* How to Succeed in Business Without Really Trying reduced "Paris Original" to incidental music. "Coffee Break" was filmed but deleted; the footage is lost, but the song remains on the soundtrack.
* How to Succeed in Business Without Really Trying so that the company higher-ups

will hopefully keep him around if any major shake-ups happens.
* How to Succeed in Business Without Really Trying takes this to its logical extreme, as each secretary enters in succession, and reacts in horror as she sees every other one wearing the same dress: "Some irresponsible dress manufacturer just didn't play fair!"
* How to Succeed in Business Without Really Trying talks about how he's spent the last 25 years in the mailroom, avoiding promotion to avoid risk.
* How to Succeed in Business Without Really Trying, the protagonist repeatedly turns to an advice book of the same name.
* How to Succeed in Business Without Really Trying, there's a scene (complete with its own song, "Rosemary") where Finch, after kissing Hedy LaRue, has an epiphany that he's in love with Rosemary.
* How to Succeed in Business Without Really Trying, though some of the advice seems like it might work.
* How to Survive a Horror Movie cites cats jumping out of every door, cupboard, box, jar, or tube of toothpaste you open as clinching proof you're in a slasher movie.
* 'How to Survive A Horror Movie' has a section on how to identify and escape a haunted house.
* How to Survive a Horror Movie, in which Wes Craven apologizes to all the film characters he's killed, injured, and/or terrorized in his films over the decades.
* How to Survive a Horror Movie is devoted to teaching the reader how to survive the more common tropes of the genre if trapped in one.
* How to Survive a Horror Movie; it claims that going into the woods is basically the equivalent of painting a target on your back.
* How to Survive a Horror Movie trope: You don't gut the interior, the interior guts you.
* How to Survive an Encounter With the Fairies, which can hurt fairies by merely looking at them, or at least prevent them from using their magic.
* How to Survive a Zombie Apocalypse world of walking dead. Hilarity ensues.
* How to Survive Camping is what he looks like to Kate, but other people for instance see him as a woman instead.
* How to Survive Camping stories revolving around a campsite that is home to many creatures of folklore, with the campsite owner having established a list of rules in order to preserve the mystical nature of the site all while ensuring the survival of the campers.
* How to Survive in Middle Earth When You're a Teenaged Girl, Priscilla is the teenaged girl of seventeen years from a cattle ranch near Magnolia, Texas. The story did not show Priscilla in school, but it was summer, when most schools have summer break.
* How to Survive in Middle Earth When You're a Teenaged Girl, so these doodles are alternate universes of an alternate universe.
* How to Survive the End of the World where a mutation of the Rabies virus was the cause.
* How to Survive Your Freshman Year, a teen self-help guide consisting of words of wisdom from current college students, one piece of advice (likely not condoned by the publisher) reads: "Bring extra lighting for your dorm room, a mattress in case a friend comes over, and a fake I.D."
* How to Talk Minnesotan: The Musical one of the songs is a commercial for the fictional Hakinblip Cough Syrup. One of the cast members (Ed the middle-aged farmer) isn't enthused about the idea, saying that the stuff "tastes like the bottom of my rowboat."
* How to Talk to Girls at Parties and inadvertently pisses her off, and the narrator never hears from him again.
* How to Talk to Girls at Parties, based on his short story of the same name.
* How to Talk to Girls at Parties was set in Croydon, but filmed in Sheffield.
* How to Train Your Dragon 2 across his left eye but the eye itself seems unharmed.
* How to Train Your Dragon 2 and heavier dialogue. Others felt that it was a worthy sequel that explored dark themes such as war and death in a mature manner for a

family film.
* How to Train Your Dragon 2, and it is very short due to Gothi interrupting it.
* How to Train Your Dragon 2 are perfectly common and accepted in the film's culture, the mask and armor conceal the figure's shape and size completely, making it a surprise when it turns out to be a woman, helped by the fact that Hiccup and the viewer have been given reason to suspect it was the man Drago he's just heard about.
* How to Train Your Dragon 2, but does not visibly burn or scar his flesh.
* How to Train Your Dragon 2, Drago is last seen plummeting off the island along with his Bewilderbeast.
* How to Train Your Dragon 2 enjoys fighting, in no small part due to his sadism.
* How to Train Your Dragon 2 Eret and Hiccup's friends to do this. Since the water is icy, this would undoubtedly kill them. Eret overpowers his guards and frees everybody.
* How to Train Your Dragon 2 has developed a steering fin that pops up from the back of his wingsuit with a springing sound. His girlfriend Astrid likes to trigger it when they are being lovey.
* How to Train Your Dragon 2 has the battle between the dragons of the island nest and Drago's forces.
* How to Train Your Dragon 2 has this exchange during the first major battle between the dragon riders and Drago:
* How to Train Your Dragon 2, Hiccup and Astrid share a kiss after Hiccup and Toothless have defeated Drago Bludvist.
* How to Train Your Dragon 2, Hiccup finally finds his place, and is now ready and willing to become the Chief of Berk.
* How to Train Your Dragon 2, Hiccup gleefully surrenders himself, Astrid, Toothless and Stormfly to Eret and his dragon-hunters, hoping that this will lead to a meeting with Drago. Stoick and the other dragon-riders "rescue" them before Hiccup's plan can get off the ground.
* How to Train Your Dragon 2: Hiccup has taken to calling Astrid "Milady". Astrid in turn sometimes calls Hiccup "Babe".
* How to Train Your Dragon 2, Hiccup is now a full head taller than Astrid.
* How to Train Your Dragon 2, Hiccup wants to explain to his father that he just found his mother but Stoick is too busy getting into the cave to listen to him.
* How to Train Your Dragon 2 is considered by many animation fans and fans of the first film to be slightly better than the first, as it not only improves upon the flaws of the original (e.g. the derivative yet well-executed plot), but also expands the franchise's own world, and the characters that live in it (Hiccup in particular).
* How to Train Your Dragon 2 is killed by an exploding fireblast entirely on-screen, and the only visible effect is soot on his armor.
* How to Train Your Dragon 2, isn't gay but said it in a way that implies the former, but the way it's presented makes it open to interpretation.
* How to Train Your Dragon 2 makes a conscious effort to remedy this, giving Astrid an independent solo role while still maintaining her relationship with Hiccup.
* How to Train Your Dragon 2 moment by Gobber's voice actor but was eventually backed up by the film's openly gay director Dean DeBlois
* How to Train Your Dragon 2 of his army still fight Hiccup, it is likely that he drowned when his Bewilderbeast submerged in the water. This is even more likely because he had only one arm, thus making it much harder for him to swim.
* How to Train Your Dragon 2 players score even 3 points before the final lap, that's it - the rest of the race is pointless and the black sheep will decide everything.
* How to Train Your Dragon 2 Ruffnut is quite... appreciative of Eret's biceps.
* How to Train Your Dragon 2's Fergus and Elinor from this article's picture. Though it is debatable whether Stoick is ugly or just big and burly while still good looking.
* How to Train Your Dragon 2 (then after tasting the fish she prepared, Gobber feeds his share to his dragon instead of finishing it himself).

* How to Train Your Dragon 2, the two-headed dragons called Zipplebacks reveal a new ability usable in battle: they curl into a ball and roll across the battlefield, breathing out flammable gas and igniting themselves into tumbling balls of fire.
* How to Train Your Dragon 2. Toothless is a pitch-black dragon with a red replacement tail fin, yet he's completely loyal to the friendly and amicable Hiccup, whose new outfit is also the same colors as his dragon companion.
* How to Train Your Dragon 2: When Toothless is using an icicle to draw in the snow, the icicle gets stuck to his tongue.
* How to Train Your Dragon 2, when we first see Hiccup trying his glider suit, he shouts, "This is amazing!"
* How to Train Your Dragon 2 with Ruffnut constantly focusing on Eret's (lovingly detailed) biceps during action scenes.
* How to Train Your Dragon", after Hiccup and Toothless arrive in Middle-Earth, when they wake up it takes them a few moments — and at least two sentences each — to realise that Toothless has started talking.
* How to Train Your Dragon, after Hiccup recovers from the final battle with the Green Death, Astrid punches him, saying, "That's for scaring me!" She then kisses him, clearly grateful that he was alive and well.
* How to Train Your Dragon after nearly crashing them into a cliff during flying practice.
* How to Train Your Dragon and its sequel, the dragons are frequently used as mounts for human riders.
* How to Train Your Dragon and the TV spinoff, the Whispering Death is a breed of dragon with this kind of mouth.
* How to Train Your Dragon, and trying to end the hatred his people have for dragons by finding the root cause of their raids on the island. After a large setback, he exclaims to Astrid, who is the strongest and smartest of his classmates, and who didn't even give him the time of day before:
* How to Train Your Dragon, as a traditional Viking wedding ceremony would require the rest of the tribe to watch the bride and groom to confirm that the relationship had been consummated; since Hiccup has been blinded by a tragic accident early in dragon training, he asks that this part of the tradition be ignored as he would feel uncomfortable if everyone else in the tribe got to see Astrid naked when he can never do the same.
* How to Train Your Dragon, Astrid briefly takes on this role after she discovers Toothless and she and Hiccup discover that the Red Death is forcing the dragons to attack Berk.
* How to Train Your Dragon, Astrid's first ride on Toothless turns into this for her and Hiccup after Toothless decides to play nice. Appropriately, the music during this scene is titled 'Romantic Flight' on the soundtrack.
* How to Train Your Dragon, Astrid still falls for Hiccup even after she accidentally blinds him during dragon training.
* How to Train Your Dragon. Believing that humans and dragons can co-exist will definitely make him this.
* How to Train Your Dragon. Be prepared to jump out of your seat a lot. In an interesting twist, a scare chord is used to start off one of the score's most popular and heartwarming tracks.
* Howto Train Your Dragon book series, claimed she came across and translated the memoirs of Hiccup.
* How to Train Your Dragon but combined with a retelling of the first movie in the successful animated film franchise.
* How to Train Your Dragon, but test audiences went up to them on their own account saying that they loved this powerful and daring twist for a family film and asked them to keep it.
* How to Train Your Dragon, but then stumbles and causes a chain reaction that allows all the captured Dragons to escape and injures several Vikings.
* How to Train Your Dragon but when Hiccup tames the Night Fury as well as hundreds of other dragons as well, getting himself a Flaming Sword and saves his tribe from

multiple threats, you bet your ass he becomes this. Hiccup, as the heir does become the Chief due to his father's passing.
* How to Train Your Dragon compared to the sequels' lesser (albeit still high) 92% and 91% respective ratings.
* How to Train Your Dragon, Dagur has almost succeeded in leaving Hiccup psychologically broken by convincing him that all of his 'allies' think he's a traitor, and then sends Hiccup into a fight to the death against his champion... only to give Hiccup the perfect ally when the 'champion' is revealed to be the imprisoned Stoick, who was captured years ago and convinced that his family were dead.
* How to Train Your Dragon, depicting a world where Astrid is the sister of Viggo and Ryker Grimborn, this idea is hinted at for Hiccup; while Snotlout and Tuffnut have visited a brothel in a nearby market island (Fishlegs being in a committed relationship to Heather), Hiccup never felt comfortable doing that himself as he felt as though he would be cheating on a woman he hadn't met yet, an image that resolves itself when he first meets Astrid.
* How to Train Your Dragon: Early on in the film Stoick proposes to do one more search for the nest before winter. Everyone tries to come with execuses why that can go on such an expedition. If you listen carefully one of them says they need to do their axe returns.
* How to Train Your Dragon: Faced with a hopeless battle against the Green Death, Stoick orders his people to the far side of the island while he faces the giant dragon alone:
* How to Train Your Dragon film series (and subsequent television shows and specials), Nuffink and Zephyr, the children of Hiccup and Astrid, look exactly like their parents, but with the other parent's hair color. So Nuffink looks exactly like Hiccup but with Blonde hair while Zephyr looks just like Astrid but with brown hair.
* How to Train Your Dragon franchise, artificial limbs are a recurring element among the vikings of the Barbaric Archipelago. Due to a harsh environment, savage dragons and even savager vikings, loss of limb is rather commonplace.
* How to Train Your Dragon franchise has a steady fanbase of dragon-loving scalies due to its plot revolving around dragons. Toothless is one of the most popular dragon characters out there.
* How to Train Your Dragon, frequently lampshaded by one or both complaining that the other never listens to anything.
* How to Train Your Dragon gives us the intentionally comical example of the stoutest member of the teenage vikings, Fishlegs, riding the smallest dragon, the Gronckle.
* How to Train Your Dragon Gobber. However it becomes clear that they are both passionate, driven individuals who desperately want to groom themselves to fulfill a greater purpose and help people.
* How to Train Your Dragon, Gobber is nicer in comparison to his book counterpart, who was a great deal nastier.
* How to Train Your Dragon Gobber's pants fall down after he gives the dragon back his bone, which had been holding up his pants for years.
* How to Train Your Dragon goes off and shoots out an adorable baby dragon. All of the Viking kids present save Astrid gather around it to coo, not giving a thought to the eggs being a) explosive and b) distributed around town.
* How to Train Your Dragon, has Hiccup forges not a weapon, but an artificial wing to harness Toothless' flying ability.
* How to Train Your Dragon, has Hiccup, Snotlout, and Gustav taking interest in her. In the end, she chooses Hiccup.
* How to Train Your Dragon, has this reaction quite frequently when he finds himself in a predicament.
* How to Train Your Dragon, has won the affections of both Astrid and Ruffnut, the former who he started a relationship with.
* How to Train Your Dragon. He has a HUGE double headed axe, with one head black and one head gold, and sharpens it lovingly all the time.

* How to Train Your Dragon. He manages to figure out a way to make Toothless able to fly again.
* How to Train Your Dragon. He's also good at building things and likes learning about dragons.
* How to Train Your Dragon. He's smitten with Astrid first thing, but she is largely indifferent to him until she finds out his mindblowingly cool secret and, more importantly, how brave and principled a warrior he actually is. Unlike most examples of this trope, however, Hiccup is far from bad looking.
* How to Train Your Dragon, he tells him how proud he is to be his father.
* How to Train Your Dragon Hiccup and Astrid are roped into an arranged marriage. To their parents' credit, they thought the kids wouldn't have any problem with this considering their big public smooch at the end of the first story. As it is, they are not enthusiastic at all at being forced but admit they are each other's best choice in better circumstances and decide to cooperate.
* How to Train Your Dragon: Hiccup has a modest Hammerspace where he keeps a notebook that's too big for a pocket. Moreover, when he puts it away, he just shoves it under his vest in the general direction of his back and lets go.
* How to Train Your Dragon, Hiccup is certain that this trope is the only way to get a girlfriend, especially the smokin' Astrid. However, when Hiccup forgets about that while befriending Toothless the Dragon, he eventually is confronted by her learning his secret. To explain the situation, Hiccup and Toothless take her on an amazing flight and she later makes it clear to Hiccup that she's thoroughly won over by him, a boy capable of exhilarating wonders no mere Hercules can match.
* How to Train Your Dragon, Hiccup is completely oblivious to how jealous Astrid is of him suddenly outperforming her in training. When she confronts him after he officially becomes top of the class, he has no idea how mad she is or why she's getting so physical with him.
* How to Train Your Dragon, Hiccup steps in a bear trap in a boat full of traps, but is unhurt because it snapped shut on his metal leg.
* How to Train Your Dragon, Hiccup the Viking goes looking for the Night Fury dragon that he caught in a net. Hiccup shows mercy to the dragon by removing the ropes and freeing the dragon. The dragon pounces on Hiccup, pins him down and roars right in his face, but then returns the mercy by leaving instead of killing him.
* How to Train Your Dragon, Hiccup wants to be acknowledged and respected by his village, as well as his father and the girl he crushes on. He does achieve all of this, but not in the way he expected.
* How to Train Your Dragon: Hiccup would be this to his father Stoick the Vast. Scrawny little nerd-boy in a society of huge, fierce, dragon-fighting Vikings.
* How to Train Your Dragon initially believe that all dragons are horrible monsters who will always go for the kill. This is later proven false when Hiccup befriends Toothless and a few other dragons.
* How to Train Your Dragon involved an even bigger aquatic creature with mind-control powers.
* How to Train Your Dragon involved in an attack on Hiccup when she resented his performance in dragon training, she was only part of a group rather than the only attacker, and she's also the only person in Berk who has actually apologised to Hiccup directly rather than just acting apologetic or leaving him something while he was unconscious.
* How to Train Your Dragon is the level headed, thinking type. His cool-headed, analytical thinking leads to his victory over the Green Death and it's useful in the Dragon Training Academy.
* How to Train Your Dragon is very much this trope, dropping his cool demeanor when he fears for the safety of his tribe or his son Hiccup. Also in the sequel, when he is reunited with his long-lost wife Valka. Valka lampshades this at one point, saying, "Stop being so stoic, Stoick." when Stoick walks up to her without saying a word.
* How to Train Your Dragon Live Spectacular Arena Spectacular", featuring several original new dragon species puppets.
* How to Train Your Dragon — Fantasy adventure film series. Three films and

two television cartoons since 2010.
* How to Train Your Dragon movie, helped by the fact that there's a massive exploding fireball behind her.
* How to Train Your Dragon movies, which was adapted from the long-running, but somewhat obscure British children's book series of the same name, have pretty much defined the series in the general public. The average person might be surprised at the wide amount of differences between the books and the movies if you hand them one of the books. The most obvious difference is that part of the books' premise is that semi-domesticated dragons have been a common aspect of viking life for generations, but Hiccup is one of very, very few people who can speak their language. Removing this skill of his means the dragons in the film are non-speaking roles, and Toothless, who in the books is a small and unassuming looking, but very talkative and sarcastic character, has virtually nothing in common with his film counterpart. Asides from the basic premise of 'fantasy vikings with dragons' the books and the films might as well be two different intellectual properties with a handful of recycled character names.
* How to Train Your Dragon Night Fury out of the sky, which leads to the rest of the plot.
* How to Train Your Dragon. Not directly after the reveal, but halfway back to town Toothless grabs her and she's forced to take a flight with Hiccup and Toothless. By the end of their joyride, she's definitely showing a great deal of affection for Hiccup, including a peck on the cheek. Quite the turnaround from contempt/anger/hatred/jealousy.
* How to Train Your Dragon one other girl in the village as far as the movies indicate, this doesn't prove much.
* How To Train Your Dragon ON ICE was performed on Royal Caribbean's Allure of the Seas cruise ship ice rink.
* How to Train Your Dragon, on the other hand, takes place a year after the second.
* How to Train Your Dragon) plan on trapping the titular dragon, only for it to find them first in this manner.
* How to Train Your Dragon: Ruffnut gets used for slapstick in near-perfect synchronization with her twin brother. The only reason Astrid doesn't is because she's too skilled a badass.
* How to Train Your Dragon sees all of the other Dragon Riders wonder what their lives would have been like if Hiccup hadn’t been born (an interesting variation on this trope where normally the missing person sees the impact of his absence directly, as Hiccup is never told what they were thinking about). Without Hiccup, Fishlegs is a complete social outcast as nobody could put up with his nerdy knowledge of dragons or give Heather a chance to stay; Snotlout is under considerable stress trying to deal with his father’s ambitions for him to be Berk’s next chief; Tuffnut is treated as a prankster and nothing else as nobody will take him seriously even when he genuinely wants to help; Ruffnut is unable to express her deeper feelings and feels that she is regarded as only Tuffnut's sister; and Astrid has nothing but her training and reputation as a warrior (and even that’s tainted when she froze while facing the Flightmare and nobody helped her work out how the dragon made her do that).
* How to Train Your Dragon series, a gigantic sea-dragon, called the Green Death, washes up on the Isle of Berk and soon reveals his intention to eat the Vikings of Berk. As a piece of backstory, it is mentioned that the dragon's last meal was a whole Roman legion which he had caught camping on a clifftop, and which he has spent centuries to digest. As author Cressida Cowell has said that the "Barbaric Archipelago" which is the setting of the series is somewhat inspired by the Hebrides off the Scottish coast, the legion which got devoured by the Green Death might as well be the Ninth Spanish Legion.
* How to Train Your Dragon series is a dragon rider example. It's notable that, unlike the other riders, Hiccup is just a much of a part of the flying processes as his dragon, Toothless, due to the prosthetic tailfin he made for him, that is controlled via left pedal.
* How to Train Your Dragon short "Legend of the Boneknapper" shifts from CGI into

cartoon when Gobber has a flashback.
* How to Train Your Dragon sometimes dabbles in this, displaying different types of Dragons as different species with a couple overlapping traits, implying that they evolved from a common ancestor. This is most prominently shown in Book of Dragons which describes at least 6 major taxonomic families of Dragons that most dragons in the franchise belong to.
* How to Train Your Dragon sourced from a fictional work from the future of the alternate history, talking about some element of foreshadowing, worldbuilding, or exposition, with the framing for each being as varied as textbooks, to a Norse-flavored Wiki, to military dossiers on the dragon breeds.
* How to Train Your Dragon started out in first place, but was quickly knocked down after its disappointing premiere weekend. Word of mouth of its sheer brilliance took it back to the top in a month.
* How to Train Your Dragon stereotype and using Scottish accents rather than Scandinavian, many Scandinavians feel that it portrays parts of the Norse culture correctly, something unusual for Hollywood.
* How to Train Your Dragon-style AU where Hiccup (from a not-too-distant future) visits a Norse-style 'theme park' with androids based on Vikings, and ends up developing feelings for Astrid despite knowing that she's an android.
* How to Train Your Dragon that is fairly obscure outside of its homeland of the UK, but an explosively popular movie.
* How to Train Your Dragon. The book is two pages long, one of the pages reading simply "YELL AT IT" and the other being an "about the author".
* How to Train Your Dragon, the Book of Dragons describe every dragon depicted as dangerous and should be killed on sight. The only exception is the Night Fury which the books says you must hide from.
* How to Train Your Dragon. The books later retconned him into being a young Seadragonus Giganticus Maximus, a powerful, rare type of dragon like the Night Fury.
* How to Train Your Dragon: The Hidden World, after Hiccup and Astrid get married, they have a son and a daughter, who they take to see Toothless and the Light Fury, who have three baby dragons of their own.
* How to Train Your Dragon: The Hidden World and the movie is confirmed to be final, but seeing how characters survived other near-death situations before, there is a slight chance he could have lived.
* How to Train Your Dragon: The Hidden World: Astrid and Hiccup do this during the final battle, during which Astrid throws a canister of Zippleback gas and Hiccup lights it up with his sword.
* How to Train Your Dragon: The Hidden World: Astrid and Hiccup do this during their wedding. It is a hand-fasting, after all.
* How to Train Your Dragon: The Hidden World: Astrid does this with one of Hiccup's dragon gas grenades on board of Grimmel's ship.
* How to Train Your Dragon: The Hidden World but it's unknown if this was just a temporary reunion or not.
* How to Train Your Dragon: The Hidden World ends with Hiccup and Astrid getting married.
* How to Train Your Dragon: The Hidden World, Hiccup and Astrid tie the knot at the end of the film.
* How to Train Your Dragon: The Hidden World: Hiccup does a pantomimed version to try to help Toothless court a female. Naturally, she's not impressed, and makes this clear by smacking him on the nose.
* How to Train Your Dragon: The Hidden World. In particular, Astrid is invaluable to him during the raids at the beginning of the movie and the attack on the Warlords' armada at the end.
* How to Train Your Dragon: The Hidden World on the part of the heroes.
* How to Train Your Dragon: The Hidden World Previously, only Hiccup had armor.
* How to Train Your Dragon: The Hidden World: Snotlout feels he needs to compete with Eret over his infatuation with Valka because Valka respects him more. This is especially perplexing for Eret, who has no idea what Snotlout is talking about.

Since it is made clear that Valka is aware of Snotlout's infatuation and is disturbed by it, it is equally likely that she listens to Eret more as a deterrent.
* How to Train Your Dragon: The Hidden World The concept of the Light Fury, a white female version of the Night Fury to be Toothless's mate, is taken directly from the fandom, although they did make her an entirely separate species instead of being a female Night Fury like the most common fandom variation.
* How to Train Your Dragon: The Hidden World: The Light Fury gleefully knocks Hiccup off of Toothless, who then swoops down to save him. When next we see Hiccup:
* How to Train Your Dragon: The Hidden World: The Light Fury is noticeably more typically feminine than all the other female dragons shown so far. Part of it is due to being a species closely related to Night Furies.
* How to Train Your Dragon: The Hidden World which Grimmel was hanging onto, and sending him plummeting into the ocean.
* How to Train Your Dragon, the titular beast is a rare breed of dragon that scavenges for dragon bones to wear as armor to protect its soft hide. The Boneknapper of the short has been chasing Gobbler for years for a specific dragon bone he keeps.
* How to Train Your Dragon to be this when it comes to dragons, but is disappointingly lacking in information. Amusingly, for the dragons it does have information about it lists their capabilities as RPG style statistics.
* How to Train Your Dragon (tone, setup, etc.) — she acknowledged that it worked better for the new medium and that the story stood strong on its own despite not adapting the books' narrative more strictly.
* How to Train Your Dragon Toothless's design is less cartoony than the other dragons. He was always meant to stand out characterwise, by being of the rarest and most intelligent dragon species.
* How to Train Your Dragon, Toothless the dragon pulls this when Hiccup examines his prone body.
* How to Train Your Dragon to show the final fireball in front of a really big volcano.
* How to Train Your Dragon: Tuffnut reacts this way every time he's touched by a dragon before the climax.
* How to Train Your Dragon, utilizing dragon-training as a means of defending the village, essentially becoming the most badass leader the clan has ever had while still remaining true to himself... his father is just as bewildered as he is proud.
* How to Train Your Dragon warrior on top of being a brilliant inventor and dragon expert favored by Thor himself.
* How to Train Your Dragon. When he assumes he's going on a expedition to find the dragons' nest, Gobber remarks that he'll pack extra undies. Later, while preparing to fight at the dragons' nest, he remarks that it's a "good thing I brought my undies."
* How to Train Your Dragon, when his father discovers that Hiccup's success against dragons comes from understanding them rather than ruthlessly destroying them. Once Hiccup's compassion for the Night Fury Toothless comes to light, Stoick drops the hammer: "You're not my son."
* How to Train Your Dragon, which does spend most of its arc developing their relationship and ends on their marriage.
* How to Train Your Dragon wield axes, but Astrid is notable for carrying a large double-bitted axe that she's not afraid to use.
* How to Train Your Dragon with his encouragement, but he genuinely means well.
* How to Train Your Dragon work together as a team with a lot of effort... but they still spend more time beating the hell out of each other than they do fighting anything else.
* How to Treat a Lady Knight Right: In chapter 103, the king has just told Leo that a warrior and mage from another kingdom want to have a match with her and Houli, who is currently under a Fountain of Youth spell that has yet to wear off. Throughout the encounter the two groups provoke one another and Houli's spell wears off just in time for both Leo and the rival swordswoman, Diana, to see him buck naked. Once everything's over, the king asks if they've all forgotten this has all

been happening in front of the king.
* How to Treat a Lady Knight Right swordswoman who also possesses an insane amount of magical power. In contrast to her sword skills, however, her magic is so unstable that when she tries to use it she simply casts explosive magic on herself. Houli tries to help her control it by holding her hand and manually adjusting her magic with his, and is largely successful, but the act of holding hands eventually makes Leo so embarrassed she blasts Houli with power rivaling that of the greatest sorcerer.
* How to Write a Historical Young Adult Novel with an Indian Theme (For Fun and Profit)
* How to Write a Love Song ("yeah, a shitty, shitty, shitty, shitty love song!")
* How to Write an Example Ever want to know how we make the examples so fun to read? Just follow these simple steps.
* How To Write An SCP guide, they make it a point that if you're going to cross-reference other SCPs, you shouldn't just reference Series I SCPs (SCPs 1 through 999).
* How to Write Badly Well by asking if the Ewoks who lived on the other side of Endor from the Death Star wear business suits and read news articles about native exploitation.
* How Troll sex works ("Do they vomit their genetic material?" "Sure, that sounds weird enough").
* How Trunks' sword can cut through the augmented Frieza without shattering is never explained, but it is clearly more durable than almost any other weapon shown. King Cold assumes that Trunks was able to slice through his son thanks
* how two thousand years after they were built to deal with horse carriages. The Pantheon in Rome similarly survived to this day and still holds the record for the biggest unreinforced concrete dome in the world.
* How Unscientific!: A moment that breaks Genre Consistency, but may or may not break consistency of tone.
* How Unscientific!: Something scientifically impossible or highly unlikely happens in an otherwise-realistic work.
* How very charitable to a social gathering of prepared foods and open-handed cordiality regardless of the immense difference in our societal statuses.
* how Washington DC as an EMP to cripple Russian air superiority, as they were bringing all their materiel and troops in by plane.
* How We Got Here, the author himself being a self-stated fan of the trope.
* How We Got Here, then the events leading up to the episode's beginning are explained via flashback.
* How We Got Here: The standard Lifetime formula seems to require opening up with a shocking scene from the climax as a grabber, then flashing back to how the chain of events leading up to it began.
* How We Got Here: The story begins partway through the plot and then starts to explain how things got to that point.
* how (which has mostly overcome this problem) plays the trope straight: the clan itself is led by the female Nakmor Morda, while Nakmor Kesh is Superintendent of the Nexus.
* howWhile he maintains that he won't tell the sailor the exact details necessary to know how to pull off the trick (for the sailor's own good, and the good of humanity), the book makes it very clear that he used some potion inspired by the alchemical notion of the elixir of life as studied by Agrippa and others. In the novel, he does mention that when he saw a lightning strike at fifteen, he longed to harness that power, and he even brings up the work of Galvani, who made dead flesh move by running current through it. This does seem to suggest that electricity may well have somehow been involved in the process of creation. In addition, Shelley did write that her idea for the story came in part from discussions that touched on Galvani's experiments.
* How will I fund my research, and how can I make money off of it? (What?
* how you gain access to his normally locked room. He shows up right before the final bosses on a Neutral/Pacifist run to judge the player if they've killed

anyone. If you don't kill anyone, he'll let you go. However, if you reload and go through the same scene again, he'll catch onto this fact and give you a series of ridiculous Trust Passwords
* how you shouldn't make assumptions about someone's tastes in music. Just... watch the video.
* how; you start blurring back and forth between states (though from your own perspective, it apparently just feels like headaches, nosebleeds, and inconsistent memories).
* How Zero views purebloods and to a lesser degree vampires in general in
* Ho Yay, and he affectionately calls Tavros the 'emotional peanut butter to [Gamzee's] royal jelly'.
* Ho Yay and it's implied to be the reason no girls find him attractive.
* Ho Yay and Kaidan becomes an acceptable romantic partner for both male and female Shepards.
* Ho Yay and moments they have. Although their childhood had Haruka being a little bit taller than Makoto, due to being five months older.
* Ho Yay, Austria straightens Italy's tie, and Italy whispers, "Austria..." while blushing with roses in the background.
* Ho Yay because they've lived together since Darwin was two and Gumball was four.
* Ho Yay, claiming that Kazuki never paid any attention to him when Juubei was around.
* Ho Yay Coach Z — with curlers in his hair and a rolling pin in his hand — gets angry.
* Ho Yay except for that one scene in the anime where a possessed Tsuzuki attacks Hisoka with a knife.
* Ho Yay: Fans interpret two characters of the same gender to be a couple based on their interactions.
* Ho Yay for nothing, those of the fandom that supports the pair goes against the "taller is dominant" part of the trope and Levi seems to top more often.
* Ho Yay) hunts him down and demands he strip and hand over the undies, leading to a "why Klaus, I didn't know you cared" scene before Klaus puts him straight.
* Ho Yay-laden song that involves Sean singing about how he might like Jet's planet, Bortron 7.
* Ho Yay moments, Yahtzee will comment that he won't stoop to making gay jokes.
* Ho Yay moment when, among the other produce, an unseen heckler throws a suggestively shaped vegetable at the Emperor.
* Ho Yay series, Marcus Fenix and Dom Santiago, and have included achievement names with mocking titles such as "Dom-curious."
* Ho Yay shippers also apply this trope to Gerome/Laurent and Severa/Noire, with Gerome or Severa as the brooders and Laurent or Noire as the gentle ones.
* Ho Yay, since the original joke was about a husband and a wife, ending with "You are the man of the family, after all".
* Ho Yay too. Again, this is Evangelion… and it doesn't end well either.
* Ho Yay towards Gilbert can be this considering they're brothers and he's a messed-up yandere for Gil to the point of wanting to end his existence because he thinks Gil will be happier.
* Ho Yay towards Yugi. He gives us this gem, complete with an uncharacteristically soft voice: "The greatest duelist that ever lived. I love him." And then there's Kaiba's apparent obsession with Yugi. Then during episode 15 between Bakura (not Florence) and Yugi.
* Ho Yay tropes as they possibly can without kissing on-panel, Professor X and Magneto spend seemingly more time doing this than they do actually battling.
* Ho Yay: Two characters of the same gender interact in ways that fans can interpret as indicating that the characters are a couple.
* Ho Yay versions: Spain and Romano, Germany and Italy, England and America, China and Korea, Lithuania and Poland...
* Ho Yay vibes with Leo which peaks when the latter uses violence on the former.
* Ho Yay: While virtually everything about wrestling is this, special mention should go to old video packages meant to showcase tag teams to female audiences.

* Ho Yay with her, just watching and waiting as she sleeps off her exhaustion.
* Ho Yay with Ken, especially as Daisuke becomes the main emotional support system of Ken.
* Ho Yay without inflicting any harm to himself before returning to have his usual subtext with Ciel.
* Ho Yinsen mentions to Tony Stark that they met once before at a conference in Bern, Switzerland.
* Hoyle Casino Games 2009. There are aliens and disco, but no safari in sight.
* Hoyle's Rules of Dragon Poker allows you to bet anything, including people, but the winner has to return them before the police get involved.
* Hoyle's Rules of Dragon Poker has 241 possible rule changes, some of which are vague specifically to cause arguments, and all of which stack. Good luck trying to play without a notepad by your side.
* Hoyle's Rules of Dragon Poker has a particular fondness for this trope, with around 10 of the games 240 or so rules changes involving changing the order of something, be it the cards, the suits, the betting or the dealing.
* Hoyle's Rules of Dragon Poker: One of the game's conditional modifiers accounts for this.
* Hoyle's Rules of Dragon Poker only in the context of explaining what nonsense it is. Then it goes on to reveal it was all true all along and chastises the reader for not believing it.
* Hoyle's Rules of Dragon Poker rule changes makes players wearing the same clothes duel against each other.
* Hoyle's Rules of Dragon Poker, when there's fog outside, all cards are hole cards and the first two rounds of betting are done blind.
* Hoy, motherfraggers, there's good reason that Fourth Edition brought the word "fuck" back to Shadowrun.
* Hoyt Axton had two Top 10 country hits with "When the Morning Comes" and "Boney Fingers", duets with Linda Ronstadt and (an uncredited) Renee Armand, respectively, both from 1974. The closest he came otherwise was a 1979 solo single called "Della and the Dealer," which hit No. 16. Axton was more popular as a songwriter.
* Hoytsman mentions he got the truck from a former client whom he defended for, in his words, "a strangle-and-mangle".
* Hoze Houndz: In "Mythconceptions" the Underwear-Wolf is told by other monsters to put on some pants.
* Hoze Houndz, Squirt steals all of Steamer's underwear while Steamer is showering. Steamer, dressed in a towel and sandals, goes down to the beach to confront him about it. While Steamer is shaking Squirt by the neck, his towel falls off leaving him naked in front of a couple of girls, who promptly start laughing at him. Squirt points out Steamer's nudity and he quickly uses Squirt to cover himself. Then, rather than picking up his towel or any of the dozens of pairs of underwear around, Steamer runs off screaming. The very next scene, we hear a door open and shut at the firehouse and Steamer run through wearing nothing more than his sandals implying he streaked through the whole city to get there. We've seen just how big the city is in another episode. Steamer had a looooooooong way to run.
* Hozen) despite the continent having been closed off from the rest of Azeroth for 10,000 years, presumably longer than those languages have existed.
* Hozuki-san Chi no Aneki: Gorou, most of the time when he sees something that deals with Horror.
* Hozuki-san Chi no Aneki has nothing better to do than mess with her step-brother.
* Hozuki-san Chi no Aneki There's one developing around Gorou with Misaki, Mizuno, and Kyou - it's unwanted because he's too smitten with his stepsister Haru to consider any of them as a love interest.
* Hozuki's Coolheadedness has become like this. His companions only go along with him because they like him but complain amongst themselves. Hozuki fixes Momotaro up with a job caring for celestial peaches, and his animal companions find work punishing the spirits of those who were cruel to animals.
* Hozuki's Coolheadedness, he starts randomly shouting the names of the animals he sees.

* Hozuki's Coolheadedness: Nasubi, a ditzy and childish minion of Hell, is a highly skilled artist and, when describing a random sketch he made to Hozuki, can readily name the styles involved. Hozuki likes his work enough to commission him to decorate a wall whose mural was crumbling from age.
* Hozuki's Coolheadedness right into his arms from a stair, instead of catching her, he use one hand to deflect her fall so that she safely land sitting on the ground.
* Hozuki's Coolheadedness: Shikimi, a chief of staff of one of Hell's kings like Hozuki, has such a sweet and loving personality that her subordinates remark that she makes them want to call her "Mom". Visitors to the office express the same connection. Her "Mom-ness" goes so far that when someone is confirmed to be lying in her judge's court, the immediate punishment is 100 spankings on the butt administered by Shikimi.
* Hozuki's Coolheadedness since he never showed any sign of attraction toward anyone, and no mention of any past relationship is made even though it's hinted on the occasion that he is rather popular.
* Hozuki's Coolheadedness who actually enjoy it and want to be punished. They even thank her when she does so. All in all, things work well because the spanking motivates them to work harder, so Hozuki leaves the situation as it is.
* HP did this to promote their line of OMEN gamer-centric laptops and desktops.
* H. P. "Grandpa Cthulhu" Lovecraft is a real existing book and that Cthulhu was worshiped by ancient Sumerians.
* HP Hax Feather Anyone who says they don't use it, either hasn't finished the BRV grinding yet or is LYING. (Or is playing the original Japanese release where it only gave a large HP boost at expense of attack.)
* H. Phillips "Phil" Lovecraft, although he hates magic and refuses to use it at all costs.
* H. P. Lovecraft abandoned old bodies that they'd suddenly find themselves stuck in with no explanation instead...
* H. P. Lovecraft about what they're dealing with. Damned if you do...
* H. P. Lovecraft, a conquistador discovers a subterranean humanoid race which communicates almost entirely by telepathy.
* H. P. Lovecraft, a famous fraud with a mix of human and ape bones, in his works.
* H. P. Lovecraft: A horse with a hundred horse legs, 50 human heads, 200 human legs, and the whole thing is purple. H. P. Lovecraft one ups that by 100 levels.
* H. P. Lovecraft" also briefly mentions "the cruel empire of Tsan-Chan, which is to come in 5,000 A.D."
* H. P. Lovecraft also encourages game masters to invoke this trope by setting the game in their local area or an off-the-beaten-path locale.
* H. P. Lovecraft among them), the horror/weird fiction field has been a steady drop downhill since the Gentleman of Providence. His vitriolic responses to Lovecraft critics such as Daniel Jose Older and Charles Baxter are proudly displayed on his blog.
* H. P. Lovecraft and at least claim they can easily put them back in bodies, not necessarily their original ones.
* H. P. Lovecraft, and Cthulhu just starts to recombine pretty much straight away, the time delay is still useful.
* H. P. Lovecraft and kept it going. This is one example where death directly made his reputation: his works went into the public domain instead of staying with an estate, which made it easy for other authors to play in his creative sandbox.
* H. P. Lovecraft and other godlike beings, which are truly immortal. In fact, some of them are actually older than the entire universe!
* H. P. Lovecraft, and the heart isn't as innocent as she likes to pretend either...
* H. P. Lovecraft". An explorer on Venus must wear an oxygen mask to breathe. While traveling, he must eat by slipping food tablets into his mask.
* H. P. Lovecraft"). Any fan of Lovecraft is very familiar with the phrase "non-Euclidean".
* H. P. Lovecraft are almost invariably driven violently insane by the Rite of

Transfiguration.
* H. P. Lovecraft are described using lightning guns. How exactly they work is not described, but apparently they look kind of like old-fashioned cameras.
* H. P. Lovecraft are said to live forever "except they was kilt violent".
* H. P. Lovecraft, as Lovecraft knew perfectly well that "aether" was a debunked concept, despite referring to it in-story to justify this trope; he just liked the idea of space being full of aether more than that of it being vacuum.
* H. P. Lovecraft, a story about an explorer discovering and living with an ancient race of subterranean immortals who worship Cthulhu.
* H. P. Lovecraft" at least justified the account of the encounter with Great Cthulhu in that some of the sailors who delayed him managed to live long enough to write it down.
* H. P. Lovecraft; a university scholar in his 70's who takes it upon himself (and a couple of other professors) to get bitch-slap the earthborn spawn of Yog-Sothoth.
* H. P. Lovecraft bearing traits of aquatic creatures, and many of his threats coming from the ocean's depths.
* H. P. Lovecraft begins with the classic line: "There be those who say that things and places have souls, and there be those who say they have not; I dare not say, myself, but I will tell of the Street."
* H. P. Lovecraft be the result of trauma, or possible a physical effect of the Great Old One's mental influence.)
* H. P. Lovecraft builds on this. (Lovecraft himself did not use the term "Cthulhu mythos".)
* H. P. Lovecraft category better than this one, since he creates his own values after realizing the insignificance of the current ones. Of course he had his best experiences in dreams, and in the end flees the material world completely, making him also a rather extreme lotus eater.
* H. P. Lovecraft civilization that flourished on Earth millennia in the past, and spends several years living in the researcher's body while the researcher uses his to learn about the twentieth century.
* H. P. Lovecraft/ C.M. Eddy collaborative story "Ashes" has a professor with a bottle of clear colorless liquid that he uses to dissolve a few animals into a white ash. He claims that it reduces anything it touches (aside from glass) into a fine ash. Later in the story has the professor attempt one last test on a human, only to be dissolved in the same fashion.
* H. P. Lovecraft description of a black boxer, comparing him to a gorilla and describing him as being full of "Congo-like secrets."
* H. P. Lovecraft didn't come about until later writers and game designers added to the expanding Mythos and desired more concrete definitions; Lovecraft himself was more interested in creating a mysterious and eerie mood than establishing a coherent cosmology and didn't specify whether Cthulhu was greater than Shub-Niggurath or Mi-Go were greater than the Elder Things or which race served what God, and the fairly rigidly defined Mythos as it exists today (or at least the fairly rigidly defined Mythos that humanity has constructed around these beings) didn't originally exist as neatly in Lovecraft's own stories. Although Lovecraft DID point out that Cthulhu wasn't in the same league as Azathoth, Nyarlathotep, and Yog-Sothoth, merely being "cousins" of those beings, not on the same level of power, and in at least one of his stories he even went so far as to hint that perhaps the Great Cthulhu itself actually SERVED these other, greater beings, which he variously named Outer Gods, Elder Gods, or Other Gods, as the fancy struck him.
* H. P. Lovecraft encountered over the course of the stories cannot be fought or killed in any way, and the main characters usually have no choice but to run for their lives. The nearest thing to a fight in humanity's favor was when Cthulhu himself got his head split open by the prow of a ship — and even that ended with Cthulhu easily regenerating.
* H. P. Lovecraft enemy and the only being who really poses any kind of threat to him in the Dreamlands.
* H. P. Lovecraft, etc. Horror in Lovecraft's work was very often related to families and bloodlines.

* H. P. Lovecraft, except many of his Dreamlands-stories, some which contain little to no horror elements.
* H. P. Lovecraft" feature aliens who could travel between planets by flying through æther. Later Cthulhu Mythos stories by other hands typically retcon the Elder Things' space flight as their wings being biological solar sails.
* H. P. Lovecraft features a group of immortal necromancers, most notably the titular protagonist's ancestor, Joseph Curwen. They can resurrect the dead temporarily by converting their bones or ashes into mystical "saltes" through alchemy, and speaking an incantation, and torture them for esoteric knowledge lost from the world of the living. It's implied that their ultimate goal is to resurrect undead legions to take over the world under their command.
* H. P. Lovecraft, fictional", such as the following example from "The Nameless City":
* H. P. Lovecraft grows to young adulthood within five years of his birth.
* H. P. Lovecraft" has adult artists making works inspired by the dreams sent by Cthulhu.
* H. P. Lovecraft" has been dead, keeping himself alive via an air conditioner and lots of chemicals.
* H. P. Lovecraft has characters who speak with a distinctly 17th century cant and write their Latin in the mode of the 9th century A.D.
* H. P. Lovecraft, he had to wait three days for the land to dry sufficiently enough for him to walk on.
* H. P. Lovecraft he lived by ever again, after the events of the story, despite of the fact that he had a normal landlord, and the street had many other inhabitants, as well.
* H. P. Lovecraft. He was a staunch atheist, and this was part of the message of his works.
* HP Lovecraft Historical Society features the song "It's Beginning to Look a Lot Like Fishmen" which ends this way, quite literally.
* H. P. Lovecraft human and Deep One hybrids are born looking human, but gradually become fishier as they get older until they become full-blown Deep Ones.
* H. P. Lovecraft human cities, have fairly frequent contact with humanity, often via such cultists and maniacs, as well as happily eating any human corpses they can get hold of, while the aquatic Deep Ones and their half-human hybrids have a fair amount of influence in the human world.
* H. P. Lovecraft imposes an orderly conceptual symmetry on it, and deals in humanly recognizable categories of morality — both of which are foreign to Lovecraft's conception, and tend to "domesticate" HPL's cosmic horrors into far duller and more traditional boogeymen.
* H. P. Lovecraft in a craft capable of surviving the rushing waters, and going on straight. The protagonist is kidnapped by a sinister crew of semi-human slave traders and taken captive to the Moon in this manner.
* H. P. Lovecraft includes Nyarlathotep, an enigmatic and dangerous being found in his other work, one of the major links between this Dream Cycle and the Cthulhu Mythos.
* H. P. Lovecraft. In fact, Lovecraftian characters' tendency to consider the aliens gods extends to the fans as well. Ask a general Lovecraft fan, and he will very likely tell you, "Cthulhu is a god."
* H. P. Lovecraft in order to intimidate the Venusian natives. They're not exactly intimidated.
* H. P. Lovecraft in real-life, wrote a joking example of an anti-drinking screed in his comedic short story "Old Bugs".
* H. P. Lovecraft in regards to everything the man stood for as a person. Heck, it could be both.
* H. P. Lovecraft insists that their wings are biological solar sails.
* H. P. Lovecraft in "The Outsider" are probably the author in various guises.
* H. P. Lovecraft, in which the insane ramblings of the town drunk all seem to be horrifically true.
* H. P. Lovecraft", in which the main character is assumed to be mentally ill

during the period when a Yithian occupied his body.
* H. P. Lovecraft" is about a man traveling to his family's ancestral home, which has a long history of spooky events dating back to ancient times.
* H. P. Lovecraft is grotesque. Everything you wouldn't normally see in New England, at least.
* H. P. Lovecraft is so effective. He also was deeply afraid of the mental issues that plagued his family, leading to the themes of the horror of mental instability and one's family history coming back to haunt you, which ties into his racism to create a general fear of heredity itself.
* H. P. Lovecraft is the sound Things make when they Go Bump In The Night.
* H. P. Lovecraft. It's worth noting that Lovecraft himself actively encouraged other authors to play around in his universe.
* H. P. Lovecraft" kicks off when artists all over the world suddenly create depictions of Cthulhu in their respective media, either just after waking from very vivid dreams or while still asleep.
* H. P. Lovecraft, live in a world overflowing with monstrous, supernatural beings with horrific powers. Rather than worshiping them as gods like most mortals aware of their existence, they plan to use their science to either control or destroy these entities. In contrast to the hopelessness that surrounds any human confrontation with the Mythos' various horrifying creatures, you get the feeling that the Mi-Go might just have some chance of pulling it off, probably because, unlike humans, their science is not inhibited by old-fashioned limitations like ethics. When you think about it, they may just be the scariest damn things in the entire Mythos.
* H. P. Lovecraft. (Lovecraft, who didn't drink, wrote it, however, to jokingly warn a friend, a.k.a. the "Old Bugs" of the title, as to what would happen to him if he kept on drinking.)
* H. P. Lovecraft loved these. Many of his stories consist almost entirely of Apocalyptic Logs, usually ending with the narrator in an asylum or clearly about to be eaten by something.
* H. P. Lovecraft makes jokes about the neighboring town of Innsmouth, where the police keep getting (supposedly) crank calls about fish people.
* H. P. Lovecraft — Many things are "squamous," which means scaly or looking like a close-up of a layer of skin cells.
* H. P. Lovecraft mythos, "Prank Call of Cthulhu", must go over the heads of most young viewers as well.
* H. P. Lovecraft not to protect what they have found, but rather to preserve the sanity of civilization as a whole. "The Call of Cthulhu" says it best:
* H. P. Lovecraft off his fanfiction. Note, though, that this was around eighty years ago and his fanbase was relatively small, so most of his fanfiction came from respectable authors.
* H. P. Lovecraft of years old (Deep Ones began worshipping Cthulhu 350 MYA during the Carboniferous, the first Serpent People civilization arose 275 MYA during the Permian, Chaugnar Faugn created the Miri Nigri 370 MYA...)
* H. P. Lovecraft", one of his ventures into straight science fiction, is set on a Venus that has a tropical climate and is filled with lush, swampy jungles with hostile native aliens. The atmosphere is not human-breathable however and the protagonist mentions having to wear a breathing mask and periodically changing filter cartridges.
* H. P. Lovecraft, or keep from thinking about the horrors they've seen in this world.
* H. P. Lovecraft ran an article about it, "Writer Charts Fatal Malady" a couple of days later.
* H. P. Lovecraft, Randolph Carter, having just endured innumerable horrors after his ascent of Mt. Ngranek, gets a break as he heads for Thran to catch a ship to Celephais:
* H. P. Lovecraft rarely went outside during the day, was shamed by his mother into hiding his appearance in his childhood, and admitted to being nervous around people.

* H. P. Lovecraft's aliens tend to have modes of communication radically different from that of humans.
* H. P. Lovecraft's deities would destroy humanity without really paying attention, Nyarlathotep seem to be bent on killing all humans (or rather, getting us kill ourselves). Why? I don't know, guess he's just being a dick.
* H. P. Lovecraft seems to work this way. When a member of the Great Race of Yith takes over a human body in the present, the human host's mind in turn goes back in time to the body of the creature that possessed him. The creature then spends several years in the person's body studying the history and culture of the era, and "meanwhile" the person spends equal amount of time in the creature's body, forced to write down all he knows about his own civilization. It's left unclear if this is a law of time travel or just a matter of convenience.
* H. P. Lovecraft served in the Legion from the beginning of WW I. He was nearly killed near Belloy-en-Santerre in 1916.
* H. P. Lovecraft's fiction abounds with strange gods and creatures, an entirely fictive cosmos whose deities are merely advanced alien and/or interdimensional beings who cannot be understood by human minds.
* H. P. Lovecraft should go down with the submarine. He is, however, the only one who lives long enough to see the submarine hit the bottom, and the story ends with him donning a suit and wandering toward a sunken temple where he will presumably die of suffocation.
* H. P. Lovecraft's monstrosities are designed for this. Some of his stories fall flat a little bit today, because
* H. P. Lovecraft's Nyarlathotep is an interesting case. He has over 1000 different forms, although it's never really made clear whether he can switch between forms or is he stuck to the one he manifests in. It might also be possible for him to manifest in more than one form at once (being the herald and soul of the Outer Gods means he can ignore pesky things like the laws of our space-time continuum). While it's not quite clear whether or not he can switch between forms, some of his forms are able to shapeshift.
* H. P. Lovecraft speak English, but that's because they've been on Earth in secret long enough to learn our languages. And it's mentioned that they need surgical help in order to even produce the sounds necessary for human speech. They communicate with each other by telepathy, as well as bioluminescent colour shifts. They speak by buzzing, which sounds creepy and abnormal even though they can technically get the English sounds just right.
* H. P. Lovecraft's stories. The roleplayer jokes are that the only worthy treasure in a Lovecraft game are untranslatable crusty old books that permanently removes your character from play if you accidentally look at the pictures; reading any of it aloud may doom the reader, the group, humanity, the universe, all universes, or all that and beyond; that there are entire hierarchies of threats beyond that who will wipe out the merely-universe-killing threats without even noticing them, only to do the ultimate everybody dies (as soon as the stars are right). While the players have 1920's guns and would probably all die if they were against a single baby shoggoth, with the survivors going permanently insane.
* H. P. Lovecraft's "The Haunter of the Dark" features a monster that can be hurt or banished by light, and which goes after the protagonist during a thunderstorm that knocks out the lights.
* H. P. Lovecraft's "The Haunter of the Dark". Gazing into it allows you to see into the audient void and learn things man was not meant to learn, but the downside is that it also summons the god Nyarlathotep (or rather one of his many avatars) to hunt you down and kill/possess you.
* H. P. Lovecraft stories don't take place in such a setting but have the idea of humans as an insignificant blip in a universe of monsters about to be snuffed out. Mike Mignola's works also have visions of a future-earth where man is no more.
* H. P. Lovecraft Stories. The only institute of higher learning in America that gives a degree in Eldritch Horrors.
* H. P. Lovecraft stories were full of gods and magic. His later stories leaned more toward extraterrestrials and suggested that all magic is really super-advanced

science.
* H. P. Lovecraft. Subsequent authors and co-writer have expanded this greatly. That's not even getting into the godlike deity-aliens. Overall there are at least 30 intelligent races described.
* H. P. Lovecraft's works. (Below are just a few examples.) On the other hand, humans have almost the same ability, as Lovecraft's narrators and characters constantly go on about how eldritch and wrong the things they encounter feel (or seem or look or smell or sound), even if they can't explain why or don't even clearly see anything.
* H. P. Lovecraft", taking place in the wet jungles of a pulp Venus. The planet-hopping protagonist grouses in his diary about his sturdy leather suit, wishing for something made of indestructible shiny metal foil instead.
* H. P. Lovecraft. The closest thing to good deities (the Elder Gods), have no more love for humans than the others; they just want to keep the Great Old Ones imprisoned (and since that is a good thing for humanity, they can be considered "good" from our perspective).
* H. P. Lovecraft, the horrible secrets going on in his world. Typically, he was fond of his characters finding some influence of human - or at least, intelligent - presence, often a ruined city, in an extreme environment or other place where it would not normally be found.
* H. P. Lovecraft, the inhabitants of Innsmouth are born as humans, but slowly turn into fishmen over the course of their lives.
* H. P. Lovecraft-themed songs, some occasionally (Nile, Metallica, Dark Moor) and some often (The Darkest of the Hillside Thickets).
* H. P. Lovecraft, the mutated deformed cannibals number in the dozens, if not hundreds, while their abode is rather isolated and the number of people who fall victim to them is small. (It's hinted, though, that they have no problem preying on each other...)
* H. P. Lovecraft. The shoggoths are a huge mass of protoplasm with eyes that temporarily form and disappear all over its body.
* H. P. Lovecraft. The stories "The Evil Clergyman" and "The Thing in the Moonlight" were originally Lovecraft's matter-of-fact descriptions of his dreams, later published after his death as short stories.
* H. P. Lovecraft, the title character becomes convinced that life is strictly chemical, and repeatedly attempts to bring the dead back to life. His first revived human attempts to claw its way back into its filled-in grave, and the others exhibit similar signs of madness when revived. Finally, the abominations that West hauled back from the great beyond find him, and silently tear him to pieces in front of the narrator, before leaving without a trace with West's remains. The last one of West's experiments does appear to be quite sentient: a pilot decapitated in an accident, whose head and body live separate from each other but act as one entity. He is not only able to understand what West did to him (having helped with a few experiments himself) and desire revenge, but also bend the other research subjects to his will, as well.
* H. P. Lovecraft", the title monster feeds on the life energy of creatures that live near to where it lairs.
* H. P. Lovecraft, the titular being appears to be some type of a shadowy creature (with wings, tentacles and a three-lobed burning eye). Its weakness is light (little light hurts it, bright light will banish it).
* H. P. Lovecraft. The titular monster has a red, three-lobed, burning eye.
* H. P. Lovecraft to go. How it actually went starts around page sixty. He's careful to set this description up so that it works for the book instead of against it, though.
* H. P. Lovecraft to them if there is any moral dimension going on at all.
* H. P. Lovecraft-type thing that sucks the energy out of its environment until it returns to space, killing any living thing in the area affected down to germs and turning anything that tries to live there gray and brittle.)
* H. P. Lovecraft uses the "break in communications" variant. An expedition team finds a cave and uncovers a bunch of unknown creatures. There's great excitement as

they talk about them over the radio and then suddenly it ceases. When the protagonist arrives, he finds the aftermath of a horrific massacre.
* H. P. Lovecraft uses this as a common theme in his works, particularly the Cthulhu Mythos. It's never a good thing.
* H. P. Lovecraft use this: they live (or used to) in cyclopean cities, sometimes filled with columns, the inhabitants they are incomprehensible and so are their designs. However, it's hinted their technology is so advanced, humans can barely understand it.
* H. P. Lovecraft) usually has them as gigantic masses of black or very dark metamorphic sludge, from which they constantly extrude and retract limbs, maws and sensory organs.
* H. P. Lovecraft walked the Earth. Those dreams are usually harmful to mind, body, sanity, or all three.
* H. P. Lovecraft were intended as fiction and regard them as holy documents offering both wisdom and warning. The Lore of the Masons likewise misinterprets Freemasonry as an independent religion rather than a fraternal brotherhood.
* H. P. Lovecraft. When he mentions the abominations that have gone unfed for the month since his commitment to the insane asylum, he replies:
* H. P. Lovecraft where he lived and often featured secluded intellectuals as the main characters.
* H. P. Lovecraft which regard humanity with about the same level and type of attention that we would give to gnats.
* H. P. Lovecraft which takes place in the Dreamlands. Only later writers have actually had him actively pretend to be human.
* H. P. Lovecraft, which they use to study Earth's future inhabitants as possible next hosts. They choose an insectoid species that comes after humanity.
* H. P. Lovecraft who is also a perfect example of a Chandlerian detective.
* H. P. Lovecraft, who was certainly a die-hard Romantic who believed civilization was an aberration; obviously, this discussion came up often in their correspondence.
* H. P. Lovecraft" Wilbur Whately needs a complete copy because his version is missing a key formula. With his hearty approval, other weird fiction writers of his era used the name, which Lovecraft thought helped make it feel real. It has even appeared in book catalogs and library records.
* H. P. Lovecraft? Within the stories themselves it seems to be the script for an unproduced play, whose plot we only ever get glimpses of, but it's apparently incredibly disturbing and will usually drive those who read it insane.
* H. P. Lovecraft with the Great Race of Yith described as having "a sort of fascistic socialism".
* H. P. Lovecraft works, spells and summonings involve exhaustive research, intricate methods, rare materials (Some of alien origin), specifics dates of preparation and some innate abilities that few people have. The complexity and obscurity of these procedures gives them an occultist and alchemist feel, as well as explaining why the Great Old Ones are so unknown to the public (In universe, of course). In fact, in this universe, magic is not presented as a separate issue from science, but more as an special form of it. Mixing sci-fi with occultism is one of the most characteristic elements of Lovecraftian literature and the Weird Science genre in general.
* H. P. Lovecraft wrote relied on this trope. Lovecraft was writing at around the time of Edwin Hubble's discoveries, which cemented the idea of other galaxies as large as the known universe of the time and gave people for the first time an idea of how large the universe was. Lovecraft said that all his fiction was based on the idea that the laws of nature only apply locally, and so his horrors from the stars were literally impossible for us to imagine.
* HQ will often introduce themselves with a silly nickname, often involving the word "quiz", before saying their real name and explaining the rules.
* Hrafnkel: Flagship of Leman Russ, Primarch of the VI Legion. Led the Burning of Prospero and was taken with Russ and his picked warriors on their final mission into the Eye of Terror.

* Hrafnkels Saga Freysgoða, concludes that "I think it is folly to have faith in the gods," after his temple to Freyr is burnt and he is enslaved.
* Hresvelgr, shows up as an enemy ace during the mission where you have to destroy the Aigaion in 6.
* H. R. Giger. Cameron, however, showed his sketches and models to Giger, who was absolutely ecstatic.
* H. R. Giger franchise. Giger also had a phobia for worms and snakes.
* H. R. Giger — Much of his artwork is based on this, thus leading to many of the subtropes listed above.
* H. R. Giger, though his work tends more to towards the horror aspect than the impossible. He also likes to paint landscapes having sex with themselves. Think about that for "scenery porn."
* HRH that thing deserves either a medal or to be hanged, depending on your perspective.
* HRH The Prince Of Wales, to quote one commenter "greets the most important person in the room first". (This is entirely in character for His Royal Highness, who is well known as an animal lover.)
* H'riak are a violent race whose goal is to seed the galaxy with violet life that attacks anything not related to the H'riak. The Centaurians and the Empiants are the two known examples of their work, and this is the reason why the Centaurians attacked Earth the moment they found it. The Empiants were, actually, a failed experiment at creating life that can survive in a gas giant.
* H. Rider Haggard, a tribe of cannibals follow a ritual where they heat a large pot red hot, pick it up with handles and then throw it over the victim.
* H. Rider Haggard: Ayesha spends most of her time doing this to the main characters.
* H. Rider Haggard has this happening to Ayesha at the end, although she promises she'll come back. She does.
* H. Rider Haggard is up to the reader, but Haggard's book sold so well publishers had trouble keeping up with demand.
* H. Rider Haggard novels, which the title character uses to go on vision quests.
* H. Rider Haggard, She Who Must Be Obeyed uses magic that she explains is simply knowledge and technology that are completely unknown to the main characters.
* H. Rider Haggard Since then, the genre has proven enormously popular.
* H. Rider Haggard. Thousands of years ago Ayesha stepped into a pillar of fire and became immortal. At the climax she steps into it again and reverts to her true age, withering and dying.
* HR is an extremely corrupt group of NYPD cops who provide protection to the organized crime outfits running crime in the city. They have no problem acting as killers-for-hire and will kill other NYPD police officers who get in their way. They have prosecutors and judges on the payroll and at one point help a bunch of young Russian gangsters join the police force so they have loyal foot soldiers for the future.
* Hrolf Kraki's Saga has an inversion where the main character's half-sister is half-elf on her mother's side. It also featured Bodvar Bjarki who might be a straight example, as his father was cursed to turn into a bear by day and no longer fully human due to that curse.
* H. Ross Perot in the 1992 US Presidential campaign quit twice, and reentered twice.
* Hro Talak ends up being abusive to his lover Shayera Hol (Hawkgirl) when she turns against him in the latter part of "Starcrossed."
* Hrothgar, similarly, take the name of their queen for their surname. Helion hrothgar use the suffix "-a" to denote a queen to whom their are in allegiance to, while Lost hrothgar use the suffix "-sch" to denote a queen that they no longer serve. For both clans, the suffix "-thgar", meaning "glory", is common in given names.
* HRP-4C, described as a "Bishoujo android". Say hi to her. Preferably with a rocket launcher.
* H.R. Pufnstuf, an evil magician who rides a flying hat. Which is lampshaded in

one episode where the two end up meeting through a dating service. It was up to the heroes to break up the relationship.
* H.R. Pufnstuf episode "Show Biz Witch", Witchiepoo sings a sings a song in which most of the rhymes are made-up words like "schmoranges".
* H.R. Pufnstuf: Marty Krofft's favorite episode is "The Mechanical Boy" because Jack Wild's acting chops came into play with Jimmy being under a Witchiepoo spell that has turned him into a mechanical boy, programmed to steal Freddie the Flute and bring it to her within 24 hours.
* H.R. Pufnstuf, the Krofft Brothers tolerated it for a couple of years... until 1973, when the Ice Capades passed them over in favor of Mickey D's. Only then did the legal eagles start flying, culminating in McDonald's being forced to heavily redesign the entire concept and scrap some of the more blatant ripoff characters.
* HR trying to bring him into FBI custody with all of HR's forces on their backs hunting them down.
* Hrudaya Geethe Dr Prasad the Chief doctor of a mental hospital is harvesting his patients' organs. First, he is running an “involuntary confinement for pay” scam in which certain people who are an inconvenience are designated as mentally ill and confined for the right price. Those people are then “prescribed” a tonic which is actually a poison that causes them to have painful spasms. To “treat” this, they are sent to surgery where they die and their organs are semi-legitimately harvested.
* Hrum, bets his seat in the Senate if his son can't conquer Farsala with only ten thousand troops.
* HRUNTING/YGGDRASIL Mark I Prototype Armor Defense System he activated the self-destruct, which in itself resulted in a nuclear explosion visible from orbit.
* HRUNTING/YGGDRASIL Mark I; the latter's still a force to be reckoned with, though.
* H. sapiens, and a third hominid species (Denisovans) coexisted in Central Asia. Also that several hominid species existed at the same time in early Pleistocene Africa and in Late Pleistocene Southeast Asia.
* H. sapiens. Because of this, some zoos have have signs near the monkey enclosure warning visitors to not look directly into the monkeys' eyes because it will scare them. Staring into your pet cat or dog's eyes can also make them uncomfortable. This can happen with humans too, in some circumstances: sustained eye contact can be perceived as a challenge. Responses can range from breaking eye contact (conceding defeat) all the way to retaliatory violence.
* H. sapiens itself — Earth is an uncontacted backwater through most of said books.
* H. sapiens, yet it didn't occur to them to improve on their technology before that.
* HSBC's advertising campaign is something of an inversion: to go with the slogan "The World's Local Bank", the adverts are about differences between cultures (a word or gesture meaning something different, for instance) and sometimes deliberately invoke examples of
* H+ shows what happens in a world when transhumanism in the form of a microscopic computer implanted into a person's brain goes wrong.
* HSR's first Christmas cartoon, the 2000 short "A Holiday Greeting", had Homestar interrupting Strong Bad's fractured rendition of "O Holy Night" before it got too sacrilegious and wishing the viewers "Happy Holidays".
* Hsu and Chan a talented martial artist. He and his father are rivals to the titular Tanaka brothers and their rivalry that has gotten very physical in the past. Like when Akira cut Hsu's hand off in a swordfight.
* Hsu and Chan comic explained that the title characters do this when their games are rated poorly. "Even the bad reviews are wordy enough that we can at least cut-and-paste together a decent blurb."
* Hsu and Chan game) and its purpose. Realizing they probably overdid the A.I., the brothers remove its power and go back to the drawing board.
* Hsu and Chan "Pocket Morons Platinum", the Charmander-spoof Gila Mobster performs the Flamethrower attack by taking a swig off his flask & blowing it through the

cigarette lighter he holds in his tail.
* Hsu and Chan show medium awareness in both the Slave Labor Graphics comics and the old strips that were featured in EGM. At one point Hsu prepared for a disaster because "that little text-box guy is acting all smug again." Another issue opened with the brothers trying to find a way to get the episode's title out of their house, before finally deciding to leave it there as a table or coat rack.
* Hsu and Chan spoofs this trope when the villain points a gun at Hsu, offering him a chance to die with dignity. Hsu's response:
* Hsu and Chan, the brothers believe this especially when it comes to RPG gamers who they consider too stubborn to admit they can't beat a broken game the Tanaka's market to them. This trope is also employed when the brother's explore creating an illusion of depth and consequence in a video game.
* Hsu and Chan, the character in the Dr. No role tries to prod the severely hung over hero into giving him a chance to brag about his plan.
* Hsu and Chan, the Tanaka brothers fight off a demon invasion by sealing them in various trinkets and keepsakes.
* Hsu and Chan, the titular brothers find themselves in a graveyard as part of a video game themed haunted house and the corpses start to rise from their graves. It should be noted that the "corpses" are obsolete video game consoles.
* Hsu and Chan, the titular brothers have spent whole issues addressing the reader and at one point prepared for a possible disaster because "that text box guy is being smug again."
* Hsu and Chan this. The protagonists declare that they're going to go to the park. In the next panel, they're in the park. Hsu says "One Panel! That was fast!" before moving onto other matters.
* Hsu and Chan, when the title characters are cornered by man-eating bears, Hsu stuffs himself with Zingers saying "These always make me sick as a dog. This'll teach 'em to eat me!"
* Hsu and Chan where the Tanakas hide in a tent plotting how to escape an army of killer bears while two of said bears stand just outside listening in. After a minute, one of the brothers admits that the whole thing was a ruse to buy more time since they could see the bears' shadows through the tent.
* Hsu and Chan wordy at times. While the walls scare off new readers, fans of the series will usually claim that Norm's style of humor justifies the intense word count. The comic's creator is aware of the wordiness of his comics and likes to joke about it constantly on his website.
* HTF + by blowing up the building with the HTF zombies in it to save Flaky in HTF+Amnesia 2, in HTF+Amnesia 3/HTF+LG 4 he comes back.
* HTF+CC 2 Evil Pinkie Pie is also shown to communicate with subtitles on the screen to Flippy.
* HTF +: Due to the return of Evil Pinkie Pie this happens in HTF+CC 1.
* HTF + for the better. Even the creator herself admits how nonsensical it is and claims she does not understand why it is so popular.
* HTF + he starts to scream, Flaky hears him from the other room and holds up a sign "Should I ask?" in HTF+LG 1.
* HTF +HTF+LG 3'' Evil Pinkie Pie and LG Creepybloom are shown to be able to posses televisions.
* HTF +: LG Creepybloom knocks on the door of Lumpy's caravan, when he does not answer she angrily kicks it open in HTF+FI/RF 1.
* HTF +: LG Creepybloom knocks out Flippy with a drugged napkin in HTF+CC 2.
* HTF + LG Creepybloom only wanted to cook Flippy into a cupcake so she could earn her cutie mark. But she realized having a cutie mark for murder does not seem to be a good look on her, so she decided to help Flippy to escape.
* HTF +: Most evil ponies have that, also the corrupted HTF characters.
* HTF +: That is where the HTF+Amnesia arc takes place and later becomes a regular location.
* htoL#NiQ: The Firefly Diary. Many of Mion's deaths can be pretty gruesome, which includes getting crushed by gears and being chopped up by buzzsaws. Luckily, she simply faints when she gets killed, her body never appearing physical harmed in any

way. However, her "fainting" is accompanied by the screen being splattered with blood.
* Htrae, the Bizarro-copy of Earth that was home to the Bizarros, was sentient simply because regular Earth

Vehicle, and then dropped his pants, mooning the planet Earth. Naturally, NASA communications staff (and the astronauts themselves) were given amnestics to remove all memory of the incident.
* http://www.sir-toby.com/extend-a-story/story-1/ for a more ... PG alternative.
* http://www.touhou-project.com/ CYOAs, though how closely writers stick to the genre varies as a few stories are nigh-choiceless.
* HTTYD The Kunoichi's Way: Inverted, as Ash's parents are pressuring him to find a girl, something he won't do because he is holding a torch for Hicca.
* huǒjī), which means "fire chicken," since their heads have a reddish color that must have reminded someone of fire.
* Hua Guan Suo Zhuan, and known to wear flowers in his hair even upon the battlefield, so that probably helped too...) From then on, she followed him everywhere and even fought alongside him in his remaining campaigns.
* Hua Mulan However, a few hours in the doctor's tent seems enough to completely fix it—not only does she run, ride, and leap around palace roofs without pain the next day, she shows no sign of fatigue from the blood loss that resulted in her fainting.
* Huang Gai (no relation) of the kingdom of Wu also merits a mention, being cast as a muscular old marine (that is, a shipborne warrior, as befitting his kingdom's naval tradition) in particular, and ever since
* Huan—for example, in the series finale, Ikki ends up dragging Huan out onto the dance floor on Varrick and Zhu Li's wedding.
* Huascar. Luckily for them, a crew member, Lt. Diaz Canseco, jumped overboard and shoved the torpedo to make it miss. Admiral Miguel Grau Seminario subsequently buried his remaining torpedoes in a cemetery.
* Huawei is known in Mexico as "Jagüey", a tree that grows throughout the country.
* Huawei launched their own mobile services framework called Huawei Mobile Services (HMS) as a substitute for Google Play Services, as well as their own app store called AppGallery after Google stopped providing software support to Huawei due to US government sanctions; the AppGallery has existed prior to the company being sanctioned in 2019, though it was only available in China until 2018. For the remaining apps which couldn't be published to the AppGallery due to sanctions or some other reason, they even came up with
* Hubba Bubba Bubble Gum decided that the words 'funbelievable' and 'unbelievabubble' just weren't
* Hubba Bubba Max has this polar bear explaining its cherry lemonade flavor but then a penguin briefly licks the North Pole
* Hubbard and Heinlein are actually involved in a pretty interesting anecdote involving this trope being played straight-up. As the story goes, Heinlein challenged his contemporary and rival Hubbard to see who can come up with the most ludicrous-sounding religion while still convincing people that's it's legit. Heinlein pulled out of the competition when he decided that people were all too willing to latch onto it and take it seriously... of course,
* Hub Beacons to be a physical and sentient pilot; autopilots and drones sent into underspace are just fried, dooming any ships that try to use them.
* Hubb Leboski spends most of the series trying to get back together with his ex-wife Cher Degré, which indirectly leads to his getting involved with the wolves.
* Hub City of Vizima itself — because the swamp is so evil, you don't have to question your every move, and just kill everything that moves.
* Hube is also pretty damn good, and prone to cutting improbable things; he fixated on Conrad in his first appearance because he knew only a master-level fighter
* Hubert and Reba, Jon's old neighbors. They first appeared in the special
* Hubert assassinates his father, the former Marquis Vestra, for betraying the Adrestian crown in the Insurrection of the Seven.
* Hubert, Dedue, and Hilda are the retainers of their respective houses' leaders. However, while Hubert and Dedue are unable to be recruited into other houses, Hilda

is the sole exception as she
* Hubert from the same game, during his Mystic Arte "No Quarter," also inexplicably gets to do this too. With one beam in each hand.
* Hubert Humphrey in the 1968 presidential election, but lost. He went back to the Senate and served from 1971 to 1978. The Metrodome, former home of the Twins and Vikings, was named for him.
* Hubie Halloween was likewise dedicated to him, as he was cast in it prior to his death.
* Hub Network miniseries featuring teenage versions of the suspects hunting down a killer who is none of them.
* Hubot Flash is probably hoping to find a robosexual guy, to fulfill her fantasy of having a normal life with a human husband.
* "Hubris": The killer had been correctly identified when the case was still hot, but the police were
* Hub, the Earth centered superpower. It has advanced technology and maintains its grip on its holdings through spies, preemptive strikes, and various top secret projects.
* Hub World come out, and Mario needs to keep alert at all times to not get hit by a stray attack. Just like with the people of Tostarena, the New Donkers stay indoors at night too. This may be Bowser's work, however, as both Sherms and Stingbies are part of Bowser's army, and it's hinted that New Donk City is not normally like this at night.
* Huck and the King of Hearts in the 1990s, with a truck instead of a raft.
* Huckleberry Finn era, Tom and Huck are shocked that a couple days worth of supplies cost 2 cents followed by a shot of a 99-cent store which sold such items as grand pianos.
* Huckleberry Finn, has a habit of tracing the letter V on his cheek or chin when he's thinking deeply.
* Huckleberry Finn has an episode dealing with the blood feud between the Shepherdsons and the Grangerfords where nobody even remembers what it was originally about.
* Huckleberry Finn, the villagers take rotten veggies to the theater after realizing that the Duke and the King's play is a scam.
* Huckleberry Hound after mistakenly swatting a college student instead of Huck.
* Huckleberry Hound and Friends ("El Kabong" and "Dynamite Fright"), and Breezly and Sneezly ("Freezing Fleas" and "Stars and Gripes").
* Huckleberry Hound cartoon where Huck was a noted gunfighter prefaced his appearance running down a short list of famous gunfighters:
* Huckleberry Hound comic book story where the Great Fondoo makes duplicates of him during a ski relay race. Quick Draw McGraw (whose singing is just as cringe-worthy) makes the duplicates all sing "My Darling Clementine"; the one most off-key was the real Huck.
* Huckleberry Hound does this at the end of "Huck's Hack", when he realizes the consequences of leaving his taxi meter running.
* Huckleberry Hound does this in "Spud Dud" when a giant monster potato throws him through the air.
* Huckleberry Hound. Each cartoon in which he appears has him in a new occupation. His first cartoon had him as a policeman (which he held a couple of more times afterwards), followed by a Western sheriff, a sheepherder, a scientist, and much more.
* Huckleberry Hound had our hero in the Old West facing against an outlaw who threatened him with a bullet with his name on it. Huckleberry defeats him by hanging a sign with his name on the Outlaw, causing him to shoot himself.
* Huckleberry Hound. Huck reveals to us that it was actually because he forgot to take the lens cap off.
* Huckleberry Hound is accosted by a fox wearing a hat, resembling Fibber Fox. The Fox tries to sell Huckleberry on the benefits of the box, bringing up a map of the United States and mispronouncing various states, drawing a comparison to grains and pilgrims, placing a pilgrim hat on Huckleberry. Somehow, Huckleberry is sold on

this sales pitch.
* Huckleberry Hound lost Yogi Bear (who got his own show) and the Kellogg's sponsorship in 1961, the opening was retooled with Huck himself replacing the Kellogg's Corn Flakes rooster. Huck's animation was rotoscoped from the rooster's original animation. Similarly the closing credits were rotoscoped from the original, replacing the cereal mascots with Hokey Wolf, Ding-a-Ling, Yakky Doodle and Chopper.
* Huckleberry Hound to school, only for them to be forced back to school for not finishing their own education.
* Huckleberry's exact age hasn't been revealed, he was born during the relatively recent Heroic Age, and everyone calls him a kid. He also survived many encounters with supervillains or powerful creatures.
* Huckleberry with a full head of leaves. They occasionally molt like feathers.
* Huddle Shot - characters form a huddle; the camera POV switches, looking directly upward at the characters' heads
* Hudgens' multiple nude photo scandals, however, are a far straighter example. On top of the usual outcry about a kid-friendly actress posing naked, there were also concerns about Vanessa's age when she took the pictures — while she's an adult now, she was about 17 or 18 when the first
* Hudibras Even more, in context it has the exact opposite meaning as is typically intended when the quote is used, essentially being a command to spoil the child by sparing the rod.
* Hud. It's a blink-and-you'll-miss-it moment but if you watch closely, the monster swallows his legs, letting the upper body fall to the ground.
* Hudson & Landry's "Ajax Liquor Store" has a besotted customer calling the store and making a rather healthy order (five-fifths of tequila, five-fifths of scotch, two cases of beer, one 16-oz.) to be delivered.
* Hudson & Landry's "Obscene Phone Bust" takes place in a police station where an obscene phone caller is being read the riot act:
* Hudson and Landry had a recurring character: football star Bruiser La Rue.
* Hudson and Landry often made use of "Ajax" companies, like Ajax Airlines or Ajax Mortuary.
* Hudson and Landry's "Fredrickism" skit; involving the worship of creator Freddie Schultz, obeying the 26 Commandments grants you immortality, and under investigation by the IRS.
* Hudson City, the Yakuza are one of *many* organized crime factions active in Hudson City, and not even the most powerful one. Inside the Little Tokyo neighborhood, though, they're not to be crossed.
* Hudson Envy is an evil counterpart to the president of World Wonder Ring STARDOM's USA branch,
* Hudson Hawk: After their date, Eddie and Anna go back to her apartment, where she gives him a backrub. He says he needs to whisper something to her, their faces come together and Eddie tries to kiss her. She pulls away, breaking the moment.
* Hudson Hawk and his partner Tommy time things not with watches, but by singing a song of a given duration. So while Bruce Willis and the other guy are onscreen, they're singing "Swinging on a Star", but each time the camera cuts away — like to the security guard's booth — we hear the "current" snippet of Bing Crosby's recording.
* Hudson Hawk at the 1991 Golden Razzberry awards ceremony) for not adequately offering what it had sold itself to be, and comedy audiences who might have appreciated the film on its own merits ended up dropping by to see it too late to save the film due to having already been alienated by the misleading marketing.
* Hudson Hawk. Eddie and Anna Baragli are sitting in a cafe. Eddie has just told her that he was in prison.
* Hudson Hawk, Eddie and Tommy go to a castle to rescue Anna Baragli, but by the time they find her, she has already escaped the villains' custody and was on her way out of the castle.
* Hudson Hawk, Eddie doesn't even want to return to his catburglering ways, but is blackmailed into it. Also, when he fakes his arrest to avoid completing the third

job, the villains go ahead without his help, resulting in innocent guards being killed compared to Eddie's non-lethal plans.
* Hudson Hawk, Eddie wakes up in a packing material shipping crate in another country after being rendered unconscious.
* Hudson Hawk glider comes in handy for the title character and Anna Baragli.
* Hudson Hawk has spring-loaded knives hidden under his sleeves, which eventually lead to his death.
* Hudson Hawk. He manages to do the job and have his happy ending, though.
* Hudson Hawk Her next shot wings him, causing him to exclaim "Stop helping me!".
* Hudson Hawk Hudson takes out the vicious fox terrier Bunny this way by shooting him in the mouth with a tennis ball launcher causing him to go flying out the window of the castle.
* Hudson Hawk is realistic up to the point where Eddie and Tommy Five-Tone jump off the building and Eddie ends up falling into a chair in the Mario Brothers' apartment (Tommy ends up back at the bar), with no explanation whatsoever. The movie has a number of reality-defying scenes after that.
* Hudson Hawk. It has things such as using a skateboard to bypass museum security, using a fishing pole to swipe Leonardo Da Vinci's artwork, and the villains coming across as a comedic rogues' gallery.
* Hudson Hawk jumps off of a hi-rise building and lands in a recliner in his corrupt parole officer's living room. Either a scene was cut from the movie, or Eddie fell through a plot hole to make the scene change. His fellow jumper appears in the following scene, no worse for wear and with no explanation as to how they survived a fall of several stories without injury.
* Hudson Hawk out the window as seconds later, Snickers' head is blown apart.
* Hudson Hawk pictures of him and his wife. Actually, it shows at least five of them, leaving him furiously clicking past slide after slide to no avail.
* Hudson Hawk speech that ends with "We'll just have to kill you." His wife Minerva promptly shoots both of them, causing Darwin to protest, "God, Minerva, I was only joking!" Since they're the villains, though, he's not particularly upset about it.
* Hudson Hawk starts with Eddie getting out of prison. He's almost immediately forced to participate in an international burglary operation.
* Hudson Hawk. The ambulance carrying Eddie and Tommy Five-Tone away from the Mayflowers drives up a ramp into a truck.
* Hudson Hawk. The Candy Bars are ordering dinner at a restaurant in Italy. Butterfinger, who is very stupid, orders a steakburger and french fries because he thinks they're in France.
* Hudson Hawk: Theft of several items → using a gold-making machine to destroy the world's economy.
* Hudson Hawk the main villains are Darwin and Minerva Mayflower, the world's richest, most evil, most obnoxious couple.
* Hudson Hawk. The safety features on ambulances are apparently disabled by the presence of stupid mobsters. In the chase scene, an ambulance driven by the bad guys hits a mound of dirt, flips over and explodes in mid-air. Although, given this was a movie with a talking crucifix and David Caruso, one may think it's not to be taken seriously.
* Hudson Hawk. The title character apparently kills Tommy Five-Tone, so the Mayflowers can't use Tommy to convince him to work for them. Minerva Mayflower turns to her operative George Kaplan:
* Hudson Hawk. The title character smuggles himself inside the Vatican inside a large mailed crate.
* Hudson Hawk: the titular character is in an out-of-control ambulance gurney. He manages to get one arm loose so he can toss change into the toll booth so he can keep careening out of control because the bad guys are after him.
* Hudson Hawk the trope: "I'm not a very good damsel in a dress, am I?"
* Hudson Hawk, when Eddie orders a cappuccino, the bartender slides it down the bar to him.
* Hudson Hawk: While breaking into the auction house, Eddie uses a suction cup device to cut out a hole in a glass door. It's large enough that he and Tommy Five-

Tone can slip inside.
* Hudson Hawk. While Eddie is in Italy, he goes to a restaurant and orders "Fettuccini con funghi porcini" (pasta with mushrooms). He also asks for a bottle of ketchup, to the waiter's dismay.
* Hudson Hawk, while pretending to be crazy, Anna intones: "What does the color blue taste like? Bobo knows!"
* Hudson Hawk. While robbing the Vatican, Eddie throws a rope (with a grappling hook on the end) from the top of a building across a street. He then slides down the rope to escape.
* Hudson Mohawke and Rustie fans get along quite swimmingly, possibly thanks to both being Scottish hip hop/trap producers that usually enter
* Hudson River. The neon sign originally said "BAR", but when it changed owners in the 70's, the new ones managed to avoid the red tape involved with changing the signage by painting over the archs of the 'B' and it stayed that way since then.
* Hudson Street, Tony was excited about meeting his favourite footballer and getting him to autograph a ball. He said something along the lines of "I can't wait to get his John Hancock on my pigskin", causing one of his co-workers to remark "I hope that's not a euphemism".
* Hudud punishment for theft and highway robbery (without homicide) is to amputate the person's hands.
* Hue Are You: Blue and Red both qualify as this with weapons of mass destruction and their general classification is called "Soldier Bot".
* Hue Are You Red side and Blue side have been in a war for hundreds of years with no real end in sight. The only thing that could start to wind it down was removing the ability of either side being able to repair themselves.
* Hue Are You. The viewpoints on these dreams differs between those that know about them.
* Hue Are You within the first few panels, the last human on the planet dies and is confirmed dead. The second episode shows the world 100 years later and starts the plot.
* Hueco Mundo, when the arrancar start getting knocked off. Although they're really just glorified mooks. Granted, it is really hard to die when you're technically already dead, which accounts for 95% of the cast. One wonders why anyone bothers with death threats.
* Huel is a very similar meal replacement that comes in the form of grey powder. Both have had similarly unflattering reviews on palatability.
* huevos being literally “eggs” but also slang for testicles.
* Huey also indirectly asks if Coldman is out of his mind when he realizes that Coldman is intending to launch Peace Walker's nuke into the Carribbean Sea [specifically at Mother Base] so that the nuclear fallout will travel through the trade winds and poison Central America's fish and crop market, allowing for "free hands" by forcing the natives to participate in Peace Walker's mass production.
* Huey also views the Lemeurs, including his own doting daughter, as this.
* Huey and Launchpad (the latter in only a small cameo) are the only main characters to appear in the third season episode "Astro BOYD!". The later third season episode "Beaks in the Shell!" featured just Huey and Louie, again the latter in only a small cameo. Launchpad has also missed much of the latter half of the third season after "Let's Get Dangerous!"
* Huey blows and pops a giant bubble (from a small piece of gum) in the episode "Time Teasers". He then peels the mess off his entire face to hamper the actions of a baseball player he froze in time.
* Huey, Dewey and Louie are preparing dinner for New Year's Eve in a geriatric care home using money provided by the Junior Woodchucks. They send Donald with the money to buy food, but he loses the purse. Donald decides Duckburg would be better off without him and seems to prepare to commit suicide, but is interrupted by his guardian angel (not the angel from the previous story, by the way). The guardian angel shows him how a new year's eve in Duckburg would be without him: Huey, Dewey and Louie live in an orphanage, are constantly bullied by their peers and are unable to celebrate new year's eve in peace. Daisy is dating Gladstone (again), but

is unhappy with how Gladstone takes her to a horse racetrack rather than a restaurant and feels Gladstone doesn't really care about her. Scrooge has no friends or family and when he decides to invite his staff to a dinner party, he finds that none of them is willing to spend more time than necessary with him.
* Huey, Dewey and Louie. First appeared in October, 1937. Adapted for Animation in April, 1938.
* Huey, Dewey and Louie idolize the adventurous "bajillionaire" Scrooge McDuck and are elated when they learn he's actually their great-uncle. They eventually help to rekindle his adventurous spirit and join him on his newest exploits.
* Huey, Dewey and Louie, particularly in the Academy Award-nominated short "Good Scouts".
* Huey, Dewey, and Louie were victims of this themselves, usually with Donald wielding a switch or other instrument of corporal punishment.
* Huey Emmerich gets pushed down a flight of stairs in both games he appears in.
* Huey Lewis and the News' best-known songs, but it had originally been recorded three years earlier by the British group Supercharge.
* Huey Lewis and the News have the state/nearest big city clumsily added into key parts of the song ("You and I" refers to a specific person from Nebraska. Needless to say, the edits kind of ruin parts of the song, especially in terms of meter) on Top 40 radio for cheap pops. Fans dislike them, but the radio station seem to have fun making them.
* Huey Lewis and the News implies that no drug compares to the feeling of being 'alone with you'.
* Huey Lewis and the News"? Nope, they were "Stuck With You" and "Jacob's Ladder".
* Huey Lewis and the News' "Stuck With You", about a couple that finds themselves happy to be stuck with each other when they can't find something better.
* Huey Lewis and the News, the second chorus features the News all buried in the sand while Huey lies behind them singing.
* Huey Lewis and the News where Patrick Bateman recites a pre-planned monologue about the band, plays "Hip to be Square" on his stereo, and then chops Paul Allen up with an axe.
* Huey Long (D-LA): Infamous Louisiana politician of notable interest: Governor (1928-1932) and Senator (1932–1935), his Senate career was cut short by his assassination.
* Hufflepuff House: A faction is important to the setting's politics, but largely irrelevant to the story.
* Hufflepuff House, can never catch a break. Because Helga Hufflepuff did not believe in cherry-picking the finest for her students, the house has a reputation for being those too stupid for Ravenclaw, too cowardly for Gryffindor and too unambitious for Slytherin, being an uninspiring bunch of 'the rest'. They rarely win the House Cup, and in the first book they came last after Gryffindor's clutch victory, their only known good Quidditch player was Cedric Diggory, their head of house is the least prominent of the four, and Harry never visits their common room or makes any major friends in the house in the entire series. Even Diggory, who was Hufflepuff's only shot in recent memory for any kind of glory, was unceremoniously (though not undramatically) murdered by Wormtail and subsequently scrubbed from press reporting of the Triwizard Tournament, despite being joint winner. There's a reason that Hufflepuff is a by-word for 'well-meaning but unimportant loser'.
* Hufflepuff House. Dialogue from the books seem to indicate that they are memetic losers in-universe as well.
* Hufflepuff, the friendly, loyal and down to earth house has the badger.
* Hufu was a short-lived tofu product parodically marketed as "the healthy human flesh alternative" for "cannibals who want to quit."
* Hug and Comment: Two people hug and one of them makes an unexpected comment.
* huge amount of metal/minerals in one go, rather than chase down millions of asteroids.
* huge, and partly to spite Chelsea for refusing to play him in the first place.
* huge And since there is no way to restock on healing items once the level is started, hopefully you didn't get hit too much clearing out the enemy soldiers on

the boat.
* Huge Ass Mr. Jass doesn't seem to be offended by it and tells him better luck next time.
* huge authority given to rabbinical courts and the rabbinate in general over marriage and family life.
* huge bastard sword around and is rumored to have never been defeated. However, Caladan Brood notes that this is at least partly because Kallor picks his opponents well.
* HUGE BRIGHT RED BLOCK CAPITAL FONT! Even the wimpiest secondary character will tend to be introduced with maximum impact.
* huge by a patch (and only applies if the survivors set them on fire directly with Molotovs, gas cans or incendiary ammo instead of the Hunter intentionally lighting himself with pre-existing flames in the map), but it's still present.
* huge cast (e.g. Mudslinger and Throatslitter) and some characters have heroic epithets attached to their name (e.g. Dujek Onearm, Scabandari Bloodeye).
* huge chunk missing from Earth, only one human left and skeletons turn up in random places. There's also a fairytale candy village and you can get nacho cheese and hazelnut-flavored coffee.
* huge crush on detective Rosa Diaz with "badass bitch" attitude. He keeps asking her out nervously. She doesn't reciprocate, but they eventually become close friends instead.
* huge deal. When a life-or-death battle actually happens, they are much more serious about it.
* huge due to the amount of dry ice needed — the thieves would stand out to any witnesses they passed.
* huge escape fleet in which they evacuated. It was following the line of those transmissions that led the alien rescue ship to the fleet.
* huge exp and cash payout. Then there's Hoxton Breakout, which has no bags but still had a huge exp and cash payout.
* huge facial scar. Not that it means much to Bunk, who immediately knows Omar was behind it due to his past run-ins with him.
* huge faux pas in Japanese culture. Tamaki just said "Okay, so what do you want to do instead?" After that, Kyouya was better about politely turning Tamaki down.
* huge faux pas that calls your professionalism into question, and is almost only forgivable in the case of massive technical problems or danger to life/health) or picking up where things went so pear-shaped it had to stop.
* huge). Female artists who have made songs that actually support bro-country stereotypes (RaeLynn, Maggie Rose) have also gotten trashing from bro-country haters as well. The hatedom gradually died down as bro-country fell out of favor.
* huge gatling gun which can mow down swarms of weak enemies or steadily wear down a tougher one.
* huge, ghastly face screaming "REVENGE!!!" drinking Mexican tap water and getting the trots from it.
* Huge Guy, Tiny Girl: In a pair (whether platonic or romantic), the guy is very large and the girl is much smaller.
* Huge Guy, Tiny Girl: When applied to a romance; a large man is paired with a small woman.
* huge, he is also considered by several Chaos warlords to be an incompetent coward unworthy of commanding the forces of the ruinous powers. He remains Warmaster because no one else is strong enough to take the position from him. His failings as a leader aside, he's still one of the most powerful warriors in the setting. His tabletop stats reinforce this: he's a great close-combat unit but he's a lousy commander who barely buffs his army.
* huge, he says, "Boy, when I buy water, I get my money's worth!" before the cartoon ends.
* huge He stays alive through his wits and a fearsome reputation. He is also expected, and manages, to solve the mystery behind his missing employer by himself.
* huge(indeed, the limits of "Largest Dropship" and "Smallest Warship" overlap), and impressively well-defended. Even a "standard" Hrothgar-pattern dropship carries

as much firepower as an average lance of Assault Mechs. With the loss of Warships in the Inner Sphere, Dropships have expanded to take the roles of Carriers, escorts, and Assault ships as well as troop carriers. When the Warships came back, they picked up a new role: The "Pocket Warship"; up-gunned Assault ships armed with Sub-Capital weapons and even Capital-scale missiles, that can damage and even destroy full-sized Warships.
* huge is a later design capable of 65 knots under sail power. There's still no substitute for something that can be repaired and driven by hand though, given that you don't want your motors to seize up or your electronics when you're several days or weeks sail away from land...
* Huge is not her brother, since she resents him being at a camp she previously considered her sanctuary.
* HUGE it is used for is drowned under the tons of smoke and mirrors. Sometimes it's the State Reserve warehouses, sometimes it is simply resource extraction, some times it is (sheepishly admitted) nuclear processing plant, but in the end it is still a secret well kept.
* huge jars with desiccated corpses in them. Agatha later threatens someone with being put in the jars if she tells the Baron what he's done.
* huge. Logically, there are Memories Beta through Omega to back it up in case the facility is lost.
* hugely the change, while from everyone else's point of view it's always been that way.
* Huge machinery (as in the 1000-tonne tank example above) are limited in size and agility by environment far more than by engine power.
* huge man who towers over his wife, Senna. His name is Tonraq, which is an Inuit name meaning "tiny man".
* Huge monsters made of metal like bronze or steel are strong enough to support their own weight (which is suitably high because it is calculated by the game based on their size and material) and are extremely durable, but that same weight also makes them relatively vulnerable to damage from falls. Very large grazing animals that have been domesticated
* huge multi-level network of rooms and passages, which crisscross the National Mall and interconnect its various above-ground public buildings. Like most museums, the vast majority of the Smithsonian's historical, cultural, and scientific assets aren't on display.
* huge muscles, very tiny wings that fans dubbed "Snowflake" first appeared in the "Hurricane Fluttershy" episode. He showed up again later as one of the recruits in "Wonderbolts Academy" before finally getting a canon name (Bulk Biceps) and a major speaking role as part of Dash's relay team in "Rainbow Falls".
* huge part of her), and could only seem to cite Willow's looks as being the reason she's interested in her in the first place. They ended up breaking up in the comics, unsurprisingly.
* Huge Power, allowing it to rip apart enemy teams with ease with Aqua Jet, Waterfall and Play Rough.
* huge punch for such a tiny weapon. In addition to having a huge amount of damage for a pistol, it has a 4x headshot multiplier even before any mods are added.
* HUGE Rarity fan. Beyond that though, he has a strong appreciation for character depth and complexity.
* Huge red Turkish oil wrestler Hakan and his smoking hot wife Melike than merely good looks.
* Huge Schoolgirl: A girl is unusually huge for her gender, and thus is self-conscious about her size.
* Huge Schoolgirl) are often seen as a sort of comedic duo due to their height discrepancies and it becomes a popular game to imagine what kind of odd couple they'd make together. For better or worse, they start falling for each other...
* Huge Schoolgirl: A young girl still in school, but is also very large.
* Huge Schoolgirl, but he's quite the playful guy on the inside, as his profile mentions.
* Huge Schoolgirl. Get to her older and much more shapely future self and...

* Huge Schoolgirl pretends to be a guy due to the negative attention she received in her previous school, feeling it easier to get through highschool if everyone believes her to be a man. Luckily, she doesn't look all that feminine, and unlike some of the other female Southridge students lacks large breasts.
* Huge Schoolgirl who's treated like the other twentysomethingers, while the meek Shinobu is treated like a kid, despite them being only three years apart in age.
* Huge sections of Atlantis are regularly demolished by alien invaders, natural disasters and our heroes — yet this seems to have very little overall impact on the city as a whole and the population, which appears to stay remarkably steady in numbers. Although the latter could be explained after contact is re-established with Earth as new personnel arriving to fill the gaps. Still, all in all, Atlantis is a
* huge serenely dragged and threw the corpses of all his fallen enemies into a makeshift burial. There was no compassion or great emotion found in Sōsuke's eyes while he was doing that, and his reason for doing it was presumably because of his own internal set of morals.
* Huge spaceships made to look like cathedrals" who animates their technology and think that if they lay off the pomp, everything will break.
* huge sundae in front of him. (It was torture for Boris too, given his reaction.)
* huge that preys on horses and pegasi. It can also explode into a swarm of smaller bats if slain.
* huge. This didn't go unnoticed by, and grossed out, a lot of smarks.
* huge thrust for very long time for a ship in open space. This is proposed for the battle drive for a space warship, which needs lots of thrust for the short periods of battle (which would tend to end as soon as someone got a telling blow in, since space is a tremendously unforgiving environment).
* huge transformable figure of Optimus Prime, complete with his trademark gun, laser axe, a miniature Megatron in gun mode, and of course, the Matrix of Leadership.
* Huge, two-handed hammers are an available melee weapon for Optimus Prime and Grimlock in
* huge, which collectively make up almost all of the series' major plot threads.
* huge world. Although the world apparently shares one language (with many, many different accents and dialects), almost no other aspects of culture are universal, or even necessarily common among neighbors!
* Huggies Pullups and other absorbent training pants, on the other hand, continue to be colored in pink and blue, because toilet training tends to coincide with the time when children develop gender roles.
* hugging Kaori to calm down and then laying and resting his head in her lap with her stroking his hair and comforting him.
* hugging machine), and has several weird Sheldon-esque traits, such as demanding her coffee be made a certain impossibly specific way and announcing "I have to urinate" every time she gets up to go to the bathroom. From dialogue, it's possible that her own mother deliberately held her back from socializing with other children when she was growing up. Otherwise, Beverly was born the same horrible person she is in the show and was never once in her life interested in socializing because of avoidant personality disorder and instead dedicated her life to science and studying.
* Hugglestones, a boarding school for the sons of the very rich designed to turn boys into men... apparently by making them play a lot of violent full-contact sports and only allowing those who survive (either by brute force or just being smart enough to avoid the scrum while still acting like they're involved in the action) to graduate; William de Worde from
* Huggsy, Joey's bedtime penguin pal, which appeared in a few episodes.
* Hugh and Seven return and both help other xBs (former Borg) reclaim their humanity and fight against
* Hugh Bliss. Sam is horrified. Max is (somehow) able to continue to function, although he's definitely not himself.
* Hugh Dennis. It appears that one of his eyebrows just naturally sits about a

centimetre above the other.
* Hugh Dennis: "Milk! Bread! Germoloids! I believe...I have been reading from the wrong piece of paper."
* Hughes earns triple points because his death is because he's "too good" in three separate ways. (1) He's too good a friend to the Elric brothers.
* Hughes pigheadedly insisted on retaining the Ross rifle as the major Canadian weapon despite its uselessness. Suggesting that it be replaced became a
* Hugh exhibits his feminine side by his Lack of Athleticism (he's a
* Hugh Harman would drive him to rework a cartoon multiple times until he'd become sick of it to a point where he'd turn in whatever he felt was passable.
* Hugh Hefner was a fairly prolific movie producer, in addition to being the founder and CEO of the
* Hugh Hefner was the living embodiment of this trope. He once stated that his favorite birthday gift he ever got was his latest girlfriend in the grotto... along with seventeen of her closest bunny friends.
* Hugh is actually a massive subversion. Canas is softspoken, a bit of a
* Hugh is the first non-Picard Borg removed from the collective, and he learns to see himself as an individual in the space of one episode.
* Hugh Jackman, and nearly breaking his own neck. After that last one, his wife nixed any more risky stunts.
* Hugh Jackman read for his audition), but was ultimately removed from the script.
* Hugh Jackman this way. In the film series, he's dark, broody, dangerous, and mysterious.
* Hugh Latimer, Bishop of Worcester, was burnt at the stake in 1555 along with his friend Nicholas Ridley. His last words are reputed to have been, "Be of good cheer, master Ridley, and play the man; for we shall this day light such a candle in England, as, by God's grace, shall never be put out."
* Hugh Laurie deflated his ego. It usually ended with the slogan "You get a wiser investor at Alliance & Leicester" although it was once changed to "You get a dafter investor at Sproggit and Sylvester".
* Hugh Laurie has also shown off his musical talent in other roles, particularly that of Bertie Wooster of
* Hugh Laurie has joked that while he was filming a movie in which there was a lion, the lion's handler told him that lions are fastidious and have very sensitive noses, and if he was ever faced with an angry lion, he should reach around behind himself, grab a handful of feces, and throw it at the lion's face so that the smell would drive the lion away. He asked what to do if there was no feces there, and was told "if you're facing an angry lion, don't worry, it'll be there."
* Hugh Laurie in rowing, making their first eight for the 1980 Boat Race (which Oxford won).
* Hugh Laurie involving a (you guessed it) lockdown which neatly sticks characters in pairs in a single set for the entire episode, rotating through the pairs. So Laurie is free to be behind the camera for most of the episode and when he's in front of it it's in a tight character-focused box.
* Hugh Laurie once said that he thought that House was just as likely to get together with Wilson as with Cuddy or Cameron. The actual writers never said anything either way on that topic, however.
* Hugh Laurie, though he puts his comic delivery to good use for the character's razor-sharp wit.
* Hugh Laurie thought it would be very nice to have his best friend on the panel for the show's introduction... whereupon Laurie said about ten words total. Interestingly Fry has said that, in private, Hugh is actually the funnier, smarter one of the two; Hugh denies this.
* Hugh Lofting and convinces them to help him put on a show so that they won't have to die in the bullring any more.
* Hugh Mann: A human is swapped with an alien impostor who does a terrible job at appearing human.
* Hugh Mann: A non-human tries to impersonate a human, but it's very obvious that they are not human.

* Hugh Mann". The only one fooled is Zap Brannigan - who is, of course, in complete personal control of the entire Earthican defense network.
* Hugh Morrus/Bill DeMott. Stayed in WCW until the end, went on to WWE, became a trainer.
* Hugh Morrus management had given him the name 'Morrus' to make him look stupid. No, really.) (he did eventually get to use his real non-punny name in the WWE Bill DeMott)
* Hugh Morrus, Sullivan said that he was giving him "the greatest gift of all, laughter."
* Hugh Walpole (1884-1941). Author in several genres. His better known gothic horror tale is
* Hugo Award is known as "the Rocket", since the design is a pulp-era SF rocketship.
* Hugo Awards." Not to be confused with the following year's Dramatic Presentation award for the TV coverage of the same event.
* Hugo Award two-parters have been nominated in the Short Form category despite their combined lengths being over 90 minutes.
* Hugo Blunt, the Shackley's steward, was killed in the interlude between chapters.
* Hugo Chavez's administration was quick to ban any show it didn't like. The most notable was Colombian soap opera
* Hugo Drax drops Bond into a pool with a reticulated python in it in
* Hugo for doing crazy things like eating the cat, but is adored by the fandom.
* Hugo frequently gets locked up and yelled at by Matt, but is usually happy when he's seen outside of his cage.
* Hugo Gernsback had one of the earliest examples in the classic sci-fi
* Hugo returns Julia's own opportune arrival on the same evening, when he shows up with their work documents in time to help her convince the police to let her go.
* Hugo's employer, who briefly looked like he could become an ally among the elite, at some point
* Hugo's House of Horrors contains a bookcase that opens when a book is taken out, causing Hugo to disappear.
* Hugo Strange, one of the few villains to successfully uncover Batman's true identity.
* Hugo: The flashback scenes take place in the Edwardian Era and in the very late Victorian era. The story proper takes place in 1931.
* Hugo The Hippo. Later, Aban-Khan turns a garden into an army of strange-looking vegetable soldiers to capture Hugo, which inexplicably features a scene where Jorma and Hugo try to escape into space on a giant butterfly.
* Hugo The Hippo the sultan's magician conjures up a metal horse and cowboy to lasso some hippos after the horse, obviously, drains the body of water they live in with a vacuum snout.
* Hugo Weaving had to dub all of his lines, both because of the mask and because the character was originally played by James Purefoy, who left a few weeks into filming. Due to the mask, they only had to redub rather than reshoot Purefoy's scenes.
* Hugo Weaving however, claiming that Red Skull was interesting, but something he'd rather not do again; while Megatron was outright the only role he never cared about.
* Hugo Yoon is less than a two-bit thug, but he's also the one responsible for the hero's iconic "White Mamba" title, which in turn leads the Yeongdeungpo Union to take him seriously — a fact that Hugo is quick to brag about.
* hug planets until they exploded. The plot would have revolved around Zim and Dib's efforts to stop him.
* hugs Dipper from getting caught up in the moment, she then proceeds to pay him to forget it ever happened.
* "HUGS": When Rainbow Monkey Kong tries to grab Numbuh 4 inside Sector V, his hand obscures the screen when he finally does.
* HuGtto! Pretty Cure ad air during the program, as Furuta sponsored the program. Sometimes, like on episode 36, the ad aired before the program as well, causing the

ad to appear twice in the span of a half-hour.
* HuGtto! Pretty Cure and Hariham Harry to travel back into the past as well, encountering Hana to make a new Pretty Cure team to stop the Dark Tomorrow Company from freezing time and robing everyone of their future.
* HuGtto! Pretty Cure at all. Despite this, Ruru's character arc revolved around her betraying her masters at the Dark Tomorrow Company and learning how to be her own person, much like the plot of the play.
* HuGtto! Pretty Cure baton pass, it wasn't really incorportated into the show until the period mentioned above.
* HuGtto! Pretty Cure before the anime begins. Though she was traumatized by her injury even after it healed, she regains her passion after becoming Cure Etoile and with help from her friends.
* HuGtto! Pretty Cure, Cure Yell ends up summoning a weapon called the "Pretty Cure Sword", which bore a glowing rainbow-colored aura. However, she ends up rejecting the weapon when she realizes a sword isn't want the team needed and they end up with standard wand-like devices known as "Miracle Swords"
* HuGtto! Pretty Cure doesn't understand normal social conventions and doesn't understand why people would do things inefficiently. She herself notes that due to this, people interacting with her decreased by 80% after a week.
* HuGtto! Pretty Cure got revealed via a listing for a children's makeup set.
* HuGtto! Pretty Cure has George Kurai, the President of the Criasu Corporation. He's trying to steal everyone's future by stopping time.
* HuGtto! Pretty Cure has Ruru. She starts off as a villain, but joins the Cures and eventually becomes one partway through.
* HuGtto! Pretty Cure is also this, because they have had many funny moments together.
* HuGtto! Pretty Cure, it was pretty obvious that Ruru would eventually defect from the Dark Tomorrow Company the moment she decided to spy on Hana's family. If that wasn't blatant enough, then the focus on her and Emiru's growing friendship in episode 15 certainly solidify this fact.
* HuGtto! Pretty Cure — Everyone except Emiru Aisaki in both her Cure form and civilian form.
* HuGtto! Pretty Cure movies have been released in China to streaming service iquiyi months before they are released on home video in Japan.
* HuGtto! Pretty Cure: Nono Hana. She gained the title of "the Pretty Cure of Genki" as Cure Yell.
* HuGtto! Pretty Cure. Once again the protagonists step up to help him.
* HuGtto! Pretty Cure team. Cure Ma Chérie even has the same theme color as the lead Cure: pink. Cure Amour and Cure Ma Chérie transform only as a duo and they attack as a duo.
* HuGtto! Pretty Cure that he can also be interpreted as nonbinary or genderfluid. Describing himself, Henri says "Masculine... feminine... it matters not! This beauty transcends all!" He later expresses discomfort with his increasing height and deepening voice, akin to gender dysphoria.
* HuGtto! Pretty Cure their power to stop the monster of the week. While he spends a little time weakening the beast, it's ultimately the Cures that beat it down.
* HuGtto! Pretty Cure, which discussed gender roles, more people began checking out the anime to see what it was like.
* HuGtto! Pretty Cure, which revolves around a daycare, aired on May 5th, 2018, which is Children's Day in Japan and Korea.
* Hugues De Vermendois, younger son of Henry I of France, Count of Vermendois, and leader of a
* Huis Clos Estelle wants Garcin (more specifically, she wants a warm male body, and Garcin will do); Garcin, on the other hand, is attracted to the intelligence of Ines; but Ines is fixated on Estelle, who reminds her of her former lover Florence. The fact that they're stuck in a love triangle that will never be resolved is their chief torment in hell.
* Huitzilopotchli has a major role in the second book, where his heart-eating shtick is played up for great horror. Apparently there's not much more to him than

that, though.
* Huldra, nymphs with cow or fox tails (and optionally hollow backs, like a tree trunk), especially since they're usually considered to be female
* Huldufólk (hidden people), which live alongside humans, but invisible to us unless they wish to be seen. They are much like humans in appearance, and they live as people do, only to us their houses appear as rocks, boulders, cliffs and hills. Sometimes their interactions with humans would be pleasant, in particular if a "huldukona" (female) was in need of a midwife, and a human would oblige their request. At other times the huldufólk would leave their old and infirm as changelings, taking the human children to rear as their own. They would bewitch both men and women to join them in the cliffs, and they would tempt humans waiting by crossroads on specific dates.
* Hulk (2003) takes about forty minutes to actually turn Bruce Banner into the Hulk.
* Hulk (2003), with the scene pictured above being his ultimate moment.
* Hulk 2099: there's a crackpot group called the Knights of the Banner who worship the original Hulk and plan on exposing themselves to gamma radiation. And then Jon Eisenhart, who couldn't care less about Bruce Banner, comes blundering in and gets the effects.
* Hulk, although they are cousins, and were partially raised together.
* Hulk and Spider Man can leap over skyscrapers, so they do this too.
* Hulk and the Agents of S.M.A.S.H. had the same problem, which was only slightly bettered by the characters posing in more dynamic stances rather than just standing around with their arms crossed.
* Hulk and the Agents of S.M.A.S.H. has a background as a government operative.
* Hulk and the Agents of S.M.A.S.H. Hulk is wise to Skaars duplicity and allows him tidbits of information to give to Leader, hoping to win Skaar over in the end.
* Hulk and the Agents of S.M.A.S.H., Red Hulk tries to take it to some forest but a wrong turn (and yes, Red Hulk mentions Albuquerque) leads them to Latveria.
* Hulk and the Agents of S.M.A.S.H. suffered with this for some time too, such as having Aqualad after being told he's the new leader (seconds after a failed mission) blink and stare at the ground like he's just entered a state of catatonic shock.
* Hulk and the Agents of S.M.A.S.H., The Collector has been shown to be one of these. This is because he is one of the Elders of the Universe - a collection of beings who are the last of their race. Each wields the Power Primordial and is known for one obsessive characteristic.
* Hulk and the Agents of S.M.A.S.H.: When the curse of the Wendigo begins spreading across the team in "Wendigo Apocalypse", the Hulks fight their way out of a real live horror movie, starting with Hulks old rival Wolverine.
* Hulk, and their supporting casts, then we get the second generation with Skaar and Lyra, the Hulk's son and daughter, as well as members of the first generation becoming Hulks themselves.
* Hulk, as any character's superpower can be easily identified by which body part is the largest (The Leader, the Abomination, etc.) In the movie, the Hulk himself would also get larger as he got angrier/stronger. Sometimes (but in no way consistently) depicted this way in the comics as well.
* Hulk. As he left jail, he was provoking his son and those who have met him and claimed he never did anything wrong. He tested on himself and was able to absorb everything he touches. He claimed that Bruce isn't his son but his essence is. His existence is the reason why the Hulk exists.
* Hulk believed that people cause too many chaos around him and his son.
* Hulk, Bruce's dad, trying to assimilate the Hulk, gets the sum total of Bruce's repressed anguish in the process, and can't handle it.
* Hulk came out, so many had no idea that he was a comedian in the first place.
* Hulk comic from the 90's, where right after beating the hell out of Captain America, the savage Hulk had a particularly brutal fight with Thor, all while completely naked. The Hulk won.
* Hulk, David Banner wants to kill his son Bruce so he can absorb Bruce's Hulk

powers back into himself to stabilize his mutated body, arguing that he gave him life in the first place and should give it back.
* Hulk: Development began in the 1990s, but the film was not released until 2003.
* Hulk features a brief appearance by an action movie star called Albert Studebaker.
* Hulk fixed it to being genetic engineering jumped started with radiation.
* Hulk had a type of medicine known as nanomeds. Over a decade since the movie, nanomeds were quite useful and reliable.
* Hulk himself succumbed to this trope during the Dark Age, when he spent a story arc running around with a huge energy cannon in each hand. Thankfully, that story tends to be ignored these days.
* Hulk Hogan about everything they did that the good guys using the same tactics just looked like comeuppance to the fans.
* Hulk Hogan) and, after busting the cuffs – and at least at one untelevised house show ripping off the metal wrist irons – manage to get a few late blows on the bad guys (usually Slick), sometimes using the chain of the now-broken cuffs to belt his foes as they tried to flee.
* Hulk Hogan and a match set up for WrestleMania V, in which Hogan defeated Savage to reclaim the World Heavyweight Championship.
* Hulk Hogan, and D'Angelo Dinero were talking about when they were rabble-rousing against Hogan and Bischoff made perfect sense.
* Hulk Hogan (Andre's manager for the match) as part of his scheme to become WWF Champion.
* Hulk Hogan) and why wrestlers band together so tightly against outsiders both in and out of kayfabe.
* Hulk Hogan are familiar to millions (perhaps even billions!) of people who have never watched a single wrestling match - particularly Hogan's ultra-macho manner of speaking and shirt-ripping.
* Hulk Hogan are what makes Hulkamania possible: "He wears the heart of his country on his sleeve / He'll fight for your freedom if you really believe."
* Hulk Hogan at SummerSlam 2005 is infamous because Michaels got annoyed at Hogan canceling their rematch and demanding he go over, resulting in him overselling all of Hogan's offense and flopping around like crazy in protest. It's pretty kayfabe-breaking but it's hilarious, especially if you understand the context.
* Hulk Hogan built a whole career on this trope, getting beaten badly in the early minutes of his fights only to become unstoppable and nearly invulnerable to his opponent's attacks once he hulked out.
* Hulk Hogan, counting a clearly invalid pinfall against Hogan. Although the twin referee angle was thoroughly explored in WWF Magazine, it was very quickly dropped though due to Dave suffering an injury. Earl would later become a normal "good guy" referee like his brother.
* Hulk Hogan dropping the same leg, even while flipping forward 270 degrees, doesn't quite have the same sense of gravity to it.
* Hulk Hogan (Face), after overwhelming crowd response before the match started caused the two men to realize that they needed to switch roles.
* Hulk Hogan faction. The move sparked interest in wrestling that it hadn't seen since the turn of the decade. Hogan once more became one of the biggest names in wrestling as a leader of the nWo.
* Hulk Hogan feud of 1992. The whole feud started because Sid had eliminated Hogan fair and square at the 92 Royal Rumble match and then Hogan proceed to cost Sid the match. Then afterwards Jack Tunney was going to give Hogan the title match at Wrestlemania till Sid challenged Hogan and pointed out how unfair that was. Hogan was presented as the face in the feud while Sid was the heel despite the fact Sid had legitimate gripes to be mad at Hogan.
* Hulk Hogan, given that his name has practically become synonymous with the archetype.
* Hulk Hogan had commentators often talking about how exceptional he was despite most of his technical performances being average at best. Ironically, Hogan actually was a decent technical wrestler and often showed this off in his early

days, but as he became more prominent, he toned this down a fair bit. This left audiences and critics a bit confused as to why Hogan was getting so much shilling for his prowess when he seemed to rely solely on brute strength and mic skills.
* Hulk Hogan, has lost most of his mobility and speed. He can still knock people down with one punch, but he needs his opponents to come to him these days.
* Hulk Hogan. He stepped in the ring, and got knocked right back out again.
* Hulk Hogan himself, BROTHER! Listening to his normal voice is a bit jarring after hearing his louder, more growly promos.
* Hulk Hogan. Hogan basically being why Beefcake was allowed to stick around as a barber when the WWF had no other use for him.
* Hulk Hogan. Hogan was so confused and felt so betrayed that he actually started crying in the middle of the ring.
* Hulk Hogan, Horace attempted to do that to Warrior by dousing him with lighter fluid.
* Hulk Hogan: if you poked his eyes, you could stun him long enough to hurt him. The "unfazable monster" gimmick worked for awhile, but eventually Zeus succumbed to Hogan, and in a "final" steel cage match in December 1989, Zeus little more than jobbed to Hogan ... a far cry from the imposing monster that was initially promoted as "unbeatable." Behind the scenes, Lister — who actually shared mutual respect for Hogan and had no problems with his second billing — had very little formal wrestling training, and Hogan has written in his autobiography that he agreed to go easy on Lister because of this.
* Hulk Hogan III; but a lot of fans don't realize that Hogan had already bodyslammed Andre (...wait for it...) seven years earlier at a house show in Hamburg, PA. Hogan did it again on a televised episode of WWF All American Wrestling on September 11, 1983, in a match Gorilla Monsoon refereed but evidently forgot had happened by Wrestlemania III less than 4 years later. By that time the WWF had attracted so many new fans, who couldn't look things up on the internet yet, so most were none the wiser. (It also helped that Andre was at least a hundred pounds heavier at WrestleMania III than he was in the previous years, so Hogan slamming him at that point was a much more impressive feat.)
* Hulk Hogan. In both instances, a week after those two wrestlers turned heel on Hogan, Hogan would invariably come on and reflect on the now-broken friendship before accepting their challenge for his World Championship (or in the instance with Savage, demand a title shot against the champion "Macho Man").
* Hulk Hogan in Japan tended to make more of an effort and do much more mat wrestling than he did in the U.S (he could even bust out athletic moves like enziguiris). While on the one hand if he brought more of that style to his work in the U.S., he'd likely be thought of more highly as a wrestler than he is. On the other hand, that style would clash with the formula that made him so successful in the first place. Damned if you do...
* Hulk Hogan in the process. Though he would eventually be re-personed three years later.
* Hulk Hogan involved a switch from his trademark red-and-yellow tights to black tights with lightning airbrushed on them. He also started wearing black and white feather boas, and white-rimmed sunglasses, and grew a 5-o'clock shadow and dyed it black (which looked rather odd and sinister next to his platinum-blond hair and mustache).
* Hulk Hogan is also a bassist, even releasing an album with his band, the Wrestling Boot Band.
* Hulk Hogan is known for throwing around slang like "brother", "dude", and "jack". He still does it, even though he's well into his sixties and long-retired.
* Hulk Hogan is so recognized for his mustache that when it was shaved by the Dungeon of Doom in 1995, it precipitated a full fledged "turn to the dark side" where he wore all black and cut bizarre promos while brandishing swords, talking about having his then ally the Macho Man bringing him Meng's head on a silver platter...
* Hulk Hogan). It regained some of its kick during Hogan's last WWE run as a good guy, but it was kicked out of far more frequently by the then-current main event

talent. Even though it's extremely devastating in kayfabe, there are some who aren't impressed: namely modern fans used to flashier finishing moves, and smarks with an axe to grind with Hogan for his backstage antics in WCW.
* Hulk Hogan match, the "evil twin" storyline was dropped and Earl "came clean."
* Hulk Hogan — a legitimate criticism of Jarrett, had it not come from Hogan. The fans of the Impact Zone, knowing full well the hypocrisy of that statement, didn't hesitate to boo Hogan out of the building.
* Hulk Hogan — saw Hogan trying to land a few punches to make the new heel go away, but the heel would be the one who would smile and Hogan would sell concern and fear ... just before he got his ass kicked. (All, of course, to sell tickets to future matches.)
* Hulk Hogan. Of course, Armstrong takes their first traps in stride before telling them that enough is enough because HE'S. NOT. LEAVING. This ironically wins their respect.
* Hulk Hogan out of nowhere after being out of the ring for some time, had betrayed him by doing so.
* Hulk Hogan, resulting in the crowd throwing trash at him and even one fan leaping up to attack Hogan.
* Hulk Hogan returned to the powerhouse-oriented wrestling of Sammartino, but Hogan would be portrayed as a cartoonish superhero rather than the more realistic presentation of Sammartino and Backlund.
* Hulk Hogan's autobiography, he was able to go out in public wearing a coat, hat, and glasses and not have anyone recognize him until he took them off.
* Hulk Hogan's early WWF themes was an instrumental version of Bonnie Tyler's "Ravishing".
* Hulk Hogan. Several people to this day claim that Hogan bribed Nick Patrick to intentionally count at regular speed, to make Sting look bad when he kicked out when he was supposed to (after "three"). There is no real evidence that Patrick didn't just make a mistake, other than general rumors of Hogan's backstage behaviors.
* Hulk Hogan signed on to TNA. He'd been wiped out by his divorce and needed the cash. This despite a reputation for demanding and getting exorbitant paydays during his career.
* Hulk Hogan's Mr. America disguise came about after he was "fired" in 2003. When he left the company, footage appeared revealing that Hogan took off his mask after a match.
* Hulk Hogan's Rock 'n' Wrestling and his menagerie pop by to stay with him.
* Hulk Hogan's Rock 'n' Wrestling: At least a few episodes were cobbled together into these and run in syndication in the late 1980s, adding in new dubbed dialogue from Brad Garrett to link the episodes together.
* Hulk Hogan's Rock 'n' Wrestling characters at the time, though it put the wrestlers into zany misadventures outside the ring.
* Hulk Hogan's Rock 'n' Wrestling featured an episode called "Ten Little Wrestlers".
* Hulk Hogan's Rock 'n' Wrestling, had a one-off episode, "Small But Mighty," where the wrestlers were transformed into kids, thanks to Hillbilly Jim's secret chili recipe and granny's magical herbs. The kids wreak havoc, of course, but end up foiling a car-stripping ring by episode's end.
* Hulk Hogan's Rock 'n' Wrestling ran his own junkyard outside of the ring.
* Hulk Hogan's Rock 'n' Wrestling, the good wrestlers are helping a friend run a hotel. Hulk Hogan couldn't tie his bowtie and Wendi Richter had to help him.
* Hulk Hogan's Rock 'n' Wrestling was another show of the impersonated-voices-plus-live-action-segments variety. It was expectedly average.
* Hulk Hogan's signature bald scalp with blond hair wrapped around and even the fu-manchu.
* Hulk Hogan's title, in a press conference where Justice stood up as the announcement was being made.
* Hulk Hogan, the most requested person from the Make-A-Wish foundation during the 1980's.

* Hulk Hogan (then most visible as an announcer) got carried away and began referring to him as "The incredible Hulk Hogan". Needless to say, Marvel gave Vince a call...
* Hulk Hogan, the one pro wrestler almost everyone in the world is guaranteed to know by name, grew up in Tampa and was billed from Los Angeles.) Many of the wrestling moves most enjoyed by fans today (the suplex, for example) were created in (of all places) Iowa during the 1920s and '30s.
* Hulk Hogan, Tugboat (who would rechristen himself Typhoon and join forces with Earthquake, another of Hogan's enemies) made a passing derogatory reference to Hogan, but nothing ever came of it other than a few short encounters in various battle royals.
* Hulk Hoganvaluing himself to get over a young guy... who then fails to get over due to weak early title defenses, drops the belt to an "old guard" guy and promptly drops back to midcard hell. And Hogan did it again to TNA. Luckily, as time went on it got significantly better.
* Hulk Hogan was often buried and humiliated. WCW seemed to go out of their way to make sure he looked horrible every time they held a show in his home town of Charlotte.
* Hulk Hogan was one of if not the biggest WWF stars of all time. However, when he brought the flexing, no-selling, All-American gimmick to WCW, fans started out lukewarm at best, and progressed to booing him and throwing his merchandise back into the ring. The negative fan reaction inspired Hogan to agree to turn heel, becoming the villainous Hollywood Hogan and forming the
* Hulk Hogan was panned by critics in 1987, but all of that criticism has since been obscured by its historical importance in wrestling history and for its enormous box-office draw. The quality of the match itself, however, is still fair game.
* Hulk Hogan were billed as brothers; either as Hulk and Dizzy Hogan or Terry and Ed Boulder, depending on the promoter.
* Hulk Hogan, which were decidedly Nineties (they wore a lot of black and had a "graffiti" graphique). Later when he re-joined WWE he reverted to his Eighties gimmick though, by which point it was nostalgic.
* Hulk Hogan. While fighting Hulk's character, the villain accidentally ran off the roof of a building and landed head-first in the empty pool of the nextdoor hotel. It would have killed him, but his afro cushioned the fall. Nonetheless, he needed to have a metal plate put on afterwards.
* Hulk Hogan (who is a natural blond, but started bleaching it as he got older) He was asked to dye his hair red during his first run in WWF (since Hogan is an Irish surname), but declined because he was already balding at the time. He actually did end up frying off most of his remaining hair during a dye job gone wrong (Hogan's ex-wife Linda used to dye his hair, after their split, he tried to do it himself and messed up) and now wears extensions in public to maintain his trademark look.
* Hulk Hogan wore a pair of shades and looked absolutely badass while wearing them.
* Hulking Out: Shapeshifting when angry and often going on a rampage afterwards.
* Hulk is a Greek tragedy with science fiction, action, military thriller and romance.
* Hulk is gaining the upper hand on Captain America, just in time for Thor to make his entrance.
* Hulk is lead by centuries-old, but adolescent looking Agamemnon. His immortality kicked in while young. His many sons, grandsons and grand-grandsons looks older than him.
* Hulk is often a significant member of the team, another effect of the 2012 film. While the Hulk
* Hulkleberry Finn and can't find it. He asks Uncle Cosmo, who informs him it's under "Furniture". Skyler asks, "Why would Huck Finn be under 'Furniture?'" "Because it's just the right thickness," Cosmo says as he retrieves the book from under an unsteady chair leg.
* Hulk-like transformations destroy his clothing, except for his underwear. It takes him a while to revert to his human form, so the story tends to end before he

does so anyway.
* Hulkling. And like his father, he ended up dying a rather tragic death.
* Hulkling, they both make it clear they’re willing to kill to protect each other.
* HULK MASH!-Up, appears human aside from his purple skin tone, but he doesn't have a human form to revert back to unlike Bruce Banner. Whether he really is human or a human-like species has not been confirmed by the creators.
* Hulk movie, the Hulk is attacked by a squad of 4 tanks. He throws the first one like a hammer, rips the second one's turret out, then proceeds to beat the crap out of the third one with that same turret, and finally disables the fourth by bending the cannon muzzle to aim at the gunner. It is awesome to behold.
* Hulk novella this is how Bruce Banner was able to restock himself with clothes - he kept accounts in several banks in larger cities, and he had his ATM cards stuck in a secure location in his clothes so when he Hulked Out he could get at the money.
* Hulk once traveled to a future ruled by a brutal being called the Maestro, who had killed all the other superheroes and
* Hulk Out from his regular, humanoid bug form to a giant, mindless monster. This first happened when a group of Neo-Nazis attacked him, and he killed them all in self-defense.
* Hulk Possibly the definitive in strong but unskilled; who needs skill when you can lift mountains?
* Hulks Out by mistaking what other people say for gay questioning\innuendo.
* hulks out. When he's not driven into a rage, however, he retains his gentle and kind-hearted personality from when he was a human.
* Hulk Speak: A character speaks in third person and uses incomplete sentences.
* Hulk Speak. He relies on the much smarter Nidhiki to tell him what to do.
* Hulk Speaking dullard soon after transformation, but once his memories are restored, he acts like his pre-transformation self thereafter.
* Hulk Speak. There are low intelligence journal entries for quests you can't undertake as a stupid character, just in case you boosted your intelligence with a potion specifically to access them.
* Hulk Speak to talk like that to smart people, like Arcade Gannon, as they have normal conversations with everyone else.
* Hulk Speak, while the TV series simply had him be too dumb to string a sentence together.
* Hulk's screen was divided into comic book panels for a scene or two.
* Hulk's skill level fluctuates almost as much as his strength. His strength is dependent on how angry he is, while his skill level is largely dependent on which of his many
* Hulk strange) in order to transition between them. Strangely, actual panel-like transitions tended to be used sparingly.
* Hulk surprisingly get along because of the similar tone and dark uniqueness of both Marvel-related films. It also helps that both focus much more on character development.
* Hulk takes a whopping 40 minutes before you even get to see the jolly green giant on screen.
* Hulk: The End one there is. As he sits there, the Hulk realizes he's cold.
* Hulk: Ultimate Destruction example, it was supposed to be comic-book canon but didn't end up fitting properly.
* Hulk villain the Leader seems preoccupied with creating more Gamma-powered mutates like himself.
* Hulk Vs. features the Weapon X program cloning babies in jars. Deadpool is creeped out by them and idly mentions wanting to kill them when they're done.
* Hulk Vs.. His introductory scene involves him sniping Wolverine with tranquilizers, and then lightheartedly (though ironically) greeting him as Logan passes out.
* Hulk vs. Wolverine this seems to be Deadpool's role, though he kills drama rather than romance. For example, as the Weapon X members resolve to hunt down Wolverine

and there's the traditional menacing shot of the team assembled and ready for violence, Deadpool shouts, "Strike a pose!"
* Hulk vs. Wolverine, we get Deadpool, who lost an arm, and was stomped by Hulk. His reaction? A joke ("Could you give me a hand?") And "Ow..." Justified by his Healing Factor. All he has to do is reattach it. Deadpool was more depressed that Wolvie slashed his favorite gun than losing his arm.
* Hulk went out of its way to show that no-one died during the Hulk's rampages. Although in the final fight scene of the movie a helicopter-borne minigun fires a 20-second stream of bullets into a number of city buildings.
* Hulk who proceeds to threaten her. This comes to pass in her adult years, when she first encounters Bruce as the Hulk but instead of hurting Betty, he protects her from the Gamma Dogs sent after her by his father.
* Hull classification numbers are similar to current navies with the exceptions of Dreadnoughts (DN) and Super-Dreadnoughts (SD). Later Super-Dreadnoughts built to carry and deploy missile launching pods are referred to as SD(P)s but are numbered in the SD sequence without distinction. When LAC carriers come along they get the designation CLAC.
* Hullo Russia, Goodbye England begins with a much-decorated RAF bomber pilot struggling to find a role in post-war Britain after the excitement of flying missions over Germany in World War II. After seventeen years of working as a mercenary and flying covert missions for employers including the CIA, the RAF head-hunt him to fly the front-line jets that would have delivered Britain's nukes to Russia.
* Hullo Russia, Goodbye England, Silk's crew does this to a Russian spy "trawler" in the Atlantic near Scotland which is eavesdropping on their comms. While they are strictly forbidden from sinking it, they fly over it at mast-top height then stand their Vulcan jet bomber plane on its tail to give it the benefit of the back-blast from the engines. The ship stays afloat, just about, but its sensitive and expensive electronic systems are shot to pieces.
* hull points, defence against normal attacks, defence against critical hits or a mix of two or more of those. The mixes give less of each individual attribute.
* Hulls are designed to withstand pressure diferentials. It is the same difference for a space-ship with 1 atmosphere of pressure inside (1 atm = 15lb/sq in = 10^5 Pascal) whether the pressure outside 0 atm of space or 2 atm from 10 meters depth of water. Assume they strengthen the Hull to withstand 4 atm difference, then the ship can go down 40 meters etc.
* Hull strength in Star Trek is often established to be the result of the "Structural Integrity Field" as opposed to the physical construction of the hull. Many references are made to diverting power to this system when circumstances create increased hull stress. Operating in tandem with the "Inertial Dampeners" (or Dampers), starships are able to absorb kinetic forces that should tear apart the hull and pulverize the crew inside. The implication is that, without power, the hull alone would not withstand most of the situations they encounter. The Probe has been draining power from starships for the entire movie, and is clearly the cause of the crash in question, so it is actually far more likely that the ship should have been completely destroyed on impact.
* Hull Zero Three - all but one of the Destination Guidance team were dead and decomposed in their cryonics pods. It is also heavily implied that the 'biogenerators' [Teacher/Sanjay invents this term to describe the birthing systems] are not supposed to be functioning—they are supposed to create Factors on arrival to prepare the target planet, or in the event that the sleeping crew were killed, birth a new one. Even if there was still part of the original crew in the Hulls, they are dead after Destination Guidance shut off fuel transfer to the Hulls' engines, and for Hull Zero Two it was practically guaranteed when it was gutted by meteorites.
* Hulmuth von Moltke the Elder have a plan, once things get started, it can only help so much.
* Hulu) admitting that television does, in fact, rot your brain and that Hulu will rot it even more due to its convenience. They then admit that they are aliens who

want to drink your liquefied brain mass.
* Hulu ads go on to say things along the lines of "don't do this, because it'll ruin everything else forever." And then it goes on to say that Hulu is the same way.
* Hulu, a video-on-demand service, featured celebrities' cheerful claims that they are aliens, and are using methods to render human brains both inert and palatable.
* Hulu claim that the service's owners want to melt your brains with TV, because they're evil aliens that feed on brains. True story.
* Hulu.com offers a RIDICULOUS amount of professionally subbed anime. And it has the entire series too. No downloading necessary. It even has a few dubs, though those are harder to get the rights to. Especially if the dub is still airing.
* Hulu does this a lot. On the plus side, there's only one commercial. On the other, it's
* Hulu formerly had the entire fifth season (as well as some fourth season episodes) marked as TV-MA, even though they use the FOX TV versions, which are edited for content (Season 4 is actually mostly uncensored). This appears to have been fixed, as they all carry a TV-14 rating now. Season 5 episodes still have
* Hulu had an ad for a Toyota vehicle that was excited about the "limited commercial interruption". The woman in the commercial asks, "Have you ever seen a 5-second ad before?" When it gets to the first commercial break...
* Hululu, an anthropomorphic girl based on his species. He would fight ferociously whenever zookeepers tried to remove the cutout and when they were forced to temporarily take it away during a storm for fear it would be destroyed or blow away, he became visibly stressed, forcing them to return it once the weather improved. He even took up a courtship stance near it at one point and was visited by Hululu's voice actress for a meet-and-greet.
* Hulu offers free video streaming for popular TV shows and movies. Signing up for "Hulu Plus" expands the available video library significantly, as well as letting you watch (some) streams on consoles, handhelds, tablets, phones, etc- Anything that isn't a PC or Mac. Unlike other freemium services, paying for Hulu Plus does not remove the advertising.
* "Human 3", aliens capture a sample human and, because of what he says because he's a Conspiracy Theorist, decide that humans aren't a threat and don't need to be annihiliated after all.
* Human Accomplishment by Charles Murray starts with a chapter intended to evoke the Time Abyss, by tracing back human society in 400-year chunks.
* Human After All: Both Robotboy and Robotgirl have the same large, spiky hair in order to hide their robotic head nodes. It fits the animesque aesthetic of the source cartoon.
* Human Alien character being in a relationship several decades ago but forced to leave his girlfriend by another member of his race before she realizes that he doesn't appear to age. Many years later, he accidentally encounters her on the street, as an old woman. She immediately recognizes him, but no one believes her and assumes she's just senile.
* Human Alien delegation is awaiting the arrival of Tau'ri representatives. They talk about what they've heard about the representatives' leader, painting him as a brilliant negotiator. Then out of the gate comes O'Neill.
* Human Alien Discovery: The human of the story discovers it wasn't precisely human as it was told.
* Human Alien do this early in the movie. Unusually for this trope, we see how they do it.
* Human Alien empire that had simply considered anyone outside their borders insignificant. The news that space was already colonized - by other humans - did not go over well on Earth, and the Interstellar Wars were the result.
* Human Alien he consumes, but he has an extra head and can somehow control how much of the alcohol goes to each one, allowing him to remain totally sober in one head while the other gets blind drunk.
* Human Alien. He tries to accomplish this by picking them up in bars with cliched pick-up lines, to no success.

* Human Alien. It's also stated that centuries of studies and attempts have resulted in a fine-tuned system for how this trope is supposed to be done to avoid catastrophic consequences (which have happened in FDAC history, resulting in the destruction of several native cultures). One of the biggest rules is to never interfere in a post-Medieval culture.
* Human Alien: Musa appears Asian, her parents' names are obviously meant to 'sound' Asian, and some of the outfits that she wears, are obviously based on Asian fashion, as are her mother's in flashbacks. Although it should be mentioned the planet's princess, Galatea is Caucasian, suggesting the planet is more diverse than it seems.
* Human Alien races, so Quark's hiring practices may just be him milking the biggest share of his potential customer base. For all we know, he might have some non-humanoid dabos who come in one night a week, to appeal to his more exotic-looking customers.
* Human Alien races, you may also hear/read "Earth humanity" when referring to the people of Earth.
* Human Aliens) aboard. The aliens are actually mercenaries, hired to "cleanse" Earth from humans for re-settlement by their employers. Roswell is specifically chosen, because the military base there has an atomic bomb, which one of the aliens (posing as a nuclear physicist) modifies with alien technology to boost its yield to allow it to wipe out everyone on the planet. However, he ends up falling in love with a beautiful widow and becoming fond of her son. He kills his partner/ex-lover, stops the countdown, and departs in a one-man ship to ensure that no other mercenaries are sent to finish the job. The military promptly covers up the event. Before departing, though, the alien reveals that Earth's humans are descended from a group of alien prisoners, whose transport crash-landed on the planet millennia ago.
* Human Aliens. According to the art book, however, they're most likely humans.
* Human Aliens Although magic enables telepathy, so a translation effect as an extension of that makes a certain amount of sense. As for the devices, one can assume that they are speaking Midchildan or Belkan, rendered into English or German for the sake of aesthetics. In the non-translated manga; a random TSAB team training in the field is singing a marching song in English. It would seem actual English is the language the TSAB speaks.
* Human Aliens: An alien which looks, sounds, and to some extent, acts human.
* Human Aliens, and makes the non-human characters easier for the audience to visually empathize with.
* Human Aliens are the foreigners since the setting is mostly on Mid-Childa or elsewhere outside from Earth.
* Human Aliens by the villains. It sorta drifted to mean the people as well as the place.
* Human Aliens continuously circumnavigate the world. Each horde is divided into clans. A clan chief is called a Qarth. The leader of the entire horde is called a Qar Qarth (sort of like King of Kings). His heir apparent is called a Zan Qarth. The Tugar horde has a title called a Sword Master, which refers to the highest-ranking general, and the Qar Qarth's second-in-command. The Merki horde has a similar title called a Shield Bearer, although Shield Bearers combine general duties with that of bodyguards. At least two Shield Bearers are mentioned: one to the Qar Qarth and one to the Zan Qarth. A Shield Bearer's primary duty is to the horde, so one of his responsibilities is to kill his charge (with honor, if possible) if this will benefit the horde.
* Human Aliens, giving rise to warmer seasons when humans can rule over phagors instead.
* Human Aliens. He ends up becoming their king by claiming to predict the future (in fact, he's using his knowledge of written Ancient language to translate future knowledge inscribed by a time-traveling Ancient). Even after his revelation that he's been lying about his powers, his people still want to keep him as their king, as he actually did a lot of good things for them (e.g. built a windmill, wrote a code of laws).

* Human Aliens human, taken from Earth long ago) are a few thousand years old. This is accomplished in almost every instance by body swapping. The only exceptions are the Wraith and humans who are immune to all illnesses.
* Human Aliens (including primitive cultures living on the same planet). The revived series reverted to using it as the name of the race - with the Eleventh Doctor episode "A Good Man Goes to War" even establishing the existence of a specific form of Time Lord DNA - until the Twelth Doctor's run started making the distinction again, and even then the term is used to refer to both the few individuals with the rank and also the culture in general.
* Human Aliens (including the Doctor himself) and one human. And a shapeshifting alien android who only made a couple of appearances.
* Human Aliens. Mahr Vehl had extensive cirugy to look like a human being and infiltrate SHIELD.
* Human Aliens (of which there are many, especially in pre-2005 stories) or far-future descendants of human colonies.
* Human Aliens should look like gibberish to them without proper references. The aliens' own written language looks like a series of lines, crossing one another at 45- and 90-degree angles. When reading them, an alien appears to use his palm as a reading aid by turning it to follow the line.
* human alien staying at the Callahan house states that he is actually the human and the humans are humanoids.
* Human Aliens). Though whatever the crazy space slug did, it doesn't seem to put Jim Raynor off (or indeed most of the fans).
* Human Aliens when Vivio uses a standard Mid-Childa cellphone to instantly send a picture to her family and friends, even though some of them are living in different planets and dimensions.
* Human Aliens, which is the one showing the Ferengi more prominently, Quark, Rom and the Ferengi King, the Grand Nagus, all show attraction to the female humanoid characters such as Major Kira, and in one episode Nog and Jake date two Bajoran teens. Considering that the few Ferengi women we have seen are not by any means attractive by human standards, these definitely apply to this trope.
* Human Alien telepath or from a race of humans who have artificially modified themselves to possess psionic gifts through cloning and genetic engineering? The series is confused on this issue.
* Human Alien whose body has been "rebuilt" at least once; this includes various robot parts and human lungs. He also mentions that his current left hand isn't the original - he won it in a game at some point.
* Human Alien, Zeo Gattler, is the series' equivalence to Dessler. He even shares the title of "Leader".
* Human All Along: An apparently nonhuman character is revealed to be human.
* Human Alliance, Orcish Horde, Undead Scourge, Night Elf Sentinels are Balanced, Powerhouse, Subversive, and Cannon respectively for the most part. Human infantry units are decently strong and decently cheap. Their spellcasters have versatile skillsets, with Sorceresses debuffing enemies and Priests to heal and buff allies. Orc units are powerful, but more expensive. What support abilities they have is mainly focused on buffing their already great damage output. Undead relies on sheer numbers, primarily through their Necromancer's ability to create skeletal minions from corpses. Night Elves lack the brute strength of other factions, but they excel in ranged combat and their units can become invisible at night.
* Human (and animal) reflexes occur without any conscious thought. The purpose of most reflex actions is to withdraw a part of the body that is being exposed to harm from the harmful situation as quickly as possible. If you had to think about it consciously, it would add a few vital tenths of a second to the reaction time which could result if a lot more damage being done. For example, the reflex that causes to withdraw your hand from extreme heat is triggered at the spinal cord. It's also why the pain of getting burned doesn't hit until a second or so after the burn occurs. The spinal cord will have already withdrawn your hand before the pain stimulus reaches your brain.
* Human and Martian zombies also find nothing appetizing in Billy's head.

* Human art, however, is widely appreciated, with alien characters quoting
* Human babies. Without their little pink or blue onesies, they're undeniably
* human, bat, and bird DNA, so he wound up with bat wings, with a few feathers here and there, in place of arms.
* Human biology states that wisdom teeth should grow in, but some people have a hereditary condition that prevents this from occurring. While this is technically a genetic defect, it only works to one's favor in an era of modern dental hygiene.
* Human biotics (people able to manipulate dark energy, granting them
* human bodies comprising some of their parts, and can become so huge and mutated they can't even move.
* Human body quickly builds up a tolerance to most alkaloids (ranging from the relatively harmless caffeine to opiates, nicotine, atropine or cocaine), which drives people slowly to higher doses and addiction. Nicotine from tobacco, in pure form, can kill a fully grown human in amounts as small as 30 mg,
* human boy Edmund into a kitten as a matter of preference: "Kittens are more digestible."
* human brains used to disrupt psionic powers and one of the main characters started the series as an organ runner.
* "Human" by Rag'n'Bone Man was a relatively unknown song until November 2016, when it skyrocketed to #3 on the British charts and became a runaway hit in the UK (and eventually worldwide) after it was featured on
* Human Cadence, like her Equestrian counterpart, is this for Sci-Twi, comforting her during her post-Friendship Games nightmares, and
* Human Cannonball: Launching yourself out of a cannon is a useful form of transportation.
* Human Cannonball: Though not restricted to circuses, "firing" someone out of a cannon is a textbook act in them.
* Human Cannonball to find asteroids. Ao reminds her it's not possible.
* human cargo, the person you're transporting will join you in the hot spring and later give you extra Likes.
* Human Centipede Martin is suggested to have spoken offscreen numerous times, even making phone calls, but otherwise never actually says a single thing outside of a few weird squeaks and grunts.
* Human Centipede: The Musical, even more so than his film counterpart.
* Human Centipede: The Musical, Steve retains his cheerful demeanor even when he wakes up tied to a bed and finds out that he’ll be part of a human centipede.
* Human Centipede: The Musical tend to dismiss any suspicions that would hinder the plot.
* human-centric and similarly elegant internal designs. They are still, however, solid grey or grey-blue in color.
* Human characters in some shows and comics are drawn with hands that look like paws, in other words, their fingers don't taper the way real human fingers do. Though, that could be because some artists have a hard time drawing hands.
* Human Chess: Chess played where the pieces are actual people... sometimes to the death.
* Human children are born with both their child and adult teeth already developing inside the jawbones, so x-rays taken before they lose their first set show a
* Human civilian transports tend to either be large spheroid designs (allowing for a rotating section for the passengers) or spindly container ships, with a fair amount of modularity (
* Human civilization was also more powerful than the Imperium of Man is presently, at one point. Their leftover weapons are some of the most powerful tools the Imperium has at its disposal to this day, like
* human-colonized Mars. The portals (or Arches, as they're called) are intelligent enough to only allow manned vehicles traveling in a specific direction to pass. Each world in the "chain" (except Earth and Mars) has two Arches, linking the "chain" between the two "end" worlds, with environments growing progressively less Earth-like and more Mars-like as one travels from Earth to Mars through the portals.

* human counterpart and both times being spotted by Pinkie Pie after she runs away.
* human crimelab would close a lot of cases, unless you actually had to go to court, that is.
* Human culture is universally appreciated. While the rest of the galaxy has their own cultural output, human culture is
* Human Curiosity. Among other things, sequel fic has several chapters telling their stories.
* HumanDescent on deviantart.com loves doing digital manipulations of this nature.
* Human Disguise: When non-human beings somehow change their appearance to look more human.
* Human Drusilla, who was very religious, was a lot more chaste (as Angel puts it) than her vampire self, or say,
* Human, elf, dwarf and qunari women are captured by the Darkspawn and force-fed Darkspawn blood. In order to survive they have to give in to the urge to eat the others which drives them mad and turns them into Brood Mothers
* Human embryos start out with tails and gill slits. A 6-week-old embryo looks less like a human and more like a fish. The tail eventually disappears (at least in most people)...and the gill slits migrate up from the neck area to the head to become
* Human emotions are heavily dependent on hormonal status. Replacing of internal secretion glands certainly will lead to changes... For example, adrenaline surges, makes humans more susceptible for emotions, like fear. With automatically administered adrenaline, such reactions will not take place. Same applies for some other hormones, like testosterone. Summing up, brains in jars likely to have much more stable moods due to automatically regulated hormonal balance.
* Humane Tyranny, those in the Population Reduction Agency don't know much about the rebel alliance, but when speculating, they refer to them as terrorists, and law enforcement agencies might share similar views, at least officially. But considering that the rebels are trying to stop the government from killing one innocent person a night, they would not see themselves as such and neither would most civilians.
* human evolution has deviated along two paths. The mentally superior race explain that they can devise a backwards time-travel device for our characters to use within five years. Cut to five years later where we find that the brainless apes have sacked the settlements of the more intelligent, reasonable species. That last part may have been a reference to how the Morlocks appeared to be nothing more than brutal savages but were actually maintaining the machinery that supported their Eloi cattle.
* human experimentation, and the creation of human beings for experimental purposes.
* Human-faced Carp is a type of hybrid breed specifically to have what looks like a human face. What look like human eyes are actually the fish's nostrils.
* Human Fluttershy does this in a flashback after trying to recruit volunteers for the animal shelter and being ignored.
* Human-Focused Adaptation: An adaptation reduces non-human characters' roles so the work focuses on newly-created human characters.
* Human-Focused Adaptation: Source materials that focused on the cute animals/mons/critters are now shifted to focus on the human characters instead.
* Human-form replicators can interface with technology (particularly Earth computers) by sticking a body part, usually a hand, directly into the machine. Apparently this also works on humans, as the human-form replicators can literally get inside their victim's heads (though it is
* human" from the first season, breaks into the apartment of his vampiric ex-protégé Penn with no trouble. This also applies to half-demons such as Connor or Billy Blim, even if ordinary humans also live there.
* Human Giant - One sketch featured astronaut Cliff Tarpey who created his own reality TV show called "Lunatics" in which he and two other astronauts capture people, hunt them down, and kill them on the moon, for entertainment purposes.
* Human Giant that goes wrong when one of the extras goes on a real shooting spree.

Since the camera man dropped the camera while running away, the show makes a re-enactment of the re-enactment. The show ends with the host being shot by the camera man and a preview of next week's re-enactment of the host getting shot.
* Human Giant uses "Romantic Rights" by dancepunk band Death From Above 1979
* Human girls sometimes show interest in any incarnations of Ryu, the protagonist of the
* human-hating man; he was probably mad to start with, though. His followers, the Devoured, are normal humans who may or may not have liked the Devouring Earth's demands, and turned into freakish monsters with amazing powers but utterly subservient to Hamidon's insanity.
* Human Head on the Wall: Displaying a decapitated head on one's wall.
* Human Head on the Wall: Mounting the head of someone you killed on the wall.
* Human Head on the Wall: Seeing one of these is a clear warning to stay the hell away!
* human. He gets so mad that he has to be dragged back to Arlong Park by his mooks so he won't destroy the village in his rage.
* Human History and future arcs are still planned with no end in sight.
* "Human Horns" (noses) are valued as aphrodisiacs, most likely due to a misguided assumption it's the human
* Human Hummingbird: A character flailing their limbs rapidly to express excitement or fear.
* Human infantry are squishy, heavily-outnumbered and armed with weak but massed ranged weapons. Rather than set up kill-zones and
* Human infants sometimes find absurd ways of moving before they can walk, such as butt scooting, bunny hopping, leg shuffling, and even back-crawling.
* human. In general, societies outside the Republic are likely to be run this way regardless of species, since they're usually ruled by autocrats who want to be free of Republic laws and Jedi enforcers.
* Human in possession of eldritch knowledge (which turns out to be that Equestria is fictional).
* Human Insurrectionists. The Covenant just so happened to show up shortly before the Spartan-IIs first received their iconic MJOLNIR powered armor. Knowing this, its not hard to understand why ONI never intended for the very existence of the Spartans to go public in the first place.
* Human in United Equestria features a character named Mykan Stevens. His pony self appears in season 6, and acts pretty much like his real life counterpart.
* "Human" is more or less a general category for humanoid people, which includes the Hylians (typically the most common), Gerudo, Sheikah, and even
* Humanitarian activist Oskar Schindler and Nazi commander Amon Goeth owe much of their posthumous fame thanks to
* Humanity adopted some advanced technology from the Race and thus used their words for it; for example, lasers are called "shelkwank light" and optical storage disc players are likewise called "shelkwank players".
* Humanity already died out due to the game taking place a century after the Apocalypse taken place. The second game revolves around Death's attempt to restore humanity back to life in order to exonerate his brother War
* Humanity and which, when found by the few surviving humans, dispensed just enough scientific knowledge to enthrall them. Additionally, war technology pre-Seven Days Of Fire is still scattered across the planet, including the aforementioned God Warriors.
* Humanity are firmly in the "decline and fall" period, continuing to have a single strong government that holds
* humanity are the ones who made the final suicide call, seeing it as the only way to end their wars and give the planet a chance to recover without them.
* Humanity Came From Space: Aliens who are actual humans not from planet Earth.
* Humanity Came From Space: Humans are not actually from Earth, and only settled down here from another planet a very long time ago.
* Humanity Came From Space: Long ago, humans migrated to Earth from another planet.
* Humanity Ensues: An animal (or other non-human) is transformed into a human. They

usually aren't happy about the change.
* Humanity explores the universe, encountering aliens and getting into interstellar wars. Ex.
* humanity, faced with near extinction during the second invasion, had already launched their desperate counter-attack which culminated in Ender blowing up the Bugger homeworld.
* Humanity freely admits that discovering the Prothean archives on Mars jumped their technology level ahead over 200 years. Upon their entry to the galactic scene they were roughly on par with the turians in term of technological development, despite having only having mass effect technology for 11 years at that point, while the turians had possessed it for little over a millennium.
* Humanity, Fuck Yeah to determine whether they leave empty-handed or sell their victims into slavery. Using a device that emits an alarm if someone lies, the leader of the pirates boasts of being from a "Class 7 Rough World" and training in 1.4 times galactic standard gravity to toughen himself up. The opposing champion is an ordinary human from Earth: a "Class 12 Death World" with gravity 1.6 times galactic standard. After hearing that, the pirates all leave without uttering a word.
* Humanity. Governments provide free screening and genetic modification to prospective parents, and as a result everything from near-sightedness to cystic fibrosis has been cured. While IVF is the preferred method of modification, it can also be done on embryos and newborns out of respect for personal belief.
* Humanity had its own suicide troops in the form of the Spartan-III super soldiers, war orphans who were expected to die by the time they turned
* Humanity had mastered plasma weapon technology before the technological collapse of
* Humanity Has Declined but progresses to the equivalent of a Comiket's worth.
* Humanity Has Declined, but they tend to use sciencey terms when asked.
* Humanity Has Declined, fairies act as plot armor, in that the number of them you meet is tied directly to how safe you are from danger.
* Humanity Has Declined has the suicidal robot bread (technically carrot juice, not blood). Whether you think this is funny or horrifying is a fairly good indication of if you'll like the show.
* Humanity Has Declined: Humans as we know them aren't going to last much longer, most technology is gone, starvation is a real threat... but society has survived, and the standard of living isn't all that low.
* Humanity Has Declined is gradually fading away, even if they still have a few good years ahead of them.
* Humanity Has Declined: The human race is slowly dying out; exactly why is never spelled out, and the humans seem no worse than melancholy about the notion.
* Humanity Has Declined. The scarier part is when some of the things that only looked like this trope suddenly start to make sense on the fourth rewatch.
* Humanity Has Declined they'd be screwed. And they still have problems with it anyway.
* Humanity Has Declined. They've been known to go to disturbing extremes to get more sweets.
* Humanity Has Declined was theoretically a satire/parody of modern manga business practices, but mostly ended up addressing this. When the characters find themselves needing to make a popular manga, the local mangaka explains that the way to make a bestselling manga is not to craft a consistent plot but to keep stringing viewers along with constant cliffhangers, since they won't realize the plot holes until the end. However, once the audience catches on, the popularity of their manga drops like a stone.
* Humanity has entered into an arms race against antibiotic-resistant bacteria. Due to antibiotic overuse and misuse, several deadly diseases has evolved resistance to antibiotics. Doctors now have to use ever more powerful antibiotics and medical researchers search for new antibiotics, but the bacteria slowly develop immunity to the more powerful and new antibiotics.
* Humanity has extended its reach (different regions in fantasy, outside earth in

sci-fi, etc.), with the revelation that humanity's actions makes
* Humanity has uploaded their minds into robot bodies called imposters, in a bid to live forever.
* Humanity, horrified by the standard Galactic treatment of client races, has a desire to be this for its own clients. They give chimps and dolphins an almost unheard-of level of autonomy and involve them in the world government, refuse to impose any kind of indentured servitude on them, and begin seeking alien clients with an eye to protecting them from more hostile species.
* humanity in general is Low Culture, High Tech is a common thread of many primitivist and anti-industrial thinkers.
* Humanity initially considers the Covenant this, until the former begin reverse-engineering the latter's technology.
* humanity'. In the very next episode, Arthur compliments the 'humanity' of a Vogon poem, which Ford hastily corrects into 'Vogonity', decreasing the likelihood that this was a mistake.
* Humanity is actually long extinct, meaning YoRHa and Androids as a whole are fighting for an empty cause.
* Humanity is actually noted as being especially diverse compared to other species. The only reason there aren't dozens of subspecies alive today is because
* Humanity Is Advanced: Human civilization and technology are (more) impressive, at least when compared to that of other species in the universe.
* Humanity is also completely outclassed in space combat; most of their victories occur only when they manage to outnumber the Covenant by at least three to one, and even then they usually end up taking more casualties than they inflict. Indeed, human victories on the ground usually merely serve as delaying actions to cover for mass evacuations, since the almost-inevitably victorious Covenant fleet will generally just proceed to "glass" the planet from space. However, there are a handful of space battles where a well-led or well-fortified human force manages to either defeat or heavily damage a numerically superior Covenant fleet, examples including a skirmish between the
* Humanity Is Infectious: A non-human entity picks up human qualities after spending some time being around humans.
* Humanity Is Infectious: Spend some time with humans, and soon you'll start thinking and feeling like one.
* Humanity Is Insane: Humans are the craziest fuckers you can ever find. Yes, even normal people.
* Humanity is more willing to properly reverse-engineer what they can find, but most of the war-era technology they can put into the field is based on stolen Covenant knock-offs, partly because the Covenant own more archaeological sites, but also because genuine Forerunner tech is even more difficult to figure out. Still, the UNSC is more willing to improve on Covenant technology if they can, with Spartan MJOLNIR armor being superior to standard-issue Elite power armor (though the Covenant were far better able to mass-produce their own stuff during the war).
* humanity is much, much better at it. The Kzinti mainly conquer much more primitive races, and rarely fight each other in organized mass combat, so "war" isn't really something they've had much practice at.
* humanity is part of the Sentient Cosmic Force. We're the universe's way of knowing itself.
* Humanity is suffering from this due to the Blight reducing the level of oxygen in the air to the point everyone is slowly suffocating.
* Humanity Is Superior and scientific training. It helps he was stir crazy at appropriate times.
* Humanity Is Superior). But he was crazy at the time he said that line.
* Humanity Is Young: Humans are like inexperienced children, still learning how things work.
* humanity itself evolved from an experimental line of organic androids once created by said robots.
* Humanity never had the benefit of First Contact teams, as we had expanded far space and ended up meeting the Citadel species by accident. Specifically,

* Humanity once had access to true magic that anyone could use, but when humanity rebelled against the gods, the God of Darkness took his gift of magic back before he destroyed the human race. When humanity returned, they only had access to a mere semblance of that magic.
* Humanity on Trial: An alien or supernatural race decides to put the human race on trial, with our continued existence on the line.
* Humanity on Trial is put on trial, usually represented by one person or a small group of people.
* Humanity on Trial, that they want to collectively prosecute all of us for our crimes and sins. But can we prove them wrong?
* Humanity on Trial with Picard as their unwilling representative, but he wasn't the only or even main defendant then.)
* Humanity's allies, the pseudo-feline Orions, take the naming of the concept as an honour, not knowing the technology was imagined before humanity ever left Earth.
* Humanity's ancient past was a time when they would easily outstrip the Tau, but humanity has fallen. Due to
* Humanity's attempt at reclaiming Wall Maria by sending out 250,000 drafted citizens, many of whom came from the recently-fallen ward of Shiganshina, was done knowing that the operation would likely fail so that humanity would not starve from overpopulation.
* humanity's determination to fight) are starting to question Queen Celestia's campaign and are either defecting to humanity or get thrown to the gulags.
* Humanity's Fire being a favorite) to convince other species to cuddle up to their rule, which they enforce rather brutally when they need to. And their status is further aided by the various (nominally independent) client states that follow their lead. The only power that can fairly stand up to them is the Ismili Mergence, a confederacy of lesser powers, and that appears to be more luck and cunning than anything else.
* Humanity's hat is so big that when Humanity is threatened by a civil war, the other races (including some that are rivals or were at war) form an alliance to support and help the humans (and the rest of the galaxy) because the prospect of losing Humanity's moderating, diplomatic voice is unacceptable.
* Humanity's scientific knowledge peaked several millennia ago in the fabled Dark Age of Technology, and in the modern Imperium, technology is monopolized by the
* Humanity's technological peak was over ten thousand years ago, so things like advanced
* Humanity's unexpected rate of advancementAnd in the sequel series, surpass and subdue them in a matter of decades.
* Humanity's Wake: The story takes place after humanity has gone extinct.
* humanity taking the task of preventing the Spiral Nemesis from the Anti-Spiral after killing them.
* Humanity themselves had the Dark Age of Technology, where mankind created anything that could have been created and rapidly colonized known space. Then the Age of Strife happened, throwing everything to the crapper. Fortunately for humanity, after the Age of Strife came the rise of The Emperor and The Imperium of Mankind, which led to the
* Humanity: The N7 special forces, which represent the very best of the best of the
* Humanity then turned it around and did this to another civilization who were asking for Earth's modern weaponry — specifically, help with research into nuclear bombs — to prepare for a world war. O'Neill points out that
* Humanity was doomed no matter what happened. In one corner, the Angels trying to bring about 3rd Impact, in the second corner, SEELE trying to bring about 3rd Impact and lastly NERV (Gendo)
* humanity was simply too greedy and corrupt to use them wisely, but Goku's purity of character convinced him to change his mind.
* Human Jack-O-Lantern: What a cute jack-o— my gosh! Is that somebody's head?!
* Humankind Abh Empire, but independent planets are not given any choice about

joining the Abh Empire, and aren't always allowed to say no to the United Mankind either.
* Humankind has you chose either human sacrifice, or to substitute animals or perform no sacrifice. The Aztec culture special building lets you do this also, trading population for several turns of improved happiness.
* Human Kind Of has Judy go back and forth between sitting in her high school classroom and inhabiting the body of her future self at various points in time whenever she sneezes, thanks to a sudden cold. Her future husband isn't exactly pleased by this, as one of these moments is him trying to say goodbye to his family on his death bed.
* Humankind's technological peak was several thousand years ago, and its knowledge has regressed significantly following the galactic dark age that existed prior to the establishment of the Imperium. (They also had a
* Human Ladder: A group of people stands on each other so they can climb.
* Human Ladder a number of times, but they were not always (as a matter of fact, they were rarely) stacked in order from smallest to biggest.
* Human Ladder to get out through the chimeny. However, the second after their totem was formed, Lucky (at the top) loosened some soot, which got into Rolly's nose, and his sneeze caused the totem to collapse.
* Human Lanterns main villain, after being cornered, decides to end it right there by setting himself on fire.
* Human Lanterns, often goes on a killing spree while wearing a mask made from a human skull.
* Human Lanterns: The film's title comes from the main villain's penchant for abducting women and skinning them whilst unconscious, to make lanterns out of their skin.
* Human life cannot go on in extremely cold temperatures. Guess what winter jackets do.
* Humanlike Animal Aging: Animals are depicted as growing, developing and/or aging at the same speed as humans.
* Humanlike Animal Aging: Animals don't age like they realistically do.
* Humanlike Foot Anatomy: An animal's foot has the same structure as a human foot.
* Human-like robots are not common yet, but this still applies to industrial robots. It doesn't matter if all you need is robotic transporter which only needs to lift empty cardboard boxes, or cigarette blocks; this industrial robot is still designed strong enough to lift 2 elephants at once. There was a small accident in a cigarette factory when one robot smashed entire stack of full boxes without even noticing.
* Human-made "smart" AIs are an interesting example, as they are usually created by brain-scanning dead people (though Cortana herself was created from the flash-cloned brain of the still-alive Dr. Halsey). After a period of roughly
* Human-made "Smart" AIs (that is, ones that can learn new information) are created by this method. The resulting AIs are
* Human marines (which are not shown in-game, but appear in a splash/loading screen) are supposed to use this. Though in the actual game they're just used for boarding actions, instead of ground combat they use
* human measurement, which the angel was using." Since a cubit is a loosely defined unit based on forearm length and the angels in the book tend to be extremely alien, this really did need to be specified.
* Human mercs working for the Plutarkians on Earth are equipped like the Martian Rats, but are way less competent and get regularly humiliated by the three protagonists in spite of superior numbers;
* Human MIB — Typical mysterious gov't agent. May or may not be a
* Human military ships have the E-Web, a weak shield that softens, rather than fully block, enemy attacks. This one is actually seen on-screen early during the Earth Alliance Civil War, when the rebelling
* Human mission 5, "March of the Scourge," when Uther brings in a large number of knights to save Arthas in Hearthglen from a siege by the Scourge.
* Human Mom, Non-Human Dad: After he was deified in the New Kingdom, Imhotep's

father was said to be the god Ptah. Hatshepsut and some other Egyptian kings claimed their father was really a god instead of the previous king.
* Human Mom, Non-Human Dad whose mother is the human and the father is not.
* human movement, thought processes, and emotions yet still expected them to act and behave like mindless drones (makes sense....RIGHT?).
* "Human Nature": Although they've already met, the first time John Smith interacts with Joan Redfern on-screen is when they run into each other while he's carrying a large stack of books, and drops one, leading her to offer to help carry them.
* Human Nature, a man masturbates in front of another person, which is meant to show that he is unaware of society's taboos.
* "Human Nature". As it turns out, Jenny has been possessed by an alien lifeform; the alien's responses to Martha's conversation confirm that not only is she not really Jenny, she's not really human.
* Human nature being what it is, this is also especially likely to occur during quiet or solemn moments such as
* "Human Nature": Daughter of Mine is indicated to have killed the parents of the little girl whose body she stole.
* Human Nature - "Don't Say Goodbye" ("There's no reason why/this part of us should die./Don't say goodbye.")
* Human Nature Fallacy may say, the actions of a few cruel humans do not reflect the many.
* Human Nature Fallacy may say, the actions of a few good humans also do not reflect the many.
* Human Nature Fallacy: Not recognizing that the actions of a few good or evil humans do not reflect on the entirety of humanity.
* Human Nature Fallacy: The characteristics, personality and behavior of a few humans do not represent the many.
* "Human Nature" gives its villains an invisible spaceship, convenient for both camouflage and the FX budget.
* "Human Nature" has the Family wielding these, one zap and the target is dust.
* Human Nature - "He Don't Love You", which makes a good case for their partner being controlling and borderline abusive.
* "Human Nature", John Smith (aka the Doctor turned human, with no memory of his real life) and Joan Redfern believe Martha (who is posing as Smith's servant) is this, and ignores her when she's desperately trying to get John to be the Doctor again, as the aliens they are hiding from have found them.
* Human Nature - "Last to Know" ("I don't know why I keep hanging on./Even love's got the message, and it's already gone./Tell me why/am I always the last to know?").
* "Human Nature": Martha (who is black), working as a maid in 1913, is the subject of jeers from the privately educated kids in the school she's undercover in. She later says to a colleague that it's quite nice that at least the temporarily human Doctor is nice to her because not everyone would be nice...
* "Human Nature" points out, "God, you're useless as a human!" and has to save his butt a few times.
* "Human Nature" such a contraption in a few seconds. It's a pretty good sign the Time Lord is still in there somewhere.
* "Human Nature": The Doctor gives the Family of Blood exactly what they wished for — in the most horrific manner possible. They wanted the immortality of a Time Lord, so they got imprisoned in chains forged at the heart of a dwarf star, past the event horizon of a collapsing galaxy, trapped in every mirror in existence and dressed up as a scarecrow to watch over the fields of England, frozen in time. Yikes.
* Human Nature". The Doctor spends some time as a history teacher at an Edwardian school.
* "Human Nature": The Family possesses (and kills) four people so that they could leave their suspended animation and hunt The Doctor.
* "Human Nature": The human alter-ego which the Tenth Doctor temporarily assumed to hide from the Family of Blood is distinguished from Ten by his adopted name, Mr.

John Smith.
* "Human Nature". The part used in the episode, while on-topic, is still something of a mess, complete with a numbering error:
* "Human Nature" to hide from pursuers is for her to not let him hurt anyone, because "you know what humans are like."
* Human Nature": When the Doctor becomes (temporarily) human, the process is only seen during a few extremely brief flashbacks — and he's screaming in anguish the entire time.
* Human Nature who can imitate any animal he's eaten part of, including humans. If he does it while they're alive, he can also gain their memories.
* Human Nature - "Wishes" ("Sometimes I wish that I could turn back time/I'd kick myself 'cause I was way out of line.")
* Human Occupied Landfill Wastits are cruel, psychotic, and make most grown men wet themselves in terror if they know what they're dealing with. And the worst part? If you don't have the "spot wastit" skill, you can't tell the difference between the two, even if the wastit is walking away from a bloody corpse with a skull in one hand and a bloody butterfly knife in the other.
* Humanoid Abomination: An eldritch being which superficially resembles or behaves like a human, or is at least vaguely human-shaped.
* Humanoid Abomination: An incomprehensible horror in (somewhat) human form.
* Humanoid Abomination: A strange, incomprehensible being that is at least vaguely shaped like a person, or may even look (almost) human at first glance, but something is horrifyingly off about them.
* Humanoid Abomination - by which he means that it was the least likely to terrify the living daylights out of everyone.
* Humanoid Abomination dive from the collapsing Red Keep tower to the burning ground of King's Landing.
* Humanoid Abomination like him, there's no real reason to change things up.
* Humanoid Abomination Said abomination also has emotions, most prominently extreme paranoia.
* Humanoid Abominations and the generals of an army of creatures from the Realm of Madness that invaded the mortal world several millennia ago (before the modern nations, but well after the dragon-demon war went down). They lost and got sealed with most of their minions in Khyber, though unlike the Overlords they're still awake and can move around, so long as they don't come to the surface or try to go home, both of which they're prevented from doing by special druidic seals. They do still have a disturbing amount of leeway for Sealed Evils, though.
* Humanoid Abominations: an untrained psyker has no defense against the daemons of the Warp, and those who escape the Black Ships are basically time bombs until they're murdered by suspicious civilians, fall to Chaos, explode into a portal that lets daemons pour through, or any combination of the above.
* Humanoid Abominations because they don't acknowledge or understand its source.
* Humanoid Abomination She panics when she begins to develop feelings beyond attraction for the protagonist.
* Humanoid Abomination, were turned into their current forms by a series of spells.
* Humanoid Abomination who gains strength from the blood of fallen warriors (which she consists of). Her fatalities, therefore, involve her enemy's blood spraying/showering over her. Furthermore, her fatality tutorial informs us that Elizabeth Bathory is her favorite historical figure.
* Humanoid Alien: Because clearly our form is something that the universe itself finds enviable.
* Humanoid Alien, have a society that's strictly divided along gender lines, although neither men nor women seem to be seen as "superior" as such. Men and women do different jobs, don't normally socialize, and don't form romantic partnerships. The only acceptable heterosexual sex is a short-term formal arrangement intended for reproduction. In respectable society, all long-term romantic partnerships are between individuals of the same gender.
* Humanoid Aliens. The only features that make them look like Tyrannids is a bunch of Chitin plates and claws. If you didn't know better you would think it's a human

female in a costume.
* Humanoid Female Animal, but that won't stop the work from anthropomorphizing them into what is essentially an attractive human woman from the neck down.
* humanoid mammalian characters Divine, have human breasts and curves.
* Humanoid Monster Bem to teenage, trading his red jumpsuit for 2010's Tokyo fashion sense to boot.
* humanoid octopi and have been known to cocoon their victims to serve as food for their young.
* humanoid plant creatures. They're sometimes worshipped as gods by intelligent plants, druids and other wilderness residents, and they're powerful enough to grant divine magic to their worshippers.
* Humanoid robots are very prone to this. It's much more difficult to find a humanoid robot that is
* humanoid, sapient plant species. Piccolo does eat — apparently he got in the habit of it while on Earth. He may need to eat while living on Earth because he doesn't get as much sunlight (Namek is close enough to multiple suns that it never has night).
* Humanoids From the Deep and its 1996 remake, the women impregnated by the Humanoids die horribly as the babies rip out of their bellies.
* Humanoids From The Deep, though the titular Humanoids are mutant fish rather than aliens.
* humanoid TARDISes... it's mentioned as being especially creepy when they open to take on passengers.
* Human on the Inside, in which Midnighter's opponent thwarted him by declining to make the first move, reasoning that Midnighter could only derive the possibilities for the fight once his opponent made an opening move. Fans seem divided over whether that's really how the power was supposed to work.
* human-operated flying bomb might still qualify. Powered by rockets, the "Ohka" was loaded with several hundred pounds of explosives and launched at enemy ships from the underside of a "Betty" bomber. Screaming at their targets at over 500 mph in a dive, the "Ohka" was intended to be too fast for Allied ships to target effectively. However, because the rockets were difficult to steer, the effectiveness of Allied anti-aircraft fire, and the potential for the much slower "Betty" bombers to get shot down before the "Ohka" were even launched meant that the overall damage to Allied ships was negligible. Of the about 20 to 40 "Okha" deployed in combat, they only managed to sink or damage seven U.S ships.
* Human Outside, Alien Inside: An alien that looks like a human on the surface, but has some wacky parts and whatnot inside their body.
* Human Pet: Treating people like domesticated animals is even more dehumanizing than regular slavery.
* Human Pincushion: Someone gets a lot of weapons, such as arrows, stuck into him.
* Human planets are defended by UNSC Orbital Defense Platforms, Orbital "Super MACs" (
* Human Polity, exposure to which drives an unprotected human quite mad.
* Human Polity which are allegedly the product of molecular engineering, which produce 2D blasts.
* Human Popsicle: A person who gets frozen ends up regaining consciousness after being thawed out in the future.
* Human Popsicle astronauts killed by HAL flatline. They don't get better. The computer display changes to "Life Processes Terminated."
* Human Popsicle found out the hard way that the courts of his time ruled those like him could not own property and thus the assets he set up for himself were long gone.
* Human Popsicle, he is called a liar for claiming that he fought and won all those battles, as his relatively light losses "prove" that he hasn't fought a "true battle". Averted with the Bear-Cows, whose historical films show ranks of disciplined pikemen defeating hordes of enemies rather than singular heroes doing the same. This is because of their herd mentality, where individual lives don't matter.

* human popsicles are the equivalent of frozen food. When the last remaining colonist wakes up early, he's not too impressed.
* Human Popsicle: Someone gets frozen and then thawed out in the future.
* Human Popsicle, such as creating a hole in the ozone layer over Antarctica and blackmailing the British Royal Family with false evidence that the Prince of Wales had had an affair.
* Human Popsicle - The prisoner is not aware of time passing, but is frozen in one moment.
* Human Popsicle worked with a Lt. Patrick Chandler in the 1950s, but his descendant Patricia after he was thawed out in the future.
* human Protectors are also rational enough to realize that unrelated members of their species aren't automatically a threat.
* Human. Puck did say that the Mirror that was used to summon him wasn't Aladdin's lamp, implying even if he wasn't being a trickster, he couldn't kill all the humans as Demona wanted.
* Human Ranch, a web manga by Kankitsu Yusura has elves abducting a bus load of Japanese students to another world. There, to their horror, the high school students find themselves in a ranch that specifically raises humans as livestock. Humans that were taken have either joined as collaborators or ended in pens. Those in the pens have been stripped of their clothes and minds behaving like cattle.
* Human Resource Exploitation Training Manual" come off like this, especially when it comes to "coercive techniques".
* Human Resources, meaning, in this case, fleshy meatlings to play with.
* Human Resources to breed a race of transhumans that wind up wiping out the (original) human race.
* Human Resources: Using human bodies (living or dead, wholly or partially) as resources.
* Human Revolution a small chance of it killing someone (it seems some enemies are randomly given the trait of dying when hit with any non-lethal attack but a take-down).
* Human Revolution has a similar case where one way to complete a sidequest is to knock out or kill two drug dealers, but gives a special response if you had done so already after being given their names (unlike Dowd, though, Tindall just thinks you're overly violent).
* Human Revolution takes place after the Collapse, but with society slowly recovering.
* human rights abuse. So quarantining and experimenting on a Kryptonian, for example, wouldn't technically be illegal.
* Human Sacrifice: An unlucky captive is chosen to be ritually executed as a religious offering to a deity.
* Human Sacrifice for a forbidden spell. After that, Angela inadvertently teleports outside of the castle where she resides.
* Human Sacrifice offers to make Clara into one of the Vigil's members. Clara accepts under the pretense of "not dying".
* Human Sacrifice on the bridge. There's also a tradition stemming from these stories to sacrifice a goat or a chicken when first stepping in a new house for good fortune.
* Human Sacrifice or not?" debate in Stannis' faction in Act II stems in part from the fact Edric is still quite young and some members of the group are more willing to look past this than others.
* Human Sacrifice-quoting killer, but finding it isn't part of his quest.
* Human Sacrifice ritual. Roshag's soul was enslaved by the Sleepers, omnicidal powers from beyond the world. Their power forced Roshag back into his decomposed remains, to return as their Harbringer, a blighted abomination. Roshag is now driven by revenge unto that human, and doesn't mind becoming an undead monstrosity as much as becoming enslaved.
* Human Sacrifice. That takes a lot of guts... or perhaps just a lot of insanity (which is more likely given this is Chaos we're talking about).
* Human Sacrifice the Egyptians did this in the first two dynasties, and possibly

later as a form of execution.
* Human Sacrifice: The ritualized murder of other people, done as an offering to the gods.
* Human Sacrifice was a way to offer blood (in addition to other uses)
* Humans: Actress Emily Berrington has said Niska wouldn't define herself as having any particular gender or sexual orientation, though we only see her show attraction to women in the show, while there's no mention of a non-binary identity or something else.
* Humans actually have some of the densest muscles of any land mammal. Specifically: Polar bears, brown bears, and male black bears. Adult women, at about 130lbs on average, outweigh an adult grey wolf by about 30-50lbs.
* Humans Advance Swiftly: Humans quickly invent new ways for technology to be upgraded.
* Humans also have the ability to "fake out", i.e. convince an alien of just about anything, like draping carpets over your head makes for impressive evening wear, or that kissing is a perfectly socially acceptable way of greeting anyone. After all, humans are the coolest species in the universe, so they should
* Humans also occasionally get called "round-ears" on the grounds that they are the only one of the five main metavariants without pointed ears.
* Humans (and our ancestors) have a styloid process on our third metacarpal (the bone in our palms that is between the base of our middle finger and our wrist). That is a bone extension that lets us lock our wrists in place and isn't present in any other extant species of great ape. This allows us to manipulate tools with greater strength and dexterity than would otherwise be possible.
* humans and zombies duking it out, but most of it is in good fun and it's just a big friendly game of extra complicated tag. Human and zombie players will eat together on breaks, and often indulge in hugs, singing, trading war stories, and general camaraderie when the zombies are stunned and temporarily unable to kill.
* Humans appear to no longer have believers in astrology, as when dealing with the Regorians (with a belief system that's entirely based on it) some must have the basic
* humans, a prank goes too far when the Deltas bring Neidermeyer's horse into Dean Wormer's office and tell their new members to shoot it; the gun is only loaded with blanks, but the poor horse has a heart attack and dies anyway.
* Humans are also unique for our potential for evil. No other animal, even ones known to be very aggressive and cruel to their prey and/or each other, can best the human race in subjects such as torture, systematic oppression, genocide, destruction of the environment and other species, racism, and slavery. "Special" doesn't always mean something positive.
* Humans are an example as well. The human body is the host of a large amount of microflora. Most of it is located in the digestive system, but the skin and most mucous membranes normally have microflora as well. Removing these residents may result in problems with digestion or vulnerabilities to some diseases, which must be considered when the doctor decides to give you antibiotic treatment.
* Humans Are Average, humans can be any one of the alignments, with sourcebooks saying that "the best and the worst are found among them".
* Humans Are Average - humans have average stats and they can learn any language at character creation, a trait shared with partially human races like Half-Elves.
* Humans Are Bastards and have already blown it by ruining Earth; only Planet is worthy of deciding if they're worthy of living here, and it's implied that if Transcendence is not possible then they will wipe out every other human faction and then commit mass suicide to ensure that Planet is free of human interference. Yikes.
* Humans Are Bastards: Humans are uncaring, ungrateful assholes to each other.
* Humans Are Bastards: We're humans and we're assholes! Get used to it or screw off!
* Humans are called "temps" by elves or "softskins" by orcs depending on humanity's greatest failing in the view of that race. Elves are
* Humans are capable of surviving under extremely limited conditions on a fraction

of the surface of one planet. Spreading the human civilization beyond the confines of Earth would likely require adapting the human organism to survive both prolonged space travel and hostile environments of other planets. The only alternative,
* humans are cattle). Lorne, on the other hand, hates fighting, loves humans, and has the power to read people's souls when they sing karaoke.
* Humans Are Cthulhu: In the eyes of lesser life forms, humans are unusual and scary.
* Humans Are Cthulhu: When literal humans are viewed as being unfathomably strange or alien from the perspective of (usually more primitive) non-human creatures.
* Humans Are Diplomats: Humans will first try to talk their way out of a situation.
* Humans Are Divided: Some humans like blue, while others prefer red. There's always something that we can disagree on.
* Humans are everywhere, but mostly you might just see their feet or vehicles from the point of view of an animal character. There are only a few human characters that have a speaking role (Example:
* Humans are extremely good at finding new uses for existing tools. Most of the basic tools one would find in a toolkit small enough to fit in a woman's purse can be used either as weapons or to make weapons.
* Humans Are Flawed than how an Enlightenment leaning individual would define Idealism.
* Humans are generally a race of Glass Cannons in that our technological ability to inflict damage is much greater than our technological ability to defend against damage. They had to build NORAD inside a small mountain to
* humans are good at heart Social democrats, social liberals and moderate socialists generally wish to bring about a more egalitarian society which to its critics tends to anti-individualism. They are usually secular and scientific (natural and social sciences) take part in protests and believe in a strong central government that regulates the economy, and promotes progressive reforms as and when necessary (Enlightenment). Conservatives might be known for their yearning of the past and strong religious views (Romanticism), but this is coupled with their support for free markets and strong militaries (Enlightenment). European conservatives tend to be more explicitly Romantic, especially when they advocate the restoration of monarchy and aristocracy, or in modern times the sustenance of a strong bureaucratic and technocratic elite (Enlightenment Values for Romantic Ends).
* Humans Are Good: Don't be afraid of us humans, my animals! We know how to treat creatures!
* Humans Are Good: Most humans strongly believe and care about morality and justice.
* Humans Are Insects: Superior beings consider us to be insignificant and unimportant to them.
* Humans are "kine", i.e. cattle. Or "bloodbags", if the vampire is younger and less than polite.
* Humans Are Leaders: Humans (or all of Humanity) will help the other sapient races and species by leading the way.
* Humans Are Morons: Humanity is the stupidest of all sapient species.
* Humans Are Morons: Humans are idiots and fools, especially if compared to other sapient organisms.
* Humans Are Morons: Humans are portrayed as dumber than other sentient beings.
* Humans are most commonly referred to as Twolegs. They have also been called Nofurs and Upwalkers, as well as housefolk and workfolk (for pet cats).
* Humans Are Not the Dominant Species: Humans live on an Earth-like planet, but aren't the dominant animal on it.
* humans aren't just meant to inherit Creation, but that the terrifyingly-powerful Caretakers are nothing more than stepping-stones meant to facilitate Mankind's ultimate awakening. Humans are special because Creation is literally intended for them.
* Humans are prone to suffering psychological damage unless they're tranquilized while moving through it.

* Humans Are Psychic in the Future: The concept is self-explanatory. The science... not so much.
* Humans are slow, feeble, ignorant, nearly powerless, and only an actual danger to supernaturals in significant numbers. Until the supernaturals find themselves facing
* Humans Are Smelly: Aliens that hate the smell of humans, even if said humans are clean.
* Humans are so broken that everyone Outside player reading this page is a filthy human main.
* humans are so emotionally rich that they are almost impossible to drain in one shot and given time they can recover.
* Humans are Soldiers, since soldiers also know that peace is the end goal of fighting.
* Humans are Space Orcs blog are referred to with nonbinary pronouns. No word on whether these are biological sexes or gender identities, however.
* Humans Are Special, and that we broke past that ceiling, or will break past it.
* Humans Are Special a ship with anti-fighter lasers to a point were they overheat allowing heavy bombers to come in".
* Humans Are Special because they are the only race that invented the pizza-bagel even though neither pizza nor bagels are a unique food creation to just Earth.
* Humans Are Special flawed (ghosts are primarily only driven by their base needs, beasts lack man's intelligence and longevity) or not flawed enough (the Deva can live for millions of years, have all their worldly desires fulfilled with a thought and don't have any reason to improve themselves). Humans, however, are, with their short lives and shortcomings, just flawed enough to strive for improvement and just wise enough to achieve enlightenment during their lives.
* Humans Are Special. Nonpsychic humans get a higher standard of living, but have no voice in the Intervention or the Rebellion and are faced with draconian punishments if they're unable to fit in with humanity's psychic elite. And most of the Metapsychic Rebels are forced into Unity - no option B.
* Humans Are Special: We're unique snowflakes compared to other species.
* Humans are split between Nobles and Commoners, and then there's elves, who are segregated into an alienage and have few to no rights... unless they have magic, in which case they're thrown alongside other magically-strong humans into a Circle and lumped together as equal Mages with a scholarship, but are even more oppressed with a test of character that will result in death if failed and any illegal magic is grounds for execution. In most cases, the chain is Nobles->Mages->Commoners->Elves, while in Tevinter Mages and Nobles are swapped or merged.
* Humans Are Survivors, the immediate suggestion is to wipe Equestria out of existence once and for all.
* Humans are the dominant race in most settings, thanks to extra versatility with none of the mechanical drawbacks other races suffer. While other races have intrinsic situational advantages, humans can always pick up the right skill for the job.
* Humans are the most widespread race and divided between several nations.
* humans are the only creatures who kill members of their own species. Nearly all species do it, however humans are (so far) the only species that are known to feel good or bad about it.
* Humans Are the Real Monsters: Humans are among the cruelest of all sapient species.
* Humans Are the Real Monsters: Humans are regarded as worse than the beings considered monsters.
* Humans Are the Real Monsters: Humans are regarded as worse than the creatures they consider monsters.
* Humans Are the Real Monsters is still just as disturbing (if not far worse).
* Humans Are the Real Monsters: We humans are so bad that it makes those weird aliens look like angels.
* Humans Are the Real Monsters: Whereas other species are morally superior.
* Humans Are the Real Monsters: With the decline of religion in the philosophical

mainstream, such ideas as Good and Evil gradually shifted to a non-religious conception:
* Humans Are the Real Monsters, Yautja for some few more bits of pride and humans for resources they don't need, power or fun as well).
* Humans are this when we go to the Moon, as roughly one-sixth of the gravity we're used to means we can jump much farther than we could at home and carry equipment that would be much too heavy on Earth. Very few humans have ever been able to experience this, though.
* Humans are top tier predators, and everywhere we go, we tend to drive out or kill every other apex predator. since not all humans are equally capable or willing to do damage and not everyone is scared of harmless things. Also certain animals and plants are genuinely dangerous for humans.
* Humans Are Ugly: Non-humans find humans to be hideous in their eyes.
* humans are universal breeders and have reproductive compatibility with many sapient alien species throughout the universe.
* Humans are Useful'. So long as they are able to enforce the relationship through their technology, this trope remains in the second form... but expect us to keep an eye out for a chance to break free of our insect overlords, no matter how benevolent they seem.
* Humans are very common, and may be the dominant species, but only a few appear in the story, which is dominated by animal or fantasy characters (Example:
* Humans Are Warriors, they like to build up the region to make it more supportive of the Empire while dominating the economy through trade.
* Humans Are White: Most human characters in a sci-fi/fantasy setting are all members of the exact same race or ethnicity, especially the majority group in the region that the work originated from (such as white people in Western countries).
* Humans Are White was the more common trope. Where it still falls into this trope is that the crew is entirely male.
* Humans as a whole still follow lots of religions, but space-faring humans to a lesser degree. Ashley implies that she's seen as eccentric for having a religious belief.
* humans as well, they just had an over-emphasis on conservatism. The Third Imperium (ruled by a mix of both races) is a heterogenous mix of high- and low-tech planets.
* humans become the first race to destroy a mass relay, when Shepard crashes an asteroid into one to prevent the Reapers from using the system as a beachhead to mount their invasion.
* Humans being unique in some way (usually in contrast to aliens) is is a very common prompt theme on Reddit's
* Humans by Any Other Name: Alternate terms used to refer to humans, such as "Earthlings" or "Terrans".
* Humans by Any Other Name: Another species has their own name for humans.
* Humans can also be summoned as proven early on during the Forest of Death section of the Chunin exams. The scrolls the teams had to gather summoned higher ranking Ninja telling them they passed if they did it right (having at least one of each scroll) and rendered them unconscious if they opened them otherwise.
* Humans can also research and build Node Missiles, which are basically destroyer-sized missiles capable of FTL travel. While their intended use is to soften up enemy defenses (i.e. ships, satellites) before the arrival of the main fleet, they can just as well be used to conduct bombardments of planets from
* Humans can be somewhat strong, too," when offering to pair up with someone in battle in the Japanese version. Since she can say this to the army's Manaketes (dragon shape shifters) as well, the English version corrected it to "Taguel aren't the only strong creatures out there."
* Humans can be this to a sufficiently primitive race if first contact is sufficiently bungled as both Picard (in the TNG episode "Who Watches the Watchers?") and Kirk (in "The Paradise Syndrome" and
* Humans can convert Peasants into Militia that have the same amount of health but more armour, move faster and around the same damage as a Footman; this can only be

done at a nearby (
* humans changed by a Devil Fruit user, and all memories of the transformed humans are erased aside from those of the toys themselves. Those who lose in the Colosseum are fated to become toys...some of which are prisoners for rebelling against the Donquixote family. Oh, and also, Doflamingo is only in charge because he framed the last ruling family and won the public's heart with Engineered Heroics
* Humans, city elves, and presumably surface dwarves burn their dead. Spirits occasionally cross the Veil and possess corpses (or a
* Humans create whole new zones, such as when Tier Zoo did a "City Meta," defining which creatures excelled when in the human-dominated City environment.
* Humans decide to do this for the pequeninos ("piggies") at the end of
* Humans define the meta. It doesn't matter how good your build is if in any way the humans decide to move against you in force. The humans don't even have to decide to hurt you; the Anthropocene climate change world event is wrecking havoc in the meta, and when humans gather resources, build fast-travel networks, or build bases like farms, roads, cities, mines, and so on, your existence is contingent on being able to tolerate the humans' presence. Likewise, if the humans decide they like you or want to party up with you, you'll probably be fine, though they might do something like turn a powerful wolf into a pug or something.
* Humans discovered the first prothean remains on Mars, which with its lack of plant or animal life, moisture, or tectonic activity, provided perfect conditions to preserve mechanical equipment under the sand for 50,000 years.
* Humans don't have a monopoly on this trope either; ants have been known to form some
* Humans don't use the Gregorian Calendar anymore, but have switched to the "Stardate" system. Apart from being an interplanetary system of time, it also seems to take into account the relativistic effects of measuring time on planets separated by light-years. In the Season 1 finale, they thawed out three humans who had been cryogenically frozen in the 20th century. When they asked what year it was, Data stated that it was "the year two thousand three hundred and sixty-four, by your calendar" (he said it out in long-form because he was unfamiliar with it). This was the first time that a solid date had actually been given for any events in
* Humans. During the Ice Age and the time after, in which Humans first started diverging from their arboreal ancestors, were specialized to hunt large prey, such as mammoths, giant sloths, and similar, through a combination of throwing weapons, large numbers, and traps allowed humans to hunt down megafauna that relied on their size and bulk for protection with devastating effect. Outside of African species like the elephant, rhino, and hippo, which had evolved alongside humans, whenever humans migrated to a new area, that area's megafauna quickly became extinct. (Indeed, Mammoths survived all the way to 2000 BC on islands with no humans, until said hairless apes arrived, disproving the claim that these animals died out as a result of Climate Change).
* Humans. Dwarves are mostly exempt from this. More actively hostile versions are usually portrayed as a result of (ancient or modern) influence from the government and/or church, and less common in frontier areas.
* Humans effectively start out as this in the earliest story arc or two of
* Humans exist and everyone knows about them, but they are very rare in the setting. Other characters might be
* humans, followed by going to a council of kings with the intended purpose of murdering them all.
* Humans frequently call elves by the term "knife-ears." A less harsh but nonethless racist insult used in
* Humans from 40k may also count, as their original star-spanning civilization (before the Imperium) was destroyed due to a combination of warp storms and a robot uprising.
* Humans from a Cylon point of view. At the end of the Miniseries, the Cylons agree that they unfortunately can't give up pursuit of the human fleet even though it's left the Colonial solar system behind and just wants to get as far away as possible, because any survivors will inevitably return and seek revenge.

* humans from becoming the most powerful race in the galaxy, and they "laughed the blue off [her] ass." So now she serves drinks behind a bar. She's a little bitter.
* humans from roughly the current era. After a presumably nuclear war screws up the planet, the survivors idiotically decide that they need to find and launch more
* Humans have a better sense of rhythm than other species, which generally can't distinguish between a steady beat and an erratic one. Not only does this awareness provide a basis for numerous performing arts, but it's crucial for coordinating our actions when performing hands-on tasks (rowing, marching, harvesting, knitting, hammering) that require careful pacing.
* Humans have absolutely terrible defense and stealth, average HP and mobility, mediocre base power, but maximum intelligence. Moreover, humans have the ability to substitute intelligence for every other stat except for HP, and their game-breaking tech tree seems to have no upper bound and to change even the worst unfavorable match-up to their advantage.
* Humans have also had their asses handed to them by the Decapodians and the Brain Spawn. We can always blame
* humans have a policy of extermination for all xenos/mutants/heretics.
* Humans have a saying: 'Minbari never tell anyone the whole truth.' Delenn, a Minbari herself, acknowledges that there is some justification for that expression.
* Humans have been altering themselves with whatever technology provided since the earliest days of civilization. Tools, clothing, armor, and weapons are all ways that mankind has altered itself to be better suited to its environment. Just because our tools now allow us to modify the most fundamental part of our being permanently does not make these tools any less useful or any less ethical.
* Humans have done a pretty good job of trying to wipe themselves out at various points throughout their history. The Dark Age of Technology ended when the
* Humans have insurmountable physical advantages over other species, but with some serious downsides. Earth's comparatively dense, warm and humid atmosphere means that humans can suffer from altitude sickness if they exert too hard in the thinner, cooler and drier atmosphere preferred by most species. Humans must eat and drink more to stay healthy, have a whole battery of dietary needs that, if not met, lead to malnutrition, scurvy or BeriBeri. The human nervous system, being efficiently fine-tuned for high performance relative to those of nonhumans, is vulnerable to things such as intoxicants or hallucinogens. While this may sound like a case of
* Humans have overpowered abilities like Overhand Throw, Stand Upright, Speech, and Sweat.
* Humans have the Dragonhawk Rider's Aerial Shackles spell, which prevent the captured unit from moving
* humans. He assisted the Hell out of the galaxy, and it's heavily implied the Andalites were included (though how much he helped them while his organic proxy was living with them is unclear).
* Human Shield both deal with bystanders being used to protect a target. The former discusses the psychological coverage, while the latter deals with physical protection.
* Human Shield, draining HP to heal herself. Killing Rinoa through attacks that hit all enemies or by letting Adel drain all her HP results in game over.
* Human Shield: Someone grabs a hostage to be placed in front of them in order to dissuade enemies from attacking.
* Human Shield; the mook dies while Yonak escapes successfully. Dr Aphra lampshades this 'classic' trope, then forces a Hutt crime boss to do the same, figuring a giant (albeit slow-moving) slug will make an even better shield. Amazingly they both make it alive, only for the Hutt to get killed by a stray deflection shot while threatening to bring the wrath of Jabba down on Aphra for this stunt.
* Human Shield: Using a living person to protect yourself from danger.
* Humanshifting are only able to change into humans from their natural form.
* Humanshifting: Some shapeshifters only have the ability to transform into humanoids.
* Human ships are oblong and consists of blocks riveted to a central frame and are

the most utilitarian-looking of all the species: The only off part is the very noticeable ring structure around the engines (it's their faster-than-light drive). Because of this engine, human ships also have poor turret coverage on the back and tend towards front-heavy ships with forward-and-side firing arcs. While paint schemes for different sides makes some of the colour variable, the default ship colour for humans tends towards the grey with some red and green mixed in (by contrast, Tarka's ships are mostly bright red and deep green, the Hivers use beige, the Liir use turquoise, the Zuul blood red and the Morrigi deep purple).
* human ships — the human ships tended to have more non-grey colours and smoother lines.
* Human ships take a really long time to get anywhere with slipspace, so that explains why they haven't ventured beyond the Milky Way; the series itself takes place primarily around the Orion Arm.
* human ship that was supposed to wipe them out but was caught in a warpstorm. However, most other primitive species found by the Imperium tend to die via xenophobic planet cleansing.
* human silliness, he sits back down and downs all his drink in one gulp.
* humans implying that the reason why non-Covenant San'Shyuum are so technologically conservative (to the point where they refuse to study Forerunner ruins) is because they fear that their gods will punish them if they become too advanced.
* Humans in general. Our two-legged gait is highly efficient compared to quadrupeds, and we have excellent heat-regulation systems (sweating), plus extremely dense muscles. To compare, an adult man weighs about as much as a jaguar. Women are, on average, about 5" shorter and much lighter than their brothers, but they still outweigh adult male wolves by about 40lbs.
* Humans in general. We have no particular advantages over creatures like
* Humans in the Mirror Universe (the Terran Empire). Instead of greeting the Vulcans peacefully, as per the "real" timeline, Mirror Zefram Cochrane (even without the evil goatee) attacked their ship and stole all the technology they could find, thereby starting the aggressive and militaristic Terran Empire on its course.
* Humans invented pokeballs, giving them a bit of an advantage. On the other hand, however, as anyone who's played the games can tell you, those things only work two, maybe four times out of ten once you get to that level of play.
* Humans; keeping pests out of your garden and plowing up the ground for a new subdivision become the acts of evil gods.
* humans killed Ariel's mother, of whom, out of all their daughters, Ariel is the spitting image
* Humans Kill Wantonly, and we'll try to kill anyone or anything that gets in our way.
* Humans Kill Wantonly: Humans kill for petty/frivolous reasons because that's human nature.
* Humans may exist to further show how adaptive they are, and usually have their own defining traits.
* Humans may have made it to space on their own, but they received hyperdrive tech from the
* humans may suck at times, they are needed to make society function. After all, humans are social creatures.
* Humans: Mia triggers a device to destroy Hester which also affects her. She's revived afterward though.
* Humans mostly call the Covenant species' by UNSC designations ("Brute" is a lot faster and easier to say than "Jiralhanae"). Grunts are
* Humans Need Aliens: Aliens which protect humans from different aliens.
* Humans Need Aliens: We Earthlings must depend on people from other planets to save our skins.
* Humans, not being satisfied with the available choices, found a third way in the form of jump arrays. These are capable of jumping a volume of space to a similarly sized array anywhere in the galaxy.

* Humans of New York, a series of street photographs and interviews with people on the streets of NYC. This blog pretty much runs on exoticizing New Yorkers and implying that they're more inherently interesting than people elsewhere.
* Human spaceships should be grey. While some important parts may be coloured, the majority of the spaceship should be the colour of unpainted metal (
* Humans refer to Orks and Trolls, collectively, as "Trogs". Not to be outdone, the Orks call Humans "Breeders", which according to
* Humans, Romulans, Klingons and Cardassians collectively give notice and file suit against the race identified only as "The Precursors" for the irreparable damage caused to their respective native genetics due to the willing and deliberate insertion of the Respondents own DNA into the native life which permanently altered the ecology of the planet.
* Humans ("scavengers") are considered cute by dragons, although their dangerous nature makes them a bit of an acquired taste: Sunny doesn't understand the appeal until she sees a tame scavenger take out a tiny sketchbook and draw her portrait.
* humans special can get pretty thick, though. You can be sweeping enemy planets away turn on turn and the AI will usually refuse to beg for peace or surrender, even all the way to their end.
* humans' stargates) are both used as common means of travel. The stargates are faster, being truly instantaneous, but have several disadvantages compared to ships, such as being easier to prevent travel through, being too small to allow passage of anything bigger than a bus, and requiring preexisting gates that are hard to move (although it's not impossible).
* human standards". To Gwen's chagrin, Ben confirms Rook's opinion saying there's "no comparison" between Gwen and the females of Rook's species. Gwen's patience runs out when Kevin then quips "so to him Gwen would be like an orangutan wearing glasses?" and she launches Kevin and Ben out of the ship.
* Human Statue recounts how small children are often mind-boggled at the idea of a statue coming to life.
* Humans tend to be bastards, but there is still a fair amount of neutral and even decent ones. There is not a single elf in any of shorts stories nor five books long saga that isn't a decadent jerk or just plain monster.
* humans tend to, while the Minbari tend to be less flashy and more elegant and minimalist.
* Humans that have been brought back from the dead for any reason become Perpetuals, with the ability to self-resurrect from anything up to and including disintegration and immortality. It plays havoc with their sanity though. The Primarch Vulkan was apparently "born" with this ability.
* humans, that was the extent of the issue. Female demihumans' Strength-ceilings often kicked in a full point before their male counterparts', placing them at a serious disadvantage in combat classes. This, for races in which biological gender differences were otherwise less overt than humans'.
* Humans. The most populous race in the world, they have many societies ranging from nomadic horse lords to sophisticated magocracies.
* Humans themselves after the Cylon destruction of the Twelve Colonies, when there are only about 50,000 survivors who flee into deep space and the number proceeds to dwindle over the course of the series.
* Humans themselves could be considered Planet Looters, Peak Oil and all.
* Humans themselves have been alluded to (such as with Groucho Glasses), but the show's producer even
* humans. They sound much like 18th-19th century Americans talking about Native Americans as they describe the Na'vi (blue-skinned aliens they're trying to conqueror) as "savages" and "barbarians".
* humans. This had the result of him eventually losing the hand, and later dying of cancer. He survived the death by transferring his mind into a clone body.
* humans to be the ones with a bizarre biology, since we’re the only sentient species that can’t reincarnate.
* Humans transformed by dark magic into ravening, lupine monsters? Well, if it's in

* Human Subspecies, have wrested control of their adopted homeworld Dregocia from the United Coalition authorities and are seeking complete autonomy. They are engaged in a terrorist campaign against Earth in the hope of securing it.
* Human Subspecies: Human variants resulting from evolution or science.
* Human Subspecies, seeing as their ancestors were frequently kept as pets, working animals and livestock. Their ownership is almost universally outlawed in human-dominated areas.
* Human Subspecies who diverged from baseline humanity through natural evolution and/or ancient genetic engineering rather than Chaos corrupted mutants) descended from colonists who settled low-gravity worlds in the time of the ancient, advanced human civilization tens of thousands of years in the past. As a result, they became extremely tall, thin and delicate, to the point that they're unable to endure Earth-normal gravity or the rigors of a spaceships' takeoff. Longshanks are effectively stuck on their homeworlds, so they, like many other varieties of abhuman, are essentially just background fluff that almost never appears in an important capacity.
* Human Subspecies with more "traditional" super soldier traits like claws, natural armor, and conditioned sociopathy, but found them to be problematic for various reasons.
* human-supremacist is to destroy the various alien species and establish a new galactic society for humanity.
* Humans use the Teach and Speech skills to reduce the XP cost of respawning.
* Humans vs. Zombies are popular, many of even the best players bring only a bandana and some balled-up socks, and zombie players don't even need the latter).
* Humans vs. Zombies: Arguably, once you're a zombie, the game really begins...
* Humans vs. Zombies breathes this trope; once tagged, you become a Zombie, and you need to feed. Of course, that doesn't mean you still can't have a vendetta against the other humans who were less than helpful in keeping you safe...
* Humans vs. Zombies. Even then, it's normally all up to recognizing faces or maybe a hat or color scheme to tell who's with you and not with you. Even generic "we all wear camo jackets"-type guidelines will give you a lot of room to maneuver.
* Humans vs. Zombies. Even today, several years later, some schools are still squeamish about the game.
* Humans vs. Zombies. For students at these schools, discussions of how to avoid zombies on the way to class, people sprinting across the quad shooting Nerf darts at people chasing them, or seeing forty people suddenly siege a dorm are quite normal.
* Humans vs. Zombies in order to either score a silent infection against a human or in order to silently kill a zombie.
* humans waged wars on each other and slaughtered the Lion Turtles to weaken other factions. Only one managed to survive and lived long enough to meet Aang. The Lion Turtle taught Aang Energybending, a skill rare even among the Avatars.
* Humans. We are nearly tireless by the standards of most other animals, though hardly fast animals — in our hunter-gatherer days, our favored tactic seems to have been following an animal at a jog until it simply dropped of exhaustion and heatstroke and either died there or had its head bashed in with a rock. This is still practiced by many African tribes. (Before you try it on your local whitetails, though, remember that these people are hunting in vast expanses of flat land; there's no forests for the animal to hide in or hills for it to vanish over.)
* Humans were also the only species to come up with carriers. They were built to get around the restriction of dreadnoughts imposed on Citadel races, though we don't ever get to see them in the series. According to the codex, they were extremely vulnerable, because the hangar bays effectively created routes into the soft interior of the ship, so they would hang back in fights and were always escorted. Other races do use fighters, but instead of having a dedicated craft, cruisers and dreadnoughts both act as
* Humans were considered non-sentient indigenous fauna by the Dominion before the Kevin Jenkins incident. Furthermore, the Dominion's bureaucracy considered it impossible for sentient life to evolve on a

* humans who have convincingly disguised themselves as supernatural creatures.
* Humans who study alien planets and lifeforms will often add the prefix xeno- (from the Greek word "xenos" meaning "outsider", "foreigner" or "stranger") to the name of an existing science, resulting in designations like xenobiology, xenoarcheology, xenolinguistics and so on.
* humans with normal proportions, hair, and clothing that they felt comfortable doing an almost entirely human cast (with the only exceptions being covered in fur) wearing normal clothing and in a realistic urban setting for the entire film.
* Humans, with the Imperium of Man squarely filling the dwarves' shoes. Though in this case, it's less about swords and bows vs axes and hammers than it is starcannons and hovertanks vs chainswords, battle cannons and heavy, tracked monstrosities.
* Humans with various mental illnesses/neuro-developmental disorders, such as an emotional disorder or autism spectrum disorder, have severe sensitivity to loud noises and the above types of noises, to the point of experiencing anxiety and physical pain when hearing them.
* Human Target and wants to break ties with her handlers. Unfortunately, it's not as easy as it sounds. In the end, Chance helps her by shooting her in a non-vital area (but looks vital to an onlooker) in front of the handlers and helps the couple start anew somewhere else.
* Human Target as a back-up feature to the main Superman or Batman story respectively), so there's also that.
* Human Target as a human shield against a sniper on a nearby roof. When the EMT they're protecting at the time manages to drag the mook in for inspection, he comments that the bullets passed straight through the mook's bulletproof vest and that Guerrero's lucky they didn't hit him as well.
* Human Target has an episode where Chance had to work with his ex-girlfriend.
* Human Target have their own Mission Control, complete with wall of monitors, building-wide sensors, etc.
* Human Target. He's supposed to be a guard dog. He'd prefer to sleep and eat.
* Human Target. How did he get that photo? "Dude, you don't want to know."
* Human Target; in another he pretended to jump off a tall building, actually grabbing a gargoyle adorning the roof.
* Human Target is an assassin hired to help protect people. The hero of the story also used to be in the business of killing people.
* Human Target, Jackie Earle Haley (who has a Black Belt) uses some of his martial arts skills.
* Human Target mini-series, Dee-Noyz holds a cell phone conversation while he and his crew shoot up a house.
* Human Target resulting in one of the most awesome action shows on TV.
* Human Target She gets all naked on the back seat of the car while hero drives. After a while he tells her to put some clothes on since it's very distracting.
* Human Target starred Christopher Chance, a man who is paid to mimic people who have been targeted for assassination. The twist in later versions was that he was so good at mimicking them, he would sometimes forget who he really was.
* Human Target (the latest one) likes this trope, and oftentimes the double-take is paraphrased a bit.
* Human Target, the plan is for Ilsa to give the villain of the episode wine dosed with such a chemical so he'll tell them his password. Played with, in that to convince him that it isn't poisoned, she also drinks it herself, after which she tells him the whole plan.
* Human Target: there isn't a fight on the roof of the train, but there are several go-rounds in the cars, and one in the air ducts at the top of the cars.
* Human Target: The season 1 episode "Rewind" has Laura, an antagonist assassin posing as a flight attendant, take the time to put on a stylish red jacket before getting into a fight with Chris Chance in the fuselage that leads to her falling out of an open hatch somewhere above Portland.
* Human Target TV adaptation, Christopher Chance and his client use one to stop from great speed, rather than fall safely.

* Human Target who were looking for her; in that same episode the main bad guy has an offshore bank account in Barbados where he stores his ill-gotten gains.
* Human Target: Winston is on the phone to Guerrero, asking him which wire to cut. Guerrero flips a coin, which does not improve Winston's temper. On being told what the correct wire was, Guerrero nonchalantly says, "Huh... good to know..." and then hangs up. Bonus points for Guerrero pointing out he couldn't possibly tell Winston which wire to cut without actually looking at the bomb.
* human. The Ancient Rules forbid any sort of romantic relationship between these two groups, lest they end up like the Greek Gods with too many demigods.
* Human themselves are indirectly the recipients of this trope starting with the second novel of the main
* human to bird footprints in the sand. Instead, they run into the water and morph to fish.
* Human Torch, and shows up on occasion. It's been mentioned Johnny chose his hero codename as a homage to the Golden Age Human Torch.
* Human Torch match, has the same victory condition, but the ring is not surrounded by fire.
* Human Torch: Professor Marko's Hydromatic Vacuum attempts to suck out all the air in the world, and is almost successful as people throughout the world gasp for air.
* Human-to-Werewolf Footprints: When a set of animal footprints changes into human footprints, or vice versa.
* Human Traffic, a movie that focuses on British rave culture, doesn't shy away from showing the comedown, but it still gives a rather positive portrayal of how the empathy-inducing effects of ecstasy help the various characters bond with each other.
* Human Traffickers: Criminal smugglers who deal not in illegal drugs or weapons, but in live human beings (usually as slaves).
* Human Traffickers: If the traffickers are intending to sell their captives (mostly women and girls, sometimes boys and men) into forced prostitution.
* Human Traffickers: People who trade in live human beings; a modern version of the global slave trade.
* Human Traffickers: Since their entire business involves kidnapping young women and girls for the purposes of slavery and sexual desire, they automatically cross the MEH.
* Human Traffickers: These criminals often take live people in captivity, usually to sell them off as slaves.
* Human Traffickers who also kill the naval officer who tries to save her.
* Human Trafficking counts, but unlike most Lifetime films it was well received. The fact that it's inspired by actual events might have helped though.
* "Human Trials": A group of soldiers sign up for a top secret mission. To "weed out the wimps", the soldiers are placed in virtual reality simulations (the kind where you can feel everything) of battles, natural disasters, etc. Those who die, crack, or give up in the simulations are eliminated and sent home. In the end, only one soldier makes it. After the round of congratulations, he eagerly asks what his mission is. He is then informed that there was no mission;
* human until Ben let it slip accidentally. Which begs the question: why didn't she figure it out sooner? And more importantly, why didn't the monks transform the Key into something without blood in order to avoid the whole mess entirely. (Unless there were other rituals in case the Key was in another form, but this is never mentioned.) Then there's the sacrifice itself. Dawn has Buffy's blood because they're sisters and Dawn was made from Buffy, thus allowing Buffy to close the portal and die in Dawn's place. But... while Dawn may have the same blood as Buffy, the fact remains that it's only generic, and only Dawn's blood has magic Key powers. Buffy's does not, otherwise she would have been able to open the portal too - something it was stated many times only the Key (Dawn) could do. In reality, Buffy's blood would not have been able to close the portal at all and should have done as much good as someone unrelated to Dawn attempting to sacrifice themselves. What's even more frustrating is that Buffy's death has been foreshadowed all season, so surely Joss and the writers could have come up with a better way to kill

her off that would've made a lot more sense. Throw in the suicidal framing that's extremely disturbing once you see it, and becomes perhaps one of the most baffling moments on the entire show.
* Human was written via its two creator-performers improvising around characters and ideas while recording. They then transcribed the best parts and honed it into the final recorded version.
* human wave attacks. Điện Biên Phủ was even nicknamed "The Tropical Verdun" by the French.
* human werebeast (in that the original creature is a reindeer who obtained the ability to transform into a human). This category also comes with several subcategories: Ancient Zoans (who can transform into extinct animals) and Mythical Zoans (who can transform into mythical creatures).
* human where she is a playable character solving an incident along the likes of Reimu Hakurei in spite of being vastly weaker than any other member of the playable cast.
* human women the W.B. Yeats poem "The Second Coming" to N'Toth, commenting that "Humans are wiser than we suspected."
* human worshipers or servants who happened to do the right things to attract their attention, and their attention does not take into account voluntary service or any other sort of allegiance.
* Humanx Commonwealth, but the culprits don't want to wait ten thousand years for the place to warm up.
* Humanx Commonwealth features the Ulru-Ujurrians, who look like large bears.
* Humanx Commonwealth Flinx books, in which the protagonist's last words, having saved the galaxy from inexorable doom after spending years scouring it for a solution, are: "I'm bored".
* Humanx Commonwealth has Hivehom, the homeward of the insectoid Thranx, as well as Dawn, Willow-Wane, Midworld, Horseye, Longtunnel, Moth, Prism and Comagrave.
* Humanx Commonwealth known as the Meliorare Society used this method to produce their "test subjects", including the series' primary protagonist, Flinx.
* Humanx Commonwealth like telekinesis and telepathy (since they have no hands and thus a civilizations based on song, not artifacts and tools), and with the help of these powers they can levitate their bodies from the water and travel into space.
* Humanx Commonwealth novels, as these insectoids have as many physical disadvantages (easily drowned, bad climbers, limbless juveniles) as advantages (extra legs, good senses, tough exoskeleton) over humans.
* Humanx Commonwealth novels uses a variation; although humans and several other species seek guidance from the United Church, which has a Unitarian-style philosophy where people only look for ethical guidance and don't buy into the ritualistic aspects of religion that fall under this trope's "superstition" label.
* Humanx Commonwealth novels, we meet the Pitar, a race that by chance resembles beautiful, perfect humans (albeit with some slightly odd hair and eye colors in the mix).
* Humanx Commonwealth: One of the alien lifeforms has a literal genetic memory, in that the parent passes on the rapidly changing hunting methods of its main predator to the offspring, which receive no parental care and fend for themselves as soon as they emerge from their egg-equivalent.
* Humanx Commonwealth: One of the few instances of lasers are mentioned as merely one of the many and varied types of advanced weaponry in the stories. They behave much as one would expect a powerful beam weapon to in real life, with speed-of-light travel, cutting through things, etc., and there are lasers for everything from starships to hand weapons.
* Humanx Commonwealth or bush-league terrorist group. Slavery is practiced on Moth under a mere nominal cover of "contractual adoption", and governors assigned to "protect the interests" of developing worlds' natives have carte blanche to block said natives' bids for full Commonwealth membership as long as they can profit by their personal authority.
* Humanx Commonwealth rather than surrender to a human. The humans oblige.
* Humanx Commonwealth series has a lot of races, as pretty much every planet with

life has sentient natives also. Aside from a few dozen species known to the Commonwealth, the planet Quofum stands out as world-of-origin to perhaps hundreds of sentient races, some still extant and others extinct.
* Humanx Commonwealth series, the chiton of elderly thranx turns from a youthful blue-green to purple as they age. As the intelligent insects' traditions and social order invariably afford high status to their elders, this means that their most powerful Hive-mothers, scientists, and government or military officers tend to be so deep a purple as to border upon black.
* Humanx Commonwealth setting and home to the Flinx and Pip series of novels.
* Humanx Commonwealth. Skua is described by many characters as the biggest man they've ever seen, while his employer Isili's description pegs her as half a head shorter than teenage Flinx (who'd not yet grown tall).
* Humanx Commonwealth somewhat like giant praying mantises. They used to have hives of drones, workers, and soldiers ruled by fertile queens, but liberated themselves after evolving true intelligence and universal fertility. Hivemothers and Clanmothers are still honored, but the role is more ceremonial in the modern day.
* Humanx Commonwealth's United Church integrates ethical and philosophical principles from both human and thranx belief systems. Potential contradictions or conflicts between the various faiths of Earth and Hivehom are reconciled by the Church not taking itself too seriously.
* Humanx Commonwealth. The entire planet is one gigantic forest so thick no one has successfully penetrated to the planet's actual surface. The only civilizations is a tribe of humans descended from a group of colonists who got stranded there and an illegal pharmaceutical research lab on the other side of the planet.
* Humanx Commonwealth: The inhabitants of Midworld use rifle-like blowguns called "snufflers", carved of literally-green wood and powered by a type of seed pod that ruptures with a blast of air when pierced.
* Humanx Commonwealth, the protagonists use a neutron star as an FTL slingshot to escape pursuing AAnn, who refuse to follow due to the danger of the maneuver.
* Humanx Commonwealth: There are several stimulants that can be used to push beyond normal limits on endurance.
* Humanx Commonwealth, there's a scene on Alaspin when treasure hunters decide there's nothing of interest in this part of jungle-overrun ruins and leave. The following paragraph describes the treasure chamber mere meters away from where they stood.
* Humanx Commonwealth: The thranx resemble giant, four-legged insects, and typically live in complex underground hives that humans would find horribly sweltering, humid and claustrophobic — for their own, the thranx find human cities much too open, bitterly cold and unpleasantly arid. They used to reproduce through queens, but readapted to reproduce individually on their way to sapience. Unlike what their respective environmental preferences and trope conventions would suggest, humans and thranx are fast allies.
* Humanx Commonwealth. The Vom is a giant ameoba-like creature that devours all life on whatever planet it's on. It's at least 500,000 years old (and probably much older).
* Humanx Commonwealth, to which the main protagonist, Flinx, is the key. That's galactic-scale engineering for you.
* Humanx Commonwealth until much later in his life, and he has several encounters with Meliorare fugitives who attempt to "reclaim" him. This has not ended well for them.
* Humanx Commonwealth 'Verse. Naturally, that means that most of its predators have a Lamprey Mouth, although spore-feeders and some insectivores avert this by having no teeth.
* Humanx Commonwealth, when describing the final events of the Humanx-Pitar War, the narration notes that the Pitar resisted to the last—many, when confronted by attackers, pretended to surrender, then attacked their 'captors' or committed suicide.
* Humanx Commonwealth, where passing counterfeit AAnn currency on Blasusarr is what blows his cover.

* Humanx Commonwealth, which presents a wide variety of space-based weaponry, some with effective ranges measured in intergalactic distances. Even a simple ship-mounted laser has light-second range; the major limiting factor is accuracy.
* Humanx Commonwealth whose artistic community, the Tier of Ssaiinn, are considered outcasts and are not spoken of. However, their work is spectacular and highly prized, even among the AAnn.
* Humanx Commonwealth world, as it used to sport Saturn-like rings, but these were disrupted by a near-miss from a dwarf planet and split into two sections.
* Humbaba and become all-powerful. Jack takes over Santa's palace while the Smiths leave with the surviving children and Santa crawls out of the ruins.
* Humble Beginnings fanfic about Zwei's life from his POV. Zwei is a dog and as a result he sees things differently from humans.
* Humble Beginnings refers to humans as "Creatures", though it seems to be a term for beings in general.
* Humble Goal: A character wants to do or have something that happens to be simple.
* humbling these supposedly 'untouchable' celebrities words seem apropos here.
* "Humbug" has long vanished from common English usage, having been superseded by "bullshit", and is now only remembered exclusively for its usage in
* Humbug, Scrooge accidentally references a Bible verse while arguing with Cratchit.
* hum for cars was advertised by saying it was compatible with a whole list of different car types, among those were red cars, white cars, blue cars, & red white & blue cars (as in painted with an American flag design).
* humiliating defeats because their hated rival lost, even if the fans' own team wasn't even in the match. One example is with University of Southern California football fans, who even when they're not playing their archrivals UCLA and Notre Dame, still define a "Perfect Day" as a day when USC wins but UCLA and Notre Dame lose.
* humiliating situations it makes him look less like he's laughing and more like he's about to cry.
* humiliation because of it—particularly after she lands the gang sans Littlefoot in trouble while trying to lead them to the Great Valley—and she loses the trait in the sequels.
* Humiliation Conga her book counterpart, she sees this as a small price to pay for her newly super-flexible body (which is especially beneficial as she's a competitive athlete in this adaptation).
* Humiliation Conga screamed out for the mom he hated so much when his usual credits didn't start.
* Humiliation Conga: The bad guy's defeat has him suffer a string of embarrassing misfortunes.
* Humiliation Conga. The Dude gets brought against his will to a house party at a pornographer's house, given a spiked drink, blacks out spectacularly, wakes up in a cop car, gets beaten up by the police chief of Malibu, kicked out a cab on the way home, and when he finally gets home, finds that the place has been ransacked by the evil Nihilists.
* Humiliation Conga: The ending has the villain get his comeuppance by being subjected to a string of embarrassing misfortunes.
* Humiliation Conga, they decide to erase all records of their interactions with Voyager so their superiors won't learn of how badly they screwed up.
* Humility Garden, a novel by Felicity Savage, has a magical version of this as the title character's job. Especially beautiful people are killed in a way that leaves a psychic imprint of them as a statue. This is a highly respected art form and carries political power.
* Hummelcest between Burt and Kurt Hummel, a rare example of a father/son incest. Considering that they cannot have a scene without declaring their love for each other, it shouldn't be a surprise.
* Hummel figurines are collectors’ items for many people who see them as adorable little statues. Among people who fancy actual art, these statues are dismissed as nauseatingly bad taste.

* Hummer Dinger Hummer brand that the Hummer Dinger trope satirises went under in 2010 as part of GM's infamous post-economic-collapse restructuring.
* Hummer Dinger on the road, due to the fact that they're so much larger and heavier that they pretty much flatten smaller cars and pedestrians where a sedan would leave a few dents.
* Hummer Dinger: SUVs returned to popularity after the high fuel prices and the financial crisis of the late 2000s. The better gas mileage, low fuel costs, and the fallout from the Toyota hybrid accelerator problems were possible factors.
* Hummer Dinger was shut down in 2010, and the 2022 revival of the Hummer nameplate is all-electric, averting its own trope.
* HUMMER, which was discontinued in the late 1990s). Ironically, Chrysler unsuccessfully sued GM for using the Jeep grill on the Hummer.
* Hummingbirds are very cute, with their small size, hyperactive behavior, iridescent bright colors and drinking nectar from flowers. They're the closest thing to real life fairies.
* Hummingbirds fill the niche of flying nectar-feeders in the American continent, which is filled by large insects, primarily moths, in other parts of the world. In the deserts of North America, certain kinds of bat fill this role instead, and have developed long, sticky tongues very similar to a hummingbird's to feed on nectar.
* humongous by its 1943 state, but it definitely deserves a mention by virtue of sheer scale.
* Humongous Entertainment and her friend Luther. A 4-year-old yellow fish with orange fins and blue eyes. She volunteers to investigate any mystery or crime that has recently affected her friends. She often counters the crooks she catches with morals of wrongdoings, and has a desire to be a police officer when she reaches adulthood.
* Humongous Entertainment included cards of the characters. As later releases have stopped including these, though, they have become increasingly difficult to find, and even if you can find a boxed copy, it may not include the feelies.
* Humongous Entertainment rarely used CG in their games, but when they did, it's really noticeable.
* Humongous Entertainment's '80s references (most pros were kids then)...all more likely to grab parents than kids.
* Humongous Entertainment. While often they were hit-and-miss, they still managed to make some pretty dang addictive ones that left children forgetting there was an entire other game outside of it.
* Humongous inverts this, at least so far as looks and resourcefulness are concerned. The plain girl, Carla, who easily looks the part of the final girl actually dies rather brutally towards the end with little chance to fight back. The true final girl? Sandy, a very attractive but resourceful girl who manages to take down the killer and live to the end credits.
* Humongous Mecha: A gigantic robot that someone controls from within.
* Humongous Mecha and former petty crim, while the regiment itself is full of very capable warriors who probably couldn't go four days in a more traditional unit without being put in a brig.
* Humongous Mecha. And in the Gosaku Ota episodes, he could launch it off to the space and blow it up (in case his enemies invaded his island and he could not win).
* Humongous Mecha and returns home after being captured from Minos by the Sardinians.
* Humongous Mecha and then some was united in a mystical "Super Empire" in the distant past.
* Humongous Mecha. An enemy training course is left on in one of the mission areas, and it's very possible to walk your lance into it without realizing it, then start shooting when you realize you're surrounded by 'enemy contacts.'
* Humongous Mecha appear to describe air-to-air missiles traded between flying mecha and floating cities.
* Humongous Mecha, a psychopathic, suicidal veteran of countless battles...
* Humongous Mecha), are blown away by how kickass it is. The girls, however, don't give a crap, and just stare as the music dies.

* HumongousMecha are THE Space Fighters in the metaseries, just humanoid to account for the AMBAC (Active Mass Balance Auto-Control) system, which shifts the mass of hands and legs of the mecha to change the direction the mecha is facing to save propellant and shift the centre of mass away from the main body for evasive action.
* Humongous Mecha as him) to stop him, but Kamina just sits tight and trusts his judgement. Sure enough, Simon ends up luring the enemy to a cliff edge and destroys it, sending the enemy toppling over it.
* Humongous Mecha behind giant humanoid tanks - they're an extension of the pilot's body:
* Humongous Mecha. Big robots and spaceships are a lot easier to animate with minimal motion and fewer keyframes than organics, because if they look jerky and awkward, well, they're mechanical, so it does not look out of place.
* Humongous Mecha. But in-game, booster-skating only works for a few seconds and makes it nigh-impossible to aim.
* Humongous Mecha but puts out a terrifying amount of exploding dakka.
* Humongous Mecha by combat android Cardia Basirissa and Arkgain, a smaller combat robot based on the Soulgain.
* Humongous Mecha). By the end of the arc, he grows an appropriately-aged clone for himself and downloads his mind into it.
* Humongous Mecha called Megaleg by climbing up one of his legs while avoiding homing missiles being fired from all directions.
* Humongous Mecha can switch out his hand with a drill, and several of the enemy types have similar armaments.
* Humongous Mecha, even allowing things to fly that by all rights shouldn't. An interesting visual metaphor Kenichi Sonoda often uses for this effect is to turn the panel upside down when a gravity jump is in effect.
* Humongous Mecha gave Japanese protagonist Kain Wakaba a pair of wingmen, one black, one white whose mechs had paintjobs to match.
* Humongous Mecha "gods" the C'tan. The entire reason the Old Ones created da Orks was to fight them.
* Humongous Mecha has cropped up called 'command 'Mechs,' generally something huge, well armed, heavily armored, and usually boasting improved command, control, and communication gear. The setting universally holds fighting generals in far higher regard than their non-fighting 'armchair general' counterparts.
* Humongous Mecha have multiple weakspots on their limbs, each of which can take a moderate amount of damage, then becomes invulnerable. If you don't notice the targeting reticules around the hips and knees, you can spend half an hour shooting them in the head.
* Humongous Mecha in most Real Robot settings seem to be mashups of your average infantry soldier and an armored tank or jet fighter.
* Humongous Mecha instead of continuing to provide air support, which gives the Resistance ground forces a shot at the artillery.
* Humongous Mecha in the 20-25 meter range require a lot of hangar space, along with storage for ammunition and spare parts. Those space needs easily dwarf crew accomodations for any reasonably sized crew, so it doesn't cost that much more to add a few small luxuries.
* Humongous Mecha. In the phase 2 of the fight, Quadraxis' head separates from its legs and starts flying around the arena. The player must climb the Spider Ball tracks on the legs, boost onto the head, and then lay bombs into the weak spots in order to damage it.
* Humongous Mecha in the series also carry and use effective (well, effective as far as mooks go) weapons of both varieties.
* Humongous Mecha is a girl in a jar, who hijacked a robot to escape from the government facility where she was stored. She beats up everyone she comes across due to fear and extreme misunderstandings.
* Humongous Mecha is described as "...dominated the battlefields until people realized what a ridiculous idea they were."
* Humongous Mecha), Jack fights The Aqualizer, which, while quite large, we discover after Jack lays the smackdown on it is controlled by a rather tiny sea

slug-looking critter.
* Humongous Mecha Mars that has been almost completely flooded. The mechs are more like giant diving suits.
* Humongous Mecha. More regular, nameless forces will use mass-produced models that are destroyed by the dozen.
* Humongous Mecha multiverse, most famously the MS-07 Gouf. In the Universal Century it's a metal tentacle that can be electrified.
* Humongous Mecha normally explode... except when explicitly using an optional rule intended to mimic the novels in turn.)
* Humongous Mecha; normally, the attack stops before the crystals turn red.)
* Humongous Mecha, obliterates the kingdom, and goes back to live happily ever after with her father.
* Humongous Mecha Of course, a prototype would have none of the practical concerns of a production aircraft destined for the battlefield, and indeed, being highly visible would be considered a plus given that the whole purpose of a prototype is to demonstrate whether or not it works.
* Humongous Mecha of removing them. This has been true as far back as the original alliance; at the time the Emperor was aggressively destroying all religion and forcing every human government into his direcr control, but they wouldn't join his nascent Imperium willingly if he did the same in their case and two were so evenly matched that direct conflict would have destroyed both sides and rendered the advantages of gaining their support moot.
* Humongous Mecha, often generally has any argument about... well, just about anything, really, solved by using this as the defining factor.
* Humongous Mecha. Or to be more exact, the skeletal remains of failed Eva prototypes are arranged into their original form and outlined in chalk, even though many are deformed and/or missing several limbs. And it only appears in the original version of episode 23; all other versions have a skeleton pit.
* Humongous Mecha personal failure—according to their creed, they can redeem another person, group or even planet if their death is heroic enough. Taking the vow associated with this is considered a high honour that is not granted lightly...)
* Humongous Mecha, Reaper is the #1 choice for killing Tank characters, which the mech certainly would be if it was a playable character.
* Humongous Mecha's beam back at it doesn't actually harm it. When Lady Noir uses Cataclysm, it damages the machine but doesn't destroy it, and worse, fries its control system, sending it berserk.
* Humongous Mecha seasons sometimes slipped into this during wirework stunts.
* Humongous Mecha's left arm precisely because it was damaged in the fight that OZ interrupted and he wanted to re-create the exact circumstances of that fight. Heero partially subverts this trope by refusing to use the rebuilt Wing, insisting that Zechs' charity would cloud his feelings and make him hold back, defeating the purpose of a "fair fight"
* Humongous Mecha's neck, and send another flying with its tail, all in one manouevre.
* Humongous Mecha so that he presents strong armor to his enemy, who he overcomes.
* Humongous Mecha students occasionally work on. The best it's done is take three steps before the knee came apart.
* Humongous Mecha technology tends to fail miserably when pushed into combat.
* Humongous Mecha. That, and the cockpit sticking out from between Dolores' legs...
* Humongous Mecha that would make a Gundam look tiny in comparison, by crushing it with their minds. The aforementioned Farseers are able to see into the future and manipulate the strains of fate, but are otherwise cursed to crystallize slowly over time, becoming one with their own craftworlds.
* Humongous Mecha. The fantasy-absorbing nature of Gensoukyou would actually allow for one to exist inside of it, and Sanae becomes convinced that the giant shadow she saw is one. The truth is less glamourous and closer to respecting the laws of physics.
* Humongous Mecha the shows, but integrates their plotlines into a cohesive whole,

which results in characters from different series befriending one another and often leads to better character development and happier endings.
* Humongous Mecha this, saying he can recognize her driving. As soon as she reaches her destination, the whole thing tips over and crashes, prompting the Doctor to mutter, "Nice job, Madge, it's a complete write-off."
* Humongous Mecha, this trope is handled pretty realistically with spacecraft. JumpShips have a centrifugal section with gravity, while DropShips generate inertial gravity through thrust.
* Humongous Mecha. This will piss off both Transfans and fans of the work it's actually from.
* Humongous Mecha (though he suddenly stops using the latter once he's found out).
* Humongous Mecha to be humanoid, it's just how they'd been using it all that time.
* Humongous Mecha Type 61 tanks that were the bulk of the ground forces' firepower.
* Humongous Mecha, unchanged, and newer lawyer-friendly art with altered designs were explicitly different variants. The mechs original designs were retconned in 2015; the original designs are now non-canonical.
* Humongous Mecha universe commonly mount missile launchers and other weapons on their shoulders. Head-mounted guns are rare, due to the majority of head space being taken up by the cockpit.
* Humongous Mecha usually brings his own mecha when he shows up, and other sets of mecha may be related to the Super Modes.
* Humongous Mecha vulnerable to shattering from the impact of a melee attack. As a result, the previously mostly-ignored melee weapon category suddenly becomes a fairly effective option as more units start using the advanced laser-reflective armor type.
* Humongous Mecha were originally developed to construct barrier dams to protect coastal cities from being flooded due to global warming. It's portrayed realistically insofar as the flooding is not catastrophic. In fact, it's merely a part of the background.
* Humongous Mecha). When they finally are able to make a temporary base there, the planet is overrun by monstrous Insecticons that tear apart and devour any Cybertronians they come across.
* Humongous Mecha, while the Imperial Palace it stands in covers all of the Himalayas.
* Humon more apparent and prevalent in Humon's other works - in fact, you could go so far as to say this is a dominant theme. She really loves her men submissive and pliant...
* Humon. The comic has not been continued, but it's titled "who caught whom?", implying that those men are in for a nasty surprise. (Or a sexy one. Or maybe both.)
* Humorama, though some covers would squeeze more than one cartoon onto it with plenty of pretty women.
* Humor, "Caution: Driver carries only $20 in ammunition", "If you can read this you're following too close", "if you can read this, roll me over" (seen on a rockcrawler jeep—
* Humor Dissonance: A joke is funny to the characters but unpopular with audiences.
* Humor Dissonance: A scene is intended to be funny but the audience disagrees.
* Humor Dissonance: Joke is considered hilarious in-universe, yet audiences are less than amused.
* Humor ensued when some of the crew would attempt to use human idioms they'd heard Chricton say, but they invariably got them wrong.
* Humoresque, Leon's Jewish father doesn't want to fork over $4 to buy Leon a violin at a thrift store. It's $4 in early 20th century money, but still. A bit of humor follows as Leon's father tries to convince him that a kazoo and a music box are just as good.
* Humoresque, Leon, who is about 12, can instantly play a violin the moment he's given one. Sure enough, he becomes a concert violinist.
* Humorism:, and characteristics are grouped into categories based on one humor. Modern medicine (which realizes the true functions of the humors) debunked this,

and the belief rarely shows up nowadays. It does, however, still show up in the use of words such as choleric or sanguine, and knowledge of the basics of this theory is still useful in literary studies due to its copious use in older works.
* Humorist Dave Barry seems to have a thing for the number 2038. This likely has to do with the "Chuckletrousers Incident" (partially recounted in
* Humorist Jean Shepherd broadcast nightly from WOR, and would often talk about New Jersey, coining the phrase 'Slob Art' for concrete Mexicans, and other such, and particularly applying it to Rt. 22 in northern NJ, pointing to the big ship sailing along in the median.
* Humorist Robert Benchley wrote an article called "Movie Boners" in 1934 (back then,
* humorous dictionary of nautical terms. The dictionary mentions that the boom's main purpose is to sweep landlubbers, annoying crewmembers and miscellaneous litter from the deck.
* humorous example from the same game has Geralt ask Vimmi Vivaldi, a dwarven banker, if he plays Gwent. This causes Vivaldi to launch into a tirade about how Geralt is making racist assumptions, and afterward...
* humorous example, Jonathan replies with, "Well, that can easily be taken care of," and prepares to kill again immediately.
* humorous example, Motocross rider Carey Hart decorated his spare bedroom to look like a torture cellar, in order to keep hangers-on from getting too comfortable sleeping at his house.
* Humorous footnote: The Eunuch disadvantage was also available (to males) in earlier editions, but its value was dropped from 5 points to a 1-point 'quirk' because too many
* Humorously, Barclay actually says "There must have been a glitch in the matrix [diodes]." when he first began investigating the Holmes holoprogram.
* Humorously described by one of the characters as "Fire and Forget. We fired it once, now we can forget about ever using it again."
* humorously drunk Uncle Billy asks George Bailey which hat he should take while leaving a party, George suggests "the middle one".
* Humorously, Guy has Kisame as a genuinely unknown rival of his own. Guy can
* Humorously, if a bugbear or an owlbear stumbles into a bear trap (whether one you placed, or one already present on the level), you'll get the "You hear the roaring of an angry bear!" message. If
* Humorously, in Pom Pom's Eleven, after they discover a robot in the stash that Homeschool Winner had taken to them, Strong Bad attempts to make it tear Homeschool Winner limb from nonexistent limb. Unfortunately, it ends up shutting down before it can do so.
* Humorously mocked, which points out that advancements are usually restricted to the rich and that the poor are often left behind. The idea that silicon can have any role in a fundamental changes to the human condition is rejected on the basis that computers are mainly used for entertainment and warfare (maybe, the character saying it is incapable of feeling positive emotions).
* Humorously, one available in some older rulebooks is Jinxed, which turns everyone
* Humorously, one persistent rumor on a few gaming sites said that jumping off of the Statue of Liberty 30 times will let you play as
* Humorously played with in the Bone Pit mine, going from an invasion of small dragons to a Coterie plot to steal shipments to a
* Humorously reversed in a fourth season episode when Sheldon discovers that Leonard has had a periodic affair with Raj's sister Priya whenever she comes to town. When asked to keep it a secret, Sheldon proceeds to develop a new series of lies that are "un-unravelable" to explain what Leonard was doing the previous night, which involves spending time with an Irish barmaid (complete with a lock of reddish hair for evidence). Leonard dismissed it as unnecessary, but an offhand question by Howard on why he missed the new episode of
* Humorously, Ron and Hermione's kiss is changed to a G-rated version of
* Humorously, she gets really excited about meeting Pip, complementing his fur and

tail.
* Humorously, Speedwagon also rushes to Jonathan's aid but finds that Erina actually beat him to it. He suddenly becomes cognizant that this trope is in play, and
* Humorously subverted at the end of "Pinkeye." Kenny rises from the dead again, and it looks like he's going to start yet another zombie outbreak... only to be crushed to death (again) by a statue.
* Humorously subverted in another episode, where two cops appear to be beating a suspect when in reality they were fixing a parking meter.
* Humorously, this is also why they survived so long against the Zentraedi attacks: whenever they pulled one of these stunts, the Zentraedi commanders were unsure of whether the humans
* Humorously Ty Lee is a low-key version of this towards Sokka given her reaction to the news that he has a girlfriend in Earth Kingdom
* Humorously used by Keith Olbermann on his sports show. The theme was that all the sports stories had gotten him riled up, and he had to leave his studio, go down to the ground floor, open the back door and let out a primal scream. All the way there and back he was muttering to himself... except when he's in the elevator, which was playing a happy, peppy number that had him smiling.
* Humorously when Nightwing took over as Batman for a while, he complained about how
* Humorously, when three alternate Legions are brought together to face Superboy Prime, the three Brainiacs 5 bicker over which one of them should be the authority; None of them can stand any of the others (albeit for different reasons; One of them is distrustful of an older Brainiac 5 because he's never trusted any adults before and isn't about to get in the habit of it.)
* humorously with the recent update for Cu Chulainn (Caster), as his new line for Scathach is teasing her for her age and ending with a panicked "I didn't mean it, please don't kick that spear-"
* Humorously, you can choose to be the good cop and then beat the guy within an inch of his life while Thane just sort of stands there (there was apparently supposed to be a proper good cop route, but it didn't make it in). You can also smack him around a few times, and then say you and Thane are
* humorous poem appearing in a 1924 edition of the Feather River Bulletin reads:
* humor. The protagonist is sitting in a bar on an alien world with no idea where to go next, when he's approached by one of the world's aliens, who offers to help. The alien is from a country to the south, so he speaks English with a stereotypical Mexican accent, and also speaks fluent Spanish.
* humor when a military enthusiast finds herself in her RPG-obsessed friend's dream.
* Humourmoid. A female hotel employee saw and immediately started walking away. In a desperate attempt to explain, he blurted out "It's because of my testicles!".
* Humpback whales in a given area tend to sing songs similar to one another, but distinct from the songs of humpbacks on a different migration route. In at least one case, a few males became lost and accidentally wound up with whales from another region. They later returned to where they came from and, having picked up new songs during their journey, suddenly began getting more attention from females. This displays hints of different cultures amongst whales, and demonstrates that they may have an appreciation for new and "exotic" music.
* Humperdink Duck, Grandma Duck's husband and Donald Duck's grandfather, is most likely dead, as his wife currently lives without him, and most of the family rarely bring him up.
* Humperdoo, Cassidy tearfully eulogises Humperdoo as the best person he ever met, saying that "he liked everyone — even arseholes" and that everyone felt happy when they were around him.
* Humphrey Bogart. Indeed, lines like "Of all the gin joints, in all the towns, in all the world, she walks into mine." and "Here's lookin' at you kid." are so iconic most people who've heard of them have no idea of any context.
* Humphrey Bogart. The result several hundred years later is a person who

uncontrollably acts like the Bogey, spending his (unlife) trying to bring private detective work and noir to sparkling-white Crystal Tokyo. His trenchcoat is his trademark, something all the Senshi know.
* Humphrey Bogart was nicknamed "Bogie" by his friends and fans. It was never spelled as "Bogey" and was said to have annoyed him (and others) if spelt so.
* Humphrey Bogart was the object of a cult for a decade following his death, first in Boston, then New York, and ultimately, and most intensely, in France.
* Humphrey Bogart was the original Gerber baby. The actual model was Ann Turner. Humphrey appeared as the model for a separate baby food called "Mellin's".
* Humphrey Bogart, which was active in Michigan, Ohio and other Midwestern states in the '20s and '30s.
* Humphrey Lyttelton's explanations do this, and the derail always ends the same way. For example:
* Humphrey The Bear cartoon "Hooked Bear", a boy kicks Humphrey in the shin after he pops the kid's fish balloon float. When Humphrey complains to the Ranger, the Ranger angrily tells him to "Leave the kiddies alone!" and hits Humphrey in the same shin with a bucket of fish.
* "Humpty Dumpty": Dr. Cuddy was advocating a dangerous treatment, forcing House into the unusual role of being the voice of caution.
* Humpty Dumpty is another horrifying example. People often think of Humpty Dumpty as an egg, but there's absolutely nothing in the rhyme that indicates this. That makes the idea that after his fall, "all the king's horses and all the king's men couldn't put Humpty Dumpty together again" all the more sinister.
* Humpty Dumpty made flipperless games obsolete — competitors rushed flipper add-on kits for existing machines, and flippers became an industry standard just six months later.
* Humpty Dumpty's competitors all scrambled to put out their own flipper games. In only three months, nearly all pinball manufacturers had a flipper pinball available, and they were standard equipment soon after that.
* Humpty Dumpty, the first game with electro-mechanical flippers, came out in 1947.
* Humpty Dumpty, the titular character is pushed off of the wall to entertain the other characters.
* Humpty Dumpty threw off the yoke of British imperialism when he fell off the wall and his yolk splattered all over the pavement. That'll show 'em.
* Humpty Dumpty was originally intended to be a riddle, and the answer was "an egg". Once the answer became well known, the character in the rhyme was depicted as a living egg.
* Humpty Dumpty where the Zora king is still pretty chunky, but he has a lot of muscle as well and his face looks somewhat old instead of ugly.
* Humpty Dumpty, which was mounted on top of a wall in Colchester during the English Civil War. The wall was blown to bits, and the cannon came crashing to the ground. Neither the king's cavalry nor his infantry could put it back together.
* Humpty Hump and the Digital Underground got around this by simply making words up, and freely acknowledging it
* Humvees are automatic transmission, so it wouldn't be hard. It's most likely that he was simply never given the formal training to indicate that he was qualified for that specific military vehicle.
* Humvees are the weakest (a single mine or RPG is enough; snipers can kill the crew without damaging the vehicle) and can only carry two passengers plus crew, yet they are fast and have variable weaponry (M60, TOW missile or grenade launcher). They can also carry combat gear, unlike the others.
* Hunan Broadcasting System gained the nickname "Mango TV" from the appearance of their logo, which is supposed to be a white fish and a golden grain but looks a lot like a mango. The network has since taken to using "Mango TV" as an official alternate name.
* Hunding survives in the end of the second opera. Instead of dropping dead as in the libretto, he spits on Siegmund's body and leaves. That was seen as especially unfair, since Hunding in this production is made particularly cruel and unsympathetic, compared to other interpretations.

* Hundraåringen som klev ut genom fönstret och försvann (The Hundred-year-old who stepped out through the window and disappeared), which devotes every other chapter to the long and exciting life of its protagonist.
* Hundred Acre Wood has Winnie the Pooh using a balloon to float up the honey tree, while Sora stops bees from attacking him.
* hundred bullets in the chest, and doesn't even stop smiling. Apparently, clowns in Homestuck are death-proof.
* Hundred Companions thus far seems to have these tendencies, apparently unable to distinguish between a hilarious prank and an assassination attempt.
* Hundred Faced Hassan in her 'main' form is muscular enough to have a six pack, which is made very clear, given that she wears a halter top that just barely covers her breasts. While she does wear an intimidating skull mask, her actual face is very feminine, and her card art almost makes her look like a dancer.
* Hundred, Hayato Kisaragi's fight with Claire has him crash into her at high speed, and then get a handful of her huge breast.
* hundred of her seven partners in her lifetime) before conceiving Steve's child.
* hundreds. Firaxis, the developer company, actively encourages modding.
* "Hundreds Gathered today to say their final goodbye to this fallen Louisville Police Officer... Deedee Megadoodoo."
* Hundreds, if not thousands, of bikini clad women run enthusiastically toward a pasty plain guy who is anointing himself in bodyspray; think it's another Lynx/Axe ad? Nope. All the woman immediately stop as soon as he puts on his hideous spectacles...
* Hundreds of characters, etc. Most of the historical characters are only referred to with one name (such as General Mack and Marshals Murat and Davout) since Tolstoy probably assumed anyone reading this book in 1870 would recognize the names from history lessons.
* hundreds of galaxies presumably ruining the day of hypothetical aliens present on them. Like the former, they are among the farthest objects known.
* Hundreds of people die each year by straining so hard to get a poo out, they burst a blood vessel in their brains.
* hundreds of thousands of butterflies, who are trying to find Sormo's ghost. They are swarmed by the same kind of butterflies that took Sormo's soul away and Fiddler senses a presence in the swarm which tells him that it is now awakened and one with the land and ceased to be whatever is was prior to that. It tells Fiddler to slay the goddess that is staining the land. Fiddler brushes the encounter off, but Nil and Nether remain convinced that it was the remnants of Sormo E'nath's soul.
* Hundreds of tourists visited Thailand to see the railway bridge in
* hundreds, the Elite fleet's commander simply remarks "Then it will be a fair fight" before proceeding to stomp the enemy force's ass.
* Hun during his last battle with the turtles at 57:43, then at 58:12.
* Hun er vred ("She is angry") is a feminist post-colonial novel by Maja Lee Langvald. It's a harsh critique of the international adoption industry. But what gets it the most attention from people is that every single paragraph in the entire novel starts with the words "She is angry."
* hung a lampshade about the Stargate asked why they didn't fall through the floor, and no one had an answer.
* hung a lampshade in precarious situations finds himself in a volcano. Dad says, "I didn't even know this town had a volcano", then the camera zooms to a very out-of-place looking volcano.
* hung a lampshade who could only speak Japanese marvel at how the Americans he was frozen with are somehow speaking Japanese, while the Americans equally marvel that he's speaking English. This turns into a brief debate about who's speaking what language, until Janeway interrupts to explain how the universal translator works.
* Hungarian dub was going to premiere on January 2, 2021. However, the show was removed from the schedule before it could even air.
* Hungarian fans of just about any sport will chant "RIA! RIA! HUNGARIA!" on international sporting events. Another popular one is "HAJRÁ MAGYARORSZÁG, HAJRÁ MAGYAROK!" ("Go Hungary, go Hungarians!")

* Hungarian Folk Tales" in a cheeky tone brings this close to an intentional example. The English dub of course stays clear of all this.
* Hungarian for twenty-five forints. (And, at 2010 exchange rates, that would run you a little over 12¢ US, less than a tenth of a euro.) Following the end of the hyperinflation, the next currency-related problem Hungary had to deal with was a shortage of currency-quality paper.
* Hungarian novelist Jenő Rejtő wrote most of his humorous adventure novels under the pen name P. Howard. His more serious western novels were written under the pen name Gibson Lavery.
* Hungarian (or Romanian - his birthplace used to be part of Hungary, but is now part of Romania) actor Sandor Tecsy was best known for playing Russian or Albanian characters.
* Hungarian poet Miklós Radnóti was murdered during the Holocaust in 1944. His widow, Fanni Gyarmati lived for almost 70 years after that, dying at age 101, but she never remarried and never moved out of the apartment where they lived together.
* Hungarian stand-up comedian and cabaret singer Géza Hofi was is one of the country's most beloved humorists, even after his death in 2004. He made his career during the second, softer phase of communism/state socialism, following the 1956 revolution, which, despite it's failure, forced the new leadership to enact a number of changes. János Kádár, leader of the People's Republic of Hungary after the revolution (which he helped the Soviets to crush, albeit out of fear that they would do it anyway, but with worse penalties for the nation, because of the government's "straying from the cause"), was a fan of Hofi, but, more importantly, considered him "the valve on the country's ass". Hofi's performances often showcased the absurdities and awkwardness of the system, allowing people to laugh at their situation. He even often jokingly addressed the government spies and snitches in the audience. Despite this, he wasn't a happy man, having spent many nights in prison for his satirical performances (albeit always released quickly). Like many "clowns" and humorists", he originally aspired to be an actor, having an excellent singing voice and vocal talent, however, he found himself railroaded into the role of "the regime's court jester". Now, combine this with a declining health and being near-constantly watched by the secret police...
* Hungary and Poland are hinted to be this. Makes sense considering the traditional friendship between the countries in
* Hungary and Ukraine have these for each other as well. The scanlation roughly translated their nicknames as "Hun" and "Raine" respectively.
* Hungary became independent, but lost territories to neighboring countries.
* Hungary goes from 1 to 5, and while teachers can award zero for an absolute null effort, a 0 will "officially" be entered into the register as a 1. However, teachers also have considerable freedom in determining end-of-semester and end-of-year grades, so some of those zeroes will indeed be counted as zeroes when those teachers calculate the weighted average.
* Hungary has "Area 29" (referring to the phone area code) where phone and internet are mainly provided by
* Hungary herself used to be so tomboyish that she was mistaken as a boy by her rivals, and she herself thought she was a boy due to chronic lack of sex-ed
* Hungary: In 1912, István Tisza, President of the House of Representatives, used police force to remove numerous opposition representatives from the House, because they wouldn't stop obstructing it. A few days later, representative Gyula Kovács went into the House, jumped off the journalists' gallery, shouted "There is still a member of the opposition here!", and fired three shots at Tisza, but missed him. He then turned the gun on himself, but survived with a permanent head injury. After Kovács was carried out, Tisza continued the session.
* Hungary is also shown and revealed to be this, whether it's her penchant for scary things (in her Chapter 5 profile), Krampus escapades or managing to freak out Prussia like a deranged stalker.
* Hungary itself makes sure that no two contestants in the same season
* Hungary that came from west of the border. This eventually led to the development

of an ultra-nationalistic cultural (and political) movement around the turn of the millennium.
* Hungary thought she was a boy, and so did Prussia until he realised she had breasts. However, she looks a lot more female after puberty, when she has longer hair and is often seen wearing dresses.
* Hungary was originally assumed to be male by everyone including herself. Then puberty hit her like a bombshell (not the first in the series), and so she started wearing a traditional Hungarian folk dress and a flower in her hair.
* Hunger Busters. Three of these little square pills provided the daily requirements of calories and vitamins.
* Hunger Causes Lethargy: A character acts tired when hungry despite not being hypoglycemic and it not having been long enough to cause low blood sugar.
* Hunger Causes Lethargy: A hungry character gets unrealistically tired.
* Hunger Causes Lethargy: Someone is hungry and it makes them tired, even though it clearly isn't malnutrition or low blood sugar.
* Hunger employs this with Jordan, who acts as the moral compass of a group of strangers who have been trapped together and forced to turn into cannibalistic savages in order to live. As if surviving that wasn't enough, she then has to outsmart the man who set up the experiment to begin with in order to escape.
* Hungerford burrowing into peoples' necks and taking over their minds. At the end of the movie, a spacecraft shows up.
* Hungerford human host is sprayed, they'll fall to the ground, clutching their faces, and then the bug will leap out of their neck.
* Hungerford is about the population of the titular town being taken over by bugs the size of shoes that burrow into their head through the back of their neck and seizing control of their body.
* Hungerford's textbook Algebra calls the fact that (x + y)^2 = x^2 + y^2 in a commutative ring of characteristic 2 the "Freshman's Dream Lemma".
* Hunger Games) initially appears to be setting the female tribute from District 10 up as the protagonist. However, though she survives the bloodbath, she doesn't make it to the end of the first day in the arena. Instead, she is killed by the District 1 girl less than fifteen minutes into the film. The actual protagonist is the girl from District 6.
* Hunger Games, Obsidian lashes out at his caretakers who call him by his given name, instead telling them to call him Sid.
* Hunger Games or "bread and circuses", hence Peeta being the son of a baker and the titular "Games" serving as circuses to entertain the masses and keep them in check. It could also mean "Pan-am", as in "Pan-American".
* Hunger Games point of view that Careers have this drilled into their heads. ("In the arena, your life comes first and foremost. If you have a choice between saving your best friend’s life and your own, leave the poor sucker to get eaten by mutts.") We can also gather that Obsidian wasn't listening.
* Hunger Games. The Careers typically work together in the beginning of the games to set camp, protect each other and kill as many of the non-Career tributes as possible early on. However, since there can only be one survivor in the end, as soon as there are so few non-Careers left that the Careers don't really have a common enemy anymore, distrust and disapproval starts spreading among the group, until they inevitably turn on each other.
* Hunger Games This reveal actually comes even before the main characters are sent into the arena, but nonetheless, it may be the biggest Reveal of the story.
* Hunger Games trilogy includes an in-universe example. The Fiftieth Hunger Games (won by District 12's Haymitch Abernathy) were never televised again after their initial run, though Katniss wonders if they might have been repeated before she was old enough to remember. However, when she and Peeta finally get to watch Haymitch's Games (the tapes of all the other living victors were sent to them as part of their preparations for the third Quarter Quell) they learn that he won by using the force-field around the arena to deflect an axe back at his final opponent. Since tributes are not supposed to know about the force-field, much less use it as a weapon, this was seen as an act of rebellion which not only led to the Fiftieth

Games being pulled from the schedules but also led to serious repercussions for Haymitch.
* Hunger (in which Galactus arrives on Earth and battles a bevy of Ultimate Marvel heroes), the readers are now keenly aware that Rick and the Surfer are going to fail in their objective.
* Hunger, longtime Irish republican prisoner Gerry Campbell attempts to converse with his new cellmate Davey Gillen in Irish, but it becomes quickly apparent that Gillen has no knowledge of the language. Campbell asks "Cad é mar atá tú?" (How are you?) and says "Bí réidh, anois!" (Get ready, now!) when he hears riot police approaching their cell.
* Hunger series by Micheal Grant, this is the excuse of almost everyone for not working, because every character is under 15.
* Hunger sharing a body with Brittney. Who is also a case, as she gets both legs broken and shot in the chest, yet can't be killed.
* hung/hanged. The latter is used for death by hanging, the former for
* "hung like a black man" like a black man. It depends though, because in many languages there's no difference between "hanged" and "hung.
* Hung Out. She realizes that her room has been searched because everything is neat and orderly instead of haphazardly strewn everywhere.
* "Hung Out to Dry": A sorority girl's headless body is found hanging from a ceiling fan. It's soon discovered that the killer's weapon of choice was a blowtorch.
* Hungover and Handcuffed after he tortures her — and several other girls — with a cheese grater.
* hungover FemShep as Garrus gleefully recounts some of the night's highlights.
* hungry... and it turns out to be a ploy designed to destroy Bobby's will to fight.
* Hungry as a Wolf, the berserk, hungry undead are referred to as "screamers" rather than "zombies" or even "ghouls", mainly because of their distinctive, hellish screaming, and because neither of the other terms were in common usage in the setting to refer to hungry undead.
* Hungry as a Wolf, the town doctor is bitten by a screamer and succumbs to infection. After he is buried, he reanimates and claws his way out of his own grave as another screamer. Averted with his two victims, though, as they are burned on-site due to the horrific nature of the attack and the condition of the remains.
* Hungry as a Wolf were humans who, in the face of starvation, resorted to eating human flesh, which allowed the influence of a Wendigo to turn them into hungry undead. They constantly hunger for more human flesh, and no matter how much they eat they constantly look emaciated. A bite from one of them spreads the Wendigo's curse, causing an infectee to become ravenously hungry until they ultimately die of starvation and rise as another screamer. They are also intelligent enough to use firearms and speak, and freakishly fast when they sprint at potential prey. The only known way to put them down individually is to destroy the brain, though re-imprisoning the Wendigo seems to cut off its influence and neutralize them as well.
* Hungry) but this was changed due to Masi Oka not being able to clearly pronounce the word "hungry".
* Hungry City, can build clever traps to take out zombies, and she manages to persuade a vampire to protect her instead of killing her.
* Hungry City happening all around him forces him to protect the one human survivor he manages to find, rather than drain her dry right out of the gate.
* Hungry City, vampire Jerome becomes more powerful when he gets his fill of blood and weaker when he's thirsty, so the human main character has to feed him her own blood so that he'd have the strength to defend her from zombies.
* Hungry City wakes up during one of those, and is none too happy about the scarcity of humans to eat.
* Hungry City who is ready to offer others as vampire bait to save her own life.
* Hungry Clicker is a famous Twitter artist known for their beautiful fanart of various video game and manga characters. Despite their fame on Twitter and having an official artbook published, virtually nothing is known about Hungry Clicker

other than the fact they are from Japan.
* Hungry Days pieces based on popular anime, with the ad often just tacked on at the end as if it were photoshopped over the actual art, or sometimes just showing one still frame of a character holding a Cup Noodle noodle cup.
* Hungry Days. The short ends with the pair reciprocating their love as an extremely large chunk of asteroid is about to make impact.
* Hungry Days, they're the only two still standing at the end. Even worse, the cameos from some of the couples from previous commercials during this sequence imply their stories end in fiery demise.
* "Hungry Heart" for Springsteen would qualify as well, being musically miles away (although lyrically similar) from his bleak late 70's/early 80's output. He originally wrote it for the Ramones, but recorded it himself after being chewed out by his manager for giving away his hit songs ("Because the Night", as well as "Blinded by the Light", which became a #1 hit for Manfred Mann, and "Fire", later a #2 hit for the Pointer Sisters). Most of his later singles from "Born In The U.S.A." were cut from the same cloth.
* Hungry Heart: Wild Striker as Jyoyo Akanegaoka's main defender. He inherited it from his father.
* Hungry Heart: Wild Striker: Kyosuke's older brother Seisuke Kanou is a pro soccer player who rose through the ranks to play for the AC Milan, and according to many characters also had very high grades as a student.
* Hungry Heart: Wild Striker when she basically ropes Kyousuke into coaching her team. It's thanks to Miki's passion for the sport that Kyousuke, who once played soccer too but left it due to personal problems, decided to restart playing.
* Hungry, Hungry Homer", as Homer prepares to go on a hunger strike to protest the Isotopes' planned move to Albuquerque, he sees the skeleton of a previous striker holding a sign reading "CLEAN THE LADIES ROOM".
* Hungry, Hungry Homer, since Homer doesn't know what Cesar Chavez looks like.
* Hungry Jack's was one of the first examples). You have to wonder, because really, they barely alter the burgers at all, and most of the films don't even have the slightest connection with the things.
* Hungry Jungle - rapidly draining the ground of all nutrients. The Tyranids then devour the plants. By the time they're finished with a planet the lack of a breathable atmosphere and any oceans makes the planet inhospitable without substantial effort, while Tyranid organisms left behind make that prospect extremely unwise.
* Hungry Jungle): The jungle is untamed and full of danger, and if you go there you're likely gonna die.
* Hungry Jungle: Tropical rainforests are foreboding and dangerous places full of death, disease, and madness.
* Hungry Marie, Anna's father (a Catholic priest) and Taiga's grandmother (a Taoist priest) do not approve of the two having contacts with the "enemy". It's mostly played for laughs though.
* Hungry Marie has a male protagonist named "Bijogi Taiga". The "bijo" in his name means "pretty girl"... which he actually becomes when his soul ends up in the body of a dead French princess after serving as a sacrifice in a fishy ritual that went wrong.
* Hungry Shark Evolution, you play as a shark and eat the fish and humans on your path. There are enemy sharks trying to eat you as well.
* Hung. The recession has hit Ray hard and he is unable to make ends meet with his job as a substitute teacher. Prostitution ensues.
* hung up on her before police arrived, in direct violation of one of the most basic rules for 911 dispatchers (he was disciplined but not fired). One of her rescuers, Charles Ramsey, also got frustrated with the operator who took his call at the same time, finally shouting at him, "She been kidnapped! Put yourself in her shoes!"
* Hunico's new bodyguard/running buddy Camacho is billed from Juárez, Mexico, but is played by the Tongan Tevita Fifita.
* HunieCam Studio is this, and is also what she wears in her eyecatch.

* HuniePop 2 if you take her to the Secret Grotto, where she'll mention that it's probably the only pool around that hasn't been peed in.
* HuniePop 2 is an attractive woman who works as a stripper, and is also downright stupid. Indeed, two of her Baggage traits are "Forgetfulness" and "Intellectually Challenged", and some of the gifts the player can give her also happen to be toddler toys made for a "slow learner" like her.
* HuniePop 2, which penalizes you for spending four or more consecutive turns on her during a date.
* HuniePop Aiko Yumi when she's full and her hunger meter is maxed out is an extremely loud belch, followed by a girlish giggle of amusement. This ties into her characterization as jaded, somewhat slobbish, and apathetic. Also, because of the way the game works, so long as you have enough food, you can keep feeding her and keep making her burp.
* HuniePop bit ashamed to let you know that she does (she particularly loves the "High" setting on the protagonist's washing machine). She says her favorite season is Summer, mostly because she can lounge around in her underwear all day.
* HuniePop was reinstated back to the store with no changes made. NCOSE has never forgiven Steam for the reversal, and runs regular articles attacking Valve for their stance.
* Huniepop, which goes as far as making hypothetical gameplay footage to see how it would all unfold.
* HuniePop, you can choose to play as either a man or woman. Playing as a woman only changes the pronouns though, the girls still act the same as they do with a male player.
* HUniverse: The Verse in which Heroes Unite, Heroes Alliance and the related superhero webcomic series are set.
* Hunk and Lance were eventually confirmed to be Samoan/African American and Cuban, respectively, removing the ambiguity for them. Meanwhile, Allura is of an alien species, so the ambiguity was likely intentional for her.
* Hunk compared to Euryale's outright tiny 134 cm (4'4 3/4"). She's small enough the narration describes him as being able to let her ride on his shoulder.
* Hunk, drunken TV presenter Garrison Gaylord accidentally gets his jeep stuck in reverse and rockets backwards along the pier until stopped by Hunk.
* Hunk, every woman who sees Hunk cannot help running her eyes over his muscular physique (which is often followed by their fingers and other body parts).
* Hunk from Clan Dingwall appear to be heading this way, as evidenced by his behavior toward her the end of the film.
* Hunk. HBO's Mace is also balding, while book!Mace has a head full of hair.
* HUNK is notorious in-universe for being the only person to survive his missions. One of the bonus ending screens in
* Hunk — A must-have in any reverse harem is a strong-built and traditionally masculine type.
* Hunk, one of Bradley's neighbors in Sea Spray is an former pro-footballer named Skeet Mecklenburger who still acts like a high school jock and immediately starts bullying the nerdy Bradley.
* Hunk receives limited characterization and still works for the bad guys, but is nonetheless portrayed as much nicer than he was in the original game. While the original Hunk was coldly professional and never cared a bit about his fellow soldiers, Remake Hunk notably refuses to
* HUNK's a hypocrite about this; when it briefly looks like he's not going to make it to extraction from Raccoon City, he tells the evac pilot to just take off and not risk his life for HUNK's sake and actually seems slightly irritated (though grateful) when the pilot refuses to do so.
* Hunk, the title character spends most of the film either shirtless or wearing his shirts fully open. He even invents a fashion trend of wearing an open sleeveless shirt with a necktie over his bare chest which becomes insanely popular.
* hunky construction worker types, one guy had bunny rabbit print undies, leading to this memorable exchange at the end of the ad:
* Hunky Dory: Davy is discouraged from acting and singing, even though he has won

the lead role; he even quits at one point.
* Hunky Dory, meanwhile, is typically regarded as the first truly excellent Bowie album, demonstrating the man's songwriting prowess in a way previous efforts couldn't express.
* Hunky Dory: When Viv, a drama teacher, praises the angelic singing voice of her student Davy, Tim replies, "Yeah, and such dreamy eyes."
* Hunley, having to leave the hatches open for seawater to get in, one of several suggested possibilities for the sub's sinking soon after).
* Hunn Raal's three cousins Serap, Risp and Sevegg seem devoted to him, and rumor has it that's because their loyalties are forged beneath the furs. They're second cousins, so it's legal, but still raises eyebrows.
* Hunson Abadeer is the Lord of Evil and a neglectful father, but according to the season two premiere "It Came From the Nightosphere" the moment that causes his daughter Marceline to give up on her relationship with him is when he ate her french fries. She even writes a song about their relationship and titles it, "Daddy, Why Did You Eat My Fries?". Unlike other examples of this trope, Marceline's grievance turns out to be very,
* Hunson Abadeer, seems intent on sucking out the souls of every living creature in Ooo, she tracks him down only to retrieve her treasured axe.
* Hunt Down: Psychonaught's second phase is her running around screaming and burning after her flamethrower ruptures. Don't get in her way.
* Hunt Down the Freeman, and one where he's on a train with several Gordon Freeman clones who motion at him to sit with them.
* Hunt Down the Freeman merely groans in what sounds like mild discomfort at best.
* Hunt Down the Freeman, who provides the soldier's voice, squeaks out "dead," and doesn't even finish the line.
* Hunted (1952), the hostess at the Bed & Breakfast turns off the radio while news are announced about the two fugitives she just let in.
* Hunted, after the discovery of an immortal shapeshifter, the FBI sends people to track him down and find out his secret. When the CIA finds out what's happening, they send their own agents to try and one-up the FBI. The U.S. Air Force gets wind of this and sends a man to try and get the secret for the military. Then the NSA, U.S. Navy, and U.S. Army all send investigators of their own, without much of an idea of what's going on, due to sensing that something big is happening and not wanting the other services to beat them to it.
* Hunted as Curt Conners tells him that while Spidey does understand the idea of that, he doesn't understand it from the eyes of a parent, which is why he's willing to let loose the Lizard to save his son.
* Hunted: A True Story of Survival goes after the writer for killing her cub and it only ends when the writer manages to crush the bear under tons of ice. The kicker? It's supposed to be based on a "true story".
* Hunted A True Story Of Survival goes after the writer for killing her cub and it only ends when the writer manages to crush the bear under tons of ice. The kicker? It's supposed to be based on a "true story"
* hunted down and murdered a drug dealer who had killed an off-duty rookie and gotten off scot-free.
* Hunted Earth series is a variant of this; the Charonians are a mixture of biological and mechanical creatures, and operate on a planetary scale - disassembling lifeless planets as building material for Dyson Spheres, and moving life-bearing planets to Sphere systems. The Charonians are barely aware of humanity when they begin disassembling the Solar System.
* Hunted has its opening issue with Kraven seated beneath a wall with multiple animal-themed heroes and villains mounted on walls like trophies.
* Hunted:, or some other deadly agent out to kill them all. They look for an escape or means of beating it as it kills them off.
* Hunted over Central Park keeping them from getting out and others from getting in.
* Hunted: The Demon's Forge, female elf archer E'lara and male human warrior Caddoc are close friends who have made a career out of adventuring together. Despite their

closeness and the fact that they're both (presumably) single, no romance is ever implied between the two.
* hunted them for fucking centuries". Even Dracula after initially writing Trevor off was forced to acknowledge him after Trevor brought him to his knees with the Morning Star Whip.
* Hunter, a job which suits him to a T. Contrary to the trope description, he is not older than the other detectives (he seems to be in his late thirties in the first season).
* Hunter and DeeDee McCall will always investigate one case a week involving a criminal who will be either locked up or shot dead by the end of the episode.
* Hunter, and his older sergeant who's the real killer. At the end Hunter chases the killer onto the range and activates the targets. The killer reacts to the first couple of targets, so when Hunter appears his reactions are lax enough that he gets shot.
* Hunter and threatened to take his badge. His successors as captain were more tolerant of Hunter (because they recognized a good cop when they saw one) but would often be frustrated by his liberal attitude to the regulations and do their best to keep him in line.
* Hunter, but it still happens. Somewhat unusually, this is not played for fanservice, at least not in the case of McCall herself - she tends to wear considerably more clothes than her supposed "colleagues".
* HUNTER: Det. Sgt. Rick Hunter served as a Marine in the Vietnam War.
* hunter-gatherers, and used this as justification to launch a terrorist campaign aimed at airlines, universities, and industrial and high-tech concerns.
* Hunter Gathers, Brock Sampson's trainer. In flashback, it's shown that when Brock turned in an unsatisfactory performance in a swimming exercise, Gathers dropped a live grenade into the pool. With training like that, is it any wonder Brock became a
* Hunter had her changing back and forth into a bear and back into herself. Although she seemed to be holding back her bear transformation.
* Hunter has a motive, and she's being framed as a patsy. Nope, it was the sister all along.
* Hunter Hayes has two #1 hits. One is obviously "Wanted", and the other is not "I Want Crazy", but rather the far less remembered "Somebody's Heartbreak". Averted on the Hot 100, where "Crazy" is a very close second behind "Wanted" (#19 and #16 respectively).
* Hunter Hayes on guest vocals, and this was the version that became a single.
* Hunter Hearst Helmsley and shortened his name to the well-known Triple H.
* Hunter Heroici, a powerful psychokinetic has retreated into one due to his advancing age, which is causing problems in the real world, but the man is oblivious to Sam's attempts to talk to him. So Castiel ports both Sam and himself directly into the man's mind, which appears as a cartoonscape, then turns to static and technicolor bars once the guy realizes that there are people in his head and starts talking to them.
* Hunter) insists that she be allowed to play "bad cop" despite Hunter's (tall, middle-aged) claims that he's usually the "bad cop" in these situations for a reason. The perp immediately sees through the act and tells them to get lost, so she upgrades to breaking in his door and threatening him with a baseball bat.
* Hunter in the 1980s). "John Francis O'Mara" and "Thomas Fitzroy" were used in the mid-60s; by about 1968, and for the rest of his career, "John Thomas James" was his invariable pen-name. (JTJ even had has own parking space on the studio lot!) In general, Huggins produced material using his own name, but wrote it using a pseudonym — it was said Huggins disliked seeing his own name continually flashing on screen during the credits.
* Hunter is initially amused by this, but quickly becomes a target of the accountant himself.
* Hunter J goes straight for her liquor cabinet as soon as she finishes her assignment from the Bloodline King.
* Hunter J's minions also have Golbat and Crobat, while J herself uses a Drapion

and Ariados in battle.
* Hunter J stands as one of the most popular villains, especially among those that were originally created for the anime, for being a ruthless and astonishingly effective
* HunterLicker attacks the group as they're fleeing on the train and rips open one of the doors and snatches Kaplan and eats him outside the train, after which he attacks the rest of the group.
* Hunter-like. It also introduced the concept of free roam in a 3D-world as early as 1991.
* Hunter. Not really a part of any organization (might be loosely) that hunts them, but usually has a network of friends, experts, and allies to help him out.
* Hunter of His Own Kind so much as a redirection of the Dalek's inherent drive to kill).
* Hunter of Monsters is, because now she's up against someone she doesn't massively outclass. The ends of each verse make use of this:
* Hunter of Monsters: Someone who fights and slays dangerous supernatural creatures to protect other people.
* Hunter of Monsters when dealing with the supernatural. Especially if their motivation is vengeance.
* Hunter of the Eastern Front, slaughters three of his fellow UNE soldiers to show off his skills to the Frost brothers. They are impressed, and Shagia Frost remarks that they will explain it away as an accident happening in a warzone.
* Hunter of us has got to start trusting the other" and holsters his gun so they can all get on with the deal.
* Hunter pets will also occasionally stop dead in their tracks if they detect a stealthed hostile mob or player. One of the many reasons for a Hunter to learn to keep an eye on their pet.
* Hunter Planet: Players take on the role of alien hunters, enjoying the dangers and delights encountered hunting on a newly discovered hunter planet, called Dirt by its local semi-intelligent inhabitants.
* Hunter Prey until their suits can adapt their bodies to the atmosphere.
* Hunter Primal will attack and kill you if you spook him. It is worth noting that certain kinds of mushrooms and plants are poisonous upon contact or when eaten, and falling from a certain height will also kill you as will falling in water too deep to wade through.
* hunters alone. Understandably, this throws a lot of Wesen for a loop when they meet him.
* Hunters also often call supernatural beings of any species terms like "things", "creatures", "freaks", and "monsters".
* Hunters and Collectors' "Ladykiller" is about a ladykiller who desperately wishes to be a ladykiller in love
* Hunters are introduced in a cutscene that shows one opening a door, but this never happens again during actual gameplay. The remake, however, averts it as hunters will sometimes burst into the room when the player least suspects it.
* Hunters can tame creatures out in the wild, which are an integral part of playing their class. They summon these creatures with a calling spell. In the Beastmaster spec, many of a hunter's spells summon animals which do a special attack and then leave.
* Hunter Schafer, is a non-binary trans woman and lesbian who prefers "they/them" pronouns.
* Hunter Schafer, like Jules, is a trans woman. Jules is bi too, while she's a lesbian in real life and has a girlfriend.
* Hunters has a conspiracy of Nazis (both escaped original Nazis and Neo-Nazis) who want to establish a new version of the Third Reich in America.
* Hunters have a tendency to assume that Princesses are just a weird variant of witches and attack on sight. Even if the Hunters do understand the truth, they don't necessarily change their policies. Task Force Valkyrie consider the Princesses illegal magical vigilantes and invading agents of foreign powers.
* Hunters have strong armor covering most of their bodies. The weak points are the

back, which is bigger and generally easier to go after, especially on co-op, and under the chin, which is much harder to hit but has the advantage of being accessible while they're facing you.
* Hunter's Hellcats #110, the Hellcats are sent out into the English Channel is fishing boat with secret double hull which is packed full of high explosive. Their mission is get themselves capture so that they and the boat will be taken back to the German submarine ens. Once there, Hunter will activate the timer and the Hellcats have two hours to find a way out before the boat explodes and takes down the otherwise impenetrable sub pens.
* Hunter's Hellcats #117, the Hellcats are sent to the Alps to disrupt the development of a new Nazi secret weapon. The 'weapon' turns out to be a unit of hulking super soldiers specially conditioned to function at extremely low temperatures.
* Hunter's Hellcats #119, the Hellcats are parachuted into Berlin to extract a Nazi general and his daughter who wish to defect: the general feeling that he can longer stomach the actions of the Nazi high command.
* Hunter's Hellcats #119, the Hellcats attempt to escape from Berlin through the subways. The Nazis attempt to drown them by flooding the tunnels.
* Hunter's Hellcats #119, the Hellcats dress in German uniforms before parachuting into Berlin to rescue a defecting general and his daughter.
* Hunter's Hellcats #120' the Hellcats makes an amphibious landing on an Italian beach while under fire from German aircraft.
* Hunter's Hellcats #120, the Nazis have reinstated gladiator games at the Coliseum as a means of executing captured Italian partisans.
* Hunter's Hellcats. As such, Lt. Hunter is granted leeway on how he recruits for the unit. Heller was originally recruited for a mission that specifically required a female, and proved so useful he decided to keep her on.
* Hunter's Hellcats, a WWII special forces unit made up of soldiers convicted of various crimes. In this case, the cons' expertise was usually limited to the stuff they were already good at before they were drafted—Snake Oil, for instance, was a con man who also happened to be fluent in six languages, including German and Japanese.
* Hunter's Hellcats infiltrate a Japanese base with Hunter and Snake Oil driving a captured tank and marching the rest of the Hellcats ahead of them as captured spies.
* Hunter's Hellcats involved them providing assistance to resistance groups in German-occupied countries.
* Hunter's Hellcats, is a hulking, well, brute of a man with a short fuse whose typical reaction to any problem is to attempt to smash it with his bare hands.
* Hunter's Hellcats, it is never established what Heller's first name is, and no one ever refers to her as anything other than Heller.
* Hunter's Hellcats, Juggler is a safecracker and the team's expert with explosives.
* Hunter's Hellcats), Juggler usually acted as the team's driver, but he seldom had to demonstrate the same badass capabilities behind the wheel as Zig Zag.
* Hunter's Hellcats leader codenamed 'Alouette' the Hellcats are being sent to rescue is his old college sweetheart.
* Hunter's Hellcats on French trains, and then claim the resulting destruction is the result of Allied bombing raids.
* Hunter's Hellcats (probably either Appalachia or, if we're going by the name, the Florida panhandle). He is constantly questioning Hunter's orders, grumbling about his duties, and talking about his feuding cousins.
* Hunter's Hellcats, Snake Oil speaks several languages, and can speak Japanese well enough to pass as a native speaker (at least briefly).
* Hunter's Hellcats, Snake Oil worked for a time as a barnstormer in carnivals before the war. He is in charge of flying the planes the Hellcats frequently steal when escaping enemy territory.
* Hunter's Hellcats. The Hellcats were a group of convicted felons sent on dangerous missions behind enemy lines during WWII.

* Hunter's Hellcats under his command. Resident pickpocket Light fingers attempts to lift his wristwatch, but is grabbed by Hunter.
* Hunter's Hellcats would occasionally feature additional, previously unseen, members of the squad who would die during the opening scenes to show how dangerous the current mission was.
* Hunter show. However, some (usually female) lawyers do genuinely believe in the legal process and are willing to work with Hunter when they feel something obviously suspicious is going on.
* Hunters(including the main protagonists) will often use terms such as "vamps" (for vampires), "black-eyed bitches" (for demons), and "halos" (for angels) to refer to specific species of the supernatural beings that they hunt.
* hunters in their first appearance, and the wife is not very useful and never comes back.
* Hunters, many of the Hunters actually side with the human-friendly Elites.
* Hunter's Moon (1989) came and created the sun for humans to hunt. He plunged his hand into the dirt and came up with a ball of fire. When he threw the sun into the sky, its soul detached into the moon.
* Hunter's Moon (1989) commits ritual suicide. When the local humans find him, they worry there's a rabies outbreak and decide to kill the neighboring wild animals.
* Hunter's Moon (1989), is told from the point of view of foxes and invents an entire mythology and a belief system they follow. From the reader's point of view, every animal speaks in a separate human language, foxes using English, badgers German, cats French, and so on. Animals of the same family speak in related tongues, such as dogs using a broken version of English.
* Hunter's Moon (1989), O-a feels "the grass begin to crackle beneath her".
* Hunters of all stripes will often follow the trail of blood from something they've just put an arrow or bullet through.
* Hunters of Earth not as Susan, is set during the period Susan was attending Coal Hill School.
* Hunters of Gor Bosk (fka Tarl) does this to a group of soldiers from Tyros who have captured Marlenus, Ubar of Ar, and his hunting party.
* Hunters of Justice: After Brainiac bottles all of Remnant's major cities and subsequently destroys the planet, a heavily injured team RWBYJNPR is able to escape via a Boom Tube with a Motherbox they stole from him. They arrive on Earth and are rescued by the Justice League and brought to the Watchtower to recover. However, they all wake up dazed, confused, and in a blind panic. They start putting up a fight before the rest of the League members arrive to diffuse the situation. Superman then arrives and comforts a distraught Ruby by gently hugging her, which she returns and starts sobbing.
* Hunters of Justice: After the destruction of Remnant and being transported to Earth after their defeat at Brainiac's hands, Teams RWBY and JNPR decide to start new lives as superheroes on Earth with the help of the Justice League. While they do hope to one day rescue the bottled cities of what's left of their home planet, they also recognize that, even if they do succeed, their lives will never return to the way things were.
* Hunters of Justice to investigate the origin of recent Grimm attacks on Earth, much to the chagrin of everyone else. Hawkgirl even complains of the last time she had to listen to one of his rants. Fortunately, everyone gets on board when Batman mentions that no one will have to partner with him.
* Hunters of Justice when they arrive on Earth, since they have nothing to go back to.
* hunters, on the other hand side, usually go for guns, preferably of a high calibre and with silver ammo.
* Hunters the eponymous darkness not only requires cast-iron balls but all too often demands a willingness to accept innocent casualties as inevitable in the name of fighting a greater evil.
* Hunters, the Talbot Group, specifically refuses to refer to Werewolves as such, perceiving the term as Hollywood slur. They instead refer to them as "Wolf People".
* Hunter S. Thompson and, lacking anything to submit for his story on the Kentucky

Derby other than his bare-bones, sozzled notes on the event, simply started ripping pages out of his notebook and sending them in. The magazine published his first-person notes from the Derby as-is, and thus Gonzo Journalism was born.
* Hunter S. Thompson, a person recalls an occurrence with Thompson, himself, and a third person at a restaurant where the waiter came by and asked for their order. Thompson spoke up and said "Four beers and four margaritas." The waiter, confused, pointed out there were only three of them. Thompson then said "I don't care if there's thirty three of us, I want four beers and four margaritas."
* Hunter S. Thompson being published after sent it to his boss (who sent it to a publisher).
* Hunter S. Thompson claimed to have committed suicide because he had been alive for seventeen more years than he actually wanted to be. His family states it was a well-thought out act resulting from Thompson's many painful and chronic medical conditions.
* Hunter S. Thompson) head, and began referring to the crew-cut Republican candidate as "my long-haired opponent."
* Hunter S. Thompson. Lampshaded when Duke reads that Hunter S. Thompson has committed suicide and his head explodes, repeatedly. He's got no idea why.
* Hunter S. Thompson — the explosion in popularity led to NFL owners building bigger stadiums to attract a richer, more middle-class clientele. Thompson was understandably dismayed.
* Hunter S. Thompson on fire if the two ever met. Apparently, Thompson wasn't happy with Duke, a Doonesbury character that had been based on him.
* Hunter S. Thompson right, as the whole point of Gonzo journalism is to allow the reader to be put in the same frame of mind as the author, whatever the author was thinking at the time. In the case of Thompson, a man who was politically astute, had a great sense of humor, and was known for being over the top, this leads to a book much like him: something equal parts genius, lunatic, and poet.
* Hunter S. Thompson was the first time that name was ever mentioned in his writing.
* Hunter S. Thompson who liked to smoke, drink, take drugs and shoot his gun a lot, rather than having read any of his novels.
* Hunter Street: Anika is practicing to join the school dance team. When her rival Janine walks in on her training session and is unpleasantly dismissive of her skills, Daniel proposes this kind of contest to prove which girl is the better dancer.
* Hunter: The episode "Fire Man" features a pyromaniac former Vietnam War soldier who, in order to hide his arsonous activities from the cops, poses as one of his deceased buddies because they looked so similar.
* Hunter: The Reckoning allows them to do this by looking into the eyes of the deceased, although if the deceased in question happened to be misinformed about something, they'll pass that misinformation on, thinking it to be the truth. The Wayward isn't automatically aware of whether the deceased is right or wrong, so double-checking may be required.
* Hunter: The Reckoning, and "I'm a monster but I have to be to defend you against the other worse monster" a central theme of all the games, Hunters appeared no longer to be the champions of regular humanity but just another type of supernatural creature.
* Hunter: The Reckoning are both entire gamelines of telling the elves just where they can stick their magic.
* Hunter: The Reckoning both use sigils based roughly on "hobo signs" for subtle communication. For the Prometheans, this makes a bit more sense, as a) their condition requires them to constantly be on the move, and b) they have powers that can make the sigils glow for other Prometheans.
* Hunter: The Reckoning cannot turn off their second sight, so they see the monsters that walk amongst humanity 24/7. They also have no empathy for the masses. Their fight against the supernatural does not care about collateral damage: if a Wayward thinks the most efficient way to kill a vampire that controls a local business is to bomb the building while he's inside (along with all of the innocent

employees), then he'll bring it down. The iconic Wayward, God 45, is implied to have stolen a nuclear weapon during the Time of Judgment.
* Hunter: The Reckoning explore these themes, as they're part of a larger cosmology where the monsters can very well be either good or evil.
* Hunter: The Reckoning had a priest. With a sword-slash-crucifix. And a crossbox-slash-crucifix. AND he could shoot light out of his hands. Proving that priests have secret magical powers that will be useful in the event of a secret zombie apocalypse.
* Hunter: The Reckoning implies repeatedly that the Salem and Inquisitorial witch hunts were both justified and effective. Of course, in the Old World of Darkness, that's not entirely ridiculous.
* Hunter: The Reckoning is an aversion, with the imbued first showing up around 1999 (the year of the game's release), and none of them being well-known. There're theories about historical antecedents, but nothing solid.
* Hunter: The Reckoning, meanwhile, are chiefly limited to wraithly society. Even so, there are sufficient conspiracies around that it doesn't help any attempts to fit them all into the same setting.
* Hunter: The Reckoning, one of the characters tries to reveal himself to the world on Chicago's WGN News by creating a magic sword and destroying a chair with it. Unfortunately, the sword is invisible to the television cameras, and later on several illusionists go on the news showing how his "trick" was done.
* Hunter: The Reckoning series of games. Stray gunfire can easily set off the many abandoned cars.
* Hunter: The Reckoning the collective force of human belief makes supernatural phenomena simply invisible to most people.
* Hunter: The Reckoning the redeemers have this power. They can ask a question, although what exactly the question is and if the monster answers, is not of much relevance. As long as the hunter appeals to the humane side of the target they bring it forward and the creature is overcome with possibly forgotten feelings and emotions of being alive and mortal. The book states that a common question is "Do you remember?"
* Hunter: The Reckoning; unfortunately, the strength of the connection is so powerful that left unchecked, it would destroy a human mind, so a Hermit's subconscious must suppress much of the connection in self-preservation. The stress of this results in the Hermit suffering permanent and painful mental 'static', which only gets worse around supernaturals and other Hunters.
* Hunter: The Reckoning until the Messengers take over and use them as puppets.
* Hunter: The Reckoning Wayward creedbook is Kirsty McCallum, a woman who'd previously had multiple personalities and integrated them; when she was imbued, she split again, her alternate taking the full force of the Wayward imbuing, seeking the elimination of all supernaturals by any means necessary.
* Hunter: The Reckoning where all the player characters are monster hunters who've been granted mystical powers and are driven by a new urge to protect mankind from the supernatural beings that live among us. They also have a tendency to be driven insane, and a lot of them (especially those of the Avenger creed) aren't fussy about whether the supernatural beings they hunt deserve to be slaughtered or not.
* Hunter there. Thinking he's being framed for murder, he leaves and gets his partner Dee Dee to come home with him so he can 'discover' the body with a witness. Only the body has disappeared by the time they arrive.
* Hunter, the technicality wouldn't have applied in the case of a spontaneous confession, and even if it did, the police could investigate to find other evidence that would support the case.
* Hunter, the technicality wouldn't have applied in the case of a spontaneous confession, and the police could then investigate to find other evidence that would support this.
* Hunter: The Vigil – Dark and Light recognize as the Noble and who will immediately direct them to the wrong direction before disappearing in the crowd.
* Hunter: The Vigil – Dark and Light, when a new member of Character Risk Analysis is reluctant to actually use the term "Magical Girl" when designing a

Princess due to how cheesy it sounds. Her superior promptly tells him to shake that off.
* Hunter: The Vigil actually uses this as a game mechanic. Hunters can become attached a particular weapon, giving themselves a firm grasp on their mental state and let's them focus on the task at hand.
* Hunter: The Vigil are force-fed like geese to produce a rich and fatty liver.
* Hunter: The Vigil as part of a chemical process that aid them in interrogation and detective work.
* Hunter: The Vigil, be very territorial, use trap and live in secluded areas where they hunt people.
* Hunter: The Vigil can requisition a weapon that is, essentially, the Medusa Particle Beam Cannon (see below). It takes a lot of energy to run, but does a hell of a lot of damage.
* Hunter: The Vigil features Task Force VALKYRIE; a paramilitary organization run by the United States government tasked with countering supernatural threats to the America.
* Hunter: The Vigil has a flamethrower available to them specifically made for taking out vampires.
* Hunter: The Vigil has the Lucifuge, a conspiracy made up of those who believe they carry the blood of Hell in their veins. They spend their days fighting against demons, their brethren who went over to the side of the Devil, and things darker still.
* Hunter: The Vigil has the Malleus Maleficarum, "The Hammer of Witches," as the Catholic Church's black bag group. They tend to view supernaturals as monsters that plague mankind, and gain access to holy Benedictions based on the saints.
* Hunter: The Vigil has the Union, a regional group (or "compact") of monster hunters made up primarily of blue-collar workers. The members of the Union might not be unionized in their day jobs, but the Union itself tends to function like one.
* Hunter: The Vigil hire people to go capture supernatural creatures for experimentation... with their only preparations being a book filled with half-truths and outright fables. Hey, with the way the job market is, if anyone dies, we can hire new ones!
* Hunter: The Vigil: Inbreeding is offered as an explanation for the deformities of both the Freak and Mutant Slasher Undertakings, with the disfigurements either arising from genetic disorders or from the inbreeding reinforcing a supernatural taint in the family.
* Hunter: The Vigil is closer to heroic organization (made of normal humans fighting monsters), while the Lucifuge is closer to organization of heroes (made of super"humans" fighting monsters).
* Hunter: The Vigil, more Security dots in Safehouse merit means that your hiding place is rigged with those kind of mechanism. The illustration is a triggered shotgun.
* Hunter: The Vigil, most Conspiracies have equipment or abilities that let their operatives pierce the various illusions and disguises used by the supernaturals, frequently while also indicating werewolves and other shapeshifters in human form as being non-human.
* Hunter: The Vigil of these: the Malleus Maleficarum, a secret arm of the Vatican dedicated to hunting down monsters (and usually of the "suffer not a witch to live" ethos); the Long Night, a loose group of pre-millennialist fundamentalists devoted to "redeeming" monsters; and the Knights of St. George, an Anglican group that focuses mainly on demons and sorcerers.
* Hunter: The Vigil, others can call on some form of magic, and yet others have supertech developed to fight various types of monster).
* Hunter: The Vigil provides The Owls, disembodied spirits that take over humans or vampires and turn them into rotting, blood drinking corpses known as Bloodjackers. When the corpse rots or is destroyed, The Owl simply grabs a new host. Some actually keep rooms full of fresh corpses, waiting to be possessed.
* Hunter: The Vigil's Network Zero has proof of nearly goddamn anything. The

problem is getting people to take it seriously.
* Hunter: The Vigil's Network Zero pursues this outcome through the power of the internet.
* Hunter: The Vigil, targeting people, or supernatural beings, who deserve it.
* Hunter: The Vigil, the powerful conspiracies that hunt in the darkness will often kill as a last resort to not only cover up the existence of monsters but the dealings of the conspiracies. This is also the reason vampires and other creatures are so quick to kill to uphold the masquerade; witnesses often become hunters.
* Hunter: The Vigil, there's literally no limit beyond their imagination to what they can do to the monsters they hunt. The sourcebooks openly describe the Abbey as some of the Vigil's most sadistic and depraved hunters, frequently engaging in drugging, raping, torturing and even cannibalizing their victims.
* Hunter: The Vigil they got their hands on vampiric blood magic, and created the Rites of Denial, special powers meant to deny vampires their innate advantages.
* Hunter: The Vigil uses this as a game mechanic, emphasizing that hunter cells will always work together no matter what they face in the darkness of the unknown.
* Hunter: The Vigil: vampires around the world will crap their pants upon receiving a piece of paper, or an SMS, or an email, or a phone call, that asks "Who is Cain?" This isn't necessarily because of the significance of Cain; it's because it means the Cainite Heresy is coming for them.
* Hunter, this is the back story as to why the world is a dystopian future with otherworldly monsters as threats to be fought back against. Back when the world was starting to go bad, most Christians saw it as the start of the Apocalypse. When the Rapture didn't happen (Christians being raised to Heaven while everyone else went to Hell), a group of Christians in the Middle East stole a nuclear weapon and set it off in hopes of kick-starting the Apocalypse. All it did was just made things even worse, as it broke the barrier between us and the otherworldly monsters.
* Hunter × Hunter… Specifically, the deconstruction is: What happens to the non-badass people? Well, they die left and right, and the police are pretty much useless against the evil Badasses.
* Hunter × Hunter, after saving Killua from his evil family, Gon, Killua, Kurapika, and Leorio go their separate ways, but vow to meet up one year later in Yorknew City.
* Hunter × Hunter, almost like a woman trying to voice adult Son Goku.
* Hunter × Hunter and getting pumped up with Nen, ready to fight.
* Hunter × Hunter, and is seen happily downing five cans of laxative-laced juice before the Hunter Exam starts.
* Hunter × Hunter, and pinned down by Kurapika and Bill, knowing they would interrogate him if he didn't kill himself immediately. First Prince Benjamin and his military aide Balsamilco, watching the footage from a camera hidden on Vincent, are confused as to why Vincent chose death so soon, as they consider him stronger than that.
* Hunter × Hunter and the rest of the main characters helping him get revenge against the Phantom Troupe.
* Hunter × Hunter: Any successful attack done by these monkeys will deprive the victim of his or her sight, hearing, or ability to speak depending on the monkey.
* Hunter × Hunter, any users of Nen will be able to withstand gunfire, though the ease and amount of which they can do so vary depending on their skill and type of gun. A more powerful Nen user will be easily able to shrug off sniper fire, well a weaker Nen user may last seven to eight shots from a pistol before taking damage. If another Nen user fires a gun infused with their Nen, it will do considerably more damage and usually negate the protection Nen provides.
* Hunter × Hunter, a person's aura is normally invisible to everyone save for Nen practitioners, who gain the ability to see it as part of their basic training. Nen practitioners, in turn, have developed techniques that mask their aura from their peers, as well as to bypass such countermeasures.
* Hunter × Hunter are bounty hunters. In-universe, this type are called blacklist hunters. Not only that hunters in general are strong, hunters are also

rich, thanks to their hunter licences.
* Hunter × Hunter. As he explains that he's not falling for it, down comes Zeno's son Silva, whose landing squashes Cheetu like a bug.
* Hunter × Hunter, as only the requests are potentially dangerous. No known wish asked of Alluka has ever been detrimental to the person who wished it.)
* Hunter × Hunter as well, though they tend to deviate sharply from what they're based on:
* Hunter × Hunter at a set return date and has found a nervous rhythm that is giving the story momentum.
* Hunter × Hunter, at Heaven's Arena Killua fights Riehlvelt, a dude in a wheelchair who is armed with two snake-headed electrified whips. They don't work on Killua.
* Hunter × Hunter: A young boy sets out to become a Hunter to find his father, encountering many criminals, monsters, and other difficult challenges along the way.
* Hunter × Hunter. Beings animated in this way do not have souls or personalities but will follow simple commands from the stamp's wielder.
* Hunter × Hunter brethren, but rather, Togashi took so many long breaks, one of which was 15 months, that it has taken this long to make it. The latest chapter was released in November 2018, and the current hiatus has lasted almost 2 years.
* Hunter × Hunter, but it was still quite violent for its time slot, hence moving to Tuesday Nights 25:30/Wednesday Mornings 1:30 AM for the last portion.
* Hunter × Hunter, but the main characters ignore them because they've got a mission to complete.
* Hunter × Hunter, but the reason he wants to be filthy rich is so he can get his PhD and open a free hospital after an old friend of his died from lack of treatment after he couldn't pay the medical fees.
* Hunter × Hunter can have self-imposed conditions that strengthens the ability, with the more convoluted ones giving greater powers, though greater punishments if broken:
* Hunter × Hunter. Chrollo seems more shocked at getting Kurapika's gender wrong than him being incapacitated and tied up in Kurapika's car.
* Hunter × Hunter commanders, have and use cellphones to communicate with each other over distances. Gon and Killua's beetle-shaped phones, in particular, are described as being able to get service nearly anywhere in the world.
* Hunter × Hunter does this to Gon as a prank during one episode. When Gon tries to return the favor Killua outmaneuvers him and delivers another one pie to the face.
* Hunter × Hunter does this with the Nen-system. Going further, while Nen itself has its own rules and limits, specific abilities can also have rules of their own set in place by their creators. Examples of such rules can be placing limitations on how and when an ability can be used. Further, due to the general rules of Nen, setting such limitations can make the actual ability far more powerful. For example, Kurapika creates powerful attacks with the limits that they can only be used against the Phantom Troupe and he will die if he misuses them. These limitations allow him to take on the most physically powerful of his enemies one-on-one without difficulty.
* Hunter × Hunter, drawn in an eerily realistic art-style, overlooking our four protagonists.
* Hunter × Hunter due to the entity possessing her and Killua is never shown correcting his family when they refer to Alluka as a boy despite otherwise taking them to task for their ill treatment of her. Adding to the confusion is how Kalluto, one of the other brothers, dresses in a very feminine kimono but clearly identifies as male.
* Hunter × Hunter. Even though they have some issues, they usually don't kill innocent or other people unrelated to their jobs. At one point, the Ten Mafia Dons hired Zeno (the grandfather) and Silva (the father) to kill Chrollo Lucilfer, but Chrollo hired the eldest son, Illumi, to kill the dons. Illumi killed them when Zeno and Silva were in the middle of the fight against Chrollo, and after Illumi

informed his father, both of them went back to home without any regrets.
* Hunter × Hunter fans have found that the Chimera Ant arc in the 2011 anime, while glacial to watch weekly, is easier to follow and digest in extended viewing sessions.
* Hunter × Hunter. For all we know, the Zodiacs are still preparing to go to the Dark Continent.
* Hunter × Hunter fun to fight, so he lets them live and encourages their development. If they don't have potential, he just straight up kills them.
* Hunter × Hunter get more powerful characters interested in Gon and Killua. Gon actually landing a blow (and later successfully stealing his badge) impress Hisoka, despite Hisoka being far more powerful and skilled. On the airship, Netero invites Gon and Killua to try to take a ball away from him. They have no chance since he's one of the most powerful beings alive, but Gon is satisfied when he forces Netero to use his other arm. When they run afoul of the Genei Ryodan they are once again totally outclassed. They put up a good enough fight to impress the Spiders, to the point that one of them even wants the two to join them.
* Hunter × Hunter: Gon and Killua are eventually taught the basics of Nen by Wing in the Heaven's Tower. Later in Greed Island, they meet Wing's master Biscuit, who would continue his training and teach the kids the advanced techniques of Nen. While Wing does it as his duty as a Hunter, Biscuit does it purely out of curiosity.
* Hunter × Hunter, greatly increasing his nen, at the same time shaving decades off his life span, very nearly causing him to never be able to use nen again and leaving his body a shattered and bloody mess afterwards.
* Hunter × Hunter: Greed Island, Bisquit punches Killua this way whenever he makes a reference to her actual age.
* Hunter × Hunter gum-like aura, and change the texture of objects. That's it.
* Hunter × Hunter has a much simpler out: Make Knuckle lose consciousness, and the curse and all its effects will go away immediately.
* Hunter × Hunter has a narrator who typically speaks at the ending of the episode and later on, particularly in the Chimera Ant arc, extensively explains the characters' powers, mental states, and miscellaneous information important for the story.
* Hunter × Hunter has a noir feel to it that gets more prominent as the tone becomes darker.
* Hunter × Hunter has a retractable version. He uses it to threaten Gon during their fight in the final Hunter Exam.
* Hunter × Hunter has at most four episodes that could be considered filler in it, and they were all fairly early on. Instead of making filler episodes, the anime simply stopped making episodes until the manga made significant progress, which is why it has three OVA seasons and stops at the end of the Greed Island arc. The series was rebooted in 2011, and despite a twelve-year gap, it narrowly averts this, ending in 148 episodes.
* Hunter × Hunter has shades of this, especially in the first arc, when the events of the first chapter are completely omitted and only recapped in a flashback dozens of episodes later, and the gourmet hunter stage of the Hunter Exam only consists of cooking pigs instead of cooking pigs and then making sushi.
* Hunter × Hunter, having Killua put the heart in a little bag, and making him watch it sloooowly stop beating. Then he puts the bag in the dead man's hand.
* Hunter × Hunter, healing any wounds she received. That the killer dies in the process avoids many of the downsides to this power as it doesn't allow the same person to kill her over and over. However, she has little to no fighting skill other than decent aim with a gun. Her older brother Benjamin, having learned of this power and instantly realizing how dangerous it is, neutralizes it by simply imprisoning her, and unlike cases like Mr. Immortal, she cannot simply kill herself to activate it—someone must murder her. Camilla is also not immortal in the traditional sense, as she still ages normally.
* Hunter × Hunter helped secure the series as one of the most popular anime

of the 2010s.
* Hunter × Hunter. He, quite willingly, loses both arms and uses that as part of his strategy to unnerve his opponent.
* Hunter × Hunter. He successfully convinces eleven of the most dangerous criminals in the world that any deviation from his directives, namely any harm done to his friends they hold hostage, will result in the immediate death of their leader Chrollo (whom Kurapica has captured.) During the course of their hostage exchange itself, he successfully de-powers Chrollo and separates him from his followers for the foreseeable future. And he ensures that if the Ryodan's negotiator reveals any personal information she learned during their negotiation, she will die, removing a significant threat his future plans as well as one of the more stable members of the Ryodan even if she doesn't uphold the deal. Keep in mind that up until this point the Ryodan has successfully curb-stomped their way through all obstacles, and Kurapica himself is only capable of restraining one of them at a time. And he managed to get ahold of Chrollo in the first place by simply turning off the lights.
* Hunter × Hunter: Hisoka is deliberately shown being sexually excited on the mere thought of fighting strong enemies.
* Hunter × Hunter his opponent in the face. He had to get both arms surgically reattached later though.
* Hunter × Hunter". However, several fans insist that "Kurta" is his surname, so much that "Kurapika Kurta" often shows up in Google results for search terms such as "hunter x hunter characters", and even on this very wiki.
* Hunter × Hunter: Hunters serve as this, although the Hunters Association is a loose guild — hunters take their own jobs, and the Guild provides contacts and perks.
* Hunter × Hunter. Immediately afterward, his body withers to a state of living death and it takes a literal miracle to revive him.
* Hunter × Hunter immediately spits the juice out when he notices that it tastes weird (despite the drug being odorless and tasteless), and everyone else either refuses the drink outright or gets rid of it once they see Gon's reaction.
* Hunter × Hunter. In later arcs, the exposition is usually provided by whoever's training Gon and Killua.
* Hunter × Hunter involves Gon, Killua, Bisk, Hisoka and some minor characters in a dodgeball game. The players on the other team throw the ball with sufficient force to break bones.
* Hunter × Hunter. Isaac chose Pariston specifically because of his adversarial nature, as Isaac felt his intuition and decision-making would sharpen with someone always provoking him. The feeling is mutual, as Pariston explicitly states the only reason he became vice-chairman was so he could mess with the chairman. He actually misses Isaac deeply for that very reason, and tells Cheadle, the new chairman, that if she ever makes the Hunter Association boring, he just might have to go all-out in teasing her, too.
* Hunter × Hunter is a male example, especially in the first few chapters/episodes. It's an established rule of the setting that great Hunters are well-liked by animals, as Gon's father Ging also seemed to have a way with critters.
* Hunter × Hunter is armed with a sniper rifle that shoots fleas, which have anti-coagulants and are thus designed to bleed his opponents to death. He is one of the few characters able to land a first hit on Killua, who is normally very agile and hyper-alert. Unlike most of his fellow Chimera Ants, he is very friendly to his comrades, believes strongly in repaying kindness, and even later defects from the Chimera Ants to join the heroes—upon which he keeps finding opponents in close quarters leaving him unable to use his sniping skills.
* Hunter × Hunter is a total sausagefest. Any women in the series are minor characters who don't stick around long. The two main characters are also prepubescent.
* Hunter × Hunter isn't set in any discernible time period (since it's a fantasy series), the 2011 remake features updated technology. Flip-phones are

changed to smartphones, and VHS tapes are changed to DVDs. It's extremely noticeable when comparing it to the 1999 adaptation and earlier parts of the manga.
* Hunter × Hunter is set in a world brimming with strange fantasy creatures and mythical locations juxtaposed with modern cities and cutting-edge technology, and characters can manipulate their auras to use Nen, which gives them access to fantastic abilities.
* Hunter × Hunter is supposed to mate with the female of another species, turning her into a chimera queen ant somehow (or making her give birth to one, the manga simply mentions it'd "create" a queen). After the death of the former queen (the King's mother), chimera ant generals also gain this ability (becoming lesser "kings").
* Hunter × Hunter, it looks like the boy is impervious to damage.
* Hunter × Hunter it starts. Gon 'bids' an insane amount of money. Fortunately they are outbid and escape the consequences of his foolishness.
* Hunter × Hunter it was said that two members of the Genei Ryodan / Phantom Troupe (Uvogin and Nobunaga Hazama) had this kind of relationship. They were at their strongest when they fought large groups of enemies together, though Uvogin would never admit it.
* Hunter × Hunter Killua was originally depicted as having a deep-seated fear of fighting stronger opponents, something that his father and abusive brother impressed upon him during his assassin's training. Other characters noted that this was a severe liability that hampered his reliability as a hunter and Killua himself worried that his cowardice would lead him to abandon his friends in the heat of the moment. Most fans were underwhelmed when it was revealed that this phobia wasn't a character trait, but instead due to a needle that his brother placed in his skull and that it was resolved simply by removing the needle.
* Hunter × Hunter Killua Zoldyck was raised to be an assassin and eventually become head of his family of assassins. Repeatedly acknowledged by Killua himself throughout the series.
* Hunter × Hunter, Kurapika hits Leorio in the face with his nunchucks. "Leorio" then transforms into a monstrous creature and asks how Kurapika knew he was an imposter. Kurapika responds that he didn't know, he just wanted to hit Leorio in the face. (Because Kurapika assumed that Leorio had abandoned the wounded man he had promised to take care of.)
* Hunter × Hunter: Kurapika's primary motivation in becoming a hunter is taking vengeance upon the Phantom Troupe for the destruction of his clan.
* Hunter × Hunter lasted from 2011 to 2014, ending accordingly due to reaching too close to the current point of the manga.
* Hunter × Hunter managed to spend several million on sweets in DAYS. The chocolate shop couldn't keep up.
* Hunter × Hunter: Many of the combatants during the assault on Meruem’s castle are top-level fighters and used to operating at scales of minutes, if not seconds and microseconds. So there happens so much during the opening moments of the battle that entire episodes are required to convey it all.
* Hunter × Hunter—the manga was only six years old when it started.
* Hunter × Hunter: Mentioning the Phantom Troupe or just merely seeing a spider is enough to set Kurapika off, thanks to his clan's murder by them.
* Hunter × Hunter, Meruem is annoyed his opponent continued a game they were playing, despite it being obvious he had won it many turns ago. When the other player stammers too much in fear and is unable to answer, Meruem jabs at him with his needle tipped tail and rips his ear off, then kills him when the man tries to run away.
* Hunter × Hunter might distract the King from his "true goal" and is therefore considering killing her for "the King's sake".
* Hunter × Hunter money, making him go to extreme ends to get funding. (He doesn't resort to crime, but he risks his life multiple times in the infamous hunter exams.)
* Hunter × Hunter muscular bit players, but among peers the largest ones usually have the most physical strength.

* Hunter × Hunter never actually goes away). Also, the second anime has been criticized for repeating the same event from the first anime series while ignoring likable parts and even cutting parts from the first manga chapter. However, after 60 episodes the series will cover for the first time the material the first anime never adapted.
* Hunter × Hunter, not without great damage. And yes, both of them are friendly and amusing to their peerage.
* Hunter × Hunter of the arc-after-next just because Togashi wanted to play with them and their powers more. He has a tendency to bond with his villains.
* Hunter × Hunter only covered the TV series and the first OVA (70 episodes total).
* Hunter × Hunter, or in Chrollo's case, to set up a situation where he can fight them without interference.
* Hunter × Hunter. Rather than the citizens getting into a panic, they just hide somewhere and re-emerge when the conflict is over. It's as if normal humans in this series are so desensitized to people dying in public that they treat it as merely inconveniences rather than tragedies.
* Hunter × Hunter, requires him to explain how his power works to his victims.
* Hunter × Hunter, resulting in every batch of eggs giving more powerful (and human-like, since humans are the best food) ants than the last, culminating in the King being the supreme being.
* Hunter × Hunter running the country and is basically allowed to keep doing so while the Ants prepare to eat everybody.
* Hunter × Hunter. She calls it "Deme-chan" ("Blinky" in the translated manga).
* Hunter × Hunter, she regularly praises her son Killua for doing ruthless things like assaulting her or taking her hostage.
* Hunter × Hunter ship that's enormous in size, built to traverse the long journey to the Dark Continent. This thing is so large, from the perspective of its passengers, it functions more as a self-contained city than a vehicle. It includes several dining areas, a courthouse, and even what appears to be a shantytown that popped up on one of the lower decks, and, when the journey begins, it carries about 100,000 passengers (though the number may be higher due to there being many stowaways).
* Hunter × Hunter: Shizuku has the look down. The "sweet" aspect is diminished somewhat by the fact that she's a remorseless murderer.
* Hunter × Hunter shows an interesting variation. The world map is made of the continents of Earth, but rotated and given different sizes and locations.
* Hunter × Hunter Since the Hunters themselves are not prosecuted for crimes (up to a certain degree), it seems that they have a sort of free rein over what goes and what doesn't. Anyone not smart or competent enough to acquire their get-out-of-jail-free card prior to breaking the law is hereby given a second chance.
* Hunter × Hunter, Squala, one of the bodyguards for the Nostrade family, finds out the Phantom Troupe is after them, so he decides to run away and quit the job. Unfortunately, he takes with him a treasure he happened to be guarding, without realizing that the treasure was wired, and it was precisely what the Troupe was searching for.
* Hunter × Hunter stage musicals. He still acts as a threat, but in a more mischievous sense rather than a serious one.
* Hunter × Hunter, still one of the most powerful people on the planet despite being over 110 years old. Not a sensei anymore, and he's still active (though rarely involved in fights) as the head of the Hunter Association, but he fits the trope otherwise.
* Hunter × Hunter such as Leol, Cheetu, Werrefin, and Bihorn have been noted by furries.
* Hunter × Hunter that he created along with his personal wireless network.
* Hunter × Hunter that's waiting for young boys to grow up, it's supposed to.
* Hunter × Hunter. The chairman confirms this. The result is that would-be

criminals wind up taking the Hunter Exam for an extra layer of legal protection. This becomes a political plot point later in the series.
* Hunter × Hunter: The Chimera Ant King prefers the brains of Nen-users. To make things worse, he absorbs his victims' Nen to make his own aura even stronger.
* Hunter × Hunter: The Chimera Ant Nerferpitou has Kite's head in their hands after their fight, but nevertheless, Gon convinces Killua and perhaps the entire audience that he was still alive. Even after witnessing Kite in a zombified state, he believes that the Ant still can restore him. However, Pitou reveals that he was just a moving doll, unable to ever come back to life, leading Gon to forget any value for both his life and Pitou's.
* Hunter × Hunter, the Chimera Ants eat any flesh they can find but prefer brains. Particularly human brains. The Chimera Ant King is even pickier and enjoys the brains of Nen users.
* Hunter × Hunter: The Hunter exam had these set up, given the extreme challenge it poses.
* Hunter × Hunter the leader of the Phantom Troupe can steal the Nen abilities of others by learning about them, asking questions, and knowing its name. The original user of that ability can then no longer use that ability again.
* Hunter × Hunter: the multiple images are visible to everybody, and the characters hide among those in order to proceed with a surprise attack.
* Hunter × Hunter, the prisoners of Trick Tower are noted to have sentences of several hundred years each.
* Hunter × Hunter. There are also naturally-occurring fox-bears and spider-eagles.
* Hunter × Hunter, the setting's effective magic system, is supposedly a secret known only to people who belong to circles that are in on it and seem to be subtly taught to hunters once they pass the Hunter Exams. However, it is also openly publicized in an arena tower that not only seems to televise the fights between powerful Nen users, also have commentators explaining what the contestants are doing in the Arena with their Nen… to a large public. It gets to a point that the only main character that should realistically be ignorant about Nen is Gon, for growing up on an isolated and morose island in the middle of nowhere. Killua should know about Nen just by osmosis from his heavy Nen-practicing family of world-famous assassins, Kurapika's deceased clan is implied to be formed of powerful Nen users as well (otherwise they wouldn't register on Nobunaga's memory. Even Uvo eventually remembers the clan and its powerful members) and Leorio's general world and history knowledge should make him aware of it as well (even if just by passing knowledge about the Celestial Arena).
* Hunter × Hunter. The two main heroes evade an enemy in a subversion. They kick through wall after wall...then double back one room and simply leave by the front door. It works.
* Hunter × Hunter, Tonpa covers Gon's eyes when Leorio checks Leroute's sex by grabbing her chest.
* Hunter × Hunter took the Hunter Exams because his mother is this, he is resentful of her to the point that he has tried or threatened to kill her.
* Hunter × Hunter to show how insignificant the threat is to them. Neon also plays this with her bodyguards.
* Hunter × Hunter uses one of his nen chains to locate people among others.
* Hunter × Hunter want to answer, you won't be able to help thinking of the answer as soon as she asks the question, giving her what she wants regardless of whether you're honest or not.
* Hunter × Hunter was re-added to Netflix in 2019, the rating was changed from TV-14 to TV-MA. The rating was later brought back down to TV-14.
* Hunter × Hunter was trained as a professional assassin since birth and he learnt how to endure various kind of torture, including electrocution. Even though, he still feels the pain, it does not affect him actually and the pain is visually not presented either. He later specializes his Nen in producing electricity with his aura, something that can only be done by someone who has suffered electrocutions on a regular basis.

* Hunter × Hunter were introduced as extremely rare powers that fell under the preview of the Hunters Association and a few others. Over time, the number of non-hunters who could use Nen increased and membership in the Hunters Association became less special. This is especially noticeable in the Greed Island and Chimera Ant arcs. The former features an entire competition of Nen users, most of whom are nothing special and the latter features an invasive species that can learn to use Nen more quickly and easily than humans.
* Hunter × Hunter, when Gon as his group faces off against Razor and his gang for one of the cards needed to win the game. The game event requires 15 players to match up with Razor and his "Fourteen Devils", and to win the card, they must win competitive matches 8 times overall. However, the match against Razor is a dodgeball match with 8 players, counting for 8 wins, leading Tsezuguerra to realize that competing against all the small fry of Razor's crew is pointless; the only match of any consequence is against the boss himself. Indeed, once Gon's group score the first few wins, Razor tells the rest of his gang that they can just forfeit their matches and leave it up to him.
* Hunter × Hunter when she gets rid of that Sadako look, takes a shower and combs her hair to go on a date with Gon.
* Hunter × Hunter which takes off and flies off into the distance.
* Hunter × Hunter: While Chrollo Lucilfer was borrowing his Nen abilities, Hisoka effortlessly decapitated Kortopi as he was relieving himself on the john.
* Hunter × Hunter will carry around a Ben's Knife — if they can obtain one, because the Ben who created them died a century ago, making them extremely expensive.
* Hunter × Hunter with Killua, whose first instinct when he's certain he's facing a more powerful opponent is to run. Unfortunately, this proves to be more of a hindrance a lot of the time, as running isn't always an option, and with his tendency to underestimate himself, it ends up holding him back from going all-out. This provides a hilarious moment when he and Gon are trapped in a room by Nobunaga. With Nobunaga blocking the only way out of the room and being far too strong for the two of them to fight, they suddenly rush him...only to break down the walls of the room and flee. When Nobunaga runs out to look for them, Killua declares that they'll come out to face him...only to take Gon and flee the building while Nobunaga waits for them to show themselves. It's later subverted when it turns out this behavior is actually manipulation from his older brother Illumi, who is overbearingly protective of him. To ensure he never fights opponents stronger than himself, he planted a mind-controlling needle in his forehead that puts that instinct in his mind. Once Killua figures this out, he immediately removes the needle, and along with it, the crippling desire to run.
* Hunter × Hunter with Mito to follow his dreams, which he saw as more important than Gon. Gon ends up following in his father's footsteps and tries to become a Hunter for the purpose of finding out just why it is worth abandoning your only son over. Defied when it comes to his mother. He stops playing a recording left behind by his father when it seems like it will reveal his mother's identity. As far as he's concerned, Mito is his mother.
* Hunter × Hunter with one of Neferpitou's Nen abilities, Terpsichora, a monstrous ballerina-like figure that appears to have them on strings. Pitou commands it to make her "dance past [their] limits", resulting in freakishly strong leaps.
* Hunter × Hunter world, airships are the only air transportation system.
* Hunter Truf: Ace Attorney and later Justices Memoirs on Ace Attorney Online feature an easter egg in which Martin Summers (hotel dusk)'s real "talent" is revealed.
* Hunter, which has McCall being raped and Hunter being shot (after he beats up the guy) by a foreign diplomat who is protected by immunity. An incensed Hunter follows the man back to his country, kills him, and escapes.
* Hunter which has restraints and a coin-operated vibrating mattress. Dee Dee starts to crack up laughing when she hears Hunter drop a couple of coins in and the bed starts to vibrate.

* Hunter x Hunter (2011) has the "Hunterpedia" segments between the end credits and the next episode preview in the Heavens Arena and Yorknew arcs. In the Greed Island arc, there's the "Greed Island Tutorial".
* Hunter Zolomon: Sending his father-in-law to his death because he (a criminal profiler) told him a criminal he was meeting with wouldn't be armed. Again and again and again. Hearing himself say "Don't worry, the perp will not be armed" over and over. The last we see of Zoom in that story, he's vibrating from impotent rage. So... How about that misery, Zoom?
* Hunt for Atlantis, where at least half the deathtraps representing the Labors of Hercules have already been set off by earlier explorers and are now harmless.
* Hunt for Red October to an action platformer where you have to disarm bombs on the sub.
* Hunt For The Skinwalker by Colm Kelleher and George Knapp, where a housing development for the Ute tribe in Utah was built over a graveyard home to mainly black Freemason soldiers.
* Hunt For The Skin Walker the book mentions reports of men driving around in black Cadillacs in a place where seeing a car would be extremely unusual.
* Hunt for the Wilderpeople: Ricky attempts to fake his death by making an effigy of himself, dousing it in petrol, and setting the barn on fire. It is less than convincing to the authorities.
* Hunt for the Wilderpeople: TVNZ presenters Sam Wallace and Nadine Chalmers-Ross appears in this one.
* Huntik: Secrets & Seekers do this whenever they cast a spell or call out a titan.
* Huntik: Secrets & Seekers. It was used by the first Seeker, Lord Casterwill himself, to seal the Spiral Mark that can be used to call the Nullifiers. After it is found, Lok begins using it as his Weapon of Choice in pretty much every episode thereafter. The Betrayer tricks Lok into unsealing the Spiral Mark with it under the pretense of destroying it.
* Huntik: Secrets & Seekers of the season one, The Professor, has two less powerful Undergolems.
* Huntik: Secrets & Seekers personality make for a villain who doesn't listen to facts or care about the consequences as long as he gets what he's after.
* Hunting "Accident": Bringing someone on a hunting trip and getting away with killing them by claiming they were mistaken for the animal being hunted.
* Hunting "Accident" if he does not join the monk-like Night's Watch and revoke his inheritance.
* Hunting "Accident": Taking someone along for a hunting trip just to "accidentally" shoot them.
* Hunting "Accident"" with the nobility or royalty for any country anytime in history. One particularly famous case is the death of King William II of England, son of William the Conqueror, who was shot in the New Forest. Whether or not it was truly accidental will likely never be known.
* Hunting down dangerous criminals to collect the bounty on their heads is a common quest for the
* Hunting Horns are support-based weapons that resemble a long-handled hammer mixed with a bagpipe. Playing songs between attacks allows users to apply buffs to themselves and nearby teammates, making this an excellent choice for players who favor bard classes.
* Hunting Humans mentions once having a neighbor who saw herself as a health nut, so she ate raw eggs every morning. He puts her out of her misery by poisoning a few of them.
* Hunting Humans, wherein 2 clinical psychopaths and methodical serial killers find themselves having to one-up each other in body-count (with the main character being more or less blackmailed to do so, ironically enough).
* Hunting Humans who has been hassling him appears as a supernatural creature that preys on infamous murderers.
* Hunting knives are effectively over-sized scalpels due to the fact that they're meant specifically for skinning and butchering game. They have to be, as animal

hide is very hard to cut through with anything short of a scalpel's sharpness.
* Hunting Series naturally uses a little bit of this. Particularly, in part 3 - Hunting and Saving when John Winchester uses it to save a kid that's being held ten feet off the ground by a vampire.
* Hunting the Most Dangerous Game: A human hunts other humans for sport, killing them like they were game animals.
* Hunting the Most Dangerous Game: During a hunt, the hunter(s) is a human. So is the prey.
* Hunting the Most Dangerous Game: Hunting wild animals has gotten boring for them. So they've moved on to chasing other humans.
* Hunting the Most Dangerous Game Max replied: "Hey, I'm as normal as the next guy."
* Hunting the Most Dangerous Game put the Doctor through a simulated hunt so he can know what it felt like.
* Hunting the Most Dangerous Game that kills and terrorizes to prove himself the best at everything and curb-stomps both teams in individual combat, is the Warrior. Cap, who secretly contacted Ant-Man as soon as he could so he could defuse the weapon of mass destruction that the Champion was using to force both teams to play his game (thus making the whole fight a distraction) and eventually reveals that they did everything they did to save lives as he leads them into ganging up on the Champion and curb-stomp him as he's whining that it's not fair, proves himself as the Soldier yet again.
* Hunting the Most Dangerous Game-type sport come through the wormhole and take refuge on the station.
* Hunting the Most Dangerous Game: Where the villains formally hunt the heroes.
* Hunting the Most Dangerous Game: Your antagonist is the hunter and you are the prey.
* Hunting the Unicorn and had no intention of taking responsibility, leaving him terrified of either getting hurt again or accidentally doing the same thing to Kurt.
* Hunting the Unicorn, and is naturally on its way to this. It seems to gain several tropes with every update (and is now well past the hundred mark), which is not helped at all by the author being a fellow troper.
* Hunting the Unicorn. Most of the readers are already Klaine fans, but a few of them didn't like Blaine at all before reading the fic.
* Hunting Tiger Trident A hunter wielding this would go into the wilderness, with the intent of killing perhaps a man-eating tiger, and when he found it, the tiger would often charge at him. The trident would be held forward, and the tiger would impale itself upon it. The prongs on the sides would keep the tiger from sliding farther onto the spear and swiping at the hunter. To strengthen this, the wielder would often dig the back end of the spear into the ground for extra bracing against the rampaging animal.
* Huntington's chorea only becomes noticeable in adulthood (the exact age varies, but it often only manifests after the carrier has had children).
* hunting trip, after being given far too much wine by a Lannister servant. Earlier there was a plot to bump him off in a melee tournament, but that failed because the Hand of the King Ned Stark talked Robert out of participating.
* hunting trophies have been taken down so as not to impede the smooth flow of diplomacy. Later in the book, he learns about The Game, where werewolves hunt down humans.
* Hunting Venus centered on a fictional New Romantic band from the early 1980s, The Venus Hunters, who were getting together for a reunion gig despite the fact they only ever had one hit. Lead singer Martin Clunes finds a problem... they've forgotten the words and how to play the music. Nobody can find a copy of the single. And their charismatic guitarist Neil Morrisey has had a sex-change operation...
* Huntress, a part of the Bat Family, is almost always depicted wearing purple. She's one of the only members of the Bat Family that doesn't wear all black.
* Huntress became a vigilante after her family was murdered by rival mafiosi.

* Huntress episode "Double Date" when it's heavily implied that they have sex offscreen.
* Huntress feature she fights the human trafficker Herbert Hynde whose face seems to be chemically scarred with most of his nose and his lips gone.
* Huntress, Helena Bertinelli, started out as a sweet, adorable little girl who, granted, had been born into a mafia family, but had not a bad thought for anyone. Then, when she was eight years old, her family was murdered in front of her at dinner. Then the Gotham police sent her a "condolence" card that read "Many Happy Returns!" Then she was taken to Sicily to be raised by her cousins, who turned out to be mafia assassins. They raised her to believe that the mafia were good-guy Robin-Hood types, and to believe in omerta, and to avenge her family, and, to that end, they trained her as an assassin. Then they were arrested by the Italian government as part of a crackdown on organized crime, and she was sent to boarding school in Switzerland, where she learned the truth about the mob. After an upbringing like that, it's hardly a surprise that she became a ruthless vigilante killer.
* Huntress, Helena says "This is worth going to hell for," when she kills Stephen Mandragora.
* Huntress. In this case, this was more anti-heroic than outright evil, since her father was a vicious gangster who had ordered the murder of the rest of her family and was trying to blackmail her into joining his gang as an assassin.
* Huntress is a more heroic figure after she resolves her issues with Mandragora.
* Huntress Morgead. She and Morgead eventually realize they're soulmates; Hugh was also seemingly oblivious to Jez's feelings and as far as we can tell only loves her in a platonic sense.
* Huntress Not incidentally, at least with the Helena Bertinelli version of the character, the crossbow allows for sniping from concealment while also being extremely quiet, making it an ideal choice for an assassin.
* Huntress/Power Girl: World's Finest costumes during her first year in that identity on Prime Earth.
* Huntress: Public Enemies when Tim and Cassandra are goofing around during the mission and Huntress tells them off.
* Huntress said that her costume was going to be changed to not include it a few issues into the 2010 relaunch. Unfortunately, the title was cancelled mid-story. As of Huntress-Year One, her midriff is properly armored.
* Huntress), so her tallness is only emphasises around male characters.
* Huntress to this: making friends with the daughter of a Mafia don is all very well, but if there's a serious falling-out, your face might appear on a milk carton. Although it really had more to do with the fact that the mafia assassins who raised her, the Asaros, deliberately kept her isolated.
* Huntress, who has had many costume changes both to and from this over the past few decades.
* Huntsman Academies, students work and graduate together as a team of four, with a colour-themed team name that is bestowed by the headmaster. As the four students came from two different teams, the fandom debated what new team name they should have for the future Volume 4 and settled on two possible options, with associated pros and cons: Team JNRR (Junior) or Team RNJR (Ranger). The creators were already calling them Team RNJR during production, but they acknowledged the fandom debate in the first episode of Volume 4, which opened to Ren, Nora and Jaune arguing about whether to call themselves Team JNRR or RNJR. Team JNRR initially wins due to Nora and Jaune favouring it, until Jaune decides it doesn't work when spoken aloud, making Team RNJR the default. At the end of Volume 5, Ruby officially calls them Team RNJR.
* Huntsman don't begin their serious training until 17 and don't get licenses until their early 20s. Ruby is the exception. She's enrolled in Beacon at age 15 and by age 16 is already on the road due to
* huntsman spiders, which can grow to be the size of one's face. According to native Aussies, the first time you see one you scream and run away, the second you try to get rid of it, the third you just ignore it. They are venomous, but their

bite is effectively harmless to any healthy human, and they keep other bugs out of the house. (The spiders, not the Australians.)
* Huntsmen and other warriors that live long enough to become tutors or truly old are extremely dangerous people by virtue of having survived a dangerous job with a very high death toll. This can cause its own problems as
* HUNT the TRUTH a secret society of smart AIs have been influencing humanity from behind the scenes for centuries.
* HUNT the TRUTH, is done as a series of in-universe recordings. One episode even played messages sent by real life fans, but done in an in-universe style.
* HUNT the TRUTH) searching for the truth about the Master Chief's origins.
* Hunt the Wumpus: A giant bat can swoop down and carry the player to a new location in the Wumpus's cave.
* Hunt the Wumpus had crooked arrows (so that they could turn corners - don't think too much about it) which could go through 5 rooms and which you had to guide after shooting by typing the room number the arrow was to go to next, but if there was no passage from the room the arrow was in to the room you told it to go into, the arrow would "hit the wall" and expend the rest of its moves flying randomly. If it entered your room, it would hit you.
* Hunt the Wumpus, the player hunts the titular monster (which can be distinguished only by its stench) within a cave whose twenty rooms are connected like the vertices of a dodecahedron.
* hunt. Tonks uses an unspecified spell to show that without him, Voldemort would've been ruling the wizarding world and most of the people he knows would be dead, including Ron.
* Huorns, against which the Orcs had no real defense. Also, Théoden did not wait for the enemy to enter his halls to use his cavalry, but made sorties several times through the battle, charging out and then retreating back to the Deep.
* "Hurdy Gurdy Man": while most of the people who know this song are aware that it was first written and performed by
* Hurl and Go Seek", the contestants first have to consume food that's been expired since 1976 and the one who first gets through the gross concoction becomes the hunter. They're tasked with finding other contestants in the forest at night and anyone found before sunrise could potentially be eliminated next. While not inherently dangerous, the food predictably makes everyone nauseous and disoriented while out alone in the dark. The thunder storm that rolls in does nothing to improve the challenge's safety.
* hurled out of a stained glass church window. As the glass shards fall with him, he very calmly remembers his past with Julia over the lilting strains of "Green Bird".
* Hurley himself had previously gone under the pseudonym C.J. Holland for "
* Hurley's Volkswagen Bus, which he found in the jungle during the third season of
* Hurl It into the Sun: Destroying something by chucking it into a sun.
* hurls meteors. Prior to that, he was a professional athlete superstar with the body of a bronzed god, perpetual shirtlessness, and masculine facial hair. When he ends up in Spira, he's immediately put in jail for being a raging drunken jackass. About the only mark against his manliness is his lousy treatment of his son, but in the end he takes responsibility for his failures, thus attaining perfection.
* Hurlyburly runs at just over two hours. The play it's adapted from was over three hours long.
* Hurog: After he is beaten by his aunt Stala, Ward is proud that he lasted so long. As Stala is the head of the guard and taught Ward everything he knows about fighting, that's hardly surprising.
* Hurog and other women might be a bit too frail and delicate for his tastes.
* Hurog duology includes a map, which is justified, as there is quite a lot of talking about taking a ship or the land route, and discussions of whether the enemy is good enough at geography to know that this or that distance is too far to get there in a certain period of time. The map only takes up one page, which is relatively small, compared to the LOTR map.
* Hurog duology, the king has the nasty habit of keeping his subjects under control

by threatening their relatives. Needless to say, that results in a lot of situations that are this trope. Ward, the main character, is a very loyal friend, brother and cousin. There is also Oreg, some kind of family ghost, who was very protective of the family's daugther. An aunt who slapped her once "never visited again", the implication being that Oreg did worse to her than just make her needlework basket disappear.
* Hurog duology, there is a variant where the person waking up immediately knows where she is, and compliments the main character on the beautiful room. It is not clear whether she pretended to be asleep until she was sure she was safe, though.
* Hurog duology works like this. Ward, who has magical abilities, but is untrained, can share his magical energy with Oreg, who is better at doing something with it.
* Hurog has this, but it seems to only work during magical healing, and seems to be a bit vague; the main thing that's shared is emotions or physical pain.
* Hurog he ever had, and he's frightened that Oreg might replace him as Ward's younger brother. He needn't have worried since Ward manages to be there whenever he's really needed, although he does make Oreg a priority when others are there to take care of his siblings.
* Hurog. Her children needed her protection against her abusive husband, but she chose to drug herself instead.
* Hurog is in Hurog. He was sent there by his father, who had a prophetic dream about their hope being found in Hurog.
* Hurog. It is never mentioned what he did to the person who did that, but it is mentioned that she never visited again.
* Hurog, later on they become quite close friends, and Ward notices that Oreg working magic is a beautiful sight, and he can also feel the magic, and is a bit embarrassed because it feels like "a hand touching [him] intimately". Ward is also well able to understand why the king's "favourite" has this position - Garranon is an exceptionally beautiful and elegant man, and Ward mentions that he likes Garranon better than most of the other courtiers.
* Hurog; men tend to wear their hair shorter, but traditionalists might wear long hair, as was the fashion of past times.
* Hurog Of course, with all those bastard children, and the strong attachment the family has to the land, there's probably lots of inbreeding.
* Hurog on his mother's side, who is also rumoured to have had an affair with his father, is a mentally strong, muscular woman who serves as weaponmaster, in a largely patriarchal setting. Ward has a big crush on a young woman who his very much like his aunt.
* Hurog Oreg can materialize a body and usually does so when talking to the protagonist, but can feel any damage done to the castle, and see everything within its walls. Most of the inhabitants think he's just a normal ghost, as the only thing he changes on the architecture is to make doors lead somewhere they could not, realistically, lead.
* Hurog, Stala is very Amazon-like, working as the weapon master of the castle, and unmarried.(Which is an advantage to her, as the man of whom others say that he should have married her was a monster.) Averted in that she is said to have had an affair with the aforementioned man.
* Hurog. Technically a mindcontrolled slave, but it is stated that the person actually enjoys violence, and would not want to be freed.
* Hurog the abusiveness of the recently deceased Lord Fenwick is never mentioned by the adults, the worst that others say about him was that he was something of a jerk. Neither is the fact that Fenwick and Duraugh are the only surviving of eight children, and that's because they were sent away to foster care. The protagonist, Ward, thinks about this, but no one says it. It remains unclear whether the other children died because the grandfather was abusive, too, or whether it's the family curse. Maybe both. Likewise, no one ever talks about the adultery that Fenwick and his father committed, the bastards are euphemistically called "cousins", although everyone knows what they really are. Ward has his blind spots, too - he complains that his mother was never able to protect him, but the fact that his beloved aunt Stala, who was a lot stronger, both mentally and physically, didn't protect him

either, is not mentioned. And uncle Duraugh also gets off scot-free, even though he spent a lot of time on the Hurog estate, and acted like best buddies with his jerkass brother.
* Hurog, the protagonist's father took him bandit-hunting. While the bandits did raid the farms on their land, the motivation for hunting them down seems to have been sport rather than a sense of justice - the protagonist, Ward, later mentions that his father fought in the king's wars despite detesting the king - simply because he liked to kill people.
* Hurog The rapist thinks his victim is too broken to kill him ... turns out this isn't the case.
* Hurog, there is a variant where a relative of the murder victim does this, apparently to not have to accuse a high-ranking person of murder: "He clearly stumbled and slit his own throat on a rose thorn in that hedge there. A tragic accident." Everyone knows who is to blame, of course, but the fact that he doesn't outright accuse the murderer enables everyone to save face.
* Hurog: Tisala. Tall, muscular and badass. Ward, the protagonist, has been unable to forget her after seeing her once. His brother is at first surprised that Ward remembers her, and then admits he "likes her", too.
* Hurog Ward mentions that his first love married another man. This happened prior to the narrative. He meets someone else.
* Hurog Ward needs a horse, his hosts mention that he probably doesn't want to ride one that is smaller than he is, and give him an appropriately-sized one.
* Hurog, who has magic abilities) - he can feel magic, and at one point mentions that someone's healing magic feels "almost erotic, like a hand touching me intimately". It makes him a bit uncomfortable and embarassed, but he can ignore it as he gets used to it.
* Hurog who is a very powerful, very sadistic mage and the antagonist of the protagonists for much of the plot.
* Hurricane (a British/Polish coproduction about the 303 Squadron) opens with the following scene:
* Hurricane Bianca, Richard's students give him a welcome gift of chocolates that turn out to be full of laxatives as a mean prank for their substitute. When he comes back in disguise as Bianca, he's wise to their tricks and forces the girl who offered them to share the chocolates with the class.
* Hurricane features a Juggler clown on the playfield demonstrating the "Shower" style, with objects suspended in an arc between his hands.
* Hurricane Fluttershy", Fluttershy keeps flying around in circles even after the tornado has disappeared.
* "Hurricane Fluttershy" introduces Bulk Biceps, a pegasus stallion who is notable for his
* "Hurricane Fluttershy"'s moral is ostensibly "even if you don't feel you can make a difference, you can", but one can also get "School bullying is
* Hurricane Gold adopts the persona of Angel Corona, a Mexican street hoodlum killed in a hurricane, so that he and his pal Garcia can join the criminals who have taken two children hostage. Since his travels up to that point have left him very tanned and the criminals, who have never really been into Mexico and can't spot a real local from a fake one, the ruse succeeds.
* Hurricane Gold, Count Carnifex is going to foment another great war in Europe, and while everyone is busy fighting each other, he'll create an underground empire which will be controlling things behind the scenes in the future.
* Hurricane Gold pulled off several bank robberies in the States disguised as a woman, which earned him the nickname "Manny the Girl" from his peers.
* Hurricane! have made situations even worse. No matter how rational Stan's ideas sound, they're all doomed to failure simply because he thought them up. Naturally, Stan doesn't listen to Francine and insists on trying to fix the situation. By the episode's end, he's managed to turn the house upside down, flood it, and let loose both a shark and a bear. Hayley and Steve get mauled by the shark and bear respectively, Stan knocks Jeff out in an effort to calm him down, he electrocutes Roger, and impales Francine to the wall with a javelin through her shoulder. The

family is only saved by the arrival of their neighbor Buckle, who uses tranquilizer darts on the shark, the bear, and Stan. He says he wasn't sure who was doing the most damage.
* Hurricane is a clown electrocuting himself while plugging in an amp.
* Hurricane Kick with the second season forced the writers to focus on other plotlines and leave this unexplained.
* Hurricane making key shots during Clown Time frenzy will show clowns performing assorted slapstick antics.
* Hurricane Mixer is a one-on-one version: Buffaloman charges at the opponent and launches them spinning skyward with his long horns.
* Hurricane Neddy", Marge finds a Rubik's Cube in the basement during the storm, and the family decides to try to solve it; they have no more luck than most people did when it was popular, Marge eventually getting frustrated, and yelling, "Now I remember why I threw this down here in the first place!" before tossing it.
* "Hurricane Neddy": Ned Flanders goes berserk and insults several of the people who tried unsuccessfully to rebuild his house after a hurricane struck. One can tell he was starting to run out of good insults by the time he got to Moe:
* Hurricane Neddy", "That's true, but he shouldn't say it" is often misquoted as "It's true, but he shouldn't say it!" when people use it online to react to certain things.
* Hurricane of Euphemisms: A character refers to something using various euphemisms for the subject.
* Hurricane of Excuses, but then my computer crashed, and when I got it back on, I couldn't log in. When I did, some ninjas showed up...
* Hurricane of Puns: Goes without saying in a British comedy of any type.
* Hurricane of Puns relating her being a dead skeleton whose head has fallen off, one could even interpret the whole thing as the man messing with you.
* Hurricane of Puns: Several puns are made that revolve around the same theme.
* hurricane of snark she will stand up to him and hit him when he deserves it.
* Hurricane requires the player to launch the ball around the playfield, then immediately shoot the Hurricane ramp.
* Hurricanes, an animated series about a team of American soccer players, had the Garkos Gorgons, the typical "cheating" team. Occasionally, however, The Hurricanes themeselves would exhibit the behavior of the Opposing Sports team, and be defeated for it.
* Hurricanes because the World Soccer League had a rule against girls being part of the team. The only chauvinist character in the story was Hurricanes Coach Jock Stone. The Hurricanes won 3-2, Jock learned a lesson, but Amanda was too honest to accept a victory like that and told the truth to the League, despite knowing the Gorgons would be declared winners.
* Hurricanes episode "The Curse of the Gorgon" had the Hispanola Hurricanes seemingly turned into stone by the legendary Medusa. It turns out they had just been replaced by statues and a butler working for the Hurricanes' host had been bribed into helping.
* Hurricanes had three Hurricanes being mistaken for fugitives. While in jail, they were allowed one phone call, which they used to contact their home stadium. Topper, the team's pet monkey, answered the phone call, ruining it, and the Hurricanes were denied another chance, meaning that, since they were arrested together, it was one phone call for the group rather than one for each prisoner.
* Hurricanes he never plays soccer ever again. It's never been stated who would be the next one to get the inheritance until Napper lost it. Until then, the only people who ever hoped to get the money were a relative and the deceased one's business partner and the two of them ever tried to rid themselves of Napper. In the end, the money went to the valet.
* Hurricanes, hires some youngsters to act as hooligans to make the World Soccer Association close the Hurricanes' stadium.
* Hurricane shows a clown being carried away by a handful of balloons.
* Hurricane shows the rollercoaster in the middle of a corkscrew; it spins at periodic times during a game.

* Hurricane shows two nuns riding the rollercoaster; one's cheering excitedly while the other is praying in fear.
* Hurricanes: In "Around the World in 90 Minutes", the protagonists organize a series of soccer matches to be played at an aircraft carrier. The villains seize the carrier and stop the matches out of spite.
* Hurricanesin "The Relegator" is technologically advanced and features people wearing togas.
* Hurricanes: It's revealed in one episode that Wyn and Genghis would stop working for Garkos if they didn't need the money he pays them.
* Hurricanes should be glad he never tried to fight any of them in person.
* Hurricane Suite Naruto frequently asks him for advice whenever he has doubts or doesn’t know what to do.
* Hurricanes: When Stavros Garkos's niece helped him with a plan hoping she'd become the first woman to become Vice-President of Garkos Enterprises in exchange for her help, the plan failed and he blamed her, stating he'd not hire her even if it was to bring him coffee.
* Hurricane, the front of the cars of the "Hurricane" rollercoaster have a manically grinning Monster Clown face, complete with razor-sharp teeth.
* Hurricane the second sequel, also includes the "Comet" in the game. Furthermore, the backglass shows two riders wearing "Comet" and "Cyclone" T-shirts.
* hurriedly pull a bomb out of Paz's stomach, only for Paz to attempt to jump out of the copter to save them saying there's a second bomb.
* Hurrying Home for the Holidays: A character needs to get somewhere in time to celebrate a holiday.
* Hurry Up Shrimp, Hurry Up Shrimp, Hurry Up, Hurry Up, Hurry Up Shrimp!
* Hurt/Comfort Fic: A character who has been hurt, physically or emotionally, is comforted by another character.
* Hurt/Comfort Fic: A fan fiction about Alice comforting Bob who is emotionally or physically hurt. Sometimes focuses more on the hurt than the comfort, or vice versa, which can lead to the subgenres Hurt No Comfort and Comfort No Hurt.
* Hurt/Comfort Fic: Generally part of shipping fics, but not always, one character needs to be comforted by another following an emotional event.
* Hurt Foot Hop: Someone hurts their foot and hops around on the other while holding their injured appendage.
* Hurt Foot Hop: Someone suffers a foot injury and hops around while grasping the injured foot.
* Hurt Foot Hop: Someone who hurts their foot reacts by jumping up and down while clutching their hurt tootsie.
* hurting a child. Later she pretends to stab Usopp to fool Arlong and save his life.
* Hurting Distance who took pleasure in psychologically breaking his victims, there's no sympathy for him whatsoever.
* Hurting Hero, although waking up from a two-year Hulk coma on an alien planet can partly explain it.
* Hurting Hero symbolism abounds but so does internal criticism of this. The Doctor is now a 'big' character who often goes on epic, blockbuster adventures (unlike his smaller-scale predecessors).
* hurting Issei might know she fancies Issei, but her father telling Issei to call him "Dad" is enough to make Rias choke on her food and then flee the room. He says, verbatim:
* Hurt only had one top 10 rock hit, which was also their only top 40 on alternative: "Ten Ton Brick", which is nowhere near as well remembered as their debut single "Rapture", which only hit #17, one spot below the also forgettable "Falls Apart".
* hurt. Researchers in the Aether foundation theorize it has an entire language composed of different flexing poses.
* hurts) but because of the level design. The final boss is in an area where you can sidestep all his attacks, and the giants are not.
* hurts except for one. The reason for that was losing his memory and snapping back

to his original brutal nature for part of the fight, thereby showing no restraint in mauling the opponent severely.
* hurts. However, it is not uncommon for a weapon (particularly foils) to snap. This results in a very jagged piece of metal which can wound or even kill an opponent in the second before the match is stopped.
* husband and wife team of assassins, it's implied that the sex was real.
* Husband-and-wife teams were remarkably common in the golden age of radio, probably due to the number of radio acts that originated on vaudeville where family acts were common. Notable husband-and-wife radio teams include:
* husband have the ability to talk to roses, and they would talk back, but her husband kept cutting and selling the roses for booze money. Molly Hayes appears to have been her first real friend, and incidentally, she is fiercely protective of Molly.
* husband's lover—the marriage was a sham in order to help her escape the horrific circumstances in her country. He'd lied about his whereabouts to cover up the fraud. The victim and the husband's partner were both aware of the whole situation and had lunch together to bury the hatchet.
* Husband Stitch tears during childbirth/is cut during an episiotomy, the nurse or doctor sewing up the perineum adds an extra stitch "for daddy" to make the vagina tighter. It doesn't work that way, it violates medical ethics, and it has the opposite effect of making sex unenjoyable (or even painful, in the woman's case) for both parties.
* "Huscle": hired muscle, which, as you can guess, the term is more or less the shorthand form of.
* "Hush": “It was a whole new way of figuring out how to act, the not-talking thing.”
* Hush", after everyone is struck mute, Riley and Forest take the elevator down to the Initiative, but can't provide the voice ID and the elevator starts to fill with deadly gas. They're rescued before they asphyxiate, and after letting them out, Professor Walsh points out the sign that reads "In case of emergency, use stairs".
* Hush, after getting his line cut, he grabs on to a gargoyle (breaking his shoulder), but it crumbles.
* Hush", Anya complains that Xander doesn't have any strong feelings for her and believes the only thing he cares about is "lots of orgasms." She's proven wrong when Xander assaults Spike, believing him to be attacking her and drinking her blood.
* Hush by Jacqueline Woodson is about Toswiah Green, a girl who ends up in witness protection after her father testifies against a criminal and his life is in danger.
* "Hush, Hush, Hush, Here Comes the Boogeyman" by Henry Hall presents a much less intimidating version along with a bouncy tune. "Uncle Henry" tells the listener that while the Boogeyman certainly wants to get you, he's also a gullible coward who any child can easily scare off in many ways.
* Hush, Hush initiated) which, while not portrayed as funny, is still treated as a sign of her broken heart and meant to show her as sympathetic. Her friend, Vee, also comes up with several boyfriend-hunting schemes that would be played for creepiness if it was a man pursuing a woman but are used as a sign of how zany she is (for instance, her proposing that she and Nora peep in on her latest love interest's bedroom to see if he's awake).
* Hush, Hush. In the first book, Patch does this to Nora, using his angelic powers to trick her into hearing his voice in her head and making her hallucinate certain things. He also makes it so that Nora is the only person who can see or hear him, so she looks like she's crazy when she talks to him.
* Hush, Hush, Nora finds a gun in Patch's car, which is splattered with a red substance that she assumes is blood. Patch explains that the gun is a paintball gun and that the red substance is paint from a game a few days ago. It's possible that Nora simply can't tell the difference between a paintball gun and a real one, but the smell, texture, and color of several-days-old blood is different than several-days-old paint. (For starters, dried blood gradually darkens to black.)
* Hush, Hush, Nora's father died not long before the series began and her mother is

constantly out of town for her job. Even when her mom is home though, she rarely seems to put much effort into looking after Nora. This conveniently gives Nora a chance to run out and do things her mother would never approve of, with little to no chance of being caught.
* Hush, Hush, Nora's mother seems blissfully unaware that her daughter is being stalked and nearly murdered by multiple parties. This reaches dizzying heights of stupidity when one of said parties visits Nora in the morning, grabs and shakes her, and shouts that he won't let her go until she does what he wants. Nora's mother walks in on the middle of this and is only mildly concerned, buying that he just wanted to copy Nora's homework, and not pursuing the issue at all when Nora brushes it off (ignoring that Nora collapses on the ground and nearly cries after he leaves).
* Hush, Hush series is described bears similarities to how Becca Fitzpatrick looks in terms of hair and body build.
* Hush, Hush, several characters say that Patch, is a bad person simply because he plays pool.
* Hush...Hush, Sweet Charlotte she's wearing these - to show how she's a sophisticated urban woman.
* Hush-Hush tabloid writer Sid Hudgens off to celebrity arrests that will attract readership. However, he does have a conscience and is a highly competent investigator when he can be bothered to put the work in.
* Hush, Hush, the only reason Nora puts up with Patch's stalking and scaring her at all is that she finds him sexy. Marcie Miller seems to have a similar mindset.
* Hush-Hush, though he seems to realize the wrongness of his ways when Sid tries to set up a blackmail scheme by arranging a sexual encounter between the district attorney and an actor that Jack previously captured as one of their previous schemes, and said actor is killed.
* Hush: Maddie's hand gets totally mangled when the killer traps it in a sliding door and gives it several stomps.
* "Hush My Mouth" by Suzette Hayden Elgin (African former slaves rise up and seize power in the United States after the Civil War; white Americans all but wiped out)
* "Hush Puppies" is an American brand of shoes whose mascot is a Basset Hound. This has been cited as helping popularize the breed as a pet dog instead of just a hunting dog.
* Hush Returns and the Joker gave Hush a massive heart attack. He came back, but not without a long recovery.
* "Hush," she tries to suggests staking as a way to kill the Gentlemen.
* Hush's mother was like this, in addition to having a drunken and abusive father. When, as a child, he tried to kill them by cutting their brakes, his mother not only survived, but the incident made her even
* Hush", though this is nonverbal, when the Scoobies are trying to determine how to defeat the Gentlemen, Buffy makes a fist and mimicks stabbing....vertically....while seated....upon seeing the looks from the others, she reiterates this with a stake in hand.
* Hush" where it looks like Buffy's idea of beating the Gentlemen is to beat them off.
* Hush who's been hounding her by holding a piercing loud smoke alarm in his face, designed to be so loud that it would cause nearby objects to vibrate to alert her in lieu of an auditory warning.
* "Hush", written by Joe South and first recorded by Billy Joe Royal, is probably most famous as covered by
* Husk: A murder of crows smashes into the windscreen of Chris's SUV, causing him to crash into the cornfield. Afterwards, more crows hang around the protagonists; watching them and cawing creepily.
* Husk encompass about 12 hours, starting in the early afternoon and ending in the early hours of the following morning.
* Huskies have similar yodeling skills to Basenjis, though they can also combine them with what can only be described as
* Husk is addressed by name only once in the pilot... by Alastor, who calls him

"Husker", so it's quite understandable that many believe Husker to be Husk's name, despite his response making it clear he doesn't like to be called that.
* Husk is the spirit of a murdered farm boy whose body was strung up as a scarecrow. He now murders travellers and turns their bodies into scarecrows, and can leap between the scarecrows.
* Husk spend much of the film walking, running or driving through the seemingly endless cornfield that surrounds the house; usually with idea of what direction they are going.
* Husk, the possessed victims hammer nails through their fingers, and then use their hands as weapons.
* Husk wears a burlap sack with a very disturbing smiley face stitched on it over his head. By placing bags over the heads of his victims, he is able to turn them into scarecrows that he is able to animate.
* Husky and Medley crush, which included the fact that she owns a Siberian husky. (Thus putting the "pet" in "pet name".)
* Husky and Medley, the real couple as of 2019 are celebrating a decade together.
* Husky Russkie: A big, burly Russian guy with the strength and courage of a bear, who can easily break you in half with his bare hands.
* Husky Starcraft" Lamond, Sean "Day9" Plott (himself a former pro-level player), and a slew of others are regularly hired by Blizzard and other pro-level game leagues to commentate the games.
* Hussar Ballad a lot of minor characters get killed in action, yet almost no blood appears on-screen. The only exception is a blood-stained letter that Shura takes from a wounded messenger and delivers herself; this blood is a minor plot point.
* Hussar Ballad, a Russian musical comedy, every main character would agree that the only real glory comes from fighting in the war.
* Hussar Ballad a young girl, Shura, dresses as a man just for a masked ball at first, but later uses that disguise to enter the army and serves as a real Hussar officer.
* Hussar Ballad; it's implied that nearly every platoon in the army is like that.
* Hussar Ballad Shura fearlessly fights French soldiers throughout the entire film, being vastly outnumbered most of the times, but shrieks and faints at the sight of a mouse.
* Hussar Ballad, Vincento Salgari gets (off-screen) into a fight with Shura, nearly killing her, but she manages to take him prisoner. As he was freezing to death at the time, and Shura happily provided him with some warm clothes, he swears to be her friend forever, and later proves to be true to his word.
* Hussar Ballad: while having a lower rank than Field Marshal Kutuzov, General Balmashov is a personal assistant to the Russian Tsar, and demonstrate willingness to throw all his weight to overrule Kutuzov's unjust decision.
* Hussars Gaming Group theme and members (joining is by invite only) are encouraged to take names from the show.
* Hussie also notes this happening to John in the notes for the second book:
* Hussie has gaslit the audience again. When John stuck his hand through the Homestuck icon
* Hussie himself once said, and he spends the majority of every day working on it; even though most of it is planning, that's still a ridiculous amount of dedication.
* Hussie intentionally left the human characters' race and ethnicity unspecified, stating only that the sibling pairs should have similar genetics. (He did accidentally let slip a reference to Bro as a "white guy", but when this was pointed out he temporarily
* Hussie took his sweet candy coated time to properly flesh out a character through a series of one on one conversations between two characters.
* Hustle: A customs official who's been trying to get the team to help him find a stolen painting slaps a newspaper in front of Mickey. Mickey, feigning ignorance, reads off the big, obvious headline ("French Trawlers Blockade Ports") before the official directs him to the smaller headline, "Masterpiece Still Missing".
* Hustle although it is merely a visual device as the previous planning of the characters for the current situation is revealed.

* Hustle (although its full significance does not become apparent till the end of the episode).
* Hustle & Flow: Shug plants a giant kiss on DJay before he goes to his climactic meeting with Skinny Black. This is the first overt romantic gesture between them.
* Hustle, Ash Morgan tells the team all the security safeguards in place at the bank they've been coerced into robbing.
* Hustle a show about con men, after all...). For a first time viewer this can come as a bit of a surprise.
* Hustle attempt to pass off as a race horse in "Signing Up to Wealth".
* Hustle Cat allows players to choose Avery's gender (and even switch it mid-game, should they wish to), and players can romance every character regardless of chosen gender.
* Hustle Cat's main character is specifically gender non-binary, with an in-game option to change chosen pronouns, even mid game. Also there is romance, and cats.
* Hustle Cat tracks the player's interactions with the other characters in the first half. At the end of the first arc, when the player goes to the basement, the character with the highest value will appear and from then on be Avery's lover.
* Hustle character when he beats them as they are happy to have seen a true master at the game. By contrast, whenever a mark loses, they tend to scream, yell, and throw tantrums. Mickey often says his motivation for taking down a mark is to see if they can dish it out as well as take it, and he apparently holds himself to that.
* Hustle "Conning the Artists". A Japanese man, seeking revenge for a con, forces the gang to each eat a piece of fugu fish, one of which is poisoned. Billy tries to fight him instead of eating his piece, which gets knocked into the air and lands in Billy's open mouth after he's been taken down.
* Hustle criminals whenever they can avoid it, purely out of fear of what would happen to them if they were found out or caught. Quite often they do it to help avenge an innocent or a friend who fell victim to the mark's villainy. That said, in a general sense, they are clearly in it for the money and the thrill, and are pretty up front about the fact, especially with each other.
* Hustle. Cut to Danny with puckered lips as he's curtly told to sit down by Katana Man.
* Hustle does this for certain exposition scenes. A description of a very old con trick is done via a B&W silent movie, and an explanation of fugu fish preparation is done via anime.
* Hustle do this pretty much whenever they need a lift. And they're not even cops. But they do usually have (fake) badges.
* Hustle: Emma encounters new old flame named Joe Ryan, who is everything the grifters are not, in "Old Sparks Come New".
* Hustle episode "The Thieving Mistake". There is a good reason why his nickname is "Liability".
* Hustle had an in-universe example when the British character Stacie conned an American by posing as staff for the BBC. Instead of using her natural British accent, she put on an over-the-top stereotypical British accent, complete with "Toodle pip!"
* Hustle had intended for Michael Stone to be white, like the rest of the main cast, but Adrian Lester's performance impressed them. He was also a little younger than they had envisioned.
* Hustle has used the Roulette version of this trope on several occasions.
* Hustle his last job... This is a rare example of where the protagonist doing the one last job knows it isn't his last. Normally he's the one to get sucked back into it afterwards, but actually it is his plan all along to get the rest of the team in.
* Hustle, in a few cases. Mostly, something gets screwed up, though...
* Hustle includes at least one fourth wall-breaking moment in every episode, in which one or more of the main characters will address the audience about the con currently underway, sometimes as time freezes around them. Some episodes are more

subtle, having a character perhaps wink at the camera.
* Hustle. In fact, it was mentioned as the reason for his absence from Season 4, during which the rest of the crew sold someone the Hollywood sign.
* Hustle. In "Father of the Jewels", Sean is with the mark when he calls Mickey and starts acting like he is talking to nursing home. Mickey is initially confused but quickly figures out that Sean is letting him know that they urgently need to set up a nursing home for the next stage of the con.
* Hustle: In "Lest Ye Be Judged", Mickey uses a bodybag to smuggle Emma into the morgue so she can place a false postmortem report in the files.
* Hustle. In one episode Stacy, who got a job at the bank they're conning, is effortlessly able to manipulate her bosses simply by sounding a note of caution whenever she wants them to take a huge risk.
* Hustle: In "Price of Fame", Benny Frazier parking in the ambulance zone at a hospital (and being rude to the staff member who asks him to move) is what first identifies him to Albert as a potential mark. This is a variation on the standard trope as the payback is not immediate and does not directly involve the car.
* Hustle: In "The Henderson Challenge", Mickey and Danny are dumped naked in the center of London. While Danny bolts for a taxi, Mickey ducks into a workman's tent and emerges wearing a set of coveralls that are a little bit short on him.
* Hustle, in which the lead investigator uncovering the crew's confidence schemes is actually a fellow conman, who vanishes with all the cops' evidence before his ruse is uncovered.
* Hustle: In "Whittaker Our Way Out", an exposition scene explaining how an old-style con worked was done in the form of a black-and-white silent movie.
* Hustle is also this in ability form. Pokémon with the ability deal 50% more damage with physical attacks, but all physical attacks' accuracy is cut to 80% of what they'd normally be.
* Hustle is coming at 6 to look at it. The good news: if they buy a 6 month pass to said castle, they get a free ice cream.
* Hustle, Mickey and Emma have a long debate over whether 'stickability' is a word. Mickey insists that if it isn't, then it should be.
* Hustle, Mickey approaches a mark and is told to bring the man a drink. He quickly corrects the assumption.
* Hustle, Micky is released from prison after serving two years, and upon release, assembles a gang of fellow con artists.
* Hustle, notably in a scene where she distracts several middle-aged security guards by posing as a flirtatious art student in a short pleated tartan skirt.
* Hustle: "Picasso Finger Painting" opens with Ash hanging upside down by his ankles in a deserted warehouse. He proceeds to explain how he ended up in this predicament.
* Hustle plan was something else all along, or there was some brilliant improvisation that we weren't shown at the time.
* Hustle plays this one relatively straight in the 3rd season finale, with a detective famous for making big busts as the villain. He's not a nice man...
* "Hustler" definitely gonks the girls out at the end. I guess that's what they get for eating so much...
* Hustlers is about a young woman named Dorothy joining a gang of strippers who drug and rob Wall Street investors for money during the Great Recession of 2007-2008. The first half of the film shows Dorothy, Ramona Vega and their friends becoming rich and hosting a lavish Christmas party. The second half depicts their downfall due to Dawn accidentally revealing the strippers' scheme on phone to a client.
* Hustlers: Released in 2019, a large portion of the plot takes place in 2007-2008 right before/during the financial crash.
* Hustler uses satire to express Larry Flynt's beliefs and opinions. Almost always Juvenalian.
* Hustler was a Christian skin mag ended the following year when Flynt survived an assassination attempt at the hands of a white supremacist, who was upset over how the magazine featured interracial couples. This left Flynt paralyzed from the waist

down, and he renounced Christianity soon after.
* Hustler would carry parody ads, usually to express Larry Flynt's opinions and beliefs.
* Hustle, Sean is deliberately not drinking after nearly screwing up a con by being drunk. However, the mark spikes his orange juice with vodka, resulting in him getting drunk again.
* Hustle: The crew often give aside glances while they're in the middle of a con, as one of the series' trademarks was its breaking of the fourth wall.
* Hustle, the gang were hired by a guy's ex-wife to ruin his life because she painted a very unsympathetic picture of him, but as the episode progresses, it is really blurred as to which of them is more at fault.
* Hustle: The protagonists have a strict honour system and are loyal to each other and other members of the trade.
* Hustle, they hear someone in the next hotel room and think it might be the mark, so they fake having loud sex to maintain their cover. Actually Danny suspects it's Mickey and just wants to make him jealous, but he's not fooled (their orgasms are too well-timed for a couple who haven't been together for a while).
* Hustle to temporarily incapacitate someone for the purpose of a con.
* Hustle (which resulted in Mickey spending much of the episode locked in a car boot).
* Hustle would sometimes feature Dirty Cops who thought they could manipulate the crew for their own ends. This always ended badly for them. D.I. Fisk in "Curiosity Caught the Kat" is a typical example.
* Hu Tao's Elemental Skill has her sacrifice a portion of her health to increase her damage and imbue her weapon with
* Hutch gearboxes because "the stick shift confused him" as Clarkson put it in S3E4.
* Hutchinson-Gilford progeria syndrome, but not the mind. The longest they usually live is to their early 20s.
* Hutch is teleported into the room where Jacinda is getting oral sex from Gabriella, to everyone's displeasure.
* Hutt River is shown wearing his purple cape, which makes Sealand proclaim him to be an important person.
* Hutts also have a habit of buying slaves only to make them lay around them, gorging, and getting "more attractive" (i.e. fatter) as a sign of wealth and a decadent indulgence of their own. Yarna d' al' Gargan, Jabba's personal fat-dancer (the large, multi-breasted dancer in his palace in Return Of The Jedi), is actually an indentured servant contracted because her species have the ability to instantly get fatter by absorbing water into their body fat. Jabba claimed she resembled his mother, sometimes. All of this is explained in her tale, in
* Hutts are always shown undressed, despite a lack of natural protective covering. Hutt hides are thick enough to shrug off blaster fire, though.
* Hutts are hermaphrodites capable of conceiving asexually (although they can sexually reproduce too).
* Hutz doesn't seem to understand conflict of interest either. He agreed to represent people in a lawsuit against the producers of a local version of
* Hückebein Family initially show any tactics beyond simple brute force. This makes sense, since they have no real interest in learning how to fight when the virus that will kill them if they don't kill other people doesn't differentiate between a talented fighter and a civilian. Then enemies show up who they can't simply overpower, making them have to work for their victories.
* Hüsker Dü, especially since drumming can be hard on the feet.
* Hüsker Dü's "You're a Soldier" matches the exuberance of its titular sociopathic soldier in music.
* Huy Fong Foods, the company that produces the ubiquitous green-capped rooster logo sriracha sauce,
* huzzah! But there's still half a season left, and all is not joyous as it seems.
* "Hvem Stjal Spenolen?" is a single by obscure Norwegian rapper Mr. Pimp-Lotion, featuring singer Didrik Solli-Tangen and World

* Hwoarang's dobok is open on the front side, exposing his abdomen. This is to highlight his rebellious personality, because dobok is supposed to be fastened by a sash (his teacher, Baek Doo-san, on the contrary, wears his properly). This dobok is his default costume in all games except for
* Hyacinth Bucket is one of the more realistic takes on the trope, because she's a registered PI that by and large solves minor crimes and misdemeanors that the police can't be bothered with. She downright refuses to take murder cases.
* Hyacinth does this at least twice to the owners of the stately homes she likes to visit on
* Hyacinth frequently volunteers Richard to perform disagreeable tasks, such as repairing the church hall electrics.
* Hyacinth Hippo and Ben Ali Gator on the "Dance of the Hours" segment of
* Hyadain: singer, composer, writer and arranger, best known for his eccentric happy upbeat songs for many recent 2010's anime opening and ending themes.
* Hyadain would use a voice-changing program for the female voices in his songs.
* Hyakka Ryouran Samurai Girls can't win the respect of anyone in the show, often being ignored, beaten up, or both. In a poll taken before the anime began, she was the winner, and when the show aired, she earned the love of the fanbase for her delusional persistence.
* Hyakka Ryouran Samurai Girls. He gradually acquires more women as the series goes on, whether he wants to or not.
* Hyakka Ryouran Samurai Girls. However, this debate coincides with the fact that the master samurai introduced are all women and most serve the protagonist, Muneakira Yagyu.
* Hyakka Ryouran Samurai Girls uses this in the character designs and weapons. The general art style resembles traditional ink painting.
* Hyakka Ryouran Samurai Girls, wherein a younger Naoe pees on an earthworm, apparently to get rid of a bad luck curse.
* hyakki-yakō. Fortunately it's just a bit of mischief, although anyone who comes across the procession will die, unless protected by some Buddhist sutra.
* Hyakko does this in episode six of the series, giving the audience a preview that has, among other things, an army of Mecha-Torakos, Evil!Suzume and a midair battle between Torako and her brother. It's also completely fake.
* Hyakko - including a scene where Amagasa-sensei holds the students at gunpoint until Touma knocks the gun out of his hand with a blow from a book.
* Hyakko is as a female version. No girl around her is safe from her ogling eyes and she has no qualms asking a cute girl out on the spot. She doesn't do it quite as much to guys, even though she claims to be bisexual.
* Hyakko. She has yet to interact with the main cast, but her happy elementary school antics usually make their way into the episodes.
* Hyakko: Torako. She's of the Genki-Ditz blend, considering she makes her debut by leaping out of a window. It's a second story window, but she definitely chooses the quickest way to get from point A to point B.
* Hyakkyoku Seiken which is utilized by Terry Bogard and Geese Howard, both of
* Hyakujuu Sentai Gaoranger). Also, one of the monsters of the week in both series was a samurai monster.
* Hyakujuu Sentai Gaoranger also pulled off cross-dressing as a bride. Even if he ended up striking the sumo pose and "Dosukoi!" yell.
* Hyakujuu Sentai Gaoranger by the network. Despite this, the characters refer to theselves as the Gaoranger within the show.
* Hyakujuu Sentai Gaoranger each have a shark-themed Blue Ranger and an additional hammerhead mecha.
* Hyakujuu Sentai Gaoranger for the series (it turns into a sword and shield).
* Hyakujuu Sentai Gaoranger, Gaku Washio (GaoYellow) bleaches his hair to disguise himself because he's officially AWOL from the Japanese Air Force.
* Hyakujuu Sentai Gaoranger: GaoHunter / Predazord's Revolver Phantom attack, a drilling lance made from the Alligator Zord's tail.
* Hyakujuu Sentai Gaoranger has the Rangers gain a pair of bear zords: a black bear and a polar bear, able to shoot beams of fire and ice respectively. The Bear

Brothers turn out to be too powerful for the main megazord to use reliably, forcing the Rangers to find a stronger zord that could handle the bears' strength.
* Hyakujuu Sentai Gaoranger) holds Tetomu hostage so the Gaorangers would make Gao King dance.
* Hyakujuu Sentai Gaoranger of that season's title, the "Hundred Beasts".
* Hyakujuu Sentai Gaoranger that anyone ever would have known about it.
* Hyakujuu Sentai Gaoranger. Their bodies are formed from the Earth itself. They just look like robots because they use metals for their skins.
* Hyakujuu Sentai Gaoranger, this is initially Yellow's response to any overture at comradeship from Red, since Red had replaced Yellow as the leader of the Gaorangers.
* Hyaku-Shiki was originally called the "Delta Gundam", and was Anaheim Electronics' first attempt at building a transforming mobile suit. They could never get the transformation working properly though, so the mobile suit was left as a solid but overall pretty unremarkable design on par with the Gundam Mk II. Anaheim eventually succeeded with their next attempt, the Zeta Gundam. The original design was later revisited with the "Delta Plus", an upgraded version with a working transformation system based on the lessons they'd learned from the Zeta.
* Hyakuya Yuuichiro's name is shortened into simply "Yuu" by most of the people who are close to him, but some people add different
* Hyaluronic acid. Which, surprisingly enough, is a real thing and not an invention of the marketing division for face creams. This is touted as the miracle ingredient for revitalising dry or older skin - despite the fact that better research suggests it's generally useless, and in over-large doses can even provoke the very dehydrating effect it is supposed to alleviate.
* Hyatt and Ropponmatsu #1 seem to develop a platonic romance for the short time they are together in
* Hyatt. Her condition has her constantly dying in an exaggerated manner only to stand up again as she's incapable of staying dead.
* Hybrid Animals from a list of them, you can create bizarre monstrosities such as a tiger-bunny or a T-rex-scorpion. Since every fusion is generated from an algorithm, your fusions will often look very odd, and more often than not will be either stronger or weaker than they look.
* Hybrid Monster: A monster with traits of two or more otherwise independent monster species.
* hybrid offspring sets in when you take into account that it also wears broken chains, as if it has just escaped someone's basement...
* Hybrid Power: If someone with superpowers and someone without have a kid, the kid always ends up with powers.
* Hybrids between the two are referred to by the Laguz as "parentless". The Branded actually consider this more cruel than the Beorc simply calling them half-breeds, because the Beorcs' preferred slur at least acknowledges their contribution to the Brandeds' existence.
* Hybrids however, have been more successful due to mixing electric with traditionally fueled cars, often using the car's normal operations to charge the electrics, extending fuel economy, and kicking in the engine only when extra power is needed.
* Hybrid's single, "Blind Side", is a bit too similar to "Break My Soul" from their
* Hybrid Theory convinces Ryouga that he snapped and abused her, because she wants him to be her perfect willing slave.
* Hybrid Theory discards all of her soul-bonded bullets except for one she leaves levitating in the center mass of the phased out Lotus Infinite, primed to explode the assassin if she solidifies in order to take advantage of the vampire's apparent moment of weakness.
* Hybrid Theory franchise, which were "New Divide" and "What I've Done". The latter is easily the better-known of the two, despite peaking one slot lower than "Divide". In fact, "Divide" isn't even as well known as "Numb" (which missed the mark at #11, with the Jay-Z remix reaching #20), "One Step Closer", "Crawling"

(neither of which went Top 40), "Papercut" (which never even made the Top 100 due to never being released officially in the U.S.!) or "Breaking the Habit" (which only reached #20).
* Hybrid Theory turn out to be grown-up versions of a child cursed into two people by Jyusenkyou spring water.
* Hybrid × Heart Magias Academy Ataraxia: Applies to Yurishia and Hayuru.
* Hybrid × Heart Magias Academy Ataraxia has the "Love Room" capable of recreating any situation or scenario, ranging from battle simulations to dating spots and hotels and can change what people are wearing. Its main purpose is to ensure things go smoothly between Kizuna and the girls.
* Hybrid × Heart Magias Academy Ataraxia, it is revealed her tail is attached to a line of anal beads that are stuck up her butt. Inserting or pulling it makes her orgasm.
* Hybrid × Heart Magias Academy Ataraxia, without fear of being caught.
* Hybrid, where he was vaporized and banished to Limbo again in each run. By the time of Avengers Academy, nobody was even pretending that this would actually kill him for good.
* Hybr) is essentially a "reverse cyborg", being a robot with living tissue grafted on, often cultured artificially rather than taken from a living organism. The term didn't really exist when the first few movies came out, though.
* Hybrots are robots with partially organic CPUs made by spreading rat neurons suspended in a nutrient solution on a computer chip. They've only lived a few weeks to a couple months so far, though with better life-support they could live up to two years.
* Hyde and Closer must fight off magicians out to kill him, all while learning magic in order to defend himself. Hyde explains that the source of all magical power is belief; the point of the strange rituals is to convince the spellcaster of the spell's reality.
* Hyde and Hare and becoming a green rabbit monster, and he questions why the people in the park are running away from him.
* Hyde and Hare. In Dr. Jekyll's laboratory the Laboratory door says "Laboratory" and the Store Room door says "Store Room". Why he would need those signs when he works there is not explained.
* Hyde and Seek: A plot where one character tries to lead themselves and another character to safety while avoiding some kind of monster, oblivious of the fact that the monster is the other person's alter ego.
* Hyde and Seek: Someone tries to escape a monster with another person, unaware that the monster is their associate's alter ego.
* Hydee and the Hytops: The Movie done this in a music store with Hydee, Mariko, Samantha and Charlotte running from Floyd (the store clerk) during the "We're Going Crazy" song.
* Hyde later rapes him to death, and the other characters — particularly Nemo — turn on him.
* Hyde's excuse for his antics—"Because, it's funnier this way."
* Hyde singles out upper-class hypocrites as his targets at first, ignoring that Jekyll himself is a hypocrite for creating Hyde and indulging in his vices.
* Hydia and her clan from G1 exist in this universe and still have this trope, but it's played a bit more seriously this time around due the series knack for
* Hydia's Fraccion are all somehow deformed from the more normal human shape most Arrancar possess, since she doesn't care about looks as long as they're loyal to her and aren't sticks in the mud.
* Hydia's helped her servants build up an immunity, or at least a heavy resistance, to her poison so she can use it without harming them. She also cares more about loyalty than appearances.
* Hydlide, if you enter a cave without the lantern, you will randomly die. And then, after getting the lantern, you see that there was nothing killing you.
* Hydorah, the last weapon can only be gotten by going through several out of the way levels. Oddly enough for the genre, this weapon is an actual sword.
* Hydorah the surviving space-navy personnel are shown celebrating. Starting a new

game thereafter provides the player with shields, doubling his hitpoints from one to two... but starting a new game right away changes the intro. Initially your commander gives an short inspiring speech as your fightercraft leaves the mothership. In a immediately-started new game he is disheveled and can't form an unslured, understandable sentence.
* HYDRA agents wear a bright green/yellow ensemble, sometimes with the organization's logo as a chest patch.
* HYDRA and its Centipede program, searching for the secrets of Coulson's resurrection. He seduced May in order to cement his cover — unaware that she had all the information he needed
* HYDRA attacks the Fridge, SHIELD's combination maximum security prison/storage facility, freeing all the prisoners as a diversion while they steal all the advanced and dangerous technology for themselves.
* HYDRA-infiltrated SHIELD, he unhesitatingly offers to shelter them, and then later offers his help when the two Avengers decide to strike back. When Steve initially refuses out of not wanting to bring a retired veteran now living in peace back into deadly action, Sam shuts down any protest with this line.
* HYDRA invent a remote-controlled version based on the Destroyer. It's flight-capable, extremely powerful, and capable of shapeshifting weapons. However, what makes it dangerous is the fact that it's being controlled by major league badass Baron Zemo and that its first set of opponents are kids in (mostly) their first life or death fight who have just been temporarily bootstrapped to god-like levels of power and are only scratching the surface of their capabilities. As
* Hydra, it's often a different one for each head. The original sprayed poison and had poison for blood.
* Hydrant Geyser results in a massive eruption of water, because municipalities certainly haven't gotten engineers to prevent that kind of thing.
* HYDRA probably had many, but after Operation Overlord and their being forced to retreat to one last base
* Hydra Problem starts out as a 1/1, but hurting it only increases its strength and toughness.
* Hydras are ruled by a constant hunger for flesh that eventually strips their surroundings bare of food, forcing the beast to find new hunting grounds. If a hydra goes for too long without prey, its hunger will become too strong for it to bear and its heads will turn upon each other as the maddened creature eats itself alive.
* HYDRA's they don't even appear to be trying to avoid villain cliches at this point.
* HYDRA this at one point by noting that with age, his penchant for racism and eugenics had faded. Now he embraces the idea of diversity...because that just means more loyal subjects beneath his boot when he finally conquers the world.
* "hydration mayonnaise" The ads end with a statement saying "This product doesn't actually exist, but Black Rifle Coffee Company does."
* Hydra Trash Party strongly subvert and avert this, taking the nonconsensual nature of rape (usually but not always perpetrated against a male character) and the devastating effects it can have on the victim very, very seriously. One of the few hard rules for Hydra Trash Party is acknowledging non-con situations for what they are.
* Hydraulic mechanisms in movies usually make distinctive hissing sounds when they operate. In reality it's
* Hydraulic Press Channel, do not usually show their faces in videos for their main channel, leading to a lot of viewers assuming from their rather deep voices they're at least middle-aged. As of 2016, Lauri is 30, and Anni is 26.
* Hydraulic Press Channel English much until his channel went viral near the end of 2015, however, resulting in his famously thick Finnish accent that the channel is known for.
* Hydraulic Press Channel very often, as he often smiles and laughs when on camera.
* Hydraulophone is a musical instrument played by directing the flow of water.
* HYDRA was trying to bring back a creature called Hive who could control Inhumans,

and in retrospect when a listing of registered Inhumans is used as a kill-list (also in Season 3), something she had explicitly warned of.
* Hydreigon has a mouth where it normally would have one, with heads at the ends of each arm which have their own mouths too. They each apparently have the appetites of a normal Pokémon.
* Hydreigon has three pairs of wings but apparently flies by using the Levitate ability instead.
* Hydrocephalus is a condition caused by a build up of fluid around the brain that can cause the person's head to grow to abnormal sizes. The most well known example is a toddler from rural India whose head grew three times larger than normal, though she was eventually treated and her head is now regular size. Don't look this condition up, the pictures can be
* Hydro-electric dam projects often force towns upstream to be evacuated and eventually the sites are submerged.
* hydroelectric dam, skyscraper construction site and deadly unguarded cliffs in "The Mysterious Mare-Do-Well".
* hydro-electric dam, suggesting it may be possible for the ponies to "generate" magic power in that way as well.
* Hydrofluoric acid is actually deadlier than portrayed here. A fairly small amount of it landing on skin can lead to death fairly quickly by affecting calcium metabolism. Jesse shouldn't have survived his exposure in this episode.
* hydrogen fuel cells) have stretched their underwater operating time, however.
* Hydrogen sulphide is highly toxic, causing instant collapse with loss of breathing at 1000 ppm, while lower concentrations can have some nasty side effects, such as eye irritation, headaches, nausea, coughing, shortness of breath, and irritability, even if they aren't deadly. During the
* hydrokinesis to waterboard her. The resulting trauma is so profound that the only way to help her return to a relatively normal life was to give her a magical drug that erased all of her memories from the past week.
* hydrokinetic abilities The meta refuses to relent and tries a few swings; gets kinda sad after that.
* hydrokinetic, while he's later supported by two Visored ex-lieutenants. Their abilities mostly negate each other, and her lack of interest in fighting him decisively takes up her time until the plot requires a conclusion.
* Hydromancy: Water Divination. Various forms of prophecy by observing water including the color, ebb and flow, or ripples produced by pebbles dropped in a pool.
* Hydro-Man him). Spider-Man once had to get Hydro-Man into a wide enough space so he couldn’t reform himself.
* Hydrophobia and the organization behind the plot. You can get the bare bones from the various collectible documents spread about the game, but that still only gets you the lead-in to a possible reveal, which never comes.
* Hydrophobia and Thomas Malthus' theories on population seem to be right, all-be-it slightly delayed. The game takes place on a massive city-sized luxury ocean vessel that has already been in operation for 10 years prior the events of the game.
* Hydrophobia is a protagonist engineer. She has to scavenge her only weapon, but she brings her Mavi — a device that allows her to hack cameras, doors, computers, and virtually every other kind of automated system.
* Hydrophobia owes its existence to Dark Energy Digital having spent five years on their Hydroengine, an engine in which water flows realistically. As you might expect, it's based on a flooding boat.
* Hydro Thunder has a hovercraft (which is very difficult to maneuver), a military boat, a fishing boat with an outboard motor and "The Tinytanic".
* Hydro Thunder has the "NY Disaster" course which is Manhattan submerged in a flood caused by a meteor strike at New York harbor.
* Hydro Thunder Hurricane is set in Atlantis as well. And yes, the boats are underwater, too.
* Hydrox cookies are the original mass-produced chocolate-and-cream sandwich

cookie, predating Oreos by a couple years. Most people think Hydrox cookies are the knockoff.
* Hydrox is the knockoff (to the extent that the bulk of poor Hydrox's advertising now centers around pointing out they were on the market first).
* Hydrozagadka was deliberately made as silly as possible. The bad guy's plan is to steal all the water in Warsaw using fridges suspended on balloons. There's also a superhero. And a crocodile. Yup.
* Hyenas are often thought of as dogs, due to being very social and canine-like in appearance, but in reality, hyenas belong to their own family which is to some degree more closely related to cats than dogs. Some people make the opposite mistake and think they're felines because of misreading or misunderstanding the "closer to cats" factoid - all this means is they are comparatively more related to felines than canines, it doesn't mean that they are actually felines. As said, they belong to their own very distinct family. To put this in perspective, this is the equivalent of claiming bears are in the dog family. While they may be more closely related to cats than to dogs, their closest relatives are actually mongooses.
* Hyenas have a complex, simian-like social structure. They may even be
* Hyenas have quite a few negative stereotypes associated with them, based mostly on legends and beliefs from North Africa, the Horn of Africa and the Near East that reached the Romans and were written down by Pliny the Elder before being faithfully copied by Christian bestiaries during the Medieval Period.
* Hyeon at first seems to be a shallow delinquent with the emotional depth of a rock. However, his genuine concern for his friend Amy when she disappears, along with the tender way that he treats Carlie after she's shot, shows that there's a more compassionate side of him. To say nothing of his frequent
* Hyeon tells his newly adopted squirrel Kwang that he can't come to school with Hyeon. The next scene has Hyeon arriving at the school with a certain rodent zipped up in his backpack.
* Hyeon used to date Nadine, and still harbors some intense feelings for her, but after they split up Nadine realised that she was a lesbian.
* "hygge" aesthetic, which has earned them a lot of admiration and envy.
* Hygieia, daughter of Asclepius, is the goddess of hygiene and cleanliness;
* Hylics 2 ends with your party performing in a rock concert attended by various other characters, including some former antagonists.
* Hylics 2, there is a dedicated button for doing this. Slapping an enemy with the correct timing increases the party's Will for that battle, and slapping bugs heals the party.
* Hylics: The text is all either procedurally generated or strangely worded for humorous effect, and there are dramatic, trippy animations for using a burrito and a vegetable (and a cupcake, in the sequel) in battle.
* Hymenoptera, almost all of which have specialized Queens, Drones, and Workers.
* Hymmal the Humming Hymnal (a parody of Psalty The Singing Songbook), with messages like "All the good things we do are God working through us". Joyce shows atheist Dorothy one episode of it, and Dorothy admits afterward that she was never going to enjoy it.
* Hymns That Are Important to Us went to #1 on Top Country Albums and was certified gold despite being a Christian album that produced no radio singles. Part of this was due to the publicity of Joey Feek's death from cancer around the time of the album's release.
* "Hymn to Liberty", which is the basis of the Greek national anthem, was the only poem Dionysios Solomos ever managed to finish (though, at 158 verses in the complete version, it's almost a career's-worth of verse in and of itself).
* Hymn to Liberty, with 158 stanzas, is quite a substantial poem in and of itself (only the first two stanzas are used for the national anthem).
* Hynerians - 2-3 foot tall stumpy limbed frogs with really big eyebrows.
* Hynerians fart helium when nervous or angry. Their bodily fluids also become flammable/explosive after ingesting a certain root
* Hynreck, the disgraced hero who left on his own while his comrades followed Bastian, went after a monster who kidnapped his love interest, and won, but we're

spared the details and what happens next.
* Hyouka, Chitanda is this to Oreki. Oreki always aims to do as little activity as possible. However, Chitanda will stare him down with wide-open eyes, tug on him, and say "I'm curious!" ("Kininarimasu!") until Oreki realises he will consume less energy by just answering her question.
* Hyouka, Episode 12 has Chitanda, who has been tasked with asking the Student Council President to allow the Classic Literature Club to have an additional booth for the Cultural Festival. However, she just can't seem to make it there without being drawn in by all the various activities around her.
* Hyouka gives us Houtarou Oreki and Eru Chitanda in the respective roles.
* Hyouka has proven to be remarkably intelligent and gifted with quick deductions, and (as theorized by his best friend Satoshi) would have been one of the most popular and academically outstanding men in his school if he weren't so lazy.
* Hyouka, in the second opening. Oreki really should go to sleep earlier.
* Hyouka: Satoshi Fukube. And how. He's pretty cheerful, sweet, flamboyant, loves getting close to Oreki, occasionally wears a pink t-shirt, and his cell phone (as shown in episode 16) is pink.
* Hyouka's school culture festival, Oreki is given a broken pen from his sister, which (after many swaps and turns involving a bunch of random objects, and eventually helping the club win a contest) turns into something that provided the key information to solve the mystery of the arc.
* Hyouka the art style changes during the sequences where the characters break down the mystery. Each art style is different from the last, and many dip into the realm of experimental animation.
* Hyouka, the Classic Lit club is called upon to help find a conclusion to a student film made with this plot due to the film's writer having to bow out of the project due to illness.
* Hyouketsu Kyoukai no Eden, Sheltis and Ymy can talk normally with each other and interact. There's just one problem: both of them can't touch each other because if they try, sparks form between the two of them thanks to Sheltis harboring so much dark energy called mateki while Ymy has an overwhelming amount of light energy called shinryoku. While both do try to find one day to have Sheltis be purified completely, what they can only do is basically talk with each other while everyone else can touch Sheltis completely fine.
* Hyoutei: Hiyoshi Wakashi is a loner, initially held as a reserve. He would
* Hype Aversion, in which they dislike a work simply because people keep recommending it.
* Hype Aversion: The more people tell you you should check it out, the less you want to.
* Hype Backlash: A much lauded work has detractors who believe it to be overrated.
* Hype Backlash: An acclaimed work receives a significant amount of backlash from people who don't think it's as good as critics and fans say it is.
* Hype Backlash - In which they hate a work simply because of the attention it has received or is receiving. A subset hates things that are critically-acclaimed.
* Hype Backlash was that it was extremely easy. This was largely due to you being able to carry an infinite number of health potions (which instantly restore your health to full), and health potions being really cheap to buy, resulting in it being virtually impossible for anything (even the major bosses) to kill you as long as you just kept mashing that "drink potion" key.
* Hyperactive Sprite, thereby being animated as if moving when it should be standing still.
* Hyperautistic Sociopathy occurs when the new mind understands the baseline minds of its former peers so well it cannot view them as sentient or capable of independent action, and instead regards them as easily controllable tools or merely animals. The results are seldom pretty.
* Hyper-Awareness is a bit too distracting to enjoy anything physical.
* Hyperball had their backboxes recycled for use on other games, mostly re-releases of other Williams and Bally games.
* Hyperballoid, allows the player to skip the last three destructable blocks in a

level by dropping a "level skip" bonus once that point is reached. Ending the level the good old-fashioned way is rewarded with extra points, but if you just can't get the ball in that accursed corner with the tiny little block, then you have an easy way out.
* Hyperballoid right to hit the one remaining brick. There is a small points bonus if you avoid the teleport drops and break all the blocks anyway.
* Hyper Beam in most games after the first generation falls right into this, especially after the physical/special split in the fourth generation. It may look awesome, sound awesome, boast 150 base power, and be learnable by a lot of Pokémon... but it also forces you to spend one turn after using it on recharging, meaning it's usually worse than two regular attacks would be. Aside from that assigned downside, it's a Normal-type move, meaning it doesn't provide any real extra coverage, and it's a Special move, when most Pokémon that get Normal STAB are physically-oriented—so most of the time, it actually does
* Hyperblade, including passing and scoring with it. And yes even by the deceased's teammates.
* Hyperbole and a Half comic advises being specific when wishing, just in case the Wish Genie is a total dick.
* Hyperbole and a Half in "Skeleton Man." After hearing a scary story, Allie thinks the monster is hiding in the school bathroom. From then on, she tries to avoid the room as much as possible.
* Hyperbole and a Half, suffers from depression, which has resulted in several long absences from the webcomic. She wrote a two-part entry in the series about her struggles with the condition (which actually manages to be very funny in spite of the subject matter).
* Hyperbole and a HalfThe Shower Hammer!! Brutalize the dirt off! Hit yourself until the dead skin submits to you. Bleed the germs away!
* Hyperbolic comparatives:," "If you thought that was great," "Bonus points for X", etc. Examples operate on their own merits, not in comparison with other examples. Calling something the "greatest X ever" is highly subjective, not to mention irrelevant. If you find yourself doing this, strip out all the fluff and just tell us what's going on.
* hypercomm node installed to extend his range, allowing him to pilot two tanks at once.
* Hypercompetent Sidekick; Aerys had cut himself on the throne that morning and Tywin took his place that day.
* Hypercompetent Sidekick, and replaced with ex-Bayern manager Felix Magath.
* Hypercompetent Sidekick. Even when she's not working at Mode, she thinks about how to best help him, and he trusts her as a confidant.
* Hyper-Competent Sidekick for a head maid. What Remilia wants, Remilia gets.
* Hypercompetent Sidekick him the superintendent in a new national park.
* Hyper-Competent Sidekick. Indeed, after Chrétien retired in 2003 and the Conservatives were finally able to present a viable alternative in Stephen Harper, the now Paul Martin-led Liberal government was easily toppled and Canada was under Conservative rule for nearly a decade ... for largely similar reasons.
* Hypercompetent Sidekick — A sidekick who is better at what they do than the hero.
* Hypercompetent Sidekick of the first series or the cheerful dimwit he is the rest of the time, is always some kind of Arlecchino, consistently the lowest-status character present, and always with some kind of 'cunning plan' on hand.
* Hyper Competent Sidekicks who, when things go well, are able to get their superiors to accept their suggestions, at least enough of the time that the Commonwealth has mostly managed to give as good as it gets over the years.
* Hypercompetent Sidekick: The hero's sidekick is leagues more competent than the hero.
* Hypercompetent Sidekick: The subordinate is smarter and more competent than their boss.
* Hyper-Competent Sidekick with: "This is not a real word, but describes the action perfectly."

* Hypercoms are very cumbersome, too big for sub-lightspeed craft and require exotic synthetic materials that starships aren't equipped to make. The mutineers sabotaged Dahak's and stole the only spares, so Dahak was forced to throw together a mundane lightspeed device instead in his attempts to phone home.
* Hyper Dash! Yonkuro: Team Dark Dominion's cars have small bombs built into them. In PHASE 2, Kill Crow, frustrated that Yonkuro's Emperor has overtaken his own Night Seek Trigger during the race, detonate his own car, causing a explosive inside Sumeragi's workplace (The Tamiya model shop). Luckily Yonkuro and the others escaped it unharmed, but Kill Crow also escaped as well.
* Hyper-Destructive Bouncing Ball: A small ball bouncing and causing a disproportionate amount of damage.
* Hyperdevotion Noire: Goddess Black Heart, she tries spying on Noire in the shower to learn some dirty secrets. When Noire hears her, she tries making a cat noise to cover her tracks. Noire doesn't buy it and pummels her.
* Hyperdevotion Noire: Goddess Black Heart The Player just arrived in Lastation, seeking a job at the same time as Noire's fiddling around with the Sharicite, you end up helping Noire out at a very critical juncture, and get hired as her personal secretary.
* Hyperdimension Neptunia, another of Idea Factory's dungeon exploring RPGs.
* Hyperdimension Neptunia, firing as Compa will sometimes prompt her to yell, "SHOOOOOOOOOOT!"
* Hyperdimension Neptunia G - The Golden Leaders, Reconstructors of Gamindustri Arc, all four of the main CPU's (Neptune, Noire, Blanc, and Vert) are the protagonists of their own respective arcs until they solve the problems in their respective nations.
* Hyperdimension Neptunia) in favour of having them on a single continent surrounded by oceans (with the exception of Leanbox, which is now an island separate from the mainland).
* Hyperdimension Neptunia mk2 has Nepgear taking the lives of the 7 other CPUs, including her own sister, in the most heartwrenchingly depressing death scenes you can imagine.
* Hyperdimension Neptunia mk2. He is also the very first opponent the player has to face.
* Hyperdimension Neptunia mk2 Of course, they're not exactly united in that regard.
* Hyperdimension Neptunia mk2, performing Nepgear's Slash Wave attack will result in her shouting, "GOOOOOOOOOOOOOOOO!"
* Hyperdimension Neptunia mk2 rating on the PlayStation Store for unknown reasons.
* Hyperdimension Neptunia mk2 says that the hat might actually be Gust and that it's controlling a little girl.
* Hyperdimension Neptunia mk2 to the end of Gamindustri, which is the opposite of what you were trying to do in the first place, and now it doesn't even matter if you defeat her because the entire world's going to collapse and everyone's going to die. Roll credits. Fortunately, this is NOT the true end.
* Hyperdimension Neptunia mk2, when Nepgear's gang encounters ASIC underling Linda in Lowee, Linda mocks each of the party members, while they respond in turn:
* Hyperdimension Neptunia Mk II likes to fish in her off-time. She gets a little competitive when Nepgear proves to be good at it too.
* Hyperdimension Neptunia Mk II who can do the same thing by placing her as a support unit.
* Hyperdimension Neptunia, Neptune does this to get the attention a warring crowd on Leanbox.
* Hyperdimension Neptunia Neptune is all about this. At one point the CPU's start playing a videogame with themselves as characters while they already are in a videogame.
* Hyperdimension Neptunia, Nisa tends to strike a heroic pose now and then while speaking, Compa touches her finger to her cheek when thinking, and IF facepalms when distressed.
* Hyperdimension Neptunia Rebirth 1; while the party are discussing their plans to infiltrate Avenir and find out their plans, their Avenir contact is outside

listening in on the entire thing.
* Hyperdimension Neptunia that is widely considered to be the superior version.
* Hyperdimension Neptunia the Animation, Chiyomaru Shikura, the president of 5pb., issued this statement:
* Hyperdimension Neptunia the Animation for fun and as a show before retiring to a meadow to rest together.
* Hyperdimension Neptunia the Animation had Episodes 1-5, 11 and 12 in the first volume, while Episodes 6-10 and 13 were in the second volume, with the justification that each volume had its own theme ("bonding" for the first, and "dimensions" for the second).
* Hyperdimension Neptunia the Animation has one by Nepgear (Purple Sister) when she defeats Arfoire in Episode 5:
* Hyperdimension Neptunia the Animation, White Heart has one after defeating Trick in Episode 2:
* Hyperdimension Neptunia U: Action Unleashed to make up the difference, the game becomes much more challenging.
* Hyperdimension Neptunia V, any CPU can get killed through any means, however they won't ever age at all.
* Hyperdimension Neptunia Victory - because of the impact it would have on the nations' children.
* Hyperdimension Neptunia Victory. However, it's never brought up again, and when Uni, Ram, and Rom join the team at the end of the Good/True Ending route, they're able to flip back and forth between dimensions just fine.
* Hyperdimension Neptunia Victory However, there’s a good chance that a thorough player will eventually unlock those dungeons simply by playing the game.
* Hyperdimension Neptunia Victory, IF and Compa, two of the playable characters in the previous two games now appear as babies due to Neptune traveling back in time.
* Hyperdimension Neptunia Victory to force the latter to get out and work on her own.
* Hyperdimension Neptunia wants a lot of wifeys. IF becomes her first one (much to her surprise) and she's downright giddy when she learns the party is all-females.
* Hyperdimension Neptunia who's a significant number of levels above you and Nep-Nep might start the fight by requesting a change of underwear.
* Hyperdimension Neptunia will significantly increase Arfoire's stats.
* Hyperdimesnion Neptunia Most of the time it can be taken as a comedy with loads of references and in jokes related to gaming.
* Hyperdrive: First Officer York creates a clone of himself from his own cells including skin flakes, nail clippings and certain other emissions.
* Hyperdrive. In one episode, Commander Henderson causes a diplomatic conflict by not allowing the Glish ambassador to rub his genitals on his face.
* Hyperdrive mission. We don't see it (fortunately) but the crews' reactions to what they are watching indicate it would make even Captain Kirk think twice.
* Hyperdrive: "Now, according to the file, their language is amazingly similar to English, which is jolly helpful..."
* Hyperdrives can make the starships in Star Wars go at Lightspeed, though the Millennium Falcon is dubbed (mostly by Han Solo) as “The fastest ship in the galaxy”. Given it’s outrun serval Star Destroyers and
* Hyperdrive, ships are piloted by cyborg "Enhanced Humans". This seems to involve dancing in an alcove full of coloured lights. The plot of the first episode comes about, in part, because two bored bridge crew members try to come up with a sequence of manoeuvres that will make the cyborg fall out of her alcove.
* Hyperdrive. The ruler of Queppu has a fearsome-looking Doom Ray that can disintegrate his enemies... provided they stand perfectly still for three days. And being zapped with it feels really good. So much for the slow and excruciating method of capital punishment.
* Hyperdrive, who has a personality somewhere between Commander Data and the Enterprise computer. One episode has her "replaying" the events immediately before her enhancement, revealing she was a cheerful (if somewhat dim) young woman.
* Hyperdrive with the Queppu, the crew seek to avoid future problems by covertly

nuking the planet behind the captain's back while he's busy giving his speech.
* Hyper Dying Will Mode with Tsuna in his normal state is far from uncommon.
* Hyperemesis Gravidarum, Julian Smith-Rhodes escapes an assassination attempt simply because the attacker just had to try and make it as emphatic as possible by going for the head-shot: the crossbow bolt misses by a fraction of an inch. Julian was annoyed about this: an Army officer's cap does not come cheap and replacing one with a crossbow bolt-hole through the crown was going to cost him at least twenty dollars.
* hyper-evolved where Jim's super-suit was replaced with one that only gave him strength comparable to an ordinary person. Or as Professor Monkey-For-A-Head found out the hard way, "an ordinary, really big person".
* Hyper Fangirl's vlogs are full of the line between fiction and reality getting blurred, and her considering it normal.
* Hyperfocus diverts all brain power on a single thing, which allows for faster learning... but cannot be triggered at will, usually only happens if the subject is already interesting, you'll be less aware of your surroundings/needs and can be a massive time sink. For example, one may come up with an idea for a project at 4pm, starts doing it and realizes at 4am they haven't eaten anything for the last 14 hours, they've been postponing a bathroom break for 3 hours and have screwed up their schedule.
* hyper-futuristic for its time there were far more chances to burn the spacecraft like a meteor.
* Hypergamy, or the practice of marrying an older or more established partner is typically associated with heterosexual women, even though historically it was quite common for heterosexual men of lower standing to court wealthy heiresses in the hopes of partaking in their fortunes.
* Hypergolic fuels. Hypergolic fuels are two-component fuels which ignite from merely being mixed together. Usually one is a strong reductant and the other a strong oxidizer. The asset of hypergolic fuel is that it is air-independent and does not need external supply of oxygen. Such engines also don't need seperate igniters, making them more reliable, especially for maneuvering thrusters which have to fire repeatedly, and with perfect timing. The downside? Well... there are things better left untold. Perhaps the most famous engine using hypergolic fuels was the WWII German Walter turbine, which used T-stoff (hydrogen peroxide and methanol) as oxidizer and C-stoff (methyl hydrazine and potassium permanganate) as reductant.
* hyper-intelligent mind, with the downside being that he can never turn it off and is always hyper-aware of every minute detail at every moment. In particularly stressful situations, such as when Carlie is shot, the information overwhelms him and leaves him paralysed.
* Hyperion above Siri's homeworld of Maui-Covenant, must watch his love progressively wilt away as he travels back and forth to the planet at relativistic speeds, all the while remaining young himself.
* Hyperion, a cyberspace hacker's head explodes when he is exposed to a section of cyberspace inhabited by AIs, which is normally inaccessible to humans. In this case, it's a completely real security system which causes his implants to boil his brain. When people are Mind Wiped during a network crash, however, that's the trope played straight.
* Hyperion arrives at the Nexus, this is the case for several of the Nexus leadership positions. To note:
* Hyperion Cantos. Also his entire family is dead and their accounts have been dissolved. He is good for nothing but digging trenches, so that's where they put him.
* Hyperion Cantos and Raul is sort of dense, so he's mostly there to fight people and lift heavy objects, and some of the off-color remarks she makes about their future relationship go right over his head. Due to the relativistic effects of travel he's still 32 when they next meet but she is nearly 22, and she immediately begins a sexual relationship with him.
* Hyperion Cantos are built with the process being constant in their bodies, and

can live for six or more centuries without visible signs of aging.
* Hyperion Cantos a way to teleport themselves to any planet in the universe that has life on it. Instant teleportation without needing a spaceship defines this trope.
* Hyperion Cantos been known to kill all but one member of a party of pilgrims, and grant the survivor one wish. Yes, they're all that desperate.
* Hyperion Cantos books, book 3 introduced a telepathic child dying from some strange disease. He went into a drinking celebration once he was allowed to let her die in book 9.
* Hyperion Cantos books feature a rabid Vatican that exploits the resurrecting power of alien cruciforms to grant believers immortality. The Pope heads an aggressive crusade against "heretics" with interstellar warships, manned by Swiss Guard special forces.
* Hyperion Cantos by Dan Simmons it's mentioned that one character (Martin Silenus) was put in suspended animation by his parents to pay off the family debt. He wakes up to find that all the accounts and debts have been frozen and then dissolved into the galactic economy, and he has to work as a common laborer.
* Hyperion Cantos. Eventually, it leads to him "losing his muse", and spending the next several decades looking for it.
* Hyperion Cantos, farcasters are implanted with devices to make a person stepping through feel like he is traveling.
* Hyperion Cantos, featureless idiot. Only with the "sarcophagi" introduced after the Fall of the Farcasters does the cruciform allow indefinite resurrection without loss of memory or human capacity—though at a frightful cost.
* Hyperion Cantos had these whenever he touched Aenea, well before he realized he loves her.
* Hyperion Cantos has a lot of these, since the series is essentially about humanity becoming stagnant despite moving to the stars: Maui-Covenant has mobile islands and intelligent dolphins, Tsingtao-Hsishuang Panna is populated mainly by Chinese and famed for its food, T'ien Shan is full of Chinese Buddhist temples, Fuji has its samurai businessmen, Hebron is the site of New Jerusalem, Qom-Riyadh has a Muslim population, Madhya is presumably Indian, etc.
* Hyperion Cantos has bioroids, biologically manufactured androids. They're bright blue to keep them out of the uncanny valley.
* Hyperion Cantos, he expresses surprise that the day exactly corresponds to a 'standard' day in the WorldWeb, before realising that the standard time measurements actually come from Old Earth.
* Hyperion Cantos he's pleasantly surprised to find that the day night there happens to match one standard day, something he's never experienced before.
* Hyperion Cantos However, considering how much of the plot's pacing hinges on said lover's constant reluctance to give information that would explain anything to anyone, maybe not.
* Hyperion Cantos in the Hyperion universe are remarkably human), and many if not most are based on historical personalities (one based on John Keats is central to the story).
* Hyperion Cantos: It's mentioned that several planets have odd sky colours: Renaissance Vector has bronze skies, Nordholm has green, etc.
* Hyperion Cantos, Kassad is from Mars, which has a lower gravity than Earth. He's very tall and slender, but he keeps in shape (it helped that he had to spend a year as a menial worker in a 1.3 G environment).
* Hyperion Cantos, laser weapons work at the speed of light. Unfortunately, space battles take place across such great distances that the enemy ships have to watch the beam crawl across space towards them. While the time it takes for lasers to hit is realistic, unless their sensors work considerably faster than light there's no way they could notice the attack until it hit, and it raises questions about why they don't move out of the way.
* Hyperion Cantos Lusus, where all settlements are for some reason underground "Hives" carved into the rock. These are quite extensive; Lusus is a major center of economic and political power in the Hegemony and subsequently (the detective and

central character Brawne Lamia's father was a powerful Hegemony Senator).
* Hyperion Cantos mentions it, apparently, it is too expensive for most people though.
* Hyperion Cantos more than once. However, the one time Hitler is mentioned, the listener doesn't recognize the name, and he's then described as "An Earth-politician who sold a lot of books no one actually read."
* Hyperion Cantos: New Earth, Earth 2, Earth City and Terra are some that are mentioned.
* Hyperion Cantos occurs during "the Detective's Tale." Ambushed in bed, Brawne Lamia learns how harrowing — and yet disconcerting to her foes — it is to fight while naked.
* Hyperion Cantos one of the characters owns a gun that's been in her family for generations and gets described as ancient. Eventually, it becomes apparent that while the gun is very old from the character's point of view it's actually a very advanced piece of technology.
* Hyperion Cantos, or "mansions" where every room is on a different planet. So when the Farcaster network gets shut down...
* Hyperion Cantos poetry. (Though in fact his audience had such bad taste that the torching didn't work, but he decided to walk away and let his publishers do what they willed with it.)
* Hyperion Cantos : Renaissance Vector, Mare Infinitus, Garden, God's Grove, Nordholm, Heaven's Gate, Whirl, Madre De Dios, Esperance, Sibiatu's Bitterness (a.k.a. Inevitable Grace), Nevermore (which is apparently in perpetual twilight)...
* Hyperion Cantos, so the people sent to build them leave their whole life behind.
* Hyperion Cantos that any attempt to simulate a human personality in virtual space ends when the mind notices the trope (which seems to always happen even with the best computers). Because at that point, the mind goes mad.
* Hyperion Cantos that takes place 700 years in the future the Consul's ship is equipped with a grand piano. He mostly plays Rachmaninov on it but in one chapter the Beatles are also mentioned along with other more traditional classical composers.
* Hyperion Cantos the Consul's ship is one of these, there's even a spherical pool maintained by force-fields. However, the Consul's ship is specifically stated to be one of only a handful of privately owned spaceships in existence. When characters go on board one of the FORCE warships it's stated to be extremely cramped.
* Hyperion Cantos: The Consul's "singleship" is piloted by an AI (and lacks obvious manual controls).
* Hyperion Cantos: The Ousters were originally a small group of humans who decided to modify their own bodies to suit foreign environments instead of the other way around. Fast forward several thousand years, and some people don't even consider them human anymore.
* Hyperion Cantos: The Ouster "Treeships", which are built around a single, massive living tree made vacuum-sealed and spaceworthy by containment fields.
* Hyperion Cantos, the TechnoCore attacks dozens of Web worlds with fake Ouster Swarms in a ploy to convince the Hegemony of Man that the Ousters are genocidal monsters who can't be stopped by conventional means. This fake invasion makes the Hegemony's leaders desperate enough to consider using a hideously destructive superweapon against the real Ousters, which is exactly what the Core wants.
* Hyperion Cantos: the Templar create living "Treeships", gargantuan trees fitted with star drives. The treeships are made inhabitable by force fields created by weird space creatures that may or may not be sentient themselves.
* Hyperion Cantos using careful timing and satellites with tightly focused invisible laser beams to boil their brains. He plays this up as the wrath of Allah, backed by the wrath of the galactic military police.
* Hyperion class was made by the Minbari, further reinforcing the trope.
* Hyperion has wide corridors, paintings, marble sinks in the Commander's quarters, and a cantina. The original owner, Arcturus Mengsk had rather expensive tastes, Jim Raynor never had the time to refurbish to suit his more spartan preferences. The wide open spaces aren't very defensible against boarding actions either.

* Hyperion itself. Also one of its cities, Endymion. Plus, during the last book, several Ouster colonies are given symbolic names by the Pax for the seven deadly sins: Belphegor (sloth), Leviathon (envy), Beelzebub (gluttony), Satan (anger), Asmodeus (lechery), Mammon (avarice) and Lucifer (pride).
* Hyperion, Mengsk orders the tank to fire. Duke is confused about how a battlecruiser can fire a broadside, as all their weapons are forward-mounted (a stupid design, really). When he finds out it was a tank, he just stands for a few minutes with his mouth open, letting Mengsk get away. To note, Mengsk is a student of history, especially the Age Of Sail.
* Hyperion of a man hiking out into the most deserted wilderness of an alien planet, only for things to get progressively more insane.
* Hyperion Renaissance Vector, which is in the same system. The presence of the agricultural world in the same system allows Renaissance Vector to survive the Fall of the Farcasters relatively unscathed.
* Hyperion's army is a mixed bag. On the one hand, their troops are elite and well-equipped, but they have very few flesh-and-blood soldiers. The majority of Hyperion troops are actually unstable AI-driven Loader robots or civilian engineers. The Hyperion army depends heavily on its ability to throw hordes of fanatical engineers and
* Hyperion thanks to time manipulation powers. It doesn't seem to be quite so fast in combat but still sufficient to absolutely humiliate every would be speedster it encounters.
* Hyperion, when he flew so fast he mostly blew his super-suit off, and later
* Hyperion who stops by for shore leave once a decade (in her timeframe). When she dies of old age, he has only aged 5 years, but their son is 43.
* Hyperius the Invincible, a mutated, power-mad Hyperion engineer found in the
* Hyperkind. Another member (the resident comic nerd of the team) stops him, telling him to call himself "Logix" because, "That's how it's done!" Said comic nerd then decides to call himself Amokk, for the same reason.
* Hyperkind, has his hands replaced with foot-long blades. In the second issue, he laments that he'll never play the guitar again, until he and the rest of the team discover that they can shapeshift back to their human forms.
* Hyper Light Drifter: Evil frog men have invaded the eastern region, slaughtering the local otter people.
* Hyperlink Story: Several unconnected and unrelated storylines gradually and slowly merge into a single overarching storyline
* hypernet-linked, rather than the usual railguns, lasers and particle beams. Only humans build these, and they are among the most feared individual vessels in space.
* hyper-novel features Abe Lincoln in a chainsaw fencing match. This is not nearly the weirdest thing going on.
* hyperparasite i.e a parasite whose host is another parasite. Specifically, the Crypt-Keeper Wasp attacks the Gall Wasp, a type of wasp that targets trees and forces them to create hollow chambers rich in nutrients where the insect deposits its larvae. After infecting a host, the Crypt Keeper larva makes its victim drill a hole that's too small for its own escape and once the large wasp is trapped inside the wedge, the insidious Crypt Keeper eats its host from the inside out and burst out of the gall wasp's forehead into the world.
* "hyperpigs" series. Their origins are obscure - no one now knows who gave them intelligence and language, or why. It is suspected that they were a side effect of genetically engineering pigs to be human organ donors... though whether the final uplift to sentience was deliberate tinkering or just an accident is never mentioned. In a more common variation of this trope, there are also many species of uplifted primates.
* Hyper Police, and Poe takes Natsuki under her wing (And her slippers, yeouch!) to try and save her relationship.
* Hyper Police can stick a bounty on the internet and expect the person to be delivered.
* Hyper Police, in which the invasion is long over and the demons are a normal part of the landscape (to the point where humans are a rare and protected species).

* Hyper Police: Natsuki has one of these after tragedy happens while on a hunt.
* Hyper Police: Tommy is a werewolf pretty much permanently stuck in wolf form, and deeply in love with Peau, a human woman. Though she rejects him at first, eventually they date, become a couple, and even have children. A lot of children.
* Hyper Princess Pitch: Pits the protagonist against Mecha-Santa, his robot Elves, and toys.
* Hyper-proton fuel is a very powerful and expensive fuel which allows ships to fly much faster than normal. Ships can handle it just fine, but it's basically meth for droids.
* Hyper Pulse or outright nonexistent due to widespread economic and political instability in the aftermath of oppressive colonial governance, one or more major civil wars and intermittent border conflicts).
* HyperRogue, the Orb of Yendor quest requires you to follow a trail that leads to a key. Then you must get back to the Orb of Yendor that spawned the key. Since the game uses hyperbolic geometry, the only way to return is to set up some sort of breadcrumbs trail so you could go back exactly the same way — otherwise you'll become hopelessly lost.
* hyper-saccharine, portrays Retsuko as an overly-emotional wimp who needs Haida's help to deal with anything and sees her job as "torture."
* "hypersea" theory - blood, endolymph, sap, cytoplasm, whatever - of eukaryotic land organisms can, in effect, be considered a highly-compartmentalized extension of the oceans. Like seawater, the liquids comprising terrestrial life are solute-rich, churned by seasonal "currents" (migration) and "upwellings" (rising sap in trees), and inhabited by untold millions of specialized life forms (pathogens and parasites) to which a host organism's body is just another aquatic habitat.
* Hyperspace Arsenal and seeing Jarlaxle as what he used to be, (albeit a more charismatic and witty version) and Jarlaxle, being a bon vivant and trickster to the extreme, sees Entreri as an opportunity to have a roaring good time.
* hyperspace disturbance-class heavy cruisers around a central fuselage.
* Hyperspace engine sends the human starship to a completely uncharted region of space.
* Hyperspace Is a Scary Place: Certain forms of space travel are incomprehensibly bizarre.
* Hyper Space Is A Scary Place frequently) are some of the most obviously exaggerated ones.
* Hyperspace Is a Scary PlaceHyperspace is drastically different from normal space, and is dangerous and terrifying to travel through.
* Hyperspace Is a Scary Place, it's an extremely bad idea to blindly roam around in Hyperspace. Without a navigation lock on a known Hyperspace exit point you're all but guaranteed to get irrevocably lost in hell. Worse is that Hyperspace "moves" and losing engine power will cause you to drift away from the navigation beacons. Still, there are massive Explorer Class ships whose job it is to build new jumpgates and the nav beacons that go with them in previously unexplored space. How exactly they do this without getting lost is never explored. The Vorlons once used the "blind jump lost in hell" nature of Hyperspace to try and get rid of a piece of technology, unfortunately it was later accidentally found.
* Hyperspace Is a Scary Place: The dimension used for teleportation/warp speed is dangerous.
* Hyperspace Is a Scary Place: Where you're going, you won't need mouths to scream.
* Hyperspace is further limited by the fact that navigation in hyperspace is almost impossible. The only way to do it is to follow established jump beacons presumably included in jump gates, so even a ship with its own jump drive has to follow the usual routes. Ships that travel too far off the jump beacon are never heard from again.
* Hyperspace is mentioned occasionally, as is warp drive. The Slitheen used a more exotic slipstream engine.
* hyperspace jump from a planet's surface into space, where it miraculously begins orbiting), in the season four opener Atlantis, traveling through space, hits an asteroid field, but is saved by skimming only the top edge (giving the chance for

an Asteroids-like shooting sequence).
* Hyperspace Lanes between systems, the "FTL Inhibitors" technology gives starbase and planet-bound fortresses the ability to restrict hyperspace travel - incoming fleets can enter a system as normal, but until the inhibitors are destroyed or captured, the enemy fleet will be unable to progress along any Hyperspace Lanes but the one it entered through.
* Hyperspace Lanes, but also allowed players to built hypergates at warp nodes, which allowed ships to travel directly between any two star systems with gates. Travel isn't instantaneous, though. The developers were originally going to add advanced gates that allowed instantaneous travel, but that never happened.
* Hyperspace LanesFaster-than-light travel is restricted to certain system-to-system jumps or preexisting routes of travel.
* Hyperspace Lanes: When travelling faster than the speed of light, you have to go certain places at certain times.
* Hyperspace Mallets (having been the one who created them in the first place), Susan gains a spell that lets her recreate them for her own use against anybody.
* Hyperspace Mallets. Ultimately, this is more like bringing in the wizard to replace a more esoteric explanation.
* hyperspace routes. With a good route, you're quite capable of getting from one end to the galaxy to the other in no time. Without one, you're stuck with slower, more roundabout methods. It's probably best to assume when there are inconsistencies, they were using different routes. It's also established that an entire third or so of the galaxy is essentially off-limits because no hyperspace routes have yet been discovered for it.
* Hyperspace, since any place that's not on the surface of a planet uses that timezone of that planet as a standard.
* Hyperspace travel. One must wonder what the early versions were like...
* Hyperspace Wardrobe - Someone can change clothes in the few seconds they're offscreen, or even just spin around so fast they resemble a small tornado to change.
* Hyperspeed AmbushUsing faster-than-light travel to take an enemy by surprise.
* Hyperspeed Escape is to launch large amounts of chaff in the vicinity of your enemies. A common tactic to deal with pursuers is the same: the evader crawls at the tactical speed one locking radius from a jettisoned mass, but the pursuer must either slow down for twice this distance or try to circumvent it and risk going off the course; if the evader slows down again and steers while the pursuer is still locked and can't catch up, it probably got away.
* Hyperspeed Escape, then jumps back into space just before hitting the ground.
* Hyperspeed EscapeUsing faster-than-light travel to escape from danger.
* Hyper Speed's high boss is Bamboo on Bamboo MX. The mandatory songs to reach BOB are Now a NEW Day MX and Right Back MX. While not as fast as the other songs in the set, NAND is still troublesome due to the hold note management present throughout. Right Back has one of the messiest new MX charts, as most of the notes tend to overlap with one another. Add to the fact that the screen must register your finger being lifted off, and you'll find yourself accruing Breaks and Misses back and forth.
* Hypersphere is also split into ten layers based on the energy levels required to reach them. However, the deeper a ship submerges, the stronger the "energy pressure" gets until a ship is crushed like an empty eggshell without strong enough shields. Most civilian ships tend to travel in the first layer, which is the slowest (or, rather, the distance between the points corresponding to normal-space locations is not as short as in other layers). Warships tend to have stronger shields and travel in the third or fourth layer. Only unmanned probes with exceptional shielding can hope to survive traveling as deep as the sixth layer. Later novels reveal what happens when one reaches the tenth layer. If one manages to do so, then the traveler reaches the very center of hypersphere, which contains a miniature projection of the galaxy from all the vertical "tension lines" converging at the location from every star in the galaxy. There are also several planets orbiting the projection, but they are not native to this location, being

the result of an experiment to alien races millions of years ago to put a permanent base of operations in hypersphere in order to serve as a hub to the rest of the galaxy. By traveling along a vertical "tension line" to the center of hypersphere, one is then able to pick another vertical and "surface" in normal space at that star system. Basically, one could get anywhere in the galaxy in a matter of hours, eliminating the need for normal hypersphere travel. There is a slight caveat in that the intense energy pressure at the center of hypersphere prevents electrical devices from functioning, while also imbuing some people with magic-like abilities. Thus, all ships wishing to use this method of travel must use a mix of electronic and photonic systems. The former are used until one reaches the center, while the latter are used for navigating in this area.
* Hypersphere that involves dropping a cluster bomb onto a planet thought to be devoid of life. However, during the demonstration, a sensor on the planetary surface detects the presence of a human child, making the testers realize what a horrible mistake they've made. Luckily, a daring pilot manages to save the colony.
* hypersphere to allow anyone and anything to travel via predetermined paths without a ship (although ships can have their own portals). There is usually a "sorting" system in place to determine where to put the incoming objects. Living beings usually go to small passenger portals. Larger objects go to cargo portals. Spaceships go to large orbital portals, etc. A joint project was underway between two of the ancient races to create a portal hub at the center of hypersphere in order to allow fast travel to any system in the galaxy.
* Hypertrichosis: A condition that causes thick hair growth all over the body, which has led it to be colloquially known as werewolf's syndrome. Appearances include
* Hyper-Zoanoids are, like ordinary Zoanoids, genetically-altered humans. The "hyper" designation is usually applied to prototype genetic templates, which are designed around an individual soldier's DNA; mass-production designs must be simplified to allow them to work on a wider range of humans, so the Hyper models tend to be considerably more powerful.
* Hype: The Time Quest, down to Maliq, a one-off thug who attacks you. Though there is the exception of a few guards and an executioner.
* Hype: The Time Quest franchise, they collapse into a pile of bones when defeated, only to get back up a little while later.
* Hype: The Time Quest. Made worse by arrow traps situated in between them.
* Hyphema, better known as an "eight ball hemorrhage", where blood pools inside the eye and blacks out one's vision.
* HyPN0se in general has dialogue consisting of about 50% English and 50% Dutch, though it's not until later that we find out it's because his
* Hypno feeds off of nightmares. He has been known to kidnap children and then feed off the nightmares of the children and their parents. There was an episode on this, and a subplot in
* Hypnosis Mic: Aimed at a general female audience despite the heavy emphasis on gangs. Two of its 3 manga adaptations run in shōnen magazines despite this.
* Hypnosis Mic began with an empty mall performance of "Division Rap Battle" before expanding into the elaborate stage shows and concerts it's now known for.
* Hypnosis Mic: Each Fling Posse member's birthday is a reference to an aspect of their personality and behavior.
* Hypnosis Mic get along well at times and their rivals outright admit that their teamwork makes them quite of a formidable foe.
* Hypnosis Mic had a relatively good start, the rap battle between Fling Posse and Matenrou, the two most popular divisions in the franchise thus far, attracted a lot of fans while it was going on.
* Hypnosis Mic: Jakurai Jinguji is easily the only male character with longest hair, which is nearly as long as his coat. Jyushi Aimono's as well reaches the small of his back. Prime Minister Otome Tohoten's hair reaches below her knees, While Ichijiku Kadenokoji's hair, even if she ties it in a ponytail, reaches the small of her back.
* Hypnosis Mic states that once women were in charge of the government, the men

were made second-class and forced to live in towns outside of the capital.
* Hypnosis Mic. The Yokohama division representative rap group is led by a yakuza leader and his members consist of a corrupt police officer and a former sergeant-ranked navy. When banded together, they are just as strong as they are intimidating. Their music also tends to lean to gangsta rap subgenre.
* Hypnosis only works if you willingly allow it to control you, you generally have to try hard to
* Hypnosis was once thought to work like this. There is still a persistent myth that it provides perfect and accurate memory recall. Unfortunately, hypnosis is just as unreliable as any other real-life "truth serum," and the human brain is
* Hypnosis, where the second suicide is an elderly man who jumps through a window. The glass is still embedded in his corpse later.
* Hypno's Lullaby is a well-known Pokémon creepypasta poem in this form.
* Hypnospace Outlaw, allowing people to browse the web while they sleep. Doctors have concerns, to say the least.
* Hypnospace Outlaw called "Squisherz", being set in an alternate 1990's.
* Hypnospace Outlaw dorky persona for his fictitious girlfriend, but it's still blatant.
* Hypnospace Outlaw has HORUS, which seems like a sinister conspiracy but is just a bunch of executives competing to hide their symbol in public places and see who who notices.
* Hypnospace Outlaw he helped create. If you put him to task and crack down on his website, he will revoke your Enforcer privileges and temporarily ban you from Hypnospace. By the time you return, his piracy site is back up and running, and no longer flagable as violating Hypnospace rules.
* Hypnospace Outlaw" Helwig plays the role of internet musician Erick "Chowder Man" Helman, while the tracks for Ray "Basidia" Dolan are written and performed by Jay Tholen. In a downplayed example, Swedish musician Casper Sunderberg is portrayed by Californian musician Chris Schlarb; note the initials.
* Hypnospace Outlaw while one sleeps. The player serves as a moderator on this network, empowered to remove infringing content and users. It also has a competitor called "CyberWorldz".
* Hypnospace Outlaw who strings conspiracy theorists along, and Zane and Corey are a pair of petty teenagers slinging crude insults at one another.
* Hypnospace Outlaw you have to chase down as an Enforcer are much less destructive than the numerous poor decisions of the company that runs Hypnospace.
* Hypnota disguises themself as a man for their stage shows, but has an
* Hypnotic Eyes, as well as the fact that humans that drink their blood develop erotic desires towards them, even against their own sexual orientation.
* Hypnotic Eyes on Sarah Jane, although it's less to hide imperfections or indicate attractiveness than to indicate Sarah's half-conscious mental state.
* Hypnotick, which is fast enough to catch up to Necrofriggians like Big Chill, is immune to cold and ice, and can turn intangible so it can hunt
* Hypnotic suggestions work this way. It is possible for somebody in a deep hypnotic trance to feel things that are not present, which leads to some real-life
* hypnotizes Weiss into becoming her BFF, and even hypnotizes Blake into being her back-up BFF.
* Hypochondriacs and calling the local emergency services for no particularly good reason, the town drunk who's keeled over in public, or drug seekers trying to get prescribed their drug of choice. The police also use this term to describe criminals they regularly are arresting for whatever reason.
* Hypocrisy - "Destroyed" (possibly - in any case he gives fame the finger)
* Hypocrisy: In "Fractured Millennium", some rageguy from a parallel universe does the lamenting for Gaia, but it amounts to the same.
* Hypocrisy Nod: A character acknowledges when they're being hypocritical.
* Hypocrisy Nod: Acknowledging one's own hypocrisy in a self-aware way.
* Hypocrite: Espousing an ideal and/or holding others to a standard that they themselves don't follow. In short, not practicing what they preach.
* "Hypocrite, four-flusher, snake in the grass, just a swindler, a wolf in sheep's

clothing... LIAR!" — "All Is Forgiven"
* Hypocrite Has a Point: A character judges someone else for doing something they're also guilty of, but that doesn't mean they're wrong about the person they're judging.
* Hypocrite Has a Point: Someone manages to provide valid points on a subject in spite of his/her hypocrisy.
* Hypocrite: Many of them may actually like the work they claim to hate.
* Hypocrite: Someone who has high standards, but doesn't practice what they preach.
* Hypocrite; you go to war over a woman being taken — that means you shouldn't take another man's woman.
* Hypocritical Heartwarming: A bully who frequently enjoys tormenting someone doesn't like their victim being bullied by someone else.
* Hypocritical Heartwarming: How dare you mess with my loved ones! Only I'm allowed to do that!
* Hypocritical Heartwarming: Protecting someone solely because you refuse to allow anyone other than yourself to hurt this person.
* Hypocritical Heartwarming: Someone stands up for their friend solely because they don't want anyone other than themselves picking on their friend.
* Hypocritical Heartwarming: Standing up for someone because you want to be the only one to antagonize them.
* Hypocritical Humor after Molly decries the tendency of the young to rush into marriage during his second reign of terror.
* Hypocritical Humor: A gag involving a character making a hypocritical statement or otherwise demonstrating comically blatant hypocrisy.
* Hypocritical Humor for being "desperate" — after he's spent the whole episode literally watching the phone.
* Hypocritical Humor: It's really only half an apology when someone says, "I'm sorry, but I'm not gonna change." A complete apology would mean being willing to change and make things better, and anything that contradicts this is something of a backhanded apology.
* Hypocritical Humor — a gangsta rapper is invited to the Mayor's office, and Carter gives a speech ending with "And no gangsta stereotypes!"... only to scream "GUN!" and throw himself under a desk when the rapper reaches for a business card.
* Hypocritical Humor point, only to catch himself and quickly refer to them as 'facts'. Hacker is quick to point out the hypocrisy.
* Hypocritical Humor. When Ootani stares at Komori in the pool while jogging, she calls him a pervert (which the rest of the boys teasingly repeat). Their positions are reversed at the end of the chapter/episode.
* Hypocritical Humor, when someone in the crowd is saying questionable facts and Colon mutters "There's always a know-all."
* Hypocritical Humor when you recall that this is the guy who pushed Tuppy's cousin Oswald into a lake.)
* "Hypo Full of Love" by Alabama 3 contains a parody of the Alcoholics Anonymous Twelve Step Plan : the steps put you under the thumb of the Reverend D Wayne Love, the band's mad preacher character.
* Hypothermia also tends to slow bleeding in wounds that would otherwise hemorrhage. There have been countless cases of wounded, hypothermic soldiers who survived when in warmer temperatures they would have bled out.
* Hypothermia is known to have has a similar phase; after a feeling of coldness, the person suddenly feels very warm. Hypothermia victims have been documented stripping down to get away from the heat, called "paradoxical undressing." Unfortunately, this is actually the body losing control of its blood vessels and flushing warm blood to the extremities, which is then chilled by the surrounding environment, freezing them further.
* Hypothese Beta that the computer punch card controls some country's nuclear arsenal, and all the chaos on the card accidentally causes a nuclear war.
* hypothesized by fans format, which fits the mentor's personality but also fits Harry's personality and the series' own narrative style. So some think that the series itself is Harry's contribution to that legacy.

* hypothesized that the latter has adapted to avoid confrontation with the former, including climbing trees, being active at different times of the day, and residing in inaccessible places (i.e. with thick vegetation and mountainous terrain). Confrontations between the two species can range from tense to outright violent.
* hypothesizes that China's one-child policy will inevitably result in the engineering of sex robots.
* Hypothetical Casting: Someone involved in a fictional project makes a list of actors who would best represent a cast of fictional characters.
* Hypothetical example: "If the dog I adopted were brown, I'd name him Brownie"; not "If the dog I adopted was brown, I'd name him Brownie."
* Hypothetical Fight Debate: A debate on who would win if two people or characters got into a fight.
* Hypothetical Fight Debate: People have a discussion revolving around this question: "Who would win in a fight between [these two different characters]?"
* Hypothetical returned for its first season after the pandemic began. hosts James Acaster and Josh Widdicombe revealed that one of the notes given to them by the channel was to not mention the COVID-19 pandemic at all. It was less to pretend the pandemic wasn't happening at all and more out of a concern that this might date the episodes on subsequent repeats (for context, the channel in question — Dave — is notorious for heavily relying on repeats in its broadcast schedule), but given the many obvious changes that had been made to ensure compliance with social distancing guidelines, coupled with it being unlikely that the effects of COVID would be forgotten any time soon, everyone concerned pretty clearly considered this an incredibly ludicrous demand. So naturally the hosts and their guests made a point of loudly declaring how "normal" everything was whenever anything that was clearly a result of COVID-related precautions happened and overtly pretending that there was no such thing as COVID-19 in a way that clearly drew attention to the elephant in the room.
* Hypothetical sulfur and fluorosiloxane based-life would live in even hotter environments and, at the hotter end, use molten rock as a solvent.
* Hypoxia is a very real danger to people who operate at high altitude, such as mountain climbers and pilots. Though in this case it's not so much "running out" of oxygen as simply not getting enough of it from the atmosphere to begin with. One of the symptoms of hypoxia is a sense of euphoria, or a feeling of everything being a-ok. Hence, a piece of advice to novice pilots:
* Hypsilophodon are often restored this way due to their large eyes and small beaky snouts. Some speculate they may even had plumage.
* Hyraxes are depicted with rodent-like incisors. Being related to elephants, hyraxes have tusks, which resemble
* hyrax is a round, furry critter with stubby legs and big eyes that looks like a guinea pig despite being more closely related to elephants.
* Hyruleboy and LucasEB2's up and coming Trigun Abridged: A Tale of A Boy and His Gun.
* Hyrule: Total War has the graceful and supremacist Zora versus the stout and warlike Gorons. They're explicitly rival factions and hence both have wiping the other race out as a win-condition.
* Hyrule: Total War they serve as safe moving platforms for crossbowmen.
* Hyrule Warriors: Age of Calamity game to be a prequel with the same Link.
* Hyrule Warriors: Age of Calamity heroic mimes instead of one: not only does Link never speak, but neither does the diminutive guardian (unless its R2-speak counts).
* Hyrule Warriors: Age of Calamity introduces a diminutive Guardian as an ally of Zelda and the Champions. It basically resembles a smaller, armless version of the Shrine Guardians with the addition of a piston that it moves up and down the top of its "head" to produce vocalizations and even complete melodies.
* Hyrule Warriors: Age of Calamity, Mipha tells her brother Sidon that they will meet again. Mipha is unaware of her ultimate fate, though Sidon and the audience do.
* Hyrule Warriors: Age of Calamity of the Champions among other things.
* Hyrule Warriors: Age of Calamity so the character's home stage is more literal,

both for promoted characters and ones who are unlocked later.
* Hyrule Warriors: Age of Calamity to be already alive, in much weaker form, in the present.
* Hyrule Warriors: Age of Calamity to the little Guardian that is helping Princess Zelda and her companions. So when Link and Impa scout ahead with the little Guardian on their way to help Zelda recruit Revali as the Rito Champion, Revali assumes they're in league with the monsters and attacks them along with many Rito soldiers. It takes Zelda showing up personally to plead with Revali to stop for the misunderstanding to be cleared up. Similarly, Master Kohga disguises himself as Gerudo leader Urbosa to trick the Gerudo into attacking Zelda's party on their way to recruit the real Urbosa, who shows up in time to reveal Kohga's deception before he can kill the princess.
* Hyrule Warriors: Age of Calamity: When Urbosa saves Zelda from an impostor, she makes a point of calling her by the nickname "Little Bird", which the impostor had failed to do.
* Hyrule Warriors also appear as Elite Mooks. In Adventure Mode, Captain Keeta appears in some battles on the Termina map.
* Hyrule Warriors and characters can use the moon as a weapon when using a powered-up Hookshot to pull it down on the enemies!
* Hyrule Warriors), and one of Proxi's quotes has her worry if an allied officer is 'still alive' after they've retreated.
* Hyrule Warriors and she becomes a little jealous and wistful at how close and affectionate they are and hears them talk about how much they love each other, that she finally realizes her own feelings for Link.
* Hyrule Warriors, at least as long as they have a skilled commander/warrior/mage in their midst. Still the Hylian Captain is infamous for his cries of help over even the most simple foes.
* Hyrule Warriors attacks enemies using the Sea Lily's Bell, and proves just as ludicrously lethal with it as the other warriors are with legitimate weapons.
* Hyrule Warriors, blue troops are allies, red are enemies, and yellow are "rogue" (either unaligned or a second enemy force, depending on the map). The map markings are also based on opacity rather than hue: small troops are nigh-transparent blips on the map, troops led by a minor officer as more solid dots, and Captains as a solid dot with a border.
* Hyrule Warriors competing for who can be a hammier kiss ass towards their boss. Ganondorf, in turn, admonishes them both and reminds them he is the largest ham of them all.
* Hyrule Warriors, Deku Babas spew a circle of poison to protect themselves and hinder characters.
* Hyrule Warriors" design; in the game proper, this is one of a few elements that were excised to make her into her own character.
* Hyrule Warriors due to being unable to be with her lover, but it was covered up as her dying of illness. Their children did fall in love however they are mad at their mother's decision. Zelda and Impa also keep their relationship a secret due to their relationship being taboo (Hylians aren't open about same-gender romances, plus Zelda is expected to have a heir, while Sheikah's are against women being with Zelda's due to the possibility of the bloodline of Hylia ending).
* Hyrule Warriors, enemy officers have attacks that will leave them vulnerable, indicated by a Weak Point Gauge over their heads. Attack them while the gauge is up to deplete it, and when it's empty the player character will perform a unique attack for a lot of damage.
* Hyrule Warriors, Ganondorf manages to begin influencing and controlling Cia, causing her to behave very dangerously. As the story progresses, she clearly begins fighting against his influence while still actively trying to finish her villainous plan. What ends up happening is a small war, in which during one stage where you control Cia's forces, you must fight Ganondorf, and yet in another stage while playing as the Hylian Forces, you end up facing both Cia and Ganondorf, and have to complete objectives against and defeat both armies while they're actively trying to attack one another and you at the same time.

* Hyrule Warriors: Ganondorf manages to steal the Triforce pieces from the heroes, but does not bother to kill them. This is what allows the Hyrulean forces to strike back.
* Hyrule Warriors gets two returning characters, Zant and Ghirahim, as his Co-Dragons when he finally makes an appearance. The original character Cia, meanwhile, has two more original characters, Volga and Wizzro, as her Co-Dragons.
* Hyrule Warriors has an 8-bit weapon for every weapon type, meaning every character has at least one and some have several. For example, Darunia has a piece of Bait on a stick while Ganondorf has a pair of keys. Besides being at odds with the HD style of the game, they're ridiculously oversized to match the scale of the characters. They all share stats with the tier 3 version of the weapon they replace, and can have the ability to boost their strength to 450 like anything else.
* Hyrule Warriors has cuccos spawn on some maps as friends, neutrals, or enemies depending on the mission. Lana can summon them with an alternate weapon.
* Hyrule Warriors has Midna and Zant, whose fighting styles involve using their Twilight Portals to summon various objects to fight with.
* Hyrule Warriors has the Land in the Sky stage, which is based on Skyloft and the various other islands from Skyward Sword.
* Hyrule Warriors has Young Link's intro invoke the trope, by having him play his ocarina ominously and then swing around his oversized Kokiri Sword while wearing his Keaton Mask... except it falls off midway through.
* Hyrule Warriors: Heroes Through Time: At the end of chapter 3, Wizzro, while going to give Cia his mission report, ends up walking in on her taking a bath. While Wizzro initially flips out and apologizes, Cia calmly brushes it off, deadpanning, "I highly doubt seeing me in a bathtub will scar you for life."
* Hyrule Warriors: Heroes Through Time: Cia has quite the habit of using magical lightning on Volga and Wizzro whenever they talk back to her.
* Hyrule Warriors: Heroes Through Time whenever they question her orders or simply talk back to her.
* Hyrule Warriors: his strong attack conjures a glowing red thread between himself and a nearby enemy, which powers up some of his moves when attacking the foe he's tied to.
* Hyrule Warriors" is basically an updated take on the Bringer of War music, appropriate considering the game deals with the clashing of large armies rather than the series' traditional fare of a lone hero battling the forces of evil.
* Hyrule Warriors is only 10 years old but is still just as capable as any of the other playable characters when it comes to killing ridiculous numbers of enemies.
* Hyrule Warriors led to her being implemented for the 3DS version (albeit as a random farm girl rather than Link's younger sister).
* Hyrule Warriors' Legend Mode, the mission in the water temple tasks you with saving Ruto, who gets trapped inside a room in the middle of the temple. To get to her, you have to find flood gates to drain the water blocking the way to the room... except the water in this case seems to be only about chest-deep at most, so there's no reason you couldn't just wade or swim there. Becomes even worse after you open the first floodgate and most of the water is drained away, leaving two ankle-deep streams that you could easily jump over or wade through, but which are treated as insurmountable obstacles. This is particularly egregious when you're playing as Ruto, who somehow cannot swim through the water.
* Hyrule Warriors: Legends Limited Edition comes with a compass watch.
* Hyrule Warriors, Link and Zelda do this when they see each other for the first time.
* Hyrule Warriors, Link is joined by the knights of Hyrule for the first time. They're nowhere near as powerful as Link (or any other playable character), and they tend to die a lot, so he still has to do most of the work.
* Hyrule Warriors listed the title (in an plain font on a white background) as this. The name stuck.
* Hyrule Warriors map. There are two variations: either you compete with the rogue forces to get a higher body count in a set amount of time (usually 7-10 minutes),

or you compete to reach a certain score (which could be anywhere from 400 to 1000) before the rogue forces do.
* Hyrule Warriors, occasionally letting him out so they can do a combo attack before she sticks him back into the bottle.
* Hyrule Warriors: Of the story mode's ten playable hero characters, eight of them are female. Impa, Zelda herself, Midna, Sheik, Princess Ruto, Agitha, Fi, and newcomer Lana. Updates add Cia, Twili Midna, Tetra, Linkle, Medli, Marin and Toon Zelda; though other male heroes are also added that even out the gender balance.
* Hyrule Warriors, one of Manhandla's attacks is spitting rapid-fire seeds from all four of its heads which can stun-lock you if you get caught in it.
* Hyrule Warriors: picking it up stops all enemies for a brief period of time, which evens the playing field a good deal.
* Hyrule Warriors, self-styled "Bug Princess" Agitha can summon her insect friends to assist her in battle.
* Hyrule Warriors, she attacks Hyrule with an army to conquer and claim Link, not able to comprehend what he's actually like or that she's made herself his enemy.
* Hyrule Warriors, the enemy will send out an elite force of morale-boosted mooks led by an officer with a stat buff. These forces can endanger your keeps more quickly and are tougher to deal with than the ordinary Raid Forces but will rout instantly with the defeat of their officer.
* Hyrule Warriors. This last one is notable as it's from a different timeline then the previously established Era of Twilight, happening at roughly the same point in time.
* Hyrule Warriors: Throughout Legend Mode, it is never even considered that other versions of characters could be running around different timelines; when rumors of Zelda running around the Era of the Hero of Time are heard, it is immediately assumed to be Hyrule Warriors Zelda and never even considered it could be the Hero of Time-era Zelda. Similarly, no other Links are mentioned or even seen in Legend Mode, even when some of them are playable characters alongside the Warriors Link.
* Hyrule Warriors was made as a pre-order bonus in Japan, Europe, and the Nintendo World store in New York. Level Up Studios also has one, produced by Ruffneck Scarves.
* Hyrule Warriors weapons is a floating portal that can summon weaker versions of the game's miniboss monsters (or in the 3DS version, colored spheres that mimic the minibosses' movements) to attack enemies.
* Hyrule Warriors: When we meet Midna for the first time in the original Legend Mode, she says that she hates Cia because Cia cursed her into her imp form. In Cia's storyline, however, we see that Midna is already in imp form when Cia first meets her.
* Hyrule Warriors: When you evade a strong attack from an Elite Mook or use the corresponding weapon correctly on a giant enemy, a hexagonal gauge appears on top of it, which you need to deplete with repeated attacks: do so, and you'll follow up with a Weak Point Smash that does major damage to said enemy.
* Hyrule Warriors, where his fighting style is more focused and precise.
* Hyrule Warriors. Zelda, Ruto, and Midna are three princesses of defined kingdoms who are not afraid to fight on the front lines, risking life and limb to save their world. Agitha, although not of royal descent, is the self-proclaimed princess of the insect kingdom, and she too is willing to get her hands dirty to save Hyrule.
* Hysteria, and more broadly the consistent misdiagnosis and mistreatment of women during the 19th and early 20th centuries, is the theme of the classic early feminist short horror story
* Hysteria. Emily Dalrymple channels this Victorian ideal of a properly feminine woman. She is a rather capable mistress of her widowed father's household and agrees to marry her father's young assistant so that his successful medical clinic could stay in the family even though she loves him more like a friend or a brother. Later she admits that she behaved like her father had expected her to behave, and she wants to be more true to herself and behave more freely.
* Hysteria made up of individual cells that can combine to form a deadly, venomous goo-like form.

* "hysteria," sex), or having too much of it, or not conforming to traditional ideas of femininity...and thus legitimate (sometimes life-threatening) diseases were dismissed as "hysteria," or "it's all in her head." Thankfully, "hysteria" is no longer a valid medical or psychiatric diagnosis.
* Hysteria the Elegant uses a similar technique, but it's far more precise; Miria uses phantoms to distract her enemies for the split-second she needs to get behind them, whereas Hysteria uses her speed to immediately attack by charging her opponent, sidestepping at the last possible second, and moving behind them to slash them in the back. In this way, her afterimage appears to moving
* Hysteria, young Doctor Mortimer Granville is distracted and accidentally runs into Charlotte Dalrymple (his employer's eldest daughter) who is riding a bicycle and they are both knocked down. He ends end up lying on top of her and accidentally touches her breast. It happens again a moment later when he helps her up.
* Hysterical (1983), the village idiot-cum-prophet was prone to wander up to the heroes while riding his bicycle, pronouncing "You're DOOOOOMED!" in a loud and mournful tone.
* Hysterical Pregnancies tend to make humans/animals experience all of the symptoms of being pregnant including an expanded stomach area as well as a baby kicking (called "quickening"). These women believe they are pregnant.
* Hysterical Woman: A lady usually has enough dignity to avert this, although she is usually emotional.
* Hysterical Woman: Holds that women must be more temperamental and neurotic than men, and therefore less capable, simply because they are women.
* Hysterical Woman: Pulling women's reactions to a ridiculous extreme.
* Hysterical Woman since the heroine and her female friends' reactions are often over-the-top.
* Hytale; wizards use magic against their foes, soldiers wear armor and carry swords, archers attack from a distance using bows, etc.
* Hyuk uses a fire extinguisher both as a melee weapon and to annoy the monsters.
* Hyunckel. At the beginning of the series he is portrayed as relatively strong and extremely skilled, but in the last chapters he's actually one of the weakest characters in the main cast, power-wise (though his skill level remains above average). He even develops a special technique allowing him to
* Hyur and Elezen have straightforward naming conventions analogous to real-world people.
* I-16, sometimes used as pocket flak guns — even if an unguided rocket isn't fit to snipe a fighter, launching a wave of these can both soften and scatter formations.
* I-400-class submarine aircraft carrier. The I-400 series of submarines were designed for clandestine attacks utilizing three floatplane fighter-bombers, stored in a pressurized hangar built into the submarine's hull. The idea was to create an aircraft carrier that could attack a target and vanish without being detected. However, several problems kept these from being practical attack options. To start with, the I-400's were not that stealthy. The large size of the subs gave them an equally massive radar signature and made them easier to see from the air. They also took longer to dive than other submarines; roughly 54 seconds, which was almost twice the speed of U.S submarines, leaving them vulnerable in an emergency. Their small rudders made them difficult to maneuver and they could be blown off course in strong winds or waves when on the surface, while under the waves they had to be steered slightly starboard to go straight. By the time the war ended, of the eighteen planned I-400's, only three were made, with the last being converted to a tanker, never being used for their intended function. Despite the relative lack of use, they were an impressive feat of engineering and awesomely huge. Reportedly, when the I-400 surrendered to a destroyer of the U.S Navy, the destroyermen were in awe of the size.
* I-400. It carried 2 floatplanes, 10 torpedo tubes (6 forward, 4 aft), and 2 8-inch turreted guns. And it was commissioned in 1934!
* I-401 manages to destroy an underwater submarine while under fire by the cruiser Takao, though to be fair I-401 used a

* I-95/I-495 in the Washington, D.C., area are the same road for most of the eastern half the 495's loop. The good news is both sides will eventually connect to the other side of 95. The bad news is your GPS will only take you on the 95 half if your journey is going further north and will try to course correct for several miles if you decide to take the exclusive 495 portion of the loop. Also frustrating in that the 95/495 stretch crosses through three different federal jurisdictions in the span of less than a mile. If you're heading south, you'll get a series of "Welcome to the District of Columbia, Welcome to Virginia, followed by instructions which are not far off. Some GPS systems count crossing state borders as a direction and will wait until they are crossed before issuing the next step... which can add a reminder to stay on 495 in DC and then prepare for a left ramp to continue on 95. And the Virginia portion of all these roads are maddening complex and seems to be the nations laboratory for highway traffic control solutions.
* I-95 is the major highway along the East Coast of the United States, going from Miami all the way up through Maine to the Canadian border. Despite being one of the first routes of the Interstate Highway System planned and started when it was first proposed in the 1950s, it was still not one continuous route long after most of the nationwide system was built by the 1980s. The original plan was to
* I Accuse My Parents begins with our protagonist on trial for manslaughter, with his defense being a retelling of pretty much his entire life story up until that point.
* I Accuse My Parents is "Cake & Shake", a cake mix with a real exotic dancer included. Frank thought he was being clever by folding the dancer into the mix before baking, thus saving a step. Dr. Forrester was incredulous, and they spend the whole experiment digging him out. Fortunately for them, Rodney (the dancer) was no worse for the wear.
* I Accuse My Parents, the start of Jimmy's life as a mob courier is when he gets a $77 check for his birthday dinner - a small fortune for a young man making $25 a week selling shoes. The local mob boss had tricked him into going to a restaurant far more expensive than he could afford so that he could ensnare the kid into working for him - he needed a new guy the police wouldn't be watching to transport stolen goods.
* I Accuse My Parents, when the main character's mom is drunk in front of Jimmy.
* I Against I, Me Against You, forcing them to fight through countless Freelancer agents, what's left of the Whitewater soldiers including Gilda (now with magical A.I.s), and culminating in a duel between Twilight and Sunset Shimmer before the ship goes down.
* I Against I, Me Against You, not only does the same revelation as in canon that Church is an AI occur, but Twilight is revealed to be Ancora, an MI created by Project Freelancer as part of the Director's efforts to revive Allison.
* I Against I, Me Against You: The third act introduces Whitewater, a company of Equestrian mercenaries hired to perform a hit on the main characters.
* I Against I, Me Against You were good friends twenty years before the story's beginning. Due in no small part to the circumstances surrounding Project Freelancer, it doesn't last.
* Iago befriends it, and at episode's end, shows it a mirror while screaming. "Squirt scared himself", so its own wish is granted — to return to the homeland of its species.
* Iago is about as reliable morality-wise as a chocolate teapot. He spends much of
* Iago is that Jafar moved a part of himself to his normal parrot to become less irritable. Thus Iago is essentially an angrier and more abrasive Jafar.
* IA held an "ARIA on the Planetes" concert with her CeVIO sister ONE.
* Iaijutsu Practitioner: The (very cool) act of unsheathing your sword and attacking someone with it in the same movement.
* iaijutsu, Thunder Breathing grants its users the blinding speed and power of lightning.
* Iain Banks, after offers of coffee and threats of excommunication fail, Isis successfully wakes up her hungover half brother Zebediah by the graduated series of containers method. First the sleeper is drenched with a thimbleful of water, which

is followed by the contents of an egg cup, a tea cup, a pint glass and finally a bucket.
* Iain Banks are written in second person in present tense. These describe the actions of a murderer. It really helps to hide the identity of the killer (even their gender) but the result is also very creepy.
* Iain Banks contains one of the few examples of a space battle actually being described rather than occurring off-screen.
* Iain Banks, in which a group of mercenaries attack an ancient temple which is, unknown to them, built mainly out of mirrors.
* Iain Banks names should be pronounced. Banks replied he didn't know, and Brookmyre said he'd always suspected as much.
* Iain Banks novels feature two types of Hyperspace: Ultraspace and Infraspace. This is a result of the description of the nature of the Universe in those novels - as the Universe expands, other Universes are expanding "inside" it (in a multi-dimensional analogue of a kind of expanding onion, with the individual layers of the onion representing Universes). Hyperspace is found "in between" the Universes, with Ultraspace defined as the Hyperspace between a Universe and the one "above" it and Infraspace being defined as the one between a Universe and the one "below" it. The current method of travel amongst The Culture is to alternate between the two, accelerating first in one then switching to the other over and over until max speed is reached, then sticking with whichever is desired. Interestingly, these spaces appear to have a plasticity — a ship that is accelerating hard or breaking hard is described as creating churning waves in whichever space it's in.
* Iain Banks novels have a number of entities that need some exposition of their long, long lives. Most of the Minds are effectively immortal and many of them have been around for hundreds and occasionally thousands of years.
* Iain Banks provides us with the Intagliated, slaves whose bodily tattoos contain information detailing their pasts, why they're Intagliated and the markings go right down to the DNA.
* Iain Banks uses the bodies to create dioramas of various famous wars and other events. Subverted in that the suspendees are volunteers, alive, and routinely returned to their lives upon completion of their requested term of suspension.
* Iain Banks utilises the trope in the form of a faction of L'Expédience, a parallel-world hopping secret service, suborned by Madame d'Ortolan to suppress the search for extraterrestrials across the many Earths. Subverted somewhat in that Banks gives L'Expédience an internal politics and diverging aims.
* Iain Banks was one Daniel Weir; listed in the school register by surname followed by first initial.
* Iain Banks writes literary fiction and non-fiction as "Iain Banks". His science fiction is written as "Iain M. Banks", in order to make it easier to differentiate his works for marketing purposes.
* Iain Banks You know the Idirans from the "As Religious Fundamentalists" example? The Culture were the ones who were willing to ignore their surrender terms and fight them to the death for ideological reasons, and the Idirans at that point were no threat to them.
* Iain M. Banks are giant flyers of a sort, though very large (large enough to provide living space for dozens of human-shaped creatures in their various nooks and crannies) and rather slow and inscrutable. You generally wouldn't chat to them, certainly.
* Iain M. Banks because organic lifeforms simply can't cope with the maths involved to hit anything at that distance.
* Iain M. Banks-built handgun that only he can use, and try to blackmail him into taking out a government target with it. While contemplating what the weapon is capable of, the protagonist imagines using it to destroy the planet's Space Elevator, trying to picture the resulting destruction and idly wondering whether it would come crashing to the ground or simply spin off into space.
* Iain M. Banks' career may serve as a inversion of the idea that one writes genre to support one's "serious" work. In fact, he said several times that sales of the mainstream novels of Iain Banks (his mainstream

* Iain M. Banks Elethiomel was fond of this. "The first messenger we personally sent came back without his skin!"
* Iain M. Banks example: the Affront. They appropriated this name from the Culture after deciding that since it suits them so well, they might as well just take it. Their entire civilization is based on Might Makes Right, and they are vicious and jovial in equal proportion.
* Iain M. Banks goes so far as to shave her head in an attempt to throw off her pursuers.
* Iain M. Banks has an appendix which calls itself part of a "Contact-approved Earth Extro-Information Pack" made in 2110, so presumably they came back by then. Dammit.
* Iain M. Banks has written about a variety of spacefaring militaries in his scifi novels.
* Iain M. Banks invokes this — a man who frequently travels between universes at one point looks up at the sky when arriving in a new one, searching for zeppelins. As he says, he 'likes it when there's zeppelins'.
* Iain M. Banks, it's mentioned that any recording could be created, making blackmail impossible. Usually. Ship Minds can record events in an unfakeable way — so if one of them is focusing on something you aren't meant to be doing, you are in trouble. (Even that can still be faked by other Minds, but they're generally held to be above suspicion.)
* Iain M. Banks novels can be this way. You can have them in your dreams, too.
* Iain M. Banks novels, citizens of the Culture are able to change their gender at will. The process is slow, taking several months, but is done entirely using consciously-released hormone, not requiring any external assistance. The change is so complete that they begin to produce the appropriate sex cells, and a newly-female person can get pregnant and give birth. Most people in the Culture will spend a year or two as the opposite sex at some point in their lives, just to see what it's like. A popular expression of love is for a couple to conceive a child, then change gender and conceive another, so both partners are pregnant with the other's child at the same time (they are also able to temporarily arrest the development of the embryo/fetus, so that they can time it so they come to term together — if the embryo is only just conceived, they can even keep it alive while they become male).
* Iain M. Banks novels end with epilogues that briefly reveal the eventual fates of surviving characters.
* Iain M. Banks novels, the Culture rates any lifeform, biological or machine, at a given level of intelligence to be a sapient creature, including the Minds that operate ships and colonies and run the Culture itself, Drones (for whom the word "robot" is inadequate) and some spacesuits. And some weapons.
* Iain M. Banks novels. The Idirans are more like imperialists than xenophobes, however; they want to conquer the galaxy so that they can improve it. The Chelgrians too, to some extent, with the addition that their heaven is a real place that their technology will take them when they die.
* Iain M. Banks of a Culture Mind). Avatars often appear human, and if they are also female they fit this trope.
* Iain M. Banks', protagonist Sharrow, as a member of the highest level of aristocracy, has only a single name, while lower social classes have more names.
* Iain M. Banks retains this option. Described as "space hippies with super-nukes", they would prefer that you get along with them in a friendly fashion and (notwithstanding the machinations of Special Circumstances) practice the last word in "live and let live". But their ships can lay waste to planets if they have to, and that's not even the warships.
* Iain M. Banks, seem quite firmly grounded in physical reality, and yet exhibit powers as vastly in excess of the Culture's as the abilities of the Culture exceed ours. Their ability to escape the heat death of their own universe is one. Possibly there are benefits to not Ascending.
* Iain M. Banks ship investigates Earth, and the ship tells our narrator:
* Iain M. Banks' structure is essentially a collection of very advanced

forcefields.
* Iain M. Banks stunningly averted, in both range and size of ships, drones, space battles, androids, sentient space-suits, conspiracies and counter-conspiracies.
* Iain M. Banks surrounded by millions of smaller chunks of rock. And the whole horrific mess is traveling at a sizable fraction of light-speed...
* Iain M. Banks the Lazy Guns were ancient weapons created by a long dead race that destroyed their target with a suitable dark humoured effect. A person might suffer a heavy anchor to appear above them, or a shark to materialize and bite their head off. A city will be unexpectedly hit by a comet or have a volcano erupt in its main square. The implication is it plucks something from elsewhere in the multiverse and pops it into its own universe where it dispatches the target - with a sense of humour.
* Iain M. Banks. These armor suits are pretty nifty even by the Culture's high-tech standards, providing impressive protection, massive physical strength, and a significant degree of AI autonomy.
* Iain M. Banks, the stories always maintain that even with drug-fuelled performance enhancement, the users are always still just temporarily getting doped, and not actually being made distinctly or permanently better.
* Iain M. Banks, they feel pity that we can't experience or understand anywhere near as much as they can.
* Iain M. Banks' to snatch back his head, but not before he's had a horrified moment to realise exactly what just happened. Later Zakalwe is in hospital waiting for a new body to be grown (they gave him the choice of remaining unconscious but he'd rather watch television) when the artificially-intelligent drone Skaffen-Amtiskaw (who doesn't like Zakalwe much, and has a twisted sense of humor) sends him a present. A hat.
* Iain M. Banks until a head-shot kills him (graphically) and the exoskeleton suit is suddenly unhindered, becoming much more dangerous.
* Iain M. Banks" (usually done by pulling petals from a daisy or other flower) by dreamily and thoughtlessly removing the (male) astronaut's various appendages. Including the "odd attachment". The vine does try to eat part of the astronaut's spacesuit, thinking it's peel, but doesn't like it.
* Iain M. Banks, when a person dies their mind is automatically uploaded by organic systems in their brain (not implants; they grow there naturally implying they are germ-line genetic engineering). They then get downloaded into physical bodies again the first seven deaths, then spend their next eight rebirths solely in a virtual reality. Then they die for good. Nondestructive uploads can also be made, and their experiences reintegrated at a later date. This allows for the possibility of people uploading copies of themselves to have a passionate affair in a suitably private virtuality, and then redownload the experiences into their minds and fully appreciate them later without interfering with work or family life.
* Iain M. Banks where it is stated that monogamy is extremely rare, it is far more normal for a couple to stay together throughout their offspring's childhood and adolescence but even this isn't a given.
* Iain M. Banks. While a Contact ship visits Earth, one of the crew arranges a feast including the power figures of 1977:
* IA investigates a veteran cop for accepting a bribe from a pedophile and the cop kills himself. The IA investigator on the case was actually about to subvert the trope and exonerate the cop fully and is so angry at his superiors that he becomes an ally of Frank.
* Iallanis is a lesser goddess of good giants, love, forgiveness, mercy and beauty.
* "I Almost Do" open with the singer lovingly fantasize about what her lover is doing after a hard day of work... before revealed that they broke up and she was trying so hard to not call them because their relationship has left too many hurt on both side. The aforementioned opening lyrics is repeated at the end, implying that she still thinks about them.
* I (Almost) Got Away With It) sent a recorded message to investigators shortly before he fled the country, taunting them with an offer of testifying against the

co-conspirators of the quadruple murder he was linked to.
* "I already knew how to run wildly into the guns of an enemy who was shooting at me. Therefore, I felt the Marine Corps had nothing else to teach me." — General
* I always worried what would happen when that bitch got some funding.
* I Am a Cat and one of the most well-known examples in Japanese literature.
* I Am a Cat/Kushami is called on by a policeman bringing the recently-captured thief who robbed his (Sneaze's) house. Sneaze assumes the thief is the policeman because he's more smartly dressed.
* I Am a Fugitive from a Chain Gang, based on the real-life case of a man wrongly accused of a robbery and sent to the brutal Georgia prison system. After escaping — twice — he is forced into hiding, and in the film's memorable final scene, bids farewell to his former fiancee.
* I Am a Fugitive from a Chain Gang has a scene where a jail warden makes an example of an inmate who "didn't give us a good day's work" by taking him to a side room and whipping his bare back. The whipping is shown in shadow on a wall.
* I Am a Fugitive from a Chain Gang. It often gets overshadowed by the film's penal reform themes but this movie also deals with how American war vets had been abandoned by the government.
* I Am a Fugitive from a Chain Gang. (The actual thief is shot dead by police.)
* "I! AM! A GOD!!" Kael's was definitely especially high even by standards of his race, but not high enough to register the shrill creepy opposite-end of this trope either.
* I Am a Hero A bunch of people is stuck in an Italian bell tower. While discussing what to do with the lost child that just arrived, one of the characters suddenly reveal they are actually all zombies. Then, the narration flickers between their perception and the girl's, showing that he is actually right.
* I Am a Hero spends the first two hundred pages making you suffer through the everyday trials and tribulations of the protagonist before it actually gets on with the plot. To say it starts slow is like saying continental drift takes a while.
* I Am a Hero. This works primarily because they're forced together by circumstance, as they have very little in common.
* I Am a Hero trying to stave off angry hordes that are consuming Japan.
* I Am Alive almost all semblance of civilized order within a year after it began. This in turn left the survivors to fend for themselves.
* I Am Alive (rare example of a game in this genre where the threat isn't supernatural)
* I Am Alone is about the host of a wilderness survival show who is bitten while in the Colorado Rockies, and his film crew is in town trying to survive.
* I Am Alone: The virus, upon infecting its host, can zombify within 32 seconds to a minute. When Jacob was infected, it took him days to turn.
* I Am America (And So Can You!) features an interview with a similar (Hindu!) cow that explains she and her children (who are just learning to read) are looking forward to being eaten.
* I Am a Monster: Where the character laments rather than embraces how bad they are.
* "I am Andrew Ryan, and I'm here to ask a question: Is a man not entitled to the
* "I am an endless barrel of exposition!", but not in the usual sense.
* I Am an Insane Rogue A.I.: "Are you pondering what I'm pondering? Probably not, because I am smarter than you."
* I Am an Insane Rogue A.I. does this in a very sneaky way; in one of the level-beginning speeches, the AI says "Your computer has not not yet been compromised. I promise!" The double-not is just a computing hiccup... right?
* I AM A ROBOT PIRATE. YO-HO-HO AND A BOTTLE OF RAM! I wear an iPATCH.
* I am a Russian Soldier, also being based on the Brest Fortress siege, understandably has a similar ending.
* I Am Baby Cakes has a surprising way of expressing the great paradoxes of life and love in simple, childish terms.
* "I Am Becoming" Song "Let It Go" has the lyric "Turn away and slam the door" and

concludes with her doing just that. The theme of slamming doors shut is brought up again in reprise of "For the First Time in Forever", in which Anna begs Elsa to not shut her out from her life again.
* I am Behemoth of the S-Rank, But I am Mistaken as a Cat and I Live as a Pet of Elf Girl
* I am Behemoth of the S-Rank, But I am Mistaken as a Cat and I Live as a Pet of Elf Girl.
* I am Behemoth of the S-Rank, But I am Mistaken as a Cat and I Live as a Pet of Elf Girl and official adventuring attire don't help. She's aware of it, but ignores it, most of the time.
* I am Behemoth of the S-Rank, But I am Mistaken as a Cat and I Live as a Pet of Elf Girl. He ends up immobilized (thanks to the titular Behemoth's attack), leaving him on his backside with spread legs, as Aria goes to end the fight with an axe-heel kick. The reader doesn't actually get to see the blow, but a few male audience members are shown grabbing their bits in horror, leaving very little doubt to where she aimed her strike.
* I Am Big Bird, Caroll Spinney discusses his contemplating jumping out of a skyscraper window to end all of the emotional pain he was in, then thinking better of it. Not too much further into the film, the subject turns to Carroll meeting his eventual wife, Deb.
* I Am Big Boned: Character insists their weight problem comes from an uncontrollable source.
* I Am Big Boned: Someone claims that they aren't really fat and gives an excuse for why they look obese.
* 'I Am Canadian' ad. Basically an average Canadian gets on a stage and systematically refutes pervasive stereotypes of Canadians.
* I Am Cuba and making capitalism look fun, but was later appreciated by Hollywood directors for the same reason.
* I Am Curious (Yellow): Lena and her friend Börje are about to make love in her archive room. There's no bed, so they drag in a mattress and some sheets and pillows from another room, and make all sorts of elaborate preparations. At the moment they actually begin intercourse, a test pattern flips up on the screen. Cut to a pleasant looking announcer fixing her hair, not realizing she's already on camera. She says "We regret that we have had some technical difficulties owing to erection fault" (or "faulty coupling", depending on the translation).
* I Am David, a couple of American tourists are in the Italian countryside when their runs out of gas. When they see David, the husband tries to tell him that their car needs gas. Instead, he says "My wine shop needs steak."
* I am done on this side; you may turn me over is built in the form of a grill just for this.
* I Am Frankie has two: PEGS1 and BOB. That's not counting the actual androids running around, mind.
* I Am Frankie is the first functional prototype of the Gaines series androids. She is psychopathically violent, hates humanity, and is entirely selfish, in contrast to her successor Frankie, who is all-loving, a friend to humanity, and considers the needs of others.
* I Am Frankie, Tammy frames Robbie for vandalizing the school lockers. When she confesses to framing him, her punishment is to be his "genie" and grant him three "wishes".
* I Am Furious (Yellow) of his dad, Lisa's dad, and Maggie's dad. Bart, Lisa, and Maggie, of course, are full-blood siblings.
* I Am Furious (Yellow) plays a slightly crazy version of himself who will not leave Comic Book Guy's shop, breaks a toy Batmobile in an attempt to make a The Thing figurine fit inside it, thinks he "made it better" and believes he can turn into the Hulk.
* I Am Furious (Yellow). The end result is a rampage through town causing millions of dollars worth of damage.
* I am gonna hug and then slap him. It's probable that her actual response would have to be heavily censored by the newspaper so they wrote this instead.

* "I Am Great!" Song: I'll sing a song dedicated to how awesome I really am!
* "I Am Great!" Song) to establish that his strange creations are borne of a desire to make the world a lovelier place, even if others don't understand or fully appreciate what he's doing.
* "I am here to take your life! My name is Wizard, Rotton the Wizard! I don't have anything against you but—"
* I Am Jazz: Jazz is a very patient, mild-mannered kid, and she also plays soccer.
* I Am Jazz: Jazz once draws a drawing of herself with a raincloud over her to illustrate her dysphoria.
* I Am Jazz: Jazz seems to be energetic as she lists dancing, back flips, soccer, and swimming in her interests, then later she does cartwheels and bounces on the trampoline with Casey and Samantha.
* I Am Jazz she was a boy who just liked to wear dresses, but she turned out to be a trans girl.
* I Am J is about a teenage trans boy named J. A large portion of the book deals with his troubles and tribulations over being attracted to women while coming out and starting transitioning over the book.
* I Am J: J's friend Chanelle is twenty and still in high school. She's one year off from the cutoff age in NYC. Chanelle plans on going to college to become a poet afterwards.
* I Am J: J tells a girl he likes that he has a girlfriend in Philadelphia, but they're on the verge of breakup. This comes back to bite him several times later on.
* "I...am just going...to go...to the Bahamas...I left my...cat in the...refrigerator there..."
* I Am Legend. Additionally, the writers felt "vampire" was too corny, but somehow felt fine about the nickname "darkseekers".
* I Am Legend and its various adaptations is the last man in a post-apocalyptic world. He spends his time killing the vampire/zombie-like creatures that everyone else has become, thinking them mindless beasts. He later finds out that many of the infected humans had found ways to retain their sentience and he had been killing innocent people.
* I Am Legend, and some copies of the book list it as science fiction rather than horror.
* I Am Legend. Apparently, Smith is a fair dad and wanted to give both his kids a movie.
* I Am Legend, attempted suicide as a result, and wakes up to find two strangers in his house, eating his food. The bacon was just a snapping point in the middle of a generally extreme level of stress.
* I Am Legend (based on the reaction of test audiences) demonstrates that people like this trope.
* I Am Legend, Basically the exact opposite of what the novel did and what the rest of the film was building up to. Several plot details hinting at the original ending remain in the film...
* I Am Legend depicted the city abandoned after a plague decimated the human race.
* I Am Legend does away with anything supernatural about vampirism. It's all caused by a bacteria. All legends of supernatural effects are either given a scientific-sounding explanation or else turn out to be mere legends. For example, repelling vampires with a cross works but is unreliable. Why? The sight of formerly revered items causes self-loathing in the vampire; a once-faithful Christian might be repelled. A formerly Jewish vampire is repelled by the Torah, but unaffected by crosses.
* I Am Legend, Dr. Neville and his two companions are trapped in his glass-encased lab in his basement while a horde of ghouls are attacking. The lead ghoul keeps pounding away at the glass (with his face) to get to him.
* I Am Legend had the protagonist making regular daily broadcasts to anyone else who might have escaped the zombie plague.
* I Am Legend has a notable piano part with solo sections. Thinking about it, the piano part may represent Neville's solitary existance surrounded by the evidence of

his failure and memories of what once was, the strings brass and percussion parts.
* I Am Legend has had three movies since it was written in the 1950s, and all of them take the plot and characters in different directions.
* I Am Legend, has the infected more like an odd cross between zombies and vampires.
* I Am Legend have also kept the idea of Robert Neville being well educated and fairly urbane rather than the rough factory worker of the original story who learned all of his science through excursions to the library and was concerned more over a lack of sexual fulfillment than over the idea of the world ending.
* I Am Legend logo. Screenwriter Akiva Goldsman was hired to write a Batman vs Superman film before it fell through.
* I Am Legend Neville himself keeps vampire rats for study while struggling to develop a cure.
* I Am Legend, Neville must kill his reanimated wife when she returns.
* I Am Legend. New York City spends thousands of dollars a year on pumps to keep water out of the tunnels. And anyone in the city can tell you how much damage grass does to sidewalks.
* I Am Legend. One he proves is that a vampire who was Jewish will be repelled by a star of David. He even applies modern psychology to the problem by concluding that this, and a couple other weaknesses, are entirely psychosomatic. The vampires think that they should be affected by holy symbols, so they react as if it were actually harming them.
* I Am Legend, particularly with regards to music. Since the story was set twenty years in the future, it prevents any inaccurate predictions, since the protagonist is the only person left.
* I Am Legend, Robert Neville, apparently the last man on earth, has set up a whole series of mannequins in specific places, where he interacts and speaks to them to ease his loneliness. And then one day, one of them is far out of place...
* I Am Legend, Robert Neville destroys the monster horde in the laboratory with a hand grenade which produces a large fireball.
* I Am Legend, Robert Neville is a terrifying monster who can hunt them during the day.
* I Am Legend: The days are safe, but at night the vampires will emerge and try to drink your blood.
* I Am Legend. The following shot is of Neville sitting in his car after burying the dog's body and blankly staring at the now empty passenger seat. He almost commits suicide when two unaffected survivors show up and help him.
* I Am Legend, the infection that wiped out most humans was the result of a supposed cure for cancer that ended up going horribly wrong.
* I Am Legend. Then out of nowhere comes the loud sound of a window closing — the heroes preparing to hide from the real enemies.
* I Am Legend, vampires fear the holy symbol of what they believed in before they became vampires. The Protagonist's archenemy is terrified by the Star of David.
* I Am Legend was intended to lead up to this, and still does in the alternate ending on the DVD release.
* I Am Legend was shot in New York, with $5 million being spent on closing the Brooklyn Bridge for 5 consecutive nights.
* I Am Legend Will Smith's character is Lieutenant Colonel Robert Neville. A brilliant scientist who also managed to survive being badly outnumbered by cannibalistic hordes. It wasn't because he was a punk...
* I Am Malala. Justified, as Pakistani have a very narrow perception of Western culture, including animation, thus any major film is perceived as "Disney". Additionally, Pakistan could very well be covered under Disney’s abovementioned deal with DreamWorks In Asia.
* "I Am Man" series of commercials shows guys doing stereotypically "macho" things (at one point someone tows a truck with his teeth), while praising the utter masculinity of a hamburger to the tune of Helen Reddy's "I Am Woman". At one point a character tosses aside a plate of nouvelle cuisine, decrying it as "chick food".
* "I... am... MEGATRON!", but his minions had different ideas of what type this

example was.
* I Am Mordred: Arthur didn't know Morgause was his half-sister when he had sex with her.
* I Am Mordred: In this telling, Mordred does all he can to resist the prophecy made about him. Though he has understandably mixed feelings about his father King Arthur since the latter tried to kill him, Mordred likes him nonetheless and hates the prophecy.
* I Am Mordred: It turns out that Mordred can hear Merlin in the form of a hawk this way.
* I Am Mordred: Merlin here is a cruel wizard with no redeeming traits we see, pushing King Arthur to kill his son when he's prophesied Mordred will be his downfall.
* I Am Mordred: Mordred returns to where he was raised, but finds much has changed and his foster father views him as a strange lord.
* I Am Mordred: This is an ability of King Arthur's, and people come from across the kingdom to receive healing from him (based on a real belief in the Middle Ages). He can't heal Mordred or Guinevere though, saying it's a punishment for his past sins.
* I Am Mordred: When Nyneve dies so does Gull and her hawk, since they're her familiars.
* I Am Morgan Lefay. When she goes mad with grief, (literally mad) and starves herself, Morgan's friends/servants with good intentions force feed her to keep her alive.
* "I am Ninja", by German band the Neu. "I am ninja, you are ninja, we are ninja too..."
* I Am NOT a Mary Sue, by bumping her heels and saying "There's no place like home!", but it was not a dream.
* I Am Not an Animal: Collage animation satire about self-obsessed talking animals created in a lab.
* I Am Not an Animal episode 'Home'. When the animals are trying to break back into the vivisection laboratory they are told that:
* I Am Not an Animal. The animals were genetically engineered to talk and were raised with celebrity magazines photo-shopped so half the people had animal heads. They escaped and didn't realize that animals aren't supposed to talk.
* I Am Not a Serial Killer and the subsequent books tries to use profiling to track down the demons. He keeps coming back to a fundamental principle of trying to figure out "What does the killer do that he doesn't have to do?". His accuracy varies, but the police that he talks to over the course of the series tend to be impressed by his insights.
* I Am Not a Serial Killer. He's drawn to the lightness and ease she brings out in him, and she likes that he's quiet and respectful and unusually interested in what's behind the pretty face.
* I Am Not a Serial Killer is actually a clinically diagnosed sociopath.
* I Am Not a Serial Killer is maybe the only person in the world he really loves.
* I Am Not a Serial Killer John Cleaver is that he's fascinated with serial killers. And that he eagerly helps out with the family business-undertaking.
* I Am Not a Serial Killer, the followup was almost universally positively received by fans.
* I Am Not a Serial Killer Then John turns dejectedly back to his therapist and the camera shows us the woman safely crossing.
* I Am Not a Serial Killer want him to become a serial killer. He is not content with that destiny, and makes it his life's mission to be better than everybody expects him to be.
* I am not ashamed decided to comply with this call a little more literally than the creators of the original campaign had intended.
* I Am NOT Going Through Puberty Again!, being responsible for Choji/Karui and Kiba/Tamaki. It's mentioned that they don't have a very good success rate (one happy couple for every twelve disasters), Shino/Hana being one such failure that resulted in millions of ryo in property damage on the first date.

* I Am NOT Going Through Puberty Again! during the Chunin exam finals. Sakura and Hinata deliberatley make it look like they knocked each other out at the same time so that their husbands could face each other at more or less full power.
* I Am NOT Going Through Puberty Again! example where Naruto, Hinata, and Konahamaru have all ghostwritten new books in the Icha Icha series after Jiraya's death.
* I Am NOT Going Through Puberty Again!, Itachi (5'7'') ends up with Karenbana (short enough to be mistaken for a child).
* I Am NOT Going Through Puberty Again!, most of them are used as the set up for jokes.
* I Am NOT Going Through Puberty Again!: Naruto and Sakura are both very protective of their respective spouses and have killed would-be assassins in the past.
* I Am NOT Going Through Puberty Again!, Naruto and Sasuke are effectively impotent, much to the amusement and annoyance of their wives.
* I Am NOT Going Through Puberty Again! that Sakura introduced her teammate-turned-enemy-turned-teammate-turned-boyfriend-turned-husband-turned-teammate-turned-boyfriend Sasuke to her parents.
* I Am NOT Going Through Puberty Again! to have picked up the hobby of trying to pair their friends together. While this actually has resulted in a few happy couples (Choji/Karui and Kiba/Tamaki being among the listed examples), they only have a 1 in 12 success rate, and their attempt to pair Shino with Kiba's older sister Hana in particular resulted in millions of ryo in property damage on the first date.
* I Am NOT Going Through Puberty Again! under orders from the village's leadership, which would be bad for PR). It barely lasts either way —- Itachi is named Hokage in the fic's epilogue.
* I Am NOT Going Through Puberty Again!, when Naruto gets a song stuck in Shukaku's head so the heart-to-heart he had with Gaara has time to sink in.
* I Am Not Infected Amanda sports one in her first appearance. She quickly stops wearing it, and with it her status as a badass.
* I Am Not Infected: During their journey to Compton, Hartley sees a cat (which remains off screen). He proceeds to empty all his ammunition shooting at it, while it responds with the familiar yowling sound effect.
* I Am Not Infected features what, in the first shot, appears to be Paul decked out with chainsaws on both arms. Then it turns out to be a "Chainsawsuit" including the aforementioned arm chainsaws, leg chainsaws, and a back chainsaw. It's awesome.
* I Am Not Infected has Amanda repeating the phrase "I can't hear you through the door" to Hartley, who had originally told this to Handcuff Guy. Who could hear him perfectly.
* I Am Not Left-Handed for Yusuke, he finishes it off by flash stepping behind Yusuke to tell him about the Dark Tournament and give him an ultimatum to join.
* "I am not lying when I say this") brought in for a polygraph test to prove he really was being honest. The machine is realistically depicted as graphing his stress levels with wiggling pens. He passes.
* I Am Not My Father: A character actively defies becoming like their parent.
* I Am Not Okay With This (lesbian main character, coming out story, LGBT youth)
* I Am Not Okay With This; under normal conditions, she can't do much more than break open a lock, with her greatest feats coming when she's angry or stressed-out.
* I Am Not Pretty, bonus points if the person has been constantly picked on for being ugly.
* I Am Not Shazam: A name in the title of a work, which may or may not be an actual character, is mistakenly assumed to be a name belonging to a prominent character within the work.
* I Am Not Shazam in places where the locals have tenuous grasp of the English language.
* I Am Not Shazam: Lots of fanart of Pokémon Lost Silver will use 'Lost Silver' to refer to the main character of the eponymous game. The story never refers to the character as such. In-game, the character is named '...', while the narrator calls him 'Gold'.

* I Am Not Shazam) or any of the other tailed beasts' names but Shukaku until very late in the series.
* I Am Not Shazam: People mistakenly assume the title of the work is the main character's name.
* I Am Not Spock: Actor tries to distance themselves from their most famous role.
* I Am Not Spock: An actor tries to distance themselves from their most famous role.
* I Am Not Spock described a fan cornering him to ask if he could touch her friend's blind eye and use his Vulcan powers to heal her. Nimoy was shaken by the experience, but realized similar things happen to actors all the time. Contrary to popular perception, fans with this type of confusion (NOT his frustration with being typecast) are what inspired the title of the book.
* I Am Not Spock, which refers to an actor who's unable to get any part other than the character for which he or she is known.
* I Am Not Weasel: An animal is mistaken for a species it plainly isn't.
* I Am Not Weasel: Mistaking an animal for a species it plainly isn't.
* I Am Number Four: Four tries on Sam's specs, which actually used to belong to Sam's missing father, and gets a major headache.
* I Am Number Four, including the Greek gods, Buddha, Leonardo da Vinci, etc.
* I Am Number Four: Mark is originally a bit of a jerk, who has no issue with the regular students but does have a grudge against Sam — a nerd who does stand up to him and believes in aliens — and John — who is dating his ex-girlfriend. By the end, though, he is incorporated into their gang, helping to keep secrets and evade police etc.
* I Am Number Four: Sam shoots one of the Mogadorians with a gun he took from one of the dead ones, Sarah's surprised reaction is dismissed with "I play a lot of Halo."
* I Am Number Four spends most of its time developing a typical teen love story. By the time it starts getting into the action the trailer led us to believe made up most of the movie, it ends. Just like that.
* I Am Number Four, the Loriens have seemingly magical powers. It's explained...that it happened by evolution. And apparently, these adaptations were to protect the planet they lived on. We're genuinely not sure whether or not the authors intended for this to make sense or not.
* I Am Number Four where Sam's specs used to belong to his (missing) dad. Four tries the glasses on and gets a massive headache for his trouble.
* I Am Number Four who gets away with assault, kidnapping, breaking into people's lockers and planting paint bombs in them, stalking his ex, has the NERVE to tell her that she's the problem, and gets away scott free from everything because the plot says so.
* I Am Number Four with all alien people and creatures, presumably to not leave lots of dead bodies lying everywhere, especially with an expanded audience including younger people.
* I Am Octavia: Octavia and Vinyl's relationship is close and romantically tinged, but it's only ever referred to as friendship. The story is a lot like a couple breaking up.
* I Am One of Those, Too encounter with a real disabled Falklands veteran ("I don't believe a word of this. In fact I don't believe it so much I'm gonna smash your face in!")
* I Am One of Those, Too: When you are caught in a lie by someone who just happens to have that ability / nationality for real.
* I amount of information about him. However it's unknown what his motivations are and he doesn't encourage or discourage John to act on either option he provides him, indicating he is a morally neutral judge. But it's strongly implied that he had something to do with the 1907 cholera outbreak in Armadillo, suggesting he can be actively malicious.
* I am [REDACTED], and by the start of the story, has given up correcting reporters and fans alike.
* I am [REDACTED]: Izuku explicitly describes his relationship with Melissa Shield

as this.
* I am [REDACTED]: Ochako was attracted to the titular Redacted long before she met him or his civilian identity, Izuku. The crush remains even as she and Izuku grow closer over the course of the story, due to her and Redacted working together frequently.
* I Am Regina by Sally Keehn, published in 1991, is about this. The main character Regina is taken by the Allegheny Indians and lives with them for so long that she forgets the English language, except for a few Bible verses. This is definitely a subversion of the original trope, mainly because it portrays the Indians sympathetically, and they become Regina's family.
* "I am ripper! (Smash) Tearer! (Smash) Gouger! (Smash) Slasher! I am the teeth in the darkness! (Smash) The talons in the night! (Smash) MINE IS STRENGTH! (SMASH) AND LUST! (SMASH) AND POWER! (SMASH) I! AM!
* i am sam, a blue filter is used in certain scenes, portraying bad times for the hero, like in court or in the hospital.
* i am sam, but many of the actors who play his housemates are disabled like their characters.
* i am sam has a funny montage of the lawyer interviewing Sam's retarded friends for court suitability.
* i am sam, occasional struggles with verbalizing his thoughts, apparent sarcasm-blindness, poor responses to stress, and displays of stimming when emotionally overwhelmed.
* i am sam, Sam, a mentally handicapped single father, mistakes a streetwalker's mockery for a promise to help him raise his daughter. He is then arrested for soliciting her services.
* I Am Setsuna, as the story, as the title implies, focuses more on Setsuna herself.
* I Am Setsuna a virgin needs to be sacrificed every hundred years. The object of the game is to escort the emponymous Setsuna to the ritual site.
* I Am Skantarios in the palace and tries to reconnect with the wife he hadn't seen for years. The garden quickly gains the nickname of "Imperial Desert", and Skantarios is more than happy to return to campaigning, recognizing that he simply isn't suited for anything else.
* I Am Skantarios is stated to have died of natural causes in-game, but everyone knows the Emperor had him assassinated (the game lacks a civil war mechanic).
* I Am Skantarios: The Byzantines fights these in their wars, and eventually gets a herd of their own.
* "I Am" Song brags about his prowess in battle and spiritual purity. Everyone at court finds him intolerable until the joust when he proceeds to do everything he says he can, up to and including bringing a man he (accidentally) killed back to life.
* "I Am" Song in "The Weirdo" is animated very crudely, with the scribbly crayon-esque animation constantly shifting. The art was actually done by a kindergarten class!
* "I Am" Song is all about this. He chides schools for wanting to break his shallow, go-with-the-flow attitude about life.
* "I Am" Song: "Mi chiamano Mimì", "Io son l'umile ancella", "Largo al factotum della città" among others...
* "I am sorry. If it's any consolation, this likely won't hurt much.", or some other seriously dangerous character.
* I Am Spartacus. The hero's allies all start claiming to be him in order to protect him.
* I Am Spartacus: When the villain comes looking for the hero, everyone else claims to be the hero to protect their savior.
* I Am Spock, Mr. Spock's reaction to the title is to ask Nimoy "To indulge in a human colloquialism: Have you lost your small glass gaming spheres?"
* I Am Suicide is completely naked for the entire story. And he's just as terrifying and effective as when he's in costume.
* I Am Suicide is naked for... some reason. And spends a lot of time well inside

Batman's personal space.
* "I am Surrounded By Incompetence", by You've Got Foetus on Your Breath.
* I Am the Cheese uses "The Farmer in the Dell". The song's last stanzas has a rat taking the cheese, and then the cheese stands alone. As one might guess from the title of the book, the cheese refers to the protagonist.
* I Am the Cheese, while the latter's enters the program at about the same age.
* I Am the Doctor: The Unauthorised Diaries of a Time Lord, fitting firmly into the "loose retelling" category.
* I am the Evil Lord of an Intergalactic Empire then their victims will just summarily hunt them down and kill them, or hire someone to do it for them.
* "I am the God of Hell fire and I bring you..." (No, not the pizza. Guess again.)
* "I am The Great Mighty Poo / And I'm going to throw my shit at you..."
* I am the law authorized to make law on the spot to achieve the government's goals, he's very uncomfortable about it. The idea of the law being consistent and not playing favorites is very important to him, after all.
* I Am the Messenger by Marcus Zusak, when the main character, Ed, meets the person behind everything that's happened to him, it's strongly hinted that this person is in fact the author. He leaves behind a folder that turns out to contain the book's manuscript.
* "I am the nicest person in the world. And if there is ever anyone nicer than me, I'll kill them and will be the nicest one once again."
* "I Am the Night", Batman messes up a stakeout and Commissioner Gordon is shot as a result. In the wake of this, he goes into a deep, irrational depression and nearly gives up the cape and cowl, even when he hears that the gangster has broken out of jail and plans to finish the job. It is only when Robin tries to save Gordon on his own does he finally snap out of it.
* I Am the Night, Batman reads in the newspaper that the Penguin avoided a guilty verdict through some unidentified technicality, and wonders if his crime-fighting makes any difference in the long run.
* I am the Night - Color Me Black", Jagger is publicly executed at 9:30 pm on May 25, 1964.
* I am the Night - Color Me Black", Jagger killed a racist man in self-defense, which the presence of powder burns on the victim's body indicated. However, a committee of townspeople convinced Sheriff Koch to ignore this evidence. Koch did so as he wanted to be re-elected sheriff. Jagger was therefore convicted of murder and is executed on the morning of May 25, 1964.
* I am the Night - Color Me Black on May 25, 1964. The last person to be publicly executed in the United States was Rainey Bethea in Owensboro, Kentucky on August 14, 1936.
* I Am the Night, while Jay Singletary is sneaking around a morgue trying to get a photograph of a famous murder victim, he is almost caught by an orderly who walks right by too wrapped up in a conversation about the smell of his mama's sweet potato pie to see him.
* "I AM THE PRETTIEST FROG IN THE POND" — said by Tarvek while delirious (and green) from Hogfarb's Resplendent Immolation.
* I Am the Pretty Thing That Lives in the House: Lily is scared to death by the haunting, and her spirit ends up haunting the house.
* "I Am... The Story is Over". It's followed by Never Turn Back, possibly the best piece in the game.
* I am the terror that flaps in the night! I am the (Noun) that (Verb)s your (Noun)!" ...More often than not, tripping or otherwise spoiling the drama on the word "Duck".
* I am the terror that flaps in the night!" The nouns and verb were usually relevant to the current situation.
* I am the very model of a modern major general, I've information vegetable, animal and mineral.
* "I am the Wendigo" is told from the perspective of a once-human wendigo on the hunt.
* "I am tired of being used, hurt and cast aside. It is my turn to use. My turn to

hurt." —
* I Am Very British: The stereotype that all non-Cockney British people speak posh
* I Am Very BritishWhere all or most British characters speak with posh accents.
* I Am War: Celestia begs Excolotis, the god of war, for help because as a peaceful goddess she doesn't know how to lead an army let alone train one.
* I Am Weasel also has IR Baboon, who often has attention drawn to his big red butt. Among other things, it killed the dinosaurs.
* I Am Weasel and one of the things their director makes them to do is have this reaction to mundane objects. ie. "Oh look, an egg" * Eyes pop out of sockets*
* I Am Weasel at a party wearing not only a latex mask but also a latex bodysuit and dress. He did this as he is an undercover vampire hunter who was tracking down vampire Weasel and vampire Baboon to kill them.
* I Am Weasel: "A Troo Storee" has a scene where several monkeys with typewriters are trying to write a novel. Weasel manages to insult them by offering to pay them in bananas, and only I.R. Baboon is left to finish the book.
* I Am Weasel, Baboon managed to dig all the way to the other side of the world by overuse of a ridiculous "musical instrument" obviously inspired by theremins, but much worse sounding. Apparently, the wavelengths of said thing triggered St. Andreas' Fault, causing him to fall all the way to China.
* I Am Weasel: Baboon's hand becomes magical and he makes wishes with his hand. Near the end, Weasel gets fed up with the wishes he makes, he wishes Baboon to shut up and, before Baboon can make another wish, his mouth disappears.
* I Am Weasel, before realizing that it's actually his own toothbrush.
* I Am Weasel episode "I Am Deity", the miniature weasels and baboons breed, which results in waboons and babeasels.
* I Am Weasel episode, "I.M. Bush Pilot." After delivering hundreds of babies in midflight, the sudden additional passengers weigh the plane down, causing Weasel to lose altitude, so Baboon works to lighten the plane; he throws out Red Guy (who was the stewardess), various crates of cargo, a two-ton man named Tom, and even tries chopping the tail of the plane off. In the end, however, Weasel manages to make an emergency landing in the very lake he was flying his passengers to.
* I Am Weasel episode "Law of Gravity", I.R. Baboon burns up the paper documenting the law of gravity, which results in gravity being destroyed. Because lawyers are the only ones who understand the law, they are the only ones affected by the loss of gravity. I.M. Weasel reprimands I.R. for causing all the lawyers on Earth to float away, to which I.R. responds by inquiring why this is a bad thing.
* I Am Weasel episode "My Friend, the Smart Banana", Weasel and the banana have an intellectual discussion and conclude that if you travel faster than the speed of light, you become your own grandmother.
* I Am Weasel episode "The Fairy Godfather", there is a Princess Charming.
* I Am Weasel episode "The Magnificent Motorbikini", the titular vehicle travels faster than the speed of light and eventually propels Weasel and Baboon into another dimension.
* I Am Weasel episode "Time Weasel", Baboon goes back in time to change history and become king, only to trigger the extinction of the dinosaurs and the invention of onion rings. As a result, Weasel sees this as Baboon's destiny to correct history and praises him as a hero.
* I Am Weasel episode "Time Weasel, I.R. Baboon refers to dinosaurs as "big chickens". It is now scientific consensus that birds are not just descended from dinosaurs but dinosaurs themselves.
* I Am Weasel. Eventually, Weasel runs out of paper and has to use Baboon's log.
* I Am Weasel featured the Red Guy hosting the "Sackless Games" with Weasel and Baboon as contestants. In the end, Weasel realizes the whole event was a scam and that the Red Guy committed fraud. When the Red Guy asks "Is that a crime?" (his catchphrase), Weasel replies "Why, yes it is." The police arrive just seconds later to arrest the Red Guy.
* I Am Weasel gets Weasel and Baboon stranded on a different dimention, and then some creatures appear as hams, saying that they wouldn't be able to undertand their true forms. Doesn't stop Baboon from trying to eat one of them, who had to hit him

to stop, and explain their tongues couldn't understand their true taste.
* I Am Weasel gets Weasel out of her TV by fishing him out of the top of the TV rather than the tube.
* I Am Weasel grade they hadn't finished. It was revealed the Red Guy was the typist.
* I Am Weasel had the story of how I.M. Weasel and I.R. Babboon got their start as a small-time country singer and comedian, respectively (which they never were portrayed as in any previous episode). It was voiced over by an unseen narrator with a smooth, fairly deep voice with a hint of a Southern accent. At the end of the story, the voice abruptly changes to that of Jolly Roger, and it's revealed he was the narrator and made the whole story up.
* I Am Weasel. In "I, Architect," an accident results in both Weasel and Baboon having their skulls cracked open and their brains falling out. Because Weasel's brain is so massive and Baboon's is so tiny, the surgeons place the smaller brain into Weasel's smaller head and the large brain into Baboon's larger head. As a result, Baboon (in Weasel's body) starts making all sorts of chaotic changes to the city, whereas Weasel (in Baboon's body) has to move up from the bottom of society in order to stop Baboon's nonsense.
* I Am Weasel inside them and gives ridiculously long sentences for them, culminating with 6 years.
* I Am Weasel. In the series, he is also referred as "I.B. Red Guy", an allusion to I.M. Weasel's and I.R. Baboon's names.
* I Am Weasel I.R. Baboon have their brains switched. The now deranged "I.R. Weasel" uses I.M. Weasel's influence to mess up the world (thinking that he's making it better). The now level-headed "I.M. Baboon" convinced him, however, to go on forced retirement before he could do more damage.
* I Am Weasel. Ocular gushers come from a disease that keeps the person constantly crying like this. Weasel cures the disease, but this has the side effect of drying up all the rivers and oceans, so he purposefully gives himself the disease to keep a constant supply of water up.
* I Am Weasel, reminding himself not to go around with dynamite in his pockets.
* I Am Weasel reprising her role. Her dialogue was cut from the final episode so although Betty appears, she doesn't speak.
* I Am Weasel short "I Architect". Owing to a surgical mishap, Weasel and Baboon's brains are switched. Michael Dorn (Baboon-in-Weasel) imitates Charlie Adler's goofy way of speaking, while Adler (Weasel-in-Baboon) speaks with Dorn's dry precision. The effect is pretty hilarious.
* I Am Weasel short, Weasel and Baboon are demoted, due to Baboon's incompetence, to "boot camp". In this case, "boot camp" consisted of the Red Guy and the kitten that they were trying to save wearing boots and repeatedly kicking them in the butt.
* I Am Weasel showing up behind him, alongside Santa Claus, the Abominable Snowman, the Easter Bunny, the Tooth Fairy and a UFO.
* I Am Weasel, "This Bridge Not Weasel Bridge": Baboon freaks out reading a newspaper proclaiming Weasel to be responsible for the bridge, because Baboon was the one who finished all of the construction.
* I Am Weasel, titled "Fred, The Last Idiot", Weasel finds a specimen of feral humans thought extinct, named Fred. Unfortunately, Fred can only communicate in unintelligible gibberish, but Baboon reveals that he's fluent in it, and says Fred is speaking "Idiot".
* I Am Weasel turns down a mission of being the first astronaut on the sun. So, naturally, I.R. Baboon volunteers.
* I Am Weasel underachiever who constantly tries upstaging Weasel, who, even knowing this, considers him a friend and even goes out of his way to save his bacon.
* I Am Weasel, Weasel's driving a convertible with a hot blonde. But he passes a road sign that reads "LOGO". He leaps out of the car in the direction the sign indicates and jumps into the logo for the show.
* I Am Weasel which sometimes makes things worse for the world rather than better.

* I Am What I Am: A character learns to accept a part of their identity they previously rejected.
* I Am Who?: The protagonist discovers their heroic destiny which had been kept secret from them.
* I Am X, Son of Y, but it's supposed to be very rare for the to earn sobriquets. Sobriquets do get passed down family lines, but only upon death and only to one descendant (there's only ever one Hellscream or Doomhammer at a time), and it's possible for an orc who inherited their sobriquet to earn a different one. Still, the majority of them fall under this trope; even one of their most iconic heroes, Thrall, hasn't been given a sobriquet.
* I Am X, Son of Y: Shouting out your name and one or both of your parents' names to boast.
* I, an Actress (1977) is a ten-minute improvised short film that was done in one take.
* Ian and Geoff flee at the first opportunity anyway since Ian believes Tarquin's the kind of guy who would hunt down his enemies, pardons be damned.
* Ian Anthony Dale (American actor born to a father of French/English descent and a Japanese mother who immigrated to the United States from Kobe, Japan)
* Ian "Beefy" Botham combined playing first-class cricket in the summer with a winter job playing professional football for Scunthorpe United. He only gave up football because the winter season is when the English national cricket team tours abroad against other first-class national sides. Botham became England team captain. Playing football for a lower-division side didn't cut it by comparison.
* Ian Brady and Myra Hindley, the "Moors murderers" who killed five children, four of whom were also sexually assaulted, in and around Manchester between 1963 and '65.
* Ian can send out high-pressure beams of feces from his hands. Extremely gross, but actually a very effective weapon.
* Ian Curtis' lover and founder of Factory Benelux, Annik Honoré, died in 2014 of cancer at 56.
* I and II also had the Enchanter and Ogre who will show up randomly on certain screens and kill you if they get too close.
* Ian Douglas, Alexander explains to his new lover that, when dolphins have sex, there is a frequently a third dolphin helping "push", hence the name.
* Ian Douglas from Earth and genetically modified them, possibly using them as labor to build the Face. An unexplained disaster then caused the deaths of both the Builders and the transplanted hominids.
* Ian Douglas is extreme redundancy, which also makes their ships so tough. They don't understand why humans bother having specialized ships.
* Ian Douglas series is between the US and the UN (European-dominated) over the discovery of human remains in alien ruins on Mars. Despite the archaeological mission being funded and run by the US, the UN insists on attaching observers with a military escort. The observers than immediately want to hide the discovery until proper decisions can be made at the highest level. Meanwhile, the American archaeologists believe that a discovery of such magnitude must be revealed to the public. The different philosophies (common good vs. individual achievement) come into sharp conflict here, eventually resulting in a war with, of course, the US Marines coming out on top.
* Ian Douglas. The differences are showcased, such as the lack of cover in space, the need to fire your weapon at your center mass in order to avoid to spin wildly out of control, and the fact that even a tiny hit can be fatal due to the vacuum outside the suit.
* Ian Douglas. The ones who are running an empire are the Sh'darr version of the Luddites. This may have a grain of truth in it, as at least one alien mentions the Sh'darr Remnant, meaning something like this may indeed have happened.
* Ian Douglas. There is also a lot of pressure on the US to give up its Southwest for a new Latino nation called Aztlan. When the Americans understandably refuse, they're accused of being selfish and refusing to integrate with the world.
* Ian Douglas, the USMC has these. They start out as glorified spacesuits and end

up being a combination starfighter/power armor/drop pod with enough features to make the Mjolnir VI look like a Model T.
* Ian Douglas. Unfortunately for them, the current tendency in the world is the opposite — splitting countries into smaller political entities. Interestingly, one of the reasons for the US-UN war is the attempt by the UN to force just such a thing in the US with the creation of Aztlan from the Southwestern (i.e. Hispanic-dominated) states.
* Ian Doyle", revolves around a Senate enquiry into the events surrounding his killing.
* Ian Dury and The Blockheads: (Honorary) Blockheads, although fans often come up with their own nick names. Harold Turkeypants (from Arnold Chickenshorts) is another.
* Ian Dury was accused of mocking the disabled with a song called "Spasticus Autisticus" by several disabled rights groups. Dury was himself disabled (partially paralyzed due to childhood polio) and recorded the song as a combative response to requests that he get involved with the International Year of Disabled Persons in 1981, which he considered to be patronizing in its whole approach to the subject. In 2012, the song got a prominent place in the opening ceremony of the London Paralympics.
* I and You: Anthony's poster presentation for his project is so awful that when Caroline sees it she feels compelled to help out of sheer pity. Only partly explained by the fact that he put it off until the last minute, and the fact that Anthony realized halfway through that he might be colorblind.
* I and You: At the end of the play Anthony reveals that none of the play has physically happened. He was the boy discussed earlier who died while playing basketball, and his liver is a match for Caroline, who needed a transplant. She's been unconscious as it was transferred to her, and this was Anthony's final effort to both meet and say goodbye to her as he wasn't able to in life. The play ends with her waking up in the hospital.
* I and You: Caroline hates how gently people treat her due to her probably-terminal illness, saying that it's fake kindness rather than people actually getting to know her and really care about her. At several points in the play, she orders Anthony to leave when she thinks he's being nice to her out of pity.
* I and You: Caroline's parents are separating due to the stress her illness put on their marriage, and she hasn't seen or heard from her dad in months. She's fairly bitter about it, though mostly because she can see how much her mom misses him.
* I and You: One of the main twists in the play is that Anthony is a ghost, having died earlier that day during his basketball game. The other main character, Caroline, is alseep, and he's visiting her in her dreams.
* I and You: The characters discuss the trauma of witnessing the death of a boy at Anthony's basketball game at several points, and try to process their own feelings about life if someone so young and seemingly healthy could die so suddenly.
* Ian expresses pride in Haley's subtlety — while refusing to believe that Roy is really the leader. Later, however, he sends her off on the actual quest with an injunction to make her mother proud of her, and when she asks what will happen to him, to make him proud of her too — with obvious confidence that she will do so.
* Ian Fleming a connoisseur of such gourmet meals. One of his friends is quoted admitting to repeatedly telling him, "Ian, it tastes like armpits!"
* Ian Fleming and while the Allies would keep him their prisoner for the rest of his life, the British government found him a big bother dealing with for their foreign policy and propaganda messaging.
* Ian Fleming), Bond shoots Kristatos as he's making his getaway after his operation is destroyed... with the Lancia's wheels in the road ruts guiding it and his dead foot on the gas pedal, the car hurtles out of sight into the distance.
* Ian Fleming) both had backgrounds in intelligence. Fleming also worked in stockbroking and journalism.
* Ian Fleming films at some point during the last 50 years. And even for the people who haven't read the books or seen the films, "James Bond" is still synonymous with

"sexy British spy who wears a tuxedo and sleeps with countless beautiful women".
* Ian Fleming gives him an obsession with a race of perfect physical specimens, but eliminates all specific reference to Germany or the NSDAP).
* Ian Fleming has just been fired by his only client for being an irresponsible
* Ian Fleming" in which Bond is nearly killed by a man whom he spared.
* Ian Fleming): No sentence is complete without at least one "buster", "buddy" or "...see?"
* Ian Fleming, on several occasions, devotes ink to Bond brooding over the fact he's had to kill someone, and in the short story "The Living Daylights", Bond puts his career in jeopardy to avoid doing so. It should be noted that the 007 of the novels kills far less frequently than his cinematic counterpart; indeed, there are a number of Bond stories by Fleming in which he kills no one.
* Ian Fleming or his UNICEF work, it's somehow fairly detailed for a man reaching his eighties!
* Ian Fleming stories from ca. 1959 reference the anti-Batista forces in revolutionary Cuba with some sympathy, which wouldn't be the case a year or so later.
* Ian Fleming to set him up, failing to enter the Royal Military College due to a case of gonorrhea and not doing well enough on the Foreign Office entry exam to become a diplomat. Family pressure pushed him into banking, which he was also unsuccessful at, but journalism ended up finally inciting his passion for writing and led to a job with Naval Intelligence. As long as he had something that interested him, he was brilliant.
* Ian Fleming, US drug runners, Cuba's secret police and freelance. In both the novel and the film, he is depicted as what Bond could have become if he did not have a strong moral center.
* Ian Fleming (while the code is American), and the terrorists attempt to portray it as an accident, that is, a "Broken Arrow" situation, instead of "Empty Quiver".
* Ian Flynn, a personal webcomic, two secret projects, several mini-series and recording his own podcast. He feels like it was a slow year.
* Ian Flynn (including quite a few original characters who are mostly loved by fans), displaying an incredible understanding of the source material. It's not hard to find people who can remark that the Mega Man comics are some of the best-written comics they've ever read in recent years. Unfortunately, Archie's financial troubles mean that we won't see more of this anytime soon, as far as we know.
* Ian Flynn that Shadow was doing it for Maria. Unfortunately, this made just as little sense, since Maria's wish for Shadow was to give people a chance to be happy; Maria's words would really have to be contorted to justify Shadow's actions.
* Ian helps Jeremy breathe and exchanges liquid medicine via mouth-to-mouth after Jeremy's drowning
* Ian Hendry). The show became a big hit when Blackman joined, then a full-blown craze when Rigg took over. No-one really remembers Hendry (not helped by only one of his episodes still existing).
* Ian "H" Watkins had recently been convicted of child molestation and possession of pornography.
* Ian James Corlett (Goku #1, Master Roshi #2), Terry Klassen (Krillin, Guldo, Master Roshi #5), and Michael Donovan (Master Roshi #1).
* Ian James Corlett, Goku's Ocean dub voice (which Schemmel's voice is an adaptation, impersonation, and refinement, of).
* Ian Levine is also well known amongst fandom. As well as his efforts to locate missing stories, he also briefly worked on the show as an unofficial fan continuity advisor.
* Ian MacKaye and titled "Stick". Connelly would say of the experience that "it was an honor to be erased by Ian".
* Ian Marter — as Marter had died in the meantime the novelisation was a collaboration between Baker and Whoniverse writer James Goss.
* Ian Mcdiarmid gives a relatively subdued performance as Palpatine. But once the charades are dropped in episode 3, and the Jedi know he's a Sith lord, it's time to wolf down the scenery like there's no tomorrow. This is the real reason most of the

movie was CGI: he devoured all the sets!
* Ian McDiarmid, who played him, has said that Palpatine's only redeeming feature is that he is a patron of the arts, particularly weird alien operas.
* Ian McDonald, an anthology set in the same universe, India has broken up into seven different nations.
* Ian McDonald and Cyberpunk with the non-city areas being Desert Punk and the cities being a mix of Diesel and Cyber.
* Ian McDonald becomes a psychotic, sadistic warlord. At one point, it's mentioned: "She was busy shaving her head."
* Ian McDonald the non-urban areas of Mars are very much like the Old West.
* Ian McDonald there is a cybernetic cult. They get pretty disturbing...
* Ian McDonald, which has human characters being considered fully mature adults and going off into the world at the age of ten. Ten Martian years, which is a tad over 18 earth years.
* Ian McKellen, a clause that would forbid local authorities in Great Britain from "promoting homosexuality." The bill passed with Section 28 intact, but the clause was fully repealed in 2003.
* Ian McKellen begins with a commando attack on the King's headquarters led by Richard of Gloucester, prefaced by an anachronistic Soviet tank crashing through the wall.
* Ian McKellen. He played the title character in 1966 and Mr. Creakle in 1999.
* Ian McKellen" his reply was "Call me Gandalf". (helps that he discourages being called "Sir Ian")
* Ian McKellen. Magneto, both young and old, has a deep voice and has consistently proven himself as one of the most badass characters in the series.
* Ian McKellen (Saruman) it is painfully obvious that the actors are not actually watching the film and the commentary from them is simply spliced bits from interviews.
* Ian McKellen (the same reason Sarah Harding agreed to her guest spots).
* Ian McKellen updates the setting to a quasi-fascist alternate 1930s Britain, and all of the characters smoke accordingly. Richard himself prefers Abdulla herbal cigarettes, and even though they were no longer being made in 1995, the production crew was able to track down the six remaining packets and buy one for the movie.
* Ian McKellen video games (before the cast became contractually obliged to participate); despite the silliness of the job ("You have to say [things] like 'over here, Hobbits! Over here, Legolas!'"), he mentioned that he made more money off the games than the films themselves.
* Ian McKellen was cast because he's one of the finest actors on the planet.
* Ian McKellen were classmates in their youth and each had a crush on the other. They would not admit this until many years later.
* Ian McShane, who plays Anansi, is also credited as a consultant producer in Season 2.
* Ian Peek from the episode "Sneak Peek" gets his hands on an experimental belt that allows him to pass through walls. Repeated use renders the belt unnecessary, but unfortunately for Ian, without the belt he's not up to the task of regulating when and what he passes through.
* Ian Quinn for the Centipede Group, as the man responsible for creating a number of supervillains with the tech his company gets its hands on.
* Ian Quinn presents himself as a champion of free business and small government but is actually a textbook
* Ian Rankin has done the charity auction version numerous times, and one time had a prank pulled on him. The winner gave his name as Peacock Johnson and asked for his mate "Wee Evil Bob" to be included as well. Rankin enjoyed writing about Elvis-lookalike
* Ian Samson, a novice witch turns her more experienced sister into a dress and wears her for a day, not realizing that the spell she used has no way to preserve her mind, which fades until ultimately dying in the wash, leaving her crying over an ordinary dress.
* Ian's Eyes: Since the game is set in a school, a large number of the zombies are

children.
* Ian's Eyes: There is a secret passage in the library that Ian and North can open. To do this, they need to push the right letters in the right order.
* Ian's Miss-Hugs-A-Lot teddy bear, which he treats like his girlfriend. She has been seen in several episodes of the series, and even made a live-action appearance in the
* Ian's nickname is Smolderhalder or Smoldeypants. His fan base is known as Somerholics.
* Ian Stevenson, Jim Tucker and others were able to link spontaneous "past life memories" of little children to real people who died, usually violently. The strongest cases even had birthmarks corresponding with a fatal wound verified by autopsy records. Some argue this is proof this trope applies to humans, although fraud, false memories, coincidences and other mundane explanations are
* Ian, the second prince, is engaged to Selena Berg. However, because Ian wants to maintain some level of propriety between them, he refuses to be openly affectionate towards Selena. This makes the nobles, in general, see them as very distant, and Selena, because of her self-image, thought Ian didn't love her, despite
* Ianto kept a Cyberman in the Hub's basement (directly endangering the world) and disobeyed orders to shoot her. But he still manages to stay on the team.
* Ianto seems to be getting in on the action (in multiple senses of the word) more in the second season. And by the third, he spends more time by
* Ianto, unlike Gwen, couldn't keep it in subtext. He bites the dust in the
* Ian Watson's story "The Great Atlantic Swimming Race" (swimming past the whole Atlantic Ocean) has a satirical bent.
* Iapetus. You gotta wonder. Then again, most just compare it to a walnut, and call it a day.
* I Approved This Message: Came into being following the passage of the Bipartisan Campaign Reform Act of 2002.
* I Approved This Message: Parodies of political advertisements and their messages of approval.
* I, Arne Næss, a comic book telling the life of the eponymous Norwegian philosopher, made for his ninetieth birthday, has one. Næss was an eager mountaineer, and often took his nephew with him. One sequence shows the two of them arguing about climbing further up or going down. Næss, being somewhat of a trickster, gets his way by tossing a coin (heads or tails) and losing it on purpose down the mountain. Thus, he just says, "Ouch, now we have to go down to find it..." His nephew, who was the one who argued for climbing upwards, is then shown banging his head against the mountainside in sheer frustration.
* Iarnrod Eireann had a "We're aware we suck and we're actively working on the suck problem"-type campaign with their slogan, "Getting there". Very similar to British Rail's 1980s slogan "We're getting there".
* IA shows up in the form of Lt. Holliwell shows up when a case touches on Detective Esposito's old partner, who it transpires faked his own death under suspicion of corruption, with significant evidence pointing to him being the murderer of the week. Although none of the detectives are exactly
* I as in Icarus has a safe-breaker explaining that it only works on safes whose code is never changed: It's the wear that makes the "right" position sound a little different.
* I asked my fairy godmother for a world cruise on a luxury ocean liner, but all she gave me was a ride on the Hudson River ferry.
* Iason and the fact Iason has forcibly made Riki his slave. Although Iason occasionally shows Riki affection despite how much he oppresses Riki in order to control him.
* Iason Mink himself is one of these, and like Guy, he becomes extremely obsessed with Riki. It's not touched upon in the OVA, but the novel and audio drama have scenes where Riki sleeps with a female pet and is subsequently brutally tortured by Iason for "betraying" him.
* Iason Mink is incredibly cruel but he is also incredibly irresistible.
* I Ate WHAT?!: A character eats or drinks something that isn't food, having

mistaken it for food.
* I Ate WHAT?!: Someone eats an unpleasant substance and is grossed out after realizing what it was.
* I Ate WHAT?!: Someone eats something unpleasant and is grossed out when they're told what it was that they ate.
* IA tries to pin a murder and numerous robberies on Frank with no real evidence. The death was a clear case of self-defense and Frank had nothing to do with the robberies. His union lawyer is so incompetent that he actually let's them get away with making the accusations and thinks that Frank should plead guilty.
* Ibáñez rarely did this during the Silver Age (early '80s). It wasn't until the 90s (let's be generous and say late 80s) that
* I Banged Your Mom: Getting a rise out of someone by claiming to have slept with their mother.
* I Banged Your Mom: I piss you off by claiming I had sex with your mother!
* I Banged Your Mom: Mothers, tending to be viewed as "Madonnas", implying that they enjoy sex puts them in the "Whore" category in the minds of some men, which they find deeply insulting.
* Ib: At the end of each run, the game prompts you to save, before starting the game over; reloading that same slot allows you to play and attain each ending on a loop, as well as learn the names of art exhibits and access the True Exhibit. These save files display the protagonists' face sprites with a small orange cross in the corner.
* Ib Chandra Nalaar's home plane the use of fire magic is punishable by death.
* iBeat the Heat (again, with distorted vocal effects) when Sabrina blindly tramples on her model of an Utopian City ala Godzilla.
* I Became a Dog: After beating the game, you can play it again from the start, but you retain your language level and collect more bugs after farting.
* I Became a Dog: Hints can be unlocked and skills can be charged for watching an ad or buying Premium mode.
* I Became the Demon Lord so I Created a Dungeon and Spend Heartwarming Time There with Non-Human Girls
* I Became the Demon Lord so I Created a Dungeon and Spend Heartwarming Time There with Non-Human Girls, the general consensus among everyone, including other Demon Lords, is that Demon Lords are haughty, vicious, and vile beings who all commit atrocity purely for their own amusement. Yuki is the very, very rare exception because he's a reincarnated Earth human, and prefers to live quietly, at peace.
* I Become Shadow: Ren can fight with many weapons, but her favorite is daggers. She has a pair of trench knives that she's very fond of.
* I Believe by Blessid Union Of Souls is about the hope for love in the world and everyone being seen as people, not different colors
* I Believe I Can Fly: Icarus, Pegasus, Harpies, Sirens, Hermes and Perseus with winged sandals...
* I Believe I Can Fly is about feeling like he can fly after falling in love, the trope is about the actual power to fly.
* iBelieve in Bigfoot, Carly backs off and holds close onto Freddie's arm when the gang encounters the alleged "Big Foot."
* iBelieve In Bigfoot where the gang and some other guys are left stranded when their RV gets stolen... by the said Bigfoot they were trying to find.
* "I Believe In Harvey Dent" campaign trucks handing out flyers, t-shirts et al.
* I believe in nothing but my own strength. What most people leave out is that the conversation is between two vikings. And that the episode ends a pagan idol mysteriously letting go of a magic ring so it can be passed to the non-believer to give him protection.
* "I believe that we will win!" The next year, said student was in the Academy proper, and taught it to a Navy cheerleader, who led the 4,000-strong Brigade of Midshipmen at the annual Army–Navy football game. It's been a standard rallying cry for Navy sports ever since, and thanks to the Army–Navy Game being nationally televised, it has since spread to several other colleges, and most notably got picked up by fans of the US men's national soccer team (see below).

* "I believe what you have there is the authentic smell of sanctity."
* I Belong to the Baddest Girl at School, but will not let the "sadist" part stand:
* I Belong to the Baddest Girl at School it's one-sided; Toramaru is smitten with him to the point that she believes they're already a couple.
* I Belong to the Baddest Girl at School Matsuri's best friend, who is the only one who realises what's going on.
* I Belong to the Baddest Girl at School: Toramaru's terrible love confession starts off the series. What she thought was a romantic declaration sounded like her demanding Unoki be her slave forever.
* Iben and his wife. The latter's a huldra, who by the divine law can only bind herself to a human. He, in turn, is an immortal, so the two can only spend together one, maybe two days before she has to leave him for months.
* I Bet You Will: One challenge has a man ask strangers to for wedgies and get paid a fixed amount per wedgie.
* I Bet You Will (reality show dare on MTV) uses "I Bet You Will" paint, etc.
* Ib, Garry gets separated from the girls by large vines suddenly springing up from the ground. Ib and Mary press forward to try to find something to take care of the vines...only for a statue to block their way back to Garry. Garry finds another way out after he realizes they aren't coming back, and you spend the next section of the game switching back and forth between playing as Ib and playing as Garry.
* Ib, Garry somehow manages to get a little blue doll to fall for him. The doll follows him around and leaves him messages asking if they can play. Garry is terrified of the thing, and for good reason.
* Ib has the titular Ib, a nine year old girl, and Garry, who seems to be a young adult. The two become good friends due to having to work together to survive being in a really strange art gallery.
* Ibiki Morino, the head interrogator in the Konoha Intelligence Corps was subjected to nightmarish torture when he was captured on a mission.
* I Binder: An entire hidden culture of human traffickers actively convert humans into ponies and cattle. They live in hidden enclaves taking the disguise of backward towns and capture any wayward traveler that comes rolling. They are very selective, only targeting those that they deem possess "the soul of a pony". Or those stupid enough to be fooled by promises of sex and remove their clothes and leave themselves helpless to their captors. Once they are at their most vulnerable they hogtie them and ship them to a ranch for training.
* Ibitsu: The Strange Lolita's solution to the fact that Kazuki already has a younger sister is to personally make sure that Hikari is taken out of Kazuki's life... permanently.
* Ibiza affair, Austrian politician Heinz-Christian Strache met with a woman he was told was a Russian oligarch's niece and offered her political favors in return for money. The meeting was actually a sting operation, and the Russian woman was purportedly played by a Bosnian agricultural student.
* Iblis has powerful mental powers but was knocked out by a single punch to the gut from Kyle.
* Iblis (Satan) from Islam fell from grace by looking down on humanity and seeing them as inferior to bow to.
* IBM coined "Hexadecimal" from the Greek prefix for six, to avoid "Sexadecimal". However, the term now invites connotations of witchcraft, based on the English "hex" and the German "die Hexe".
* Ib, minds and (in Mary's case) a palette knife to counter the malevolent monsters in the Gallery World.
* IBM manuals are infamous for pages stating "This page intentionally left blank". Similar to the other examples described here, this was done to keep page numbers consistent for cross-referencing even if information was added or removed.
* IBM (now Lenovo) ThinkPad keyboards, as well as the Rapid Access keyboards, have an annoying Back key above the left arrow, and forward key above the right arrow. Imagine: You are playing a game on the Internet and want to hit the left arrow key. You accidentally hit the back key. Damn. Now you have to start all over. Even experienced ThinkPad users get caught out by this one. The way to prevent this is

to open the game in a new tab or window.
* IBM PCjr, but by the time it reached the market the PCjr had become an Edsel-class fiasco. The Tandy 1000 succeeded where the PCjr failed, and later PC clones that featured similar graphics and sound capabilities were commonly called "Tandy-compatible."
* IBM (personal computer): Not ubiquitous, but quite commonly used in early 1990s Poland. Not so much today. Everyone else used "PC", which persists until today, and is an example itself.
* IBM's "Watson" system. He actually sounds less roboty than Stephen Hawking's synthesizer. It still uses the "string pre-read phonemes together" method. It sounds a bit like the
* IBM used to run adverts for servers and other such expensive technological arcana that the vast majority of the population would never want, understand or need. That said, many small-to-medium-sized business owners
* IBN Lok Mat (IBN People's Bulletin) - Marathi news service, operates mostly in Maharashtra.
* ibogaine. She later remarked to Nikita that the possible future scared the hell out of her.
* Ibold Train's "A Song About You", The Arena Drive's "The Fall", and Self's "Paint By Numbers" (often also
* iBook (though Apple rebranded their notebook line as "MacBook" after switching to Intel processors in 2006)
* I, both of which are beautiful women who's lower bodies are giant insects (spider and scorpion respectively) with giant, toothy maws where their crotches would be.
* iBOT wheelchair can balance on two wheels to raise its user up higher and it can even climb stairs.
* I Bought a Vampire Motorcycle has a demonically-possessed predatory motorbike fueled by human blood.
* I Bought a Vampire Motorcycle in that the title motorbike is actually a demon-possessed Norton Commando, but still awesome.
* I Bought a Vampire Motorcycle that, after spectacular supernatural phenomena of both dark and light varieties, ends up failing.
* I Bought a Vampire Motorcycle, the demon-possessed killer motorbike's headlight glows red when it's active.
* I Bought a Vampire Motorcycle, the demon-possessed motorcycle cuts a priest's fingers off with its brake lever, when he touches it incautiously.
* I Bought a Vampire Motorcycle, the protagonist Noddy has a nightmare in which he is attacked by a talking turd with the face of his dead friend Buzzer.
* I Bought a Vampire Motorcycle, the removed fuel tank of the possessed bike, which Nobby replaced before he realised that it was evil, sucks down a bloodstained rag.
* iBoy, but he's able to hack into any network, operate cars, and even explode things.
* Ibram Gaunt also bears a multitude of scars from various injuries sustained in the line of duty. A particularly impressive scar runs across his stomach, which he received
* I Broke a Nail, with short-clipped nails that rarely if ever get broken. As a result, it took a long time for women to get across that broken nails hurt, and that is usually why they're crying. When nails break, they tend to take a bit of skin with them... a bit of skin that has a cluster of nerves within. Then there's bleeding and the risk of infection so while it's not life-threatening, it's still a legit nuisance. Nowadays, it's used more as a joke than anything.
* I Brought You My Bullets, You Brought Me Your Love is the twisty but understandable story of two lovers during a vampire invasion/attack.
* Ib. The only speech we get from her is when the player answers a question, and implied speech (for example, when she first meets Garry, he asks her name, pauses and then says "Ib... Ib you say").
* Ib, there are many rooms with windows, and one of them will break to allow an enemy to keep chasing you.
* Ib, the titular character enters the painting world through a painting titled

"Abyss of the Deep" and can leave it through another painting much later on.
* Ib This need eventually leads to her working against Garry so she can get out with Ib, and whether her wish is granted depends on which ending you get.
* Ibuki also has a battle with final boss Gill, who while massive in his own right at 6'10 isn't as tall as Abigail, but outweighs Ibuki by an entire 644 pounds, and no that massive weight difference isn't caused by Obesity. Those Psycho Lariats are going to hurt.
* Ibuki, a tiny lightweight weak but skilled female fighter who stands at 5'3 and weighs 101 pounds, but battled the massive 8 foot Abigail in the latter's story mode. The height difference is remarkable and he is taller than a fully standing Ibuki while crouching on his knees.
* Ibuki averts in her comic is shown that she would still be attractive in a more evil way if she stayed with the Geki clan rather than taken from them by her master Enjo when she was still an infant. She would have used more makeup among other techniques but still would have been a ruthless killer compared to the more natural girl who is cutesy and good she ended up becoming.
* Ibuki in the same game invokes this herself in her win quote against Kazuya Mishima from the opposite franchise "Taking it easy on me because I am a kid? Well don't forget I am also a ninja!". Though she herself gets a rather harsh one from the afore mentioned Guile in the previous game alluding to a famous "family man" quote telling her to "Go home and be a schoolgirl" and the battlefield isn't for someone like her.
* Ibuki is only involved because of Rolento and her ninja village elders (who are all male) made her go with Rolento. He can command her to do what he wants and also when they reach Pandora it is a victory only for him and his army and also an example of his wit and cunning while Ibuki's success is only relative to how well Rolento is doing.
* Ibuki Mioda is pretty cute as well, especially with her energetic nature and hilarious dialogue.
* Ibuki's aforementioned encounter with Sakura seems to have also developed into one of these, albeit largely off-screen. When Karin requests the kunoichi's services and brings Ibuki into the fold in
* IBUKI strong woman Hiroyo Matsumoto is just as likely to strike "sexy" poses as she is to flex and flaunt her muscles.
* I Burn, detailing how she's getting through her pain and becoming stronger for it.
* iBuzz Vibrator, although it's been renamed to the OhMyBod. Though apparently there's a two-vibrator version available now, and a Vibro Pod Digital Music Simulator... hmmmm. Wonder how many other versions are out there?
* Ib Weiss Guertena became one with his own creation and basically turned into a genius loci.
* Ib, which was the heart and worked like this trope's Heart, containing a person's mind, memories, and personality.
* I Call It "Vera"" was first named "Muckle Meg" in 1650 (or in the 16th century, if "Monce" counts as a name instead of an identification of origin).
* "I Call Your Name" was supposed to be in the film and the fourteenth song on the album, but was cut for sounding too similar to "You Can't Do That" (consensus amongst fans would be that it doesn't). This is why the UK LP only has 13 tracks. It was included on the American album
* "I came home from work early, and find my wife naked. I figured she was waiting for me to come home, so I take off my clothes, when suddenly I hear a noise at the balcony, and I see a naked guy hanging on for dear life. Then I understand my wife's cheating on me, so I start beating on his hands, and I was so angry that I ripped the refrigerator away from the wall and threw it at him, then lost my balance and fell over the side. And then I saw this light, and I was here." "OK, picture this: I'm hiding, butt-naked, in a refrigerator-"
* "I came in through the window last night/ now you're gone, gone." My Own Worst Enemy, Lit.
* I Can Change My Beloved: A character believes they can make their love interest a

better person; they're usually mistaken.
* I Can Explain. As such, a common subversion is for the character in question to deliver this line... then resignedly admit that no, actually they can't explain it.
* I Can Get It For You Wholesale, albeit while bribing her with a silver fox wrap.
* I Can Get It For You Wholesale, Harry Bogen convinces Meyer Bushkin that Apex Modes is making so much money that it needs to hide its earnings from the government, so they can set up a scheme where Apex Modes writes checks to a personal bank account, on which checks of equal amount are drawn. Harry makes sure Meyer's name is on all the checks, so that Harry isn't the one facing jail time when the company goes bankrupt.
* I Can Get It For You Wholesale, long paragraphs of Harry Bogen's first-person narration are devoted to his lecherous contemplation of Miss Marmelstein's figure.
* I Can Get It For You Wholesale spends the entire musical lying, cheating, betraying and embezzling his way to success.
* I Can Get It For You Wholesale, "The Sound of Money" has a rhythm part for ticker tape, as well as the obligatory cash register sound.
* I Can Live With That (Type 1): Willing to accept a negative situation.
* I Can Live With That (Type 2): Accepting that the situation isn't as bad as you thought.
* "I can name at least half a dozen jobs I can never have if I can't grow a beard or a mustache or at least dome decent stubble." The jobs Greg lists? Magician, pirate, lumberjack, artist, cop, and...criminal.
* I Can Never Go Home Anymore about a girl who runs away from home and breaks her mother's heart to be with a boy, who she forgets about almost immediately, while it's implied that her mother dies of loneliness in the meantime.
* I Cannot Self-Terminate: A suicidal person begs others to kill them because they can't do it themselves.
* I Cannot Self-Terminate: Someone wants to die, but doesn't have the means to off themselves, so the hero has to do it for them.
* "I can quote in elegiacs all the crimes of Heliogabalus" is well and good, but an elegy is very specifically a poem of
* I Can Rule Alone: One half of a Duumvirate decides to backstab the other half in order to take full power for themselves.
* I Can Rule Alone: One half of a group decides to backstab the other half in order to take full power for themselves.
* I Can See You: Someone gets a call, thinks the caller is far away, but then the caller reveals that they can see the call-ee, and it's creepy.
* I Can Still Fight!. He was given a Medal of Honor for his heroic efforts on the brink of death.
* I Can Still Fight!: Someone has serious injuries but insists they are nothing.
* I CAN SWING MY SWORD!. Which is really funny because he really is talking about a sword made of diamonds...
* "I can take care of myself!" — You are now the bad guy's next target, and it
* I Can't Believe a Guy Like You Would Notice Me: A character is surprised to learn that their crush actually loves them back.
* I Can't Believe I'm Saying This: I don't want to say this to you, but...you're right.
* I Can't Believe It's Not Butter! in the most over-the-top, sexy manner ever. He even recorded personalizable dialogue for a promo website, ramping up the ridiculousness.
* I Can't Believe It's Not Gambling), the "game" part of this lootbox simulator awards an actually substantial amount of the currency you need to buy more boxes.
* I Can't Believe It's Not Heroin!: Things that are not heroin that have the same effects when someone takes it.
* I Can't Believe it's not the Justice League, the Superbuddies are in Hell and meet their long-deceased friend and teammate Ice. Eventually it comes to pass that the group is simply allowed to leave, and they can even take Ice with them - as long as none of them look back to make sure she's still there. Ice was Fire's best

friend and the only person Guy Gardner ever truly loved - it was torture to not look. Ice says something just as they reach the end of the tunnel, and the two instinctively look back, causing her to disappear.
* I Can't Believe it's not the Justice League when Max Lord immediately demands to know what service they have.
* I Can't Dance: A character is required to dance but is embarrassed to and/or doesn't know how.
* I Can't Do This by Myself: A character tries to win their friends back on their side by admitting they can't do things alone.
* I Can't Do This by Myself: ...And you don't have to. There are people who can help.
* I) can temporarily reveal a designated area anywhere on the map. It can also detect cloaked or burrowed units.
* I Can't Feel My Legs: If someone's legs go numb, they're in serious danger.
* I can't hear you! (Repeats the first person's statement back verbatim)
* "I Can't Help It (If I'm Still in Love with You)," backed "Howlin' at the Moon."
* "I Can't Look!" Gesture: A character trying not to look at something horrible.
* I Can't Reach It: Characters refuse to do or 'can't' do something that is clearly within their means.
* I Can't Sing! on TV wasn't interested in paying West End ticket prices for a parody of something they could watch at home, while regular theatergoers were turned off by the self-promoting, lowbrow concept. To make matters much worse, the overconfident producers gave it a huge physical production and staged it in one of the largest theatres in town (the Palladium), so whatever good word-of-mouth there was from those who did see it wasn't nearly enough to fill the theatre and justify the day-to-day running expenses.
* I Can't Think Straight: A significant plot point, as Tala's family is highly traditional. Though less so, Leyla's mother also gets quite upset at hearing she's a lesbian, saying it's sinful.
* I Can't Think Straight is a British romantic comedy about a young Indian woman who falls in love with a rich Palestinian heiress.
* I Can't Think Straight is a serial runaway bride, having a history of dating whatever young successful man that her parents would approve of only to break it up once the wedding was up. At the start of the movie she is on fiance number four, and her relatives are placing bets whether she'll break it up before or after the engagement dinner. Turns out she has a really good reason for her behavior (It's all there in the title).
* I Can't Think Straight (lesbian main characters; subject matter includes coming out story, homophobia, LGBT acceptance, queer female romance)
* I Can't Think Straight: Leyla, as noted by Yasmin as she looks over her collection of k.d. lang CDs and lesbian-themed books. Yasmin also brings up Leyla's dissatisfaction with Ali. Tala is also this to some degree, as Lamia noted how close the two girls were and attempted to put a stop to it. She's also previously been in love with a girl.
* I Can't Think Straight: Tala is Jordanian-Palestinian, played by Canadian Lisa Ray who's of Indian and Caucasian ancestry. Leyla is British Indian, and played by Sheetal Sheth who's an Indian-American.
* I Can't Understand What My Husband Is Saying and the only ones that take place after this point revolve around her and Hajime dealing with the the fact that they're going to be parents).
* I Can't Understand What My Husband Is Saying. As the credits play, it jumps to them in various positions (including both of them with their upper bodies completely off the bed), but it ends with the two of them next to each other again.
* I Can't Understand What My Husband Is Saying, as the genre is dominated by female. His real name is Youta.
* I Can't Understand What My Husband Is Saying cross dressing younger brother.
* I Can't Understand What My Husband Is Saying, due to episodes only being three and a half minutes in length).
* I Can't Understand What My Husband Is Saying, during Season 2, Episode 9,

Hajime's family gets on his case over how he still doesn't have a job, leading to this exchange when his younger brother Mayotama takes a turn.
* I Can't Understand What My Husband Is Saying gets drunk, her only thought is to have sex with her husband Hajime (whether he's in the mood or not). Both of them are horrified by this (Hajime during and Kaoru after the fact), but it's played for laughs due to the jackhammer sound effects accompanying the scene.
* I Can't Understand What My Husband Is Saying has an obvious breast fetish, which Kaoru (with her relatively big boobs) is fully able to satisfy.
* I Can't Understand What My Husband Is Saying has a variation in the backstory. When Hajime and Kaoru had been working at the same company for a while, Hajime asked out a co-worker and got turned down, and he took it pretty hard. Seeing him that upset made Kaoru upset, and she realized she was jealous of Hajime's strong feelings toward the co-worker even though they didn't get together. This forced Kaoru to admit her feelings for him, leading to the unlikely relationship that forms the basis of the series.
* I Can't Understand What My Husband Is Saying has a very feminine build, enough for Kaoru and Miki to confuse him for Hajime's younger sister rather than his brother. He also holds his arms as if he was a woman covering her breasts when he's in a hot spring.
* I Can't Understand What My Husband Is Saying has two thirteen episode seasons (with each episode lasting about 3 minutes).
* I Can't Understand What My Husband Is Saying). Her friends do ask what he sees in her, but that was more to tease her.
* I Can't Understand What My Husband Is Saying in the air like a snake. It's also about 2 1/2 feet long making it more of a side ponytail than a single hair.
* I Can't Understand What My Husband Is Saying, it fits perfectly. Episode 8 of season 2 has a similar style.
* I Can't Understand What My Husband Is Saying. It then starts up again and plays until the episode finishes.
* I Can't Understand What My Husband Is Saying. Most of the time, it's implied that they just have sex at home instead.
* I Can't Understand What My Husband Is Saying on him, self-admonishing for his folly. He also suspects it was when his love for Kaoru become something more solid, substantial, and real.
* I Can't Understand What My Husband Is Saying right after this episode.
* I Can't Understand What My Husband Is Saying. She always told her friends that she'd never get married, a fact that they remind her of when they come over to meet her husband for the first time.
* I Can't Understand What My Husband Is Saying, to Kaoru's distress. So she dyed her hair just because Hajime's "Sadako moe" thing freaked her out so bad.
* I Can't Understand What My Husband Is Saying. Unsurprisingly, it gets this reaction from people who already find a 13-episode anime too short, since it's a fraction of that length.
* I Can't Understand What My Husband Is Saying when she remembers it due to how embarrassing it was for her.
* "I can't WAIT to meet them! They're my greatest heroes!" — Prepare to have
* "I can write a washing bill in Babylonic Cuneiform": Cuneiform was at the time understood to be a form of writing, but nothing else was known about it.
* I Capuleti e i Montecchi also tells the same story. However, in this version, Giulietta (Juliet) is engaged to a man named Tebaldo (Tybalt), who completely replaces Paris, but Giulietta is in love with Romeo, who is the leader of the Montecchi (Montagues). Just like Shakespeare's play, Romeo and Giulietta commit suicide at the end.
* Icarax: Icarus — in the sense that he liked to aim too high, not that his wings stopped working
* I Care a Lot: Marla appears to have gotten away with everything and become the multi millionaire she always wanted to be by exploiting the elderly on a mass scale. Then the guy from the opening who threatened her shows up and makes good on his promise, shooting and killing her.

* Icarian Flight territory as they are a favorite of speedrunners and (when combined with a few exploits) allow completion of the game in a matter of minutes rather than dozens of hours.
* Icari have a dozen black-feathered wings, which are attached by their witch creator at the age of sixteen.
* Icari Isidolde Kryska Stares that other characters have pointed it out to her in-universe. She denies this the same way she denies her attraction to Kayto: by getting flustered and saying “I-it’s not like I like her or anything! ”
* Icari Isidolde was the only survivor of a PACT attack on her family’s spaceship.
* iCarly (2021): In the episode "iHate Carly", Carly is attempting to track down the identity of an internet troll who has been harassing her. The troll turns out to be Justin, the guy she's been dating. Justin reveals that the reason he's been attacking her is because he was a huge fan of iCarly when he was a boy, but was hurt because a video he sent her of him reciting a poem was never played on the show. But after getting to know how wonderful Carly is, he got over it.
* iCarly (2021): In the third episode "iFauxpologize", an image of Carly spitting out a rotten meatball goes viral and, at Harper's insistence, Carly milks the popularity of the meme for all its worth. Spencer gets angry at her for doing so since his latest sculpture was in the background of the photo and many viewers thought her cringy expression was aimed at the sculpture. When Spencer demands an apology from Carly for the meme, her response is "I'm sorry if your feelings were hurt. I didn't realize you were so sensitive." Spencer deems it a "Fauxpology", hence the episode title. She does apologize for real at the end of the episode.
* iCarly (2021): Justin from "iHate Carly" has been bombarding Carly with hateful comments online under the username IHateCarly57. All because Carly didn't play a video he sent in to iCarly when he was a boy. He does feel guilty about it after getting to know her and would have told her if she hadn't found out first.
* iCarly (2021): Nora Dershlit returns in "iHate Carly". She claims to have turned over a new leaf, but after seeing Carly and Freddie again for the first time in years, she can't resist the temptation to follow them around a bit. After climbing into Carly's apartment, Nora begs her not to tell her parents about it, which is strange since Nora's parents once helped her kidnap the iCarly trio. Though it's implied that she doesn't want her parents to know because she lied about where she was going.
* iCarly (2021) pilot episode "iStart Over", Carly said she panic bought the anti-aging products she's advertising on the new iCarly because a guy at the 7-11 called her "ma'am".
* iCarly (2021) reprising their roles as Carly, Spencer and Freddie respectively.
* iCarly (2021): The second episode plays with this. Carly becomes determined to track down a troll who has been harassing her online. However, she's had haters for a long time, this was just the first one who was bad enough to warrant her attention. And while Carly doesn't appreciate the negativity, what really pisses her off is the troll continuing to send hateful comments after she sent him a kind message.
* iCarly about what to do if Kevin asks if you want to see his "onion ring".
* iCarly) after Carly goes into an emotional meltdown in reliving her childhood memories with their late best friend.
* iCarly, after Spencer returns from the Groovy Smoothie to discover Griffin making out with Carly:
* iCarly. Although she's seriously close to the age where the "precocious" part doesn't apply any more.
* iCarly a minor character asks Carly to be his girlfriend. The dialogue seems to imply this, by making it because his mother doesn't believe him about something regarding girls or a girlfriend.
* iCarly a minor character named Jeremy is an almost perfect inversion. He sneezes every few seconds, all day, every day (at least when he appears), to the point that he is nicknamed "Germy."

* iCarly, and again in 'iOMG' although in that case she might not be correct as to who Sam likes.
* iCarly and do a show with her. Though Sam brushes it off at the time, she brings it up during a fight with Carly in a later episode. Subverted, however, in that it was actually Freddie who thought of the name.
* iCarly and its five episode Sam/Freddie romance arc ended with one of these. In the A-Plot, Sam and Freddie were trying to become closer. In the B-Plot, Spencer and the girl who used to babysit him when he was 10 years old (she was 15 at the time) entered a relationship that got creepy as she started acting like his babysitter again and bossing him around. Carly ends the B-Plot by telling Spencer and the babysitter that their relationship is creepy and weird, and that they were forcing a romantic connection out of their previous relationship. Sam and Freddie overhear this, and both realize that even though Carly wasn't talking about them, her words matched their dysfunctional relationship. They discuss it, then break up.
* iCarly: Annoying fan Mandy is sent off to get "fladoodles", which, of course, don't exist. She comes back an hour later, claiming she had to go to some store in a different state, and then she is told: "No, we wanted fat free". Guess what else is in the bag.
* iCarly, any sleeping student is prone to be Sam Puckett's victim during a Ridgeway HS all-nighter. To the point that the principal warns the entire school about this.
* iCarly arc. They are complete and total opposites that become physically attracted to each other, but eventually break up when the actual relationship fails. They are unable to find any common ground in their interests and actually end up sabotaging them for each other when they try being involved in each other's activities. It ends up being one of the main causes of their break up.
* iCarly are setup like this, with each being aired as a full 1 and a half hour movie, but split into three parts when aired as part of a regular schedule.
* iCarly: Aruthor (Spencer's 'avatar') and Aspartamay's (Jack Black's character's 'avatar') battle, combined with spoofed references from MMORPG like Dungeons & Dragons and World of Warcraft.
* iCarly: Attempted by Spencer when he surprises Sam by hiding inside her locker. Sam slams the locker shut in his face, and he lampshades the trope:
* iCarly averted this in the first and second seasons, with them clearly moving up a grade, as well as the cast clearly entering puberty and growing up. They also explained how their school was a combined Middle and High school as they moved to a grade, that in almost all US education systems, means moving from a Junior or Middle school to a new High School. After season 2 however, it gets hazy. It's likely they are now in grade 10, but it's possible they could still be in grade 9, or have moved ahead to grade 11.
* iCarly because she's used to her and her brother wrecking their relationships and never speaking to the other person after they break up, so feels if they keep it casual, she can avoid hurting Freddie whilst still giving him what she believes he wants most. Freddie gets concerned that because Carly doesn't want to tell anyone, and that they haven't slept together again, that Carly thinks it's a mistake.
* iCarly because there's nothing that stands out as a moment Freddie realises he likes Sam back until the end where he kisses her.
* iCarly being something of a rip-off of the 'iPod Generation', the actual tech they used is completely opposite. The "Pear" Pods are literally shaped like pears, they're very colorful, and their laptops avert the typical white Macbook color scheme. The Pear "Pad" is a massively exaggerated version of the iPad that's about as big as most common LCD computer monitors.
* iCarly both relationships having temporary in-canon relationships that are broken up, Carly kisses Freddie for the last time and they have a last minute parting kiss in the original series finale before Carly leaves the country.
* iCarly, but because he's interrupted by a toilet flushing (Spencer saying goodbye to a goldfish he killed). He also arguably started off too far away for a really effective move.
* iCarly by claiming that he did not want to get "cloudburn." Oddly enough, she

does eventually find cloud block.
* iCarly by having Gibby jumping out of a giant pie, however, Gibby comes out of the pie before he is told to do so because he couldn't breathe, courtesy of Spencer who forgot to give Gibby something so he could breathe.
* iCarly, calling him a "weak, spineless fool". Later, when Principal Franklin confronts him about the insult, he tries to save face by saying that he actually said "sleek, stylish, cool".
* iCarly: Carly and Sam get into a fight, which ends when Carly leaves the apartment, slamming the door behind her. A beat passes before Carly opens the door again and tells Sam to get out instead, as the apartment is her house.
* iCarly: Carly and the team seek to gain the ear of a well-renowned web enthusiast, who turns out to be a very sleazy, spoiled kid. When he writes a deliberately negative review after Carly spurns his advances, the team simply call his mom, who orders him to recant his negative review.
* iCarly: Carly devises a homemade pesticide for her science project and tests it on Spencer's healthy tomato plant. Said plant smokes profusely and withers instantly. Carly exasperatedly deems herself (and later Spencer) as "The Plant Murderer".
* iCarly: Carly does one of these as Freddie starts to believe that she only likes him because he saved her life. It doesn't work, and Freddie breaks up with her, despite Freddie having had a crush on Carly since the day he met her.
* iCarly, Carly, Freddie, and Sam decide to prank Loubert by giving him an exploding muffin basket. They didn't realize it would explode quite so much, dealing serious damage to Loubert, who spends the rest of the episode being tended to by Freddie's mom, which shifts the focus onto a potential romance between the two. By the end, the prank is forgotten and none of the kids receive retribution.
* iCarly, Carly joins an art class after dropping her lessons with Spencer. When Spencer observes the class and freaks out like a jealous ex, ending up in a paint fight with the teacher, the Shay siblings get banned from the building forever.
* iCarly: Carly manages to suffer from this after a few hours in "iSpaceOut" even though she, Sam and Freddie never go to outer space and are just in a simulation room. Later episodes show that Carly is actually claustrophobic, though it’s possible that the simulation room caused it.
* iCarly, Carly, Sam, and especially Freddie are dumbfounded that Gibby can get someone hot like Tasha as his girlfriend. They all agree in the end that "There's something wrong with that chick."
* iCarly: Carly, Sam and Freddie resolve a potential lawsuit with Spencer's intervention, winning thousands of dollars in a settlement. They waste it all by the end of the episode. In another episode Sam ends up with $500 to pay back Carly and Freddie, then wastes it on an trampoline that is never seen again.
* iCarly: Carly Shay does this to Sam and Freddie after reaching her breaking point when they drag her into yet another fight (the last of several) during the episode "iDate Sam & Freddie". She points out that both their behaviour (Sam being a complete pig when they are on a date, and Freddie being a 'whiny nub' for pointing it out) and finally ends it by telling the two of them that they shouldn't be dating at all.
* iCarly: Carly shouts two of these in "iWin a Date" when she realizes Gibby chose her instead of Shannon.
* iCarly. Carly towards Freddie, although that could end up in eros in the future.
* iCarly, Carly tries to tell Sam and Freddie to be confident that they will be rescued, only for a giant truck drive on a puddle, splattering them with mud.
* iCarly: Despite the subtleties, innuendos may be lampshaded in the show time by time.
* iCarly did this a few times. Example: "I don't want to point at anyone or call any names, but someone gave him the wrong medication and someone's name is Cat"
* iCarly dropped an Anti-Shipping anvil at the end of the episode, basically mocking the fans who made his show popular online, and then following it up with Carly mouthing something that could have come from one of his blog posts, which basically boils down to 'shut up about romance and watch the show for the comedy'.

* iCarly: During "iTake On Dingo", the trio+ Spencer share a 2 bed, tiny hotel room. The floor recently had a dead body on it, so it's unlikely anyone was sleeping on the floor. No matter who slept in what bed with who (although it's a good chance it was probably Sam+ Carly and Freddie+ Spencer), it would get shippers excited.
* ICarly either Carly with Freddy ("Creddy") or Sam with Freddy ("Seddy"). It gets so bad that when the boy Carly is dating shows up, Sam blames him for "Freddy and Carly not being happy together." The Creddy shippers proceed to beat him up and tie up with the microphone cord. (Interestingly, no one mentioned "Sarly".)
* iCarly episode and the poodle puppet and the possums from "iGo to Japan"....
* iCarly episode: Carly's webshow lands a sponsorship from a new type of wonder shoe. When the shoe fails to deliver, the team piles on "faint praise" to fulfill the contract without lying to their fans.
* iCarly episode "iDon't Want To Fight", Sam trades a shirt Carly made for her in honor of their friendship anniversary for tickets to a concert she wants to see. She holds her hand out for a fist-bump, but Carly coldly rejects it.
* iCarly episode, "iFind Lewbert's Lost Love". Even though Chuck Chambers was responsible for stealing all the TV remotes in the Bushwell Plaza, Lewbert tells the police that he stole the remotes in order to get away from Marta Trundel, his ex-girlfriend. Just to ensure he's away from her for a long time, he slaps one of the officers to extend his sentence.
* iCarly episode "iGo Nuclear": Cal, the man that helped Carly make an exquisite nuclear power generator which gives her an A+, is revealed to be a wanted criminal as the rod he used to the generator's energy source was an illegal substance. As a result, Carly's grade reverts to a D- and she is forced to attend her class's "Root and Berry Retreat" for extra credit.
* iCarly episode "iGo to Japan" had a Japanese speaker saying "Hello, I have a bladder infection" to the kids because he was using a Japanese-English English-Japanese dictionary. Subverted in that he was actually trying to communicate his bladder infection.
* iCarly episode "iHatch Chicks"; and in "iPsycho" and its sequel "iStill Psycho" the antagonist Nora had a pet chicken named Maurice.
* iCarly episode includes awards for things like, "The Most Interesting and Yet Frightening Tongue Video" and "Best Milk Squirting from Eye Video"
* iCarly episode "iOMG", Carly locked Sam and Brad in a room together because she thought Sam was in love with Brad. It doesn't work out very well...
* iCarly episode "iWant a World Record", Spencer tried to bribe the representative of the world record book into overlooking the four seconds the webshow was off the air (his sculpture drew so much power that it briefly knocked out the power) with skee ball tickets. Upon realizing that they were tickets and not money, he promptly took them back so he could get a giant harmonica.
* iCarly episode, Tori's classmate Sinjin is video-surfing on a machine set to the highest level. Just as he is about to break the record, the machine flings him out the window and he lands in the hot-tub occupied by Spencer, Sikowitz, Beck and Jade, lucky for him.
* iCarly episode where they have Freddy sneak into detention with them.
* iCarly. Extremely lazy. But she shows occasional signs of brilliance, like innate ability to discern the amount of a certain food product in a giant jar, and her ability to Houdini an A when she didn't bother doing a science report using just an orange from her bag.
* iCarly falls into this at times, such as that one instance where Spencer somehow managed to play the drums so hard that one of the cymbals burst into flame.
* iCarly features a scene with Carly and Sam offering a picture of a pregnant man, along with a steak knife and BF Wangs gift certificate, to anyone who can find Sasha Striker.
* iCarly features a subplot of Sam and Freddie betting each other that Sam wouldn't read a chapter book by the end of the week.
* iCarly for what happened is enough for Freddie to call it quits from the production.

* iCarly, Freddie Benson's first crush and his first love will always be Carly Shay, and he is so sincere in this that he has told her that he will be her second husband if necessary, implying that he will always stay true to his First Love.
* iCarly: Freddie can do this. Using it more often on Carly probably would've helped him seduce her.
* iCarly: Freddie towards Carly, who seems to love Carly unconditionally no matter where their relationship lies with regards to Philia and Eros. He has proven his ability to self-sacrifice for her, being almost killed in order to save Carly from being killed herself by pushing her out of the way of a truck in one episode.
* iCarly friendship and exaggerate it to having Freddie be a sadomasochist to explain why he's fallen in love with a girl who repeatedly and constantly abuses and degrades him.
* iCarly, gained a ton of muscle, lost an arm-wrestling match with her, despite it being clear his arm is nearly twice as thick as hers.
* iCarly Gibby being promoted to the main cast, and that Sam has a crush on Spencer. The fic was written a year before either of those events happened, with both being very unlikely until they happened.
* iCarly Gibby (Noah Munck)'s brother Guppy is played by his little brother Ethan.
* iCarly girl Emily who is the daughter of the hot mother Spencer is helping.
* iCarly had a revelation that Sam likes Freddie. It's quite possible that her actions in "iSaved Your Life", where she completely fucked up Carly and Freddie's newly formed relationship by planting seeds of doubt in Freddie's mind was a subconscious desire to sabotage the relationship to keep Freddie away from Carly.
* iCarly had a version of this in the episode iHeart Art, where Sam Puckett must refrain from insulting Freddy in order to avoid paying five bucks for every insult.
* iCarly had her to be a "mom" to all 3 of them in a single episode by motivating Spencer's workout, sympathizing with Freddie and later reprimanding Sam for her on-air attack on Freddie.
* iCarly had Sam and Freddie date for 5 episodes. It was pretty horrible, constant fighting, hurting each other and so on. In the 5th episode, they mutually break up because they were forcing a platonic friendship into something more. Freddie says he loves Sam, but it's clearly as a friend.
* iCarly had to have a few minor scenes cut for time after its first few airings due to having a longer runtime than other episodes (28 minutes vs. the usual 24). The uncut version is available on DVD and streaming services.
* iCarly had to take time off to recover after breaking her ankle in a tour bus accident.
* iCarly Halloween episode, "iScream On Halloween", this happens when Sam and Carly run into a dark closet to escape the "ghost".
* iCarly has a habit of accidentally setting things on fire and calls for the fire department to put it out. They react to his calls with annoyance and in one episode, decide that they are fed up and refuse to come back next time.
* iCarly has an episode where a newspaper wrongfully states Spencer's death. He keeps up with it due to his art gaining value. Carly later tells a neighbour "Spencer's making sculptures with the angels now", although the Angels are just a charity group he went to.
* iCarly has an episode where Sam bets that she can go an entire week without insulting Freddie, or else she has to pay five dollars for each insult (which she would gladly do, but was broke). Freddie tries all sorts of things to make her crack. The end has her receive a large sum of money, then give it up because she just had to insult him.
* iCarly has both played this straight (Federal freakin' agents bursting in when they try to hack the school computer!) and averted it (Live webcast from detention and the principal's a fan of their show!)
* iCarly has "iHave a Lovesick Teacher", where Carly, Sam, and Freddie try to hook their teacher up with Spencer.
* iCarly has Mrs. Benson reveal that she has a chip implanted in Freddie's skull, and it becomes useful when she and Spencer are trying to find the kids when they're kidnapped.

* iCarly has ordinary high school students hosting an internationally-popular hit webshow.
* iCarly has pushed the button with both major couples, Carly/Freddie and Sam/Freddie.
* iCarly has Sikowitz literally scaring the pee out of Tori with a trumpet.
* iCarly have begun making their very own spaghetti tacos after seeing them on the show.
* iCarly. He is often abused by Sam, manipulated by Carly, and oh yeah, humiliated in front of the whole school.
* iCarly her actions at the end of "iSpeed Date" were meant to indicate her feelings for Freddie. Carly might end up doing the same in a future episode.
* iCarly" However, this is because she was on laughing gas at the time and wasn't aware of what she was saying.
* iCarly: If Carly/Freddie isn't revisited, then Sam's insistence that Carly's feelings for Freddie weren't real would become one. Sam tells Freddie Carly's feelings aren't real. Freddie breaks up with Carly because of Sam's thoughts. This stops any chance of Carly's feelings being allowed to blossom or fail on their own. Instead, Carly's feelings end immediately due to rejection and Freddie's explanation of Sam's potentially mistaken logic. Those feelings never return. Everyone believes Sam was correct. Carly never loved Freddie. Sam saying that Carly's feelings aren't real creates the situation that eventually results in everyone believing that Carly's feelings weren't real thus creating this trope.
* iCarly Impulsive, violent juvenile delinquent Sam dates geeky momma's boy Freddie for a while, though she spends a lot of time picking on him up until that point.
* iCarly, in a case similar to the above example, but replace Austin/Ally with Chyna/Fletcher.
* iCarly, in an effort to calm the shippers of a pairing involving a different character, implied it might not be what it appeared. Cue the episode, where they ended up kissing 7 or 8 times, and it was pretty much as it appeared.
* iCarly: In his first episode, Carly, Sam, and Freddie realize that all they really need to do to stop Nevel is tattle on him to his mom (since he is only 11). This is handwaved in his next appearance where they mention that his mom is going out of town and will be unreachable for a while. After this, it is never brought up again.
* iCarly. In "iKiss", which happened after she dated Jonah, Sam says that she's never kissed anyone, meaning that Sam must have never kissed Jonah. It's possible that Jonah got fed up with it and tried to kiss Carly instead.
* iCarly in "iStage an Intervention" when he pulls a prank on Sam after she pulled one on her. Carly is impressed, but Freddie lacks the confidence to follow through and try to ask her out.
* iCarly: In "iStill Psycho", Freddie's mom has a sword fight with Nora and her mom who wield fireplace equipment.
* iCarly: In one episode, two characters saying "Mom..." "No!" 10 times in a row on their web show is presented as an example of their humor surpassing everything on TV.
* iCarly: In the episode "iBeat the Heat", Sam does this to get everyone's attention when Carly is giving a speech that no-one will listen to at first.
* iCarly: In the episode "iLost My Mind", Spencer runs out into the hall, pantsless, calling after Carly to bring back some more olive oil. There he is met with an old lady, a child, and a nun. The old lady pepper sprays him.
* iCarly: "iRue the Day" was temporarily banned from Nickelodeon and Teenick when Sony was hacked in 2014. The reason for the temporary ban was because a hacking heist was depicted. As of now, the episode is re-running again.
* iCarly is and knows enough about their group to interact with Carly daily.
* iCarly is an example of a well written Creddie story of the first type.
* iCarly is quite susceptible, most notably in "iThink They Kissed" and "iSpace Out". Minor variations are the instances where she delivers long rants like in "iSaw Him First" and "iDate a Bad Boy". Also, Mrs. Benson will freak out about anything, usually hauling Freddie off for a tick bath, like in "iFence".

* iCarly is very active in this regard. In addition to twittering, set pictures and livejournal discussion, he also posts episodic fact sheets. Some of these contain interpretations of events on the show, one example from the iFight episode is that Carly was at least a little jealous when Freddie made some comments about Shelby being hot and future wife material.
* iCarly. It is frequently mentioned early on but doesn't actually appear until halfway through the second season.
* iCarly. It ruins the plan because it turns Sam from questioning if Missy even was trying to get rid of her, into sure of it, and decided to bring Freddie in to help her.
* iCarly. It's obvious to everyone that of the twins, she prefers Melanie over Sam. She even outright asks Sam once why she can't be more like Melanie.
* iCarly likes, it's Carly, but he had been recently hit by a truck and was stuck in bed and then hobbling around on crutches. He also ended their brief relationship because he was worried Carly only liked him because he saved her from the truck.
* iCarly like Wendy, and Gibby (who eventually was upgraded to the main cast), whilst most vanish and are never seen again after one or two episodes.
* iCarly makes the same joke the trope title does in one episode. Also, there occasionally is pee humor that fits this category.
* iCarly. Mandy had to go down to the ethnic district to find them however.
* iCarly, mind you - never mind her being the bad guy, breaking and entering is still an offense) they call the cops, as mentioned by Carly at the end of the episode.
* iCarly: Missy does this, allowing Carly to overhear and finally figured out that Missy was trying to get rid of Sam.
* iCarly moment where Freddie asks Carly if she was jealous. It's not in the final episode.
* iCarly: Nearly anything Spencer creates or meddles with ends up on fire. This is roughly split 50/50 between things that shouldn't catch fire, like the doorman bell, or a drum kit, and things he really should be smart enough to not build, such as the overpowered metallic magnetic Christmas Tree.
* iCarly. Notable as he becomes injured by a truck performing the titular saving of her life.
* iCarly. Not as widely used as the nicknames for the two major shipper groups though:
* iCarly once tried to take Carly out of school to go to the amusement park. When pressed for an excuse, he said he was taking her to a doctor's appointment. With Dr. Rollercoaster.
* ICarly once yelled at a little girl for accidentally knocking over a jar of pickles he was going to buy at the supermarket. This was caught on video and spread viral, making him a laughingstock.
* iCarly: One of the episodes features Malika, a stage magician who asks Freddie to the girl's choice dance and seems to be practicing real magic. Even the iCarly gang can't explain her magic tricks, which might be genuine magic.
* iCarly online content (as opposed to the in-universe webshow) often breaks the fourth wall, by way of a 40 year old man filling in for Sam, and a clip of Freddie informing the 'Baby Spencer' character (who is played by Jerry Trainor), that Jerry Trainor was nominated for an award.
* iCarly, only this time she's undergone many years of psychological help and claims to have changed for the better. While she is no longer violent or willing to hold people captive, she still is not completely sane and stalks Carly and Freddie until Carly tells her to stop. Nora apologizes and leaves them alone.
* iCarly, or as Spencer calles them, "her two friends who never hang out at their own homes." The show tended to lampshaded their constant presence, such as when Freddy barged in saying "Hey, mind if I come in, 'kay thanks!"
* iCarly: Parodied when the webshow started advertising for sneakers on her show. The foot warmers and wi-fi pedometer linkup exploded and wiped hard drives, respectively, so they obviously didn't advertise them for long.
* iCarly: Punishment for anything bad is detention, no matter how small.

Occasionally subverted by adding extra punishments like having to do star jumps or washing the teacher's car as well.
* iCarly quits making videos after Freddie says he doesn't find the latter's show very funny. When the gang visits Fred to apologize, Fred states he only pretended to be upset in order to get more views.
* iCarly reaction from Carly, Freddie and two other kids Sam shows it to, but she genuinely seems to get a kick out of it.
* iCarly), Reed Alexander (Nevel's actor) messes up his line by doing this.
* iCarly refuses to believe it and forces Sam to admit Melanie doesn't exist, he leaves right before Melanie actually does show up.
* iCarly rescheduling Carly's interview with a private school headmistress to her apartment, setting up a mini-golf course inside Spencer's apartment, inviting 2 dozen kids over, and getting the kids to think she had a prize hidden on her, done to sabotage Carly's chances of being admitted to the school so Carly wouldn't leave them.
* iCarly: Samantha Puckett is known for breaking into the home of her best friend Carly Shay, by using the fire escape into Carly's bedroom.
* iCarly: Sam/Jennette shows off her dancing skills in "iDream of Dance" and "iWas A Pageant Girl".
* iCarly, Sam. Most notable in "iSell Penny Tee's" with the contrasting styles in running their t-shirt factories. Sam runs her 'factory' like a child labour sweatshop, while Carly and Freddie run their way by being nice and fun.
* iCarly: Sam Puckett shows she has flows and thus is also pretty fly.
* iCarly: Sam Puckett takes this trope so far that a realistic question can be asked of how she hasn't been expelled or held back. Again. She got held back already in the 3rd grade. She's also a bully. Yet outside the school, she can scheme and plan.
* iCarly (Sam's mom) until she showed up in a single episode, Spencer and Carly's dad is in the military and rarely shows up in one-sided phone conversations. This leaves Sam's father, Freddie's father and Carly/Spencer's mother, and they have never even been mentioned.
* iCarly, Sam tries to attract a boyfriend by being girlier. Turns out he likes her the way she was.
* iCarly, shares some romantic tension with Spencer, and finishes the show by giving him a big sexy kiss before leaving.
* iCarly, she'll hold it up and press a button, which cues the laughter. It's played straight in the show proper, though.
* iCarly should've had Sam taken away from her on general principle after one of her many dangerous or neglectful episodes.
* iCarly's iGo to Japan movie is even funnier when you know why the Japanese security guard slapped Spencer: he called his mother fat. In the episode iGo Nuclear, a bonus joke for Russian speakers is that Cal's case of illegal uranium is actually labeled plutonium.
* iCarly, since the only reason Carly got a B was because she handed in her report on three hole paper, and the teacher doesn't like three hole paper. Another reason it was so important to her is because if it weren't for that B, she would have had her first all A report card, instead she gets a B+.
* iCarly, Spencer and Carly's father is rarely seen due to the fact that he's in the Air Force.
* iCarly: Spencer builds one so that he won't forget to feed his fish. It works until Carly tells him that he has to remember to reset the machine every day, thus rendering the device pointless.
* iCarly. Spencer generally averts the trope though, trusting Carly to make good decisions about her movements and activities.
* iCarly: Spencer invokes this in the episode "iPrank." He pranks Sam and Freddie by having a clear, nearly invisible plexiglass wall placed in front of the elevator so whoever exited it would smack into it.
* iCarly, Spencer says this after something he makes/fixes spontaneously bursts into flames.

* iCarly : Spencer tells Carly they need to talk, Carly stars with "Yeah, I know, when a mom and a dad..." Spencer cuts her off with a "No! Not that!"
* iCarly), such that pretty much any fanfic of the series required the author to give away the end pairing with a warning like this just to head off criticism.
* iCarly's, with Mindy Crenshaw, who gave Drake and Josh hell in her first few appearances. While she does legitimately hate Drake, she teases Josh because she likes him. The two become a couple after that and a pretty stable one at that.
* iCarly: T-Bo's food on stick gag (capsicums, chicken, doughnuts, etc) is put up with a couple of times, and now every time it's brought up he is forcefully rejected by the other characters.
* iCarly, tells Spencer she's not having that conversation with him. Spencer is understandably grateful.
* iCarly that don't really fit with the rest of the show's humour. One was an elderly clown at a party having a heart attack and dying, with the rest of the cast treating it casually.
* iCarly that is not the main focus for the show, and only comes up in a handful of episodes per season. There are differing ideas on what it meant, mostly around which side of the Creddie (Carly + Freddie) or Seddie (Sam + Freddie) shipping divide people stand on.
* iCarly the computer, so the kids had failed to follow the literal logic of the owner.
* iCarly, the eponymous show (how's that for meta?) has at least one episode every episode. The TV viewers don't always get to see the entire episode of the web original, but it follows the trope closely.
* iCarly the little girl who infiltrates the Shays' apartment never says a word.
* iCarly: The numerous Pear computers, pearpods, etc. as a stand-in for Apple.
* iCarly there's a scene where Sam forces Freddie to make out with a girl on the other side of a glass window. It's quite creepy.
* iCarly there were several occasions where one of the main characters ruined a relationship for the others:
* iCarly: The second blooper episode is framed as a talk show with "Christopher Cane", where he interviews the cast members and then shows a blooper reel for each of them.
* iCarly, they changed the usual establishing shot of Bushwell Plaza by adding a storm, which was in response to complaints that Seattle which is a very rainy city in real life being completely sunny on the show.
* iCarly. They then get into a massive almost break up moment when Sam is revealed to have sabotaged an admission paper that could have helped him get into any college he wanted. They still stay together through both episodes.
* iCarly they will get back together after some time passes, for the time being they should end their relationship.
* iCarly" to get Gibby to help her electrocute her brother for their semester project.
* iCarly to impress a boy she likes. It works until the new school bully starts harassing Carly and Freddie and she reverts back to her old self to save them. It turns out Sam's crush actually likes her for being who she already is instead of who she tried to be.
* iCarly to impress a boy she likes named Pete. She looks quite good in her more feminine outfit, prompting an audience reaction, and even though Pete is quite smitten with her new look, he reveals that he actually liked her tough girl image better. However, there have been other times in the series, before and after this episode, that Sam has put a dress on, and she looks quite good in them.
* iCarly, up to and including making Carly wear a horrible sweater, and disguising himself as a janitor at her school so he can catch Griffin when he visits Carly's school to make out with her.
* iCarly: Used a bunch of times throughout the series, usually by Freddie and Spencer.
* iCarly uses the dramatic variation (although it includes some embarrassing moments) in the 20th chapter. Freddie has kept the secret that he cheated on his

girlfriend (who already has issues with Carly) with their other best friend Sam, from Carly and that enrages her. They both get defensive and angry about the secret, the secret keeping and each others attitude.
* iCarly using only blow tube guns. Carly and Freddie were "eliminated" early on, leaving behind extreme mind games between Sam and Spencer. No safety equipment is used at all, although the relatively low speed nature of blow-guns reduces the risk of injury and it was meant to be played in a home.
* iCarly was playing slow music just perfect when you'd expect pop or Top 40 music, and secondly, the fact that the other 12 customers inside all vanished within the space of the 2-minute conversation that caused both their dates to leave.
* iCarly: Wendy. Tells the gang that another TV show is stealing their bits. Explains that Freddie gave up a sea trip to get rid of Carly's old friend who was trying to break them up.
* iCarly: When Carly and Sam have an argument over a boy in Carly's apartment, Carly gets fed up and walks out ... only to return and kick Sam out instead.
* iCarly, when Carly finally kissed Freddie on his bed, the show abruptly cuts into a commercial break. When the scene resumes, Freddie became stiff and wide-eyed as he and Carly continue kissing throughout the half-hour absence of his mother. In the extended version, Freddie was dumbfounded and even tased himself to prove that Carly had really kissed him.
* iCarly when Carly, Sam, Dave, and Fleck argue about who would leave the Groovie Smoothe first, all four of them go out the door at the same time and briefly get stuck.
* iCarly: When Freddie is talking about his newfound freedom after his micromanaging overprotective mother is too busy taking care of Lewbert after being injured twice.
* iCarly when Freddie's teacher meets Spencer at the school. She hated Spencer when he was a student, but since he's an adult, she can't punish Spencer. Instead, she doles out punishments to Freddie until Spencer leaves the building. Freddie has to throw Spencer out before he could be expelled.
* iCarly when trying to sing. Carly has to fix everything by singing the song for him.
* iCarly, where a tape outline is seen on the floor of a rundown motel implied to be in a very Bad Neighborhood.
* iCarly where even Freddie and Carly end up going against Sam when she does something bad. Example, starting a child labour sweatshop.
* iCarly who became well known for those antics on the creators blog and websites.
* iCarly, who tries to claw Spencer's face out every time he sees him. In another episode, Sam mentions having a possibly-rabid cat.
* iCarly will in most episodes, feature either a random segment from the webshow, or set up the plot using the webshow.
* iCarly. Without Carly there wouldn't be a friendship between them because Sam and Freddie dislike each other. However, neither of the two will hesitate to please her.
* iCarly with "The Sack," which is just a giant burlap sack to wrap around your body. The commercial begins with Carly lamenting that her blanket keeps flying off her body (pulled by an invisible string).
* iCarly would be enough to stop someone coming first. But somehow Sam comes back to win, as she performs a tap dance routine in the talent section.
* Icarus: An orbital weapons platform capable of digitizing people en masse.
* Icarus eventually manages to hack his brain, and he can do this with his nanotechnology that just doesn't make sense in a real-world equivalency.
* Icarus game series. The game would have followed an older Pit who could fly without aid. The game would have been more mature, with Pit's design reflecting that. Nintendo rejected it since they felt the game was too much of a departure from the series, and even former Factor 5 developers felt they were missing the point.
* Icarus II (2007), but they do manage to save the world in the process. It is hinted that Kappa might not die, but is frozen in time right before his death,

stuck admiring a wall of fire. In all probability, he died.
* Icarus II is damaged on its mission to reignite the sun, but the crew realize there is still enough oxygen to get there if one of them dies. A scientist who's lapsed into depression after indirectly causing the death of
* Icarus II, which has a big shiny sunshield out in front. This is for purely practical purposes, to prevent the ship, and more importantly, its payload, from getting destroyed by heat as it approaches the Sun.
* ICC, and Cannons, it's a low-profile sustained damage-dealer carrier-gunboat, with a uniquely powerful shield layout giving it even more enhanced staying power and recoverability in return for the loss of any meaningful armor-based defenses.
* ICD-10 (International Classification of Diseases) is a widely used system for medical coding that is published by the World Health Organization. Being vast and attempting to classify every cause of literally every health problem, this leads to some quite bizarre and odd entries. Examples:
* Ice Age 2: The Meltdown: After a dodo walks past a geyser field—only to be shot up and fall to the ground, resembling a roasted chicken.
* Ice Age 2: The Meltdown: After Diego and Sid are easily beaten up by two possums:
* Ice Age 2: The Meltdown, after you defeat it, to reach a high ledge.
* Ice Age 2: The Meltdown: All the herds head for a giant log that would serve as a boat when the flood waters come.
* Ice Age 2: The Meltdown are prehistoric monsters who, despite not being able to talk, show they are capable of thinking and express either joy or anger at the heroes when trying to eat them.
* Ice Age 2: The Meltdown: As Sid sleeps, he's taken away by a tribe of mini-sloths, who claim that Sid is their Fire King, since he previously "discovered" fire. The mini-sloths virtually mimic everything Sid does, which he then decides to use to his advantage by leading them into a devotion chant/song to him. Afterward, the tribe attempt to toss him into a lava as a sacrifice, on the grounds that his discovery of fire is the reason behind all the ice melting and the impending flood. Only one mini-sloth (presumably the tribal chief, or some kind of head priestess) can speak fluent English.
* Ice Age 2: The Meltdown, a vulture tells the assembled animals that the valley is going to flood unless they get to a boat at the other end. But he does have some good news: the more of them that die, the better he eats. He never said it was good news for them.
* Ice Age 2: The Meltdown, between Manny and Ellie. Two times, actually. Each time, life-threatening circumstances lead to them forgiving each other.
* Ice Age 2: The Meltdown Diego jumps into the water, swims to Sid, Crash and Eddie, and hoists them onto a rock. Sid then states that everybody can swim when they're babies... except tigers.
* Ice Age 2: The Meltdown: Diego, the saber-toothed tiger, has a fear of water, but he needs to swim to save his friend. Said friend told him earlier that "Most animals can swim as babies," and he uses this to go after him. Once saved, the friend tells him baby tigers can't swim; he left that part out.
* Ice Age 2: The Meltdown: Ellie does one after Manny says that it's their responsibility to save their species. She later admits she overreacted.
* Ice Age 2: The Meltdown features a literal example. Ellie is supposedly a possum. Who's 10 feet tall and weighs 7 tons. And has huge tusks. And is otherwise basically a mammoth. Her "brothers" Crash and Eddie, actual possums at that, don't seem to find this odd, except for her lacking the ability to sneak around. Ellie herself is in complete denial about possibly being a mammoth, in spite of Manny, Sid and Diego trying to convince her otherwise, and still tries to hide, even though no tree can hold her and no bush can cover her.
* Ice Age 2: The Meltdown, has the vulture that tells everyone that the flood is coming soon and they need to move fast if they are to survive. But there is good news, the more of them that die the better he eats. He never said it was good news for them.
* Ice Age 2: The Meltdown. Justified, as it takes place at the end of the last ice age, when the Earth's climate was starting to warm.

* Ice Age 2: The Meltdown, Scrat is climbing an ice wall that suddenly springs leaks. He tries to plug one leak with his muzzle but winds up drinking the water and inflating. When he can't take anymore, goes flying through the sky as he spews the water back out.
* Ice Age 2: The Meltdown, Sid is insulted after Manny and Diego tell him (rather insensitive) that he's not qualified enough to run a camp for kids:
* Ice Age 2: The Meltdown: This is how Manny responds to Ellie calling herself a possum:
* Ice Age 2: The Meltdown try to save an unconscious Sid from drowning, one of them grabs him by the mouth and opens it, causing one of them to say, "You really need to brush."
* Ice Age 2: The Meltdown, vultures sing a reworded version of "Food Glorious Food" regarding eating the main characters. Sid starts dancing along to it, then humming it, much to the other characters' irritation.
* Ice Age 2: The Meltdown, when he goes to Acorn's heaven but is revived just as he approaches a giant acorn.
* Ice Age 2: The Meltdown, whose flatulence was so loud it was mistaken for a mammoth trumpeting.
* Ice Age 3: Dawn of the Dinosaurs- a female saber-toothed squirrel with pecs.
* Ice Age 3: Dawn of the Dinosaurs, Crash and Eddie charge at a carnivorous plant while carrying sticks like swords and yelling battle cries...then run away screaming from the plant's attacking vines.
* Ice Age 3: Dawn of the Dinosaurs: Crash and Eddie shoot exploding berries at a bunch of flying pterodactyls that are chasing them. One during the chase gets inflated like a balloon after a berry is fired in its mouth as it tried to eat the possums, leaving it billowing smoke and floating away complete with balloon deflating sounds.
* Ice Age 3: Dawn of the Dinosaurs", despite predating both the Chipmunks and indeed Christmas itself by quite a wide historical margin.
* Ice Age 3: Dawn of the Dinosaurs: Diego fends off gulongs to protect the laboring Ellie
* Ice Age 3: Dawn of the Dinosaurs, Ellie is giving birth while Diego fights off some raptors trying to kill her. At one point Diego is the one appearing to go through labor pains, and then the camera pulls back to show him pushing a raptor off a ledge. She's telling him to push, he claims that she has no idea what he's going through, and then there's a moment of silence as he processes what he just said before sheepishly apologizing.
* Ice Age 3: Dawn of the Dinosaurs have the characters dancing over the end credits.
* Ice Age 3: Dawn of the Dinosaurs in the same film, who are depicted as threatening (though their feathers are really more like quills).
* Ice Age 3: Dawn of the Dinosaurs is quite contested; some consider it an absolute disaster, while others call it the best of the series.
* Ice Age 3: Dawn of the Dinosaurs is smart enough to hold a grudge against an individual weasel, named Buck. While the characters in the movie are all animals, the dinosaurs are depicted with more or less animalistic intelligence, unlike the more anthropomorphized protagonists.
* Ice Age 3: Dawn of the Dinosaurs like he said, claiming it was "gas talk", but was he really high or was he just saying he was to avoid embarrassment?
* Ice Age 3: Dawn of the Dinosaurs, Little Johnny the aardvark gets eaten by a baby T. rex. Manny and Diego are also ingested by a carnivorous plant. All of them end up fine.
* Ice Age 3: Dawn of the Dinosaurs: "Rule number one: Always listen to Buck!"
* Ice Age 3: Dawn of the Dinosaurs, Scrat's acorn is stuck to his chest with tar. Enter Scratte, who pulls it off, along with a sizable chunk of his hair. Cue scream.
* Ice Age 3: Dawn of the Dinosaurs that is about to digest Manny and Diego. He dives inside, goes to the center of the stem and... there's a red root and a blue root.

* Ice Age 3: Dawn of the Dinosaurs. Until Buck points out the dinosaur skeletons that died laughing.
* Ice Age 3: Dawn of the Dinosaurs, when Buck performs mouth-to-mouth on a pterosaur knocked unconscious by a mid-air collision.
* Ice Age 3: Dawn of the Dinosaurs: When Scrat first encounters female sabertooth squirrel, Scratte. Lou Rawls' "You'll Never Find a Love Like Mine" starts playing as he gazes smitten with her. Then the music comes to a screeching halt as soon as he notices her holding his acorn.
* Ice Age 3: Dawn of the Dinosaurs, when Sid's "kids" (who are actually Dinosaurs he stole when they were still eggs) harass the other kids on the playground built by Manny.
* Ice Age 3: Dawn of the Dinosaurs, when the herd is leaving the underground world, Buck states that they should have that adventure full of mortal peril again.
* Ice Age 3: Dawn of the Dinosaurs when their different parenting methods are brought up. When trying to feed the baby T-Rexes, Sid points out how he tries to have a conversation with her and all she does is growl at him.
* Ice Age 3: Dawn of the Dinosaurs while a tango plays in the background.
* Ice Age 3: Dawn of the Dinosaurs, who are actually the ones responsible.
* Ice Age 4: Continental Drift, after Sid's family leaves Granny with Sid and the herd and abandon him for the second time.
* Ice Age 4: Continental Drift as characters just because the studio perceived them as being hip with the kids. It even has the characters dance along to a generic auto-tuned pop song in the end credits. Considering this is the fourth movie of a franchise that began in 2002, these elements can't help but feel like the filmmakers are falling into this.
* Ice Age 4: Continental Drift as they carry supplies on their backs (note: they are about the size of guinea pigs). Sid's comment?
* Ice Age 4: Continental Drift, Captain Gutt wants to take revenge on Manny for destroying and later stealing his ship.
* Ice Age 4: Continental Drift, Crash and Eddie barely appear, and contribute nothing to the plot.
* Ice Age 4: Continental Drift, Granny's pet whale Precious serves as a submarine and battleship in the last battle against Gut's pirates
* Ice Age 4: Continental Drift her when she turns on him. When we next see her, she's in a pretty bad state, implying that Gutt might have done worse to her. Diego even points out that when she went missing, Gutt never bothered to send a search party for her, opting to fix up a new ship instead to continue pursuing Manny's group.
* Ice Age 4: Continental Drift intend to get rid of Sid and his granny this way. However they don't succeed.
* Ice Age 4: Continental Drift, Manny and Sid taunt Diego with this after realising he's in love with Shira.
* Ice Age 4: Continental Drift: Manny tries to get a group of hyraxes to help him steal Captain Gutt's ship to get to the continent, but can't get them to understand him. Sid steps in and converses with hyraxes via a stream of gibberish and wierd pantomime. To Manny and Diego's amazement, it works!
* Ice Age 4: Continental Drift use a live badger as a flag, the patterns on his back forming a perfect skull and crossbones. He can also become a white flag by turning his underbelly forward.
* Ice Age 4: Continental Drift: When Granny falls off the iceberg and has her "first bath in decades", an oily substance oozes off her and multiple dead fish and a shark suddenly pop up.
* Ice Age 4: Continental Drift, when they are floating on a tiny ice floe in the middle of the ocean together with Manny, Sid and Granny.
* Ice Age 5: Collision Course, as they talk fluent English, but they're also goofier and less monstrous.
* Ice Age 5: Collision Course, Gavin eats Granny, who eventually has to be coughed up.
* Ice Age 5: Collision Course, he asks if it was because he made her a bikini out

of poison oak. He then absent-mindedly uses said bikini as a handkerchief, causing his nose and eyes to swell up.
* Ice Age 5: Collision Course: Manny and Ellie try to make Peaches give up on the idea of moving far from them by making her think it's her idea. Ellie says this is how they always make Peaches do whatever they want her to.
* Ice Age 5: Collision Course! They barely have any development at all.)
* Ice Age 5: Collision Course. This has become one of the larger targets of the film's already wide criticism.
* Ice Age 5: Collision Course with "WHO'S WITH ME?" Cue the crickets and the Herd putting their heads together to see if this includes them.
* Ice Age a common name for his species, and their scientific name (Smilodon) doesn't exactly roll off the tongue. Similarly, the brontotheres are referred to as "rhinos", despite being only distantly related to modern rhinoceroses.
* Ice Age after Scrat is hurled through time thanks to a small time machine, he ends up in the distant future in front of what appears to be an enormous Oak Tree. However, it turns out just to be a memorial, complete with a plaque that reads "Here Stood the Last Oak Tree."
* Ice Age, and he doesn't live up to his species' fearsome reputation as much.
* Ice Age and is down for the count. Sid approaches him and urges him to "say something, anything!" to confirm he's okay. He mutters something, and is told to clarify by Sid, so clarifies after that and says Sid is stepping on his trunk and unintentionally choking him.
* Ice Age, and Scrat, of course, sees his acorn. Cut to reality, where Scrat is now trying to bury the siren into the ground, blissfully unaware of what's really happening.
* Ice Age are anatomically correct prehistoric animals that can talk. Nevertheless they only interact with a human once and is in the first movie, and is a toddler (but seems to understand them).
* Ice Age: Before he actually fell in love with Ellie, Manfred the mammoth is actually revealed to have had a first wife and child in a flashback sequence who unfortunately end up being stabbed to death by humans. This explains why Manfred not only hates humans, but also started to think that he is the last mammoth on Earth.
* Ice Age came out, Diego, the name of one of the main animal characters in the movie, jumped from the 140th most popular baby name in the United States to number 83.
* Ice Age: Chills, Thrills And Spills: Sid to Jennifer and Rachel, though this is due to his beliefs about mating for life.
* Ice Age Christmas special, Sid sees yellow snow and wants to taste it. But Prancer, knowing what it is, quickly says "Don't. Just...don't."
* Ice Age: Continental Drift'': Everybody but Peaches and Ellie call Louis "Wiener".
* Ice Age: Continental Drift is last seen being attacked by a siren-like lungfish, with more coming to join in. While one can assume they kill him, there are comedic noises during their attack and Gutt's noises of pain sound more like he just stepped into a really hot bath with cold feet, so it is unclear or not if they really did kill him. However, with no more ships or crewmen, we can assume Gutt’s days of piracy are over regardless of his fate.
* Ice Age: Continental Drift, Though in his defense, given what happened to his previous family as revealed in the original film, who could blame him?
* Ice Age: Dawn of the Dinosaurs when Diego is attempting to convince Manny to let him go protect Ellie.
* Ice Age: Diego and Sid are the deuteragonists, while Manny is the protagonist.
* Ice Age, Diego remarks upon a piece of kindling: "It's still green. They broke camp less than two hours ago."
* Ice Age films. He caused the ice age, a volcano explosion, and the continental drift simply by planting an acorn. He also destroyed an Atlantis-esque civilization because of his compulsive need to grab an acorn.
* Ice Age, Fox would only accept the movie as a children's comedy, so the makers of

the movie decided to mix both genres. The sequels past the second one are straight-up comedy, lacking the drama of the first two movies.
* Ice Age from the third movie could count as well, as long as you aren't whoever she wants for dinner...
* Ice Age has characters that might act goofy or out of character if the writers think the joke is funny. For example, Diego is a mostly serious character, yet will start acting silly or goofy if the joke depends on it (like him trying to hide that Sid's family abandoned him again by saying they were destroyed by an asteroid).
* Ice Age. He's confronted about the selfishness and brutality in his plans that set up Manny when the mammoth saves him from the lava, and after Roshan chooses to walk to him first. This culminates in his change of heart and the decision to do whatever it takes to make sure his new "herd" makes it to safety - even if it might mean his own death.
* Ice Age, in the climax, Sid the Sloth is pursued by a saber-toothed tiger to a small cave where Sloth has hidden the human baby. The tiger tries to attack them, but they manage to get away in the nick of time, while the tiger gets stuck in the entrance to the cave, after which Sid does this while repeatedly shoving the tiger further into the hole so he can't get out.
* Ice Age. In the climax, when he hears the baby cooing, he immediately turns to it — completely forgetting about the raging mammoth right behind him. It gets him knocked into a wall and killed by falling icicles.
* "Ice Age" is a comedy featuring live-action actors, a young couple who are stunned to find a tiny developing civilization in their freezer.
* Ice Age is a small (8-9 inches long) squirrel-like mammal with a long snout and sharp canines, discovered in 2011. However, it lived during the Cretaceous Period, not the ice age, wasn't a rodent, and probably didn't eat acorns.
* Ice Age: "Isn't there someone else you can annoy? Friends? Family? Poisonous reptiles?"
* Ice Age is this in a nutshell: a mammoth, a sloth, and a sabre-toothed tiger protect a Palaeolithic baby from ice storms, ice caves, icicles, and a lava field. Baby has fun. Caretakers? Not so much.
* Ice Age manages to make fire using flint and tinder, and proudly declares himself as the "Lord of the Flame", then almost immediately sets his own tail on fire, making him run around in panic.
* Ice Age: Manny tells Sid, "The sooner we find the humans, the sooner I can say goodbye to Mister Stinky-Drool Face. And the baby, too."
* Ice Age, Manny told Sid he was going on Santa's naughty list, which didn't exist beforehand:
* Ice Age movie, Diego cracks a joke about this when he sees Manny and Sid defending a human baby:
* Ice Age movie. For someone who supposedly wanted revenge for the murders of his pack, he certainly didn't seem to value his crew's lives very much, threatening them with death for failure and more generally not caring for them and letting each fend off for himself.
* Ice Age movie, we see how Manny lost his family as rendered in animated cave paintings.
* Ice Age originally was going to include a female sloth character named Sylvia, but she was cut from the film late in production. She remained in the novelization.
* Ice Age right at the end. In the second film, two carnivorous water-dwelling creatures are thawed from the melting ice.
* Ice Age roars at Diego for letting his packmates go after Sid and the baby when they should attack Manfred. Diego... just shrugs.
* Ice Age's acorn-related antics, which often indirectly affect the story.
* Ice Age, Scrat attempts to warn Manny and Sid of the ambush by Diego's pack. They understand "pack of..." but can't find out the last part, even when Scrat points directly at Diego.
* Ice Age, Scrat gets a giant acorn from Santa, which opens up to reveal another acorn inside, and another, and another and another, until eventually he gets the real (small) acorn in the middle.

* Ice Age: Scrat has filled a log full of acorns and is just putting in the last one. But the log is so full that that last acorn keeps popping out. In trying to push it back in, the bottom collapses, sending all the nuts — and Scrat — tumbling down a cliff.
* Ice Age series, although Ellie becomes a lot more level-headed in later installments.
* Ice Age series films is this to Manfred, since Manny's first wife and child were both killed by humans, causing the mammoth to distrust humanity as well as fear that he is the last mammoth left.
* Ice Ages happen every once in a while. It always brings a massive extinction wave and the birth of new species.
* Ice Age, Sid accidentally steps on glyptodont poo. Then wipes it on two rhinos' salad. Then gets some on one of the rhino's face. You can't blame the rhinos for wanting to kill Sid after that.
* Ice Age, Sid the Sloth is this. Out of a combination of pity and the acknowledgement that he holds the herd together, nobody kicks him out. If there's one thing they can agree on, it's that Sid is a loser. However, they do care about him.
* Ice Age that takes him and his acorn through several time periods. It ends in the shade of what appears to be a huge oak tree full of acorns, but Scrat discovers to his dismay that it's actually a bronze monument to the last oak tree.
* Ice Age, the group takes a dangerous shortcut that isn't a shortcut at all, just so that Diego can hide the others from his clan.
* Ice Age: The Meltdown: A literal closed circle made from ice prevents the protagonists from leaving the valley. Their goal is reaching a "boat" (a vast piece of wood from a giant tree) to survive the inevitable flooding.
* Ice Age: The Meltdown dances along with the vultures, even continues to sing until Manny tells him to stop.
* Ice Age: The Meltdown: The film's villains are a pair of Mesozoic sea monsters that were sealed in ice for ages, only to be released as hale and hearty as ever when the Ice Age's glaciers begin to melt.
* Ice Age: The Meltdown: When Scrat dies, he finds himself in his version of Heaven, which has a gate decorated with an acorn. When he is revived by Sid, the squirrel gets sucked back into the living realm, trying in vain to hang onto the gate.
* Ice Age, then we cut to his hench-cats cringing as a sickening stabbing sound is heard.
* Ice Age, they have become this. Even the scenes with Scrat have gotten more cartoony over the course of the films.
* Ice Age. This helps the two sabre-toothed tigers to recognize how similar their pasts are.
* Ice Age wants to take revenge on the humans for killing half of his pack by killing the chief's son Rashan.
* Ice Age where the gang steals melons from some dodos. The scene quickly becomes a parody of a football game. When Sid returns with the last melon, he does a victory dance and spikes it. Oops.
* Ice Age which is pretty cute for a black card. Reportedly, the artist had never heard of a lemure (a minor evil spirit) and drew a lemur instead.
* Ice Age whose love for the animals brings them together in an unlikely herd and leads Manny on a journey of forgiveness to let go of his anger against Roshan's tribe.
* Ice Age, with small proto-elephants in a tar pit (they were doing it on purpose).
* Ice Age worshipped ancient Thran machines. Which were then taken over by Phyrexia, if I recall.
* Ice Age would later buy the film when they brought 20th Century Fox). As a result, it played a major role in establishing CGI-animated movies as a permanent fixture at the American box office—instead of just a minor novelty controlled by two competing studios.
* Ice And Fire has Lelouch, in spades. He's willing to go the extra mile for his

troops, even cooking for them and giving blood to the wounded. A good example of this is shown in Chapter 26, when he's talking to his men and chatting with them casually, in comparison to Zero’s dialogue with her subordinates at the same time being more professional and aloof.
* Ice And Fire has Sayoko threaten Jeremiah with this on more than one occasion.
* Ice And Fire: In Chapter 22, Cornelia does this to Euphemia while she's in bed with Suzaku. Awkwardness ensues.
* Ice And Fire, Kallen got a Geass from C.C. that lets her create illusions.
* Ice And Fire, Kallen's Zero mask, unlike the one Lelouch wears in canon, makes her look like this. More specifically, it's an ornate clown mask that's happy on one side and sad on the other. Subverted in that, despite being ruthless at times, she's not actually evil.
* Ice And Fire, Lelouch gives Suzaku a phone call, not knowing that he's having sex with Euphemia at the time. Needless to say, neither the Honorary Britannian nor the Third Princess are happy.
* Ice And Fire, Suzaku ends up being transferred to the Middle East after he caused a scandal by dancing with Princess Euphemia at a ball. It's there that he ends up meeting Lelouch, and becoming one of his greatest assets and best friends.
* Ice", an extraterrestrial parasite causes an Arctic research team, and later the investigating team, to turn on each other by increasing their paranoia.
* Ice Angel is also based off of) where the soul and habits of the deceased do live on in the new body but they will forget everything else about their adventures and time in Heaven and the Afterlife Bureaucracy. It is meant to help the soul and person go back to living a normal life.
* Ice: Another common breath weapon, ice is often included as a direct inversion of the popular fire breath. The most common form is a gale of icy air that freezes everything it touches, but volleys of icy shards are not unheard of.
* ice bath, and its more extreme cousin, cryotherapy, are used in sports medicine to help heal sore muscles after intense exercise. While some swear by them, their effectiveness and safety has been debated my medical professionals.
* Ice-Bat is also turned into a female character, a fact revealed from her bio on Hasbro's character website.
* Ice Bear almost never directly speaks to the other characters and is typically mute for most of the time. It's implied it may have been the result of his cubhood before meeting his brothers.
* Iceberg, Dirk Pitt instantly knows something is up with Kristi as she is supposed to have spent years living in the jungles of South America but her tan is far too shallow.
* Ice Block which lasts a minute and prevents a given amount of damage (based on spellpower). Against weaker enemies, that latter can functionally prevent all damage done to a mage.
* Icebones is a novel that follows the journey of a herd of Mammoths on Mars (just follow along), and at one point their youngest member is menaced by a giant seabird.
* Iceborne. Shara Ishvalda, while not immune to it, resist the flinch shot effect unless it's sent into falling boulders.
* Iceborne. upon sensing Fatalis' awakening, and running away as far as they can.
* Icebound, Grandmother Jordan dies at the beginning without ever appearing onstage, but she is discussed throughout the play, and on two occasions letters from her are read, which prove crucial to the plot.
* Icebox. He doesn't, but Rafael says that the others won't believe that.
* Icebox is about a boy from Honduras named Oscar who escapes to live with his uncle in America after he gets forced into joining a gang. Oscar barely makes it into America before immigration finds him wandering alone in the desert. He spends the rest of the film going through the immigration system.
* Icebreaker, Bond is sent on a mission with three other agents from fellow secret services to deal with a Nazi terrorist organization called Nationalist Socialist Action Army, which is led by man who envisions himself to be the next Hitler.
* Icebreaker into a trap, so that with him captured and delivered to his peers, he

could further his own career.
* Icebreaker involves him escaping to Paraguay with other Nazis after fighting on the Finnish-Soviet frontier during WWII. He grew frustrated living there since most of his fellow fugitives weren't really into the nationalist socialist ideology anymore, and he decided to create the Fourth Reich himself.
* Icebreaker seeks to start the Fourth Reich through terrorist activities.
* Icebreaker takes care of one of the snow ploughs chasing him by dropping a grenade from his car's doorway, pulling the pin from it with his teeth.
* Icebreaker, who is revealed to be working for them when the former's allegiance is made clear.
* ice, Brussels sprouts, and a human finger with fingernail, painted bright red.
* Ice Castles, which was her film debut. Presumably, it was easier to teach a skater to act than to teach an actress to skate at the level required for the character.
* Ice Climber, Nana (the P2 character) is just the Popo sprite with a pink parka instead of blue.
* Ice Climber, polar bears wearing sunglasses and swim trunks would show up and cause earthquakes. They could easily kill the player.
* Ice Climber: Popo wears a blue parka while Nana wears a pink/red one.
* Ice Climbers perform at all times as a duo. Taking out the lead Climber respawns them both as it would any other fighter; taking out the partner Climber severely cripples the lead, as their recovery power no longer works effectively (unless you count "boosts you upwards by mere millimeters" as working) and their attacks lose a lot of utility as they expect to be performed by both Climbers in tandem.
* Ice Cold in Alex: Captain Anson struggles with alcoholism throughout, but after his drunkenness leads to one of the party getting killed by German soldiers, he swears off alcohol altogether until they reach their destination in Alexandria. The fabled "ice-cold lager in Alex'" becomes part of the driving force keeping him and the crew going through all their struggles. The scene when they finally reach their reward is perhaps the most iconic need-a-drink (and damn well deserving it) moments in cinema history.
* Ice Cold in Alex, in which Anthony Quayle's "Nazi Spy Disguised As South African Officer" falls into some, and is exposed by his inability to remember the Afrikaans for "Quicksand" ("Wilsand"). Only reason he even sank was because he was rushing to get to his listening device to sink it before the others saw what it was, and because he kept struggling afterwards when they tried to get him out.
* "Ice Cold Rita" by Roddy whilst being dragged behind the Jammy Dodger on a rubber duckie with a guitar as a paddle.
* ICE comes out of left field and goes nowhere for the rest of the OVA.
* ice cream commercials casts using Lyons-Maid popsicles to save the world.
* "Ice Cream for Ke$ha" features Tori trying to drown her sister Trina.
* Ice-Cream Koan is from Bodissey since he's said practically everything.
* Ice Cream Man gets a lot of mileage out of this trope with a species of deadly venomous spider that a boy is keeping as a pet. It manages to gruesomely kill several people with its bite before the story is over.
* Ice Cream Man ice cream man who drives around in his truck spreading misery wherever he goes.
* Ice Cream Man is a horror anthology comic that connects a series of disparate stories, all of which involve the eponymous Ice Cream Man, a malevolent supernatural entity.
* Ice Cream Man (the eponymous ice cream man) shoves ice cream down a boy's throat inside his ice cream truck.
* Ice Cream Man. The zombies' cook is a mannequin and he feeds Will to them for brunch.
* Ice Cream Man who mixes parts of people who he has killed into his delicious frozen treats.
* "Ice Cream of Margie (with the Light Blue Hair)" shows Homer, Lenny, and Carl playing a chair-hockey game. They disagree not only on the rules, but also on what game they're even playing. Homer claims it's called "Cincinnati Time-Waste", and

Carl pulls out an official Cincinnati Time-Waste rulebook.
* Ice Cream Of Margie With The Light Blue Hair", we find Homer, Lenny, and Carl playing office chair hockey at the plant; Mr. Burns comes in and chastises them for goofing off...but then we see him complaining that they're not practicing their chair hockey moves hard enough.
* Ice Crown because of his injuries. Roane uses her medikit to patch him up.
* Ice Crown, Roane and Princess Ludorica are drugged in the coach and wake up indoors.
* Ice Crown, Roane is distraught when the ship leaves without her, thinking herself alone; Nelis assures her that she has found a home.
* Ice Crown, the heroine sees the queen and her attendants in full mourning. Her ability to describe this clinches the accuracy of the vision in question.
* Ice Cube, because of the firestorm of controversy surrounding him at the time.
* Ice Cube both went on to greater commercial success in their solo careers. However, influence-wise, N.W.A. still wins.
* ice cubes are an effective way of undoing the effects of the ability.
* Ice cubes are "high-quality beverage temperature devices. Imported."
* Ice Cube's 'It Was a Good Day' is the musical equivalent of this trope, considering the usual subject matter of his songs. "Plus nobody I know got killed in South Central L.A./Today was a good day."
* Ice Cube's songs from his "AmeriKKKa's Most Wanted" to his "The Predator" albums also reference this trope.
* Ice Cube stated that his favorite song overall and to perform live is "It Was a Good Day".
* Ice Cube's "We Had to Tear This Motherfucker Up" is about the L.A. riots. Including the rash of arsons. It's from the point of view of a rioter.
* Ice Dancers are easily one of the most capable teams competing since, being Olympians, they're at the peak of physical fitness and being the show's villains, are willing to cheat mercilessly as well. They only have one weakness: Josee's extreme claustrophobia which slows them down several times.
* Ice Dancers Jacques and Josee state in the Brazil leg of the race that they have been making great costumes since they were kids and that they have known each other for fourteen years. Taking into account, the
* Iced Earth fans have coexisted since the bands toured Germany together in the early 90s and became fast friends. When Jon Schaffer (of Iced Earth) and Hansi Kursch (of Blind Guardian) formed their side project Demons And Wizards and released two albums, which solidified the connection in the eyes of fans.
* Iced Earth) had a song called "Lobotomy" on their first demo Burning Oasis, as well as on live bootlegs. The demo has yet to be shared online by anyone, unfortunately.
* Iced Earth has quite a bit of information about the three days of battle, with each song focusing on one day.
* Iced Earth have employed this trope on multiple occasions, making sure that their dark speed metal is mixed with a few more chilled out moments. The first album had Curse The Sky and Solitude, Night Of the Stormrider had Before The Vision and Reaching The End, and Burnt Offerings had The Pierced Spirit. The Dark Saga has I Died For You, which was a power ballad and one that would prove influential on later stuff. Something Wicked This Way Comes has a lot of softer songs to balance out the heavy ones, although they have heavy choruses, the most notable ones being Melancholy and Watching Over Me, both of which got them new fans. Watching Over Me is a notable example as it is sandwiched between two of the heaviest songs the band did, Disciples Of The Lie and Stand Alone. Though the band haven't done it as often since then, there are numerous examples of this later on, for instance When The Eagle Cries from The Glorious Burden, and A Gift Or A Curse from The Crucible Of Man.
* Iced Earth, however Hansi Kursch has stated that many of the songs have more than one meaning, and are more related allegorically, such as songs about Captain Ahab which reflects Roland's quest.
* Iced Earth is the sequel to the former album and was released in 2008.

* Iced Earth's Cast In Stone is Written On The Walls with new lyrics and reduced instrumentation, as Gene Adam (who wrote these parts) did not allow the band to use them. However apart from this, the backing track is identical to the original version. It is debated amongst fans if this constitutes a new song or not.
* Iced Earth use rapidly tolling bells on Boiling Point off their newest album Dystopia.
* Iced Earth. You really have to know the whole story to fully understand, and that would take a very long time to explain here.
* Ice devils, or Gelugons, and Narzugons are both rank 10. Ice devils are Hell's commanders, while Narzugon are made from corrupted paladins.
* Iced tea. (This one is banned in the United States for obvious reasons)
* ICEE is another trademark used for a frozen drink that is widely genericized.
* ice enough that his sugar side turns up more frequently in Series 9, but even then, it usually is only around certain people — Clara, children, his number one fan Osgood, and River Song being the key examples.
* Ice Fantasy: After Ka Suo and Shi have to leave the Ice Tribe in a hurry, they quickly realize that their white hair and blue eyes draw too much attention among the mortals. Consequently, both magically change their appearance to a more human one, with dark hair and brown eyes.
* Ice Fantasy), easily frees himself, and stays like that for the rest of the series.
* Ice Fantasy. He simply averts his eyes and tells her to put some clothes on before she catches a cold.
* Ice Fantasy: Ka Suo, an immortal and a prince of the Ice Tribe, falls in love with Li Luo, a mortal commoner.
* Ice Fantasy: Ka Suo's grandmother, who's a more formidable warrior than most immortals half her age and doesn't hesitate to rescue Xing Gui from the Fire Tribe's clutches.
* Ice Fantasy: The Fire King manages to destroy most of Ka Suo's spirit, which results in Ka Suo losing his supernatural powers and longevity.
* Ice Forged. First a green ribbon of fire snakes across the sky and fireballs begin to fall like meteorites across the city of Castle Reach, then the entire ribbon comes crashing down across the city and smashes Quillarth Castle to the ground.
* Ice Forged used as a reason for Kestel's personality: in the time we know her she simply takes it in stride as something that happened to her a long time ago.
* Ice Fury, the relationship between Toothless and Wintergale can be seen to represent the new alliance between Berk and Arendelle, considering that the two dragons are each the only known living Furies- regarded by many as the most intelligent species of dragon- and also belong to the rulers of both kingdoms, even if Hiccup and Elsa do not have that kind of relationship themselves.
* Ice Gift Elie and Rikter find a man in a melting iceberg. He wakes up after defrosting.
* Ice Gift is set in a world affected by global warming after a short ice age.
* Ice. Hitsugaya, the most prominent ice-user, goes for the "humidity" explanation, even when conjuring icicles the size of buildings.
* Ice Hockey and everyone else. In the whole history of international Ice Hockey only ~10% of the World and Olympic championships were won by the teams outside of this club.
* Ice Hockey could have a fight break out automatically just by having two characters fight too much for control of the buck. The winner is determined by whoever presses A the most often, and again, only the loser gets sent to the penalty box.
* Ice Hockey game is televised. The first broadcast of its kind. The game was between the New York Rangers and the Montreal Canadiens.
* ice hockey game, the Soviet Team, who agreed to play by NHL rules, began protesting calls made by the officials. After vocal complaints weren't going anywhere, the Soviet Coach opted to call the entire team back and leave the game. In another rage-quit move, the Flyers owner threatened to not pay the Soviets for

the game should they leave. Eventually, the Red Army team relented and continued play, eventually losing.
* ice hockey getting a breakaway and going one-on-one against the goalie—or, of course, a shootout, which is a series of forced one-player-versus-goalie breakaways.
* Ice Hockey has a form where one player takes the puck from the halfway line, skates towards the goal and has to try and score in a one-one one with the goalkeeper. The North American Soccer League introduced a variation of penalty kicks that took inspiration from Ice Hockey, where the player would start 25 yards away from the goal and have to dribble towards the penalty box and shoot past the keeper. The majority of these attempts failed due to the strict time 5 second shot clock which stopped players from getting anywhere past the start of the penalty box and thus a long way from goal.
* Ice Hockey, having coached eight teams and been ignominiously fired from many of them.
* Ice Hockey. He later coached hockey teams in Russia and China, only to again be fired from both jobs.
* ice hockey. More likely in smaller arenas that use cheaper glass but even specially-designed NHL-quality glass can shatter with a hard enough hit.
* Ice Hockey of Kris Draper, Joe Kocur, and Kirk Maltby. This line led them to two straight Cups in 1997 and 1998 (and another Cup in 2002 after Darren McCarty had succeeded Kocur on the line) and permanently encoded this technique in the essence of the game.
* Ice hockey players Douglas Murray and George Parros are both the epitome of a stereotypical hockey player (large, heavy hitters who are not afraid to get physical during a game), yet they're also both
* Ice hockey players from Europe are rumoured to be fond of deliberately teaching "tricky" basics of their mother tongues to their American and Canadian fellow players. New York Rangers embraced the concept and used it in their commercials with Bobby Granger, a quintessential ice hockey fan.
* Ice Hockey's general level of violence: "I went to a brawl and then a hockey game broke out."
* Ice Hockey so that fighting majors would still have the two sides play 5-on-5 with each participant still in the box.
* Ice-Hockey teams. Hurt one player, especially the goalie or star player,
* Ice Hockey team the Belfast Giants managed to do this to their owner. A month after buying a majority share, it was discovered that he was a registered sex offender in Florida charged with lewd and lascivious battery. The entire team cancelled their contracts with the club, and the trust who managed their home arena banned the team until the owner sold his share.
* Ice Hockey wear masks attached to their helmets to keep pucks from flying into their faces. These masks and helmets tend to be highly decorated according to the goalie's tastes.
* Ice Hockey, which is perceived as violent, dangerous and lionizing negative masculine stereotypes.
* Ice House (1989), one character, a Greek immigrant, needs to marry Kay to become a permanent resident. Things get complicated when an old boyfriend also wants to marry Kay.
* Icehouse, an Australian rock band, only had two notable hits in North America: "Crazy" and "Electric Blue".
* Ice Ice Baby. Barack is cautious and thoughtful, and refuses to be divisive. Joe is the happy-go-lucky, loudmouth of the bunch, Bill is humble in his talents, quiet and always willing to lend a helping hand. Mitt stays plotting, and only wants what's best for him. The four boiz work together to stop the assassination of Queen Elizabeth II.
* Ice Ice Baby. He plays by the rules and the citizens of Sochi thank him for it.
* Ice Ice Baby" to know it's not for him. He spits it out in shock over the foul taste, right into Scott's face. Scott throws his bowl back in revenge.
* ICE in Season 7 generally wear orange, with anyone who committed a felony

wearing red.
* Ice is known to be less dense than water, but just how much less dense is a surprise to people. As
* Ice King is another example of the show playing with this trope. He has pretty much every trait of your standard Evil Wizard Overlord: spiky headgear, rules over his own kingdom, is
* Ice King is consumed by GOLB. Due to the way GOLB digests things (he gradually reverts them to their base components), the crown and its magic is wholly separated from Simon, rendering him into the man he was before he put it on in the first place. This time he doesn't suffer rapid aging. Unfortunately, Betty then sacrifices herself by using the crown to merge with GOLB in order to save Simon and Finn. Meaning Simon and Betty still can't be together.
* Ice King is over a thousand years old. He's more insane than actually evil, though.
* Ice King places a hit on Finn and Jake intending the hit man, The Scorcher, to hit them, "like on the shoulder or something". Anyways he has trouble getting the Scorcher to stop hunting them down.
* Ice King skirts around this as his status as crazy ruler of the ice kingdom started being undercut by his transition to
* Ice King's past comes up again in "I Remember You", when it's revealed that Simon took care of Marceline when she was a child in the aftermath of the Mushroom War.
* IceKunion (now defunct, titles it used to own are now published by
* Iceland (ageless nation with the looks of a 17-year-old) and Turkey (also ageless nation, looks like in his mid-to-late 30's). More exactly, the
* Iceland also does this when Denmark tells him that cows are flying through the sky during the 2011 April Fool's event.
* Icelanders outdo the Swedish here. Útburðir also exist in Icelandic folklore. Their appearance is about the same as when they were left for dead, but they can crawl and communicate, and are swathed in rags, often bloodsoaked from the afterbirth. They also howl an otherworldly mewl called útburðarvæl. Should an unfortunate traveler chance upon an útburður, they are in grave danger, as the infant will attempt to crawl three circles around the traveler, and upon the completion of the third circle the traveler will lose his mind irrevocably. Útburðir also come for their mothers for various reasons, some with malice in mind, but others in innocent ways, yet the ending is always terrible.
* Iceland has a whole family of giants who visit around Yule to give gifts or mete out punishments.
* Iceland has no standing army. However, it's a member state of NATO, meaning that should it ever be attacked by another power, the United States and most of Western Europe can be expected to come to its defense. NATO militaries even take turns on active duty protecting them.
* Iceland having a rather small population with no last names, there is apparently a smartphone app meant solely to avert this trope.
* Icelandic ad for prostate cancer awareness involves an (imaginary?) barbershop quartet singing to an old man while encouraging him to get checked for cancer symptoms. It does, indeed, make this serious subject considerably more funny.
* Icelandic radio theatrical comedy Harry & Heimir would do this a few times per episode. From noting they only had x minutes to solve the mystery of the week before the end of the episode to reading the other character's lines in the script; and in the finale of the second season they drove a horse carriage out of the studio, onto the streets of Reykjavík and finally crashing. The show ending where they were recovering in the hospital.
* Icelandic Saga). A major part of the story is Gunnlaugur confronting his rival in front of the king of Norway and them doing the ancient equivalent of freestyle battle rapping to see who the king favours.
* Icelandic sagas, a fight to the death is put on hold so one guy can tie his jacket around his belly after a wound made his guts spill out.

* Icelandic Saga Society. After momentarily lapsing into a P.R. film for business investment in North Malden, an action scene unfolds with "INVEST IN MALDEN" occasionally flashing on the screen (along with knights carrying signs shilling for Malden.)
* Icelandic Sagas were all prose, meaning they didn't rhyme. They tell stories of the ancient rime giants (which many translations call frost giants).
* Icelandic sitcom, Heilsubælið Í Gervahverfi, a sitcom set in a hospital has the head doctor have similar facial features to Hitler, same hairstyle, same mustache, similar voice, has the swastika on his coat, doesn't have the salute but close to it and as a greeting, he says "Hæ, litli!" which translates to Hi Little, but does sound eerily familiar if you say it fast. And his first name? Adolf.
* Iceland provided another example with anti-capitalist electro-thrash BDSM group
* Iceland's largest telecommunications company is named Síminn, which means "the phone" in Icelandic, and is pronounced almost identically to English "semen".
* Iceland was born and spent his younger years alone, with only vague sensations of an "older brother" that he dismissed as "his own delusions." In
* Ice looks and acts like a 32-year-old. He is the same age as Sabre 9.
* Ice Magic also exists, its not really part of the eight winds of magic and is only practiced in Kislev by its Ice Mages.
* Iceman (1984): The titular character is a primitive man is frozen for many thousands of years in a glacier. He is revived without much in the way of complications.
* Iceman and Jubilee also count, as they spent almost all of their screen time during season 2 together, always went along together on wacky hijinks, and seemed practically inseparable.
* Iceman and Kitty is hinted at, especially during the ice skating scene.
* Iceman and Rogue. Iceman seems disappointed that Rogue "cured" herself, even though she did it for both of them. It's unknown what their relationship is now, especially since
* Iceman as a mini-series this time — and see them both a lot more beloved.
* Iceman, Bobby manages to kill an alien fungus by draining all the moisture from a sealed room, but it takes much, much longer than you'd expect from the volume of ice he's producing.
* Iceman, "Charlie" is discovered in a block of ice, thawed out and revived, after 40,000 years of being a Caveman Popsicle.
* Iceman does it more than a few times in everything he's in. But he usually makes sure to leave heads uncovered.
* Ice Man had a white strip on his face, that glowed ice-blue when he spoke.
* Ice Man has C-3PO's oral design, though his mouth flashes as he speaks.
* Iceman. He has had a difficult life, starting in his origin story. He first used his powers to save his girlfriend Judy Harmon from a would-be rapist. She was scared of him and ended their relationship. His status as a mutant became public knowledge and he was targeted by a mutant-hating mob. He has had a difficult relationship with his father William Drake, who does not trust mutants. He has had many love interests but his love tends to be unrequited. Even his most successful relationships have ended in sad notes. He feels insecure about his position in the X-Men since the once tight-knit is more recently filled with people he barely knows. He still faces life and dangers with a series of wisecracks.
* Iceman sports one. Shawn Ashmore has said in interviews that it signifies his character's maturity.
* Iceman. They even have the same way of getting from place to place: creating ramps of ice to skate everywhere.
* Iceman tried to impress a girl by talking her about the School, and everything that happens in it, exposing its secrecy. Xavier had no option but to erase it all from the memory of both.
* Iceman. Unlike most examples here, the results are portrayed fairly realistically.
* Iceman was the Lancer of the original five, with an attitude bigger than

Connecticut and a constant bone to pick with
* Ice Nine Kills'', except the doll comes pre-damaged/patched up, and the whole band has clothes and makeup to make them look like said doll to up the creepy factor.
* Ice Nine Kills, is about a woman who "turns the villain to the victim", i.e. murders her rapist.
* Ice Nine Kills theme in its bridge. The band's members also dress like horror movie villains.
* Ice On The Rhine). In which Elsa builds a giant ice dragon to fight with Napoleon's armies at Waterloo, Anna is a semi-psychopathic soldier, and other such fun things.
* Ice Palace: A castle made of ice or one that's completely frozen over.
* "Ice Pillars Break": Each player has a group of ice pillars set up in the stadium, and whoever has more pillars standing when time runs out wins. The pillars can be destroyed any way a player wants-
* Ice Planets: DB/907 (issue 179), Keeron (issue 33), Mongros (issue 43), Pax Ultima (issue 166), Sartog (issue 228), Thrymheim (issue 127), Vardy (issue 87)
* Ice Princess and the "girly" hobby is still "girly" (figure skating) but the "manly" one is replaced with a "brainy" one (math). However, it's her knowledge of physics and math that helps her be a great figure skater.
* Ice Princess is a figure skating prodigy in addition to being a math genius whose been offered a scholarship.
* Ice Princess is, despite the publicity he's been getting for "rescuing" the Mayor's baby, as well as his mayoral campaign, and instead, fell for his lie that he's a "talent scout", which led to her kidnapping and eventual death at The Penguin's hands, in his attempt to frame Batman for it.
* Ice Princess plays a math and physics nerd who applies her skills to becoming a figure skater, utilizing it to figure out how fast an ideal spin is and how much power she needs to apply to do it, and so on. She goes from 0 to competing for a U.S. Nationals spot in a few weeks.
* Ice Princess: The story of a Math Genius who wants to compete as a figure skater.
* Ice Princess traps Casey in the girls' locker room to keep her from making the ice-skating tryouts.
* Ice Princess, where the protagonist is the same age, sex, and ethnicity as the other young figure skaters she wants to compete with, yet is hassled for this ambition – even by her own mom – because she's a science geek.
* Ice Queen. But it’s revealed in Ikari Gozen that this is because of the pressure put in her by her mother, whose so strict she makes Adrien’s dad look like a free-range parent. She’s so lacking in basic social skills, she depends on an app to figure out how to appear friendly. All she wants is a chance to make true friends, which is why she goes against her mother’s wishes and enters a contest to make a friend.
* Ice Queen didn't realize that she should have integrated herself into the colonists when she arrived at her new executive job, instead of spending three months hardly communicating with them at all. She's actually rather caring and considerate, but that's not how she presented herself.
* Ice Queen: Female characters with a cold disposition tend to be introverted.
* Ice Queen has her own fanfiction with gender-swapped counterparts to the already gender-swapped counterparts, starring Flynn the Human Being, Jacques the Raccoon, and Ice President. Ice Queen's fanfiction has Ice President reading his own stories, starring Lynn the Person and Janet the Fox.
* Ice Queen makes her unworthy of being in love with the kindhearted Shirogane.
* Ice Queen who seems to be willing to trample on Marinette’s chances with Adrien knowing of her affections. But later down the road, she’s shown to be lonely and not very capable of being friendly thanks to her mother’s strict and emotionless rules, and hinted to be more than Adrien’s love interest.
* Ice Revolution Harding/Kerrigan affair. Subverted when we meet the so-called perpetrator and learn that it truly was an accident and she's still haunted by guilt.

* Ice Revolution person) Masaki decides to take up the very girly sport of figure skating, culminating in her dropping a Bridget on an entire ice arena when she appears on the ice at her first public performance wearing a skating dress. Everyone at the rink had just assumed she was a boy up until that point.
* Ice Revolution. She completely uses the wrong word choice when asking her much older coach for help in this regard ("Please... make me a woman!") with predictable results.
* Ice Ribbon began largely with teenage girls wrestling on mats. While Emi Sakura eventually whipped many of them into well regarded women athletes and Ice Ribbon into a much respected promotion on the Japanese independent circuit, it's origins are among the most humble of any promotion ever. Neo only had Ice Ribbon slightly beat in having a ring, and while some of its girls also became well regarded women wrestlers, they largely did this in spite of the sparse training Neo gave them and the Neo promotion itself only lived on in World Wonder Ring STARDOM using one of Neo's title belts as its own.
* Icerigger, and the natives mount anything heavy that needs to be transported on ice skates.
* Icerigger: the volcanic caldera in which the city of Poyolavomaar is located does not erupt, although Williams does point it out to explain the locale's defensively-convenient geography.
* Ice Road Truckers Alex got into trouble because he could not handle the gear shift on his truck. He has driven trucks for decades but was not familiar with the setup in the truck he was given to drive and would shift to the wrong gear.
* Ice Road Truckers exemplifies this trope. In the tense seconds leading up to the commercial break, it will frequently look like some unexpected event that caught a driver off guard is about to lead them to their death at the bottom of a frozen lake or an icy cliff. Cut to commercial, come back, and we find out that there's a loose bolt on one of their back wheels or something.
* Ice Road Truckers like the one in danger. Justified, as having divers shoot scenes under such frigid circumstances is too darned dangerous, never mind expensive, to do repeatedly.
* Ice Road Truckers uses Aerosmith's "Livin' on the Edge" for its first four seasons.
* Ice Scream centers around an evil ice cream man named Rod, who lures children into his van and uses them to make ice cream.
* I.C.E.'s Cyberspace: The Skateboys is a gang that carries messages and packages while riding motorized skateboards.
* Ice" shows the first and last videos of the sequence. At first, the tidy, cheerful and well-lit scientists of an arctic research base report digging ice cores from record levels; the second is gloomy and shaky, with one disheveled man saying "We're not... who we are... we're not... who we are..." before being attacked.
* Ice Spiders: Upon finding out that the genetically-engineered giant spiders might be escaping from the lab, the main scientist drags his feet at even considering there's a problem (although his colleague is much more helpful) and tries to keep his man-eating creations from being destroyed, while the soldiers rapidly deploy to contain the threat and protect the nearby civilians and tend to ignore him.
* Ice Spiders, wherein Olympic athletes are terrorized by, you guessed it, Giant Spiders at a ski resort.
* Ice Station in his group (not on the same side as the guys that threw them in) to determine which will die first. After knocking his opponent to the ground, the first thing he does is bring his cuffed hands beneath his feet to be able to fight better. The bad guys don't fix this after the fight, making it easier for him to escape later.
* Ice Station Zebra centers on a lonely Arctic research station that happens to be the closest manned site to where a reconnaissance satellite fell to Earth. Both the Soviet Union and the United States desperately want that satellite, since it managed to photograph secret military sites worldwide before falling out of orbit. It comes down to a race between Soviet fighter jets versus an American nuclear

submarine.
* Ice-T, but he can't wrap his head around that and drug dealing is making him more money than he could ever hope to have otherwise, so he goes right back to it.
* Ice-T episode dealing with an armored car theft the team was supposed to prevent.
* Ice-T. He replied, "I was paid $800,000 for that movie." The host moved on.
* Ice: The White Walkers produce snow wherever they go and are invulnerable save with if especial substances are use against them.
* Ice-T joined the U.S. Army after high school, and after serving for four years, returned to his old neighborhood and eventually joined his school friends in crime. His military experience gave him the tools to plan and perform bloodless jewelry store robberies and the like.
* "Ice to Know You" has the scene where the main group is attempting to run from a yeti in the Maxum Mansion.
* Ice (Tora Olafsdotter). White hair, blue eyes, and she's the princess of a magical northern tribe. Sigrid Nansen (Icemaiden), who served as Tora's temporary replacement in the Justice League International, also had white hair but hers was the result of a science experiment to replicate the mystical ice powers of Tora's tribe.
* Ice trolls use floating weapons, zulu shields and tiki masks to guards their houses, and build giant Mesopotamian-style/Babylonian Zigurats, while worshipping/killing animal gods, and practicing human(oid) sacrifice.
* Ice-T's "Cop Killer") was never released as a single. That song has never been re-released, and became known for the controversy surrounding its lyrics.
* Ice-T's "Gotta Lotta Love" is about the Watts Truce ushering in an age of peace.
* Ice T's song with Bodycount, "Now Sports" criticizes the news for its vapidity and indifference to human suffering:
* Ice turn into a human man, he can only do so when Cassie can't see him, and usually only for the purpose of them sleeping together.
* Ice, two stranded astronauts find an advanced moon base built by humans from before Noah's flood. The technology is far beyond anything they've seen.
* Ice, when fleeing colonists reach your town and arrive at your arsenal, they are transformed into Skirmishers, a light infantry unit and something of an equivalent of militia.
* ICE where two assassins shoot a contact who has demonstrated he enjoys watching security footage of rape.
* Icewind Dale from a goblin shaman. He is alive and recovering but only halfway conscious and lucid and speaks in riddles.
* Icewind Dale gives us various character voice sets with this feature. Most are annoyed, some start cursing the player, and one even plays along with the player and then mentions that he knows a druid that can "hook you up with some really good stuff".
* Icewind Dale has a similar start. Thankfully, there are some moderately challenging sidequests in the first town to get experience. Going on to fight the first goblins will probably get you killed, especially your squishy wizard, with his 4 hitpoints and one spell (two if you have maxed Intelligence).
* Icewind Dale has drums that appear in the orc war-camp. If you approach them, they begin beating, summoning orcs to attack you until they're destroyed.
* Icewind Dale. In Shattered Hand, you could find a dirty old sack in the hands of one of the goblins, which turns out to be a completely malfunctioning Bag of Holding. Instead of using it to store things, you could open it up, once a day, and try to shake something out. Results range from mildly magical weapons and arrows to jewelry of varying value and dead cats.
* Icewind Dale is quick to point out the slip up, at which point the boss essentially disowns the pun with embarrassment claiming it unintentional.
* Icewind Dale's chest can be unlocked at the very beginning of the game. The only reward is a note taunting the thief.
* Icewind Dale series has "Heart of Fury" mode, which was designed for characters that have completed the original campaign. In this mode, enemy stats go through the roof. While it's possible to start Heart of Fury with level 1 characters,

successful completion is another matter.
* Icewind Dale series. Trying it in the sequel is lunacy (doable, mind you, but still lunacy), because the Challenge Rating system ensures that you'll soon end up gaining as much XP solo as you would with a full party, although backup characters at level 1 (lowering the average level) who do no fighting can mitigate this to some degree.
* Icewind Dale, she gives you a "grain of sand from the lake's bottom" (a pearl that's worth a decent amount of gold at that point in the game) as a reward because she knows that surface dwellers place value on such things.
* Icewind Dale, the final boss was flat out unaffected by any spell or other magical effect. He not only never took damage, but he also wouldn't even show the flinch animation if caught in an area effect burst, and when the characters and how they were affected by one spell or other was displayed at the bottom of the screen his name would be completely bypassed, unlike other enemies that had super magic resistance, like Iron Golems, which would display something like Iron Golem: Magic Resistance in response to being hit by a spell.
* Icewind Dale, there's a powerful two-handed sword you can find that has a backstory as having been given to a group of women when they prayed to the god of vengeance for something to keep them from being used as sex slaves. He responded by giving them a dagger that they used to scar their own faces. As each one was cut, the dagger grew larger until it finally became its in-game size.
* Icewind Dale Trilogy. The lore states that Crenshinibon was specifically created as a giant middle finger to the "good" races as it was powered by the symbol of all that is good — Sunlight. The liches apparently had something of a sense of humour.
* ice world natives with claws on their feet that act as natural ice skates, and sails beneath their arms that let them catch the wind for propulsion. The stavanzer, a gargantuan herbivore from the same icy planet, slides on its belly like a slug, propelled by blasting air out its twin posterior vents and dragging itself forward with two colossal ice-gripping tusks.
* Ichaicha Suru to Okane ga Waichau Futari no Hanashi, but Natsuki naturally assumes she's talking about sex.
* Ichaicha Suru to Okane ga Waichau Futari no Hanashi: Haru's boss at the restaurant cares about his employees, even paying for a cab to take her home when she collapsed from overwork.
* Ichaicha Suru to Okane ga Waichau Futari no Hanashi: Hojo and Haru's apartments are next door to each other, and she often sleeps over at his place to make money appear.
* Ichaicha Suru to Okane ga Waichau Futari no Hanashi It's not hard to see how Natsuki gets the wrong idea.
* Ichaicha Suru to Okane ga Waichau Futari no Hanashi sleeping next to Hanasaki, and runs to stand in a cold waterfall to stop being turned on before she wakes up.
* Ichaicha Suru to Okane ga Waichau Futari no Hanashi. Strangely, whenever they show affection to each other, money appears out of thin air. They take advantage of this, "acting" like they like each other (at least in private), but worry that the other one thinks they're only interested in the money. Eventually, they do admit their feelings, but they haven't told anyone else yet.
* Ichaicha Suru to Okane ga Waichau Futari no Hanashi Touma, and lingerie and handcuffs that Touma had bought for his own girlfriend, she assumes Touma is Aki's girlfriend and runs off.
* Ichaicha Suru to Okane ga Waichau Futari no Hanashi: When Touma makes him think Haru holding his hand was just a dare, Hojo slams his head on the table in despair.
* "Ich bin Berliner" translates to "I am a Berliner." "Ich bin ein Berliner" means "I am a particular Berliner" or "I am one of many Berliners." It's also worth noting that the kind of jelly donut known as 'Berliner' in other parts of Germany is usually called 'Pfannkuchen' (literally pancake, and used in that sense elsewhere for extra confusion) in and around Berlin itself. For more detail, see
* Icheb becomes a long-range version (as in 30,000 light years from Starfleet Academy) in Season 7, being instructed by the command staff of

* Icheb for his Borg parts and left him to die, at first it seems like Picard has persuaded Seven of Nine not to go through with the murder. However, she teleports back to the casino and vaporizes Bjayzl with her phasers anyway.
* Icheb is even worse than Seven, having been assimilated as a baby. When working close with B'Ellana, he misinterprets her behavior and several physiological readouts as indications that she wants him. Later, when she faints, he scans her with a tricorder and diagnoses her with a parasite of some sort. Seven (slightly more versed) explains that this "parasite" is called a fetus.
* Ichibē Hyōsube of the Royal Guard has a technique called Futen Taisatsuryō which can steal 100 nights from Soul Society 100 years in the future to completely obliterate the
* Ichigaya, a clandestine paramilitary spy organization, keeps the code name "I-9029" in reserve for agents that fit this description. Every 9029 has been extremely good at their job... and has had an insubordinate streak a mile wide that makes their handlers want to tear their hair out on a regular basis. We mostly see this in Yuuji, the current 9029, but later entries reveal his mentor and the previous 9029, Asako, was just as bad, if not worse (where do you think Yuuji learned it?)
* Ichigekiden (The Legend of Ichigeki), the manga by Yasuichi Ohshima, features Sakiko Sakamoto, protagonist's mother, who is the successor of old marshal arts clan and an expert marshal artist herself. She ran away from her family to marry an ordinary office worker and settled as a plain housewife, but often shows her hidden nature to help her children or solve the various problem around the neighborhood.
* Ichigenme... The First Class is Civil Law, main character Tamiya meets love interest Tohdou, who introduces himself with a kiss... but Tamiya is just irritated. His real Closet Key is a substitute professor who gives him one-on-one tutoring, and it's only after he's had a confusing encounter with him that he realises he's gay.
* Ichigo and Orihime attempt this as they're about to be separated on their entry to the Seireitei, but they fail. Similarly, Ichigo tries this with Senna as she's abducted by the Dark Ones in the first movie, but it also fails.
* Ichigo and Tatsuki are childhood friends. They grew up together, trained at the same dojo, and Tatsuki recalls how much his mother's death affected his family. Ichigo, most of all. Though she eventually laments how much they've grown apart over the years
* , Ichigo assumed Tatsuki and Orihime were dating from how close they are. The fact Orihime says stuff like "I promised Tatsuki I would come back to her" really doesn't help matters.
* Ichigo does this a lot according to Tatsuki, though not too frequently onscreen — not only does he get names wrong, but he misread Uryu's name as a GIRL. He also manages to totally forget about a classmate who's been bugging him for years to join his club.
* Ichigo get one of these when they voluntarily engage in acts that they know will end up destroying their powers forever (they both eventually get them back).
* Ichigo gets it too. While he had a month to get to know Rukia, and even longer for Orihime, he was willing to risk his life for Nel after knowing her for a few hours, despite her status as an Arrancar and thus technically being his enemy. It's even more
* Ichigo gets really shocked when he finds out Yoruichi has a brother and asks why she never mentioned him before. She says she didn't think it was important and asks why she should just randomly tell people facts like that.
* , Ichigo gladly tells him that he can takeover for Ichigo in protecting Karakura from Hollows. Uryu however insists that he won't allow Ichigo to simply forfeit and uses Hollow Bait to prove he's better. The only reason Ichigo doesn't kill him afterwards is that Urahara took Uryu away and hid him.
* Ichigo; he was rendered incapable of connecting with people who weren't his equal in power.
* Ichigo in particular is singled out for this, with an elder captain noting that he "gained power decades before he was ready to use it", though all of his friends

fall into the category of
* Ichigo is naturally faster than nearly everyone, but his Bankai further grants him the ability to perform hyperspeed combat; he creates speed-clones by accident whereas everyone else has to consciously create them. Ichigo has only ever performed hyperspeed combat once because the force of the power he needed to use to overcome Byakuya's tremendous speed almost broke his bones from sheer effort. When he develops Fullbring, he masters Bringer Light
* Ichigo is Special Average or Common beauty, Riruka mentions how handsome he is, but that's it.
* Ichigo Kurosaki continues to fight a hopeless battle against his nemesis Ulquiorra, refusing to ever put down his sword. Ulquiorra kills Ichigo to prove his point on humans; Ichigo gets better...
* Ichigo Kurosaki. His father tells him it means "the one who protects"; true to form, it's written with the kanji for "one" and "protect", but is a homonym for the Japanese word for "strawberry". Just
* Ichigo Kurosaki vs Byakuya Kuchiki is a classic case; Ichigo fought him
* Ichigo Mashimaro concludes with one of these. Nobue tries to preserve Matsuri's belief in Santa Claus by shutting down Miu's attempts to tell her the truth, and by dressing up as Santa Claus herself.
* Ichigo no Gakkou plays it for drama and deconstructs the concept. Teacher Ichigo Oomiya and student Kurumi start a relationship in high school, and the latter ends pregnant. The two end up keeping the child and do love each other genuinely, but it's not without consequences; Ichigo gets fired, Kurumi's friend initially feels betrayed because the latter knew the former had a crush on Ichigo, both of the couple's parents had a hard time adjusting, and they raise the question of keeping the child and dropping Kurumi out of school or aborting the child and letting Kurumi continue schooling. She's even shown to be wistful of the school life she could have had, even though she does love her family as is now.
* Ichigo, Renji and Kon when they saw Kirio Hikifune's slender form, which is revealed after cooking.
* Ichigo repays the favor to him at the final battle of the Arrancar arc when stopping his music.
* Ichigo's about to get his throat carved out, and suddenly manifests Blut Vene... a Quincy
* Ichigo's core adventure group consists of himself, Sado, Ishida, and Orihime. However, by proxy it also includes Rukia and Renji, making Rukia and Orihime the only two women in a six-person group.
* Ichigo's father is a bumbling idiot who pervs over his daughters and his deceased mother was someone he remembers as gentle and kind. Kon and the audience finds out that Isshin is a Shinigami when Aizen's proto-Arrancar almost kill Kon. However, it's hundreds of chapters later when Ichigo learns the truth about Isshin, and that's only because Isshin intervenes in Ichigo's fight with Aizen to prevent Aizen revealing the truth about Ichigo's mother, who was a Quincy. Ichigo doesn't have much time to stay shocked at Isshin's reveal given that he's in the middle of a fight with Aizen and Gin, so it takes almost another hundred chapters before Isshin's back story reveals he's the former 10th Division Captain who went AWOL twenty years before the story began. The Gotei 13, especially his successors, Hitsugaya and Rangiku, still haven't found out who Ichigo's father is.
* Ichigo's hollow form doesn't have the best defenses but it has a very powerful Cero. As a result, most of his fights start and end by him firing a Cero at his enemy.
* Ichigo's more-ordinary friends do have an unusual tendency to turn out to be not so ordinary after all, including a girl whose hairpins can raise the dead, a huge foreigner with a demonic arm, the
* Ichigo spends the entire Arrancar Arc struggling with his fear of his
* Ichigo's resolve comes from his mother Masaki's death which is introduced via flashback.
* Ichigo's robes transform into a long-sleeved, ankle-length black coat with red lining that is body-tight to his waist and then flares out dramatically for the

rest of the length. It also acts as a
* Ichigo's strange Hollowfication while in battle with Ulquiorra turns him into a fully hollowfied humanoid being that cannot speak, can telekinetically summon Zangetsu and which is more powerful than a top-level Espada. Later, Aizen notes the reiatsu Ichigo has developed as a result of that fight and reveals he's known about Ichigo since he was born. Then it's revealed Fullbringers are created by unborn children inheriting Hollow reiatsu from mothers that have survived attacks. Eventually, flashbacks reveals how Isshin lost his power due to one of Aizen's Hollowfication experiments taking an unexpected twist.
* , Ichigo started fighting extremely recklessly after gaining Blut Vene and Ransotengai, believing those techniques would let him survive anything, until Weiss sets him straight.
* Ichigo's teacher gives him the karate-punch variant after a long absence, when he tries to small-talks her and mentions that she changed hairstyle — which was three weeks ago.
* Ichigo, upon meeting Yasutora Sado, misreads his name card, and keeps calling him "Chad" despite being corrected. The nickname eventually sticks, and in the dub and English manga (in which the classmates
* Ichigo vs Zaraki Kenpachi. Of all the captains for Ichigo to face, the first happens to be the
* Ichigo wakes up after getting knocked out by Byakuya in Urahara's shop....with Tessai laying directly on top of him with his face a couple inches away.
* Ichigo when Yoruchi says she's coming into the hot spring with him.
* Ichigo, who in a world where shikais and bankais give elemental abilities to weapons, turn them into entirely different weapons, summon giant poison baby familiars, has a shikai that simply fires off
* Ichiji is stoically cold and aloof compared to Sanji who is often Hot-Blooded.
* Ichika used to be one towards Yotsuba when they were children, often stealing her snacks, stickers, and even her friends. She grew out of it by the present time after their mother died.
* Ichimako "Mako" Watadzumi, a nonbinary individual who was born male, attacks
* Ichimatsu: A furry lump that looks almost like a cat. It's fairly large, reflecting its owner's
* Ichimatsu often causes this reaction too. However, his reputation is not as bad as Karamatsu's.
* Ichinensei Ni Nacchattara), falls asleep in class and wakes up wet. He freaks and has to work up the guts to confess this fact to the teacher. Only after he does so is it learned he never wet himself at all, merely fell asleep under a leaky sprinkler nozzle.
* I-Ching, a blind old-master martial artist with a deep knowledge of the supernatural, acts as a mentor in his every appearance starting as a teacher to
* Ichirō Nagai before dying of a heart attack on January 27, 2014. His work was released posthumously.
* Ichiroh! has its protagonists Nanako and Akane. In fact, the title is the term used for someone in their first year as a ronin.
* Ichiroh!. Nanako is painfully aware of their feelings, but can't seem to discourage either of them, leaving the two to fight between each other for her.
* Ichiro Ogami is a subversion: while a natural leader, he was given command of an elite fighting team as his
* Ichiro Ogami was originally a placeholder name for the then-nameless protagonist when
* Ichiryusai Madarame's first name means "top-notch". While Madarame was indeed top-notch as an artist at one point, he's now resorted to copying his pupils' work, and claiming it as his own.
* Ichi the Killer all day. In the manga, he actually does know karate.
* Ichi the Killer always cries during, and after, killing, due to being in a semi-hypnotic trance in which he's reliving being bullied as a child.
* Ichi the Killer examples ever. Ichi cuts his palm with a knife and masturbates to the sight of his favorite prostitute being beaten and raped by her husband.

* Ichi the Killer has a poster boy for this: Masao Kakihara. He is actually shown getting stiffies when he sees the over-the-top carnage Ichi creates. Being a masochist, he stalks Ichi in the hopes that Ichi will torture him.
* Ichi the Killer has the titular Ichi, a deadly assassin, and Kaneko, a rather unsuccessful hitman.
* Ichi the Killer. He has a horizontal scar running across his cheeks and nose, a horizontal scar across his forehead, and a vertical scar that connects both over his left eye. In addition to a glasgow smile held together by piercings at the edge of his lips. He is arguably the villain even though the good guy isn't any better than him and Kakihara gets more screen time (about 75% of the manga and film).
* Ichi the Killer is messed up in all sorts of ways, but only the twins, who pretty much rape their way through the series, get monster treatment.
* Ichi the Killer: just about every character; the majority are actively in an organization, others are either ex-yakuza or had/have some other 'professional' connection with them.
* Ichi the Killer, Kakihara, an extreme masochist, becomes obsessed with Ichi after he sees the result of Ichi's brutal murders.
* Ichi the Killer Later on, they had a fierce contest to see who was better at torturing a captive.
* Ichi the Killer, protagonist Kakihara slices off the tip of his own tongue. Of course being a masochist he enjoys it immensely.
* Ichi the Killer runs away and tries to jump from one apartment building to another, only to invoke this trope. Although no one comes to stomp on his hand, something even worse happens: a bird comes by and shits on his fingers, causing him to slip and fall to his death.
* Ichi the Killer. The comic and film open with a crew cleaning up his mess.
* Ichi the Killer, the final confrontation takes place on the roof of the Yakuza apartment building.
* Ichi the Killer to torturing them, and who is equally eager to cut off the tip of his own tongue in penance (shown in gory technicolor), and it's hard to know who to root for amid the bloodbath... but at least fans of Japanese splatter will have a blast.
* Ichi the Killer wears baggy clothing and walks with a slump in order to disguise his true strength.
* Ichi the Killer, when heading into the final confrontation, the sadomachistic gang leader gives all of his henchmen the opportunity to back out. One of them takes him up on it, telling him that "it's time to hand back this sake cup we drank in friendship." The gangster responds by stabbing a spike through the henchman's foot and dragging him along anyway, spike and all. None of the other henchmen try to leave.
* Ichi the Killer when Karen tells him that she once strangled her neighbor's dog.
* Ichiya says "man/men" just as often as Elfman does, and despite his comic relief status most of the time is the most powerful member of his guild.
* "Ich mach's dir mexikanisch" ("I do it Mexican Style") is sort of the German equivalent of the aforementioned Lithuanian Typewriter (except for the Gorey translation, which invented the Mongolian Double-Drawer), with books by Doris Lerche or Christoph Gutknecht. A prostitute once offered it to an author, who reported that unfortunately he never asked or tried. (Given that, as another investigative reporter found out, "Greek" evaluated to "normal, with Vicky Leandros background music", maybe he wasn't that unfortunate...)
* I Choose to Stay: A character has the chance to go home, but decides to stay where they are now instead.
* Ichthyosaurs, dolphin-like marine reptiles of the dinosaur age, evolved their forelimbs into paddles to aid in swimming. However, while dolphins retained five fingers inside each flipper, icthyosaurs sprouted
* Icicle Junior also forgoes shoes when iced up, and chooses instead to use the ice to make his toenails longer and sharper. This could be a matter of practicality, or simply aesthetic.
* I, Cid of the Lufaine is a background character known as a legendary scientist

who built the first airship.
* icing a very annoying Elan in the process that it was "accidental", and didn't mean to do that.
* Ici Radio-Canada Télé, the CBC's French-language service.
* ICI RDI the French-language counterpart of CBCNN. Formerly named as Réseau de l'Information ("Information Network") and formerly abbreviated to RDI.
* Ickis' special scaring ability (referred to as looming) has him inflate his body and grow gigantic, but he can't hold the form for very long.
* I, Claudius. After Caligula is assassinated (while being protected by German mercenaries, who presumably would be less open to conspiracy than Roman guards) drunken Praetorians annoyed at the imminent demise of their jobs find Claudius hiding behind a curtain and declare him Emperor almost against his wishes. Which is what happened in real life, though whether the real Claudius was as reluctant as his TV version is another question. The actual Praetorian Guard unsurprisingly play a fairly major role in the miniseries.
* I, Claudius. After Emperor Claudius' wife commits adultery and treason, Claudius' advisers worry this will happen to them, so they choose a courtesan who's a favorite of the emperor to deliver the initial bad news, before nervously entering the room to confirm what she's saying.
* I, Claudius (BBC historical series). Mother Antonia punishes daughter Livilla this way in an early episode. In a later one, grown-up Livilla poisons her husband. Antonia finds out and locks her in a room to starve to death. Those fun-loving Romans!
* I, Claudius by Robert Graves. The entire premise of the story is that the Roman Emperor Claudius wrote a memoir giving all the inside dirt on the Imperial Family and that Mr. Graves actually did discover these secret papers, "Nineteen hundred years or near" later.
* I, Claudius, Caligula summons soldiers to hear him give a speech — including soldiers who had disobeyed him, ready to have them executed, telling that particular group to not worry about weapons or armor. His uncle, Claudius, manages to drop a hint to one captain. Caligula quickly changes his tune when those guards let it be seen that they are carrying their swords underneath their tunics.
* I, Claudius) can "no more become Emperor that he can ride across the bay from Baiae to Puteoli". One of Caligula's first acts as Emperor involves a very long bridge...
* I, Claudius, Claudius gives a similar speech before an important battle in Britain (without a radish though).
* I, Claudius, Claudius has prepared to address his army with a grand speech before they go into battle at the conquest of Britain. When he actually comes to give the speech, he finds himself abandoning the speech he'd planned and improvising something far less formal.
* I, Claudius: Claudius, having written a history of Roman religion, makes a habit of reviving old ceremonies that he thinks are picturesque.
* I, Claudius: Everyone agrees that Claudius's wife Plautia Urgulanilla has a pretty face, but the moment that she stands up during their wedding ceremony, revealing that she's a full head taller than her middling-height husband, his own family bursts into mocking laughter.
* I, Claudius get interesting. It might also raise a smile at the end of the book when Claudius (a historian) says that one of the perks of becoming Emperor is that he can make everyone read his history books, and is out and out Lampshaded when Claudius mentions a few dozen pages into the book that he has written several chapters of his autobiography and hasn't quite got up to the point where he is born.
* I, Claudius had Caligula impregnate his sister, then cut her open and eat the baby.
* I, Claudius: Has a number of poisoners, all of whom dose their victims over a number of days to make it seem like they died of a wasting illness. One of the poisoners, Martina, advises a client against using the tasteless belladonna as a poison since it leaves a tell-tale rash, but the client doesn't listen and uses it

anyway. (This later comes back to haunt said client, when she and her husband are brought in for murder charges.)
* I, Claudius, he would have probably been likewise targeted for death as a young man, since his political beliefs also ran counter to his grandmother's.
* I, Claudius in a nutshell. He tries to stay out of his family's internal power struggles, but as soon as he becomes Emperor he realises it's "get your hands dirty or die".
* I, Claudius" in private. Although later research showed that Tiberius went to Capri mostly because he wanted to hide from assassins and read in peace.
* I, Claudius, insists that the senator commit suicide since "obviously" the gods have taken the man up on his offer, in exchange for restoring Caligula's health.
* I, Claudius instead, as he'll eventually become resistant to the drug.
* I, Claudius is an ultimately tragic example. He's capable of taking on just about any military or governmental task as long as he is answerable to somebody, and eventually his dependability makes him the heir to the throne. His morose and paranoid personality didn't stop him from being one of the best right-hand-men that Rome had ever seen, but it made him terrible at ruling.
* I, Claudius is portrayed this way - he's immensely strong and healthy, one of Rome's greatest generals, an excellent administrator, and a student of philosophy. Unfortunately, he's cursed with moral weakness and a domineering mother, and he ends up becoming a reclusive, paranoid, murderous pervert.
* I, Claudius is presented as the aged Emperor Claudius reminiscing, with each episode opening on him as he writes his history of the early days of empire.
* I, Claudius manages to stage the whole thing without ever having a crowd larger than a meeting of the Roman Senate. (The battles all occur off-camera, with perhaps an aftermath scene in the general's tent; the gladiatorial games consist of a close-up camera on the Emperor's box.) Hey, the BBC ain't made of money.
* I, Claudius murders her way through the show's cast, and in a candid moment with Claudius freely admits that she was a terrible criminal. She fully expects to suffer for her sins in the afterlife. Despite this, she considers it all worth it in the name of staving off another round of civil war.
* I, Claudius only to find he's a very bitter, unpleasant person. He also especially has it in for Julia herself, as his mother Livia forced him to end his happy marriage to Vipsania to marry her, seeing as she's Augustus's only child and therefore an extremely useful political tool.
* I, Claudius originally auditioned for the role of Tiberius, but was eventually persuaded to play Augustus instead. He recounted Herbert Wise's saying "be as you are, full of flannel", and that he should always play Augustus as an ordinary person, because the reactions of those around him would make him the Emperor.
* I, Claudius since prior to this no one had paid the house any attention, but after seeing the ruins naturally became curious as to what had occurred there.
* I, Claudius, the fifth and last Julio-Claudian emperor who ruled Rome for almost 14 years until his own death in 68 CE.
* I, Claudius: Tiberius and his younger brother Drusus discuss their roles in life. Tiberius criticizes their mother's treatment of Drusus, and her overall abrasive nature. He quips that "a snake once bit her and died." Drusus takes offense as she is still their mother.
* I, Claudius, translating Greek verse (which was based on patterns of long and short syllables) into an equivalent English poetic form (based on stressed syllables and rhyme).
* I, Claudius: Upon learning of his plot to seize power, the Emperor Tiberius has Sejanus' family and supporters murdered. More purges occur with depressing regularity throughout; in the end even Claudius himself orders a purge of Messalina and her faction when she's suspected of plotting a coup.
* I, Claudius when it describes him as being "every man's woman and each woman's man."
* ICO and a very beautiful and distinct cover made by the lead designer of ICO based of the painting "Nostalgia of the Infinite". Because of the huge backlash from the NTSC version, the HD re-release was a port of the PAL version, but with

the aspect ratio modified so it would fit NTSC TVs.
* ICO, and B) he has a vague idea of why he himself was trapped in the castle, and knows it's a bad idea for anyone to stick around there.
* ICO, any time Ico leaves Yorda alone, Shadow Men may show up to drag Yorda away and cause a Game Over. Nevertheless, a few puzzles can only be completed by the two separating briefly.
* ICO for the first time you can enable four increasing levels of film effects.
* ICO getting punched around by shadows or falling off medium-height ledges only stuns the player. Falls higher than three stories and certain magical effects are an instant game over.
* ICO HD for 5 hours) but never before was it two freaking hours. Even the developers acknowledge the game's short length.
* ICO: Ico himself is bound and left to die in a haunted castle due to his horns being seen as a curse.
* ICO makes it his mission to guide Yorda through the perilous castle and protect her from the shadows that stalk them.
* I Come in Peace (1990), an alien sawblade-like disk does this quite memorably, until caught (attracted?) mid-flight with a strong magnet.
* I Come in Peace: After the two aliens have a shoot-out in a convenience store, the crime scene is quickly cordoned off by these people and the case closed. It's implied that Larry's boss is one of them, as he reveals that they want to make a deal with the alien and ignore how many he's already killed on Earth.
* I Come in Peace: During first contact, one species lets the other know they don't intend to harm them.
* I Come in Peace: From Larry, when he asks Jack to stop driving on the sidewalks as they're being chased by the bad alien:
* I Come in Peace) injected humans with overdoses of heroin in order to harvest Endorphins, that could be rendered into a powerful recreational drug on his home planet.
* I Come in Peace is about an extraterrestrial drug dealer who extracts endorphins from human brains, to be sold on his home planet as an addictive substance.
* I Come in Peace: Larry's FBI boss tries to kill his subordinate after Larry hands over the energy weapon which he retrieved from the alien cop, but Larry's local partner Jack saves him by shooting the guy first.
* I Come in Peace. Subverted. The alien criminal says this to the Earthlings almost out of reflex, but in reality he wants to steal their brain fluid for the intergalactic drug trade. He's not trying to deceive us however, as he uses the line the moment he appears and starts attacking. Perhaps he believes the phrase is a standard human-alien greeting before getting down to business.
* I Come in Peace: Victor Manning, the drug lord who killed Jack Caine's partner in the opening, later sends Jack a photo of himself with some half-naked girls to show that he's having a great time on his vacation in Brazil.
* ICO. Most of what little dialog there was wasn't translated in the NTSC version.
* Icon, as he basically passes his wealth on to his "son", who is himself, over the years. By the time he meets Raquel Ervin, he's Augustus Freeman IV.
* I Confess at the time were already offended enough by the idea of a married woman and a priest being in love.
* I Confess: Otto Keller commits a murder while disguised as a priest.
* Iconic Attribute Adoption Moment: When characters take on their most well known traits in an adaptation.
* iconic because the Hays Code forbade movies from showing characters getting away with adultery.
* Iconic Item and his homemade guitar, the Red Special. To such an extent that, when appearing at a concert celebrating the Fender Stratocaster, he still played the Red Special.
* Iconic Item. He can also use them as weapons, lockpicks and pretty much anything else.
* Iconic Item in the opening scene of the season premiere, suggesting that the glasses were never meant to be a permanent replacement for it (he then used both

items).
* Iconic Item, where Jughead wears a knitted beanie with a crown-shaped outer flap. Indiana's hat shows us another way to deal with this: it would not age well today except with a certain bohemian crowd that Indy would be a bad fit for, but Indy's adventures take place between the 1910's and 1950's, with his age usually realistically reflective of his fictional timeline. If you leave Indy safely in the pulp era, the hat doesn't matter.
* Iconic Logo - An image that immediately identifies the advertising campaign or product
* Iconic Outfit: Bowler hat, tiny black moustache, baggy pants, big shoes, wooden cane.
* Iconic Outfit cover also counts; that lightning bolt is still his single most-referenced "look" in pop culture.
* Iconic Outfit) to look like, as Uproxx's Donna Dickens put it, "a deflated balloon", or a modern teenager's prom dress. Yay?
* iconic picture of a paper boy doing this in the wake of the Titanic disaster.
* iconic police sketch of Ted Kaczynski, the Unabomber. Which is how the poker player Phil Laak got the nickname "The Unabomber" because he always wears a hoodie and sunglasses similar to Ted Kaczynski. He wears them to make it harder to read his facial expressions.
* Iconic Sequel Character: A character introduced in the sequel becomes one of the most prominent parts of a franchise
* Iconic Sequel Character: A character introduced in the sequel rises to become iconic to the franchise.
* Iconic Sequel Character: A character who is strongly associated with the franchise even though they were not present in the first installment.
* Iconic Sequel Song: A song introduced in a later work becomes iconic of the franchise it originated from
* Iconic Sequel Song: A song introduced in the sequel rises to become iconic to the franchise.
* Iconic Sequel Song: A song that came from a later instalment but is iconic for the franchise as a whole.
* iconic step on the building he was inside, bloody and battered but still raring to fight. There are also a few recursive examples like the Centurion armor which is even bulkier than terminator armor and worn over normal power armor and the Exosquad-style Dreadknight which has an armored marine operating it from a harness in the front (creating an unfortunate resemblance to a baby carrier).
* Iconic suffragette Susan B. Anthony has, in recent years, been co-opted by the pro-life movement for allegedly being against abortion, even though she took no active part in protecting unborn fetuses. The pro-lifers referred to several documented statements against abortion claimed to have been said by Anthony, but there have been debates over whether or not she actually said them, or even if she was against abortion at all. On the other hand, Planned Parenthood founder Margaret Sanger
* iconic villain to get sworn in his stead. Logan winds up causing trouble for rest of the show, even if at times it's indirectly for arcs where he's absent, and all of it can be traced back to what Anderson did.
* Icon is an alien who used technology to become human when he crash landed on Earth. This also gave him a bunch of powers he didn't have before, because apparently humans have the genetic potential to gain these powers and the tech took the liberty of making him a "genetically maximized" human.
* Iconoclasts is a mechanic in a world where unauthorized mechanical engineering is illegal, and carries an oversized wrench that she uses to twist equally-large bolts and attack enemies.
* Iconoclasts. Specifically, Agent White is a pretty humorless man of few words with glowing bionic eyes whose boss fight consists mostly of running away from him, and Agent Black is a ruthless pursuer that's obsessed with killing the protagonist and her family.
* I Control My Minions Through...: A villain uses evil methods to ensure loyalty

from their minions.
* ICO original is now unobtainable (not at a reasonable price anyway).
* ICO sleeping cute. Extra points to the programmers for adding a little animation of Ico carefully sitting up with his head turned so as not to hit Yorda with his horns, when they wake up after their game-saving nap. You can even press R1 (the "call Yorda/hold hands" button) to turn Ico's head toward Yorda's while on the couch, who will respond in kind.
* ICO started life as a PS1 title, but got ported to PS2 midway. One artifact of that is the game running in 240p mode, needlessly upscaled to 480i (or 288p to 576i for the PAL release).
* ICO. The sudden physical sign of violence after a game full of whacking nothing but intangible Smokemen is like a punch to the gut.
* I Coulda Been a Contender!: Being forced to give up on your dream before it became reality.
* I Coulda Been a Contender!: Right as a character has or is about to accomplish something amazing and has a good future ahead of them, something happens that forces them to retire from it.
* I Coulda Been a Contender!: Someone is just about to become famous, but then suffers an injury or something meaning they can't do the thing they'd be famous for.
* "I Could Be Jewish For You" is all about a girl telling her Jewish boyfriend she's willing to convert to be with him. It's primarily a comedic song, but it's actually rather sweet at the end when she sincerely tells him she's willing to convert despite not knowing a thing about the faith because she loves him, and really wants to be with him forever.
* I could have made something —" before he calms down enough to realize he's been lured into this trope.
* I Could Never Be Your Woman of Rosie's sitcom. Most of what we see is pretty basic and flat. But then again, Rosie might be biased since she has a thing for him.
* I Couldn't Become a Hero, So I Reluctantly Decided to Get a Job: Daily life is a lot like modern Japan, with TVs, telephone, AC, etc. Except that the cars are monster drawn carriages, and everything runs off magic instead of electricity. Plus the demons, spells, and all the other fantasy touches.
* I Couldn't Become a Hero, So I Reluctantly Decided to Get a Job involves this. Raul was training to be a heroic knight to fight the demon lord. Once that path is cut short as the same demon lord is defeated, he isn't able to find a job where his considerable fighting skills are seen as a plus, and he doesn't have any practical business skills, forcing him to settle for an entry-level position at an electronics store.
* I Couldn't Become a Hero, So I Reluctantly Decided to Get a Job is literally that. Raul (the first person protagonist), could not become a hero (no more demons to slay), so he reluctantly (VERY reluctantly) decided to get a (shitty) job.
* I Couldn't Become a Hero, So I Reluctantly Decided to Get a Job while he turns around in embarrassment and tells her to put her clothes back on.
* I couldn't stand his wailing, so to shut him up I started whaling on him.
* "I could write a hell of a paper on a man who dresses like a flying rodent."
* ICO, which was basically an entire game with an built-in Take My Hand mechanic.
* ICO: Yorda as the Bright Lady princess with Ico as her White Knight who escorts her out of the castle.
* ICP track "Bang, Pow, Boom!" is about a sentient version of this. A nuclear level, thinking explosion, that cleans out the scumbags and evildoers from the Dark Carnival when it gets crowded.
* iCrates. What does this have to do with the internet or technology? Uhhh....
* Icta. It's implied that it will work out in the future, unlike the rest of his hare-brained plan.
* Icteridae)—as with the New World Robins, it was likely due to similar appearances.
* Iczelion sending all his Robeasts after the heroines. A possible subversion, in

that the tone of the scene is actually fairly upbeat. Supporting this is the fact that the OAV's trailer features a scene not found in the episodes themselves of what is apparently the heroines beating the ever loving crap out of the entire force.
* Iczer play this straight, being an one-gendered female-looking alien species. The title Iczer-1 and Nagisa may count as well, with Iczer-1 being an alien android who seems to love Nagisa.
* ID-0 where all the space sequences lack sound effects. Even asteroids striking the shields of a ship do so in silence.
* Ida Aunt Wanda has convicted an awful lot of people during the communist purges in Poland, earning the nickname of "Bloody Wanda".
* Idaho left in 1996 and came back in non-football sports in 2014. Football returned to the Big Sky in 2018.
* Idan Alterman, but Tsakhi seemed to be more open to her, and even remarked it could be nice to say, "Watch out, or I'll call my wife on ya!" (Eventually he married another famous comedy character, though.)
* I, Daniel Blake: After months of misery, the titular Daniel has finally got the appeal he needs to get his benefits sorted...only to suffer a massive heart attack and die minutes before its due to begin.
* Ida Sofia is this to her grand-niece Cecilia, who will come and visit her and borrow books from her.
* I Dated A Robot": The Planet Express crew is disgusted with Fry dating a Lucy Liu-bot, and they show him a propaganda film to try (and fail) to make him stop.
* iDate Sam & Freddie, the courier hit Freddie, Freddie smacked his head against a fire hydrant, and as he was lying knocked out and bleeding from the ears, that was the first moment Sam realized he was 'kinda cute'.
* I, Davros, and you don't gain any sympathy for him, just understanding.
* Iddhi meter grows in size as Ajna becomes more powerful. First she actually gains the bar starting out with one. It snaps to three and five bars when she is being attacked by Ravannavar and Kala respectively. In both instances she also becomes more in touch with her Haruka form and gains more mobility. The last instance she simply attains 7 bars since her transformation into her divine form is less violent and more of a moral revelation.
* "I'd Do Anything For Love" with "Ow, my only scene!" after the cops get "Chandelier'd!"
* Idea Bulb: A lightbulb appears over a person's head to signify that they've come up with an idea.
* Idea Bulb: A visual gag where a lightbulb appears over a character's head to indicate that they have an idea on how to solve the problem.
* Idea Bulb: Nowadays usually has the lightbulb somehow breaking or turning off if they have a bad idea or forget, or using candles or other sources of light for characters predating the lightbulb, or possibly even taking the lightbulb out and using it in their idea.
* Idea Bulb ("You're Watching Television!") cuts off the bottom third of the screen. It goes away when Phineas notices it, revealing Ferb holding a triangle.
* Idées Noires comedy aimed at hunters, the death penalty, and jokes about bizarre monsters.
* Idées Noires: People pray to God for help after a massive oil spill. Cue an exploding plane loaded with feathers in the exact same region.
* Idea Factory and Compile Heart apparently love this trope, as some of their games show.
* Ideal Hero: A hero who's held up as being a near-perfect role model.
* Ideal Home (two gay male main characters, subject matter includes LGBT parenting/family)
* Ideal Illness Immunity: It's not just that all diseases are easily cured – you simply never get them in the first place.
* idealistic endurer, emotionally available, a good sense of humour, good with relationships.
* idealistic young soldier who learned flame alchemy to better protect his

countrymen and putting himself on war trials to save his subordinates. This has to be pointed out to the audience.
* idealized rural England, hence the mixture. And hence Pippin's Scottish accent although he is Frodo's cousin (and although most of the Shire, including Sam, and even Merry — another cousin — use the generic country accent known to English actors as "Mummerset.")
* idea of One-Click is their property. Although not in the EU where it was deemed too obvious to patent.
* Ideas and phrases from the Declaration of Independence are frequently conflated with the Preamble to the Constitution. Religious conservatives use the Declaration's mentions of "Nature's God" or "Creator" to argue that the United States was intended to be a specifically Christian nation. Leaving aside the fact that many of the Founders were deists and may not have associated "Nature's God" with Christ, the Declaration holds as much
* Identical characters switching places are a major plot point in two
* identical feet. May or may not be his actual feet as by some accounts he's a cyborg in addition to being genetically engineered.
* Identical Grandson: A character has an ancestor or descendant who looks just like them.
* Identical Grandson: A character has an ancestor or descendant who looks just like them, which is often done so that the actor can play their character's ancestor or descendant.
* Identical Grandson: A character's descendants are played by the same actor.
* Identical Grandson is so strong, it can give you the original person back!
* Identical Grandson: Someone has an ancestor or descendant who looks exactly like them.
* identical great-grandson. She essentially has to live out her second life being haunted by an image of the boy she left behind.
* Identical Stranger — For some reason, the gene sequencing fairy took the day off and you have an unrelated twin.
* Identical Stranger: A new character arrives who looks just like an existing character.
* Identical Stranger: A person comes across and is mistaken for a lookalike.
* Identical Stranger, in which the protagonist opens the door and takes his doppelganger for a mirror salesman. Then he shuts the door in his face.
* Identical Stranger named Walter Dorian and stole his identity, and thus his properties in Clerville, after assaulting him and throwing him into a river.
* Identical Stranger to Archer's deceased friend Sakura Matou. He thinks she may actually be Sakura, even though he watched her die and get torn to pieces. When Cinder does some research and concludes it is more plausible that BB is an android, Archer says Cinder has some nerve thinking his idea is stupid, because her idea is the stupid one.
* identical to Earth in atmosphere, mass, diameter, rotational period and orbital period. Maybe it even has the same continents as Earth, if you can actually find them underneath the enormous cityscape that literally covers the entire planet.
* Identical Twin ID Tag: Identical twins have minor differences in appearance to make it easier to tell them apart.
* Identical Twin ID Tag: Twins make themselves distinguishable with hairstyles, costumes, or scars.
* Identical Twin Mistake, at the end of Chapter 70, students in his class on separate occasions ask Fuutarou to pass a message/item to Miku and Ichika respectively... completely unaware that's she's standing right next to him.
* Identical Twin Mistake: Someone gets confused with their identical twin.
* Identical twins, triplets, or more are technically clones. Most seem fine with it. Except for cases when the two are constantly compared to each other, and worse, forced by their parents to wear identical clothes. Still, that's the result of social pressure, not anything inherent to the fact they're biologically identical. Though this certainly wasn't the case in
* identical with no concept of individual identity or leadership. What little was

revealed about their society hinted at something like this trope.
* identification number (CT-5555), is one of the most rebellious and independent clones in the show, and highly insistent of being seen as a person and an individual, instead of "just another number". Gets lampshaded in "Conspiracy".
* Identified explicitly as "the ticking clock" by the candy store owner, who notes that it "works great in the movies". Another Trey Parker / Matt Stone production,
* Identified persons (via ID transponders or biometrics) may be allowed through a door or barred from entering an area. Similarly, the door control system may know exactly where a specific person is going, and only open doors to and from that location.
* Identifying Common Traps is a specific course module at the Assassins' Guild School. It is presumed that anyone who cannot identify a pit trap in time is Failed from the course. One way or the other.
* Identifying the Body: A relative is asked to identify a body as confirmation of the deceased's identity.
* Identity after a few of the cast have been picked off by the still unknown antagonist, Clea DuVall suggests that maybe this is a result of the motel being built upon an Indian burial ground, as it is detailed in a brochure she read about the area they are in. Given the subsequent events, this would have to be considered a subversion.
* Identity Amnesia and having to be trained from scratch by the old pilot who rescued him. Upon regaining his memories and leaving, Baloo returns to find the old man's place in shambles and learns the old man has been dead and gone for quite some time. Despite this, Baloo finds a photo of the two of them together in the ruins of his old office...
* Identity Amnesia: A person forgets who they are and thinks they're someone else.
* Identity Amnesia) is a good man, even though he was pursued by men who claimed he's a killer, and she decided to help him. She's a bit livelier that this archetype tends to be but she fits the trope very well.
* "Identity": An elderly man kills the guy who faked his identity and used it to sell his house on the market. The victim was counting on the guy being too old and feeble to do anything about it. The man's son and lawyer try to get him declared unfit to stand trial by way of dementia so he wouldn't be sent to prison, but he rightfully insists that he's totally competent and maintains that by killing the con-artist, he regained his entire livelihood and identity that was stolen from him.
* Identity Crisis are aware of the others are open to debate. Especially considering that Jean Loring knows Tim Drake is Robin, despite Tim having his identity a deep secret even from Bruce's allies.
* Identity Crisis for the night. Shortly later that same night Jack's final words are:
* Identity Crisis has very few fans today. Whenever someone admits to have once liked it, they will usually be greeted by everyone else pointing out its mistakes and plot holes.
* Identity Crisis, he'd been preparing to rape three women he'd caught and dressed as the female members of the Teen Titans.
* Identity Crisis, hugs Tim tightly, and all we see of Tim's face is one eye, wide and wild with grief, flooded with tears, staring back at the reader.
* Identity Crisis. Includes the literal line, as when Captain Boomerang tracked down his son, put up for adoption, he lost his nerve at the last moment — too late to prevent his son from seeing him and making the jump.
* Identity Crisis in the JLA watchtower. Following the retcon, it's become standard practice to write Light as a serial rapist. Quoth Plastic Man: "It's like that's his power now."
* Identity Crisis, is nearly killed as well. It seems someone is murdering the spouses of superheroes, and the hero community comes together to try to figure out which super villain might be behind it. Except, of course, that it's not a super villain; it's Jean, who staged her own attempted murder to both throw suspicion off herself, and to send the heroes on a wild goose chase by making Sue's murder look

like part of a larger series of killings. And it turns out she did it all to get a man's attention.
* Identity Crisis: Many readers figured out who the killer was in the first issue, because even though that person wasn't listed as a suspect at all, the story went out of its way to provide them an alibi.
* Identity Crisis Mind, Jean's still clearly nuts, and her first kill visibly shook her more than the ones she arranged later.)
* Identity Crisis, Ralph Dibny is prepared to eulogize his late wife Sue. He's so heartbroken that he can't stick to his prepared speech. Ralph falls apart emotionally and physically as his friends escort him away.
* Identity Crisis removing the note from the scene before the press found out. Oops.
* Identity Crisis, she tries to cover it up by burning her body with a flame thrower.
* Identity Crisis simply dumps her in Arkham. The crime was committed nowhere near Gotham, she clearly understood it was illegal considering the steps she took to cover it up (she is a criminal lawyer, after all), and since they're divorced Ray had no legal standing to commit her.
* Identity Crisis since they live in a world with numerous teleporters, time travelers, magic users, etc. Essentially, it's something that doesn't work in a superhero universe if the characters actually act in character.
* Identity Crisis story arc and finds it necessary to work with her again:
* Identity Crisis story), Barry Allen and Bruce Wayne actually witness a scene from it when running through the time stream and don't remember it.
* Identity Crisis storyline in which she set up a murder and an attack in order to cover up her own accidental killing of Sue Dibny.
* Identity Crisis, Sue Dibney is preparing to surprise her husband Ralph with the news that he's going to be a daddy. Minutes later, she's brutally murdered.
* Identity Crisis, Sue Dibny's funeral was heavily attended, and Captain Cold, who's known for his professionalism despite being a villain, sent flowers.
* Identity Crisis that one of the reasons the JLA has been able to keep their identities secret over the years is by having Zatanna strategically erase the knowledge from the minds of any villains who find out. The story was set into motion years before when they attempted to forcibly reform Dr. Light via this method, and it went horribly wrong.
* Id_Entity, except it comes with a mode where you can actually play as you sleep, through some kind of poorly explained science babble about the subconscious mind.
* "Identity" for being willing to work for a government that he "should" hate even more than the militia does because of all of the injustices that it had committed against African-Americans.
* Identity Impersonator: A ruse to protect a character's Secret Identity by showing both character's identities in the same place together at the same time.
* Identity Impersonator: A superhero protects their secret identity by appearing in public with someone pretending to be their alter ego.
* Identity Impersonator enters the courtroom by crashing through the overhead skylight to further sell the idea that he's the real Green Arrow.
* Identity Impersonator: Protecting your secret identity by appearing in public with another person pretending to be your alter ego.
* Identity Impersonator: The hero protects their secret identity by appearing in public with another person pretending to be their alter-ego.
* Identity Impersonator: The hero protects their secret identity by appearing in public with someone pretending to be their alter ego.
* Identity Impersonator: The superhero protects their secret identity by appearing in public with someone pretending to be their alter ego.
* Identity subverts this in multiple ways: the character set up as the Final Girl was a prostitute, thus subverting the virgin-and-pure side of things. We then find out one of the other characters believed to have died was actually still alive. Said character, who was actually the killer, returns to finish the Final Girl off. Furthermore, the Final Girl, the character that killed her and all of the other

characters who didn't make it were actually the multiple personalities of a serial killer, and the whole thing was being played out in his mind. The "killing" of the characters was his real-life attempt to integrate. So when you get down to it, there's really no Final Girl at all, and no person at the motel ever really died.
* Identity Thief smashes a guitar over her head, among other incidents.
* Identity V, the Soul Weaver can wrap Survivors up in cocoons as an alternative elimination method. Notably, she’s the only Hunter that has one.
* Identity was set in a motel no character could leave. They then proceed to fall victim to a killer in their midst, one by one.
* idents, which came later, but a bouncing CGI one with an antennae), eventually getting married and, similar to the above, having a litter of mini-Skutters and 2s.
* Ideologically motivated pirates are what led to the Trade Federation being allowed to build an army in
* Ideological polarization (e.g. communists and fascists often neither gave nor expected quarter from each other).
* ideology-laden words, occasionally used by the parties the word have been coined against.
* ideoProductions of Jory Caron rolling through the hallways of Emerson College in an office chair.
* iDevices is an electronics company that makes Web-connected smart home gadgets.
* IDF tend to have the same opinion for similar reasons—kitchen duty is usually easier and less unpleasant than, say, guard duty, cleaning or maintenance work, and provides access to food outside of meal time. Soldiers in supporting roles tend to have the opposite opinion; their regular duty isn't so unpleasant that the kitchen is an improvement.
* IDGet, which Lindsay justifies by saying, "What? It's not as if twins exist in real life."
* Id has an absurdly large sword that he manages to use single handed.
* Idi Amin Dada, when he was President of Uganda, often ordered people executed by feeding them to crocodiles.
* Idi Amin on his chest; it would seem as though he awarded those to himself.
* Idi Amin's birth date is unknown, guessed at maybe 1923, 1925 or 1928.
* Idi Amin's secret weapon during the East African War is to have necromancers raise the corpses of every person killed as a result of his orders within Ugandan territory. This gives him thousands of undead cannibals at his disposal, which tear through enemy lines and bring Uganda victory.
* Idi Amin was selected as a replacement by the East Africa rugby union team for their 1955 tour match against the British Lions. While Amin really did spend some time as a rugby player, he doesn't appear in the team's photograph or on the official team list; moreover, replacements were not allowed in international rugby until 1968.
* Idi Amin, who, like Brezhnev, had to have the length of his tunics extended to accommodate his absurdly large collection of awards. Sometimes he would re-enforce the inside of his jacket with a piece of wood to prevent the fabric from sagging or tearing under the weight.
* Idi Amin with one of these in 1971. While Milton Obote, the country's president, was attending a Commonwealth conference in Singapore, Amin and his forces seized control over the country. Most Ugandans were happy at first, since Obote was increasingly brutal and authoritarian, and his regime was marked by widespread corruption. Unfortunately, Amin did not honor his promise to hold free and fair elections, and turned out to be even worse than Obote.
* I Did Not Want To Die does this in an explosively spectacular fashion.
* I Did Not Want To Die. It is a tragedy, where the desire to fight and protect ones homeland brings naught but death and destruction to it.
* I Did Not Want To Die, the protagonist reaches for the last grenade at the very end.
* I Didn't Mean to Kill Him: It was an accident! I wasn't planning on murdering him!
* I Didn't Mean to Kill Him: When the guilty party claims (honestly or not) that

their killing was accidental.
* I Didn't Mean to Turn You On is repeated at the beginning of Chapter 263 to invoke this trope, though given the whole point of said event, only Negi is the innocent one.
* I Didn't Mean to Turn You On: They unintentionally arouse someone they weren't trying to arouse.
* I Didn't Mean to Turn You On: Unintentionally making someone fall in love with you.
* I Didn't Mean to Turn You On: Why are you blushing like that? Eep! I'm sorry I got you all flustered! I really wasn't trying to do that!
* I Did What I Had to Do: A statement of justifying your questionable acts.
* I Did What I Had to Do: Don't lecture us on morality, or what's right and what's wrong! We don't feel all that bad, and nor should you!
* I Did What I Had to Do: Someone gives the excuse that they did something reprehensible because they had no other option.
* I Did What I Had to Do that it was for the greater good) while being at least nominally aware of the gravity of their actions.
* I Did What I Had to Do with the lever scenario, but pushing the guy onto the tracks would metaphorically, and possibly literally, put his blood on your hands.)
* I Did What I Had to Do: You justify your morally questionable deed by stating that it needs to be done.
* I Die Free: A slave takes solace in the fact that dying means they no longer have to live in enslavement.
* I Die Free: Someone fails to get their freedom, and decide that at least they'll be free in death.
* I Die Free: Someone is content with dying because in death, they're no longer enslaved.
* Idina Menzel do the sisters truly sing together in "When we're Together".
* Idina Menzel has admitted to using the bathrooms in her dressing room to warm up her vocals, claiming the acoustics are best suited for it.
* Idina Menzel includes Caissie Levy, Caroline Bowman (Broadway) and Jemma Rix (Australia).
* Idina Menzel long notes at the end of "Queen of Swords" from her self-titled album.
* Idina Menzel, Ryan Murphy said that the character wasn't going to turn out to be Rachel's biological mother as many people assumed (Menzel bears a striking resemblance to Lea Michele). And then that totally happened.
* Idina Menzel"), the touching reunion song with her daughter being the innuendo-filled "Poker Face" by Lady Gaga seemed odd, to say the least. Special attention was given to the bridge's lyrics.
* Idina Menzel was originally recorded by Yvonne Catterfield. The song was cowritten by Menzel, so she sort of covered herself up.
* Idina Menzel went barefoot for her entire 2012 summer tour, even calling it the "Barefoot at the Symphony Tour".
* Idina Menzel you get into who the best successors are. Shoshana Bean, Willemijn Verkaik, Stephanie J. Block, Lindsay Mendez, and Rachel Tucker, in particular, are favorite Elphaba replacements.
* ID: Invaded, another case where the manga promotes, then runs concurrent with the anime.
* ID: Invaded by serial killer prisoners as it is required to that they killed and having a killing intent to become a Brilliant Detective that can dive into ID Wells.
* ID: Invaded. Protagonists Akihito Narihisago and Koharu Hondomachi have to figure out the internal logic of each ID-well to deduce the killer's identity so that the Wellside agents can prevent that killer's next murder.
* ID: Invaded, the sniper in the Pyrotechnician's ID well is a faceless mannequin with a rifle. It's a figurative nobody, because it doesn't need to be anybody as long as it causes the destruction the Pyrotechnician craves.
* Idiocracy: A bizarre example. The futuristic technology was built before the

human race began its slide into stupidity, so now the descendants of the people who built it have no idea how it works.
* Idiocracy, a floor cleaning robot is shown repeatedly banging into a wall announcing "Your floor is now clean!" over and over. Given the putrid condition of the floor everywhere but where the robot is, it had been at this for a long time.
* Idiocracy: After 500 years of mind-numbing media and natural selection favoring large numbers of poor-quality offspring over smaller numbers of higher quality offspring, humanity has become rather stupid, and struggles on with only two things in mind: loads and loads of sex and cheap entertainment.
* Idiocracy: A government official mentions that a nuclear reactor is leaking in Georgia. When his coworker states it's in Florida, he responds by saying "Florida is in Georgia, dumbass".
* Idiocracy, all clothing has corporate logos on it, and even names mostly consist of products (the president's middle name is "Mountain Dew").
* Idiocracy. Andrew is Beef Supreme, one of the "corrections personnel" trying to kill Joe (Luke) in "Rehabilitation".
* Idiocracy: "Brawndo. It's got electrolytes!" Also: "Carl's Jr. Fuck you, I'm eating."
* Idiocracy: Corporations in the world of 2505 have achieved substantial governmental powers.
* Idiocracy during his presentation on the hibernation project to several army officers. It results in Collins going to jail for running his own prostitution ring, and the project being shut down, leaving Joe and Rita to spend 500 years in suspended animation.
* Idiocracy events had them agreeing with the fans on how their movie actually is coming true.
* Idiocracy explains that due to a lack of predators and other natural hazards, humanity's survival is awarded not to the strongest or smartest.
* Idiocracy Explains the narrator: "And that's all it was, for 90 minutes."
* Idiocracy has Brawndo, a close relative of Powerthirst. It is claimed to be this. It isn't.
* Idiocracy has degenerated into a combination of Ebonics, Redneck, Valley Girl and Hispanic gang banger by the 25th century. People have difficulty understanding the protagonist from early on.
* Idiocracy has product placement everywhere, and it is parodied to show just how shallow and dumb the future is:
* Idiocracy has to fight against monster trucks, one of which has a massive drill. And then it nods that yes, the drills are overtly phallic in design.
* Idiocracy. Interestingly, he seems to hit it off pretty well with Upgrayedd ("With two D's for a 'double dose' of his pimping"), if his slide show is anything to go by. Part of the reason that the plot happens, furthermore, is that Collins ends up getting arrested by military police. It's implied that he took to the pimping lifestyle a little too closely...
* Idiocracy in the 2500s, when his plan to get crops growing again resulted in many people losing their jobs. The President of the United States himself comes in the arena to pardon him just seconds before Joe is set on fire once he sees proof that the plan worked after all.
* Idiocracy in which the main character is given a brief examination. He has three identical probes inserted into his mouth, ear, and backside, but the nurse on duty has no idea which one's which. Cut to him rinsing his mouth out with Brawndo.
* Idiocracy is a judicial sentence as well as a televised event. The convict faces armed "corrections" personnel in a gladiator-style match featuring monster trucks, explosions and plenty of phallic imagery.
* Idiocracy is much dirtier than any floor in a hospital should rightfully be. The Roomba responsible for cleaning the floor is stuck in a loop, ramming itself against a chair and proudly announcing that the floor is now clean, except the floor is only clean in the spot where the Roomba is stuck.
* Idiocracy, is regarded as talking "like a fag" (presumably meaning "too formally") when speaking normal 21st century English.

* Idiocracy, it is repeatedly stated that Rita is going to be gang-raped if Joe/Not Sure stops vouching for her as his "girlfriend."
* Idiocracy, Joe and Rita have to share the Lincoln Bedroom in the White House. Joe, naturally, takes the floor, even after Rita invites him into the bed. To add to the humor, Rita is a former prostitute.
* Idiocracy Joe has the world's three smartest children, and Frito fathers 32 of the world's dumbest.
* Idiocracy, Joe is sentenced to a single night of rehabilitation for failing to save the world. This seems to be a fairly mild punishment, until he finds out that 'rehabilitation' is essentially a public execution by means of insanely oversized monster trucks sporting flamethrowers, giant drills and other nasty weaponry.
* Idiocracy: Military suspended animation experiment, supposed to only last a year, takes two totally average people 500 years into the future, where they find they're anything but average....
* Idiocracy nationwide, almost any ads would have been a waste of money).
* Idiocracy of Gatorade. What makes it interesting is that they specifically mention this by saying that it "tastes like Gatorade".
* Idiocracy "Ow, My Balls" features a man continually taking blows to the crotch. Everyone thinks the show is hilarious, and his fans even pay "tribute" when he's making public appearances. Perhaps the people of the future are too dumb to recognize sympathy?
* Idiocracy quiets down a rowdy crowd in the House of Representin' by firing a light support weapon into the air.
* Idiocracy rather than drama, and the real focus is on the downfall of humanity.
* Idiocracy's Costco actually has its own subway system and university.
* Idiocracy subtrope. The hero actually spends most of the movie having to make everyone realize they're living in a Crapsack World.
* Idiocracy: Suspended animation into a distant future full of idiots...
* Idiocracy, the American flag has only twenty-five stars on it, so it’s possible half the states have seceded. On the other hand, there are only eleven stripes, so it’s possible it has simply been forgotten what the stars and stripes are supposed to represent. Or that nobody can count that high anymore.
* Idiocracy. The Army Researcher's powerpoint shows that Joe's stats are so average he's exceptional in how average he is.
* Idiocracy: "The Great Garbage Avalanche of 2505". They had mountains of garbage at least as high as some buildings, streets were littered, etc.
* Idiocracy, the main characters are frozen in 2005 and thawed by a random avalanche in 2505.
* Idiocracy. The most notable instance is when he is explaining to the Cabinet his plan to use water on crops instead of Brawndo energy drink. He has to pretend that he can talk to plants before they listen to him.
* Idiocracy, they had originally planned to use Gatorade, but Gatorade didn't want to be associated with the film, especially since they would play such a major role in the plot. And thus the fictional Brawndo was born.
* Idiocracy tries to object to the judge's clear bias, forgets and objects that "he won't be able to pay ME after he gives back all the money he stole from the hospital!"
* Idiocracy voices two announcers, the one for the Masturbating Channel and the stadium one for Rehabilitation.
* Idiocracy. When Joe meets the show's actor later, he finds that people commonly run up to the actor and kick him in the balls because they saw it on TV.
* Idiocracy, when Paris is briefly shown, the Eiffel Tower (in perfect condition) is the only thing that remains there; everything else is an uninhabited flattened wasteland.
* Idiocracy when they switch from Brawndo (it's got electrolytes!) to water.
* Idiocracy, where the "hero" triggers alarms every time his wrist comes anywhere near a laser scanner after he's arrested, tattooed, and escapes.
* Idiocracy, which takes place in the year 2505, everything costs several billion dollars. Of course, the ridiculously bad economy is actually a plot point in the

film — it's entirely possible that hideous inflation is an intentional choice rather than just poor economic mismanagement so that everybody can be rich and amazed to have "billions of dollars". On the other hand, considering that 500 years of 3% inflation would still result in an increase of around 2.6 million times, it's not as absurd as it initially seems at first glance.
* Idiocracy. While presenting his project on hibernation to several army officials, he reveals he took a lot of pictures with him hanging out with Upgrayedd, Rita's pimp. He has to mash on the slide button several times to get back to the original presentation.
* Idiocracy with some accompanying images of a futuristic world showing bearded guys in togas among the crystal spires of their city. The camera pulls back to reveal that these images are all part of a mural at a carnival, in front of which a bunch of not-too-bright and decidedly non-futuristic-looking people are waiting in line to get into some kind of exhibition or maybe carnival ride.
* Idiosyncratic Album Theming — Every album by an artist shares some quirky attribute.
* Idiosyncratic Combo Levels: Names for combo length or timing specific to a game.
* Idiosyncratic Cover Art: The cover never really changes its art across multiple volumes, even if the titles do.
* idiosyncratic door system could be used to add an uncanny element (or sheer comedy) into a highly automated facility. Though this is rarely used or regarded in media.
* Idiosyncratic Episode Naming: Every episode is named in the same way.
* Idiosyncratic Episode Naming: Every episode of the show has their title follow the same pattern.
* Idiosyncratic Episode Naming limit) while Eli has a generic plate with no province (or state) caption.
* Idiosyncratic Ratings Scale: A critic has a unique, creative way of rating what's being reviewed.
* Idiosyncratic Ship Naming: Using an actual word to refer to a pairing.
* Idiosyncratic Wipes of cameras from the Machine's network (the Machine is, in essence, the show's viewpoint character). After a virus is uploaded into it, glitches begin to appear during the wipes, which become increasingly frequent and severe over time.
* Idiosyncrazy: Some supervillains get really, really crazy about one specific thing and incorporate it into all their crimes.
* Idiot Ball and got themselves in trouble through their own stupidity.
* Idiot Ball doesn't intentionally engage in lecherous behaviour, in contrast to many other examples of this trope.
* Idiot Ball the fact that they should know this), they still get it wrong!
* Idiot Ball themselves. Fortunately, college football rules state that a muffed punt can't be advanced (or retreated), so Kent State didn't lose any field position and they would go on to win handily.
* Idiot Ball: The plot requires a usually smarter character to suddenly act like an idiot.
* Idiot Ball: The plot requires for an otherwise intelligent character to suddenly act very stupid.
* Idiot Ball unless he's being secretly sarcastic, which would be even more out of character. When the Emperor tells him in so many words to stop using his mouth to say stupid works, he says:
* Idiot Ball when it comes to social media or the time a madame books rooms for her prostitution ring.
* "Idiot Box" and "The Paper" both have Squidward cave in to desiring something he saw as childish after observing SpongeBob having fun with it, playing pretend inside a cardboard box for the former and using a gum wrapper to do all sorts of improbable things in the latter.
* Idiot Box looks up to his friend Kev, unaware that Kev is a sociopath. He remains unaware even as he starts to move beyond Kev's influence and realize he can make more of his life than Kev ever could.

* Idiotest, worth respectively $200/$200/$500/$500/$1000/$2500, so the last round is worth more than the first five combined. The rub is that players lose ten percent of the money for each second they do not answer. Even then, the minimum value of a correct answer in round six is worth more than the maximum value of either of the first two rounds.
* Idiot Hair, but less abrassive than Nino. She's quite stubborn and prideful and often tries to act more mature than she really is.
* Idiot Hair, Glacia's erm... braids, Wallace's floating curls, Greta's danishes and Tucker's whatevers.
* Idiot Hair is shown in the comic to be an "erogenous zone". It's unclear if the note was referring to his scalp reacting to the hair being pulled, or if he has actual feeling in the hair, but the fandom tends to run with the latter, and usually applies the same principle to the other curl-bearing nations. At least one fic goes to the logical extreme of the hairs being sensitive and has one bleed when severed. Also, Norway's curl actually floats around, detached from his head.
* Idiot Hair. Plus, to most people, Princess Tutu appears to be an enormous swan.
* Idiot Hero After the outburst, they're closer than ever, and Kyouya knows he's free to occasionally tell Tamaki how stupid he is without ruining their friendship... just like everyone else does.
* Idiot Hero and thus is on the lookout for Distressed Damsels to rescue. This is turned on its head in Episode 4, where he's lured in a cursed castle by the four "Ugly Princesses". Naturally, he ends up as the Distressed Dude to be rescued by his friends.
* Idiot Hero but sometimes he does things ridiculously well to the point of brilliance (e.g. writing a symphony (once he got the hands to play it), driving the ship and shooting at a chasing car of robot mafia at the same time, and re-arranging an entire galaxy with a gravitational array to write Leela a love message).
* Idiot Hero gets thing done by simply being lucky rather than smart or skilled.
* Idiot Hero Gourry Gabriev actually has the potential to be a sorcerer of power perhaps equal to Lina Inverse — it's just his Swiss-cheese memory stops him.
* Idiot Hero, Helen is able to do this very well. It helps that besides being the mother that needs to balance, control, and maintain her family, she can adjust herself in various ways to accommodate her own plans.
* Idiot Hero in the end. Hinata loved him long before he ever became the hero in the public's eye, and she'll love him long after his story fades into legend.
* Idiot Hero is either dimwitted, ignorant, addled, and/or a total moron.
* Idiot Hero. Reason? He has the Heroic Heart, which resembles a star, that got separated from his main body when Kirby was split into ten and almost wiped out of existence by Necrodeus. Even after he was split, his heroic heart remains, and offers for itself and the ten Kirbys to fight Necrodeus together.
* Idiot Heros, does not recognize medical ninjutsu and at first thinks that Kabuto is... feeling Hinata.
* Idiot Hero Taokaka is Feb 22 (World Thinking Day and Cat's Day in Japan).
* Idiot Hero, tend to make them intelligent enough to be considered smart, but not geniuses.
* Idiot Hero: The main protagonist is not too bright, and thus prone to causing as many dumb problems as they solve.
* Idiot Hero. When fighting against truly dangerous opponents, Goku's focus and fighting form are top notch, a fact that many of his companions notice. He even says himself during the Otherworld Tournament that his skill in combat is directly proportional to the seriousness of the threat he's facing.
* Idiot Hero with a firm grasp on rocket science (and the wit and adaptive skills needed to achieve such things with his limited resources), law and the various loopholes he can exploit.
* Idiot Hero with no idea how to stop that from happening beyond the vague notion that "if we have the power to destroy [it], we must have the power to save it". A concept that doesn't really hold true in a lot of situations.
* Idiot Hero Yukimura Sanada. When he says something truly dumb, he delivers a dope

PUNCH, usually sending Yukimura through the nearest door, or into a wall. He's always up again a second later though.
* Idiot Houdini: A dumb character avoids punishment for their actions simply because they don't know any better.
* Idiotic Partner Confession: When you tell a stupid person something another character isn't supposed to know, of course, they're gonna blurt it out to everyone.
* Idiotic Sociopaths in the series helping and saving the people he cares for and even people who hate him and want him to suffer.
* idiotic tolerated by the rest of the cast, any other, they openly hate and abuse her.
* Idiot Plot 12 hours to surrender after seizing his daughter as a hostage. One would think 12 minutes would be enough — how long does it take to surrender? The extra time only encourages our hero to launch a rescue mission.
* Idiot Plot: Audiences don't like the story because the conflict relied too much on the characters all being too stupid to notice the obvious solutions to their problem.
* Idiot Plot, in which the characters take way too long to realize both twins are present.
* Idiot Plot: The only reason the conflict happens at all is because everyone is acting like a moron.
* Idiot Plot: This plot can't go anywhere without the characters sacrificing their intelligence.
* Idiot's Delight, a satire about the people stuck in an Italian border resort as war looms, takes place over 24 hours.
* Idiot's Delight is Weber, who sells arms to all sides and profits off of death. He defends himself by saying that the people who use his products are worse than he is.
* Idiotsitter, as Gene says Chet is her best nonsexual friend. Chet agrees that they're "friends, but we never touch ends."
* Idiotsitter as Mr. Russel just whacks her in the face (sending her falling hard to the floor) and runs away, shouting "Happy Ocho de Octo!"
* Idiotsitter, Billie and Gene don oversized fur coats during "Happy Birthday", while they are also whacked out on peyote. The image of them in their coats and sunglasses, in-doors, is also a promo image for the series.
* Idiotsitter, Billie is hired to babysit the adult Gene as a mixture of legal guardian/nanny/tutor. Being a Harvard grad, she is quite resistant-but she is also quite poor, and is swayed by Gene's father eventually offering double his original price. Slowly, she starts to actually like Gene.
* Idiotsitter, Billie is led into the darkened garage by Joy, who explains the situation of "Fight Day" by matchlight. Then the match goes out and Joy flees, leaving Billie to light a match of her own-revealing Gene right behind her, who lampshades this trope.
* Idiotsitter, during the episode "Fight Day", Gene surprises Billie in a dark garage, and paint cans fall on her. Hours later when Billie wakes up, she's got red all over her shirt and screams, before she realizes it's paint.
* Idiotsitter, "The Ex-Boyfriend", Billie has dinner with her ex, and Gene suggests using this trope-on his car. They come up with another plan, and when it falls flat-Gene sets fire to the guy's car anyway.
* idiots!, there's a strong case for this being the pot calling the kettle black.
* Idiots trying this when they don't know what they're doing. Just as Ashburn is getting chewed out by her partner for always thinking she knows better than everyone else, a guy next to them in the diner starts choking. Ashburn, who had half-watched a medical programme about tracheotomies earlier in the film, springs into action... succeeding only in nicking an artery and spraying the diner with blood by the time the ambulance arrives.
* idiot. There are also quite a few others. But the most amusing one has to be when Carson is lying to the captain about Kyle being the hijacker. He tells her that she outright refuses to negotiate (as to not blow his cover) and to go ahead and have

the airline wire the $50 million "she" demanded without "her knowing". Next scene shows him getting a call from the captain saying it's been wired. Yeah, that's very much how real life does not work. The airline has no idea who she is and Carson gives no evidence whatsoever that's she's a hijacker. Yeah, we'll all believe she's a hijacker because an air marshal, the person one should trust the most on an airplane, says so. At the very least, the airline would want a background identity to consider wiring the money.
* idiot who needs a cheatsheet to remember spells. He also has trouble pronouncing Latin.
* "I Disagree With You, but I'm Pretty Sure You're Not Hitler", "Got Competence?", "9/11 Was an Outside Job!" and "Legalize Pot".
* I discovered something horrible on an old family VHS tape and he had repressed the memory.
* Id is the very definition of this trope. Men and women alike fawn over his beauty. Though more often than not, every person he's met has initially thought him a woman.
* Iditarod, Alaska, the namesake of the Iditarod Trail and the annual dog sled race.
* Iditarod: The Toughest Race on Earth: A reality series that chronicles the struggles that competitors in the Iditarod race go through.
* "idkfa", instead of giving all weapons, full ammo, and max armor, turns the player into a chicken. There also exists an item called the Morph Ovum that does this to all monsters but the bosses.
* IDKFA there are doors that can only be opened by these skeleton keys, but then they can obtained by means other than cheating.
* idle animations will have him pose and flex his body while sucking up his fat. A variant ends in his gut flopping back to normal, which knocks his belt off.
* Idle Champions of the Forgotten Realms at the enemies, which not only deals huge damage but also fills up the Story of Doom stacks to max for 30 seconds.
* Idle Champions of the Forgotten Realms by 10 for every point of Intelligence less than 12 among your active champions. For example, Minsc with 8 Intelligence will reduce its max health by 40 if he is in the party.
* Idle Downloader lets you multiply offline earnings by 3, multiply download rate by 2, or reset Server Farm points by watching an ad.
* Idle for too long comes out of nowhere and kills you, resulting in an instant Game Over.
* Idle Game, one can hire corrupt lawyers to keep the heat off, and occasionally bribe DEA officials to not raid their drug labs.
* Idle Hands and Angels & Airwaves fame was a drive-thru employee.
* Idle Hands are undead stoners who returned from the dead because... well...
* Idle Hands begins with the demonically possessed main characters' hand killing his parents on Halloween.
* Idle Hands blown up into an entire movie, with the hand possessed by a demon drawn to particularly lazy individuals (Anton Tobias, the 'owner' of the hand, speculates that this is because he did so little with the hand).
* Idle Hands, Elden Henson's character Pnub is decapitated by a thrown circular saw blade, and as his head bounces down a flight of stairs, he looks up at the killer and says "Whoa, cool."
* Idle Hands has examples of Jacob Marley Apparel and possession. After the protagonist's best friends are murdered by his hand they decide not to go to heaven and possess their own dead bodies. The bodies function normally despite the fact that one has a beer bottle in his head and the other was decapitated. They can interact normally with everyone else too. Once they duct tape the head back on they can even go out in public. So I guess they aren't really ghost even though they are dead. You know what, never mind.
* Idle Hands is about a slacker whose possessed arm goes on a killing spree around a suburban neighborhood.
* Idle Hands one of them, trying to call the cops, exclaims that "I think he smoked some nutmeg or something!"

* Idle Hands: Tanya wears a devil costume to the school dance, and makes out with Phub for a while.
* Idle Hands, when things are getting hot and heavy with Molly, Anton ties his own hand to the bed. He's doing it for her safety, but she thinks he's just being kinky.
* Idle Mine Remix mentions that in the Universe, planets cannot become much larger than over 250000 km in diameter because the immense mass and pressure in the core would start a nuclear fusion, which means that the planet would become a star. But thanks to the game's different physics that can be done.
* Idle Rich: Rich people who don't do anything vs. rich people who actually do things.
* Idle Slayer doubles offline progress when you watch an ad. It may not always work, though.
* Idlewild as the characters suddenly realize how many of their friends/family are virtual and how empty the world actually is.
* Idlewild. Clodge ball is an immersive, brutal version of strategy games the students played as children with graphic violence and attacks against the opposing commander encouraged; on the other hand, all the soldiers are virtual and wounds against human commanders are automatically nonlethal.
* Idlewild fit: virtual armies of cyborgs, nightgaunts, hobgoblins, and gangsters that are expected to die in large numbers every fight.
* Idlewild has Maestro and the Nannies, who may be true AIs or else very well designed evolving programs. Malachi is more explicitly an AI as an attempt to create an original human intelligence and personality.
* Idlewild has Mercutio, who describes his coping methods as "Humor? That's my lizard tail. You can look at that while I run away."
* Idlewild: Immersive Virtual Reality allows students to program their own personal domains. When they make personal phone calls to each other, the system mashes the domains together.
* Idlewild is the story of a teenage boy who realizes his world has been shaped by lying adults and is faced with the responsibility to support himself and others. Also, there's an apocalypse.
* Idlewild sees Maestro do this to Halloween. In Maestro's defense, he claimed that it was intended to break Halloween's problem with authority and that Maestro would release him later.
* Idlewild series has Immersive Virtual Reality. Users can meet in common areas or build their own domains from scratch.
* I'd Like to Buy an Eye when they impersonate pirates about to attack another ship.
* I'd like to see that!, where Bart is welcoming his friends into his treehouse casino. "Well, he certainly showed me."
* "I'd like to see you try it!" — They'll do much more than "try".
* "I'd Like to Teach the World to Sing" was originally written for a still-famous
* "I'd love to, but...uh...I'm clinically dead. What you're seeing is merely the last few movements before I stiffen."
* ID-number tattoos are a common means of identifying racehorses and other valuable livestock. Technology has improved to the point that high-end research laboratories can actually buy an automated machine capable of tattooing ID-numbers on a mouse's tail, to take the place of old-fashioned ear tags.
* I DO COCAAAAAAIIINE!! I hear it's somebody's biiiirrrrthdaaaaaay. I DO COCAINE!!"
* I Do I Do I Do, a Hallmark Original Movie, has an architect repeating her disastrous wedding day over and over until she discovers what she really wants in life.
* I doing it wrong!". The band would break up a year after the song's release, citing tensions between Nicholas and Aiden.
* "IDOL" again references Anpanman in the verse "sometimes I become your superhero/Keep spinning, you Anpanman". The choreography for this line also has the members posing as various superheroes: Jin as the
* Idol Angels Welcome Youko. Just what the title says. The series aim was to push

Mika Kanai's singing career.
* idol anime in that it allows the animators to record a real person dancing and apply the character models, resulting in more fluid and natural-looking animation, but it can be rather jarring.
* "Idol Curiosity": Just when Sniffles thinks he's evaded all the Cursed Idol's traps, the earthquake he evaded earlier in the episode somehow
* Idol Densetsu Eriko, Eriko's dogs are named Fortissimo and Pianissimo. Fortissimo is quiet and Pianissimo is noisy.
* Idol Hakkenden: Gogawa in Studio 2 wants to become a famous baseball singer, but he's terrible at singing, with it even being reflected by how out-of-tune it sounds in-game. He gets utterly outclassed by Erika's Miracle Voice.
* Idol Hakkenden: When Kuwashi attacks Erika with his taser, he calls it "The-Spanish-Currency-is-Called-Peseta" Punch, "The-Aardvark-is-Native-to-Africa" Punch, and "Reagan-is-the-Fiftieth-U.S.-President" Punch.
* Idolish 7 conveniently has 17 episodes that covers Part 1 of the Main Story
* Idolish 7 has slowly been adding in new skills and abilities to make higher difficulties easier to play, especially for newer or lower-leveled players.
* Idolish 7. Some minor details had to be cut in order to fit all 17 episodes. Everything else remains faithful to the game for the most part.
* Idolish 7, The player is given several rewards upon achieving certain goals such as meeting a combo requirement, getting a certain rank, or playing a song a certain number of times. There are also the bonus-giving badges which are also awarded to players upon reaching specific milestones.
* Idolish 7 You can play the game for free, but good luck getting a decent rank or getting all the rabbit chats
* Idol Manager is a game about, well, managing one or more groups of female idols, training their singing and dancing, and making them look attractive, while trying to keep your idol company afloat and keep them from having injuries or emotional meltdowns.
* Idolmaster: Xenoglossia, and Yayoi wears a giant penguin suit on more than one occasion.
* Idolmaster: Xenoglossia appears where the moon once was and threatens the world, requiring the heroines to stop it in the next (and final) episode.
* Idolmaster: Xenoglossia of the characters' personalities from the original video game, but changes... well, everything else.
* Idolmaster: Xenoglossia to spit her essence back out, where she likely then dissipated.
* Idol No Akahon has the titular group of idols getting told that they shouldn't date (or be caught in anything resembling anything remotely scandalous) by the CEO of their talent agency to avoid alienating their fanbase.
* Idol, only for Monokuma to sabotage her performance and cause it to slam shut on her.
* Idol Project featured the "Tropical Dimension", basically a resort/ocean planet. And yes, it had space whales.
* Idol Project takes things even further, having the universe run by an idol. The whole story is about a contest to decide what idol is fit to take over the Ruler Of The Universe place.
* idol series - without warning, but you catch on quickly enough that they're acting.
* Idol) since there aren't enough easily distinguishable colors for that many members at one time.
* Idol Singer 3DS game. The episode also shared the same name as the game.
* Idol Singer are able to investigate what the police can't handle and find out the machination of the Old Gods, the supernatural and their cult lackeys.
* Idol Singer culture, there is a distinct difference between the terms "graduate" and "withdraw" when it comes to an idol retiring. Both words relate to the idol moving on past her idol career, but when an idol "graduates", it is treated as an amicable departure, usually accompanied by a farewell performance. Conversely, an idol "withdrawing" is seen as due to less than pleasant circumstances, such as an

idol being fired.
* Idol Singer dreams. She eventually rejoins the volleyball team towards the end, however.
* Idol Singer, Fujie came to believe that she hated him, leading to him only killing himself... but making it look as if Okino actually murdered him.
* Idol Singer; in fact, her trying to hack into its parent organization Chaos was what got her recruited in the first place.
* Idol Singer onto, fans claim that idols being in relationships will mean that they are not devoted to their job and their fans, which is also enforced by Asian work culture mentality. Newbie and rookie idol singers are less likely to reveal their relationships publicly if they are even dating at all to begin with. Some talent companies have rules on not having any romantic relationships written on their contracts.
* Idol Singer Sala Manda, and gushes when she realizes that she met and even got to touch Sala.
* Idol Singer that she's not interested in. Aoi asks for a meeting and shows up in male clothes, telling him about his issues. The guy respects Aoi's wish, withdraws the proposal, and they decide to stay friends.
* idols. It was easier for fans to buy Aikawa as a serious wrestler due to both her background and her in-ring performances showing she had "paid her dues" and was credible enough as an athlete, so nobody minded her getting pushed into a World of Stardom Championship run as a classic underdog babyface. However, later promotions would see Aikawa's success, not realize her background that made it possible, and immediately push former idols even if nobody could ever buy them as wrestlers in the first place.
* Idols of Anime episode 14 discusses the rise of Moe in anime during the mid-2000s.
* Idols of Anime: Viga calls out shows where a character's speaking and singing voices don't match up well.
* Idol Time PriPara in which three winners would be chosen and shown along with the players' characters on TV. The coords they designed would also appear in the final update of the game.
* Idol Time PriPara, Yui is annoyed that her older brother, Shougo, is bothering her. To scare him away, she shows him a picture that she took when he was younger of him crying with a wet bedsheet next to him and the caption "This is amazing, Shougo!". This, along with an approaching group of fangirls, makes him run away from her.
* Idol Time season had a contest to design a new mascot to appear in the anime, with the winner being a rainbow-colored turtle.
* Idol x Warrior Miracle Tunes!, and in episode 21 when he's turned into a Negative Jeweler, he targets good-looking men and puts them under his spell by blowing kisses at them.
* Idol x Warrior Miracle Tunes! got an Italian/Spanish co-produced remake in 2018.
* Idol x Warrior Miracle Tunes! while the actresses released music and performed in music festivals as their characters.
* Idomeneo, unlike the classical myth it is based on, Neptune intervenes and has Idomeneo spare his son's life.
* Idomeneo was adapted and brought up to current tastes from that of the earlier French opera by Antoine Danchet and André Campra.
* iDomination and the death of the other major promotions in the '80s.
* I Don’t Like You at All, Big Brother!!), down to which hand he uses. It turned out she snooped him through a telescope.
* I Don’t Like You at All, Big Brother!!. She even blackmails the main character Shuusuke into buying more for her after she threatens to rip up his girly magazine or show it to his family/sister.
* I Don’t Like You at All, Big Brother!! the brother's pervertedness, even if it's not targeted at her.
* I Don’t Like You at All, Big Brother!!, whose life goal is to hook up with her adopted brother Shuusuke.

* I do not know. I just merely understand it as my primary function. Please input Talk."STATEMENT"
* I Do Not Like Green Eggs and Ham: A character spends the story claiming they hate something, then finds that they actually like it when they finally give it a chance.
* I Do Not Like Green Eggs and Ham: The story revolves around a character refusing to try something they're sure they won't like before eventually giving in and finding that they actually do like it after all.
* I Do Not Own: Putting a disclaimer on fan works saying that you don't own the original work, characters, etc.
* "I don't always drink beer but when I do, I drink Dos Equis. Stay thirsty, friends."
* "I Don't Believe You" strikes me more of a song about someone with such low self-esteem that they can't believe the person actually loves them. It's what I get from quotes like
* I don't care if the Washington Monument is closed, I want to visit it now!"
* I Don't Get It, who is still close to the father despite being divorced.
* "I don't give a fuck, I'm taking you with me! So you like to play with bombs, huh? Well, BOMBS AWAY YOU WOODY BUNNY FUCKING PECKER PIECE OF SHIT!"
* "I don't have any money." It's so natural to say it! However, that's why they're in bankruptcy court.
* I Don't Know How But They Found Me is a concept band based around the idea of an 80s band that never made it big and was forgotten about. All of their music and music videos are presented as if they were found on cassette tapes in an old box, and are now being re-discovered and shared.
* I Don't Know How I Didn't Realize I Had To Twist The Joystick To Play.
* I Don't Know How She Does It Kate Reddy's cell phone ringtone plays "Farmer in the Dell", she later explains that she took her son's toy phone by accident.
* "I Don't Know My Age: 5 Things I Learned in My Isolated Tribe". There's one section dedicated to talking amazing and insane modern technology is to him. He's expressed amazement over the following things: faucets, flushing toilets, cars, the different types of music, the internet, and grocery stores. Granted, he sometimes misses the food back home in the jungle, mainly monkey and bugs.
* " 'I don't know where I'll be then, Doc,' he said, 'But I won't smell too good, that's for sure.' "
* "I don't like sand. It's course, it's rough, it's irritating, and it gets everywhere."
* I Don't Like You and You Don't Like Me: ...but we have to work together to a common goal whether we like it or not.
* I Don't Like You and You Don't Like Me if they happened to discuss this predicament.
* I don't mind if you leave, because I know you'll come back." Forever is another variant, where she acknowledges the time between them is over but if he ever wants her back then all he has to do is call her back. Butterfly is, yet another, example. Its main message is very similar to Always Be My Baby except it's more, "If you truly love me, you will come back but, until then, I have to set you free."
* I Don't Need Your Civil War, Hulkling infiltrates as a S.H.I.E.L.D. agent a super-human prison to kidnap Hank Pym, and while there he salutes S.H.I.E.D. commander Maria Hill with "Hello. Not a spy."
* I Don't Pay You to Think: Don't question my orders, just follow them!
* I Don't Remember Loving You" by John Conlee is all about this trope.
* "I don't see race. People tell me I'm white, and I believe them because [humorously observed benefit of being a member of the racial majority]."
* "I don't think anybody gave you license to talk, here in Callihappimussisoopi County!"
* : "I don't wanna be a villain anymore! I just wanna go home! And maybe wear pants without feces in them!"
* I Don't Want This Kind of Hero, aka a government agency that recruits people to become 'heroes'. They actually almost had to disband when their main nemesis,

Knife, suddenly disappeared years ago, and ultimately had to create a fake Knife group to justify their continued existence. Until the real Knife's return in the present, they mostly take on odd jobs and act as a second police force.
* I Don't Want This Kind of Hero: Dana is very easy to set off, which is one of the many reasons why her subordinates fear her so much. It's actually her weakness, though: the angrier she gets, the weaker her power becomes as well.
* I Don't Want This Kind of Hero: Discussed. Orca tells Naga that the organization Spoon belongs to isn't exactly clean, and the fact that the existence of Knife hasn't been publicized throws further suspicion on them. When Naga then relates this to Dana, asking for answers, she admits that that's all true—but does it matter? Even if Spoon has its shady areas, that doesn't change the fact that Knife is full of mass murderers who need to be stopped.
* I Don't Want This Kind of Hero: Dune can inflict this on others using the smoke from his pipe. He notably did this to Naga early on without his consent and was brutally called out for it.
* I Don't Want This Kind of Hero, is why, despite claiming to be 'heroes', they're not wearing technicolor spandex suits. In general, Spoon members wear whatever they want (heck, Naga does most of his missions in his school uniform, as he usually goes to work right after school).
* I Don't Want This Kind of Hero. Lady is in love with Naga, who would prefer that she stay far, far away from him. Orca is in love with Medusa, who sees him more as a surrogate son than anything. Also, the entire plot happens because Baek Morae is in love with Raptor while she would very much rather see him dead.
* I Don't Want This Kind of Hero means that Naga should be denied the right to live his life, and Naga himself is annoyed at the people who claim he's doing nothing, given that being a superhero is already going beyond. He's helping people out on a regular basis — why should that not be enough?
* I Don't Want This Kind of Hero More generally, the fight against Knife is also very personal for him: Songha used to be his teammate, and Knife is responsible for the deaths of his first team.
* I Don't Want This Kind of Hero Oh, and essentially violently stalk her for a decade. As he tells her, he'll never be content until he's the only one in her heart.
* I Don't Want This Kind of Hero Temper aside, Dana is a great boss to work for.
* I Don't Want This Kind of Hero: The primary reason why Naga became an official superhero—in today's society, it's a paying job (otherwise, as he points out, classic superheroism was really just hardcore volunteer work).
* I Don't Want This Kind of Hero therefore utterly destroying their relationship in the span of about a day. To rub salt in the wound, in the present day, he's the one who ended up with her.
* I Don't Want This Kind of Hero, Tracy is this to Baek Morae, created by a group of scientists in an attempt to duplicate the latter's power of purification. Baek Morae, on his part, considers her existence disgraceful and so tries to kill her when they meet in the present.
* I Don't Want This Kind of Hero Unsurprisingly, she's now barely better than the villains she's supposed to be against.
* I Dont Want To Be The Hive Queen can even absorb the DNA from their prey and incorporate it in the new generations of Vex. Unlike most examples on this page, the Vex in the story are actually rather friendly, mostly because their current Hive Queen is a former human that retained her memories and personality.
* I Don't Want to Get Hurt, so I'll Become the Ultimate Defensive Hero
* I Don't Want to Ruin Our Friendship, and worried about losing that if they try to become something more.
* I Don't Want to Ruin Our Friendship on the grounds that doing so will destroy their friendship.
* I Don't Want to Ruin Our Friendship: Two friends who are attracted to each other decide not to become a couple in case it doesn't work out, as they don't want to risk their friendship.
* I Don't Want to Ruin Our Friendship: Two people who are good friends refuse to

get romantically involved with each other on the grounds that their friendship would go south.
* 'I don't work here, does not work here' category has twelve pages worth of material.
* "I dood it!", "He don't know me very well, do he?" and "You bwoke my widdle arm!" –
* "I dood it!", "He don't know me very well, do he?" and "You bwoke my widdle arm!" (reference to Red Skelton's radio comedy character Junior, aka "Mean Widdle Kid")
* "I dood it!", "He don't know me very well, do he?" and "You bwoke my widdle arm!" s were lifted from the radio character Junior, aka "Mean Widdle Kid", played by Red Skelton.
* Idoru. Okay, so it's made in 1995 when the internet was actually invented, but many things are just now becoming possible - and done.
* Idoru uses a collapsible war axe not dissimilar to the US army tactical tomahawk.
* "I'd rather be fishing." Jimmy Glass, executed in Louisiana's electric chair, 1987
* I'd Rather Be Right was a success in 1937, but has rarely been revived since due to its reliance on topical humor about the F.D.R. administration. The show's enduring legacy is the song "Have You Met Miss Jones?"
* "I'd Rather Have a Bottle in front of Me (than a Frontal Lobotomy)", or would you choose frontal lobotomy?
* I Dream In Another Language Zikril and using the language to maintain harmony among themselves.
* I Dream, Natalie was this, mostly to Amy. Though when they're forced to work together they do end up getting along in the end. If only until the next episode.
* I Dream of a Jeanie Bottle, and her mentor has told her it's either impossible or forbidden (a typo making it ambiguous) to do more than disguise herself as a man. She also, possibly as a form of quietly ironic revenge, has a habit of doing the same to men and boys around her, with some apathy to their restoration - three men and a teen boy are now two woman, a little girl, and a teen girl respectively, and unlikely to encounter her again. Her "master" Neil is also being forced by circumstances to spend significant stretches female.
* I Dream of a Jeanie Bottle Jean turns out to have acquired an allergy to moonshine whiskey. She starts sneezing random magical effects all over the place unless she is confined to her bottle.
* I Dream of a Jeanie Bottle or in response to some slight, real or imagined, though once it was a clear-cut case of self-defense.
* I Dream of a Jeanie Bottle via a poorly worded wish. "I would totally so do her" indeed.
* "I Dream of Cosmo": Timmy's Dad meets an amnesiac Cosmo and assumes Cosmo must be a
* I Dream of Jeannie after being hit on the head at NASA, she's represented by a lawyer who happens to have been on a tour of the base at the time.
* I Dream of Jeannie after the first season to her being born a genie.
* I Dream of Jeannie. Although the Latin American dub mercifully removed it from both shows.
* I Dream of Jeannie: An astronaut discovers a Persian genie in a bottle while stranded on a deserted island, who ends up following him home.
* I Dream of Jeannie, as Jeannie has been willing and eager to marry him since as early as the second episode of the first season.
* I Dream of Jeannie; as she is in love with Major Nelson, her goal is to be Nelson's wife.
* I Dream of Jeannie: At a party, Jeannie does her 'fold arms, nod head' spell casting gesture. One of the guests sees her, thinks it is a new dance move, and soon everyone at the party is doing it.
* I Dream of Jeannie. Before becoming Dr. Bellows's wife Amanda, Emmaline Henry appeared in the Season One episode "Is There an Extra Genie in the House?" as the sexy assistant to a down-on-his-luck magician who temporarily rent out Roger's

apartment.
* I Dream of Jeannie. Dr. Bellows knew something was up, but Jeannie always managed to pop things back to normal before anybody could corroborate his story. He was left looking like a raving lunatic.
* I Dream of Jeannie features a willing slave entity to whom liberation means the freedom not to be a literal genie, but to serve of her master as she sees fit. (Jeannie is, in fact an exteme case, as she falls in love with her master. He tries to set her free shortly after meeting her, but she won't allow it, returning to her bottle simply so he can find it and open it again.)
* I Dream of Jeannie has Jeannie, newly arrived in Captain Nelson's house, dressed in one of his white shirts. Captain Nelson tells her to take off the shirt. Cue Jeannie shrugging and starting to unbutton it, whereupon he corrects himself, and tells her to change back to her genie outfit.
* I Dream of Jeannie: In "Have You Ever Had A Genie Hate You?", a magic potion causes Jeannie to hate Tony. After putting him through various tortures, in the end, both Tony and Roger find themselves under a swinging pendulum about to slice their throats.
* I Dream of Jeannie - In the pilot, spacecapsule wrecked astronaut Tony Nelson makes one, inadvertantly using Jeannies bottle as part of the last S.
* I Dream of Jeannie: In "Tomorrow Is Not Another Day", upon trying to fetch the morning paper Jeannie accidentally summons a paper from the next day. The subplot involves Roger attempting to capitalise on this by using it to bet on races he knows the outcome to. Tony, however, considers this too much of an unfair advantage and manages to sabotage him by having Jeannie change the result of the race, then waiting till Roger has torn up his betting slip to change it back so that no one who gambled legitimately will lose out.
* I Dream of Jeannie involves Jeannie going to Reno filing for separation from her Master, Tony, who thinks she's gone to Reno, Nevada, when she really went to "Reno, Persia."
* I Dream of Jeannie: Jeannie coming down with a cold would cause "blink" effects and random things showing up that Tony had to get rid of.
* I Dream of Jeannie, nosy NASA psychiatrist Dr. Bellows is constantly played off Tony Nelson this way. With the good doctor always suspecting that Tony is hiding something. (Which would be Jeannie.)
* I Dream of Jeannie plays with this. Tony gets sick of Jeannie doing him favors and commands her that the next time he asks for anything, she deny it. He ends up getting kidnapped by terrorists but due to his previous command, Jeannie can't directly rescue him. The terrorists try to give him truth serum to make him talk, so Jeannie casts a spell on him that forces him to speak in a different language when under the effect of the serum.
* I Dream of Jeannie. Roger Healey also became one of these after the first few episodes.
* I Dream of Jeannie: Shortly after Jeannie and Major Nelson get married Major Healey finds a bassinet and a bottle of pre-natal vitamins in their bedroom. He assumes this means Jeannie's pregnant and rushes off to tell everyone at NASA. The basket and vitamins are actually for Jeannie's dog's mate who's expecting a litter of puppies.
* I Dream of Jeannie since astronauts of the time really did get stuck in quarantine after missions. (See Real Life below.)
* I Dream of Jeannie-style. This particular quirk was eventually forgotten during the show's run... and then re-remembered during their wedding episode.
* I Dream of Jeannie: Subverted in "Nobody Loves A Fat Astronaut". Major Nelson tries to call home, and argues with a "recording". In reality, it was Jeannie's sister pretending to be a recording.
* I Dream of Jeannie: The trope applies to Major Nelson and Jeannie, once they marry. Once the continuity of the series is retconned, to indicate that Jeannie was born a djinni into a family of djinnis, it also becomes clear there are genies of various ages. One episode suggests that djinnis age slowly over thousands of years - Jeannie blinks up the minister who married her parents, who had just celebrated

their 3000th anniversary.
* I Dream of Jeannie version. One episode featured the "Blue Genie" (the one who initially planned on rewarding whoever freed him, but eventually decided to kill that unlucky individual).
* I Dream of Jeannie was a series that seemed to be based entirely on the premise that the title character was clearly madly in love with her master, Tony Nelson, who constantly deals with the headaches created by her clumsy super-powered advances on him. The fifth season had the pair married to try and stave off a ratings decline and Jeannie and Tony were married at the start of the fifth season. Snuffing out the lead conflict of the show only hastened its demise, as it was cancelled after the season's conclusion. This might have been why the two reunion films involved plots breaking the couple up.
* I Dream of Jeannie, "Watch the Birdie", featured a golf game where the ball did lots of bizarre and improbable things, but that was because of Jeannie's magic. Among other unlikely shots, Captain Nelson hit the ball from the branches of a tree and shot it in the hole after it had landed in a water fountain.
* I Dream of Jeannie, which would show three different rockets during a launch.
* I Dream of Jeannie whose two goals in life were to marry her 'master' and to have as much innocent fun as possible along the way.
* I Dream of Jeannie, with Air Force Captain (later Major) Nelson, Army Captain (later Major) Healey as N.A.S.A. astronauts and Colonel Bellows, the local psychiatrist, with the action depicted as taking place around Cape Kennedy and Cocoa Beach, Florida, but actually filmed near Edwards A.F.B. and Hollywood, CA.
* I Dream of Jesus" the Griffins go to a 50s themed restaurant. When Cleveland tries to enter the employees blast him away with a hose, but he fondly declares that it takes him back.
* I Dream of Jesus to inspire Brian and Stewie to break as many copies of the song as they can.
* I Dream of Mimi, Akira carries Mimi to the bathroom and hide from a rogue android. He even tells that she's light for a Robot Girl, presumably because of the advanced technology or body frame used in creating her.
* I Dream, where a pair of characters destroy every (fake) credit card they have trying to open a door this way.
* I Drew This this is totally original and a perfect satire for the war in Iraq, but then Joe the Liberal Eagle comes up with the paper, which has the headline "All That Cheney Stuff You Just Said", a reference to the 2006 Dick Cheney hunting accident. Last panel is of David sobbing onto his drawing board saying "Satire is dead!"
* "I Drink Alone" by George Thorogood and the Destroyers is about a man who regularly likes to drink alone.
* I Drink Your Blood inverts this, in that the hillbillies are actually decent people and it's the Satanic, murderous hippies who are evil. Unfortunately for the hillbillies, their plan to get back at said hippies by giving them meat pies contaminated with rabies backfires.
* Idris-class corvette and destroyers have hangar space for a small number of fighters, but primarily rely on their guns for their offensive punch.
* Idris Elba after Smith passed on the film, allegedly due to scheduling issues. Elba's role was eventually rewritten into a new major character, Vigilante, so as to leave the door open in case Smith wanted to return in future installments. As such, Storm Reid's character was initially written as Zoe, Deadshot's daughter from the first film.
* Idris Elba had a hard time finding work as an actor after first coming to America, eventually leading to him selling drugs while living out of his van before making it big in Hollywood.
* Idris Elba preferred American actors for authenticity. Upon discovering Idris' true origins, he offered him Stringer Bell instead.
* I'd Tell You, but Then I'd Have to Kill You: Someone has a secret that's so great, that if he told anyone, he'd have to kill them.
* I'd Tell You, but Then I'd Have to Kill You: You want to know my big secret? Ok

but you'll have to die afterwards. I'm not joking by the way...
* iDubbbz tells RiceGum "I'd say 'take the L' if you could pronounce it", satisfying RiceGum's wish for iDubbbz to make a joke about the former's Asian identity.
* Iduna touches her forehead with young Elsa's, before laying her down to sleep.
* I dunno wether this should be listed in Abandonware or Emulation or Digital Piracy or whatever, but what happens in the event that a game formerly offered on a Console-based Digital Distribution system (Xbox LIVE,
* Id uses many Wuxia tropes and mixes them with Norse and Christian mythology.
* IDW, and are manipulating him to bring about their master’s return.
* IDW comic map, which warns "Here there be monkeys, guard your valuables", "Beware the dangers of the Forest, they be too many a number to document", and "Elephant sightings reported".
* IDW comics, an alternate universe version of Trixie became an Alicorn princess. This would imply that the main universe's Trixie has the same potential, even if she's never shown it yet.
* IDW continuity a father figure), the Japanese Oroku Saki (Shredder).
* IDW empty and the grate over the air vent is dislodged. The guards do question how she fit through there, but run off to raise the alert, leaving the cell door wide open. Once it's all clear, Bombstrike emerges from above the ceiling tiles in the cell and makes her way out through the corridor.
* IDW Ghostbusters, in which he escapes the Devil by putting himself into a ghost trap.
* IDW has taken the time to explore this a few times in their run of The Transformers:
* ID, with varying degrees as to how much they were influenced by the men.
* IDW miniseries. Windblade herself was the culmination of a fan poll for the creation of a new character.
* IDW-published new continuity and having volunteered for Jhiaxus's experiment and her insanity was due to him deciding that it would be fun to torture her afterward.
* IDW Publishing, as they were unable to negotiate the fees to use these characters. The earlier reprints by Titan included everything because Marvel went a lot easier on them, though IDW eventually was able to work a deal with Marvel and reprinted the Marvel comics a second time with the issues featuring Spider-Man and Circuit Breaker intact.
* IDW Publishing claim to be the next step in Cybertronian evolution, making normal Transformers like Hot Rod and Wheeljack surplus to requirements.
* IDW Publishing comics since 2010. Unlike other companies before them, they also have the rights to most of his supporting cast.
* IDW Publishing had a magazine containing comic stories around the time the show originally aired that were published exclusively in the UK by London Editions Magazines, consisting of a series lasting 12 issues and two annual issues.
* IDW Publishing. In particular, Road Ranger talks of creating an heir who is an "optimized" version of himself and encourages Bug Bite to do the same, which implies that they are the creators of Optimus Prime and Bumblebee. The two also decide to recycle Leader-1 and Cy-Kill's remains to create a new GoBot, who is seen undergoing construction in the form of a jet plane similar to the alt mode of the Decepticon Starscream.
* IDW Publishing is hosted by two all new hosts: Forelock The Warlock and Mr. Karswell.
* IDW Publishing miniseries, which established the GoBots as being robots built to serve humanity before a faction led by Cy-Kill goes renegade and starts attempting to wipe out the human race.
* IDW Publishing). There was also a special that adapted the first pilot, "The Cage". The ongoing series came to an end with #22 in 2018.
* IDW Publishing to merge with its mind and convince its creator to make peace, causing Unicron to consume itself and implode into a black hole.
* IDW Publishing, which was less than a year away from release when the miniseries began publication.

* IDW's 2005 Transformers series to his toy, which also claimed he was his own 'bot to avoid spoiling the film).
* IDW's G.I. Joe took the form of one of these, with 9 high ranking Cobra members competing for the position of Cobra Commander by seeing who could kill the most members of G.I. Joe.
* IDW Shockwave is no slouch at this either, and not just for calculating probabilities or discovering weakness, either. During a fight with the Dinobots, he is astonished by the irrationality of their attack and deducts that it's driven by anger, an emotion that he finds irrational and normally pointless. However, once he sees how it seems to drive up their ability to fight, he patches together a "rage" emulator into his mind and goes absolutely berserk, singlehandedly dominating the Dinobots, and then puts this so-called "anger" on the back-burner for later analysis.
* IDW's Transformers comics is their tendency to do this to fan favorite characters.
* I Eat Tomatoes specialises in these, with many of his works sharing a universe including
* I Eat Your Skin is a horror version, where a writer in the Caribbean uncovers a voodoo zombie cult on an isolated island.
* i.e. "fuck"), prompting a recall of an earlier print run which had been rated PG.
* i.e.). In others (like Russia), the line is on alcohol by volume, so anything below that limit — whatever it's made of — is legally classified as "beer".
* i.e. it will fall then bounce when it reaches the bottom of the window.
* i.e. Mars, as this could (at least in theory) counteract the lack of atmosphere that makes Mars as cold as Hell.
* i.e. — Krum is 18 years old and shows a shocking arrogance and lack of faith in his presumably more experienced teammates, but no one in Quidditch fandom or sports media ever takes him to task for his decision — even though we see the press hound Krum as a Triwizard champion later in the book.
* i.e. missed the entire season with a neck injury which observers suspected may have been exaggerated to give the Colts a chance to draft Manning's successor in Andrew Luck. In both cases, their draft chances were nearly jeopardized by their replacement-level quarterbacks actually playing pretty well, effectively auditioning for a job elsewhere the following season.
* Iemoto on the ceiling, and even move, clinging solely with her toes.
* Ienakiko Remi one from the nineties. In both of them, the traveling musician Remi travels through France either on his/her own or with their master, their best friend, and/or their animals. And both are based in a French novel where the (male) lead character does the same.
* i.e. not using what today would be an Always Run option), and to never ever leave a single one of the allied humans ("Bobs") alive.
* Ienzo is an example of this to a lesser degree. He was an orphan that Ansem took in, who regarded Ansem as a father figure and turned out to be a child prodigy. When Ansem's other students betrayed him,
* i.e. one leading directly into the house proper, which includes windows but excludes garage doors).
* i.e. pythons, boas, and anacondas) may be more intelligent than previously thought. Research shows that they would check to make sure their prey is dead when they're constricting by checking the animal's heartbeat; they would keep squeezing until the heartbeat stops.
* "Iesha" by Another Bad Creation, the song quoted above. ABC were a preteen quartet discovered by Michael Bivin. The song recounts the lead singer meeting Iesha at the playground and falling in love with her "on the monkey bars".
* i.e. table sugar) derived from sugar cane rather than sugar beets. If it's not these, it's apparently not sugar.
* i.e. Vikings) come to Gaul to learn fear, a concept they cannot understand. The Gauls throw everything they have at them, including a severe beating from their strongest men, but only one thing teaches them to fear: Cacofonix's singing.

* i.e. writing a character and then playing as that character, flaws and all. For example, you can play as a noble paladin who cannot loot corpses and must leave them to rest in peace, or a warrior who refuses to use any form of magic, including enchanted items.
* ¡Alarma! was a Mexican news-magazine that specialized in very graphic pictures of traffic accidents, murder victims, as well as
* ¡Alarma!, with "Hit Them" discussing it the most directly: "Words have their place / but live what you say."
* ¡Eh, tío!''. where the woman who is insulted is the very same woman who is doing the insulting.
* ¡Mucha Lucha!: A cherry and pineapple Popsicle in the shape of Rikochet's head.
* ¡Mucha Lucha!: All of The Flea's organs have autonomy, and get out of his body to save him from an evil doctor that wants to extirpate one of them.
* ¡Mucha Lucha!. At first it seemed like it was just to illustrate their attacks, but it turned out they actually do this real time.
* ¡Mucha Lucha! despite her perfect teeth and planned to do the same to other people.
* ¡Mucha Lucha!, El Malefico says this when the Three Mascaritas turned into giants and beat him up.
* ¡Mucha Lucha! episode "Doomien" has Rikochet and Buena Girl as a tag-team who always seems to win, to the point that no one is actually rooting for them in the tag-team matches.
* ¡Mucha Lucha! guarding a bridge upset by insulting his mother.
* ¡Mucha Lucha! had Ricochet, Buena Girl and the Flea fight a masked toilet twice in the series. Also, The Flea swam in it at one point.
* ¡Mucha Lucha! has a minor character named French Twist who is a wrestler who happens to be a mime, and has the power to turn the imaginary objects he acts out into real invisible objects.
* ¡Mucha Lucha! - In "A Mucha Mucha Christmas," Santa Claus's evil brother, Rudo Claus, and his team of chubacabras try to take over Christmas by giving only those who have been bad gifts.
* ¡Mucha Lucha! is definitely on the "supernatural" side of things, with moves that involve shapeshifting among many others.
* ¡Mucha Lucha! mariachis that Rikochet hired to play for his signature entrance. They get obnoxious later in the episode. Mariachis and lucha libre are both Mexican, but they are not usually paired together.
* ¡Mucha Lucha! once had a wrestler named Doomien who is new to their school. During the match it turns out that Doomien is actually an evil demon.
* ¡Mucha Lucha!, Ricochet ends up wearing only his mask and underwear when the group is stranded on a deserted island. Nobody minds while on the island, but when they finally get home, Buena Girl orders him to get dressed. Ricochet refuses, but his Abuelo shows up and orders him, while bystanders start laughing. This time, Ricochet is embarrassed and complies.
* ¡Mucha Lucha!, Rikochet ends up taking on soccer, and is doing a rather... challenging drill. As exemplified by his coach: "You must run the course like your life depends on it! Because, a matter of fact... it does!"
* ¡Mucha Lucha!. The main setting is a school for luchadores, and true to form, pretty much 90% of the entire cast (and that's counting one-shot characters) dabbles in wrestling.
* ¡Mucha Lucha!: The Return of El Malefico, El Malefico has a lot of Darkness based powers.
* ¡Mucha Lucha! to finish an adversary who intended to turn masked wrestling into a fad.
* ¡Mucha Lucha! was about Rikochet, Buena Girl, and the Flea confronting a giant spider-themed wrestler named Black Widower, who has been beating several insect-themed wrestlers all over town, and is threatening to do the same to the Flea. At the end of the episode, the Black Widower is defeated, and as a result, his costume comes off to reveal the aforementioned insect wrestlers.

* ¡Mucha Lucha! when Rikochet was in detention, the Headmistress kept adding to his time because the mariachi band with him wouldn't stop singing.
* ¡Mucha Lucha! where they are shown, The Flea's rotten teeth might be a example of this.
* ¡Mucha Lucha!, with each issue focusing on one of the main trio.
* ¡Mucha Lucha! with the strange ability to morph their bodies into whatever shapes that are based on their special move's names. They go on crazy adventures that lead them to battle evil toilets, ancient Mexican mummies, an entire classroom that teaches some of the other luchadors how to be evil, and many other bizarre things.
* ¡Three Amigos!, a friend of the same gender, and a friend of the opposite gender.
* ¡Three Amigos!: After the good guys use a creative method to defeat El Guapo, El Guapo tells them it was a good trick, shoots at one of them in the foot, and says that that was a good trick too. (He doesn't actually kill them but does die laughing).
* ¡Three Amigos! and challenges Lucky and Dusty to cross it and go with him to face El Guapo.
* ¡Three Amigos!) as they sing their theme song there's one part where they hold one note for a comically long time before continuing.
* ¡Three Amigos!. Because of this, they gladly take a telegram promising 100 thousand pesos if they travel to Mexico to face El Guapo (thinking he's a Mexican performer).
* ¡Three Amigos! ensues in which Sokka thinks that Aang is talking about one of the girls that lives in the town and Aang thinks Sokka is giving him blessing about liking Katara. Aang even asks him, “You’re okay with it?”.
* ¡Three Amigos! has a scene where Chevy Chase's character is trying to blend in with the banditos as their leader reminisces about the good times they have had. He offers a few suggestions such as the time they "raped the horses and rode off on the women."
* ¡Three Amigos! has a scene where Dusty, Lucky and Ned freeze to hide from two Mexican guards, one of whom is describing to the other a recipe in Spanish.
* ¡Three Amigos! has Lucky's speech to the villagers of Santo Poco:
* ¡Three Amigos! is about a group of three adult guys, not a high school group with one member of an opposite gender to the others.
* ¡Three Amigos! is a villainous example of this trope, shown receiving a sweater from this henchmen for his birthday and wearing it for the remainder of the film. He even treats his birthday celebration like a party for everyone. Of course, he also shows no qualms at all when he shoots one of his henchmen during target practice.
* ¡Three Amigos! make and model of bi-plane for a film, but his stuntman actually did the flying. He still manages to fake it long enough to escape.
* ¡Three Amigos! play silent film western stars Lucky Day, Ned Nederlander, and Dusty Bottoms.
* ¡Three Amigos!, Steve Martin's character calls in very badly done bird calls to get his co-stars' attention. Still, they assume it's a real bird. He eventually gets to "Lookuphere! Lookuphere! Lookuphere!" and finally resorts to just yelling, "Hey, you guys!"
* ¡Three Amigos! that got a bit lost in the middle, and a lot of digging and sewing by the villagers, the day is saved.
* ¡Three Amigos!: The entire plot is based on this. Three actors are mistaken for actual heroes and somehow manage to beat the bad guys.
* ¡Three Amigos!, the final part of the titular group's salute involves them turning their heads and coughing, simultaneous with a forward hip thrust.
* ¡Three Amigos! Then, as they go to sleep, they bid goodnight to each other, and a tortoise says "Goodnight, Ned." There is nothing prior to this in the movie that couldn't happen in reality (unlikely, yes, but not impossible). After this, many weird things start to happen, such as the appearance of the Singing Bush, the summoning of the Invisible Swordsman, and the impossible landing of the biplane in

Santo Poco.
* ¡Three Amigos!. The title characters do this because they aren't very bright.
* ¡Three Amigos!. The title characters dress everyone in the village of Santo Poco as themselves to trick and defeat El Guapo.
* ¡Three Amigos!, the title characters receive a telegram from Mexico STOP They confuse a "Stop" in the message for a STOP and think that "the infamous El Guapo" sent the message, but they are actually supposed to stop El Guapo (the leader of a gang of bandits) STOP
* ¡Three Amigos! this is the standard M.O. of El Guapo. This leads to a bit of dialogue when Dusty poses as one of the banditos, and starts making up recollections for an inebriated and celebratory El Guapo:
* ¡Three Amigos! was only a modest money-earner and received mixed reviews on release. Today it's more fondly regarded by fans of 80's comedies, thanks to plenty of repeat showings on HBO (which owns the film), and eventually earned a spot on Bravo's "100 Funniest Movies" list.
* ¡Three Amigos!. When El Guapo's men desert him he calls out "Come back, you cowards! You traitors!" His second-in-command Jefe says "I'm still here, El Guapo!" and is shot off his horse. He ends up on his feet, fires one shot in the air, and falls on his face, dead.
* ¡Three Amigos!. When Ned Nederlander sees a biplane flying overhead he makes a joke about it being a mail (male) plane "because of the balls." When his fellow Amigos don't immediately get the joke, he explains it to them at length.
* ¡Three Amigos!. While the title characters are traveling through the desert to reach El Guapo's hideout, Dusty Bottoms drinks the last of the water from his canteen and carelessly discards it. He apparently forgets that after the Amigos rescue Carmen they'll have to return, and if they don't have any water with them (or something to collect more in) they'll die of thirst. Luckily for them they acquire a plane so they can fly back instead.
* ¡Three Amigos!, while trying to come up with a plan to fight El Guapo, Lucky thinks of something from their films, but doesn't explain what specifically it was.
* ¡Viva Zapapa! takes the same basic idea, but instead of the complexity of the plans themselves, it's usually the bumbling assistant to The Great Revolutionary Leader Zapapa who manages to scupper those plans (if they had any chance of success in the first place).
* "I expect you to have no problem with this game except the fourth level."
* Ieyasu's route: His Dramatic route has him try to make the main character hate him enough to return to her time because
* Ieyasu Tokugawa grows into one as he becomes a more skilled general, masterminding his eventual rise to power, culminating in his planning of the Siege of Osaka, ending the last Toyotomi threat to his rule.
* Ieyoshi raped his daughter Iesada since she was a teen. When she (and her advisor Masahiro Abe) started taking steps to prevent this, Ieyoshi turns full
* if… "All this homosexual flirtatiousness — so adolescent", while he looks longingly at blond junior boy Bobby Philips.
* If a 500 Internal Server Error occurs, part of the resulting error message that appears says, "A team of
* If a a fighter is inside the clay pot on the Garden of Hope stage while the Pikmin rebuild it, they become trapped inside, with their model shrinking to avoid clipping issues. A glitch (since fixed) can cause them to get stuck like this.
* If a ball enters the Vault while the Bookcase barrier is still supposed to be blocking it, the game proceeds as if the vault had been opened. Gomez even compliments you about this:
* if about being "prepared" that could be for the battle ahead... or for sex. Still not enough? Citan is very jealous of anyone he thinks Fei has slept with - from the doctor in Nocturne/Nortune he replaced to Elly herself. Still not enough? Fei's alter Id tells Citan he likes him - which is something from a being that only knows hatred and violence as a language.

* If a Brain Suckler attaches to your head, everything is blacked out except a small circle around you.
* If a British children's book is adapted as an animated show, expect there to be people who are fans of the source material and don't like how the show made it
* If a cat is assigned to hunt and eats his catch rather than sharing it with the kits and elders of the Clan first, he can't take anything off the fresh-kill pile for supper.
* If a certain faction was ignored, the investigation of synth escapes in the Institute.
* If a character angers his or her deity, the deity will send an aleax to attack them. If the character defeats the aleax, they are taken to their deity's home plane to serve them personally for a year and a day.
* If a character breaks a Training Pledge Oath they must wait a year and a day to heal the oathbreaker marks.
* If a character disrobes at a beach and neither a sign clearly saying "Nude Beach" nor other nude people are visible, it will turn out that it is not, in fact, a nude beach. The character either went to the wrong beach, was misinformed (maybe it
* If a character from an entirely unrelated work just happens to possess certain traits such as a colorful, eccentric fashion sense, means of time travel, knowledge of past and future events, high intelligence and problem-solving, bizarre, reality-defying technology, British mannerisms, the ability to regenerate into an entirely new person/
* If a character gained powers courtesy of an Infinity Stone, and their eyes start to glow, it's a sign that they are tapping into their full power and things about to go
* If a character has a very long or very short name compared to the rest of the cast, spoilering the name can end up being pointless. If the entry is about
* If a character is a child, or at least easily amused, the character might do the Jumble.
* If a character is introduced as a nudist, that character will be either extremely young and attractive or extremely old and ugly, depending on whether the character is being played up for
* If a character is on their 5★ uncap, then they'll be able to gain Extended Mastery Points even if they aren't at their level cap. Levels past 80 can be very grindy, so it helps that the uncap doesn't have to be delayed just to grind Extended Mastery.
* If a character meets Yachiru, they'll usually end up with an Embarrassing Nickname. Orihime is "
* If a character rarely swears but in profuse/intense vulgarity on those rare moments, then it might be a sign that the topic is either a
* If a character uses the Sacrifice Magic type "The Dying Act" but changes their mind before carrying it through, they suffer wounds that last for a year and a day.
* If a character uses the Sacrifice Magic type "The Dying Oath", they must fulfill the oath within a year and a day. If they don't (e.g. by changing their mind before completing it or deliberately not trying to fulfill it), they take wounds that last a year and a day.
* If a child is born with genes considered inferior to those of the Highborn parent, the child is immediately taken from them and sent to the slums, and a Highborn doctor actually providing treatment for a Lowborn is a considered a waste of resources, and thus a crime worthy of imprisonment.
* If a club leader sees you commit murder, they won't allow you in their club, and have a specific line for it. It's very unlikely that Budo Masuta or Itachi Zametora would survive to bar you from their clubs, as they are Heroes and will attempt to apprehend you directly (which can only end in their deaths or you getting a
* If a computer technician tells you a laptop isn't working because of "deceleration sickness," he thinks you're an idiot for not realizing someone
* If a contestant said the "secret word" of the day, a toy duck that looked like Groucho would drop from the ceiling bearing the $100 prize, to be split between the

two contestants. Doubles as a
* If a contestant who rang in doesn't provide the number one answer, past hosts would always prompt the other contestant with something along the lines if "X answer(s) will beat that." Harvey sometimes doesn't do this, so a contestant can run out of time to answer without warning. This has resulted in a higher rate of buzz outs on his run than on previous versions. It's most noticeable on
* If a Core Pattern Item is destroyed, it will be automatically recreated after a period of time, which can be up to a year and a day.
* If Actaeon had been thinking with the right head at the time, he probably would have realized it was not a good idea to stand around watching the
* If a defense attorney has a recurring role on the show, then he or she will probably be sympathetic or pure evil, in terms of pulling any trick up their sleeves to win. Most of them took their losses gratefully, and one wizened attorney expressed
* If a demon is successfully conjured up using Demonology, it will serve its summoner for a year and a day.
* If a disco song is performed by a female singer, chances are it's been miscredited to
* If a DM uses the random undead generation tables, an undead so created can have the weakness of not casting a shadow, which makes it easy to identify in the light.
* If a dragon places a Lair Mark on a victim, it will last for a year and a day.
* If a dropped item bag gets stuck in a wall, its contents will automatically be collected after a few seconds.
* if advisable — even if the car doesn't actually explode, a gasoline-fed fire can very quickly turn lethal.)
* If a female Byleth meets Dimitri in the Goddess Tower late in the Blue Lions route of Part 1, Dimitri talks about wishing to the goddess that he and Byleth could be together forever, then laughs it off as a joke a moment later. Byleth's possible responses are, "That's cruel," and "It didn't sound like a joke."
* If a female warden is romancing Alistair and has gone to bed with him, Zevran can make comments on how the affair is going based on things he overheard.
* If a fic goes on into a character's seventh year, usually something will happen to them make them miss the end of the school year or the whole seventh year just like the main characters. This is because there isn't much known about how Hogwarts students celebrate the end of their schooling, and it just isn't in the fans' consciousness. (One thing is certain, though — there would not be a "graduation ceremony", because in the UK, "graduation" refers to finishing
* If a fighter has the "Supreme Cleave" ability, then each time he slays an enemy he gets to immediately move one square and take another attack. As long as each attack kills an enemy, he can keep repeating the trick, carving a long path of carnage before anyone gets a chance to strike back.
* If AFP candidate Huey Long is elected, the Combined Syndicates of America tends to start a bit larger as a result of backlash to Long's policies.
* If a game gets a lot of attention and money for being rated M, then surely getting it even higher to AO (adults only) will make it sell even better, right? Wrong. Similarly to the "No Cash" NC-17 rating for movies, getting an AO is a death sentence because most retailers refuse to put an AO rated game on their shelves in order to avoid problems with minors and most major publishers will also refuse to publish a game that has an AO rating in order to protect their own reputation. For a game to get an AO rating, there has to be pornographic material in the game or
* If a game is being released on multiple consoles, advertise and show the features of the more powerful, robust versions. Downplay the differences present on the weaker systems, or don't acknowledge them at all until release. Bonus points for billing the weaker versions as "built from the ground up for" said system.
* If a game is rated "E," "E10+," or sometimes even "T" (in other words, not
* If Agatha Christie's Miss Marple is the most famous example of this trope, Jessica Fletcher (
* If a gay character showed up, chances are they would be introduced as a love interest for Luke (and always male, of course) or his boyfriend Noah to cause

tension in their relationship, though sometimes they were just introduced as a friend.
* if a Gem spent a long time in the dark. Sugar wasn't comfortable answering, so Hirsch retracted the question apologetically.
* If a German speaker wanted to explain what crops their farmer father grew, they might say they grew 'mice' if they didn't know that Mais translates as corn (though maize would be correct, the listener was evidently not familiar with this crop).
* If a goalie is pulled for an extra attacker during overtime and the goalie's team loses, that team forfeits the "loser point" in the standings they would otherwise have earned for making it to overtime (the only exception to this is if the goalie was pulled due to a delayed penalty call against the other team). This was apparently put into play to discourage teams from going offence-heavy in overtime to take advantage of the smaller number of players on the ice. What truly pushes this into "bizarre" territory is that any team that pulls its goalie in overtime also triggers a second obscure rule that states that the goalie cannot then return to the ice, even if one of the active players swaps out, until the next stoppage in play (a goalie returning to the ice from the bench on the fly is an extremely rare play on its own, nevermind doing so in the further unlikely event that a team in overtime has pulled said goalie).
* If a green slaad is killed but its symbol isn't destroyed, it will reincarnate as a blue slaad and remain in that form for a year and a day before returning to its normal form.
* If a guest in your lair annoys you, treat him cruelly and without mercy.
* If a guy and a girl who can potentially marry reach "only" an A support level, they can be seen as this fairly easily. The closest to an exception would be
* If a hero operates in a city and the series lasts more than 60 issues, this WILL be a storyline.
* If a heterosexual couple only has sons, the woman in the relationship becomes this to her immediate nuclear family.
* If a hit or tackle causes a major injury too many times, the NFL may declare it illegal, so players best keep abreast of what tackling techniques are allowed and which are not if they want to avoid fines.
* If a Hogwarts rule ever gets brought up in any book, expect it to be broken by the last page. Notable examples include wandering the halls late at night, trespassing into the corridor being guarded by Fluffy, horseplay on broomsticks while Madame Hooch is bringing an injured student to the hospital wing, etc.
* If AJ ever gets up Mt. Silver to challenge Red, Feraligatr might just be able to
* If a Juggernaut Frigate reaches the opponent’s battleship, it will bore into the hull with its prow-mounted drill before exploding in a spectacular fashion for massive damage.
* If a knight wanted to partake a tournament incognito, he would wear a black shield instead of his coat-of-arms.
* If a Let's Player has a pet that could make noise or disturb them, they will at one point do so. In an example of
* If Alice comments how "crazy" it would be if they were a couple, his agreement is either less than enthusiastic or sincere, or he goes too far the other way.
* If Alistair is crowned king, then he'll very reluctantly break off his relationship with the PC due to his new responsibilities. And depending on your choices near the end,
* If Alistair is romanced, he starts calling the Warden "my dear"; if he's not romanced, but has a high friendship level, he'll sometimes call him/her "my friend!" instead.
* If all else fails, appeal directly to the fans of said opposing teams, offering them the chance to see their players in your stadium.
* If all else fails, planting powerful explosives in the ground (either dedicated anti-armor mines, or improvised bombs made from artillery shells) could be very effective if you could get the enemy tank to drive over it (roads are popular for this, obviously). Another method is to plant the bomb some distance away off to the side of the road, with the explosion propelling a fast-moving (and in the case of

shaped-charge bombs, molten) projectile at the target, essentially a poor man's anti tank gun.
* If all else fails, try to snag the enemy with some cables strung between poles (preferably across any particularly tempting approaches for attackers, such as valleys or the tops of mountains or other high terrain near the target) or dangling from balloons floating over the target. This was primarily effective against enemy aircraft attempting to fly at tree-top level to avoid the worst of the anti-aircraft weapons and fighter cover. The presence of these cables would passively force the enemy aircraft to fly higher to avoid them, rendering them easier to target.
* If all the fuel in a Saturn V rocket were to burn at once, the resulting explosion would be about the size of the one that leveled Hiroshima in World War II. Space travel in the future is likely to be highly regulated, just because of the damage a single rogue pilot could do.
* If all the gods from Rheingold are considered to be in Valhalla then the Ring cycle manages to kill 29 out of 33 named characters. The only surviving characters at the end of
* If all the heroes are standing together around a strange device and begin to taunt me, I will pull out a
* If all the ships in your fleet have cloaking sections, then the fleet isn't even visible on the strategic screen, unless you happen to have researched the Quantum Tunneling tech and have a Deep Scanner in the system. Sometimes, not even then.
* I Fall to Pieces" had a psycho stalker doctor who could disassemble and reassemble himself.
* If a Mage, Hawke frequently shows their irritation towards Apostates who resort to using
* If a male Hawke romances Merrill, a rivaled Isabela will ask her what she could possibly see in Hawke, not knowing where to even begin listing his flaws. This is not a straight example, as Isabela actually rather supports the relationship,
* If a male or female character decides to go to a nudist beach or resort to look at women or men, said women or men will either not exist or be extremely old.
* If a male or female warden is romancing Zevran and has gone to bed with him, Wynne can bring this up to you in a lecture about appropriate behavior for a Grey Warden.
* If a man and a woman have a sexual relationship that is not based on love, one of them will fall in love with the other.
* If a man and a woman have sex, theirs will be considered by shippers the
* If a mech has partial cover, then any shots that would normally hit the location behind the cover hit the cover instead. If this is because a battlemech is standing behind a low hill, this doesn't really matter. If it's because the mech is standing behind a small building, on the other hand, the building takes the hit. This can potentially destroy the building if it takes enough damage.
* If a Metroid latches onto Samus, she can escape by firing missiles instead of planting bombs.
* if, a middle-aged chaplain and mathematics teacher at a boys' boarding school seems to take an interest in Jute, a pretty new boy in his class, probably 13 years old. The chaplain is skewered by Anderson's satire, as are most of the adults in the film.
* If, a middle-aged chaplain and mathematics teacher at a boys' boarding school seems to take an interest in Jute, a pretty new boy in his class, probably 13 years old. The chaplain is skewered by Anderson's satire, as are most of the adults in the film.
* If a military peacekeeping force is needed it will often be the Allied Nations as a thinly disguised stand in for UN forces, down to using the same white vehicles with blue lettering and blue berets/helmets.
* if a move is locked to a specific family, it'll be amazingly powerful, or at least unique. Other times... not so much. Barrage, the trademark of the Exeggcute line, is a Normal-type move on a Grass/Psychic (or Grass/Dragon)-type, with subpar accuracy and randomized damage that is mediocre even when all five attacks hit and

terrible otherwise. Kinesis, the signature move of the Abra line, lowers the opponent's accuracy by one stage, which would put it on the same level as moves like the Sand Attack that a generic level 5 Pidgey can throw around if the move didn't also have poor accuracy itself. It's not even the best accuracy-dropping move that the line can learn.
* If an actor in your film has been caught up in a scandal, ends up in rehab, or does anything else to screw the pooch in terms of their reputation or the attention they bring to the film, show them in the trailer as little as possible and cut them out of any promotional work.
* If an actor is seen with his real life partner instead of the actress who plays his wife in a TV series some people will think he's committing adultery.
* If an alien doesn't consider humans annoying or dangerous, they're feeling this trope in
* If an alien is asked to do something that clashes with their species' culture, they will often say, "I am a [species]" or "[species] do not [action]".
* If an ally disconnects from a game, their role will be picked up by the computer so that you still have a full active team instead of having one or more players parked in your base. AI players will even attempt to respond to player pings.
* If an animal is important and doesn't have extra features (Pegasus, Sleipnir, Cerberus), it will most often be a certain color. White is a particularly strong giveaway, as many cultures believe that white animals have magical properties.
* If an animal of some kind is biting someone, an onlooker will be prompted to ask, "What's eating you?"
* If an antagonistic Rider shows up and they're wearing purple armor, they're probably
* If an Antivan Crow like Zevran fails an assassination he/she is considered dead to the Crows. Some Crows like Ignatio are willing to merely pretend the errant Crow is dead. Others want to make absolutely sure that is the case one way or another. If the Warden lives, Zevran will tell him/her that he knows the Crows will keep coming after him and that he will keep on fighting them for his freedom
* If an astral opponent hits the mage's body with a spell, the spell will take effect on the physical plane at that location, possibly affecting the people guarding the mage's body.
* If an attractive young couple enters my realm, I will carefully monitor their activities. If I find they are happy and affectionate, I will ignore them. However if circumstance have
* If) and his friends are caned by the prefects. Afterwards they have to shake the prefect by the hand and thank him — a common tradition in public schools, apparently.
* if and only if it proves that government officials have been breaking the law, abusing their authority or both.
* If and revealing Angus had been chosen for his ability to find, cause and feel negative emotions, realized this weakness).
* If an enemy rolls a 20 when attacking you, they're going to be doing a lot of damage. Doubly so if it's a powerful enemy like a dragon. The only thing you can do in this situation is to pray they roll badly for damage.
* If an entire dungeon can count, the classic Tomb of Horrors module and Forgotten Realms' Undermountain definitely belong on this page.
* If an esper is out of power points, they can pay the difference in extra nonlethal damage to use their powers.
* If an idea seems to be crossing two different ideas, it's not this trope. We do have a
* If an immigrant spouse of a US citizen applies for a green card and the immigration authorities suspect the marriage to be
* If an input device was sufficiently messed up and sending garbage input to the computer, it could possibly cause it to crash — however, the problem could immediately be solved by unplugging the device and rebooting the CPU.
* If an item in your shop isn't bought after a certain amount of time, Greg (an NPC) will automatically buy it. (Items can't be returned to your inventory after

you put them up for sale.)
* If anointed king, the progressively pragmatic Bhelen Aeducan opens up service in the regular army to Orzammar's Casteless as a means of social advancement.
* If a normal woman tells you, "I'm gonna get you so baked tonight," you know you're in for a night of stoned, sexy fun.
* If an unhappy dwarf gets the uncontrolled urge to create a Legendary Artifact, it may be a Fell or Macabre Mood. What does this mean? It means they
* If any character in a Lantern book's eyes start glowing a different color from their Corps, it's a good sign that they're being overtaken by another emotion,
* If any character references Hugtan needing a certain sort of care (diapers, being carried in a baby carrier, some of her outfits), it's a reference to an actual product Bandai made for the Hugtan doll. It got to the point where some of these items were snuck into the script without having no plot relavance whatsoever.
* If any fantasy story has any mentionings about sexuality, elven ears are always erogenous zones. Actually, this is true for many humans as well.
* If any hero has a shed of nobility to them, and refuse to do any of the above activities they are often depressed loners who feel that they are the only one in the world who believes in traditional
* If anyone brings up lawn darts, chances are it's to bring up the many people who were injured or even killed by them, which resulted them being banned in the United States and Canada.
* If anyone is trying to spy on one or both of them, inevitably he/she drags someone else with them, and any of the aforementioned points above
* "If anyone says he hates war more than I do, he'd better have a knife, that's all I have to say." — Jack Handey
* If anyone was skeptic about the existence of ghosts and the supernatural, probably the giant walking Stay Puft Marshmallow Man changed that in
* If any practical real-world aircraft could get away with calling itself a flying tank, the
* If any principle governs the time-travellers of Thin White Rope's song "Around", it's the
* If any students fell in battle during Part 1 and the player chooses the Silver Snow route, at the start of Chapter 13 Edelgard will mention that some of her former classmates defected to her side. It was originally planned that any student defeated during Part 1 would become an enemy in Part 2 of Silver Snow, but this ended up being cut.
* If Anything Happens I Love You: Two parents are driven apart by grief after their daughter is killed in a school shooting.
* If anything human-built counts, some sites (including a few cities surviving to the present day) in the Middle East are leading contenders.
* If anything it may have helped the movie's box office prospects. It's hard to imagine better free advertising for a horror movie than "The only reason it's rated R is because it's too scary to be PG-13."
* If anything, its counterpart, Xenon, was the jigsaw. Vitor folded about 8 billion different ways depending on whether you wanted it in jet form, Xenon form, or Synchro (Servo combination) form. Borr, the
* If anything, it's his last name that's strange, being pronounced with a long O as in "cope" rather than a short O as in "cop" as it would seem.
* If anything, Kirie's constant beat downs of Fukuyama actually make him even more determined in his pursuit of her. Same with his sister Lisa whenever Yukinari fights back against her advances.
* If anything, the big problem was supernaturals deciding there might be something to this Hitler thing, only to later have to be purged out of their own ranks by members who knew better. This was a particular problem for the Get of Fenris, the Verbena, and the Progenitors.
* If anything, the blame goes back even further, to their portrayal in
* If anything, the original Final Fantasy is Linear Fighter/Quadratic Black Belt. Black Belts start out substantially weaker than fighters, typically achieve parity somewhere around the volcano stage, and go on to become spicy kung-fu death on a

stick in the endgame.
* If anything, the story explores civilization development, and aims to show that 'natural development' - superior, while 'uplifting' - inferior, as this is mainly what separates the Alliance and the Citadel.
* If anything they come off as subtly alien in something akin to the
* If anything this is one of the main reasons the Justice League has non-super super heroes to keep them in check.
* If anything, Unit-00 is considered less reliable than its counterparts. As a prototype, Unit-00 wasn't intended for actual field deployment.
* If a paladin's mount is killed, the paladin can call a new mount after a year and a day.
* If a parrot is left alone for a long time, it will get bored...and a bored parrot often lets out ear-piercing screeches, hoping to catch the attention of a nearby person or bird. On the other hand, being in a large group doesn't get them to shut up in the slightest. Rather, parrots in the wild chatter and call to one another continually, both for social purposes and just to keep track of one another's locations.
* If a Pee Bar Was Added to Minecraft", there is several humorously vulgar parts, including Herobrine peeing blood.
* If a person dies while under extreme hypothermia, revivability can be extended much longer due to their lowered metabolism.
* If a person has been dead for more than a year and a day an Elixer Vitae potion will not bring them back to life.
* If a planet orbits one star in a binary system, then during part of the year the more distant star will be on the opposite side of the sky from the closer one, resulting in several extra hours of (much dimmer) daylight.
* If a player attempts to ride a speedboat up a wooden incline. Upon hitting the water again, the speedboat promptly explodes, presumably from fall damage.
* If a player hits it big for an innovative niche, the next 1,000 guys at that position will all be compared to him. Before Michael Vick, the mobile quarterback was something of a rarity, and every halfback that catches passes will inevitably be compared to LaDainian Tomlinson. There's probably a bunch of guys looking to draft the next Devin Hester.
* If a player purchases an Upgrade to Premium Gift and sends it to a Free-to-Play player, not only does the recipient get Premium for free, the sender also receives an achievement item (Professor Speks) for free.
* If a poison is administered, and the cure leveraged for your advantage, that's a
* If a Poop Bar Was Added to Minecraft", there is now a poop bar and public toilets.
* If a popular musician contributes songs to other artists, fans will often buy releases containing those songs whilst having no interest in the artist's other work. This was common with
* If a popular scientific theory held by a large enough proportion of the world is disproven, the universe will go ahead and create a version of that theory anyway in an event known as a Maniac Storm. This was how the alternative realms of existence mentioned in the first bullet point above came into being. It's also how a number of antagonistic factions were founded; the Viking lander reaching Mars in 1971 and proving there was no intelligent alien life on the planet was followed seconds later by a Martian invasion, and the first Lemurians came about when it was proven that there was absolutely wasn't a mystical island full of serpent-people with advanced technology who wanted to destroy humanity.
* If a power grants a character the ability to improve their lives in any way possible, expect it to be unable to do the one particular thing that makes the user truly happy, with usual examples such as curing some permanent injury,
* if a prisoner becomes sick and his cellmate tells the guard it's an emergency, the guard will fetch a trauma team instead of opening up the cell for a look.
* If a prisoner has the "Cop killer" reputation, the guards aren't exactly going to treat them kindly. Usually, guards will beat a prisoner unconscious for getting violent. For the same crime, a cop killer

* If a runner is training for speed invoking this is mandatory. Running unhindered for long durations will only train you to run for long durations. Speed can only be improved with added intensity, achieved by doing something that isn't running, or by adding weights while running.
* If a scene in a movie or TV show is set in a cafe, odds are better than good it will be shot at
* If a Scrapper soaks up enough damage with its frontal shields, it will be immobilized for several seconds, at which point players can head to the back of the machine and kill its exposed driver.
* If a Season 1 remake retains Heather as the villain, which is quite common, she will typically ally with Lindsay and Beth (
* If a shadowdancer's shadow companion is dismissed or destroyed, the shadowdancer cannot replace it for a year and a day.
* If Ashley gets captured, a cutscene is shown of the Ganado carrying her off and the game over screen says "Mission Failed" instead of "You are Dead". This also occurs if she is killed, either by an enemy or your bad aim.
* If asked to name Roman Emperors, most people will reel off the names of the very earliest ones, like Augustus, Tiberius, Caligula, Claudius and Nero. Slightly later names like Hadrian, Trajan and Marcus Aurelius are usually recognised, but anyone after 200 AD will be virtually unknown. The only exception to this rule is another example of it. Most people will have heard of Emperor Constantine I, but know him simply as Constantine, despite the fact that there were a further
* If a society used to having everything done with magic, technology or the like is
* If a standing unit loses the ability to stand (either from legs/nervous system injury or losing consciousness) and has another unit's weapon stuck inside them, they continue standing up because the game can actually tell the other guy is
* If a steel ship lands upright on the seafloor they often stay relatively intact. A ship is simply much likelier to face structural collapse if it's on its side because it's not meant to hold itself together at that angle.
* If a story is tagged as "shipping", the presence of romance won't be surprising. Most ship fics also tag the pairing itself, which can ruin the tension in
* If a structure is only defended by infantry, or you can somehow disable the vehicles/defences, a Commando can place C4 charges. C4 is placed instantly from close range, and take a second to arm after which the structure is rubble, no questions asked. Add in the Commando's jetpack, and a single commando can level a base in less than thirty seconds —
* If a survivor hides in a locker for too long, ravens will perch on it and make noise, giving away their location.
* If a survivor is incapacitated outside the safe room at the end of a level, the other survivors will usually say that they can't leave anyone behind. Though on occasion Francis will say he's fine with leaving a teammate behind if everyone else is. Similarly, if Louis is down outside the safe room, Bill may joke "How well do you know Louis?" and then admitting he was just joking. There's an achievement that you can earn if you leave the safe room to rescue a downed survivor outside and the two of you make it back.
* If a survivor stays still for over a minute, ravens will circle overhead and noisily give away your location until you move.
* If a tank takes too many stacks of Festergut's debuff, which is applied to melee attacks, he or she will explode and instantly die, typically causing a wipe. Steelbreaker has a similar ability if he is killed last (generally considered the hardest way to defeat the Assembly of Iron), but it is applied in one hit and takes longer for the victim to explode, basically serving as a soft enrage.
* If, at any point, you make physical contact with the Ultimate Chimera, you're not even given a hopeless boss battle; the Ultimate Chimera starts chomping, complete with biting sound effects, and the screen fades to red before going to the standard "Retry?" screen.
* If a team scores a touchdown or safety, the game is over and that team wins.
* If a time limit is given for Hermione to find a pureblood husband, there is

often a
* If a tire on an eighteen-wheeler explodes, can the rubbery shrapnel decapitate a motorcyclist?
* If a Toilet Bar Was Added to Minecraft", a toilet bar is added, much to the joy of one crazy old man and the unamused confusion of one woman.
* If a top prize on this trope existed, Brittnay Matthews and Mrs. Zales of
* "If a Tree Falls..." has three college students accidentally drowning in a car accident—but since no one saw them die, they're still alive. One of the kids has strong religious convictions and can't bear the pressure of keeping their secret, so he decides to free his body from the wreck and move on to Heaven. You might expect that he succeeds, with his friends eventually realizing he was right—but the exact opposite occurs: he accidentally releases his two colleagues' corpses, which sends them into the afterlife, but in doing so sends the car plummeting to the bottom of the lake where they crashed, where it can never be found by anyone. He's now trapped on Earth forever, functionally immortal and completely alone.
* If a tree falls in the forest and there's no-one around to hear it — a hipster has bought the soundtrack on limited edition vinyl.
* If attacked by Allied forces, the crews of Japanese ships carrying British or American prisoners of war would very often take retribution against those prisoners. It was not unknown, if the merchant ship was sunk as a result of attack, for the Japanese to murder the complement of prisoners, to force them to go down with the sinking ship, and to reefuse to allow them access to lifeboats or rafts. Many such instances were catalogued when proceedings began against Japanese war criminals.
* If a UFO is allowed to escape, then there's a chance the aliens will locate and shoot down one of your satellites. A foundry upgrade can reduce the profile of your satellites, making them harder to detect.
* If a video game produced after 2001 has a main character who's head to toe in
* If a Viking wanted revenge without starting a blood feud, they would sometimes make their case at a
* If a Vocaloid with no box art or no anime-influenced art needs to get a design from the fans, there's a 100% chance that they
* if awkward). He's by far the most charming and magnetic person in the group who holds the others together.
* If Balloons Could Talk, then apparently humans would do all sorts of things that hurt and terrorize them just for the sick pleasure of hearing them cry out in horror and agony.
* If Baron Blade has 15 or more cards in his trash (i.e. discard pile) at the start of his turn, his
* If Bay's name is in the credits at all, expect people to dump on it and dismiss it as pure garbage before it's even released. Once it is released, they will blame him for any flaws, real or perceived, even if he was only the executive producer (meaning he or his production company footed the bill, but that he likely had no creative input). Some dismissed
* If Bazelgeuse is on a map with you, it'll come running in search of a free meal if it hears the distressed cry of another large monster (which it can do from a surprisingly large distance due to its acute hearing.) Once its theme
* "If beef sausage is made out of beef, and pork sausage is made out of pork, what is Mennonite sausage made of?" You can replace Mennonite with Ukrainian or any other group that has a type of sausage named after them. This example is generally used more as a sexual
* If Bethany survives instead, party banter will also make references to this being Carver's relationship to her. Apparently he didn't take it well when his twin turned out to be the only magical child while he was normal, which was aggravated further by being an inferior warrior to their elder brother/sister. It's also possible to set up a sibling rivalry between Hawke and Bethany, but
* If Bob's original line was meant maliciously, Alice's Ironic Echo will be twice as cruel, as she throws the attack back in his face.

* If Bob was trying to convince Alice of a way of thinking, Alice will quote it to signify that she now agrees with the idea. This
* If both Wrex and Eve are alive, it's hinted that their stabilizing influence will keep the krogan from becoming a threat to the universe if you cure the genophage. If either or both are dead, then it's strongly suggested that the krogan Rebellions are going to start up again if you give them the cure.
* If Bowser ends up right by the sides of any of his boss arenas, he'll teeter on the edge briefly. This animation is otherwise unused.
* "If Brahma has me burnt, I will spit into the flames. If he has me strangled, I will attempt to bite the executioner's hand. If my throat is cut, may my blood rust the blade that does it." — Sam,
* If Bushroot's descent was bad, the fall of Jim Starling for Darkwing's rebooted counterpart in
* "If" by Rudyard Kipling, with the name of the bank only briefly appearing in text at the beginning and end.
* If by some chance you are able to sequence break all the way through the searing hot caves of Upper Norfair without the Varia Suit and survive, arriving at Lower Norfair will result in a very rude awakening—almost
* "If Canada is divisible, so is Quebec" was the main argument that was used against Quebec's secession plans in the 1990s. The resource-rich (and First Nations-dominated) north threatened to secede from Quebec and rejoin Canada; various other bits (mostly English-speaking communities near the borders, but noises were made in emphatically-francophone Montreal itself) did the same.
* If Captain Keyes dies in the mission "Truth and Reconciliation", where you have to rescue him, the camera cuts to him falling, and Cortana says "No! Without the Captain, the Covenant have already won".
* If carefully disguised with foliage and parked within appropriate terrain, a
* if Carolina had kept Sigma, her assigned AI and learned to accept that she wouldn't ever be able to beat Tex, Project Freelancer would have been spared a lot of pain and misery. Maine wouldn't have been reborn as the Meta, as Sigma wouldn't have been able to influence him; and she wouldn't have requested both Eta and Iota as AI, which means that Wash would never have received Epsilon and learned the truth behind everything, and South wouldn't have gone Cain and Abel
* If Casey is coming to the rescue, why bother with making him take the door when you can have him parachute in through a glass ceiling with a team of Special Ops commandos?
* If caused by a tool of the group the protagonists belong to, the likelihood of abuse of this power is almost never addressed. There's little interest, procedure, or advocacy devoted to making sure someone isn't stealing from, raping, killing or committing other crimes against
* If certain Australian fans are to be believed, the inspiration for
* If certain classes of serf run away from their master and stay uncaught for a year and a day, they become free men.
* If certain theoretical conditions are met, stable strangelets — a hypothetical category of subatomic-scale particle — could convert any normal matter they contact into more strangelets, which could then go on to convert more normal matter, and so on.
* if commit the crime. Which doesn't help said suspect during a trial at all, of course.
* If commuting on Metra's Milwaukee District North Line, Milwaukee District West Line, North Central Service, or Union Pacific West Line, your train passes under a signal bridge east of Tower A2 that looks like a truss arch bridge. That bridge is a remnant from the Paulina Connector of the old Metropolitan Elevated. From 1895 to 1951, trains on the Met's Northwest Side branches to Humboldt Park and Logan Square
* If cops on the show talk about "Doing it the Western District way" you can expect excessive brutality and brain-bending stupidity to follow. Especially with Herc.
* if cornered by a Brown Bear scavenge corpses and can easily tell the difference between a still man on the ground and a dead one. The true reason behind the

playing dead issue is to convince the bruin you're not a threat: if the beast sees the potential opponent stays down and does not move, will examine it for a little and then move away to more useful things like searching for food.
* If crimes are viewed as "cheating" at life, this is basically the attitude of most criminals. Especially if their motive is profit rather than revenge or just sociopathy. Not only does a thief risk going to prison, they don't get to keep what they stole, either.
* If criminal investigators encounter a Locked Room Mystery in real life, the usual default assumption (barring physical evidence to the contrary) is that the victim locked
* If Crybaby Boobie and Molly Volley count as "principal characters", then so does Roy, the kid who introduced Peppermint Patty to Charlie Brown. He appeared in quite a few summer camp strips. And what about the pig-tailed girl who's friends with Rerun?
* If Cthulhu himself appears and there are humans within arms' reach, he eats 1D3 of them
* If "cushion" is really the right word for a baked good the consistency of stale granite.
* If Cybertron was originally Earth-like, the machines might incorporate a programming directive to
* If Death's killings can be classed as murder, there's the tanning bed deaths in
* If Democratic candidate John Nance Garner is elected, he can reach a compromise with Huey Long and prevent him from rising up if it succeeds, leaving only a single front against the Combined Syndicates of America, which rise up immediately.
* If Diabolik recycles a scheme, Ginko will be ready for it and slap him into jail (possibly long enough for that death sentence on his head to be executed), and if Ginko recycles a successful defensive ploy the next time, Diabolik will bypass it with ease. Best shown by Diabolik's
* If Dickinson (the face of the anti-independence faction) hadn't basically begun gloating about how his vote would kill the independence vote, Franklin wouldn't have had enough time to call for a delegation poll, leaving the final vote (and the fate of the United States) in the hands of Wilson, who sides with the independence voters because he doesn't want to be remembered in history as the man who killed American independence.
* if Director Araman had just told Ninmo why the invention was suppressed Ninmo would have stopped it himself, as the chronoscope could allow you to see anything anywhere only a second in the past, destroying all privacy.
* "If Disney Cartoons Were Historically Accurate". You won't see your princess the same way again.
* If done correctly a GM can even get a player to do this. It's immensely satisfying when it happens.
* If done properly, the first thing that comes to mind is "tastes like the seaside", with no rotting in the equation.
* If Douglas MacArthur seizes power from either of the most extreme presidents, Jack Reed or Huey Long, or any other president if they refuse to take action to take action to deal with Reed and/or Long, the
* IF doujins that Tenchi's daughters by Ryoko and Ayeka will marry Seina and Kiriko Masaki's son, while Tenchi and Ryo-Ohki's triplet daughters will all marry the son of Seina and Amane Kaunaq, and the two daughters Tenchi respectively has with Mihoshi and Noike will both marry the son of Seina and Ryoko Balta.
* If each supernatural game line is considered standalone from one another you have various supernatural creatures that behave like each other in special cases, so a Changelings might be the cause for Vampire rumors because a Leechfinger is similar to a Vampire. Another example, wolf like supernatural beings can be Werewolves, Hunterheart Changelings, Gangrel Vampires, etc... This can cause a lot of confusion when corning such a creature and have brought the wrong tools to kill it.
* "I feel as though one of nature's eternal secrets has just been unlocked before my very eyes."

* I Feel Better" features an angelic being that can shoot lasers from his mouth, who uses it to kill the members of the parody boy band Hot Chip is portrayed as.
* I Feel Better members of Hot Chip, and a few audience members before destroying the stage itself.
* I Feel Guilty; You Take It: When the hero turns down a reward that they feel they doesn't deserve.
* I Feel Sick, Devi reminisces about a particularly bad date she went on. A mongoose ate her date's brain, but he was so stupid to begin with that it took her a while to notice.
* I Feel Sick, the main character Devi, an artist who is working on cover art for a book, is instructed to put a monkey on the cover. The book in question features no monkeys, it is about children who get evil powers from gnawing on contaminated aluminum siding, but research shows that people love monkeys and a monkey on the cover will just about double sales.
* if either of these men were to die...all because of the lack of Coca-Cola.
* "If either of you finish that sentence, I'm going to hang you both from each other's intestinal tracts!"
* If Elihu gets it, then Satan must be fuming...one of the two main protagonists who have a bet over the temptation and scarification of Job, he isn't involved any more after the first few chapters.
* If Eliwood marries Fiora, he will be questioned for it since she's a mercenary from Ilia; and if he marries Lyn instead, her
* If Elizabeth is this in the first movie, then Will must be as well, because he ends up having to be rescued from the
* I Fell for Hours, when Hephaestus recalls being flung off of Olympus by Zeus he says that he fell all day.
* I Fell in Love, so I Tried Livestreaming for Yuu, Vina suggests that Sora and Yuu act as a fake couple to ward him off. This backfires because of the dorm's no romance rule and because of Sora's double life as a net idol. Vina then tries to cover this up with another lie by claiming that he confessed to Sora, thus necessitating that she forms a fake relationship with Yuu, but Yuu senses that this lie will get out of hand and properly explains the situation to the whole dorm.
* If enough time to say "No fair!" is enough to be a time bomb, then we should certainly count the unluckiest pirate from
* If episodes ended with a cliffhanger, the words "Transmission to be continued" would appear.
* If ever taken hostage, experts advise you to tell your captors your name as early and often as possible, even if it's incredibly awkward to do so ("Yes, I will sit over here now, my name is Jennifer.") The theory goes that humans are much less likely to kill or harm someone who they have any degree of familiarity with, even if it's just their name.
* If ever there was a game that was made of pure 100% mansauce, Warhammer would be that game!
* If ever there was a song begging to be used in a cell phone commercial, it's the Who's "Goin' Mobile". A 2008 ad for Fox's Seattle affiliate uses it to promote a service that sends you news headlines by text message.
* If ever the United States elects a female or gay male President, then (unless the President is unmarried) the nation will have a First Gentleman instead of a First Lady, the President's spouse who often takes a largely ceremonial role as one of the nation's leading socialites and influencers. Oddly enough, the closest the US ever came to having a First Gentleman was
* "If ever you're not satisfied with one of our tires, please feel free to bring it back." Cue an old lady throwing her tire into the window of a Discount Tire shop ("Thank you!"). The commercial has been running since 1975 and is the world's longest running commercial according to The Guinness Book of World Records.
* if everything blows up, you tend to have a better chance of survival than the yellow and blue shirts.
* If fans liked the franchise for what it was, and then it is totally changed, the new stuff may be good and please the fans, but they are right to complain that what

they liked is never coming back. If a complete overhaul of a franchise is old enough, fans who want the franchise to go back to its roots are not rejecting change, they are demanding change.
* If female Commander Shepard romances Thane Krios, he will use a word that Shepard's translator is unable to understand, saying her "translator just glitched."
* If female Hawke romances Sebastian, Varric will remark to Cassandra that he never understood how that worked; Hawke is his best friend, but Varric really doesn't like Sebastian very much, and he invokes the trope by name.
* If female Shepard returns to speak to Jack frequently enough, Jack will inform her that she "doesn't swing that way"
* If fireworks or champagne corks aren't meant to symbolise an orgasm, they're often used to symbolise happiness, excitement, American patriotism (in the case of fireworks), or celebration. American patriotism is often symbolised by eagles as well.
* If Footmen Tire You, What Will Horses Do?, predicts the persecution of Christians in an America that has been taken over by Commie Nazis.
* If for any reason pushing the gem at the end of the mid-boss for Relic Maze doesn't progress the game by braking the truck's engine, it can easily be destroyed with an attack.
* if future!you dies while past!you is still alive, past!you gains access to future!you's consciousness. When future!Jake dies, he snaps to his past self and simply elects not to take the mission that caused the Sario Rip in the first place.
* If Germany is overrun during the Second Weltkrieg, but still holds its African colonies, the German monarchy and government can flee to them and attempt to keep fighting. The Netherlands can do the same if they still hold Indonesia.
* If '"Get Famous'' is installed, famous Sims have a chance of getting the Vain Street fame quirk from using mirrors. Sims with this quirk always want to admire themselves in the mirror and become tense if they haven't in some time.
* If given combat ability, they tend to use their youthful energy and small size to fight as a
* If given to the right actors, any of Shakespeare's plays. Done properly (enunciated, with stilted hand gestures and a very serious look) it can either be filled with
* If Goku or Piccolo win a match while on a team with Ultimate Gohan, they may tell him this in their victory screen. Goku's line had a passive-aggressive "finally" attached in the demo, but this was removed from the finished product after fans pointed out how jarring and out-of-character it was.
* If Gooey is related to Dark Matter, why is he good? Why does he look so much different from all other Dark Matter?
* If Gotenks is on the same team as Piccolo when using his Charging Buu-Buu Volleyball attack, Piccolo will join in.
* If Guybrush tries returning to LeChuck's ship as a ghost, Elaine will repeatedly spray root beer at our hero and force him back into the Crossroads, making it pure horror.
* If having played a male Warden who pursued a romance with Morrigan, this is invoked by your companion Ariane in
* If Hawke is female, this is implied to be her relationship with Bethany. If Hawke is a mage (and Bethany therefore dies in the prologue), Bethany's character information states that she idolized her big sister. If Bethany survives the prologue, most dialogue options between the sisters reinforce the idea that this is their relationship.
* If Hawke romances Fenris, they sleep together, and the emotional surge causes him to remember - and then immediately forget again - the memories he has repressed due to trauma. This leads him to back away from Hawke for the next few years, despite being very much in love with them. However, if Hawke
* If Hayate wasn't just a bit too old to qualify, he would probably be the poster-child of this trope. The levels of
* If headline showing Margaret Thatcher, and asks "So we live in Poland, then?"

* If he befriends or becomes the lover of The Warden in the original
* if he could be bothered to try) could kill every other Heroic Spirit with zero difficulty. There's a reason Tohsaka greeted him with "Behold! We have won!"
* if he did it would be in some big grand gesture; so she assumed he was asking her.
* If he doesn't use firearms, he will be a master of some kind of fantastically-obscure and specialized (if not
* if he lives to the end, he will sacrifice himself in his own reality, throwing his soul on the First Flame to continue the Age of Fire.
* If he opens up to the D section of the Monster Manual. Demon, Devil, Dragon, even Dinosaur if you're low to midlevel...
* If her father is to be believed, the instrument started life as an axe and was turned into a bass-guitar later.
* If Her Flag Breaks: Due to his very feminine appearance and attire (thigh-high socks and shorts), Megumu is mistaken for a girl by many characters when they first meet him. The fact that he wears the male uniform (or, at least, the male blazer) is the only way anyone could see that he was actually a boy.
* If Her Flag Breaks glomps Souta who appears confused and says "Hold on, why does he smell this nice?! And his body's soft!"
* If Her Flag Breaks: In episode 3, Souta is awakened by Akane on top of him. A few moments later, Megumu is also found sleeping next to him.
* If Her Flag Breaks in particular are absolutely delighted whenever a new girl pops up.
* If Her Flag Breaks: Kikuno is Souta's self-declared big sister, so she does sisterly things for him, such as making him lunches, giving him advice, and being a little too affectionate sometimes. She also acts like a big sister figure to the rest of the cast.
* If Her Flag Breaks: Mei has this hairstyle, representing her desire to remain emotionally aloof and guarded.
* If Her Flag Breaks. Since everyone constantly mistakes him as a girl, someone eventually mentioned that he would have a much cuter child with Protagonist Souta than one of the actual girls would, but he clearly said it isn't possible.
* if he said any such a thing, as there doesn't seem to be any record of him saying those words until about 50 years afterwards.
* If he's sitting down he tends to put his legs up on anything he can - other people's desks, and so on. Note particularly when he props his legs up on the top of Bessie's windscreen in his first story - something the Third Doctor would find unthinkable.
* If he won't even cop to his identity, forget about asking him about God/Heaven/Hell/the Meaning of Life/Whatever.
* If his name and occupation aren't convincing, just watch how he fishes.
* If his reaction to Jaime calling him an idiot even before is any indication, there is still a somewhat of sentience in Gregor Clegane after
* If his route is to be trusted, he's almost surely telling the truth.
* If Hitler Never Existed, and he can't Photoshop Nazi imagery onto his picture. The man quickly begs the Gestapo Angel to take him back to the real world.
* If Hoagie drops the item in the box after the fire is started, he again suggests they check the box. George Washington again says he has an idea. This time, John Hancock asks if they're going to torment Betsy Ross again.
* If Hoagie drops the item in the suggestion box before the fire is started or after it's put out, he suggests they check the box. George Washington says he has an idea to which John Hancock asks "Does it have to do with starting a fire?"
* If Hong Kong cartoons count as anime, then Excreman from the McMug/McDull series.
* If humans are ever the designated prey, two sister tropes can also occur.
* If Hykrion the Strong is to be believed, one of the many visitors to Fantastica from the real world was
* If I absolutely must ride into battle, I will certainly not ride at the forefront of my Legions of Terror,

* If I Am Ever Head of an Alien-Monitoring Agency: A joke page for how to be the Men in Black's leader.
* If I Am Ever the Heroine) strongly warns against agreeing to this practice.
* If I Can't Have You...: Commonly said when you're not good with being rejected by someone you love.
* If I Can't Have You... (if followed up by trying to kill the rejector)
* If I Can't Have You...: I want you all to myself and if you won't be with me, I'll make sure no one else can have you either.
* If I Can't Have You...: Killing someone because they won't return your love.
* If I Can't Have You...: Killing someone you're attracted to just because they refuse to return your affections or have gone with someone else.
* If I Can't Have You...: Someone tries to murder someone for leaving them or rejecting them romantically.
* If I Can't Have You...: The prince may be shapeshifted because of his refusal to marry a terrible bride. Conversely, the ogre/witch/what have you that was raising the heroine may curse the prince to forget her after they run away.
* If I Can't Have You...: Unrequited love ignites violence against the one who refuses them.
* If I Can't Have You...: Wanting to kill someone you're in love with just because they haven't returned your affections or have gone with someone else.
* If I Can't Have You...: You don't return my love? I'm gonna kill you for that!
* If I Could Start Again, after Thor kills Thanos, he is sent back in time to the day of his coronation when he picks up the Time Stone, with his mind returning to the body of his past self. The Ancient One later observes that this is because Thanos used the Time Stone to undo the destruction of the Mind Stone just moments before, creating a link between those two Stones in particular, allowing Thor to travel back mentally rather than physically.
* If I Could Start Again is sent back to his pre-coronation body after he picks up the Time Stone from the gauntlet.
* If I Could Start Again. Thor and Loki speak any language thanks to the All-Speak, but they need to purchase translators for Natasha and Clint when they arrive on Sakaar since they can't understand any of the languages being spoken.
* If I Could Start Again, Thor's plan for dealing with Ebony Maw and Cull Obsidian to stop Thanos from expanding his army isn't well thought out at all. It basically amounts to 1.) find them, 2.) learn about the army they were gathering, and 3.) kill them and the army. As Black Widow points out, that's not a plan, but a list of objectives.
* If I decide to hold a double execution of the hero and an underling who failed or betrayed me, I will see to it that the hero is scheduled to go first.
* If I Did It as a "purely hypothetical" account of the crime by which he was tried and acquitted. The publisher considered that the book was "his confession".
* If I Did It: By O. J. Simpson. He's talking about the crimes he is accused of committing and the trial he went through over it.
* If I Die Before I Wake based on his recollection of events and the conversations at his bedside.
* If I Die in a Combat Zone (Box Me Up and Ship Me Home) was disposed of in this way.
* IF I'D KILLED HIM WHEN I MET HIM, by Sharyn McCrumb, includes an incident where a human woman gets drowned when attempting to consummate a liaison with a dolphin in a water park attraction. Described as a "conjugal visit" gone wrong.
* If I Ever Become an Anime Villain... recommends villains avert this to get an advantage in the fight.
* If I Fall, If I Die: During Arthur and Diane's relationship, Arthur was always either at his drafting table or attending an architectural conference. He was so absent from her and Will's lives that when they split up, she found it hard to care.
* If I Fall, If I Die, Jonah and Will spend a great deal of time searching the abandoned grain elevators and warehouses by the harbor. They even build an indoor skatepark during winter, when it's too icy to skateboard outside.

* If I Fall, If I Die: Once Diane's agoraphobia got so severe that she couldn't leave the house, her social skills quickly atrophied, causing other people to become one of her phobias. She has her son Will answer the door when the deliverymen arrive.
* If I Fall, If I Die snaps her blue elastic band against the inside of her wrist to distract herself from her anxiety.
* If I Fall, If I Die: When Will starts school, his cursive resembles a seismogram. When he learns how to print legibly, his teacher calls it a minor miracle.
* If I Fall, If I Die, Will's parents Diane and Arthur met at a poetry club. That night, she attended a party with him, where the two of them had drunken sex. Arthur was married at the time, but was so brazen about his affair with Diane that the marriage didn't last long.
* I Fight Dragons dies shortly after her, the boy, and her grandfather escape the complex. As the boy morns, he manages to reverse the link between him and her, returning all her powers and bringing her back to life.
* I Fight for the Strongest Side: Someone joins the hero's side after being defeated by them.
* "If I had a million dollars / I'd buy you a monkey! / Haven't you always wanted a monkey?"
* If I Had a Nickel: A joke where someone says, "If I had a nickel/dollar/pound/etc for every time X happened, I'd be rich."
* "If I had to choose, I'd choose you (Souji/Yu) you're so handsome and reliable." Says Yosuke.
* If I have a fit of temporary insanity and decide to give the hero the chance to reject a job as my trusted lieutenant, I will retain enough sanity to wait until my current trusted lieutenant is out of earshot before making the offer.
* If Iji cracks together the two most powerful pieces of Tasen and Komato nanoweaponry, she gets the Velocithor, a hand-held Wave Motion Gun capable of blasting through enemies and walls alike, and is instrumental in a very specific bit of
* If I learn the whereabouts of the one artifact which can destroy me, I will not send all my troops out to seize it. Instead I will send them out to seize something else and quietly put a Want-Ad in the local paper.
* If I'm Dyin', I'm Lyin' is cancelled, leading Peter to storm to the networks headquarters and demand it be brought back.
* If in a comedy, the character will step back, stunned, and contemplate the news before properly freaking out.
* If in a drama, the character will usually be confronted by the villain, who will deliver a
* "I find that 'I will die of an indistinct infection if I don't remain physically close to preteen girls' rarely goes down well in court."
* If: In it the then UK prime Minister Theresa May is portrayed as, in Steve Bells own words, an "evil,scary clown".
* If, in real life, a person can't stand somebody else's whining, they can try to
* If Insufficiently Advanced Aliens show up on Earth and are surprisingly wimpy, they are maybe only probes or scouts.
* If I Only Had a Heart The audio has survived, as well as photos of Ebsen in his Tin Man Costume. This too was used as an extra on some home video releases such as the 50th anniversary VHS.
* If iron golems count as robots, then Pandora Breedlswight's relationship with Fantasia Faust in
* If I Ruled The World, however, is still going strong. In Scandinavia, admittedly, but twenty-two seasons deserve a mention.
* If I Ruled The World: One of the regular rounds was answering questions without using the words 'Yes' or 'No'. In series 2, episode 4, the round began thus:
* If Isaac enters a room with low health, he'll leave a small puddle of urine by the doorway.
* If I See You In My Dreams because his devotion and interest are proven as more genuine than his rival's.

* If Ishmael dies in the tutorial level, you'll get a "Time Paradox" message
* If I Stay. He drives her to auditions and talks to her when she's in a coma.
* If I Stay, in her out-of-body state, looking the same as she did before the accident.
* If I Stay: Mia in her out-of-body state, looking the same as she did before the accident.
* If it besmirches the reputation of someone who is already dead instead of someone living, that's a
* If It Bleeds, It Leads: The news media prioritizes bloody stories over all else because it brings in money.
* If it burns and you can mix it with air, it can explode. This includes pretty much any kind of organic dust.
* If it covers a symmetric side of the face (left or right) then it's fairly neutral... except for the part where it is likely hiding a
* If it doesn't end with the original cycle, this harm will continue until it
* If it doesn't happen in the novel proper, it is often revealed that the heroine (or one of her friends or relatives) of the average
* If it doesn't make sense, don't ask Zapp for an explanation. He didn't write Brannigan's law, he just enforces it.
* If it has a win condition, you can win it. Definitely qualifies as a
* If it is an expensive actor, then we'll see a lot of that actor. You got this guy because you didn't want the
* If it is an expensive locale, then we see lots scenes of the characters traveling through the iconic scenery. Especially in very scenic locations like Hawaii.
* If it is an expensive prop, then we'll see a lot of the prop, and the plot will feature it heavily. Your only hope is that it isn't a
* If it is an expensive set, then expect it to become the base of operations. If not, it might receive some minor redressing to represent other locations.
* If it is animation, then you don't waste any shots, because you don't bother animating something you aren't going to use.
* If it is any consolation, however, that eighth child turns out to become the legendary Bhishma, who was blessed with wish-long life and had sworn to serve the ruling Kuru king, and grand-uncle of both the Pandavas and the Kauravas. Long story short, when Bhishma died, he was the eldest living ancestor to the equivalent of 5 generations of the Pandava line, and was strong enough to overcome even Arjuna in battle.
* If it isn't capturing them to make them into gold or to eat them (or, as in
* If it isn't otherwise obvious, the easiest way to tell if a dog or puppy on
* "If it Makes You Happy" was used in a car commercial. They only used part of the chorus, which goes "If it makes you happy/it can't be that bad", clearly trying to give the impression that buying a new car is just what your self-esteem needs. They had the foresight to cut off the song right before the last line of the chorus, which is "Then why the hell are you so sad?"
* If it means something other than what an ordinary person would understand it to mean (some people believe that "legalese" means that even if you
* If it pleases the court, the plaintiff will now present exhibit A from
* If it's an episode of an anime or an overseas import, usually it's skipped over due to translation issues, the aforementioned content issues (often due to
* If it's children doing it, one of the parents shuts them up, perhaps commenting "If you two don't quit arguing, and I have to turn this car around..."
* If it's describing hair directly, it's blonde (X has blonde hair). If you're describing people, they're different.
* If it's for boys, then the technology in the toy will be prominent in the advertising. The design of the toy and its description in commercials will suggest bleeding-edge technology. "
* If it's French, however.... John Browning, or his French-speaking student Dieudonné Saive. Joining these countries, Italy is well-known for quality handguns and shotguns.

* If it's in a forum post, click on the button with three dots on the post in question. On the dropdown, select "Holler this" and put your complaint in the input box that opens.
* If it's incomprehensible, as you can't agree to something you don't understand;
* If it's literally unreadable — many jurisdictions have banned the literal sense of "fine print", even specifying a minimum font size.
* If it's not awesome enough, their surfboards leave energy trails that can slice through armor, luminescent green/yellow and look like splashing waves.
* If it's not Dib's interference or Zim's own ineptitude that foils a plan, it'll be GIR in another moronic stunt.
* If it's someone the protagonist knows, it's a convenient way to have them
* If Its Tuesday This Must Be Belgium who starts the trip with an empty suitcase. By the end of the film, the suitcase is full of stuff he's pilfered, including a life preserver from a cruise boat.
* If it succeeds, whoever investigates the murder is bound to stumble upon the conspiracy, particularly if higher-ups
* If it's "unconscionable", or extremely unjust or overwhelmingly one-sided, such that no sane person would accept it;
* If It's You, It's Okay: A character falls for someone of a gender they're not normally attracted to.
* If It's You, It's Okay: A character finds themself attracted to someone outside of their preferred gender.
* If It's You, It's Okay. After being friends for a while, they kiss after a fun party and end up dating.
* If It's You, It's Okay: Discredited in slash fiction due to a specific use of it (i.e. "We're Not Gay, We Just Love Each Other") being perceived as having homophobic undertones.
* If It's You, It's Okay: When a gay or straight character makes a single exception for sex or romance with someone outside their normal gender preference.
* If It's You, It's Okay when she checks out some other girls in the locker room and finds herself interested.
* If It's You, It's OK has a prominent straight male fanbase that are fully aware of her biological sex, but don't care. Her appearance at a convention showed them taking pictures, receiving kisses and happily letting her grind her (underwear-clad) junk on their heads no different than a typical night at a strip club.
* If it wasn't for his 97% closer rate, it is pretty clear he would have had the
* if it wasn't for the fact that he was Anderson and would be revealed to be the DARPA Chief many years later. Y'know, for a technology expert, Sigint was rather narrow-minded with this.
* If it wasn't for the padding by the Milkshake! hosts and the additional older episodes of the show that round it to 70 minutes in total,
* If it was possible for another magic user to reverse a spell, they had to get it
* If it was real, it would be too disgusting to watch, like boxing or Joe Theismann's
* if it weren't for Doakes' suspicious and secretive behavior making him more conspicuous than Dexter.
* If it weren't for Gru's nosy neighbor Jillian setting him up on a terrible blind date in
* If it weren't for the "be safe around trains" line at the end, the Aesop of
* If it weren't for the computers and a few other things, you would swear that
* If it weren't for the fact that Shinryuuji's coach is more like something out of a martial arts movie, Agon probably would've been kicked off the team a long time ago.
* if it weren't for the model's relative prominence during the scene in question.
* if it were playable, would have this mechanic for some of its Utterances (i.e., spells): you can say them backwards to achieve the opposite of the normal effect.
* If I Wanted X, I Would Y: A character talks trash about something by saying, "If I wanted [something related to the thing they're trashing], I would [do something else, usually quite mundane]."

* If I Wanted You Dead...: If I was going to kill you, I would have by now. Better get moving before I actually DECIDE to kill you!
* If I Wanted You Dead...: The biblical David twice gets close enough to kill Saul, but stays his hand. Although not explicit, the message is clear. Saul doesn't get it.
* If I Was Your Girl during a dance. He then asks if that makes him gay.
* If I Were an Evil Overlord) the royal family is barricaded behind a magical door. The invading empress orders her men to tear down the wall instead.
* If I Were You for their food and even leave a hefty tip, but they won't eat it. And Jon Wolf does this solely for the satisfaction of knowing that the restaurant will have to throw out several perfectly good lobsters later that night.
* If I Were You, Jake and Amir share a variation of the joke their fans can use on Tinder to break the ice (taking advantage of the fact that you can't "interrupt" someone via text):
* IFixIt.com applies this trope to repair instructions for just about everything, but especially electronics.
* iFixit electronic device. Devices are graded from 1 to 10. So that cool gadget made in a factory by robots can be repaired by hand at home.
* If Jimmy really is cracking corn, is he a separate guy, or is the slave
* If John Cena were in the dark match to "send the crowd home happy", he would often add some cheap heat in the form of thanking the crowd for their support, singing "Rocky Top" with the Tennessee crowd to piss off
* If Katara and Sokka's mom Kya hadn't pretended to be the last waterbender to save Katara, Katara would have died and wouldn't have been able to get Aang out of the iceberg.
* If Kaze and a Female Avatar obtain an A support before Chapter 15 of
* If killed, can be restored to unlife with the proper procedure. One early version of this, appearing in both pre-Dracula stories
* If Kim starts trying to convince Acele to reveal what drug she is on, he'll start acting like he's "
* If Konami ever decides to make a Metal Gear game without Kojima’s involvement, don’t. Ever. Support it. For example, this instantly became the case with the aforementioned
* If kudzu is the vine that ate the South, then Himalayan blackberry is the vine that ate the Pacific Northwest. Fortunately, it's not quite as fast growing and isn't toxic or prone to exploding in flames, but the thorns that grow on its vines and leaves make it unpopular with most browsing animals. Birds and small mammals love its delicious berries, but this just means that its seeds are deposited in a nice pile of fertilizer. It does have one major enemy that's proven quite effective at controlling it, though: goats. Goats will happily eat its leaves and even vines, quickly destroying the plant. So by putting up some temporary fences around an overgrown area and leaving goats to take care of the vines, it can be quickly eliminated with relatively low impact to the environment (compared to other methods of control such as burning it or using chemical herbicides).
* If Lee reins in his language around Clementine in the first season, she talks like this in the second.
* If left to die in the first game, the third game reveals that their replacements aren't that much better either. The tendency to simply stick their head in the sand whenever there's trouble, forces Shepard in the third game to go over their heads and organise a summit with the leaders of each of their respective governments, so that they can properly organise a counter-offensive against the Reapers.
* If Leliana is successfully romanced, the scene after she and the PC consummate their relationship will have her doing this.
* If Leo only scoring an Oscar in his sixth attempt was deemed painful, imagine how it went for both acclaimed cinematographer Roger Deakins (only in his fourteenth,
* If lesser enemies (or players in Deathmatches) were hit with an attack that reduced their health to their starting health times negative one (i.e. negative 30 for a Shotgun Zombie, who starts with 30 health), they would be gibbed. This was a

reasonable result when they were hit by rockets, but picking up a special
* If Life is a Bowl of Cherries -- What Am I Doing in the Pits? lookalike, and bringing her husband when a single man asks her to spend some time and bring a friend. She also considers "Semper Fidelis" her and her husband's "song"
* If Loner, Coward, Phone Addict, or Spiteful students witness a student burning to death, they'll step back in shock before
* If Looks Could Kill and loads his getaway helicopter with so much of it the thing will barely get more than thirty feet off the ground. He dies when Michael Corben shoots the helicopter, causing the gold to fall out. Letting go of the steering stick, Steranko falls out with the gold trying to save it and is killed when the now pilotless helicopter lands on him as a result.
* If Looks Could Kill. By the time he puts them on, the scientist has already moved behind a lead shield.
* If Looks Could Kill. Despite the fact that his personal emblem is a scary-looking scorpion and he has a private army of machine gun-toting goons for no reason he could possibly justify and generally acts like a jerk to people in public, Steranko has somehow convinced British Intelligence that he is "an ally and a friend."
* If Looks Could Kill, Michael Corben gets X-ray glasses as part of his superspy gear.
* If Looks Could Kill: When Michael fights Zigesfeld, he lands quite a few direct punches to his face, which accomplishes absolutely nothing except to make him really angry. Zigesfeld then backhands him using his mechanical hand, and this literally sends Michael flying.
* If Luffy's childhood was anything to go by, his older brother Portgas D. Ace likely had a similar (if not
* "I flunked again, Petka. The question was about Caesar, and I told them it's a stallion from the 7th cavalry squadron." / "Oh, sorry about that, Vasily Ivanovich, I had him moved to the 6th!"
* If magical creatures in general — elves, dwarves, monsters and so on — make up less than 10% of the world population, the world enters the Age of Fairy Tales.
* If Malik uses his Eternal Serenade Mystic Arte on the main arc's final boss, he declares it the last time he'll use said move. Yet, the player can still use Eternal Serenade in the Future Arc. If this happens, Sophie will call Malik out on his lie, forcing him to lie again to get Sophie off his back.
* If McCain wins (according to Democrats), the coastline will be submerged by global warming,
* If — an entire series of the genre which the BBC ran for a while.
* If medicine is your interest, whether you practise it or are simply interested in the subject, you could be this, if subjects like pathology, toxicology and haematology are particularly interesting to you.
* If memory serves, Modular Man's creator ace had a superhuman gift for robotic design or something along those lines. When said creator was infected with another version of the wildcard virus he lost the brilliance. When we see Mod Man again he is in less then perfect order because the creator has lost the ability to maintain his creation.
* If Menendez is killed at the end of the game, Cordis Die rises up one year afterwards and overthrows the governments of America and China. If Menendez is spared at the end of the game, but Karma isn't alive, Menendez breaks out of prison a year later (during the Cordis Die attack) and kills Woods before going to Josefina's grave and lighting himself on fire. If Menendez is captured and Karma is alive, she foils the Celerium worm and gloats about it on TV while he rots in prison. The best ending has everyone alive except for Harper and Farid.
* If Michael Eddington is anything to go by, the Maquis breakaway from the Federation has elements of Romanticism in conflict with the prevailing Enlightenment ideology of the Federation. Though their initial grievance was the handover of their colonies to the Cardassians, they also value the rugged frontier lifestyle above the utopian society of the Federation.
* If more than one category tag can apply to a story set in Florida, the Florida

tag automatically wins.
* If Morrigan was romanced by the Warden in the saved world state imported for
* If most cereal commercials (namely Apple Jacks and Cinnamon Toast Crunch) are to be believed, adults are the biggest morons on the planet and don't understand anything and just exist to be scorned mercilessly for their idiocy by their children. They are also physically incapable of grasping why children enjoy cereal.
* If Multiball is ready, launch to the upper left flipper, then hit the Tommy saucer for the "One Way Combo" and start multiball.
* If my advisors ask "Why are you risking everything on such a mad scheme?",
* If My Calculations Are Correct: Intellectuals who talk about their "calculations" a lot.
* If my clients are to be found guilty, then they refuse to go down alone on this. If they get thrown in the stockade, then at
* If My Favorite Pop Idol Made It to the Budokan, I Would Die, as it shows that as obsessive as she and other idol fans can get at times, it comes from a place of genuine love, with the fans going through great lengths to fully support the titular idol group in their different ventures.
* If My Heart Had Wings because her high school was a special engineering school that boasted great facilities, which she needed to produce the glider she had been working on ever since making a close friend as a teenager there.
* If My Heart Had Wings is completed, something will go wrong no matter what, unless it's the end of a route.
* If My Heart Had Wings is free, but only allows the first half of the novel to be read, purposely leaving readers on a cliffhanger in hopes they'll pay for the complete route DLCs. Previously, you had to use "Wings" to read the novel, which you could pay for, or get a very miniscule amount for free (one scene a day if you were lucky).
* If My Heart Had Wings, meaning that in the meantime until they meet again Ageha deliberately tried to invoke this trope by making herself into a cute girl in the hopes that he'd be shocked and humbled when he returns. He's definitely surprised to see his young, boyish friend having turned into a such a pretty girl... but he doesn't remember the comment, and as soon as they start interacting again they fall into familiar patterns. It's not until they get caught in the rain one day and see each other half-naked and wet that it hits both of them that they're the opposite gender and damn attractive, too.
* If My Heart Had Wings, the twins' route is split between upbeat, sweet, but clumsy and 'average' Asa and intelligent but cynical, aloof, and sharp-tongued Yoru.
* If My Heart Had Wings, to suggest that he just date them both. Aoi is skeptical at first, let alone everyone else, but the situation goes forward with extremely minimal drama or jealousy.
* If My Heart Had Wings: Twice in Amane's route, Aoi accidentally walks in on Amane watching porn, causing him to freak the hell out, and get rather angry the second time as they're dating by that point. Though both times, it's quickly revealed that she's watching for educational purposes, not to masturbate. However, she seems to be pretty into it the second time (at least) and is quite peeved when Aoi demands she stop.
* If my trusted lieutenant tells me my Legions of Terror are losing a battle, I will believe him. After all, he's my trusted lieutenant.
* if Naruto could challenge him, it meant his own skills were inadequate.
* If Natural Magic games aren't hard enough, you can attempt the "No Equipment Natural Magic Game"(NENMG). No Espers, armor, weapons, or relics can be used at any point during the game, so your characters' ability to deal damage comes only from their natural abilities (Blitz, Rage,
* If neither are romanced, Dorian, a Tevinter Mage, and The Iron Bull, a Qunari from
* If neither Dorian nor Bull is romanced, they may get together and use those nicknames for each other..
* If Nero revs up the Red Queen in a cutscene or his taunt where he stabs the

ground and revs it, when gameplay resumes he'll actually have level 1 Exceed ready. Accordingly, skipping said cutscenes leaves it unrevved.
* If NewGRFs, AI scripts, game scripts and such don't cut it, and you need changes that require modifications to
* If nobody in their right mind would buy your product for themselves, say it's "the perfect gift for anyone". Particularly common for household "inventions" aimed at people
* If non-interactive viewing of another time counts, there are examples in the Bible, most famously The Revelation of Jesus Christ. "Come up here, and I will show you what must take place after this."
* If non-villagers are added from multiple games, the announcer says to prepare for an epic battle even if there's only one of each non-villager. At first, the announcer said to prepare for an epic battle between villagers, werewolves, and vampires, but didn't include aliens when that game was introduced. As of
* If not following this, they could have followed three later (1950, 1955 and 1956) International Court of Justice decisions on
* if not for the door that remains open with a wall of fire running through and somehow not entering the room.
* if not in appearance, sometimes troll her, and one of them once stole her ice cream.
* if not right away, then eventually, for example, once razed an Imperial town he was passing through because he didn't like the taste of the wine they served him.
* If not the political figures, at least someone on their staff or in their immediate family...
* If not trained as a stunt performer, many of these actors are martial artists, acrobats, etc, which greatly assists in doing stunts. A related situation is where the majority of a character's on-screen time is action or fight scenes with relatively little dialogue (this is common for an
* if not worse than, except un-dirty. On a similar note, Cassie is the only character described as being able to make the sometimes horrific-looking process of morphing look beautiful and elegant (the Andalites call it morph-dancing).
* If on a winter’s night a traveler by Italo Calvino has a frame story (about "the Reader") as well as descriptions of the novels the Reader is reading. The Reader is referred to as "you"; the narrators of the internal novels are referred to as "I". Then there's an interesting section where the Other Reader (the love interest of the Reader) becomes the "you" for a brief while.
* If on a winter’s night a traveler is written in the second person, with the Reader as the protagonist, and begins: "You are about to begin reading Italo Calvino's new novel, If on a winter's night a traveler."
* If on a winter’s night a traveler written almost entirely in the second person, is centered around two readers: one as a stand-in for male readers, another for female.
* If one believes his Twitter is debatable, as they very well could have been referring to "All the Small Things" which actually is by blink-182 and whose chorus opens with the phrase.
* If one considers the Caamasi to be subject to Can't Argue With Elves, then the Caamas document crisis, a major plot in
* If one considers the plight of the Colonial fleet as analogous to the Mormon migration to Utah (in keeping with the strong Mormon themes throughout the show), then the original
* If one defined "main character" based on screen time alone, Isaac and Miria would fit. They are also the only ones to show up in every single timeline (except for 1711). However, this doesn't hold true in the novels past the anime, since - starting as early as Volume 5, the first volume past the anime's adaptation - there are entire volumes in which Isaac and Miria simply don't appear at all, maybe save for occasional prologue/epilogue cameos. This serves to only further dilute their presence in the story and bring it more or less down to par with how much screentime everyone else in the story has, making for a true
* If one goes to Wonderland, leaves, then completes Deep Jungle first, the scene

that normally shows Alice wandering into Hollow Bastion will instead show Snow White.
* If one has the Million Dollar Wedge and/or the Wild Card, having Round 4 and beyond go without a Speed-Up since Bankrupt is still in play. It more or less hinges on the staff hoping Bankrupt would be hit, thus denying someone the opportunity to take either or both to the Bonus Round.
* If one interview, in particular, is any indication, this was the result of
* If one is an American citizen, one does not simply fly into Cuba. The longstanding American trade embargo means that there are few flights (despite Florida being less than 100 miles away), and those are for people who have relatives in Cuba and must be booked through a special travel agency. If you're a tourist, you have to go through a third country like Canada or Mexico and bribe the immigration official not to stamp your passport.
* If one is willing to stretch the definition to the North of the border, then Quebecois writer
* If one looks at maps at Interstate 295 in Virginia, one can see that, where 295 merges into I-64 at the very end, there is a highway stub where the Interstate would have continued. There were indeed plans to continue past that area, but were scuttled when the decision was made to focus on the Virginia State Route 288/World War II Veterans Memorial Highway, which effectively did the same thing. While the southbound stub is still there, today the northbound stub and the cloverleaf on-ramp has been removed in favor of an overpass on-ramp to get on 295.
* If one looks at the calorie count for Nutella, it's true, it really does give you energy. If you're using it on a sandwich, maybe more than a quarter of all your energy in the day, maybe more than half!
* If one of the children has a learning disability or neurological condition (like autism or ADHD), favoritism can go in either direction. The disabled child will be either completely ignored, left in the care of therapists, and/or institutionalised while the "normal" child will get their parents' undivided attention (as the disabled child is a "lost cause" while the "normal" child "still has hope"). Or
* If one of your friends has a long-lost relative they last saw on some distant planet, be assured that you will bump into said relative shortly after landing on the next planet, whatever it happens to be.
* If one of your ships is damaged beyond repair, the crew starts evacuating in escape pods. If you manage to retrieve at least 50% of the crew, the new (identical) ship you get for the next mission will have the same experience as the lost one. You will, however, have to get all new equipment.
* If one person has a really nasty sunburn and the others want to show sympathy without causing pain.
* If one side violates a contract, the other party is no longer bound to it either.
* If one stretches a bit to include newspapers as "literature," Bonnie Parker was the
* If one takes the Many-Worlds Interpretation of Quantum Mechanics, the Elitzur-Vaidman bomb tester experiment may be a subversion. If one, with a certain photon maze setup, links a macroscopic event to whether an object is a potential detector of a photon or not (in the original thought experiment, whether a bomb will explode or is a "dud"), it is possible to emit a photon and, if the bomb is live, have a 50% chance of the bomb exploding, a 25% chance of being unsure of whether or not is a dud, and a 25% chance of learning for sure that the bomb would have blown up. If the bomb is a "dud", the "unsure" result will always happen with 100% probability instead, which can be made more clear by repetition. The situation is highly contrived, and it is still more likely to be in the "bad universe", and the involvement of other universes rather than just quantum-unique probability-canceling effects requires taking the Many Worlds Interpretation. However, if one had multiple of these "bombs", would only lose the bomb and not your face if any exploded, and wanted to save at least a few live ones, you could find out, and potentially save for later, some of the ones that would explode, at the cost of creating a bunch of universes where you weren't or were more lucky in number of

real bombs determined yet saved. It has been
* If one wants to get technical, Vegeta's son Trunks is also a warrior prince, by virtue of being both a fighter and Vegeta's son. However, the only time he's ever called a "prince" is in a
* If one was to travel to exotic locales, this may be something that one might say in response to trying some exotic cuisines. Cracked.com has a list of
* If one wished to summarize Temperance "Bones" Brennan in a single phrase, it would be: "An insufferable and
* If only it worked like that in real-world nuclear reactors. In real life, a shutdown (known in the United States as a SCRAM) is largely a matter of turning an immediate and overwhelming problem into a big-but-manageable problem spread out over time. Even after shut-down, nuclear fuel still releases
* If only they could agree on how ..., while the Council focuses on democracy and sees any kind of hierarchy as suppressing the human spirit.)
* If only Willow was there to hear about sticking fingers in dykes - uh, dikes.
* "If Only You Knew" by Patti Labelle: "I must have rehearsed my lines/A thousand times/Until I had them memorized/But when I get up the nerve/To tell you the words/ Just never seem to/Come out right".
* If, on the Fastest Finger portion of the game, no one gets it right after several attempts, Regis Philbin comes on, mocks you for being stupid, and says
* "I" for "Incomplete" is usually a temporary placeholder, indicating that something weird happened and the student hasn't finished the work. Either the student finishes it and gets a real grade, or they don't and the grade converts to an F.
* I, for one, welcome our new insect overlords.." The camera pulls back to reveal a hastily-drawn "HAIL ANTS" poster, which Kent quickly rips off.
* I Fought the Law and the Law Won can cough up a seemingly limitless number of redshirts just to take down that pesky protagonist even if the narrative says they shouldn't be able to.
* I Fought the Law and the Law Won: Police forces that are nigh impossible to escape or defeat.
* I Fought the Law and the Law Won to put down that pesky protagonist.
* I Fought the Law and the Law Won: Whoever or whatever the local law enforcement may be, attempting to fight it is futile. They're either downright invulnerable, or endlessly respawn.
* I found a Hidden Door in my Cellar and I think I've made a big mistake.
* I Found You Like This: A character who has passed out from injury wakes up in the care of someone treating them.
* If Papyrus's snow puzzle is too hard for you, you can talk to him repeatedly and he'll eventually reveal that you can just press a switch on a nearby tree to solve it. Interestingly, pressing the switch before talking to him and then stepping on the switch that marks the puzzle as "finished" will cause him to react as if you had solved it properly.
* If parents find out one of their children is LGBT, expect the burden of
* If passing isn't an option, the offense can try to continuously lateral the ball to keep the play alive. This is often referred to as the "Stanford band play" after a 1982 football game in which California University completed five laterals on a kickoff return to win the game, but the Stanford marching band had run onto the field believing that the game had ended. Due to the insane risk of this play (as failed attempts often end with the defense recovering the ball), this is reserved for the absolute last moment of the game. On the rare occasion it works, it can be magnificent: a Division III college football game ended with one team making
* If Peri is Soleil's mother, she also shows that she's afraid her daughter inheriting her
* If Phil Fish is indeed retired from game development, as he claims, then
* If Piccolo were to die, then Kami would as well and vice-versa. This is because they were originally one person but Kami cast off his evilness in order to become guardian of Earth. That evilness turned into Piccolo. On the plus side, you only have to resurrect one to get both back. This is no longer an issue once the two of

them
* If players side with Saulot in "Fair Is Foul," they actually get within inches of accomplishing his goal of defeating Lilith and bringing down the wrath of God on Caine...
* If playing with multiple players at the end of the Salt Mine run, one of the fighters can
* If plot points from originally non-canon works count, then the big,
* if poorly developed turned out to be one of the least popular plotlines in the show's history up to that point.
* If possible, played even straighter with the Zerg Scourge in the original, flying units that cost the same as a Zergling and exist for the sole purpose of crashing into enemy flying units, exploding on contact, and the Zerg Banelings in the sequel, which are like the Scourge but ground-based and so bloated with explodium that they
* "If Quake was done today" (a satirical video by Kai Moosmann) begins with a parade of logos for id Tech 2, Bethesda Game Studios, Face FX, Scaleform, Speedtree, and Aldi Süd, which is not a middleware company but a German supermarket.
* If Quark can be believed, the Ferengi never had slavery or significant wars in their past because of their focus on commerce (Rule of Acquisition Number 35: Peace is good for business). In another instance, Quark points out that human's fascination with "doing it themselves" and "not taking shortcuts" means that they take longer to do things they could just buy, which prevents them from spending time on other important things.
* If Rance and Garrett are the hottest couple, then Lady Frost says she and Victor Benjamin The Savage Gentlemen are wrestling's coolest couple. While they have entered some tag team tournaments and thus do qualify for this trope, "Pretty Proper"
* I, Frankenstein. Averted with the gargoyles and the demons. They both look unattractive in their true form, while their human appearances vary.
* I, Frankenstein, demons are not killed, they're "descended". Gargoyles are not killed, they're "ascended". Justified, since we're actually shown flames coming out of defeated demons which then head down somewhere, while defeated gargoyles turn into a bright light and lift up in a bright column towards the heavens.
* I, Frankenstein has the Frankenstein monster getting mixed up in a war between gargoyles and demons.
* I, Frankenstein is more than a soulless monster is that even though he hates Victor Frankenstein for creating him, he still carries his body back to the family cemetery and digs him a grave.
* I, Frankenstein, Victor Frankenstein's journal reveals that he used electric eels to generate the sufficient electricity to reanimate Adam's body.
* If Raul Tejada is inspired to be the Vaquero that he once was, he states that while he's an old man who's eyesight and body aren't what they used to be, his brains can make up for that and he's still quick with a gun. His Old Vaquero perk lets him fire revolvers and lever-action rifles 33% faster.
* If real, the running theory is either carbon monoxide or a chemical weapon leak. As the ship's mission was classified and the ship itself having been renamed, but not having been recorded as having done so in several records, the chemical weapon theory is viable. The explosion could then be caused by the gas being flammable and the victim's faces looking up in horror meaning it was at least in part somehow hallucinogenic (or deprived the brain of oxygen, causing hallucinogenic like symptoms) or incredibly painful or both. Some bodies were also reported to still be standing where they died, meaning whatever it was caused muscle stiffening, paralysis, and/or rigor mortis almost immediately.
* If reapers and sowers don't do their job, then life and death go out of whack.
* If Regina trying to prevent Charming and Snow from being together isn't enough,
* If registered in European countries, Humvee is legally a truck ("motorized vehicle over 3500kgs loaded weight") and can be driven by anyone holding a truck license. Controls are not different from a 4x4 truck anyway. Some older military

trucks are much more demanding - see the
* If Republican candidate Alf Landon is elected, there will be no compromise, but he can weaken both the SPA and AFP, resulting in both uprisings being smaller.
* If Robin Hood is a Lovable Rogue, then definitely we have to include Yoshimitsu of
* If Ryder manages to bargain the krogan into letting the Initiative set up a colony on Elaaden, Director of Colonial Affairs Foster Addison will comment that Acting Initiative Director Tann will object (he hates krogan). One of the player's choice of responses is "fuck Tann", resulting in this exchange:
* IF Season 4 was made, it would be done with 3D models. After being bombarded with questions by upset fans, the team finally admitted that Season 4 was cancelled in February of 2020.
* If Seikimatsu Toshio hadn't elbowed Tadano unconscious in Chapter 4, Komi wouldn't have stayed behind in the classroom or had the conversation that lead to Tadano becoming her first friend. Yet Seikimatsu makes very few appearances in the story.
* If Senpai is in close proximity to Yandere-chan, the screen will turn pink,
* If Series Five was made, one possibility was that Baldrick accidentally killed J.F.K while fiddling around with a gun in Dallas.
* If sharks could edit TV Tropes, they'd name a page after orcas instead.
* If sharper, pointier things such as swords or claws are involved, especially if
* If she did confess to Marie then and there, LOTS of lives would have been saved.
* if Sheen came along, he'd make Fatigue's mom strip for them. He was right.
* if she hadn't figured it out on her own, probably before anyone else did. She decides not to view it as a problem.
* If she is named Divine, her staunch morals prevent her from remaining lovers with the Inquisitor since Divines must be celibate, and she breaks up with you.
* if she IS Scout Arael, she's been conditioned previously to withstand some of what happened to her and that on top of this, her Autistic traits make it harder to notice if she's angsting.
* If Shepard has the Spacer Background, their mother, Captain Hannah Shepard is mentioned in the second game as having
* If Shepard is a biotic, s/he is considered one of the lucky ones, having only manifested in late puberty, due to secondary exposure to Element Zero. By that point BAaT had already shut down and when Shepard's latent biotic abilities were discovered, they had
* If she's Chrom's wife, when Chrom had a heart-to-heart talk with their future daughter Lucina, Sumia attempts to assure herself that Chrom is not cheating on her by doing this instead.
* If she's in your party, when you rescue him from the Thieves Hideout, you'll get an extra bit of dialog where
* If she's romanced by a male Avatar, Lucina can give him one as well.
* if she's screwing with him when he sees that Lockhart's test comprises entirely of questions about the man himself.
* if she were told that her husband was dead and her young son had been kidnapped by her husband's worst enemy.
* If Shin Getter Robo, from the manga continuity specifically, is featured in a
* If smaller astronomical objects are your thing, an enhanced version of this law also applies to planets. There's a reason the moon, Mercury, and Mars are geologically dead, while Earth and probably Venus are still active. Geological activity is created by heat leaving a planet, the area through which the heat can leave is proportional to the square of a planet's radius, but all common sources of heat are proportional to
* If smashing a small robot into a big robot's head, almost impaling the pilot of the big robot (who, by the way, was the one who thought of this) in the process is not Crazy Enough To Work, then nothing is. Oh, and they also run a walking, nonflying battleship up a mountain and jump through the air for a good half a mile just to get a chance to
* If Snake calls Para-Medic after finding Bio-Luminescent Mushrooms, he'll ask if

eating them will recharge his batteries; Para-Medic jokingly tells him "Sure, why not?" Eating the mushrooms actually
* If Snake Plissken gives even a fraction of a damn about the people who die helping him, he certainly doesn't show it.
* If somebody else is wrongfully implicated, and looks close to taking the rap,
* If somebody is going through the trouble to be hated by everybody but still be a picture of justice overall, that might be more suspicious than anything else, that or every single person around them is just insane.
* If someone actually foresees all the plans, then that person can sometimes
* If someone appears on the Midnight Channel, you have to rescue the person from the TV world before a certain date passes. If the deadline passes and you didn't save the person, said person will die when the fog is at its heaviest. Your hero collapses and you are then given the option to exit to the title screen or flash back seven days to try again. The stated in-game reason for this Game Over is not because the person dies (though that's obviously the motivation), but because the death frustrates any further attempts by the hero to investigate the murders due to lack of clues or information. And the very last person — if you fail, instead, Naoto calls the hero to tell them that shadows are coming out of the TV, and suddenly cuts off with a scream.
* If someone can get her angry enough, such as in the case of Kasane possessing Shinra, Celty will almost instantly turn into an amorphous, insentient monster.
* If someone emerges the victor of the aforementioned pileup, that's
* If someone had shot off a chunk of my ear, I'd be pretty pissed, too.
* If someone has been successfully framed for a serious crime, they most likely aren't free to investigate it. They're in jail or on the run from the law.
* If someone interrupts you when you're cleaning the house, use our guns!"
* If someone is hoping to be bought by a particular person, their chance of success will depend entirely on
* if someone is pathetic and weak enough to end up in this position in the first place, there would be no satisfaction in finishing them off anyway.
* If someone is turned into a girl by the Exemplar power, and used to be a guy, no force on
* If someone lasts longer than their first bad call, anyone who works as an emergency medical responder will eventually experience this, as they must in order to function. The same is true of emergency room personnel they deal with. This can sometimes cause a severe case of
* If someone of royalty dies however, they lose their status and are considered 'dead' in the line of succession.
* If someone plans to fail, and accidentally succeeds—in other words, they
* If someone ruins the plan by having a better plan, the first plan is
* If someone says "You'll pay for this" or something to that extent, expect the
* If someone suffers from Depatterning damage to their True Pattern due to Blood Magic use, in order to heal the damage, they must refrain from any Blood Magic use for a year and a day.
* If someone works up the courage to ask someone for the very first time (usually in high school) and they get rejected, it is not at all unusual for it to be
* If some or all of the above gambits are used by different characters trying to manipulate each other at the same time, then it's a
* If some street robbers demand "Your money or your life" from some dwarves, they should be prepared for a long wait while the dwarves discuss. It's also suggested that any bandit attacking a Dwarf mail coach, Dwarfs being faithful about sending money home, and demanding their money or their lives should bring a book, folding chair, and lunch.
* If something else causes the glass to be broken before the car can even make it to where the glass pane broke, it's also
* If something is initially presented as scary but turns out to be harmless, it's most likely not Nightmare Fuel since
* If something is normal or expected in the genre, it does not automatically qualify. Violence in a

* If something startling happens, and the screen is suddenly filled with fish. Understand that the onomatopoeia for surprise is "gyoh", which is also one of the words for "fish".
* If songs originally first used in movies count, Disney did that with several spin-off cartoons:
* If SPA candidate Jack Reed is elected, Huey Long's American Union State tends to be larger as a backlash to Reed's policies.
* If specialized skill sets rate as "technology", then the ancient practice of falconry - a hunting tradition at least as old as human civilization - has found a whole new 21st-century application. Aside from its occasional use in pest control around airports and urban areas, trained eagles are now proving viable as a defense against consumer-grade drones: snatching intruding quad drones out of the air around sporting events, airports, and prisons more safely and reliably than net-launchers or interceptor-drones, and retrieving smugglers' contraband-loaded drones intact as evidence.
* If Star Wars was Swedish features the voices (or rather soundclips) of famous Swedish actors dubbing over the voices of the cast of the original trilogy. The new voices are minor parts used to tie the completely unrelated dialog together. Featuring [[Riget Ernst-Hugo Järegård]] as Darth Vader, Mikael Persbrandt as Han Solo and Death from the Seventh Seal as the Emperor.
* If, Steve Bell drew Tory politicians of the Thatcher/Major era, such as Norman Tebbit, as animated skeletons or barely-human zombies; Michael Howard was a daylight-shunning vampire, and Michael Heseltine had something of the werewolf about him.
* If Superman utters even the word "hell", you know you've pissed him right off. He's nice and polite enough to avoid curse words, so if you've made him mad enough to start actually
* If Su Yung's the long case, Kimberly Maddox is the alarmingly short one, as in two shows in two months short, over the fact she couldn't get a win in the Shine promotion. However, Leva Bates theorized that Kimberly already had narcissistic personality disorder, so she likely didn't start very far up the slope.
* If Tatum in the first film stopped her rant about how obviously contrived her situation was (trapped with the masked killer) even a few seconds earlier to think, she might have been able to get the upper hand and escape.
* if that) and throw them at the enemy. The Alpha Legion recognise that their few astartes can't be everywhere at once and are difficult to replace, so if mortal servants can be trained to be guerilla fighters and agents then that helps protect their lives even more than simply using them as bullet-catchers.
* If that doesn't make your head spin, then this probably will: North Korea's missile program is based on designs reverse-engineered from Egyptian, Syrian, and Chinese missiles, which came from the Soviet Union, which in turn were based on
* If that doesn't sound too bad, we should probably mention that Trace was one of the most powerful Mages in the setting... and a tyrant with an
* If that plan works simply by letting someone know about it and try to prevent it, then it's a
* If that wasn't enough, there is the Self-Aware Beauty Mark, which is a bread monster inside of the container. Once thrown at the player the bread monster will cosmetically maul the player's head. It applies the same effects as Jarate. Only it may look like green liquid as the result of the urine being contaminated by the bread monster.
* If that wasn't enough, they then replaced the Pontiac Trans-Am altogether with a Porsche 911 and a Lamborghini Countach.
* If that wasn't hit hard enough, Framework!Fitz says of Skye "Nevertheless, she persisted," which a couple months earlier had become a
* If the abandoned extension of the Northern City Line from Moorgate to
* If the aircraft has dual machine guns, the bullet pattern will be two parallel lines, usually wide enough to be on each side of a road.
* If the airliner you're in decides to dismantle itself at 30,000 feet you can expect ruptured lungs to be one of the clues that an in-flight breakup occurred

during your autopsy.
* If the Amazonian women are aliens and not just giant humans, then Zapp did make it with a significant number of hot alien babes.
* If the Aryan Brotherhood are the ones to unify Russia, it can result in a coup where
* If the audience seems to have a fairly good reason for preferring the bad guy over the good guy, you may have
* If the audio dramas and promotional art are canon, then averted with Shizuru, who shows interest in
* If the ball falls into the Highwire lock from a weak ramp shot without being lit, you are awarded a "Sneaky Lock" bonus (with an animation of a pinball tip-toeing across the display), and that ball is locked.
* If the beautiful princess that I capture says "I'll never marry you! Never, do you hear me, NEVER!!!", I will say "Oh well" and
* If the body is moved, the mage might might not be able to find his way back to it.
* if the Bombs were to possibly be taken out by luck of the Conveyor Belt, it wouldn't happen. Not as hated as the Toffee Tornado, but still an annoying obstacle.
* If the boy is immature, it needs to be in a feminine way, and if the girl is mature, it needs to be in a masculine way.
* If the car comes down the road in a series of wide turns, and it isn't clear if the car will hit the pane of glass (if it ever makes it there), it's
* If the car disappears from view and isn't seen again until after the sound of glass breaking, it's
* If the car drives into the pane of glass, and not only the glass shatters, but also the car, as well as the workers, it's
* If the car drives into the pane of glass, and the result is that the glass merely has a car-shaped hole in it, that's
* If the car drives into the pane of glass, but the glass endures and car bounces back, it is
* If the car drives through the glass, and views are shown of damage sustained by the car either complicating the driveability of the vehicle and/or making the car more identifiable to the chasers, or the workers point out the direction of the car to the chasers as they drive by, it's
* If the car drives through the pane of glass, and the driver stops to explain the reason why he crashed into it, it's
* If the car drives through the pane of glass, and the workers are heard complaining about why cars that are being chased can avoid nearly everything but a pane of glass, it's
* if the caretaker is just knocked unconscious into their pen isn't that overdramatic anymore, huh?
* If the car hits the pane of glass and drives through unharmed because the car company paid to have their car in the film and wouldn't allow its use unless it was show undamaged, it's
* If the car hits the pane of glass, and the chasing car(s) regain their lost trail from the scattered pieces of glass, it's
* If the car is not doomed to hit the pane of glass, but one of the workers sees the car coming and stops in the street such that the car drives into the pane of glass, it's
* If the car misses the pane of glass but a second car breaks it instead, it's a
* If the car's occupants mention the number of car chases that lead to a pane of glass being carried across a street, it's
* If the car stops before hitting the pane of glass and then takes a different route, it's
* If the cartoonist supports Joe Biden, they tend to draw him in a more realistic and heroic way. However, for the detractors of Biden, they will draw him as either a manchild, exceptionally ignorant, or a disgrace to American society.
* If the character does Sudoku instead, it connotes that the character is trendy

and up on popular culture. Whether that's a good thing depends on context.
* If the character is not disabled throughout the whole story. Generally involves the following variations:
* If the character or characters getting the Day In The Limelight are very minor, it's a
* If the characters are villains/antagonists in the work, then it's a
* If the characters arrived by vehicle, circumstances will prevent them from using that same vehicle to leave.
* If the city's populace is missing, you can't say it's very populous.
* If the Clone and Stasis Clone spells were used on adults, the clones they created would be adults too.
* If the commentators are to be trusted, closed fists are now legal in WWE;
* If the company doesn't want the original author, they simply replace/fire them from the project.
* If the country band Ricochet is remembered for anything other than their
* If the crime has any direct witnesses, they will almost always turn out to have completely misinterpreted what they saw. They are usually outright lying the other times.
* If the current economical system persists into the future, inequality would be exacerbated greatly, as the haves and the have-nots will become physiologically distinct subspecies. Tremendous riots are likely once death itself is no longer the great equalizer.
* If the dad in question is one of those "doesn't read the manual" types, this can very well turn into
* If the "Damage Roulette" Second Wave option is enabled, regular weapon damage ranges between 150% of the base damage and
* If the Dark Ritual is performed, Morrigan becomes this by the time of Dragon Age: Inquisition
* If the Democrats and Republicans keep the National Unity coalition together and elect Floyd Olson, the United States can reach a compromise with the SPA and prevent them from rising up if negotiations succeed, leaving only a single front against the American Union State, which rises up immediately.
* If the discussion becomes political, expect the Scientist to stand by the side that protecting Humanity and the creation of a greater world for everybody is what is important and politics be (
* If the DM instructs you to roll d20 for no specified reason, then nonchalantly says "Oh, nothing" when you report the (low) result and ask what your PC might've seen or heard.
* If the Doctor is supposed to mature over the course of the show's run, why is the First Doctor portrayed as an elderly,
* If the Emperor Had a Text-to-Speech Device act and traumatized the hell out of them first for no reason other than amusement. And while he was laughing with the Deceiver about the C'tan eating each other:
* If the Emperor Had a Text-to-Speech Device after having his already broken back being hugged for a little too long. He got better in quick order but still.
* If the Emperor Had a Text-to-Speech Device after yet another attempt at unplugging Guilliman from his life support.
* If the Emperor Had a Text-to-Speech Device, although he still treats Corvus's bullet immunity like it's just insubordination.
* If the Emperor Had a Text-to-Speech Device analogy as if it is an incredibly difficult and abstract comparison to grasp.
* If the Emperor Had a Text-to-Speech Device, and decides to hide the fact, mangling the account immensely.
* If the Emperor Had a Text-to-Speech Device, and he's back in the next shot without as much as a word of explanation, or anything else for that matter.
* If the Emperor Had a Text-to-Speech Device and Kitten whether they've heard of times when humanity was kicking ass. A single servoskull is cast as the tumbleweed and slowly floats by the two, who are just staring at the Emperor in awkward silence.

* If the Emperor Had a Text-to-Speech Device and outright defies the Emperor once.
* If the Emperor Had a Text-to-Speech Device and the Emperor gets to enjoy the schadenfreude. If they win, his plans to unfuck the Imperium are much, much closer to fruition.
* If the Emperor Had a Text-to-Speech Device and thus were qualified to know all about the Fallen without killing them. It's just that the others are trigger-happy paranoiacs.
* If the Emperor Had a Text-to-Speech Device, an Imperial planet descends into civil war over an argument the Emperor has with Rogal Dorn over which day it is best to eat tacos.
* If the Emperor Had a Text-to-Speech Device) answers questions sent in. In the first of these episodes, someone naturally asked the Emperor if there would ever be enough dakka. Here is his response:
* If the Emperor Had a Text-to-Speech Device as well and even Alfabusa uses it out of videos.
* If the Emperor Had a Text-to-Speech Device (at least after emerging from his period of depressive insanity).
* If the Emperor Had a Text-to-Speech Device based on Diavolo (Custodevolo?) at least wears a pair of pants.
* If the Emperor Had a Text-to-Speech Device biological children (unlike the Primarchs, who were more like clones) was that every time he had sex, the woman tended to end up rather mauled (he mentions blood and broken bones were usual), and, while he made sure they never ended up unsatisfied, he never bothered to return to check on any of them.
* If the Emperor Had a Text-to-Speech Device brothers bully him for having powers the Emperor also had. To be honest, they both needed this rant.
* If the Emperor Had a Text-to-Speech Device/calm/AGGRESSIVE words mid-sentence, such as when given a kill order by his boss.
* If the Emperor Had a Text-to-Speech Device Cato Sicarious can't say "I" without putting "Cato Sicarious" right after it, even when stressed.
* If the Emperor Had a Text-to-Speech Device Chapter Master Marneus Calgar promptly lampshades, he's effectively wishing Marneus to die at the earliest opportunity.
* If the Emperor Had a Text-to-Speech Device deck so he can beat Kitten in two turns with a deliberately broken deck that takes the bulk of the episode to do. Only to be beaten with two cards that exploit the fatal weakness of the Emp's strategy. He doesn't take losing very well.
* If the Emperor Had a Text-to-Speech Device don't treat him with great respect, only reluctantly coming along with Kitten on his quest to Mars when he asks them. And his position as a High Lord of Terra doesn't help him much when confronting people other than the Custodes either.
* If the Emperor Had a Text-to-Speech Device, episode 9, the Fabricator General hits a fatal error while pronouncing "buttcheeks" and explodes. He is back within 15 seconds.
* If the Emperor Had a Text-to-Speech Device for him to correct himself, this might've been him trolling Kitten. Then Kitten does the same in the very next episode while discussing the Tau, mentioning that the Tau males lust for "Greater Goods", then backtracking to mention their superior technology and firepower.
* If the Emperor Had a Text-to-Speech Device get a pass. To be honest, the Imperium has been showing its stupider side multiple times over the years, and Kitten, with whom the Emperor interacts the most often, is not the sharpest tool in the box either.
* If the Emperor Had a Text-to-Speech Device had this bit in Episode 24, during the Emperor's discussion with Rogal Dorn about the latter's gene sons:
* If the Emperor Had a Text-to-Speech Device has a weird sense of humor."
* If the Emperor Had a Text-to-Speech Device has entire organizations of those.
* If the Emperor Had a Text-to-Speech Device has led his two fellows to become more independent and even oppose him at times.
* If the Emperor Had a Text-to-Speech Device, has moments when he appears to be this.

* If the Emperor Had a Text-to-Speech Device has one Stormtrooper's head exploding after witnessing too much of the Warp.
* If the Emperor Had a Text-to-Speech Device has quite a few of those:
* If the Emperor Had a Text-to-Speech Device has the Imperium, and in particular the Emperor, being obsessed with skulls. However, in one of the Q&A sessions, he gets asked about this, and his response is oddly heartwarming:
* If the Emperor Had a Text-to-Speech Device has this happen two times in "This is impossible!" variety:
* If the Emperor Had a Text-to-Speech Device, he doesn't know this because the part of him knowing is in the other end of the Warp.
* If the Emperor Had a Text-to-Speech Device he is in canon and more like petty bully, swinging insults at Magnus and launching into overthinking everything just to annoy the Emperor. Nurgle as well, as his idea of making the Emperor go over to their side consists of giving him phantom itching.
* If the Emperor Had a Text-to-Speech Device. He's died four times onscreen and has one death referenced, and each time bounces back just as peppy as before.
* If the Emperor Had a Text-to-Speech Device, he's extremely blunt and to the point, seeing no point in metaphor, or even lies, when getting the point across with the truth is so much faster. This series treats him as if he literally cannot comprehend the concept of metaphor.
* If the Emperor Had a Text-to-Speech Device, he's speaking in a clear, powerful voice. It's enough that they accept his words.
* If the Emperor Had a Text-to-Speech Device Horus). Magnus certainly feels that way.
* If the Emperor Had a Text-to-Speech Device in-depth lore of the franchise.
* If the Emperor Had a Text-to-Speech Device: In episode 27, Magnus cracks up at a quip by Kitten, in what was apparently his voice actor doing exactly the same thing in real life:
* If the Emperor Had a Text-to-Speech Device informs him that the Gorger-Lord has a Toughness of 70 — meaning he ignores that much damage from every attack. Since the player character's attack only does damage based on the throw of a ten-sided die plus three, there's no way he can harm the Gorger-Lord. Except, of course, that when you throw a 10, you can throw again for more damage. Still, it would take getting a 10 seven times in a row to get more than 70 damage. Though these numbers are not pointed out in the story, the possibility of that happening is one out of ten multiplied by one out of ten etc. seven times — one out of 10,000,000. So naturally the player rolls a 10 eleven times (chance one in 100,000,000,000).
* If the Emperor Had a Text-to-Speech Device. In his first turn, Kitten lays down a monster card face-down. The Emperor proceeds to pull out a sixteen-card combo that leaves him with an indestructible monster and an indestructible spell that forces Kitten to attack directly with any monster he brings out and destroys it, while both are down to 100 Life Points. Kitten wins by using two cards - a spell that returns all spell cards to hand and a monster that returns an enemy's monster card to hand upon being placed, which then erases the Emperor's last Life Points.
* If the Emperor Had a Text-to-Speech Device! IN! THIS! ROCK! WHY! DO I! GET! ONE! THAT! TALKS!". Lesson? Don't blurt out Azrael's secrets unless you want to be beaten to a pulp.
* If the Emperor Had a Text-to-Speech Device. It's questionable whether she realizes how much he has decomposed, though.
* If the Emperor Had a Text-to-Speech Device it, the Emperor gets angry at him.
* If the Emperor Had a Text-to-Speech Device left him, he became the chief advocate for murdering her entire species. He even offers to go on a one-man crusade against them.
* If the Emperor Had a Text-to-Speech Device, Leman Russ calls Ex-Inquisitor Kryptmann "another one of Fyodor's irrational carnage cronies". Kyryptmann objects to two-thirds of that statement: He's perfectly rational, and his mass-murder is completely independent.
* If the Emperor Had a Text-to-Speech Device like so many of his other brothers,

Rogal has this to say:
* If the Emperor Had a Text-to-Speech Device, Lord Inquisitor Coteaz's tactic against Descius' ministers are barrels of Jokaero, intelligent orangutans.
* If the Emperor Had a Text-to-Speech Device. Magnus lampshades it in episode 16:
* If the Emperor Had a Text-to-Speech Device: Magnus the Red occasionally does this:
* If the Emperor Had a Text-to-Speech Device may be annoying, but they can at least get stuff done, so he sends them on a seemingly impossible but non-suicidal mission.
* If the Emperor Had a Text-to-Speech Device mentions in episode 20 that the Salamanders invoke this reaction in the common citizens of the Imperium, as they have jet-black, coal-like skin and glowing red eyes.
* If the Emperor Had a Text-to-Speech Device most of the time, but finally admits that he's not all-knowing, made a stupid decision and had no idea whose side he was on back in Heresy days, or what the sides even were. He also seems rather uncertain and confused of his current situation.
* If the Emperor Had a Text-to-Speech Device. Notable for containing almost no humor in it at all, with the exception of a mention of a "hyper-realistic Furby" (which cried 666 liters of blood as the Star's influence reached its peak). It's mentioned that the letter was discovered sealed in a box on a ruined planet devoid of life, explaining how it got delivered.
* If the Emperor Had a Text-to-Speech Device of the first season, Lord Inquisitor Karamazov, believes that there is no such thing as innocence and will gleefully bathe a whole world in blood, fire or both if he suspects it of heresy. It doesn't help that he's confident that he's the only person who knows what the real truth is and won't accept the possibility that he may be wrong.
* If the Emperor Had a Text-to-Speech Device on a massive scale, it quite often enters this trope too. One of the very first examples:
* If the Emperor Had a Text-to-Speech Device packs a double punch at the end of Season Two with near-simultaneous arrival of Vulkan and Rogal Dorn, the latter of which comes pretty much out of nowhere.
* If the Emperor Had a Text-to-Speech Device painted over with a cheery "Please Die :D"
* If the Emperor Had a Text-to-Speech Device, pretty much everyone takes up this mantle, depending on the topic.
* If the Emperor Had a Text-to-Speech Device pretty much tell you all you have to know about him.
* If the Emperor Had a Text-to-Speech Device recalls the last moments of his old friend Malcador, one of the few people he will not see insulted, in complete silence. Cue the Custodian poking him with his spear to see if he's still alive. The worry's understandable, given that he's an immobile skeleton whose only signs of life are the text-to-speech device and psychic outbursts.
* If the Emperor Had a Text-to-Speech Device refrigerator running?" and soon the conversation devolves into an argument between Karamazov and the demon — until Leman Russ blows the place up, the prank being a distraction.
* If the Emperor Had a Text-to-Speech Device's appearance in Episode 25 is accompanied by a distorted, unnerving laugh track that comes close to hysterical screaming, and plays over the opening theme.
* If the Emperor Had a Text-to-Speech Device (see below) when he does.
* If the Emperor Had a Text-to-Speech Device's entire vast collection of priceless artifacts for the kicks.
* If the Emperor Had a Text-to-Speech Device's episodes starts with some beautiful shots of Holy Terra and the Imperial Palace before the story proper begins.
* If the Emperor Had a Text-to-Speech Device sex life. Kitten, on the other hand, puts a bucket on his helmet. It doesn't help much either of them.
* If the Emperor Had a Text-to-Speech Device's Old Ones, not deigning to give every other lifeform a proper push towards evolution and fucking up every attempt at actually doing something good. Or, in his words:
* If the Emperor Had a Text-to-Speech Device special rigs a coin flip by shooting

the coin in midair.
* If the Emperor Had a Text-to-Speech Device that his god systematically destroyed his life (and goaded him into delivering a mortal wound to mankind) in less than 10 minutes. To be fair, Tzeench is a dick.
* If the Emperor Had a Text-to-Speech Device, the Adeptus Custodes refuse to wear their armor, instead becoming enormously muscular, homoerotic bodyguards who spend all day oiling their abs, making sexy poses, and fapping (but only on Thursdays). They even go so far as to conveniently mishear the Emperor whenever he tells them to put on some armor, with the Captain-General being the only one who is still sane enough to stay in his armor all the time.
* If the Emperor Had a Text-to-Speech Device: The Custodes, after hearing the Emperor assumes the Sisters of Battle must be "sensible and rational" warriors.
* If the Emperor Had a Text-to-Speech Device. The Custodian that is usually giving exposition about the Warhammer 40,000 setting mentions off-hand that many people find the black skin of Salamander space marines unsettling. The Emperor is furious about the implied racism, but it eventually turns out that 1) the Salamanders are actually JET black, and 2) the Custodian is what we now think of as black under his armor, but the normal range of skin pigment is such a non-issue he didn't even know there was a word for it.
* If the Emperor Had a Text-to-Speech Device the Emperor does after recovering is ordering the Inquisition to be disbanded.
* If the Emperor Had a Text-to-Speech Device, the Emperor does this when he's communicating through the titular text-to-speech device. When he's using his own voice (in flashbacks for the most part), he's voiced by Randolph Carter.
* If the Emperor Had a Text-to-Speech Device, the Emperor is very happy with the news that he has biological children. When he finds out what happened to them, though, Warp storms abound over perpetrators' heads.
* If the Emperor Had a Text-to-Speech Device, the Emperor, is very much platonic father-son, but as the Emperor's favorite, he's less than seriously called the Emperor's wife; Magnus (one of the Emperor's sons) jokingly calls him Stepmother, and one of the other Custodians compares him to a widowed father doing his best for his kids.
* If the Emperor Had a Text-to-Speech Device, the Emperor reacts this way to many things. Most notably:
* If the Emperor Had a Text-to-Speech Device, the Emperor's description of the Warp is "dangerous, stupid, dangerously stupid and stupidly dangerous".
* If the Emperor Had a Text-to-Speech Device the Emperor shapes the Astronomicon, the massive psychic beacon powered by the daily sacrifice of a thousand screaming psychic children that guides every ship of the Imperium, to flip the bird.
* If the Emperor Had a Text-to-Speech Device, the "Fabulous Custodes" are still the best soldiers in the Imperium, they're just far from professional about it.
* If the Emperor Had a Text-to-Speech Device the first time the Emperor rants about religion in the series:
* If the Emperor Had a Text-to-Speech Device" them. Santodes misinterprets the order and instead seduces the technophillic Skitarii by showing off his well-crafted, mechanical body, who promptly oil themselves and let them in.
* If the Emperor Had a Text-to-Speech Device, the only people who are not aroused by the Custodes are the Emperor, Kitten and a couple of Inquisitors, regardless of their gender.
* If the Emperor Had a Text-to-Speech Device: There's a conversation that goes about like this:
* If the Emperor Had a Text-to-Speech Device: The series' interpretation of Rogal Dorn; every damn line of his becomes memetic thanks to his perfect deadpan delivery and extreme matter-of-factness about everything.
* If the Emperor Had a Text-to-Speech Device (the Tau were in their Stone Age around 6000 years ago).
* If the Emperor Had a Text-to-Speech Device. They make rather... obvious remarks about their attraction to the Emperor (and each other), criticize the Inquisition's sense of fashion and jump on the scene and pose. Fandom nicknamed them Fabulous

Custodes.
* If the Emperor Had a Text-to-Speech Device" This consists in the Techpriest slamming Kitten's head hard with a huge hammer.
* If the Emperor Had a Text-to-Speech Device, this happens when Kitten mentions Sensei, his human descendants.
* If the Emperor Had a Text-to-Speech Device: This trope was apparently the main reason the Emperor of Mankind refused to create female Astartes.
* If the Emperor Had a Text-to-Speech Device this trope writ large. He believes that Malcador's Marines Errant turning into the Inquisition are also this. He's pretty much right.
* If the Emperor Had a Text-to-Speech Device to say Magnus, second only to the Emperor himself in psyker power and someone who despises them above all else, is probably just jealous that they're better than his own legion.
* If the Emperor Had a Text-to-Speech Device to what he's saying, though, he becomes one of the creepiest characters in the show.
* If the Emperor Had a Text-to-Speech Device universe, the Adeptas Sororitas show up.
* If the Emperor Had a Text-to-Speech Device verse delivered to those who actually deserve them for once.
* If the Emperor Had a Text-to-Speech Device was "Holy shit I want one!"
* If the Emperor Had a Text-to-Speech Device, when Karamazov invades the palace, Descius sends against him his ministers, who turn out to be his lookalikes.
* If the Emperor Had a Text-to-Speech Device, when the Emperor tells the history of the entire universe, the first question (after the two listeners pick their jaws from the floor) is:
* If the Emperor Had a Text-to-Speech Device. When their father is dying, blacksmiths He'Stan and Tu'Shan need to make a lot of money in a hurry. However, all they can make are funeral masks.
* If the Emperor Had a Text-to-Speech Device, which immediately gets exploited by him complaining about the worrying state His Imperium is in and also exploited by everyone else since they can finally communicate with their Sovereign again and help Him create a good Imperium once again.
* If the Emperor Had a Text-to-Speech Device with a single wave of a hand.
* If the Emperor Had a Text-to-Speech Device with blackened custodes helmets replacing their heads. Exaggerated in the "historical" scenes, which have literal paper cut-outs with pencil art of characters on them held up by visible Popsicle sticks. Later seasons do add some basic animation, in the form of having people's arms move up and down, or otherwise folding, although it's still quite limited. Leman Russ, for example, technically has a walking animation, but his art can't have its legs separated so he does so by hopping around like he's in a sack race.
* If the Emperor Had a Text-to-Speech Device, with Kitten suggesting that Salamanders are worse and Orks keep on losing because both are green, while the Ultramarines' blue being superior. The Emperor dismisses this, as to him all colors are equally inferior before gold.
* If the equal opportunity fanservice of both the male and female characters isn't enough to hook someone on
* If the Exile gets on good terms with Visas Marr, she will teach you this ability. During the trip to Telos at the end of the game, she will ask to the Exile to meditate with her whilst using Force-Sight, so they can see each other as they really are.
* If the Expanded Universe sources are to be believed, Earth is abandoned and recolonized quite a few times.
* If the first batch of Mind Worms you breed is ever killed in battle, you get the option of renaming the base where the worms were bred in memory of the young, promising Talent you put up to the task of controlling them. It's rather touching, and you get a bit of (non-fourth-wall-breaking) text to explain why you would do this.
* If the first team fails to score on their first possession or if both teams score field goals on their respective first possessions, then it becomes full

sudden-death overtime and the first team to score any points after that (even a field goal) wins.
* If the first team to possess the ball scores a field goal, the other team gets one possession to respond and either win it with a touchdown or re-tie it with a field goal of their own. If the second team fails to score before losing the ball, the game is over and the first team wins. This will still create a Down To The Last Play situation, since the second team will fight to the last play to avert this outcome.
* If the first ten minutes were any indication, this movie's gonna BLOW!!!
* If the gender is constantly hidden by spoilers, especially if the male-to-female ratio isn't equal (or worse yet, there's only one character of a particular gender), it can be pretty easy to guess who the spoiler tags are trying to hide. Not to mention it's also very easy to tell the difference between he and she. Relatedly, if a character is referred to as one gender in the story, but an entry about them spoilers their gender, that spoils the reveal of
* If the "gimmick" is more than 6 words long or includes the word 'and', think hard before adding it. It might still count, but it might be too stretched to fit.
* If the goal as such is to weaken them so you can eliminate them later, it's
* If the goal is to make money and/or gain amusement from the conflict, it's
* If the goal is to pretend to be an enemy and attacking another enemy so they'll fight each other without them knowing it was you, then it's
* If the Goa'uld had ever attacked Earth with ships in orbit, at least before Season 5 or so, they could have used orbital bombardment to conquer or destroy Earth civilization with impunity. The SGC prevented that with guerrilla tactics, alliances with other enemies of the Goa'uld, and sheer luck.
* If the Greasy Spoon is meant to evoke a "50's diner" feel, it may have jukeboxes at the tables, or off to the side somewhere.
* If the Great Khan arises among the Marauders, they will use the full empires as the outside enemy and thereby unite the Marauders into a terrifying force. If you can't go toe-to-toe with them, they will happily conquer you.
* If the group fight/kills the aforementioned Zeke and then goes to the nearby village, when Alm speaks to the girl she reveals that she loved Zeke from afar and then curses the group. If Zeke and
* If the hero actively opposes the villain before the latter has done anything evil, all the audience sees is a
* if the hero had committed them and authors punishing characters for things the characters literally cannot help.)
* If the hero is proactive about his situation, then the Status Quo will, in most situations, eventually change, which is frequently banned under
* If the hero runs up to my roof, I will not run up after him and struggle with him in an attempt to push him over the edge is not even worth considering.)
* If the Hikigaya siblings are right, Hachiman Hikigaya is pretty good-looking. He would fall under Imperfect Beauty. Because his "fish eyes" and "gross disposition" counteract his similar neutral facial features, bar his eyes, to Hayato Hayama who is probably at least a common beauty. If they're wrong, Hachiman probably is Flawed Average on the scale.
* "If the Hogfather does not return, then the sun will not rise tomorrow." No, instead a sphere of burning gas would.
* If the "if" is interpreted as a material conditional, then the only way the claim "If he did it, he had an accomplice" gets the value "false" is if he did it and he didn't have an accomplice. You might even apply some similar reasoning with normal language, but it gets much more uncertain.
* If the Imperium is intolerant when it comes to natural mutation, it's positively
* If the Inquisitor is a Qunari, one of the other members of their mercenary band said this to a donkey after an
* If the Inquisitor is female and romances Cullen or Blackwall, there are aspects of this trope to their relationship in
* If the Inquisitor is female and romances Josephine, she can take this route when Josephine's parents put her in an

* If the invasion never actually reaches Earth's surface, it's semi-plausible that it could be covered up. What are the odds of somebody just happening to point their telescope right at the space battle, after all?
* If their encounter with Raven is any indication, the Space Ponies of
* If the Joker has the ability to create a variant of the Joker Toxin that powerful, why would he only use it as a back-up plan in case he dies? Why not mass-produce the stuff and use it for another round of anarchy? Sure, they might betray him, but he's
* If the loss of faith with humanity and/or society and government makes them decide to
* If the Male Protagonist romances Mitsuru, she makes it clear in that she wants it to be secret, at least for a while, because during her Social Link, she
* If the many, many conversations on alignment on various boards (oddly only rarely becoming flame wars) are any indication, the rules for alignment are vague. It really doesn't help that the writers don't seem that constant; one iconic character is lawful because they are devoted to something, but another iconic is chaotic because they are devoted to their art.
* If the mask covers the top half of the face, it emphasizes the mouth, aka
* If the media hawks about a new disease, people get more stressed, which weakens the immune system, which makes them more likely to get sick.
* If the men and women of the Imperial Guard are pathetic, than Chaos cultists are even more. Most cultists are armed with autoguns (basically just classic gunpowder firearms) and improvised melee weapons and armour with the odd flamer or heavy stubber. Most of them don't even have combat training, they just rely on sheer zeal. As far as the Chaos Astartes are concerned, cultists are only good for using up the enemies' ammunition or as unwitting fuel for their profane rituals (if the legion is the Iron Warriors, they can also dig trenches and be used as field rations). However the Alpha Legion actually bother training their cultists, and as a result they can be
* "If the Moon Were Only 1 Pixel: A Tediously Accurate Scale Model of the Solar System."
* If the movie is particulairy heinous, he might have a skit or two in which he rants at the writers/actors/directors/Hollywood in general, and so on, for not putting any effort into their craft/being
* If Them's the Rules definitely qualifies being described as very beautiful but utterly cold to his wife and a racist bastard to Harry.
* If Them's the Rules despite not being particularly handsome or beautiful.
* If Thems The Rules for a week after Tom passed out after attempting a floating charm without a wand.
* If Them's the Rules, Harry employs this technique to slowly win Tom over, to the point that he prefers Harry's cooking to the Hogwarts feast.
* If Them's the Rules if the latter screws up in missions, Harry will have to learn Pureblood politics and behavior. If he doesn't, Marchosias has to spend a day amongst Muggles.
* If Them's the Rules only met that he didn't have a reason to express them.
* If Them's the Rules so he makes sure he hides his darker tendencies.
* If Them's the Rules Tom does not like the idea of Harry being friends with Madeleine or that creep Arcturus.
* If Them's the Rules uses polyjuice on a prostitute to make him look like Harry.
* If Them's the Rules: When the orphanage caretakers discuss Tom's punishment for knocking the kid who tried to smother him unconscious. Tom notes they are completely apathetic to him. On a lighter note, there's the instance when Madeleine convinces Tom the benefits of having Harry go out and for both of them to attend a birthday ball.
* If the mummy wrapping variation counts, they do that sometimes, too.
* if the name didn't make that clear). It is another "farm league" that has chugged along after its larger partner closed down. And it didn't return to being its farm league when WWL started back up.
* If the name Gloryhammer isn't manly and epic enough for you then just listen to

the lyrics, most of the songs could very well be written by googling 'Things that are epic and manly' taking the first hundred or so results, and then mashing it together as lyrics, Glory? Check, Battles? Check,
* If the name John Wesley Ryles is ever brought up for anything other than his extreme prolificacy as a session vocalist, it's most likely for his 1968 debut single "Kay", which got to #9. No one remembers his higher-charting "Once in a Lifetime Thing", which hit #5 in 1977.
* If the Nameless One gives his name as 'Adahn' frequently enough, a man named Adahn appears in-game. He only exists because the Nameless One's been claiming to
* If the Nameless One (which means you) tries to test the boundaries of his immortality on... let's say, Lothar or the Lady of Pain, s/he will promptly erase the Nameless One (I mean, you) from existence and you get a game over. The former is an immortal similar to the Nameless One but without any of the irritating side effects. The latter is the caretaker of Sigil who happens to be more powerful than almost any deity within the confines of the city, and will perceive the Nameless One a rash that has to be removed should the Nameless One overstep his place.
* If the noun is plural and ends in s (as most do), add an apostrophe: my sisters' birthdays, the unicorns' horns.
* If the noun is singular, add 's. Yes, even if the noun itself ends in s. A fox's tail, the quiz's answers, Jesus's disciples, even my boss's desk.
* If the occurrence of the appendix among humans decreased until only a testimonial number of people had it, it would become what in Biology is known as Atavism. Horses with lateral toes and whales with leg bones are among the best known examples.
* If the only context is that the boy is a wimp while the girl is action-oriented, it is not enough.
* If the other guy has rigged a computer to do his number crunching on the fly for him though, try not to get on his bad side.
* If the other two contestants had "Whammied out" (i.e., hit four Whammys, which takes them out of the game) and the remaining contestant still had spins, he or she could play "against the house" with the added option of stopping whenever he or she wanted, as opposed to using up all available spins.
* If the Overload power is used on an enemy that's carrying a flame thrower,
* If the page has an Image Pickin' thread (it should be linked to above the article, like you see on this page), try and give it a read; it would be unfortunate if somebody created an illustration and then it couldn't be used because it lacks something important.
* If the page is a trope, the examples are the works where the trope shows up. These usually start with "Examples:" in a banner at the top of the list and are sorted by medium. Media that acquire a large number of examples may be moved to their own subpages, whose links are provided in an indexed list separate from the other examples on the page.
* If the page is a work/person, the examples are the different tropes that show up in that work. These usually start with "Provides examples of:" (or some variation) in a banner at the top of the list.
* If the pane of glass is broken before being hit by the car, which then drives through a different pane of glass carried by a second pair of workers, it's also
* If the parent has a specific talent, skill, career path, or what have you, any kid who shows promise in that field will instantly be doted upon by that parent for following in their footsteps. Say, if the dad is a police officer, he might share a bond with a daughter who also wants to be a cop.
* If the phrase "cheese food" appears anywhere on the package, it may be neither. It sounds like cheese food isn't cheese, it is what cheese
* If the picture requires dragging and dropping instead of just clicking on it,
* If the planet and companion star had significantly different orbital inclinations and/or the planet had a high axis tilt, endless day could occur on one hemisphere for decades, but as the other star crossed the ecliptic to shine on the other hemisphere, or moved so that one pole or the other always pointed towards it, just as much time would pass without an endless day.

* If the plan fails, but for some reason everything still goes as wanted, it's an
* If the plan hinges on the planner's apparent defeat or failure, then resulting in a positive outcome, then it's a
* If the plan involves deliberately poisoning yourself or at least pretending to be poisoned in order to poison someone else, then it's a
* If the plan involves fooling your enemies into fighting each other, it's
* If the plan involves intentionally getting hurt in battle to gain an advantage, that's
* If the plan involves predicting someone's actions based on their character and planning accordingly, then it's a
* If the plan involves someone injuring themselves in order to play on someone's sympathies to gain an advantage, that's a
* If the plan involves the victim knowing you have a plan but thinking it's a different one that they know how to beat, then it's a
* If the plan involves tricking someone into leading you to what or who you want, then it's a
* If the plan involves you not knowing the plan, though there is still definitely a plan, then it's a
* If the plan is created by the "victim"'s friends and loved ones for benign purposes (for example, as a practical joke), it is
* If the plan works because everyone knows the plan, but doesn't believe it's the
* If the player attempts to enter the Queen Metroid's room before killing all the Metroid larvae, the Queen Metroid does not appear (although she can be heard roaring in the background), and a cluster of crystals blocks the entrance to the egg's chamber. Fortunately, while Samus is barred from returning to the previous room or progressing forward, a hole in the floor allows her to exit the nest and return to the room with the broken Chozo Statue. The Queen Metroid only appears (and the crystals automatically disappear) after all of the larvae are exterminated. Additionally, the hole in the floor is still open during the boss battle (in case the player doesn't have enough missiles or energy and needs to make an emergency exit to restock), but is covered up when the battle ends to ensure that the player can only progress forward and is no longer able to backtrack.
* If the player attempts to exit school before the day is over, the screen will fill with static and a message will appear stating "No... I must not".
* If the player character decides to create his own faction, it can even become a Mêlée A Quatre.
* If the player character is inflicted with Vampirism, he/she will have nightmarish dreams when attempting to rest. Notably, resting no longer restores health, forcing the vampire to absorb it from other people and/or rely on potions/spells/enchantments to heal.
* If the player has over 50,000 RU and reaches the Wish Granter, the PC will say "I want... to be rich". He then sees hundreds of gold coins falling around him... which is actually a hallucination. The "coins" are actually bolts falling from the roof of the building which then collapses on him.
* If the player in the lead has between 1.5x and 2x the second-place score:
* If the player is so inclined, they can play as their own horde by creating a Hive Mind empire with the "Devouring Swarm" civic.
* If the player knows Zero's identity, there are a few places where extra dialogue can be found. When typing in
* If the player maxes out his cousin Nanako Doujima's Social Link, at the end of
* If the player opted to romance Tali or Garrus, they can be found making one of these . Apparently it's not the first time they've done this;
* If the player opts to kill Ryoji, it'll result in the entire party losing their memories and living happily about their "bright future". Except that an apocalypse will destroy humanity.
* If the player reenters the crypt where Stan has set up his insurance business, all they will get is a greeting from Stan. If the player enters enough times, Maggie from
* If the player solves a puzzle through guess work, because they're replaying an

already completed room, or solves it before acquiring all information the game expects you need to know, the characters will say something about how they accidentally stumbled onto the answer, or how the answer just popped into their head. They also often say something akin to "I feel like we skipped a few steps...", or muse over how it feels like the answer was something they just somehow knew, particularly tying it into most of the characters having a
* If the player still can't hit the last few blocks in a level, a lightning will strike them and destroy the blocks instantly.
* If the player tries to walk into the lagoon on Blood Island, the game won't let them. If the player persists, Guybrush will eventually walk into the water and find his
* If the player was married to Emily prior to 1.4, she has different dialogue in the scene where she allows you access to her sewing machine. This is otherwise impossible to see since she normally gives you permission to use it long before you can marry her.
* If the plot actually mattered where the gameplay was concerned, the playable characters would very quickly run into a big problem the first time they took damage - since one zombie bite is all it should take to turn one into the walking dead. Amusingly, in
* If the plot involves a certain European nation between Sweden and Germany, somebody will note that
* If the Pokémon flees, it doesn't count as the one encounter you're allowed in an area, since wild Pokémon running away is rare and beyond your control.
* If the Pokémon you encounter is one that you already have, you may elect not to catch it and try again. This is to stop the party being glutted with early-game
* If the present Avatar is killed while in the Avatar state, the whole lineage dies off forever.
* If the protagonist goes into witness protection, expect focus on the hardships of the program. Frequently they were an innocent who has had to turn their life upside down because of someone else who is a threat to them; often they lost a loved one to the people they had to run away from (which may be why they were testifying in the first place).
* If the Rats wanted to leave no trace behind of their lair, how were they going to take care of hiding something as massive as the council room?
* If there are any actual Holy Relics lying around, these things will often kill a vampire even if they're just in close proximity. Again, some variations have the relics' effectiveness dependent on the faith of the wielder, the vampire, or both.
* If there are any aliens are up there reading this mostly. Please don't take it hard.
* If there are expies of Superman and Batman in a story there is probably a
* If there are no magical creatures at all, the world enters the Age of Civilization.
* If there are other sentient, intelligent organisms in the universe who have developed a data system similar to the internet, they probably have pages describing how they are special as well.
* If There Be Thorns, Cathy is aware that social services will investigate the family if she and Chris adopt Cindy (the daughter of one of Cathy's ballet students, who is terminally ill), and thus likely discover that she and Chris are brother and sister, not husband and wife. So she makes a private arrangement with the girl's mother to decree that she wants Cathy and Chris to be Cindy's guardians. But even this would warrant an investigation.
* If there can be a comicbook example there likely won't be a bigger one than
* If the referee punishes their team, Hungarian fans often chant "SZEMÜVEGET A BÍRÓNAK!" ("Give glasses to the referee!").
* If there is absolutely nothing for them to air at all in terms of actual events, Golf Channel will often fall back on
* If there is a chair he has a standard routine where he will begin to sit on it, and then has a sudden flash of insight just before touching the seat and stands

back up again. Particularly hilarious in "
* If there is a Hacking portal around the cursor will spit between red and blue and will point towards it.
* If there is a third person, it will likely be the perverted friend who completely misses the point and spends the entire episode trying to sneak peeks or take photos. If there is an older cast member, he or she will probably already be naked when everyone else arrives.
* If there is a triangle for the European civs in the base game, it goes like this: Spain and Britain are the Balanced - Spain has a large and diverse unit roster and a card deck that can let them play rushdown, boom or turtle strategies equally well, while Britain is primarily an economic and naval faction with the potential for a competent land force as well (though it's not a true powerhouse). Holland, Portugal and Russia are the Subversives - Holland is an economic machine with a card deck suited for fielding lots of mercenaries, Portugal is a kind of fiddly faction with a focus on light and highly specialised units, and Russia's whole playstyle, from their card deck to their ability to raise troops in batches, is geared towards
* If there is ever a need for an insufferable jackass with a load of red tape in the
* If there is no pane of glass despite road signs saying "glass factory", or no car chase despite hearing engines roaring from the distance while the workers transport the glass through the road, it's
* If there isn't enough of Jamuraa left to stand on, I will still claim it for Keld.
* If there is one daughter and several sons, she will be the "baby girl" of the family regardless of birth order (possible exception if she is the oldest sibling, in which case she'll be de facto babysitter). Strangely, brothers are seldom shown as resenting their sister — in fact, they'll defend her honor more ferociously than their parents will. Any potential boyfriends are in for a hard time.
* If there is one show on TV that takes the concept of more dakka and runs with it, it has to be
* If there is one son and several daughters, the son will acquire the title of "heir to the family." His parents may believe him to be "more important" than his sisters, and they might be expected to obey him/take care of him.
* If there is something like a "spy porn" genre, torturing the heroine (or the villainess (or both)) with multiple orgasms until she dies (or blows the secret (or both)) must be a staple thereof. Example: A softcore
* If there's a baseball movie and the Yankees aren't the protagonists, you can put down your savings on them being the antagonists. This even extends to non-MLB movies, like
* If there's a fan-story about a late teens/early twenties Wally having to overcome insecurities chances are the climax (or an event a little before the climax) will take from his epic beat down of
* If there's a potential traitor in the group that manages to fool the hero, expect the Lancer to sniff him even before he knows the guy's true colors.
* If there's a scene at a carousel, there's a good chance it was filmed in one of two L.A. locations: the outdoor
* If there's ever going to be a fic or discussion about the gender-bent characters, there's a host of widely accepted
* If there's one series that has a wet spot for chainsaws, that'd be
* If there's one thing that the franchise as a whole teaches, it is that Fate is not set in stone and that mortals can control their own futures.
* "If there's some telephone card that goes cheap to all operators, I'm marrying a monkey!
* If the reviews for the movie adaptation are to be believed (with Janet Maselin calling the musical "a horror on the stage" and Jonathan Rosenbaum calling it "terrible" -
* "if there was any danger at all, Bosco's animal instincts would sense it." error.

* If there was no way for the planner to have known that option was even possible, then they
* If the right choices are made you can hear the Sand People history, another oral history going back about as far. Although it turns out to be closer to the truth than the previous example, it also heavily implies that Tattooine is the original human homeworld and states that the ancestors of the Sand People were the ones who overthrew the entire galaxy-spanning Infinite Empire in a slave revolt.
* If the score is tied after sixty minutes of regulation play during the regular season, the
* If the series were to have a signature vehicle, it would likely be
* If the seventh night is to be taken as canon, Mike Schmidt, the protagonist of
* If These Walls Could Talk 2, a television movie about three lesbians couples from three different eras.
* If These Walls Could Talk's pregnant 1950s widow asks a neighbor and a coworker where "a friend" could get a safe abortion.
* If the short guy knows anything about grappling, the tall guy better prepare for a joint lock. An extended arm is just asking for an armbar or triangle choke.
* If the singer keeps singing new lyrics during the fadeout, it can actually have the opposite feeling - for example, in Fixing A Hole,
* If the sisters start to attack each other, the symbol on the cover of the book changes and the sisters lose their powers. Also, the sisters can no longer read the book.
* If the source address does read 192.168.x.x, then it could be a case that
* If the Spanish and Mexican theatrical versions of the film still existed (Spain got the Japanese cut, Mexico got
* If the spoilered example counts, Vol absolutely must get a mention here.
* If the stalker formerly had a romantic relationship with the target, they're a
* If the stalker is an antagonist and the target is a protagonist, it's likely a
* If the stalker is chasing a celebrity, especially one who doesn't know them, they're a
* If the stalker is unattractive (especially if female) and her attention disgusts the target, this is
* If the stalker's behavior is meant to be romantic instead of creepy, it's
* If the stalker spies on/photographs the target but does not seek further contact, they are
* If the stalker wants their target's DNA as much as (if not more than) their love, that's a
* If the story has just been moved into modern time, but is otherwise more or less the same it's
* If the stuff you're buying is in Spanish, beware of the word 'sucedáneo', which is a pretty obscure word for 'substitute', and 'producto', which means 'product'. That thing in your cart? It isn't butter, just a close enough substitute. Chocolate milk? Umm, no, just a milk product with something else (they won't tell you what) as a substitute of chocolate.
* If the Superman robots are anatomically correct, then Catwoman knows what Superman looks like naked. In one late 2010s
* If the survivors you're trying to rescue takes enough damage from zombies,
* If the thought of an archaeologist searching for the Holy Grail sounds familiar, it's because Indiana Jones was based on Otto Rahn.
* if the title didn't clue you in to establish the main story as a generational saga.
* If the twins count, then Korra herself certainly counts as well. While Tenzin and Tonraq
* If the Universe was finite and boundless, it would be the largest example of this trope given that light would be able to circumnavigate the Universe since having been emitted, producing ghost images of the galaxy that emitted it, and of course the former being unable to escape from the latter.
* If the US government has spied on you illegally and they classified the spying as secret, you can't sue. Because the fact that they spied on you is classified,

you can't prove they spied on you.
* If the viewer happens to speak French, they can catch the deliberately uppity yet nonsensical names of the restaurants that Frasier and Niles frequent, such as
* If the villain doesn't do anything, the audience is entirely within its rights to think that this is a case of
* If the Warden reaches high approval with Sten, he addresses him/her as "kadan," meaning "close to the heart." He will also use this nickname for Shale, if the
* If the way reincarnation works in the Reincarny webgame series is to be believed, the safest way to prevent criminals from committing crimes again for a long time is to give them life imprisonment without parole, since executing them will just allow them to escape from Hell and be reincarnated as adults who immediately start doing the same things they did before. (The game series is at least 90% of the way toward the cynical side of the
* If the weapon does the "thinking" for you, you can distribute them to untrained personnel and still get a reasonably effective air defense out of each platform, but now in more places at once.
* If the wielder of a Staff of Withering expends two charges from the staff while hitting a creature, the victim ages 10 years instantly.
* If the winter of the changelings were to find its way to a new spring,
* If the work becomes successful thanks to their input, even if the company gains a fortune thanks to it, the author won't be able to become rich themselves or earn more money beyond their salary.
* If the workers are talking about the possibility of a car driving through the glass before the car chase reaches them, it's
* If the world history includes the death of most Forgotten Beasts and Megabeasts and humanity has become a dominant civilization, the game enters the Age of Twilight.
* if they are left alive, they'll only want to rise up against us one day. Better to kill them now and save us the trouble of having a rebellion later. After all, what have they got to lose?
* If they are repentant, they'll seek to rectify the situation and regain their "rightful place" in society. They will fail. May often come from being a
* If they died violently, they may be covered with their own blood, with visible deadly wounds like in
* If they'd looked closer, maybe that invading army would have noticed the sign on the gates to Mechanicsburg:
* if they don't like the way they look with them on. It's the little things that usually tip off the people around them - not noticing obvious signage, etc.
* if they don't send him back. She even takes one of their agents hostage!
* if they don't, there won't be a solar system left.) Some novels seem to indicate that activating a warp engine too close to a star can cause serious problems for the star, which also falls under this trope, so....
* If they exist in the story, magical weapons or other supernatural creatures might also have special abilities to kill vampires.
* if they get their powers stolen, like what temporarily happened to Vert in Hyperdimension Neptunia Re;Birth1
* If they have human-like qualities, they probably have a claim to do so.
* If They Haven't Learned Your Name even when in tactical gear, possibly because his old employers never provided him any. Why would HYDRA give a damn about their asset's comfort?
* If They Haven't Learned Your Name every minute to remain drunk) and commiserate about their respective fallen friends, and those friends' sexual practices. This eventually leads to Steve brokenly confessing to Sam that he feels like he's being eaten alive by the mantle of Captain America, and the two crying into each others' shirts.
* If They Haven't Learned Your Name, he and the other white members of the Howling Commandos tried disguising themselves as German soldiers once, only to get busted immediately because their pants weren't tailored tight enough to pass for real SS officers. He goes on to add that he's never met a Nazi who didn't have a weird

preoccupation with their appearance.
* If They Haven't Learned Your Name, Natasha Romanov pays Nick Fury a visit in his little cottage-safehouse in the UK and starts rummaging through the cupboards for tea, which Fury always kits SHIELD safehouses out with. She pushes past tins of sugar, green tea, cyanide, and arsenic before finding the tin of black tea, and proceeding to fix herself a cuppa with lemon.
* If They Haven't Learned Your Name, Steve keeps having to use the bar's restroom every few minutes because his serum-ized super metabolism keeps processing the alcohol too fast. Every time he comes back out, he describes a new and horrifying piece of graffiti he's noticed next to the urinals. Eventually, Sam is so disgusted by Steve's descriptions of the graffiti alone that he refuses to use the restroom, stating that he'll piss in the street if he has to.
* If They Haven't Learned Your Name, Steve Rogers asks for a full bottle of "their strongest stuff" at a Croatian bar and receives a cobalt-blue bottle that has something swimming in it, and whose smell Sam likens to paint thinner. Even still, it takes four or five shots of the mystery liquor for Steve to get drunk off of it, and in order to stay drunk, he has to keep taking a sip every minute or so, and a full shot every twenty. The bartender looks at Steve worriedly every so often because he's still lucid and upright and not blacked out on the floor.
* If They Haven't Learned Your Name, this is SOP for the particular circles she moved in between escaping from the Red Room and Clint Barton recruiting her for SHIELD- betray or hurt someone if it's convenient for you, because they'll do it to you eventually. Even years later, post-Insight, it's still her first instinct to hoard secrets in case she needs them later for leverage, even when it would be expedient to not keep them. Early on, she withholds intel from Steve Rogers that would have aided in an op, and it rightfully pisses him off. That, combined with how much she liked the feeling of having someone's trust and being trusted in return that ultimately got her to defect to SHIELD in the first place, are what convince her that she needs to stop and make a change.
* If They Haven't Learned Your Name when Sam Wilson refers to his current location somewhere in rural Russia as Central Buttfuckistan, because the last four places he's stopped at had no idea what macaroni and cheese was.
* If They Haven't Learned Your Name who find Barnes and the spaceship floating near their farmlands. After Barnes asks them for directions and then takes off, the two farmers debate if Barnes is an alien- obviously thinking of Asgardians -a drunk, or just a gringo, or if they're the ones who got drunk enough to hallucinate a white guy and an ugly-ass spaceship. They also realize that if Barnes is, in fact, an alien sent to take over Earth Loki-style, they're the idiots who just pointed him to the nearest town.
* If they marry, Ann often gets into arguments with Cliff that leave him with a bruised eye. They always make up though.
* If they need to remain Steadfast, are they waiting for something to
* If they're all clones that's probably still a valid response since there's still only five different base codes. Inbreeding's a problem even when there's lots of people if they're all clones.
* if they're fooled and award a penalty, it still stands - the player and/or team can still be punished later, though. Referees will give out yellow cards for diving in the penalty area (or in a similar high-stakes situation).
* if they're lucky, they get stuck and do thousands of dollars' damage to the truck. Newer models now have "car" and "truck" settings to specifically try and prevent this.
* "... If they're not laughing, it's not comedy. Well either that, or you're just not
* if they've been there awhile, someone has probably already asked or demanded something far, far crazier and were utterly serious about it.
* if they want to or appear blurry or not at all if they don't; "it's all tricks of the light". Vampires tend to seem technophobic just because they're old-fashioned, but several have been seen using laptops and other modern technology. One vampire is perfectly willing to feed on someone with her fangs, but also uses a

needle and syringe when she wants to be considerate to a wary, reluctant donor. And in the first book, a police detective brings Kitty to a murder scene so she can get the scent of the killer, and tries to treat her as evidence or witness to the crime just based on that scent even though she was nowhere near there when it happened.
* If they were notable figures of the mid-Seventies, odds are they appear in
* If they weren't playing Liberty Mutual ads, the channel would play
* If they were wearing the newest uniform, the Army Combat Uniform (ACU), the flag patch is velcroed, along with the rest of the insignia.
* If they wind up changing their mind afterwards, Word of God turns into
* If they won, they would win her hand Hippomenes, who used three literally irresistible apples given to him by Aphrodite to distract her long enough to finish first.
* If things do go wrong, but the person keeps adjusting the plan so that it works anyway, they're playing
* If thirteen to eighteen, where it's common and accepted for older boys to take a shine to younger ones. One of the three main characters has a relationship with a younger boy, of whom he's protective, but who seems to be a more mature person than his lover.
* If this be error and upon me proved,/I never writ, nor no man ever loved] and what it means, he wants to confess his love to Archie also. His feelings are anguished as well, mostly because he does not know how to do it properly and how to convince Archie he truly means it. There's also the Navy thing: They will both be court-martialed and hanged if they are ever found out.
* If this doesn't qualify Tumblr as a yaoi fangirl, I don't know what will.
* If This Goes On—, as the complete disappearance of the note would have been doubly suspicious.
* If This Goes On— had this as well. The theocracy, started by the prophet cum President Nehemiah Scudder, is part of Heinlein's "Future History," a title applied to a large percentage of his work which all takes place in the same Universe. Consequently, this version of the United States appears in much of Heinlein's fiction, though it may not be mentioned directly.
* If This Goes On— has these. They are sort of "landships". To get an idea of the "landships", think of a WW2 battleship that goes overland like a tank.
* If This Goes On—, John Lyle, a junior officer in the rebel forces attacking the Prophet's capital of New Jerusalem, is thrust into the position of commanding the whole force, when his commanding officer is wounded and his tank-analogue seems to be the only one in effective communication with all the others. Lyle isn't technically next in the chain of command (he's a staff officer/aide de camp for the commander, doubling up as tank commander). However, he doesn't trust the next in line to handle the situation (too cautious) so he continues to issue orders in the commander's name, even though the commander is out of contact. Once things reach a "safe" state, he tells the real next-in-line "you are in command now".
* If This Goes On— take over the transmission station where the Miracle of Incarnation is being broadcast, a ceremony in which God gives his yearly approval of the First Prophet Scudder as his agent on Earth, and replace it with one where God urges the populace to overthrow him. This causes enough chaos that the Resistance is able to take the entire country except the capital New Jerusalem. Eventually people realise what they saw was fake, and the protagonist says this should tell them the other Miracles of Incarnation they saw were also faked. His more cynical friend Zed tells him not to be naïve, as it's more comforting for people not to accept that everything they've been raised to believe is a lie.
* If This Goes On—. When he gets there he is put under anesthesia to extract the information. He later asks one of the Resistance scientists what was the nature of the "really important" message. He is disappointed when he is told that it was just lots of routine information. The scientist realizes he made a mistake, the man did have very important information. He also had his resistance credentials, "If they hadn't checked out, you would never have woken up."
* If This Goes On—", Zeb covers up Johnny's obviously guilty reaction to receiving a note from the Resistance by replacing it with one about gambling,

because they won't believe innocence but will believe this.
* If this involves Kansas State Representatives, odds are only 0.003% need to know.
* If This Is a Man, Primo Levi explains how, at the end, he and his fellow inmates departed from Auschwitz as part of a death march.
* If This Isn't Love, starts with a girl singing that she has "a secret kind of secret".
* If this is what Sans can do, then how powerful is his brother, Papyrus, who has way
* If this was ever true, it certainly isn't now. Kyle Meyers, better known as his stage name Dimitri Potapoff was arrested in August of 2017 for receiving cannabis oil in the mail, which is a felony in his home state of Georgia. Under US law, a felony charge automatically disqualifies anyone from possessing a firearm.
* If this wasn't so funny, it would be depressing: Charlie Brown is to Peppermint Patty as the Little Red Haired Girl is to Charlie Brown, making it an unrequited
* If three brothers set out on a quest individually, and it claims the lives of the first two brothers,
* If Toilets Were Added to Minecraft", one of Notch's assistants adds toilets without his permission.
* If Tolkien had known just how much of a merchandisable icon The One Ring would have become, he would likely have been outraged. He genuinely
* If Toontown survived into the present day, what does it look like now?
* If Toshiba doesn't make their laptops drop-resistant, the resulting chain of events will cause a zombie outbreak. A marketing campaign has the CEO imagining various worst-case scenarios if some seemingly minor feature isn't added to their product.
* If Touma casually opens a door, there will be a girl changing on the other side, regardless of what kind of room it is. No exceptions. If Touma bumps into a girl, he'll most likely end up touching her boobs or something. Even when walking in a public park, he isn't exempt from this. This is partly justified in how this guy is supposed to be rather unlucky (although YMMV on how "unlucky" it is to invoke this trope). But a lot of the times, it's because the girl and/or Touma grabbed the
* If trouble blew up at a remote outpost, and there isn't time to get help, those characters who were
* If Tsali is so powerful, why didn't he just kill Sonic and his friends in the very first chapter?
* If TV theme songs count as jingles, then the Rembrandts' "I'll Be There for You", the
* If two or more players are tied in score at the end, and a winner is required, the standard is to play one more game, except with just one ball instead of the usual 3 or 5. Whoever's score is higher is the winner. If they're still tied, more one-ball games are played until their scores are different. The Pinburgh 2016 Finals is one case of this, with the three tied players on
* If two or more players disconnect from a co-Op vs AI game, some AI players will 'go afk' as well and just sit in their base to even the teams back up a bit.
* If two teams are tied for a playoff berth at the end of the season,
* I Fuck Dogs, Paul McDermott pulls a very long note... And gets a headspin for his trouble.
* I Funny: In the beginning of the third book in the series, "I Totally Funniest", Jamie has become so famous in his school for winning multiple comedy competitions that he is now popular with girls, as he is surrounded by screaming fangirls who all want his autograph, to the dismay of his friends. One of Jamie's rivals, Ben the Italian Scallion, has hordes of screaming female groupies as well.
* Ifurita asks if androids and humans go to the same place after they die at the very end of the manga of
* Ifurita is Put on a Bus in the special episode-end credits for both Nanami and Shayla-Shayla in the 4th season that Makoto eventually gives in).
* If vertical people-movers qualify as "vehicles" for this trope's purpose, "elevator surfing" is a similar (and similarly-dangerous) activity.

* If violence wasn't your last resort, you failed to resort to enough of it.)
* If Walker dies before making it to the destroyed helicopter in "Adams", a special loading screen will play where Konrad's silhouette will shake his head at you with the faint voice of "Stop, just fucking stop!" being yelled in the background.
* If "Walter Koenig" sounds more German than Lithuanian to you—Koenig's family were Ashkenazi Jews (like
* If we apply this trope's logic to the Broadway Musical, then Little Meg is very much this trope.
* If we are the snobs, we think you lazy, filthy, disgusting leeches should just get a job, pull yourselves up by the bootstraps, and until then enjoy a limited and painful existence as your just punishment for not being born a snob.
* If we are to believe the autobiography of the Renaissance goldsmith and sculptor, Benvenuto Cellini, he was guilty of several crimes during his lifetime. However, the time he went to jail was for no real crime (a false accusation by his servant). Yet, since it was his "first" offense - he was never caught previously - he was not locked in, but allowed to roam the St. Angelo castle, where he was imprisoned, quite freely. Touched by the kindness of the castle's governor, Cellini stayed in jail freely, despite even the soldiers in the castle offering to aid him in his escape, since they were aware that he was condemned wrongly. Cellini's word, however was a word of honor.
* If we consider each webcomic to be its own thing, though, the longest hiatus is that of
* If we count the command to fire, then most heavy weapons would apply, although the call is meant to be heard by the weapon crew and accompanying friendly troops. Sometimes, the last thing heard on the radio before everything is drowned out by exploding shells/rockets/missiles is a
* If we drag our feet long enough about permanent radioactive waste disposal it will definitely be us. Some of the stop-gap solutions in place weren't even supposed to last this long.
* If We Fall Down. The way he talks to Flappy even sounds like a dad talking to a son who's disappointed him.
* If We Get Through This...: Characters agree to do something if they survive their current predicament.
* If we go by the traditional definition, Roland Orzabal is the frontman of
* If we go even further up the cosmic power scale, there's his boss Philemon, the embodiment of mankind's good and constructive side, and Nyarlathotep, the embodiment of mankind's evil and destructive impulses.
* , if Weird Al sang about the degeneracy of the Allies and the pure martial virtues of Germany.
* If we knew why the bowl of petunias thought "Not again!" while falling, we would probably understand a lot more about the universe.
* if well cared for) ponytail flailing around through lockups and pin attempts is a sight to behold.
* "If We Make It Through December," not explicitly a Christmas single despite many references to the holiday — it was much more a lament about being laid off and enduring other majorly disappointing news just before the holidays — did have a more blatant holiday tune for the B-side: "Bobby Wants a Puppy Dog For Christmas," a song about a young boy who, living in a community where there are no boys his age (it's unclear whether he was an only child or much younger than his siblings) yearns for a dog for companionship and friendship.
* If we're including Shakespearean Manipulative Bastards, then we also need to include
* "If we're lucky, the sharks will stay away until we reach shallow water."
* If we're on the subject of rappers, Busdriver, just listen to any song of his from "Roadkillovercoat" onward
* If we're playing the Kobayashi Maru example straight, then chances are the true test is a test of character, judging how well a pony can accept failure and realize where their flaws lie. Given how Twilight takes the thought of failure (before the

Rainboom boosts her power, she quickly gives up and apologizes for wasting the instructor's time), it's not exactly a surprise she failed in the many alternate timelines.
* If we're talking about heavy metal tribute bands, let us not forget
* If we're talking Bublé, we have a whole plethora: "The Best is Yet to Come," "I've Got The World on a String," "Crazy Love," "All I Do is Dream of You," "Baby (You've Got What It Takes)," "How Sweet It Is," and "Moondance," just to name a few. Although all of those songs are covers.
* If we're talking football, then look no further than the Pittsburgh Steelers and Oakland Raiders of the 70s. Not only did they win consistently, they faced off each other for AFC supremacy every year and had legitimate bad blood, leading to extremely physical, emotional, dirty games. The Steelers typically were the
* If we tried to mention all of the bionic parts that grant this in, we'd be here all night. Not to mention the
* If we want to get technical, Ray Chapman, a shortstop for the Cleveland Indians, was hit in the head by a pitch from the New York Yankees' pitcher Carl Mays. This one ended his career in a different way- the injuries sustained by the pitch ended up killing him 12 hours later.
* If we wish to stretch the definition of 'shark' a bit, there are a number of teams that
* if when three self-obsessed teenagers get into a sword fight more or less for the hell of it and tear around the school flynning for all they're worth.
* If where you work is a non-trivial commute from home, working at night and on weekends can have the benefit of not having to deal with the horrendous rush hour traffic.
* If White Wolf mortally wounded their brand with the Quickstart guide, they would kill it when they dropped the Camarilla Sourcebook. The book treated the
* "If wifie shuns / your fond embrace / don't shoot the iceman / feel your face /
* If Wilhelm comes out of the trial alright, Rolf certainly has a strong reason to let the matter drop now. God has exonerated Wilhelm. The authorities might prefer that feuds and hatreds are dropped rather than allowed to fester due to a lack of evidence.
* If Wishes Were Horses cast made him confident that he could demand rewrites this time.
* If Wishes Were Horses, "the shot was completed in 6-7 takes... and 6-7 toys."
* If Wishes Were Ponies and, in a panic, summons Twilight, who summons the guard. One of the guards is described thusly:
* If Wishes Were Ponies call upon Twilight for information from Equestria regarding Ghosts. Sending over a library book, the CMC, Harry Potter, Hermione Granger, and the Weasley Family casts a spell that manages to bring Myrtle Warrens aka: "Moaning Myrtle" back to life again.
* If Wishes Were Ponies: First contact happens when a badly injured Harry Potter stumbles through a portal to Equestria. The portal is eventually rediscovered by the Equestrians, who proceed to make contact with the British government. Specifically the Muggle one due to the Wizarding one being laissez faire to the point of negligent.
* If Wishes Were Ponies: In chapter 107, "Bight Star" (AKA) Starlight Glimmer, is fuming over her defeat by Twilight and Co.
* If Wishes Were Ponies: Pegasi on a whole have taken an immense love and interest in the sport of Quidditch.
* If Wishes Were Ponies routinely questions the intelligence and common sense of Dumbledore and the Wizarding World as a whole.
* if, with the ensuing drop in response rates leading to poor quality data.
* If wizards already had a basically functional system, why would they feel the need to incorporate something as extensive as plumbing? Keep in mind that wizards eschew Muggle technology enough that they still use quill pens and parchment paper in the 90s.
* If Word of neither God nor Saint Paul is available, fans will often make stuff up themselves to fill in important gaps in canon. This is

* If wrestling bothered to pay, maybe they wouldn't need to switch jobs so much.
* If Yandere-chan's sanity is low, the screen will become smudged and desaturated, she'll lose the ability to perceive other students as anything but silhouettes (or interact with them in any way besides murder), and begin to hallucinate herself murdering Osana.
* If "yoga" isn't a strange enough excuse for weird powers, Blanka was
* If you accept Salum Barows' suggestion of taking the throne for yourself instead of rescuing the rightful heir, you'll get a cutscene where
* If you actually suffer from acid reflux and get it while you're sleeping (which is pretty much inevitable), you may have strange dreams based on the pain and nausea before finally waking up.
* "If you ain't cheating, you ain't trying" is also a commonly acknowledged "rule" in NASCAR racing. No matter how hard NASCAR tries to discourage such an attitude, drivers and crew chiefs continue to look for creative ways to break the rules.
* If you already tried fighting the secret boss before, later attempts allow you to skip the cutscene and go straight to the battle.
* If you also have blood vials and quicksilver bullets in your storage chest in the Hunter's Dream, after dying (or transporting to the Hunter's Dream), you replenish your on-hand supply of your vials and bullets back in your inventory, just as long as you have such items in your storage.
* "If you analyze these vellum pages really thoroughly you get instructions on how to build a cow." The "instructions" in question are a sequence of the letters A, C, G and U... genetic code (specifically, RNA). And vellum is parchment made from calf skin...
* If you are agoraphobic, please stay on the line to make an in-person appointment at our national office in
* If you are a heavy user of public transportation: how many times have you experimented that what in theory was a shortcut (ie, taking the subway instead of the bus) becomes the opposite courtesy of
* If you are a high-ranked ruler (usually Grand-Duke or higher) the majority of your appointed commanders and your marshal will probably be landed nobles anyways, since rulers are usually better leaders than courtiers, due to better education, war or hunting focus and character modifiers.
* If you are a pre-90's kid, you probably remember Nancy Ekholm Burkert's illustrations of
* If you are a wizard, you have to be careful about making extended eye contact with anyone who has a soul. Otherwise, a Soul Gaze will be triggered, which exposes you to a visual representation of that person's soul and vice versa. Gazing into a sufficiently nasty Soul (or when using 'Sight', like when Harry 'looks' at the Skin Walker in
* If you are Depressive, it doesn't matter which button you press. No one will answer anyway.
* If you are dipping into Japanese pro wrestling, don't forget watching matches of
* If you are face to face with Lord Voldemort and your name isn't Albus Dumbledore (who is the one who HE fears), you either run like hell or kiss your butt goodbye. Let's just say that people are afraid to say his name for a reason. To quote Hagrid when he starts telling Harry about Voldemort:
* If you are forced to draw a card when there are no cards remaining in your library, you are "decked" and lose the game.
* If you are Imperial and wear heavy armour, Nord guards will remark that "
* If you are in a social network and you suspect that a user is a Spaniard or Latin American and they are pretending to be from another country, call them "Spanish", if they answer back with "I am not Spanish", they will prove that they are, in fact, Hispanic. Few Hispanics or Latinos know that the demonym for those born in Spain is "Spaniard" and not "Spanish".
* If you are intent on winning all of the swoop races, you will probably spend enough effort on them that you end up at a loss with the track fees, unless
* If you are on friendly terms with her, Ashley Williams will refer to Commander Shepard as "Skipper."

* If you are on the receiving end of prank calls, or other harassing phone calls, especially if you are fielding large amounts of them
* If you are playing the Human Noble origin, you will eventually go through the gauntlet to retrieve
* If you are Schizophrenic, listen carefully, and a small voice will tell you which number to press.
* If you are set on fire by the Pyro, your vision is blocked by 2D flame sprites. Good luck if you're playing as the Sniper.
* If you are smart enough to climb out of the main area of the Battlements level and
* If you are still confused as to whether something belongs here - if it was originally promoted on the basis of being artistic (anything from a big-budget blockbuster to an indie film), it likely does. If it was originally promoted as primarily to help the viewers have
* If you are the band Horion and you wanted to release an album named "No Fear Restriction", what you'd put on the cover to match?
* If you are the father or main parental figure of the protagonist, you are going to end up in the ground by the halfway-point of the game,
* If you are the Thane in a hold, you can sometimes get guards to look the other way in regards to some of your crimes, but you can only do this once. If you've done enough jobs to get Thieves' Guild influence in the hold, you can bribe a guard for half your bounty to make the problem go away.
* If you are trapped in another dimension (but you don't know which or how to get out), surrounded by the hostile forces of the Red Room, and
* If you ask any classic Mario fan which Mario game is the best, chances are they'll choose either
* If you ask any random person on the street across the English-speaking world to name a superhero, most could identify
* If you ask Apple's Siri to "open the pod bay doors", she will appropriately respond, "
* If you asked for Domestos in the UK, it's unlikely you would complain if the sodium hypochlorite based domestic bleach you were given wasn't Domestos brand.
* If you asked people who sang "I'm Going Down", most people would probably say Mary J. Blige, not Rose Royce.
* If you ask Sapphire to reveal her real name after joining the Thieves' Guild in
* If you attempt to enter their base without Veronica, the Brotherhood of Steel test your loyalty by fitting you with a bomb collar and dealing with an NCR Ranger that's set up camp nearby.
* If you attract Lord Clarmont's interest enough to earn an invitation to dinner with him during the first week, on the way there you're met with a secret test in the form of one of the Isle's servant girls. How you treat the servant when you think no one else is watching, and
* If you bake enough cookies, the news blurb claims that the universe itself has turned into cookies to the molecular level.
* If you befriend the Thraddash, they ask you for help naming their new culture. As above, one of the options is "The Glorious Slave Empire of
* If You Believe is over, she jumps and starts dancing. She keeps chanting multiplied and somewhat toned down "Yes! Yes! Yes! Yes! Yes!". She's kind of embarrassed when her new writer Tom Weller sees her. He thinks she's cute.
* If You Believe: — she works as an editor for a publishing house, he's a novice writer
* If You Believe, Susan's assistant Robin talks and talks and talks. Constantly. To Susan's great annoyance. Susan is an editor and calls it "run on sentences" in her lingo.
* If you believe the critic R.W. Stallman, this can occur after the fact as well. He insisted that Stephen Crane deliberately stated the wrong
* If you boil human urine, you can condense the vapor back into liquid. The liquid is just water. This is also how NASA keeps the astronauts hydrated in the ISS, as water is expensive and heavy to ship up to orbit.

* if you bring your own phone. If you buy a phone from them, you have the option of buying the phone outright, or paying it off in two years, which brings the bill up to what the bigger carriers charge for a similar deal.
* If you buy the free news report from Trixie's airship, she will throw the desk she was leaning on out of the airship by the end of it. Returning to the ground floor, you can use this desk as a platform to get over the poison joke, making the platforming at this part slightly easier.
* "If You Buy This Record (Your Life Will Be Better)", a song by The Tamperer, as one might guess from the title, parodies this trope.
* "If you buy this record, your life will be better, your life will be better, your life will be better. If you buy this record, your life will be better, if you buy, if you buy, if you buy. Fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fa-fabulous."
* "If you call before midnight tonight, we'll give you a special bonus!" Related to
* If you call the moogle who acts as your save point on the world map without saving enough times, he gets angry and threatens you, first by stating that he's "sharpening his knife, kupo..." before ultimately his dialogue devolves into
* If you call your support team (other than Campbell that is), they will
* If you can believe it, Team Rocket (at least Jessie, James and Meowth) saved Ash from falling out of a window in
* If you can consider it a face, a farmer in the US chopped off the head of a chicken but did it in such a way that just enough of the important bits of the brain were still intact, allowing the chicken to live practically headless for years.
* If you can find the single match the Toxic Turtles had in WWE (it never aired on television and WWE takes it down from Youtube when they find it), you can pinpoint an exact moment X Pac Heat kicks in. During their entrance and early in the match, the Turtles, who are playing the faces, are getting very mild cheers. Then comes a spot where one of their jobber opponents kicks out of a pin and the turtle pinning him lands on his back and flails around until his partner tips him back over. This spot turned the fans against the Turtles on the spot, and they booed for the rest of the match.
* If you can get Dracula to cross his eyes and hit the Start button while he does so, an animated picture of Fluffy the Vampire appears, and the player gets 20 points.
* If you can get in close, 'Flame Tanks' will absolutely incinerate buildings. These '
* If you can get up on a construction site, you'll have a pretty good sight of the city.
* if you can make out what Tara's saying (though to be fair, by this point it was a fairly common fan theory):
* If you can't figure out Mitch Conner's obvious riddles, The Coon will eventually just tell you where to go with a frustrated voice tone.
* "If you can't stand the heat, get out of... y'know, that aforementioned heaty place."
* If You Can't Take the Heat...", Owen sneaks past a hornet nest and steps on a rake. It pierces his foot and he doubles over in pain, his fall shaking loose the hornet nest. It falls right on top of him.
* If You Can't Take the Heat...", the Screaming Gophers trick Heather into the freezer and lock her up in there because she's bossing them around, and not in a way that'll make them with the cooking challenge. It's only after the challenge is over that Lindsay remembers to free Heather, who at this point is showing early signs of hypothermia.
* If you carry actual weapons on your avatar, none of them can be used. This is
* If you choose Jolee Bindo to escape the jail on the Leviathan, he will
* If you choose more than one girl to enter the "Keyhole" rooms to have sex with Takato, in the end
* If you choose the Human Noble background, your family's political enemies try to

paint our family as rebels and traitors. However, when you visit the Landsmeet the other nobles make it very clear that everyone knows your family are staunch royalists and the bad guys full of crap.
* If you choose to banish the Grimm Troupe at the end of their quest line, the Dirtmouth BGM is replaced with an accordion arrangement played by Nymm, who is apparently an amnesiac version of Brumm.
* If you choose to betray him, either for the NCR, Legion or for yourself, he'll ask you why you did it. You can declare your allegiance to the faction of your choosing... or you could bluntly tell him, "I don't like you." After you do the deed, his obituary, entitled "A Tragedy Has Befallen All Mankind", states that he was a man of incredible vision and genius that will likely never be replaced, recognizes him as the best hope for a prosperous future, possessed incalculable knowledge of several key subjects, and generally talks about him like he's a
* If you choose to escape with Yuzu on day 7 or fail to unlock any of the other endings, you are saddled with a shortened day 7, a rather anti-climatic final boss fight, and the knowledge that you have unleashed demons on the outside world.
* If you choose to retrieve the canister instead of saving Jess, and fail to let Gerry get on the boat, Jess will be the sole survivor in
* If you chose to murder your way through the game, he generally agrees that, yes, cybernetics DO eat your soul. If you were mostly pacifist, he states that cybernetics offer many new options, but also comes with a severe side of temptation to use those cybernetics as shortcuts. Whether or not those shortcuts are justified depends on the ending you choose.
* If you come across "chocolatey", though, that's not good for you — that usually means "cocoa-flavored lard".
* "If You Come to Me" is remembered for the music video showing the girls nude with animations of clouds and butterflies on their body. As they were quite modest for a
* If you commit a crime and then speak to a guard, you have the options of paying a fine, going to jail, or resisting arrest. Choosing to go to jail, depending on the game, either has an amount of time pass based on the size of your bounty or literally puts you in a jail cell with the options to try to escape or sleep in the bed to serve your sentence. In each case save for escape, one of your skills will randomly decrease as part of the punishment. (Simulating not using it due to being in jail.)
* If you complete Hollow Bastion before completing Monstro, Riku only says one thing in any of the cutscenes and does not help you during the first Parasite Cage fight. Riku only speaks one line before the second Parasite Cage fight, mocking Sora for not remembering his best friend. Sora calls him a liar, saying he's not the real Riku.
* If you complete "The Death of Chivalry" (a 6th Age quest) before "While Guthix Sleeps" (a 5th Age quest),
* If you complete the main quest and then join one of the factions, you'll still need to do that faction's beginner level quests while being treated like "new meat" by your new superiors and comrades even though you're a
* If you complete various DLC achievements, you unlock special equipment for future playthroughs of the main game, no matter what origin those playthroughs have. Meaning that the City Elf and Dwarf Commoner start out virtually skint, barely having two copper pieces to rub together, even though their inventory contains nearly 350 gold in dragonbone weapons alone. This equipment is also never taken away; even though the Dwarf Noble is arrested, found guilty, and thrown into the Deep Roads with sword, shield, and prison clothes, they won't confiscate the Orlesian-made high-grade leather armour, dragonbone axe, or magical stat-boosting belt (and indeed, if your Strength score is 20 or above the former will be donned automatically as soon as play starts).
* If you consider culinary arts, many animals enjoy human cooking, often more so than their own proper food. There are plenty of dogs that like pizza crusts, cats that like cooked fish and chicken, horses that like sugar cubes, etc. Absurdly, there are also

* If you consider Madison, the officially advertised protagonist and the one you play as most often, to be the main character, then this trope is zig-zagged. Near the end of Chapter 2, the
* If you consider Morgan the main protagonist, since she's the one who makes all the critical player decisions that determine the ending, the other bad ending sees Morgan perform a
* If you consider that umpires, for all intents and purposes, function more or less as baseball's lawyers in game-related matters:
* If you consider the Big Bad of each season as the character that causes the most suffering to the Scoobies, then Willow is the Big Bad for Season 6, hands down, being the primary cause of the majority of the suffering endured by all the Scoobies, including herself
* If you contact Master Miller during the duel against him in the first game, you'll get
* If you convince him to go back to taking lyrium (a highly addictive Fantastic Drug
* If you could get the resources together to build them, nothing was more awesome than tooling around with a squadron of battlecruisers (except possibly tooling around with a squadron of carriers). Trump Card: On certain levels, a squadron of battleships AND a squadron of carriers.
* If You Could Go Back... Not that that changes the end result - a new dictator arises and does the exact same thing.
* If you could prove it, you could sue, but the evidence is secret, so you can't. Even if you can prove that the government illegally spied on you, the feds will try to have the entire case thrown out on "state secrecy" grounds. Even if some of the evidence you have isn't secret. In evidence involving government spying, they can legally conceal the "sources and methods." All thanks to the Espionage Act.
* If you could really call him a "villain" per say, Pepe el Romano in
* If You Could Say It in Words complains that her degree only qualifies her to earn more degrees.
* If You Could Say It in Words is a struggling painter who longs for the opportunity to sell out, but nobody's buying. One scene has him listening to a series of messages on his phone about how he's behind on different payments.
* If You Could Say It in Words: Sadie's dad was in the navy. He resigned his commission when she was sixteen. The family then moved to Santa Fe, to Sadie's delight, as she'd lived next to the ocean her entire life and found the desert wonderfully strange.
* If You Could Say It in Words: Sadie's family moved around so much when she was a teen that it disrupted her education. She didn't graduate high school until she was twenty.
* If you count humanity as one deeply fractionated empire then we've already achieved this.
* If you count only his third-season appearances, Xellos starts out pranking them, then joins them to fight the apparent villain, then
* If you count the heroes as a group, it is also subverted. Goku is only average height, although he tends to be drawn a little taller in the anime. The tallest is Piccolo followed by Tien. As an adult, Gohan is taller than his father.
* If you deal with the Rachni before visiting this part of the station, the security staff (secretly under Benezia's employ) attack you, and it is implied that they killed the researchers and staff themselves.
* If you decided to side with the Templars earlier on and fail to defend the Great Hall by reaching 0 status (or dying), you are told that the Red Templars rampage across Thedas, killing or enslaving everyone and you are shown Ser Barris being executed by a Red Templar Horror.
* If you decide to go to the Hydra Marshes to get a cure for a poisoned Kid, the native Dwarves will defend their soggy homeland against you interlopers while belittling humanity for cutting down trees (on an island covered in forests with only two small settlements). They
* If you deem the Ravenclaw Quidditch team to be responsible for/compliant in

bullying your friend (Luna Lovegood)? Wait until the next Quidditch match, fly as close to a bludger as possible, then
* If you design a robot to lift things and make it only strong enough to lift empty boxes, then the only people that will buy it are people who need empty boxes lifted. If it can lift a couple of tons, then it has a lot more potential applications. Also, it's a general engineering practice to overdesign anything that might lift something over someone's head by a factor of ten or more as a safety margin.
* If you didn't figure out that he was never going to ease up on Spidey after
* If you didn't play Sega Saturn he would throw you so hard you would explode on contact. Twice.
* If you didn't take that one, there's still one more last chance, but this one is more meta.
* If you didn't take the bus to Calico Desert but need to take it back to Pelican Town, Pam won't be there to drive it. So
* If You Die, I Call Your Stuff: Making a claim of one's possessions when they're about to do something extremely risky.
* If You Die, I Call Your Stuff: People claiming other people's stuff in the event that the person might die.
* If you die in the cart minigame, you can watch an ad instead of paying Gems in order to continue.
* If you die normally, you scream and then collapse. If you get hit by the Phantom Hammer, your entire body instantly turns to dust and is blown away.
* If you die while attempting to escape the Envy Demon during Champions of the Just, you are told that it impersonates you and uses the Inquisition to conquer the world and destroy the Chantry.
* If you die with the bottle in your possession the demon carries you straight to hell.
* If you do actually win the battle, the situation is reversed; Lloyd is about to finish off
* If you do a quick search, you'll find websites solely dedicated to dating police agents and officers.
* If you do a search under the genre "Anime" and go under the subcategory "Kids & Family", you'll find DVDs of
* If you do Bastion of Twilight on normal mode, the final boss is Cho'gall, who was a fairly tough but doable boss. Beat his much more difficult encounter in heroic mode? The raid's not over, now you have to face the heroic-exclusive fight of Sinestra, a much more demanding fight.
* If you do choose a symbolic name, be prepared for it to quickly become either heavily ironic, or eerily appropriate. Case in point, don't name anything Icarus, because that myth involves him becoming too proud, flying too close to the sun, then falling to earth and dying as his wings melt. If your floating city or space colony is named this, the fate it meets is likely to be...
* If you do fail it due to this reason, the guild gives you another way in.
* If you do feel like eating some, like say scrambled pork brain, keep in mind that this type of food is
* If you do it badly, you lose the game and have to listen to a buzzer make an awful sound.
* If you don't agree with certain difficulty features, you can always toggle them in the options menu while in town.
* If you don't block Ulrich's sword throw attack, you're as good as dead. XANA-William tasted it. Twice.
* "If you don't [comply], we [The UN] will be very angry. And we will
* If you don't have Reraise or the Esper that grants it, the only other likely option is to use Rasp/Osmose to drain
* If you don't help him overcome his grief, he dies during the final mission.
* If you don't know just what it is—remember, boys and girls—DON'T PUT IT IN YOUR MOOOOOUUUUUUTH! ICK!
* If you don't know the story, it can be jarring to see images from "

* If you don't land there, it means that there is a bug. Go back to the page you want to edit, click on the button "history" and try the edit button there.
* If you don't shoot Weepy the Onion when he shows up, he disappears, and a radish appears in his place, which will attack you alongside Psy-Carrot.
* If you don't speak up, people won't hear you and/or they will make their own assumptions. You won't like them, and it'll always make a situation worse.
* If you don't take the above option, convince your friends to continue pursuing the truth
* If you don't think that Dante's motorbiking up the vertical walls of the Temen-ni-Gru was cool, your definition might be unnecessarily strict. The bike had
* If you don't tighten that loose bolt, we could lose the entire wing!
* If you don't want to forget your lotto ticket and potentially miss out on that jackpot, stop caring about your family.
* If you do the math for the hotel bill Porky got, you would realize that it should be $20 more than what was listed on the bill.
* If you DO think of fictional beings, they WILL become real eventually! Of course, this means that non-believers are safe to an extent, as they don't have enough "Mind Power" to keep these beings around them. But believers? They are likely to see, hear and feel them.
* If you earn high approval with Morrigan as a male character but do not romance her, she will comment that she literally did not know it was possible to befriend a man.
* If you eat the flesh of a Japanese mermaid ("Ningyo"), you don't exactly live forever, however, you'll live for a very long time (and not age), and your life will suck for the same reasons. As
* If you encounter a Shiny Pokémon, you can attempt to catch it regardless of where and when you found it. The chances of encountering a Shiny Pokémon are so unbelievably small (about 1 in 8000 for most games) that it would be a shame to not try and catch it.
* If you encounter monsters while one of Napstablook's mixtapes is playing, the monsters will get badly creeped out by the music.
* If you end up in Vivi's Salon and have the misfortune of accidentally picking 'manicure' for the treatment option you have to endure a very long minigame of having to avoid getting your hand lopped off by a meat cleaver. The tell for where Vivi is going to chop is unbelievably subtle and only appears for a split second. If you fail you watch as Lance's hand gets cut off and he collapses on the table from the shock.
* If you enjoy hacking, you can put Liberty Prime's Liberty Laser into your weapons inventory. At 1200 strength, it's about 20 times stronger than the strongest normal weapon in the game. This basically means that not only will anything you point it at instantly die, they will also turn into a giant mass of flying red chunks that shoot out for miles across the map.
* If you enter a pipe or Warp Door, and the exit is blocked off in some way, you get a brief animation of Mario trying to get through the other side before returning to the entrance. If
* If you enter one at zero rotation and at less than 50,000 km/h, you'll only travel a short distance to the next point. Entering faster jumps you further, but the destination is unpredictable on the first try: while exactly matching your original velocity and rotation gets you back, it takes until
* If you equip the Luminary with a costume that would cover his hands, the Mark will still appear and glow in certain cutscenes.
* If you equip the Soldier with the Tin Soldier set (a cardboard box mask, shoes, and pair of ventilation pipes) during certain times of the year in
* If you ever bring Geer'AH something that he dislikes (that is, any Beeboorat-related item that is not Valorin/Heroine, or some cirt from non-Beeboorat Larva), he'll get angry and take all your possessions, forcing you in a
* "If you ever bring that up again, I'll deny everything and I will not rest until every student in this building is convinced that
* If You Ever Do Anything to Hurt Her...: You're in for some serious pain should

you hurt my loved one!
* "If you ever find out what you're watching is a show within a show, sit back and hang on for the ride of your life." —
* If you ever happen to be walking in the woods (or in the suburbs, in some areas) and notice a bear cub that appears to be on its own,
* If you ever have a chance to find footage of it, it's always a hoot to watch the short-lived wrestling promotion
* If you ever hear the phrase "This is the BBC from London" when one of their channels suddenly stops regular broadcasting, someone significant has died (this will occur either as a result of the sudden death of a reigning monarch or another member of the Royal Family (the phrase was used on the death of Princess Diana, as described above), or the death of the incumbent Prime Minister) or
* If you ever wondered why a three hundred sixty five pound football player like
* If you ever work in technical support, expect to see this a lot. Many peoples are completely unable to properly describe a technical problem.
* If you examine a painting of Shadi in Pegasus's castle, Shadi himself appears and explains what happened in the backstory.
* If you examine some of the bushes, trees, and sentry stations you encounter in Snowdin, the narration will tell you that there are cameras hidden behind them. There's also one hidden behind a waterfall early on in, well,
* If you examine the heart you get to see it beating. And it's nightmarish.
* If you exist twice in the same time, you'll die. It's called shadowing yourself. You can't cross your own shadow and live.
* If you expand Down To The Last Play to include games where the comeback
* If you fail a Friendship Mission, all resources you spent to do it, be they badge bits; hero chips (later missions); or diamonds (which you can use in lieu of missing badge bits), will be refunded, so you don't lose anything except time.
* If you fail during one of the Poison Ivy missions, she'll lament the destruction of her plant, saying that
* If you fail the Snifit's guessing game in Shroom City enough times, Mario gets sucked into the lamp on the top of his tent along with Luigi, and the
* If you fail the tutorial mission, XCOM will be immediately disbanded.
* If you fail to complete the dungeon in time as you inevitably get yourself in a situation where you must change the heart of your target or face charges and certain jail time due to any violation breaking your parole, you're shown a sequence where you are
* If you fail to defeat Roy in a duel, you're put into a coma from the injuries, and your group forces Roy to take your place, but soon the army's overrun. "Perhaps it's a good thing that he won't wake up."
* If you fail to gain enough loyalty Zevran will turn on you as soon as he's given a chance to return to his previous life with the slate wiped clean of his initial failure. This is after he's spent the game playing up how shallow, self-interested and jovially merciless he is.
* If you fail to hit the Deplanetizer switch in time during last battle
* If you fall in battle, you are greeted by Charon, who offers to resurrect you for a fee of Macca or 3DS Play Coins. If you choose to pay in Macca, but don't have enough of it, he'll let you come back to life anyway, but if you die again before getting enough Macca to pay off the debt, you're treated to a unique sequence in which Charon notes that he can't revive you and has your soul thrown aside. You can also choose to not be brought back to life, but instead to wait in line like the many other (billions) souls. He then points out that you'll be waiting for eons, if not longer, to be resurrected, and come on, it's just a little money, right? If you still choose to wait, he tells you to get in line and the game ends.
* If you fall towards an open floor portal that you'd otherwise slightly miss, the game will nudge you towards it.
* If you feel a certain pairing is badly handled, that doesn't mean it's a case of this. If the pairing took a long time to build up and execute, it does not belong here, no matter how badly written the actual romance is. That's more likely a
* If you fight off the Ganados in the village before entering the house containing

the shotgun, Dr. Salvador won't spawn here. Don't go into the path leading to the next area, since he guards the door there. Also, fighting the second El Gigante is optional, although you have to fight a camp of Ganados and the "
* If you find a glitch and fall outside the boundaries of the level in
* If you find something dead, it may well have started rotting already. If it's suddenly dead but with no traces of injury, it can be assumed that it died from poison or some form of sickness that makes it undesirable to eat. While a human might stop to check the prey more thoroughly, many animal predators don't and leave it alone due to instinct. Dead, but not eaten, and I didn't kill it? There must be something wrong with it.
* If you find yourself singing it very slowly, it's because you've seen
* If you foil one event by scheduling another event at the exact same time, even if the reverse eventually happens, that's a
* If you follow the news regularly, there are many people whom you might recognize as "a politician", but if they're not the head of state, it can often be tough to recall precisely who they are and what their official function is. For example, the only member of
* If you garner high enough affection with Tifa and have her in the party when you meet Zack's parents, talking to her after she runs outside she will reveal how proud of Cloud she is for coming as far as he has.
* If you get a headshot on any mech, especially a YMIR mech, it will cause a large explosion.
* If you get a Triple Tech stone early on, you might notice that most of them can be equipped by any of three characters - except Crono. Since you
* If you get caught committing a petty crime in a city where the Thieves' Guild's influence is high, you can pay half the fine for guards to go away. Meaning it's possible to get away with picking a lock by paying two gold or get away with being seen picking a lock (and failing) with nothing but your winning smile.
* If you get Chrom and Sumia hitched via Supports, they're a gender-flipped example since
* If you get enemies to join forces to fight an enemy they would not have otherwise fought, that's a
* If you get evicted from the ball by reaching 0 court approval during Wicked Eyes and Wicked Hearts, you are told that Orlais was left leaderless and thrown in chaos, leaving both it and your Inquisition easy prey for the
* If you get infected with vampirism, you'll be dreaming about becoming one before the three days required to finally turn into a vampire.
* If you get laser eye surgery and stop needing glasses, you will still spend months looking for your glasses when you wake up, try to correct their position on your nose or pick up tissues to clean them.
* If you get long term payments but you need cash now, call J. G. Wentworth, 877-CASH NOW! (J.G. Wentworth Financial)
* If you get past the trans-dimensional science / magic amalgamation, this may or may not be what set off the plot of
* If you get repeatedly shot with an automatic gun, prepare to see nothing but white. And if there are two people shooting you? Forget about hoping to see. Standing too close to an exploding grenade will also cause a brief ringing sound to play, mimicking the effects of tinnitus.
* If you get someone placed in dangerous situations from something seemingly innocuous, that's a
* If you get the crazy idea of shooting the anagramming gun at its own reflection, it turns into an anagramming
* If you get tired of "swell" try "keen" or "neat" instead, but don't say "neat-o" or "cool" unless you're a beatnik.
* If you get to a point where you cannot reasonably complete a puzzle, some text will pop up on screen saying "hold X to reset", which puts the whole puzzle back to how it was.
* If you get to the end of Chihiro's Free Time Events, Chihiro will ask Makoto for the name of a "strong guy."

* If you get your enemies to mistake innocents for your minions, that's a
* If You Give a Mouse a Christmas Cookie, just after Mouse sneaks a bite of the cookie left out for him. He leaves Mouse and Oliver's presents, and then Mouse hands him the cookie.
* If You Give a Mouse a Cookie, arguably Laura Numeroff's most famous work, begins with the mouse being given a cookie, and asking for various other favors until the end, where he wants a cookie again. Numeroff herself described it as a "circular story."
* If You Give a Mouse a Cookie, Dog is scared to sleep after having a bad dream. His friends try to help him out and also relate their own bad dreams. These include Pig's dream about a being forced to sign way too many autographs after a ballet performance until she becomes exhausted, and Moose's dreams about being unable to find matching color antler mittens and not having enough honey for his blueberry corn muffin.
* If You Give a Mouse a Cookie is about the chain of deals that will result if you do what the title says.
* If You Give a Mouse a Cookie, Mouse is invited to test toys at a toy factory by the owner and is allowed to bring his friends along as well. As they're headed there, he gushes about it, but Pig tells him not to get too excited and starts to say "It's probably just a—" but then cuts herself off as they arrive at the toy factory.
* If You Give a Mouse a Cookie, Mouse tells Moose that the can be a reliable Lovey-sitter for him. He then says that if he's going to be a reliable Lovey-sitter for Moose, he first needs to know what "reliable" means. Oliver tells him that "reliable means that you're someone Moose can trust to keep Lovey safe."
* If You Give a Mouse a Cookie, Mouse tells Oliver that their new float is really noisy.
* If You Give a Mouse a Cookie, Oliver and Mouse find a tiny toy telescope at the bottom of their cereal box. Oliver gives it to Mouse, who is inspired to create a pretend galaxy.
* If You Give a Mouse a Cookie tells "you" all about what will happen if "you," well, give a mouse a cookie.
* If You Give a Mouse a Cookie, the eponymous mouse spends the entire book speaking to demand a variety of things.
* If you give Homestar Smarties in "The House That Gave Sucky Treats", he'll say "Marzipan said to eat lots of these this year. I'm not really sure why, though." Cue an awkward silence punctuated by crickets.
* If you go and read the item descriptions of some of Talion's items from the past (mainly Ioreth's Embrace, a cloak from his wife, and Acharn, half of his son's broken sword) after completing several of the Nazgul missions, they will change to reflect that Talion is losing his memory of Dirhael and Ioreth. Ioreth's Embrace is changed to Dark Embrace, stating that while he can still remember it is a memento from their anniversary, the days are rapidly becoming more distant. Acharn, meanwhile, when fully upgraded flatly states that its original owner is long forgotten.
* If you go back and reread the Chuunin Exam arc again, it's exceedingly obvious that Gaara was never meant to be a jinchuuriki — the concept of jinchuuriki didn't
* If you go down too deep, that oxygen tank on your back won't do you any good. Water
* If you go through the files in Nick's office one of them talks about the
* If you go through the quest to obtain his freedom, and then release him from your own command (either immediately, or by removing him from the group), he returns to Parnell's. Admittedly this is part of the game's programming (every party member will eventually return to where you found them, if removed from the group), but it's interesting nonetheless.
* If you go to Lake Macalania during Chapter 3, you'll get the Berserker Dressphere from an Al Bhed man who dies in the fiend attacks. When the player ports back onto the Celsius from this, if you talk to Rikku, she won't respond.

* If you go to the Legion fort, you can find little boys training to be full-on legionaries. It's horrifically implied that those children are expected to enter combat very soon, what with the battle against the NCR over Hoover Dam on the horizon. Keep in mind that, in the NCR, troopers can sign up to join the active military at 16, and they still consider Legion troops abnormally young. Chief Hanlon says that any legionary who survives 10 years is considered an exceptional veteran, as many,
* If you go to the Settings menu and hit the "Super Secret Settings"-button, a filter will be placed over your character's view. Clicking the button multiple times will cycle you through the filters. Some filters are barely noticeable and might even look nicer than the base game, others disrupt your view so much they make the game nigh unplayable.
* If you had a nickel for every time Superman has crashed through a wall into an unsuspecting foe, you'd be a rich man.
* If you hadn't been spoiled by the trailers, the DVD covers, or the DVD menu, the first half-hour of
* If you hang around the Luteces after they've finished their first speech, they'll eventually tell you that it's pointless to wait around for them to leave, but they'll
* If you happen to be standing where the trap door to the next level is supposed to spawn at the end of a boss fight, it won't open until you move off of it, preventing you from falling through to the next level and missing whatever items spawned.
* If you happen to come across Chester, a ventriloquist dummy dressed up in a business suit in
* If you happen to crawl over sea lice, they will get inside your kit and slowly consume your spare rations. You can shake them off by cycling through your gear.
* If you have a gift card, chances are the fine print will tell you that a monthly "service charge" will be applied to your credit starting a year from purchase, except where prohibited. California is one state that prohibits retailers from slowly eating away your unused credit. This particular aspect of the trope is also becoming
* If you have a large collection of drawers, you might need a few drawers to store them in. Invest in a chest.
* If you have an adblocker and attempt to use Hulu, you'll get a notice demanding you turn your adblocker off or else the video won't play correctly (generally it will still play, but instead of ads you get black screens for the amount of time the ad would have run for)
* If you have a Nervous Disorder, please fidget with the Pound Button until a representative comes on the line.
* If you have an impossibly competent character with a cool back story and an idealized personality, and they manage to be
* If you have an untied lead, do NOT wager everything, no matter what. Leave at least $1 as insurance, because of the rule that a 3-way $0 tie is a triple loss (as opposed to a triple win for a non-zero tie).
* If you have a spare stocking and a few blunt objects, you might as well
* If you have a vitamin D deficiency (while rare), this can actually happen a lot more easily as your nails become brittle.
* If you have been ambushed and mugged at night, you can never quite get over the feeling that somebody is ready to jump out of the shadows behind you. Hell, even if you
* If you have Bi-Polar Disorder, please leave a message after the beep. Or before the beep. Or after the beep. Please wait for the beep.
* If you have demons in your DNA (whatever that means), you can learn an infernal power, Tongue of Babel, that allows you to comprehend and speak any language, permanently.
* If you have ever seen an anglerfish, it was a female. Male anglerfish are tiny and have no role in life other than to find a female and latch onto her, becoming an appended symbiote that exchanges his sperm for her blood. Over time, the male

will gradually dissolve into the female, leaving only its still-functioning testicles behind.
* If you have ever worked at a store that sells perishable food, chances are you've encountered this at least a few times.
* If you have forward momentum, jump down as little as six or seven feet, you'll put at least one hand out to help slow your landing. Try it by running and then jumping down about a dozen stairs — though for safety's sake, try it with smaller numbers of stairs first so when you land badly and fall, you won't break yourself.
* If you have less than two spare batteries for the camera when you die, you'll respawn with a full battery in the camera and two more in reserve. This way the game never becomes
* If you have low self-esteem, please hang up. All our representatives are too busy to talk to
* If you have multiple children who are capable of speech, odds are this will ensue. Even if they are incapable of speech, they will find a way to do this. Bickering trumps all obstacles.
* "If you haven't found any Communists in your back yard, you're not looking hard enough!"
* If you haven't grown up on or near a farm, you may be surprised to see sheep with long tails,
* If you have short-term memory loss, please try your call again later.
* If you have taken a web design class, chances are that you've familiarized yourself with HTML (Hyper Text Markup Language)
* If you have the 1 hour preview pass of the FOX Sports app and live in Ohio, expect to see an ad for FOX 8 Cleveland every commercial break even if you live no where near Cleveland(like Columbus Ohio). The ad is a parody of the Full House intro starring Bill Martin and Tracey McCool, and on 1 commercial break, it played as the only commercial and played 5 TIMES IN A ROW!
* If you have the cheat console, typing "Dancedancemalak" before the final fight activates a cutscene where you turn Malak into a Twi'lek dancing girl and boogie together for a few seconds.
* If you have The Frozen Wilds DLC, certain dialogues in the main story missions will change depending on whether or not you completed the DLC missions, and vice-versa.
* If you have the Key, you can use any door with a tumbler lock in this manner in
* If you have the right items, you can turn yourself into a small cute frog, rabbit, dog, etc. in
* If you have the "Spoils of War" game rule turned on, you can steal technology when you conquer an enemy base. Again, this applies whether the conquered base belonged to a human or Progenitor faction.
* If you have watched a crime drama since the mid-noughties, chances are that you have met Sicilian-born Ivo Nandi at some point, playing an Italian, French, Russian, or any kind of Hispanic character. The only thing the roles have in common is that they are foreign-accented and
* If you have Wendy edit the Meteor's manuscript, you can send it to the publisher to get it a contract and present the contract to the Meteor to get a different ending
* If you help out Moira with her survival guide research and return to her with over 600 rads of built-up radiation, she accidentally
* If you hide from Skolas instead of fighting during your battle with him in the Prison of Elders, he'll make various comments in Fallen language such as getting annoyed at you for hiding or thinking that you've run out of ammo.
* If you hold down the Home button instead of pressing it, you'll get an abridged system menu where you can put the console into sleep mode, airplane mode (if the Switch is in portable mode rather than docked), and system volume. The last setting would be useful if you don't wanna fuddle with the volume buttons (especially since they're next to the power button, which can be easy to press by mistake in a dark environment),

* If you ignore the catastrophic environmental damage, collapse of many state governments, tension between those that are still around... Humanity has learned to fight off the zombies and many people have overcome their differences to work towards rebuilding, but there's the implication that it may be too little too late, especially considering the Holy Russian Empire's freely admitted ambitions of outbreeding and conquering the west.
* If you immediately asked how they go to the bathroom, the suit canonically includes "recyclers", which can recycle body waste into a nutrient rich form that is fed back into them intravenously or as an edible, bland paste. Yes, their armour turns their
* If you increase the power output of a microwave, it will take less time to cook something, based on the principle of how they work. However, you only need to worry about this if you're using a commercial microwave (in convenience stores), which are way more powerful than home microwaves; and if used improperly invariably under or over cook one's food (or occasionally: both at the same time, if it's an item with multiple layers such as a burrito. The reason these items call for low power and longer cook times is that the innermost layers have to cook via indirect heat from the outer layers). There are also some microwaves that are lower-power than standard home microwaves; these are typically the small ones you see sitting on top of a mini-fridge in a college dorm room. Many frozen foods will list a second, longer cooking time to use in these low-power microwaves.
* If you infect the water supply with the Modified FEV, it is implied that it will eventually kill everyone on the planet, not just the mutants and corrupt humans in the Wasteland. If you purchased and installed the
* If you injure the present version of someone, the time-travelling-from-the-future version of the person will immediately show the scars. However, all events involving the future version up until the point the present version was injured continue to have happened as if the injury had never occurred. So you can cut off a present versions legs to stop the future one from escaping, and the future version will immediately fall over in a location they never could have reached unless they had legs up until a few seconds ago.
* If you investigate his house, there's lots of notes that indicate that he's been spying on them and the PC for a while. Also, from the second he first sees you in Skingrad, he follows you everywhere so there's no escaping his quest unless you run everywhere you go. He even follows you into the Mage's guild and your house, if you've bought the one in Skingrad.
* If you just lost a huge chunk of health, blood vials will restore more of your life bar.
* If you keep Chris alive to the end (also resulting in him and Ashley having a
* If you keep clicking on the first non-italic, unbracketed link on any page of the
* If You Kill Him, You Will Be Just Like Him: A character wants to kill someone who has wronged them. Their friends try to talk them out of it on the grounds that killing their enemy would make them just as bad as their enemy.
* If You Kill Him, You Will Be Just Like Him: Having to choose between killing a villain or sparing him.
* If You Kill Him, You Will Be Just Like Him: Killing the enemy makes you as bad as they are.
* If You Kill Him, You Will Be Just Like Him that Piccolo got, whereas in the original Japanese, Goku does so only because he found the fight with Vegeta exciting and wanted to fight him again even at the risk of the Earth's safety, which he openly admits is a selfish desire.
* If you kill the thresher maw in Grunt's loyalty mission, Wrex remarks, "Next you'll tell me he's a quint and craps dark matter." "Quint" presumably meaning having
* "If You Knew Susie", a song popularized by Eddie Cantor in 1925: "I have got a sweetie known as Susie/ In the words of Shakespeare, she's a wow!"
* If you know Easton Corbin's "Are You with Me" at all, it's most likely through the remix by Belgian DJ Lost Frequencies. While Corbin later tried to popularize on

the remix by releasing the original version as a single, this did not pan out as well.
* If you know that ZIP actually stands/stood for "Zone Improvement Program" (which is why it's "ZIP Code," not "Zip Code"), it's still pretty clear, but most people who know that are old enough to remember zones outright.
* If you know the Brontes were from Yorkshire the joke is still funny but the chosen accent jars a bit.
* If You Know What I Mean" could be considered a form of aside glance to the reader.
* If you lacked 3D rendering skills, this was what you were reduced to doing for custom maps with custom creeps in Warcraft 3's World Editor. The game itself gave you some flexibility in changing their sizes and tinting them different colors, but apart from that you had to work with what was shipped.
* If you learn Latin, be prepared to see the "Latin grammar correction" scene from
* If you let him, Niftu Cal tries to engage the mercenary Captain Wasea in one of these. Unfortunately, since Niftu Cal is a) a Volus merchant with absolutely no combat experience pitted against an asari commando
* If you let Qara talk to the Caretaker at the Mages Guild, he'll insult her by calling her "that tavern wench who cleans tables at that dive in the docks district." If you choose the "Hey! The Sunken Flagon is not a dive!" response, Qara gets cross that you care more about the tavern's honor than hers.
* If you let the game run without pressing start it plays through the beginning bumper, too. The bumper is pretty much like the trailer.
* If you level up your pickpocketing skill to 100, you can get the Perfect Touch perk, which lets you steal people's equipped items. Like their clothes.
* If you lied about your outfit (or changed clothes after the phone call), then Papyrus assumed you were telling him the truth, so he lied to Undyne on your behalf—and
* If you lie to Summer in the bar at the beginning of chapter 7, Summer will get discouraged and check out of the hotel before the night ends. Dunning thinks Kyle had something to do with it because he overheard Summer's mumble of wishing he never talked to him, but instead of kicking Kyle out, he will tell him to not worry about it since he was sick of Summer anyway and drags him to the bar where he spends the entire night drinking with him.
* If you like association football (soccer in the US, Canada, Australia, and a few other places), please be reminded that there isn't a world championship. You have to call it the FIFA
* "if you like small fruit... or even a big one!" and "can I say hard cheese on television?"
* If you listen carefully, Aida actually holds out "torn" for a while right before that note.
* If you listen through the credits, a little girl starts singing a creepy song- "Who's playing hide and seek? Won't you come play with me? Who's hiding in the dark? Come out, come out, let's play again..." The words aren't much until you hear the tune.
* If you listen to the commentaries, they explain that they did that on purpose because if you shoot a helmet-wearing bad guy, you simply have to show shattered glass flying off, as opposed to blood when the foe is without helmet. That way they prevented a higher-age rating because of the bloodless carnage— which doesn't make sense when you realize that the movie is rated "R" and depicts someone's face being sliced off, but then,
* If you listen very closely during all the times that Ishigami heads home early in season 1, you'll faintly hear the cheer team practicing in the background. This most likely played a role in his decision to join in the sports festival arc.
* If you live anywhere in the US, you cannot escape the Amazon "I Need You" ad. It's played way too much, and it's advertising a product made by a company that is currently in the middle of scamming people.
* If you live in America, you might be aware of your state's date of founding, origin of name, capital city, official state flower, state animal, state rock,

state vegetable (yes really), etc. Now they've come out with state quarters, which contain some symbol significant to the state in question on the back.
* If you live in Arizona, chances are you've felt the pain of seeing an awesome contest with tons of gear for the winner - but the fine print will say to the effect that the contest is not open to you, a resident of Arizona. The gaming magazine
* If you live in Malaysia, you'll still hear this a lot on radio commericals even to this day. Some of the laughs even sound forced and creepy, and ventures into scary territory!
* If you live in Southern California, you don't give these a second thought. They're the predominant brand.
* If you live in Wisconsin, local ad blocks tend to follow a set pattern of "HOM Furniture/Local Advert/HOM Sleep Express".
* If you'll believe it, a group of teenagers did a shot-for-shot remake of
* If you load the music notation software Dorico without installing instrument libraries first, it defaults to a loud, ear-piercing instrument called Dorico Beep, which
* If you look at a map of the United States where all counties are colored based on who they voted for president, using the standard red for Republicans and blue for Democrats, the map will often be
* if you look at it. The only way to survive it is avoid eye contact with its face at all times. The second you look at it, you're dead.
* If you look at Morgan’s feet during the intro helicopter ride, you see they’re tapping their feet to
* If you look at the comment sections on pretty much any of Low Roar's songs, you can guarantee that 99% of the comments will be about
* If you look at their pre-anime timeline flashback episodes, Jessie and James are pretty serious. Even when they became goofier/more open toward each other and friendlier toward each other, they were good criminals. Though, soon after they met Ash... they became the "lovable losers" that they are today.
* If you look at the outskirts of the national airport Schiphol on satellite pictures you can spot the remnants of a never created road stretching along the southern edge westwards right through the city of Hoofddorp. The only true proof that you can see on the ground is a rail bridge crossing the non-existing road, some obvious gaps in dykes, and a ditch.
* If you look closely during the final boss of the first game, you'll notice that
* If you look closely in "The Reynolds Pamphlet", you can see someone give a pamphlet to a disappointed-looking Phillip.
* If you look closely on the cover of the SummerSlam cover described above, you can actually see Daniel Bryan brawling with
* If you look closely, you can see she wears an otter-fly brooch on the front of her top, one of her favorite cuddle-buddies.
* If you look in the basement of Black-Briar Manor, you can find an unsent letter from Maven to the head of the Dark Brotherhood complaining about the lack of response to her performance of the Black Sacrament.
* If you look only at the original four Warmachine factions, they mostly follow the standard for 4 Factions: Cygnar (Cannons), Khador (Powerhouse), Cryx (Subversive), Protectorate (Balanced). Specific models and units within each faction will break the standard, but overall they fit fairly well. With the addition of Retribution of Scyrah in Mk. II, the faction calculus changed a bit to follow the 5 Faction standard, with Cryx becoming The Horde and Retribution becoming the new Subversive.
* "If you look up the word "nerd" in the dictionary, you're liable to find Leisure Suit Larry's picture as a definition." —
* If you lose in battle to either the Fetish Dolls or the nameless inn wraith, then they won't just kill you straight away. Instead, you’ll get a small scene showing Catie’s
* If you lose the "Revenge of the King" game, Strong Bad's fate is to be slowly lowered into

* If you lose to Papyrus, you survive with 1 HP and he locks you in his shed, which is
* If You Love This Planet, was suppressed by the U.S. Department of Justice in 1982 as "foreign political propaganda". The move backfired, causing a storm of protest that helped the film win the Academy Award for Documentary Short Subject.
* If you make a bicycle lizard run, it will eventually move fast enough to create this effect.
* If you make a rude gesture at Mountaineer Pebblebitty (which you are likely to do, considering what she puts you through), she has an appropriate response ready.
* If you make enough money this could be a discredited trope, given how easy it is for the super-rich to sidestep tax or to "minimise their tax burden" by registering as citizens or companies in tax havens - usually microstates that would be Third World backwaters if not for their banking and financial centres. British governments have also been notorious for brokering "sweetheart deals" with big companies that make a significant amount of money in Britain - here the Inland Revenue actually
* If you make it through the fight without losing anyone, an ally suggests a possible
* If you make it to the first room of the Dark World in under eight minutes, there will be a special item there called the Wrist Protector. Obtaining it allows you to skip past all cutscene text quickly by holding down a button. The Wrist Protector also doesn't take up any inventory space. So if you're going for a
* if you manage to ally with the Spathi, they study Earth's slave shield and intentionally duplicate it on their own world. The Spathi really only want to be safe.
* If you manage to collect seven hidden jewels hidden in each main level in
* If you manage to disarm one (preferably before you stumble into it), you can pick it up and then set it somewhere else. However, they both take a while to set up (meaning that you usually can't use them vs. the enemies already aware of your presence, unless you spam Elbereth beforehand), incur a minor alignment penalty for Lawful characters (which can theoretically lock you out of your class quest until you fix your karma), and weigh a lot. The latter means that you'll often have to abandon a lot of potentially-more useful stuff like potions, wands or extra arrows/throwing daggers/darts to avoid becoming Burdened or worse, Stressed, which slows the player down and makes them easy prey for tough enemies like soldier ants in the early game and mind flayers in the mid-to-late game.
* If you manage to get the UN Charter repealed by the Council, then it is no longer considered an atrocity to nerve-staple people or use nerve gas on civilians.
* If you manage to load save files will chastise the player for "cheating" and then send you back to the menu.
* If you max her Social Link, 7-year-old Nanako will attempt to make a
* If you melee a bicycle, or otherwise find a way to flip one over, it will smoke for a few seconds and explode.
* If you mention Galileo Galilei, many people may think you're quoting from
* If you mess with Tinkerbell here, don't expect her to act by proxy via the Lost Boys or the mermaids: she'll knock you off and pin you to the wall with a knife or a poisoned stick at your throat.
* If you miss the QTE in the tutorial, your character misses a jump and falls to their death. Craig then comments that he though you were going to do a sick jump.
* If you need an impossibly impractical (but awesome) weapon to take into battle, there are now
* If you need another example of his reputation in the fandom, keep in mind that the Official Nintendo Magazine (the UK one) nearly always uses Serebii.net as a source for their Pokemon news. Serebii/Joe Merrick himself also often ends up writing for said magazine, so you've got a situation where a fan is well known enough that the official media for the company uses his work as a source themselves.
* If you need to buy some items but use up your stock of Shop Calls, you can go to the "WELCOME" sign on Route 5 to have the shop appear for free.

* If you neutralized the outlying Eclipse camps before reporting to Sona and Varl during the "Revenge of the Nora" mission, Varl will mention it and express his amazement at Aloy's capabilities. Sona is less impressed, though.
* If you offer the rebel mages a full partnership, Cassandra will defend your actions when your advisors ask you what you were thinking, and if you talk to her afterwards, she'll say she doesnt disapprove and respects that you made a decision when necessary. In-game, however, she
* If you pause the game, though, enemies are not drawn. So if you see bricks disappear...now you know.
* If you pay attention during Mutavore's attack on Sydney and happen to have a map handy, you'll notice that a big chunk of the city would be on the
* If you pay attention to the stills of Edgeworth in 1-4 and 2-3, he seems to favour the longcoat as well.
* If you pay attention to those Shakespeare advertisements, notice that the elcor reading the play
* If you pay close enough attention to the globe, the vectors completely miss
* If you perform a Suplex on a dazed enemy with less than 15% health in
* If you pick Lord Harrowmont as the new king of the dwarfs, Prince Bhelen, and some of his supporters go hostile, and try to kill you and the newly crowned king.
* If you pick up a comic book, you might notice two recurring characters in the form of a ginger man with glasses and a goatee and his stockier, black-haired friend. They’re usually cops, but they’ve also be seen as everything from civilians, party-goers and common crooks, and are always seen together. The kicker? They’re found in Marvel, DC
* If you pick up an item in the shop but figure the price tag is too steep, then you can always blow up the shop, right? If you touch the merchandise, walk out, and attempt the Ballistic Discount technique above, then you will be shot the moment you light the bomb instead of when you throw it into the shop.
* If you piss off the humans or elves enough to start a war after letting their guild representatives wander through your fortress, they avoid any traps said representatives have seen.
* If you piss off your god enough to try smiting you, and then survive their
* If you plant an orc spy in an enemy fortress, their clothes revert from the blue used by allies to the red ones Sauron's army uses.
* if you plan to sleep soundly tonight) actually latches on to a fish's tongue and causes it to shrivel up and atrophy. The crustacean then clings to the stub and serves as the fish's new tongue in a manner not dissimilar to a corporate takeover.
* If you play a male character, there are hints that Atris was infatuated with the Exile. Especially apparent when the Handmaiden returns to her late in the game, and in a fit of jealous rage Atris will attack her with Force Lightning, spewing accusations about the Handmaiden's feelings for the Exile.
* If you play as a thief, you start out with a lock pick in your inventory. If you type "pick nose", the hero will stick the lock pick up his nose and die, and you will get a game over. However, if your lock-picking skill is high enough, you will get a message that says, "Success! Your nose is now open!". Later games have the game reply "Success!" with the same sound effect the player hears when picking a lock.
* If you play as Christian the Holy Roman Empire and the Byzantine Empire will fill the role of the
* If you play neither a Muslim, nor a Christian character prepare for a
* If you play on an iPhone or iPod Touch rather than an iPad, the markers will be made slightly larger relative to the screen.
* If you play with the optional "shoot the sun" rule (take every trick to get a doubled version of "shooting the moon"), you have the most potent version of this; while it's possible to recover from watching another player "shoot the moon" early, it's almost impossible to come back should an opponent "shoot the sun" (unless you're playing to a score other than the traditional 100).
* If you poke around some Christian bookstores and church thrift shops, you can find T-shirts that proudly declare your sincere, deeply-held conviction that "

* If you prefer to believe the Doji actually have genders (they are supposed to be robots) then Ultimo, Desir, Jealous, and most especially Sophia and Service all count (the former for his feminine name, and the latter for being a
* If you preordered either you would get a pretty Ho-Oh or Lugia figurine, same as in Japan.
* If you present Mia's autopsy report to Gumshoe, Phoenix says how unusual it is for a newbie lawyer to take on two murders in a row.
* If you pretend to be your own twin as a disguise, even though you don't actually have a twin, that's a
* If you pulled the lever at the right moment, the trolley would derail and grind to a halt.
* If you purposely yield to a powerful enemy because it benefits you more to do so, it's a
* If you question your orders to sabotage and rob a charity art exhibit, the quest-giver reassures you that it's a
* if you ran up against a Romulan who then used their cloaking device, the game superimposed a "travelling matte" over the ship. Turn your contrast up on your monitor and you could see the black splotch that was supposed to hide the ship.
* If your bowels are not moving regularly, have a bowl of high-fiber cereal.
* If your character is a Priest, your patron god can be Kelemvor, the god of death in
* If your characters are strong enough and you know what you're doing, you can actually finish fights faster with fighters than with mages, it's simply harder to pull off. They have
* If your college basketball team is being bombarded with "N-I-T!", it means you're probably going to be qualified for the infamous National Invitation Tournament, which consists of 32 teams who failed to reach the NCAA tournament. Being in this tournament (which used to be as prestigious as the NCAA tournament is today, but has since devolved into March Madness filler for
* If you're a dad, call your teenaged daughter "Kitten" and your preteen son "Sport".
* If you read into it a certain way, the Devil is just fulfilling her role in the grand cosmic design.
* If you read some of the descriptions, you will find out that they don't entirely start from scratch. The gauss guns are using the same technology as plasma guns from the first game (i.e. generating focused magnetic fields). They just use human-made materials (those gauss weapons are
* if you really get Moe going during testimony, the judge will punish you for doing it.
* If you really need to go through an interior door, and aren't too worried about damage, there's an even easier way on most modern buildings with wooden or metal-frame construction (the vast majority of modern homes, and many commercial buildings): punch a hole in the wall next to the door. The door may be solid wood with a solid lock and good hinges that will resist kicking and take time to break down, while the wall next to it is probably just two sheets of thin drywall screwed to the wall studs. Make a hole, reach inside, and unlock the door.
* If you really want to blow your mind, the fundamental unit of quantum computing is the qubit, which can be in a superposition of zero and one.
* If you really want to push it, Buffy and Angel had shades of this. As
* If you're an evil race of robots, what's the first thing to do after subjecting humanity to a nuclear apocalypse? Round up the survivors and put them in "farms" to produce your
* If you're a production assistant in television or film, you do this and stuff like it. If you do it well, and they like you, then you get to sit in on meetings and stuff and maybe are allowed to pitch ideas and move up the ranks.
* If you're a radio listener in Ohio or Kentucky of the United States, there's a good chance you may be familiar with the "Phantom Tire Buyer with a Secret Identity" from ads for Tire Discounters.
* If You're Armed and at the Glenmont Metro, Please Shoot Me: Thanks to a drug

vastly slowing his perception of time, a man trips and falls down the escalator in a metro station. He feels centuries glacially pass in the span of just a few minutes. Just blinking leaves him alone in darkness for decades. The constant pain of a dislocated shoulder, combined with the sheer boredom, drives him to try throwing himself in front of a train. He'll be waiting millennia beside a bench for it to arrive.
* If you're a second- and/or third-generation wrestler, expect a little favoritism.
* If you're at a circus show, you hear the band suddenly strike up "The Stars and Stripes Forever" and it's not the 4th of July, expect to be ushered outside as fast as possible. Circus tradition is that this music is played
* If you're at the mercy of a stronger foe, but stay alive by keeping them amused, that's a
* If you're a woman withholding sex to manipulate your significant other, that's a
* If you're Catholic and don't take your religion that seriously, and like vampires and werewolves, then
* If you recline the seat while the van-driver is driving, he will lose control of the vehicle and crash anyway.
* If you're creating a character with the Dwarven Commoner origin story and try to remove the facial brand that signifies that your character is casteless, the game will ask you to reconsider having one for roleplaying purposes. You don't have to have one, but in the game's universe, you do. Same goes for the Dalish Elf origin story, as their facial tattoos are given to them as a
* If you're dating someone, particularly one of the more reserved characters, the player can often get them to say something uncharacteristically sentimental and they'll blame it on you being too cute and distracting.
* If you're defeated on a campaign stage, it'll cost only a sixth of the energy a successful run would.
* If you're ever having a bad day, here's something that should make you feel better: Go to the drugstore and buy a Johnson & Johnson rectal thermometer. Bring it home, go into your bedroom. Close the door and lock it, close all the windows and draw all the curtains. Open the box.
* If you're familiar with Japanese legends, you may recognize this as a possible allusion to the tale of
* If you're familiar with other UNICEF ads, you probably won't be surprised to hear that they seem to have quite a thing for this trope. In particular, their collaborations with other studios/animators often employ this:
* If you're going from Android to iOS, you may end up trying to press a nonexistent back button at the bottom of your device. Likewise, if you're going from iOS to Android, you may reflexively hit the top left corner of the screen trying to go back inside apps.
* If you're going into the funny pages, Charlie Brown learned that the demon of heartbreaking sports losses can attack
* If you're going through an office, any desk, office or cubicle which contains significantly more objects than normal will belong to a character important to the plot in some way. This also tends to apply to houses in
* If you're going to buy explosives, lunatics seem a natural starting point.
* If you're going to come back to your arch-nemesis' place with a gun, be careful where you point that thing...
* If you're going to get the Man-Emperor of Mankind to go on a rant, in
* "If You're Gonna Play in Texas" is about regional preferences in country music, as expressed by a fan during a show.
* If you regularly steal someone's lunch, don't be surprised if they feed you something gross one day. Especially if you have any severe food allergies or the person you're stealing from uses chewing tobacco. Or you might discover that
* If you're having a heart attack or think you might be having one, be sure the aspirin you take is Bayer brand aspirin. Presumably aspirin from any other brand will kill you.
* If you're in charge of a one-party totalitarian state, not a multi-party

democracy where selling policies to voters is essential,
* If you're instructed to find something on a planet, and don't know
* If you're interested in how to lead a populist religious movement and in general create a world changing social movement, just pick up a copy of
* If you're in the US (or another country that doesn't provide universal healthcare), pay insurance companies on the sly to cover your brand-name medication, and
* If you're just short of the amount of money needed to purchase something, sometimes the dog shopkeeper will give you the item anyway.
* If you're looking at playing the Payload Race mode, expect to spend a LOT of time at Hightower. It's gained a following similar to that of 2fort above, due to the tendency for matches to drag out for incredibly long periods of time due to the goals being right beside each other, and two chokepoints which both require the attacking team to push the cart uninterrupted for a fairly long stretch.
* If you're looking for a person example, Numbuh 2 would be the man. You just have to get past his
* If you're not American, is better on DVD for the simple reason that the episode
* If you're not from the Fire Nation, Sozin's Comet counts (it comes approximately every 100 years to magnify Firebenders' power and allow them to do more world-dominating damage than usual).
* If you're on Sakuya's path then you can be invited to a party which is literally crashed by
* If you repeatedly try to have your main character do something they cannot do (e.g. open a locked door) they will call you out on it.
* If you're playing for free, you're quite restricted. You have to earn tokens by logging in daily and playing against people, and the packs you can buy with Tokens are watered down — you get five cards instead of the ten you'd get in a normal pack, and the cards cannot be traded with other players.
* If you're playing Paranoia and think that Bouncy Bubble Beverage cannot possibly be Unfettered, you're either new to the game or your GM is Doing It Wrong.
* If you're playing the game on the original hardware and have two controllers, you can press start on Controller one, then press Up and A on Controller two at the same time to end your game and go to the password screen without dying.
* If you're reading a novel, short story, fluff piece or fanfic set in the
* If you're rich, then you'll probably be under the most pressure to marry well. A rich person wanting to marry someone poor or even relatively poor would face tremendous amounts of resistance from family. This is true of Indians, but it's also an age-old story that you see across many cultures and time periods, including present-day white Americans. And it may well be true that 90% of Indian marriages are arranged, but that doesn't mean they're all
* "If you're seated in an emergency exit row, please review the responsibilities for exit row seating on the back of the safety information card, which is in your seat pocket."
* If you're seeing statues where they shouldn't be, you'd better be in daylight. Torches might help, but statues of the angelic bent have a nasty habit of switching them off in order to come and get you...
* If you're seen. Which, for the guards, translates as "a string of your hair in the general area". The player CAN pull this off and sneak away, but the odds are harsh. What makes this ridiculous is that another option to perform the assassination is to snipe the bride from an even lower, easier-to-see perch, with a unique bow and some arrows, both planted in there by your assassin pals. Not only this doesn't make the deed look like an accident at all, it's also harder for the player to get caught in that way!
* If You're So Evil, Eat This Kitten: A person is asked to commit an atrocity to prove how evil they are.
* If You're So Evil, Eat This Kitten: If you're evil like you claim you are, you are to kill our enemies to prove you're one of us!
* If You're So Evil, Eat This Kitten: One is made to cross the line to prove their character.

* If You're So Evil, Eat This Kitten: Testing whether someone is truly evil by their willingness to do something obviously cruel.
* If You're So Evil, Eat This Kitten) to do something evil to prove his evilness.
* If You're So Smart, Why Aren't You Rich? and seek revenge on Mockridge. While Mockridge survives his enemy's wrath and gets no legal punishment (and presumably continues to profit from the game), the Riddler escapes and the experience leaves Mockridge a broken shell of a man who cannot even properly sleep at night, expecting Nygma to come for him eventually, and will be like that for the rest of his life, prompting Batman to wonder if the millions that he made were worth a good night's sleep...
* If You're So Smart Why Aren't You Rich?'s design and time running out, Batman commandeers one of the maze's flying robots (the Hand of Fate) to bring him to the Riddler's would-be victim. Needless to say, The Riddler calls him out for "grand scale cheating."
* If you're struggling with a Boss, the game will offer you Sentinel Armor, a temporary Rune that massively boosts your damage resistance, for no penalty.
* If you're talking about midair rescues from high places, look no further than
* If you're the guy in 1st place, wager so that if you're right, you have at least double the 2nd-place score, while if you're wrong, you still have more than the 2nd-place score. You should also wager so that if you're wrong, you still have at least double the 3rd-place score, if it is possible to do so while still satisfying the first part of the rule. This way the only way you can lose is if you get it wrong
* If you retreat from a quest that you've never finished, then you're refunded the AP that you've spent. Additionally, if it's a story quest, you get a stat bonus if you retry the quest in the next hour that stacks up to five times.
* If you return their brains, Maloof (who is implied to be from a mafia family) and Mikhail of
* If you're unlucky enough to lose one or both your heroes in the tutorial, the game will hand you replacements (on top of
* If you're watching A&E in late 2017, you'll most likely see an ad for Taylor Swift Now, an AT&T program. More specifically,
* If you're watching work from the 17th or 18th century (where opera houses and orchestras were much smaller) this is usually averted, if not sometimes inverted; soubrette sopranos who play roles like Despina
* If you're willing to accept the Earth, or at least Sumaru City as the "table" in question, then Nyarlathotep's actions just after the final boss fight in
* If you're wondering how the historical Illuminati achieved such a prominent place in conspiracy lore, it's largely because the Illuminati's disbandment was followed shortly by
* If you're wondering what could have done that: Another Great White, a Saltwater Crocodile, or an Orca.
* If you're wondering what's the aesthetic in vogue at the time of this edit, look no further than
* If you're wondering why several of these relate to the whole party, a full team in
* If your Femshep romanced Kaidan and chose to leave him to die on Virmire, and then moved on to Thane in the second game, you are
* If your GM is aiming for this, you can make some hilarious memories of burning down a forest when you're supposed to be a protector of Nature, giving an enemy a death without a drop of dignity (
* If your house is robbed, even a child Sim can roll the want "See Burglar's Ghost". So much for the innocence of the young.
* if your load times are slowed down for whatever reason . After the transformation starts, enemies just kind of lounge around you for the 15 or so seconds it takes to finish.
* "If your master's actions destroy him whom I regard as-as the best and wisest man I have ever known, make no mistake that I shall hunt down, to a man, everyone who played a part in his destruction."

* "If your master's actions destroy him whom I regard as-as the best and wisest man I have ever known-make no mistake that I shall hunt down, to a man, everyone who played a part in his destruction."
* If your neighbor refuses your barbecue invites, but shows up after dark, consider
* If you rob a bank you are expected to pay taxes on the loot you get away with. It is even permissible to claim the cost of the weapons and masks you wore as deductions on income!
* If you romanced her in , Liara T'Soni and Shepard's relationship proves to be what may be the most triumphant example on this page. Two years after his/her death, Liara went to hell and back recovering Shepard's body from the Shadow Broker and provided it to Cerberus just to bring him/her back from death. Hell,
* If your opponent goes AFK, you'll only have to wait out a full turn from them once. If they run out of time without taking any actions, their future turns will only be 7 seconds long. Enough of these in a row, and they automatically lose. If they really did disconnect or something, they can get their full turn back by taking any action, which gives them a normal turn timer.
* If your Persuade or Speech skills are too low, the most you can tell them is "Try not to get shot".
* If your playing sucks, you do not have enough distortion. Sufficient amount of fuzz, distortion, and/or overdrive can cover bad fingerwork.
* If your product is going to have its basic design shared with others, but is the first one to have that design, you can say that it is "unique" and a "clean sheet design" before the others arrive.
* "If your right hand causes you to sin, cut it off and throw it away," etc. (see the Religion section above). Well, the Church Father Origen took this advice quite literally. However,
* "If your right hand causes you to sin, cut it off and throw it away. It is much better for you to lose one of your limbs than to have your whole body go off to hell."
* If your Scanner is in disrepair from excess use, it will gradually glitch out more and more while in use.
* If your ship is destroyed, you can rebuy the same model and all of your modules for 5% of their original price.
* If your submarine takes fatal damage but you manage to abandon ship at a shallow enough depth, there's a good chance you and your crew will survive. In that case you may be picked up by NATO units and continue the campaign with a new sub. However, if there's a lot of hostile units still afloat in the area, you will be captured by the Soviets (or Chineese, in the 2000's campaign) and imprisoned in a gulag for the rest of the war, ending the campaign then and there.
* If you run into a dragon, Zevran may say "I, I may have just browned my drawers, no? Phew!
* If you run out of dedicated food items, you have the option of wasting your effect-causing berries, seeds and elixirs, or letting your hunger run down and eat into your health until you can find something to eat off the floor. Either way, it's a pretty bad time.
* If you run out of explosive ammo, the Blood Launcher and Cannon will use your health for ammo instead. Missing an attack with a Blood Hammer will take your HP as payment.
* If you rush to Mettaton NEO without fully depopulating the Hotlands+CORE area, he'll still die but give a speech about how he can tell you're not irredeemably evil after all and won't destroy everyone — and your character indeed doesn't.
* If your visor is drowned in static and then blips out, then congratulations,
* If your workplace requires you to hit other numbers before you can dial to external lines, for quite a while you'll find yourself forgetting to do so and end up accidentally calling anyone from the Chief Janitor to the Big Boss and generally embarassing yourself. After you've gotten used to the system, you'll reflexively start doing the same thing at home or on the cellphone/handphone, dialling wrong

numbers and referring to the person who answers as "Dude! I got tickets for the game! Who's your daddy, bitch?" only to realize that no, that's
* If you save a pre-spaceflight civilization from an asteroid there is a chance that they will return the favor much later in the game. Destroying an asteroid approaching one of your own colonies in their own less advanced space ship.
* If you saw a Buried Alive match end with six men taking forever to fill the grave by hand rather than just dumping a truckload of dirt in, you would likely assume it was a parody of the stipulation put together by some comedy indie fed. Except, that is exactly how it went for the very first Buried Alive match, as WWE critically underestimated how long it took to fill a grave. For well over five minutes
* If you saw a young girl — let's call her Talie — wandering around a city, saying that she lost her mother, would you help her or walk away? If you answered the former, you may be in the minority.
* If you say you "feel tiered", you're telling us that you feel like you're built in multiple layers.
* If you scan the various Luminoth corpses scattered about, it shows that their warriors were
* If you "screw up" at a certain decision, you hit the dead end pathway and are forced to start again. From this point on, Stefan and Colin are aware of the actions they performed and the choices you made on the last run. Sometimes, they're very aware, for others they just think they have
* If you screw up Priority: Rannoch or have a bad save, and choose to allow Legion to complete the upload, Han'Gerrel will doom the fleet in a mad attack on the geth, leading to the virtual destruction of the quarian people and the death of Tali
* if you screw with me I will hit you powered by radiation, pain and crazy.
* If you search "Impey Barbicane" on Google you'll get more results for the
* If you secure a krogan-turian alliance, it goes so far as to include
* If you see an all-gold uniform—whether it be on the Blood Angels Sanguinary Guard, the
* If you see an unfamiliar name, it's very likely that it is a famous wrestler's real name or earlier persona. It's easier to just use the search function at the other wiki rather than try to use a list. As a general rule, the wrestler's most famous persona will be used instead of their real name, although different fans will have a different opinion as to which persona was the most famous, and then to add to the confusion, WWE has the annoying habit of trademarking a wrestler's name so that
* If you see anyone outside of dedicated fansites and such talk about
* If you see a squirrel with a less-fluffy tail than usual, that's probably what happened to it.
* If You See Ghost Lights, Don't Leave the Trail,), who beg them to tell their story because they don't want to be forgotten.
* If you see the Dungeon Master smiling... or in certain cases, chuckling. There are plenty of cases where that will chill you.
* If you selected the Spacer background and play the "Citadel" DLC, you get a call from Shepard's mother saying how proud she is of you.
* If you sell out the community center to JojaMart and buy every available upgrade, Morris gives you a vending machine that produces Joja Cola. Not really all that useful, since everyone in town but one person hates the soda, it doesn't even restore that much energy, and sells for cheap. Also, you'll miss out on the other smaller rewards the completing the bundles would give you, and the "Friendship" reward that boosts all of your affection rating with every villager by two hearts becomes unavailable. But hey, free soda!
* If you set Flint to Ivan while he's briefly in your party at Vault, he will apologize and give Flint back when he leaves. This just
* If you shear a mountain clean in half, the exposed face will be a sheer cliff.
* If you shoot an instructor, the screen goes black and then transports your character to a prison cell in Leavenworth.
* If you shoot people on your own team too many times in online play, the game

will kick you out of the server and give you the Leavenworth scene as well.
* If you shoot the infection form inside the Flood combat forms (they're located in the part of the chest where the sensory tentacles are sticking out), they take more damage, or die in one hit if you have the right weapon.
* If you shoot the target during his wedding ceremony, in front of the large audience, everyone will begin looking for the shooter and you'll likely be found quickly no matter how far away you were. But if you wait until after the ceremony when all of the men draw guns and fire them into the air to celebrate and time your shot with theirs, they will react with confusion and the death will be counted as an accident.
* If you show no interest in the human love interest (Ashley if you're male, Kaidan if you're female) in
* If you sink too many neutral merchant ships, you will be relieved of command and sent to a court martial, also ending your campaign.
* If you spend more than a week without interacting with a character (including your current main partner if you spend a week without booting up the game),
* If you spend time among animation circles, you'll likely hear the name of one animator spoken of in the highest possible regard: Yutaka Nakamura. He's animated many, many
* If you stand over here, you can hear the English majors crying after viewing this page.
* If you stick an earbud into both of your nostrils and open your mouth, the sound will be amplified, and come out of your mouth. This is because your sinus cavities are a pretty good natural amplifier. Part of the training opera singers go through is in the proper use of their sinus cavities to amplify the sound they make.
* if you stop to think about it, they imply something is not quite right about those professionals' concern over their own family...
* If you study physics long enough you'll probably run into the Galaxy Song from
* If you study to become a Lutheran pastor, you have to learn Hebrew, Greek, and Latin. Making you fluent enough to understand not only those languages, but also Arabic and all Romance languages to some extent.
* If you summon monsters or undead in the middle of a city or inside someone else's home, nobody will complain.
* If you supersaturate a solution—dissolve something into a solvent (e.g. water) so that there is more of the solute (e.g. sugar) present than there could be under normal conditions—adding the tiniest amount of the solute into the apparently clear liquid will cause it to crystallize, as the added crystal provides a seed for the excess solute to grow upon. This is
* If you take a detour into the broom closet en route to the boss' office in
* If you take down someone too strong to beat directly by destroying everything else that matters to them, that's a
* "If you take one bite of my pie, Garfield, I'll smack your fat little paws". Garfield's response to Jon's threat: he destroyed the pie and stated "If I can't have it, neither can he".
* If you take Rise (a girl) into your room she'll look around a bit before outright demanding to know "where you hide them." You can casually answer you hide them under the futon, but she's more amused than anything and not really upset. On the other hand, saying you don't know what she means has her amused by your innocence, and denying you have a stash altogether has her impressed that you would be such a gentleman.
* If you take the Barge to Tharro at the beginning of the book you get to witness both sides of this trope. The
* If you take the Dwarven Noble Origin, you briefly held the position of Commander of Orzammar's army before events force you to be exiled and join the Wardens.
* If you take the Great North Road, you might end up at an abbey. The monks of said abbey
* If you take the non-canon IDW comic book series that ran from 2013 to 2015 into account, you have a nine year gap between new
* If you take too long in Madame Carvier's apartment, the police arrest Lara and

the game resets to the title screen.
* If you take too long on a puzzle, Elohim will tell you to "save this mystery for another day".
* If you take too long to use the laser designator on the Reaper-Destroyer during Priority: Rannoch, it'll end up destroying the quarian fleet.
* If you talk to Gerson (the turtle shopkeeper in Waterfall) when you first see him, he'll call Asgore "King Fluffybuns", but won't remember why if you ask him. Talking to him in the
* If you talk to NPCs in Sol Falena before the final dungeons, they will say that your sisterly queen intends to radically reshape the state: turning the Queendom into a constitutional monarchy and abolishing the whole "tournament winner becomes Queens' Knight Captain and Queen Consort" tradition being at the top of her agenda. On the other hand, the good ending heavily implies that the prince ends up with Lyon,
* If you talk to wrestling fans long enough you just might run into one or two who have a passing familiarity with
* If you tangle with the Four Emperors and get any sort of victory at all, it's already a massive credit to your strength.
* If you tap the Fiend's Cauldron enough times on the difficulty menu in
* If You Taunt Him, You Will Be Just Like Him: Bullying your enemy back makes you as bad as they are.
* If You Taunt Him, You Will Be Just Like Him: Don't get back at your enemies.
* If You Taunt Him, You Will Be Just Like Him: The idea that getting back at a bully makes you just like them.
* If You Taunt Him, You Will Be Just Like Him: This is the plausible idea why the character is called out for dealing with someone who is harassing him.
* If you tell a mortal a lie using a particular ability, the only way for them to be convinced otherwise is to be presented with direct contradictory evidence. If you use it to tell the
* If you tell it something suggesting you may be suicidal, Siri will suggest the most appropriate suicide hotline for you to call and offer to call the number for you.
* if you think about it, is not so much cowardly as it is reasonable, unless you think your enemies ought to be obligated to attack you only in ways that cannot possibly harm you.
* If you think about it though, this trope applies when looking at every game in itself. In the aforementioned example with with members of the Scarlet Devil Mansion, you have
* If you think it's bad for Catholic School Girls, all male Catholic School Boys are masters of this trope... Most of the time, the boys don't have uniforms but rather dress codes which require some kind of nice pants (khaki or black) a buttoned down collared shirt (no color specified, though tradition is White or Blue), a sports coat (navy blue or black traditionally), and a Tie, and black or brown shoes.
* "If you think it's scary being lost, just wait 'til you're found." -
* If you think that last one doesn't make any sense, try saying it to a woman. What conclusion do you think she'll come to?
* If you think the IRS is intimidating you should read up on the United States Revenue Cutter Service. A part of the US Treasury department created not long after the Revolutionary War, it was initially responsible with combating smuggling, piracy and doing stuff the Coast Guard does today (in fact this service was the ancestor of today's US coast guard), but its ships wound up fighting with distinction in actual stand up wars against other nations and between 1790 and 1798 it was the only service America had capable of fighting on the ocean.
* if you think too much about something you become unable to do it properly good. The point remains that measuring and calibrating everything involved by hand usually takes longer than you have.
* "If you think we're getting tired of the zucchini joke, you had best think again." (

* If you think you won, but actually did exactly what the other person wanted, you are an
* If you thought Harry and Ron were bad academically, Ron's prankster twin brothers, Fred and George, are even worse. Case in point: Mrs. Weasley commented once of Ron achieving seven "Exceeds Expectations" grades in his O.W.L. exams as more than Fred's and George's added together. On the other hand, they managed to found a highly successful joke shop to sell their magical inventions that impress even Hermione. However, they were not always Book Dumb; in the first book, Ron mentioned that they make high grades, despite being goofs. Their grades declined because in the later years of school, they could no longer breeze through exams without even trying. And given their career plans didn't require getting into the advanced classes, it wasn't worth the effort to them to study harder.
* If you thought it was going to end with "Villain wakes up, pounds the troops, then runs." then you would be wrong. It was more: "New guy pounds the troops, takes other villain and runs." To make it more embarrassing, said new guy was just a normal Flying Mook.
* If you thought Pokémon couldn't get away with this, say hello to the
* If you thought the other games on this list were bad, you haven't seen the grandaddy of them all,
* If you thought you least wanted a Cryxian necrosurgeon to get you in
* "If you throw a baseball in an ascending, vertical line with a velocity of X, What is the maximum height it will reach, and how much time will it take for it to hit you back in the head?"
* If you told Papyrus the truth about what you were wearing, he assumed you were too smart to tell the truth and passed your "misdirection" on to Undyne verbatim.
* "If you truly love something, let it go. If it comes back to you, it's yours forever; if it doesn't, it never was to begin with." — an old proverb.
* If you try to build a shooting-based army out of Orks, expect to take a
* If you try to fight the Sixth Graders before the game tells you to, they just automatically beat you to death.
* If you try to get Hoagie to drop the item in the box during the evacuation, he refuses since no one's watching.
* If you try to invite a Sim over to your house and they reject (usually because their
* If you try to place the times and events of some books, you will find they take place a couple years before a different book, and at the same time, hundreds of years before the IMMEDIATE SEQUEL of that different book.
* If you turned the "flying Bug" cheat on which allows Bug to freely move anywhere, you could actually run up to Sonic and kill him in one sting.
* If you type "about:robots" into the address bar, you get a page with several references to fictional robots:
* If you unlock Dr. Cray's third diary entry, he states that man has been to the moon but the Apollo footage was faked to hide what was really happening.
* If you use a VoIP chat program like Teamspeak or Ventrillo and make use of a push-to-talk button, you can get so used to pressing it to talk that you can do something as innocent as sneeze or even have a conversation with someone standing next to you and press said button and transmit your conversation to the entire channel.
* If you use "ball" as a verb, you're probably writing porn. (In fairness, it can also mean "to make into a ball," as in "to ball one's fists.")
* If you use martial arts from 4E's Arsenal book, Finishing Move is the name of a martial arts maneuver that allows you to spend your next action as an interrupt to immediately follow up a successful melee attack.
* If you use the point emote to dramatically point at Crota during your battle with him, he notices and angrily points back.
* If you've done an illustration for any of the following, post a link in the "submissions" section, or contact user Lubaf on
* If you've ever been to a convention, expect to find fan-made lawyer pins from
* "If you've ever broken a speed limit in reverse… you might be a redneck."

* If you've ever had a moment when you feel like you'll explode if you don't scream and let out your problems, odds are you're on the verge of one.
* If you've ever played a game of "Marco Polo" with a group of friends, odds are
* If you've ever taken an open roof double-decker bus tour, take heed of the warnings not to stand up while the bus is moving — you
* If you've gone through multiple losses of close family members and friends, you realize that it can appear to get easier to deal with losing yet another close family member/friend, but it doesn't get any easier coping with the loss, particularly if it pertains to a parent, child, spouse, or sibling. You'll be able to manage living a normal life again after the original grieving process is over, but you'll never really be able to "get over it".
* If you've got a Rubik's Futuro Cube but not the instructions, you can find out how to use the thing by the Help option, which is in the Red Menu — but if you have only just got the cube, chances are it's still in Beginner Mode, in which only the Blue Menu is available; so in order to find out how to unlock it so you can reach the Green or Red menus, you have to know how to use it. Of course, you can download a copy of the instructions.
* If you've gotten used to living in a same gender dorm / hotel / house with a bunch of your buddies, you might be surprised to find that doing things like walking out of the shower and dripping water all over the floor with just a tiny towel around your waist, leaving smelly socks and clothes all over the place, leaving old pizza boxes and food cartons around until they start growing stinky mushroomy thingies on them and living without hygiene in general is not considered acceptable behaviour in society. Be wary if you visit your parents while on this phase.
* If you've ground White magic enough to have gotten the spell Empathy, you can use it on him when you next talk to him.
* If you've heard Trio's "Da Da Da" or a cover of it at any time later then the early 1980s, you almost certainly have Volkswagen to thank for that even if you don't remember
* "If you've never heard of us, we may have caused your memory loss."
* If you've said the words "haunted" and "hospital" in the Philadelphia region over the last thirty years, then you've heard of
* If you've scored at least fifty ally kills and win the final battle, you'll get a choice of whether to run away, or stay calm and think. Choosing to run away triggers the normal ending, but choosing to stay calm and think causes
* If you visit Amazon.com, the site uses encryption and allows you to use your credit card. If you subscribe to Amazon Prime, in addition to free shipping, you can stream free videos. Encryption, credit card acceptance, subscriptions, on-line shopping, and streaming video were all first developed for the needs of the on-line porn industry, but became very useful for non-erotic commerce, too.
* If you visit the Vatican, you will see them. Their uniforms look like a cross between Stuart doublets and hose and stripy red, blue and orange pyjamas. They are everywhere!! (They also wear a more nondescript, but still somewhat out of place for the twenty-first century, blue uniform.) However, they are armed, and not only with the sabres at their hips and halberds in their hands. They are also very devoted to their mission, very pious Catholics (piety is actually a major factor in recruiting candidates), and do not suffer fools, especially people who laugh at their uniforms. It's the same reason poisonous creatures are brightly colored: so you know to stay away from them.
* If you wanna get further technical, Frieza is this as well; his father is King Cold, ruler of the planetary empire he'd constructed for himself. For some reason, Frieza prefers to give himself the title of "Lord" over "Prince" perhaps to keep from reminding himself he's second-place in the organization.
* If you wanna win, get a Finn is an old adage in motor sports. Many car manufacturers do their development work in Finland due to the Finnish winter and road conditions in wintertime.
* If you want a fascinating first-hand look at just how much technology has marched on over the years, all the episodes of

* If you want a non-medley that contains this trope, consider "Genius in France", his style parody of Frank Zappa (see above) from 2003's
* If you want a not-so-sunny example of this trope, look at original-model
* If you want a quick view of just how confusing tesseracts can be, see
* If you want a volcano world, look no further than Io. Most moons aren't large enough to retain sufficient internal heat for volcanic activity, but Io is being constantly stretched and crushed by tidal forces from Jupiter's gravity, like a stress-ball made of rock.
* If you want a war with Alicetonia, describe the Alicetonians as a dangerous threat to the peace-loving people of Bobsylvania.
* If you wanted to show those film buffs who's boss and knock off the entire
* If you want more folk, The Ramblin Rover by Silly Wizard probably should never be sung sober.
* If you want proof that Harmony Gold was willing to squeeze as much money from
* If you want scary ghosts, forget the ghost and skeleton monsters, actuations; ended are soulless entities possessing other living things that may or may not have a SOUL themselves, are animated through determination, and will ultimately be molded in the image of their host. If powerful enough they will start entering
* If you want to become a chauffeur for the European Parliament, they require you to be licenced to drive pretty much anything with wheels, including HGVs.
* If you want to count professional wrestling games as sports games, then the long-running WWE-licensed
* If you want to cross off the most memes on your list for a single source,
* If you want to get into MMA, you're probably going to have to learn Boxing, Wrestling, Brazillian Jiu-Jitsu, and Muay Thai (for the latter two, an equivalent amount of Submission Wrestling and\or Kickboxing training can suffice). They're considered the four pillars of the sport because they're considered the most
* If you want to get rid of clastrophobia, you'd have to call 555-4296.
* If you want to get technical, transformation could actually be a free half action, what with getting into a correct position and all.
* If you want to go FTL, you'll have to travel through "slipspace". However, slipspace is rather unpredictable and inconsistent (not to mention quite dangerous without the proper precautions), and while humanity and the Covenant have colonized much of the Orion Arm, they don't yet have the technology needed to quickly or safely navigate to other parts of the Milky Way. While the Forerunners had the technology to quickly jump across the entire galaxy, intergalactic travel was still something of a hurdle for them, and they built only a few extragalactic installations in their entire history.
* If you want to imagine what Vulcans would be like if they gave into their emotions, one need look no further than the highly paranoid and extremely dangerous Romulan Empire, which spawned at least one planet-destroying and truly
* If you want to keep the ‘monster’ in monster girl, you want the villainous Ranamon. Green, covered with seashell-themed, uh, head-things, and cute as a button. Her Beast Spirit form, Calmaramon, is much more monstrous, with a giant squidlike body beneath the humanoid portion. Though it wasn't used that way, you get the feeling the designer had in mind hapless victims approaching a "woman" in the water, and then out comes Cthulhu's little sister to
* If you want to know all the privacy and transparency focused alternatives to traditional social network sites, among other tools, the
* If you want to know how to animate Homestar, according to "Sample of Style Too"
* If you want to know what a Chinese person's imperfect English might really sound like, read the novels of
* If you want to make this challenge even harder, go through The Ulitmate Choice (this game's version of The Arena) without allies. The harder difficulties will make you beg for mercy.
* If you want to watch "The Visitor" (2014) without being spoiled of the
* "If you want wrongdoing done right, you have to wrongdo it yourself." is the frequent lament of
* If you watch a four-hour movie just for the last line, that's dedication.

* If you watched any television at all in the 1970s, you may remember the commercials for Wisk. One of the very first mass-marketed liquid laundry detergents, Wisk's advertising executives built nearly a decade of commercials around being able to pretreat collar stains with it — with a side dose of horror and looming insanity. The initial run of ads seemed innocuous enough: housewives being embarrassed by children dancing around their drying laundry and chanting "Ring around the collar! Ring around the collar!" at the white dress shirts hanging there. But within a couple of years, the
* If you watched Canadian TV during the 2013 Christmas season, you probably saw an ad for Merci Chocolates multiple times during a show.
* If you watched Noggin back in the mid-2000's, it was impossible to watch any show without seeing
* If you watched only the first five minutes, you'd be forgiven for thinking that the 1976 version of
* If you watched WXYZ ABC 7 Detroit's morning newscast in October 2020, you definitely didn't go through a commercial break without seeing an ad Hazel Park, Michigan gun store Universal Pawn. At one point, it got more airplay than
* If you watch "Jet" without knowing that Katara and Sokka are siblings, it can come off like a
* If you watch the cutscenes carefully, you'll note that Harbinger took direct control of the leader of the Collectors before the first time you fight one of his puppets, and relinquishes that control just before the leader is killed. Harbinger was lying to you every time he said "assuming direct control;" he was actually forcing the one Collector he'd taken control of to control those fighting you, giving him indirect control. Because Harbinger knew what you did to Sovereign.
* If you watch the excellent Ken Burns documentary about the war, you can't help but wonder how many excellent opportunities to win the war right then and there George B. McClellan squandered throughout the first years of the war. True, Lee was a competent military leader, but more often than not all his competence got him was getting away, bleeding the (superior) Union forces and living to fight another day. Once competent commanders were put in command on the Union side (Sherman, Grant etc.) the economic, manpower and technological advantages of the North began manifesting themselves in
* If you watch the Qubo Channel, the Qubo Kids' Corner block on ION or were a viewer of their former
* If you went to the town first, thus not breaking the buggy, an NPC still offers to fix it for you. An odd oversight, as the town is easily spotted and the player is just as likely to go straight there.
* If you were a boy and played with a Barbie doll, then you immediately had to transfer schools. Unless, that is, you did stuff like strap her to a model rocket and attempted to launch her into outer space or did all sorts of violent acts to her such as dropping a bowling ball on her or trying to melt her with a magnifying glass.
* If you were a prepubescent boy in 17th-century Italy, and you showed promise to be a great singer, your parents might have had you undergo a...
* If you were cynical you might comment that a group hug is a Succubus's most frequent action in
* If you were in college in 1994 and smoked cigarettes, you had at least, by Christmas break, learned to roll them yourself, if indeed you hadn't switched to rolled cigarettes completely.
* If you weren't aware of who's voicing him or what Detective Pikachu sounds like in the source game, you'd expect him to be voiced by
* If you weren't careful though, even if your ship survived you might end up losing a warp nacelle or two. In the storyline mode this was an automatic failure, as finishing the mission required returning to the starbase, which required warp drive.
* If you were on the winning side of (And it's no coincidence that none of the countries from the losing side have nukes.) It made sense when the UN was set up in the 1940s when Britain and France controlled most of Africa and much of Asia.

* If you were to ride the Chicago 'L' around the central Loop and you entered at one Loop stop, then got off at another Loop stop, chances are this trope might play out. If you enter at State/Lake and get off at Clark/Lake one stop west, you've taken a train for the equivalent of 500 feet. If you got on at LaSalle/ Van Buren and got off at the very next stop, Harold Washington Library-State / Van Buren, you've gone about 600 feet, or the equivalent of two blocks east. That said, the station intervals outside the Loop are much larger, which is especially noticeable on the freeway sections of the Red and Blue Lines.
* If you were to select the search button for a Google search box with
* If you were to visit the houses of people who died during the ending, word salads filled with numbers and punctuation appear once again, but this time
* If you were unlucky enough to fall into a black hole, the strong gravity would pull on your feet (or whatever is pointed toward the singularity) more strongly than it would on your head. This would increase, and the gravity would begin to stretch you out, eventually ripping you in half (hopefully killing you quickly). The process would continue, stretching you and tearing you apart, until all that was left of you would be a long, thin strand of particles. The scientific word for this process:
* If you win the second brainwashed Joey fight with anyone but Mai, he fails to break free of the mind control. Scott sets him up to sacrifice himself via a hypnotic suggestion, and Yugi and friends can't even take revenge on Scott since he appears as a hologram.
* If you wish to be smarter, the Djinn will fill your brain with useless trivia knowledge, stating that you do indeed become smarter from it, but to no actual effect.
* If you wonder where he got it from, it turns out that Mr. Torgue's
* If you work in a field that involves a lot of sewing, stitching through a finger on a sewing machine is treated as almost inevitable.
* If you work in a home and garden or domestic supply store, such as Bed, Bath & Beyond, you
* If you worship Poseidon, your buildings automatically spawn a group of militia when they're destroyed.
* If you would like to see desperate literary snobbery coupled with hilarious pretentiousness, why not ask a professor of Shakespeare why the ghosts and witches in
* If Zimmy counts, then Jack definitely does—at least during the time that he's
* IG-11 droid moment, but this is only when the situation requires it.
* IG-88 had one almost ready to go when it was killed. In fact, it had transferred its consciousness to the second Death Star and was going to open fire on the Imperials as soon as it finished with the rebels, then broadcast the go code.
* Igarashi Nagi (May)'s name contains 'fifty' in his family name. Granted, it's not 'five' alone, but it's still there.
* I Gave My Word: Dialogue which basically means "I promised to do or not do something, you can't make me do otherwise", which often turns out to be irrational.
* I Gave My Word: Holding accountability in keeping a promise to someone.
* I Gave My Word, the oaths of the suitors that required them to follow Menelaus to Troy. Also the Oath of the Styx that Greek gods cannot break, which has gotten Zeus, Helios, and others in big trouble...
* Igbo mythology has two. Ikenga, the proud ram horned (sometimes literal two faced warrior depending on the region) warrior that represents just war for the sake of improvement (his domains were also Achievements and Time). The other is Ekwensu, lord of Chaotic War, tortoises and bargains.
* I-gears have amazing maximum lock-on range with their missiles, but it's also harder to lock on to the desired target from extreme range if said target is
* Igelit was originally a form of PVC, made by IG Farben. In Czech, the term is commonly used for any kind of plastic bags and wrappings, even though other materials have replaced the PVC; "igelit" bags are actually made from low-density polyethylene (LDPE).

* I Get That a Lot is a celebrity doing a mundane task (such as Mario Lopez working at a hog dog stand) and laughing off people who recognize them, usually by saying the eponymous phrase.
* I Get That A Lot, it would feature various celebrities in public jobs. If a customer noted their 'resemblance' to themselves, they would say "I get that a lot". Paris pretended to be a gas station attendant.
* I Get That a Lot" or variations of the phrase until it's time to reveal the prank.
* Iggie's House, the protagonist, Winnie, has a habit of cracking her gum as she chews it, and often does it on purpose to annoy people (particularly her mother). It's apparently chewing gum, not bubble gum, but is used for the same comedic effect as bubble gum.
* Iggle Pop! are literal fuzzy balls of fluff with wide, innocent eyes.
* Iggle Pop!, Fizzy learns that he was the one to rescue all the Iggles after Doc made all the arrangements.
* Iggle Pop!, it will merely be blown away skywards. Averted with the player character who loses a life if it gets hit.
* Iggy Azalea after "On the Verge" championed "Buy Me a Boat"), Chase Bryant, Cam, Granger Smith, and Maren Morris all benefiting from it.
* Iggy Azalea). Both songs only barely made the Top 40 before quickly dropping out.
* Iggy Azalea divisive among hip-hop fans. Her real accent is rural Australian.
* Iggy Azalea has a nice set of legs, shown off in the music video for "Fancy".
* Iggy Azalea — several scenes from the film, such as the debate, outfit selection, party, and the driving test are recreated in the video, with Iggy herself playing Cher Horowitz and Charli XCX playing Tai Frasier.
* Iggy Azalea spells her name as Iccy, Iegi, and HRT5, because she "can't spell because her IQ is negative ten"
* Iggy Azalea that prevented her from getting a third big hit. She attempted to make a comeback with "Team", but it only peaked at #42 and fell off the charts rather quickly.
* Iggy Pop bears the sticker "Parental Advisory: THIS IS AN IGGY POP RECORD."
* Iggy Pop in skintight leopard-print pants, repeatedly bashing himself in the face with a microphone onstage at the legendary New York punk venue CBGB's."
* Iggy Pop", in which he sings about how shallow and unfulfilling his decadent celebrity life is, was used to advertise a cruise line. For that matter, this applies to anything else that it has ever been used in an advertisement for as well.
* Iggy Pop. Known for being the grandfather of punk rock, much of his output is rough, hard, and loud. But the closest thing he's had to a hit was a pop ballad love song. It's called "Candy" and is duet with Kate Pierson of The B-52s. It reached 28 in the US Billboard top 100.
* Iggy Pop's take in 1986, but was actually recorded as far back as 1958 by Johnny O'Keefe.
* Iggy Pop: "Strict constructionists and lo-fi snobs charge indignantly that by remixing his own album Iggy has made a mockery of history and done irreparable damage to a priceless work of art. This is really stupid."
* Iggy seems to be getting dumber and more childish in each book. Where in the first three he was treated by Max and Fang as one of the older kids, now he appears to have a mental age of twelve and spends most of his time with Gazzy, who admittedly has a similar outlook and personality, but is way younger than him.
* Iggy's Reckin' Balls: The "Reverse" item inverts all directional controls for about five seconds. How much of an issue this is largely depends on whether you are currently trying to make a tricky jump; in most other situations, you can simply stop and wait it out.
* I Give It A Year finish up leaving each other for the rival suitors.
* Igloo-Gloo: Seal pups Snowball and Snowflake wear a blue bow and a pink bow respectively.
* Igloo-Gloo while holding his bunny to someplace not too far away during bedtime, with Snowflake always having to bring him back to bed, followed by the Moon with

the item that was dropped from the sky at the beginning if the episode.
* Iglot is of a species called the Unggiko that was mass-murdered to near exctinction by the Ravena. Aviona saved Iglot from harm during this event, making him the sole surviving member of the species.
* Ignac; however, it remains to be seen whether these plans will ever come to fruition.
* Ignac, the eponymous main character gets this grade in math, which makes his parents lock him up in the house.
* Ignatius "Iggy" Knight...standing atop several crates of TNT...and a barrel of dynamite being licked by flames.
* Ignaz Semmelweis discovered that childbed fever can be avoided by use of hand washing standards in clinics. His findings were rejected, and were only accepted after his death. The idea of disinfection only really took off after Robert Koch and Louis Pasteur produced definite proof of the relationship between germs and disease. Washing your hands to prevent infection was popular in England even before Semmelweis, but since the English scientists still believed in the theory of miasma, they were
* Ignaz Semmelweiss in his hospital. Only after the much more influential Lister suggested basically the same did the notion take root.
* Igneel and the other dragons used the Dragon Soul technique to enter the Dragon Slayers' bodies to both protect them and to extend their own lifespans after being fatally injured long ago by Acnologia, thus explaining their long disappearance.
* Igneel and Zeref himself have claimed that there is more to him than that, such that the former he refused to kill him even when he had the opportunity and the latter claimed to Natsu that, upon encountering him, it would be his choice on whether to kill him or not
* Ignignot and Err teach Meatwad to smoke, drink and peruse pornography in
* Ignis has a giant pool of lava in the middle, with criss-cross bridges over its breadth, and several places where pillars of fire appear and disappear seemingly at random. Fire-types can pass through the lava and fire without difficulty, but most other Pokémon have to do maneuvering.
* Ignis has the option of screwing destiny after beating the DLC at least once. After that a different option unlocks, ultimately leading to an alternate ending to FFXV. One in which Noctis (and Ravus) don't die and Ignis never loses his sight.
* Ignis licking Kotone's wound at the beginning of his route started his Horror Hunger
* Ignis, towards Noctis. Brotherhood is a major theme of the game, and the four main characters are described at various points as having a brotherly bond of friendship. At one point Regis explicitly tells a young Ignis to serve as a brother to Noctis. But Ignis's extreme level of dedication to Noctis, including his willingness to throw away the entire world's future in exchange for his friend's safety among other things, and the fact that his relationship with Noctis employs numerous of what are typically thought of as
* ignite them. That's not the only time Jerry abuses a loophole. Apparently simply opening the door for a deliveryman can count as an "invitation" and if a building is abandoned it's fair game.
* Ignite The Stars. She reluctantly chooses the former, and starts plotting to escape as soon as she reaches the academy.
* Ignite The Stars under control, the Commonwealth implant a device in her heart. It can kill her, and also cause extreme pain.
* ignition (and the other captains' inability to have foreseen this weakness) spells disaster for everyone.
* Ignition! An Informal History of Liquid Rocket Propellants by John D Clark. The chapter "What Ivan Was Doing" ends with this observation:
* Ignition City. The titular city is a spaceport constructed from rusted spaceships that has a lot of expies of classic sci-fi heroes as its residents.
* Ignition weapons have their own version of this, even though they're (normally) just objects: when ignited they start bursting with energy and become a lot more powerful, gaining massive range even when they're theoretically close-range

weapons.
* Ignition Weapons like Black March, Narumada, and Green April will only release their special abilities when their name is combined with the command to attack (i.e., "Black March, IGNITE!"). Since this happens in the heat of battle, there will be shouts.
* Ignition Zero comic where the protagonist, Robbie, and his friend Orson fall in love. They're both asexual men.
* Ignition Zero has such a sweet tooth that in the first chapter he went to a bakery and asked for a sample of everything. Orson was unamused.
* Ignition Zero is an aromantic heterosexual, meaning he's sexually attracted to women but romantically attracted to no one.
* Ignition Zero looks like a scary monster but is very nice. They communicate through writing and write in a cutesy format where they dot their "i"'s with hearts.
* Ignorance Is Bliss: A character or characters are told that what they are doing is something completely harmless or beneficial when it's actually dangerous or evil.
* Ignorance Is Bliss: An common phrase that means if you don't know about something, you don't worry about it.
* Ignorance Is Bliss: Sometimes it is better NOT to know about things.
* Ignorance of this mechanism among pace bowler heavy teams such as England, Australia and the West Indies could have been due to the pitches in those countries being more bouncy and therefore more conducive to fast bowling. Therefore, a good pace attack would typically dismiss a batting side long before reverse swing’s mechanics could take effect. Those with weak pace bowling resources would often switch to a spin bowling attack, where aerodynamic “swing” isn’t a factor and is not utilized. Pakistan had the right special circumstances to discover this phenomenon, as they became a pace bowler heavy team with excellent seamers, but Pakistani pitches as is typical for the subcontinent tend to be flat dead pitches that do not assist bowlers at all. Therefore, batting sides tend to last much longer in those conditions, thereby allowing enough time for a pace heavy attack to notice and exploit reverse swing.
* Ignorant About Fire: A character is too stupid, clumsy, or just plain naive to deal with a fire.
* Ignorant About Fire: A character's clumsiness or idiocy makes them ignore the dangers of fire.
* Ignorant About Fire: You fail to prevent a fire from starting or spreading due to being too stupid, naive, or clumsy.
* Ignorant Minion who is out of naivety or slow-wittedness unaware that their boss is evil.
* Ignorant of Their Own Ignorance: A character is oblivious of how much knowledge they truly lack.
* Ignorant of Their Own Ignorance: This character is too stupid to realize that they're stupid.
* Ignorant of Their Own Ignorance: You fail to realize your own ineptitude.
* Ignored Aesop to discuss what the moral is that they were supposed to learn. After going through several possibilities they end up concluding that they either learned something ridiculous or they didn't learn anything at all.
* Ignored Aesop: When characters discuss the Aesop in a metacontextual way, usually sabotaging whatever flimsy moral may have existed in the first place.
* Ignored Confession: A character makes a confession, but nobody listens to them or takes their confession seriously.
* Ignored Confession: If someone is impaired in any way, whatever revelation they say will be ignored. Even if it seems perfectly logical that it would be so.
* Ignored Confession: Someone makes a confession, but no one cares to pay any attention to them or to take the claim seriously.
* Ignored Enamored Underling: A character loves the person they work under, but they don't love them back.
* Ignored Epiphany: A villain considers redeeming themselves, then decides not to.

* Ignored Epiphany: A villain or morally gray character has a brief moment of realizing how bad their actions are, only to shrug it off a few moments later, knowing how far they've fallen.
* Ignored Epiphany: The villain briefly considers renouncing their ways, but decides not to.
* Ignored Epiphany: The villain considers redeeming themselves, but brushes off the thought and continues being bad.
* Ignored Epiphany: The villain considers redeeming themselves, but decides not to and continues being bad.
* Ignored Epiphany: Whenever a character intentionally maintains their status quo.
* Ignored Epiphany: You had a realization, but you forget about it and continue with your business.
* Ignored Expert appears in an Enlightenment-leaning work, the character who speaks it will have plenty of knowledge and training to back it up.
* Ignored Expert: A scientist who is right but not trusted by those in power.
* Ignored Raised Hand: A character wants to ask a question, but everyone ignores them.
* ignore her henchmens' rather well-thought out, and well-founded reservations on fighting Kirito., something Kirito himself points out.
* ignores severe stomach pains; he's diagnosed with appendicitis ("Hospital")
* ignores the majority of his attackers; his passive defenses will slaughter them all, they're not worth actually fighting.
* Ignore the Disability: A character unsuccessfully tries to avoid pointing out another character's disability or deformity.
* Ignore the Disability: A disabled character is coming, and other characters are told to ignore, and/or avoid mentioning, their disability to avoid offending them.
* Ignore the Disability: Character unsuccessfully tries to remind themselves not to point out another character's disability or deformity.
* Ignore the Fanservice: A character deliberately ignores the fanservice aimed at him.
* Ignore the Fanservice: Being able to resist the temptress shows self-control.
* Ignore the Fanservice: Someone flirts with another person, but that person just ignores the flirter.
* ignore the Prime Directive to prevent them from appearing is that an unstable exploding Omega Particle (Omega Particles almost never remain stable for longer than a nanosecond) will permanently damage subspace (which makes warp travel impossible) in a region the size of a Borg Fleet. If this happened enough times, warp travel would become impossible and galactic civilization would be ruined. What makes things worse is that people still try to create them anyway because even a single stable Omega Particle could provide unlimited power.
* ignoring all of those bits calls the Ellimists a group more than once. Some time after the last time, Marco decides it's a question for some reason. Then it turns out he's one guy — whose story has little in common with the hints given in the series proper.)
* Ignoring by Singing: A character covers their ears and sings to try and ignore a statement they don't like or don't want to hear.
* Ignoring by Singing: A character tries to ignore a statement they don't like or don't want to hear by covering their ears and singing.
* ignoring GT entirely that adapted said movies first and then created original content.
* Ignoring people who are injured, homeless, or otherwise down on their luck.
* "Ignoring the kommandant! He appears to be the victim of some sort of enemy nerve gas!"
* IGN's annual "Top 25 [Insert Console Here] Games" lists tend to garner a lot of debate from fans. For example, their "Top 25 Nintendo DS Games of All Time" list was heavily criticized for replacing
* iGoodbye show involving the 'third wheel' to promote, he took to his blog to creatively muddy the water, attempting to confuse the meaning behind the kisses, the romances, how much the romances meant in the context of the episode and the

very idea that there was a romantic hookup involved. All without giving either side any additional content or clarity beyond what happened in the episode itself.
* Igor a blueprint. She asks him if he's really going to make it, and Igor replies that if it doesn't work out, they'll just adopt. The camera then shifts to Eva's POV, showing a blueprint for a dog.
* Igor; and Brain, exactly what the name implies; are trying to dismantle a doomsday device. Failing, Brain panics and exclaims, "We're all gonna die! Except you!"
* Igor are recycled for parts at the end of their usefulness... or sometimes just because someone feels like it.
* Igor, even though she was made to look monstrous and be evil, she still has a very pretty look.
* Igor has been made free to watch with ads on Youtube Movies as well.
* Igor. He's a zombie bunny, but he's not at all physically intimidating, and while he is kind of a snide jerk, he wants to end his own life rather than hurt anyone else.
* "Igor" is actually an impostor. His voice is completely different (while Igor's Japanese VA
* Igor is immortal, to the extent that his body will rematerialize even if completely atomized by an explosion. He spends most of the movie attempting to kill himself in various ways, as he believes that life is meaningless and nothing matters. (He gets better, in part because Eva's obsession with acting leads him to discover his hidden passion and talent for costume design).
* Igor Objective Uikokahonia is used solely in a cutscene for this purpose.
* Igors harvest their dead for spare parts, with some body parts being handed down from generation to generation (When they say, "He's got his father's eyes," they're not being metaphorical). Also, they offer their services as surgeons to villages on the condition that they can harvest the villagers' body parts once they die of natural causes. A village can refuse to let the Igors collect on their payment, but then they'll never offer their services to that village again. "What goeth around, cometh around. And thometimeth, it thtopth."
* Igors the scar cream. However, every Igorina will subtly advertise her Igor nature with a single, subdued and discreet, stitched scar somewhere on her face or visible body. It's like having a discreet membership tattoo.
* Igor Stravinsky and in the case of the latter only for the huge riot that broke out during the premier in 1913. That he also composed less brutal music is mostly unknown, let alone that the majority of his oeuvre was in fact quite accessible neoclassical music.
* Igor Stravinsky," a setting of Thomas's poem "Do not go gentle into that good night," was composed after the poet's death put an end to a planned collaboration with Stravinsky on a theatrical work.
* Igor Stravinsky; he had offered to compose a piece expressly for it, but the idea was rejected.
* Igor Stravinsky". However, he found his place in Hollywood and with his film music, defined the lush sound of the movie soundtrack.
* Igor Stravinsky's neoclassical period consists mostly of pastiches of more traditional baroque and romantic composers.
* Igor Stravinsky, the characters are playing cards and the antagonist is a joker who considers himself superior because of his ability to become any card. He gets his comeuppance in the last of the ballet's three hands when he leads a straight flush in spades, only to be beaten by a royal flush in hearts.
* Igor Stravinsky, the famous opening melody is given to the bassoon. It was a line that was more suited for a clarinet and was written out of the common range of bassoonists at the time; Stravinsky intended it to sound broken and strained. Now, ironically enough, the piece is so famous that the bassoon melody is a must-know for bassoonists, who've gotten significantly more proficient at their instruments when the "Rite" improved the PR of their instrument. Now every performance of the piece has the opening melody played beautifully and expertly.
* Igor Stravinsky: "The true hierarchy of phenomena, as well as the true hierarchy

of relationships, takes on substance and form on a plane entirely apart from that of conventional classifications. Let me entertain the hope that the clarification of this thesis will be one of the results of my course, a result I greatly desire."
* Igor Stravinsky to a pagan god. Though Stravinsky's music is more often heard as a concert piece than a ballet, the violence musically embodied in such sections as "Glorification of the Chosen One" is obvious.
* Igor Stravinsky, which is entirely sung in Latin (not counting a small amount of spoken narration) though based on an ancient Greek play and still set in ancient Thebes.
* Igor Stravinsky writes K in place of C in many words just to force the hard Classical Latin pronunciation.
* Igors working for mad scientists/lords/whatevers have the uncanny ability to have all of their possessions and body parts packed and be halfway out of the village before the peasants can finish distributing these essentials.
* Igor tends to be mistaken for a DreamWorks film because of its design and humor.
* Igor. The country is filled with castles for mad scientists high up on tall mountains.
* Igor, the main characters are being chased, so Brain starts trying to find a switch for a secret passage on the wall. Igor tells him there isn't a secret passage and bangs the opposite wall in frustration, hitting the switch for the secret passage.
* Igor, the titular character previously succeeded in reanimating and gifting a rabbit named Scamper with immortality. One problem: Scamper has a death-wish and takes every opportunity to test the limits of his regeneration.
* Igor was sent to retrieve the brilliant Hans Delbruck's brain from the Brain Depository. Igor drops the jar containing the scientist's brain, and instead takes a different jar marked "ABNORMAL - DO NOT USE". After the monster reveals its true nature, Dr. Frankenstein asks Igor whose brain he put in the body. "Abby someone." "Abby who?" "Abby Normal."
* Igor (who can't spell "Brain" right) and making an intelligent rodent immortal, while also giving him a death wish.
* Igor, whom Ramsay captures and breaks into becoming a replacement Reek.
* Igor, wrote his own name as "Brian". While Scamper calls him Brian to spite him, the guy running the brainwashing centre calls him that by mistake.
* I Got A Cheat Ability In A Different World, And Become Extraordinary Even In The Real World
* "I Got a Hobby" and "Bad" were deleted, because they were replaced by "Dentist!" and "Mean Green Mother from Outer Space" respectively, which are both better songs.
* I Got a Rock: Halloween trick-or-treaters get something other than candy.
* "I got a thousand volts of lightning runnin' through my veins; three feet of steel in my hand, and it's flavor is pain! You've been playin' with fire, now you gonna get burned; you're in over your head, another lesson to be learned! I'm gonna run you through! You gonna pay for your crime! (fucker) I just cast Haste, and now you're running out of time!"
* I Got Myself into a Weird Situation and Awful Things Happened to Me.
* I got RIPPED in 2 weeks; the original is used for the "before" picture, and the more muscular design is used for the "after" picture.
* I got soul, but I'm not a soldier. I got soul, but I'm not a soldier. I got soul, but I'm not a soldier.
* "I gotta feeling / That tonight is gonna be a good night / That tonight's gonna be a good good night / That tonight's gonna be a good good night / That tonight's gonna be a good good night
* I Got You a Drawer: A character gives their girlfriend a drawer as a gift.
* I Got You a Drawer when one partner gives the other partner a space in their home to put their stuff.
* IGPX decided to move the show to Friday at Midnight, with exactly one ad detailing the change of the schedule.
* IGPX: Immortal Grand Prix can't keep up nearly as well as it used to: the years between his retirement and his temporary comeback were not kind to him.

* IGPX: Immortal Grand Prix features a cat with whom one of the human characters has a technologically available mental link. Though the cat is opinionated and realistically cat-like (okay, he does have an attitude), he is neither a villain nor a hero in most instances.
* IGPX: Immortal Grand Prix, Johnny, a fan of Takashi and Team Satomi, hopes to one day become an IG pilot. He uses an IGPX racing simulator at the local arcade to practice, but has a hard time getting anything better than the lowest grade, CC. Takeshi points out how he used to play that game, and how they use slightly more advanced simulators to practice with for upcoming opponents, and gives Johnny some good pointers to improve his score.
* IGPX: Immortal Grand Prix — Made by Production I.G (Japan) and produced by Bandai Entertainment (also Japan) and Cartoon Network (USA).
* IGPX: Immortal Grand Prix re-grabs her hand and entwines her fingers.
* IGPX: Immortal Grand Prix, Teams Sledge Mama and Velshtein in the first season. Sledge Mama is made up of a bunch of violent thugs who aren't above cheating to get ahead. Team Velshtein, meanwhile, are the arrogant reigning champs whose coach treats them like soldiers. The second season introduces Team White Snow, who are even worse, cheating more often and more flagrantly, and being meaner and more arrogant.
* IGPX miniseries was a mecha combat tournament. The actual series is a racing anime.
* Igra that ends in nuclear holocaust. It ends with the boy drawing a missile that launches and detonates over the girl's drawing of a house, after which the boy accidentally knocks over an ink bottle. The ink spills over the drawings, symbolizing the end of the world.
* "I greet you warmly, but I'm not a criminal, before hastily taking off.
* I, Grimlock, after being gifted with remarkable intelligence, also speak in this manner in the mirror universe.
* IGSRJ's review of Super Mario Bros. 3 shows Mario jumping and getting hit from below with a Podoboo (jumping fireball) and shrinking, and IGSRJ commenting, "Did I mention that Mario has a hot ass? Sorry, I know the joke was bad. I apologize."
* Iguanas and geckos are often depicted with long and sticky tongues like chameleons.
* Iguanodon fossils a couple of decades later, which drastically revised science's ideas about the animal and consequentially caused a drop in the Crystal Palace dinos' popularity.
* Iguanodon reconstructions for a long time also suffered from the "kangaroo stance"-fallacy. Later it turned out that they were indeed at least capable of walking on all fours. The latest reconstructions are nevertheless still a far cry from Hawkins' rhino-lizards.
* Iguanodon was built like a reptilian rhinoceros, complete with a horn on its nose. Once more complete remains were uncovered it was realized that it had a considerably lighter build, could likely switch between moving on two legs and four (previously it had been assumed to be entirely quadrupedal), and the "horn" was actually a misplaced thumb claw.
* I guess, framed him or her (by "proving" it was them who did it), and then released the suspected killer to the waiting hands of police while slipping away.
* I Guess I Became The Mother Of The Great Demon King's 10 Children In Another World
* I Guess It Doesn't Matter Any More are disrupted by running water, inconveniencing them even if they try to cross by riding in a truck over a bridge, and making it almost impossible for them to cross under their own power.
* "I Guess It Doesn't Matter Anymore", the above song by Blackmore's Night.
* "I Guess This Is Goodbye", "Maybe They're Magic", "Our Little World", "First Midnight", "Second Midnight", "Ever After", "So Happy", "Agony (Reprise)" and "No More". Interestingly enough, several cut songs appear in the scenes as background music where the songs were. Listen to the music as the Baker
* "I had a cocktail and Mary had a Moscow Mule." (the narrator's cocktail is a rooster's tailfeathers in a glass and Mary's "Moscow Mule" is an actual mule

sitting on a mug with thick
* "I Had An Accident" has a different way of something disappearing. When Patrick and Sandy are attacked by a gorilla (played by
* "I had a No 1 single with a song about a robot prostitute and no one knew." — Gary Numan.
* I Had Sex With All These Fish", which Peter doesn't notice, causing him to say a lot of unintentional innuendo when in a conversation with who he assumes is just a regular customer asking how he catches fish.
* I Had That Same Dream Again: Nanoka has a bit of an attitude problem and tends to look down on her classmates for not seeing things like she does, but on the whole she is optimistic, courageous, and tries her best to help and encourage people.
* I Had That Same Dream Again: Nanoka sees a forlorn-looking man sitting in a swing in a local park on a couple of occasions, then learns that it's Kiryu's father when she runs into the two of them together.
* I Had the Right to Remain Silent...But I Didn't Have the Ability with Devil!Ron egging him on while Angel!Ron conspicuously does nothing.
* I Harth Darth being a well-intentioned but understandably awkward dad to Luke and Leia.
* iHasCupquake evokes this trope passionately and often, especially with cute animals (virtual or not).
* "I hate babies! Almost as much as I hate hedgehogs!" in "Baby-Sitter Jitters", when he retreats in his drill tank.
* "I hate chili dogs and I hate that hedgehog!" in "Sonic the Matchmaker", after he falls victim to a stick of dynamite disguised as a chili dog.
* I Hate Dragons, takes place on a cubic world. All of the protagonists (except for one) are Sixthfacers and hence have random magical powers known as "knacks" (Skip, the primary character, can hear spelling and punctuation, and smells so delicious to dragons that they go crazy with the desire to eat him). One of the protagonists is a sorceress from Dawnface (the only face to have sorcery), while the dragons are known to have originated on Drakeface.
* I Hate Everything has ‘I Hate Halloween’ and ‘The Search for the Worst: Troll 2’
* I Hate Everything hates "everything", from terrible movies to specific fandoms to entire websites, all while maintaining a deadpan, but still angry tone.
* I Hate Fairyland... but at the same time, she's so murderous (if not outright psychotic) that she probably deserves whatever troubles befall her.
* I Hate Fairyland, but that's brought to a quick resolution when they're told that they'll all be paid equally regardless of who finishes her off.
* I Hate Fairyland is about a young girl who wound up stuck in the eponymous Fairyland and sent forth on a quest to unlock her way home... 27 years ago. While she hasn't aged physically, mentally she is now 33 years old and has been driven murderously insane after nearly three decades of failure and now goes around causing all sorts of chaos and carnage.
* I Hate Fairyland might be a subversion. While she looks 6 and can beat the living fluff out of anyone who has the gall to get in her way, she's really in her thirties when she's doing all that.
* I Hate Fairyland to end his misery, before waking up from the dream.
* "I hate happy endings and I hate that hedgehog!" in "Sonically Ever After", said near the end of the episode as he sees "Happily ever after, THE END!" being written by a red biplane.
* "I hate hedgehogs!" in "Robotnik's Pyramid Scheme" and "Honey, I Shrunk the Hedgehog", said by Robotnikhotep I in the former and Robotnik in the latter.
* I Hate Past Me: When a more experienced character meet their past selves and regret their previous actions.
* "I hate seafood and hedgehogs!" in "The Little Merhog", said at the end of the episode before getting eaten by a shark.
* "I Hate" Song: A song expressing cynicism and hatred for something or someone.
* I hate this damn computer. I wish that we could sell it. It won't do what I want it to. Only what I tell it.

* I hate this place. Nothing works here. The medications don't work. I've been here for seven years."
* "I hate those hedgehogs!" in "Prehistoric Sonic", when he, in his Supreme High form, gets knocked down by Sonic's clones.
* "I hate turtles! I hate Tails! I hate that hedgehog!" in "Full Tilt Tails", after a turtle eats the Speedemint gum before Robotnik.
* I Hate You, Vampire Dad: Hating someone who turned you into a monster.
* I Hate You, Vampire Dad: Someone turned by a vampire despises the vampire who bit them for turning them into a vampire.
* I Have a Dream speech is, in fact, Hope Mongering. It is also about as close as you can get to blaspheming against the history of a country.
* I Have a Family: A character pleads for their life by mentioning they have a family to care for.
* I Have a Family, yet somehow see no problem with slavery, murder, rape and doing all sorts of evil to others who have families too.
* "I have an Eiffel Tower in my pants." "What?" "GRAPEFRUIT!!" Turk says he learned a little bit of French, but most of it was intended to help him pick up girls. So the Eiffel Tower in his pants is... that, and the grapefruits are... those.
* "I have a problem, Mr. Anthony!" - Reference to John J. Anthony, who presented the daily radio advice program "The Goodwill Hour".
* "I have a problem, Mr. Anthony!" was lifted from John J. Anthony's daily radio advice program "The Goodwill Hour".
* I Have Boobs, You Must Obey!: A woman tries to use her breasts to persuade men.
* I Have Boobs, You Must Obey!) is enough to make them hand over suitcases full of money.
* I Have Boobs, You Must Obey!: Men kneel before my breasts! Mwahahaha!
* I Have Brothers: A female character who learned male oriented skills from her brothers.
* I Have Brothers: A tomboy who is good at manly things because she has brothers.
* "I Have Confidence" — Maria stops in the middle when she sees the sheer
* I have invented an universal acid which will dissolve just anything — glass, metal, plastics, anything!
* I Have Just One Thing to Say: A character chews another one out, then has one last thing to say... and it's positive.
* I Have Loved You So Long. When she is released, her father is dead, her mother is senile, her friends have cut off all ties to her, and her baby sister has almost no memories of her whatsoever. Despite this, the woman's sister takes her into her home and tries to become a normal family again.
* I Have No Mouth and I Must Scream adventure game, Nimdok fled to Brazil to continue his experiments.
* I Have No Mouth and I Must Scream, and still has tabs on all of them. To drive it home, Ellen's scenario includes a bank of monitors that lets her see parts of where she is, and everyone else's scenarios as well.
* I Have No Mouth and I Must Scream destroyed humanity, although his behavior comes from more intense, personal loathing than a mindless rampage.
* I Have No Mouth and I Must Scream expanded on Ellen's backstory by making her a rape victim in the past: Specifically, she was once assaulted by a man in a yellow repairman's jumpsuit in a halted elevator. AM uses this fact to his advantage in torturing her in the game, by decorating every environment with the colour yellow as a reminder of the event. However, the player is given the chance to help her conquer her fear and give her the strength to fight back against her rapist.
* I Have No Mouth and I Must Scream, Gorister's scenario starts inside a steampunk air ship. The ship lands in front of an abandoned gas station/truck stop, inside which Gorister has to face his inner demons.
* I Have No Mouth and I Must Scream. Gorrister's heart was removed prior to the events of the game, but as he's fond of pointing out, that old heart of his don't beat no more.
* I Have No Mouth and I Must Scream, he probably made his victims consume it as

part of some past torment.
* I Have No Mouth and I Must Scream himself put so much feeling into voicing AM that one review said that the name of the evil artificial intelligence ought to be renamed HAM.
* I Have No Mouth and I Must Scream in the earlier series of the show.
* I Have No Mouth and I Must Scream is set in a concentration camp (specifically Auschwitz), although any explicit references to the Nazis and the Jews are obfuscated by AM until the very end of the scenario.
* I Have No Mouth and I Must Scream, it's revealed that the supercomputer AM originally went mad when he realized that, for all his vast power and intelligence, he was still bound by his programming as a war machine, and couldn't direct his thinking away from destruction, warfare, and torture: already teetering on the brink of insanity thanks to his inability to move or escape his original complex, this additional constraint drove him into genocidal madness.
* I Have No Mouth and I Must Scream moments and he actually says all he feels is hate.
* I Have No Mouth and I Must Scream's systems projects its avatar as a yellow figure in a gold robe. It also acts as a trickster throughout the scenarios that each of AM's 5 human victims are sent into.
* I Have No Mouth and I Must Scream the cast is sent on by the evil AI, and thus it makes sense that they could not be opened by brute force.
* I Have No Mouth and I Must Scream this is part of the premise. The evil machine intelligence AM already succeeded in its war against humanity over a century ago, and so its only purpose now is to torture the last five human survivors endlessly as a means to cope with the sheer boredom of its eternal hate-filled existence.
* I Have No Mouth and I Must Scream" were each written the night before their deadlines.
* I Have No Mouth and I Must Scream when AM uses them (for example, a youth serum created via the deaths of countless Jewish children) to torture him and the other remaining humans.
* I Have No Mouth and I Must Scream) who murdered his own men for failing to meet his expectations.
* I Have No Son!: A family member (usually a child) being disowned is heartbreaking.
* I Have No Son!: Parents disown their child because they are ashamed of them or do not approve of the decisions they've made.
* "I Have No Son" (the episode where Rocko and Filburt try to reunite Ed and Bev Bighead with their estranged son) and "Wacky Delly" (the episode where Rocko, Heffer, and Filburt create an animated series that Ralph Bighead hopes will get him out of his contract), and
* I Have No Son!: You are disowned by your own family and banished from their home.
* I Haven't Had a Date in 4 Years, after a diary they found that had the sentence written all over it.
* I Have the High Ground, is talking about having a strategic advantage from a higher position, as well as a metaphor for "good will prevail over evil in the end because good has the moral high ground".
* I Have the High Ground moves. In Mexico, the Volador legacy gimmick came about by comparing an ancient Mesoamerican dance atop a pillar with ropes to stop people diving off from killing themselves, to luchadors standing atop ring post supported ropes.
* I Have This Friend...: A character asks for advice on how to deal with their problem, but claims that it's a friend of theirs who has the problem to avoid embarrassing themselves.
* I Have This Friend...: A character tries to get advice on how to deal with their problem, but claim that a non-existent friend has the problem because they don't want to humiliate themselves by revealing they have this problem.
* I have to admit, I've made a simple mistake or two, but I try not to get too upset about it.
* "I HAVE TO KILL FAST AND BULLETS TOO SLOW" actually manages to sound badass,

despite being one of the stupidest one liners ever.
* I have to lock the door when I leave my house overlooking Loch Ness.
* I have wined and dined with kings and queens, and slept in alleys chewin' on pork-n-beans."
* I Have You Now, My Pretty: The kidnapper makes it no secret that they want to do something sexual to their captive.
* I Have You Now, My Pretty: The villain has captured the girl and makes it clear they intend to have their way with her.
* I Have You Now, My Pretty: The villain has the girl in his grasp and doesn't even try to deny having unsavory intentions with her.
* I Have You Now, My Pretty: To remind the audience (and the hero) that I'm the villain, I'll tie up his girlfriend and lick her ear (or even worse).
* I Have You Now, My Pretty was commenting about the "S&M overtones."
* I Have Your Wife: Someone is manipulated into doing what the villain says because the villain captured this person's loved one.
* I Have Your Wife: The villain manipulates someone into doing as they say by capturing the person's loved ones.
* I heard a joke with similar punchline. It was about a dwarf who married a giantess, and then gleefully jumped up and down on her, shouting this.
* I Heard An Owl Call My Name, a doctor explains to a bishop that a newly ordained priest is terminally ill: a few active years left, then a few as an invalid. The priest dies during the novel, in an accident. Craven has said she doesn't know what he had.
* I Heard The Owl Call My Name, in which the protagonist is subjected to the named portent of death.
* "I heard you used to be a lawyer. Do you ever miss those days?". Cue hysterical laughter.
* "I hear scientists are replacing their lab rats with lawyers. One, the scientists were starting to get attached to the rats. And two, there are some things even rats won't do."
* I Heart Huckabees: A heart symbol is used in the title, and is the slogan of the Huckabees company.
* I Heart Huckabees. The director insists it's pronounced, "I Heart Huckabees."
* iHeartMedia is a major United States radio broadcast company that owns about 60% of the nation's broadcast radio stations. Their signature mobile streaming app is called iHeartRadio.
* iHeartRadio (formerly Clear Channel) has the "On the Verge" program, which takes obscure new artists and heavily promotes them through airplay on its stations, and usually boosts them to hit status. In pop music, the acts who have been taken this way include
* I ♥ Arlo Season 1 finale "The Uncondemning" ends with Arlo, his gang, and everyone at Seaside by the Seashore singing and dancing as they celebrate the community's Uncondemning party.
* I ♥ Arlo Season 1 finale when Arlo is ensnared in the Bog Lady's vine trap and hypnotized into staying with her forever.
* I ♥ Arlo: The episode "A Memory of Pizza" has Arlo's crew expect a visit from the Mayor of New York City to oversee their project of reopening Seaside by the Seashore; if she doesn't approve, then the place will be permanently condemned.
* "I Hear You Calling" has an alien using a ray to disintegrate people infected with a deadly virus.
* "I Hold Your Hand in Mine" sounds romantic, up to the lyrics "My joy would be complete, dear/If only you were here/But still I keep your hand/As a precious souvenir." And: "I hold your hand in mine, dear/I press it to my lips/I take a healthy bite from your dainty fingertips".
* iHome is an electronics company that makes docks and accesories for Apple's iPod and other devices.
* I Hope I Shall Arrive Soon, a passenger on a years-long space voyage is placed in a simulated reality to preserve his sanity. The ship's computer does its best to make an immersive experience, but the simulation keeps failing as the man notices

glitches.
* I Hope They Serve Beer in Hell, the number one of the characters asks someone to dial actually leads to author Tucker Max's real phone.
* I Hope They Serve Beer In Hell, Tucker Max recounts that he has easily had hook-ups in the "triple-digits", and estimates that he stopped remembering names somewhere around the 80-mark. Almost all of his stories have him being hit on by (and sleeping with) multiple women within the course of a day or so.
* "I Hope You Get Ugly In Heaven" is a power-ballad duet where Robby offers up some already skewed romantic sentiment ("I hope you get ugly in heaven/ 'cause you might love someone, someone like me"), which guest vocalist Heidi Lee bluntly rebuffs:
* "I Hope You're Happy" was composed but was considerably pared down until it only survives as a few throwaway lines at the beginning and end of "Defying Gravity".
* IHOP's summer 2019 ad for their line of burgers blatantly tries to push them as pancakes.
* I Hunt Killers: Jazz has to do this at least once in every book, usually both about Billy's own victims and whatever case is menacing him.
* I Hunt Killers, who at one point muses on whether it really matters whether or not a woman (always a woman) was raped before she is horribly tortured, mutilated and killed.
* I Hunt Monsters has the heroes dealing with a circus run by werewolves.
* II) are useful for gaining vision. Since nearly all Terran buildings have built-in rocket engines that allow them to lift off and fly around, a Terran player can use a lifted building (usually a barracks) as a beefy high ground spotter which can stand getting shot up quite a lot before it actually dies.
* II by being "fed" other items in Death's inventory, leveling up in power and, depending on what items were fed, can stack multiple different effects. Unlike most, these don't actually endanger Death in being used.
* II, Cloud's description of Sephiroth is "Silver hair, carries a big sword," narrowing it down to two traits that are incredibly common in their home franchise.
* Iida does strange, robotic hand motions (mainly chopping furiously) when he's trying to emphasize a point or is scolding someone, which emphasizes his role as
* Iida got the episode 'Fight On, Iida' in the same arc, later getting more focus in the following arc Vs Hero Killer.
* Iida's brother Tensei. It's noted that many other Pro Heroes suffered the same fate.
* II depicts a human footman commandeering an orcish catapult and using it to destroy a goblin zeppelin. In gameplay, catapults can't even attack zeppelins, let alone strike them down in one hit.
* IID gets used cynically again later in the show. Herc (who is white) causes problems for Tommy Carcetti (newly elected white mayor in a largely black city) when Herc use excessive force and humiliates a black preacher he arrested on false information Bubbles gave him. If Carcetti caves to the deacons who want Herc gone over this, he looks weak, and like someone who can be pushed around. If he doesn't, then he's a white man who doesn't care when a white cop pushes a pillar of the black community around. Burrell proves he's just as capable of playing political games by
* : "I... I don't know. I sort of sounded Greek, but all I got out of it was monsters. It could have also been hot chocolate, the jury's still out."
* II has Chun-Li's original ending, in which she visits her father's tombstone.
* III and IV have Fanorona and Nine Men's Morris mini games, and IV adds Draughts (Checkers) as well. All of these are complicated enough that you won't win unless you have a very good understanding of the game but not so complicated that your opponent can't be a
* III, an elderly hermit who is 140-years-young and still more powerful than the average young fighter in their prime. So much that he voluntarily disables one of his arms just to even the odds for his opponent.
* III composited them into a single "Onion Knight", a boy who has a gentle and thoughtful personality different from any of the four in the DS remake.
* III. Despite this, he still goes back to his position once the war is over.

* III from afar, by magic alone. Three measly bases should've been a breeze.
* III has done this, all of them with suggestive or violent names, such as "Burger Shot" (Burger King) and "Sprunk" (Sprite).
* III has multiple character point of views, many of whom have a Number Two in some way or form: Hugo has Sgt. Joe and later on, Lilly; Thomas has Cecile; Chris has Borus, Percival, and later, Nash; Geddoe's whole squad counts in various ways, but Queen is usually his second in battle; Sasarai has Dios; and finally,
* III, has radio advertisements talking about the dangers of children going on the internet. (see page quote)
* III, his appearance has changed and he boasts about how powerful he is... but his stats aren't any different from that of a typical level 10 Demon Hunter.
* "IIIIIIIIIIIIIIIIIIIIIIIII feel like a Private Eyyyyyyyyyyyyyyyyyyyyyyyyyyye!"
* III, not Miku (her roommate). Fortunately for her, said ghost doesn't harm or kill her, though the experience still leaves her feeling unnerved by it.
* III only features music and sound effects, with what little dialogue there is being delivered through subtitles.
* II is the one about him being a manifestation of John's subconscious.
* III, the main character whips out a bamboo ruler that transforms into a lightsaber-esque weapon near the climax.
* III, there are Chimera enemies who just like in the original Greek Mythology, have lion-like body with lion and goat heads and snake-like tail.
* III', there are Hippocampi, who are water horses with tails of fish, and lobster-like limbs.
* III, Uhura wears a skirt with her uniform for the first time since the Original Series. She would alternate between a skirt and trousers going forward.
* III, units' health will decrease from the cold and only recover after taking shelter in a cave or near a fire.
* III were retold, Sora, Donald and Goofy were dropped midway into the plot, interact with the cast before being sidelined leaving them to experience the moments in the background which often leaves several plot points unexplained for those who did not watch the original movie. Arendelle especially got it worst though particularly cutting out Hans' role, yet his Heartless still attacks you at the end for no apparent reason.
* III, while possessed, nearly kills Riku and gives a boss fight to Sora. When she gets un-possessed, her biggest showing afterward is getting taken down by Vanitas in a rather anticlimactic manner.
* III, you start off by fighting the leviathan, the apocalyptic living embodiment of the sea itself, as it is destroying the Titans who are climbing up Mount Olympus to wage war with the gods. Even more epic than it sounds. And then it's god slaughtering time.
* iilluminaughtii is a nonfiction Youtube channel featuring an animated pyramid person exposing real-life mlms and shady corporations. On multiple occasions, she has brought up times where shady corporations come into conflict with other shady corporations.
* iiNet 'i's to everything. Their offerings include iiBroadband2, iiPhone, and iiNetPhone.
* Iino and Osaragi have been friends since elementary school. Osaragi even appears to have been Iino's
* Iino and Osaragi, whose entire friendship is based on the fact that they were both outcasts in elementary school. This eventually causes their entire relationship to fall apart at the seams in Chapter 231 because the former now has a wider social circle and the latter has been a horrible friend for the past several months (if not since the beginning).
* i. In this case, the "i" refers to the system's cameras, which act as an "eye", while also reflecting the individuality of a handheld. Compare the Wii, whose name and two "i's" represent togetherness.
* II onwards have guard types called "Elite", but ironically these are some of the weakest guards in the game (ranking only above militia).
* IIRC, they actually showed that their lower halves (or rather, any part of their

body that goes below their waists) are simply
* II see. This doubles as a detection ability, since any cloaked or burrowed units in the target area of the Revelation will reveal their own location, as well as the location of any cloaked teammates that pass within their sight radius.
* /i/ is for either art/i/sts or /i/nsurgents, depending on which /i/ you are. (/i/ is either oekaki or invasion.)
* II, since Maxi is also constantly half-naked there. Unlike Kilik, Maxi stays a stripper for the rest of the series.
* IISuperwomanII, has hair that she could sit on. She's had people pull on it on-camera just to prove it's real.
* IISuperwomanII in the United States, right after business administration and nursing). She wasn't able to get a job in psychology that paid enough, so she wound up becoming a full-time YouTuber instead. Funny how things work out.
* IISuperwomanII". The first commercial parody is a medicine for sneezing.
* II, the player climbs on and inside a literal Colossus: the Colossus of Rhodes, and faces Titans so massive their bodies often ARE the stage.
* II trilogy both feature a scene where a person sitting behind the wheel of car gets struck with a drill that goes through the seat.
* II whose air-to-air attack range is slightly longer than their sight radius, making spotting a necessity to take full advantage of it. Oracles, described below, are especially useful for this purpose.
* I, Jedi, but he survives (with relatively little injury), and there are very few casualties.
* I, Jedi Corran Horn notices that when in a ysalamiri's field Luke seems younger and more optimistic, since not sensing the greater galaxy also means a reprieve from sensing his overwhelming responsibilities.
* I, Jedi has Corran Horn become furious when he sees a pirate gunning for a civilian landspeeder. Even later, when he's terrorizing a town full of mostly pirates, he does his right best to not kill civilians and those pirates who aren't so nasty.
* I, Jedi, is initially misused, making him green-haired from head to toe, and he has to call his old Space Cop partner for help.
* I, Jedi, Leonia Tavira thinks this of Corran Horn, who dyed his normally brown hair blond as part of his cover ID.
* I, Jedi massively tempted, briefly tries to rationalize it, then decides it's the Dark Side of the Force talking. But Tavira's made it clear she wants him as her boytoy and won't take "no" for an answer long-term (despite his cover story including a committed relationship), so Corran accelerates his plans to break up her pirate alliance.
* I, Jedi's effect - the bluff is that Luke has disabled the perp's Force powers, and is telepathically berating Corran for coddling the prisoner. All Luke has to do is stand there glowering, and an angry Skywalker, prequels notwithstanding, is a terrifying sight indeed.
* I, Jedi (something far beyond the resources of most pirates in the EU) unifies several pirate gangs under her command and terrorizes New Republic shipping. The Star Destroyer gives the pirates enough firepower to raid even the largest ships and crush most opposition. This means the only potential threat is a concerted attack by the New Republican Navy itself—and she's got a group of Force-sensitive advisers who give advance warning whenever such an ambush is being planned.
* Iji, after you have beaten the game once, you can use a switch to make the final boss much harder. This is literally done by activating the "make the boss harder" console accessible via teleport right before him. And the game even warns you.
* Iji also includes a timer for speedruns, and when new features are added, the author usually makes sure they won't affect speedruns. For example, skipping the fight with Krotera (possible from version 1.3 onwards) forces Iji to give Vateleika (offscreen) a ten-minute head-start, so speedrunners will fight instead.
* Iji. Alternately, the player can reset their skills with a hidden technique, then set their skills to be able to fire the Velocithor, which ignores obstacles. This

solution also gets the player the last Supercharge upgrade, though they then need to actually open the blast doors to collect it, rendering it pointless in a true pacifist run.
* Iji and cries things like "I'm sorry!" and "No..." the first few times she kills someone. If you decide to become an instrument of alien genocide, her quotes change to things like "Hah... YOU DIE!" and "AAAARGH!"
* Iji, a plant and some ants crawling over it in the (probably acid) rain is seen as part of the "humanity is not doomed" montage.
* Iji are all male. The only other named aliens are Tor, Vateilika, Ansaksie, Iosa, Hel Sarie, and Kiron.
* Iji are the only non-robot enemies the player can "kill" without it getting added to their kill count, because instead of dying, Assassins just throw in the towel and teleport away.
* Iji, as a fellow Komato thinks that Iosa's aggressive nature is not a good thing (not to mention that Iosa knows about her illegal weapon smuggling activities on the side).
* Iji as one of the switches is guarded by a boss who insists on fighting to the death.
* Iji: as the only projectile affected by gravity, you can use it to bomb enemies from the safety of an elevated platform. If you deliver the last blow to the final boss with it, then the boss will have a banana balanced on their nose in the closing cutscene, for no reason at all.
* Iji as though it'll grant you some spectacular badge or benefit upon beating the game. But ultimately, it's totally impossible: the exit is blocked off, because you're not actually Reallyjoel's Dad.
* Iji blatantly stutters when she lies. Fortunately, it matters little when talking to aliens.
* Iji bombarded Earth to make place for them running away from Komato that want to annihilate them completely.
* Iji designed to deal with large waves of forces, but has trouble with engaging single units.
* Iji dodge it, but it's not easy.) In a logbook before the final battle, it's mentioned that the Phantom Hammer is capable of completely obliterating a nanofield, which is presumably why it's so effective.
* Iji equipped with music players and that they play such unforgettable classics as "exploding eardrums that are also on fire" and "Hel Sarie will kick you in the face".
* Iji for her homeworld in turn. Then the Komoto show up and they all have to defend the planet against them.
* Iji, had great variety of powerful moves and would reflect explosive projectiles regardless of direction.
* Iji: Happens with a boss if you do a pacifist run, thus letting you stay pacifist.
* Iji has the Alpha Strike, but this one is pretty close to the actual Military Alpha Strike. See Real Life below.
* Iji have been working on this stuff for millions of years. Having nothing to do but make a super solider to fight off invading aliens was probably a big motivator.
* Iji have what is called the Alpha Strike, which involves a bunch of ships firing lasers at a planet. The Tasen use it before the game (at half power!) to kill almost all of humanity (along with most other life), and the Komato almost fire it at at full power near the end, which would have destroyed the planet.
* Iji, humanity is considered a pest at worst by both of the two alien races. To the point that the Tasen, upon invading, hardly bothered looking at human "neoweapon" research because it was still horrendously inferior to even their outdated weapons.
* Iji, Iji will talk to him and say that she was afraid he was killed, then leave him behind to recover. The horror sets in when you realize that you never heard him reply. It's confirmed in the scene after the final boss. Who catches on and immediately decides that he doesn't have the heart to break it to her.

* Iji, just in case you didn't have one yet. More acceptable than usual, since otherwise it would be impossible to win on the hardest difficulty level.
* Iji lets you upgrade no stats except health on its hardest difficulty—and since upgrading skills is necessary before you can acquire any new weapons, you are effectively limited to the puny starting shotgun, the resonance detonator, and the kick—but since your strength is also locked at one, the kick and the detonator will only affect turrets and weak doors (and the detonator is basically a longer-range kick), so you're really left with only the shotgun. You are still handed a resonance reflector right before the final boss that you can actually use so that you can damage him.
* Iji makes the implied crush on her even more explicit. When Asha's dialogue is more or less composed of "<3", "TOOT TOOT", "HONK" and other possibly dirty things, you can't help but think that Daniel Remar is seriously hinting at something.
* Iji — the enemy grunts are mostly identical, but a couple of them are given names, and the protagonist comes across journals, letters, and diaries written by them. The player's decision to kill or spare one non-descript soldier in Sector 3 affects her girlfriend's diary entries and the plot later.
* Iji Minigame Hero 3D. It's a very addictive action game in its own right, but upon reviewing some logbooks it is stated that one of the aliens programmed it in his spare time, and left it there in hopes that the "Human Anomaly" will be distracted enough by it that they can just walk up and capture her.
* Iji No one ever thought of both species peacefully staying on Earth.
* Iji of Earth by the Tasen, but it soon turns out that they're only here because they're on the run from the Komato, who have long been waging a war of extermination against the Tasen.
* Iji. Opening up single-sector play and running amok with a Velocithor is pretty fun too.
* Iji or pacifist; regardless, the final boss is awed by her determination.
* Iji-preventing shield generators, instead results in Iji being vaporized instantly and wiping her stats to zero, with nothing but silence left where she once stood. Then the game over music kicks in and the boss says his standard victory line.
* ijiraq, a shape-shifting creature that kidnaps children. No matter what shape an ijiraq shifts into, its eyes will always appear red.
* Iji soundtrack was intended for the game but not used due to Daniel Remar being unable to find a good place to put it.
* Iji standing right next to whatever thing you're trying to hack and, in fact, probably touching it, so it could just be zapping you. Also, doors mostly just increase their security, and supply crates will break or explode as retaliation, and enemies mostly just realize you're standing there and stop standing around in a peaceful manner. And maximizing your crack level removes all harmful effects of failure.
* Iji (straining poor Iji's already fragile sanity), you can read the logs the enemies leave behind. They vary between fear of the grunts, astonishment, and anger of the officers struggling to maintain the discipline.
* Iji... that are widely telegraphed, allowing a quick dodge and retaliation.
* Iji: The ally who contacts you throughout the game is normally killed in a cutscene towards the end of the game. By placing a trip mine in the right place, it is possible to interrupt the cutscene and have the enemy who kills him blown up instead. But it doesn't glitch the game: in fact, your ally has dialog written for the entire rest of the game entirely in case of him not dying as a result of this trick.
* Iji; the heroine, wakes up in room overrun with violent aliens. In the background are bloody handprints, and the word 'Help' written in blood.
* Iji, the Komato are the ancestors of the Tasen, and, although it's not clear how close they are to humans, first evolved on Earth, leaving without a trace some time before the halocene period.
* Iji, the protagonist's nanofield allows understanding and speaking in the

language of both alien species. It's also parodied with an item that messes up the conversation and speech.
* Iji, The Tasen and Komato use "cycles", "pulsecycles", and "starturns", although how they correspond to human units of time is unknown. Starturns would presumably be a Komato year, but since we don't know how long it takes their planet to orbit, it doesn't help much.
* Iji: The Tasen are soldiers fighting for the very survival of their species, and have rather professional voice lines when they spot an enemy (such as reporting an "Hostile!"). By contrast the Komato appear to have the time of their lives fighting, wear helmets with integrated kill counters, and are prone to yelling "Die!" or "Come here!" when they spot an enemy.
* Iji, when the Komato empire which the Tasen are fleeing from arrives to finish the extermination of their species.
* Ijuna: her Ether Gear, Red Destiny, allows her to control and manipulate a series of red strings: if the binds two people together with them they will forcibly fall in love with each other... but if the string is cut they will feel endless hatred instead.
* I Just Can't Wait to be King", Zazu (Caleb Hyles) dies of a heart attack during his solo, and is instantly fine a line later.
* I just remembered, I have a chicken in the coffee roaster! Gotta go make sure it's not overdone!"
* I just remembered I have to give my boyfriend his butt medicine every two hours or his butt will explode..."
* I Just Shot Marvin in the Face: Don't ever let a stupid person handle guns; they don't know anything about or don't care about gun safety.
* I Just Shot Marvin in the Face is about a group of kids messing around with an air gun. One of them gets shot in the eye with it, and killed.
* I Just Shot Marvin in the Face: Mishandling a weapon and forgetting about gun safety.
* I just, uh, wasn’t paying attention last night. It’s my fault," which is technically the truth (the Russians had lured him into a trap) but just enough of a lie that Karen and Foggy are led to think Matt walked into a door.
* I Just Want to Be Badass: Badassery being the quintessence of manhood in fiction-land, this goes without saying.
* I Just Want to Be Badass desire in young men. This makes sense since the job is usually quite dangerous and not especially well paid when you start out, so few people would be willing to sign up just to make a living.
* I Just Want to Be Badass: Generally how one gets into backyard wrestling is from watching WWE on TV or something along those lines and being inspired by the whole thing. Backyarders may or may not be interested in "going pro". Some may just want the experience of wrestling without actually choosing it as a profession or spending time and money in a wrestling school.
* I Just Want to Be Badass. Only then can you claim the crowning titles of "manly" and "respectable".
* I Just Want to Be Beautiful: A character wants to remain or become beautiful.
* I Just Want to Be Free: A character's greatest desire is their freedom.
* I Just Want to Be Free: A character wants freedom from some sort of bondage.
* I Just Want to Be Normal: A character living an abnormal life wants to live a life without excitement.
* I Just Want to Be Normal: A hero or an extraordinary person wishes that they could have a normal life.
* I Just Want to Be Normal also goes back to his mom. The demon deals thing is just a family tradition at this point. They even spread it to the adopted members, and back to people who died before they were born.
* I Just Want to Be Normal: A superhero or extraordinary person wishes that they had a normal life.
* I Just Want to Be Normal, Reed Richards actually tells Thing that the universe will never let him become human again for very long because that would make his story less interesting.

* I Just Want to Be Normal: Some heroes or villains don't really want to have special powers, or at least desire to have safe and normal lives like regular people do.
* I Just Want to Be Normal: Special powers prove to be too overwhelming to deal with.
* I Just Want to Be Normal-type villains, notably the Rhino on Spider-Man's side of things and Killer Croc on Batman's, have this as their go-to motivation for knocking over a bank or taking some hit-job.
* I Just Want to Be Normal: When a character thinks that whatever makes them different is a curse.
* I Just Want to Be Special: A character living a mundane life wants to be more exciting.
* I Just Want to Be Special, but also because he desperately needed some kind of family unit. When he fears he's losing his friends, he ends up inviting fans of his over to the tower, which ends up in disaster and causes him to become even more alienated. This is used against Eddie by Clock King when he brainwashes him into a violent monster, and Miss Martian has to remind him that he does have friends in order to bring him back to sanity.
* I Just Want to Be You: A character wants to literally be the person they envy.
* I Just Want to Have Friends: A character or a person who wants friends.
* I Just Want to Have Friends: A solitary character longs for friends.
* I Just Want to Have Friends: Someone becomes desperate for friendship.
* I Just Want to Have Friends: This loner wants to have people with him.
* I Jzerbroot's chef of the Dutch Intelligence Service has a huge jawline.
* Ika herself treats an umbrella she's given with a similar reverence, and is equally devastated when it's blown out of her hands and destroyed by a passing car.
* Ikariam however when it became possible to outright buy resources with Ambrosia, effectively allowing players with spare real-life money to just buy supplies rather than gathering them.
* Ikarie XB 1 (1963), set on a lengthy mission to Alpha Centauri. While everyone else is eating what looks like high-class ready meals, one man gets a large pill.
* IKAROS) space probe was launched in 2010. It was the first spacecraft to use a solar sail as its main method of control (a traditional chemical rocket placed the probe on its Venus flyby trajectory) and was the first interplanetary solar sail spacecraft. The craft's journey to Venus was intended to test the sail's control system - LCD panels on the sail itself can adjust their reflectivity, giving the craft a method of attitude control. Cycling the panels on and off also allows the spacecraft to control its rotational speed. Since its launch in 2010, IKAROS has completed its original mission successfully and now orbits the Sun once every ten months, periodically waking up and transmitting data back to Earth.
* Ikaruga, a reserved and proud assassin who uses her katana to send slashes through the air that slice through all of Erza's armors as she tries to slaughter her, qualifies.
* Ikaruga boils down to just shooting three enemies of the same color for chains.
* Ikaruga has an equivalent sequence at the start of each level where the player's ship accelerates to intercept the enemies while the music kicks in.
* Ikaruga. It features the same color change light/dark mechanic where you have to absorb orbs of your color, and swap colors on demand to avoid special attacks.
* Ikaruga, loops just its final phrase until the credits finish rolling. It doesn't help that the Xbox Live Arcade version's credits run on longer than other versions.
* Ikaruga mentions this, and argues there's no way to stop it. He seems to be uncertain if your awareness is even of such level that you can understand everything that's going on.
* Ikaruga port, were Japan-only. The GameCube port was made for international markets in 2003, two years after its original release.
* Ikaruga? Prepare to spend endless hours practicing and memorizing chains, giving yourself absolutely no freedom as to how to play.
* Ikaw Lamang revolves around two generations of the Hidalgo family of sugar barons.

* IKEA also hit the news in Czech Republic when their ads announced the "sale of Hoven" (a carpet named after a Swedish town). In Czech, "hoven" is plural genitive case form of the word meaning "shit". The name by itself wasn't funny for grammatical reasons and the sale announcement was the first time the name could be interpreted as a meaningful Czech word in official ads. The carpet was later renamed to Fare in Czech republic.
* Ike also gave the finger after Cartman rejects him when auditioning for the boy band.
* Ike and Soren had met years ago, and Ike did not remember the first time that he met Soren, although Soren remembered in vivid detail. It was not until near the end of
* I, Keano, which led to Keane going or being sent home and not playing in the tournament. During the production's first run, three major cast members—including Mario Rosenstock, who played "Keano"—publicly left the show.
* IKEA once sold marshmallows called Godis Skum, which sounds a lot like 'God is scum'. ("Godis" just means candy—basically "goodie"—and "skum" means foam or froth.)
* Ikebukuro. Something is always happening whether it's a gang war, Slashers, or vending machines flying through the air.
* Ike: Countdown to D-Day. The film made a point of showing Montgomery's (historically true) prohibition on smoking in his headquarters or at meetings he's attending, even to the point that Eisenhower, his superior in the Allied chain of command, wasn't allowed to light up. During the briefing for Operation Overlord given to King George VI, the king pulls out a cigarette, much to the distress of Monty who clearly isn't willing to tell his monarch that smoking is banned in the building. Immediately almost all the other senior Allied commanders, including Eisenhower, start smiling and also light up.
* Ikeda Sen was a 16th century Onna-bugeisha (female Samurai) who fought in several battles as a member of the Toyotomi Army. At the Battle of Shizugatake in 1583, she commanded a 200-strong musketeer unit consisting entirely of women.
* Ike has this attitude when Mist joins along with Rolf in Chapter 9. He quickly gets over it, though he remains protective throughout the rest of the two games. Justified in that she's his only living blood family left.
* Ike himself as well, though more out of lack of social skills initially. He really is never one to mince his words, whether it be sarcastically bursting someone's bubble, or telling off the senators of Benignon out loud in front of all of them to hear.
* Ike Ike! Nekketsu Hockey Bu, the Nekketsu Hockey Team can wear the uniforms of defeated rivals. Among them are an all-girl school team who wear white blouses and red plaid skirts.
* Ikemen Revolution, this happens in most Black Army routes with the entirety of the Black Army (except Luka, who's usually too innocent to realize what's going on) quickly catching on to the UST between the MC and the Black Army officer she has her eyes on. In Fenrir's route in particular, the Everyone Can See It nature of their feelings actually extend to Fenrir and the MC themselves who are fully aware of their mutual feelings for each other but pretend to be ignorant about them because they don't want to break the promise they made at the beginning to not fall in love so that the MC would be able to go back to her home in London at the end of the month with no regrets or sadness.
* Ikemen Sengoku avert this trope, however, by falling for Sasuke instead who came from the same time as her.
* Ikemen Sengoku can mistake trees for people without his glasses. In one route, Kenshin even pilfers them specifically to prevent him from escaping, but luckily Sasuke has a spare pair and a friend who can get them for him.
* Ikemen Sengoku, causing him to become so overwhelmed by his feelings for her that he impulsively kisses her while they're still in the middle of a battle. The MC describes their kiss as being hot enough to scorch away the entire battlefield.
* Ikemen Sengoku, despite the 500 years between them, the only language issues that

come up are when the main character or Sasuke use modern reference or when the main character struggles with reading books written in the ancient script.
* Ikemen Sengoku, every route has Nobunaga Oda order the other Azuchi warlords to split up into two teams to deal with the Takeda-Uesugi alliance and Kennyo's behind-the-scenes manipulations separately. The main character, who time-traveled from modern-day Japan and has no personal experience with real-life battles, thinks to herself in one of these routes that "splitting up is what gets everyone killed in a horror movie", but also that the seasoned warlords know better than her how to handle situations like this.
* Ikemen Sengoku figure it out, her ensuing laughter is often over how bad and/or random his jokes are.
* Ikemen Sengoku has a variant in Hideyoshi's route where the main character doesn't try to hide from Mitsuhide that she's the one who needs advice but she does try to hide from him that it's Hideyoshi who's the source of her love-related problems. Mitsuhide isn't fooled for a moment.
* Ikemen Sengoku: In Sasuke's route, the main character realizes early on that Sasuke has to be spying for the enemy side but they avoid discussing it because she doesn't want to lose him as a friend and he doesn't want to put her in danger by telling her too much.
* Ikemen Sengoku, it's revealed in Sasuke's Dramatic route that the normally stoic, intelligent, and rational Sasuke has a deep fear of butterflies. The main character, upon learning this, tries and utterly fails to hold back her laughter.
* Ikemen Sengoku kind) of that game just by looking at him and the giant scar running across his face, especially in contrast to Shingen and Kenshin who oppose the main character's Azuchi friends but have unscarred countenances and are depicted as more honorable and less dangerous than Kennyo.
* Ikemen Sengoku makeout sessions between the main character and her love interest, and telling the main character blatant lies or provocative statements just to see her "interesting" reactions.
* Ikemen Sengoku, Mitsunari has enough of a reputation for this that the main character dreads having to eat a rice ball he personally chose the filling for in one story event. The filling turns out to be a mixture of red-bean paste and strawberries which, while tasty in a daifuku mochi, is not so tasty when combined with the salted vinegar rice shell of a rice ball.
* Ikemen Sengoku of the Oda forces and want to either bait the Oda forces into waging war against them for her or torture and kill her in front of her love interest to break his spirit.
* Ikemen Sengoku: On Ieyasu's route, Nobunaga gives the player character this kind of "choice" at a war council about the identities of their enemies.
* Ikemen Sengoku: On some routes, the female main character gets an affectionate nickname from her love interest; "kitten" from Masamune, "goddess" or "angel" from Shingen, and "little mouse" from Mitsuhide.
* Ikemen Sengoku or sleep whenever he's absorbed in reading or some other activity that he's passionate about, causing his friends Hideyoshi and Masamune to have to constantly look after him to make sure he gets proper meals and rest.
* Ikemen Sengoku, Sasuke and the female main character have to keep their identities as people who got sent back in time together from modern-day Japan to the Sengoku period a secret, so Sasuke tells anyone who asks him how they know each other that they come from the same "hometown". He also tells someone who doesn't like Nobunaga Oda in one route that the MC is working for a warrior family after going on a pilgrimage to Kyoto, which the MC notes is technically true in that the "warrior family" is Nobunaga Oda's forces and her "pilgrimage" was a time-travel trip.
* Ikemen Sengoku seems to make it his mission to use the cheesiest pickup lines imaginable on the female main character. Much to the MC's dismay/exasperation, he's good-looking and charming enough that his pickup lines still work on her even though she knows how ridiculous they are.
* Ikemen Sengoku Sengoku warlord who doesn't clash with the MC's beliefs and/or threaten to kill her at some point.

* Ikemen Sengoku, several of the main character's potential love interests fit this trope, especially Nobunaga Oda who's known as the "Devil King of the Sixth Heaven" and Masamune Date who's wild, flirtatious, and more than a little dangerous. The main character even explicitly notes this trope on Masamune's route with her thoughts on how "I had become the princess in love with a bad boy, and I had no regrets."
* Ikemen Sengoku's role. Most routes have at least one scene of him using a smoke bomb to help his allies escape or giving the main character one of his smoke bombs that she uses later on to help save her love interest.
* Ikemen Sengoku that route's love interest develop one-sided feelings for the female main character. Fortunately, in almost all cases, that guy is content to step aside and let the main character be happy together with the man she loves, including even normally manipulative/villainous guys like Mitsuhide and Kennyo.
* Ikemen Sengoku that the man she's becoming interested in is one of Nobunaga's sworn enemies.
* Ikemen Sengoku, the female main character is sent back in time from modern-day Japan to Sengoku-era Japan where she experiences cultural shock about how different the Sengoku warlords' viewpoints on wars and relationships are from hers. Sasuke, an astrophysicist who was sent back in time along with her, also experiences this but was sent back to a time four years earlier than her so by the time they meet again at the end of these four years, he's acclimated enough to the period to not qualify for this trope as much as her.
* Ikemen Sengoku: The main character who was sent back in time to Japan's Sengoku period initially plans to spend only the three months in it needed to wait for the wormhole that forcibly sent her to manifest again, but her growing attachment to the friends she's formed in that time and her developing feelings for one of the men there too eventually cause her to decide to stay in the past. Sasuke, who was sent back in time with her too, also makes the same choice as her to stay in the past in most routes.
* Ikemen Sengoku the reason behind him seeing her this way and just thinks that he's suffering from some strange eye condition.
* Ikemen Sengoku, this happens in several routes with the female main character and the warlord of her choice:
* Ikemen Sengoku, this happens on several routes. Regardless of the situation or character, it never works for very long.
* Ikemen Sengoku to the female main character after he gets past his initial suspicions of her. In most routes, their relationship is genuinely platonic, but in his route their growing romantic feelings for each other make it increasingly impossible for them to keep treating each other as only "family".
* Ikemen Sengoku. When a wormhole sends him back in time to that very same Sengoku period, he can barely restrain himself from BSODing with fanboy glee whenever he crosses paths with one of these warlords in spite of him working on the opposite side of most of them. One hilarious scene in his route has him rope the female main character into chasing Ieyasu through town just to get his autograph (all while Ieyasu has no clue why some weird guy wants him to write his name down on a piece of paper).
* Ikemen Sengoku, who promptly kicked his ass and gave him a lecture on wasting his life instead of trying to better himself that inspired Hideyoshi to turn his life around and work his way up to become Nobunaga's right-hand man.
* Ikemen Sengoku who wears an eyepatch over his right eye. He becomes even more badass when you learn the story behind his eyepatch: he lost his eye to smallpox when he was younger and after angsting about it for a while, decided to just cut short his self-pity party by asking one of his subordinates to cut the entire eye out for him. The female main character even thinks that "anything sounds good coming from a man with an eyepatch" in regards to him.
* Ikemen Vampire, when Arthur got a pet dog from a friend, he made a big show of naming her after Queen Victoria on the spot and didn't realize until he got home that "Victoria" was actually male. Not wanting to admit his mistake, he just shortened his name to "Vic".

* Ikenfell (the main playable characters are non-heterosexual and/or transgender, there are several supporting LGBT characters)
* Ike Perlmutter, chairman (formerly CEO) of Marvel Entertainment, appears to have this. He has acquired such a stake in Marvel thanks to his toy company helping the comic company get out of bankruptcy that Disney can't fire him despite virtually no one in the company liking him thanks to his excessively cheap ways (
* Ike seems to be a magnet for these. Much earlier in the game, while he's running errands for the Apostle, a maid mistakes him for hired help and starts chatting him up, telling him about the
* Ike's inner circle among that remain cutscene relevant. The heads of the Greil Mercenaries, and their Laguz
* Iketeru Futari gets tons of men fawning over her because of her large breasts, and even gets her a modeling gig. Ironically they don't help at all with her romantic pursuits. Her childhood friend, Saji, whom she's been in love with for years, only has eyes for the more slender Koizumi. She eventually gets over him when she gets a new love interest and boyfriend named Kaede, who happens to have a phobia of breasts. He gets over it to some degree but she notes that he loves her in spite of her breasts.
* Iketeru Futari, Saji steals a scooter from his friend Urawa to chase his would-be girlfriend Koizumi, who's taken a taxi. Especially troublesome for Urawa, since he was working at the time.
* "I kicked a burning terrorist so hard in balls that I tore a tendon in my foot."
* Ikigami. The National Welfare Act was passed was to deal with underage crime.
* Ikigami: The Ultimate Limit - a Chosen receives the titular document 24 hours before they are killed by the nanocapsule imbedded in their heart rupturing. Each Episode revolves around what that particular Chosen chooses to do with that time.
* Iki. He has outstanding Physical Defense, and higher than average Physical Attack, but his Speed is subpar.
* Ikiki too. In his games, there are many protagonists and enemies that don't wear any clothing.
* I Killed Adolf Hitler, living in a world where murder is legal. His last contract is the Fuhrer.
* I Killed Adolf Hitler the hero sees himself naked in front of Hitler. No wonder he wakes up screaming.
* I Killed Adolf Hitler the main character follows his former girlfriend's new date, and even pulls out a gun, but decides against it.
* I Killed Adolf Hitler to end up together, alive, in the present, but as old people.
* I Killed Adolf Hitler, waiting for the day the time machine arrives so he can stop Hitler.
* I Killed the Hero?! in a game. Many of them are concerned over the story starting because the starting town always gets demolished at the beginning of the game.
* "I killed the last honorable man 15 years ago." Bill is a nativist who would like nothing more than to see all Irish-Catholics thrown out of America.
* I Kill Giants has the central message that "We're stronger than we think".
* Ikiru: Watanabe dies at night, in the rain, sitting on a child's swingset. But the mood of the scene is peaceful and even a little bit triumphant: he is enjoying being in the park he dedicated his last days to building.
* I Kissed a Girl" has the girls performing the homonymous song during Santana's coming out, immediately after attacking a boy for not taking lesbianism seriously. While the song is actually about bicuriosity, all of the lines that explicitly refer to that aspect (like the ones mentioning a boyfriend) are given to Rachel, who is straight.
* I Kissed A Zombie And I Liked It, the female protagonist Alley falls in love with a Goth called Doug who turns out to be a zombie.
* I Kissed Dating Goodbye as "Do volunteer work as a substitute for having a significant other" instead of the intended message of "Do not forget about spirituality (including, but not limited to, serving others) simply because you wish for romantic love".

* I Kiss Your Foot: Kissing someone's foot, which may not be sexual, but often is.
* Ikizukuri, translated to "Prepared alive", involves a chef butchering their meal (usually a fish) in such a way that it's still alive when served; depending on where you eat, they may put the heart on display in an easily viewed spot, still beating away for a few minutes.
* Ikkakumon is a particularly odd example, being a mash-up of various arctic animals (Polar Bear, Walrus, and Narwhal).
* Ikkaku once explains to his opponent that the first thing Shinigami are taught when they learn how to fight is to always practice the custom known as 'the Last Courtesy'; this ensures that a Shinigami's opponent will always know the name of the person who killed them in battle. Some Arrancar practice something similar, but it's an act of individuality for them — not all Arrancar believe in it, such as Ikkaku's opponent, Edorad. It is seen as extremely arrogant and rude when Byakuya refuses to give his name to his opponent, telling Zommari there's no point giving it to someone who is about to die, and when Mayuri asks for his opponent's name just so he can label the experiment jar he'll place Szayelaporro into.
* Ikkaku's bankai functions according to this principle. When he first activates bankai, his power is not at a level that would be considered typical for a bankai. He first has to strike his opponent and/or cut his opponent before his bankai starts to awaken. Even then, he has to wait for the dragon crest on his blades to fill completely with the colour red (like a power gauge) before he finally has access to his full bankai at proper bankai-level strength.
* Ikkaku's eyes glow when he activates bankai against Edorad. It does not end well for Edorad.
* Ikkaku's sword is unpredictable, dangerous, and incredibly powerful. However, it breaks easily because its shikai form is a wooden spear, and the bankai's overpowered force makes itself brittle. Ikkaku is refusing to use his power correctly and has been chastised for that by Iba. It's heavily implied that his misuse of his power is why the weapon keeps breaking so easily; the Zanpakutou inventor, Nimaiya, openly tells Renji and Ichigo that Zanpakutou which are not correctly used will break easily. Ikkaku himself is not this trope, having immense stamina and the ability to shrug off wounds with sheer willpower.
* Ikkaku Tachibana relies on Slash Draw, which discards cards from his deck equal to the number of cards on the field, then lets him draw a card, and if it's another Slash Draw, he destroys every card on the field and inflicts 1000 damage to his opponent for each one. He never fails, though it's revealed that he achieves this with a
* Ikki's abusive family repeatedly tried to sabotage his matches with tactics like imprisoning and poisoning him shortly before the matches, but he would overcome this and win anyway.
* Ikki Tousen) are destined to fight and die in the same battles, in similar ways.
* Ikki Tousen but Seitou generally has to rely on Kan'u or Chou'un to repulse any concerted assault.
* Ikki Tousen, but she then gets picked up by her head and gets slammed into a wall. Her head basically gets crushed like a grape and explodes in a bloody mess.
* Ikki Tousen changed for Season 2 after dubbing moved from New Generation in Los Angeles to Headline in New York. When FUNimation licensed Seasons 3-4, they chose to get the better-received Season 1 cast back, although some members of the Season 2 cast did return if their characters debuted in that season.
* Ikki Tousen does little to improve his situation — her first reaction to him declaring his intent to protect her even at the cost of his own life, is to ask if he's eaten something strange...
* Ikki Tousen episode, Kan'u asks if Ryuubi does love her. Ryuubi says yes, which causes Kan'u to feel like she's in heaven… until Ryuubi continues that she likes the rest of the school members (Chouhi, Chou'un, Koumei, even Kouchuu)… which instantly petrifies Kan'u.
* Ikki Tousen featured Hakafu kicking the camera for the "going to commercial" eyecatch, followed by her skirt lifting, giving us a panty shot for the "back to show" eyecatch. 2nd-4th seasons feature still images of suggestive poses and

revealing attire on the female characters while rock music plays.
* Ikki Tousen, good God. Pretty much every person that gets any amount of time can be seen fighting at some point or another (and that's counting the minor ones).
* Ikki Tousen Hakufu Sonsaku is considered to be the worst fighter of Kanto. Despite that, she's also the strongest of the fighters and has rarely ever been defeated. She's even the leader of Nanyo Academy.
* Ikki Tousen: Hakufu Tousen never holds grudges, always comes to her friends and family's aid, and is against the idea of violence and killing against her opponents. This could be attributed due to her being a ditz.
* Ikki Tousen. In the manga, there is actually more women commenting and lusting after men than the inverse. Even Kan’u has expressed her idea on what a man of valor should be; the pacing of the manga is much slower as the setting takes itself more seriously and the violence is much more graphic.
* Ikki Tousen Kakouton (Xiahou Dun) is one of them, specially when they meet Hakufu's mother Goei (Lady Wu) and she flirts with him. He isn't amused.
* Ikki Tousen Later, Kan'u Unchou (Guan Yu) is shown to be one of this for her leader and friend, Ryuubi Gentoku (Liu Bei).
* Ikki Tousen or threaten her directly, and you'll have her prove that she can defend herself rather well.
* Ikki Tousen Ryuubi's own friends Kan'u and Chouhi. and Ryoumou almost being slain by Ten'i and her arrows.)
* Ikkitousen's first season had 13 episodes. It later got another three seasons of 12 episodes each.
* Ikki Tousen shipped its collector's edition box with a pair of girl's panties.
* Ikki Tousen. The distributor was gunning for a lower rating, and ended up ultimately canceling the release out of fear the M rating would impact sales.
* Ikkitousen uses this with Hakufu's mother. She remarks that either the young man at the coffee shop or the convenience store must be talking about her, but it's actually her daughter insulting her.
* Ikki Tousen usually avert this trope. Hakufu, one of the protagonists, will be mostly or entirely topless in her average fight against a challenging opponent. There are examples of those who play the trope straight as well.
* Ikki Tousen was portrayed like this in the manga, although the anime actually upped her stupidity by a large degree to the point of exaggeration.
* Ikki Tousen, when one of the characters was stabbed in the spine. The doctors said that he may be permanently paralyzed and never wake up from his coma. Then, at the last few minutes of the show, said character raises his hand into a fist.
* Ikki was in elementary school and tended to be ignored by the girls. He saw a shooting star and wished to become popular with girls... and he was given
* Ikkyu-san features Ikkyu Sojun, a Japanese Zen Bhuddist monk, as the protagonist at age ten.
* Ik Mik Loreland: Huiverhuizen ("Chillinghouse"), one of the lands visited by Mik, is a creepy swamp.
* Ik Mik Loreland: Mik comes across a Cat Woman living in the Mazeworld of Doolgaarde.
* Ik Mik Loreland: Mik has a serious blind spot whenever she finds herself in a situation reminiscent of a fairy tale.
* Ik Mik Loreland: Mik travels from Loreland to Kratermaan by jumping into the town well and emerging from a water-filled krater on the other side. It's sort of implied that Karbonkel used his magic to create this portal.
* Ik Mik Loreland no one is physically hurt, but all the letters disappear from the main character's colorful homeland, everyone forgets how to read and write, everyone's clothes become plainer, and the place just generally looks like it's been sent back to the dark ages.
* I Knocked Up Satan's Daughter, the afterlife is described as being as diverse as Earth.
* I Know All About It. The main character receives a visit from her younger sister, who confesses to being the woman who had sex with the main character the previous night. The main character then says that she knew about her younger sister's

feelings for her, and that she went along with it because she reciprocated those feelings.
* "I know a lot before a start an action. I know a lot about the necessity of the general idea of sculpture, but I don’t know anything about the process in which the action will run. When the actions runs, my preparation works, because I am prepared to do a thing without knowing where it goes. You see, it would be a very uninteresting thing – it would have nothing to do with art – if it were not a new experiment for which I have no clear concept. If I had a clear concept of solving the problem, I would then speak about the concept and it wouldn’t be necessary to make an action. Every action, every artwork for me, every physical scene, drawings on the blackboard, performance, brings a new element in the whole, an unknown area, an unknown world." (Interview with Kate Horsefield, 1980, as quoted in Energy Plan for the Western man - Joseph Beuys in America, compiled by Carin Kuoni, Four Walls Eight Windows, New York, 1993, p. 73)
* I know an old lady who swallowed a fly... and an increasing sequence of critters each swallowed to catch the previous one.
* I Know Black People was that they would get the answers right because the answers to the questions would frequently be basic answers like "I don't know".
* "I Know I'm A Wolf" by The Young Heretics uses a wolf and rabbit as a metaphor for
* I Know Karate moment, and his actor had clearly very little stage fighting experience. They must have worked on it in the off-season break, as he's much, much better in season 3.
* I Know Madden Kombat: When the Improbable Weapon is a sport implement (for a non-combat sport, that is).
* I Know Mortal Kombat: Learning and performing extraordinary feats from watching movies, playing video games, etc. In real life, this can happen, though the success rate varies.
* "I know the Kings of England" — Quite impressive today, but at the time being able to recite the line of regents was part of middle school history.
* I Know This Much Is True" Ray, Dominick's stepfather is stern and even physically abusive. He is very much seen as the evil cillian ruining their family while Dominick is a child. But towards the end of the book, when Dominick is in his forties, he actually comes to begrudgingly appreciate Ray for supporting and Raising two kids that aren't his. Even as an adult, after his mother has died, Ray continues to be there for him when he really needs help.
* I know we have a trope for difficulty increasing in sequels, but apparently neither
* I know what I have to do", always spoken by Kylo Ren at a hugely significant moment for his character.
* I Know What You Did Last Summer, a 1997 slasher horror, received an 18 rating from the BBFC when released in cinemas, for its 'strong horror and violence'. On video this was downgraded to a 15, due to the effects being "considerably diminished on the small screen".
* I Know What You Did Last Summer features an intergender example with the crazed fisherman killer Ben Willis obsessed with killing the teenage Julie James and her friends for accidentally hitting him with their car.
* I Know What You Did Last Summer for being "too soft". He hit the gym and bulked up, also getting a haircut to win the part.
* I Know What You Did Last Summer has its four leads discussing different versions of the Hook Hand story (see below under Folklore) while drinking and making out on the beach.
* I Know What You Did Last Summer is parodying, opens with Helen winning a local beauty contest - to become the Croaker Queen. She wears the crown all night.
* I Know What You Did Last Summer, since what the characters did was try to dispose of the body of a hit-and-run victim.
* I Know What You Did Last Summer tells this to Helen when Helen calls to find out what time Barry is picking her up for their date.
* I Know What You Did Last Summer trilogy has a group of teen accidently killing a

man well drunk driving after a fourth of july party. He comes back during around the same time next year seeking revenge.
* I Know What You Did Last Summer when he swims away (They all do, really, but he totally crosses the line more than they do).
* I Know What You Did Last Summer with Julie, though her love interest Ray survives both films as well. Notably in the book it was based on, no one was killed off. Julie is also made into a straighter Final Girl than her book counterpart - in the book she's a red-haired cheerleader who was previously a slacker and only just buckled down in her schoolwork towards the end.
* I Know What You Fear: Great! Someone's gonna use my fear against me! I fear they're gonna tell everyone!
* I Know What You Fear: The ability that helps a someone discover what people fear.
* I Know Where I'm Going! has Joan Webster who clearly loves her father very much, and calls him "darling".
* I Know Where I'm Going!, Joan Webster has to choose between Robert Bellinger, the owner of Consolidated Chemical Industries, or Torquil MacNeil, the poor laird who has to rent his beloved Kiloran to Bellinger.
* I Know Where Im Going there's a bunch of UST between our main characters, Joan and Torquil. To add to it, Torquil recites a Scottish folk song to Joan.
* "I know who I am! I'm a dude playing the dude disguised as another dude!"
* I Know Who Killed Me, nor are they particularly foreboding. They're just there.
* I Know Why the Caged Bird Sings. After molesting her, the bed got wet and he poured a glass of water over the wet spot, telling her that she wet the bed. She got confused because she knew that she didn't wet the bed, and yet she didn't say anything to contradict him. He manages to ensure that this situation of her sleeping with him continues and no one suspects him to be the pedophile that he is until he violently rapes her and her mother finds her bloody underwear that she hid.
* I Know Why the Caged Bird Sings due to her fear of the power of her words.
* I Know Why the Caged Bird Sings in Saint Lousis, though it's an autobiography.
* I Know Why YouTube Went Down the Other Day, published within a week of the site's September 2018 crash, involves a kid messing around with an omniscient chatbot.
* I Know You Really Love Me. Typically the affected person believes that a secret admirer, usually a stranger, high-status individual, or celebrity, is sending secret signals of affection through significant glances or telepathy. The patient then returns this perceived affection with a flood of gifts and notes, believing that any denial of the relationship is a ploy to conceal their forbidden love from the rest of the world.
* "I Know You're in There Somewhere" Fight, as your friend is dying from their injuries anyway and if you don't, they'll kill both of you.
* "I Know You're in There Somewhere" Fight: Battling a transformed or corrupted friend while trying to reach the goodness inside them so that they'll overcome their transformation or corruption.
* "I Know You're in There Somewhere" Fight: Fighting a corrupted or transformed friend while trying to get the good in them to overcome the evil inside them.
* "I Know You're in There Somewhere" Fight: Someone tries to get through to a friend that has transformed or been corrupted and forced to fight them.
* I Know Your True Name: Someone or something's real name is important.
* I Know Your True Name: The Egyptian goddess Isis tricked the sun god Re into revealing his true name to her, thus gaining power over him.
* Ikoku Irokoi Romantan. Gondou, who is straight and in love with Kaouru, is tempted by him.
* ikon into a tube, not with a vacuum cleaner, but a hand-pumped air cylinder. This only works on amorphous ayakashi, whereas Shirogane simply got his tail caught in the nozzle. Paper talismans wrapped around the tube keep the ayakashi inside—until it breaks out because it's more powerful than Reo expected.
* Ikoria is home to a tremendous variety of chimeric creatures — bird-winged goats and foxes, bat-winged lions, wolves with cetacean tails and dorsal fins, hippos with the tails and back plates of stegosaurs...

* Ikoria: Lair of Behemoths, the Corona Beam. While it was too late to remove it from the set's initial printing, future printings will not include the variant due to the coronavirus pandemic.
* Iksar, Sarnaks. They can begin in the Human city of Freeport, Dark Elf city of Neriak, or Sarnak city of Gorowyn.
* Iks's abilities help people heal from wounds quickly (sans glowing hands). From
* Ikuisuuden Laakso is a Finnish indie RPG, a philosophical game of epic heroism and tragedy... about penguins. Not a gag product, either, and really very good.
* Ikuko and Tooya Hachijō), but they aren't married and don't seem to be in a romantic relationship. That's actually the first thing Ange asks them when meeting them.
* Ikuma Momochi, a reoccurring character in the side novels. After her own child died, Mrs. Momochi encountered a female Ghoul fleeing
* Iku's name (in the Japanese naming order) is "Sutou Iku", or "stoic". She is perhaps the least stoic person in existence.
* Ikuto finds himself on the other end of this trope in a later chapter when Ikuto sees an
* Ikuto has been on the island long enough to know that the standard rules don't apply to the island, and indeed has gotten to the point that he can talk to the animals of the island, his usual first reaction to a new oddity of the island is to reject any simple fantastic explanation from anyone else (even from the oddity itself) and instead comes up with his own explanation that's usually even more ridiculous (for example, he thinks that all the ghosts on the island are polar bears). Revealed in chapter 126 to be due to
* Ikuto is staying in her room for a few days. Her mum thinks it might be cat so she suspects something. I guess she was right in a way...
* Il-2 had a sights device called PBP-1b (Dive Bombing Sights 1b). During rough or crash landings, it tended to hit the pilot, often lethally, so the people started joking the letters actually meant "Pribor Byushchiy Pilota 1 Raz Bol'no" - A Device Hitting the Pilot 1 Time, Painfully.
* IL-2 Sturmovik avid global modding community makes lots of new maps, skins, missions and campaigns, addon planes and total conversions on a regular basis. Some more complex mods are a bit harder to implement into the game than others, but generally, the modding community has made mods for anything related to prop and jet plane combat flight simulation of the 20th century (particularly things from the WWI era up to the 1950s).
* IL-2 Sturmovik can be customized with these. Most of the available nose arts are reminiscent of real WWII nose arts, but it's possible to mod in your own as we’ll see .
* IL-2 Sturmovik comes with an extensive hardcover "Pilot's Instructions"-handbook, a reprint of pilot's notes for the Mk.I Spitfire and a fabric map of the English Channel area.
* Il 7 e l'8. He initially flatly refuses, blaming the girl for her icy demeanour and bad manners, until she slaps him. After that, he suddenly and abruptly kisses her.
* I lack names, encouraging the player to name them after themselves and their friends.
* Ilana Glazer, a queer actress, plays Frankie, who is lesbian or bi.
* Ilana's Arzt moment in the final season. Killed while saying something seemingly very important in relation to The Big Bad, no less.
* Ilana was made a regular, but only appears roughly every other episode until she's unceremoniously
* Il (and his associated side characters) undergoes much of the same character development and even overthrows the Evil God
* , Ilando, a visitor from Galma, unknowingly accuses Edmund of being a traitor to his face. Edmund, being a pretty decent guy by this point, takes it pretty well, but that doesn't stop Ilando from being horribly embarrassed when he finds out.
* Ilang: The Wolf Brigade (2018) as a Korean live-action update to Jin-Roh.
* Ilang: The Wolf Brigade, the goggles are also used to scan someone's body to

identify anything that stands out of place.
* Ilanics (a cousin species to the Luxans) and their Scorvian enemies both had "cruisers" in the episode where they appeared, and the cruisers appeared to be of very similar or identical design, so it's possible that one species stole their tech from the other. The first cruiser (an Ilanic cruiser) was understaffed by just two scientists and was being used to research an experimental weapon. When the cruiser was about to be destroyed it launched a small shuttle, identical to the one used by the Tavleks in another first season episode (it was stock footage). The second cruiser showed up pretending to be an Ilanic ship but it was actually a Scorvian vessel in league with one of the first cruisers' crewmembers, who was a Scorvian in disguise. It's not clear if the Scorvians were operating a stolen Ilanic ship just for this deception, as the identical first cruiser was said to be an Ilanic design, or if the two species commonly use the same starship class.
* Il Commissario Montalbano appeared alongside it, about Montalbano as a young man.
* Il Commissario Montalbano. So much so that when Montalbano tries to talk to him, he threatens him with a shotgun.
* Ildith should really have listened to her husband Lot when he told her "
* Il était une fois... airliner-, with a crew of at least two people. However other races such as the Humanoids use small, one-man fighters.
* Il était une fois...: Almost all Cassiopeian warships have a Shark nose-esque Type A.
* Il était une fois..., and very likely countless stuff that does not appear in the cartoon.
* Il était une fois... battles that happen on multiple occasions, with people dying on-screen from weapon wounds.
* Il était une fois... come with sound, however, and in one episode a warship from the Omega Confederation after being hit explodes producing a planar shockwave.
* Il était une fois dans l'oued some people in Algeria whose features are European and who may even have blond hair, but the film doesn't dwell on this).
* Il était une fois..., even if heavy cruisers are the (named) top of the line and fighters include from small one-man ships to others much larger.
* Il était une fois... features the Hundred Years Wars and Joan of Arc, and almost at the end there's a scene featuring a traveler that tells the cast about her execution.
* Il était une fois... focuses on early civilizations, including Ancient Egypt.
* Il était une fois..., grinding to a halt even with a puff of smoke until her main reactor has an emergency repair moving then again.
* Il était une fois... has only one scene with Hitler, and that's in a newsreel shown in a movie theater. Here, he is depicted as a bug-eyed goofball whose dialogue is obviously dubbed over by a recording of one of his actual speeches.
* Il était une fois..., has Pierre's village pillaged and burned by two sets of bandits (but not raped, obviously, since all the villagers have fled for shelter). This forces Pierre and his family to take shelter in the town.
* Il était une fois...: In the episode with the 1890's automobile racing, one group is ahead of the pack, and decides to mess everyone behind by adjusting a road sign to Bordeaux. However, the previous scene showed the sign being spun by a breeze, and the cheaters actually correct the sign before going down the wrong road.
* Il était une fois..., landing and later taking-off from the planet Omega.
* Il était une fois... takes place in ancient Rome and naturally involves two Gallic prisoners fighting beasts in the arena and winning, to the approval of all.
* Il était une fois...: The episode about the pollutant toxins shows the (anthropomorphized) enzyme responsible for gluing the RNA ribbons struggling with his big glue stick, ending up spreading the stuff everywhere and getting stuck in it.

* Il était une fois... used this metaphor extensively, up to the point that the nucleii of every cell in the body were represented by fully staffed command centers.
* Il était une fois... way, by the engines of the ship the protagonists use to escape.
* Ile de France had planned ahead by installing a telephone in his office that wasn't connected to anything. Whenever he wanted to get away from a tiresome or troublesome passenger without being rude, he would step on a hidden button beneath his desk, causing the fake phone to ring. He would then answer it, pretend to listen, then reply: "Yes Captain, right away!" and hastily excuse himself.
* I Left My Sneakers in Dimension X, if someone from Dimension X came to our dimension, what language would they speak? (Considering in the series it includes not only the hundreds of languages on Earth but also alien ones.)
* Ilena introduces herself in a Rain of Blood after slicing up Yoma in the air and walking through the resulting shower without letting a single drop touch her, establishing her Badass stature fairly quickly.
* I Let Gwen Stacy Die: Hero blames themselves for not being able to prevent a loved one's death.
* I Let Gwen Stacy Die: The hero blames themselves for not being able to prevent a loved one's death.
* I Let Gwen Stacy Die: The hero feels responsible for causing a loved one to die.
* I Let Gwen Stacy Die: You blame yourself for being unable to save a loved one.
* Il Fornicazione by Michael Green. A lover tries to sneak in via a stage window but he's too fat.
* Il gioco degli Immortali about him before the start of the game, so it's hard to know if he changed at all.
* Il Giornalino is an Italian weekly comic book of Catholic inspiration, whose publishing house was founded by a Catholic priest. Most references to youth culture in its stories are at least 20 years out of date. Example: a story in a 2013 issue was basically a rant against people who follow fashion, except that the main character, whom the readers were supposed not to follow, was head over heels about a style of shirt that was popular in the mid-1990s. Another story in the same issue was a rant against playing video games for too long: the main character was addicted to his "Wii"... that looked like a Sega CD.
* Iliad, Ares, the god of war, challenged her on the battlefield and Athena knocked him out in a single strike.
* Iliad is one of these, he is the oldest man in the Greek army and was a young adventurer contemporary with the previous generation of heroes, including Hercules, Perseus, Theseus, and Achilles' father Peleus, he says that all of these previous heroes were stronger fighters than any of the Greeks attacking Troy, including Achilles. He is the frequent source of advice, counsel, and long monologues about the olden days. He is an old badass because he is still gearing up and fighting with the young men on foot and on chariot — and he is a better fighter than most of them! The fact that he survived to old age without being killed in Greek warrior society is taken as a testament to his great wisdom.
* Iliad Quest in the First Mustering. When Palamedes' father Nauplius comes calling to investigate the death, he gets killed off as well.
* Iliad Quest, Palamedes demonstrates a quite literal example in the form of defensive serpents made from his material wealth.
* Ilia reveals that when the White Fang tried peaceful protest, Atlas authorities did nothing to protect the protestors, and would straight up arrest
* Ilia was eventually the first confirmed LGBT character when she revealed to the unsuspecting Blake that she used to be in love with her during a dramatic confrontation. Volume 6 would also casually introduce the lesbian couple of Saphron, Jaune's older sister, and her wife Terra.
* I Lied and believe that they're tricking you into believing that they just tricked you into believing that they were wrong about some small thing.
* I Lied: A taunting stock phrase given to a character when they fall for a lie.
* I Lied: A villain admits to have lied to a person to manipulate them.

* I Lied: The villain admits that they never intended to keep their promise.
* I Like It When You Sleep, For You Are So Beautiful Yet So Unaware Of It, which was also the name of one of the songs on the album.
* I Like Monkeys": The man himself states "I like monkeys". It seems to be that way at first, until they start causing trouble, but he still likes them.
* I Like Monkeys": The man tries to get rid of the dead monkeys bodies by flushing them down the toilet, putting them in a freezer, and burning them. None of the methods work.
* I Like Monkeys": The story starts and ends with the words "I like monkeys".
* "I Like My Toys", which deals with a thirty-one year old man's desire to play with his childhood toys instead of looking for a job, much to his parents' chagrin.
* "I like my women like I like my coffee: Ground up and in the freezer."
* "I like my women like I like my coffee: Used to smuggle drugs from Colombia."
* "I like my women like I like my whiskey: twelve years old and mixed up with coke."
* "I like my women like I like my wine: twelve years old, imported in burlap sacks, and locked in my basement."
* I Like My X Like I Like My Y: Saying that you like something the same way you like something else.
* I Like Those Odds: Odds are not in someone's favor but they state (either snarkily or genuinely) that they like them.
* "I like to see girls of that... caliber. By 'caliber,' of course, I refer to both the size of their gun barrels and the high quality of their characters... Two meanings... caliber... it's a homonym..."
* "I like to watch", featuring a woman raped in her apartment by a man pretending to be a fireman, was ripped from an identical case that took place in New York the year before.
* Ilium components, and are manufactured and designed for specific roles, while still remaining fully sentient, to the point that a common 'vec custom is to develop an interest in ancient human literature as a "hobby."
* Ilivais X and she becomes dark and sullen. They couldn't be more opposite, and they couldn't be crazier about each other.
* Ilivais X are fairly normal and realistic. But the eponymous one only registers with one who possesses "Love" Drive Core (or has a similar demeanor), but the way it works makes it more similar to lust. This kicks off numerous broad themes involving the border between love and lust and whatnot, but the most clear example of an out-and-out Deus Sex Machina is the Love Drive Core attack, which can basically only be used via orgasm.
* Ilivais X bond with Mille, making the string out of each other’s blood in a kind of haphazard transfusion. Since every cell of Iriana is designed to return to her, this essentially means Mille will always innately know where she is and be drawn to that location.
* Ilivais X gradually becomes this. At first, she's mostly freaked out, having narrowly escaped from an eternity of servitude to an empire that half-unwittingly tortured her for more than half of her life. As such, she spends her first week or so taking respite, learning to use the eponymous robot, defending herself, getting in close with Mille, and generally being moderately suspicious but even pitiable at times. But soon she realizes the infinitely destructive power of her robot, and her grudge against the Aztecs and the world in general begins to surface. She begins antagonizing the empires far more adamantly for little reason aside from wanting them destroyed, manipulates and forces people into serving her (especially Mille), and shows an unwillingness to accept things that aren't in her control- and if that doesn't change, she deigns to erase it from existence.
* Ilivais X has its example, Iriana, rebel from the very start. Even though she's 17, she was designed to remain in a child-like form forever, adding to the very large lists of complexes she deals with over the course of the story.
* Ilivais X: Ilivais Q has six teardrop-shaped REACT Drones mounted on the "hair".
* Ilivais X influences. The eponymous mech (and the others like it) are more streamlined and shiny and just futuristic in general than other examples present.

* Ilivais X Iriana's regenerative abilities to have those blood cells be drawn to the other.
* Ilivais X on their pinkies, so they keep those joined while all the rest intertwine. It's notable that this particular hold is a symbol for their relationship as a whole- it wants to fit, and it should fit, but it's definitely strained and it takes a bit of awkward fidgeting to get it right. Go on. Try it.
* Ilivais X pilots or high-ranking military commanders. For the most part, the implication of prejudice for ANY group is highly frowned upon.
* Ilivais X takes to calling Iriana "Ir" early on even before they have any romantic moments, with a justification along the lines of "it's four syllables in six letters!" Iriana has a bit of contempt for it at first but quickly gets over it.
* Ilivais X, the American continents are under control of the Aztec Empire, and the vast majority of the Eurasian continent and Africa are under the Iberian Empire. The Gaia Forces, a neutral zone mostly descended from the space colonies, is allowed a buffer section of Russia and the entirety of Australia.
* Ilivais X the Ilivais units are basically 80s super robots, and as such standing under their own weight would be impossible without assistance. This developed into "make them focused on flight" which then developed into "don't even bother giving them feet". As such, most of them have blade legs that end in a point, meaning that if they lose flight capability, they're utterly incapable of movement.
* Ilivais X, the Phonos Weapons (which include the titular mech) are supposed to use their pilots like this. While they CAN be used with motion control, they tend to be controlled via mind synchronization. The four pilots are altered to be fragile, intelligent, and highly emotionally derailed, because the intent is that they stay in their unit until they are destroyed (which, given their effective regeneration and the pilots' immortality, may well never happen), turning into sentient processors for their machines.
* Ilivais X, the result is the same. She wants to die, but can't no matter how hard she tries or how much she frappes herself.
* Ilivais X typically being very sleek and advanced. The Avespias are the only units to even have any kind face, as the Ilivais prototypes have curved wedges with a sensor web, and the Espadas are piloted from within a shoulder-mounted sphere.
* Ilivais X: "Why do you fight? Why do you exist?" More prevalent but not as unanswered is "Where are we going?"
* Il Ji-Mae: He met his first love when they were children, saw his father assassinated, then meets up again with his first love as an adult, each time while the trees bloomed. He ultimately uses a painting of a flowering branch as his symbol.
* Il Ji-Mae, one of his love interests figures out who he was by a piece of jewelry the boy who saved her life carried. The other love interest also figures out who he was because he continued a story he never finished when they were children.
* ilKhan: Khan of Khans, a rank given during times of crisis and when the Clans are united.
* ill-advice about revenge being a form of retribution, blows up the labor camp site with dynamite to free him. However in the midst of the chaos, Javier's dad is killed by an evil colonel.
* Illagers look like villagers, but with grey skin. Unlike villagers, they're naturally hostile and will attack anyone.
* I'll Always Know What You Did Last Summer, Amber and her friends arrange a prank which makes it seem that the Fisherman is attacking them in a carnival, which is supposed to lead to P.J. performing a sick skateboard trick on front of everyone. It fails when P.J. plummets to his death instead.
* I'll Always Know What You Did Last Summer: Ben Willis/the Fisherman appears to be the Resounding Psychic Echo type. He's actually lacking in a lot of powers associated with ghosts (apparently only able to appear and vanish at will) and can be physically harmed (even bleeding, though it's evident the only thing that actually hurts and doesn't just annoy him is his original hook).
* Illaoi was being developed, they tentatively named the eldritch sea god she

worships "Nagakaborous" (a mishmash of a few mystical-sounding elements like "naga" and "ouroboros"). However, Riot kept it as they moved onto recording Illaoi's voiceover, and Rolonda Watts made the name sound so badass that they made it permanent.
* I'll be back" by Arnie and the Terminators is sung in this manner, naturally.
* "I'll Be Good" by Jaymes Young is about a man who wishes to atone for his bad behavior in the past.
* I'll Be Home for Christmas, Jake attempts this when he thinks his girlfriend Allie slept with his rival Eddie, who at the moment is only wearing a towel. When Eddie eggs him on by saying that all that happened (a kiss under the mistletoe) was good, Jake angrily pulls his towel off.
* I'll Be in My Bunk - A character who steps off-stage is humorously portrayed as leaving to masturbate.
* "I'll be in my bunk." It must be *ahem* hard for Jayne, being trapped on that ship with Inara, Kaylee, Zoe, and River, and not able to touch any of them.
* I'll Be in My Bunk: Someone sees something sexy and leaves, presumably to masturbate.
* I'll Bet (1964-65; originally aired on KTLA, became national in '65)
* I'll Be There), Cee Cee Bloom boards a jet and attempts to scatter the ashes of her dead friend Bertie. Due to her holding the bag the wrong way, the ashes blow back into the jet and all over her and the pilot. To add to her embarrassment, she's forced to pay a hefty fee for the cockpit to be cleaned.
* Illbleed, built by horror movie director Michael Reynolds, which the main character wisely avoids until her friends vanish during a trip there and she has to go find them.
* Illbleed had every single trap, even the deactivated ones, prefaced by a classic scare chord. The upside to this is that people who've played this game tend not to jump nearly as high whenever a movie tries to pull one on them.
* Illbleed if they bleed out, which also leads to death and a flatline.)
* Illbleed Other than that, however, he's capable of doing pretty much everything regular Randy can do, making him a bit of a mix between type 1 and type 2.
* Illbleed praising his son. It's one of the few horror moments in the game played completely straight.
* Illbleed put her through so many scare tests when she was just five years old that she lost her sense of fear.
* Illbleed saving your kidnapped friends. Stranger still, every time you let one of them die, Eriko (the protagonist) loses her clothing, until she is eventually completely naked save for a tiny thong-like panty scrap and a couple of band-aids over her nipples. Reach the final arena like this, and instead of introducing the final boss, the announcer will start drooling over you and come down there himself. And believe it or not, it gets even stranger from there...
* Illbleed, the main female protagonist's appearance isn't affected by the environments, but it gets more and more torn, blood-soaked and muddy as she fails to save friends (i.e. completing a level without rescuing the friend there). In order to get the true ending, you have to lose everyone, at which point she is completely naked with only a few mudsmears to cover her bits.
* Illbleed was going to be developed, but the death of the president of Climax Graphics, makers of the series, stopped all plans for it.
* Ill Boy. Hence why he's seen more often than not in manager positions and doesn't play until it's mandatory.
* Ill Boy who needs constant care, but hates feeling like a burden and tries to take on as much as he can by himself. Patrick is physically healthy but mentally unstable, tries to appear more delicate than he is for sympathy points.
* I'll check the material of every piece of cloth I purchase to make sure that there's SOME cotton in there, at least. Seriously, though, is there a marketing executive out there that seriously thinks some fifteen second song about touching and feeling somebody's clothing is going to change anyone's behavior?
* "I'll Cry Instead" was used as a prelude, illustrated with stills and behind-the-scenes photos, for its first theatrical re-release following

* Ill-designed maps in old FPS games (or ones subjected to abuse beyond all reason) have been known to reach a state where each character returns into play before the previous one has had time to get out of the way, causing the creation of the gib fountain.
* I'll do you one better. How does it make sense that, if you are playing as the killer, you wouldn't know that you did it or how? Somehow, I can't see it being
* Illegal (1955), Edward G. Robinson plays Victor Scott, a district attorney who is disgraced when his tenacious prosecuting sends an innocent man (a young DeForest Kelley!) to the electric chair. Scott becomes a criminal defense attorney — and a damn good one — but unwittingly becomes tangled up with the affairs of a local mobster. Though Robinson gets away with some antics that'd never fly in a real courtroom, the film nonetheless does a fantastic job explaining the very real dilemmas presented by criminal defense.
* Illegal Alien features a species of aliens unable to do any math aside from the most simple arithmetic, but have no difficulty answering difficult moral questions that baffle others.
* Illegal Alien involves a milder example, with an alien charged in the murder of a human.
* Illegal Aliens red herring. An alien reporter who resembles a red, anthropomorphic fish.
* Illegal Aliens refer to humans as "Dirtians", because their translators keep converting "Earth" (and "Terra", for that matter) into the word "Dirt".
* Illegal Aliens, the galactic currency is based on Thulium, because "Gold is prettier, Silver makes a better conductor" and a number of other reasons.
* Illegal Aliens: Though initially technologically inferior to the alien races they encounter, Humans catch up quickly (albeit with the help of an alien technician) and surpass the weaponry, medical, and general technological abilities of the aliens they got most of the technology from in the first place. For example, they regenerate members of an extinct alien race, create a type of unobtanium ship armor an alien earlier on in the story was lying about to make them think alien ships were tougher than they really were, created original weapons based on an "atomic vortex" that started with a pistol that was ridiculously powerful and escalated to a cannon that could wipe out massive fleets of automated attack satellites, and generally overcame any and all opposition by races whose technology they hadn't even known about mere months before.
* Illegal Aliens translates the explanation that gold is fastest. The "Great Golden Ones" have the best ships precisely because they enforce a monopoly on that color.
* illegal, and the other side can do to you as they wish after they capture you.
* Illegal: By a crime gang or terrorist group, located in some field somewhere. Attracts police and military.
* Illegal Gambling Den: An underground casino that is owned and operated by the mob.
* Illegal Gambling Den: An underground casino that's not properly licensed or exists in violation of anti-gambling laws. Usually run by mobsters, and woe betide you if you owe them any unpaid debts resulting from prior bets you made there.
* Illegal Guardian: A wicked relative of a character gains guardianship of them through unscrupulous means in order to get their money.
* Illegal Guardian: The guardian of a young child, who is anything but good to them.
* Illegal immigrants of all stripes will often try to sneak across borders by clinging to the undersides of trucks or trains. The hazards are well known, but every year,
* Illegal Religion: A religion that is banned and persecuted by the government.
* Illegal Religion by the state. Outsider worship is also associated with witchcraft and the occult similar to the Hollywood version of Voudou.
* Illegal Religion: If you get caught practicing a religious sect that has been outlawed by the state, then expect to be punished for doing so.
* Illegal Religion: The government bans an entire religious sect, and punishes anyone caught practicing it.

* Illegal Religion. The Praetorian Arrius explains why; "They could sacrifice their babies in the forum if only they'd give a slice of the meat to the Genius of the Emperor. But they won't."
* Illegal Religion: We forbid people from following their own religion, and make it mandatory for them to show their total devotion to the state.
* Illegal street racing tends to be this, as showcased in certain works above. Most drivers who participated in unsanctioned street racing events have
* Illegal touching means that the ball is downed when the kicking team gains control of it and cannot be downed in such a way as to give the receiving team worse field position than when the kicking team first touched the ball. Thus, if a member of the kicking team attempts to down the ball, but it goes into the endzone off his hands, it's a touchback. If the ball is deflected toward the receiving team's endzone and then downed, the ball is placed back where it was first touched. And now for the
* illegitimate daughter, Franks response rivals what he did to the man who dug up his families bodies, and involves hooking the mans testicles to a car battery for over an hour.
* illegitimate son in the Stark family, Rickon is the only one with the Stark name left in the North — one who Bran expects will be fostered with the Umbers, loyal bannermen.
* Ill Fly Away. Oldest son Nathan and his girlfriend Diane are caught by her parents. Especially bad since (a) Her parents already disapproved given that she was Jewish and Nathan wasn't, and (b) They had almost gotten away with it—he'd hidden under the bed and was caught when trying to sneak out.
* I'll Get There. It Better Be Worth the Trip is a 1969 novel about a lonely teenage boy who befriends a schoolmate. Their relationship turns romantic when the two are playing with the protagonist's dog but end up kissing.
* Ill Girl: A character (usually, but not always, female) is sick, and this inspires sympathy from the audience.
* Ill Girl (attracting both attention and benefits), until Gypsy got rid of her with the help of her online boyfriend Nicholas Godejohn.
* Ill Girl. But Helen still has time to impress on Jane the importance of dedication to God and trusting in her own conscience more than the love of others.
* Ill Girl, but the lightning strike actually seemed to cure her ailments and caused her to become more curious, intelligent, and lively.
* Ill Girl Nikki, who eventually becomes the sixth ranger for the rest of Season 2.
* Ill Girl recovers and journeys out of her village determined to become a doctor, inspired by Usopp whom she adores.
* Ill Girl second daughter Izumi (who is weak enough to get exhausted from a kitten standing in her head) to push herself physically.
* Ill Girl, who nevertheless can become especially determined for the sake of her younger sister.
* "I'll give you some lessons on how to become a reporter later." Almost certainly the inspiration for SNL's Herb Welch sketches mentioned above.
* "I'll have two number 9s, a number 9 large, a number 6 with extra dip, a number 7, two number 45s, one with cheese, and a large soda."
* ill. Her only vague flaw is that she's kinda spoiled. After maturing Kaya decides to become doctor simply because she wants to heal people.
* Illiana Henriksdotter in "Betvingade" is still a teenager as well, and a brilliant medicine woman.
* "illicit affairs" starts with the singer setting up all the way the she and her love interest conducts an affair... right before revealing that all the lies and secrecy has eaten away and exhausted her for the rest of the song and ended the song stating that she can't end the relationship because she loves the man so much.
* Illidan makes this point to Kur'talos Ravencrest during the War of the Ancients when the latter calls him out on sacrificing his own men to gain the power to defeat the Legion invading Black Rook Hold. Illidan points out that this single invasion nearly destroyed Black Rook Hold, which would have left Suramar open to attack, and angrily says that all Kur'talos can do is criticize Illidan's methods.

After getting a glimpse of the true size of the Legion, Illidan realizes how hopeless the fight is.
* Illidan's demon hunters are a relatively small group whose mission is to destroy the endless Burning Legion and who are quite capable of facing off against it in most circumstances.
* Illidan Stormrage expansion, approximately nine years after his "death" in Black Temple.
* Illidan Stormrage is always without a shirt. Even more so after he absorbed the powers of the skull of Gul'dan, which made him grow wings on his back, which means he cannot wear shirts anymore. (As
* Illidan was claimed to be the Chosen One of prophecy, meant to end the Age of Demons. He was skeptical and, when Xe'ra tried to forcibly "redeem" Illidan to ensure it came to pass, Illidan
* Illinois politician Jim Oberweis is also known for his ownership of the family dairy and ice cream business. This, combined with numerous failed political campaigns for Illinois governor, US Senate (twice), US House of Representatives (thrice) has led some local press and political wags to call him "the Milk Dud".
* Illiterate, which means you can't read or write anything (you can't write Elbereth on the floor to make monsters leave you alone, can't use scrolls or spellbooks, and can't eat Fortune Cookies).
* illithids, a.k.a. mind flayers, are the most well-known brain-eaters from the game and can perform an "Extract Brain" attack on a helpless foe that will insta-kill most creatures.
* Illithids can make people suits, from humanoids, that give them a bonus on disguise checks.
* Illithids communicate telepathically, which is automatically translated into the hearers' language. Their
* Illithids find a host, usually if its colony is wiped out and the Elder Brain slain, it will venture onto land and start hunting to survive. Should it feed on a sentient creature, consuming the brain triggers the same growth spurt as ceremorphosis, but without a body to inhabit, the tadpole grows into a monster called a neothelid, a fully-sentient, dragon-sized, slime-caked worm with a mass of tentacles for a face, psychic powers, and the ability to spray acid. Illithids prefer not to talk about them, since neothelids are just as willing to prey on them as anything else.
* Illithids reproduce via a process known as ceremorphosis. Mind Flayers are hermaphrodites that lay thousands of eggs, two or three times over their lifespan, into the Elder Brain's pool at the heart of an Illithid settlement. These eggs hatch into what look like tadpoles, but these by themselves do not grow into Illithids. Instead, after ten years of feeding on each other and avoiding the predations of the Elder Brain, these tadpoles are ready to be inserted into a helpless victim's ear canal, at which point the tadpole consumes its victim's brain, melds with its nervous system, and transforms its new body into a fully-grown Mind Flayer.
* Illithids, though the practice is not very efficient for them. Assuming a human brain is "ripe" by the age of twenty, this would mean that each illithid in a community would require a minimum breeding stock of 250 human "cattle" to survive. Orcs, goblinoids and other races mature faster but taste worse, which isn't to say that the brain of someone who lived their whole life in a holding pen would taste good to begin with — the best brains are "flavored" with a variety of strong memories to savor, which is why adventurers are such a delicacy. So in most cases, an illithid stronghold keeps as many prisoners as it can manage, and launches "brain raids" to round out their supply. And to get the most out of the best brains, Illithids will engage in the spectacle of "performance eating," where one lucky mind flayer will psychically broadcast the sensations of their meal for an audience to share.
* Illium, "faxing", a means of teleportation utilized by old-style humans, works on the principle of disintegrating the original and recreating them from a pattern scan at their destination. This is how the Firmary can bring back Daeman even after

he has been eaten by a genetically-engineered Allosaurus. It basically just recreates him using the scan taken from the last time he used a fax node. There is a hint in the fact that his memories do not include the events leading up to his being eaten, because that was after he was faxed.
* Illium. Like most asari, her bondmate and daughters loved alien races and meeting new cultures.
* Illium, the Moravecs are skeptical that these gods are genuinely gods and not some high-tech trickery.
* "I'll know." (The hero can't live with themself if they fail this test.)
* I'll look in aisle 6 of the store for the geography textbooks labelling all the isles of the Pacific Ocean.
* "I'll Make A Man Out of You" are described as "hordes of faceless bad guys from a ninja clan."
* "I'll Make a Man Out Of You". The first verse is diegetic, and becomes non-diegetic for the rest of the song, save for a couple of lines ("You're unsuited for / the rage of war / so pack up, go home, you're through") that Shang says directly to Mulan.
* Illmatic in the genre; it also happened to be his first album released under Def Jam Records, the biggest hip hop label in the world and a wholly-owned subsidiary of Universal Music, and the album itself was made in collaboration with many mainstream artists and producers.
* Ill Met by Moonlight: Due to his supernatural heritage, Steven possesses a natural magnetism when it comes to animals, strays, and birds following him around. This seems to be a form of vampiric hypnosis that Steven unconsciously emits, unintentionally doing this to the werewolf Amethyst.
* "I'll murder you momentarily. But first, I need a cool drink... of ice...water..."
* "I'll Never Fall in Love Again", written by Burt Bacharach for the musical
* I'll Never Tell You What I'm Telling You!: Accidentally revealing information while refusing to tell it to the person asking you to reveal it.
* I'll Never Tell You What I'm Telling You!: A character refuses to reveal information they've been asked to reveal, but in the process comically reveals the information anyway.
* I'll Never Tell You What I'm Telling You! at keeping a secret, even as you insist you'll succeed.
* I'll Never Tell You What I'm Telling You!: Blurting out a secret while simultaneously claiming you won't do just that.
* I'll Never Tell You What I'm Telling You!: The idiotic villain tells you what you want to know despite claiming that he's not telling you anything.
* illogical if one divorces it from common sense and basic human decency. For example:
* I'll Pretend I Didn't Hear That (plus her no-nonsense, down-to-earth persona makes her steadfast reliance on Shawn's vibes seem very out-of-place).
* "I'll Quit Singing" is Luka ranting about writers who make her sing pornographic songs.
* "I'll rip your bloody arms off!" was the catch phrase of Aunty Jack of the Australian cult comedy series
* "I'll rip your legs out of your ass!" is a common saying/threat in Poland.
* I'll see you that and raise you the story of the guy who proposed to his girlfriend on the walkway of the Brooklyn Bridge. Romantic... until he dropped the ring while trying to put it on her finger. The good news is that it fell to the roadway below rather than into the water. Determined to get it back (no doubt thinking of how much he spent on it), he jumped down and proceeded to contend with the rushing traffic in order to find it—and he did.
* I'll Sleep When I'm Dead one), the film's protagonist, played by Clive Owen, is a former mob boss who learns that his brother was violently raped. The rape scene is brutal and ugly, and the victim is traumatized (and later commits suicide). Graham goes to a medical examiner and a psychologist for information, and both doctors give in-depth, matter-of-fact descriptions of both the motives and effects of the

rape. Graham doesn't want people to learn his brother was raped, as he fears - correctly - that this very trope might come into play.
* "I'll Stand by You" by The Pretenders (and other artists) promises love and commitment no matter the mood and circumstances of the person to whom it is addressed.
* I'll Take Manhattan's Maxi and her ex Rocco — at one point she grabs his penis during an argument, which leads to a hard-on, which leads to... well, him saying she raped him afterwards.
* "I'll Take You Home Again, Kathleen," the song Ryley sings (badly) over the intercom in
* "I'll tell you, but only because it's in the evil scientist ethics code."
* Illumi/Killua & Alluka/Killua goes here, unless you have a strong fetish for both incest & shotacon.
* Illuminae series, Space Marines are the bulk of the forces seen within the United Terran Authority. Though there might be an army we don't see, as the only soldiers we see directly are part of a ship's crew, being much closer to classical marines.
* ILLUMINATED, Jane's abusive exe Thrax finds her. He kills her girlfriend and threatens Jane. Cornered, Jane shoots the boxes of nearby TNT, blowing up both her and Thrax.
* Illuminati" alignment was introduced as the new opposite to "Government".
* Illuminati card game by Steve Jackson Games do a variation: The Illuminati symbol (an eye in the pyramid, sometimes simplified to a dot in a triangle) appears on nearly every card, usually hidden.
* Illuminati card game, the Paranoids are one group you can control, and give you protection against all attacks except natural disasters.
* Illuminati collectable card game includes a "Suicide Squad" card which can launch this sort of attack on enemy assets.
* Illuminati conspiracy. They then have to take over various interest groups (ranging from political parties to industries to fandoms to aliens). These generate money and can take over other groups, until your cards are arranged in a web. Each conspiracy has a specific goal, although all conspiracies can win by eliminating the competition.
* Illuminati has a card called "Cattle Mutilators", which gives a bonus to the player who is playing as the Aliens.
* Illuminati: New World Order card game has a card called "Secrets Man Was Not Meant to Know". There was a gag card appropriately titled "Secrets Man Was Not Meant to Know In the Biblical Sense".
* Illuminati: New World Order features a card which depicts one of these.
* Illuminati: New World Order includes a card for the "Church of Violentology".
* Illuminati New World Order, it's possible to give a group a temporary attribute, and then give them power-boosts that are only legitimate for that attribute. Such power boosts are normally permanent, but when the attribute goes away, so will the power. The rules say that only permanent power boosts count for victory conditions. So, does a power boost as described above count for victory? Steve Jackson originally said yes. The official FAQ now says no.
* Illuminati: New World Order, the "Crackdown on Crime" card has a picture of a SWAT team menacingly training their laser-sights on a man who's halfway through tearing off a mattress-tag.
* Illuminati: New World Order were immediately won by whichever player went first.
* Illumination Entertainment (although, considering its obscurity, it's unlikely that its existence was ever addressed by the producers to begin with).
* Illumination Entertainment, and that's rated PG due to brief language (O'Hare sounding like he said the word "dammit") and a brief scene with a woman in a bikini.
* Illuminati that makes a personality indestructible and can also cause an opponent's personality to defect.
* Illuminati, the Mafia is one of the most powerful groups in the game.
* Illuminati University does much the same thing, with Straight, Classic, and Zap.
* Illuminati version, it's one of the mysterious forces that the characters might

have to investigate.
* Illuminati which not only made the affected character indestructible, it could be played on an opponent's characters to make them defect!
* Illuminator: The phrase "everything else you could care to know" in the ending card is replaced with "the eternal struggle of illuminator vs goth".
* Illuminatus! as the entity begins to appear. Bidden to come in a form we can be comfortable in seeing, the form in which you move and go about your business in the world, the entity complies. He adopts the form of evangelist Billy Graham.
* Illuminatus! at insensitive and incompetent literary critics in the real world.
* Illuminatus! by Robert Shea and Robert Anton Wilson is a comedic conspiracy novel that also includes erotic fiction, horror, epic fantasy, and espionage. Wilson's later novels in the same setting add science fiction, historical fiction and a variety of literary pastiches.
* Illuminatus! chosen seemingly at random and very clever yet completely nonsensical wordplay.
* Illuminatus! claiming that the book's author was actually a "time-travelling anthropologist from the 23rd Century," who "has visited Earth many times in the past, using such cover-identities as Zeno of Elias, Emperor Norton, Count Cagliostro, Guilliame of Aquaitaine, etc."
* Illuminatus!) conspiracies is that the government(s) use this to keep the populace distracted from their own sinister agendas. A character is told to watch China after the USSR falls.
* Illuminatus!-filled that what the "truth" is intentionally left up to the reader.
* Illuminatus!, hapless magazine editor Joe Malik desperately needs a piss but is alone in Illuminati HQ's boardroom. So he comments on the need for ultimate power expressed by a powerful occult secret society by emptying his bladder into their boardroom wastepaper bin.
* Illuminatus! Instead, we've all been mentally programmed since grade school not to notice them on a conscious level, which in turn causes a general "sourceless" feeling of uneasiness and confusion, making us easier to manipulate.
* Illuminatus! is chock full of this, explicitly described as such to be paradoxic and funny.
* Illuminatus!, lead character Sigismundo Celine is consigned to the Bastille. He ends up under a heavy security regimen after escaping and being recaptured, effectively confined to his cell where he has ample opportunity to memorise all the details of his room. One day he wakes up after a deeper sleep than normal to realise he is on the ceiling and looking down at his room - the floor has become his new ceiling. Gravity has semingly reversed itself in the night. But he looks carefully and sees small inconsistencies in placement and arrangement of furniture. He also realises the window has suddenly been boarded over. He deduces he has been drugged and moved to an elaborate hoax set-up.
* Illuminatus!, one of the old Nazis (presumably Hitler), who is hoping to gain immortality through a mass-sacrifice ritual, dies on the toilet with his pants around his ankles when the plan is foiled.
* Illuminatus!: the collective Discordian Cabal. It's implied that the ELF itself is actually relatively young, like its contemporary compatriots. They just happen to know and guard some very old secrets. The actually oldest and most mysterious organization in the book is called A.'.A.'., which is not an acronym of anything; anyone claiming otherwise is an impostor.
* Illuminatus!, the disaster that destroyed legendary Atlantis is due to an artificially induced solar flare brought about by an embittered Moral Guardian.
* Illuminatus theory is filled with these, and range from few decades to tens of thousands of years old, and it's perfectly possible for organizations to split, die, reemerge and resurrect, as well as their teachings to get corrupted in various ways. Somewhat rarely for the genre, the protagonists are mostly members of an ancient conspiracy of their own.
* Illuminatus! The shape of the Pentagon is explained as a geometric prison for an otherworldly entity which lives on the energies of death and destruction. Pyramids are meant to be flying machines based on principles of paracosmic science, but the

secret of levitating them has been lost since the fall of Atlantis. And so on.
* Illuminatus!, this has to be used repeatedly by one character to become an avatar of a goddess.
* Illuminatus! (though there are exceptions in both directions). It specifically adds two extra elements to the Hegelian triad of thesis, antithesis, and synthesis: parenthesis and paralysis.
* Illuminatus!, to shave off costs by making life on Earth mortal, including all possible sentient life forms arising on the planet.
* Illuminatus! to the Knights of Columbus, the group ends up renouncing Christ and adopting geocentrism.
* Illuminatus! trilogy is essentially a jigsaw puzzle with ten thousand widely scattered pieces in at least three different boxes. And even then you can't be sure you've got all the pieces, or if you break it all up and start over again, you're going to get an entirely different picture. And the person next to you who is also reading the book will assemble an entirely different picture. And you're both equally right.
* Illuminatus! trilogy, the goddess Eris has sex with multiple men to return to God mode. The insanely high amounts of sex in that book build up a pretty good reader tolerance to implausible sex acts, but that one takes the cake.
* Illuminatus! trilogy where the magic number is five. Characters spend some time discussing whether the Law of Fives is real, or an artifact of perception, or if there's a difference.
* Illuminatus!, wherein the British agent Fission Chips leaves a trail of dead Eurasian girls wherever he may go.
* Il Lupo, AKA The Prowler, is a Templar agent trained in the skills of the Assassins. Fittingly, his outfit is very similar to Ezio's, though black and red rather than white, and his hood is missing the distinctive point.
* Illusion (and with good reason) of its developing efforts on giving compelling animation to the games' girls, especially to their hair. To the point that it's jarring when its compared to the flat-boxed environments.
* Illusionary Trauma is gay for Oreo Cheesecake. When Hershey points this out to him, the former blatantly denies this.
* Illusionary Trauma, with each route showing the flaw of the character and how it affects them.
* Illusionist. Blending this sort of illusion with both stage and true magic. Though not much of it is seen in actual gameplay.
* Illusionist David Copperfield is reportedly not happy with his 10th TV special "The Bermuda Triangle." On a DVD commentary he mentioned that he didn't like the final illusion (to be fair it is VERY hokey) and that it came "during a very rough part of my career." However, the special did feature one of Copperfield's signature tricks... The Death Saw.
* Illusionist Wayne Dobson was a big star in the UK in the late 1980s and early 1990s. He's still very active as a devisor of magic tricks and is well-known and respected in the industry, but hasn't been in the public eye since mobility issues caused by multiple sclerosis led him to step back from performing in the mid-1990s.
* Illusion, it is possible to use this as a way to attack with other elements, but often without the same strength as the real deal. Often a subset of various other elements, like Light, Space or Mind.
* Illusion magic is one of the series' standard magical schools (along with
* illusion magic. This is not a conscious ability — it just happens when she's around. For example, she has been able to see ghosts and similar beings from a young age.
* Illusion Master kaiju which, although not the size of a mountain as it initially appears, is at least 4 times larger than Jack and towers massively over the Ultra. Jack defeats Paragon nonetheless.
* Illusion of Gaia, a store in Euro has a queue, which you must wait in to gain entry.
* Illusion of Gaia but drops a contact lens, resulting in Will continuing to fall for a while while Neil argues with his passengers and brings the plane around

again.
* Illusion of Gaia entire plot is influenced by a comet that returns every few hundred years. Each visit affects all life on Earth in unexpected ways, although the end results thus far (that tend to linger even until the next visitation) are usually the same (mutations, destroyed civilizations, famine, etc.).
* Illusion of Gaia had the insane artist Ishtar, who trapped people in their own portraits. By the time Will makes it to his studio, he finds that the artist has painted a self-portrait, thus committing himself to the same fate but leaving Will with the instructions and method of how to rescue Kara from a similar fate.
* Illusion of Gaia has a rather graphic scene in which the mercenary sent after Kara, the Jackal, is lit on fire by a booby trap and burns to death even as he tries to crawl towards his prey.
* Illusion of Gaia), he calls out to the queen "Ma'am! Save me!!", prompting the queen to say "Did you say Ma'am??!" It's unclear whether she's complaining about the reference to her age or Will not calling her "Your Majesty," though.
* Illusion of Gaia occurs with one of your best friends strapped to a time bomb, and you still have to defuse it once the boss is defeated. Luckily, whichever wire you pick turns out to be the right one.
* Illusion of Gaia: The Nazca Sky Gardens, which float above the huge drawings on the Nazca Plains.
* Illusion of Gaia throws Will into the castle dungeon near the beginning of the game.
* Illusion of Gaia waiting for them at the top of the tower, and they were all children when they parted ways.
* Illusion of Gaia. When Will sees the vision of modern society, he seems to be a bit disturbed at the concept of natural environments being replaced by sprawling cities.
* Illusion of Gaia, where the climate is quite pleasant in the south and gets hotter in the north. And is hottest of all in the northwest...
* Illusion of Gaia, where the player simply has to remember that Will is psychic and make a decision quickly.
* Illusion of Gaia who is only playing the game in order to leave his winnings to his family; when there's only one glass remaining, he drinks it anyway.
* Illusions: The Adventures of a Reluctant Messiah. This revelation shocks and distresses the main character.
* illusions. These powers are based on that of the Fox Miraculous, which also comes with an illusion-casting flute.
* Illusive Gnome Style draws on the natural affinity gnomes have for illusion magic to enhance their ability to feint in combat.
* Illusive Man's space station is stated to move from system to system in order to keep its location hidden. Only high-ranking operatives are allowed to visit it, and are usually told by the Illusive Man himself where it currently is.
* Illustrated by Liquidator Brunt (Ferengi Commerce Authority) when he accuses Quark of being a "phil-AN-thro-pist!" in much the same tone a human might accuse someone of
* Illustrated crossword: The hints are small pictures embedded in the crossword puzzle. This is the most popular form in Finland.
* Illustrated Guide has this as Siobhan's backstory. She was kidnapped, raped, and turned into a vampire by a Turkish vampire building a harem for himself. After her transformation into a vampire was complete, she promptly killed him and the few harem women who tried to protect him.
* Illustrated_Menagerie, a low-fantasy universe where prehistoric animals from different time periods come to coexist in a fantasy world. Derived theropod dinosaurs called megaraptorans take the role of "dragons", large derived giraffids are "unicorns", and a wide variety of other fauna, such as hyena-like entelodonts, flightless ape-like pterosaurs, and manatee-like aquatic dicynodonts, to name a few.
* Illustrator John Held Jr., when not creating the iconic imagery of
* Illustrator Mary Grandpre always draws Severus Snape with a beard, despite the

fact that he is never described as having facial hair in the books (and was played by clean-shaven
* Illuve LARP is the LARP club run on the SUNY New Paltz campus in New York. It is a unique high/dark fantasy system featuring several unique continents, races, religions, and character classes. The main storyline focuses on a group called the Crusaders, who fight to protect the world. The club has had several sub-campaigns over the years, including an urban low fantasy military campaign, a dystopian fantasy campaign, and an "evil" campaign that runs alongside the main system, but features the villains creating the problems that need to be fixed in the main storyline by the Crusaders. The system has been running since late 2011.
* Illwillpress commonly uses brand substitutes: Snell Computer company, the Fatkins Diet, or StarSchmucks Coffee.
* Illya Kuryakin played The Watson at the climax of the third season
* Illyana Rasputin between Earth and the hell-dimension in which she was trapped. Nowadays, she fluctuates between being around an older teenager to being in her early twenties.
* Illyana Rasputin). In one story, both she and Nightcrawler teleport part of Magus away, severely injuring him.
* Illyana Rasputin, pronounced with a long 'a' and a hard 'g', is an actual word in Russian; it means "magician". The question is if Chris Claremont knew that when he gave the Siberian mutant that name.
* Illyana Rasputin, seven-year-old sister of the X-Man Colossus, was lured into the realm of a demonic sorcerer. The X-Men went in and rescued her before any harm was done, but the youngest of them lost her grip for a few seconds as they escaped... and pulled out a fourteen year old teenager with a host of Dark Secrets. There is no set ratio for time in Limbo; in fact, time isn't even linear there.
* Illyana Rasputin's Soulsword, forged from her very soul. It's incapable of cutting purely physical objects (though it still blocks things just fine), but it can cut through anything the least bit magical — artifacts, enchantments, demons, etc. — like a hot knife through butter. It also generates a kickass armor when she wills it. Ilyana's own magical abilities are also enhanced while wielding the Soulsword. Finally, the sword is a symbol of her mastery over Limbo.
* Illya's birthday is November 20, also internationally known as Children's Day.
* Illya survives the Grail War in a few of the scenario ends but, even when she does survive, she probably only has a few years of life left due to her circumstances. She is killed onscreen in the Unlimited Blade Works scenario and makes the best of it at the end of the Heaven's Feel True End when she uses herself as the completed Holy Grail to perform the titular Third Magic and save Shirou's life.
* Illyasviel as well. It takes half of the first route to beat them, yet they are far from the main antagonists.
* Illyasviel von Einzbern gets jealous of how close Archer and Cinder Fall are getting.
* Illyra, Elysia, and Occela form the basis of a budding Amazon Brigade in
* Illyra takes infects and kills Fred, Gunn has this little convo with Lorne:
* Illyria also detects Wesley's attraction when she shapeshifts into the form of Winifred Burkle despite his abhorrence over her impersonating his former
* Illyria by Elizabeth Hand is about the romance between first cousins Maddy and Rogan, whose fathers are twins.
* Illyria probably is 'evil', or was originally. Or at least was Cthulhu, completely uncaring about lesser species and seeing them, at best, as pawns, if she saw them at all. It's just she doesn't understand the new world at all, and is without (most of) her powers and followers. Even all of her enemies are dead. She's only 'good' because the other people willing to explain things to her insist she behave in a certain way.
* Illyria's habit of likening people to vermin, apes, plankton, amoebas, slime...
* Illyria. Similarly to Glory, she had a true form, a taloned, tentacled
* Illyria's original form was a massive tentacled creature as she's an
* Illyria, who is a literal demon king, has a tendency to give self-serving

justifications for her helpfulness. Given the below
* Ilmari Juutilainen, 94 kills, the top Finnish Air Force ace, as well as the highest scoring non-German fighter pilot in WWII. 2 kills in a Fokker D.XXI, 36 kills in a Brewster Buffalo and 56 kills in a Messerschmitt Bf 109G. The first two were
* ILM visual effects supervisor Ben Snow remembers reading an article in a special effects magazine about Dennis Muren's work on
* Ilo Ilo (2013), an award-winning Singaporean film about the Filipina maid/nanny of a Singaporean family from the author's past. The film is named for her province of origin.
* Ilona Andrews because the patrol car makes all the humans concentrate on following the speed limit and otherwise not getting caught.
* Ilona Andrews is the pen name for husband and wife writing team Ilona and Gordon Andrews.
* Ilona becomes this after getting burned by one too many men, and she eventually gets together with an
* Ilona is perfectly dressed by her culture's standards: she's wearing jewelry, and a lot of it. She's horrified when she finally understands that by Tellurian standards she's practically naked.
* "I Looked Down at Him" (sung by Magnolia in the Pantry Scene to lead into a reprise of "Make Believe") and parts of "The Creole Love Song" (an early precursor to "You Are Love") also remain as underscoring.
* I looked into the Abyss, and it Winked (Parts 3 - 6) and returned to reality after being ripped out it:
* "I Love Acid" by Luke Vibert is an acid techno song about acid techno.
* I Love Bees-affiliated. In fact, it is widely considered responsible for kicking off the ARG craze, particular in the video game industry. None of its successors so far have replicated its success, though.
* I Love Bees ARG): "Flash" is used to mean "instant", "refu" means "refugee", and "ghosting" is almost entirely used in place of "spying".
* I Love Bees ARG): Kamal's mother sets him up with Sophia because she's the daughter of a friend of the mother.
* I Love Bees Jan James becomes one when gangster Thin Kinkle kidnaps her.
* I Love Bees), made by the same people who ran The Beast. Players helped repair the fragmented AI and get it home, while unlocking audio clips that told a backstory about the day of the Covenant invasion.
* I Love Bees, often humorously decides to punish people (for offenses like doing their jobs and annoying people she likes) by hacking into their accounts and changing details to make it look like they committed various crimes. She also makes a guy lose his job for interrupting her conversation, which he has no way of knowing was happening.
* I Love Bees's viral marketing campaign, thus dampening the effect. It should be noted that, alongside "The Beast", this thing was pretty huge and sparked a new wave of ARG tie-ins to various merchandise.
* I love cheesy poofs, You love cheesy poofs. If we didn't eat cheesy poofs, We'd be...
* "I Loved 'Em Every One," a No. 1 country and top 40 pop hit by T.G. Sheppard. The cover of the album where the song came from even plays upon the song's main theme: the mysterious stranger who bounds into a number of young women's lives for what's ultimately (each time) one-night stands, and boasting of his conquests:
* I loved my wife" as she was carried out by EMTs after a supposed bathing accident, but at the time since it was just a passing hunch, he doesn't seriously investigate the matter until it comes up again later. He still has to get the lab to find more definitive proof of foul play before he could do anything substantial and the criminal wasn't arrested by the end of the episode (though the raised suspicions were enough for the wife's life insurance company to repossess the husband's newly-bought Ferrari).
* "I Love Lisa" has him pulling a similar gag by crying out "Oh, my baboon heart" and spewing it onto the cafeteria table to all the kids' disgust and his delight.

* I Love Lisa", Lisa bemoans that in order to get tickets to a Krusty show, her parents would have to be a part of Springfield's cultural elite. Cue Homer walking in, brushing his teeth with a toothbrush he found in Flanders' trash.
* I Love Lucy", after admitting housework is harder than they thought, Ricky and Fred pull out two big boxes of chocolate to apologize to their wives. Lucy and Ethel collapse, having seen and eaten more than enough chocolate during their last job.
* I Love Lucy" after a fight with Marge, but instead draws himself into a tiny corner of the bedroom.
* I Love Lucy. Almost every single "wacky" sitcom situation that you can think of was either born on this show or at least popularized by it.
* I Love Lucy called "Ricky Loses His Voice" Lucy forces her husband Ricky to drink his cough medicine after refusing it.
* I Love Lucy Day," celebrating the iconic sitcom's first airdate. Many networks air reruns of the show to honor this anniversary.
* I Love Lucy, either through the front door, or through the balcony door next to the kitchen.
* I Love Lucy episode "Breaking the Lease" is a prime example of this. After a night of window slamming at the Ricardos' apartment, the Mertzes downstairs complain enough where Ricky and Lucy threaten to move out - only stymied by a 50-year lease. They determine to break the lease by making as much noise as possible - stomping around with heavy shoes, and so on; finally climaxing by bringing Ricky's band into the apartment for a jam session. Fred almost subverts this by charging admission, but after he goes to bed, they ratchet it up by playing the Mexican Hat Dance over an over until the Mertzes give up. All, of course ends happily, as all concerned start crying when the Ricardos are actually packing.
* I Love Lucy episode "Desert Island", the Ricardos and Mertzes tow their gasless boat to a seemingly deserted island; after Ethel wanders around a little, Lucy notices huge footprints in the sand she deduces belong to a giant native, and proceeds to follow them, only to find they're Ethel's.
* I Love Lucy episode "Drafted" involved a misunderstanding which caused Ricky and Fred to think the women were pregnant and Lucy and Ethel to think the men had been drafted. Accordingly, they plan a baby shower and a going away party, respectively, for each other. To keep the parties secret until the right time, they all shove all of their guests into the Ricardos' tiny closet—giving them a huge human knot to untangle at the end of the episode.
* I Love Lucy episode featuring them returning home from Hollywood by train, Lucy continuously pulls on the emergency brake which causes the train to abruptly and violently stop. When she does it to catch a jewel thief, the conductor (who has been driven crazy by Lucy doing that) comes in says he just won $5 from the engineer.
* I Love Lucy episode "Lucy and Superman", Lucy (who is going to pose as Superman) plans to use the (several-story) window. Ethel asks her to find some other way, and Lucy responds that the other way would cause unacceptable property damage.
* I Love Lucy episode "Lucy Does a TV Commercial". At the start of the episode, Lucy attempts to sell her husband Ricky on the idea of her starring in a commercial by gutting his TV and putting on a show inside of it as if she is on air. Ricky and his friend Fred mock the performance, and when they act as if they’re going to turn off the set, Lucy breaks script to demand them to sit down, creating this effect.
* I Love Lucy episode, "Lucy Meets the Queen", Lucy practices a 'perfect curtsy' so relentlessly that she ends up with a severe charley horse that threatens to compromise Ricky's 'Trained Horses' routine, and her own chance to meet the Queen.
* I Love Lucy episode "Lucy's Show Biz Swan Song", Ricky puts on a "Gay Nineties revue" at his club. The characters sing "By the Light of the Silvery Moon" and "Sweet Adeline" in full period costume.
* I Love Lucy episode, Mario, their gondolier from Venice, stops by to see them on his way to meet his brother and tries to get a job to work in an Italian restaurant in New York. He tells Lucy that he got fired, but Lucy says he must have

misunderstood them. He tells her that, while his English "issa not so good, when two men take you under da arms, shuffle you to the door, and (bloop!)[imitates a kicking action], I issa fired!"
* I Love Lucy episode "Men Are Messy", back in 1951. Neat Lucy gets tired of sloppy Ricky messing up their apartment, and starts several zany schemes to get him to reform - including but not limited to dividing the apartment down the middle.
* I Love Lucy episode "Ricky Loses His Temper", Lucy and Ricky have a bet going to see how long she'll go without buying hats and he'll go without losing his temper. Unbeknownst to Ricky, Lucy does buy a hat and tries to make him blow up before it's delivered so it will look like he lost the bet.
* I Love Lucy episode "Ricky's Old Girlfriend", Lucy dreams that Ricky leaves her for another woman. After walking out of their apartment, Ricky returns, to which Lucy is overjoyed. However, he just came to grab a sock that she had been sewing and walks out again.
* I Love Lucy episode "The Courtroom", Ricky encourages Lucy to do this to sway the judge, who has to settle a case between the Ricardos, and their friends, the Mertzes. When Ethel follows suit, her husband Fred objects, thinking it'll ruin their case!
* I Love Lucy episode "The Golf Game", Lucy and Ethel want to take up golf, and ask Fred and Ricky how to play. The men don't want their wives following them around the golf course, so they try to discourage them by inventing a set of crazy and overly complex rules.
* I Love Lucy, Ethel's birthday is coming up, and Lucy is stunned that Fred is planning to buy her a toaster, she ends up convincing him to buy her a pair of pants. When she opens up the gift, she's not thrilled about them, saying she actually wanted a toaster, and wonder's who the idiot was who convinced Fred to buy them. Let's just say that the rest of the episode revolves around Lucy and Ethel fighting.
* I Love Lucy featured this kind of product, advertised as an elixir containing concentrated "vitamins, meat, vegetables, and minerals". It promised to help people who are "tired, run-down, and listless". Storywise, the original elixir contained 11% alcohol (which was common for patent medicines and nutritional supplements at the time) but has somehow been increased to 22% by the company, making Lucy blind stinking drunk after several unsuccessful takes.
* I Love Lucy features one in its fourth episode, "Lucy Thinks Ricky Is Trying to Murder Her". Ricky is preparing stuff for one of his shows and one of the items is a "Bang" flag gun that Lucy thinks is a real gun, finally culminating in Ricky "shooting" Lucy, showing her that it is a prop.
* I Love Lucy: For a period of time in the 1960s, networks stopped airing the final season episode "The Ricardos Visit Cuba", due to the then-strained relationship between the U.S. and Cuban governments.
* I Love Lucy for television, beta couple Fred and Ethel Mertz are older and well set in their ways. They have a dynamic that seems mildly hostile at first, but they are consistent and settled, serving as a foil to the younger Lucy and Ricky Ricardo whose relationship experiences more ups and downs.
* I Love Lucy. Frank Nelson was a frequent guest star on a number of episodes throughout the first five seasons, including such notable appearances as Freddy Filmore, a local radio emcee, and a Hollywood talent scout who launched Ricky's would-be film career. During the final season, Nelson was cast in a permanent recurring role as Ralph Ramsey, the Ricardos' neighbor in Connecticut and a TV producer who helped Ricky gain a little more exposure to a broader audience.
* I Love Lucy frequently bungles English idioms, resulting in memorable lines like "Don't cross their chickens before their bridges are hatched."
* I Love Lucy. Funny thing is, their actors hated each other and refused a spinoff.
* I Love Lucy get this way when watching a boxing match on television.
* I Love Lucy had an episode where Lucy and Ethel tried to pay their way to Europe by inventing a charity.
* I Love Lucy had Lucy and Ethel convinced that Ricky and Fred were about to join the army. They decide to show their support by knitting socks; Ricky and Fred

notice them knitting and assume that both their wives are pregnant.
* I Love Lucy has an episode where a rumor was spread about a neighbor, Grace Foster, having an affair with the milkman while Mr. Foster is away.
* I Love Lucy has her shoot a commercial for a medicine called Vitameatavegemin. While she pours a small amount into a spoon, she claims "It tastes just like candy." She then takes the spoonful and makes a face that indicates it tastes terrible.
* I Love Lucy have ended with Ricky spanking his wife Lucy for the trouble she caused. It's played for laughs because apparently, if Lucy acts like a child, she will be treated like one.
* I Love Lucy hearings, and the 1960 Presidential debates were television's Killer Apps. In Britain, the coronation of Queen Elizabeth II was this.
* I Love Lucy housewife Lucy Ricardo constantly tries her damnedest to get into showbiz, while her husband Ricky (who knows she has no talent) acts as a wet blanket.
* I Love Lucy. If divorce had been as common in the first half of the 20th century as it is now, they probably would have split up twenty years before the series began.
* I Love Lucy: In "Lucy Misses The Mertzes", the Ricardos and Mertzes walk in and out of the Westport, Connecticut train station, just barely missing one another time and again.
* I Love Lucy In one episode, Ricky is able to recognize and subvert the Zany Scheme in its infancy by asking Lucy directly, "What's up?"
* I Love Lucy. In "Pioneer Women", when the oven containing the result of this trope was opened, the bread came out in a huge oven-shaped loaf, far longer than the oven was deep, stretching all the way across the kitchen and pinning Lucy to the opposite wall.
* I Love Lucy: In "The Benefit", Ethel expresses her disappointment that Lucy will be performing at her club benefit instead of Ricky.
* I Love Lucy: In the episode "The Moustache", when Ricky grows a mustache that Lucy dislikes, she dons a false beard in protest. It's accidentally attached with Bulldog Cement ("Holds fast forever. Will not let go. Can only be removed with Bulldog Cement Remover Number Three") instead of spirit gum.
* I Love Lucy Lucy and Ethel had taken jobs at a chocolate factory and eventually Lucy and another woman start throwing chocolate at each other.
* I Love Lucy, Lucy and Ricky send Mario off to "San Francisco." Just as they return from the bus station, Mario's brother arrives at the apartment, saying he was visiting a sick friend "Sam Franceska."
* I Love Lucy, Lucy calls Ricky and has him stay on hold while she goes from downtown to their apartment so that Mrs. Hansen can't call and ask him about the check she gave her on the dress shop he doesn't know she and Ethel bought.
* I Love Lucy, Lucy compares her friend Carolyn's modern Chinese furniture to "a bad dream you'd have after eating too much Chinese food."
* I Love Lucy, Lucy gets a black eye accidentally. She jokingly tells Fred and Ethel "Ricky slugged me!" But they believe her, and not her later counter-protestations. This episode had some of the creeeepiest dialogue in the history of the show. "Well, Fred, nobody's going to believe this story. You're probably the only person in history who *actually* got a black eye from walking into a door." Oh, the Fifties — you so crazy!
* I Love Lucy, Lucy has an elaborate plan to announce to Ricky that she was pregnant, in which she prepares for him his favorite meal when he comes home for lunch. Unfortunately, as she's trying to talk to him, he's more focused on the food, among other distractions, much to her annoyance.
* I Love Lucy Lucy has to convince someone that Lawrence Welk was in the room, so she crouches behind a Madam Trussard's wax Welk seated at the table and says his catchphrase, "Wonderful, wonderful." Thuen, unbeknownst to Lucy, the real Lawrence Welk shows up and sits at the same place.
* I Love Lucy, Lucy makes a bet with Ricky that she can go without buying a new hat for longer than he can go without losing his temper. She loses the bet almost

immediately when she goes to return a hat she bought before the bet and ends up being sweet-talked by the hat seller into buying a new one, and spends the rest of the episode trying to get Ricky to lose his temper before her hat is delivered to their home so that he'll think he lost the bet instead.
* I Love Lucy: Lucy Ricardo was apparently unable to tell a joke. In one episode, she tried to tell about the lady who went to a butcher and asked for pork chops "and don't leave too much fat on them." The butcher replied, "Yes, ma'am. Which way?" Fred Mertz had heard the joke before and explained that the lady was supposed to say, "Be sure you make them lean." Lucy thought this was only a minor detail, when it was in fact the point of the joke. A mental health crisis followed when she felt isolated and rejected by the others.
* I Love Lucy, Lucy wants to test Ricky's love, so she climbs onto the ledge outside their apartment. As Ricky, Fred, and Ethel worry about what happened to Lucy, a neighbor from across the street calls Ricky and lets him know where Lucy is. Realizing that they have been tricked, they start badmouthing her, and when she comes back inside to return the insults, Ricky says that a neighbor told them she was eavesdropping on the ledge.
* I Love Lucy marriage with Ethel — adds, "You could still try."
* I Love Lucy may have the oldest case on television. Lucy and Ricky are trying to get out of their lease by holding a party with loud Cuban music late at night. Fred and Ethel turn the tables by selling tickets to the "concert".
* I Love Lucy, Middle Eastern and Arab characters et al., due to his swarthy complexion.
* I Love Lucy: Not only did all four of the series leads smoke regularly (at least during the first five years of the show), many of the guest stars lit up.
* I Love Lucy often referred to Ricky's rivalry with fellow mambo singer Xavier Cougat.
* I Love Lucy: Over the course of the series, Desi Arnaz was first granted an executive producer credit, before being elevated to co-producer.
* I Love Lucy, prevented a public release until it came to DVD in 2007.
* I Love Lucy Ricky and Lucy with their always-bickering neighbors Fred and Ethel.
* I Love Lucy, Ricky and the Mertzes are featured as characters in a book Lucy is writing (supposedly a novel but more of a thinly-veiled, exaggerated autobiography than anything else). When they read a copy of her manuscript, they are outraged at the insulting ways they have been portrayed.
* I Love Lucy, Ricky freaks out over Lucy's 1,000 franc spending spree during their trip to France. She reminds him that it's a much smaller amount in U.S. dollars.
* I Love Lucy: Ricky hides Lucy's wedding ring to teach her a lesson about carelessness, but his plan backfires when Lucy believes that she lost it in the cement of their newly built outdoor grill which she proceeds to take apart brick by brick. To make matters worse Ricky actually loses the ring. At the end of the episode it's found in a hamburger.
* I Love Lucy, Ricky, thinking he's forgotten Lucy's birthday, gets a box of candy from the bedroom and gives it to her. Lucy says that it isn't her birthday (they were really talking about Ethel's), which means Ricky has to explain why he has a gift for her. Ricky confesses that the candy is an "emergency present" that he's had for three years. He even has tags for it for every occasion.
* I Love Lucy (set in New York City, mostly in one apartment.) Has Ricky coming out to Los Angeles for a few weeks to star in a movie, he can bring Lucy, and the Mertzes tag along too. The change of scenery does nothing to change Lucy's scheming.
* I Love Lucy's Hollywood story arc places the Ricardos and the Mertzes in rural Ohio; after making a pitstop at a rundown roadside diner where the lone proprietor only serves stale cheese sandwiches, they leave. Afterwards, Lucy drives down the road, while Ricky, Fred, and Ethel sleep, finding a billboard, promising good accommodations and wonderful food if you turn left onto the next road - Lucy does so, only to take everyone right back to the same rundown diner, where the proprietor admits he was waiting for them, saying that he put up that billboard himself to make everyone travel in circles. Not surprisingly, his only cabin is

bare-bones, the full bed's mattress dips down to the floor, and passing trains shake the entire cabin violently.
* I Love Lucy show up while she's out there. She gets her cape stuck on a drainpipe so she's stuck out there in the rain. Superman goes out on the ledge and helps her get unstuck.
* I Love Lucy, since the audience knows she's his cousin, in-universe.
* I Love Lucy's insistence that Desi Arnaz play the husband in her TV show by saying they weren't sure if audiences could believe that a celebrity like Lucy had a mixed marriage with an obscure Cuban bandleader. In response, Lucy and Desi gave a vaudeville tour across the country. The tour became a success, proving to the networks that a TV show of the duo would be huge.
* I Love Lucy" so that she'd have something particularly juicy to tempt her.
* I Love Lucy) story. When they do, Lucy smugly hands Ricky his hat and he bites down on it.
* I Love Lucy takes place in an apartment building whose address was 623 East 68th Street, which would be in the middle of the East River.
* I Love Lucy, the ice cream and fudge were "played" by mashed potatoes and gravy - but the sardines, which had to show up on camera for effect, were the genuine article. Lucille Ball later said she never ate sardines again after that.
* I Love Lucy the television — she tore out the guts of the TV and is now standing inside it.
* I Love Lucy, the way Ethel described poker to Lucy: "It's a lot like hearts, only you bet, and there isn't any old maid."
* I Love Lucy: Upon tasting watercress, Lucy remarks "Very tasty... if you like buttered grass."
* I Love Lucy used the "job switching" version of this trope in the famous "chocolate factory" episode. Ricky kept on making iron marks on the clothes, made the nylon stockings into cardboard, and caused a huge mess in the kitchen.
* I Love Lucy: Vitameatavegimin. Take one somewhat alcoholic 'supplement', repeated filming takes, and a sample consumed each take.
* I Love Lucy was filmed in front of a live studio audience, and is rumored to be the source of a good deal of the canned laughter used in later shows.
* I Love Lucy was probably the first to do this on television. And the second and third and fourth and tenth...
* I Love Lucy were clearly implied to be colorful profanity, but Spanish speakers will know that most of what he said was fairly mild ("What is this woman thinking?", etc), just said in an overly excited tone.
* I Love Lucy: When Lucy and Ethel try to name their new dress shop, they decide to combine their names but can't settle on which one sounds better; LucyEth or EthelLu (a clever reference to Desi Arnaz and Lucille Ball's production company Desilu). Another episode has the Ricardos and the Mertzes buying a diner and then each person wanting to name the diner after themselves.
* I Love Lucy, when Lucy forces herself into a poker game of Ricky's, since she has just learned to play that very morning. She has no trouble convincing the regulars that she has a very good hand, and she wins when she doesn't even have a single pair.
* I Love Lucy when Lucy takes on a babysitting job. However, the mother neglected to mention it would be for twins (when she met Lucy to drop one of them off. She waited till both were out of sight to drop off the other twin). So when Lucy goes to get one of the snacks and encounters the other who demands the same thing. The twin starts whining and kicks her in the leg.
* I Love Lucy when she meets some of Ricky's friends from Cuba. Finally, Ricky tells her, "Honey, they aren't hard of hearing!"
* I Love Lucy, when the Ricardos and the Mertz end up having parts in Little Ricky's school play, Ricky, who is arguably the most talented of the four adult characters, ends up being cast as a tree.
* I Love Lucy, which featured several long-running arcs. The most famous is Lucy's pregnancy, which took up a full season from her first learning of it to giving birth and bringing Little Ricky home. Subsequent seasons followed the Ricardos and

Mertzes on long trips through Europe, the US, and a stay in Hollywood.
* I Love Lucy, you will be surprised at how similar the plots are, down to some lines and jokes having been copied word for word.
* I Love Maria is a 1988 Hong Kong science fiction film, in which a gang leader created a female armed robot named Pioneer II, which was modeled after his girlfriend's face, leading her to develop a strong hatred for the robot. Later on, the robot is sent to hunt down one of the gang's members (and as well as a researcher working for the police), who became dissatisfied with the direction the gang is headed, only for Pioneer II to malfunction and be reprogrammed (hilariously, he confuses the robot to be Maria, whom she was modeled). Pioneer II slowly begins to develop feelings for the human characters, and is later given a human disguise.
* I Love Money. Who knew Pumpkin would actually have the guts to do something big besides trash talking?
* I Love My Family) cast Simone Giertz, a 16-year-old Swedish girl on vacation, as a character's American girlfriend. Not only did she have to memorize all of her Mandarin lines phonetically, but she spoke English with a noticeable Swedish accent. Giertz would later gain internet fame as the builder of "shitty robots" and banish her Swedish accent almost completely.
* I Love My Wife, the effects the eponymous girl has on people include "Men go ape/ Apes go man."
* I Love Nuclear Power; his father, Locke, performed "biological enhancements" on himself, noting that Knuckles' was made up of more than just the genetic material of his parents. Then Locke irradiated his son's egg with Chaos Energy from the Master Emerald.
* I Love Nuclear Power — Radiation gives you superhuman abilities.
* I Love Nuclear Power: The first nuclear power plant was built in 1954. Many people were frightened of the US and USSR engaging in a nuclear war. When Marvel Comics launched itself at the end of the decade, its heroes all had origins dealing with nuclear power.
* "I love that man!" - (reference to the character Beulah (Marlin Hurt) on
* I Love the Dead: Someone has a depraved lust for dead bodies (necrophilia).
* I Love to Singa" after his father catches him singing jazz behind his back.
* I Love to Singa, have a gag where a character is listening to the police over their radio. When a character wonders if they found who they are looking for, the radio replies they have not.
* I Love to Singa, Professor Fritz Owl is a classical musician and wants his children to follow suit. Most of them do, but one of his sons Owl Jolson wants to be a jazz singer instead. This upsets Fritz so much that he throws Owl Jolson out of the house, though he quickly regrets it. Fritz ultimately encourages his son that if he loves to singa, then he should singa.
* I Love Trouble features Julia Roberts skinny dipping and then getting her humorous punishment for it by getting photographed by a bunch of boyscouts.
* I Love Trouble in front of all the boys as they begin taking pictures.
* I Love Trouble she can get her hands on happens to be hiding behind Nolte. Still a little miffed from a previous argument the pair had had, Nolte proceeds to walk towards the boyscouts while ignoring Julia's surprised protests. Nick gets her to admit to secretly reading his novel, despite her professed uninterest in his writing, but Julia makes the mistake of mumbling how she'd expected more from the writing. As one might expect, the scene closes with an embarrassed Julia squeeling in alarm as the boyscout's camera's are going off.
* I Love Trouble) to openly ask his assistant to start going through all of Peter's past stories for one almost exactly like what he just submitted. Realizing it's the crash or find a new job, Peter reluctantly goes.
* I Love Wolffy 3, but it was cancelled due to the first two doing poorly at the box office.
* I Love Wolffy and its sequel are the only ones to have no English subtitles.
* I Love You, Alice B. Toklas! and find his own path to happiness alone.
* I Love You Because I Can't Control You falls in love with someone who rejects

their advances.
* I Love You, Colonel Sanders!: It's never actually commented on whether the player is male or female.
* I Love You, Colonel Sanders!, that has the word "Love" in the title.
* I Love You, Colonel Sanders!, the entrance of Colonel Sanders onto the scene is often heralded by cherry petals floating across the screen.
* I Love You, Colonel Sanders!, the player character knew Mariam from when they were babies:
* I Love You, Grease Pig!", Jasmine jokingly warns Samey not to let her hand swell up into a wicket-keeper's glove. Neither Samey nor Shawn know how to respond to this and let the crickets play their tune in the background. The joke has an extra layer to it because, as Jasmine points out, she made a joke about the sport cricket.
* I Love You, Man, a guy misinterprets the intentions of Peter (Paul Rudd), which is to say he's just looking for a guy best friend, and promptly kisses him on the mouth.
* I Love You, Man has fun with this. Jason Segel's character has many aspects of this trope.
* I Love You, Man the bromance and main storyline feature this. The main character separates from his fiancee for a day or so, but the main Second Act Breakup is between the main character and his new friend.
* I Love You, Man; the gay groomsman played by Thomas Lennon unsuccesfully hits on the protagonist's gay brother while at the wedding. "Sorry. You're not my type. I only date straight guys."
* I Love You, Man tried to sell itself as "the first bromantic comedy." It covered the start and development of a male friendship much how other movies might a romance, and largely not as a parody.
* I Love You, Man. Where Peter Klaven's repressed real estate agent is taught how to live life by the maniac pixie dream guy Sydney Fife.
* "I love you most out of all the girls in all the world who love me back."
* I Love You Phillip Morris, but failing to have any knowledge on the premise can give the impression that softcore gay pornography is being viewed.
* I Love You Phillip Morris (LGBT biopic about the gay Steven Jay Russell and his boyfriend Phillip Morris; subject matter includes queer male romance)
* I Love You Phillip Morris Phillip runs through the prison and out into the prison "garden" to chase after the prison bus Steven was on and they promise they'll see each other again. Steven drops the title of the film in the process.
* I Love You Phillip Morris, Steven tells one of these to the receptionist. She finds it funny, and the joke is quickly told to anyone and everyone in the firm, with plenty of variations, including a nasty anti-Semitic one.
* I Love Your Work, Giovanni Ribisi's character kisses a woman while filming a scene in an elevator, then promptly hops off the Scully Box at the end of the take, revealing that the woman is about six inches taller than him.
* "I Love You" sign resembles the "horns" sign. Never mind that 1) the "horns" sign is different from the ILY sign (it has the thumb towards the palm, rather than outstretched,) and 2) the sign isn't even an "official" part of the language, just a bit of slang made up by the ASL community themselves as a combination of the letters I, L and Y, so it has nothing to do with any supposed Satanic/masonic/Zionist etc. plot by the creators of ASL.
* I Love You to Death (loosely based on a real attempted murder) Rosalie Boca makes several attempts to murder her husband Joey for cheating on her with other women, and is helped by her mother Nadja and her friend Devo, who's in love with her. When the cops finally do find out, the three try to cover for each other by saying the other two had nothing to do with it. Nadja claims her daughter begged her not to kill Joey, but she went on anyway, explaining, "I'm her mother, I do what I want."
* I Love You, Vampire Son: A vampire turned someone into one of their own out of love.
* I love you. What am I doing? I love you!" You can actually hear her realize on the third "I love you" that she means it romantically.

* I Love You With All My Heart by Jane Chapman, the bear Little Bear flops to the ground and sniffles that she wants her mommy after losing a race at school. Then she remembers what her mommy told her - that if she puts her paw on her heart, she'll feel her love beating on and on forever. So she does so and cheers up.
* I Love You, You're Perfect, Now Change. A group of adults with defined standards in what they're looking for in a spouse are forced to listen to a convict's story about how he grew so bitter over being single for so long that he eventually snapped and murdered all of the couples at a New Year's party. This terrifies his audience into abandoning their standards, grabbing the nearest member of the opposite sex, and running off to get married on the spot.
* Il Palazzo appears and restores Hyatt's memory, and she leaves Watanabe. This ends up driving Watanabe insane.
* Il posto: Domenico is sitting at a table at the New Year's party, looking morose, holding a glass of champagne. Another guest says "Go on, drink, it will cheer you up!" Cut to Domenico dancing in the middle of a conga line.
* Il Ragazzo Invisibile: Or rather, completely naked, and spying on semi-naked girls.
* Il Re Pastore who eventually allows the four to follow their hearts.
* Il sapore del grano dynamic is both invoked and subverted. Duilio teaches Lorenzo to drive a tractor and identify trees and offers him the simple affection which Lorenzo, who lacks a family and whose sexual relationships with women are emotionally unsatisfying, needs. When Lorenzo's girlfriend, seeing a postcard from Duilio, asks if he's one of Lorenzo's pupils, Lorenzo says, "No, he's the one who taught me everything I know."
* Ilsa, She Wolf of the SS Naziploitation franchise. 4 films since 1974.
* Il Sole penetra le illusioni (幻影ヲ駆ケル太陽) uses katakana where hiragana would normally be used.
* Il Sole penetra le illusioni are triplets, which sort of justifies them often being literally copy-pasted and colour-tweaked. Also, Etia and Ariel's outfits are identical except for colour and the pattern on their circle-things.
* Il Sole penetra le illusioni began as an anime, then got a manga adaption and a light novel prequel.
* Il Sole penetra le illusioni, episode 1. Akari does end up passing out, but that had more to do with getting strangled by a daemonia.
* Il Sole penetra le illusioni has a heavy tarot theme and four tarot-using fortunetellers. So, this turns up. The first episode has things start going to shit after the main character gets "The Tower" in a tarot reading.
* Il Sole penetra le illusioni has the ability to create magical vines. Meanwhile, Akari's association with The Sun causes plants near her to grow very quickly.
* Il Sole penetra le illusioni is Sephiro Fiore's base officially being a fortune telling school. Since the monster attacks look exactly like accidents to normal people, this is really all that's necessary.
* Il Sole penetra le illusioni it's guaranteed that that person is possessed by a daemonia.
* Il Sole penetra le illusioni, Laplace and Schrodinger, are named for thought experiments in physics on the nature of causality. In case you haven't guessed, the show has a destiny theme.
* Il Sole penetra le illusioni: Plus an unaired 14th episode that serves as a prequel.
* Il Sole penetra le illusioni's bonus 14th episode serves as a prequel, showing more of the bond between Akari and Fuyuna, and how Luna got started as a magical girl.
* Il Sole penetra le illusioni: Sephiro Fiore maintains the girls' education under the guise of a fortune-telling school while sending them out to fight monsters.
* Il Sole penetra le illusioni show, so they only get weirder when they transform.
* Il Sole penetra le illusioni: Such is the burden faced by wielders of the Elemental Tarot: they can't kill Daemonia without killing the humans they possess, and only they remember anything about those people while everyone else forgets

about them.
* Il Sole penetra le illusioni take place in a weird approximation of what's going on in the real world. For the most part, this means that the Daemonia take the form of whatever they're manipulating, so the heroes can prevent more damage by blocking it's strikes, binding it, etc.
* Il Sole penetra le illusioni: The daemonia can only be killed by destroying their tarot card, located in a sphere in their body.
* Il Sole penetra le illusioni this happens to the people that were possessed by the daemonia.
* Il Sole penetra le illusioni this is said word for word, regarding the fact that the heroes have to kill the victims of possession.
* Il Sole penetra le illusioni, what happens to the Astralux can wreck havoc on the real world.
* Il tabarro had Michele's aria "Scorri, fiume," whose music was mostly (but not entirely) the same as its replacement, "Nulla! Silenzio!" Puccini apparently demanded the rewrite because he wanted Michele to be more concerned with plotting revenge than contemplating suicide.
* Il tabarro includes a barrel-organ waltz where the second flute is playing off-key most of the time.
* Il Tempo Gigante. The other cars in the race are also cool, but not quite up to the same level as the protagonists' car.
* Il Trovatore. And the boys don't even know they're brothers. Consequence? Well, it's an opera...
* Il Trovatore. He sings that long aria in the beginning that you sleep through. Then, in the current London production, Ferrando becomes Luna's bad spirit instead of the old buddy... being bald and having a Villain Scar.
* Il Trovatore) how he looked, Milanov laughed at him and said that he looked like a rooster. Then, Leonard Warren laughed at himself.
* Il trovatore is so jealous of his rival that he outright says he wants to act as evil towards him as possible. It ended in his rival and his beloved both being dead.
* Il Trovatore - style, and rescue the soprano. During the first rehersal, he misjudged the distance and crashed painfully to the floor, but managed to get up and signal to the rest of the cast that he could continue. The soprano then changed her line "Have you descended from Heaven?" to "Have you plummeted down from Heaven?" and then he had to sing through pain and laughter combined.
* Il Trovatore takes this to extremes. Ok, it takes everything to extremes.
* Il Trovatore, the gypsy Azucena seeks revenge against the di Luna family for burning her mother as a witch.
* I, Lucifer a novel written from the devil's perspective details his various efforts to corrupt mortal souls.
* I, Lucifer by Glen Duncan has Lucifer being granted a second chance for redemption by living life as a mortal. The book is told from his perspective with all the dark humour, sex and charm you'd expect from the devil himself. Deals with his side of the story.
* I, Lucifer: Forced to duel with Willie, pistol against throwing knife.
* I, Lucifer one of the few things Lucifer is very vague and evasive on is the exact nature of Hell, whether it's a horrific place or actually not so bad. It's very difficult to assess if he's hiding something or just messing with the reader.
* I, Lucifer struggling writer Declan Gunn's body is possessed by none other than Lucifer himself, so that old Luce can sample the mortal life and a chance for redemption.
* I, Lucifer, whose body is given to Lucifer to live as a mortal for a trial run.
* Ilulu Taketo due to her poor transformation skills giving her the relative height of a child.
* I Luv Halloween amerimanga, Moochie's "cabbage poot" is an almost blink-and-you'll-miss-it joke, the youtube animation turned it into a 20 second long EXPLOSION that leads one to wonder just what the heck she ate for breakfast that day.

* I Luv Halloween, Finch fills an apple with razor blades after he and his friends were cheated out of their candy. He gives the apple to a cop. The result isn't pretty.
* I Luv Halloween: Take out lovable, and you got Mr. Kitty, a young trick-or-treater dressed as a cat who loves to ogle at women's cleavages. In the first volume, his head actually explodes when he witnesses a teenager flashing her bowling ball-sized breasts in anger.
* Il viaggio a Reims… when the plot cuts off for the whole lot to arrange a concert in King Charles X's honor.
* Il viaggio a Reims with Don Profondo and platonically adored by all other men—got it all? Good.
* Ilya (disguised as a slave) is slapped by Pally (a higher-ranking slave) when he mouths off about (not to, about) a non-slave.
* Ilya in the "Unlimited Blade Works" scenario. Yes, she was a psychopathic monster at worst, appeared in 'Unlimited Blade Works' long enough for a finale with backstory that managed to make her sympathetic without even giving away her whole
* Ilya is also very capable of being this trope... As long as she's not commanding her nine-foot tall monster servant to rip you limb from limb because she's bored... Or trying to control your mind with magic... Or just in other ways being the perfect example of the
* Ilya Ivanovich IvanovIn 1977, it was proven that human sperm could penetrate the outer membranes of a gibbon egg. Gibbons, also called Hylobatids or lesser apes, are even less closely related to humans than chimps. The tests were repeated with eggs from non-Hominoidea species, like baboons and rhesus monkeys, which the sperm did not attempt to fertilize. While purely theoretical at this point, it suggests interbreeding between these groups could be possible.
* Ilya Ivanovich Ivanov was a Russian biologist who developed modern systems of livestock artificial insemination, creating a program that allowed Tsarist Russia, and later the Soviet Union, to produce animals in large numbers. He was also obsessed with using artificial insemination to create animal crossbreeds, including failed attempts to transplant human semen into a chimpanzee.
* Ilya Kuryakin while at a sleepover at a friend's house. Neither the friend's mother (who caught her) nor Betty was amused. It's possible she simply didn't know what she was doing, though - it's not uncommon for children younger than her to realize that touching yourself in certain places feels good, and it's likely the sexual education classes of the early 1960s wouldn't have helped to clear anything up...
* Ilya Muromets, after Ilya is released, there is a full minute's worth of a panorama showing the aftermath of Alyosha and Dobrynya's warriors holding a border position against the Tugars' flanking maneuver.
* Ilya Muromets: "I had set a trap for a marten, and I've caught a boyar's pants".
* Ilya Muromets (The Sword and the Dragon) is portrayed this way. In one scene she sings cheerfully, surrounded by forest animals.
* Ilya, which is rather baffling to Shirou. Eventually he decides it's because she has no sense of right and wrong, and instead acts on any desire she has, no matter what it is.
* Ilyushin Il-2 Shturmovik was extremely well protected and armoured, and difficult to shoot down. It had only two weak points: the engine radiator (it had water cooled engine) and the main wing spar (breaking it would render the wings and fuselage on so hard stress the plane would disintegrate in mid-flight). The German and Finnish pilots were instructed to approach the Shturmovik from an inclined sector from behind and aim at the joint of the wing and fuselage, effectively cutting the main wing spar. Conversely, if a photograph shows a shot-down Shturmovik relatively intact, it has either had its pilot killed or engine shot.
* "I'm 31 years old!") with enormously thick glasses and terrible luck. He earned his appellation from the production crew when they noticed how shriveled and unrealistic he was. According to a DVD commentary for one episode, a number of viewers were disgusted by Moleman's appearance, and he was reused in order to annoy those people.

* Imabikiso, partially since the hero is trying to investigate where the drug Vision is being made from.
* I'm a Celebrity... Get Me Out of Here! gets celebrities to stick their faces into tanks of slime, get it poured over them or swim in it. Oh, and often there's worms and insects. All this to win food for themselves and their competitors.
* I'm a Celebrity... Get Me Out of Here! is mostly made of opportunities to do this to celebrities.
* I'm a Celebrity... Get Me Out of Here!, proving that it can work in real life. So far no celebrities have been smart enough to avoid getting caught in it.
* I'm a Celebrity... Get Me Out of Here! shows someone up to their neck in a quicksand pit saying the title of the show.
* I'm a celebrity, get me out of here! There's a scene where there's a volcano erupting nearby, and they want to stop it so they don't get hurt. They catapult a rock into the volcano to try to plug it up, but it falls into the crater. Someone says, "We may need a bigger rock," to which the reply is, "Like, duh!"
* I'm a computer! I'm a computer-y guy! Everything made out of buttons and wires!
* "I'm A Crazy Weirdo" is, well... a song about a self-proclaimed "crazy weirdo" calling someone repeatedly.
* I'm a Cyborg, but That's OK It gets suberverted since Young-goon finds it perfectly reasonable, but Il-soon begins to realize how awkward the situation is once she actually undresses.
* I'm a Cyborg, but That's OK she is a robot, and has many hallucinations. Over the course of the movie, another patient tries to romance her while playing along with her delusions.
* I'm a Cyborg, but That's OK, when Il-soon tries to kiss Young-goon, she lifts off the ground since he has trouble bending down to her.
* I'm Addicted to You begins when Hinase Hotaru, a girl who's never fallen in love before, gets confessed to by Hananoi-kun, the class pretty boy whose love comes on too strong. She starts going out with him in order to find out what love's about, and the title page of chapter 2 shows them tied together by a string of fate around their pinky fingers: Hananoi-kun holds up his pinky while looking affectionately at Hotaru, who is examining her end of the string with wide-eyed curiosity.
* I made a conscious decision to be guided by my conscience in the matter.
* I'm a Doctor, Not a Placeholder: A stock phrase for people who are asked to do something outside their field and are offended by it.
* Imadoki! and Kouki ties his handkerchief around the wound. She later washes the handkerchief and thinks of returning it, with Kouki telling her that he's surprised she made such a big deal out of that.
* Imadoki! has Tanpopo use her bicycle to leap over the closed schoolgate and she ends up crashing into Kouki Kugyou.
* Imadoki! is so angry that student council president Ogata mocked her friend, Arisa, over her pregnancy that she quickly asks Kouki if he minds that her actions will mean their request to exchange all fake plants with real ones gets denied, and then smacks Ogata in full-page glory.
* Imadoki! It's more one-sided on Tanpopo's end, as she and Koki very clearly have feelings for each other, but when Yoji confesses his own feelings for Tanpopo, she briefly dates him.
* I'ma Firin' Mah Lazah" by Morbicae is based on the Shoop da Whoop meme, so of course it is all about this trope.
* Imageboards can have a similar effect. You open up a discussion you like, then you go through all the discussions on that board. By the time you're done new threads have started and you have to check all those. Then you have go back to see if anyone has added to discussions you have already been in, and then you just keep hitting the refresh button until new threads start.
* Image Boards is "Playoff wins: 0". Kind of ironic, when you remember his days at Boston College, where he was known as a clutch QB (Hence the nickname, Matty Ice).
* Image Boards videogames is a quite remarkable and interesting man, because he terminates extraterrestrials and does not cower in the face of insurmountable odds." This has led, for example, to "NO U" becoming "I would like to elucidate the

fact that the aforementioned statements about me apply more accurately to their own author."
* Image Boards, where multiple threads are used to create coherant jokes or image-series. Unless you visited the website at the right time, the only way to understand the point of these threads is to wait until someone compiles the screenshots.
* Image Booru tag searching can differ in small yet significant ways. For example, on Danbooru you link words with underscores and use spaces to separate tags, while Derpibooru allows for space-separated phrases and separates tags with commas. Cue trying to use one 'booru's style with another.
* image, claimed that Allied troops had far more fear of the Southeast Asian jungles than Japanese troops did.
* Image Comics a new race of Spectrans from human genetic material. Those weird animalistic uniforms they wear are meant to resemble the long-dead original Spectrans.
* Image Comics, as one of the most universally acclaimed and celebrated comics of the generation, and Image has since made it the mascot of the company.
* Image Comics did a lot to change what was possible for both creators and the comic book medium.
* Image Comics — Jacob Marlowe (Lord Emp) is the multi-millionaire financier as well as the team leader. He's also shown to be rather far below average height. (Four feet tall wouldn't be far off, though with scales being what they are in comics, it's sometimes hard to say.)
* Image Comics mini-series). Since then, there have been a number of Image crossovers, but each creator was free to decide just how much that counts in their continuity.
* Image Comics of years. Earth was a minor backwater of this war that lost contact, and the war kept going. When both sides finally re-established contact, they discover that the war had ended thousands of years ago but no-one told them. So they decided "to heck with them" and went on fighting anyway.
* Image Comics properties, which encompassed about half a dozen titles, and made his Wildstorm Studios into a DC imprint.
* Image Comics seems to release a lot of thick anthology books like Popgun, a general collection of indie artists, 24 Seven, different stories set in a world inhabited entirely by humaniod robots and Liquid City a collection consisting of work by artists from South East Asia. Image's head publisher Erik Larsen has said he really loves anthologies, which works out nicely for readers who also like them.
* Image Comics showed a disavantage in this model, in the early days, the Image properties were part of a
* Image Comics's nemesis Diablolique takes revenge on her enemy (and on men as a whole) by changing every man Glory had ever met into a woman. The event lasted only a month and didn't have much to carry on plot wise, but it occurred through much of image's then-current lines, dramatically raising the amount of fanservice. As was the point.
* Image Comics: The heroine Blacklight has flight powers — and acrophobia.
* Image Comics was announced for PlayStation and PC, and was not released, though the PC version's demo is available.
* Image Comics was that artists and writers working for Marvel and DC wanted to own their own properties, avoiding this very trope.
* Image Comics, where the characters from the various studios making up Image would be briefly shunted off into separate universes, then joined back together, mostly. The original notion was that the Silvestri characters would get their own 'verse, while the Liefeld characters would stay part of the whole. Instead, due to real-world machinations, the Liefeld characters vanish without anyone noticing partway through the series (replaced by similar heroes from other 'verses), and the Silvestri characters leave in a solemn parting scene, then return suddenly in the very last panel.
* Image Fight does this right before the final few stages of the game.
* image in the 1980s, combining the Judas Priest facade above with KISS and Alice

Cooper-style shock rock antics turned up to eleven, unsubtle Satanic imagery, songs about sex, drugs and rock 'n' roll, big hair, pointy guitars and spandex.
* Image in the Sand", Sisko is attacked by a Bajoran religious fanatic, who says "You will never find the Orb of the Emissary!" Immediately after, Jake knocks the assassin out and calls for medical attention.
* Image Macro (Foul Bachelorette Frog) who is just as lazy and disgusting as he is, if not moreso.
* Image Macro) is "I put Redbull in my coffee this morning instead of water. Now I can see noises." The second sentence is sometimes replaced with "Now I can hear colors."
* Image Macro saying, "I'm not saying it was aliens, but, it was aliens."
* Image Macro; the first caption is about something stereotypically bad about the Muslim or the black guy, and the second caption turns the first one better in context.
* Image Macro with a caption like "Babylon 5 agrees that you're a fucking idiot".
* image of a Hand counts as a curse point. Emperor Valkor made a point to only possess Stythanyx and just let him control the Hands to avoid spreading the curse to the rest of the Collective hive mind.
* "Image of the Fendahl": Four hands Stael a pistol, and heads to the stairs. When he reaches the top, we hear a single gunshot. The Doctor looks back, the scene changes, and the next time Stael is mentioned it's a reference to his suicide.
* "Image of the Fendahl" in the universe, and is so terrifying even looking upon it causes its victims to be rendered immobile with fear. The Fendahl Core appears as a gold-skinned human woman.
* Image of the Fendahl into plain English for the sake of the guest character he's failing to communicate with. This involves her displaying technical knowledge about chemistry jargon that she doesn't show again.
* Image Pickin', but the example isn't, this can lead to some confusion. This is why it's a bad idea to write such examples.
* Imager Portfolio novel has as one of the central conflicts a dispute between the Rex (King) and the High Holders (Nobility) about the tax rates, which turns into a high-stakes fiscal game of chicken thanks to a long standing law that nobody is required to pay their taxes for the current fiscal period until the tax laws for the next fiscal period have been finalized.
* Images of Mike Enslin's deceased daughter are used by the titular room
* Images of the world as a flat object that it is possible to sail off the edge of are prevalent in works based on the erroneous assumption that
* Image Song. It starts off with one, but she's one of the heroines of the series.
* Image Song normal song in the entire series; otherwise they are just talk tracks.
* Image Song 'Poi' means "poof," and it's used in-context as "making problems and bad luck go POOF!"
* Image Songs) is written as a travel card/love letter to Akane. He angsts a lot about being so far away from her, but the lyrics make it clear that while he thinks he's in the other end of Japan, he's probably in her backyard.
* Image Song TV show, the backup singers play along with the Riddler's "riddles" until...
* Imaginaerum, main character Thomas Whitman is played by Tuomas Holopainen, and his friend and former bandmate Ann is played by Tuomas' real life friend and now former bandmate Anette Olzon.
* imaginary boyfriend of an earlier draft, where there was a scene where Joy and Bing Bong would meet the actual Justin Bieber in a place called Boy Research.
* "Imaginary Fiends" is set in a world where inter dimensional beings latch parasitically onto the minds of children to draw sustenance from their emotions in the guise of their imaginary friends. Some fade with time as the interest of their charges wanes, others get more greedy and grow stronger, eventually moving onto drawing fear out of multiple hosts.
* "imaginary friend", and all she wanted was for someone to find her body.
* Imaginary Friend brought to life. She doesn't take it well until Twilight Sparkle, Zecora, and Princess Luna assure her it doesn't matter where she came

from, she's real in every way that matters.
* imaginary friend—which leads him to believe that he's still locked away in the psychiatric ward, and that he hallucinated the plane crash. He drops that theory after Libby convinces him that it's complete nonsense.
* Imaginary Friend, merely saying that "Calvin sees Hobbes one way, and everyone else sees Hobbes another way."
* Imaginary Friend said that with the tone of the film, a more serious Hitler would be out of place and thinks that Hitler was such an “evil fucking cunt” that he doesn’t deserve the dignity of getting a serious portrayal. That being said, he does become more menacing as the film progresses and Jojo grows more disillusioned with him. Especially after he finds out that real Hitler was a coward who killed himself rather than face trial for what he’d done.
* Imaginary Friends" is that they're all actual, real fractions of European folklore and that the reason England can see them is because he's the only one who still believes in them.
* Imaginary Friend: Someone treats a figment of their imagination like a friend.
* Imaginary Friend, this is actually the Little People playing with them.
* Imaginary Friend to blame misbehavior on, children have also been known to ascribe good deeds, successes, and achievements to such non-existent companions.
* Imaginary Friend: Treating a figment of your imagination as your friend.
* imaginary from a wandering Chinese master who somehow made it to Palestine.
* Imaginary Landscape No. 4.; and other pieces using vegetables, conch shells, and the sound of fire. Yes.
* "Imaginary Lover" by the Atlanta Rhythm Section. One of the rare examples of a song that's unambiguously about masturbation and managed to still become a US Top 10 hit (Yes, it was
* Imaginary Love Triangle: Characters are mistakenly assumed to be involved in a love triangle.
* Imaginary Love Triangle: Someone thinks there's a love triangle, even though there isn't really
* imaginary mass impossible due to certain instabilities it would provoke in quantum field theories.
* Imaginary Number District formed from the combined AIM of every esper in Academy City, it exists in the same location as the city, can be trasversed, and even brought forth into the real world.
* Imaginary Seas as well as open the door to Olympus for the Servants that come after him. As if to emphasize the point, he gives Pandora's Box to Hephaestus, telling him to "just hand it to the next guy", in case he doesn't survive his battle with Poseidon.
* Imaginary Seas based on what he knows about himself and the gods of the Lostbelt to keep Artemis from simply nuking the island.
* Imaginary Seas, both Chirons are able to draw and fire their bows at speeds that make them act more like automatic weapons than bows.
* Imaginary Seas, both Percy and Caenis have been given Poseidon's trident and thus access to his Authorities over earth and sea through his favor for them, Percy for being his favorite son and Caenis as an apology for raping her. This is also why Percy qualifies for Lancer, though he'd almost certainly kill his Master from sheer mana consumption before he got to do anything if he were summoned like this.
* Imaginary Seas. But since it was never struck in life, Percy's version of Andreia Amarantos doesn't weaken him when he's struck there besides permanently turning off the Noble Phantasm.
* Imaginary Seas, Caenis refuses to surrender or beg for her life and instead keeps cursing Percy after he thoroughly trounces her in a fight. Granted, it doesn't come to that since Wodime shows up for the save.
* Imaginary Seas death to the soldiers Lostbelt Chiron sends after Percy. At full power, they're strong enough to scour an entire island.
* Imaginary Seas outfit. Chiron is no slouch either, saying that he's having a "slightly difficult day" while murdering scores of Olympus' soldiers with Pankration.

* Imaginary Seas, Percy considers just burying Caenis alive under rocks and trees until she starves to death. He dismisses the thought when he remembers that Servants can simply disperse into Spirit Form.
* Imaginary Seas, Percy does his best to minimize civilian collateral during his battles, but he soon finds that it's all for naught, as succeeding in his quest will destroy the Lostbelt and wipe everyone in it from existence. Despite this, he stubbornly sticks to his morals until Olympus' forces rally the populace against him, forcing him to reluctantly destroy everything on Eris Island with Nine Lives to obscure his and Chiron's escape from Artemis' and Zeus' prying eyes.
* Imaginary Seas. Percy feels uncomfortable walking around with his pecs and abs showing in a ridiculously gaudy-looking set of armor he had no say in wearing, so he puts on a shirt the first chance he gets.
* Imaginary Seas'', Percy has a dream of Olga Marie on the day of her death, seeing everything up the point that the control room was bombed and listening to all of her thoughts. He then sees the Priestess of the Alien God before the dream ends. This is also why Percy is able to recognize Wodime on sight, though he doesn't know that Wodime is now one of the Crypters who began the Lostbelt crisis.
* Imaginary Seas, Percy has a listed Magic Resistance of C, only allowing it to block weak spells with two verses or less. But his effective rank is significantly higher due to saving Hecate from being bound in eternal torment for rebelling against Olympus and granting her recognition and a cabin at Camp Half-Blood. It gets bumped up to A while he's standing in water, and elevated to EX after taking Moly.
* Imaginary Seas. Percy puts on the Nemean Lion's pelt in the form of the trenchcoat he wore as a teenager while snooping around Deimos Island in search of Hephaestus. While the protection is obviously welcome, it makes him look suspicious and feel suspicious, to the point that he thinks people would call the cops on him if he put on a pair of sunglasses.
* Imaginary Seas proud and confident in herself, treating others like morons to be educated or chess pieces to move. Percy refers to her as a "heartless, cast-iron bitch", but is able to abuse her pride to manipulate her into being more helpful.
* Imaginary Seas, so he tries to find a shirt to cover himself up with.
* Imaginary Seas so long as he's near the sea. However, in an inversion of this trope, Percy loses the Curse of Achilles in Rome or areas conceptually defined as Rome because of how the Little Tiber washed it away in The Son of Neptune.
* Imaginary Seas, the muscles of Percy's arms briefly bulge in size while he's using his Stout Arm of Brutality skill, allowing him to easily thrash Lostbelt Chiron with brute force.
* Imaginary Seas, this is Percy's reaction to realizing that cannibalism is a recurring thing in Greek mythology after Chiron reveals his plan to absorb his Lostbelt counterpart for power and information.
* Imaginary Seas. This is why he has an A+ Rank in Stout Arm of Brutality, his father's armor, Divine Core, and trident, and the same invulnerability as Caenis.
* Imaginary Seas to slowly reveal Percy's capabilities over the course of the story, as more of the restrictions are lifted each time he breaks out new abilities in a fight.
* Imaginary Seas who has saved the world time and again and lived through Greek myth in the modern day, but he's also completely unaware of the gods' secret history as machines from another world or the notions of Servants or Lostbelts. Because of this, numerous pieces of information are introduced to the reader by others telling it to him.
* Imaginary Seas, Zoe still hasn't forgiven Heracles for taking her sword and essentially writing her out of history. Because of this, Riptide suffers a rank down in Heracles's hands, and calling upon her aid will likely end up making Zoe fire upon Heracles too.
* imaginary sister, Feebee wears a pink shirt and helmet, while Jeffy wears a blue helmet and a yellow shirt.
* Imagination-Based Superpower: A power based on the user's imagination.
* Imagination-Based Superpower will only create simple props. Sometimes those props

have a glow effect.
* Imaginationland" features terrorists invading Imaginationland and killing many fictional characters. They use a rocket character to release the evil characters, getting killed themselves in the process.
* Imagination Movers had an episode where Mr. Knit Knots is stuck into a colorful costume, which is something he didn't like at all. He needs to take it off before the time he had to meet with his "Boring Club".
* Imagination Movers has Warehouse Mouse, a Team Pet that gets actual plot within the show.
* Imagination Movers, Knit Knots wasn't scared by Warehouse Mouse to the point of panic but did urge the Movers to keep the "woodland creature" away from him. An episode of the show also focused on the Movers helping a TV repairman to get over his fear of mice so that he could stick around to fix their TV and not be afraid of Warehouse Mouse.
* imagination segment he carries Elliot like this, but manages to bang her head on every doorway killing her by the time he gets back to Dr. Cox.
* Imaginatively known as "The Builders". It was shown that they made them to defeat another alien race and things went wrong. So less abusive and more technology has turned against us. Given the kitbashed and divergent technologies of Berserkers over the millennia of endless killing, it is unknown if one race used them as the Final Option against another or if two or more different factions or races deployed these death machines against each other. (You could always ask a berserker—but they don't care, and you wouldn't survive to share the answer...) No matter how you slice it, Berserkers are shining examples of
* Imaginators and can also use it to either attract enemies closer to her or lay down "Trails of Pain" that further damage opponents who cross them.
* Imagine a factory that makes rocket fuel. Imagine the entire facility coated in highly unstable, incredibly dangerous powdered fuel due to lax safety protocols. Imagine this facility also stockpiling said rocket fuel from floor to ceiling. And then imagine somebody firing up a blowtorch in this same facility. Ladies and gentlemen, I present to you:
* Imagine a World Without Hate, an ad by the Anti-Defamation League which shows how some people, like Yitzhak Rabin and Martin Luther King, could have changed the world had they not been assassinated, to the tune of John Lennon's Imagine.
* Imagine being a first responder, law enforcement officer or government agent (like an FBI agent for example). Maybe one day you pull off something extraordinary; you rescue a family from a burning home, you solve a major case, you apprehend a terrorist or something else along those lines. You’re a hero and everyone tells you that. But remember that such things are pulled off daily by people like you all around the world; there are always brave men and women committing major acts of heroism that often go unnoticed by society at large because it’s just their job to do so. They may not get recognition for it, but there are many people out there doing what you do or something similar and they’re heroes too.
* Imagine Breaker gets around this because she actually changes the surroundings instead of moving Touma. Also, when Awaki Musujime tries to kill Kuroko by teleporting a massive object on top on her, Touma punches the object while it is materializing, causing it to return to its starting position.
* Imagine Breaker makes him the perfect guy to deal with supernatural threats. Logically, it doesn't help him against mundane threats. He has to deal with street thugs and bullies the old fashioned way, and the magical organization GREMLIN learn and hires armed mercenaries to deal with him, since he can't negate their mundane guns.
* Imagine Breaker Mikoto under most circumstances. In their first onscreen confrontation, Touma protests to a sparking Mikoto that he's "just a Level 0" esper. Mikoto makes a compelling rebuttal in the form of a giant blast of (ineffectual) electricity. He's "Level 0" only because his power is impossible to quantify.
* Imagine Breaker, since she didn't believe in its powers (just as he doesn't

believe in her magic). He uses it on her "Walking Church" (A magic priests robe to shield her from danger). Since the magic that sustained her robe was nullified, the robe goes into shreds and Touma gets an eyeful of her physique... And is bitten in revenge.
* Imagine, characters infected by the disease age at a rate of 1 year per hour using the standard aging rules (loss of Strength, Dexterity and Endurance). This will cause them to die within a couple of days unless they find some way of curing the disease.
* Imagine Dragons about how he needs to reconnect with his past, and reflecting on childhood memories and his explorations of remote New Zealand locations. The memories (including some taken from home movies) play in full color, as does Dan's rise out of the tub at the end of the video.
* Imagine Dragons - "Amsterdam". He apologizes for his problems and/or behavior leading to the end of the romance, but reminds her that now she has a chance of finding someone better.
* Imagine Dragons' "Believer" music video provides a "youthful innocence"-related example, as the kid version of frontman Dan Reynolds appears barefoot, while the present-day and future versions appear wearing either sneakers or boots (save the parts with present-day Dan taking his younger self's place, while wearing an outfit similar down to an absence of shoes).
* Imagine Dragons - "Darkness" and "My Fault" play this straight. "Shots" fluctuates between the singer wishing he and the lover stayed together, and him admitting that maybe he'd screw up their relationship again.
* Imagine Dragons depicts one of these, with the beasts being stuffed animals.
* Imagine Dragons ends up rescuing them after taking down the leader and his champion.
* Imagine Dragons has a song titled this, in which the singer says that his girlfriend should see through his lies about fixing their relationship.
* Imagine Dragons has produced several songs that encouraged multiple theories about their meanings. To quote the frontman:
* Imagine Dragons labelmates X Ambassadors had their popularity boosted twice; once by their song "Jungle" appearing as the aforementioned "Single of the Week", and once again when their song "Renegades" appeared in commercials and radio spots for the (what else?) Jeep Renegade.
* Imagine Dragons' "Pantomime" makes four usages of the phrase, "It's just a matter of, 'Oh, don't touch me. Don't you, don't you touch me no more.'", the last of which replaces the second "don't you" with, "dare". The singer uses it twice during the first verse, when hesitating to take an ex-girlfriend back in, especially as her friends try to help him rebound. It appears two more times in the second verse, which details how the singer and the ex broke up (she left him for a rich and handsome man), and why she started pursuing him again (the rich and handsome man keeps brushing her aside in favor of making more money).
* Imagine Dragons - "Pantomime". The singer spends a lot of time telling the ex not to touch him, and also boasts that he's become rather popular among her friends. However, he also says that he loves her "part time", instead of not at all, and also notices her crying over the lack of emotional commitment in her current relationship. The bridge seems to tell her that it's her choice whether or not to leave her current lover.
* Imagine Dragons proclaimed in the 2017 single "Believer" that frontman Dan Reynolds overcame the depression that made much of their music since late 2014 sound disillusioned and/or apologetic.
* Imagine Dragons scenes of Dan Reynolds singing while submerged in a bathtub.
* Imagine Dragons song "Curse" has a chorus in which the singer proclaims that he should leave town and run to someone he loves.
* Imagine Dragons song "On Top Of The World" is about telling those you love you love them before they leave.
* Imagine Dragons song "The River" explains that the singer has realized his own selfishness, and decided to perform a spiritual cleansing.
* Imagine Dragons's "Royals", chances are it will still remain in rotation on

alternative radio, despite the fact that it's not really "alternative" anymore.
* Imagine Dragons Super Deluxe album overseas in February 2015, the same date as they did the normal version of the album. In the US, the Super Deluxe version didn't become available until October 2015. Although, the bonus tracks had already become available by then on either their own singles, or other soundtracks.
* Imagine Dragons watching next to him. After the landing was successfully televised, the sound stage is rushed by screaming fangirls who listen to the band play while still wearing their spacesuits.
* ImagineDragons, who have three members with the first name Daniel — vocalist Reynolds, who goes by Dan, drummer Platzman, who is usually billed by his complete first name, and guitarist Sermon, who goes by his middle name, Wayne.
* Imagine getting trapped in a strange dimension where dozens or even hundreds of suns blink in and out seemingly at random, populated by
* Imagine how slow sauropods would have been due to their gigantic sizes. The
* Imagine if, tomorrow, Tiffany released an award-winning, angsty, introspective, multi-platinum-selling album that would become one of the defining albums of the decade it was released in. Got that picture in your head? Good, because that is exactly what happened in 1995, when a
* "Imagine if you had three wishes, three hopes, three dreams...and they could all come true." —
* Imagine knows how Imagine Breaker works. Aleister Crowley is the only one who has hinted that he knows how it really works (and he has no particular desire to explain it to anybody else).
* Imagine magazine #26 adventure "The Great Paladin Hunt". While a group of paladins is traveling through a swamp, a small dinosaur-like monster called a babbler will try to sneak up on them from behind and attack and kill the last one in line. It hopes to return to its lair and eat its prey without the other paladins even knowing it was there.
* Imagine Me & You after Luce and Rachel get back from their "date". They're at Rachel's apartment, and Rachel is barely an inch from Luce's face when a car loudly speeds by.
* Imagine Me & You, Heck (aka Hector) goes to pick up flowers for his bride Rachel, as a way of apologizing for not being present all the time for her. All this happened just after Rachel and Luce kissed in the flower shop.
* Imagine Me & You. However, he later pushes it off, revealing that he'd been pretending to sleep and had heard her confession of infidelity.
* Imagine Me & You is about a woman who falls in love with the florist, Luce, who catered for her straight wedding. It features an incredibly heartwarming final scene and lots of flowers.
* Imagine Me & You, is this to the main character Rachel. They meet on Rachel's wedding day, and the rest of the film is Rachel's increasing denial about her feelings.
* Imagine Me & You, Rachel initiates further physical contact by claiming she still doesn't understand.
* Imagine Me & You: the long-awaited make-out scene between Luce and Rachel is interrupted by the sound of Rachel's husband's voice.
* Imagine Me & You, the male lead Heck meets a beautiful girl on a plane and gives the camera a quick smirk.
* Imagine movies with more effort and less money. Something something art something something.
* Imagine seeing this on TV: It's the 4th quarter of a basketball game, one team was on the losing side, and there was only about one minute left on the counter. People were packing up and leaving, thinking that the rival team won this one for sure. Not backing down, one
* imagines jumping out of a cake the Simpsons are celebrating with and killing them all.
* Imagine Spot about a bad news robot, unfortunately the robot breaks down and he has to tell it's kids. One of them promptly disintegrates him, ending the fantasy.
* Imagine Spot about being able to have sex with a group of gorgeous strippers but

not being allowed to tape it.
* Imagine Spot about not being able to get back down in time to get the first new donut of the day:
* Imagine Spot) a few alleged flashbacks of other women throwing themselves at him, only for her to scold him for having an overactive imagination: "Lately you've begun to imagine in Cinemascope with stereophonic sound."
* Imagine Spot: An old man sits watching his wife of over 50 years play the piano. He then suddenly shuts off the CD he's listening to and goes into the bedroom, where his wife lies bedridden from a stroke and can't even speak or feed herself anymore.
* Imagine Spot. As he does this, he says, "Psyche!" to Vicky and drives away.
* Imagine Spot as he imagined it before he is spotted and the plan goes off the rails.
* Imagine Spot, Calvin imagines drinking one glass of water too many, so that his body becomes 90% water and melts.
* Imagine Spot coming up with "their idea", they're played by supermodels and are impeccably handsome.
* Imagine Spot for breaking Marge out of prison involves him dressed as a woman named "Bartina", romancing the warden, then knocking him out with a crowbar to get the cell keys.
* Imagine Spot from earlier in the episode, when Arthur and Buster imagined getting A's, and Francine an A+.
* Imagine Spot has Turk and The Todd battling Ninja!Surgeons, one of whom gets his heart ripped out of his chest. Good thing they're at a hospital...
* Imagine Spot). He accomplishes this by heating up a cornfield with his heat vision until it all pops, allowing the newly made popcorn to catch the butter. (Orson's method of solving the out-of-Spot problem does involve popcorn but is unrelated to this trope.)
* Imagine Spot, he pretends he's the star of a nineties situational comedy called "My Black Son"; the theme song ends with the claim "also, he's a ninja!"
* Imagine Spot in the behind-the-scenes OVA where Ran Mao pins a struggling Meirin down to strip her, and the scene is censored before we see they have switched clothes with Meirin blushing as Ran Mao caresses her thigh and grabs her boobs. Meirin calls Angela "beautiful" and nosebleeds at the sight of her getting it on with Pluto.
* Imagine Spot in the episode "A Thing For Musicians", and again when Alex blows open the door of a plane right next to her in "Shrinking."
* Imagine Spot in "Time Crisis". Cricket does not appear in all the shorts, however.
* Imagine Spot, J.D uses this to cure heart failure by tipping a box of kittens over a flatlining patient.
* Imagine Spot, Mr. Dink removes all of Doug's Bluff Scout badges and yanks his hat down to his neck.
* Imagine Spot occurs. As Piggy is cast as Ginger Grant, Skeeter is cast as Mrs. Howell, and the roles of all the other male characters are taken by Kermit, Fozzie, Gonzo, and Scooter, Rowlf is cast as Mary Ann Summers, and he's not happy about it.
* Imagine Spot of Baby resenting her in his adulthood because of how far she pushed him.
* Imagine Spot of being branded a traitor after selling nuclear secrets to China for a dirt bike, and a bald eagle comes flying out of his chest.
* Imagine Spot of him selling fake maps to celebrities' homes to a family of Japanese tourists. Cue said tourists going up to Moe's front door and mistaking him for Drew Barrymore.
* Imagine Spot of his balloons, which he takes, and begins to float away.
* Imagine Spot of Protestant Heaven being full of these types. In contrast, Catholic Heaven is a lot more ethnic (and lively).
* Imagine Spot of what Batman does when he fights: "Your deluge of destruction is over, Despero", "Your wicked winds wane tonight, Weather Wizard", "Your sinister subterfuge ceases now, Star Sapphire", and lastly, "Your titanic tantrum of terror

terminates tonight, Giganta."
* Imagine Spot. On the picture, she has almost the exact same face as her adult self (though her nose is smaller and her hair shorter). The only thing that really gives her off as a kid is that she has the head-to-body-proportions of a young child. 200 chapters later, we get to see a long flashback with 8-year-old Robin. Now she is suddenly drawn with a more childlike and cuter face (bigger, rounder eyes and a different nose) which doesn't really look like her bounty poster picture. Later in the flashback, her bounty poster is issued and it does have her more mature-looking face on the photography, though outside of the poster she still has her cute child face. One would almost think the Marines traveled to the future, took a picture of her 28-year-old face and photoshopped it on her 8-year-old body...
* Imagine Spot reading his eulogy, and another (sarcastic) eulogy by Alan.
* Imagine Spot, Riley imagines Buzz's science project to be "What Happens to Pizza Left Under a Bed for Six Months". The answer? It comes alive and crawls away.
* Imagine Spots, during which she imagines Luffy as a typical Bishonen.
* Imagine Spot series) has been taken off the shelves. The kids understandably freak out and we cut to the librarian shushing them then the camera pulls back to reveal she has no legs and glides back into the library.
* Imagine Spot shows Brain in the show's intro. He begins "walking down the street" like the intro usually begins, but he quickly stops to sit down and think, stopping the song.
* Imagine Spot singing to the song's tune, and in the end he says "now I'm gonna beat my skull with a hammer in hopes of removing this song from my brain!"
* Imagine Spot, some of the mob of office workers that pursue Hart through the cubicles with bloodhounds are carrying torches.
* Imagine Spot: Someone imagines a brief scene in response to learning about something or anticipating something to happen.
* Imagine Spot, spelling out the word "LOVE" (yes, it's all caps), Miu's name and a heart symbol, and then having Fourze fly Shun to Miu's side.
* Imagine Spots. Starblaster recognizes the signs in his vacant expression and explains that this happens to her all the time.
* Imagine Spots takes place in the same boat, only her grabbing his food and pushing him into the water.
* Imagine Spot that breaks the case shows him back at that board erasing one line of the chart that so frustrated him earlier.
* Imagine Spot to hypothetically talk to people who died because of him, so he could ask them whether they thought he killed them. This imagine spot takes place in a diner, and when he orders flapjacks discovers heaven doesn't serve them. He spends the rest of the episode calling flapjacks 'devil-cakes'.
* Imagine Spot to J.D. helping Kim pack, while she perplexedly asks "And then everyone just watches us make out?"
* Imagine Spot", Uncle Sam appears and tell him it's his fault America has lost its way. This is a reference to politicians and conservatives deeming Bart (and the show) a bad influence during the show's early years.
* Imagine Spot when he and Skeeter were having an opening night for their monster movie, Skeeter was unable to edit out Doug's mother who kept interfering because she was in every shot.
* Imagine Spot when seeing Diane, Dad imagines giving her a bouquet of flowers, which she enthusiastically takes to smell.
* Imagine Spot where Arthur tells everyone that he has a night light by singing "Binky has a night light!", which the rest of the class also begin chanting.
* Imagine Spot where her evil-self flips off Sanji as they bake a cake to stop Big Mom's rampage. Like the other examples, this is censored in the anime.
* Imagine Spot where Lisa imagines her future after losing her intelligence, she's inexplicably gained a southern accent.
* Imagine Spot where Telly and Izzy do get into a physical scuffle, and we even see both of them lying in hospital beds, all bandaged up and in casts. Kids watching were apparently more entertained by the humorous fight between Telly and Izzy,

rather than responding to the episode's actual anti-bullying message, to the point that Sesame Workshop removed the episode, and as such, it didn't appear again on PBS during that year's summer repeats, and the character of Izzy was retired. The episode did appear on the resource video "You Can Ask!", but with the fight scene omitted.
* Imagine Spot where the character pictures themselves as able-bodied.
* Imagine Spot which was animated like the 2D illustrations of Dr. Seuss.
* Imagine Spot who had been attacked by two big fish biting each of his arms simultaneously.
* imagines Riley and Shelton puckering up while sitting on a tree branch and fears she's going to do just that.
* Imagine that the real reason the U.S. Space Program no longer sends men beyond Earth orbit is because they discovered planet-sized
* Imagine the Audience Naked say even managing to do this at all is very unlikely, since you're probably not capable of imagining something like that in such a high-stress situation. And even if you were capable of it, this has a high likelihood of backfiring because of how needlessly distracting it is. There are many ways of calming your nerves during public speaking, but imagining your audience naked is absolutely not one of them. If a work uses this trope, it will parody the concept, usually by making the audience actually naked with the speaker thinking they've got a great imagination.
* Imagine the Audience Naked: Someone who is supposed to give a speech tries to ease their nerves by pretending the audience isn't wearing any clothes.
* Imagine the shame of being a muscle-bound henchman who just got your butt handed to you by a cheerleader, even
* Imagin even has four of them as allies, who regularly take possession of his body at inopportune moments. Despite drastically altering his appearance with things like colored hair, changing his voice and, above all, behavior, other characters don't really seem to notice something is off.
* Imagine Vordred's surprise when he realizes that Artix was right about the Spirit Orbs that were once enslaved and are now free not being able to be re-enslaved as the Spirit Orbs cause his armor of skulls to self-destruct within him and destroy the ShadowReaper of Doom. Better. Guess what word Vordred himself says...
* Imagine will encounter six magical mirrors that are doorways to the memories of the wizard Alquhol. After they pass through all of the mirrors, they will have aged a total of 7-19 years.
* Imagine you're an association football player. Scoring an own goal on your debut? Unfortunate. Getting sent off on your debut for a second bookable offence? You should have known better. Doing both of these in your debut? Very unlucky. Now imagine doing that on your debut for Real Madrid, one of the biggest teams in the world.
* Imagining a confrontation between notorious drug kingpin Joaquín "El Chapo" Guzmán and Speaker of the House of Representatives John Boehner
* Imaginties, which is apparently sufficient to connect to the past. In another, the Imagin of the week overhears a man talking in his sleep that he would like to get rid of his boss, and takes it as a wish. When he finds out that the man can't remember wishing that (he was fast asleep)... Well, just say it didn't go over very well.
* Imagist poetry by writers such as Ezra Pound and H. D., which used clear imagery and was inspired by forms such as haiku, as well as more Modernist sensibilities.
* Imago Dei to defend its faith and its faithful, most notably The New Knights Templar and the New Jesuits.
* I'm a Humanitarian: A cannibal who eats other people, usually after killing them.
* I'm a Humanitarian: A character who kills and consumes members of their own kind.
* I'm a Humanitarian are the only monsters more associated with cannibalism.
* I'm a Humanitarian: If a cannibal kills another person with the intention of eating their body.
* I'm a Humanitarian is when some other species is preying on humanity.
* I'm a Humanitarian tendencies are particularly effective in terrifying and

terrorizing the enemy.
* I'm a Humanitarian, the Egyptian god Shezmu butchers people and other gods for the deceased king to eat.
* I'm Alan Partridge, Alan encounters his self-proclaimed "Biggest Fan," who starts with simple things like an autograph request and a too-long handshake and eventually reveals a Stalker Shrine filled with photos and memorabilia. He also has Alan's face tattooed across his torso.
* I'm Alan Partridge: Alan Partridge brings his own (oversized) plate to the buffet.
* I'm Alan Partridge Alan Partridge frequently boasts of hosting "the fourth-highest-rated show on Radio Norwich".
* I'm Alan Partridge, Alan tries to give a rendition of "Close to You" but starts way too high, changes key several times, then just gives up.
* I'm Alan Partridge" Jed Maxwell, and while looking for the bathroom walks into a pitch-black room. He switches on the light to reveal that every wall plastered with pictures of his face, and there's even a dummy of himself sitting in the centre of the room. Things get worse when Jed appears, takes off his shirt to reveal a huge tattoo of Alan's face on his chest, then tries to take him prisoner.
* I'm Alan Partridge's "Big Yellow Taxi", interrupting a debate with a farmer by making animal noises, continuously laughing to fill up the remaining seconds of his show, and getting into on-air spats with colleagues whilst handing over to them.
* I'm Alan Partridge tries to leave with the excuse that "I've just remembered that my dad is...still dead."
* I'm Alan Partridge was shot exactly like a documentary, but had a laugh track, didn't acknowledge the camera crew and had several scenes in which the camera crew would usually be excluded. An in-character commentary on the DVD says that half of it was a 'documentary', but the rest was filmed using actors when the 'real' people were unavailable.
* "I'm A Little Bit Country": In the pro- and anti-war debate, America is described as "an entire country saying one thing and then doing another."
* "I'm a Little Bit Country", which looks at protest over the war in Iraq. Turns out the answer is to go to war and
* "I'm Alive" takes this pretty literally, half the lyrics starting with "I am..."
* Imalris definitely qualifies. Just summoning it devours the soul of the summoner.
* I'm a Mac, I'm a PC" ads is considered by many to be a hipster stereotype. In fact, many people who appear in Apple ads appear to be hipsters. This is likely the result of Apple trying to tell people "Buy a Mac and be a hip counterculture artist rather than a PC using drone."
* I'm a Mac/I'm a PC the two characters), but among those who don't adore it the general consensus seems to be that the "Mac" character is vastly less appealing than his "out of date" rival. Not to mention that Mac is never invited to a LAN party...
* I'm a Man; I Can't Help It, having their way sexually is the only important thing to men in a relationship. And women have to deal with it, like it or not, else men are entitled to dump them or cheat on them.
* I'm a Man; I Can't Help It: It's attempted to justify sexual harassment and sexual assault with the rationalization that men have little self-control when it comes to being aroused.
* I'm a Man; I Can't Help It: Men have limited self-control when it comes to sexual arousal.
* I'm a Man; I Can't Help It: Probably the sole element of male sexuality to ever be acknowledged to exist.
* I'm a Man; I Can't Help It: The rationalization that men who rape do so because they're that desperate for sex.
* I'm a Man; I Can't Help It: Uses his biological urges as an excuse for his behavior.
* I'm a Marvel... and I'm a DC also has commentaries available for purchase, which mostly discusses how they came up with the plot lines and the methods for the filming and "acting."

* I'm a Marvel... and I'm a DC: An early After Hours episode has Superman carrying Wolverine off-screen, slung over his shoulder.
* I'm a Marvel... and I'm a DC appears to say "Obscure reference for the win!"
* I'm a Marvel... and I'm a DC. As the characters' mouths never move, this is only noted by stating it occurring and a slight change in inflection.
* I'm a Marvel... and I'm a DC) because his series isn't nearly as successful as it once was, and many people see him as an outdated character with no relevance to the 21st century.
* I'm a Marvel... and I'm a DC Boisterous Bruiser for the heroes in Season 2.
* I'm a Marvel... and I'm a DC, but circumstances beyond ItsJustSomeRandomGuy's control prevented him from making videos about them.
* I'm a Marvel... and I'm a DC for its second season. The Joker decides that, should he somehow manage to kill Batman, he'll need a new straight man to play with. So he sets up a plan to turn all superheroes into dark, brooding anti-heroes to give him an endless supply to pick from.
* I'm a Marvel... and I'm a DC has one for ordering a "Team Wade" t-shirt. Unfortunately, Deadpool's name exceeds the seven number limit.
* I'm a Marvel... and I'm a DC has over 100 videos on YouTube. That's 2 complete seasons of After Hours, working on a third, plus all the original format videos, parodies ad ads. And oh yeah, if you want to understand even half the jokes, you have to watch them all.
* I'm a Marvel... and I'm a DC has the sub-series "Goblin Blogging", which is presented as the Green Goblin's video blog.
* I'm a Marvel... and I'm a DC has "T'was the Dark Knight Before Christmas."
* I'm a Marvel... and I'm a DC, having the languages of Spanish and Portuguese zapped into his brain, Green Goblin threatens the Joker with a foreign phrase that even he doesn't understand. It translates into "What a nice dress. May I try it on?"
* I'm a Marvel... and I'm a DC is weaponized to do this on a small scale.
* I'm a Marvel... and I'm a DC: Lance M. Donavan display this characteristics in "DC/Marvel Happy Hour".
* I'm a Marvel... and I'm a DC. Mostly, he's very good at making each voice different — with the exception of the strangely gentle Captain America voice, they're all similar, but distinct. However, when characters are worked up they all sound the same.
* I'm a Marvel... and I'm a DC: Occurs every single time Random Cat shows up on BlogTV.
* I'm a Marvel... and I'm a DC on hold just so that he can catch the twelve o'clock screening, he comes back to reality:
* I'm a Marvel... and I'm a DC Plan Q was actually Plan A for a while, but was downgraded by Luthor when he realized how dangerous it was. It should tell how bad it was when it dropped that far down the plan list.
* I'm a Marvel... and I'm a DC plays this straight too in the second season, when Batman and Green Goblin have been captured by the Joker and Batman instructs Goblin to reach into his pocket...
* I'm a Marvel... and I'm a DC; rather than leaving his own house in an argument...
* I'm a Marvel... and I'm a DC read his mind. Lance explodes from his systems overloading, as, according to Batman, "Science and magic usually don't mix."
* I'm a Marvel... and I'm a DC runs out of bullets he asks the audience to do this to make new bullets appear in his guns. When this doesn't work he calls the audience a bunch of amputees.
* I'm a Marvel... and I'm a DC's "After Hours" special, when Lex Luthor and Dr. Doom halt their shock battle to pant from exhaustion.
* I'm a Marvel... and I'm a DC series, has one in the form of his girlfriend, ItsJustSomeRandomGal.
* I'm a Marvel... and I'm a DC, Spider-Man telling Batman that he thinks he might have been married once would help Batman realize how Spiderman was immune to the Joker's brainwashing.
* I'm a Marvel... And I'm a DC's 's "Happy Hour" story arc sees Spider-Man and

Batman visit Lex Luthor in custody to ask questions about how his android Lance works, after the Joker had acquired it and began using it for a nefarious purpose. However, Luthor was brainwashed by Joker before the heroes had arrived and informs Joker when they get to him. Luthor only provides helpful information after Batman acquires Wonder Woman's golden lasso, which he promptly uses on Luthor.
* I'm a Marvel... and I'm a DC take the Rorshach and Deadpool examples from under Comic Books. Seriously. They even got their own web series.
* I'm a Marvel... and I'm a DC, though only Deadpool (who else?) is truly aware that he is a toy.
* I'm A Monkey's Uncle, Moe says the same whilst pulling Larry's hair out in his sleep.
* I-Man, about a man who acquires the ability to heal instantly and survive any injury or toxin when he is exposed to an alien gas.
* I'm an Animal had a black rhino with only one horn and a white rhino that was actually white.
* I'm an egotistical bastard, and I name all my projects after myself. First Linux, now Git."
* Imaro of an Illyassai warrior, and Imaro was the Illyassai warrior his henchmen happened to kidnap.
* Imaro that their supposedly fearless leader suffers from nightmares that cause him to wake up screaming in terror.
* I'm a Royal Tutor in My Sister's Dress: Sherlock was forced to dress like his sister.
* I Married a Communist!. After the fall of the Soviet Union, people are no longer concerned with the spread of Communism as an ethos, and in fact many people in traditionally-capitalist nations have actually embraced some of Communism's ideals.
* I Married A Monster From Outer Space kidnapped various women's husbands to breed with their wives and are much poorer partners than those they replace.
* I Married A Monster From Outer Space. The heroine wonders why her husband (having been possessed by an alien) no longer likes the dog she bought him as a present, and vice versa. He eventually kills it and tells her that it died in an accident. In the climax, some German Shepherds are more effective than bullets in taking on the aliens.
* I Married An Earthling, Earth's TV broadcasts are the subject of academic study on the planet Zeeron.
* I Married a STRANGE Person!: After Grant Boyer is zapped by his TV satellite dish, he starts to warp reality to match whatever he imagines, and he just cannot stop imagining.
* I Married a Witch, an ordinary guy falls in love with a nearly 300,000-year-old witch.
* I Married Dora his illegal alien maid so she could get a green card.
* I Married Marge", Marge reunites with Homer, who is trying to earn money for her and her coming child by working at the Gulp 'n' Blow.
* I Married My Best Friend to Shut My Parents Up, and eventually falls in love with her.
* I Married My Best Friend to Shut My Parents Up and "wife," Machi, on a permanent basis. After that, life goes on for the married couple... and that's it. Because of that, some people were surprised that the manga ended after only three chapters.
* I Married My Best Friend to Shut My Parents Up is about a young woman who marries her best friend because she's tired of her parents' efforts to hook her up with a successful husband.
* Imaskar was another extensively magical human empire in the Realms. The Imaskari focused on dimensional magic. If you were a rich citizen of the empire, all the above fissures to other planes could be acquired, as well as other portal-trickery (fresh air from the Elemental Plane of Air, storage rooms in dimensional pockets, portals designed to show nice views of other places...).
* I'm a Stranger Here Myself features a discussion between two undercover aliens. One race considers human meat a delicacy. The other is stirring up wars and tribal conflicts for alien thrill tourists. The first one notes sourly that this could

spoil an awful lot of good meat.
* I'm a Stranger Here Myself then followed it up with a proposal for a law making it a crime to be Newt Gingrich.
* I'm at End of Your Sight: Dong-ha and Je-Hyung in the first chapter. Dong-ha asks if they can sleep together and, after some persuading, Je-Hyung agrees and has Dong-ha hug him from behind.
* I'm at End of Your Sight. He wakes up wondering why his trousers had been taken off. He wondered if it was because Je-Hyung wanted to drive him out of the house naked.
* I May Destroy You: Malik's rape of Kwame after he refuses to engage in bareback sex is brief but unpleasant to watch as it's very clear what's happening and Kwame keeps asking him to stop.
* I'm Being Eaten by a Boa Constrictor, also by Shel Silverstein, ends with the lines:
* "I'm Bound to Pack It Up" is told from the perspective of someone walking away from a relationship
* Imbus key: In Germany, Czechia and the Netherlands for the same tool. Commonly misspelled with an "m" because the pronounciation is very similar.
* Imca is not natural, but rather artificially created, and while mostly squishy and quite like a normal gijinka, even if she is synthetic, does have some electrical bits in her head.
* "I'm Carlos, and beneath my tough exterior is a boy aching to learn! And beneath that is a rapist."
* "I'm challenged all right, I'M CHALLENGED TO HOLD ON TO MY LUNCH MONEY, because of all the big mooses who wanna pound me because I'm a shrimpy dork who thinks he's smarter than them."
* I'm Cold... So Cold...: Character comments that they feel cold as they're dying.
* I'm Coming To Get You by Tony Ross featured a horrifying alien creature who proceeded to land on an alien planet, wreck everything there, and consume the population before finally eating out the whole planet itself like an apple. The book even shows the monster has repeated this on several planets that have crossed it's path before learning of Earth. The alien then travels to Earth ready to devour a human boy when it sees him, only for the kid to walk right past the monster because it turns out to be comparitively no bigger than a cherry. Upon realizing this the suddenly much less fearsome invader beats feet and retreats.
* I'm Coming To Get You told the story from the perspective of a monster travelling across space wreaking havoc, all the while getting closer to Earth in order to "get" a small child. When the monster finally arrives it realises it horribly misjudged its own size and the child is actually much bigger than it and easily chases it away.
* "I'M COMING!... which he takes as an acknowledgement that she heard him, and heads back downstairs none the wiser.
* Im Dal Young is currently working on several projects at once, some with irregular schedules and at least one on hiatus.
* "I'm Dan Rather and I approved this message. Kind of. Sort of. Not really."
* IMDb, "After the movie came out, many people went in search of the village with the phone booth. Since it didn't exist, they were always disappointed. The village where the movie was filmed finally decided to put up a phone booth for the sake of the visitors."
* IMDb, as a result of his actor being absent a number of times that season. He eventually leaves the show in season 9.
* IMDb. He also wrote four episodes that made IGN's list of the ten best episodes after season 13.
* IMDb list "Movies that are destroying the planet Earth" consists of nothing but films reviewed by either the Nostalgia Critic or associates.
* IMDb. The movie also increased demand for Ghostface masks/costumes, which existed before (and which is actually a minor plot point in the first film).
* IMDb. This is somewhat mitigated, though, by the fact that the episode counts are often inaccurate, due to the site's info submission format and episode-page format.

It's not unheard of for the lead of a successful series to only have a single-digit number of episodes on their IMDb tally.
* "I'm Dib! I'm Dib! I'm Dib! I am Dib! I'm Dib! I'm Dib! I am Dib! I'm Dib!"
* I'm Dying, Please Take My MacGuffin: A character has the MacGuffin. (S)he dies after giving the MacGuffin to another character (usually the heroes) and asking them to take care of it.
* I'm Dying, Please Take My MacGuffin: A dying person gives an important object to someone else before they die.
* I mean Mom movies. She's very pretty but not exactly the brightest bulb in the lamp.
* I Meant to Do That: A character tries to save face after a gaffe by claiming that what they did was intentional.
* Imelda May's "Human", in which the singer insists on being loved for her true self instead of being idealised:
* Imelda May's "Human", which is about being loved passionately but realistically — because that's better than being silly.
* Im. Elvira grabs the bodice of the dress of a woman who has been taunting her and punches her in the face, causing her to fall backward and the bodice to rip off — and she isn't wearing a bra. Even worse — she's exposed as being flat-chested to the entire town.
* IMFDB, Spike uses a Jericho 941 R chambered in 9x19mm. Assuming a +p+ load, that's a 7.45g projectile at 435m/s. Spike weighs, say, 80kg. Each round fired will accelerate Spike by (7.45g * 435m/s)/80,000g = 0.0405m/s. A full 15 rounds would give him a velocity of 0.6075m/s. Taking into account propellant gases at an alpha of 1.75 (no atmosphere), he should end up at just over 1m/s, or a relaxed walking pace.
* I'm flaming!" Burns looks at the viewer and shakes his head with a "My, my" expression.
* I=MGCM, communicating with Omnis and his heroines through the computer in the quintuplet's White Room.
* I=MGCM: Downplayed in the medal shop, in which you have to exchange weapon skins and additional costumes with character medals. However, character medals can be easily obtained through selling dresses.
* I=MGCM named Omnis in order to guide the new magical girls and activate magical girls' transformations.
* I=MGCM, Studio MGCM themselves also promote some giveaway and collaboration merchandise that is mostly aimed outside that demographic:
* I=MGCM: Ultimate Magica Iroha's Saint Anger skill allows her to single-punch an enemy in a massive damage and penetrates all buffs and ignores all passive skills on the opponents' side.
* I=MGCM: Ultimate Magica Lilly's "Devil Grinder" skill has her throw her magical weapon and then spin into a giant wheel of fire and sweep the opponents horizontally.
* I=MGCM, where all the heroines are alive and intact. Both living and dead heroines in the universes where he screws up are merged with the copies of themselves from the universes he recently created, and their deaths get undone.
* i'm giving you a nightcall: Alchemy can only be activated by applying blood to an array. The Elrics are unique in that they need very little blood to activate an array.
* i'm giving you a nightcall, Ed ended up dumping Roy when the latter shot him and was put in charge of arresting him. Even before that, Ed had to leave in the middle of dates for Fullmetal business.
* i'm giving you a nightcall: Edward was physically and emotionally exhausted from being kidnapped by the new Homunculus Gang, fought his way out and got his automail arm painfully torn off. When Roy asked for an explanation to why he never told him that Edward was Fullmetal, he goes on an angry rant before finally telling Roy that he loves him.]
* i'm giving you a nightcall, this was reason Roy and Ed never had sex in their first relationship despite Roy being known to sleep around. Roy wanted his

relationship with Edward to last so he put off sex so he wouldn’t drive him off. When they finally get back together Edward is rather miffed this out since it was the longest Edward had been celibate since he was virgin. They quickly work to rectify this.
* "I'm Giving You My Cold for Christmas" is about a man who's tired of having a cold on Christmas and seeks to deliberately infect his girlfriend so that they can commiserate.
* I'm Going to Disney World!: An advertisement that was very popular from the 1980s on.
* I'm Going to Disney World!: The iconic ads started in the late 1980s.
* "I'm going to get 24th-century on his ass", this probably was also offset by 1000 years.
* I'm Going to Hell for This: A character quips that they'll end up in Hell for enjoying or being amused by something that could be seen as morally objectionable.
* I'm Going to Praiseland", Bart is pulling out weeds when Homer pours out some gasoline from a jerry can and sets it on fire. Homer says it's safe since it's a controlled burn, and not knowing that a controlled burn requires careful supervision not merely calling it "controlled", it burns a good chunk of the abandoned park they're renovating.
* "I'm Goin' to Praiseland" had Ned Flanders build Praiseland, a Christianity-themed amusement park (which was previously Story Time Village, which went out of business after a kid somehow got
* I'm Gonna Be an Angel! and sleep together naked in the same bed while holding hands.
* I'm Gonna Be an Angel! Beta Couple to Noelle and Yuusuke as it's implied that they have been in a relationship long before the series actually started and their relationship is...a lot less innocent than Noelle and Yuusuke's.
* I'm Gonna Be an Angel! has Raphael and Mikael - believe it or not, it's not as squicky as it sounds, although they are also angels, which may make it sound even worse. And it's pretty much consensual on both parties (Mikael may have problems admitting it, though)
* I'm Gonna Be an Angel!, his aloof classmate's heart to no avail, and at least throughout the first season, she generally treats him like crap. Likewise, Noelle is this for Yuusuke.
* I'm Gonna Be an Angel!: It may look like a one-sided crush (and sexual harassment) on Raphael's part, but the truth is Mikael is as hot for his teacher as his teacher is for him. (Mikael has just huge problems with self-denial.)
* I'm Gonna Be an Angel! it might be be kinda subverted, since in the last episode, it looked like Mikael and Silky (especially Mikael) could gain redemption only through letting go and dying, but then at the very end when Noelle eventually cleaned up the whole mess, everything turned out just fine, no one died and everyone seemed to get their happy ending.
* I'm Gonna Be an Angel! loves doing this to Yuusuke to an almost frightening degree. Also, Raphael to Mikael.
* I'm Gonna Be an Angel!. Might be slightly subverted in that she is the heroine but the plot is told from her love interest's point of view.
* I'm Gonna Be an Angel!: Noelle is pretty much goodness and pureness incarnated — unfortunately with the side-effect of having the brain capacity of a 3-year-old (while technically age 15).
* I'm Gonna Be an Angel!, Raphael explains to Mikael that the reason he didn't wake him up was because he got lost in admiration of his cute sleeping face.
* I'm Gonna Be an Angel! used this trope at the end of the first 12 episodes, with a repeated sequence of Micheal opening the Book of Chaos mystically, then making some generic philosphical statement. It then subverted itself in a later episode, when Raphael interrupted the statement to ask, "Didn't you say that one already?"
* I'm Gonna Be an Angel! was only dubbed in English for its first half. The show never sold enough, which led to the 2nd half to never come out in the west. Which is a shame, since, if the session outtakes are to be believed, the VAs gave their all to make the performances great.

* I'm Gonna Be an Angel!, Yuusuke stumbles over Noel, who just happens to be napping in the nude in the middle of a forest. Their lips meet and she awakens, convinced that they are now married. This results in her entire kooky family moving into (and totally redesigning) Yuusuke's house.
* I'm gonna get these muthafuckin' snakes off this muthafuckin' plane!
* I'm Gonna Git You Sucka. After an innocent bystander is killed by machine-gun fire, John Slade grabs his body and uses it as a shield against the incoming fire.
* I'm Gonna Git You Sucka: After getting out of prison Fly Guy returns to being a pimp. He wears elevator shoes with miniature goldfish aquariums in the heels. When one of his shoes breaks and the fish spill out on the ground, they flop around a little bit.
* I'm Gonna Git You Sucka. After getting out of the Army, Jack Spade continues to wear his uniform even while engaging in vigilante justice against Mr. Big.
* I'm Gonna Git You Sucka: After Jack Spade tells his mother he doesn't want her fighting his battles for him any more, she taunts him by reminding him how he called out for her when he was beaten up as a child.
* I'm Gonna Git You Sucka, a henchman tries to kidnap the heroine, and she turns into a demon on him. He thinks she's possessed by the devil, but she says, "No! Cramps!"
* I'm Gonna Git You Sucka, as described above. The trope is subverted at the end of the film when the protagonist says "There's two ways outta here..." at which point Wayans screams and jumps out the window. This prompts one of the heroes to say, "Didn't he know about the elevator?"
* I'm Gonna Git You Sucka. Both of them have army jackets with lots of pins on them, so John Slade assumes they have combat experience. Turns out they don't; the pins are for stuff like typing, surfing, and winning a darts tournament. Slade's pretty upset about it.
* I'm Gonna Git You Sucka did to disaster movies. The film features a long string of gags, usually several per scene with a quick change to the next scene and more gags.
* I'm Gonna Git You Sucka. During the assault on Mr. Big's hideout, John Slade rappels down the side of a building from the roof with the intent of throwing a stick of dynamite through a window. Unfortunately, he misjudges the length of the fuse.
* I'm Gonna Git You Sucka: During the climax, Mr. Big acknowledges that his character is an exploitation villain in a movie.
* I'm Gonna Git You Sucka had a TV ad playing it up like a Merchant-Ivory motion picture — an upper-class-British-accented narrator reads it as "I Am Going To Get You, Sucker".
* I'm Gonna Git You Sucka had a TV ad with classical music and a PBS-grade announcer presenting it as a highbrow art film with the title "I Am Going to Get You, Sucker".
* I'm Gonna Git You Sucka has John Slade followed about by a funk band to provide the Obligatory Theme Music. Young Jack Spade, at the end, gains KRS-One and his crew (complete with turntable) to mark his ascent to Black Hero-hood.
* I'm Gonna Git You Sucka. Jack Spade's mother Belle was once in love with John Slade and almost married him. They broke up because he spent so much time fighting crime, and she married the man who became Jack's father. Near the end of the movie she falls in love with John Slade again.
* I'm Gonna Git You Sucka, Momma slides a thug down the counter of a coffee shop.
* I'm Gonna Git You Sucka's criminal minions relax and drink while wearing giant-sized hats.
* I'm Gonna Git You Sucka somewhat by another hooker who is wearing a T-shirt that reads "Another Model Turned Actress".
* I'm Gonna Git You Sucka: When Kung Fu Joe calls Slade, Slade leaves a blank stretch of tape on his answering machine just long enough for Kung Fu Joe to leave his message before revealing that it was the answering machine talking and not him.
* I'm Gonna Git You Sucka, where Jack Spade was an Army vet...but his only experience was as an office clerk.

* I'm Gonna Git You Sucka. While Jack Spade is fighting Mr. Big's men, he gets a splinter in his finger. He goes though a prolonged bout of self-applied first aid, including crying out in agony as he removes it.
* I'm Gonna Git You Sucka, who insists that he put on a sweater before he goes out and fights against men twice her size to protect him. When he goes up against Mr. Big, she shows up with a shotgun to join in. Her son eventually breaks free by locking her in a closet until the fight's over — which pisses her off no end.
* "I'm gonna slap that sumbitch sideways and stick it right up your candy ass!"
* Im Great Priest Imhotep is based on Ancient Egyptian history and mythology, with fictional versions of the High Priest Imhotep and Pharaoh Djoser being the protagonist and antagonist respectively.
* "I'm Hannah Davis and I have DirecTV" (Hannah on a beach in a skimpy bikini). "And I'm Cat Lady Hannah Davis and I have cable" (self-explanatory).
* I'm Having Soul Pains: Someone gets hurt in a place that shouldn't be hurt, either a body part that doesn't feel pain (like his hair) or some part that's not a body part (like his soul).
* I'm Here is centered around a male robot selflessly giving his love interest his limbs as she accidentally damages hers beyond repair. He can detach them in a matter of seconds with a screw driver stored in his finger tip.
* I'm Here to Help then Neo-Queen Serenity committed planet-wide brainwashing and the senshi were ruthless soldiers. If one takes him as an Unreliable Narrator though, this trope is averted. In the latter case, there's also Pluto, who in canon takes her duties as guardian of time incredibly seriously and in the fic allows a known criminal to travel through time and change the past and alter the Crystal Tokyo in the future.
* ''I'm here to lodge a protest. I'll let you read it yourself. The formal document uses some of the strongest words you can write in Galstandard West without violating grammatical checksum.''
* Imhotep and violently smashes them against each other for nearly killing Rick's son.
* Imhotep only escapes this fate (which was part of him being entombed alive at the beginning of the first movie) due to being cursed with immortality.
* Imhotep was a genius who lived in Egypt 2600 BC, credited with strongly contributing to the founding of the sciences of engineering, medicine, and architecture. His service to the Pharaohs was so remarkable that he became the only commoner ever to be elevated to godly status after his death.
* "I Might Fall Back on You" and the burthens (to use Jerome Kern's term) of "Queenie's Ballyhoo" (which is surprisingly plot-relevant) and "Dandies on Parade" became merely dance music in the 1946 revival. The refrain of "I Might Fall Back On You" was itself borrowed from "Be Happy Too," a song for Magnolia and Andy written for an earlier version of the World's Fair scene where Ravenal makes a losing bet rather than a winning one.
* I'm In Love With the Villainess and won't let anything nor anyone stop her.
* I'm In Love With the Villainess. As the title implies, she only has eyes for one of the main female rivals instead of the intended three princes.
* I'm In Love With the Villainess features a downplayed case: Yuu wins the round with a hand of four aces and a king, beating Claire's full house. However, Rei remembers that her own hand had an ace, which she got rid of in an attempt to make a straight. And then she notices that the dealer is Yuu's personal attendant.
* I'm In Love With the Villainess Further subversion: Rei's attempt to make a straight actually makes her hand worse, dropping it to an abysmal ten-high.
* I'm In Love With the Villainess game 「Revolution」 from her pre-incarnation life, and an incredible capacity for cunning, deception, and working with and around external forces and agents to the betterment of her long-term plans and personal desires.
* I'm In Love With the Villainess, when Rei is reincarnated as the protagonist of her favorite otome game, she rejects pursuing the game's intended male love interests in favor of Claire who's supposed to be the "rival" character competing with her for the males' affections.

* I'm in Marsport Without Hilda, is only referred to by his first name. Hilda, Max's wife, also has no last name (because that would imply his own last name). Flora, his girlfriend, is referred to only by her first name as well. It would seem as if all the characters were going to be given only one name, but then Rog Crinton, Max's boss, shows up and tells him to investigate Edward Harponaster, Joaquin Lipsky, and Andiamo Ferrucci.
* I'm in Marsport Without Hilda": The main character works for the Galactic Service, and has a Class A rank within the organization. They operate as federal agents rather than a police force.
* I'm in Marsport Without Hilda. They can prosecute the actual guilty party, but trying to search an innocent man will give them cause to publicly ruin Max and his organization.
* I Minored in Tropology: A character reveals that they are educated in a field or subject that is unexpected for them.
* I'm in the Band: During the band tour, a coffee can was used as a potty. At some point, this coffee can gets knocked over.
* I Miss Halloween has this, though some story clues imply that they're a gay/bisexual man.
* I Miss the Sunrise are a mix of type 2 (they're the only known arms dealer in the galaxy) and type 3.
* I Miss the Sunrise, EROS flip-flops with this. Some of the stuff they do is for a real purpose, but a lot of it is just because.
* I Miss the Sunrise. Given that the developer is a proud reptile lover, this is clearly used as a mark against him.
* I Miss the Sunrise. Justified for a number of reasons; its stasis chamber kept her from going insane from emitter radiation, she was naturally inclined towards science and technology to begin with, and the other members of Purity Point shunned her, leaving her with little other companionship.
* I Miss the Sunrise, people apparently repressed their emotions in the past, though they're resurfacing now. The characters tend to treat them as both a blessing and a curse, instead of planting themselves firmly on one side. Most characters do lean towards one or the other. The personality bars, especially the mentality one, also represent this.
* I Miss the Sunrise, so he inherited their poor intelligence, but not their aggressive urges.
* I Miss the Sunrise, where it only leads to one favor. If you attempt to rescue the Black One in Episode 3, he'll cite this as his motivation when he returns to help you later on.
* I Miss You. Cilla begins to say something and gets hit by a car and dies.
* I Miss You, I Miss You, after her twin sister Cilla gets hit by a car and dies while Tina remains unharmed, Tina has nightmares where Cilla tells Tina that she should have died instead because she didn't saw the car coming.
* I Miss You, I Miss You nearly all of the teenage characters were played by amateurs.
* I Miss You, I Miss You there is a heartbreaking scene where Tina addresses this. She was running just one step ahead of her twin sister when her sister was hit by a car and killed. Afterward she has nightmares where her sister wants them to trade places, and sometimes hears her sister's voice in her head.
* I Miss You, I Miss You". Tina was running just one step ahead of Cilla when she got hit by a car and killed, and it could just as easily have been Tina who died.
* Imitates Art. Chinese toy helicopters from circa 400 BC may have been depicted in European painting prior to Leonardo's time.
* imitating a woman's voice him, and only wrecked the helmet because Paperinik dodged at the last moment.
* imitating her Mid-Atlantic accent, briefly slicks back his scales to resemble her trademark mane-style.
* Imitating Kiss, and taking their gimmick to new levels, is what got acts like
* imitating their loved ones. It seems that Jenova itself is an entity that travels from Planet to Planet, infecting the native inhabitants and transforming them into

carriers to further spread its infection around, before bringing them all back and "reuniting" itself to travel to another Planet and continue the cycle. How long it's been doing this is anyone's guess.
* imitation-Disney. Most people are stunned to learn that (a) the song is from a movie and (b) exactly what movie the song is from.
* Imitation General an army general visiting an area under German siege is killed and his aide realizes that only the sight and authority of a high ranking officer can hold the trapped soldiers together. He takes the general's place even though he knows his action could save or cost lives and make or break the general's reputation. It's a comedy though so...
* Imitation General devises a plan to ambush advancing German tanks. To get them to expose their weakest point (the underside) they put a crude sign saying (in supposed German) "Bridge Mined" on a small bridge. The German tank commanders don't believe it, but neither will go first and the plan works.
* Imitation of Life (1959) - almost in an attempt to sucker audiences who might be alienated by what the director viewed as the true story of the film; Lana Turner's black housekeeper trying to raise her fair-skinned daughter.
* Imitation of Life and Sandra Dee in fancy clothes. He even cut down a few of Lora's scenes to emphasise Annie, which he viewed as the true story of the film.
* Imitation of Life, Bea finds out that her daughter Jessie has fallen in love with her fiance Steve, Bea decides to break up with Steve to prevent anything coming between her and Jessie. But she tells Steve to call on her again whenever Jessie falls in love with someone else.
* Imitation Of Life: Loomis establishes himself as a gross creep when he evaluates Lora: "You have a chest full of quality and quantity. I like that."
* Imitation Of Life: Lora has a lot of success on Broadway as a comic actress. She insists on playing a dramatic part, much to the displeasure of David, who is both her lover and the writer of all those comedies. It works, as she gets even more acclaim and lands a part in an Italian art movie.
* Imitation Parmesan cheese runs into this in two ways. First is the fact that "Parmesan-style" cheese often isn't real cheese at all, leading to the "pizza topping" thing above. An additional wrinkle in Europe is that only cheese from the Parma region of Italy can be legally called Parmesan cheese (which Kraft gets around simply by calling it "Parma cheese").
* "I'm Joe the Plumber" ads near the end of McCain & Palin's Presidential campaign.
* Im Juli. He does some calculations in the sand, drives the car off the ramp, and sails through the air...only to land in the middle of the river.
* Im Juli opens with a scene chronologically towards the end of the movie. Therein the hero tells the story of how he ended up in that remote place.
* "I'm just breaking balls!" — You're going to get your ass kicked if you keep up that mouth, if not whacked.
* "I'm Kent Brockman, on the eleven o'clock news tonight... a certain type of soft drink has been found to be lethal. We won't tell you which one until after sports and the weather with 'Funny' Sonny Storm!"
* I'm lonely and I love it / If only I'd dreamed of it / I'd have broken up with you so long ago...
* Im Looking For Kadak describes the problem of finding a tenth man to make up a sufficient number for a Jewish service — especially being a blue, eleven-armed inhabitant of the asteroid Zsouchmuhn — "Ha! I'm a Jew."
* "I'm Looking Over a Four Leaf Clover" is best known for being a #1 hit for Art Mooney and his orchestra in 1948 along with its prominence in
* Imma Be, Imma Be, Imma Imma Imma Be / Imma Be, Imma Be, Imma Imma Imma Be / Imma Be, Imma Be, Imma Imma Imma Be ... (repeat ad nauseum;
* Immanuel Velikovsky, a major proponent of the supposed scientific idea of catastrophism, the theory that the Earth has largely been shaped by sudden, short-lived, violent events, possibly worldwide in scope, faced vociferous disagreement from the mainstream scientific community. Here it wasn't that Velikovsky was mocked for his proposals, but he was subject to a level of personal vitriol by that

community, including
* Immanuel Velikovsky studied ancient legends and concluded that other planets were responsible for global catastrophes here on Earth. Among other notions, Venus was once a comet ejected from Jupiter responsible for the Biblical plagues of Egypt, and Earth once orbited Saturn and the Biblical flood was caused by Saturn going nova and also ejecting Earth to its current orbit. Scientists everywhere rolled their eyes and dismissed him entirely because everything he suggested violated every understanding of planetary physics, as well as conservation of energy and angular momentum. However, he did influence a portion of the American public, some of whom latched onto the notion that the only reason dinosaurs could exist was because of lessened gravity on Earth's surface due to the presence of Saturn in the sky. One author inspired by Velikovsky correctly stated that a human of saurian dimensions would collapse under his own weight and die, then incorrectly reasoning that dinosaurs couldn't possibly have survived.
* Immaterial and Missing Power, almost every character ends up fighting either Reimu or Marisa at some point in their story mode.
* Immaterial and Missing Power. First goes the super meter, then the spirit meter, and then the health bars, leaving nothing on the screen except you and the boss by the end.
* immaterial forcefields were useless against it. Since Flamer template weapons automatically ignored all cover saves as well, this means that the only thing safe from the Incinerator was extremely tough armor. Good thing it only had an AP value of 4, otherwise even Space Marines would be crying in face of it.
* Immaterium and created demons and the Chaos gods. The constant warfare between various different aliens since then has not really helped matters.
* Immature Filipinos laugh at the mere mention of Lake Titicaca, as the word "titi" is Filipino slang for "penis".
* Immaturity Insult: Insulting someone by calling them a child or treating them as a child.
* Immeasurable and its stomps usually inflicts infinite damage to those without divine constitution. Even a mere mortal can run quickly enough to evade Mount Mostath's stomps, given its tremendous size and weight.
* immediate action. But you can't take more than 20 lbs of living matter, so no taking anyone with you.
* Immediate Action, former Special Air Service trooper Andy McNab recounts an incident where Princess Diana's hair was singed by an explosion during a hostage rescue demonstration. One emergency trip to the stylist later, tabloids began raving about her new, shorter hairstyle.
* Immediately after becoming Mecha-Frieza, he wasn't even off the operating table before ordering his father and their men to set course for Earth, wanting revenge on Goku so badly that he overrides his father's plan to just blow up the planet from orbit and lands so he could personally kill all of Goku's loved ones and friends... and gets sliced into itty bitty pieces by Future Trunks, another Super Saiyan, for the trouble.
* Immediately after, Crow promptly wakes at Servo's panicked reaction and does a double-take at Servo before realizing what he just glanced at... and the both of them scream in horror.
* Immediately after EDSA II which deposed Joseph Estrada in 2001, Senator
* Immediately after grabbing the bottle, Rose herself is caught and saved by Jaspersprite, with scant seconds to spare.
* Immediately after helping Twilight Sparkle in stopping the Changeling invasion of Canterlot,
* immediately after processing the information. A human would be incapable of processing that information so quickly, meaning a subject who answers the question right after being provided the recording is indeed an AI.
* Immediately after the aforementioned incident in ExCoKo, Konstantin thinks this way
* immediately after the mystery is solved, and any non-mystery fallout of the main plot, such as processing of criminals, recovery from traumatic events, shocking

revelations and conflicts caused by a case, healing of injuries, explaining that needs to be done to other characters, etc, are usually dismissed with the implication that it was all taken care of without incident (or at least, without enough incident for Watson to spoil the pacing of his stories by reciting all the details). However, some of the implication of what these glossed-over details involve are quite intriguing — trials for the captured criminals, ruined families and friendships, swearing of revenge, or intensely emotional scenes between Holmes and Watson (or Holmes' apparent non-reaction to emotional incidents). Therefore, there are gazillions of fics revolving around the aftermath of various canon cases. In particular, there is a whole genre of fic involving Watson mourning Holmes/Holmes as a fugitive after The Final Problem or dealing with the reveal of Holmes not being dead in The Empty House. Holmes' fright about Watson's injury after The Three Garridebs, Watson throwing a fit at Holmes for his manipulation of him in The Dying Detective, and speculation about how Watson weaned Holmes off cocaine, are also common fanfic plots.
* Immediately after the race, many in the garage suspected that Bowyer had spun out deliberately in an attempt to manipulate the finish of the race so that Truex would gain a Chase spot. This led to the incident's second nickname as the Singapore Sling because it was compared heavily to the 2008 SingTel Singapore Grand Prix in Formula One, where Nelson Piquet, Jr. intentionally caused a caution to give an advantage to teammate Fernando Alonso, who would win the race. Dale Earnhardt, Jr., who was directly behind Bowyer at the moment of the spin, said afterwards that the way Bowyer's car spun was "one of the craziest things he's ever seen", and noticed the car being "jerked around" to make it lose control out of turn 4. While Bowyer claimed it was a flat tire that caused him to spin out, and indeed the right front was down after the spin, Dale Jr.'s version of events and video replay showed Bowyer's car behaving inconsistent with the normal behavior of a car that had cut a tire: normally, when a car cuts a tire in the corners, it washes up the track without steering and slams the outside wall on its right side, then comes back down onto the track, rather than spinning onto the apron. In addition, the popping noise normally associated with a flat tire only happened after the spin. Further suspicion arose during the video replays, as the radio communications between Bowyer and crew chief Brian Pattie showed they were openly worried about the possibility of Newman winning and eliminating Truex from the Chase on lap 391, two laps before Bowyer spun. Another suspicious conversation was revealed between Vickers and his spotter, team general manager and vice president Ty Norris, where Norris ordered a completely oblivious Vickers to make a green-flag pit stop after the restart on lap 398 in order to give Truex another position to tie Newman in points. These conversations seemed to provide evidence of some kind of manipulation going on via team orders. In order for the scheme to work, Gordon, who was in 10th place, had to be overtaken by Logano in order to guarantee Truex a wild card.
* immediately after they send the message, Cyclonus blows up on them that everything they went through had a “net positive outcome”: if they avoid doing all those bad things, all the good
* Immediately afterwards, as her shapeshifting abilities manifest, she subconsciously turns
* Immediately afterwards, Josh points out that the Movie itself takes place between Seasons 7 and 8, and points out that not only are the Royal Guards and Shining Armor absent from the film, but also characters like
* Immediately after warning Tangent not to treat Florence like a dog, Naomi mentions the potable water system and the toilet
* immediately became this instead and was quietly dropped in Baker's second season.
* immediately become their true "outside" age, which can cause death due to old age.
* immediately before he shoots her dead and the exact words that prompted her to say this have only ever been revealed to the actress playing Ritsuko.
* immediately caused the opponent to be able to do nothing but defend himself, by learning parry and reposte as separate moves, but soon learn to combine them.

* immediately ceases its search for you and retreats into the vents, even if it was inspecting a sound you had made (the only exception is, of course, if it's spotted you and is moving in for the kill). This guarantees that, no matter what, the thing will soon back off for a while and allow you to actually make some progress in the game.
* immediately comes to regret this, and she refuses to help even when her friends want to help Yearling out of her fix.
* immediately compelled to question and walks home with a skip in her step and squeeing all the while.
* immediately distracted by the shuttlecraft's blast shield function, which she plays with like it's a toy.
* Immediately followed by Colbert rattling off the ingredients of Taco Night, which doesn't just deliver the flavor of a taco - hell, even a taco could do
* immediately following that one, the same song is used in Dale's flashback to his childhood birthday party.
* immediately hitting the button, while the third leans back and just smiles - the other two, after several seconds of uncomfortable pause jump on his button. (The act? The world's oldest champion male stripper.)
* Immediately lampshaded by one of the villain's mooks: "Why does that never happen to me?"
* immediately lead to romance, the first thing that seems to attract Willow to Oz in season 2 is that he is injured saving her life.
* Immediately once the credits began rolling at the first screening of
* immediately opening fire, forcing the geth to once again defend themselves.
* Immediately subverted on the next page, when Mitzi unhesitatingly orders Gordito to shoot her son fatally.
* Immediately subverted: she says "I saw them," Lt. Becker says "I'm sure you did," usually a lead-in to a patronizing "you're just stressed" until he points to tiny holes in the walls, saying "They were put up with pins."
* immediately. The place name of Marathon was later used in modern times to refer to a long-distance running race.
* immediately turn to Shawn for help, and Shawn gives them a whole series of tips on how to crossdress correctly, so he clearly hasn't stopped since. Eric also decides to continue cross-dressing after the episode ends, just for his own sake. Notably, both characters are not only heterosexuals, but they are also actually three of the show's most prolific flirters.
* Immediately upon taking power, German paramilitary groups including the "brownshirts" (
* immediately while Ed was recovering from being shot. (He gets the permanent promotion in the series finale.)
* Immediate Murder Professionals adoptive father of the hellhound Loona and considers the other members of the I.M.P. the closest thing he has to a family.
* Immediate Self-Contradiction: Saying something, then saying or doing something clearly contradictory to it.
* Immediate Self-Contradiction: The contradiction is brought about by the character themself and not by outside forces.
* Immediate Sequel: A sequel where the plot picks up immediately after the previous part.
* immediate? The only reason they got what they wanted was because Shelly and Kalia flipped and voted out Keith.
* I. M. Meen. He may be the funniest villain in the series, but he's not the most important.
* I. M. Meen. Instead of the background fading away, the titular antagonist does this by teleporting in such a way that everything but his eyes disappears, and the eyes disappear a second later.
* I. M. Meen involves an evil wizard sucking "bookworm" kids into his magic labyrinth with a magic book.
* immense displeasure, Agatha Heterodyne's top minion. As Mechanicsburg is a town filled entirely with minions loyal to the House of Heterodyne, this essentially

makes him the most powerful minion in the town.
* immensely powerful AIs that act as protectors and guardians of unspoiled and valuable planetary environments and prevent outside contact with them. Similar reserve planets exist for other hominid species such as Neanderthals and australopithecines, as well as for unmodified Earth cetaceans, for similar reasons.
* immense power, who announces she's about to send him and his minions back to their cells.
* Immercenary in the VR game is not immediately fatal, but apparently it does cause shocks to the system that eventually can result in death (as is shown to a predecessor of the player in the opening cinematic). Whether this is an intentional feature of the system or whether it is a side-effect of the time-projection technology is never stated. Late in the game, the player learns of an arguable inversion: characters crashed by the player are, due to the player's unorthodox presence in the system, misread by the controlling AI as having been disconnected from the game; the AI then responds by shutting off life support. Thus, characters crashed by the player die because the AI's mind makes it real.
* Immersion-Creativity cluster contains Fantasy, Story, Design, and Discovery. This cluster contains players primarily interested in the narrative, self-expression, and emotional payoff.
* Immersion what would happen to two women who actually tried fighting in video game costumes. A male equivalent was also provided but he never seemed to get past being prepped by one of the female techs.
* Immigrant dwarves might arrive with jewelry made from the bones of creatures they've killed.
* Immigrant Patriotism: An immigrant loves their new country, and would proudly receive their naturalized citizenship (or already has).
* Immigrant Patriotism: The period that birthed nationalism was also a golden period for cosmopolitanism with philosophers travelling across Europe and America and sharing ideas.
* Immigrants were seen up until the mid-20th century as shiftless lowlifes on their way to ruin any given national culture. Nowadays, many consider that migrants do not only enrich culture, but also they are an economic asset rather than a liability.
* Imminent Danger And How To Fly Straight Into It ends this way, with Eris deciding to leave behind her life on Earth, and return to exploring the stars with Varrin. The villains have been defeated and the heroes look set to live happily ever after...and then Eris learns that the pendant Varrin gave her means they are now technically married. And she's not happy about it.
* Imminent Danger Clue: A seemingly mundane detail of the setting indicates that a character has just walked into a trap; the danger will come into play shortly after the character realizes it exists.
* Immoral Journalist: A dishonest reporter who has no problems with bending the facts to get a sensational (fake) news piece.
* Immoral Journalist: A journalist that doesn't care about writing the truth.
* Immoral Journalist: A journalist who doesn't care about writing the truth, and/or doesn't care if getting the story hurts people.
* Immoral Journalist: A sleazy journalist who has no qualms with screwing over other people to get their news pieces published (including defamatory fake news).
* Immoral Reality Show: Forcing contestants to do humiliating and possibly harmful things may be morally dubious, but it makes for sky-high audience ratings!
* Immoral Reality Show gives convicted murderers the choice of having their death sentence performed by the state or being hunted down and killed by a relative of the victim. The relative is given 24 hours to find the killer. If they fail to do so within the allotted time, the killer's sentence is automatically commuted to life in prison without the possibility of parole. The killer is implanted with a chip which is tuned to the same frequency as a 10,000 volt taser given to the relative. The taser can shock the killer at 50 feet and kill them at 3 feet.
* Immoral Tales which includes a section on Bathory and sequences of her bathing in blood.

* immortal Also a few locations have been repeated across the various strips at different periods in history.
* immortal army? Yeah, shooting them is a good idea. That will kill them for sure. Let's do that.
* Immortal Beloved, sadly enough—Beethoven could compose just fine without his hearing, but conducting and performing were another matter, and he was ultimately forced to retire from both pursuits (during the performance of his Ninth Symphony, Beethoven was allowed to stand with the working conductor, but he was only permitted to tap out the tempo before each movement—and the musicians were ordered to ignore any direction he happened to give beyond that).
* Immortal: Between Nikopol and Horus. Technically, they're involved in a MFM threeway romance with the same woman through Horus possessing Nikopol during the act, but Horus takes an extraordinary interest in Nikopol as well, beyond what would be necessary to fulfill his own purposes.
* Immortal Breaker: A certain thing can turn the immortal into mortal.
* Immortal, but it's implied that they're not using more than a fraction of their actual powers. Their pyramid transport is only a mechanical ship that needs fuel and maintenance (in the comic, at least), so they're not exactly omnipotent, although the credit of Earth's creation is given to them.
* Immortal Cities: Children of the Nile, you can employ these yourself, as distinctly separate from your main army. They're even literally called City Guards. Mostly they just go around stopping vagrants, thieves, and protesters, as they are fairly useless against a real army.
* Immortal Defense are the reason hyperspace is a scary place, since you're an immortal disembodied spirit with god powers, and you tend to tear apart fleets.
* Immortal Defense, but players who are just that good have gotten him. The developer didn't think anyone would be able to do it and the game assumes the normal events happened where the boss wins and continues from there. The rest of the game, heavily psychological, goes on to make near-record amounts of no sense.
* Immortal Defense in order to combat enemy fleets as they travel through hyperspace before they invade your home planet.
* immortal emperor keeps himself in such a device. Even holding rare audiences from his tank.
* Immortal ends with Jill having Horus's baby. Who, even as an infant, can turn into a hawk and hunt Parisian pigeons.
* Immortal forges a new leg for Nikopol out of a subway rail. It still needs Horus' power to function.
* immortal game, until the author decided to rename in order to get the concept across better.
* Immortal guitarist and lyricist Demonaz Doom Occulta was forced to abandon the former role because of severe tendinitis in his arms, though he is still considered an active member by the band. Demonaz eventually was able to return to playing guitar with the band and took over lead vocals from Abbath after his departure.
* Immortal has one appear right on Earth's surface, in Central Park, New York. This phenomenon called the Intrusion causes arctic atmosphere around the area, kills any human trying to enter, and brought some aliens, at least Jill and John from outer space, acting as a some kind of wormhole. Though John didn't create the Intrusion, it's implied that he brought it to Earth.
* immortal, having decided that his former plans for domination were meaningless.
* Immortal Heart Society: Alanna McKenna, the ex (for the female main character), and Emilio Espinoza, the dark horse (for the male main character).
* Immortal Hob Gadling avoids suspicion by faking his death once in a while and leaving the money to a "relative" with the same name. It still doesn't solve the problem of government records, though, in the modern era.
* Immortal Hounds of every human being (though people still die of "old age" at exactly 60). Blowing up your own head with a gun and wait a few seconds to be revived as good as new is a common method to cure a disease or heal a wound, to the point reluctance to do it is considered suspicious. Vectors and those they infect are unable to do this.

* Immortal Hulk all creation and wants to corrupt it until all is destroyed.
* Immortal Hulk, and explores psychological and even supernatural angles to the Hulk's powers, all of which have been given a sufficiently horrifying twist befitting of a darker narrative. With the cast of the character's world reimagined, it becomes clear that Hulk's place in the Marvel Universe will never be the same.
* Immortal Hulk capabilities the likes of which no other Hulk had displayed before.
* Immortal Hulk. How he did this is unseen (it's implied he ate his soul in some fashion), but it's quite a chilling note on just how horrifyingly powerful he's become.
* Immortal Hulk of the highest order, just ignores her and carries on with his insane plans, until eventually she reaches her breaking point, takes command from him, and lets Fortean die from the consequences of his own insane stupidity.
* Immortal Hulk science - it can be measured and understood scientifically, but when it makes "Metaphor people" it is behaving magically. It's all a matter of perspective.
* Immortal Hulk sparkles included, random flowers, and dramatic posing.
* Immortal Hulk: When Joe Fixit takes over for a few days, he grows a mustache which makes Bruce look an awful lot like his abusive scumbag dad.
* Immortal Hulk, when someone calls that Hulk Banner and he just asks "are you trying to piss me off?"
* Immortal Hulk: While Joe Fixit is trying to lay low, he suddenly finds a cop car pulling over to arrest a kid for wearing a Hulk-themed hoodie, slamming him against a wall and beating him up, even as he points out he hasn't done anything wrong. Joe tries to ignore it, not least because he knows if he starts smashing, he'll be in trouble, but he can't help.
* Immortal Immaturity: Being immortal doesn't stop you from behaving like a child.
* Immortal In Death reveals that Eve Dallas killed her father in self-defense after repeated physical and sexual abuse at his hands.
* Immortal Iron Fist are often drawn in the style of pulp era artists.
* Immortal Iron Fist, a tale is spun of Fat Cobra's life, including the time he and a bunch of kung-fu commandos faced off against Hitler's private SS Ninja squadron, led by the nefarious Herr Samurai.
* Immortal Iron Fist character Fat Cobra attempts to do this to the martial artist Tiger's Beautiful Daughter as they're sitting next to each other at dinner. For his troubles, she stabs him in the hand with one of her hairpins.
* Immortal Iron Fist, Danny receives a chronicle of the lives of all the previous Iron Fists that only he can read.
* Immortal Iron Fist. Fittingly, her main power is the ability to summon hordes of spiders.
* Immortal Iron Fist, Fongji, the Iron Phoenix, just disappeared after she merged with the Phoenix Force.
* Immortal Iron Fist in the '20s, supposedly passed into obscurity, completely unknown to Danny Rand, the modern Iron Fist, until he "reappeared" in 2007. The series delves into the histories of the Iron Fists that held the title before Orson, which go back for over a thousand years.
* Immortal Iron Fist superhero who had previously been owned by a rival company, was one of the Immortal Weapons.
* Immortal Iron Fist: The Eighth City is a brutally hellish realm that could only be reached through a dimensional gateway located in the remotest part of China. It used to be an empty place, until the elders of K'un-L'un turned it into a prison for many demons and monsters that plagued the Seven Capital Cities of Heaven. It's an absolutely dreadful place populated by all evils in the world, where none of its inhabitants are able to age, and they are eventually driven mad by their prolonged stay.
* Immortal Iron Fist: The Eighth City was a brutally hellish realm that could only be reached through a dimensional gateway located in the remotest part of China. At first it was an empty place until the elders of K'un-L'un turned it into a prison for many demons and monsters that plagued the Seven Capital Cities of Heaven. It's an absolutely dreadful place populated by all evils in the world, where none of its

inhabitants are able to age, and they are eventually driven mad by their prolonged stay.
* Immortal Iron Fist, this is how Xao treats his Hydra underlings who also consider themselves expendable, calling themselves a Legion.
* Immortal Iron Fist. Upon hearing this, he burns his biography and dismisses his company. He glares at the fireplace in disgust as he sits alone.
* Immortal Iron Fist wear a shirt, but a lot of the time it either gets destroyed, discarded, or had a plunging neckline that exposed his chest, tattoo, and abs.
* Immortal is a parody of the Black Metal genre. But then, it's almost impossible to distinguish between fake black metal videos and genuine ones, so there's the slight possibility that the entire genre is one big, long running stealth parody. Immortal realizes that they look ridiculous, which is why of all the original Norwegian bands, they're the only ones who didn't drop the corpse paint. They probably see it as a signature aspect of the band.
* Immortal is set in the future and features things such as flying cars, human augmentation, and other sci-fi conventions, but there are also Egyptian gods running amok with supernatural powers.
* Immortality are made clear-cut in episode 7 (and even earlier in the books). The rules in the book are elaborated on a bit more (primarily because at least two immortals have been spending 200 years testing the constraints), but the principles are still the same:
* Immortality Begins at Twenty in the second game. Another asari asks what species her friend's father was, is told he was a salarian, and delicately says "Oh, so you didn't get much time with him."
* Immortality Begins at Twenty is only for female Greek gods given that Hades and Posideon also look decades older than their sisters.
* "Immortality Blows". The main character is eventually lift drifting through space forever after the heat death of the universe.
* immortality but only The Elixir of Life lacks downsides. It will keep you alive with repeated doses, and has eternal youth (or at least eternal middle age) added in.
* Immortality can also be cosmically illegal: creatures called Marut travel around the Planes, hunting down people who go too far to avoid dying when their time is up.
* Immortality, either - although they may lose their memories or be forced to take a new form.
* Immortality Hurts: Not being able to die does not mean you can't feel pain.
* "immortality" if they leave the forest (which would mean death in a matter of decades), or they would quickly become weak and die in a period of weeks or months while outside of the forest.
* Immortality Immorality: Obtaining immortality requires resorting to unethical means to achieve it.
* Immortality Immorality: Villainous immortality seekers are frequent line-crossers, as they typically pursue monstrous or morally bankrupt means of achieving it, and once they become immortal (or if they have been immortal for a while), they are extremely likely to engage in significantly more heinous and depraved acts as time goes on.
* Immortality, Inc. The rich guy has guaranteed afterlife and doesn't fear death, while the hunters mostly don't.
* Immortality Inducer: Something that causes people to become immortal.
* Immortality: In popular Western media, genies are often immortal beings.
* Immortality is more than stretching it for Time (who retains his office for precisely as long as he lived before gaining it, since
* Immortality is why Melinda had no need to master the cycle of life and death, unlike her former apprentice Melissa and her
* Immortality Through Memory: The belief that as long as someone remembers them, they can never truly die.
* Immortality Through Memory: The idea that someone only truly dies when they are forgotten.

* Immortality: Vampires are commonly portrayed as being able to live forever, unless someone exploits one of the vampire's weaknesses to kill them.
* Immortality: Werebeasts are sometimes depicted as being able to live forever.
* "Immortalization", where the characters reason that the only way to create something that other intelligent beings elsewhere would not have come up with is to produce crap, which of course makes humans very special.
* immortal jellyfish is another example, using a kind of reverse aging. Hydras have a similar mechanism.
* Immortal Kalas goes after Duncan by striking at his friends. He forges the signature of Duncan's doctor girlfriend Anne which leads to two patients going into medical arrests and one dying. As Anne is about to be fired, Duncan interrupts the meeting to have her sign her name three times, noting how each one has some minute differences in the style. He then brings up how each of the three signatures on the orders is
* Immortal Leader for Governors, anomaly results and/or being shot down for Scientists in charge of a Science Ship, and dying in battle for Generals and Admirals.)
* Immortal Life Is Cheap: A character can't be killed at all, which others use as an excuse to not care about doing anything to them that could cause serious harm.
* Immortal like this, at least as far as "rare person who can mate with gods."
* Immortal Love 6: Bitter Awakening Alison falls in love with Jacob after he saves her from a charging boar.
* Immortal Love 8: Sparkle of Talent Emma has to rescue her husband Oliver after he's abducted by Radcliffe and his minions.
* Immortal Love 8: Sparkle of Talent Sam throws a bucket of water on an unconscious Emma after capturing her, due to thinking she's one of Radcliffe's minions.
* Immortal Nicholas between Krampus and Zwarte Piet) whom Agios frees.
* Immortal of the Peri as of the current edition; many of the others are still Creepy Children, though, just from different origins.
* Immortal Procreation Clause: Obtaining immortality strips you of your fertility.
* Immortal Rain, Machika is Rain's second love (Freya was his first). There may have been others (he's really old) but these are the ones shown. Eury might be this for Ayla...maybe.
* Immortal Rain. She's following in her grandfather Zol's footsteps, although the bounty hunting part doesn't come up all that much.
* Immortal Redneck does considerably more damage then the basic pistol, but it is also far less accurate.
* immortal revenants of various historical villains is Judas Iscariot.
* Immortals After Dark, all races of immortals eat normal food as children, but some stop as they become fully immortal. Females are required to eat, however, if they wish to become pregnant, and presumably until they give birth. Among the non-eating races are vampires, Valkyries, and succubae/incubi.
* Immortals After Dark, Demons' horns are so sensitive that stroking them is referred to as a hornjob.
* Immortals After Dark is a fanatic bent on destroying immortals, believing them to be unnatural. He becomes immortal himself, and promptly begins plotting the subjugation of the human race he championed, having decided that he's now part of a master race or some such. Really, it's just a predilection of his; the only thing that changes is which team he's on.
* Immortals After Dark series by Kresley Cole features this fairly often, with an extreme case being the relationship between Lothaire, about three millennia-old, and Elizabeth, who's in her early twenties. The women sometimes play the December part, funnily enough, but only the three Valkyrie sisters Myst, Kaderin, and Daniela, who are about two thousand, to Nikolai, Sebastian, and Murdoch, three brothers who are about three hundred. So even in those cases, the guys aren't exactly babies by immortal standards.
* Immortals After Dark series by Kresley Cole has a variant. One becomes a Wendigo when bitten or scratched by one, although Lothaire reveals the heretofore little-known fact that rubbing salt into the wound halts the transformation. They hunger

for flesh, like the archetype.
* Immortals After Dark series by Kresley Cole, this is explicitly stated to be the case. One character says that every myth is an example of when some being in the Lore screwed up and let humans catch them existing.
* Immortals After Dark series' titular beings. For those with divine blood such as a Valkyrie, there's a possibility of becoming deities if they reach an extremely advanced age, like three millennia or more.
* Immortals After Dark, there are ghouls, which exist solely to mindlessly increase their numbers by scratching or biting anyone they can reach. There are also wendigos, which can transform others in the same way, but seek to eat their victims rather than add to their numbers. And there are revenants, which are corpses raised by dark sorcerers to do their bidding, minus the infection aspect.
* Immortals are unable to give a false name in the presence of other immortals.
* Immortals as babies, and have to grow up all over again. As they mature, each new incarnation recalls the memories of all their previous incarnations.
* Immortals does this a lot, especially when the Gods fight the Heraklions and Titans.
* Immortals do this when they "die" in order to reset themselves. While their fundamental nature as a person does not change, most of their memories and personality will be lost upon their "death". And the memories they do choose to keep are retained only as information, not experiences.
* Immortals' ending, true to the Greek mythology, Phaedra gave birth to Theseus's son Acamas.
* Immortals Fear Death: I don't want to die! I'm supposed to live forever!
* Immortals Fenyx Rising, but the company was forced to rename the game when Monster Energy objected to the original title, somehow claiming that it could cause confusion between a mythological fantasy game and an energy drink of all things.
* Immortal's Handbook, a third-party splatbook for Dungeons & Dragons. For awhile, the front page, at a glance, seemed to be 60% "look at all the cool stuff that I'm making!" and 39%, apologizing for not updating or releasing anything for years. Then, the website was changed. The
* Immortals' Handbook: Epic Bestiary had plenty of them, with the most extreme example probably being the nehaschimic dragons, which start two thousand feet long, expand to fill the observer's perception of the universe, and are utterly incomprehensible.
* Immortals in general use an intentional form of this. Immortals have to "reset" every few centuries in order to avoid going insane, but the new Immortal is functionally a new person, who only remembers their past self's life "as though reading about it from a book". They can make some things stick (such as Jerry ensuring that the debt he owed Susan would be carried over and not dismissed), but for most part shedding the excess baggage is seen as a
* Immortals in that Damen, being immortal, actually seeks out each of her new incarnations.
* Immortals. In the film, it is stated that they hide their faces as a sign of equality, while Theseus says that they do it because they are cowards.
* Immortals it takes with the story of Theseus, does two things wonderfully right: make the fights more gorgeous than the scenery, and make Theseus rallying a troop of defending Greeks so epic that the audience in the theater is tempted to stomp and shout along with the front-line shieldbearers.
* Immortals. Oh, and the Patchwork People, who stay alive by taking other people's body parts to replace their own.
* Immortal Souls Allison is a sweet little innocent woman. She's always clueless about the extent of the danger she's in, though she gets suspicious now and then.
* Immortal Souls both wear billowing black leather coats that serve as their "armor" in terms of the games' defense mechanics.
* Immortal Souls for John, who's too worried about others finding out about his secret life to seriously flirt, and Allison, who worries about whether or not he's doing OK too much to ever get a chance to get beyond that. Though Allison finally eventually perks up enough courage to ask him out for coffee by the end of the

first game.
* Immortal Souls for the latter, as well as Juliet's female gang members also dressing equally sexy.
* Immortal Souls) good guys take advantage of the matter on a regular basis. As a result he's constantly forced to choose between keeping his secrets, protecting Allison, and/or going along with whatever scheme either side has cooked up for him.
* Immortal Souls, Raven had herself turned into a vampire specifically so she could take revenge on the vampires that killed her family and is well-known for her enthusiasm about the matter.
* Immortal Souls really wants to go back to be human, or at least try to just live as normal a life as possible as a taxi driver. Unfortunately for him, everyone keeps either trying to pressure him into doing heroics for them or trying to kill him for what he is. There was also an incident when he was human where he tried to give up being an ace street racer after the races started getting too deadly and dangerous for his tastes, but the people he raced for tried threatening him into continuing anyway.
* Immortal Souls "sensors detected pheromones release, possibly clouding her judgment".
* Immortal Souls serves as a mediator between the hordes and gangs of shadow creatures that attack the humans and the holy warriors that protect the humans, doing whatever is needed to keep the two forces evenly matched. They attack the former only as needed to keep them from doing major damage and overrunning things, and the latter only in self-defense and when needed to remove any major advantage they happen to gain. The normal humans themselves are treated as collateral damage.
* Immortal Souls, though he is talked into taking non-sexual advantage of them occasionally, and is reasonably polite while turning down anything more forward whenever he does so.
* Immortals Rules boxed set "DM's Guide". When a jumper monster attacks a mortal being, the mortal instantly ages 10-40 years. Repeated attacks can cause death by old age in seconds.
* Immortals, something Zeus or any other god could have easily prevented.
* Immortals sourcebook. They're more Chinese than Egyptian (complete with using Chi as a power source), but attain immortality through ritualistic preparation and spend the rest of their lives as a part-spirit entity.
* Immortals that can fire infinite shots, which destroy men and rocky walls alike. So when it comes time for the final battle, he fires said bow exactly one time at the giant wall the Greek soldiers are hiding behind. Which creates exactly one small opening for his massive army to use, giving the Greeks plenty of time to defend such a small area.
* Immortals themselves (that is to say, a class of magical humanlike creatures who are naturally immortal), have another form of this trope, in that the older they get, the more unhinged and psychotic they become. They also tend to get
* Immortal Sun Mist Emperor. It's about a young boy who seems to become the strongest mage in the universe of Xeleria. The story is currently updating weekly on Wattpad and is on its second entry (technically it has three, but one of those is a prequel).
* Immortal Technique's "Dance With The Devil", the singer reveals that he was one of the gangsters in the story and says this:
* Immortal the bodies of the inhabitants of New York are too heavily mutated and modified to survive being Horus' hosts for long, so he is forced to jump from one to another every few hours. He stops after taking residence in the unmodified Nikopol.
* Immortal: This is the form of immortality that Horus ultimately acquires. After siring his offspring with Jill, he willingly accepts judgment by his fellow gods. She's later seen with a baby that turns into a falcon.
* , Immortal!Twilight talks with her apprentice about the many ponies she's seen grow up and pass on, and concludes that the friendship she shared with them was worth the pain of mourning.
* Immortal: Unchained deal more damage per shot than the pistols, at the expense of

having a lower fire rate.
* Immortan Joe is often shown near or at the front of the fleet throughout the chase.
* Immortel are realistic CGI — all other characters are played by live actors.
* Immortel). The plot convenience comes in when he finds a cryonically-frozen convict that was accidentally unthawed before his sentence was up; since the Human Popsicle was put into cold storage before genetic engineering became a fad, his body is unaltered, and thus the perfect host for the god.
* I'm Mr. [Future Pop Culture Reference]: Someone time-travels to the past and uses the name of a character from a future work of fiction as an alias.
* I'm Mr. [Future Pop Culture Reference]: Time traveler uses the name of a present-day fictional character or popular figure as an alias.
* immune to blaster fire unless you happen to be lucky enough to shoot them in the mouth.
* Immune to Bullets as well as most forms of non-magical physical assault, as he regenerates faster than he can get harmed.
* Immune to Bullets. "If it's any consolation," he adds, "That hurt like hell."
* Immune to Bullets it was necessary to have them ally with a race that did not share this immunity, thus allowing shootouts to continue.
* Immune to Bullets, shouting "Eat lead, alien robot!" Then there's a gulping noise from offscreen.
* Immune to Bullets swords at least aren't going to outlive their usefulness for quite a while yet in this setting.
* Immune to Bullets. When it turned out that an enemy wasn't, it ended badly for them.
* Immune to Drugs: Somebody who's impervious to the pills and the powder.
* Immune to Flinching: When the character actually is getting injured by the attack, but you wouldn't know that by looking at it.
* Immune to Mind Control and realizes that her infatuation with him when they first met wasn't just his incubus powers.
* immune to pain, tends to react with nothing more than annoyance to life-threatening wounds, including being skewered by a katana.
* Immune to Slapstick: I won't get involved in these childish slapstick antics!
* Immune to Slapstick, she found herself on the receiving end of this trope more frequently.
* immune to sunlight. And while the breed of the old vampires, almost always have yellow eyes, the new vampires have red eyes.
* Immunity Attrition: Your immunity to something only protects you in the short run, but prolonged exposure cancels it out.
* Immunity Disability: Because sometimes being immune to something may be a detriment instead.
* Immunity Disability: Being immune to something comes with its own drawbacks that might be exploited.
* Immunity from Prosecution: may not be used against him in a future prosecution — they can still try and convict him for it with other evidence. The only other way you can get this is through a pardon by the President or governor. It's related to but distinct from plea bargaining — prosecutors will often exchange a reduced charge or sentence in exchange for testimony, but rarely full immunity.
* immunity to instantkill abilities or debuffs's weapon) that bypass this weakness. That said, it's a downplayed example.
* I'm My Own Mascot has Indie Kevin, a badly drawn version of the main character who seves as his self-loathing and Kevin's inner five-year-old, who seems completely unphazed by him.
* I'm My Own Mascot, talking about the Internet being a medium for stupidization:
* I'm Not A Child, went all out with the fact that Britney is now an adult that viewers can fantasize about without shame.
* "I'm Not Afraid of New Ideas", sung by Jet and Sydney in "Lone Star". It's

about, well, not being afraid of new ideas.
* I'm Not Afraid of You: Please! You can't scare me just because you rely on fear!
* I'm Not a Hero, I'm...: A hero denies or accepts that they are a superhero.
* I'm Not a Monster, the protagonist is a grave robber. His partner gets his throat bitten out by a zombie while contemplating screwing their mark's corpse.
* Im Not book "I'm Not Santa", Baby Owl is mistaken for Santa by a rabbit. He insists he isn't, but then decides to humour him. However, by then, he realises Baby Owl isn't Santa and cries because Baby Owl "lied", then Baby Owl starts crying, but luckily, Santa comes and cheers them up.
* I'm Not Doing That Again: A common, snarky phrase and variants said by characters after they've done something taxing.
* "I'm not even angry/I'm being so sincere right now/Even though you broke my heart/and killed me/And tore me to pieces/And threw every piece into a fire."
* I'm Not Here to Make Friends: A contestant is focused on winning the game as opposed to making friends with other contestants.
* I'm Not Here to Make Friends: Introverts are more concerned about winning a game than socializing.
* I'm Not Here to Make Friends: Winning a competition is more important than making friends!
* "I'm Not Okay (I Promise)" where the band members portray the bullied loners at a prep school who play music in their garage after school.
* "I'm not saying Dick Cheney absorbs light. Or that if he were to brush by a plant, that plant would three days later die."
* I'm Not Scared features this, largely due to the fact that the main character is a naive young boy. His quiet little rural village seems nice enough, but most of the villagers (including the main character's parents) are involved in the kidnapping of a young Milanese boy.
* I'm Not Stupid", John Laurens' father beats him up and locks him up in the trunk of his car and then stages it so that it looks like he fell in the shower. Emergency services, social workers, and doctors all fall for it, as John doesn't dispute it. His stepmother catches on and leaves his father but is unable to get custody of John.
* I'm Not Your Manic Pixie Dream Girl. It's also shown that even the "quirky" girl her boyfriend ditched her for is more well-rounded than the shallow MPDG stereotype Beatrice initially saw her as.
* I'm not your sweet baboo!"), Lucy towards Schroeder... the list goes on.
* I-Mockery: A general, humorous riffing site that reviews anything from movies to toys.
* I-Mockery, and all October the site is given a change in design with articles exclusively focusing on the holiday, what candy seems to be handed out this year, impressive (along with kitschy or downright terrible) celebrations throughout America, tributes to old horror games and movies, and the usual antics of the staff getting caught up in the holiday. They have a similar celebration for Christmas as well.
* Imoen, both Children of the dead god Bhaal a romance option). Ultimately irrelevant, as she isn't a romantic option in the game... unless you mod it.
* Imoen is revealed to be a child of Bhaal, thus she can't be normally resurrected, as when she dies, her corpse turns into dust (like Sarevok and Charname) and her soul rejoins the essence of Bhaal, speeding his resurrection. However, in the first game she can die and be resurrected every time the player wants. She could also die at the beginning of chapter 1 and be resurrected after months of in-game time for the final fight. In the expansion Throne of Bhaal.
* Imogen and Agreus goes in with a gun to shoot the latter, calling his sister a whore. Philo's parents also had a secret relationship in the backstory. He keeps his marriage with Vignette secret from most humans for this reason as well.
* Imogen Heap, although it can be justified that Frou Frou only had one album and she already had one solo album out before that.
* Imogen Heap mean well. So, in this context, it's Derulo singing about just how unfaithful and spiteful he is ("I don't want you to leave me\Though you caught me

cheatin'"). Oops.
* Imogen Heap parody "Dear Sister/The Shooting" thereof, and the recursive parodies of that SNL sketch on video sharing sites. Then made old meme by Jason Derulo's "Whatcha Say" that samples mainly the memetastic bits.
* Imogen Heap project, which included extensive sound- and image-sourcing from her fans, primarily for the song "Lifeline".
* Imogen Heap, the band members (as zombies) stalk a man and his girlfriend.
* I'm O.K, a response to Jack Thompson's "Modest Video Game Proposal" featuring a vengeful father out to slaughter video gamers and devs over the death of his son. After gorily massacring a multitude of bystanders (including children. Many, many children,) industry employees, and eventually destroying the building E3 is hosted in, the game gives a generic "Congratulations! You killed every game designer in the world! America is saved!" ending.
* I'm Okay!: Someone states he's okay even if he logically shouldn't be.
* "I'm only three and a half years old!" - From a character named Martha (Billy Gray) on the Abbot & Costello radio show.
* "I'm only three and a half years old!" - From a character named Martha (Billy Gray) on the Abbott & Costello radio show.
* I Monster. The music box melody keeps reappearing during the chorus.
* I, Monster. (The supporting characters Lanyon, Utterson, and Poole keep their names from the novel, presumably because anybody familiar enough with the novel to recognize those names would spot what was going on in any case.)
* Imori loses to Yami, and the jar can only hold one soul at a time...
* Imotekh the Stormlord happen to have such policy on those he defeats. High Marshal Helbrecht punishes him, leading the force that ambushed and destroyed his flagship, while Imotekh was forced to flee.
* Imouto ni Fianse wo Yuzure to Iwaremashita: After it's been announced that the prince's hand in marriage would given to Luna instead of Eliana, a random creep tells Eliana that he heard rumors about her losing her place as the Crown Prince's bride due to her infidelity. He then pins Eliana against a wall and tries proposition her into going out with him. Eliana manages to break free from his grasp by slapping him.
* Imouto ni Fianse wo Yuzure to Iwaremashita: Eliana is set to marry Prince Alvin at the beginning, though she later is replaced by her younger sister, Luna.
* Imouto ni Fianse wo Yuzure to Iwaremashita: For whatever reason, Eliana's younger sister, Luna, was always favored by their parents. She never had to undertake training like Eliana did, and after Luna throws a fit for not getting to marry the prince, her father eventually swaps fiancées.
* Imouto ni Fianse wo Yuzure to Iwaremashita: Luna has her pink hair done in two pigtails. It's fitting considering how childish and irresponsible she is.
* Imouto wa Shishunki and their teacher starts to say reezun (raisin) but then she realises that means she would lose and changes it mid-word to rezubian (lesbian). The other teacher is shocked but Kanami just cheerfully points out that she loses.
* I Moved Your Cheese complains about how hard it is to write a self-help satire:
* Impact (1949) detective Charles Coburn tries to question an aged Asian played by Philip Ahn. When he doesn't answer immediately the detective asks him "Savvy English?" To which he replies (in perfect English): "Yes. Also French, Italian and Hebrew")
* Impact Comics as one would help him get a scoop on the real thing (the Comet, if memory serves) and quite by accident ended up helping save the day.
* impactor spacecraft against the comet Tempel 1, that created a visible crater on it.
* Impact Silhouette: Someone runs through a wall and leaves behind a hole shaped exactly like them.
* Impact Silhouette: When a person crashes through a wall, they leave a hole shaped exactly like them.
* Impact Wrestling (2002-): Began to set PPV buyrate records not seen in nearly a decade after AEW World Champion Kenny Omega appeared on their programming.
* Impact Wrestling. Debuted in 2002 as Total Nonstop Action (TNA) Wrestling.

* Impact Wrestling (formerly Total Nonstop Action) has gone from a hot wrestling commodity to a shell of its former self due to how badly-booked and poorly-mismanaged TNA had been.
* Impact Wrestling's 2019 Thanksgiving week episode (traditionally a light-hearted, out of continuity episode as the holiday week has few viewers) was made to look like an 80s studio wrestling episode of a fictional regional predecessor.
* Impact Wrestling's mirror and whenever somebody else entered the room she would disappear. They were a little smarter about this because the commentators never mentioned her until she finally showed up in person.
* Impact Wrestling together are almost a distaff counterpart to James Storm's team, America's Most Wanted.
* Impact Wrestling was saved by its current parent company, Anthem, twice in succession. Buying it out from Dixie Carter in the first place, and then buying out the AXS TV channel, giving Impact a home on perhaps the biggest TV channel they've had since they left Destination America.
* Impact Wrestling, whose sculpted biceps and love of flexing them were a big part of her gimmick when she first arrived, yet her physique softened up considerably over time. She still flexes, but it looks hilariously pathetic compared to before she debuted on the main shows.
* Impairment Shot - Ccamera trick used to indicate that the character whose POV we are seeing is drugged, poisoned, sick, injured, or otherwise incapacitated
* impaled - i.e. given equal space) of the Baratheon Stag and the Lannister Lion—and yet the tail of the Lion hovers menacingly above the Stag's own field—subtly emphasizing that it is really House Lannister calling the shots behind them.
* Impaled Northern Moonforest acoustic black metal songs with names like "Awaiting the Blasphemous Abomination of the Necroyeti While Sailing on the Northernmost Fjord of Xzfgiiizmtsath".
* Impaled Northern Moonforest, specifically the section on the "acoustic black metal" genre that sprung around the group.
* Impaled with Extreme Prejudice, after which he states, "Look, I found all these free swords. They were in my spleen."
* Impaled with Extreme Prejudice: Death by being impaled upon something.
* Impaled with Extreme Prejudice: It's not uncommon for many slasher victims to meet this fate, whether by the killer's knife or through some other unfortunate circumstance.
* Impaled with Extreme Prejudice. Prime Quark and Rom discover this when they visit the Mirror Universe in "The Emperor's New Cloak" several seasons later.
* Impaled with Extreme Prejudice: Someone is impaled all the way through.
* Impaler, it only takes two days for what started as a few dozen vampires to become a few million and infest New York City to the point where it has to be nuked. It takes less time for them to wipe out Baltimore, Boston, Philadelphia, and Washington, D.C.
* impales Krillin with his horns, shoots up Piccolo, brutally beat Vegeta to near death, and tears Goku apart with only half of his full power. When he is almost killed by the Spirit Bomb, he slowly picks off Goku's friends in front of him to rub in how helpless he is. This, however, backfires when Frieza's killing of Krillin and threatening of Gohan unleashes the very thing he most feared in Goku, a Super Saiyan.
* impale you with steel spikes to prevent hobos from hanging around on the benches.
* impaling their helpless victim upon the spines covering their body. They're also fully sapient and capable of speech and known for having morbid conversations with their food while it "ripens" on their spines.
* Impassable Desert: You can't enter the desert without some important item.
* Impassable Forest, a sparse congregation of vegetation, apparently sporting a force field that expels player characters.
* Impassable Head High Hole, an opening you can't enter because the top of your character's head is an inch too high. For whatever reason, your character can't/won't just crouch and move through it.

* Impassable water appears as well. The several rivers that appear in the game are all impassable despite being a few feet wide and inches deep. And the PC is shown many times in the game to be capable of swimming, including in a couple of fairly large areas that are
* Impa undergoes a similar development to Zelda; in her initial appearance she's an elderly servant, but later games turn her into an Amazon Warrior who acts as Zelda's bodyguard. Since
* Imp cast spells by drawing "hexes", which look like pentagrams. Apparently picturing the hex, however, produces the same effect and the witches of the north use incantations to summon magic.
* impeccable dramatic credentials) as a Dame or another minor character.
* Impeded Messenger: An interrupted messenger can't deliver a plot-important message on time.
* I. M. Pei's glass pyramid at the Louvre was an attempt to invoke this.
* Impel Down(although Ace was sentenced to public execution and held in Level 6 until his sentence was to be carried out).
* Impel Down and Marineford make up an entire All For Nothing arc. Luffy breaks into
* Impel Down arc on Impel Down to open the Gates of Justice. Jimbei was the only one aware of 2's plan, and 2 asked him to keep it secret from Luffy until they are past the Gates, or else they would never escape.
* Impel Down look like demons and wear uniforms that bear a very strong resemblance to SS officer uniforms, complete with armbands showing the Impel Down symbol (not quite a swastika, but close).
* Impeller engines, while the Bergenholm is still engaged, causes the ship to come to a complete stop instantly (the moment they bang into that first hydrogen atom in the interstellar medium). Turning off the Bergenholm itself causes the ship to resume its "intrinsic velocity", i.e. the sublight velocity it had before the Bergenholm was engaged. This is significant in several instances when a ship which had gone intrinsic in another galaxy was trying to rendezvous with a fleet in the original galaxy, and the two groups had fantastically different intrinsic velocities.
* Impending Clash Shot: Two characters are about to attack each other at the same time.
* Impenetrable Darkness, an area which is impassible because your character apparently has a paralyzing fear of the dark. Sometimes justified if there are actually things in the dark trying to kill you or pits to avoid, but more often leaves the player wondering why they couldn't just use one of a hundred different ways to create light.
* Impenetrable Walls identifies Wei Wuxian as demisexual. It makes for quite the awkward situation when he's picked up to be an Imperial concubine but doesn't get it involves more than flirting and teasing — his eunuchs and lady-in-waiting are rather annoyed and baffled by what they perceive as a refusal to fulfill his duty.
* Imperal mercenaries and knights both in Empire and Bretonnia bling up according to
* Imperator have been Skuurnur, and to hell with any investigation in the matter. The twist is that he flat-out said that he's only really concerned Skuurnur might curry favor with some defense contractors that he's interested in courting for his own empire.
* Imperator Librarius, like Relius, mostly provided crippling support in
* Imperator Mar'gok in Warlords of Dreanor's Highmaul raid regularly turned the current tank into a living bomb, necessitating a Tank Swap. Depending when during the fight it occurred different Tank Swap tactics had to be utilized. In 1 phase the current tank simply had to run away as the new tank taunted. In another the affected tank was randomly teleported into the rest of the raid, necessitating an even quicker response in running away. Later the affected tank began to be rooted in place, meaning they had to both know it was coming and start running in advance and the new tank had to pull the boss (and melee) away from the bomb.

* Imperator Online, by Mythic Entertainment, was going to be a sci-fi MMO where Roman and Mayan civilizations developed space travel, and was canceled in 2005.
* Imperator: Rome: War elephants are available to anyone who can trade with a province that supplies elephants, which generally means North Africa and India. They also cost double the supply limit of any unit.
* Imperator: The equivalent of an admiral in command of a large fleet of ships.
* "Imperfection": Tish shows her report card to the gang, and her straight-A grades. She is then surprised to read a negative comment concerning her perfectionism, which, ironically as she points out, tarnishes her report card.
* Imperfect Metamorphosis. Fortunately she doesn't want to hurt anyone, and has spent most of her time defending herself, running away, or hiding.
* Imperfect Metamorphosis herself; she's bedridden with intense nausea and hallucinations from the aftereffects later.
* Imperfect Metamorphosis is almost as much work as actually writing it.
* Imperfect Metamorphosis Kotohime gets nothing but flak for running Gensokyo's first police force. The youkai hate her because the GPF largely protects humans from them and tries to involve themselves in youkai affairs, when they've always handled things amongst themselves, and the humans hate her because they also protect youkai from humans and hire some youkai. Even Yukari, who enabled her to start the GPF in the first place, treats Kotohime as a disposable lackey.
* Imperfect Metamorphosis. Not a cross-over, because it's only a one-shot scene, and these things are directly coming from Kaguya's memories.
* Imperfect Metamorphosis, Reimu finds out that she just can't stand back and let Yukari kill an innocent child, if she can choose to take a third option.
* Imperfect Metamorphosis says can be trusted without outside confirmation, and plenty of other characters occasionally get in on the act.
* Imperfect Metamorphosis towards Team 9 and several other characters.
* Imperfect Metamorphosis towards Team 9. Wriggle, who has apparently experienced it before, is horrified the entire time, but the others don't seem to understand the danger (aside from the obvious).
* Imperfect Metamorphosis Yuuka is all but outright stated to be a serial rapist who kept Wriggle as a "pet" for a while.
* Imperfect Ritual: The material lacks or substitutes some key component, but manages to start anyway.
* Imperial Agent doing this to both sides of the war to get them to destroy each other.
* Imperial Agent PCs and some mobs have the ability to call in tactical orbital strikes (
* Imperial aircraft can actually buy a distinctive paintjob or decals as an upgrade that let one unit that sees the plane reroll one leadership test.
* Imperial Americana AKA the American Empire takes up all the rest, including Washington D.C. After Non-Nuclear World War IV in 2019-2020, this industrial and militaristic extreme right-wing conservative nation resorted to aggressive foreign policies to help stabilize their economy, casting them as antagonists in
* Imperial and Renegade Knights are devastating weapon platforms capable of wielding rapid-fire battle cannons and
* Imperial, apparently preferred this uniform without the epaulettes and fancy trim, at least when he wasn't in the Emperor's presence.
* Imperial Army troopers in the field have their own sets of armor, though they're much less covering than Stormtrooper armor, as shown by Veers and the vehicle pilots in
* Imperial Austria, and, outnumbered, outgunned and deprived of his forward base at Milan by the city's rebellion, he outmanoeuvred the Sardinian-led coalition until it dissolved under its political difficulties, at which point he fought decisively and won.
* Imperial Bedroom and the Attractions has a cover design that's meant to be a pastiche of the Pablo Picasso piece "Three Musicians". On the left side of the cover are six odd, slug-like creatures with zippers at the ends of their bodies; if you look closely there are letters on these zippers, and they spell out "PABLO SI".

* Imperial Bling of War works against humans when fighting orks: since to the
* Imperial Captain Brunson delivers one to her helmsman after he informs her their rocket troopers have suffered heavy casualties, and when she asks how many he sheepishly answers "all of them".
* Imperial captain Joak Drysso, in command of the Super Star Destroyer "Lusankya" in the
* Imperial China"), in which prisoners convicted of severe crimes were slowly and painfully flayed to death.
* Imperial China. The fist means the strength and courage of the wielder, while the palm symbolizes the wisdom and temperance that controls said strength.
* Imperial Commander Degoren operates out of a modified freighter, the
* Imperial Dating System records dates in the format of check number, year fraction, year, millennium (e.g. 0123456.M41). The check number refers to how far removed the recorded event is from Terra (0 being on Terra, 9 being in the Warp and therefore chronologically unreliable). The year fraction refers to when in the year the event occurred in a system divided into one thousand units; each increment corresponds to roughly eight hours and forty-five minutes. The year and millennium are straightforward. The example works out to "This event happened on Terra in the 123rd increment of the 456th year of the 41st millennium."
* Imperial defector Bodhi Rook wears protective goggles on the top of his head for almost all of his screen time in
* Imperial Earth by an Earthman who remarks wistfully that it'll be kind of monotonous "when" everyone on Earth has bred to "the same shade of beige." He's a touch envious of the main character's darker skin.
* Imperial Earth by Arthur C. Clarke the protagonist has a homosexual love affair with his best friend when they are teenagers, which becomes a three-in-a-bed triangle when they both fall in love with a female visitor.
* Imperial Earth, in which the space drive of the day contains a tiny black hole (referred to as a "Node") into which matter is fed. The resulting energy release is used to drive the spaceship. As a result of this process, the black hole gradually increases in mass, and eventually has to be replaced. What happens to the "used" black holes is never explained.
* Imperial Earth. The space drive of the day relies on dropping matter into 'Nodes' (microscopic black holes), which thus become heavier over time and eventually have to be replaced. The protagonist asks what happens to the resulting black holes — are they thrown into the Sun? The ship's engineer replies that that wouldn't work; they'd go straight through the Sun and out at the other side.
* Imperial Elite Guard seem to rotate as the functioning capacity of this role.
* Imperial flip-flops a bit. While less extreme than Bauhaus or Mishima, power lies firmly with the clan chiefs and their families. Commoners have little power, but they
* Imperial Germany managed to rally the defense of the city and held it against the invaders. Despite this, Moscow remains the capital to this day.
* Imperial Germany (Prussian Secret Police) established by Karl Ludwig Friedrich von Hinckeldey following the 1848 revolution — which would later become the basis for Gestapo.
* Imperial Germany) to either side with the Americans and take control that way or to win glory and followers by fighting the Americans, which followers could then be turned against him. (Indeed, Villa had been trying to provoke the Americans into invading Mexico for the past two years in the hopes of doing exactly the latter, and he was enough of an opportunist to try the former.)
* Imperial Guard and is a genius in Ogryn terms (N is for Nork), he remains in the Guard because of the content feeling fighting alongside his fellow troopers gives him.
* Imperial Guard and others all descendants or counterparts of Earth culture. Given how a good number of Imperial worlds were originally settled by either the successors of modern Earth cultures or cultural revivalists, this is justified.
* Imperial Guard Commanders appear to be junior flag officers, possibly somewhere around brigadier. Lord Commander of the Segmentum is a much higher combined arms

rank, the five joint highest in the Imperium answerable directly to the council of High Lords.
* Imperial Guard Enginseers in the expansions to the first game are the toughest builders available. Other factions tended to use various types of slaves or drones or other squishy units.
* Imperial Guard fame summed up a Guardsman's duty as "We die standing."
* Imperial Guard generals tend to follow this model, with the authenticity of the medals depending on the generals and the regiments involved.
* Imperial Guard, meaning they take fewer Rout tests because they're too stupid right now to realise they should be.
* Imperial Guard often sees Planetary Defense Force units are this. Their lack of discipline, morale and combat ability can usually be attributed to lack of combat experience, training and communication equipment (and the fact that the Guard tithes the best of the planet's soldiers for use elsewhere in the galaxy).
* Imperial Guard players to defeat monstrous creatures, especially Tyranids, is to ring them with conscripts, shoot the rest of the army around them, then, once everything is well under control, maybe charge them with a command squad and try to get a force weapon and a couple of powerfists in contact with them.
* Imperial Guard regiments, exterminate all sentient life on the new planet, ship colonists in. The stone age Tau only escaped that fate thanks to a freak warp storm.
* Imperial Guard regiments from Valhalla are described to generally be like this, able to shrug off even the largest losses and focus on the objective at hand, not even surrendering until the very last moment, and sometimes not even then. For a good example of this, see Gunner Jurgen, aide to
* Imperial Guard regiments use grav-chutes (essentially less powerful jump packs that work like parachutes) whenever they deploy troops or light vehicles from the air. Specialist regiments like the Harakoni Warhawks and Elysian Drop Troops employ this trope in a very literal sense by being able to drop
* Imperial Guardsman's Uplifting Primer? Start praying to the Emperor that your assignment is primarily fighting rebellions of planets who failed to pay their taxes or traitors. Otherwise, enjoy being part of Squad number 529 being sent to replace the most recent losses. Oh, and don't think of running away from the big scary monster charging at you from the front. Headquarters has seen fit to stop that by placing something even scarier at the back of your squad. It's called a Commissar, and his job is to provide "encouragement" to any who might consider retreating. Said encouragement often involves impromptu execution for cowardice via .75 caliber explosive shell firing Bolt Pistols. Planetary Defense Forces have it even worse. At least the Imperial Guard often defeats the enemy, even though the first deployed usually don't get to see it. The PDF, on the other hand, can merely slow them down until the Guard arrives...
* Imperial Guardsmen have a wide variety of nicknames for their enemies (such as "greenskins" for orks, "bugs"/"'nids" for tyranids, "blueies" for Tau/their human followers...).
* Imperial Guard, the Imperial forces are supposed to pray for the dead they find, and see to it that the bodies are burned, in order to give them some chance at redemption; they do not like it because it interferes with fighting.
* Imperial Guard veterans have a term for new recruits: "fungs", from FNG (
* Imperial-I-Class Star Destroyer has an overall crew of 46,785 individuals, including a troop complement of 9,700. This is the smaller 'Standard Star Destroyer', which is 1.6 kilometers (or one mile) long. In addition to the crew it carries a complement of smaller ships and ground vehicles. In earth terms it could be compared to a whole carrier group, rolled into one ship.
* Imperial Intelligence (military) and the Imperial Security Bureau (political) are the Empire's two main secret police organs, often at each other's throats. The latter is also
* Imperial in that while it does occasionally have some nuggets of useful information, such as how to strip and clean your gun, a startlingly (or hilariously) large amount of it is propaganda and outright lies:

* Imperialist at works that originate from countries with a lower age of consent or less liberal views.
* Imperial Japan. After the war, they were 'civilianized' but were still given the task of protecting the Imperial family, the family's properties, as well as being the firemen in the palace grounds in case a fire broke out.
* Imperial Japan controls Indochina, Indonesia, the Philippines and most of the Pacific islands.
* Imperial Japanese military, in large part due to their brutal discipline and rigid stratification between enlisted and officer ranks. Imperial officers and NCOs were supposed to make their men fear them more than they feared the enemy. This tended to backfire in the Air services because the more experienced enlisted pilots would simply abandon officers that they didn't like; actual fragging was normally unnecessary since being alone in a dogfight usually meant you were dead meat. According to one surviving enlisted pilot, unpopular officers "often failed to come back."
* Imperial Japanese Navy ordered simple armor plate welded in around the interior of the cockpit. They were a minority but towards the end, the only ones left. Perhaps uniquely for the concept of Ace Custom, they performed worse than the basic model... but were more likely to bring their pilots back to base.
* Imperial Japanese soldiers only really started to surrender to British forces in appreciable numbers once forced back onto the Sittang River in Burma. British soldiers bottling them onto the river to keep them trapped there have vivid recollections of the screams as they tried to cross the wide river, swollen by monsoon rain, and full of crocodiles.
* Imperial Japanese surprise-attack upon the United States' Pacific Fleet through civilian channels. By the time they got it, a day late, half the fleet was underwater and the Nipponese were long-gone.
* Imperial Japan, it already had Korea and a chunk of China. During the war, it gobbled up the rest of China and most of Southeast Asia (Thailand was part of the Axis, so it didn't get conquered). Unsurprisingly, after the war, it lost everything sans the homeland.
* Imperial Japan — since Tokyo was on the coast, it would have been too risky to leave the central apparatus of the Japanese government there in the event of a US invasion. Construction began in November 1944 and it was about 75% complete when Japan surrendered the following August.
* Imperial Japan mistreated Allied POWs, or just stood by and watched the abuse, was because anyone helping out, or even sympathizing with, them was seen as fraternizing with the enemy, a shameful crime that often carried a similar punishment that was doled out to the prisoner.
* Imperial Japan's department of biological and chemical warfare research is called the Epidemic Prevention and Water Purification Department.
* Imperial justice is usually extremely fast, but anything that can't be resolved by crushing somebody's head with a shock maul on the spot can take centuries or millennia to get resolved, with punishment doled out on the criminal's distant descendants.
* Imperial Legion. Imperial soldiers, who now technically report to you, will still treat you like you're a new recruit. You do at least get to get away with being out of uniform if you outrank them.
* Imperial Legion. Plenty of other military forces throughout Tamriel are known to employ Healers as well.
* Imperial Legion. They almost exclusively make up the guard units in Cyrodiil itself, capital of the Empire, but also serve as the guards of Imperial settlements in the provinces.
* Imperial Legion was in training to become an Imperial Battlemage prior to the events of the game.
* Imperial Living Saints, the Emperor's rough equivalent of a greater daemon, are people canonized as Saints in the Imperial Church and have been resurrected when the Imperium needs them most. They even have a gameplay mechanic for coming back from the dead.

* Imperial March, the main theme of the Empire in general and Darth Vader in particular.
* Imperial Navy, the Imperial Army - as it was known at the time - was split into the Guard and the Navy in order to insure that no man commanded both fleets and armies.
* Imperial Navy when Vader's shuttle is approaching and the Empire is evacuating the Death Star II.
* Imperial Order, the only continuous spell negation trap in the game. Its intended downside is that it has a maintenance cost that you have to pay 700 life points during each of your standby phases or it's destroyed. This, however, wound up giving the person using it the option to cancel its effect before their turn really starts, allowing them to play their spell cards when they want to after denying the opponent the chance to play theirs. As spell cards are an important resource to the game (especially in spell based decks), this card gave a massive strategic advantage to the person playing it, resulting in the card being banned initially. Eventually it was given an errata that makes the cost mandatory, thus downplaying the awesome part.
* Imperial power armor often show both at once. It's usually decked out with
* Imperial Psykers also make use of a multitude of cybernetics just as normal humans do. There is even some specific cybernetics that only benefit psykers, such as 'Psychic Hoods' and 'Psy-Amplifiers'. In fact, one of the Gaunt's Ghosts novels features
* Imperial psykers are often accompanied by a familiar of some sort that boosts their psychic abilities. These range from cybernetic and cloned birds (usually in the form of ravens or two-headed eagles) to the more macabre Cherubim (cyborgs built from vat-grown infants who have mechanical wings and propulsion devices installed) and Servo-Skulls (skulls of particularly loyal servants of the Imperium fitted with an antigravity generator and a machine spirit so that they can continue to serve even in death). To be used as a familiar, all of these are a specialist variants of otherwise common technologies (perhaps with the exception of the psyber-eagle) and are rare and to expensive to make, meaning only the wealthiest or most connected Imperial servants get to make use of these.
* Imperial Radch by the hijacking, but it takes a few weeks for the remnants to fade entirely. When Tisarwat is briefly implanted and later rescued, she sees herself as a new person entirely, albeit one with the original's memories.
* Imperial Radch implants let him control a small fleet of them at once with enough precision to give a friend a good haircut, which the protagonist Ingray finds endlessly disturbing.
* Imperial Radch. In-universe, Radchaai are known for referring to people as female unless told not to, and Breq struggles with gendered languages because she doesn't really understand how to identify someone as male on sight. Out-of-universe, it did originally default to a gender-neutral "he", but that just meant it read like any other sci-fi, so Ann Leckie changed it.
* Imperial Radch, it's implied to be the warships' primary weapon system.
* Imperial Radch. It's not a sign of dystopia — given that the Lord of the Radch can order summary executions on a whim, the pretense of euthanasia would hardly be necessary.
* Imperial Radch of the Radch doesn't even have a societal concept of gender; since the viewpoint character is Radchaai, most characters are never explicitly gendered or sexed. One Radchaai character is outright confused at how another culture seems so fixated on which genitalia people have.
* Imperial Radch of the Radch runs the gamut of assimilated planets and peoples, upper-class Radchaai culture views pale skin as somewhat unfashionable, so there is some social pressure to have it darkened.
* Imperial Radch series, Radchaai always wear gloves in public and are moderately scandalized by people who go around bare-handed. At one point, Breq offers to buy a pair for a self-conscious acquaintance but is quickly told that it would be seen as inappropriately intimate to do so.
* Imperial Radch series, where the Radchaai empire is tremendously advanced and

openly devout. Its (massive) military names all its spaceships after deities and has daily religious observances, and the Radch religion adopts the local gods of conquered peoples into its pantheon to smoothe their assimilation.
* Imperial Radch that shares its name exists primarily to protect it. Radchaai citizens outside the Dyson sphere don't know any more than that.
* Imperial Radch" through which ships can safely travel. Radchaai military vessels can open temporary wormholes into gate space, but it's riskier for them to travel that way than through stable routes.
* Imperial Radch to serve as a diplomat, and they seem not to have taught her the human concept of condiments.
* Imperial Remnant, came to the conclusion that the Empire would only survive to rise again if he made peace with the New Republic, so he sends a trusted underling as an envoy to meet with the general he respects most. A Moff's consternation at this and someone finding a corrupt version of the Caamaas Document kick off the events of the Hand of Thrawn duology.
* Imperial right after the dedicated shield generators were destroyed-again by small fighters.
* Imperial Russia had the knout. Technically this is just "whip" in Russian, but the brutality of serf flogging with this whip lends the term infamy. Particularly notable was the "great knout," which was an especially large, heavy, hard whip designed to inflict maximum damage. Where most floggings had to get into triple-digit strokes to threaten the victim's life, the great knout was known to kill with as few as twenty strokes - allegedly by
* Imperial Russia; they would be sent in cantonists' batallions, where they would be subjected to brutal training and forced conversion until their 18, when their 25 years term of service would begin.
* Imperial Saints' dedication to the Emperor and acts of Faith in his name actually have managed to save the day for the Imperium on more than a few occasions when all seemed lost. This is actually a game mechanic for some factions, which allow the player to pull the imperial equivalent to some warp powers.
* Imperials are outclassed in just about every skill category by at least 2-3 other races each, however, they also lack the
* Imperials, changes some Latin last names to Italian ones, reflecting the real-life evolution of language.
* Imperial Security Bureau recruits them to help found and train the incarnation of the 501st Legion that Unit Aurek-Seven belongs to.
* Imperial Servitors are this to any Techpriest. Their biological components are more or less used to support their technological ones, rather the other way around for conventional cyborgs.
* Imperials for the Mer) each with enough similarities to to fit within the category, but many differences as well.
* imperial soldiers) who got into Creation, and were later repurposed to hunt down the beings who formerly ran the show.
* Imperial Stormtrooper Marksmanship Academy always hit their mark, the hero would be dead and the story would be over.
* Imperial stormtroopers seem to serve as this in the films, as they're not just elite troops but are also an ubiquitous sight within the Empire's cities and space stations, keeping their "order" (the name comes from the Nazis, with the SS having the same dual roles, albeit in separate branches).
* Imperial tanks and other ground vehicles don't derive any particular special rules from the practice, but it's still mentioned from time to time in the fluff (such as the "Vixens", a tank unit from
* Imperial TIE Fighters, with their spherical cockpits bracketed by vertical wings, are referred to as an "Eyeballs" by Rebel pilots, while the TIE Interceptors' inwardly-canted wings lead them to be called "Squints." TIE Bombers are "Dupes" due to their double-fuselaged design, TIE Advanced and other special models are "Brights," and TIE Defenders are "Trips" for their triple wing-bases.
* Imperial Titans, which they use to punch stuff with. Generally it's used against other titans, but on occasion they are known to punch the poor sap 3 feet from

their toes. Khorne Lords of Battle wield massive Great Cleavers, which are massive titan-scaled Chainaxes. Ork Stompas have similarly large chainsaws to Titans, albeit much more crudely designed.
* Imperial to intimidate in true Imperial fashion while being economical and standardized enough to form the backbone of the fleet.
* Imperial Triumphant: Avant-garde black metal act with extremely prominent jazz and modernist classical influences and musicians who are all schooled in jazz and still play it on the side. Current drummer Kenny Grohowski also plays in the current lineup of Brand X and is a regular
* Imperial Truth to the Chaos Gods, and the alien conspiracy called The Cabal genuinely believed that getting Horus to make humanity self-destruct in The Horus Heresy would cause the Chaos Gods to starve to death. This is in spite of the fact that Chaos has existed long before humanity has been around, most of the gods themselves having been around since well before humanity's rise on the galactic scene, and at least one was birthed by the collective hedonism (not worship) of an entirely different species.
* Imperial war criminal Kardue'sai'Malloc (the horned alien in the Mos Eisley cantina) is an obsessive collector of music: not only does he own a treasure-trove of rare recordings, but he spent many years following some of the greatest musicians of the age in the hope of attending a performance, and only settled on Tatooine when the artist he'd been hoping to witness there was arrested and executed. After being captured by Boba Fett, Malloc ensures that his collection is donated to a museum.
* Imperial which lean closer to works of architecture than pieces of furniture.
* Imperion. Oh, sure, you can play your game for free, if you want to be raided ceaselessly and smashed into the ground by the three guys in adjoining systems who paid so that they could have increased resource production, instant building, additional building slots, and cheaper auto-trades. Basically, free players exist only for the pay-players to prey upon.
* Imperious, as befits an avatar (or whatever) of Zeus, can hurl lightning bolts where he wants them to go.
* Imperishable Night. As the Magician Team (Marisa and Alice), tapping the focus button with the right rhythm allows both characters' attacks to be active simultaneously. This bug doesn't break the game, but rather moves the ridiculously underpowered Marisa/Alice team's damage output to top tier.
* Imperishable Night blacks out most of your screen during her last few spellcards. One of her explicitly stated powers is causing night-blindness in humans.
* Imperishable Night, but probably fits the hare archetype best: her escape from the moon war (flight), her alliance with the exiled Lunarians at Eientei (cleverness), and her insanity-inducing gaze (mystery).
* Imperishable Night Drones, which are explicitly named "Familiars" - all youkai characters have one or two, but only one human, although the other humans have abilities to compensate. Enemy fairies and bosses may also use Familiars, which youkai can see through and shoot through - humans are out of luck in that regard, but they can still destroy them for Time Orbs.
* Imperishable Night ending. The true final stage itself can't be reached if you continue, and gives you the bad ending if you die on it.
* Imperishable Night: Reisen Udongein Inaba, Keine Kamishirasawa, Eirin Yagokoro, Kaguya Houraisan, and Fujiwara no Mokou.
* Imperishable Night series. In order to avoid discovery emissaries from the Moon, lunarian refugee Eirin Yagokoro hides the Earth in a magic pot with a fake sky on the inside. She then hides the pot in her home of Eientei. Which is on Earth. Which is hidden in the magic pot.
* Imperishable Night, she's Reimu's pairing and thus a playable character.
* Imperishable Night the Stage 4 boss is either Reimu or Marisa, the two standard protagonists, who will blame you for the current incident and attempt to stop you.
* Imperium as whole is definitely a lot more scarier than it sounds in a setting like 40k.
* Imperium board wargames, but this one is notable for historical reasons.

* Imperium doesn't seem to make it work with the Tau Empire. Imperium wins most major military engagements, but Tau get more and more ground by diplomatic means and by attacking poorly defended regions when Imperium is sufficiently distracted. Also Tau technological growth easily outpaces the Imperium's one (which used to surpass the Tau before they
* Imperium Galactica can no longer be directly controlled. Instead, the player can adjust the Attack-Defend behavior scale. However, fighters are also almost useless in this installment. The first game focused the fleet on the flagships, a special class of powerful ships that were the only ones who could carry invasion forces. The sequel removes the flagships and instead allows each capital ship to carry a certain number of tanks.
* Imperium Galactica has 2-D space in both the galactic and battle mode. The sequel adds 3D visuals to the battle mode, but the galaxy is still 2-D. The only things not on the plane during battles in the second game are ground-based weapons. The only effect this has is that only capital ships are able to attack them (and vice versa).
* Imperium Galactica. This is averted in the first game, which appears to be set in a different universe.
* Imperium Galactica you can use Genesis-type devices on planets that explosively terraform them to your civilization's needs.
* Imperium has FBI agent Nate Foster shaving his head to go undercover in a Neo-Nazi group.
* Imperium III reduces the health of units and eventually kills them unless they are routinely provided with food wagons. In the Egypt scenario, several places in the Nile Delta carry malaria and will also damage your troops if you march them through there, and keep damaging them after.
* Imperium: In order to travel at FTL speeds, starships had to use hyperspace jump routes between stars.
* Imperium Nova allows you to arrange marriages between members of your house and those from others. The lower status house gains status from the marriage and the higher status house often loses status but dowries can be offered to soften the blow. It also decreases feud score.
* Imperium Nova features a news crawl across the top of the page displaying the three most recent galactic events. Elections, natural disasters, weddings, wars, assassinations...
* Imperium Nova has a mechanic for houses to fund piracy around one or more planets, it is frequently described as being "broken".
* Imperium Nova has the player's houses operating in one, at least in name. Gemini has at least seven, plus an Alliance. And Capricorn's empire broke up after reigning for 380 years, and six houses have formed their own "kingdoms", though at least one has ambitions of restoring the empire.
* Imperium Nova has this by default, but some players choose to role-play their houses as aliens and, in one case, a game administrator orchestrated an alien invasion of a galaxy.
* Imperium Nova Houses can fight each other, but they can't have battles on planets under Imperial Jurisdiction unless the attacker has feud points against the defending house or one of them is a "Renegade", breaking that rule automatically gets your House declared Renegade and thus open game for every house in the galaxy.
* Imperium Nova, houses gain feud points against other houses who offend them via insults, ignoring monopolies or trade restrictions, destroying facilities, or assassinations. Feud is required for houses to attack one another on planets under imperial jurisdiction and is expended with every successful assault. It's not unknown for players to intentionally insult one another so the mechanical feud can persist as long as the RP one.
* Imperium Nova: Houses that operate in the Military sphere can hire out their military units as mercenaries, and they can specify which House can hire them if they don't want them used against them, or want to use a weaker House as a proxy. They don't take time to train and use the tech level of their founding House, but they cost anywhere from 10 to 250% more than training the units yourself.

* Imperium Nova, on the grounds that it results in a number of abandoned accounts and the game is almost entirely player-created.
* Imperium Nova: Psionics are a sphere that houses can operate in, their main use being counter-espionage. What exactly it entails varies a lot from galaxy to galaxy.
* Imperium Nova's whole schtick. Each player controls a feudal house with operations spanning several planets in a galactic empire theoretically under the rule of an imperial house. Though planetary governorships are elected.
* Imperium Nova system. When one House engages in actions against another House such as withholding taxes, insulting dynasty members, espionage (and are caught), or attacking facilities; the offended House gains feud points that can be spent attacking the offender. If a House attacks another House, on a planet under Imperial Jurisdiction, without feud the Emperor declares them a Renegade, which allows every other House to attack them with impunity.
* Imperium Nova uses a 400-day calendar with ten months to keep things simple. Each galaxy numbers years based on the ascendance of the current Imperial house, which like the Japanese system can make long term dating difficult in certain galaxies.
* Imperium Nova, you don't really need to subscribe to play, but you can only operate in up to two socio-economic spheres if you don't. With a monthly or tri-monthly subscription you can operate in up to seven (depending on status).
* Imperium of Man will also try to kill everything on a planet, because it's easier to eat them and harvest their biomass in that manner.
* Imperium's to end the devastating civil war. In the four thousand years since then, the Imperium has all but destroyed itself waging penitent crusades to atone.
* Imperium stories, where the "Maxoni-Cocini drive" allows access to parallel timelines - but at the risk of destroying one's home time-line in an unspecified chrono-nuclear disaster. In fact, our Earth is in the middle of a Blight made up of timelines where the M-C drive went horribly wrong.
* Imperium that he is "too squeamish" to even watch others fight, much less fight himself. This sometimes makes him look bad and earns him a tongue-lashing from Quintus after Quintus, who unlike his brother fought at Pharsalus, learns that Cicero is giving up.
* Imperium: The film revolves around an FBI operation to find out if white supremacists are planning an attack. It's eventually learned some are.
* Imperivm franchise follows the already common trend of portraying almost everybody in Carthage as black people, most egregiously the Numidians.
* Imperivm has your units march in formation when attached to a hero but as soon as they meet an enemy in combat they devolve into a mob.
* Impersonal contains a short routine ("Cherry Picking") that quickly turns from the concept of a "migrant farm worker fantasy camp" into a meta exercise in seeing how long the gag can play out.
* impersonates him in order to have an established background and history in that reality and hide his identity from any magic-users who might cross realities in search of him.
* impersonate warped back to the late afternoon of December 6, 1941, just west of Hawaii...
* Impersonating Amber-Amber (Gary's favorite porn star) even got Gary to make out with him under the pretense of Dillon helping Gary learn how to do it right, albeit to no apparent lasting effect on Gary's sexuality or attitude to Dillon.
* Impersonating an Officer a cop in order to commit crimes while disguised.
* Impersonating an Officer: A criminal disguises themselves as a police officer to covertly commit crimes. Note that the act of pretending to be a cop is also a crime itself.
* Impersonating an Officer: Pretending to be a police officer as a cover for criminal activity.
* Impersonating an Officer: The character pretending to be an official dresses appropriately for the role they are claiming, and actually says that they are a police or other Law Enforcement official.
* Impersonating an Officer: When a criminal disguises themselves as a cop as a

cover for their actions.
* impersonating Bruce Wayne) in the back as they flee and claiming self-defense, or gunning down the attacking zeppelin and becoming an even bigger hero and celebrity to Gotham. He starts gunning the blimp.
* impersonating Mystogan — including his magic. The fact that he's using illusion magic is itself an illusion!
* Impersonating the Evil Twin's words don't appear to be about this trope.
* Impersonating the Evil Twin: The hero pretends to be their evil twin.
* Impersonation-Exclusive Character: All or almost all knowledge of a character is gained through their impersonator.
* Impersonation Gambit: The hero tries to infiltrate the villain's organization by passing themselves off as one of the bad guys.
* impertinent colonials rebelled against the British Crown The rest is history.
* Imp has her house burned down after a priest visits her home town and convinces them she's a devil worshiper.
* Impire by the representative of FAKE, the Federation of Abysmal and Kataclysmic Evil. FACE just didn't work as an acronym.
* Implacable Man feels nothing. In response, Joe bites the trap with his just-as-sharp teeth, sending it whimpering away like a dog.
* Implacable Man Not only does Broly seem unaffected, he sneers and says, "What the hell was that?"
* Implacable Man: There's no stopping this guy from coming to you, when you happen to be their target.
* Implacable Man. They repeatedly manage to wing each other, escape, take cover and perform horribly squirm-inducing self-surgery on their wounds before limping back into their game of cat-and-mouse.
* Implacable Man who cannot be easily stopped or deterred by anything until they achieve their goal.
* Implacable Man, who never drops that creepy smile of his, not even when his face is splattered with blood or when he's being shot at.
* Implacable Stalker, allowing them to be reborn from their victims nightmares.
* Implacable, who plays Cameron, that might not have been simulated...
* Implacable Woman you'd expect. Likewise, she's every bit as nimble as you'd expect, so she's not too difficult to deal with if you know a good banishment spell.
* Implanted RFID chips/tags are often used for identifying pets, livestock, or highly endangered animals since they are unobtrusive and unlikely to fall off or break like collars or bands can.
* implanted with a bulky artificial heart unit. Her only friend is the hospital handyman Mr. Razor, whom she glomps when he finally agrees to help her escape.
* Implanting these tadpoles into humanoids like humans or Drow results in standard Illithids, but other victims result in variant creatures with Illithid features.
* implant memories easily by the hypnotist (accidentally usually), making these suspect at best without some independent evidence (which is generally lacking).
* Implausible DeniabilityA character consistently denies doing something, even despite incontrovertible evidence.
* Implausible Deniability at a number of American Congressional hearings. Refusing to answer or being caught lying can have serious consequences, but it's more difficult to prove someone doesn't remember something. Consequently a number of to-remain-nameless officials over the years have gone before Congress and the nation and mysteriously forgotten what should be quite memorable actions, people they've met, things they've talked about, and policies of their own department. In some instances these performances would, if taken at face value, raise serious concerns about the mental competence of the individuals in question.
* Implausible Deniability: Claiming to be innocent when you're obviously guilty.
* Implausible Deniability: Denies something even in front of unquestionable evidence.
* Implausible Deniability: Denying something when evidence to the contrary is right in front of the denier.

* Implausible Deniability: Someone claims they didn't do something even though it's very obvious that they did.
* Implausible Deniability: The exposure of some truth comes before the actual denial.
* Implausible Deniability to hide the fact that his house has caught fire from Superintendent Chalmers:
* Implausible Fencing Powers: Anyone who wields a sword or saber will have this.
* Implausible Fencing Powers: Where swordsmen can do insane things with their swords, like deflecting bullets or cutting clothes to pieces without touching skin.
* Implausibly, Garnier started marketing a hair-styling range called "manga hair" around 2005 or so, complete with commercials full of bounding Goku-coiffured gents and ladies.
* Implementing the Incomplete: When a work is forced out before it is either complete, made to work reliably, or polished enough to look good.
* implication being that the only source of income for dermatologists are helping people getting rid of wrinkles instead of, you know, ACTUAL health problems regarding the skin.
* Implications now hit that the band's self titled album will focus on
* implications some humans (particularly with "roborats" whose behavior can be controlled by an implant in their pleasure center, and a few roboroaches that can apparently directed completely by remote control), it's not clear whether the critters themselves feel any different. Of course, we can't exactly ask them. In the interests of potentially freeing stroke victims, it's worthwhile research.
* implicitly: If the forces of darkness are invading the realm of light, that's a worse state of affairs than if they just stick to hiding in the shadows and prey on those who enter those kind of places.
* Implicitly, thanks to his job as top enforcer and commander-in-chief of a galaxy-spanning totalitarian empire, Vader has tons of
* Implicit Prison: A setting is treated like a prison, even if it's not explicitly called a prison.
* Implied about Stanton Parrish, who has a form of immortality. He records all his memories using an Alpha named Mitchell (long story short, Mitchell is sort of a living journal). It's suggested that he does this because he's lived so long that he can't hold onto all of his memories.
* Implied. According to the backstory she tells to Prince Dastan, she is descended from a girl who managed to prevent the gods from destroying all of mankind through the wish of her pure heart that humanity would be spared.
* Implied after the eponymous duo plays baseball indoors and destroys the living room:
* Implied again in the April 4, 2012 strip when Garfield scolds Odie as the dog walks by
* Implied allows Shepard to supply the response. Vega comments he didn't think an officer would know that one, suggesting Shepard may have spent time in the ranks.
* Implied and Invoked by Kozuki Oden, Daimyo of Wano. It's not openly said how he died, but a flashback conversation has him goading his captors into boiling him alive. After all,
* Implied) and less usual (tick) animal suspects show up... and a cat.
* Implied Answer: They don't answer straightforwardly, but you know what the response is.
* Implied. Apparently that part of her family has been in the Andorian Imperial Guard for centuries.
* Implied as far as Flynn and Lora go. Flynn was in no hurry to grow up and take responsibility. Lora had completed her doctorate and was looking for stability while she focused on her career. Flynn is clearly not over her in the film, but Lora moved on with her eventual husband, Alan Bradley.
* Implied," as the singer admits he's "been doused in elixir to numb my pains."
* Implied, a trope is implied when it is not explicitly present in a work but is suggested to have occurred offscreen.
* Implied at the end of the Doby Gillis story "Her Face Was Familiar, But...", in

which Doby is constantly interrupted every time he tries to find out the name of the girl he started dating (she doesn't realize that he hasn't learned her name, and he's too proud to come right out and ask). He finally gets his chance when they go on a date to the radio studio, and he's chosen to participate in a trivia contest. He lets her take his place so that he can hear her give her name at the end, even though he is very upset to learn that not only was the trivia on a topic he knew very well (the meanings of names, of all things), but the prize money was triple what it normally would have been. He's still cheered up when he learns that her name is Mary Alice. Then, he takes her home and she gives the last line of the story:
* Implied. At the end, the homeless man is revealed to be Tawky Tawny, a shape-shifting spirit who works for the Wizard.
* Implied between Craig Boone and Manny Vargas. When Boone's wife went missing, Manny could barely hide his joy, leading to Boone ending their friendship. Conversation with Manny (particularly if the player has the Confirmed Bachelor perk) shows that Manny was always jealous of Carla (and her generally unpleasant demeanor didn't win her any favors), though Boone is apparently unaware of his true feelings.
* Implied, but not executed, later in the episode: Rocko crams a gigantic pill down his throat, though he's still not feeling well. He checks the label on the back of the pill's container, which reads... "Warning: Not to be taken orally".
* Implied by Decapodians, as Zoidberg describes himself as "Norm and Sam and Sadie's boy." Then again, a previous episode seems to indicate two parents who
* Implied by Kaiba's goons when Yugi's grandpa asks what would happen if he should refuse Kaiba's offer to duel.
* Implied by ruling the death accidental, John snarls that they're scared to death, to which Al replies that one can hardly blame them.
* Implied by the ending of the bonus chapter (only found in the collector's edition of the game) of
* Implied could have survived getting shot in the head, which should have been fatal. However, the musician refuses to answer.
* Implied Death Threat: Don't get in my way again, unless you want me to send you to join the choir invisible.
* Implied during a skit that appears if you go too long without cooking anything, Estelle mentions noticing a steak on Repede's back.
* Implied during the famous "Under the Sea" song as well, when Ariel briefly tickles a
* implied expected to be resurrected and galactic status quo restored. The original endings can still happen however if the player doesn't prepare enough for the final battle.
* implied explanation has absorbed this into canon on account of "making sense" and there are several books set during these events, but many fans dislike it for diminishing the beautiful conclusion to the Second Doctor's story, being improbable based on what we actually see in "The War Games" and being rather unnecessarily cruel, forcing the Second Doctor to go through the pain of losing his companions again.
* Implied for both the concurrent "kill the Nazi high command at a film premiere" plots in
* Implied. Gianna D'Antonio speaks to John in tones almost like a pining ex-lover when he arrives to assassinate her, and asks for the name of "this woman whose life has ended my own" in reference to John's deceased wife Helen (the destruction of keepsakes from her having started this whole mess).
* Implied. Hassan, a Pakistani engineering student in Paris, is kidnapped by the CIA on suspicion of terrorism, then sent back to Pakistan. In prison, he is brutally tortured, though released when his interrogators learn nothing. When we see him next, he's sneaked into the US and plotting to blow up Grand Central Station.
* Implied has this too. She dates every attractive or popular boy possible but is never seen physically affectionate with them, and in one episode claims she won't

slow-dance until the fifth date. She was also extremely freaked out when she thought that Daria and Tom actually had slept together.
* Implied have historically been interpreted as not protecting people who have already broken them.
* Implied in a joke involving a particularly unpopular village head: One day, while he was walking around the village at night, a young man bumped into him, and claimed that he couldn't see him because it was too dark. The next day the head passed a rule saying everyone walking on the streets at night must carry a lantern. That night, the same man bumped into him again, and showed the lantern to the annoyed village head and pointed out that
* Implied in an ad for Invisalign Teen. Twin teenagers both need braces; however, their parents get Invisalign for one daughter and regular braces for the other.
* Implied in another episode, where an incarcerated Birdman is shown in a montage being married to a fellow inmate. While the whole ordeal is revealed in the end to be
* implied incestuous willing to see her die, as it would be a "pain in the ass" for him to try and make another like her, and she's a unique design besides. Nemu sees this as Mayuri's version of "compassion".
* Implied in chapter 4, which identifies three children of Adam and Eve: Cain, Abel, and Seth. After Cain kills Abel, Cain moved east to the land of Nod, where he married someone and had at least one son, Enoch. The identity of Cain's wife is a matter of much debate, along with how he and Seth managed to populate the Earth on their own. Explanations include the following:
* Implied in Claudia's first episode after she breaks into the Warehouse to coerce Artie to help her save her brother (as in, she knows about the Warehouse and now we have to do something about it). They seem like the kind of folks who consider death to be a (albeit viable) last resort, though, and Claudia ends up joining the team.
* Implied in "Explosion" by Zolita. It's about a woman who is in love with her female best friend, who is in love (and possibly dating) a guy.
* Implied in "Mirror, Mirror". Kirk shows more softness than one would expect toward the Mirror Spock, who (despite being better than Mirror Kirk) is as ruthless as one would expect from the Mirrorverse. This probably has something to do with
* Implied in "Mom's Flowers", where the presence of lilies brings back old memories before the flowers get changed to the chunk of wood neighbor chopped much earlier in the story.
* Implied in "My Pretty Seahorse" where two fish think a seahorse is a mechanical kiddie ride, so one takes a quarter claiming he's found the 'coin slot' and... yeah.
* Implied in Ned Stark's speech to Bran after executing Will the deserting Night's Watchman in
* Implied. In one colorspread page, there are a shot of many of the current (and some ex) high ranking Marines' younger selves as foot soldiers.
* Implied in the April 3, 1991, where Garfield gives Jon a ball of yarn.
* Implied in "The Ark in Space", where Vira, a far future human with quite an alien mindset, immediately explains to the Doctor and his companions that the Ark leader's nickname Noah was taken from "mythology", as if expecting them not to know.
* Implied in the episode "True Q", where Amanda tells Q that when she practices her teleportation, she always ends up somewhere she doesn't want to be.
* Implied in the first mission in the same game, however, where you get a storage device from a hostage, and when Sam asks how he hid it, he says to "just wash your hands when you're done with it."
* Implied in the French film "Le Grand Chemin." Martine (who shows her panties frequently in the film as she's wearing a dress) and her pal Louis are crouched down on the ground, when Martine sees Louis looking at her.
* Implied in "The Golf War". Surly teenage troublemaker Robbie is chased off the local mini-golf course for spraying graffiti, and makes "lewd hand gestures" at an employee from off-screen.
* Implied in the Halloween party arc when Paige stands up to two party crashers

who were prepared to kill Peter for not having beer at the party:
* Implied in the May 16, 2011 strip when Garfield once again finds himself up a tree.
* Implied in the relationship between romanced Garrus and female Shepard in the
* Implied in the "R.I.P." Remix by Young Jeezy (feat. YG, Kendrick Lamar & Chris Brown). Precisely YG's verse:
* Implied in the song "I'm your Mailman", where every verse is a double entendre.
* Implied is a bicycle-wheel-style design with buildings built along the interior rim.
* Implied Love Interest: A character acts like a love interest, but it's unknown if they're really in love.
* Implied Love Interest DLC, if Shepard is not in any relationship (or is in a relationship with a non-combatant character like Kelly Chambers or Samantha Traynor) Liara will come to rescue him/her from the mercenary attack instead of the Love Interest.
* Implied Love Interest. Even though choosing Chrom's wife is optional, the game's mechanics and her extra scenes (one even titled "lovebirds") does push you to choose Sumia, and she's the only one who receives a cutscene for the proposal, not to mention she has an extremely shallow pool of potential suitors to choose from (Chrom, Frederick, Gaius, Henry, and the Male Avatar). However, she vanishes from the narrative after Lucina joins, instead just becoming just like any of the other units.
* Implied Love Interest - Someone has a lot of love-interest-related tropes, but we never see anything romantic around that character.
* Implied Love Interest: Two characters seem to have an interest in each other, but it it implied and not pointed out.
* Implied, saying it's supposed to be "made porn" or "made a porno". When the priest exclaims "Oh God! Have I been saying it wrong this whole time?", two altar boys nod in affirmation.
* Implied. Several countries are gearing up for war and there are a great deal of powerful magical artifacts to uncover. Whether the trope is played straight is up the DM, of course.
* Implied Spaces features 'Zombie plagues', nanotechnological infections that drive victims into a murderous rage, and rewrite their brains so they can't be in any other state.
* Implied Spaces scarcities remain is in pocket universes dedicated to games and historical re-creations, where artificial scarcity is part of the rules.
* Implied Spaces, the protagonist's sword, Tecmessa, has the ability to send his enemies to a sealed pocket universe.
* implied speciesism in calling aliens inhuman, while the aliens skipped all the bother and just called them humans. Except for the Spathi, of course, who continually refer to them as "Hunams".
* Implied states that whenever it visits a farm, a Dubwool mysteriously vanishes.
* Implied story, he of course thinks it is a sign that he is going insane.
* Implied strip. The actual results only appear as bonus material in the print collection.
* Implied the Coo-Hatch, a vaguely-humanoid race from another universe, are always accompanied by weird little flying insects. The human protagonists suspect that those might be young Coo-Hatch.
* Implied) the entire promotion. The story was she had shown these tendencies since she sought out a wrestling school at 13.
* Implied then subverted in "Conrad the Sailor." Conrad just finished mopping the ship deck then looks down. Slowly he angrily looks up towards a smug Daffy Duck. Pull back to show that Daffy merely tracked his dirty feet on the deck.
* Implied: The trope isn't shown, but the audience is indirectly led to believe that it happened off-screen.
* Implied, though yet to be explained. A number of people show up with no trouble communicating despite having been away for over 4000 years or being from another world. Notably

* implied to an explicit case in the New Who series. The "cross-dimensional" Cybermen were victims of one madman's obsession with "perfecting" humanity, and were only able to survive because of their emotion suppressors; when these were shut down, they invariably killed themselves out of horror at their transformation.
* Implied to be a major factor in Dragon Lady's desire for Pat Ryan in
* Implied to be one of several reasons behind the suicide in "The Ledge" by
* Implied to be the case for any Grey Wardens who want children in the
* Implied to be the case for Birthmothers (surrogate mothers who give birth to all of the community's children). The job is spoken about with some disdain, but as
* Implied to be the case of the world under the rulership of Nicolae Carpathia in the
* Implied to be the case with many outsiders (though not really anyone in the inner circle) in
* Implied to be the case with many younger members of the Port Mafia in
* Implied to be the case with Mr. Bonaparte. He prescribes his patients with "classified" medications, but we have not seen anyone at Napoleon XIV Mental Institution whose mental health has improved under his supervision. Napoleon XIV also has a history of security issues, and he is willing to lie about them to avoid bad press.
* Implied to be the case with the inhumanly strong and almost literally unstoppable
* Implied to be the case with the traitorous Thane of Cawdor, as Malcolm notes to the King that "nothing in his life became him like the leaving of it."
* Implied to be the reason Juhani and Dak Vessar had a falling out. They were both Jedi Padawans, but started to have their doubts about the Order. Dak made up his mind to run away, and tried to take Juhani with him, pleading he loved her. Unfortunately, Dak…
* Implied to be what happens to some Newtypes after death in the Universal Century continuity of
* Implied to be why Prince Schneizel keeps appearing with Nina Einstein in public - as his aide and brother drop very big hints about his true sexuality. Of course, Nina herself is
* Implied to happen with whoever is in charge of the Västerström children in
* Implied to have been the case for Firefly, "the sexiest mare at the Academy," in
* Implied to have been the case with Jessica and her late husband Frank on
* Implied to have happened, albeit not in a specifically Nazi context, in
* Implied to have happened as well in the "A Different Kind of Circumstances" timeline, as Ranma and Shampoo are shown to have married without anyone of their friends knowing until they saw the rings at their fingers.
* Implied to have happened between two nebbishy humans and two female
* Implied to have happened to the Kamen Rider Base on Ventara, Kase says in Swan Song that the survive mode cards were the last thing she grabbed before Xaviax destroyed their base.
* Implied to have once been the case with Pearl. Pearls are little more than servants on Homeworld and it seems to be par for the course for other gems to treat them as lesser beings. The Crystal Gem Pearl was the personal servant of
* implied to let him down gently, since she's got a massive crush on Hawke.
* Implied Trope series but later explained. The United States of North America is made up of the USA, Canada, Mexico, and several smaller countries (Guatemala is mentioned by name). At the same time, these nations retain a measure of autonomy, as several ships are mentioned to be Canadian or Mexican.
* Implied Trope": Twilight doesn't even try teleporting out of the crystal cage that Sombra erected around her and her friends, probably because she recognizes it as the same kind of barrier that blocked her power in "The Crystal Empire – Part 2". Instead, they all have to dig their way out.
* implied was this type of book. She would tell them, for instance, that spiderwebs for healing had to be gathered at midnight by a redhead. When they laid hands on the book themselves, it just said spiderwebs.

* Implied when Martin mistakes all the Loud sisters for Lincoln's kids; he must have thought that Lincoln's older sisters were younger than him.
* Implied" when she admits she wishes she could force him to be happy. As for the latter, no matter your intentions, you can't force someone to be happy or change their ways, doing so would only make things worse.
* Implied where Biff is shown with the lower part of his body bandaged, and it is stated that he lost his job testing copy machines.
* Implied who's related to the Nuclear Family. Might explain why they don't seem to get along too well.
* Implied with an early captain, that started an assault shouting "If I advance follow me, if I go back shoot me"... And promptly reached the edge of a cliff, under the eyes of his grinning soldiers.
* Implied with another strip that shows a clown being escorted to the electric chair.
* Implied with Archduke Poggle the Lesser, who uses a cane rather than flying and has facial tendrils resembling a long beard.
* Implied with Crystal. She was promised to her half-brother Felton when she was 4 years old, and he's been shown to physically abuse her. Regardless, she loses any sympathy when she chooses to rape Jason in season 4.
* Implied with Gil Graham. Why else would an elderly British man have a pair of horny catgirl twins as familiars?
* Implied with Iriadne Comb-Buttworthy, who writes trashy romance novels in the
* Implied with Maid Marian, as she's shown drawing a weapon to help fight a snow monster. However the monster is quickly destroyed by Regina's magic - and Marian is not in any other battle scenes. Also,
* Implied with Morticia and Gomez. When interrogated, Morticia compliments the turncoat lawyer stretching her on the rack with "You've done this before!" later, when Gomez is freeing her:
* Implied with Pam. While we don't actually see her get raped onscreen, flashbacks to her past reveal she was a prostitute with a brothel where the men in her time were abusive towards the sex workers there. One man even follows Pam home one night with the intent of raping her before Eric saves her life.
* Implied with steampunk cyborg Nazi Kroenen's backstory comic in the
* Implied with the bank employee who racially profiles Erik and Ana, accusing them of stealing the credit card that Chris lent them earlier. His name is Mateo, implying Hispanic heritage.
* Implied with the Detention Kids, given how they all were given detention. Goth-kid exemplifies this the most.
* Implied with the goblin bank manager Glutonia. Alodi references her being an elf only for Meryl Felstorm to reply that she's a goblin, to which Alodi makes a remark about her changing forms every so often.
* Implied with the protagonist in Planet Perfecto — "Bullet In The Gun". In addition to saying
* implies he's doing this on purpose. He gets hit by a ball and is actually injured by it, forcing the team to find another pitcher (who is actually much better) and causing Charlie Brown to worry that he's losing his reflexes. He's nervous during his first game back, but on his very first pitch he's bowled over with his socks, shoes, etc. flying like normal. When Schroeder comes over to see whether he's okay, Charlie Brown smiles up from the ground. "See? I've got my old reflexes back!"
* implies that he did molest children in Africa when he was there as a missionary.
* implies that Sarah may not have been as ugly as Ron claimed she was.
* implies that they do have feelings for each other, but neither of them have really considered it since they're a human and a pony respectively.
* implies what he meant. It's surprising how many people are aware of the two words but manage to confuse them.
* Implosion and then is followed by a credits roll right after the scene of the wheelchair girl who wants to name him since he is amnesiac. We also don't know whether the rest of XADA aliens are still on Earth, although it's implied that they're completely obliterated, while it's not clear that XADA pathogens are

airborne and still on Earth.
* Implosion. In addition to expected conditions like completing the level "naked" (equipping no extra battle gear) or without damage, there are "Zero Knockdown" badges and one badge whose conditions are hidden until you earn it. Badges can then be used to collect rare ARKs or weapons.
* Implosion, there are 2 playable Warmechs in the main story, Avalon (with Jake as the pilot) and Crimson (with Diana as the pilot. Unlockable by collecting medals acquired from accomplishing some missions). Even though you play as Crimson in the gameplay, the cutscenes still shows Avalon only (a.k.a. Jake), while Diana still works as the supervisor in Nightwing spacecraft.
* Implosion use a neural link to download their minds into their WarMechs. The in-game explanation is that since the pilots aren't physically inside their battle suits, they're immune to viral infection from the alien XADA enemies. Too bad the XADA eventually figure out how to hack the link.
* Implying that an elf enjoys heterosexual intercourse is apparently a dire insult.
* Impmon/Beelzemon spends the last half of the third season being eaten alive by guilt for
* Imp of the Undersiders has this as a literal superpower. Her power is always "on," but she normally suppresses it in order to interact with people. When she
* Impondrtables addresses this trope, suggesting it was brought forth to give exercise to a couch potato who has lost the remote. He gets up to turn down the volume on the commercial, but this makes the show too quiet, so he gets up to turn it back up, etc.
* importance), that Harry himself doesn't seem to have any nicknames, as such.
* important band members dead, retired or just not being what they used to be includes the following:
* Important Character, Important Evidence: It's always the protagonists who find the important evidence.
* important crop that has unique attributes. Such flora or fauna could be used for medicinal uses, especially if it's a drug. Then it would be more profitable than a world that exports beef. Such farms tend to be jungle or death worlds.
* Important distinction: an apostrophe is actually an illustration of a speaker "slurring over" parts of a word or phrase: "It's" is a shortening of "It is", with the apostrophe replacing the space and the "i".
* important early cracks by undermining its economic control over black sharecroppers, allowing them to buy goods through the mail on credit without having to go through local, highly segregated general stores. Needless to say, this did not endear the company to many segregationists. Their mail-order competitor Montgomery Ward (which only took cash and didn't let people buy on credit, and thus catered to middle-class white customers) paid people to spread rumors that Richard Sears and Alvah Roebuck were either black or mixed-race in order to discredit them, and many general stores would refuse to sell stamps to black people to let them buy the Sears, Roebuck catalog — leading the company to put instructions in the catalog on how to ask the post office for it directly.
* important evidence has recently emerged. Unwilling to test the process on themselves or their fellow Ancients, the researchers instead used a "lesser" species: humans. The majority of the test subjects did not survive the transformation. When it became clear that the survivors could only sustain themselves by feeding on the life force of humans or (more importantly in the researchers' eyes) Ancients, they imprisoned the newly-created Wraith and planned their extermination, which was prevented by the Wraith escaping and killing their captors. The Wraith Queen Alabaster and Teyla Emmagan, descended from human-Wraith hybridization experiments, can both testify to genetic memories of these events. The Wraith Old One is the only known survivor of the original Wraith and could also confirm through firsthand knowledge, but is unlikely to recognize the validity of this court and more likely to see it as a snack.
* important fact. Specifically, that the woman who Captain America married was Loki's daughter Hela, the Asgardian Queen of the Dead. By the time Steve and SHIELD

arrive on the scene, the HYDRA troops are all dead or unconscious, both Hela and Bucky (her and Steve's son) are totally unhurt, and the Red Skull has had his arms and legs cut off and been stuffed into a trash can.
* Important Haircut: Hair cutting, or refusing to cut it, has had important implications in Chinese culture and history, making this a trope that appears quite often.
* Important Haircut the two of them together, which does not work well with the aforementioned awkwardness. This romantic subplot could've easily been taken out of the game entirely and not have made much difference, considering the game is already dealing with a heavy plot of talking about one's meaning of existence and finding one's spot in the world.
* import antigravity. It brings up the relevant comic in your browser. And in at least one version, "import this" gives a statement of Python programming "philosophy".
* Important Jobs - Possibly off the menu, unless they waive the restriction.
* Importantly, the ChemRail is a very real concept design. It very much does exactly what it is shown doing. At 50+% of the speed of light, things like Concealment, Cover, Steel walls, and the Coriolis Effect (which would make most firearms on Elysium fire in peculiar arcs, like a nosedive into the firer's foot) simply cease to apply. Think .30 caliber nailgun with Electromagnetic assist.
* important that some artistic representations of the act even have the girl giving herself with chocolate poured all over her body. White Day was later invented for March 14, where males "return" the sentiments with a gift of their own. The usual method is that of giving him homemade chocolate and cookies, packaged in an embroidered handkerchief and tied with a ribbon. Sometimes, it will involve a handmade sweater as well.
* Important Things with Demetri Martin sketch portrays a particularly long and redundant chain of deals when a woman goes into labour on a plane.
* Important to note that one of the reasons we have a legal system in the first place is so that we don't have to rely on violence to solve our problems. Yet, Adam, as bee co-counsel, gives in to his aggression and attacks the opposing party with his venomous stinger. He should be disbarred for that. And there is absolutely no way that he would be allowed to sit at counsel table anymore. The judge would probably have to declare a mistrial because of the outburst that occurred, because it's not fair to either party to have to proceed with a tainted jury as a result of Adam's bad conduct in assaulting the opposing counsel.
* Importation Expansion: New scenes are added to a work when it is localized.
* Importation Expansion that mixed up clips from episodes that were unrelated to each other, changed character names and even censored some scenes.
* Importation Expansion: When a movie is imported to a new country, it gets new scenes added.
* Imported Alien Phlebotinum left behind by the Nestene Consciousness during a failed invasion.
* Imported Alien Phlebotinum of UNIT to deal with anything at all without the Doctor helping them, it makes complete sense to resort to drastic measures to ensure the next wandering alien doesn't wipe Earth from the universe.
* Import Filter good, even if they're only being spared the bad stuff.
* Import Filter: The belief imported media is better, when in reality media is only imported when it is of good quality to insure the import sells well.
* Import substitution has another important side: an industrially developed nation, whose products are widely bought around the world, has an additional way to throw its weight around, by initiating trade wars with and imposing sanctions on countries that behave in a way it doesn't like. US in particular has been throwing sanctions right and left, and has initiated a full-on trade war with China, leading the tacit Russo-Chinese alliance to step up their import substitution campaigns.
* imposes restrictions on genetic modification aspects of of Enlightenment.
* Impossamole's power-ups is a can marked with an S, presumably standing for "steroids", that increases Monty's kick power.
* Impossible Bliss is highly eccentric and more obnoxious. Though he's been

arrested numerous times in his Santa Barbara hometown, he's never faced charges in court, because he's the last scion of the family that founded (and still owns much of) the town.
* Impossible Creatures and defense stats in the first place, they fall pretty quickly; however, these towers can't hurt land or water based units.
* Impossible Creatures game wherein you can make an entire army of chimeras from your choice of a few dozen base animals.
* Impossible Creatures, the Tunguska Event was actually the birth of the Sigma Technology; the machine that combines animals.
* Impossible Dreams" by Tim Pratt, the main characters are Pete and Ally. In the short film adaptation, their names have been changed to Daniel (Mitkovsky) and Shiri.
* impossible, during the rooftop standoff at the beginning of the book, all the sight-lines are purportedly consistent with the model.
* Impossible Genius: An genius's intelligence that transcends the normal and is able to succeed at the impossible.
* Impossible Genius, gifted scientist and brave adventurer who has saved the world (and the Brigadier) countless times - and Jo Grant, a ditzy blonde in a miniskirt who's only on the force at all because the Brigadier agreed to pull strings for her rich uncle, and only a companion because the Doctor found her too cute to crush her feelings. Jo is actually quite an effective companion, but she will never be regarded as a high point for the show's feminism (not least because the companions immediately before and after her got their position via their own career).
* Impossible Genius, when it's a character's intelligence rather than their manliness that enables them to do absurd things.
* Impossible Heists has these as the premise of each episode, in which teams of security experts attempt to slip through elaborate security systems and retrieve valuable loot. As a bonus, each episode's heist is inspired by an actual caper, at least in basic concept — e.g. an episode inspired by a famous diamond heist had the teams scaling the outside of a high-rise, as the actual thief did.
* Impossible Heist staged a full-on shirt-ripping, hair-pulling cat fight in a casino, in order to distract a blackjack dealer. It allowed them to switch the cards for a rigged deck and cheat the house.
* Impossible Hourglass Figure: A woman has an unrealistically thin waist as well as unrealistically large hips and chest.
* Impossible Hourglass Figure: A woman has unrealistically wide hips in addition to an unrealistically narrow waist.
* Impossible Hourglass Figure create the visual illusion of him being that much smaller.
* Impossible Hourglass Figure: In reality, the human female figure forms only a slight hourglass, even in the most ideal figures.
* Impossible Hourglass Figure was notorious for her supposedly 16 inch waist (and her photographs were edited to make her waist appear thinner). Queen Victoria's daughter Princess Maud (later Queen Maud of Norway) was another woman famous for her "tight-laced" figure.
* Impossible Insurance: Insurance agents deny claims filed against very unlikely circumstances.
* Impossible Item DropEnemies drop weapons that they could not plausibly have.
* Impossible Landscapes is recommended to throw in completely mundane scenes to contrast with all the insanity going on.
* Impossible Leavening: Too much yeast either makes the food explode, or swells it way too large to be possible.
* Impossible Leavening: Too much yeast means either an explosion or a massive amount of dough.
* Impossible Man one-shot comic book, where the title character is sunning himself on a beach surrounded by practically every major Marvel hero buried up to their necks in the sand, with Impy making a threat to Doctor Doom (who's behind him) that implies he beat them up and did that because they were blocking his sun. There's nothing like this inside the comic, but given the humor-themed stories that are, it

was clearly meant as a joke.
* Impossible Mission Collapse: An elaborate, high-risk plan is concocted by the good guys, we hear all the planning, and then it never gets past step one.
* Impossible Mission games is a genius computer programmer and former university professor. Although he has been unstable his whole life, he officially became criminally insane when a power failure caused the deletion of an artificial intelligence program that he had nearly finished. The player must stop him from hacking into the defense networks of the world's superpowers and starting a nuclear holocaust.
* Impossible Mission. You get infinite lives, but the clock keeps on ticking.
* impossible odds should have died - regardless of how few survive, they wouldn't have without her.
* Impossible Pickle Jar: Attempts at opening a jar or bottle with mixed results.
* Impossible Pickle Jar: Opening a jar or bottle takes serious endurance.
* Impossible Pickle Jar: Pickle jars are real difficult to open without asking a stronger person for help.
* Impossible Spell Card in favor of using cheat items that allow her to replicate the gimmicks of numerous other characters.
* Impossible Spell Card, Seija can equip a toy camera as one of her cheat items. It functions similarly to Aya's camera when equipped as main, and increases Seija's speed when used as sub.
* Impossible Task describing what kind of store he wants him to turn the Goatwich's lair into. His requests are sometimes contradictory and often outright insane.
* Impossible Task ("Go to Hell and come back with a gem from Satan's crown!") his reaction is : "That's all you want from me? I expected something harder."
* Impossible Task: Heracles, David, Psyche, and Perseus faced them in stories from this period.
* Impossible Task—the flat piece of cardboard just can't be folded into a box shape.
* Impossible Tasks the king sets, but in the end rejects the princess for Guilemette.
* Impossible Task to deliver a liver to a hospital in Kensington, London on 28 May 1987; there was no crime to deal with, the biggest conflict came from getting there on time and congestion. Although there was gridlock, the bewildered drivers were not antagonists for the police.
* impossible the enemy navy with its numerical superiority and positional advantage will pound your fledgling fleet into dust before it can even push out of the drydock. If the sea is the only way for you to advance on your opponent, this naturally leads to an unpleasant stalemate at best.
* Impossible Theft: Stealing something that's practically impossible to steal.
* Impossible Thief Emolga to steal Tagg's cynical side. As a result, Nihilist!Tagg was unleashed, and some of the trainers had to fight for their lives while DS went off to find the Emolga and get Tagg's cynical side back so he could be returned to normal.
* Impossible when Fenella tells the circumstances behind her own pregnancy. She slept with her fiancé, hoping that getting pregnant would dissuade Padraig from romantically pursuing her. She succeeds, but it doesn't protect her the way she thought it would.
* impossible, which would normally be a sign of either severe mental trauma or something supernatural... but then, how often does anyone memorize the layout of a hotel?
* Impossibly Awesome Magic Trick." Dirk not only takes this at face value, but is right.
* Impossibly Cool Clothes, but almost strictly done in drawn media, because that kind of outfit can barely even be worn at all in real life.
* Impossibly Cool Weapons. Later on in the Atlas arc it gets another upgrade, able to use Dust to punt targets backwards or create a hard-light barrier that lets it function as a larger shield, hang-glider or parachute. Still not particularly flashy, but it remains versatile and practical.

* Impossibly Delicious Food: Food so delicious that no one can get enough of it.
* impossibly difficult, and important to the game's message - if the Genocide route was any fun, its meaning would be all but lost.
* impossibly good sniper skills are required (Enies Lobby Arc, Dressrosa Arc).
* Impossibly Graceful Giant: Instead of being held by by real-world physics, something huge moves with great speed and grace.
* Impossibly-Low Neckline: A woman's costume has a neckline so low that it's a wonder her breasts aren't exposed.
* Impossibly-Low Neckline: In reality, any outfit that shows that much neckline would just fall off entirely.
* Imposter Forgot One Detail — An impersonator fails to to be convincing.
* Imposter Forgot One Detail: You fail to convince others you are someone else.
* Imposters, Ezra is rocked to find his accounts have been emptied out and his credit cards are no good. Coming home, he finds a video from his love Ava, who reveals she's actually Maddie, a con artist who just took him for everything. She's a bit apologetic for it but also issues a warning: If Ezra goes to the cops or tries to find her, she will reveal a dark secret he has that will not only ruin him but his entire family.
* Impostor Exposing Test — A test to identify an alien or supernatural impostor.
* Impostor Exposing Test or otherwise give themselves away. While most are not that much more capable than humans, there are cases where they have "malfunctioned" and killed several innocent people before being taken down.
* Impostor, the Alpha Centauri aliens attacked humanity and try to destroy Earth civilization for no apparent reason, as their motives aren't revealed in the film.
* Impostor, the Centauri can create manufactured humans with an atom bomb built into them which will explode if they're exposed to an appropriate trigger.
* Impostor: The protagonist slips the detective his ID chip, which sets off the alarms when the detectives walks close to a scanner. Him and his men start running around the area, with the ID setting off numerous scanners, until he plays back the event in his mind and realizes what happened.
* Impostor when he realizes that he was in fact the biorobot that the police have been looking for. However, his original target, the Chancellor, survives, since she's outside the blast area.
* Imposture, Disguise and is promptly discredited by being dressed only in lingerie.
* impotent men, to get erections. So instead of treating chest pains Pfizer marketed their drug as an "erectile dysfunction" treatment under the brand name Viagra.
* Impotent Rage) puts the striking workers he was trying to help out of their jobs.
* Impoverished Patrician: A noble or aristocrat who has lost their wealth.
* Impoverished Patrician: A noble or member of royalty continues to hold their titles despite being poor financially.
* Impractical Jokers: “British Invasion” starts with Q announcing, in a prim English lady accent, “We’re in London, bitches.”
* Impractical Jokers, as Murr's punishment, he plays a sculptor showcasing an exhibit titled "Me, Myself, and I". The first sculpture is a countdown clock that says "Time Until Legal". This is done in front of an audience and Murr gets shot with dirty looks all around.
* Impractical Jokers challenge, the Jokers ask strangers to hold their seats, giving ridiculous excuses for why they're leaving. The goal is for the stranger to repeat the excuse to another Joker when they ask for the seat.
* Impractical Jokers During the Nitro Spectacular, Sal is voted into a punishment by the fans, that of being hoisted up 150 feet and swung around when he's afraid of heights. They let him down, but when he's informed he must ascend again, Q comforts him by touching foreheads and telling him to breathe.
* Impractical Jokers episode "Snow Way Out" was dedicated to location manager Michael Raptis.
* Impractical Jokers eventually devolved into cartwheels and somersaults.

* Impractical Jokers featured a segment where Murr ran afoul of a friend of the restaurant manager where they were filming, saying Murr should be fired for incompetence. When Murr failed to convince him to tell the manager to let him keep his job, he made a bindle stick out of a plastic bag.
* Impractical Jokers has a lot of this. Half of the show is the guys laughing at what they've come up with, and their victim's reaction to what he has to do, which are mostly funny. When they are actually going through with it, however, awkwardness galore.
* Impractical Jokers has an unfortunate one that periodically crops up as an "Employee of the Year" photo, a slide in a presentation, etc.
* Impractical Jokers. He had to endure multiple calls from the other Jokers during a book reading and even read a passage from "his" book while the phone rang.
* Impractical Jokers involved Murr being hooked up to a polygraph and being asked increasingly embarrassing questions...to his entire alma mater.
* Impractical Jokers involves the Jokers sitting in a quiet waiting room and trying to make the others laugh, with the last one standing the victor. Sal nearly always loses because he has a bad habit of cracking up at his own jokes, sometimes before he even reaches the punchline.
* Impractical Jokers: Joe announces to a busy restaurant that he's quitting his job as a waiter to manage his boy band "The Yoloboyz (with a Z on the end)". Their motto is "Hey! Do it, but do it with a Z!" In another episode, Joe and Murr pitch the latest in home security, "Safe Dogz" (live dogs that are capable of storing one's valuables).
* Impractical Jokers' Joe Gatto is particularly fond of this when the challenge gets particularly absurd.
* Impractical Jokers, Joe had to go into a swimming pool and loudly announce to everyone there that he's peeing in the pool. Not that he peed in the pool. That he is currently peeing in the pool.
* Impractical Jokers, Joe has Sal, Murr and Q get these. Q's is a picture of a cat and the sentence "38, lives alone, has 3 cats." Q jokes that he's not going to be 38 forever. Murr's is a picture of a screaming, skydiving ferret, a reference to a previous episode's punishment. Sal's is a headshot of Jayden Smith. Why? It's funny.
* Impractical Jokers Lewis substitutes for Sal in a "Refuse you Lose" challenge on the Jurassic World ride. Lewis could be considered the male poster child for this trope, so the Jokers make him say to fellow riders "You know, I wasn't always this hot. Soak it in!"
* Impractical Jokers made a hot dog smoothie, buns and toppings included. It was surprisingly decent!
* Impractical Jokers mostly takes place in NYC; the Jokers themselves are from Staten Island.
* Impractical Jokers mouse trap for him while he walked away for a minute. He was unsuccessful. (It probably didn't help that just before the attempted hand-off, he set off another trap that he was holding in his other hand.)
* Impractical Jokers: One of Q's punishments has him on display in a zoo complete with a kiddie pool bath, hay, and roommate Pepe the camel. He goes through the day dealing with various discomforts, until he finally can't take it anymore and calls Joe to end the punishment.
* Impractical Jokers, one of Sal's punishments involves him drinking breast milk. Murr is tricked into drinking it as well even though it wasn't his punishment (the guys made him think it was a dual-punishment).
* Impractical Jokers: One skit has Joe ask a group of bikers he's annoying to give him a wedgie; a request two of them gladly comply to.
* Impractical Jokers. The "Inside Jokes" version states that the art department was asked to use the "douchiest" looking stock photo they could find.
* Impractical Jokers. They were pelted with snowballs and paintballs, then left stuck in the air.
* Impractical Jokers this gives him the deciding point and makes him the big loser for the episode, which forces him to swim in a cage near sharks...as his friends

detach the cage from their boat and sail away.
* Impractical Jokers whenever he felt like it. The kid threw it at some point in the middle of Q's "performance." At the end, the kids were told to smush Q's face into the cake, and they did so excitedly.
* Impractical Jokers where the guys intentionally crash into a display and try to get a bystander to vouch for it being an accident so they can sue the store. The items have ranged from breakfast cereal boxes to personalized snacks (Ja'Crispy chips and Captain Fatbelly cereal).
* Impractically Fancy Outfit, but the latter trope is also responsible for the continued application of the former.
* Impractical Magic and slowly fade into history as they do incomprehensible things. No one is sure if they died, become gods, teleported away, are on multi-millennia astral projection trips, or if there are higher levels of the school. They just know that it's dangerous, boobie trapped, and anytime orders comes down from a high tower that it must be obeyed.
* Impractical Magic and slowly fade into history as they do incomprehensible things. No one is sure if they died, become gods, teleported away, are on multi-millennia astral projection trips, or if there are higher levels of the school. They just know that it's dangerous, booby-trapped, and anytime orders come down from a high tower that it must be obeyed.
* Impractical Magic elemental magic that has some elements of wonder and vagueness that prevent that part of the story from becoming rationalist fiction.
* Impractical Magic, the cost of books, sleep deprivation, the addictive properties of cheap stamina potions (amphetamines), and magically horrible public restrooms in college dormitories. It's also noted that species with different body plans are great for books until you have to imagine how an institution would bulk order desks.
* Impractical Magic: The world is built out very rationally and expands slowly from the central school setting outwards. Authors have created maps, economic systems, population dynamic calculations, partial languages, and even run the numbers behind the physics/chemistry of different magical interventions. Though much of this is done off-camera and only hinted at in-story.
* Impractical Magic where competition is fierce, godhood is a career aspiration you can put on your forms, and where the medical students will push you down a staircase so they can practice. "Study, survive, and hold your secrets close."
* Impractical Magic Yam Hist of the Ken Seekers and Cal are both introduced in their first chapters as anti-heroes. Cal is a street thief who wanted to rob someone, found them dead, and decided to pretend to be them so she could learn enough magic to rob the fancy stores. Yam has a temper issue that led to him stealing from a racist ferryman who said he would pee in his barge (in an act of superior spite Yam sneaks in and does just that after grabbing enough money to hire a better ferryman).
* impractical the cape is, whining to Alfred that despite lightening it three times, it still felt like he was “wearing a circus tent on his back”.
* I'm practicing being a boyfriend, Pop!" Actually, he was just kissing his hand to practice kissing.
* impregnated by Roger, Roger tries to leave the scene by saying "I think I left a sweater in the sink."
* Impressed by her strength, he fell in love with her and kidnapped her to Libia. There he founded a city in her name and made her its queen. Together they had two sons - Aristaeus and Idmon.
* impressive army of 9-foot-tall phoenixes. When Puriel snaps out of it, his ensuing battle with Oblivion rips up half the city and it only ends when Puriel manages to rip out Oblivion's heart and then finally kill him. And even then, there's evidence that he might not be totally dead.
* impressive collaborative series information about the future of the cartoon series, had it not been canceled. It included three "seasons" for the main Gargoyles stories, but also branched out with Brooklyn's time travel stories, the adventures of King Arthur and the London clan, and the story of the Scotland clan

before its destruction.
* Impressively, Faramir isn't tempted by the Ring's power either, even when he learns Frodo has it and is in a position to easily take it from him. This is in stark contrast to his older brother Boromir, who was always seen as stronger than Faramir but
* impressively weak disguises are not helped by their apparent inability to shut up or keep anything secret.
* Impressive Pyrotechnics: Explosions always look the same, even when the materials combusting shouldn't explode that way.
* Impressive Title allowing players to mix and match body parts to however they please. While they are limited to feline heads and lion bodies, they can still add things like fox tails, spotted hyena markings, and wings to their lion-like personas.
* Impressive Title that overlook the landscape to let the player take in the spooky atmosphere.
* impress or entertain the devil so much that taking your soul would seem like a waste.
* "Imprint": After the father raped the Woman as a child, she beats him to death when he's drunk.
* Imprint Chronicles is set in New York, where the creator lived for a good portion of his life.
* Imprint Chronicles main villain dresses in an all-black tuxedo. The scene gets considerably darker when he appears, and his name is Mr. Black.
* Imprinting: A baby animal mistakes someone else, usually of a different species (most often human) as their parent (usually their mother).
* Imprinting: Young animals assume the first living thing they see is their parent.
* imprison and torture them, using massive drills, saws, hooks, and knives to mutilate and torment the innocent children.
* imprisoned in the Vermillion Wasteland, she can only teleport to locations in that area; all traffic out has been disabled.
* "Imprisoned": Katara drops what she's doing (a perfectly nice ceramic jug of water) when she realizes that Haru's been arrested and taken prisoner for illegal Earthbending.
* Imprisoned, they visit an Earth village that was taken over by the Fire Nation. Katara pretends to be an Earthbender in order to be taken to the prison ship in which the Fire Nation put all of the other Earthbenders, in order to free one of their friends who was captured.
* Imprisoned", where Katara deliberately gets herself imprisoned by the Fire Nation in an attempt to free a friend from said prison.
* "Imprisoned With the Pharaohs", a supposedly true story, ghostwritten by
* "Imprisoned With the Pharaohs," this serves as the kicker, when the hero encounters a huge "five-headed beast" emerging from the shadows of an Egyptian tomb.
* imprisonment's "Spell of Forlorn Encystment" (see above). It buries a victim in suspended animation deep below the surface.
* imprison the Eldrazi, but the leaking power of the Eldrazi tainted them.
* improbable ability to hack anything... and the healing power has seemingly been forgotten.
* Improbable Age: A character's age is inconsistent with their occupation.
* Improbable Aiming Skills:A character has good enough aim that they never miss any of the targets they shoot at.
* Improbable Aiming Skills" implies that the Yu Yan archers are used only for certain tasks.
* Improbable Aiming Skills is sometimes able to win without fighting. Twice he simply tricked an opponent into showing off their skills, using up all their bullets in the process.
* Improbable Aiming Skills. Once she gets into position, her mind enters a Zen-Buddhist state and her kills are reported in an icy-cold voice. She works better without a spotter, and fits the lone wolf description better than any other

Spartan, with a very detached and quiet personality. Several of her fellow Spartans have noted that she makes sniping an art.
* Improbable Aiming Skills to simply shoot off the buttons of the officer's jacket, explaining to Hitler that while a dead officer is useless, one who knows exactly what will happen if he fails again, is quite valuable.
* Improbable AntidoteAnything can cure poison if the plot requires it.
* Improbable Ballistics (who's a notoriously terrible golfer) hits the ball, bounces it off several trees, golf carts, pins, roads, etc... only to have it wind up back on the tee. In the words of his wife, "I can't tell whether the people behind us are laughing or crying."
* "Improbable Bestiary: The Gremlin and the Glitch" by F. Gwynplaine MacIntyre:
* Improbable Cause", the shop of Garak, a former member of the Cardassian Obsidian Order, is bombed. Odo speaks with an informant who tells him that there were five former operatives of the order who had died on the same day that Garak's shop was bombed.
* Improbable Chopsticks Skill: Using eating implements for improbable purposes.
* Improbable Cover: When a character leaps behind something to escape an explosion, ducks to avoid a rolling wall of flame, or closes a door on an avalanche.
* Improbable Food Budget: A family spends an inconceivable amount of money on food.
* Improbable Food Budget: The seven years of plenty before Joseph's biblical drought.
* Improbable Hairstyle: Hair that shouldn't be possible, given the circumstances
* Improbable Hairstyle—hair that shouldn't be possible, given the circumstances
* Improbable Hairstyle Sequence: A character goes through a series of apparently random hairstyles
* Improbable Infant Survival: Even the worst villains are not allowed to kill children or infants.
* Improbable Infant Survival: Showing older people dying is okay, but the work completely avoids having children get killed.
* Improbable Island, and you feel less hungry just from looking at it.
* Improbable Island has you fight David Attenborough after he does one of these on you, and inadvertently insults you while doing so.
* Improbable Island is named Hannibal Lecture, and tries this on the player. It doesn't work.
* Improbable Island; the premise of the game is that a device known as the Improbability Drive is generating chaotic energy, causing all sorts of weirdness to ensue. As a result... well, the entire place and all its inhabits can get quite surreal most of the time.
* Improbable Island to "tread lightly on Mother Earth" doesn't mean they can actually completely give up meat.
* Improbable Island, you'll actually get advantages from fighting naked.)
* improbable motorbiking skills. This time with no punctuation whatsoever.
* Improbable Power Discrepancy are given statistics based on how powerful you're expected to be at that point, not how strong that enemy would be based on common sense. But it would get boring if you had to wait 30 hours into the game to start fighting the enemies that looked cool, and besides, cool fights with dragons wouldn't be likely otherwise.
* Improbable Power DiscrepancyEnemies are given statistics based on how powerful you are expected to be at that point, not how strong that enemy would be based on common sense.
* Improbable Power DiscrepancyEnemies in RPGs are given statistics based on how powerful you are expected to be at that point, not how strong that enemy would be based on common sense.
* Improbable romances and weddings run rampant, with Pooky romancing and eventually marrying bowling alley owner Elsa even though he is in middle school and she is in her late 40s, and local mortician and Mangler's employer Mr. Ferndipper courting and also eventually marrying Conrad's mother (the wedding furnishing material for an hour-long episode in the seventh season).

* Improbable Taxonomy Skills: Everyone can classify an organism just by looking.
* Improbable Weapon User alongside the normal swords, bows, and maces.
* Improbable Weapon User; he never misses a vein, and the drug is the exact amount needed for the specific person. Sure, it's Gregory House, but it's still amazing.
* Improbable Weapon User once (probably twice — there's almost nothing original in wrestling):
* Improbable Weapon User Samson killed an army of Philistines using a donkey's jaw.
* Improbable Weapon User: You have to turn every random object into a weapon to survive.
* Improbably Female Cast: For some reason, there are next to no men in this setting. Women do everything, plain and simple.
* Improbably High I.Q.: An IQ level that is so high that it's not possible for this person to actually act like the way they are in real life.
* Improbably Low IQ: An IQ level that is so low that it's not possible for this person to actually function properly in real-life.
* "improbably molded metal" tradition, but it looks like Hank is hanging on to it regardless.
* I'm Probably on a Plane or a Ship Right Now, Matt tells the audience that if he doesn't upload a vlog the day after, then it'll be because he choked on a chicken wing, he got stabbed, the ship he's going on sank, or he got attacked by a rabbit sloth.
* Improfanfic is notorious for this, due to various factors. Among the things that can kill an Impro dead:
* Impro Fanfiction's Do-Gooders's Sailor Exposition is a parody of this; she defeats monsters by talking to them.
* Impromptu about the romance between George Sands/Aurore Dudevant and Frederic Chopin, Chopin's tuberculosis makes him a little hesitant to take things to the next level with Aurore.
* Impromptu Campfire Cookout: A character responds to any event with fire by cooking food over it.
* Impromptu Campfire Cookout: Characters roast sausages or marshmallows around an accidental fire.
* Impromptu demolition derbies on the highway with whoever happens to be around.
* Impromptu Tracheotomy because she wouldn't stop talking about her powers instead of fighting him. He even gets to cynically lampshade the trope:
* Improperly construct it so that the fat in the yolk mixture destabilizes the foamy whites mixture. Refer to the relevant
* Improperly Paranoid: What do you mean, I'm scared for no good reason?!
* Improvaganza, Colin Mochrie was a semi-regular, while Brad Sherwood, Wayne Brady, Greg Proops, and others appeared specifically in the live episodes.
* Improv comedy shows. Sometimes when two players are doing a scene, a third player will tag one of them out and do a short scene with the other player about something that had just been mentioned, after which the player who was tagged out tags back in and resumes the original scene.
* Improv comedy troupe/public pranksters Improv Everywhere parodied this trope by setting up a New York subway station as an art gallery, where preexisting objects like trash cans, advertisements and passing trains were the "art". See a video of it
* improved by leaps and bounds. They liked the results, even if the methods weren't By The Book.
* Improved upon, perhaps by others in the same desert, who used trucks disguised as tanks, tanks disguised as trucks, the truck and tank disguises left behind in the front line where they would be seen, trucks pulling trailers that left the tracks of tanks, fake airfields with fake aircraft (sometimes bombed with fake bombs), fake railroads and railheads 100 miles south of the real railheads, ammo, water and fuel dumps that were sometimes fake covering the real ones. All this constructed to a realistic timetable that indicated an attack several weeks later than the actual attack. Job done. Nazis lose.
* Improvement in art quality has removed the infamous dotted lines from the comics

and replaced them with the same effect used for glass.
* Improvements in medicine that made HIV a manageable condition are for the most part the trope breaker for the
* improves significantly as the series goes on). But she's also probably the best nurse they could have when things get tough. Even Henry, who clashes with her on a regular basis, decides he can't let her go when she wants to leave, because she's just too important to the unit's success.
* Improv Everywhere A group of improv agents acted out a moebius loop in a Starbucks. Every five minutes they repeated their actions, for an hour. A couple argues, a guy spills coffee, another guy dances through with his own boombox. To the patrons of the Starbucks, it at first looked like a really clumsy guy and a couple fighting and making back up, but by the third loop they began to realize all was not what it seemed.
* Improv Everywhere has the "Mall Santa Musical" song about adults' desire to sit on a mall Santa's lap.
* Improv Everywhere of this in a Best Buy when they had 80 people in blue polo shirts and khakis hang around inside (the actual Best Buy employees were not amused).
* Improv Everywhere's sketches featured a suicidal businessman threatening to jump off a ledge. This is played for drama — at least, as much drama as you can get when the ledge is about three feet off the ground.
* Improv Everywhere the day it came out understood it was a joke, but afterwards they got a lot of flack from people who didn't understand it was put up on April Fool's and were use to their more friendly ones like Frozen Grand Central or Pantless Subway Ride. Despite putting up warnings in the description and in annotations and the title - yes, the title - a few people still respond "outraged" many years later.
* Improv Everywhere. The random bystanders who helped the young man propose to his girlfriend by holding up signs when she entered the car had no idea that the two of them had already been married for years. A rather important and necessary deception, actually, considering the requirement of a guaranteed heartfelt "yes" for the prank to end happily.
* Improv Everywhere who get together and "cause scenes" (that are all perfectly legal), with interactions of shocked bystanders being completely improvised.
* Improving the nature of mankind is an inevitable extension of the scientific progress. Earth has already been altered greatly by civilization, and we're more likely to fail if we try to halt progress in its tracks rather than explore all of its possibilities.
* Improvisational Ingenuity: When a character in adverse circumstances uses their creativity, ingenuity and resourcefulness to improvise a clever way of achieving their desired objective.
* Improvisations in the world of jazz music are varied, depending on the subgenre. Swing musicians usually just "riffed" on the melody, while the bebop musicians played extended solos on the chord changes. Miles Davis edited hours of recordings of his musicians loose improvisations to create "Bitches Brew". Ornette Coleman pioneered free jazz, improvisation using no chord changes at all. And the genre continues...
* Improvised Armour: Great armor won't be available, so use what you get.
* Improvised Armour with repurposed microwave parts, although the creature inside escapes.
* Improvised Cross: You can kill a vampire just by forming a cross with two sticks.
* Improvised Golems: Golems created from other materials in the surrounding environment.
* Improvised Imprisonment: A character is held prisoner by amateurs, in a place not intended to hold prisoners.
* Improvised Microgravity Maneuvering: Using thrust to push oneself through space.
* Improvised Umbrella: Can be improvised with a large piece of paper, usually a newspaper.
* Improvised Weapon allows this. As long as you don't mind breaking the instrument

you're using.
* Improvised Weapon: Chopsticks, furniture, musical instruments, gardening tools, painting brushes. Basically, you name it...
* Improvised Weapon: Huge weaponry won't be available, so use what you get.
* Improvised Weapon: If an everyday item or terrain feature (such as a parking block) can reliably kill or cripple someone, it can be considered a deadly weapon, and certain everyday items that are commonly used as weapons under specific circumstances (e.g., a baseball bat, golf club, or crowbar in the trunk of a car) will be considered weapons by the court.
* Improvised Weapon: Older than non-improvised weapons in the archaeological record. Heck, older than our species. The earliest weapons known are the Schöningen spears, c. 400-375 millennia old. They were simply sharpened wooden poles, without any hafted points.
* Improvised Weapons, she always seems to bring a few dozen knives along with her. That's all she needs to kill trained assassins, small armies, and chocolate ice cream.
* Improvised Weapons), the effects when using a belt sander or post-hole digger as weapons.
* Improvised Weapon: To provide creative deaths, the killers will use whatever they can get their hands on to kill their victims.
* Improvised Zipline: When a character really needs to rappel down a building but doesn't have a rope, he'll improvise one.
* Improv Theater Game called "Freeze" that has this as its base. It uses two pairs of people: one pair starts a scene and at some point "freeze" or another stop word is called, the other pair go up and start their own completely unrelated scene using the last line from the first scene as their first line. Then back again, with both scenes continuing.
* Improv to make the other corpse? Pretty normal. After all, panto runs are often fairly demanding (two or three shows a day for six weeks to two months), and the actors need to let off steam somehow, so a little extra japery is usually allowed for.
* Imps, a Keeper's initial troops, are bald, and presumed, and are usually, evil, since Keepers are too.
* Imps are diminutive demons with googly eyes, a big tongue sticking out (
* Imps are rank 2, capable of independent thought and making deals, but not really combatants.
* ImpSec. We never see him using those skills, but I would bet good money that he hasn't lost his edge.
* Imps: Small, antagonistic creatures that are more annoying than evil
* Impulse 101 either; when he first sees you and you fade out, or when he rounds his desk.
* Impulse Annual #1, the Dargonian Empire rules hundreds of star systems and has a tendency to respond to overt acts of defiance with severe reprisals.
* Impulse Annual #1, the speedster Kinnock established the Invisible Resistance on Mtoncanf two years after the Dargonian Empire invaded the planet. As he knows that they do not have the resources to prevail in a direct confrontation with the Dargonians, Kinnock takes a more subtle approach. The Invisible Resistance attacks them without even letting them know that they are being attacked by sabotaging their computer systems, tainting their food and air supplies and overrunning their quarters with insects. It is Kinnock's hope that the Dargonians will eventually decide that Mtoncanf is more trouble than it is worth and abandon the planet.
* Impulse arc dealt with this. Impulse gets possessed by a genie that imbues him with unlimited magical powers. He changes the world and tries to make it better, inadvertently making it worse. For example, having cars run on water instead of gasoline, getting rid of pollution, but with the effect of countries now going to war over water rights instead of petroleum.
* Impulse, Bart has to hide the fact that his cousin Jenni is from the future, so he teaches her English with the help of books like "See Spot Run". When introduced to his friends, Jenni's first attempt at conversing with them is to ask if they've

Seen Spot Run.
* Impulse comes across as a massive superhero fanboy, though his demeanor is at least partly meant to hide the fact that
* Impulse featured said Crown Prince of Conundrums with a revolver rigged to shoot backward.
* Impulse, Impulse's friend Carol is being raised by her adult brother after their parents died in an auto accident.
* Impulse is a really nice and well made ship in addition to being completely random and unexpected. It's the favor he asked from Ali Ben Styn back when the grateful ruler offered boons to the first three members of the team since Imp has no concept of just what a huge deal building such a thing would be and showed no restraint in his request.
* Impulse isn't real, because his powers are implausible. Impulse quickly (how else?) debunks every objection by naming a superhero with the same power. (E.g., the Atom can get down small chimneys.)
* Impulse is that if they completely change the past, it will alter the future so much that the scientist will never exist, which means he will never invent his time machine, which means they won't have travelled to the past in the first place, which means they won't actually cause any damage at all and find themselves back home. Confused?
* Impulse of the tragedy. The pod floated in space for several years until it was discovered by a Dargonian ship and brought to Mtoncanf.
* Impulse: Wally at first wanted Bart to be his successor as the Flash, but realised that Bart just doesn't care about learning to use his powers.
* Impulse: When Bart was born, his Speed Force connection did this to him. He was physically a teenager when he was chronologically two years old. His grandmother Iris later took him to the present day in order for Wally to "speed-steal" the source of his rapid aging.
* Impulse, where her superhero Mentor Max Mercury was so disgusted by her mother that he called Child Services.
* Impulse who at the time, had no idea of his superhero persona. He tries his best to play it off.
* Impunity Jane: The Story of a Pocket Doll - a boy steals a small doll from a friend and keeps her as he grows up.
* Impure Blood. (And are killing people and have already destroyed one town.)
* Impure Blood, and they are chiefly afraid of it because it comes from the Ancients.
* Impure Blood, Caspian, Elnor, and Dara all have this. Bits and pieces are emerging.
* Impure Blood has a blond young woman flinching away from an Ancient, looming over her.
* Impure Blood has the level two of the prison, for gladiators, murderers, thieves, rapists and lawyers.
* Impure Blood—to be sure, the men he took down were stalking him to taunt him with the same thing.
* Impure Blood. Note that her eyes can also glow blue for other magical purposes.
* Impure World Resurrection brings people back from the dead by turning still-living people into clones of them.
* Imp was close at hand, needling and provoking his fellow villains, then getting Hordak to punish them for trying to retaliate. Just one of his many nasty traits.
* Imp was typically used by the Horde for information gathering against the Rebellion. He was very much able to shapeshift into any form he wanted and his transformations were so flawless the characters encountering him in a shifted state tended to treat him accordingly. Examples include Kowl perching on top of him when he was a footstep in a ladder, Bow tossing him when he became a stick, and Catra even drinking from him when he was mimicking a goblet. Though most of his transformations tended to retain his blue color scheme, on at least two occasions (as a ground rodent and as a hanging painting) Imp showed the ability to alter his coloration at will. The only limitation here seemed to be Imp wasn't able to become

anything more massive than himself, although he did take on the abilities of whatever thing he was pretending to be.
* Imp will usually be there when someone does something that might be a problem for Hordak and they're completely oblivious of his presence in the room.
* Imra did not dissolve into dust, but vanished, intended to reflect how her future no longer exists.
* Imran Khan isn't the only athlete who did Bill Bradley one better in 2018. Liberian football legend George Weah was elected his country's president.
* Imran Khan, one of Pakistan's greatest-ever cricketers and captain of the 1992 Cricket World Cup champions, did Bill Bradley one better. He was elected as his country's prime minister in 2018.
* "I'm ready! I'm ready! I'm ready! I'm ready! I'm ready! I'm ready!..."
* Imriel's a much more realistic example. While Phedre's gift for languages is remarkable to the point that it's lampshaded a few times, Imriel learns to make himself understood in a variety of languages because he spent months in an environment that spoke many different languages interchangeably. After he returns to Terre D'Ange, he rarely uses any language besides D'Angeline, and as a result loses most of what he learned as a child.
* "I'm Right Here" by Samantha Mumba has a similar premise, where a woman is searching for her Mr. Right and wants all the good men who are out there to let all the single women know where they are. Unusually for this type of song though, she's quite optimistic about finding one.
* "I'm Scared", an early story by Jack Finney, has a temporal variant in which elements of the past begin to appear in the present. (e.g., the sudden appearance on the outside of a house of a wide strip of the original paint from decades before.) These elements begin growing in size and effect as the story progresses.
* Imscared into this, downloading text files to your computer explaining that White Face has become an entity playing with you.
* Imscared is HER, who, while not the standard incarnation, certainly fits the trope.
* I'm Scared Too, Ron thinks he's referring to her kissing Bonnie and accuses him of homophobia. He was actually referring to her underage drinking and drunken tirade:
* Imscared version of this. The game can open itself, interfere with your browser, put files on your computer, has several fake endings to make you paranoid about if the game is over or not, and pretends that the villain is a monster that turned itself into a computer virus.
* "I'm sending troops to fight in a foreign war" tends not to poll well, so politicians throughout history have invented expospeak terms for war. Examples include "police action" and "kinetic military action".
* I'm sitting/In the kitchen sink/And the tap drips/Drip drip drip drip drip drip drip drip...
* "I'm So Lonesome I Could Cry," backed "My Bucket's Got a Hole in It." Initially — according to at least one Time-Life Records compilation this song is included on — "I'm So Lonesome ... " was virtually ignored when "Bucket" was first released, unlike many other Hank B-sides. But then, in 1966, a handsome young country and pop singer from Hugo, Oklahoma, named B.J. Thomas recorded the song about loneliness in a troubled relationship, and Williams' song finally got the recognition it deserved, with Thomas reaching No. 8 on the Billboard Hot 100. All of a sudden, country disc jockeys began playing Williams' original version (and sometimes, Thomas' new version as well), and although it never charted, finally was heard and appreciated. In the years since, more than 300 performers have recorded "I'm So Lonesome ... ."
* "I'm sorry, Al. This is all my fault. So I promise that no matter what, I'll get you your body back."
* I'm Sorry I Haven't a Clue, a game of Mornington Crescent played with a "Sat Nav" included, amongst various unhelpful instruction from the computer voice, "Turn left. Left. No, left. Other left."
* I'm Sorry I Haven't a Clue all became this some time during the nineties. Special

mention goes to the late host, Humphrey Lyttelton, who told some of the filthiest jokes on the radio well into his eighties.
* I'm Sorry I Haven't a Clue and Andy Hamilton fires over his shoulder. "Look, I'm sorry, but that cat was really annoying me."
* I'm-Sorry-I-Haven't-A-Clue and their son Theo L'point-Of-The-Last-Arrivals-Game-On-I'm-Sorry-I-Haven't-A-Clue.
* I'm Sorry I Haven't a Clue, a parody of all sorts of quizzes and gameshows. A who's-on-first joke was used as a one-off gag.
* I'm Sorry I Haven't a Clue as a comment on the habits of builders making estimates for jobs:
* I'm Sorry I Haven't a Clue, as well as having its One Song to the Tune of Another round, has also taken various topics and performed them in the style of various types of music (e.g. blues, calypso, even madrigals). They've also taken songs and performed them as a duet, with one team member singing normally and the other playing a role and commenting on the action. For example:
* I'm Sorry I Haven't a Clue at a themed Charity Ball. (e.g. at the Christmas Ball: "Mr. and Mrs. Amanger, and their son Wayne.") One episode had a Cheesemakers' Ball, and one of the announcements was "Mr. and Mrs. Zola and their son... Emile." Or at the Menswear Ball, "From Scotland, Mr. and Mrs. Strap and their son... Dougal."
* I'm Sorry I Haven't a Clue, Barry Cryer suggests that Mornington Crescent is connected to a cult based around cooking and cleaning. Domestic Scientology, founded by Hubbard's mother to get him to help around the house.
* I'm Sorry I Haven't a Clue came from the Playhouse Theatre (where the first show was recorded) and included an introduction by the original producer, David Hatch, and the Mornington Crescent Championships, with commentary by Raymond Baxter.
* I'm Sorry I Haven't a Clue, Chairman Jack explains the connection between the words "ugly", "manhole", "lazy" and "stupid", saying that they're all things with politically correct equivalents.
* I'm Sorry I Haven't a Clue) depending on how close the panelist is to the song when the record is turned back on, and whenever Barry Cryer gets the rhythm wrong (quite often), he tends to give a loud and shocked "What!?"
* I'm Sorry I Haven't a Clue: each player has to make up one line of a limerick that goes with the previous ones according to the AABBA rhyming scheme, so the earlier players often deliberately set up words that obviously rhyme with something obscene. Then the later players scramble to come up with something else (which may also be dirty), subverting the audience's expectations and leading to a laugh. Example (where the subverted rhyme is "hysterectomy"):
* I'm Sorry I Haven't a Clue) else; wondering why anyone would be listening to this; suggesting their listener numbers were in single figures; etc. The contestants often agreed.
* I'm Sorry I Haven't a Clue ended with Humph announcing "According to our clapometer, Tim is the winner". Barry Cryer then added "Report to the clinic immediately".
* I'm Sorry I Haven't a Clue, even when logic suggests the organ can't possibly be present.
* I'm Sorry I Haven't a Clue Facebook group is basically thread after thread of these, with memberes pushing the boundaries of good taste, both in subject matter and actual comedy.
* I'm Sorry I Haven't a Clue featured many, including the game Mornington Crescent (usually preceded by reading a fan letter from Mrs Trellis) and the introduction of the pianist Colin Sell:
* I'm Sorry I Haven't a Clue from the audience rather than laughter, though.
* I'm Sorry I Haven't a Clue, furniture mogul Graham Kirkham invented the sofa-bed after forgetting his anniversary.
* I'm Sorry I Haven't a Clue had a round in which humorous translations were given of foreign phrases that had entered the English language: these included "avant-garde" (next-to-last coach on a train [I-want-car]) and "film noir" (my photos haven't come out [film-no-are]).
* I'm Sorry I Haven't a Clue has been running on BBC Radio 4 since April 1972.

Humphrey Lyttelton was the 'chairman' from the beginning (barring a few episodes in the first series where Barry Cryer was chair; Lyttelton was the first and only choice for host but for various reasons he couldn't make every recording) up until his death in 2008. Of the regular panel of Barry Cryer, Graeme Garden, Tim Brooke-Taylor and Willie Rushton which was quickly established within the first two years, Brooke-Taylor was the last to still be regularly appearing on the show when he passed away in April 2020 (Rushton had died in 1996, and health issues had reduced Cryer and Garden to occasional appearances by the late 2010s). Apart from the format of the show itself, the only other element remaining from the "classic" lineup is pianist Colin Sell, who didn't make his debut until 1975.
* I'm Sorry I Haven't a Clue. He also once commented "The trouble is, you get as far as 'Ah, Hamish!' and I switch off."
* I'm Sorry I Haven't a Clue helpful, eventually getting into an argument with the first Sat-Nav over road signs.
* I'm Sorry I Haven't a Clue". He was on the way home before it occurred to him that the correct reply was "Not so much an orthinologist as a word-botcher".
* I'm Sorry I Haven't a Clue, Humph would rag on the producer Jon Naismith for his terrible handwriting, at one point claiming he needed to pin it up on a board and run past it to have any chance to understand it.
* I'm Sorry I Haven't a Clue, in a round called "Strip Quiz" where the players (supposedly) had to remove an item of clothing if they answered incorrectly. Everybody got extremely easy questions they had no difficulty answering... apart from Tim Brooke-Taylor, who got impossible ones.
* I'm Sorry I Haven't a Clue: In the "Kiss of Death" round, each panellist has to come up with a one-liner that will not only end a date but make sure it is never repeated. One of Graeme Garden's was:
* I'm Sorry I Haven't a Clue in which one team are given a performance evaluation by the other, and have to justify the complete mess they made of their job, Tim Brooke-Taylor and Susan Calman are zookeepers, trying to explain to Graeme and Barry why they released all the animals and let them roam around. Eventually Graeme says "I'm very tempted to accept your apology but there's the obvious thing you haven't mentioned: The elephant in the room!"
* I'm Sorry I Haven't a Clue, in which the panelists try to top good news with bad news and vice versa. A typical round:
* I'm Sorry I Haven't a Clue is a parody of the panel show genre (featuring many intentionally surreal rounds where scoring points would be completely impossible even if they tried) and has been broadcast with most of the original panelists since 1972.
* I'm Sorry I Haven't a Clue is the chairman's completely unnecessary attempts to explain the rules, usually by means of a hideously convoluted metaphor.
* I'm Sorry I Haven't a Clue. Lady Violetta "Gnasher" Ickenham unleashes a stream of invective against everyone else at the dinner table and how much she's dedicated herself to making their lives hell, before adding that she's finally going to do something about the typing error in her will that names them all as beneficiaries...
* I'm Sorry I Haven't a Clue, Linda Smith redefines the seaside town Margate as "the mother of all scandals".
* I'm Sorry I Haven't a Clue — "Giant set of alien false teeth ate my virgin"."
* I'm Sorry I Haven't a Clue Mornington Crescent is a real, rational game with a long and detailed history) or as one-off gags and quick silliness.
* I'm Sorry I Haven't a Clue occasionally attempt to explain jokes that haven't got a laugh, including one occasion when Jack Dee told Tim "No, the audience is right", and the following exchange:
* I'm Sorry I Haven't a Clue on kazoo and swannee-whistle (slide whistle). For the first half the swannee-whistle played the melody while the kazoo was used to make aeroplane noises, then the kazoo took over, and the swannee played a series of Bomb Whistles.
* I'm Sorry I Haven't a Clue opens with the chairman saying "You join us today in

the fine city/town of..." and then making jokes about the town's claims to fame.
* I'm Sorry I Haven't a Clue) or just disappeared, changing the central joke to be a swipe at the format itself.
* I'm Sorry I Haven't a Clue owns this Trope, having had it for almost 40 years...
* I'm Sorry I Haven't a Clue. "People come to this theatre from far and wide to watch the greatest performers of the age. Other times, they come to see our teams..."
* I'm Sorry I Haven't a Clue, recorded in York, Jack's introduction to the city includes casually mentioning that Captain Cook was born there and died mysteriously in the Pacific, leading into a joke about the first England/Australia cricket match. He then continues on the cricket theme by describing how Yorkshire County Cricket Club changed its rules from insisting players were born in Yorkshire to just having an ancestor with Yorkshire blood. The first player to take advantage of the new rules was a Pacific islander whose great-grandfather ate Captain Cook.
* I'm Sorry I Haven't a Clue: Referenced in a round of "Limericks" on a show from Edinburgh:
* I'm Sorry I Haven't A Clue's Christmas specials, the teams gave an improvised pantomime of Jack And The Beanstalk. Resident pianist Colin Sell provided some of the sound effects, like the mysterious sound that represented the beanstalk growing.
* I'm Sorry I Haven't a Clue sound effects using only their voices, but the first team is deliberately misleading them as to what effects would be appropriate.
* I'm Sorry I Haven't a Clue: The chairman comments on crosswords thus:
* I'm Sorry I Haven't a Clue. The chairman says the beginning of a quote, the panellists finish it in a humorous way, and the chairman reveals the real answer. At least once, Chairman Humph has neglected to give the answers because they're too boring, at one point just saying "Sod the answer, buy the book". On another occasion, after not bothering with the real answers for several questions, he said "The producer's just told me I should read out the real answers if they're funny. That's what I've been doing!"
* I'm Sorry I Haven't a Clue: The host Humphrey Lyttleton, playing into the gag that he hates his own show, occasionally leans on this in continuity bits.
* I'm Sorry I Haven't a Clue. The host's scripted ones are the best examples, but some of the ones the panellists come out with are really more notable for this, since they're being thought up on the spot (usually) and are more likely to be incredibly lame. In "Sound Charades," the audience often groans very early on as soon as it becomes clear what pun the players are relying on to convey their assigned title, and the rest of the round becomes an exercise in drawing out the setup for as long as possible.
* I'm Sorry I Haven't a Clue: The letters from Mrs. Trellis of North Wales would sometimes veer into this territory; not helped by the fact that she was often unaware of exactly what programme she was writing to.
* I'm Sorry I Haven't a Clue the original (which had a very respectable run itself).
* I'm Sorry I Haven't a Clue, there is a regular game called "Pick-Up Song", where each panellist takes it in turn to sing along with a song, the music is faded out and they continue singing, then the music is faded back in to see how well they've been able to keep in time with the original song. The game still used a record player up until 2006, and this resulted in several moments where the music came back to reveal the needle had got stuck, such as when Graeme Garden was seemingly doing a pretty good job with "Nellie the Elephant", only for the sound to come up with "was never seen again... was never seen again... was never seen again... was never seen again..."
* I'm Sorry I Haven't a Clue thing people liked about the first show, and Tim Brooke-Taylor and Graeme Garden felt they'd done so badly that they turned to each other afterwards and said, "Never again." When it was picked up and became the BBC mainstay that it is, they made this a good-luck ritual.
* I'm Sorry I Haven't a Clue type so as to be amusing (and it to be fun seeing how the players get there). For example "he grabbed it at each end, cut it in half and

declared the supermarket open".
* I'm Sorry I Haven't a Clue was named after the ancient Greek inventor of TV listings, Theradio Times (pronounced 'theh-rah-dio tee-mes').
* I'm Sorry I Haven't a Clue (where the contestants are given an opening line and have to complete a limerick by supplying one line each in turn):
* I'm Sorry I Haven't a Clue, where the panellists were asked to guess what Dame Judi Dench did for a living.
* I'm Sorry I Haven't a Clue. You join us this week in the city of Leeds, and when it comes to describing the town, it's no exaggeration to call it Leeds."
* I'm Sorry I'll Read That Again career, Graeme and Bill drive straight into Tim's house in their efforts to recruit him.
* I'm Sorry I'll Read That Again, done in various ways. On one occasion, for instance, David Hatch is introducing that week's episode of the serial and breaks off to comment on how bad the plot is, saying that it's just as believable as him saying that suddenly there was a huge explosion and [the cast] all disappeared in a puff of smoke. They promptly do just that, and once he's brought them back, John Cleese berates him for being power mad. Hatch proceeds to narrate a series of disasters culminating in Cleese landing in a vat of simmering tapioca pudding as an object lesson to everybody else.
* I'm Sorry I'll Read That Again. Everyone else in the cast is baffled by this.
* I'm Sorry I'll Read That Again except the "and"s and "...all tied up with string; these are a few of my favourite things" was bleeped.
* I'm Sorry I'll Read That Again irritatedly recites all the fish puns he can think of right at the start, to get them out of the way.
* I'm Sorry, I'll Read That Again" is held up by the representative of the division of Animals' Equity representing spiny anteaters, marsupials, and other lower mammals, who demands that some of the parts should go to members of that division. Leading choruses of "B'rer Rabbit out! B'rer Platypus in!", he is successful, and when the production continues, not only does B'rer Platypus take the leading part, there's also one for B'rer Bandicoot.
* I'm Sorry I'll Read That Again is quite memorable, mostly for being a parody of something still well-known.
* I'm Sorry I'll Read That Again opens in the Houses of Parliament. The narrator explains that "select committees meet to discuss matters of national import" and then there is a tinkly piano transition. Followed by the narrator adding "And play the piano". The scene then cuts to a meeting room where a member is asked to stop playing the piano and come back to the table.
* I'm Sorry I'll Read That Again panto, which ran slightly longer than ISIRTA itself.
* I'm Sorry I'll Read That Again plenty bawdy and occasionally touched on dark ideas, but often kept a light heart or a non-serious tone about it. This is all the context you need to get the next absolutely terrible yet horribly fantastic pun.
* I'm Sorry I'll Read That Again, the wildly incomprehensible caricature of sports commentator Eddie Waring is speaking to a German with a mild accent.
* I'm Sorry I'll Read That Again wasn't the half of it. The highbrow critic paused for a beat at the end and added "And I especially liked the knickers jokes".
* I'm Sorry I'll Read That Again was wont to do this at any and all puns. It's worth to note that the writers often predicted this, and made the following dialogue reflect it.
* I'm Sorry I'll Read That Again, with Graeme Garden as "Doctor Why" and Tim Brooke-Taylor as his companion, Peter:
* Im Sorry I Thought That Was Obvious." A minor difference, yes, but a very consistently rendered one.
* "I'm sorry to god for what i have done. I love my family so I kill all my family. It's the only thing I can do to stay together with them F O R E V E R!"
* "I'm sorry, Uncle, I'll never take a drink from your private stash again..."
* "I'm so sick of Congress right now that I could vomit." (a recurrent feeling for the characters from
* "I'm So Sick of You" has him singing "you don't have an ounce of class, you're

just one big pain in the neck!"
* I'm Spelling as Fast as I Can", Brockman deems Lisa Simpson getting into the Spellympics to be of more paramount importance than the destruction of Paris (as apparently does Marge, who switches off the television as soon as he starts to tell Springfield about the latter).
* I'm Standing Right Here: I don't care that you can hear me insulting you.
* I'm Standing Right Here: Someone insults another person without noticing or caring that the other person is in earshot.
* "I'm Starting to question my choice of attire" is a good example of why this is a bad idea.
* Im Still Here ruse. When the film premiered, Phoenix confirmed that the ordeal was a hoax, and he began appearing in interviews as his old, well-groomed, clean-shaven self.
* I'm sure there's a trope for this, but I can't find it. Basically, a character wants something very, very badly, after unsuccessfully trying to obtain it for the better part of the episode, it turns out that someone else has got it for them as a gift. Popular in sitcoms.
* "I'm sure you recognize this lovely melody as 'Stranger in Paradise.' But did you know that the original theme is from the Polovetsian Dance No. 2 by Borodin? So many of the tunes of our well-known popular songs were actually written by the great masters—like these familiar themes... "
* I'm Taking Her Home with Me! can turn even the most level-headed person into a gibbering mess.
* I'm Taking Her Home with Me! that a character just wants to take them home.
* I'm Telling! to be embarrassed when it showed up in reruns on the Family Channel from 1994-1996.
* I'm Telling! usually consisted of six questions per show, the final one worth 150 points. However, if a team was leading by more than 150 when it came time for the final question, they would be declared the winners right then and there. This happened at least once.
* I'm the Grim Reaper Although he does have his moments of explaining things well and even briefly training Scarlet, Satan is still...well, Satan, and has a lot of fun at Scarlet's expense, purposefully not telling her important information like there being more than one grim reaper or there being a demon residing in her that could easily lose control.
* I'm the Grim Reaper and has Scarlet and Chase talking and being friends.
* I'm the Grim Reaper: As Scarlet is technically homeless after being turned into a grim reaper, she ends up staying with Chase in his apartment, possibly indefinitely.
* I'm the Grim Reaper badly, far more than he would like to admit. It’s implied he would much rather ignore her than risk her going out of control again.
* I'm the Grim Reaper: Being grim reapers and not really alive, neither Scarlet or Brook react much to lethal injuries. When Scarlet gets her arm and leg ripped off, she's even surprised it doesn't hurt. Brook doesn't react much when his body gets ripped to pieces, leaving only his head behind.
* I'm the Grim Reaper: Chase’s backstories have different ones. The one where he details his abusive ex starts off with a bright, pastel color palette before slowly turning back into the series’ usual darker tones. His backstory regarding how he got his X starts off with muted colors, but as it goes on his mother’s colors become brighter...while his stay muted.
* I'm the Grim Reaper he knocks her clear across the room several times, showing that even though she's a grim reaper, she's a new one and incredibly out of her league fighting him.
* I'm the Grim Reaper. He seems normal, but is actually a serial killer. The two quickly switch places when Scarlet literally cuts him in half in a dark alley.
* I'm the Grim Reaper However, it's also important to note that her past isn't used to justify the murder.
* I'm the Grim Reaper in this series, with their sins varying from almost silly sounding to outright murder. It is worth noting that Scarlet can only see sinners;

she cannot see the virtuous, only archangels can do that.
* I'm the Grim Reaper is primarily a thriller and action story. However, there are several more contemplative scenes, since life and death are very prevalent themes.
* I'm the Grim Reaper: One of Scarlet's eyes tends to glow when she summons her scythe. Her irises are always bright red.
* I'm the Grim Reaper, per se, she is noted to be a little dense at times, especially when it comes to people.
* I'm the Grim Reaper: Satan explains a lot about the grim reapers, their rules, and how hell works to Scarlet, since he is her boss. Doesn’t mean he tells her everything though...
* I'm the Grim Reaper: Scarlet has a very powerful demon inside her that when activated, is nearly invincible. The problem is that the demon is a single minded killing machine, slaughtering anything in its way, and Scarlet can’t control it when it starts creeping out and lets it take her over easily.
* I'm the Grim Reaper: Scarlet walking the lines between anti-hero and anti-villain makes her this. After all, she is a grim reaper. While she does kill sinners, the overall morality of killing in general is explored.
* I'm the Grim Reaper: Scarlet wears one to hide her horns and make herself look more human.
* I'm the Grim Reaper tells him he has always been weak, especially since he'd developed an attachment to Scarlet, rather than keep thinking of her as a tool. The crow even nearly says this trope word for word to him. But he makes it clear he won't listen to those fears anymore.
* I'm the Grim Reaper they are very upfront about seeing each other as friends.
* I'm the Grim Reaper: This is something Chase has to deal with. He considers himself very pragmatic and logical, and prioritizes that over emotions and feelings. But after becoming genuine friends with Scarlet, he realizes he needs to open himself up to emotions more again.
* I'm the Grim Reaper: To escape from Brook, Scarlet tosses herself out of a window during their first fight.
* I'm the Grim Reaper to her lying about always smelling like blood. Later when Chase wants her to attend a meeting while disguised as someone else, she points out she is really bad at lying as an obvious flaw to his plan.
* I'm the Grim Reaper: What Scarlet finds out with her second sinner. The red X appears on sinners, be it a murderer or a thief, a sinner is a sinner. After discovering this she tries to find out more about her targets to make sure she is actually killing a vile person rather than someone that just stole something quick to eat.
* I'm the Grim Reaper: When one of Scarlet’s eyes glow red, it’s a sign she’s about to reap a sinner.
* I'm the Grim Reaper, where the protagonist is asked for her name by another character, Jordan. After mumbling through several names, she sees a red X on Jordan's chest, and blurts out, "Uh . . . Scarlet!" He takes it at face value.
* I'm the Grim Reaper: While Chase is still recovering from being stabbed, at one point he starts talking about a soup he had as a kid and how much he would like it again. Scarlet immediately starts putting her shoes on and when asked what she’s doing she says she has to go check what color the sky is.
* I'm the Grim Reaper who can take care of sinners easily. But she’s also a new reaper, and so Brook (who is more experienced than she is) beats her in a fight with ease.
* "I'm the Juggernaut, bitch!" parody video, the first segment ends with Juggernaut tossing Professor X out of a window.
* I'm the motherfucking swearing asshole who fucking enjoys swearing like a motherfucker! You piece of shit faggots got a motherfucking problem with that bullshit, motherfucking cocksuckers?!!
* I'm the One, which plays during their match against Coco and Yatsuhashi. The song is about how the two have gone through hell and come out stronger, and as a result will crush their opponents.
* "I'm the only one around who might be inclined to twiddle your handle again."

from
* " I'm the wicked bitch of the west! I'm here to drive you out of your fucking MIND!"
* I'm Thinking of Ending Things: Briefly, following a mental breakdown, the janitor seemingly hallucinates the maggot-infested pig (as an animated piece) and follows it into the school.
* I'm Thinking of Ending Things cartoon akin to the Golden Age of Animation, with a Betty Boop-esque fairy queen singing about Tulsey Town and followed by little children drawn in inkblot style — pie eyes, white-gloved four-fingered hands, and rubber hose limbs.
* I'm Thinking of Ending Things has this as its premise. Jake is bringing his new girlfriend home to meet his parents. The dinner that proceeds is increasingly awkward and surreal.
* I'm Thinking of Ending Things!, with the young woman as Laurey, Jake as Curly, and the janitor as Jud.
* "I'm trying to return your purse!"). Later, he tries to thank a shaman for his sage advice. It ends up being, "Thanks for your wise words of ostrich."
* ''I, Mudd": a group of androids decided to conquer the galaxy and impose peace on everyone by force. They were simply applying Asimov's Zeroth Law of Robotics. One of the first applications shown.
* "I, Mudd". He tries it on Norman, but fails because Norman's a robot.
* I, Mudd". The aliens who created the androids originally came from the Andromeda galaxy. Their home planet's star went nova and destroyed their civilization except for a few outposts, whose inhabitants died out over time.
* "I, Mudd". The android Norman says "We shall continue on our present course for approximately four solar days."
* I'm Under Your Spell when Willow was already showing signs of magical "dependence." The reprise of the song later in the episode is probably the moment it flips, when Tara realizes just how under Willow's spell she actually is.
* I Must Be Going,. It's used to describe something as being emerald green.)
* I Must Be Going through it to retrieve the weapon the characters need. Bull's the one who lampshades the matter, when Varric reads the story out loud for everyone.
* I must not tell lies., and Fudge makes reference to his "cock and bull stories," Umbridge is the only one to outright call Harry a liar to his face.
* I'm very fond of Calvin. Pass the gravy, please." Calvin wisely accepts his fate and sleeps cold.
* "I'm very well acquainted too with matters mathematical/I understand equations, both the simple and quadratical"—Understanding a quadratic equation is junior-high-level math and should not impress anyone older than fourteen. At the very least, a man of his class would be expected to have been introduced to calculus as a university freshman, so a statement like this would be roughly the equivalent of someone today saying "I went to high school."
* IMVU, not only is it almost impossible to get a personal avatar for under 5000 credits, there's also the Access Pass, buying your name, and wait for it... VIP accounts! Not to mention buying more credit, with which you're able to get more clothing, rooms, etc.
* I'm watching you through a camera!" In the middle of "Sweet Dreams (Are Made of This)" by Eurythmics.
* I.M Weasel managed to publish a book that apparently turns everyone who reads it into complete and utter idiots. Lamenting on this turn of events, I.M. Weasel decides to expose himself to the "stupid powers"... but remains unaffected. He eventually realizes that everyone around him was already a stupid twit and he just didn't notice it.
* I'm With Her, main character and famous actress Alex has a dream where she's accepting a major award, only to suddenly find herself naked in front of the audience.
* I'm With You, putting a cheery ending to an otherwise dark latter half of the album.
* "I'm working at a mahou shoujo recruitment company, but I think I may be at my

limit".
* I'm Working On That's comment on a tour of Star Trek sets, referring to the warp core.
* "I'm writing this note to your mother, telling her everything!"'s on-going fun with Canadian stereotypes.
* Imy as an intentional way to freak out and terrorize a neighbor kid.
* I My Me! Strawberry Eggs: Aspiring teacher is forced to disguise himself as a woman in order to take the only teaching job he can find.
* I My Me! Strawberry Eggs: Hibiki Amasawa really does make a convincing woman, even if it is just to get a job as a Gym Teacher.
* I My Me! Strawberry Eggs is also a transvestite whose failed marriage to the boss caused her man-hating.
* I My Me! Strawberry Eggs likewise offers the promise of a happy ending several years later after the girl in question has matured a little.
* I My Me! Strawberry Eggs. There's actually a pun in here. In Japanese, the word "aimai" means "ambiguous" or "vague" which, given the plot, makes a good deal of sense. It still doesn't explain the "Strawberry Eggs" part, though.
* I'm Your Biggest Fan: Someone gushes to a celebrity that they're their biggest/number one fan.
* "I'm Your Moon", a song Charon sings to Pluto so Pluto doesn't feel bad about not being considered a planet anymore
* I'm Your Worst Nightmare. Actually, the page quote refers to this specific trope.
* Imzadi II, Lwaxana is stuck and delivers the quote below from that show.
* Imzadi, two planets have been hostile—not open warfare, but anger and resentment—for generations, until a window into the past reveals the extremely trivial origins of the hostility (a dog analogue owned by an official from one planet killed a cat analogue owned by an official of the other, which resulted in the first-ever peace treaty to include a section about leash laws). It's played exactly like Feuding Families.
* In "$pringfield", Homer finds a pair of glasses in the toilet and decides to keep them (unknowingly swiping the ones Henry Kissinger wears) after he likes how intelligent he looks with them. Even if, from his new perspective, wearing them makes Bart and Lisa look like something from a Salvador Dali painting.
* In "$pringfield, or: How I Learned to Stop Worrying and Love Legalized Gambling", Bart is kicked out of Mr. Burns' casino for being underage. The Squeaky-Voiced Teen taunts him, saying "What are you going to do? Start your own casino? In your tree house? And get all your little friends to come?
* In "$pringfield", while touring the delapidated boardwalk where he plans to build his casino, Burns remembers when he was young child he would go and play in the bumper cars. His happiest memory was of him bumping into and crippling an Irish maintance worker, a memory that causes him to laugh uncontrolably for several days.
* In 0bl1v10n.exe, the narrator appears more upset about destroying his laptop than his best friend getting killed.
* In 10:04 pm by Tanagra, the protagonist of the song becomes lost in time, unable to get home. After countless ages of searching, they become an omniscient being that is referred to by worshippers as "The One That Time Forgot".
* in #109 Eglamore requested to turn Reynardine over and Antimony refused and offered a good rebuff,.
* In #10, they draw straws to pick who'll morph a spider for an infiltration mission. Marco reasons that he can beat the system by going first, as the odds will only be one in five. Guess what happens.
* In "11001001", a group of hypercommunicative aliens take over the Enterprise while Captain Picard and Commander Riker are locked in the holodeck, accompanied by
* In 1.13, this is played straight. The best handgun you can get is the .357 Satan, which has a low AP cost and takes the heavily damaging AET round. You can also purchase a Raging Bull or a Freedom Arms revolver, both of which fire the .454 Casull round, or the slightly less powerful UDAR that fires what are effectively .410 shotgun shells loaded with slugs. This is all somewhat academic, however, as pistols are quickly demoted to

* In "11:59", Janeway speaks with pride on her ancestor, Shannon O'Donnell, a star astronaut and one of the first Mars colonists who single-handily pushed through a massive tower project against huge opposition. But, going over Earth records, Janeway discovers that over the centuries, Shannon's "exploits" have been overblown: She was never an astronaut, she only consulted on the tower and there was no mass opposition to it. Janeway lampshades how records can be skewered to Chakotay.
* In 11 markets, Comcast has changed the name of its "Triple Play" service to
* In 11, the squad hits the beach at Marberry in northern Gallia to help secure vital industrial areas. The enemy is very well dug-in, with trenches and bunkers backed up by multiple tanks. Before the landing, Isara works overnight to develop smoke rounds that allow troops to sneak by indestructible machine gun towers.
* In 1254, King Louis IX (the holy one) forbade his siblings to play the game of chess.
* In 1/29/13, 95.1FM, a classic rock radio station based in Rochester, New York, had its DJs mention the Guitar Center's Rock Walk of Fame and the bands included. One DJ says: "The Walk of Fame includes some of the greatest rock and roll bands in history... and
* In 1292, when Rome and the other papal states were under the direct rule of the Pope, the established election process for the position was drawn out by two rival factions of Cardinals from the usual two weeks to
* In 1.2, Lead, Tin, Tungsten, Platinum, Palladium, Orichalcum and Titanium are practically alternate (and slightly better) materials of Iron, Copper, Silver, Gold, Cobalt, Mythril and Adamantite respectively, that can be generated in a world in the place of the latter materials. The weapons, bricks and furnishings made from them are appropriately different-colored as well, while the 'alternate' Hardmode Metal armor suits have unique properties that the Cobalt, Mythril, and Adamantite armor suits lack.
* In 1306, English forces besieging Scottish rebels at Kildrummy Castle managed to bribe a royal Scottish blacksmith named Osbourne who, in exchange for all the gold he could carry, set fire to the defenders' food supply. Once the castle was taken, the English, who were disgusted by his greed,
* In 1312, soldiers of the Polish duke (later king) Władysław Łokietek rooted out foreign members of a burgher revolt in Kraków by forcing every interrogated citizen to say "soczewica koło miele młyn" - a nonsensical
* In 1325, Italy was still divided into city-states. A regiment of soldiers from the city-state of Modena invaded Bologna to steal a brown, oak bucket. During the raid, several
* In “A Canterlot Wedding” It seems Twilight hasn’t heard of the concept of impersonation, because
* In “An Egg Scramble” most of Miss Prissy’s lines as well as her clucks and squawks were done by Mel Blanc, but a few of her lines were done by Bea Benederet such as when she chases after the egg delivery truck.
* In “A Plonqmas Tale — 2018,” it is revealed that Santa and Plonq had a reciprocal agreement not to punch each other out that year.
* In “Arthur’s Family Vacation”, Arthur dreams that he and Buster sailing on a river. Unfortunately, a giant D.W. appears and Arthur and Buster jump off quickly before D.W. steps on the boat.
* In “Can You a Spare a Dime?”, Spongebob does this a couple of times to Squidward.
* In “Cupid and the Cat”, Lulu the cat’s pose never changes.
* In “Edge of Tomorty: Rick Die RickPeat”, Morty is willing to let Rick
* In “Emily Swallows A Horse”, D.W. is a giant chasing after Emily, who hides inside. She rips off the roof and grabs her. Thankfully, it was a nightmare.
* In “Eternal Moonshine of the Simpson Mind”, when we see Homer’s picture-a-day montage into his life, it turns out that his house was so poor and unkempt that the bathtub collapses into the kitchen room. Then the unknown chemicals create what seems to be a lizard-like abomination that crawls about...

* In “French Fries”, he gets into a fight with Daffy, who is outraged because Porky ate “his” fries (which he thought were for the table,
* In “It’s No Picnic”, Isabella admits to her crush on Phineas and gets this reaction from Candace:
* In “I Will Always Loathe You” Jackson and Lilly both share a bowl of popcorn while watching Mamaw and Aunt Dolly have a brutal catfight.
* In “Little Gift Shop of Horrors” at the end of the "Clay Day" segment, Soos is turned into a clay figure who resembles
* In “Living Witness”, a historian shows a grossly-inaccurate portrayal of the Voyager crew as militaristic thugs. The Good Cop was Chakotay. The Bad Cop was
* In “My Generation G-g-Gap” most of Porky Pig’s lines are done by
* In “No Help Wanted”, Fred indirectly gets Barney a job that turns out to be repossession. After Fred finds out what Barney’s new job is, the two fight over his unpaid TV. The two make up at the end after Barney gets a raise and buys the TV back for him, only to fight again when he has to repossess Fred’s golf clubs.
* In “On a Good Day I Can See My Sister”, Chief Wiggum throws Bart in jail for violating his
* In “Past Tense”, after finding himself in 21st Century San Francisco, Sisko impersonates martyr Gabriel Bell after he dies before leading the riots that bore his name, in order to ensure history progresses as it’s supposed to.
* In “People Who Use People”, Lilly chows down on popcorn to watch the
* In “PTV” Peter creates the titular channel filled with uncensored content. One of them is a parody of Jackass called “Douchebags”. He poops on top of a bridge which lands on Lois’s car. The FCC comes over to the Griffin’s house and cancels PTV and Douchebags after one episode.
* In “Pups Save a Cow”, the pups form a pyramid to try to get a kite down from a tree. Rocky was on top since he was already in his uniform so that he can use his claw to reach it.
* In “Pups Save Daring Danny’s Hippo”, the pups form a pyramid as part of the circus act.
* In “Rabbit Transit”, after Bugs finally wins, he gloats to Cecil that he did 100 miles an hour easily. Cecil asks him to repeat it louder so the police could hear; Bugs is promptly arrested as a result. Bugs even calls him this as he’s dragged away.
* In “Radio Bart,” when emergency personnel refuse to rescue Bart from being trapped in a well (after he admits he pulled a hoax on the town), he is resigned to possibly dying alone in the well and not getting a chance to do the things he wants to do someday: “Smoke a cigarette, use a fake I.D., shave a swear word in my hair ... .”
* In “Remember Me”, everyone has been disappearing from the
* In “Road to the North Pole” during the “Christmas Time is Killing Us” number, we briefly see a grotesque close-up of Santa’s face while he’s looking in the mirror.
* In “Scooby-Doo and the Reluctant Werewolf”, Dracula needs a werewolf for his car race. He turns Shaggy into one and promises Shaggy, Scooby, Scrappy, and Googie their freedom if they win. Of course, the monsters don’t play fair, and Dracula’s wife Vanna is too oblivious to really be of help.
* In “Scrubbin’ Down Under” Clean Gene shows Rocko an educational film about a hippopotamus child named Jimmy with poor hygiene, he smells so bad kids faint when he passes by or raises his arms, plants die when passes by, his bad breath kills flies and melts food, and dogs run away from him.
* In “The Autobiography,” Mittens inadvertently opens a porn website on Penny’s desktop computer. It immediately begins littering the screen with pop-ups and downloading a likely malicious file. Penny’s mom also may or may not be looking at porn on her personal laptop.
* In “The Autobiography,” when Penny is disgusted by the possibility that her mother may be looking at porn on her laptop.

* In “The Cakes,” Mittens initially tries to keep Bolt and Rhino from eating the title pastries until she is pushed into one of them and gets covered in frosting. She responds to Bolt’s continued angry insistence for cake by dropping one on his head, initiating an all-out
* In “The Cameo,” Penny and her friend read and make fun of smut fanfiction featuring the former TV star and her dog.
* In “The Cameo,” when Bolt is embarrassed by his father’s dissolute sex life.
* In “The Coyote,” Bolt inadvertently lets slip to Charlie the Coyote that he and Mittens (who the coyote is hoping to catch and eat) are sexual partners.
* In “The Double Blind Job,” the Client of the Episode is pursued by two such henchmen, claiming to be FBI agents (“she’s in our custody!”). Hardison flat-out states that he isn’t fooled by their “fake-ass” badges. Then he directs their attention to Elliot, whom was barreled into during the chase and thus ended up with hot coffee all over his white shirt. While Hardison rounds up their soon-to-be client, Elliot pummels her pursuers.
* In “The Falcon and the D'ohman”, we're shown an image of Kiev with the captions:
* In “The High Ground”, when she and Picard are kidnapped by terrorists and the lead terrorist has threatened to kill him, she says she has “some things” to tell him. Then the lights go out indicating they’ve been found.
* In “The Imaginary Letters,” the dog mentions using hotel throw pillows and a chair leg as a substitute for the absent Mittens.
* In “The Original Fry Cook”, Mr. Krabs says to Jim that he makes him laugh and one just doesn’t find employees like that anymore, completely ignoring Spongebob.
* In “The Paris Trip,” Mittens flirtatiously has Berlioz guess her name via an impromptu game of charades.
* In “The Paris Trip,” Mittens has sex with Berlioz the night before she leaves for home. During the airport cab ride the next morning, Bolt asks a clearly sad Mittens “What’s gotten into you anyway?” She breaks into a mischievous smile, thinking that sometimes the best jokes are unintentional.
* In “The Ski Trip,” Bolt, Mittens, and Rhino ride up a chairlift without a ticket, snitch a pair of skis, erratically descend down a mountain trail while tearing up its freshly groomed surface, and engage in a
* In “The Ski Trip,” Bolt, Mittens, and Rhino would not be able to ski down a mountainside on a single pair of skis.
* In “The Ski Trip,” Rhino alerts Bolt and Mittens to what appear to be an abandoned pair of skis using the phrase “I spy.” It turns out they weren't abandoned at all, just set aside by a skier adjusting her boots and clothing.
* In “Thine Own Self”, Troi is taking the Bridge Officer qualification test. Having failed the test three times, Troi seeks Riker for help, asking whether the test is actually an
* In “Time and Punishment”, Bart and Lisa become giants after Homer kills a fish.
* In #14, Poindexter attempts to grab the chest of ancient golden artifacts the wind knocks it off the balcony. He manages to grab it, but its weight drags him over the balcony with it and he plunges to his death on the rocks below.
* In 1513, with King Henry VIII off fighting the French, the Scots decided to invade England. Absolutely nobody expected Henry's wife and regent, Catherine of Aragon to ride north in full armor while
* In "— Drawings —", a boy with the power to draw monsters into existence sics a handful of mannequins on the watchman. It's implied they murder him.
* In 1562, the German town of Mittenwalde loaned the town of Berlin 400 guilders at 6% interest, compounded annually. They would like to be repaid. With interest,

Berlin owes Mittenwalde approximately 97.7 trillion guilders. Oh, and one guilder is equivalent to 280,000 euros (in 2012).
* In 1587 John White set sail for England to get help for the colony of Roanoke. When he finally returned in 1590, the entire colony had vanished, including the buildings having been dismantled and no signs of any struggle, with only the word "Croatoan" carved into a tree trunk. Unfortunately, this could not be investigated, and nobody knows what happened to the colony of Roanoke. While no concrete evidence have ever been found, the most accepted theory is that the colonists dismantled the colony when it seemed no help was coming, and integrated with the local indian tribes to survive.
* In 1591, Sir Walter Raleigh began an affair with Bess Throckmorton, one of Queen
* In 1593, a young, pregnant, newly widowed woman from Bad Wimpfen (a historic spa town in the Heilbronn district of Germany)
* In 1630, another Puritan sect founded the Massachusetts Bay Colony forty miles north of Plymouth, establishing the city of
* in 1641. Descartes proposes the idea that there could be an evil genius or other outside influence keeping him trapped and exposing him to false experiences (a real, full simulated world). This shortly follows his own proof of his own existence (the famous Cogito Ergo Sum he is more well known for) and is ultimately resolved, then he goes on to prove that God exists and otherwise codifies his own philosophy and weltanschauung.
* In 1688 in England, there were 50 offences on the statute book punishable by death, but that number had almost quadrupled by 1776, and it reached 220 by the end of the century. The "Bloody Code" included some 220 crimes punishable by death, including "being in the company of
* In 16th-17th century Russian there was actually a semantic difference between old-style Warriors and new-style Soldiers (Soldaty, using the Saxon word for 'soldier') which quite neatly mirrored the real distinctions in recruitment and training between the two. Needless to say, and
* In 16th century Sweden, king Erik XIV starts behaving like he is insane and is deposed and imprisoned by his younger brother Johan after an insurrection. Johan makes himself king, while Erik's son and heir to the throne Erik Jr disappears abroad. Later king Johan has Erik Sr poisoned to death.
* In 1726, a woman named Mary Toft became (in)famous in England, as she'd reportedly begun giving birth to rabbits. Investigation revealed that she was "birthing" pieces of dead rabbits, which she eventually confessed her husband had purchased; she'd inserted them into her birth canal for later expulsion, in a weird attempt to gain fame and a possible pension from the king.
* In 1784, a tax on hats was implemented in Britain. Hat-makers promptly started using referring to their products using other terminology to avoid the tax; the law was eventually amended to define what counted as a hat.
* In 1785, a Russian cossack woman named Tatyana Markova didn't want to get married, so she faked her suicide and ran to join the army under the last name of Kurtochkin. The service was smooth until the rank of a Captain, but then a girl who failed to woo "him" accused the officer of seducing her. Markova was forced to confess the secret to
* In 1786, Jean-Baptiste Bernadotte, later King Charles XIV John of Sweden and Norway, but then a sergeant of Louis XVI's army, suffered from a severe lung disease, was mistaken for dead and only narrowly escaped a premature burial, thanks to the meticulousness of a young surgeon.
* In 1796, a counter-revolutionary mob was marching on the Paris Directory (the seat of government); a quick-thinking lieutenant of artillery, noticing the antique cannon kept on the front doorstep as an ornament, managed to obtain a single charge of "Grapeshot" (a tin can filled with iron balls the size of ball bearings) and fired it at the approaching mob, killing dozens and dispersing the rest; he was promoted to General and given a medal for saving the French revolution with a "Whiff Of Grapeshot"; his name was... Napoleon Bonaparte!
* In 1796, Amédée Laharpe, a Swiss general fighting for the French Republic, was mistaken for an enemy officer while conducting a reconnaissance at

dusk and killed by his own soldiers. Made even more cruel by the fact that he was condemned to death in his home country for supporting the Revolution, and had to leave everything to serve France.
* In 1806, the Kingdom of Prussia declared war on Napoleon's French Empire, hoping to blunt his ambitions after his victory at Austerlitz. The first engagement of this conflict took place on October 9. Napoleon entered Berlin on October 27. Over less than 19 days, the Prussians sustained 65,000 casualties (including the deaths of two members of the royal family) lost a further 150,000 prisoners, over 4,000 artillery pieces, and over 100,000 muskets stockpiled in Berlin. The French suffered around 15,000 casualties.
* In 1807 the Ottomans loaded some giant cannons that had been collecting dust since the fall of Constantinople three and a half centuries earlier and used them to repel a British attack on the Dardanelles.
* In 1809, during the Second Siege of Saragossa and at a point where the French had gained undeniable superiority, having even taken parts of the city, French general Verdier sent a message to the Spaniard's defending military demanding the surrender of the city, stating simply «Paz y capitulación.» ("Peace and surrender."). General Palafox's answer? «Guerra y cuchillo.» ("War and knife.").
* In 1811, Charles Deslondes led the German coast uprising, the largest slave revolt in American history, which took place in the territory of Orleans (a part of modern-day Louisiana that had not yet been incorporated into statehood). After gathering up his followers, Deslondes began their revolt at the plantation of Manuel Andry, killing his son, and wounding Manuel before he made his escape. Deslondes and his men then gathered up as many slaves and weapons as they could find on a march to New Orleans, intending to storm the city and free every slave there. Somewhere between 150-300 slaves joined Deslondes' rebellion until it was stopped and defeated by a militia (led by the wounded Andry) 15 miles outside the city. Despite their large numbers, Deslondes and his followers' lack of firearms and military experience proved too much to overcome. More than 50 of them died in the battle with the militia, while they inflicted no casualties themselves. The only other person killed by the rebels was another plantation owner during the march. An additional 45 slaves were executed after the rebellion, including Deslondes.
* In 1817, Abraham Thornton, out of fear of facing a biased jury when charged with the rape and murder of Mary Ashford, challenged her brother (who was pressing charges) into that kind of trial. William Ashford knew he'd lose regardless of Thornton being guilty or not and it was officially ruled that, if he accepted and Thronton killed him, that death wouldn't be considered a murder. Ashford refused and Thornton was acquitted. However, Thornton was so
* In 1824, Andrew Jackson won the popular vote in the United States presidential election as one of four candidates running under the banner of the Democratic-Republican Party, but the Electoral College was split. The party elite in Congress ended up awarding the presidency to Jackson's rival, John Quincy Adams. In response, Jackson founded his own party, the modern Democratic party, and ran against Adams four years later, winning in a landslide.
* In 1824 the New South Wales penal colony instituted its own version of the trope by sending convicts to Norfolk Island. Those who had been "double convicted", having been transported to New South Wales and then committed
* In 1831 "The Lion of the West", a thinly veiled satire about the life of
* In 1834, Moroccan Jewish teenager Sol Hauchel was falsely accused of converting to Islam. Brought before the Muslim governor for ludicrous charges of heresy, she was offered wealth and privilege if she accepted conversion,
* In 1841, the most successful mass slave uprising in US history took place when rebellious slaves took over the coastal slave-trading ship
* In 1848, Phineas Gage had a pole jammed through his head that removed part of his brain. It didn't kill him, but he is said to have become much more cranky and dishonest after the pole went through his head. Though just how much impact the injury had in his personality is now questioned by psychologists, due to there

being no actual records of what he was like before the accident aside from anecdotes that were recorded after. And due to many of the records being either vague or contradictory (for example, one doctor claimed that he had become sexually insatiable and would readily assault any woman he saw while another claimed that he'd completely lost all interest in sex).
* In 1853, before the Civil War and only five years after its admission as a state to the union,
* In 1854, while prospecting for gold near Sacramento California, Mexican war veteran Jonathan R. Davis killed 11 armed outlaws who had killed two companions and tried to murder him as well. He killed 7 of the 11 bandits with a pair of Colt revolvers (the rest he killed with a Bowie knife)
* In 1856, 18 year old William Henry Perkin botched a college assignment to synthesize quinine due to impurities but while cleaning the flask with alcohol, he noticed the solution turned purple. By isolating the purple compound, he had created the first synthetic dye: and by sheer luck it was also
* In 1869, Adam Worth and Charley Bullard broke into the Boyleston National Bank in Boston by renting the shop next door as "William A. Judson & Co", purveyors of Gray's Oriental Health Tonic. This was probably the inspiration for "The Adventure of the Red-Headed League".
* In 1870, the throne of Spain was offered to a prince from a Catholic side-branch of the ruling house of Prussia. The French government vehemently objected, so the Prussian prince withdrew his candidacy. Then the French government demanded that Prussian king never allow such an offer to occur again. Prussia refused.
* In 1884, the United States capped the Washington monument with a 100-ounce pyramid of aluminium to show off its industry.
* In 1887, a group of men against women in politics put Susanna Salter's name in the ballot list for Argonia in Kansas, for humiliation purposes. However, despite not even knowing she was a candidate until the ballot day, several defections and supports in her favor ended up securing her a large majority, hence making her the very first woman to be elected as mayor in the United States.
* In 1887, reporter Nellie Bly went undercover in the Women's Lunatic Asylum in New York City to investigate its conditions. She spent ten days there before people from the newspaper finally got her released. Afterwards, she wrote an exposé about the facility's deplorable conditions, which she later turned into a book,
* In 1888, Friedrich III became the German Kaiser, but by then, he had already been diagnosed with terminal cancer. He died 99 days later and was succeeded by his son Wilhelm II. Historians have noted that Friedrich was more liberal than his son, and speculate whether he could have transformed the German Empire into a Westminster-style democracy, possibly avoided the animosity his son would cause with Britain.
* In 1890, a Gatling was mated with a motor for the first time. This gave such promising results that Gatling himself patented a version with 10 barrels and a built-in electric motor in 1893. It fired 50 rounds per second, a rate that would go unsurpassed for 60 years.
* In 1895, a group of children were playing somewhere outside of Michigan City, Mississippi and had dashed across the tracks in front of an oncoming train some fifty-sixty yards down the railroad. All but one, a little girl who had suddenly froze up in fear of the train, made it across the tracks, but the little girl was very fortunate. An engine crewman by the name of John Luther "Casey" Jones was maintaining the engine aboard the train, and had spotted the girl. He risked serious injury, possibly even almost certain death, by shimmying out to the cowcatcher of the moving train to foist her up off of the rails to safety. The girl was shaken but unharmed, and the crewman, who was later promoted to engineer, would go on to
* In 1896, French scientist Henri Becquerel was working on an experiment involving a uranium-enriched crystal. He believed that sunlight was the reason that the crystal would burn its image on a photographic plate. With dark clouds rolling in, Becquerel packed up his gear and decided to continue his research on another sunny day. Some days later, he retrieved the crystal from a darkened drawer, but the

image burned on the plate (above) was, as he described, "fogged." The crystal emitted rays that fogged a plate, but were dismissed as weaker rays compared to William Roentgen's X-ray. Becquerel had discovered radioactivity.
* In 1896, the so-called "Women Rescue League" in Washington D.C. denounced bicycles because apparently
* In 1899 a certain Robert Baden Powell, the youngest colonel in the British Army, published a quite small and specialised book of war called Aids to Scouting, about the art of military scouting and how to train people in it. When he returned home a few years later he discovered it had become a bestseller, amongst teachers and teenagers. The man decided to run with it, wrote a new book called Scouting for Boys (which became the 4th best selling book of the 20th century) and started what might very well be the biggest youth movement of all time. Not all books pan out like they're supposed to.
* In 18th-century Portugal, it was fashionable for a young man to fall in love with a nun. He wasn't supposed to tell the Sister in question, or even make direct contact with her. He'd hang around the convent hoping to get a glimpse of her between the cloister and the chapel. He'd write poems to her — but would never mention her name, substituting another name that would fit the meter — which he might share with his friends or even publish on a broadsheet, or, if he were especially bold, tack on the convent door. If the Sister in question did identify him, or if he were to meet her by chance, it was considered an unmitigated disaster.
* In 1900, in what is now Ghana, a war broke out between the British and Ashanti Empires over a golden stool. To the Ashanti, the golden stool was an object of immense cultural and spiritual significance, representing the souls of all Ashanti, dead, living, and unborn. The British governor, Frederick Hodgson, was unaware of this, believing it was simply a throne, and rather unfortunately demanded the Ashanti hand it over so that he could sit on it. The result: the
* In 1900, the Russian archaeologist Friedrich Zibold discovered the remains of a mysterious domed structure in the Byzantine Crimean site of Theodosia. After studying the ruins and some terracotta pipes found nearby, he proposed that the structure was an air well designed to condensate moisture from the air into water, and built a replica to test it. This replica was successful and became the precursor of modern air wells. However, it was discovered later that the ancient structure was actually a tomb, the pipes were not related to it, Zibold had used the wrong materials for his replica, and weather conditions at the time (which had included thick fog) had exaggerated the results of the experiment. But by sheer coincidence these materials were the right type to make a working air well—had Zibold used the real ones in the tomb his experiment would have been a failure—and had weather conditions been more characteristic of the area (not as much fog), it wouldn't have worked as well as Zibold reported it did. Neither of these problems were discovered until 90 years after Zibold's experiment. In other words, Zibold inadvertently invented a new technology as a result of a failed attempt to replicate a
* In 1900, the Russian archaeologist Friedrich Zibold discovered the remains of a mysterious domed structure in the Byzantine Crimean site of Theodosia. After studying the ruins and some terracotta pipes found nearby, he proposed that the structure was an air well designed to condense moisture from the air into water, and built a replica to test it. This replica was successful and became the precursor of modern air wells. However, it was discovered later that the ancient structure was actually a tomb, the pipes were not related to it, Zibold had used the wrong materials for his replica, and weather conditions at the time (which had included thick fog) had exaggerated the results of the experiment. But by sheer coincidence, these materials were the right type to make a working air well — had Zibold used the real ones in the tomb, his experiment would have been a failure — and had weather conditions been more characteristic of the area (not as much fog), it wouldn't have worked as well as Zibold reported it did. Neither of these problems were discovered until 90 years after Zibold's experiment. In other words, Zibold inadvertently invented a new technology as a result of an attempt to

replicate a
* In 1902, some students left the Nanyang Academy (predecessor of Shanghai and Xi'an Jiaotong Universities) over what they perceived as unfair treatment of one disciplinary action, and their sympathizers arranged them to study European philosophy from Rev. Ma Xiangbo, a Chinese Jesuit monk. These students became the first students of Aurora University, a Jesuit university founded the following year under Rev. Ma's behest. However, in 1904, Rev. Ma
* In 1904, Japan started a war with Russia by launching a surprise attack on Russia's naval facilities in Port Arthur, without issuing a declaration of war. Almost forty years later,
* In 1905, a French newspaper began publishing a comic strip about a young housemaid called
* In 1906, an hour after their wedding, William McKeekin told his bride he was going to get a carriage. That was the last anyone heard or saw of him, and after seventeen years of searching for him, his widow sought an annulment.
* In 1907, a New York theater offered a "performance" by Sober Sue, a woman who allegedly never laughed. A cash prize was offered to anyone who could get her to do so; many of the city's best comedians made the attempt but in vain. It's known that this was set up by her manager as a way to trick comedians into performing for free, and strongly suspected that Sue's facial muscles were paralyzed in a way that
* In 1907, baseball player Germany Schaefer was part of an attempted double steal (with runners on first and third, the runner on first tries to steal second, hoping to draw a throw whereby the guy on third can steal home). The catcher didn't bite, so on the next pitch, Schaefer, now on second, turned around and stole
* In 1907, the Missouri Valley Intercollegiate Athletic Association was formed. In 1928, the conference split mostly along public/private school lines; both factions claimed the MVIAA name for a time. One faction eventually became known as the Big Six Conference, later the Big Seven and Big Eight. The other became the Missouri Valley Conference. The Big Eight merged with four schools from the disbanding Southwest Conference in 1996 to form today's Big 12 Conference, while the MVC operates to this day.
* In 1908-09, Douglas Mawson and Professor Edgeworth David were part of an Antarctic expedition. Mawson was working in the tent one day when the Professor asked if he was busy. Mawson said yes. A few minutes later, Professor David asked again, explaining apologetically, as Mawson quotes him, "I am so sorry to disturb you, Mawson, but I am down a crevasse and I really don't think I can hold on much longer."
* In 1911, academics Charlotte Anne Moberly and Eleanor Jourdain published an account of how, in 1901 during a trip to the Palace to Versailles, they found a road which led into the 1700s, where they saw historical figures including Marie Antoinette. Although most believe that the "Ghosts of Versailles" incident either sprung from the women misidentifying other guests in period dress or was a hoax plain and simple, the story remains a classic staple of real-life time travel urban legends (and was used in the French
* In 1912, the Red Sox beat the New York Giants on a sacrifice fly in the bottom of the 10th inning of Game
* In 1915, an ornithologist named Steve William Bebee hypothesized a "Tetrapteryx" stage in bird evolution where avian ancestors had feathers on their wings and legs. In 2003,
* in 1916 to his name. Nevertheless, his is still listed as an open case by the Clark County Sheriff's Office.
* In 1917 the Austro-Hungarians had finally broken through Italian lines at Caporetto and were marching on the valley where most of the Italian weapons were and still are made... Only to stumble on a massif fortified with thousands of guns. In the same days, the routed Italian soldiers running from the main Austro-Hungarian force suddenly realized that their homes were under attack, stopped running, and started fighting like demons (an Italian brigade was actually nicknamed 'Demons' by the Austro-Hungarians due their ferocity), with the Austro-Hungarian invasion being stopped dead on its tracks.

* In 1917, the German Foreign Office unilaterally (without the approval of the Reichstag or the OHL, both of whom thought it was a
* In 1918, Italian general Armando Diaz signed the Victory Address, a short document meant to inform the population of the victory against Austria in
* In 1920, mathematician Milton Kasner wrote a number on a blackboard: 1 followed by 100 zeroes (also depicted as "1e100"). He asked his nine-year-old nephew Milton Sirotta what to call it. The boy said it should be called a "googol", and the name stuck. From there, Milton coined the word "googolplex", which is a 1 followed by a googol zeroes (although his original definition was "one, followed by writing zeroes until you get tired"). The search engine
* In 1920, President Paul Deschanel of France fell through the window of the train while travelling on the Orient Express. He stumbled up to the nearest signal box in his pyjamas and told the signalman that he needed help and that he was the President of France. The signalman reportedly replied 'And I'm Napoleon Bonaparte'.
* In 1920s Japan, the Takenouchi Documents claimed that all world religions are the result of their founders travelling to Japan to study its spirituality, then
* In 1921, Commander Lumley Robinson of the British Royal Navy patented one of the most useful mechanical assembly aids ever invented and trademarked it under the name "Jubilee Clip". But if a fitter sees "Jubilee Clip" specified on a parts list and uses some random Asian make of worm drive hose clamp instead, no one is going to sue.
* In 1922 British Prime Minister David Lloyd George suggested that a good temporary solution to the growing religious, political and territorial tensions in Ireland would be to allow the more British-leaning counties of Ulster to be governed from Belfast, while the remainder of the region would be governed from Dublin with the two governments being separately elected and be allowed to pursue different policy paths. A century later, this "temporary" solution appears to have become permanent, albeit with some
* In 1924, as a way of mocking an art exhibition jury for rejecting his wife's paintings, Paul Jordan-Smith submitted an intentionally bad painting under the false name "Pavel Jerdanowitch", claiming that it represented a new art school called "disumbrationism".
* In 1924, the president of Xiamen University mentioned respect for Confucianism in a public speech, which did not sit up well with the college's radical elements, who left for Shanghai to found Great China University.
* In 1924 the Washington Senators beat the New York Giants on an RBI double which bounced over the New York third baseman's head in the bottom of the 12th inning.
* In 1926, chemist Andreas von Antropoff proposed an Element 0, which he called Neutronium, and placed this at the top of the Periodic Table (this was six years before the neutron was discovered). This was eventually dismissed. Turns out a form of neutronium DOES exist—specifically, degenerate neutronium in the cores of neutron stars. It isn't an element, though.
* In 1935, a Quebec politician magnificently named Hortensius Béïque said in the Legislative Assembly, "The roads are as crooked as the government." When chided by the Speaker, he apologized and retracted his comment: "I will say that the roads are
* In 1935 a trio of airmen flew a Fokker Trimotor named "Southern Cross" from Australia to New Zealand to demonstrate the practicality of carrying airmail across the Tasman Sea. Several hours into the flight (500+ miles), the center engine's exhaust manifold broke apart, one of the pieces entering the starboard engine and disabling it. The overladen aircraft began descending. The crew turned back home and started throwing out every loose item of equipment save for the cargo. Then the port engine began losing oil. Desperate, one of the airmen suggested crawling out on a wing strut with a leather satchel to recover the fuel in the useless starboard engine and then crawling out on the other wing strut to put it in the other one. Fighting the slipstream, he performed the feat not once but THREE times in the ten hours it took to reach land!
* In 1935, the first themed attraction in the United States, Santa's Candy Castle, was opened up in

* In 1937, Lester Gaba created a life-like plaster model for Saks Fifth Avenue, dubbed Grace by
* In 1938, Roy Plunkett, a scientist with DuPont, was working on ways to make refrigerators more home-friendly by searching for ways to replace the current refrigerant, which was primarily ammonia, sulfur dioxide, and propane. After opening the container on one particular sample he'd been developing, Plunkett found his experimental gas was gone. All that was left was a strange, slippery resin that was resistant to extreme heat and chemicals. He had invented "Teflon".
* In 1938, the E.H. Ferree Company of Lockport, New York introduced a new wallet sold at Woolworth and other department stores across the United States which included a replica Social Security Card to demonstrate how one could fit in the wallet. The card used the number 078-05-1120, which happened to be the actual Social Security number of Hilda Schrader Whitcher, the secretary of the vice-president and treasurer at E.H. Ferree. Despite the card being printed in red (real ones were printed in blue) with "SPECIMEN" written on it, a lot of people began using the number as their own, either due to cluelessness or to hide the fact that they didn't have one. Despite the number being retired a few years later (Whitcher was issued a new SSN), over 40,000 people have claimed that number as their SSN and 12 were still using it as late as 1977.
* In 1939's "Hamateur Night", Swami River, a middle-eastern performer, asks for a volunteer from the audience for his Indian Basket Trick. Egghead volunteers and gets into the basket, and Swami pierces it with a sword while he's inside. Instead of coming out unharmed as normally expected, Swami looks into the basket, and "tsk"s in disappointment, strongly implying that he accidentally killed him. He then gives the basket to the usher, saying
* In 1941 Stalin approved the formation of Red Army versions of the German 'Strafbataillons' (Punishment batallion) for deserters and cowards, with their discipline being ensured by close oversight from the NKVD (
* In 1942-3, Sicherheitspolizei (Si'po) and Ordnungspolizei (Or'po') police units in Poland were
* In 1942, the Russians arranged an assassination of Von Papen, the German ambassador to Turkey. They gave the would-be assassin a package which they said was a smoke bomb to cover his escape. The assassin decided that attacking under cover of the smoke was a better plan and so set it off early: it exploded killing the assassin but leaving von Papen unharmed except for the gore splattered on his suit. The Russians of course intended him to do this after shooting the target, thus preventing him from telling who was the guilty party.
* In 1943, actor Van Johnson was involved in a serious car crash, which left him severely injured, with damage to his face, skull, and neck, and had severed an artery, causing massive blood loss; in fact, he had just narrowly avoided getting decapitated by the accident. The accident had occurred right on the county border between Los Angeles City and Culver City, and had in fact thrown Johnson right across said border onto the Culver City side. When the Los Angeles police arrived on scene, Johnson, despite his serious injuries and bleeding profusely, was still, somehow, conscious, and as such they informed him that due to being on the other side of the dividing line, he would have to wait for an ambulance from Culver City. In response, the heavily injured Johnson was said to have quipped: "Tell me where the right side is, and I'll crawl there!"
* "In 1943 a group of British Army officers, working deep inside enemy lines, carried off one of the most dangerous and heroic raids in the history of warfare. [
* In 1943, American codebreakers decrypted a detailed itinerary for a inspection/morale tour of front areas by Admiral Isoroku Yamamoto. The problem was that the US was heavily relying on Japanese confidence in their "unbreakable" code, which had been in use since before Pearl Harbor — but had been broken very early on. To conceal the fact that their information came from breaking the code and preserve that source of intelligence, the mission was set up to make it appear that a flight of P-38's just happened to "accidentally" stumble on Yamamoto's flight, and the success of the mission was hidden even by the US. It wasn't until after the Japanese acknowledged his death a month later that Americans learned this

themselves, and that it was a deliberate strike was hidden until well after the war. Astonishingly, it did pass as an accident, even though the P-38s were right at the limit of their operational range when they encountered Yamamoto's aircraft, meaning they had to have taken off at exactly the right time for interception.
* In 1943 U.S. military intelligence intercepted a message stating that Admiral Isoroku Yamamoto, commander of the Imperial Japanese Navy, would be flying from point A to point B at a certain time. The Americans successfully intercepted the plane and shot it down, killing Yamamoto, the architect of
* In 1944, the U.S. Army Air Force began using old battle worn bombers as Assembly Ships, (Sometimes called "Judas Goats") to assist squadrons in assembling into formations for bombing missions over Germany. These were painted in bright garish colors, to make them easier to spot by the crews of the bomber groups. These elderly B 24s, and B 17s were only used to form up on, and did not continue to the targets. Some examples can be seen
* In 1945, the Nazis had concentration camp inmates in death marches far from Allied forces which would have freed them.
* In 1945 US Army Air Force navigator Raymond "Hap" Halloran was shot down over Tokyo, Japan and was captured by a group of civilians and soldiers. They then beat and stripped him naked before locking him in one of the tiger cages in the Ueno Zoo where people would look at him like he was one of the animals until he was taken to an actual POW facility.
* In 1946 Friz was suspended for a month for refusing to direct "Hollywood Daffy," feeling it was too much like Avery for his style. Hawley Pratt (a layout artist in the Freleng unit) directed it uncredited.
* In 1946, the NCAA made a new rule explicitly disallowing ties in track and field events.
* In 1947, Isamu Noguchi created a model for a sculpture called "Sculpture to be seen from Mars", which depicted a giant face staring up at the sky. In 1978, Viking 1 captured an image of a mountain which resembled a face on Mars.
* In 1948, an attempted robbery took place in Los Angeles, in which the perpetrator was shot and killed. Normally, this wouldn't lead to much... but the investigation revealed an illicit partnership (and allegedly a love affair) between LAPD vice cop Elmer V. Jackson and madam Brenda Allen. The subsequent prostitution and police corruption trials resulted in a massive shake-up and reform of the Los Angeles Police Department.
* In 1948, shortly before the Dominion of Newfoundland unified with Canada to become the province of Newfoundland and Labrador, a significant portion of Newfoundlanders advocated instead becoming the 49th state of the United States
* In 1948, the Red Sox were in control of the American League pennant race in the last month only to drop it to the Indians. Boston came back to tie it up and force the first-ever A.L. playoff game. Thanks to the poor choice of pitcher Danny Galehouse (8-7), Boston lost the game and the pennant to the Indians.
* In 1949, 6 working prototypes of the Taylor Aerocar, a flying car, were built. However, due to financial problems and a lack of a big enough target market, the car wasn't ultimately produced.
* In 1949, a young actress named Jean Spangler went missing in Los Angeles. She left her toddler daughter with her sister in law one evening, saying she was going to meet her ex-husband to pick up a child support check then to work a night shoot, never to be seen again. Even 70 plus years on, no one has ever managed to find her body or even a prime suspect. Two days after she was reported missing, her ripped purse was found in Griffith Park with a note written to a Kirk about going to see a Dr. Scott for a procedure while her mother was out of town. Her family and friends didn’t know who Dr. Scott was but her mother said someone named Kirk had picked her up at home a few times but he’d stayed in the car. She’d been working on a movie with
* In 1949's "Slide Donald Slide" Donald plays baseball and runs around the four bases, but as he slides for home, his butt gets poked by Spike's stinger and he jumps in pain as the radio announcer tells him he's out.
* In 1950, during the crowning ceremony of Belgian king Baudoin I, a Communist

party member, Julien Lahaut shouted: "Vivé la République" ("Long live the Republic") through the hall. Lahaut was assassinated a week later. Decades later, research has pointed out that Lahaut didn't shout this slogan at all. It was the politician standing next to him: Georges Glineur. Still, the quote is still associated with Lahaut to this day.

* In 1950, Estela Films released an animated, musical, feature-length film based on the Cinderella story. The film had the misfortune of coming out the same year as the Disney film and, unfortunately, Disney, trademarked the Spanish name of the story, causing the film to be called

* In 1950s England, there was the notorious Bentley case (portrayed in the movie

* In 1951, Centaur Productions made two stop-motion animation musical shorts,

* In 1951, meat from a mammoth found preserved in the Siberian tundra was served at a very exclusive dinner. Or so the story goes, DNA analysis of a piece left over showed it was actually sea turtle meat. Although other stories have surfaced claiming it's edible but tastes about as bad as you'd expect meat more than 200,000 years old to taste.

* in 1954. Again, the main characters escape, but most, if not all, of the redshirt survivors are finally killed, ending four seasons of slaughter.

* In 1954, an incident happened in Christchurch, New Zealand where Pauline Parker and her friend Juliet Hulme killed her mother. Their story was made into the film

* In 1955 somebody got the idea to adapt a popular episode of a TV anthology series to film.

* In 1955, some students at Chalmer's Institute of Technology, Gothenburg, Sweden, invented a whole new branch of mathematics ("Fatilary Calculus") by making up their own sciencey-sounding words. They presented it in a mock PhD defense, to which several national newspapers were invited. Some of them bought the story and published.

* In 1956, a B-47E Stratojet carrying two nuclear fissile cores (not complete weapons, just the nuclear part), descended through the clouds at 14,000 feet to refuel. It never made contact with the tanker, vanishing without a trace. To this day, no signs of the aircraft, its cargo, or the crew have ever been discovered.

* In 1956, Ruth Handler saw a German Bild Lilli doll while on a trip to Europe. While Bild Lilli was aimed at adult men (she was based on a bawdy character from a German comic strip), Handler thought that little girls, like her daughter Barbara, would be interested in a doll portrayed not as a child like most of the American dolls made at the time, but as a glamorous fashion model and career woman — and since she and her husband were the co-owners of

* In 1956's "Gee Whiz-z-z-z-z-z-z", Wile E. Coyote purchases a "Triple Strength Battleship Steel Armor Plate", which the Roadrunner

* In 1958's "A Pizza Tweety Pie", Sylvester is waterskiing behind a motorboat in pursuit of Tweety through the canals of Venice, Italy. Sylvester raises himself by the tail to avoid a mooring mast, but impacts hard against a pedestrian bridge that's marked "Duck-a you head / Lowla Bridge-ada" (a

* In 1958, Scottish folk musician Alex Campbell married US folk musician Peggy Seeger so she could stay in the UK with Ewan MacColl, who was still married to his second wife at the time. Seeger and MacColl finally got married in 1977. (According to Campbell, the whole thing was made even more surreal because Seegar was pregnant. The priest was lecturing him about getting this girl into trouble, and he just wanted to say "I'm not the guy you want to be talking to here...")

* In 1958, the Canadian Broadcasting Corporation made an experiment with subliminal advertising: during a popular show called

* In 1960, Pittsburgh Pirates announcer Bob Prince was calling the World Series for NBC. With Game 7 tied in the ninth inning, the network sent him down to the team's clubhouse for postgame interviews. Prince was walking through the stadium when he heard the crowd explode with a roar, but he didn't get a chance to hear what had happened. When Prince reached the clubhouse, he started randomly interviewing players, and when he came to Bill Mazeroski, all he asked him was how it felt to be a member of the world champions before moving on to the next player. It wasn't until hours later, when Prince asked his wife how the game

* In 1961, Clarence Earl Gideon, a drifter who had recently taken up being an electrician, was accused of burglary after a Panama City, FL pool hall was robbed of some small change and beverages. Too poor to afford an attorney, he was subsequently denied a public defender by the judge (only in capital crimes did the judge have to provide a public defender). He represented himself in his criminal trial, and although observers say he did a pretty good job for a
* In 1961, the US almost nuked North Carolina (a state on the USA's eastern coast) with a 3-4 megaton bomb when a mid-air refueling accident damaged a B-52 nuclear bomber aeroplane and forced its crew to bail out, leaving the bombs onboard. The aircraft broke up in mid-air, causing one of the two bombs it had carried to deploy its parachute and arm itself as per a usual bomb-drop (unlike normal bombs, nuclear bombs were fitted with parachutes to give the bomber time to escape the blast). Thankfully, the bomb couldn't have detonated without a crew activated safety switch, so there was no danger of full detonation. The design of the bomber aircraft and bombs, and the routine nature of such flights and refuelings (a fleet of these bombers was in the air at all times, ready to nuke the USSR at a moment's notice if necessary), meant that a repeat of the incident was almost inevitable until the parachute system was replaced.
* In 1963, Ferrari was desperate to secure funding, and the company entered serious talks with Ford about purchasing the company. When Enzo Ferrari learned that the Americans wouldn't allow him to keep control of the racing team, he broke off the negotiations. Ford (and Henry Ford Jr. in particular) was so incensed that they designed the GT40 specifically to challenge Ferrari's record in the 24 Hours of Le Mans. The GT40 went on to win Le Mans four times in a row. This event was dramatized by the 2019 film
* In 1963, King Features produced a string of shows based on three of their comic strips:
* In 1964, a Candy Striper Barbie outfit was released (800 series, #889). The ensemble featured a red-and-white striped jumperskirt over a white blouse, with sensible white sneakers, a nurse's cap, and a tray filled with items for Barbie's patients (orange juice, a hot water bottle, a washcloth, etc.).
* In 1964, Israeli critic Khayim Gamzu wrote a review about a play named
* In 1964, the Ford Mustang and the Pontiac GTO started the muscle car era in the US. There had been high-performance packages for cars going back to the '40s (the 1949 Oldsmobile Rocket 88 is sometimes called the first muscle car), and all of the major Detroit automakers had been involved in racing for a while by then, but these cars helped bring performance to the masses by costing far less than a true dedicated sports car. The Mustang in particular did so at the compact end of the auto market, inventing the "pony car" that was more lightweight than the full-size muscle cars and marketed to young buyers.
* In 1964, when the disused section of railway line between the Bluebell Railway and the national network was being demolished, the contractors' diesel locomotive broke down, and they had to hire
* In 1965, a clandestine group of army officers in Indonesia attempted, and failed, a coup against the military leadership. The army promptly blamed the whole incident on Indonesian communists...not the party, mind you, but
* In 1966, a B-52G collided with its KC-135 refueller off the southern coast of Spain, the KC-135 exploding and the B-52 breaking up, causing a Broken Arrow situation. Of the four nuclear weapons being carried at the time by the bomber, three dropped on land near the fishing village of Palomares, Spain, and the remaining one fell in the Mediterranean Sea. All four devices were eventually recovered, though the conventional explosives of two of the three that fell on land detonated, contaminating the area with weapons-grade plutonium.
* In 1966, a man named Mike DeBardeleben was acquitted of raping a young girl
* In 1966, American Dr. Sam Axelrad amputated the arm of Viet Cong soldier Nguyen Quang Hung, who had been shot by American soldiers. The arm was amputated to prevent further infection, and Axelrad took the arm home as a souvenir. 47 years later, Axelrad
* In 1966, Sid Ramin composed a catchy jingle for a Diet Pepsi ad. The tune was

covered by the Bob Crewe Generation as "Music to Watch Girls By" and became a hit in 1967, reaching #15 on the
* In 1967, the Colts would finish tied for the best record in the NFL at 11-1-2 but still managed to miss the playoffs due to two games with the divisional rival Los Angeles Rams. Following a Week 5 game at Baltimore that ended in a 24-24 deadlock; the teams played again on the last week of the season in Los Angeles for the Coastal Division crown and lone spot left to be settled. The Rams would end up blasting the Colts 34-10 to leave Baltimore the odd team out in the postseason.
* In 1967, the second "London Bridge", constructed in 1831, was sold and rebuilt in Lake Havasu City, Arizona. It's widely believed that the man who bought the bridge, Robert P. McCulloch, had purchased it thinking he was getting the far more iconic Tower Bridge, and therefore got ripped off. This was merely a comical rumor and was repeatedly stated to be untrue by McColluch and the bridge seller Ivan Luckin after it started to spread.
* In 1968-9, Quentin Collins, as a ghost, haunts Collinwood in an attempt to bring his nephew Jamison back to life in David's body.
* In 1968, Alexander Dubček of the government of Communist Czechoslovakia announced a period of political liberalization and reform, granting the citizens freedom of speech, movement, and travel, raising the possibility of a mixed economy and even multiparty politics. This was known as "socialism with a human face". The USSR didn't like that. Not one bit. So on 21st August 1968, they and their allies invaded Czechoslovakia and installed a new puppet government to roll back Dubček's reforms and return to socialism
* In 1968, Catherine Yasinchuk, an inmate at a Philadelphia mental hospital since 1921, was found to be perfectly sane; she had been locked up after being encountered on the street because no one understood Ukrainian, the language she was speaking.
* In 1968, Hot Wheels came up with their first original car design, the
* In 1968, Jim Morrison vetoed a request from Buick, which the other members of the Doors approved of, to use the song "Light My Fire" in a commercial. In a bit of self-parody over the affray, when Robbie Krieger penned the song "Touch Me" later that year, he ended it with the four-note
* In 1968, many students and antiwar activists, many if not most of whom had previously sported the long/unconventional '60s "hippie hair", cut their hair as part of a "Get Clean for Gene" campaign in support of Democratic Presidential candidate Eugene McCarthy, who ran on a platform in opposition to
* In 1968 Pat Paulsen, a comedian who became popular on the Smother's Brothers show, "ran" for president. He would fly into a town, get off the plane and give a speech which always included the sentence, "I've been all over the United States, and met all kinds of people, but the people of are the best in the country." Someone put together a video of him saying just that sentence in town after town. ["Picky, picky, picky!"]
* In 1968, Swedish soprano Birgit Nilsson underwent an operation (officially for "gallstones"), and four months later, she was back on stage, singing Brunnhilde at the Vienna State Opera. Only many years later, in 1995, did she reveal the real reason for her operation: she had been stricken with cancer. She had never talked about it before because she, in her own words, "couldn't bear being pitied."
* In 1968 The Adventures of Gulliver was made as a loose adaptation of the 1st story of the original book.
* In 1968 the Houston Cougars defeated the Tulsa Golden Hurricane 100-6 in the most lopsided game ever between two major college football teams. Houston's second-to-last touchdown was scored by receiver (and future country music star) Larry Gatlin.
* In 1968, the Pennsylvania Turnpike was rerouted east of Breezewood, PA in order to bypass the Ray's Hill and Sideling Hill tunnels, two narrow tunnels that created traffic backups. This left a 13-mile stretch of old turnpike abandoned to public use, but still visible to this day. Part of the old turnpike became part of the interchange into Breezewood, which makes an abrupt left turn just before a long since abandoned bridge. The abandoned stretch also includes Cove Valley Travel

Plaza, a rest area serving westbound travelers which was torn down after its abandonment. A third tunnel, the Laurel Hill Tunnel west of Somerset, PA, was also bypassed due to traffic demands but remains visible.
* In 1968, the Philadelphia Eagles started 0-11 and had their sights set on USC's Heisman-winning running back
* in 1968. Two missile maintenance technicians were servicing a Titan missile, when one fell off the platform to his death below. Since the remaining technician was now by himself on the platform, his superiors had to first report a Two Man Rule violation, then report about the fallen crewmember.
* In 1969 Delta Green organizes an unsanctioned raid on Cambodia, where 300 Marines paradrop on Cambodia attempting to stop the summoning of a Great Old One, the operation fails spectacularly. When the US and South Vietnam invade Cambodia later, they meet stiff resistance from well-prepared Viet Cong and Khmer Rouge, the military's Joint Chiefs consider the intervention in Cambodia a failure due Delta Green's shenanigans seven months prior. This is the final nail in the coffin and Delta Green is officially deactivated in 1970.
* In 1969, psychologist Lawrence Kohlberg studied moral reasoning by presenting his subjects with a series of stories dealing with moral dilemmas and asking them why the people in the stories should (or shouldn't) have taken the actions they did. The most famous of these stories is the
* In 1969, Reyna Marroquin was murdered by her boss/lover after she told his wife about the affair and her pregnancy. He stuffed her remains in a barrel, intending to dump it in the ocean. When it proves to heavy to lift, he stashed it in the basement of his house. It remained there for the next
* In "1969", Teal'c answers a query about the tattoo's symbolism with, "Slavery. To false gods."
* In 1969, the band decided to record some songs together in a studio, and later in an impromptu concert on the Apple rooftop, in what would become the album
* In 1969 the Swiss company Helbros brought out a "lunar watch" for the use of astronauts, which divides the lunation into 30 "lunes" of 24 "lunours". (Centilunours and decilunours for shorter periods.)
* In 1969, two Irani conmen were sentenced to one year for each of their victims, for a total of 7109 years.
* In 1970, a dead sperm whale washed up on the beach near the town of Florence, Oregon. The
* In 1970, as the Canadian government was facing the French Canadian separatist terrorists, the Front de libération du Québec (FLQ), Prime Minister
* In 1970, Earl Brydges, majority leader of the New York State Senate (and thus one of the three most powerful politicians in the state), wanted to head off attempts to legalize abortion in the state. Some were before the legislature, but he decided to supersede them all by writing his own bill, even more liberal than any introduced by more liberal legislators, with the idea that it would be too liberal to pass and thus he could put off the reformers by pointing to the failed bill. However, it passed, and after a tense moment when an upstate assemblyman changed his vote after they had been counted, allowing the governor's veto to be overriden, New York became the first U.S. state to legalize abortion, three years before
* In 1970, Melanie Safka released a song called "Look what they've done to my song, ma", which opined in the destructive effects of commercialism on music. A few years later, Generals Mills modified the song and used it in an
* In 1970, segregationist Georgia governor Lester Maddox walked off during an appearance on
* In 1970, Yuri Bezmenov, a KGB agent stationed in India, decided to escape by disguising himself as an American hippie.
* In 1971, a clerk intending to send out a routine test alert to all radio stations in the network accidentally loaded a Telex program tape that included the day's codeword — long story short, they accidentally convinced every radio station in the country that the government had confirmed a catastrophic emergency of some kind and would broadcast important news shortly. To add insult to injury,

the attempted retraction message had the
* In 1971, Melanie Safka wrote the song "Look What They Done to My Song, Ma", about this very trope and how much it sucks to write a song that mean something to you, and then, having someone taking that song and turning it into something completely unrelated. So, obviously, in the 1980s the Quaker Oats Company used a version of that song in their commercials for Instant Oatmeal, with the revised lyrics "Look what they've done to my oatmeal".
* In 1971, NRK-TV introduced a nameless marionette and asked the viewers to name it. After it had became famous as "Titten Tei", Andre von Drei, the freelance designer who had retained the rights to his work but was not involved in the naming, tried selling duplicates of the marionette as "TV Doll".
* In 1971, scientists aroused interest in whalesong, which is sufficiently eerie and psychedelic. It's an
* In 1972, Siemens, a German megacorporation, sued a German satirist for writing a satirical history of the company. The trial ultimately brought much more attention to the company's sordid history during World War Two: using forced Jewish labor in their factories to supply electrical parts to Nazi concentration camps and death camps.
* In 1972 Spain, in the Gabriel Granados case, the prosecutor asked for a
* In 1972, Stanford psychologist Phillip Zimbardo conducted an experiment to test if placing normal, emotionally healthy people in a prison-like setting increased their capacity for violence. Half the test subjects were assigned the role of guards, the other half were prisoners. The result both plays straight and inverts this trope: by the end of the first week of the study, both groups had become so hostile to each other that the experiment had to be cancelled. The experiment has been questioned, though, because subjects were not screened for whether they already had tendencies toward violence and Zimbardo himself participated (playing the warden)-a huge no-no for experimenters. These results cannot be replicated, as
* In 1973, a weekly comic magazine associated with the series blew the secret that the Doctor's home planet is named Gallifrey, months before it was scheduled to be revealed on screen.
* In 1973, Johnny Carson made a joke about a potential toilet paper shortage. This caused viewers to stockpile toilet paper, thus creating the very shortage he'd joked about.
* In 1973, Logan, Charles Xavier and Erik Lehnsherr sport fashionable '70s-style sunglasses.
* In 1973 the all-female dance troupe Pan's People made a video to the original song in which they dressed as
* In 1974, Mexican authorities arrested a number of men for smuggling indigenous artifacts. Among them was one
* In 1975, a Gangsters' skit is made with Lefty – not the salesman, but a Fat Blue character as a scared kid – intimidated by a pair of gangsters. He's told to remember the "secret knock" (three knocks) and that he'd better answer the door when he hears the knock or else. Lefty eventually decides he doesn't want to be bullied anymore and leaves through a back door, leaving the gangsters stranded outside (and – as the skit ends beforehand – likely easy targets for arrest by the police, who have been searching for them).
* In 1975, another Soyuz mission had its capsule ejected while heading for orbit as the third stage was deviating too much, but by then they had already jettisoned the LES and the crew capsule was sent clear by the explosive bolts detaching it from the launcher.
* In 1975, Indonesia then tried to convince the international world that their invasion of East Timor was in fact an independent action by pro-Indonesia factions such as APODETI by giving their paratroopers Russian weapons, and...
* In 1976, amateur musician John Trubee, then a teenager, found an ad in a tabloid for a song poem company
* In 1976 Canon introduced the AE-1, the first 35mm camera with an embedded micro-computer; the commercial announced that Canon had "unmanned 35mm photography".
* In 1976 in New York, Keith once paid some NYC cab drivers to block traffic on

the street in front of the hotel so he could throw the entire contents of his hotel room out the window.
* In 1976, KSAN free-form radio DJ Terry McGovern recorded a cheery ballad called "Beam Me Up, Scotty" (Baseball Records BR-1011). It received plenty of airplay on the
* In 1977, a year after Deirdre Hall began playing Dr. Marlena Evans on
* In 1977, six schools in the Midwest formed the Mid-Continent Athletic Association, a football-only league, with play starting in 1978.
* In 1977, the 1000th episode was commemorated with a primetime special on PBS entitled
* In 1977 when Marvel Comics got the rights to the Hanna-Barbera characters, certain books featured a two-page teaser of another character's book with a "to be continued" tag for that other character's book.
* In 1978-1979 in France, a series of various felonies (five asaults, one murder, car thefts...) in the same region was eventually attributed to Alain Lamare, a gendarme who was part of the persons who investigated this crime spree. Lamare was diagnosed schizophrenic and declared non-responsible, so he was never tried.
* In 1978, a TV station in Wichita, Kansas ran a subliminal message telling the BTK killer to turn himself in. It didn't work.
* In 1978 Belgian billionaire son Édouard Empain was kidnapped. The abductors cut off a piece of his pinky finger and send it by mail to invoke pressure on the family.
* In 1978, Digital Equipment Corporation came out with the VAX line of mini-computers. In the UK, there was a line of vacuum cleaners named VAX. No problem so far, as the two trademarks didn't clash for reasons explained in the intro. But DEC's competitors had a great deal of fun borrowing the advertising slogans from the vacuum cleaner company, such as "Nothing sucks like a VAX".
* In 1978, notorious Australian criminal Mark "Chopper" Read tried to kidnap judge Bill Martin in order to force him to release his friend from prison, but Martin and his friend Ernie Trotter were able to hold him off until the police arrived. Read served 12 years of a 16-year sentence. He wrote to Martin while inside to apologize, and Martin wrote back saying he "
* In 1978, on the flight where he mysteriously disappeared, Australian pilot Frederick Valentich sent a series of
* In 1978 the Soviet satellite Kosmos 954 broke up on re-entry into the atmosphere over the Northwest Territories of Canada, spreading radioactive material all over the wilderness around Yellowknife because there was a nuclear reactor on board. The Soviets eventually paid $3 million Canadian dollars to help with the cleanup.
* In 1979 inventor Carlisle Dixon patented a system for single people to identify potential friends/lovers in crowds. Each person programs a personal transceiver with musical, literary, and other preferences. When two such transceivers detect each other, the person carrying them is told how compatible they are.
* In 1979, Peter Strelzyk and Guenter Wetzel were able to escape along with their families (eight people total) from Poessneck, Thuringia to Bavaria. How did they escape?
* In 1980, 27-year old Chris Smith challenged longtime Democratic Congressman Frank Thompson of New Jersey. He had previously challenged Thompson in 1978 and lost 61%–37%. He was thought to have no chance of winning, but then Thompson was indicted in the ABSCAM sting operation, where he was caught taking a bribe. The controversy of the scandal, combined with Ronald Reagan's strong performance in the district during the presidential election allowed Smith to defeat Thompson 57%–41%. When Smith was up for reelection in 1982, many had dismissed his win as a fluke and expected the Democratic challenger, New Jersey Senate President Joseph P. Merlino, to win. After one of their debates, when Smith offered pleasantries Merlino rebuked him, saying "Beat it, kid." However, despite Democrats regaining many of the House seats lost in 1980, Smith managed to win reelection 53%-47%. As of 2021, Smith is still in office, having won at least 55% of the vote in each subsequent election.
* In 1980, an uprising in West Cuba leads to the collapse of the communist

government and the two countries' reunification.
* In 1980, Australian producer Reg Grundy bought the rights to the NBC game show
* In 1980, in the midst of the Iranian Hostage Crisis, at least one man applied to Congress for a Letter of Marque. He planned to seize tankers carrying Iranian oil out of the Gulf. Predictably, he was turned down.
* In 1980, Rhode Island sought to reduce some of their harsher penalties for prostitution, but the legislation wound up accidentally deleting the specific crime of selling sexual services. While soliciting on street corners was out, conducting the entire transaction indoors was technically legal, a massive loophole that lasted until 2009.
* In 1980, the most repeated ad shown during the parade was for a now-defunct toy store called Child World.
* In 1981, directer Larry Cohen was removed from the director's chair of a remake of
* In 1981, following two very successful albums, half the original line-up of
* In 1981, John Anderson released "Chicken Truck" and a cover of Lefty Frizzell's "I Love You a Thousand Ways" as a double A-side. Radio preferred the former, getting it to #8 on the country charts while the latter stalled out at #54. But in Canada, the reverse was true: "Chicken Truck" was not released there at all, so "I Love You a Thousand Ways" got the bigger radio push, making #11 on the
* In 1981, John Russo's girlfriend, who was working at a rest home, told him that an old black man with a harmonica had been admitted. Fusco went to visit him and on the way dreamt up a story about what would happen if the player was a legendary blues player. This gave him the idea for
* In 1981, the town of Sunol, California elected a dog named Bosco as its mayor, beating out two human candidates. However, Sunol is an unincorporated community, so 'mayor' is a purely honorary position with no actual authority. This didn't stop the Chinese government-run
* In 1982, British Airways Flight 9 encountered a cloud of volcanic ash that sand-blasted the aircraft's windows and choked all four of its engines with rock fragments causing them all to flame out. The aircraft was reduced to gliding over the ocean, miles away from the nearest airport (or indeed any land whatsoever), with little hope of relighting the apparently dead engines, and the point rapidly approaching where the only option left was ditching (a maneuver never attempted in a 747, and one that has far more often than not gone horribly wrong on other models of airliner). Amid their frantic attempts to restart the engines the crew did manage to find the time to make the following announcement (called "a masterpiece of
* In 1982, just after he left The Babys, John Waite reached #16 on the US chart with "Change," originally written and performed by Spider, a band that few remember. Spider also gave us Anton Fig, drummer for the band on Late Night with David Letterman.
* In 1982, some teenagers threw a switch in New Jersey, sending a Conrail commuter train crashing into a factory, killing the engineer.
* In 1982, the principal of Hazelwood High School removed two pages from the school newspaper that he found objectionable, two stories on teen pregnancy and teen marriage. The author of the stories brought him to court, and the case went all the way up to
* In 1983, Henry McCollum and Leon Brown (two mentally handicapped half-brothers) were accused of raping and murdering an 11-year-old girl. There was no physical evidence, the confessions were inconsistent, and what little did match up was already known by the police. They were sentenced to death (though Leon later had his sentence commuted to life in prison) in 1984. It wasn't until 2014, when DNA implicated a sex predator named Roscoe Artis (who lived 100 feet from where the little girl's body had been found, had been implicated in a similar murder a county over, and was convicted of murdering another young girl a month after the Brothers had been arrested in the same neighborhood) that the two were released. By this time, their mother had died just a year before. Both were ultimately pardoned in June 2015.

* In 1983, there was a strip that featured him choosing to walk away from Lucy and the ball, which certainly represents a kind of victory in itself. In the last panel of the strip Charlie Brown, having walked away from Lucy, sees a number of other kids holding footballs for him.
* In 1983, they gave us the board game "Three-Cornered Pitney", which had similarly ridiculous rules, as it was designed by one of the creators of 43-Man Squamish.
* In 1983, Vanessa L. Williams was crowned as Miss America. 10 months after winning the crown, several nude photos of her (which had been taken before she became Miss America) were sold to
* In 1983 Victor Jovica defeated Ric Flair for the NWA Title, but this was reversed three days later because Jovica had his legs on the ropes when he pinned Flair.
* In 1983, war tensions were high between NATO and the Warsaw Pact. For a few years, the USSR under Brezhnev and Andropov were terrified that a United States first strike was imminent, and had instituted the RYaN (from the Russian meaning something like "Nuclear Rocket Attack") program to find any hints of warlike intentions.
* In 1984, rap group U.T.F.O. released a song about a girl who ignored their advances called "Roxanne, Roxanne." This song was soon followed by "Roxanne's Revenge," an answer song by seminal female rapper Roxanne Shanté told from the female's point of view. This song spawned a well-known answer song by
* In 1984, Rev. Jesse Jackson exhorting his Afro-American listeners to run for
* In 1984, South African wrestler Steve Simpson came to the USA and formed the S&S Express with Joe Savoldi. In 2012 Nevaeh formed an alliance with Sassy Stephie and later Jessie Bell Smothers, which came to be known as the SNS Express.
* In 1985 a national campaign against unemployment in Britain attempted a "Hands Across Britain", a human chain the length of Britain in an attempt to get the government to "do something" about unemployment. It didn't work, the (Thatcher) government just ignored it anyway.
* In 1985, David Gilmour and Nick Mason made serious efforts to revive
* In 1985 DC decided that Superman should be the only survivor of Krypton and killed
* In 1985 MIT pranksters managed to get a sculpture included in an exhibition at MIT's List Visual Art Center. Titled "No Knife", it consisted of an overturned wastebasket on which was a dining hall tray, plate, bowl, glass, fork and two spoons. It was accompanied by an artist's statement describing it as "a study in mixed media earth tones", and going on to praise and interpret it ("The casual formalism of the place setting draws upon our common internal instincts of existential persistence to unify us with the greater consciousness of human bondage") in a parody of the style of art criticism. It took the gallery staff several hours to discover it was not actually part of the exhibition.
* In 1985, Playhouse Video released ten compilations featuring the best clips from
* In 1985, Robert Ballard mounted two expeditions to find the wreck of the
* In 1985, serial killer Leonard Lake swallowed a hidden cyanide pill while in police custody. Police were initially confused as to why he took such drastic measures (he was brought in for a robbery at a hardware store) but when they started to dig a little more into Lake's past, they uncovered the ghastly secrets Lake had hoped to take to the grave with him.
* In 1985, there was an infamous Japanese Kleenex commercial which featured a young woman playing with a kid dressed as an ogre, with the beautifully haunting "It's a Fine Day" sung in the background. Since most Japanese didn't understand English, many thought the song's lyrics were a German curse and urban legends told about the misery and deaths plaguing the actors who played the kid and woman (in reality, Japanese actress
* In 1985, there was an Italian TV ad where a man drives home a luxury car, checks the hour on a luxury watch, pulls the dress while casually showing the tag (with the name of the stylist), and then enter his home, where a party is going on. It's a spot for Barilla, a brand of pasta (as in spaghetti, rigatoni, etc.).

* In 1986, a man named Michael Lush fell to his death while rehearsing a bungee stunt for
* In 1986, MTV sponsored a contest called "Make My Video" in which viewers were encouraged to send in a video set to
* In 1986, the Greater London Council, led by Ken Livingstone, was disbanded by the Thatcher government and power was devolved to the local boroughs. In 2000, the Greater London Authority was formed, and the first elected Mayor of London was the same Ken Livingstone. He started his victory speech by saying, "As I was saying before I was so rudely interrupted fourteen years ago..."
* In 1987, after suffering several miscarriages, Annugetta "Ann" Pettway abducted Carlina Renae White and raised her under the name of Nejdra "Netty" Nance. 23 years later, becoming suspicious by several elements such as her not having any birth certificate, Carlina went on kidnapped children websites and found the truth.
* In 1987, Freddy Cannon sang a reworked version of his 1962 hit "Palisades Park" that was used to advertise Kennywood Park, the lyrics being altered to mention various rides that were active at the time.
* In 1987, Jim Crockett Promotions took over/bought (Nobody seems to know which is the absolute truth) Championship Wrestling from Florida and bought the
* In 1987, there was an attempted coup by a faction in the Armed Forces of the Philippines known as the
* In 1988 an Australian breeder named Wally Conron created the "Labradoodle" (Labrador Retriever x Standard Poodle mix) as we know it. He intended to make a new service dog-geared breed meant to be low-maintence, friendly, and easily trainable. However, the popularity of the mix led to others breeding their own Labradoodles and other similar mixes with cute names (Goldendoodles, Cockapoos, etc). Since then, numerous other Poodle mixes have popped up and Labradoodles are still not any closer to being a "real breed" than they were in the 1980s. Wally Conron no longer breeds them and says he regrets starting the "designer dog" fad. He says that he created "a Frankenstein" and that Labradoodles (and similar mixes) are generally poorly bred, having many problems and no breed standard instead of the original intention of fixing the "flaws" of Poodles and Labradors.
* In 1988, CBS aired an all-morning long marathon of the entire first season of
* In 1988, Ivan Lester McGuire went skydiving and recorded his dive. Partway through the video, he appears to be looking for his ripcord, which he can't find, since he'd forgotten his parachute. At this point the camera goes spinning until the video glitches out, as footage of the final stage of his descent was destroyed on impact.
* In 1988, two Brazilian comedic newspapers (who would later join forces and have a TV show) launched a mayor campaign for
* In 1989, after the wife of the Yorkshire Ripper Peter Sutcliffe won £600,000 in libel damages from Private Eye, the Editor, Ian Hislop said "If that's justice, then I'm a banana!" In a much later interview, he explained he had a whole speech prepared about how ridiculous the ruling was on multiple levels, but he was too angry to say any of it, and this was the first thing that came into his head. (The damages were reduced to £60,000 on appeal.)
* In 1989, a United States Delta Force team cornered Panama dictator Manuel Noriega in the Apostolic Nunciature of the Holy See, the diplomatic quarters of Vatican City. Since they couldn't go in and get him, they instead enacted a campaign of psychological warfare known as
* In 1989, clothing chain Express started a second store brand for men's apparel known as Structure. This was renamed Express Men in 2001.
* In 1989, Pepsi-Cola paid $5 million to use Madonna's single "Like A Prayer" in a commercial, but the soft drink company chickened out after protests by religious groups in the wake of the song's video release...A video that, for anyone that doesn't know, includes burning crosses, stigmata, and Madonna having sex with what they assumed to be "Black Jesus"
* In 1989, there was a then-rare occurrence of this in the tech industry when MiniScribe, who made hard drives for PCs, Macs, and other desktop computers, announced that they'd been padding their sales numbers for years. It turned out

that after losing an important supply contract with IBM for the PC/XT and PC/AT, they took the advice of a "turnaround expert" who basically told them to fake it until they made it; the biggest story of the time was how MiniScribe employees faked shipping records by sending boxes full of bricks or other heavy, worthless objects between the warehouses in the US and the factory in Singapore. By the end of the year, they had filed for bankruptcy and agreed on a sale to rival HDD maker Maxtor, which took place in January of 1990.
* In 1989, the show was canceled pending a revamp...which was attempted in 1996, but rights issues and low US ratings of a
* In 1989, two citizens of Hill Valley hijack a DeLorean time machine and end up in Hill Valley, 2015, amazed at the neon lights and new cars of the future. While searching for pizza, they are briefly confused by a passing hoverboarder wearing a skateboarding helmet. They shrug, before coming across a Domino's Hardware store. Because Domino's Hardware had been manufacturing automated trash cans by this time, confused, the two asked a local police officer where to find pizza. The police officer's visor displayed an electronic message, and an audio message, "Turn around guys." Turning around, they beheld a lavish multi-story Pizza Hut restaurant. Indoors, they began eating from a neon serving tray when a girl began complementing the two on their sense of retro 80's fashion. "Wow, nice look guys, very 80's!" Unfortunately, the two ended up taking the comment very personally before turning away from her.
* In 1989, United Airlines Flight 232 was on a routine flight from Denver to Chicago when its No. 2 engine suffered a catastrophic failure that resulted in damage to the plane's hydraulic system, rendering the flight controls useless. The flight crew were able to re-establish some control by using the two remaining the engines to steer the plane, and attempted to make an emergency landing in Sioux City, Iowa. Without hydraulics to deploy the flaps and slats, the plane was forced to come in at an extremely high landing speed. The crew attempted to raise the nose by powering up the engines, which would have at least allowed them to land in the correct position, but there wasn't enough time to straighten it out after finishing their final turn, causing the plane to strike the runway in a right-wing down attitude and break up. 112 of the 296 passengers and crew onboard perished, with many people, including the first responders on scene, being shocked that that
* In 1989, when radio and television stations would get able to air from very far away, the idea was put forward by corporations that wanted to air television but had problems airing them in their own country to set up headquarters in London and air television for the country they wanted to air for through U-Turn construction. Cue the fact that public radio and television stations in the affected countries would say that this practice ruined television. In The Netherlands, where commercial radio and television remained banned until 1992, the Public Television network there even called the cops to investigate who was behind this criminal activity. In the end the people who aired radio and television there were found, sent to court and charged. Their channels, which were Cable One and TV10 respectively, were then taken off the air.
* In 1990, after getting a deal with DC, Alan Grant killed off Johnny Alpha, the protagonist of
* In 1990 Marvel Comics presented an ongoing story of Lifeform, a hideously mutated young man, through annual issues of
* In 1990's Bhutan, the government expelled hundreds of thousands to millions of Hindus and non-Buddhists, and still violently resists other faiths.
* In 1990, toward the end of the Brother Love Show segment where Hulk Hogan was sneak attacked by Earthquake, the referees and ring officials were taking too long to move Hogan. McMahon finally lost his patience and yelled, "Move it, move it!"
* In 1991, at the CMA awards, the video of the year went to Garth Brooks, "The Thunder Rolls". In his speech, he thanked TNN and CMT for having banned the video and brought attention to it.
* In 1991, Blondie put on pants and started a catering business with her friend Tootsie. In 2000, Blondie yelled "Dagwood Bumstead Dot Com!" to wake her husband. Dagwood responded, "Omigosh, that means BUSINESS!" Dagwood uses a flatscreen

computer monitor at work, Cookie and Alexander use cell phones and crack jokes about Facebook. But Dagwood is still late to work — although now he races out the door to his car pool rather than a city bus — and Mr. Dithers still kicks him in the ass.
* In 1991, Bush nominated Clarence Thomas to the Supreme Court as a replacement for outgoing justice Thurgood Marshall. Thomas would be a controversial pick from the start due to his conservative political views and would become even more controversial after being accused of sexual misconduct by
* In 1991 Gene Larkin's single in the 10th won the Series for the Minnesota Twins over the Atlanta Braves.
* In 1991, Old Milwaukee Beer had a series of commercials featuring the "Swedish Bikini Team." The commercials played on the
* In 1991, there was a dancing doll called My Pretty Ballerina. The doll was only around for a year or so and then discontinued. However, a children's picture book,
* In 1991, Tom Burton entered the GWF and was rechristened Tom Davis to form the Dirty Davis Brothers with established star Mike Davis.
* In 1991, with the Soviet Union beginning to collapse, Mikhail Gorbachev held a national referendum to see if the population wished for the union to continue in a reformed state. The referendum was overwhelmingly supported by each of the remaining republics, and negotiations began on what would be known as the Union of Soviet Sovereign Republics, which would decentralize the Soviet Union but maintain a common president, foreign policy, and military. However, the day before the treaty was to be signed, communist hardliners staged a coup. It was defeated, but Gorbachev's power disappeared and the USSR dissolved in December upon his resignation.
* In 1992, a political rally of Hindu Right-Wing extremists attacked and destroyed
* In 1992 a young girl named Katie Beers was held prisoner in the basement of a family friend's home where she was left alone in the dark for hours at a time. Her only brief reprieve came whenever he'd come in the evenings to bring her food—and rape her.
* In 1992, convicted murderer Richard Lee McNair and two other inmates escaped from North Dakota State Penitentiary by crawling through an air vent in an education room and making their way to the roof of the building. After crossing several more rooftops, they dropped 15 feet to the ground outside the main wall and escaped. The other two inmates were apprehended within hours, but McNair remained free for 10 months before being re-arrested.
* In 1992, Jim and Jennifer Stolpa, along with their baby son Clayton, took the wrong turn in Nevada and ended up stranded in the middle of a barren ice desert. The mother stayed with her baby in a cave, keeping him alive by melting snow in her mouth and letting the baby drink it, while the father walked for 50 miles in the freezing cold looking for a road. This was also the subject of the 1994
* In 1992, the late Pope John Paul II said that the way the Catholic Church judged the scientific positions of Galileo Galilei was completely wrong. It took over three hundred years for Galileo's judgment to be overturned.
* In 1992, the MVC took over the Gateway, spinning the football conference off into a new entity which immediately renamed itself the Gateway Football Conference.
* In 1992, they looked to be heading to victory in the semi-final against England, until a rain interruption, which by the rules of the time left them needing to make 22 runs of one delivery to win. This was the impetus for the introduction of
* In 1992 Winter Olympics, gold medal favorite Midori Ito looked unlikely to win a medal at all, thanks to the disastrous short program she skated (she was crumbling under the intense pressure to win). Literally at the last minute of her long program, she threw in her signature triple Axel jump (she was the first woman to ever land one), resulting in her winning the silver medal.
* In 1993, as Hong Kong was approaching the end of British lease, Kowloon Walled City, notorious for its congested space and a hive for criminals and prostitutes, was demolished and was converted into a park.
* In 1993, a small DIY company were planning an advertising campaign for their products and, until they came up with a slogan, chose the phrase "It does

* In 1993 Delta Green discovered information about what they thought it was a mythos cult in Waco, Texas. The agents organize the ATF and FBI to raid the cult's compound resulting in the now-infamous Waco Siege.
* In 1993, La Sirenita had to vacate the Mexican National Women's title due to a pregnancy. In 1994, she regained the belt by defeating rival claimant Maria del Angel. Also, her son would grow up to become the luchador known as Enigma.
* In 1993, Subaru of America faced slumping sales as its sedans and wagons were outcompeted by SUVs. A small company that lacked the resources to design and build an all-new vehicle, they instead added a higher suspension and more rugged-looking body panels to the all-wheel-drive Legacy wagon. The resulting vehicle, known as the Outback, not only saved the company, but, while few would've guessed it at the time, it laid the groundwork for an entirely new class of automobile combining the utility of an SUV with the smaller, more efficient, car-like form of a station wagon. The Subaru Outback wasn't the first crossover (the AMC Eagle is often credited as such), but it
* In 1993, the last season of the two-division, 0-wildcard format, the Giants had a phenomenal season, leading their division by as many as 10 games on July 22; a month later, the lead was still 7.5 games and they'd not had a losing streak of more than 2 games since late May (and no losing streak of more than three games all season). Then came 6 games against the Atlanta Braves, the team chasing them, in a 9-game span. They went 1-5. Less than a week later, they began an 8-game losing streak that dropped them from 3.5 up to 3.5
* In 1993, then-President Bill Clinton called up KMOX in St. Louis (1120 AM) and said on-air, "After I get off the phone with you, Rush Limbaugh will come on and have three hours to say whatever he wants and I won't be able to defend myself. There's no truth detector." Limbaugh came on shortly after and said, "We don't need a truth detector. I
* In 1993, when Cologne-based station Viva TV prepared for launch, local musician
* In 1994 a huge circus elephant called Tyke got furious after years of animal cruelty. She killed one of her trainers and then fled outside in the city, causing chaos and panic everywhere she went. She was eventually shot dead. Due to the high level of publicity of the event, as a news crew caught almost the entire thing on camera, numerous cities in the US and Canada passed measures outlawing circuses from using performing elephants, which started the end of the practice.
* In 1994, Alamo Rent-a-Car had a 1:30 commercial (the longest single ad of that year) where a couple rents a car from their service and go on a quest to drive all over America... all over-four-million miles of roads in it (Alamo didn't charge per mile). During this journey, they have a family, raising and educating their children (especially on geography). Their children also have grandchildren. By the time the journey is finished, it is
* In 1994, a teenage girl named Matilda Crabtree decided to play a prank on her parents by hiding in a closet, planning to jump out and scare them when they came home. But her father Bobby thought she was staying at a friend's house, and when he came home and heard noise in the house, he assumed it was an intruder. When she jumped out at him, he fatally shot her.
* In 1994, Canadian computer programmer Daniel Corriveau analyzed the Keno drawn numbers of the Montreal Casino and found buried in the seemingly random results a pattern that allowed him to win $620,000 with a single bet. After a few weeks of inquiry, the casino admitted he had beaten the system fair and square. They gave him a cheque for his winnings and hired him to
* In 1994, Fiat (now known as Fiat Chrysler) tried running an ad campaign in Spain to market their new Fiat Cinquecento towards the "independent, working woman". 50,000 Spanish women received a "love letter" which personally addressed them by name, claiming that they crossed each other on the street, that she glanced interestedly in their direction, and inviting them to go on a "little adventure". The purpose of the letter (advertising a car) was only revealed in a second message which would arrive a few days later. The ad campaign was a horrible failure because of this, since the first letter did not even remotely hint that it's meant to be an ad for a car, leading its recipients to believe they were being targetted by a

* In 1994, the restaurant chain Jack in the Box released the first commercials with the "Jack" character. In the commercials, he referenced the 1980 commercials where they blew up the jack-in-the-box head that was their trademark, saying they had "fired" him. He then claimed that due to plastic surgery, he was back and would change Jack in the Box. Immediately after this announcement, the commercial showed Jack getting revenge by blowing up the building's boardroom behind him. The commercial drew
* In 1994, there was an infamous "Undertaker vs. Undertaker" feud. Or more accurately, "Undertaker vs. Guy In Undertaker Costume Who Is Visibly Shorter And Less Muscular Than Undertaker". Fast forward to 2006, and there was a "Kane vs. Guy In Kane's Old Costume Who Is Visibly Shorter And Less Muscular Than Kane" feud. (The fake Kane was played by the same wrestler who played hillbilly Festus and
* In 1994, there was a really weird commercial for Duncan Yo-Yo's, depicting a brain dead gamer sitting alone on a chair and playing a Sega Genesis (with
* In 1995, a doomsday cult, Aum Shinrikyo, released sarin gas in the Tokyo metro, killing around a dozen people. It soon came out that the cult disseminated some of its propaganda in the form of manga, and that its founder took some of his crazy ideology from sci-fi anime. This prompted a public backlash against anime and manga for a couple years.
* In 1995, CompuServe released "Internet In A Box For Kids." It was basically the grown-up version of "Internet In A Box," except with a videotape on proper internet usage along with an internet monitoring software program for parents to block sites they deemed inappropriate for their children. While the included video mostly averted this (probably because it featured actual children explaining how to properly use the internet), the box art was filled to the brim with Totally Radical imagery and lingo... such as a kid screaming "Totally Internet!!!"
* In 1995, Conan O'Brien was looking for a word to outwit the censors. He came up with the word "Crunk". Ice-T used the word several times during the broadcast. Nowadays, there's barely a rapper alive that doesn't have "crunk" in his vocabulary... and there's now even an
* In 1995, hockey player Travis Roy crashed head-first into the boards and severed his spine, becoming a quadriplegic, just 11 seconds into his first shift as a member of the Boston University hockey team, his boyhood dream.
* In 1995, Mitsuhiro Matsunaga had in two of the same types of matches he had in W*ING three years earlier against two of the same opponents he face in them. A Fire Death match against Mr. Pogo and a Spike Nail Death Match against Leatherface. The difference this time was that they were under the
* In 1995, Nick at Nite celebrate its 10-year anniversary with a marathon of shows from its 10-year history, inclduing most of the shows that had previously aired. Each show had a special introduction, including facts about the shows run on Nick at Nite, as well as listing how long the shows had aired on the channel.
* In 1995, orthopedic surgeon Angus Wallace had to treat a woman with tension pneumothorax — on an
* In 1995, Senator Vicente "Tito" Sotto, also a famous comedian and once a singer in a rock band in the '60s, earned the ire of rock fans when he called for the ban of three songs. The appeal for the ban went nowhere, and painted a picture of Sotto being out on a witch hunt against young rock bands of the present due to his conservative, old-fashioned leanings. The songs he tried to ban:
* In 1995, there was a hulking brute of a man whose gimmick was that of being a depraved
* In 1995, the Spanish murderer Serafín Cervilla raped and killed his girlfriend due to
* In 1995, Time Magazine ran a cover photo of a cigar-chomping Rush Limbaugh with the blurb, "Is Rush Limbaugh Good for America?" The article inside only tangentially dealt with Limbaugh and mainly concerned the rise of "electronic populism" that would result from people having more TV and radio choices and from consumers getting more of their news from the Internet. This trope tends to involve Limbaugh a lot; a controversial, polarizing figure with 20 million daily listeners can attract a lot of attention even if he doesn't have much to do with the real

guts of the project.
* In 1996, amateur astronomer Chuck Shramek announced that he had found a "Saturn-like object" following the Hale-Bopp comet (closer examination, however, proved that no such object existed). Unfortunately, UFO enthusiasts everywhere latched on to the supposed "fact" that there was an alien spacecraft following the comet. Among the people who got sucked into this fantasy were the members of the Heaven's Gate cult, who chose the appearance of the comet as a signal for their mass suicide. They claimed they were "leaving their earthly bodies behind to travel to the spaceship" that was supposedly following the comet.
* In 1996 and 1997, there was a country music duo called Thrasher Shiver, composed of Neil Thrasher and Kelly Shiver, who recorded one unsuccessful album. After they got dropped, Thrasher became famous as a songwriter, with several cuts by
* In 1996, Chess Grandmaster Garry Kasparov lost a chess match to famous
* In 1996, someone was recording WKCR 89.9, the radio station of Columbia University, when it was interrupted by a disturbing broadcast involving otherworldly voices, a woman reading the obituaries of people who died in the 1980s, and funeral bells. Exactly what the broadcast was is still unknown, whether it was just a prank by some bored college kids, or a genuine message from Hell.
* In 1996 the Burlington Northern Railway and the Santa Fe Railway merged and became the Burlington Northern Santa Fe Railway or
* In 1996, writer Mark Waid and artist Ron Garney were unceremoniously removed from a critically acclaimed run on
* In 1997, a group of NYPD officers brutalized and sexually assaulted Haitian immigrant
* In 1997, all of Brazil's voice actors entered a strike. To counter this,
* In 1997, artist Andy Cox put up a series of posters at the San Francisco State University streetcar stop, lampooning Citibank's "In Your Dreams" billboard campaign. ("The posters featured such figures as Arnold Schwarzenegger and Che Guevara with the artist's slogans replacing the bank's ad copy. The Guevara piece, for example, states, 'In your dreams, everyone is treated equally.... And your bank sponsors socialist revolutions.'" —
* In 1997 Edgar Rentería's single in the 11th won the Series for the Florida Marlins
* In 1997, Sprite ran two spoof ads for a fake brand of soft drinks called "Jookie." The first poked fun at the extravagant claims advertisers make about the benefits of their product (if you drink Jookie, you'll suddenly be transported to the most awesome beach party EVER!!!). The second poked fun at the often useless mail order prizes advertisers use as bait for their products ("Jookie Junk"). The commercials made no mention of Sprite until its logo was shown in front of a black background at the end.
* In 1997, the group had two: "Six Days on the Road," a No. 2 hit for Dave Dudley from 1963; and "This Night Won't Last Forever," a top 15 pop hit for Michael Johnson (who would later turn country) in 1979.
* In 1997, when the TV ratings were introduced, Nickelodeon put a special content warning at the beginning of
* In 1998, a student at the Naval Academy Preparatory School, the official prep school for the US Naval Academy, created a chant for his platoon—
* In 1998, Mr. Handford quietly passed the torch to Alan and became the new owner of Hooper's Store.
* In 1998, they again got hot late, going 9-1 to enter the final day of the season tied with the Chicago Cubs for the NL Wild Card. They lost, but so did the Cubs, forcing a 1-game playoff, which the Cubs won.
* In 1998 Tony the Tiger, the mascot of Kellogg's Frosted Flakes (Frosties in some countries) cereal, switched from being traditionally animated to being CGI for a while. He was switched back after it was decided he looked better traditionally animated. In the 2010s they revived the concept though.
* In 1999 a 17 year old boy stowed away on flight from Boston to London, allegedly because he wanted to impress the Israeli intelligence service, resulting in a huge embarrassment for Airport Security and British Airways. There was no official word

on whether the Mosad was impressed or not.
* In 1999, a shootout at a São Paulo movie theater closely resembled the first level of
* In 1999 Gibraltar, a tiny dependency of the UK on the edge of Spain, applied for membership of UEFA, the European football (soccer) governing body. Based on UEFA's membership rules at the time, there was nothing barring Gibraltar from joining. But Spain, which deeply resents British control over Gibraltar, threatened to withdraw from UEFA if Gibraltar were accepted. To keep Gibraltar out, UEFA altered its membership criteria in 2001 so that only independent states as recognised by the United Nations could become members, but granted an exemption to the five already-existing non-independent teams (the four British teams, plus the Faroe Islands). After a decade-long legal battle, the courts ruled that as Gibraltar had made their application before the rule change, UEFA had to allow them to join anyway, removing the original purpose behind the change. However, the new rules now act as a bar to places like Jersey, Guernsey and Greenland, who would probably have been allowed to join UEFA had they applied before the Gibraltar debacle.
* In 1999, Japan's customs authority banned the importation of a book of photographs by
* In 1999, King was struck by a car and has since turned it into a reoccurring theme, with one of his books (
* In 1999, the cover band Abba Teens gained a certain popularity with their Abba covers that appeared in popular music shows. (After a while, they changed names to A*Teens and started performing their own songs.)
* In 1999, their semi-final against Australia ended in a tie. Australia advanced to the final due to finishing higher in the super sixes stage of the tournament.
* In 1999 there was a series of adverts (some more NSFW than others) for the web portal MSN. They were roughly 30-second clips showing bizarre situations, like
* In 1999, the St. Louis Rams acquired Trent Green from the Washington Redskins and slated him as their starter. However, Green went down with a knee injury before the season even started. His backup - a former Arena League quarterback with eleven career NFL pass attempts - took over for Green. Kurt Warner would wind up leading "The Greatest Show on Turf" to a Super Bowl title that season and would have a brief but stellar career, including another Super Bowl appearance and two league MVP awards, that landed him in the Hall of Fame. Green would be shipped the Kansas City Chiefs where his career would rebound a bit, but never to level of Warner's.
* In 1999 Walmart used songs from old TV series with altered lyrics in their Rollback campaign, including
* In 19th and early 20th Century America, corporations would sometimes field a virtual army of mercenaries to break strikes and enforce their interests.
* In 19th- and early 20th-century Europe, the match seller was a stock "hard up" character. It was an especially popular depiction of impoverished WWI veterans, especially the wounded and disabled. Famous examples are
* In 19th-century French opera, the selling point was the mandatory ballet sequence, to the point where the big-money patrons often skipped the rest of the show to dine at their clubs and only came out to watch the ballet (in large part because they had romantic affairs going on with the dancers). The opera itself was treated as window dressing.
* In 19th C. household, when a man brought his new bride home there was a little ceremony in which his mother, unmarried sister, grown-up daughter, or whoever had been mistress of the household, handed over the keys to the house to the new wife.
* In "1%", Cartman finds his favorite doll, Clyde Frog, ripped apart and nailed to a tree, and he holds a funeral in his backyard. He then treats the subsequent destruction of his dolls as brutal murders, and the culprit turns out to be
* In 1 Corinthians 5:1-3, Paul chides the Corinthian believers' fellowship for not having expelled a certain man for sleeping with his father's wife (probably referring to a step-mother), pointing out that not even the pagans around them (Corinth being a rather decadent and sex-obsessed city) would tolerate that kind of sexual immorality and that they ought not to associate themselves with it, either.
* In 1st and 2nd Edition, any model with access to the Shooting Skill chart was

able to acquire the 'Gunfighter' skill when they levelled up. This skill allowed the model to fire a pair of pistols at a target. This skill was also one of the common randomly generated skills available for the
* In 1st and 2nd edition, they had no special abilities whatsoever, but could run the full range of ability scores, could belong to any class, and had no limit to what level they could gain in their class. Other races could belong to two classes at once in predetermined combinations, but only humans could change their classes after creation (although it was a pretty grueling process, requiring you to start from scratch until you regained the level you switched at).
* In 1st and 2nd Edition, vampires can cross running water, but if they are immersed in it for 3 minutes they are destroyed.
* In 1st Edition Advanced Dungeons & Dragons, High Elves have natural lifespans of 1600 years, give or take about two to three centuries. Grey Elves have lifespans of 2000 years, give or take another 300, meaning the normal lifespans of High and Grey Elves float around two millennia. By comparison, the lesser Wood Elves and Dark Elves (AKA Drow) have lifespans of "only" 1350 and 1000 years respectively. A Grey Elf PC in 1st Edition AD&D can easily begin play in his 500s, the human equivalent of roughly the mid-30. This would allow your Elf PC to have lived through the rise and fall of historical human kingdoms, with parents over a millennia old and grandparents old enough to potentially have personally witnessed all of recorded human history. For some reason, the 2nd and later Editions cut Elven lifepans in more than half to a mere 700 years (which had previously been the lifespan of Gnomes in 1st Edition.)
* In 1st Edition, before serious attempts were made to balance it with other game elements, psionics was something that non-psionic opponents had little or no defense against. You pretty much
* In 1st Edition, Bugman met his end when, on returning to his brewery, he found it under attack by a goblin army. His band was pitifully weak and exhausted after a long campaign against the goblins of the Bad Lands, but they took up the brewery's defense and were slain to the last.
* In 1st Edition the psionic ability "Telempathic Projection" could send an emotion to a target creature.
* In 1st Samuel, David was told by King Saul that he was too young to take on Goliath the Gittite by himself. David told King Saul that he had slain a lion and a bear with God's help while still just a youth, and with God's help he will also be able to slay the Philistine giant.
* In 2000, a ficus tree ran against incumbent Rodney P. Frelinghuysen for the 11th district New Jersey house seat... and won the election by a 4:1 ratio before being disqualified. The Ficus campaign was masterminded by
* In 2000, an eminent critic by the name of Harold Bloom wrote an infamous essay decrying
* In 2000, eTrade showed two guys and a monkey in a garage, with a boom box playing "La Cucaracha".
* In 2000, Michael Bellesiles, a history professor at Emory University, came out with his book
* In 2000, PAX aired a "sneak preview" of a Bible-based quiz show called
* In 2000, presidential candidate George W. Bush appointed Dick Cheney as the head of his running mate search committee before choosing Cheney for the job.
* In 2000, the Clay Institute of Mathematics proposed 7 "Millennium Problems" (classical unsolved mathematical problems) and that anyone who could solve one of them would win US$1,000,000. Naturally, this lead to tens of thousands of "
* In 2000, the Giants made the playoffs but lost in the first round to the wild card Mets, 3 games to 1. The following year, the Giants were eliminated from playoff contention on the second-to-last day of the season.
* In 2000, Weetabix aired a commercial narrating the fall and recovery of a scarecrow. A sickly scarecrow is harrassed by crows and kicked out by the farmer for not doing his job. He is found by another farmer, brought home, and fed whole grains. With this nourishing diet, the happy scarecrow flourishes like a plant and regains the energy to chase after crows.

* In 2001, Mad Catz planned to release the Bioforce controller, a Playstation 2 controller that sent shock waves to the player. It was shown off at trade shows but never made it to release (likely due to health worries).
* In 2001, progressive rock fans were surprised to recognize a fragment of
* In 2001 the Arizona Diamondbacks beat the Yankees in the bottom of the 9th when Luis Gonzalez floated a pop fly over Derek Jeter's head and into short left field.
* In 2001; the FBI was investigating general corruption in the government of Waterbury, Connecticut
* In 2001, the Pepsi 400, Daytona's summer night race, was the first race in the NBC half of the
* In 2002, chuckpalahniuk.net held a raffle to raise money. The six winners had characters in "Diary" named for them. (Nora Adams and Will Tupper are two of them.)
* In 2002, Devil's Due comics began a Voltron comic loosely based on the original series. After a five-issue miniseries, an ongoing lasted for 11 issues before being discontinued due to low sales. However, strong reprint sales led to a second five-issue miniseries being made. The original miniseries and first arc of the ongoing were later collected as motion comics.
* In 2002, Disney, specifically CEO Michael Eisner, found itself doubting
* In 2002, France didn't make it past the first round, despite winning the previous World Cup, in 1998. And it was in true
* In 2002, German consumer engineering conglomerate Siemens - Bosch proposed to revive a tradename which had not been used in Germany for over fifty years and which had fallen from use with nobody hurrying to pick it up. They proposed to use the trademark
* In 2002, Hulk Hogan and the Rock finally met in the ring for the first time at
* In 2002, in the first mayoral election in the town of Hartlepool in
* In 2002, James Watkins set out to rid All Pro Wrestling of all women, starting with
* In 2002, the 35th anniversary of his debut album marked the release of
* In 2002, the Giants finally returned to the World Series for the first time since 1989, facing the Anaheim Angels. After taking Game 1, they fell into a 2 games to 1 hole, but took Games 4 and 5 at home to take a 3-2 lead and got off to a 5-0 lead in Game 6. With just 8 outs to go, starter Russ Ortiz gave up back-to-back singles and the Angels' Scott Spiezio greeted the first San Fran reliever with a 3-run homer; the following inning the Angels scored three more to take a 6-5 lead and won the series in 7 games.
* In 2002, the leaders of the already-unstable coalition government of Turkey convened at a high-level meeting. Story goes that during the meeting, an argument broke out and one of the coalition leaders hurled a book (or a dossier) containing the constitution at the then-Prime Minister, Ecevit.
* In 2002, Tracy Byrd had the #1 smash "Ten Rounds with Jose Cuervo", his first trip to the top of the country charts since 1993. The follow-up single, "Lately (Been Dreamin' 'bout Babies)", stalled out at #38 and didn't even appear on an album due to its underperformance.
* In 2003, #15 Kansas State faced undefeated, #1 Oklahoma and embarrassed them by the score of 35-7, giving the two spots in the national title game to USC and LSU...or so the human pollsters would've had it. Despite the humans having USC #1, the computers thought little enough of them that they didn't even make the top 2, and Oklahoma's choke
* In 2003, a feud between WWE Divas Torrie Wilson and Dawn Marie erupted from Wilson's father, Al, suffering a massive, fatal heart attack (on-screen) while having
* In 2003, astronomers discovered an object in the outer solar system that was larger than
* In 2003, at Lake Calhoun in Minneapolis, a 7-year-old blind girl drowned because all three counselors were also blind.
* In 2003 a vault in the Secure Antwerp Diamond Area was robbed by a group of sophisticated Italian thieves known as the School of Turin, who made off with anywhere from 108 and 420 million dollars. They defeated a number of high tech

security systems in order to pull it off, including using hairspray against the motion detectors (due to the fact that it would be transparent enough for the system to arm but opaque enough to make the sensor useless). The vault itself though was interesting in that no one knows exactly how they got the combination. It was suggested in a
* In 2003, Brazilian TV show host Gilberto Barros made some TV reports for his TV show
* In 2003, Cartoon Network turned their all animated Cartoon Cartoon Fridays block into a block hosted by Tommy and Nzinga (later replaced by Tara) called "Fridays". In addition to cartoons, there were two puppet characters, celebrity interviews, and musical guest performances. It ended in 2007, and was replaced by Friday Night Premiere Thunder.
* In 2003, Mercedes Benz ran two versions of the same commercial for the then-new W209 model. In the commercial, an entire street worth of mannequins dressed in black tie fashion gather around the Mercedes Benz W209 display to admire the car. A poor streetsweeper alone at work sees them and they see him and he pretends to have seen nothing and carries on.
* In 2003, the Giants went wire to wire in first place, winning 100 games, only to lose to the wild card Marlins 3 games to 1 in the first round of the playoffs.
* In 2003, the International Wrestling Association hyped up their acquisition of the
* In 2003, their group stage match against Sri Lanka was affected by rain. A miscommunication caused the batsmen to leave the field with the scores tied under the Duckworth-Lewis method, causing them to miss out on a spot in the super sixes.
* In 2003, the Minnesota Vikings' receiver Randy Moss "fake mooned" Green Bay fans after scoring a touchdown against the Packers. Moss claimed it was in retaliation for a group of Packers fans who mooned the Vikings team bus the last time they came to Green Bay.
* In 2003, the Progressive Conservative Party of Ontario accidentally released an overblown press release identifying the Liberal Party leader, Dalton McGuinty, as an
* In 2003, WWC was in need of a woman who looked good on television and Rico Suave saw the one who would become
* In 2004, after her test came back positive, Lita confides to Stacy Keibler that she's pregnant but asks her not to tell Matt Hardy (Lita's boyfriend) because she wants to tell him herself. Later that same show, Stacy tells Matt.
* In 2004 and 05, NWA East and Pro Wrestling eXpress booked Scott Venom and All Business Brant as the
* In 2004, Apple applied for a patent for an interface that would search across multiple databases. This was when Google just searched the Web. Apple's interface would search the Internet and, let's say, your personal address book at the same time. The patent application didn't detail the program design, just what it would do. After being denied nine times, they got it. Apple can now claim that any kind of search engine that searches across different databases is theirs and theirs alone.
* In 2004, a white Deputy Chief Constable performed a rap while addressing the first meeting of the North Wales Black Police Association.
* In 2004, beer company Stella Artois started up a website called Helpmefindjon.com, which was advertised almost exclusively through graffiti of a pair of glasses (Jon's apparent trademark frames), a reward of at least £20k, and the website address. It led to a plea from a woman to find her brother, by searching on a website recreation of his room and finding clues as to his recent activity. Enough searching found that Jon had made a deal with an acquisitions company, in return for a lifetime's supply of Stella Artois. It turned out that he had infact sold his soul to the devil and disappeared to a remote island off the coast of Scotland.
* In 2004, Designer Eric Flannum had discussed the possibility of a potential sequel to
* In 2004, George W. Bush referred to "the Internets" in a presidential debate. In

2006, Alaska senator Ted Stevens defined the internet as "a series of tubes." Today, "the tubes of the internets" — sometimes shortened to "the intertubes" — is a
* In 2004, Honda had a very long and very strange (but compelling) ad on British television, "
* In 2004, police on a training exercise in the tunnels underneath Paris found a fully operational movie theater/bar/restaurant, complete with professionally-installed electricity and sound. When they returned three days later, everything was gone, somehow snuck out through an opening the size of a drain.
* In 2004, Ryuhei Kitamura and Shogo Tomiyama stated that they renamed the
* In 2004, there was supposed to be a 3D sequel to the popular PC game
* In 2004, they ran a parody editorial attributed to the CEO of Gillette, entitled
* In 2004, WWE writer Dan Madigan (who was one of the people behind Katie Vick) suggested that Jon Heidenreich’s gimmick be an unfrozen Nazi managed by Paul Heyman, who is Jewish...and whose mother survived the Holocaust. When the idea was pitched, Vince McMahon himself walked out of the board room and didn’t come back for the rest of the day. Suffice to say, Madigan’s career didn’t last much longer and he was fired in early 2005.
* In 2005, a former Brazil Postal Service executive was filmed negotiating a bribe, while saying he had the backing of a congressman. Said politician went on to reveal
* In 2005, a group of Manchester United fans unhappy about Malcolm Glazer's takeover founded their own club, FC United of Manchester. FC United are, as of 2015-16, in the sixth tier of the league.
* In 2005, a man named Michael Mullen shot and killed two convicted child molesters execution-style.
* In 2005 Christie Ricci wrestled a match for PGWA in her hometown, on her birthday, so she almost had to be the face but even more since it was against Lollipop of
* In 2005, comic and book author Greg Farshtey got a free hand to write a novel about anything he wanted, and he made use of the opportunity to transform the character into a highly mastermind that
* In 2005, his great-nephew Prince Charles married Camilla Parker Bowles, who was well-off but divorced and not noble. Notably, she had been his
* In 2005, it changed its logo to a new one that flips through various anime-inspired backgrounds (space mech, ninja samurai, kawaii cute). This logo can be seen
* In 2005, New York Mets catcher Mike Piazza held a press conference to declare his heterosexuality.
* In 2005, Operation Red Wings, a botched Navy SEAL Operation in Afghanistan left 11 Navy SEALs and 8 members of the 160th Special Operations Aviation Regiment dead, with only one Navy SEAL, Marcus Luttrell surviving.
* In 2005, Paul Brown claimed a series of NES-style screenshots, showing a monster made of butter saying "Ja I am made of dur butter und you are worth 2K monies" and "Eat Communism!!!" came from a
* In 2005, Shocker, Máscara Mágica, and El Terrible held a competition in mockery of competition based reality shows that had the same format as WWE's
* In 2005, Steve Wade, a Tasmanian-based Saab fan, launched a blog about his favourite car. Six years, 5400 articles and 50,000 comments later, Saab formally credited
* In 2005, the journalist Wilker de Jesus Lira wrote a monograph called "O merchandising capitalista no desenho Bob Esponja" (
* In 2006, after numerous cases of injuries and a few deaths caused by children imitating the moves on
* In 2006, a man died in Australia after having received at least 28 "jolts" from a taser, at 50,000 volts. Channel Nine News reported this as being the equivalent of "over a million volts altogether". Voltage doesn't work that way (not to mention that both voltage AND current must be high to kill). To use an imperfect analogy,

you can take 3 mg a day of a medication for a month and be fine, but taking 100 mg of the same medication at once will probably kill you. Similarly, each "dose" of voltage is a separate incident and isn't the same as suffering a million volts at once, even if they happen right after each other.
* In 2006, Britain's already scandal-hit Deputy Prime Minister John Prescott found himself in even bigger trouble when he treated himself to an afternoon off to enjoy a game of croquet. Bad news for him, as it ultimately cost him his grace-and-favor mansion, but good news for manufacturers of croquet sets which suddenly came into greater demand than they had for decades.
* In 2006, Kraft got EMF to re-record their hit "Unbelievable" in a series of ads where the lyrics had been changed to be all about... Kraft Cheese Crumbles. (
* In 2006, Outback Steakhouse made a series of commercials in New Zealand starring
* In 2006, Sprint ran a commercial in which a ventriloquist comes home to his dummy berating him for missing out on a gig because he couldn't contact him. The ventriloquist resolves to switch over to Sprint, prompting the dummy to say that he's finally in control of something.
* In 2006, The Da Vinci Code was banned in Samoa because according to Samoan church leaders,
* In 2006, the prospect of Nintendo quitting the home console business altogether was becoming increasingly believable after the middling performances of the
* In 2006, the supergroup Supernova was formed after picking a lead singer via the reality show / singing competition
* In 2006 to attack al Zarqawi's credibility, the US military released bloopers from Iraq's (then) Al Qaeda leader's films, showing clips that had not been released by Al Qaeda. It showed him incorrectly operating a machine gun, and then having to get help to clear the weapon when it jammed as a result. In the aftermath one of his subordinates came to carry the machine gun away, and grabbed it by the barrel - instantly burning his hand and causing him to drop it.
* In 2006, to coincide with the new film, Jakks Pacific put out a line of
* In 2006, U. S. Senator Ted Stevens (R-AK) criticized a "Net neutrality" amendment to a committee bill...but the only problem was, his vehement eleven-minute speech had a good deal of buffy speak and revealed that he had very little idea how the Internet works. Here's the most
* In 2006, West Virginia was #3 at the end of October, behind only the aforementioned Michigan and Ohio State (which would naturally sort itself out, all but assuring that the Mountaineers would get into the top 2 if they kept winning), until they ran into Louisville. However, the Cardinals themselves were all the way up at #5 when they knocked out the Mountaineers, elevating
* In 2006, while Zidane was taking a free kick, Roberto Carlos was adjusting his sock. Thierry Henry passed behind him and scored France's victory goal.
* In 2007, a Canadian gas station store chain called Mac's launched the appropriately-named "WTF?" campaign to promote its new Froster beverage of the same name. One ad begins with two lesbians in white pajamas lurking by a tree in a forest teasing each other before beginning to make out—before it turns out that the tree is actually the legs of a giant man who is watching them make out. The girls respond by throwing axes into the tree,
* In 2007 a certain Connie Meskimen decided to troll the Arkansas Democrat-Gazette by sending them an editorial that blamed
* In 2007 a huge gorilla named Bokito escaped from a Dutch zoo. The media attention even inspired a short lived eponym "bokito proof", meaning a cage is strong enough to prevent the prisoner from escaping.
* In 2007, an anonymous Twitter account tweeted "Going out for lunch." After 14 years of inactivity, the account tweeted "Back from lunch."
* In 2007, bitter rivals Buffalo and Ottawa were meeting in the NHL playoffs. The game went into overtime as both goalies were red hot that day. But oops! the game was on NBC, which still hadn't learned its lesson. Overtime was shunted to Versus, an upstart cable channel which few providers carried, in favor of an hour of
* In 2007, engineer professor Nicholas Kotov created a multi-layer polymer called
"

* In 2007, he performed a new song called "If You're Reading This" at the Academy of Country Music Awards. Several radio stations played the unedited recording to the point that it made Top 40 on the Hot Country Songs charts, overlapping with his then-current single "I Need You". Curb Records responded by officially releasing a radio edit of "If You're Reading This" that cleaned up the audio and removed most of the audience noise, except for applause at the end — all while pushing "I Need You" into the Top 10 so that it could freefall and promotion of "Reading" could go into full force. In addition, his then-current album
* In 2007, Simpson argued that his current conviction and sentence for armed robbery and kidnapping is this for his acquittal for murder. Granted, the possibility was pointed out by the judge, who warned the jury that they could get removed from the bench if they used the murder trial as a prior prejudice. Though the general public thought he was all but convicted the moment he was arrested, it is also unlikely that many have sympathy for him about this. In an interesting contrast to his last trial, many believed that he was poorly defended, and also that the authorities actually did have an agenda this time around.
* In 2007, Tennant appeared as the Tenth Doctor and in the special episode "
* In 2007, the CGSociety (for Creative Digital Artists) held a contest to create images and pieces using
* In 2007 the company aired a commercial featuring Mac Tonight promoting that the restaurant is open for all 24 hours. Near the end, he namedrops whatever city the ad is broadcasted in. In
* In 2007, the entire city of Naples, Italy was subjected to this. Factors blamed were incompetent local government, restrictive environmental laws, and infighting among
* In 2007 the first case of scleral tattooing was reported. This procedure makes it possible to
* In 2007 the International Cricket Council ruled that the distance from boundary to boundary of an international ground must be at least 150 yards square of the wicket and 140 yards straight (measured from centre of pitch), that square boundaries must be at least 65 yards (which allows the pitch to be a little off centre, because a cricket ground has several parallel pitches to allow grass time to recover), and that no boundary can be more than 90 yards from the centre of the pitch. However, all grounds that were built before 2007 are allowed to have shorter boundaries. A few grounds, such as Eden Park in Auckland, New Zealand, fall well short of the minimum.
* In 2007, the New England Patriots were caught illegally taping the hand signals of their Week 1 opponent New York Jets. Coach Bill Belichick was fined $500,000, and the team ended up forfeiting their first-round draft pick. They were the first team to go undefeated in a 16-game regular season and ended the season with 589 points scored and a +315 point differential (difference between points the team scored and points the team allowed over the course of the season), while their quarterback Tom Brady threw 50 touchdown passes and wide receiver Randy Moss had 23 touchdown receptions, all NFL records. (On the other hand, they lost Super Bowl XLII to the New York Giants.)
* In 2007, there was a feud between PWU Hardcore Champion Tracy Smothers against Corporal Robinson, Violent J and
* In 2007, the students at the police academy in Fürstenfeldbruck investigated the unsolved
* In 2007, Winter Park replaced their Timberline double chairlift with a longer high speed six pack known as the Panoramic Express. The new lift originates at the bottom of the Sunnyside lift, not at the start of the old Timberline lift. Timberline's bottom terminal stayed intact for a couple years even after the rest of the infrastructure was removed.
* In 2008, Allison Danger revealed to Valerie Malone that she would be taking time off to begin raising the next generation of
* In 2008, a sixteen-year-old cheerleader from Texas's Silsbee High was sexually assaulted by Rakheem Bolton, a popular basketball player. While Bolton was initially charged, he admitted to misdemeanor assault and served no jail time,

instead ending up with a fine, community service and mandatory anger management classes.
* In 2008, a start-up called Carbon Motors showed the E7, a prototypical purpose-built police car, powered by a more durable BMW straight-6 diesel and with special safety capabilities. The original production date target was 2012, but the car was first delayed, and then the company went bankrupt in 2013.
* In 2008, Donald X. Vaccarino took the idea of each player using a deck, a la
* In 2008, FedEx ran an ad in which someone at a business firm proposed using carrier pigeons for shipping. For large items, they already had giant carrier pigeons.
* In 2008, Governator Schwarzenegger ordered the firing of every temporary and part-time employee of the State of California, and the reduction of the survivors' pay to minimum wage. Only then did he discover that the only people who knew the state's payroll software well enough to implement the latter directive had been victims of the former...
* In 2008, Mexico had a salty crackers ad where a Chinese boy in a Mexican family wonders if he's adopted, only to have his question shrugged off by the family talking about the crackers. The 2008 Beijing Olympics Special was the same commercial,
* In 2008, Mike Shanahan, then coach of the Denver Broncos, chose to forego an almost guaranteed game-tying extra point from the two-yard line, and went for two to win the game with 29 seconds remaining.
* In 2008, Pieter De Crem, then the Belgian Defense Minister, told the Belgian Parliament that
* In 2008, Republican U.S. congressman Steve Pearce of New Mexico's 2nd congressional district retired to run for an open U.S. Senate seat, and the blue wave that followed swept Democrat Harry Teague into the seat. 2010 proved to be a much more favorable year for Republicans across the country, and Teague lost his seat to a returning Pearce. In 2018, Pearce retired once again to run for the open Governor's seat, and the blue wave that followed swept Democrat Xochitl Torres Small into the seat. 2020 proved to be a much more favorable year for Republicans across the country, and Small lost her seat to Republican Yvette Herrell.
* In 2008, Swansea put up a sign saying "No entry for heavy goods vehicles. Residential site only," with corresponding text in Welsh. What nobody on the Swansea council realized was that the text in Welsh actually meant "I am not in the office at the moment. Send any work to be translated."
* In 2008, the BBC released a series of drama pilots all at once with the intention of choosing the most popular one to make into a full-length series. This led to several instances of the trope:
* In 2008, the British bank Barclays used the Bellamy Brothers' 1976 hit "Let Your Love Flow" in a commercial, causing it to re-enter the UK singles chart. This is also an example of
* In 2008, the CEO of Doctor Pepper vowed to give everyone in the United States a free can of Dr Pepper if
* In 2008, the hapless Arizona Cardinals had a shot at their first winning season in a decade after drafting quarterback Matt Leinart a few years earlier, only to see him perform terribly. See if you can guess where this is going. In the end, the Cardinals reached the Super Bowl for the first time, but their
* In 2008, the Pentagon sent up a red flag about the possibilities for
* In 2008, there was a news article about a 7-year-old girl and her mother who were attacked by the mom's ex-boyfriend. When he tried to kill the mother, THE GIRL TOOK SEVERAL BULLETS!
* In 2008, there were two highly anticipated releases by dormant bands just one month apart:
* In 2008, the syndicated version added a time limit on questions with the contestant being forced to walk away should the clock hit zero.
* In 2008, they were led by Brett Favre, started 8-3, they were considered a favorite to win the Super Bowl that year, and were doing things like scoring 56 points against the Cardinals, beating the Rams 47-3, and stomping the previously

undefeated Tennessee Titans 34-13. Unfortunately, Favre suffered an injury, didn't tell anyone, and decided to play through the injury. Therefore, his performance suffered, the Jets lost four of their last five games, and floundered their way out of playoff contention.
* In 2008, three jailed members of the domestic terrorist/secessionist group the Montana Freemen tried to charge the US government millions of dollars for using their names, which they claimed they had copyrighted. The government, in response, added 15 years each to their sentences for conspiring to impede the duties of federal prison officers and extortion.
* In 2009, a "Barbie Fashion Doll Career Clothes" Nurse outfit and accessory set was released (
* In 2009, a Belgian girl named Kimberley Vlaeminck tattooed 56 stars on her face. After her parents became angry, she claimed that she had fallen asleep during the procedure. She became the laughingstock of the entire nation and fell into a serious depression.
* In 2009, a group of NYU students barricaded themselves in a cafeteria by stacking lightweight tables and chairs at the entrance. When an elderly security guard had finally had enough of the ordeal, he simply started moving the chairs and tables out of the way while the students ineffectually yelled at him. Once he was able to walk through the barricade, the protest ended.
* In 2009, an advertisement from fashion company Ralph Lauren was posted on the blog "Photoshop Disasters" and tech news website Boing Boing because of the excessively thin appearance of the model in the ad. Ralph Lauren sent a DMCA takedown notice to both Blogspot (the host of "Photoshop Disasters") and Boing Boing; while Blogspot removed the post, Boing Boing refused on the grounds of fair use and publicly mocked the takedown notice in a satirical rebuttal. From there, the story picked up steam and was talked about on hundreds of other websites and blogs, each one mirroring the ad in question. Days later, Ralph Lauren apologized for
* In 2009 and 2011, Sega was awarded two more patents on the use of tap and drag-and-drop controls on a touchscreen to move characters around; i.e., using a touchscreen
* In 2009, a Twitter user named Marcus Lepage sent out the tweet "Going to sleep." The account lay quiet for
* In 2009, a woman survived being shot with a handgun because the bullet
* In 2009, Cash4Gold.com, previously known for its late-night basic cable ads that look like they were shot on VHS in 1986, ran a Super Bowl ad starring Ed McMahon and
* In 2009, Chilean senator Fernando Flores is about to finish an interview for the CNN Chile channel. His host makes some questions that he dislikes, then finishes the interview. Just before the transmision was about to finish, a pissed-off Flores rants about how the guy's questions were
* In 2009 Dell Computers introduced della.com, a website designed to sell laptops to women. Apparently, Dell assumed that women aren't interested in (or won't understand) all those scary hard numbers that let rational male buyers choose the laptop that best suits their needs. No, women are only interested in how cute the computer is, since they're only going to be using it for shopping, diet tips, and watching cooking videos. For some reason, women in the real world didn't embrace the website with undiluted enthusiasm.
* In 2009, it looked like maybe the Big East had finally thrown off the mantle of chokers when 11-0 Cincinnati rallied from a 21-point deficit to narrowly beat #15 Pittsburgh, preserving their perfect season. Yes, it was a longshot, with the Bearcats only ranked #5 entering the game, but #4 TCU didn't even
* In 2009, Molly Ringwald told Time Out that Jon Cryer's character Duckie in
* In 2009, numerous German newspapers reported the full name of the newly appointed Minister of Economy as Karl-Theodor Maria Nikolaus Johann Jacob Philipp Wilhelm Franz Joseph Sylvester Freiherr von und zu Guttenberg. In reality, Guttenberg has "only" ten given names, and the name "Wilhelm" was misinformation planted on

* In 2009 off the eastern seaboard of Australia, a three metre (ten feet) great white shark was found entangled in shark nets. The nets hadn't killed the shark, in fact, the shark had been
* In 2009, Takara (in partnership with Cross World Connections) released a Petite Blythe doll wearing a Candy Stripe jumperskirt, marketed under the name "Intensive Care."
* In 2009, the Jets got all the way to the AFC Championship Game, where they got out to a 17-6 lead over the Colts. They were outscored 24-0 from there and lost 30-17.
* In 2009, the series dropped models and created new episodes exclusively in CGI.
* In 2009 the shooting and running were combined into a single event. Final time in the race is still all that matters, but failure to shoot accurately can add up to a 50 second delay.
* In 2009, what was then known as Memphis Ladies Wrestling ran angle about Brandi Wine
* In "200", Martin Lloyd complains that his cell reception is terrible in the SGC briefing room. As above, the fact that he gets any signal at all is a miracle. Again,
* In 2010 a 16 year stowaway fell out of the wheel well of a US Airways jet as it made its final approach into Boston (what is it about Boston?) The exact cause of death was never determined, but he would have died from hypoxia even if the landing gear hadn't crushed him.
* In 2010, a Czech TV fortuneteller Stanley Bradley made himself an internet hit for a while with his response to a prank caller's
* In 2010, a horror movie all about murders in a corn maze (at night!),
* In 2010, a Japanese amusement park built a life-sized, 60 foot tall statue of the title Gundam robot from
* In 2010, a similar thing happened to a man named Jonathan Metz, whose arm became trapped behind his boiler when he tried to clean behind it. He realized that not only was he going to die if he didn't cut his arm off, so was his pet beagle Portia, who was wandering around upstairs, hungry and confused as to why he had disappeared and whose barking fits were becoming shorter and less frequent, coinciding with his own weakening state. Much like the Ralston example, his timing was perfect—the arm had become gangrened enough that it was relatively painless, and police and EMS crews were converging on his house, alerted by friends who were alarmed by his disappearance.
* In 2010, a spin-off site effectively dedicated to Alternate Universe versions of
* In 2010, defending champions Italy also crashed in the group stage, managing to score fewer points than
* In 2010, Dockers premiered an ad which opened with a bunch of guys marching heroically through a field, clad only in shirts and underwear, proudly singing a song by California folk band The
* In 2010, due to economic difficulties, Woodland Park Zoo closed and barricaded the Night half of its Day & Night Exhibit, although the Day part retained its name, then the building as a whole was closed off following a 2016 fire. East of the Raptor Center is a hilly fenced-off area with vacant enclosures that once housed mountain goats, beavers and otters, which has been the proposed location of an Asian Highlands exhibit that
* In"2010", everything seems to be perfect on Earth until the former SG-1 team discovers the threat from the Aschen. O'Neill has already retired and refuses to help because he "told you so!" He changes his mind in time to save the mission.
* In 2010 he began a tradition dedicating all of October to Halloween festivities, calling it Nostalgiaween. The intro: Jason Voorhees decapitating the kids from Peanuts
* In 2010, Jaguar showed the C-X75 concept, a turbine-engined hypercar. A year later, the turbine engine concept was shelved, due to too high CO2 emissions, and replaced with a hybrid 1.6 powertrain, making 888 HP. Unfortunately, that was also cancelled, because of a lack of a big enough target market.
* In 2010, Jennifer Weiner set off a controversy in literary circles when she

criticized
* In 2010, Lotus released 5 sports car concepts, intending to put them into production. Unfortunately, financial troubles made only one of the cars, the Elan, have any chance of getting a release, and this is because it would be a replacement to an existing model.
* In 2010, on the other hand, the Big East found a far more unusual way to be a complete embarrassment: by sending a team from
* In 2010, radio host Don Imus was heard mocking Kars4Kids on-air when their ad came on during a commercial break (the group is well-known for having a
* In 2010, Rite Aid did a commercial talking about one of their customers who used to be a disco dancer. Instead of using an actual Disco song, or even a
* In 2010, Russian Academy Of Science decided to create the English version of their website. It resulted in gems such as "Squirrel institute," "President of wounds," "Arm-medical institute," and so on.
* In 2010, tech company Fusion Garage released their own PC tablet called the JooJoo, meant to compete with the new iPad. They had originally started this project with TechCrunch founder Michael Arrington but eventually broke off and did the tablet themselves, incurring a lawsuit from Arrington in the process. When the tablet hit store shelves, its ungainly size and weight compared to the coming iPad, along with battery-life issues and poor lag, ended up making the tablet a failure and unplugged Fusion Garage's business within two years, owing creditors $40 million.
* In 2010, the advent of unlimited storage space and bandwidth will kill Big Media, according to
* In 2010, the Jets started out 9-2 and actually had one of their best seasons in years, barring a 45-3 loss to the Patriots. How did they cap this off? By practically no-showing the AFC Championship Game against the Steelers, going into halftime down 24-0. They outscored Pittsburgh 19-0 in the second half, but they still managed to find another way to lose.
* In 2010, the Philadelphia Eagles had just tied it up against the New York Giants with 14 seconds left on the clock and the Giants punting the ball. The snap was high and the punt instead of going out of bounds went right to DeSean Jackson who burned the entire Giants punt unit and scored a touchdown to win the game with no time left on the clock.
* In 2010, the US women's Olympic gymnastics team from 2000 was awarded the bronze medal from those Olympics after it was discovered that one of the gymnasts on the third-place Chinese team was underage.
* In 2010 they did produce a few episodes with no cutaway gags, basically to prove that they could. Two have been broadcast as of now. One of them, "Brian & Stewie", featured Brian and Stewie locked in a bank vault. It was a normal episode that was pretty well done. The other was an extended
* In 2010, Toyota created an ad series for their Avalon series that were decidedly dieselpunk. The first,
* In 2010, White Wolf released an April Fool's pamphlet of "optional game hacks", including rules for riding animals into battle. Not traditional mounted animals like horses, but animals that could also attack, like grizzly bears, pterodactyls, and unicorns. As with the chainsaw above, it also included stats for using a double-ended dildo as a weapon.
* In 2011, a group called One Million Moms protested against an issue of
* In 2011, Amina Arraf al Omari, a lesbian Syrian woman and operator of the blog
* In 2011 and 2012, the Free Syrian Army received several high ranking (colonel & up) defectors from the Syrian military such as Riad al-Asaad, Mustafa al-Sheikh, Salim Idris, and Abdul-Ilah al-Bashir. But by late 2014, the FSA has taken heavy losses in the Syrian civil war and is now a fraction of its former strength, with
* in 2011 and there was nothing stopping the media reporting what he said about the injunction).
* In 2011, Andy Schleck had a 57 seconds lead on Cadel Evans before the final counting stage in the general classification that year. The thing is, that stage

was an ITT, which is a discipline where Evans is far superior to the
* In 2011, a new logo appeared that involved a planet featuring the above-mentioned background flip, then turning into a smiley face which forms the O in the logo. This logo can be seen
* In 2011, blogger/author Allie Brosh came up with the definition for "alot." According to her, "
* In 2011, "Cena Sucks" chants started to ring out during the shows of NWA promotions that never have and probably never will book John Cena, spontaneously, without any effort to work the crowds into it, putting him on the same level as the trope namer. Even more so after Cena claimed he would never wrestle for a promotion except WWE, saying it would be an insult to the WWE Championship during his otherwise hot feud with
* In 2011 CMLL partnered with the comparatively tiny fed REINA, which isn't even first on a joshi scene that lacks any national promotions, but Ayumi Kurihara left such a good impression with CMLL's fan base that it lead the company to create two new women's belts, bringing the total up to four when not counting those of the two strictly REINA divisions that also get showcased from time to time. Unfortunately Kurihara would soon start winding down to retirement but Chinese wrestler Ray and Japanese partner Leon would see their stocks rise while Karate Girl Syuri would finally get the break she'd been missing since
* In 2011 Honda thought the best way to sell their Honda Civic Si to the young female demographic was with the fun exploits of a masked, super-heroesque girl flying around town in her Si to the tune of MC Chris's “Hoodie Ninja.” Which is about wrapping a sweatshirt around your face and, among other things, peeping on a girl from your homeroom as she undresses in her bedroom. Yeah, that fit the demographic perfectly...
* In 2011, Madeleine Pulver of Sydney, Australia became a stay at home hostage, as a result of a fake collar bomb plot. The instruction note attached to the note even referred to the Brian Wells case mentioned above.
* In 2011, retired Haitian wrestler Tyree Pride gave his endorsement to Tokyo Monster Kahagas regarding the
* In 2011, the Belgian cable company Telenet has been advertising its internet via the cable as "
* In 2011, the Jets stood at 8-5 and had winnable games left on their schedule. What did they do? They were destroyed by the Eagles 45-19, got embarrassed by the Giants 29-14 in a game they had practically staked their entire season on, then were eliminated from playoff contention by losing 19-17 to the Dolphins, a team they could have beaten. The Giants loss was particularly nasty, as the Giants went on to win the Super Bowl that year, the same thing the Jets kept swearing they'd do all season.
* In 2011, the legal guardian of a child complained to the central library of the city of Tottori that it was inappropriate to have a manga "with rape and other sexual depictions in a place where children can reach it." The library removed the work from its shelves and decided to provide it only to those who specifically asked for it. After the scandal in Matsue mentioned above, the library moved the manga back to the shelves.
* In 2011, the song "conflict" by siromaru and cranky won the music game simfile contest
* In 2011 when a religious individual named Harold Camping claimed to have figured out the exact date of the world's end according to the Bible, saying that the world would suffer massive and simultaneous earthquakes on a global scale. The date came and went, confusing people who were expecting and preparing for the world's end. Naturally, the person who made the bold doomsday claim went into hiding from the public while others who still strongly believe the prophecy brushed off the mistake by saying the world is still going to end, but not right now. He died not long after this fiasco turned him into a punchline.
* In 2011, when Paige O'Hara was declared too old to continue voicing
* In 2012, a chef at the Virginia Governor's Mansion was fired for stealing food from the mansion. The investigation into this small-time petty crime ended up

revealing a far more serious crime involving Governor Bob McDonnell accepting extremely expensive gifts in return for illegally using his office to market a dietary supplement. The chef ended up with two misdemeanor embezzlement charges, while McDonnell and his wife were convicted of a combined
* In 2012, a columnist for a Massachusetts college newspaper published an article called "
* In 2012, after a discography that had long run hot and cold, Josh Turner had the biggest hit of the year with "Time Is Love" (although it
* In 2012, a malfunction during a test flight required the pilots to eject from their F/A-18 which then crashed into an apartment complex. Amazingly, there were no fatalities. There were a few unaccounted residents for a few days, who turned out to have been out of town. The Navy paid for the lodging and relocation of the residents of the 40 units that were rendered uninhabitable within two days.
* In 2012, an old Spanish woman without training was trying to restore a 19th-century fresco at a local church and accidentally made a portrait of Jesus look like a smiling monkey. It seemed like a case of
* In 2012, a particularly brainless tourist decided that he would try to climb the gate to Buckingham Palace, an event that was caught on camera. The Coldstream Guard stationed inside the courtyard beyond
* In 2012, a picture was taken at the scene of a fatal car accident, where a cop had broken down, and was praying in tears on the side of the road. The victims had been seven and nine years old.
* In 2012, Apple launched its own version of Maps, but received a storm of criticism as their maps turned out to be horribly inaccurate. The Australian police even issued an official warning not to use it to get to the town of Mildura, because the application would leave the user stranded in the Murray-Sunset National Park, 70 kilometers off target and a very dangerous area to be in without proper preparation.
* In 2012, a right wing group complained to the Matsue city assembly to ban the manga from school libraries because it contained "unsupported" depictions of Japanese atrocities. The city assembly refused to act, but the local school board subsequently moved all copies in local elementary and middle schools to closed shelves, effectively stopping students from reading the work at school. When this action became widely known nationally in 2013, there was a large public outcry. In the ensuing controversy, Japan's education minister commented that he found the ban to be appropriate, though he took no actions himself. In the end, the school board reconvened and unanimously decided to lift the ban, though it is left it to individual schools to decide how they wanted to treat the books.
* In 2012 a Romanian gang tried to rob a moving truck at night by tailgating behind it, climbing onto the roof of their car, and opening the truck's rear doors.
* In 2012, a time capsule that had been entombed for 100 years was removed from the cornerstone of a GE building in Cleveland, OH. In addition to documents and photographs, it contained five light bulbs, at least one of which
* In 2012, Bandai recreated and updated their Emotion division's first logo (an '80s logo, mind you) for modern audiences,
* In 2012 Dennis's parents were given a makeover by Gok Wan, so they no longer looked like they were trapped in
* In 2012, English football player Fabrice Muamba suffered a cardiac arrest on the pitch. He was treated with CPR for 78 minutes (plus a total of 15 defibrillator shocks, and various drugs in hospital) before his heart resumed beating and given the circumstances was almost perfectly fine.
* In 2012, Guf recorded a track with that title, a pretty tongue-in-cheek reply to his then-fresh memetic fame. It also featured Basta, who was reported to be dead around the same time (not as famous for that though).
* In 2012, he assured everyone that we wouldn't find out anything about
* In 2012 he's released a Gorillaz single, made an Elizabethan opera album, released a funk album with Flea and Tony Allen and produced Bobby Womack. He's about to do some dates with Blur, too. When does he sleep?
* In 2012, London's ceremony had a segment celebrating the NHS, the country's

universal healthcare system, against objections from the conservative government. Director
* In 2012, Macy's premiered a Christmas commercial that seamlessly manipulated footage of the late Edmund Gwenn as
* In 2012, pinball player Eric Priepke finished "Cactus Canyon Continued", a project that updated
* In 2012 Planet Hunters discovered PH-1, orbiting a binary system orbiting a binary system. The result?
* In 2012, Prell Gilton and Lupe Mercado found that their daughter Alicia had been forced into prostitution by her boyfriend Calvin Sneed. After
* In 2012, Republican lawmaker Mitch McConnell introduced a bill that would allow the president to raise the debt ceiling. It was intended as a bluff to prove that Democrats were so split on the issue that they would vote against it. Instead, the Democrats agreed enough to it for a straight up or down vote,
* In 2012, Ross Rowland, a noted railroad preservationist, attempted to launch a new luxury train called "The Greenbrier Presidental Express," which was to be a service to the Greenbrier resort at White Sulphur Springs, West Virginia. Multiple passenger cars were acquired, and his engine of choice, the Chesapeake and Ohio 614, was moved to the C&O Historical Society Headquarters in Clifton Forge, Virginia and painted in a green paint scheme to advertise the train as a billboard for it. Supposedly, Rowland intended to press 614 back into service, along with a few other steam locomotives, to work on special event trains, while the main train was powered by diesel. However, the train was scrapped altogether due to a lack of cooperation from Amtrak, who's
* In 2012, scientists at IBM's T. J. Watson research center discovered that cylinder-shaped molecules known as carbon nanotubes may work as a replacement for the silicon-based microchip. The tubes are capable of delivering more power at such a small size without losing any control over the electrical current that flows through them. The tubes themselves are made up of hexagonal pathways, with electrical currents constantly making a path from one end of the tube to the other by going either left or right at each corner of the hexagon.
* in 2012, surely an HD release isn't out of the question given the film's 16:9 aspect ratio.
* In 2012, The Art Institutes created a commercial to showcase what heights students of theirs could reach. A mannequin wears a dress by Gustavo Cadile and tells about how it would've remained but a sketch if the designer had never studied the finer details of sewing or learned how to promote himself.
* In 2012, the Columbus Blue Jackets were so short on goalies that they were forced to call on Shawn Hunwick. He not only wasn't on the team officially,
* In 2012 the Italian knife-maker Maserin produced a reproduction of
* In 2012, word spread across Bethel, Alaska (population 6,000) that a Taco Bell would open there. Bethel is only accessible by air or water. Residents were heartbroken to learn that the original rumor was a hoax, until Taco Bell picked up on the story and airlifted a taco truck with 10,000 tacos to the town, giving them Taco Bell for at least one day.
* In 2013-14, playoff-seasoned coach Doc Rivers arrived, and another Pacific title ensued, as would a Round 1 victory over in-state rival Golden State Warriors. But then despite much effort into upsetting the Oklahoma City Thunder, OKC still beat them. Apart from the playoff choke, the tail end of the 2013-14 season was rough for the Clippers as controversial owner Donald Sterling was involved in a scandal caused by some racist comments he made about blacks watching his games. Thankfully, Adam Silver quickly ended the Clips' misery by banning Donald Sterling from the NBA for life.
* In 2013, 29-year old ship's cook Harrison Odjegba Okene survived a maritime version of this trope when the tugboat on which he was serving capsized and sank off the coast of Nigeria. With his ship resting on the floor of the Atlantic ocean, Okene survived for more than 60 hours in a small air pocket that had somehow not been filled with water, with a bottle of Coke as his only source of food or hydration until he was discovered by divers who had been sent to the ship on a

salvage operation. Sadly, the 11 other men on board on the ship were not so fortunate.
* In 2013, after an embarrassing 3-9 season last year (with no wins against SEC opponents, including a 49-0
* In 2013 and 2014, after pitching very well against the Atlanta Braves in the 2013 NLDS, he went on to lose four straight postseason starts against the same team (the St. Louis Cardinals), becoming the first pitcher in franchise history to do so. While his first loss in the 2013 NLCS was a well-pitched game where he only gave up one unearned run, his second loss was a complete blowout (with Cardinals infielder Matt Carpenter opening the floodgates) that eliminated the Dodgers from the playoffs. In Game 1 of the 2014 NLDS against the Cardinals, Kershaw had a 6-2 lead to work with at the beginning of the 7th inning, but proceeded to blow the game (perhaps not surprisingly, it was Matt Carpenter who drove in the go-ahead runs). In the final game of the 2014 NLDS (St. Louis led the series 2-1), Kershaw once again blew a 7th inning lead (2-0 this time) when he threw perhaps his worst curveball ever and gave up a three-run homer to Matt
* In 2013, Ariel Castro, of Ohio, was sentenced to life plus 1,000 years after pleading guilty to 937 charges related to the kidnapping of three women. He was found dead in his cell a month later, an apparent case of suicide.
* In 2013, a study of dolphin vocalisations revealed that they employ unique signifiers to identify specific individuals. In other words, they give each other names.
* In 2013, Australian pop-rock band 5 Seconds of Summer were selected as One Direction's opening act for their second tour. Unsurprisingly, this spurred international interest in the band and led to a #1 album the next year.
* In 2013, Brooklyn Nets coach Jason Kidd tried to stall the end of an NBA game by telling one of his players to "hit me" and make him spill his beverage, forcing a time-out. Not only did the Nets lose, but the NBA found out what he had done, and fined Kidd $50,000.
* In 2013, Burger King tried to do an advertisement in Russia that showed red poppies being crushed by a Whopper, arguing that the poppy "was popular once, but now its time has passed". The ad was
* In 2013, Disney announced that they were planning to trademark the phrase "Dia de los muertos" (Day of the Dead, a well-known holiday in Mexico) for marketing purposes related to
* In 2013, Elite Canadian Championship Wrestling saw Red Denero become the Ginga Ninja, a
* In 2013, Los Bizarros picked up Cuervo, Espiritu and Ozz, former members of Cibernético's
* In 2013 Matt Prater kicked a 64-yard field goal, breaking the NFL record of 63 yards first set by
* In 2013 NASA engineers took a specimen of the beastly huge F-1 rocket engine, originally built for
* In 2013's "Chopped Champions: Part 1", Chef Sylvain Harribey said "This is all shit!" But
* In 2013, Tennessee enacted a law requiring that beverages labeled as "Tennessee whiskey" be made in the state, meet the legal definition of bourbon whiskey, and use the Lincoln County Process (in which the whiskey is filtered through, or steeped in, charcoal before being bottled for aging). The law specifically allows Benjamin Prichard's Tennessee Whiskey, which does meet the definition of bourbon but does not use the Lincoln County Process (the fact that Prichard's is the only distillery actually
* In 2013, the NCAA investigated college basketball player Shabazz Muhammad after he was seen wearing an expensive Gucci backpack (Shabazz had already been suspended previously for receiving benefits not allowed under NCAA rules). He was eventually cleared when it was proven that the backpack was a gift from family members.
* In 2013, the Pirates finally reestablished themselves as one of baseball's best teams, but were eliminated in the playoffs by their division rivals, the St. Louis Cardinals. In 2014, they finished second in their division to the Cardinals by only

two games and were eliminated by the San Francisco Giants in the Wild Card game. 2015 was particularly galling; they had the second best record in all of baseball, but ended up finishing second to the Cardinals (again) and had to settle for a Wild Card spot (again), where they proceeded to get eliminated by their
* In 2013 there was a great commercial for some art colle- oh wait, it was for
* In 2013, there was a small announcement made by Catalyst Game Labs about the potential of jumping
* In 2013, venture capitalist Tim Draper proposed a "Six Californias" plan that would split the state into six pieces, all splitting along existing county lines.
* In 2013, when Amanda Berry escaped from the Cleveland house of horrors where she'd been held prisoner since being kidnapped ten years ago and called 911, she got a very bored sounding operator who talked to her like he was reading from a script, dismissively told her to just "talk to the police when they get there," and
* In 2013, WWE hyped up the first match between John Cena and Daniel Bryan as being a really big deal but it was really just the first match they ever had in nine years since they first squared off on WWE Velocity.
* In 2014, a car ad in Spain did a "sound-only" variant of this, with
* In 2014, a couple in Russia was involved in a car accident, which resulted in the wife's death. The driver of the other car was drunk and was clearly the guilty party (his car crossed to the opposite lane). The drunk driver was arrested and found guilty of DUI and reckless driving and put in jail, also being ordered to pay compensation to the other driver (which he never did). Then the drunk driver's passenger (who had also been drinking before the driving) sued both drivers for compensation. The case was dismissed initially, as the court took into account the fact that the other driver was not at fault and himself never received compensation from the drunk driver. She filed for an appeal in a different area, and the second court ruled in her favor, so the innocent driver had to shell out a sizable sum to pay for someone who was partly responsible for his wife's death. How's that for justice?
* In 2014, after getting a reputation for poor service, Friendly's Restaurants advertised basically that "We haven't always lived up to our name, but from now on...!"
* In 2014 after losing their starting QB before the season and their backup just before the Conference Championship, Ohio State was forced to start third-stringer Cardale Jones. Jones proceeded to not only win the Conference Championship, but also lead the team past the top two teams in the country to win the national championship.
* In 2014 a London Air Ambulance crew used a new method (Reboa) of preventing blood loss on a patient involved in a large RTI. The method involves open-heart surgery, and the patient survived.
* In 2014, an ATM at a Tesco in Wales meant to say "Arian am ddim," or "withdrawal without fee," but accidentally put "Codiad am ddim," or "erection without fee."
* In 2014, a politician suggested this method of handling any case of Ebola discovered on American soil or elsewhere. His
* In 2014, Avex began the first series in a unisex anime franchise about dancing that aired as part of the Nichi Asa Kids' Time block,
* In 2014, a year after Russia passed a law banning "homosexual propaganda" (
* In 2014, Brazil is the host nation, their first home tournament since their 1950 defeat (itself already a
* In 2014 Eric Cantor, then the House Majority Leader, was confident he would cruise to reelection in his central Virginia district even though his primary challenger David Brat, a college professor who had never held government office, had been gaining ground against him in polls, running on an anti-establishment and right-wing populist platform. Cantor had the backing of the national party and outspent Brat 40-to-1. Cantor apparently didn't consider Brat much of a threat and rented out a large ballroom for what he assumed would be his victory party. The race was called for Brat soon after polls closed, who won by a comfortable 10% margin. To be "Cantored" even became political terminology for when a high-ranking politician is unexpectedly defeated by an unknown from within their own party.

* In 2014, Focus on the Family sought to put on a radio production of
* In 2014, Gilliam's seventh attempt at production was underway, this time with
* In 2014, he finally showed his face in a panel after keeping it a secret for years. The catch? The panel consisted of multiple people,
* In 2014, Love Hearts (UK counterpart to Sweethearts) were updated to such messages as "Tweet me a selfie", "Snapchat me" and "Swipe right".
* In 2014 Nintendo announced an as-yet still mysterious "quality of life" platform that will be focused on health and fitness and incorporate technology that can detect the user's body in some way. It's been speculated that the vitality sensor project may have morphed into this over time. Said platform has also not surfaced as of 2021.
* In 2014 North Korea claimed that South Korea had broken the ceasefire treaty when soldiers erected a Christmas tree on the southern side of the DMZ.
* In 2014, Old Spice is back at it with commercials showing an obvious android straight out of the
* In 2014, Omocat announced a game based on an old webcomic of hers, simply titled
* In 2014's NCAA Division III playoffs, The University of Texas at Dallas Comets hosted the regional for their division. The final of said regional pitted them up against Whitworth, a school from Washington state. The game went to overtime off of a Whitworth basket to close out regulation, and UTD fell behind by seven early in the overtime. They came roaring back thanks to good free throw shooting and poor free throws by Whitworth, making it 77–75 with 9.6 seconds left to play. UTD fouled the inbounder, stopping the clock with 7.1 left and forcing a one-and-one free throw, which was missed. With the final 7.1 seconds, UTD dribbled the ball upcourt, and then put up a shot at 0.4 seconds left.
* In 2014, some enterprising person decided to sell custom-printed condoms on Amazon. This would already be rather odd, but they decided the best example images to use were... pictures of
* In 2014, Spain was eliminated in the first round, despite having one of the stronger teams and being the winner of the previous World Cup.
* In 2014, the IBA went through several restructuring as the Israeli government decided to create a new company that would be in charge of managing the new public television: the Israeli Public Broadcasting Corporation (IPBC). However, the government could not start operations of the new company until May 15, 2017 due to problems with the European Broadcasting Union (EBU), owners of the
* In 2014, the Leafs peaked at 3rd place in the Eastern Conference, and despite a mediocre November were performing well... until March and April, where they went 2-12 in their final 14 games, finishing 12th in the East and missing the playoffs again.
* In 2014, the "Lidl Surprises" campaign in the UK had the German discount supermarket posing as a hip farmer's market in London and a gourmet tasting event in a posh villa, only to reveal the truth once customers had expressed their admiration for the food and surprise at the low prices.
* In 2014 the new government of Ukraine started building a fence along the Russian border. Propaganda described it as a new Chinese wall to protect civilized Europe from hostile invaders (there is an ongoing war between the two nations after all). The plans were made for high-tech electrified fences, moats, cameras, drones, landmines... As of early 2021, about 40% of it had been built, although the construction has been marred with huge corruption scandals.
* In 2014, there was the ice cream clown family Sweet Licks, Cutty and Bubba from the haunted house,
* In 2014, the social networking site Foursquare announced that they'd
* In 2014, the team that was once Cup favorites had pretty much self-destructed, trading away both of their starting-caliber goalies for a draft pick and an AHL goaltender, firing their GM, and failing to so much as make the playoffs in the juggernaut Pacific Division.
* In 2014, while TNA was in dire straights, they found room to sign Chris Melendez, a trainee from the
* In 2015/16, Leicester's King Power stadium developed a reputation as a near

impossible place to win, the team losing only once (2-5 to Arsenal in September), as they won their impossible title.
* In 2015, a 12-year-old boy tripping and punching a hole in Paolo Porpora's
* In 2015, a 63 year-old British tourist called Geoff Keys got lost in the Australian outback. He was found after a search helicopter spotted the message "HELP 2807 —>" (the latter parts was the date and an arrow pointing in the direction he was travelling) that Geoff had carved in into the sand.
* In 2015, a couple days after Brazilian voice actor Caio Cesar was shot in the line of duty, several local TV stations reran productions featuring his voice. TV Cultura reran
* In 2015, a fitness supplement company called Protein World launched a billboard ad campaign in the United Kingdom that showed supermodel Renee Somerfield in a bikini with the tagline "Are you beach body ready?" The ads were immediately attacked by feminists who accused Protein World of "body-shaming." Rather than apologizing and removing the ads, Protein World used Twitter to mock their feminist critics by saying things like "Your insecurities are not our problem." This enraged the feminists even more, but a lot of people praised Protein World for standing their ground and not giving into the "cry-bullies." In the end, Protein World reported that the controversy resulted in a significant boost in sales.
* In 2015, a motion was made in the case of Luthmann v. Chusid requesting that the court order trial by combat to resolve the controversy, arguing that since such means were part of the English common law at the time of the American Revolution, and never banned by the New York state nor Federal legislatures, it remained within the purview of the New York Supreme Court to order such a trial. The Judge in the case issued a ruling in March of 2016 noting "this Court does not deny that such power resides within the Supreme Court", but nonetheless denying the request.
* In 2015, an accident knocked out the electric power supply on the Dutch Railways line between Hoorn and Enkhuizen, leaving an electric train stranded a few miles outside Hoorn. Fortunately there's a heritage railway at Hoorn, and
* In 2015, Atlanta jewelry chain Shane Co. did a series of fake "radio call in interviews":
* In 2015, a witch from New Orleans posted in a witchcraft discussion group about using human bones they found in a nearby cemetery (specifically, a potter's field, which meant the graves were shallow and not very well protected) for rituals, and offering to send them to people. (There are in fact some rituals in various forms of witchcraft that require human remains, but none that allow you to just take random bones from a stranger without their prior consent.) This naturally caused a
* In 2015, a woman named Clauddine "Dee Dee" Blanchard was murdered and her
* In 2015, director Chris Buck jokingly claimed that he likes to think King Agnarr and Queen Iduna survived their shipwreck, ended up in the jungle and became
* In 2015, during the network's All-Star Curling Skins Game, Canadian sports channel TSN aired annoying ads for VTech's
* In 2015, ESPN aired a montage of college football highlights to shill
* In 2015, he would recite his own version of the "Hush Little Baby" rhyme right before subjecting his victim to said live dissection.
* In 2015, in response to a civil war in Yemen that featured the overthrow of the government by Iran-backed fighters and the escalating threat of jihadist terrorism in Syria, Iraq and other parts of the Middle East (particularly the rapid rise of the
* In 2015, in retaliation for the Crimean crisis, the Ukrainian government began to blacklist Russian artists who supported the annexation of Crimea by Russia from entering the country, and restricting new films featuring blacklisted actors from being exhibited in the country. Although older films are not covered by this policy, the negative stigma prompted a Ukrainian television network to end its annual tradition of airing
* In 2015, Kyle Busch missed several races after suffering a broken leg in the Xfinity Series opener at Daytona. NASCAR ruled that even if he won a race when he returned, he'd have to compete in a certain number of races and accumulate a certain number of points before qualifying for the Chase. Busch came back and won

several races to qualify with ease despite the restrictions. He then managed to survive all the way to Homestead on points alone (no small feat) and ended up winning the Championship by 3 seconds over defending champion Kevin Harvick.
* In 2015, Matt Kenseth was put out of contention in a race at Martinsville due to an early wreck severely damaging his car. When Joey Logano later went to pass the off-pace Kenseth, he deliberately turned in on Logano and both cars went hard into the wall, knocking them out of the race completely. While the incident earned Kenseth a 2 race suspension, it had the desired effect of also ruining Logano's chance at the Championship that year. Given how the fans in attendance
* In 2015, Michigan Rep. Todd Courser admitted to writing up and sending out e-mails accusing himself of soliciting a male prostitute, because he was
* In 2015, not long before the temporary closure March, Joe Bravo and The Gentlemen's Club did this to Director Of Wrestling Operations Savio Vega, who was basically a
* In 2015, Oedo~tai jumped on World Wonder Ring STARDOM's first USA tour, bringing Hudson Envy back to the EWF arena, where she got her start, for the first time in three years, only to see her and Thunder Rosa's thunder stolen by
* In 2015, PETA filed a class action lawsuit against Whole Foods accusing the latter of false claims surrounding animal welfare. The lawsuit was dismissed because Whole Foods' vague claims about humane meat, such as "great-tasting meat from healthy animals" and "raised right tastes right," were considered legal levels of puffery. Their boast that "no cages" were used to raise their broiler chickens was also deemed not misleading, but it
* In 2015, the Chinese port at Tianjin stored a number of hazardous materials that exploded with enough force to register as a 2.3 magnitude earthquake, toss shipping containers like fireworks, kill 173 people and injure almost 800 others over the course of a nightmarish weekend. Making things worse, the firefighters' attempts to control the flames with water exacerbated the problem and helped cause eight additional explosions due to chemical chain reactions with some of the combustible materias on-site. The primary suspects? 800 tonnes of ammonium nitrate, 500 tonnes of potassium nitrate, (at least 700 tonnes of) sodium cyanide, calcium carbide (which reacts to water by turning into acetylene gas), and an overheated container of dry nitrocellulose to set it all off.
* In 2015, the Clemson Tigers rode a top-ranked undefeated record all the way to their first National Championship Game appearance since 1981, and fought a valiant battle against the Alabama Crimson Tide, only for defensive breakdowns to do them in the final quarter as the Tigers lost 45-40.
* In 2015, the Japanese government opened a new organization dedicated to combating cyber-crimes related to internet usage and technology, and used
* In 2015, the Jets stood at 10-5 in the final week of the season, in a "win-and-in" scenario facing former head coach Rex Ryan and the 7-8 Bills in Buffalo. Jets QB Ryan Fitzpatrick, who was having a Cinderella season at Quarterback, turned into a pumpkin in the final stretches of the game, throwing
* In 2015, the Patriots ran a trick play against the Ravens in a playoff game which relied on confusing the Ravens about which players were eligible receivers. Per the rules at the time, the offense was required to inform the referee which of their linesmen were eligible or ineligible receivers, and the referee was required to inform the defending team that one of the linesmen was an ineligible receiver. However, more information wasn't required, making it unclear to the Ravens who exactly was and was not an eligible receiver, making it much harder for the Ravens to defend against passing plays. After the game, new requirements were put in place for identifying ineligible receivers at a glance based on where they lined up.
* In 2015, the Romanian metal band Goodbye to Gravity were performing a free concert at the club Colectiv to celebrate the release of their
* In 2015, they launched a new series of ads with a live-action Darrell Hammond, of
* In 2015, Volvo showed a shooting brake concept, intending to put a similar design into production if the public reception is good enough. However, the estimated demand ended up being too low to justify production, and the design isn't

going to be mass-produced.
* In 2015, with FIFA President Sepp Blatter having to resign over the huge corruption and bribery scandal stemming from the bidding process of the 2018 and 2022
* In 2016, 10-year-old Caleb Schwab was decapitated on Verrückt at Schlitterbahn Water park in Kansas City. Due to uneven weight distribution, when the raft went airborne, it hit the netting and Caleb was decapitated by a metal support beam. His father, Kansas state assemblyman Scott Schwab, sought criminal charges against the park. While the case was ultimately dismissed, the park's reputation was badly damaged, as attendance declined following the incident.
* In 2016, an Australian doctor took a wrong turn and discovered a catastrophic truck collision in the middle of nowhere, and called for emergency services. When they arrived, they asked the doctor to stay in case they needed help and firefighters freed the truck drivers. A paramedic attempted to decompress the chest, without luck, and called the doctor over. He then cut open the man's chest cavity, called his attending, and continued surgery to relieve it. The doctor says that, really, anyone with the same skill in the same circumstances would have done the same.
* In 2016, a visitor trying to reactivate a clock in a clock museum ended up
* In 2016, Canadian writer Kel Currie was called a pedophile on Encyclopedia Dramatica by cyberbullies simply for watching cartoons and collecting dolls. Since Currie has a developmental disability, her interests are not typical of adults. Currie herself is asexual and has stated that she hates pedophiles.
* In 2016, Fox took over another sports property that was being swept under the rug by ESPN — NHRA drag racing. Unlike ESPN (which treated NHRA events as an afterthought and constantly shuffled it around its schedule to the chagrin of fans) Fox Sports 1 and 2 have aired more consistent and thorough coverage, with broadcasts of qualifier rounds, live finals coverage from most events, and more importantly, better scheduling and promotion. Plus, the
* In 2016, independent film-maker Charlie Lyne produced a movie that was over
* In 2016 Indy car driver Josef Newgarden went literally headfirst into the wall at Texas Motor Speedway, breaking his right hand and shoulder, and there was talk about whether he would be back for the end of the season. As it turns out, he was back for the very next race at Road America, where he finished eighth in spite of having thirteen screws in his shoulder and his hand was still healing. Two weeks after that, at the G-load heavy Iowa Motor Speedway, he started on pole and utterly dominated, even while still healing from his injuries at Texas only a month before.
* In 2016, Japan-based Glico had specially-named Pockys to be given as different types of gifts, such as for good luck, love, friendship, and even ones for parents. These names were amalgamations of certain words with "Pocky". One, however, intended to be given by an admirer, had the unfortunate name of "Sukky".
* In 2016, LinkedIn was banned in Russia for violating a new data retention law.
* In 2016 makes it obvious it was specifically criticising the people behind the New 52.
* In 2016, Microsoft announced a "Play Anywhere" initiative, meaning any and all Microsoft Studios games from then on would release simultaneously on Xbox and PC. Initially they were exclusive to their Windows 10 app store, but starting with
* In 2016 Sasha and Malia were nowhere to be seen during President Obama's final turkey pardon, because they'd become too embarrassed by the seemingly endless stream of dad jokes he'd make during the event. Instead, he was joined by two nephews.
* In 2016, some new trainees debuted, including Hyou Watanabe and Shun Watanabe. Shun quickly donned a mask and adopted the name Shun Skywalker to avoid confusion.
* In 2016, the Cleveland Browns had been going the entire season without any wins or ties. That is, until their second-to-last game against the then-San Diego Chargers on Christmas Eve (which was also the Browns' last home game that season). In the last seconds of the game, the Chargers were behind 20-17 and were attempting a field goal to force them into overtime. Instead, the Chargers missed it,
* In 2016, the team started to go back to its old ways; they started out hot and

fought hard to stay above .500 for most of the season despite a June swoon, but they would fizzle out in September and finish below .500. In 2017, they stumbled out of the gate and never really had a chance. In the meantime, the Kansas City Royals and Chicago Cubs would snap their infamously long championship droughts in 2015 and 2016 respectively, leaving the Pirates with the longest championship appearance drought, having not played in the World Series since 1979 (in fact, they haven't even been to the League Championship series since 1992). Despite the
* In 2016, the Tigers come back to the Playoffs, shutting out Ohio State 31-0 in the Fiesta Bowl and in the National Championship against Alabama, won 34-31 by overcoming an early 14-point deficit and scoring 21 points in the fourth quarter, with a last-minute touchdown drive to take the win.
* In 2016, the Utah-based Candlelight Media Group launched Lumin.TV, a family-friendly streaming service targeted specifically at LDS audiences. In addition to the company's in-house productions, they hosted
* In 2016, they did everything they could to honor one of the network's original driving forces, C. Martin Croker. This included the
* In 2016, things seemed to really be looking up for the Falcons, finishing 11-5 and coasting through the NFC Playoffs to advance to their second Super Bowl, where they were on the wrong side of history again, as they became
* In 2016, this marathon was retired, and was replaced by another now-annual tradition: a four-day marathon of three of TBS' original shows:
* In 2016, two different toy companies came out with toys based on the "unboxing" craze:
* In 2017, a bloodhound ran an entire half-marathon after being let outside to pee near the starting line. She finished in 7th place and was awarded a medal.
* In 2017, after another change of management and the subsequent end of gold generators, a new currency Platinum was introduced with 1 platinum worth
* In 2017, after beating the New York Yankees in the American League championship, by winning four of the seven games they played, including the final seventh game, the Astros went on to face the Los Angeles Dodgers. It was in the final game, played in Dodger Stadium, that the Houston Astros
* In 2017, after the Republicans gained control of the presidency, Senate, and House, Republican Senate Majority Leader Mitch McConnell tried unsuccessfully several times to pass an Obamacare repeal bill that appealed to both moderates and conservatives in the party. In July 2017 his party drafted what the media referred to as a "skinny repeal" bill that would repeal key parts of Obamacare and had seemingly secured enough votes to pass it, as only moderate Sens. Susan Collins and Lisa Murkowski publicly opposed the bill, and a 50-50 tie would be broken by Vice President Mike Pence who supported the bill. During the floor vote Sen. John McCain unexpectedly voted against the bill, causing it to fail 51-49.
* In 2017), and depictions (implied and otherwise) of homosexual couples (the remaining six).
* In 2017, a tanker truck carrying 40,000 litres (10,567 gallons) of petrol overturned and spilled its cargo in Bahawalpur, Pakistan. As petrol was expensive, villagers in the vicinity quickly gathered at the crash site to collect as much of it as they could. Many of them ignored repeated warnings from both the truck's driver and the police to clear the area due to the fire hazard the spilled fuel posed. Several minutes afterwards, the truck exploded, killing 219 people.
* In 2017 Candy Cartwright and her "Cutie Pie Club" caused this trope to apply to SHINE Wrestling. Their earliest efforts to stink up and sabotage
* In 2017, factions of the Zimbabwe Defense Forces enacted a coup by detaining President Robert Mugabe and his cabinet, including First Lady Grace Mugabe under "Operation Restore Legacy" due to the Mugabes unnecessarily purging the ranks of the ZANU-PF of their allies, especially Emmerson Mnangagwa, when they accused them of being involved in a potential coup. This started to be the main event that pissed off every Zimbabwean since Mugabe became president, becoming very distant and then relying on the military to crush dissent. Even his friends and allies who fought with him in the independence war were also frustrated with him and thus threw their support behind the coup.

* In 2017, factions of the Zimbabwe Defense Forces (ZDF) enacted a coup by detaining President Robert Mugabe and his cabinet, including First Lady Grace Mugabe under "Operation Restore Legacy" due to the Mugabes unnecessarily purging the ranks of the ZANU-PF of their allies, especially Emmerson Mnangagwa, when they accused them of being involved in a potential coup. This started to be the main event that pissed off every Zimbabwean since Mugabe became president, becoming very distant and then relying on the military to crush dissent. Even his friends and allies who fought with him in the independence war were also frustrated with him and thus threw their support behind the coup.
* In 2017, however, Nintendo experienced an upswing with the release of their new console, the
* In 2017, Pepsi released an ad starring Kendall Jenner where during a photo shoot, she decides to hand a Pepsi to a cop during the middle of a protest. The ad was heavily panned for being tone deaf and promoting the message that Pepsi would ease tensions between protesting factions. Pepsi would eventually pull it due to the backlash.
* In 2017, Perry did actually cut her hair after reverting back to being a blonde (since she wasn't a naturally
* In 2017, Sega launched a service called Sega Forever for Android and iOS devices, featuring a selection ad-supported free-to-play titles from the Sega Genesis and Dreamcast era as well as native mobile ports of existing games. Games featured in this service includes
* In 2017, the Dodgers have one of their best regular seasons ever and proceed to make it to the World Series for the first time since 1988, and as the favorites against the Houston Astros (who had never won a championship since their establishment in 1962) to boot. Kershaw's own fortunes were looking up too; sure, the Arizona Diamondbacks hit four home runs against him in his sole start of the NLDS (with the Dodgers only winning that game because their own offense performed even better), but he proceeded to pitch well (though not necessarily his best) against the Cubs in both of his NLCS starts, and his first World Series start was an absolute gem of a victory. However, Kershaw would once against fizzle out right at the moment when his team needed him the most; in a crucial Game 5 start when the series was tied 2-2, Kershaw gave up a three-run lead
* In 2017, then-FBI Director James Comey learned he had been fired from a TV news report announcing his dismissal,
* In 2017, the private rocket company SpaceX released a video titled
* In 2017, they registered a trademark in the United States that would've allowed them to release lots of merchandise, but they never used the trademark and they let it expire.
* In 2017, Wanna Cry — a ransomware botnet — affected more than 20% of hospitals in the UK, later spreading to over 74 countries. The malware was designed to automatically ping an unregistered domain name, and would cease to exist if it found a domain name that actually existed. A twentysomething hacker found this flaw, registered a previously unregistered domain name, and began to intercept the botnet's packets. This registered domain's IP address reached all affected PCs... shutting down the virus. As Malware Tech, a British research firm, described it: "It thought it was in a sandbox [testing environment] and killed itself." Or, to put it another way, it was the cybersecurity equivalent of launching a missile that will only detonate if it hits a preassigned city ... and having the missile technician add "Mojave Desert" into the missile's launch code database.
* In 2018, a "blue wave" year, Democrats won seats in the traditionally Republican suburbs of Charleston (South Carolina), Oklahoma City, Salt Lake City, Staten Island, upstate New York, and Republican-leaning rural areas of New Mexico, Maine, and Iowa. Donald Trump won all of these seats in 2016 by sizable margins, so Democrats winning any of them in 2018 was shocking (though some were by razor-thin margins—the Utah Democrat, Ben McAdams, won by 694 votes out of almost 300,000 cast). Holding on to them in a presidential election cycle was another story, though, as Democrats likely needed a blowout defeat of Trump to repeat that success, and although all polls indicated that was what was going to happen, Trump

still carried those seats again with little trouble, and, with the exception of the seat in Maine, all of the House Democrats in question were sent back home after just one term (although once again, some still by razor-thin margins—the upstate New York Democrat Anthony Brindisi only lost his bid for a second term — to the same Republican he had ousted two years prior, no less (Claudia Tenney) — by a little over 100 votes).
* In 2018, after Comcast unexpectedly dropped Big Ten Network outside of Big Ten conference markets, Dish Network began to counter with a commercial showing a frustrated college football fan unable to watch his game (clearly not prominent enough to be on a major channel), promoting that Dish carried "every" Division I football game.
* In 2018 and 2019, the Falcons were anemic at best, finishing both seasons with a 7-9 record and missing the playoffs.
* In 2018 Dushku appeared poised for a comeback with her appearance on
* In 2018, "Is a hot dog a sandwich?" became an object of deeply heated debate on twitter.
* In 2018 it made international news when 68-year-old Japanese minister
* In 2018, longtime Chicago album-rock station WLUP-FM ("The Loop") was also sold to the K-Love network. On March 10 of that year, The Loop created a special playlist for its final hour; this included a couple of classic rock staples (
* In 2018,Romanian TV had a commercial for a taxi service named Street Taxi,which used this jingle (translated into English):"9-4-6-5,Street Taxi is here".
* In 2018, she ended up back in her original Caucasian body, and while she's retained her combat skills, she's shifted her psychic weapons to suit - more triangular shield and longsword than katana.
* In 2018, Team Four Star showed a short teaser for a wrestling-themed show filmed with action figures called AWF. They still occasionally mention it on social media when asked about future projects, but nothing more has been shown.
* In 2018, TFS premiered a pilot for an original 2D-animated series called "Fist Master." Although it was announced as a series, no followups have been revealed.
* In 2018, the company announced that some stores would be named "Dunkin'" as test markets for a potential name change.
* In 2018, the Dodgers had a strong regular season, and won the National League Championship against a very strong Milwaukee Brewers who extended the series to the seventh game where the Dodgers won by scoring a three run homer that got them the 5-1 victory. Next came the World Series, where the Dodgers faced off against the Boston Red Sox, who had just come off a very strong regular season, and record setting season for the franchise loosing only one game out of four against the New York Yankees, and one out of five against the Houston Astros. The Dodgers lost the first two games against the Red Sox in Fenway Park, back in Dodger Stadium, the dodgers eked out a 3-2 victory after a grueling 7 hour, 18 inning game. In Game four, thanks to a three run homer by Yusiel Puig, the Dodgers were up 4-0 on the sixth inning, where pitcher Eduardo Rodriguez was retired for the night on the seventh inning. His replacements, Ryan Madson and Kenley Jansen, allowed the Red Sox to score an incredible nine runs in three innings, and though the Dodgers scored again, the final score was Dodgers 6, Red Sox 9. In game five, the Red Sox got off to a good start scoring a two run homer at the top of the first inning, the Dodgers scored one run in the bottom of the first, but Kershaw allowed four runs, and Pedro Baez allowed another single home run on the eight inning, leading to a score of 5-1. At the bottom of the ninth inning, Chris Sale struck out Manny Machado, leading to the Red Sox to claim their fifth World Series Championship since 2004, while the Dodgers, for the second year in a row, lost in their home turf. And once again, when Clayton Kershaw was trusted to pitch big, he failed, losing Game 1 and crucial Game 5, which gave Red Sox the World Series. This makes his record 9-10 in the post season with an ERA over 4.30. He has also become the only pitcher to give up the most home runs during the World Series.
* In 2018, the phrase "Funds are safu" became a meme among users of the cryptocurrency exchange Binance, due to a
* In 2018, the poll was to choose a couple of characters opposed to eachother to

include in the
* In 2018, the series has underwent a major retool along with a new title:
* In 2018, Toro Rosso's lineup consisted of Pierre Gasly and an Eastern Hemisphere driver not from Europe using a British former driver's 20's-range number in the form of New Zealand's Brendon Hartley using the number 28 of Will Stevens. Three years later the team, now Alpha Tauri, brought on Japan's Yuki Tsunoda (using Jenson Button's number 22) as Gasly's teammate.
* In 2019-20, having reigning Finals MVP Kawhi Leonard along with Paul George raised the hopes that the Clippers could finally win the big one. And then again the team couldn't get to the Conference Finals, opening 3-1 on the oft-underperfoming Denver Nuggets and managing to suffer a horrific collapse in which they had a
* In 2019, a little known laptop company called XMG released what they claim to be the first laptop with a desktop AMD Ryzen processor inside. Little that they know, Acer had went down that path in 2018 with the Predator Helios 500 AMD Edition, and Asus went down that path a year earlier in 2017 with the ROG Strix GL702ZC. It would be truthful of them to claim that they're releasing the first laptop with a third generation Ryzen desktop processor.
* In 2019 and 2020 Costco had some Christmas decorations out September 4th. Note that in 2020 this was 3 days BEFORE Labor Day, 51 days before Halloween, and 77 days before Thanksgiving.
* In 2019, a post by entertainment magazine Complex went viral that took something she said about Dumbledore and Grindelwald way out of context. It said she said they had an “intensely sexual relationship” which took two separate things she said and put them together. She said it was intense and that there was a sexual element to it, she didn’t say the sexual part was intense. She was accused of fetishizing it. However, if you actually watch the interview it’s from, she goes out of her way to say she’s not really interested in the sexual side, she was more interested in the clash of two equals side.
* In 2019, a study was publicized by the media for how many shootings had occurred in a matter of months in the United States to demonstrate a problem with gun culture. When you read the study, they state that they defined a shooting as any event where a firearm was reported even if it was not used, anyone was injured/killed, or was even present at all. Another study reporting the number of children killed by guns in the home defined a child as a dependent under the age of 25.
* In 2019, Chicago Mayor Lori Lightfoot was caught on-mike referring to a police official as "this FOP
* In 2019, Coleen Rooney, wife of soccer superstar Wayne Rooney, suspected another soccer wife of leaking her private stories to the tabloids. She tested the theory by making her social media private to everyone but the suspect, then posting false stories and seeing if they spread. When they did, she made a big public accusation, which of course became huge tabloid fodder again.
* In 2019, Donald Trump mocked Greta Thunberg after she was named as Time Person of the Year. Fast forward to the 2020 Presidential election, wherein Greta trolls Trump by quoting his tweet nearly word for word in response to a call from Trump to stop the vote counting: "So ridiculous. Donald needs to work on his anger management problem, then go to a good old-fashioned movie with a friend! Chill, Donald, Chill!"
* In 2019, Gilette turned towards politics with their "The Best a Man Can Be" ads calling out toxic masculinity, which led to positive coverage of the brand, but a drop in sales.
* In 2019, Jeffrey Epstein, a billionaire accused of trafficking children for
* In 2019, longtime Democratic-aligned Wisconsin Judge Shirley Abrahamson announced she would retire after her term’s expiration in April. The Democratic base rallied around Lisa Neubauer, who was supported by a large network of state and national left-wing organizations. The Republican was Brian Hagedorn, a little-known judge who conservative organizations were barely putting any effort into. After losing the election in the 2018 Supreme Court race by 10 points and all

of their key statewide races during the November midterms, Wisconsin Republicans were demoralized and even they expected Neubauer to cruise to victory. Even a large realtor group who endorsed Hagedorn gave up on him about a month before the election due to concerns over some controversial views of his. Hagedorn was being outspent by about 14-to-1. What happened? The conservative base unexpectedly showed up. Many were outraged that Neubauer’s supporters decided to use what could be perceived as anti-Christian rhetoric to argue against Hagedorn during the campaign
* In 2019, Microsoft introduced a new version of its ergonomic keyboard that included an emoji key. Given that the keyboard is popular in professional settings where emoji use is often discouraged, many saw this as a questionable move.
* In 2019, NECA made convention exclusive figures based on the various
* In 2019, New York City adult contemporary station WPLJ was sold to a Christian radio network, and ended a 71-year run as a commercial station. Their final days on-air in May 2019 were met with much fanfare, including a promotion in which the station would play through songs from 1971 (the station's first year under the WPLJ calls) to the present to "clean out" its music library, while there were also on-air reunions of past personalities, and a final toast to the station at around 7:00 p.m. on May 30, after which the station flipped to the K-Love network.
* In 2019, Sirius XM's indie station, XMU, did this sort of thing, dubbing it the
* In 2019, Thallanor was subjected to this again, He managed not to get sick, but had to discard much of it due to time constraints, much to his relief.
* In 2019, the Browns had high expectations and opened as the favorites to win the AFC North and had high odds to win the Super Bowl, thanks to a promising rookie season from quarterback Baker Mayfield, Odell Beckham Jr. being traded from the Giants, and a brand new head coach in Freddie Kitchens. However, they did not meet expectations, due to Baker Mayfield regressing, the offensive line having more holes than a chunk of Swiss cheese, the inexperience of Freddie Kitchens, the team being undisciplined, injuries to key contributors, and both sides of the ball regressing overall. After a disappointing 6-10 season that ended with a loss to the Bengals (who had already clinched the worst record in the league), Freddie Kitchens was fired after only one season and was replaced by former Vikings offensive coordinator Kevin Stefanski.
* In 2019, the decline has continued. Since the #ChangeTheChannel scandal, the Nostalgia Critic has increasingly become the target of ridicule in many internet circles. His review of
* In 2019, the poll was to choose which one out of four Decepticons would be featured inthe
* In 2019, there is a moral panic going on about something called the "
* In 2019 the World Health Organization added "gaming disorder" to its list of diseases, making it the first disorder that pathologizes a hobby.
* In 2019, they put out a controversial commercial addressing toxic masculinity, depicting a montage of sexist behavior and bullying before encouraging their male customers to be better. It's more of a PSA than an ad for razors or any other Gillette product - though they do play off their slogan ("The best a man can get," which is tweaked into "The best a man can
* In 2019, University College Dublin Dramsoc produced a play based on
* In 2020 and because she was receiving death threats because of this mistake. The damage was already done because thousands of TikTok users got the tattoo before they did the research.
* In 2020, a new twitter account titled Seradotwav popped up, with no outward ties to League Of Legends being apparent from the start. The account features a quirky,
* In 2020, Britain's opposing Labour Party is rebranding and repositioning itself as a party of the centre, following a disastrous election defeat in December 2019 and a change of leadership. It is noticable that the new leader Sir Keir Starmer, an Establishment figure from the party's right wing, has been overseeing a realignment of the Party to the right, clearing out or isolating members who were active in the former centre-left leadership and in its support. The pretext of "anti-semitism" has been used to expel members who were formerly active on the left, shadow cabinet ministers inherited from the previous leadership have been

demoted or sacked on various pretexts, and even the previous party leader Jeremy Corbyn is now in a state of limbo that falls one step short of being formally expelled.
* In 2020, it hit the iTunes charts in the US after Google featured it in a Google Doodle marking what would have been the artist's 61st birthday.
* In 2020, KFC announced they would drop their slogan, "It's finger-licking good," in light of the COVID-19 pandemic and people becoming more cautious about spreading germs.
* In 2020, Marvel ran a series of variant covers to promote the "Nexus War" event in
* In 2020, the Falcons found themselves on the wrong side of history again as they became the first team in recorded history to score 39 points in a game while not committing any turnovers and lose the game. As a result, following an 0-5 start, team owner Arthur Blank decided he had seen enough and fired both head coach Dan Quinn and general manager Thomas Dimitroff. This did little to help the Falcons' fortunes, as they stumbled their way to a 4-12 record, finishing last in their division. Four of those losses came when they went into the fourth quarter with the lead.
* In 2020, two Atlanta men fatally shot a jogger whom they believed had been responsible for a string of burglaries in the neighborhood. They cited an old citizens' arrest law as their justification, which did not protect them from arrest but did bring attention to the law and led to its swift repeal.
* In "20/20 Vision", the uptight, highly committed loan officer Warren Cribbens is embarrassed when he overhears Sandy refer to him as "the human calculator."
* In 2020 when the COVID-19 pandemic happened, many Americans referred to the virus and disease as "Chinese flu" or some other permutation that includes the word "flu" and some reference to China. COVID-19 is not caused by an influenza virus but a virus related to those that typically cause the common cold. (The name probably originated by extension to many previous pandemics, such as Spanish flu and swine flu, which were indeed strains of the influenza virus.)
* In 2021, Britney spoke before a court to request an end to the conservatorship that gives her father so much control. She confirmed what a bunch of people suspect: he's used the setup to have total control of her life, both personal and professional. In one horrifying instance, he had her doctors given lithium because she dared object to a piece of choreography for an upcoming performance.
* In 2021, due to travel restrictions in the wake of the COVID-19 pandemic, the league's divisions were temporarily modified so that all 7 Canadian teams competed in a "North" Division. During the regular season, the Leafs ran away with what was largely seen as the weakest division in the league, and looked to have an easy path to the semifinals at the start of the playoffs. Cue the Leafs choking away a 3-1 series lead to the Montreal Canadiens, who had the lowest regular season points total of the 16 playoff teams, en route to yet another first-round exit.
* In 2021, five privately run Burmese-languages newspapers were banned in the country.
* In 2021, Samsung have released a new model of "The Wall" TV that can go up to a thousand inches. We'll get to 2,000 soon. For reference, that's 28 yards, or 25M
* In 2021, the CDC released a PSA image encouraging people to get vaccinated for COVID-19... featuring a character who looked a lot like an
* In 2021, the seemingly impossible happened and the Clippers won two rounds. And in the conference finals, as much as they gave a fight couldn't stop Chris Paul's new team, the Phoenix Suns, who downed the Clippers in 6 games, the decisive one in Los Angeles.
* In #2034, "Leonard is Done", Leonard receives an atomic wedgie shortly after winning the "Battle to the Death II" at the hands of one of the competitors.
* In 2075 the Matrix was reformatted again and centralized through a massive server called "The Foundation",
* In "22 Short Films About Springfield", Moe tells Barney that he once had NASA calculate the drunk's bar tab,
* In "22 Short Films About Springfield", Principal Skinner conjoins this trope

with
* In "22 Short Films About Springfield", Skinner's pot roast catches fire and instead of calling 911, he lies to his boss
* In "22 Short Stories About Springfield", Maggie gets trapped inside a newspaper dispenser and Homer tries to get help by writing a message
* In "24 Minutes", Homer keeps a pungent container of yogurt in the employee fridge. The stench is so bad, experts in hazmat suits are called, and Jimbo, Dolph and Kerney end up stealing it as a component of their nuclear stink bomb they intend to ruin the school bakesale with.
* In "274" the CDC's veterinary pathologist Doreen has to release this in her lab's observation box to stop the rapid, uncontrollable growth of viral
* In "28 Geeks Later", Zoë complains about everyone around her acting stupidly (basically like in a zombie parody, which the story is) by asking if everyone has been exposed to crazy-stupid gas or something. Then a flashback reveals that yes, they have, literally.
* In #2, a cave troll treats Fluttershy like she were a doll (including one shot that
* In 2 and 3, The Chosen One wrecks Animator's PC just because he can.
* In "2BR02B" (the zero is pronounced "naught"), aging has been cured. To keep the population of the United States from exceeding forty million people, the law of the land says that before anybody new can be born, somebody must volunteer to die. Anybody who feels like dying arranges to do so by calling the phone number which is the title of the story and making an appointment. The protagonist of the story is distraught because his wife is about to have triplets, but he's only found one person willing to die.
* In 2 Maccabees, when the Jewish people rebelled against the corrupt high priest Jason, who had been appointed by King Antiochus IV, and ran him out of town, the king left Egypt for Jerusalem. Once in Jerusalem, he massacred many, young and old, women and children, virgins and infants. In 1 and 2 Maccabees (2 Maccabees is not a "sequel', it's another viewpoint of what happened in the the first book), King Antiochus IV then decreed that everyone take up the customs of everyone else, except the Jewish customs. He outlawed all Jewish customs, including circumcision. The children who were circumcised were killed, as were their mothers and whoever performed the circumcision.
* In 2nd Edition all of the references above were removed except for the Dagger of Venom. Now a few Good critters like Couatls used lethal poisons too.
* In 2nd Edition, god "ranks" were broad terms meant to give an idea of how powerful they were in relation to one another, and about how large their faith was. Further detail usually wasn't necessary because You Do Not Mess With Gods and their possible death was a matter of plot rather than dice (especially in
* In 2nd Edition, Paladins are designed to be a rare and special character class. This is achieved by giving them the most onerous required stats of the game, most notably a 17 or better in
* In 2nd edition that's no longer true, two werewolves can give birth to a normal-ish(the child's a wolf-blooded)offspring
* In 2nd Edition, the Complete Psionics Handbook had psionic abilities that did this: Feel Light, Feel Sound, Hear Light and See Sound.
* In 2nd edition, there was also the seawolf (an amphibious werewolf that could take the form of either a water-breathing man-wolf or a giant wolf-headed seal) and the loup de noir (a "skinchanger" werewolf who assumed wolf form by donning an enchanted wolf's pelt).
* In 2nd ed, they get the justified version of the trope with Voidtech, Charms which draw on the metaphysical disease that's killing their god-world. An Alchemical who goes too far, accumulates too much Void-taint, soon descends into murderous psychopathy. There are also ways for Creation's Exalted to implant Voidtech, letting them join the fun.
* In 2 Samuel 17:8, when Ahithophel plans to attack King David, Hushai warns against it, noting that David and his mighty men will turn fierce like a bear robbed of her cubs.

* In 2, The Animator names his stick figure "The Chosen One". This gives him a wide assortment of powers that allows him to start breaking the computer.
* In "30 Minutes Over Tokyo", the Simpsons go grocery shopping at a 33 Cents Store so they can save for a vacation, and Homer eats a can of plankton, which expired three years previously, according to the
* In #3420, "Charles is Always the Wedgie of Reason", Gabby gives Charles an atomic wedgie after he berates her for still being upset about getting fired.
* In 3.5, 5th level Druids can summon Thoqquas, which can tunnel through solid stone and explicitly leave a usable tunnel. This is especially notable because at 5th level, you normally can't teleport yet, so the DM may not expect shenanigans like this.
* In 3.5 Bards, rather oddly, start with proficiency in whip. Given that they only cost a handful of gold and the ability to trip or disarm at range can be quite useful in the right situation, there's no reason why you WOULDN'T pick one up,
* In 3.5 Edition, multilingualism is extremely easy. Characters start out fluent in a number of extra languages proportional to their intelligence, and just one skill point enables them to read, write and speak an entire new language. On top of that, the "Master Linguist" feat lets them learn one new language whenever they gain a level.
* In 3.5 Edition, the Klurichir demon is a massive monster with more mouth than stomach for a belly, even though it has a boar head just above it.
* In 3.5e, they introduced a dedicated Healer class. It turned out to be a less versatile Cleric in most circumstances.
* In 3.5, its a frequent joke that cats are the greatest enemy of humanity. Statistically, a common housecat would be able to kill a first-level human peasant better than half the time. In defence of the cats, there is nothing in the rules indicating they
* In 3.5 it's explicitly stated that while you do need to follow conservation of energy, you can pull any extra heat you need, for example, from the elemental plane of fire. Which is infinitely large and all of it is fire. So the only real limits are how skilled you are at moving things around. Once you get into the plane of shadow, or the positive and negative energy planes, it gets weirder.
* In 3.5 they went by the name Spawn of Kyuss (the monster). Which would be a more badass name for a band. Maybe a tribute band?
* In 3e, Swordsages could use Shadow Jaunt/Stride/Blink to teleport, but those abilities are non-magical and require line of effect, making them ambiguous.
* In 3e, this is one of the basic powers of an Aspect 3 Miracle— it ensures that whenever you use it to take some physical action, you complete it either 'instantly', 'at just the right time', or (in an absolute
* In 3rd/3.5 edition, the Monkey Grip feat was infamously one of these. It allowed the user to either
* In 3rd Edition, all models equipped with a pair of pistols are able to fire them both at a single enemy fighter but suffer a to hit penalty if they do so. The 3rd Edition 'Gunfighter' skill however allows the model to ignore the to hit penalty and target multiple enemies.
* In 3rd Edition at least, Half-Elves Are Diplomats even more than humans (or elves), being the only race to receive inherent bonuses to social skills. Which, admittedly, aren't very large, but dedicated
* In 3rd Edition, efforts to make the Cleric "more fun" to play brought it closer to
* In 3rd edition, humans again have no special racial powers, but instead gain a bonus feat of their choosing and can develop an extra skill, allowing them to excel right from the start. While other races have specific favored classes that don't count against multiclassing penalties, a human's favored class is whatever class he has the most levels in, making multiclassing a bit easier.
* In 3rd Edition, it forces a Fortitude save if a character suffers massive damage, which is any single attack or other source of damage (such as a long fall) that does fifty or more
* In 3rd Edition, normally, monstrous creatures (or just atypically powerful

races) suited for use as player characters have "Level Adjustment", a number of "virtual" levels to count them as already having (added on to their racial hit dice) before adding class levels, to balance their innate prowess. In many cases, however, monsters' LA is badly overestimated. They often would have gained much more by an equivalent number of levels in an actual character class, meaning that when controlled by players, they often are very weak for the party's level. This problem can be exacerbated by racial hit dice, which provide the monster's core abilities (hit points, attack bonus, etc.) and count as effective levels, since they provide no other direct benefits and some racial HD types are vastly superior to others. Under-estimated LA, and/or very powerful HD types (dragons, outsiders, and magical beasts being strong contenders), and/or good synergy with class features can cause this to be inverted.

* In 3rd Edition, templates made it easy for DMs to Mix and Match their own custom-made game critters.
* In 3rd edition, the Wakers of the Beast were dedicated to awakening the tarrasque, an unkillable fifty-foot-tall spiked eating machine that will devastate the world if not kept in hibernation.
* In 3rd Edition, using poison is still generally evil. Like previous editions, Poison Use as an ability (apply poisons to weapons without the risk of poisoning yourself) is found mostly in evil-only classes, though races like
* In 3rd Edition Wizards could cast fewer spells per day than sorcerers but knew more spells. Giving them more versatility but they couldn't put out as much raw magic. Clerics had a similar relationship to the non-core Favored Soul class.
* In 3's Creepy Cavern, after a series of unfortunate events, Steeler gets a big break via Chance Time... but while he's celebrating, he accidentally hits the TV, ending the game.
* In "3 Squares and an Ed", Edd and Eddy try to help a grounded Ed escape to freedom, and they create a dummy with a vacuum cleaner and a pineapple "head" dressed in Ed's clothes, also propping a book next to it, to fool Sarah when she goes to check on him. Sarah suspects something when she sees "Ed"
* In3structoTank!: Completing Adventure and Standard modes, getting 5,000 points in the Pindestructotank pinball game, getting 33/66/99 Combos, getting 100/250/500 kills, and beating Whizzkid or General Betton in one minute or less.
* In 3, The Animator creates "The Dark Lord" in a desperate attempt to deal with The Chosen One. He didn't consider the possibility of the two teaming up to destroy his computer.
* In 3.X edition, playing as an ordinary human rather than an exotic fantasy race might sound boring, but it provides the best all-around game benefits: a bonus feat (giving you a jump-start on later, powerful feats), an extra skill point each level (which has more of an effect on skills than a one-time stat bonus) and allows more freedom from penalties while multiclassing (freeing up the player to create a more impressive character build).
* In 3, you can open a few doors. It's just that terrible things happen every time you do.
* In 40K, Kairos Fateweaver is the most powerful of all Tzeentch's daemons. After Tzeentch threw him into the Well of Eternity (the starting and ending point of time and space in the Warp), Kairos emerged even stronger, having gained an extra head and utterly shredded sanity. Now both heads constantly mutter prophecies and events yet to come, with 99 lesser daemons constantly writing down what the heads say, and asking it a question causes the heads to say one true answer and one false but equally believable answer.
* In 40K, the World Eaters Legion cemented their allegiance to Khorne by slaughtering their Librarians. Now they roam the galaxy in eight-man warbands looking for things to kill and be killed by.
* In 414BC the city-state of Syracuse (on Sicily) was getting monstered by an Athenian invasion force of about 7,300 soldiers and 134 warships. Syracuse appealed for help to Sparta, which sent one man to lead the resistance: Gylippus. The Athenians sent another 5,000 troops and seventy ships. Gylippus won. Not a single member of the Athenian force escaped alive.

* In "48 Hours," Jake attempts this by bringing a guitar into the interrogation room, shredding on it, and
* In #49, a former mafia wife who's gone through hell largely due to the machinations of her much more loyal sister ties her to a chair and uses an
* In 4, after his friends have their tasks ended, The Second Coming likes a Facebook post that shouldn't be liked, making it clear that he did that on purpose and waiting for said person's reaction. Then he goes on a spree of making rude comments on other Facebook posts.
* In 4e canon there is a group called the Sable Lancers that use this on potential recruits (often without their knowledge). The potential recruits are hired to carry a chest to a nearby town, with the stipulation that they not look inside it. Along the way they encounter several moral dilemmas, such as a woman whose child was carried off by goblins, two wagons crashing on a bridge, and an unconscious man in a ditch with a large sum of money on him. If the characters ignore the problems or fail to complete them satisfactorily, they fail. It goes without saying that if they look in the chest, they also fail.
* In 4E, it's stated that most tieflings have "traditional" names like Amnon and Nemeia, while others choose hilariously over-the-top names like Poetry or Despair. Throw in some other races and you can have a party consisting of Wil, Jon, Bree, and Torment, and that's just using the sample names.
* In 4E it's the basic premise of the whole Primal power source. The Primal Spirits are basically the natural world's counterpart to the
* In 4e, space is just the void between celestial bodies. However, the Astral Sea is basically a port over of the version of space from
* In 4e the Warlock gets an ability that causes physical damage to an enemy while it teleports them, presumably via this method or
* In 4e, transformation (using the Druid power Wild Shape) is a minor action. There are a number of utility powers and feats which can upgrade it to a free action or even immediate interrupt (meaning that you can be standing next to someone in human form, and bite their arm off in beast form as an Attack of Opportunity, before they even have the chance to shoot). There are a lot of other transformation powers too, but the Druid's is probably the quintessential one.
* In 4E, you can play a warlock who's sworn fealty to The Fair Folk (or at least got them bent over a log). A lot of your powers rely on deception and flat-out
* In #4, Franziska objects to Apollo introducing himself to the court, and the Judge sustains it.
* In 4, Second Coming actually manages to destroy Animator's cursor, slowing down his efforts to stop SC.
* In 4th and 5th edition, Devils are generally this by default. They may have evil intentions, but they respect authority, have a strong sense of honor and wouldn't start a fight just
* In 4th edition, a cheap Necron Lord with the Resurrection Orb was considered essential for Necron Warriors or Immortals gunlines; not only did he keep the necrons alive via the Orb, but he also provided essential melee prowess if any of the units were charged by dedicated melee specialists. Destroyer Lords likewise often took one as well to keep up with Destroyers. This was largely phased out in later editions where the Orb became less and less effective in reviving troops and Necrons in general became harder and harder to kill.
* In 4th Edition, any sort of one-handed weapon can be attached to a Warforged's arm. However, they function like type three model in that the Warforged can't actually do anything with that hand while the weapon is grafted onto it, although it can be removed voluntarily and fairly quickly.
* In 4th edition, Efreeti (Fire Element Genies) are all slave-trading bastards who consider
* In 4th edition, it is explicitly supernatural. It's the result of temporary, willing possession by primal spirits, some of which are subtle enough you might not even notice the feats performed aren't possible. Others set you on fire. Wardens also get super modes that last for the whole combat as daily powers, temporarily transforming themselves into part-spirit beings with varying powers.

* In 4th edition, other races get bonuses to two predetermined ability scores and two predetermined skills, 2-4 passive abilities, and a bonus activated power (normally an 'encounter' power). Humans get a bonus to only one ability score, none as such to skills, and only a small bonus to all non-armor defenses as a true 'racial' ability...but by being able to assign that ability score bonus to whichever ability they choose and start out with training in an extra class skill, a bonus feat, and an extra first-level at-will attack power from their class list (which is a pretty big deal as for most classes this means going from having two such convenient always-ready attack modes available
* In 4th Edition, poison isn't evil anymore, and anyone can use it with impunity.
* In 4th Edition, resurrection is less common at low levels, but more common at higher levels. There are some epic level powers that can be activated "once per day, when you die."
* In 4th edition, the Druid class gains at 1st level the ability to change into animal form (which doesn't technically change your stats, it just makes you look different and gives you different attacks) at will for as long as you want. So, technically, you could play a Druid who spends their entire life as a bear.
* In 4th Edition, the magical structure of Faerun went completely bitchcakes when the god of magic got killed. As a result, there are zones of wild magic where large chunks of the landscape sits
* In 4th Edition, there are monsters called the Macetail Behemoth and the Bloodspike Behemoth, which have an uncanny resemblance to an ankylosaur and a stegosaur respectively. The 4E names may be inspired by the
* In 4th edition, there are several classes that fit the Combat Medic trope — the Cleric, Bard, Druid (in the Essentials version), Warlord, and Ardent — each with different strengths so that, for example, an Ardent and a Warlord in the same party complement each other rather than infringing on each others' roles. Most of their healing spells are tied to attacks, or minor actions, which let them support their allies while fighting at the same time.
* In 4th Edition, there is an Epic Destiny called "Hordemaster". As one of its features, you gain a number of followers that, upon your death, take up your mantle until such a time you can be resurrected. Conveniently, your replacement is mechanically identical to you, but your party might not be so warm to him/her.
* In 4th Edition, there is the low-level Boneshard Skeleton that has an absolutely brutal blast for its level that goes off either when bloodied
* In 4th edition, the Thief of Legend epic destiny allows the player characters to approach levels unseen since the double-dealing diva herself. Such a thief can swipe unattended objects or vehicles,
* In 4th edition, this is the standard fate for epic characters in various versions (some becoming
* In 4th Ed., there's the "Compact Folding Astral Skiff", which folds to the size of a backpack and only weighs a few pounds, but folds out to a full-sized astral skiff which requires a crew of four. Of course, like many items in the book it's introduced in, it has some weird multidimensional physics applied to it.
* In 4th Gen, a well-known breeding trick is to give the mother poke an Everstone, so the offspring has a better chance of inheriting the mother's nature. If something is being bred with a Ditto, the trick only works if the Ditto is the one holding the Everstone and passing on the nature. Conclusion: Ditto is the mother, even if the other poke is female.
* In 500 BC, Hanno the Navigator described a tribe of "hairy women" he encountered in Gabon, that the locals called "Gorillas". His report was largely disregarded as a traveler's tale, but in 1847, a large, hairy hominid was indeed discovered in Africa, which was named "gorilla" after the creature described by Hanno. The animal, now called the western gorilla, has become prominently featured in popular culture from the 1860s on.
* In "500 Keys", Homer buys a cake at a store specializing in wedding cakes from cancelled weddings. He is determined to get it home safely, leading to some reckless driving.
* In 535 CE, Byzantine Emperor Justinian I sought to retake Italy from the

Ostrogoths, triggering a 20-year long war that actually did more harm than good to the former Western Empire (who did enjoy some stability with Ostrogothic King Theodoric). The Byzantines won in end, but the war left their empire broke, left Italy
* In 5E, aboleths cannot truly die — if one is slain, its spirit flees to the Elemental Plane of Water, where it slowly grows a new body.
* In 5e, a Paladin's 20th-level ability is usually some sort of triggerable minute-long aura and/or power boost
* In 5e, Dwarves have a low movement speed of 25 (the standard for almost every other race is 30), but get a good boost to their constitution (increasing the number of hit points they have). All dwarfs get proficiency in Hammers and Axes allowing players to hit harder in melee with classes without normal access to martial weapons. Mountain Dwarves additionally get a bonus to strength, allowing them to hit harder with every melee weapon.
* In 5e, it is possible to play as Necromancer as a Druid and even a Paladin. The Druid of the Spore Subclass has access to
* In 5e, monks are an excellent choice for this, their Martial Arts ability allowing them to attach their dexterity bonus to melee attack and damage rolls. Feel free to put Strength as your dump stat while remaining on the frontline.
* In 5e orcs, unlike goblins, create huge hordes inviting giants, ogres and human barbarians.
* In 5e, Vistani are just normal humans that can travel the mists, but to make up for the difference there are Hexblood. "half-hags" that have gained some traits of hags for some reason.
* In 5e, Warlocks can make pacts with Archfeys. This pact allows Warlocks access to some whimsical and mind effecting spells like Sleep, Calm Emotions, Phantasmal Force, Blink, and Dominate Person.
* In #5, Indy and Karen Mays get trapped in quicksand while attempting to travel overland across the moors to Salisbury Plain. The Nazis who are chasing them cut through Indy's whip and then offer to pull them out in exchange for the
* in 5 Seconds goes into those, so it's hard to really call it "distillation", in the traditional sense.
* In 5th edition a high level (17+) rogue can potentially have a 'minimum' sleight of hand roll of 27 and only need a roll of 13 to pass a 'Nearly Impossible' skill check. Throw in things like the lucky feat and you can have a character who can reliably steal anything they can carry.
* In 5th edition, a new cosmology made up of the Great Wheel with a simplified array of Elemental Planes and incorporating the Feywild, Shadowfell and Elemental Chaos from the World Axis was released as the "default" multiverse of D&D. The Eberron multiverse is also considered a part of the Great Wheel, but it's not explained how.
* In 5th edition, a solar angel can use its brilliant gaze to strike other creatures blind.
* In 5th Edition, Clerics can eventually gain a feature that lets them beseech their deity to offer assistance in their time of need. The roll for it is very unlikely to succeed, but having a more limited but reusable version of the Wish spell is nothing to scoff at.
* In 5th edition, instead of getting a bonus to 2 stats like most other races (generally a +2 and a +1), humans default to being well rounded and getting a +1 to all of their stats. The book also includes a variant option: pick any two scores to get a +1, and start the game with a feat. It should be noted that in this edition feats are rarer, and any other race has to forgo gaining an ability score increase 3 levels later to even have the option of picking one; feats are also a lot more flavorful, giving more customized builds. This means that while technically any race can be any class (with varying degrees of competency), humans can be suited to whichever path they decide to go down.
* In 5th edition, most monsters that could be considered high-level bosses have the Legendary Resistance trait, which lets them straight up succeed on a saving throw three times a day without needing to roll for it, even if they have already

failed the roll. This is generally used to make sure they can't be defeated with some simple Save or Suck spells. Constructs like golems, animated armors and similar also have the Immutable Form trait, which lets them
* In 5th Edition, small animals identified as "quippers" are clearly piranhas. However, it's worth noting that he name had appeared in previous editions to refer to a particular species of piranha that prefers colder waters than real piranhas.
* In 5th Edition, the barghest gets changed into this. They've always wanted to consume humanoids, but in 5E lore they were created by the yugoloth lords after the goblin god Maglubiyet broke his contracts with them. Barghests are sent to the Prime Material Plane in order to kill and consume thirteen goblins, one for each contract that was broken. However, their status after they complete their task is based on the power of the goblins they consume, so they target only the strongest, most cunning goblins they can find.
* In 5th edition, the distinction between Arcane and Divine magic is mentioned in a sidebar, but has no effect in game mechanics. There are several ways for a caster of one style to pick up spells from the other, or in some cases bridge the gap. Aside from rangers, Divine casters have access to all possible spells for their class, and pick and choose what they prepare-easily justified as the caster's deity granting spells. Some spells are not available for wizards, warlocks, or sorcerers, being restricted to divine magic. Other spells are restricted to arcane casters. However, certain cleric domains give access to spells normally restricted to arcane casters, while some abilities and features grant divine magic to arcane casters (in particular, a sorcerer variant allows him/her to cast cleric spells). Bards, however, draw magic from the fabric of the universe. Their basic spell list draws from both the cleric's and wizard's primary spells, and can also pick spells from any list to add to their repertoire via a class feature.
* In 5th edition, the Super Mode is powerful enough that a barbarian can survive attacks that would render them unconscious, but not kill them.
* In 5th Edition, they just want to conquer and dominate to rebuild their old empire while it was retconned that they actually shattered the C'Tan to shards just after the War in Heaven in a revolt as revenge for the loss of their souls, but the Necrons are willing to wipe out all life on a colonized tomb world and also capture a lot of people for destructive scientific experiments while some Dynasties are xenophobic on top of wishing to rebuild their empire. One of the Dynasties is still ideologically omnicidal and the Flayer Virus, caused by the only actual death of a C'Tan, the Flayer, at the hands of said omnicidal Dynasty, also makes any Necron inflicted with it obsessed with gaining flesh back by skinning any sentients nearby and using the leather as a substitute. The Retcon was explained as the initial group to wake up after 60 million years to be damaged and a glitch causing them to think they still served the C'Tan. There is also the Destroyer cult, which are Necrons who, while not insane due to the Flayer Virus or due to the fact that they were awake during their 60 million year stasis, actively decided to purge biological life after waking up out of a combination of jealousy over their souls and bodies being lost to them and sheer hatred.
* In 5th Edition, whips have been upgraded to dealing 1d4 damage (as much as a dagger or club) and are considered martial weapons, meaning a good chunk of the classes can use it right off the bat... And that's about it. It's worth noting that it's the only weapon with a 10 ft. reach that can be wielded one-handed, and it's also the only reach weapon that can use Dexterity instead of Strength. Quite a few classes that don't solely rely on weapon damage (such as a Rogue, who makes more use of Sneak Attack damage, or a Paladin who can power up his attacks with Divine Smite or other spells) can take advantage of the whip's reach if they're willing to sacrifice a few points of potential damage per swing.
* In 616, mutants are the product of the Celestials messing with the human evolutionary process a million of years in the past. Here, the mutant genome was created in a lab by Weapon X around the time of World War 2.
* In #6, Phoenix objects to Apollo "leading the witness" when Apollo asks Frank if he was at Vera's home on the night of the crime. That question is relevant to the case, and isn't worded in such a way that Apollo is trying to manipulate Frank into

giving a specific answer.
* In 6, Red Guy walking up to the machine and seeing Yellow Guy, still in his "lesson", on the monitor; this reveals the entire series had taken place in a
* In 6th edition the quality of the Tau and Eldar armies broke the "build anti-MEQ or anti-anti-MEQ" status quo due to how overpowered they were, along with the newly introduced ability to ally disparate factions together. Tau units were buffed and they became a highly mobile, extremely hard hitting shooting army with markerlights making a mockery of cover saves while the Eldar received the "Divination" psychic power which had similar cover removing abilities plus allowed shooting re-rolls along with their usual highly specialised hard hitting units. The newly-inserted and not yet fully tested allies mechanic meant that for an extended period Warhammer 40,000 tournaments saw three kinds of players: Taudar (Tau allied with Eldar), Deldar (Eldar allied with Dark Eldar to use one excellent special character and one excellent unit from that book), and everybody else.
* In 733 Yang Yu Huan married Prince Li Mao, son of Emperor Xuanzong and his then-favourite concubine Consort Wu. Four years later Consort Wu died. Xuanzong decided the best way to deal with this was to take Yang Yu Huan as a concubine. He ordered her to become a nun, gave Li Mao a new wife, then made Yang Yu Huan an imperial consort. It ended very badly for poor Yang Yu Huan; in 756 she was made a scapegoat for the An Lushan Rebellion and Xuanzong ordered her execution.
* In '75, Cary Bates had Legion members saying "cool up" for "calm down" or "relax".
* In #75, following the previous issue, Sonic and his friends discover the Robotnik they thought was dead was actually an alternate dimensonal version, who would later become known as Dr. Eggman.
* In #8, a seemingly ordinary couple is killed. Their deaths are widely dismissed as just another murder, but the Shadow knows they chanced on something that the murderers were trying to hide.
* In "8-ball" pocket billiards, when you are permitted to sink the 8-ball (which is after all balls of your pattern have been sunk), you must invoke this trope and call the pocket you're going to sink the 8-ball into. If you sink the 8 but into the wrong pocket,
* In "8-Bit is Enough", Strong Bad finds out that the Trogsword is located in "a magical world where platforms mysteriously hang in the air, and extra men are extremely hard to come by". He replies "Platforms, eh? (in his Dangeresque voice) Looks like I'm gonna have to... (speaks quickly) ...find a way into the Stinkoman game and get the Trogsword before he does!"
* In "8 Simple Rules for Buying My Teenage Daughter", Stewie has a crush on his new babysitter, but when he finds out she has a boyfriend, he tries to kill him.
* In #9, Pearl would definitely not be allowed to serve as a judge in her cousin Maya's trial in real life due to being unable to judge her impartially, to say nothing of the fact that Pearl is nine years old.
* In #9, they draw straws to see who'll be the distraction. To everyone's surprise, not least his own, Jake
* In a 1960s story, Batman's enemy the Mad Hatter commits crimes based on the occupations of the jurors who convicted him as a rather oblique form of revenge. The story was adapted into an episode of the live-action television series as well.
* In a 1965 plane crash, legendary pilot Chuck Yeager suffered facial burns that, by all rights, should have vaporized his left eye. Miraculously, though, the fire's heat caused a crust of dried blood to instantly form over the eye, saving it.
* In a 1970s comic, Dagwood enters a record store and asks for the "The B's". The clerk assumes Dagwood is asking about Bach, Brahms and Beethoven but is shocked that Dagwood actually wants "Bop, Be Bop and Boogie." (Even given that a 1970s Dagwood may have enjoyed these musical genres when younger, it is unlikely that anyone in the 1970s would have still found 1940s music edgy or disturbing).
* in a 1980s commercial where some of the people involved learned their lesson and got Lincolns to alleviate the issue. (Ironically, nowadays Lincolns have a reputation for being badge-engineered Fords, though as of late they've been trying to shake this reputation, with the current Lincoln Continental perhaps being the

prime example.)
* In a 1990s radio campaign for a Vancouver RV dealership called Fraser Way, the owner of a competing dealership needed ideas on how to beat Fraser Way's deals, so every employee became the Sales Manager for a few seconds.
* In a 1993 story arc involving an inter-promotional feud between the
* In a 1996 episode, the Warners are heard over the closing credits, complaining about work, dissing their voice actors, even trying to figure out who
* In a 1997 team-up special, Batman and Daredevil are working together. Used to heroes thinking he can see, Daredevil brushes off knowing info on "let's just say I'm lucky."
* In a 1998 Cocoa Pebbles commercial, Barney attempts to trick Fred as he normally does, only this time with Pebbles, Bam-Bam and Dino. Pebbles stands on top of Bam-Bam, and they pose as the Ghost of Christmas Past. In contrast, Barney plays the Ghost of Christmas Present while Dino plays the Ghost of Christmas Yet to Come. One of the rare instances where Pebbles actually talks.
* In a 2000 television ad for Clarica, promoting the concept of clarity in how they sell insurance, a man hurries into a busy upscale bar looking for the bathrooms. He finds them, but instead of the door signs for "Men" and "Women", there are two abstract paintings he can't interpret. Then he hears a flushing noise and one of the doors opens. The person leaving the bathroom is androgynous, and his dilemma is unresolved.
* In a 2001 book of "Quotations for Public Speakers", the US ex-senator Robert Toricelli had said:
* In a 2001 spot for the National Cheese Board, a city (live-action with live citizens) is getting decimated from an alien invasion. The citizens look into a window pleading for help. The figure they're pleading to is
* In a 2002 episode of Raw, Chris Jericho and Christian got their clothes stolen by the Dudley Boyz and spent much of the show backstage wearing only towels trying to find them. Later, when they're on the stage, Spike Dudley rips their towels off.
* In a 2004 episode Snuffy gets a magic ukulele. The number to call to have it activated is 1-555-UKE. After he accidentally breaks the ukulele the hotline to get it fixed is 1-555-OOPS.
* In a 2008 Capital One commercial, Santa Claus is supposed to depart for Christmas Eve but is too distracted customizing his Capital One credit card. It ends by showing two of the elves stacked up wearing Santa's suit heading for the sleigh.
* In a 2008 TED talk about cell-phones and cool time-saving tips-and-tricks on how to get the most out of them, New York Times tech columnist David Pogue recounts being on the receiving end of an especially
* In a 2009 game between the Bengals and the Browns, broadcaster Rich Gannon debated whether the Bengals should run down the clock before kicking an overtime field goal, so as not to allow the Browns time to return a kick. His broadcast partner helpfully reminded him that NFL overtime (under then-existing rules) is
* In a 2009 M&M's commercial, Red and Yellow pose as the Easter Bunny comically with Red on the bottom.
* In a 2010 game between Georgia Tech and Maryland, Georgia Tech scores the go-ahead basket with 3 seconds left on the clock. Maryland star PG Greivis Vásquez drives it down the court and makes what appears to be the game-winning basket from half-court, only for it to be called back because Maryland coach Gary Williams called a timeout with 1.5 seconds left. The game looks all-but-squandered until the ball gets inbounded to Maryland's Cliff Tucker, who promptly hits the game-winning shot.
* In a 2010 T-Mobile commercial, the NBA's Dwyane Wade, then of the Miami Heat, finds himself locked in his hotel bathroom. He then issues a video call for help: "Get me outta here!" When the video goes viral on the internet, the public misinterprets it as a plea for a trade. Wade is eventually helped out by a maid who tell him he's on the news. He responds with a "huh?" look.
* In a 2011 ad for Farmer's Insurance, a group of insurance agents are being shown slides of some of the customers by their supervisor. One of the slides is a plate

of meatloaf.
* In a 2011 interview, were asked if they ever found out whether or not Tom Cruise was responsible for pressuring Viacom into not rebroadcasting the episode "Trapped in the Closet" despite his denial. This was Stone's response:
* In a 2011 pre-game conference leading up to an NFL divisional playoff game against the New England Patriots and the rival New York Jets, Patriots wide receiver Wes Welker would use his stage time to launch a stealth
* In a 2011 San-Disk radio commercial, a mother asks her husband (the father) if he remembered to give their son the USB flash disk for his power-point presentation, and if he happened to edit out the baby pictures of him crawling around in diapers. The father tells her no, having her freak out then asking the time of the presentation and the current time, the father then suggests maybe
* In a 2012 Samuel Adams commercial, one of the brewery workers does this to another worker.
* In a 2012 Sunday strip, Garfield takes a Snow-Cone container outside when it is snowing. The snow then fills up in the container, until it reachers snow-cone-like levels, to Garfield's delight. Jon and Liz are watching the entire thing inside, leading to this exchange when Garfield is bringing the cherry syrup bucket:
* In a 2013 Sprint commercial, a zombie attempts to take advantage of a "lifetime guarantee" on a mobile phone.
* In a 2014 J.G. Wentworth commercial, in a departure from their usual opera-inspired TV ads, this one is done in the style of a really old and aged music video with far more contemporary music, featuring various different singers appearing in the busted-out windows of an old, abandoned brownstone building. Almost all of the women appearing in the windows are wearing either
* In a 2014 Taco Bell ad, two random strangers — both eating Taco Bell items — sit down on a park bench and make eye contact with one another; the man takes a look at the woman and sees her in a series of
* In a 2015 TED Talk, Microsoft co-founder Bill Gates warned that another pandemic will occur in the next 50 to 100 years and that the world is not prepared. He warned that a new disease outbreak will be worse than the Ebola and Zika virus epidemics and will cripple vital supply chains. Unfortunately for the world, Gates was proven correct with the
* In a 2015 video for "See You Again", Todd mentions that Wiz Khalifa is a strange choice for a tribute song, and says maybe someone involved in the
* In a 2016 Campbell's Soup ad, a child is playing around a house in a Spider-Man costume. Before taking a sip of the soup, the child takes off the mask to reveal that she's a girl.
* In a 2016 commercial for Bai for bai to be good for you but taste great, much like your echo having a cheeky British accent. He then demonstrates this.
* In a 2018 commercial for Blue Bunny ice cream, a couple notices that all their pants are missing. The
* In a 2018 run of the One For All mode, where everyone on each team plays the same character, the devs pointed out that in this version buffs can stack on top of each other when they wouldn't normally. Among the examples they gave for this was that Sivir, with five stacks of Sivir's ultimate ability stacked at once, is the fastest thing in the game. They highlighted this by saying she has won the title of The Fast from Jhin, after a notorious Jhin movespeed build of that name that became popular on
* In a 2019 Pro-Am at Pebble Beach, Tony Romo's tee shot on the fifteenth hole sailed way right and landed in one of the hospitality tents. Instead of taking a drop, however, Tony Romo chose to play it where it lied. His ensuing shot
* In a 2020 Christmas ad by the Minnesota Department of Public Safety, a kid is opening presents with his parents while joyful Christmas music plays. When the present is shown to be a model of a wrecked car, causing the kid to break down in tears while his mom comforts him and his father revealed to simply be an illusion (he died in a car accident due to impaired driving), the music slows to a stop and transitions into a darker and more ominous track as the message "Impaired Driving Kills the Holiday Spirit" appears on screen.

* In a 7 vs. 4 war game, 4 of the opponents switch sides, allowing the protagonists to win.
* In "Aaron Burr, Sir", Hamilton asks "if you stand for nothing, Burr, what will you fall for?". It takes Burr half the play to find what he wants: he wants to be in
* Inaba cosplayed as Nami and favoured above all other female characters.
* In "A Bad Case of Diary-Uh!", one of the embarrassing secrets revealed in Vicky's journal is her fear of cows. In the same episode, Timmy is revealed to have a fear of both clowns and feet. Vicky manages to use both
* In "Abaddon", Curtis Sandoval is jettisoned from the waste disposal system of the interplanetary hauling vehicle
* In Abaddon's Gate, the third novel, we get to see what they can really do. Disarmed of all of their weapons and in the hands of inexperienced users, four of them prove almost unstoppable
* In "Abaddon", the former United States has been ruled by the North American Corporation since 2102. Its population, known as shareholders, live their lives in service to the Company.
* In a bad ending after failing at a specific mission, Blair can find himself reassigned there *again* and can only sit in despair as news comes in that the
* Inaba of the Moon & Inaba of the Earth asks her mentor Eirin if she could be a bit nicer and adopt a "whip and candy" approach (the Japanese equivalent of "carrot and stick"). Eirin takes her suggestion... which, naturally, involves whipping Reisen, then pelting her with hard candy.
* Inaba of the Moon and Inaba of the Earth's manga stories, one chapter has Reisen and Tewi getting lost in the basement of the Scarlet Devil Mansion, which is where the mentally unstable, highly dangerous Flandre happens to be locked up.
* Inaba of the Moon and Inaba of the Earth, the Moon princess Watatsuki no Toyohime repeatedly tries to take home one of the Earth rabbits she finds while visiting Eientei.
* In a Batman serial this happened in every single episode. They have Batman at their mercy, set the place on fire or leave a bomb and then proudly announce to their leader that they killed Batman, who has already escaped.
* In "Abduction", Ray was the star running back of the Eden Park High School football team until he injured his knee, bringing his football career to a swift end.
* In "Abduction", the former Eden Park High School running back Ray seems to be a
* In a beach episode, Olive Oyl gets Popeye and Bluto to promise they won't fight. Bluto keeps taunting Popeye
* In Abed's short film in "Introduction to Statistics", a photo of his mother is briefly visible; she appears to be Middle Eastern, likely meaning that both of his parents are of Arab descent. Later on, multiple episodes establish that Abed's mother is Polish, and Abed is biracial (
* In a beer commercial, an average looking guy is stranded on a desert island with a supermodel, complete with several cases of ice-cold (don't ask how) beer. The two of them think they hear a rescue plane so the guy assures the girl he'll try and signal one if he sees it. By using shells, rocks, palm fronds and his own body (for the Y), he does get a message out to some would-be rescuers: "GO AWAY".
* In a behind-the-scenes crew example, production assistant Nancy Motes, the sister of
* In a behind the scenes example, the show's iconic cover of Bob Dylan's "All Along the Watchtower" (and several other tracks) are performed by Brendan McCreary, the brother of the show's composer,
* In Abe Sapien's origin story, he was found by workers underneath a hospital in Washington DC, floating in a suspended animation tank with a note that had the date of Abraham Lincoln's assassination and the word icthyos sapien.
* In "A Better World", Flash ignores a "Please Don't Pick the Flowers" sign and picks one. Poison Ivy calls him out on it.
* In "A Better World", the League has to fight the Justice Lords, their
* In "A Better World", the show opens with Superman, Batman and Wonder Woman

storming the White House to put a stop to President Luthor's current plan to start a nuclear war. Luthor takes the time to gleefully gloat to Superman that sure, they stop him now, but the dance will just repeat itself because Superman can't bring himself to end it by killing Lex once and for all. Realizing that he's right, Supes takes that step and fries Luthor with his heat vision. It turns out that this moment is the
* In a bigger case of this, the entire Half-Blood Prince storyline was originally intended for the second book (in fact,
* In a bigger, non-ad version, ESPN Brazil was not allowed to broadcast the 2013 Confederations Cup. Instead they showed five commenters watching the game, many times reaching
* In "A Big Guy Took My Ball!", it turns out that the ball belonged to the "big guy" (a whale) all along, and Piggie just assumed it was hers because she found it lying on the ground.
* inability to dodge by firing an attack directly at him. Realizing that he's all alone and no one will save him leads to Gohan transforming out of desperation to deflect the blast.
* inability to effectively kick with his left leg, which makes him predictable for the opposing team's goalie.
* inability to handle stress well. This is why, in Chapter 22/ Episode 7, Mira suggests to pick up the offer to be volunteer instructors at a children's stargazing event. As an astronomy event, Mai's responsibility is relatively light, so that she can get used to her new role.
* inability to make new main characters who had certainly caused enough chaos to warrant such a punishment.
* Inability to survive without attaching to another body is pretty much was describes the plot in the infamous
* In a Bill Pronzini short-short story, a recently released car thief gets the jones and tries to steal a fancy car, only to be found out by the owner. Fortunately for him, said owner is in the repossession business, and now the thief gets to satisfy his craving to steal cars in a perfectly legal fashion.
* In a biological sense, the telomeres at the end of your chromosomes, which grow shorter as you age and they are at their shortest when one dies of old age or close to it.
* In "A Bird in the Hoof", Fluttershy gives an uncharacteristically cunning look to the audience and says "Always works!" during a
* In a bit of a Meta-entry, many players come up with elaborate backstories for their characters. It's a
* In a bit of a meta-entry, several techno-thrillers and what-if war novels from 1978's
* In a bit of an aversion, in season 9, the Freelancers initially think Texas is probably just New Meat and that the three (three!) Freelancers fighting her in the training room will easily defeat her.
* In a bit of an inversion, at tables whose GMs insist that every (important) social interaction be roleplayed out without involving dice or other mechanics, it's potentially quite possible for one or more
* In a bit of an inversion, Kate starts dating John when she discovers she's
* In a bit of a subversion, Death maintains that things like justice, mercy, and duty are lies, but says that the entire point in believing in those lies is that that's what makes them real, something an actual nihilist would deny is a possibility (this would be more
* In a bit of a subversion, the blind devisor Jericho is working on a life-
* In a bit of a subversion, the scene apparently went on longer originally, showing that all the money was fake, one-dollar bills with the Joker on it, calling back to an earlier joke he made.
* In a bit of a twist, the fact that the position of Arbiter is an Uriah Gambit isn't hidden from the one chosen during
* In a bit of a twist, though, most of the people of Dunwich are portrayed as harmless, frightened townsfolk over the course of the story itself, and team up

with the
* In a bit of a twist, with the exception of rare and expensive WarShips with special compact jump cores the average fleet "mothership" is a sitting duck in combat — plain JumpShips spend so high a mass fraction on their faster-than-light drive system that they have basically no tonnage left over to invest in armor, mobility, firepower, or even significant cargo, and recharging the drive for a second jump back out of a hostile system can take on the order of a week or more. As such, while they're key to
* In a bit of a variant on this trope, in one episode the group is looking through Blanche Devereaux's old diaries to see if she slept with Rose's traveling salesman husband many years ago. At first they are shocked that Blanche has given them a large list of everyone she's ever slept with, because the journal is titled "BED". Blanche casually explains that her full name is "Blanche Elizabeth Devereaux", and her initials just happen to spell "bed".
* In a bit of a variation, George has forgotten exactly what's in his
* In a bit of defiance (although it's actually just one more example of
* In a bit of inversion, the older one is the idealist and considered to be a bit of an idiot.
* In a bit of irony, the player starts with a corpse in his inventory to start necromancing faster. According to the backstory, this body belongs to the necromancer he killed to get the book of necromancy in the first place.
* In a bitter irony, the government's measures to try and stop hooliganism led to the
* In a bittersweet aversion, the end emphasizes that Angelica was only buried near, not with, Alexander, symbolising her unrequited and unfulfilled love for him.
* In a bizarre circumstance around the time the PG-13 rating was introduced, two of
* In a bizarre example, after noting that The Janitor seems afraid of JD's Latina friend Carla, JD wonders how he can use that to his advantage. He then
* In a bizarre instance of self-awareness, when female Ranma (posing as "Ranko") is forced to go bra-shopping with Nodoka and Akane, she gives up and tries on a few bras, posing to herself in the mirror and nodding appreciatively.
* In a bizarre instance where the first sequel has Continuity Lockout,
* In a bizarre twist: Guitars with more than six strings. 7-8 String guitars had been on store shelves since the 80's, but were popularized by bands like Korn and were indeed quite useful for creating the sound of Nu-Metal in the late 90's and early 2000's...but then Nu-Metal became very,
* In a blatant reference to Charles Atlas himself, Adrian actually sells a mail order self-improvement course including both mental and physical training advice, written in the "Congratulations on buying this book, friend. Let me guide you to becoming a new you!" style that Atlas himself used. Also, Ozymandias is named after the Greek name of an Egyptian Pharaoh who has become legendary, and Angelo Siciliano changed his name to Charles Atlas to evoke the image of a Greek God.
* In a blink-and-you'll-miss-it part of a deleted scene, Steve is reviewing files after thawing out in the 21st century.
* In a blink-and-you-miss-it moment, Olenna plucks one of the seven crystals from Sansa's necklace. Those crystals contain a deadly poison, and we see Joffrey put down his goblet within arm's reach of Olenna. Guess who ends up dying of poison at the end of the episode? For bonus points, a later shot of Sansa shows only six crystals on her necklace.
* In a bonding event with Altina, she goes on a solo mission to Ymir without telling anyone else, having discovered that the IDF is planning to take the town hostage to lure Rean out. Rean is horrified when he finds out and, once Lechter has assured him that it won't happen again, he hugs her out of relief and yells at her to never do it again.
* In a book about Joe Namath, the author relates how he and Joe were in an elevator and Joe was drinking from a beer bottle. When the elevator arrived at their floor, Joe saw some kids and had to stash the bottle under his shirt.
* In a book about stars in Hollywood whose name escapes me, a character tells how

(back in the 1960s), he'd meet underage girls and go home with them to have sex in the girl's bedroom,
* In about 600 million years, the acceleration of the greenhouse effect due to increasing solar luminosity will make earth too hot for C4 photosynthesis to occur, wiping out most (but not all) plant life on earth; by 1.1 billion years, nearly all surface life on the planet will be extinct and the oceans will begin to evaporate, increasing the atmospheric pressure to Venus-like levels, making things even hotter.
* In "About Face" the villain cuts his first victim's face off while she's still alive. Earlier in the same episode, Reid mentions Rossi once helped put away a guy nicknamed "The Scarsdale Skinner."
* In "A Boy and His Ed", the Eds hear that Kevin has a box of jawbreakers and ask him for some. Kevin replies that they are too late and tosses them the empty box, and
* In Abraham's Bosom: The rivalry between Lonnie and Abe ends with Abe murdering Lonnie after the local KKK chapter puts an end to Abe's hopes of a school and Lonnie says he's confiscating Abe's cotton crop. (Abe, the illegitimate black son, has been reduced to sharecropping on white legitimate son Lonnie's land.)
* In a brief scene in one episode, Buffy breaks up what she thought was a vampire attack, only to discover it is "only" a mugging. She remarks on how quaint it is.
* In a brief scene where he's cleaned by his mother, Sarabi for Simba in
* in a bright red, sparkly floor-length number with a slit up the side to mid-thigh.
* In a broader gameplay sense, there's the Engineers, who carry enhanced healing items, tank repair tools, and a couple of ways to help protect their comrades.
* In a broader sense certain comic books are said to bring about the end of an age,
* In a broad sense, human lives are always a race against the clock to accomplish everything we want to do before we eventually pass away one day.
* in absentia and found guilty. Einhorn was arrested but fought his extradition back to America for over 20 years before he was returned to Philadelphia, where he was found guilty and then sent to prison for life.
* in absentiafor fraud, the largest sentence ever given for a white collar crime, and was initially eligible for release on November 23, 2754. He served 20 years in prison before being pardoned by Donald Trump in 2021.
* In Absentia is more definitely a concept album, about serial killers.
* In absentia, Two-Face is hailed as Gotham's greatest public servant in
* In "Absolute Candor", Soji lampshades that the records on the Borg databases are classified.
* In "Absolutely Elsewhere", two suspects have a joint alibi; they were both on the phone and established as being miles away at the time. Lord Wimsey is suspicious of just how elsewhere they were; although he claims you can't be "absolutely elsewhere" unless getting to the scene of the crime would violate general relativity. It turns out to be simpler than that:
* In a B-story Steve tricks the egomaniacal "Daily Announcements" guy into saying terrible things into the open mike because he wouldn't make Steve's announcement. Steve gets the job and goes crazy with power, so his friends do the same to him. Snot takes over - again power-mad and brought down. Barry is next. He clears his throat, takes a sip of water, and then grabs the microphone and screams obscenities into it. Finally Principal Lewis declares no more daily announcements and then, when is alone in his office, starts musing out loud that he should have stayed in South America moving coke for a ruthless drug lord. Sure his boss was a vicious bastard but gave him money and weapons and girls - "Not women, girls! Little bitty things." Then his secretary bursts through the door screaming "Brian,
* In a Budweiser commercial, a Clydesdale pulling a sleigh stops, the man leaves his woman briefly for something and gives her a candle. It then cuts to the horse's butt as its tail rears back,
* In "A Bullet for Bullock" Harvey Bullock asks for Batman's help to find out who is trying to kill him (Bullock doesn't want to get the department involved, lest

they take too close a look at
* In a "Bullwinkle's Corner" segment, Bullwinkle does the "Queen of Hearts" poem, where he's the king, Rocky is the queen, and Boris is the knave who steals the tarts Rocky made. They were turnip tarts, so when Boris promises he'll steal no more, Bullwinkle says, "You don't get off that easy. You stole them, friend, you eat 'em!" With that, he shoves a turnip tart into Boris' mouth, and Boris looks sick.
* In "Abyss", Clark returns the favour when he carries her unconscious form to
* -in-a-cabin characters are in that secluded cabin to shoot. As Nathan Shumate notes in his review, "I wonder how many young slackers go into pizza delivery with entirely unrealistic expectations of the perks."
* In a campfire story of unknown authorship, generally known as "The Boy Who Cried Werewolf," the titular boy tries and fails to fake these. The person he shows them to notices that not only do the prints switch immediately from human to werewolf, they switch from left foot to right foot.
* In a camping episode, Stimpy carries several of these. Ren swallows one labeled "Cowboy's Delight Dinner" before Stimpy tells him they're dehydrate, and he needs to add water first, causing the entire meal (inexplicably, a
* In "A Canterlot Wedding", Cadence and Chrysalis wrap up the season with a legitimately epic
* In a Capital One commercial, a princess encounters a frog prince and kisses him, but he keeps transforming into other animals instead. By the time the prince is turned into a centaur, the princess gives up and leaves, but he yells out that she was only one kiss away.
* In a Capital One commercial, the Viking mascots use reward miles to visit a museum. Naturally, they are mistaken for an exhibit.
* In a car chase between Jay and a studio exec in LA, the freeway sign reads "High-Speed Chases use Diamond Lane".
* In a Car. Slow or fast, as long as it's undodgeable, it's quite dangerous.
* In a cartoon starring George and Junior as dog catchers, they dress as fire hydrants to attract a dog they've been trying to catch. They end up being chased by every dog in town.
* In a cartoon with Ralph Wolf and Sam Sheep Dog, Ralph has one wired to his alarm clock which grooms him and makes him breakfast.
* In a case centering on the murder of a domme from an S&M club,
* In a case involving the murder of aspirant actresses during auditions,
* In a case of accidentally weaponized exhaust, the huge white clouds at a rocket launch during liftoff are not actually the rocket's exhaust. They are created from massive amounts of water poured on the launch pad during launch to absorb the enormous energy that would otherwise radiate out from the pad, destroying windows and even structures nearby.
* In a case of a finishing move arms race, the Dudleys would increase the number of tables they slammed opponents through, reaching rather ludicrous proportions when slamming through three or more tables.
* In a case of artistic license, Joy manipulates the system by blowing her family's cover
* In a case of a rumor coming true in a later revision of a game, players were finally allowed to legitimately reverse
* In a case of a victim using a chainsaw against the killer occurs in
* In a case of "Easter Creep", major Australian supermarket chains have been censured and in some locations even fined for putting
* In a case of ejection by design, Yuri Gagarin, on the world's first manned space flight, actually ejected from his Vostok capsule and landed separately by parachute. This was covered up for many years, as the FAI rules of the time required a pilot to land with his capsule for the flight to count. Gagarin, dressed in a bright orange spacesuit, landed next to a man and his daughter, having to explain he wasn't an alien, he was a fellow Soviet and needed to find a telephone. The soviets kept it a secret that they hadn't figured out how to make the Vostok capsules land survivably and pretended that the cosmonauts usually, with a few

exceptions, landed with their spacecraft, when in reality the only way to survive was to eject. The next generation of Soviet spacecraft, the Voskhods, had an improved combination of parachutes and braking rockets that made a soft landing possible. This made the ejection seat unnecessary and a two- or three-man crew could be fitted in the capsule.
* In a case of future-proofing, balconies were built in 1971 on the buildings for Flight to the Moon and the Circlevision Theatre where they opened onto Tomorrowland's main entrance pathway. In 1975, they were turned into part of the Tomorrowland Transit Authority.
* In a case of like father, like son, you know that you're in trouble when Thor's eyes go entirely electric blue, usually accompanied by the build up of a massive storm. And it usually happens because someone has threatened/tried to hurt Harry, as both Gravemoss and Hera found out.
* In "A Case of Mistaken Secret Identity" Huey, Dewey and Louie think Launchpad McQuack is
* In "A Case of Mistaken Secret Identity", several talk shows are seen speculating on Gizmoduck's true identity.
* In a case of nonhuman ghost, Mudsy's cat [appropriately named Boo] was also a ghost alongside him.
* In a case of some things never changing, Asuka once again display this type of behavior in
* In a case of them using this for a title twice, there for two stories titled
* In a case of this happening within a single game's storyline, the first
* In a case of this trope being relative to the buyer's perspective, the other hobbits from
* In a case of this with some uncomfortable implications, the entire family and the show treats Meg as if she is some kind of unlovable, disgusting loser, even when all of them are terribly damaged people who engage in regular, horribly abusive
* In a case of two revenges for the price of one, there's the original motivation of Venom. Disgraced reporter Eddie Brock hated Spider-Man because he'd caught the real Sin Eater serial killer after Brock had published an exclusive article with the confession of a fake. The alien symbiote wanted revenge because Spider-Man had rejected it.
* In a case of 'using the other M word', the term "machine" was only used once near the beginning of
* In a case similar to the one of the film examples above, Thomas, when he gets a 'real job' as a hair dresser, deliberately poses as a flamboyantly gay European because there is no such thing as a 'good, high class, straight American' hairdresser.
* In a case that combined this with criminal carelessness (carelessness by criminals as well as carelessness that is criminal), Italian police seized 125 billion in counterfeit $500 million and $1 billion U.S. bearer bonds. No U.S. bearer bonds have been issued over $10,000.
* In a case that dwarfs Katrina, the Pakistani response to the devastating
* In a case that extended to within Disney, two projects started concurrently,
* In a case that's more than a cameo, the Brazilian and French dubs of
* In a case where adverse effects can be used to treat different conditions, Paroxetine (an SSRI) can be used in the treatment of premature ejaculation.
* In a case where the "maybe" is clear but ultimately, fortunately, "no", there's
* In a case which reverses the above, a grandmother in Pennsylvania investigated a strange sudden thump in her home in 2016, only to find a mummified body in her attic which had fallen against the door. It turned out to be the body of her grandson who had disappeared two years before. Although police are still investigating, and both she and the rest of the family do not believe it, the current prevailing theory based on his Facebook posts before he disappeared is that troubles in his life had led him to suicide, and that after the search of the house, he had returned secretly some time later (the body was wearing different clothes than he'd last been seen in) and hanged himself in the attic. What exactly

caused the body to fall (the rafter breaking, the rope he used to hang himself wearing through and breaking) is unknown.
* In "A Cat and a Kitten's Rock & Roll", Tessa falls on top of Sousuke
* In a catastrophic magical experiment at the College of Winterhold, a mage known only as the Augur of Dunlain destroyed his physical body but remained spiritually bound to the college. In doing so, he gained wisdom inaccessible to the living and, ostensibly, some degree of precience which makes him a shrewd advisor to the college.
* inaccessible and might not have the time or resources to adequately solve the hero's problem as quickly as he or she would like.
* In accordance with his will, British philosopher Jeremy Bentham had his body preserved for posterity after his death in 1832. Following his dissection (
* In accordance with the trope, the crossover race ended inconclusively.
* In A.C. Crispin's Han Solo novels, it's once mentioned that Rebel agents carry suicide pills. One of them,
* inaccurate-but-simpler version of whatever concept he wants to discuss, and once that is understood, he moves on to more-accurate-but-harder-to-understand iterations.
* Inaccurate Legends, not Christianity. Saber then sees a flaw in the impersonation.
* Inaccurate Legends powers and can simply overrun a city with plant life to make it her territory and be almost invincible.
* inaccurately series — fanon and outright Word of Dante occurs in the fandom with frustrating regularity for anybody trying to keep canonicity straight.
* In a Cell Saga filler episode, Goku casually catches a bullet fired at him by a mobster. By this point, he's so ridiculously powerful that he's more confused by the attack than anything.
* In "Ace", Olivia and Elliot pose as an infertile couple looking to pay for a baby to bust a child-smuggling ring.
* In a certain timeline you have to play the AB game. This was a central premise of
* In a change from both the Grimm tale and the Disney film, not only does her father feature in the story, but Lilli is his pet in
* : In a chapter actually called "Passing The Torch", when Clark Kent decides to retire, he first tests his son Conner by fighting him. When Conner wins, Clark gives him his cape and tells him he is the new Superman.
* In a chapter of the Devi Mahatmya, the Demon Lord Sumbha, who becomes infatuated by the Mother Goddess Parvati, sends an envoy to persuade the goddess to marry the Asura Lord. Parvati refuses and states that she will only wed the demon lord if she is bested by him in combat. After hearing this, Sumbha sends an Army of 60,000 demons to battle the goddess and "drag her by her hair" back to the king should they subdue her. Parvati God-modes into the warrior Goddess Durga and the battle ends about as well as somebody sending a herd of sheep to fight a grizzly bear.
* In a chapter of the Grand Blues comic strips, Korwa insists that if Sturm and Drang won't try to act like a romantic couple, they should at least act like close siblings instead. The next panel has Drang imagining the two scenarios whether Sturm becomes his older sister or a younger one. It ends with the real
* In a Cheerios ad, Dr. Simon Bar Sinister zaps Cheerios with a ray gun, turning one individual Cheerio at time into a hole-less piece of cereal he dubs a "tiddly-wink". Sweet Polly Purebred reports on Bar Sinister's plan to take the O's out of Cheerios. Seeing the news report on televison,
* In a children's book series featuring kids rescuing and returning lost pets, a book features a parrot who says odd things, frustrating his would-be rescuers who can't figure out where he learned what he's saying or what it means. Eventually the point of view character visits a diner and overhears some of the parrot's phrases being said which prompts her to realize he lives in a diner.
* In "A Chill Goes Through Her Veins", a body is hidden inside a freezer to allow it to be smuggled out of an apartment building. The freezer is later placed in a storage unit and turned on, and that is where the body remains for years.

* In "A Chill Runs Through Her Veins", Castle and Beckett identify the killer based on a chance conversation with a witness. They don't have any physical evidence or witnesses, so to close the case, the writers nicely have the killer volunteer a hypothetical confession so the viewer can feel satisfied that C&B have their man.
* In a Christmas comic strip, Calvin's dad stubs his toe and yells, "Slippin'-rippin'-dang-fang-rotten-zarg-barg-a-ding-dong!"
* In a Christmas episode, Capt. Stottlemeyer has the following opinion on an herbal drink he's trying for his back pain.
* In a Christmas episode, Martin is rehearsing "O Holy Night", but is having difficulty hitting the high note, and every time he tries
* In a Christmas episode, Martin says Frasier has a habit of giving people Christmas presents that
* In a Christmas Honda commercial, several kids give a Honda employee a wedgie in order to get him to tell them where the presents are hidden.
* In a Christmas strip where Satchel is waiting for Santa, Rob tells him that Santa is probably flying over Canada at the moment. Bucky claims that there is no such place as Canada, saying, "So you see a couple of flannel-wearing hockey fans that mispronounce the word 'offense' and you automatically believe there's some other country? Next you'll tell me you pay taxes." Rob replies that he does indeed pay his taxes.
* In "Achy, Breaky Art", Frida rips off her dress to reveal a jumpsuit underneath. Carl tries, but belatedly realises that he's only wearing underwear under his clothes.
* In a cinema advert: two Orange executives are trying to decide a name for their campaign which gives two tickets for one on a Wednesday. "We need a movie title. It's every Wednesday.
* In a classic '70s era story, "The Batman Nobody Knows", Bruce Wayne takes some inner-city kids on a camping trip, and around the campfire, the subject of Batman comes up. As Bruce listens, the kids describe what they think Batman's like (one calls him a demon, another claims that he's Shaft-meets-Superfly). Bruce then emerges from the woods in his Batman costume, and the kids reply, "Yeah, nice costume, Mr. Wayne, but you ain't no Batman!" It's not so much that his
* In a classic Astonishing X-Men arc written by Joss Whedon, in the first battle with an alien baddie he’s winning well until he’s surprised from behind by Lockheed the Dragon, who blasts him in the face with fire. In the next confrontation he’s fighting 4 X-Men who suddenly stop with shock on their faces. “Oh, no. The dragon is right behind me, isn’t he?” Nope. It’s a REALLY pissed off Peter Rasputin. Cue the beatdown.
* In "A Clone at Last", a short story by Bill Pronzini and Barry N. Malzberg, a man commissions a female clone of himself because he has no luck with women.
* In "A Clone of My Own", the Planet Express Ship can travel faster than the speed of light, according to Farnsworth. When Cubert calls him out on how blatantly wrong this is, Farnsworth explains that scientists increased the speed of light.
* In a Coca-Cola commercial from 1997, three male mannequins are standing in the store window while all kinds of events take place on the street, such as a car crash and a guy breathing fire. Being mannequins, they stay as they are until two kids drinking Coca-Cola walk by. Like weird goldfishes, the mannequins press their mouths against the glass to get a sip of the drink.
* In a Coke Zero ad, a guy drinks one after waking up in bed with a woman and her dad at the door and a squad of special forces enter the scene this way.
* In a collection of Pacific Coast Indian folktales there was one in which a group of hunters find that the "old woman" who took shelter from the winter in their lodge is actually a brain-eating monster. They hit it on the head with a hatchet, then burn the lodge with its body inside. Thye then led it on a chase across the country-side, setting traps for it as they go until they finally lure it onto thin ice and it falls through, and was presumably released again come spring. Since there were no other versions of the story from other tribes it was probably made up on the spot by a storyteller who would have been writing for Hollywood except it

was the 19th century.
* In a combination with this and the opposite, Darth Maul's surprise appearance in the Stinger to
* In a comedic sequence later in the series, Riki pulls out a cartoonish mallet (complete with "100t" on the side) during an attempt to assassinate
* In a comedic Stephen Leacock short story, the last words are "I fell ill. I died. I buried myself. Would that others who write sea stories would do as much."
* In a comedy, characters try to outrun the bullets or dodge them by
* In a comedy performance at Carnegie Hall, Ray Romano talked about formerly being a diner waiter, and noted that knowing the language actually hurt him in later jobs. When he later worked at a pharmacy:
* In a comic book from the John Byrne era, the Invisible Woman, the Torch and She-Hulk find themselves in 1930s New York with Nick Fury. Fury decides to go to Germany and kill Hitler, and the other three try to stop him. They find Fury being interrogated by some goons while Hitler watches; they overpower the goons and free Fury, and Sue Storm gives an impassioned speech about not altering the timeline. Fury nods, starts walking out the door — and then turns and shoots Hitler. It turns out that
* In a comic book, Marge makes Homer agree to eat only one doughnut a day. As he drives to work, he sees a doughnut-shaped cloud. Then more such clouds. And then a cloud shaped like an open box full of doughnuts, with the words "EAT US, HOMER" written on it. Naturally, he does not stick to the plan for long. That was the first issue. He does sort of stick to the plan, but cheats.
* In a comic book story titled "Bizarre Love Triangle", Mystique takes an exotic female form and attempts to seduce Gambit in order to prove to Rogue (her adopted daughter) that he can't be trusted. When this fails, she takes the form of
* In a comic for, Peanut is startled when a squirrel runs into a nearby window from outside.
* In a comic released during the 2011 Smissmas update, Miss Pauling asks the Spy how the Soldier became a lawyer. Then the Spy replies: "His roommate is a magician. Should I continue?"
* In a comic story a mishap with a potion Ray Ray was randomly mixing up causes Monroe to expand with blubber. Growing out of the house, a quick antidote mixed up by Juniper restores him to normal, but caused him to burp up the excess mass as a cloud of smog that blankets Orchid Bay.
* In a comic story from the 1940s, Robin imagines what would happen if Batman were to marry Kathy Kane, the original Batwoman. Robin, insecure about his place with Bruce, imagines Batman believing in this trope to make himself feel better.
* In a comic, the company is at thirty dollars a share when Dogbert offers to buy them, but their value promptly falls. Dogbert then offers to pay "the full thirty dollars" for their stock. They ended up selling him the entire stock for thirty dollars and not thirty dollars
* In a commentary, Doug and Malcolm surmise that this is the reason why minor side characters Devil Boner (shouty man in leather and eyeliner, with the added bonus of
* In a commentary for Season 1, the producers talk about the difficulty of adapting certain things from the books, and specifically tell us not to get our hopes up that white ravens will be included. In episode one of Season 2 (filmed before the commentaries were made), we do get a white raven.
* In a commercial advertising the Sega Sports Pack, a football player gets a wedgie from a player from the rival team.
* In a commercial for Ace Hardware, where the ad claims that your local Ace Hardware storekeeper is like a friend, the shopkeeper is serving the customer, not from his store, but from the ample hardware supply located in the kitchen of the shopkeeper's home (including a full selection of wrenches and even a wood mounted full-size p-trap on the island in the middle of the kitchen!) The shopkeeper is interrupted in the middle of the demo by his wife, who walks into the kitchen to get something out of the refrigerator and asks why the other guy is there. Rather than admit that he's there because he dropped his wedding ring in the sink and has to get the tools and knowledge to remove the p-trap to retrieve it, both of them

simultaneously lie and give a different reason. Lampshaded by the wife.
* In a commercial for a credit card company, where they advertise that if you have 25,000 points you can get airline tickets,
* In a commercial for Ally Bank, there are two girls in a room with a man. He asks one, "Would you like a pony?" When she accepts, he gives her a small plastic toy pony. He then asks the other, "Would you like a pony?" When she accepts, he clicks his tongue a few times to bring out a real pony for her.
* In a commercial for a new Hellman's Mayonnaise, the "old" Mayo is outside the diner where other condiments are gloating over the new guy. The old guy makes the "I'm keeping my eyes on you" gesture, except it looks like he's doing the British "flipping-the-bird" gesture.
* In a commercial for Best Buy's buyback program (where you can trade in your tech for the latest version within a certain length of time) we see a man who has just taken delivery of a big screen 3D TV, the latest and greatest technology of the day, only to notice that the delivery van has a huge ad for the new 4D TVs.
* In a commercial for Campbell's Soup a snowman comes in from the cold and has a bowl of hot soup. He melts, showing that he's actually a kid who got caught out in a blizzard.
* In a commercial for Career Builder, a man gives his employee a wedgie as a form of feedback, while another employee is in a hanging wedgie in the background.
* In a commercial for Chunky Chips Ahoy! cop comes along and corrects them.
* In a commercial for Citi Bank identity theft protection, a woman is shown speaking in the voice of a guy who stole her identity talking about all the great stuff he's going to do with the money, including "...and fifteen thousand dollars to complete my robot. My
* In a commercial for Del Taco, an employee allows a customer to give him a wedgie to vent his frustrations about other restaurants ripping him off.
* In a commercial for Diet Irn-Bru, an arrogant man tries (and fails) to show-off to a couple of women at a pool while on a diving board. In response, one of them shines a light in his eyes, causing him to fall and get left dangling from the diving board by his speedo until it rips off.
* In a commercial for Energizer Batteries, a man who has suffered from a major injury is watching TV. He is channel surfing, until he comes to a very intimate channel. When he hears from his Wife that his Father-in-law is coming to visit, he tries to change the channel, only to find out the batteries in his remote have died. Because he is heavily injured, he can't walk up to the TV and change the channel by hand. He gets caught by his Wife and Father-in-law as the Announcer says, "Should have used Energizer. They keep going and going...", complete with the
* In a commercial for Glad garbage bags, a piano breaks loose from the rope used to pull it up to a third-story window. Two workers use a Glad bag to make a fireman's trampoline. The piano completely misses, breaks into a hundred pieces, and the workers use the trash bag to deliver the pieces to the piano's owner.
* In a commercial for Hershey's Syrup, a kid known only as "Messy" Marvin causes his family's bathroom to be filled up with water while he mixes up a glass of chocolate milk, but after he enjoys the glass, we see the bathroom door fall down as a lot of water comes pouring out of the bathroom while Marvin shrugs.
* In a commercial for Huggies diapers where a baby uses a sock puppet to express how he really feels, he reminds his mom that they make thermometers that go in your mouth.
* In a commercial for Itchy And Scratchy cereal, Itchy fills Scratchy with the cereal and then opens him up like a single-serve cereal box.
* In a commercial for KAYAK, a man laments being banned from kayak.com for giving its founder atomic wedgies back in high school.
* In a commercial for Leisure Beer, four bar goers (three male, one female) willingly let a worker give them wedgies.
* In a commercial for McDonald's, a woman tells her boyfriend that her sister's boyfriend says that Sundays are only for watching football. Since he [the boyfriend we see] is so intelligent — evidence of which is that he ordered off the McDonald's dollar menu — he's able to come back with, "He's a jerk."

* In a commercial for Pillsbury Crescent Rolls two boys get in an argument over who gets the last one, but then their mother reveals that she has made more.
* In a commercial for Sling TV that compared cable companies to school yard bullies, a bully gives a customer a wedgie.
* In a commercial for Snickers Cruncher, a sidewalk vendor was selling small wind-up dolls that said annoying phrases like "I think your sister's pretty" and "Not if you were the last man on Earth". People could buy one for a dollar and stomp on it to relieve frustrations.
* In a commercial for Sprint Unlimited, while two families are left hanging by the backs of their shirts, a poor kid somehow winds up hanging by his underwear.
* In a commercial for the National Geographic Wild channel's reality show Snake City (about a husband and wife team who professionally catch and relocate dangerous snakes that get into peoples' homes), the husband at one point states that "if something goes wrong, I am going to need a change of underpants."
* In a commercial for T-mobile, two parents decide to reduce the available minutes on their daughter's phone as they watch her giving her brother a wedgie while spraying a hose down his pants.
* In a commercial for Toys R Us, a little girl without a baby doll to play with puts a diaper on her cat, who runs away and yowls when she tells it, "Time for a changing!"
* In a commercial for Tracfone, a mom casually gets her son down from a hanging wedgie.
* In a commercial for Turbotax, a guy asks his tax advisor if his son still eating his food makes him a dependent and gets this response back.
* In a commercial for U.S. Cellular, a woman is watching a soap opera (some kind of period piece romance) on her tablet, but it's downloading really slow. When it stops at one part, this group of bikers who were watching it start arguing about what's going to happen until it turns into a full-on brawl.
* In a commercial for Washington Sports Clubs: A young woman is being peeped in on by her neighbor. Noticing the man's attention, she opens her shirt, revealing her sexy lingerie-clad body, and gyrates enticingly.
* In a commercial for Wonka's Loompas (the same company that makes Nerds, named after the candy maker in
* In a commercials episode, he spouted that men are too stupid to know they're being harassed and had an episode-long running joke about him. This caused a lot of controversy, plus didn't even make sense for Doug or Critic to say (as they've both complained about getting harassed), and when the Hyper Fangirl
* In a commercial, two Pop Tarts eat a tiara and cowboy hat, which appear printed on their stomachs. From off screen you hear "No, No!" followed by a gulping sound. A third Pop Tart comes on, with a screaming Pop Tart printed on his stomach.
* In a common anecdote, a vicar attempting to introduce actress Diana Dors by her real name—Diana Fluck—was so nervous about mispronouncing her name that he introduced her as 'Diana Clunt'.
* In a comparably more mundane example, the Chrysler Building became one after the events of
* In a compensating move, Allied forces revised their markings. The prewar US aircraft marking had a red circle in the middle of the white star. This was removed in 1942 after it was discovered that overeager pilots would fixate on the red dot and attack any aircraft displaying a red circle marking, even if it was only part of a larger marking; the RAF/RAAF similarly painted over the central red dot of their insignia with white for aircraft in the Pacific theater.
