* Hillary Clinton, two of the most unpopular candidates in electoral history. As a result, both sides tried to discredit the other.
* Hillary Clinton. Ultimately, echoing Donald Trump's surprise upset of Hillary Clinton in the 2016 Presidential Election, Mr. Garrison is elected President of the United States, due to interference by the Member Berries.
* Hillary Clinton, who at that point was seventeen years old and a supporter of Obama.
* Hillary Rodham Clinton and the US ambassador speaking out against it, which have been completely ignored. The supposed aim of the filter was to protect the children from accessing pornography and stifling child porn online. However, the Coalition has followed the Greens in agreeing to not to vote in favor of the Internet Censorship bill when it appears in parliament, thus denying the Bill the majority it needs to pass through government. It is now virtually impossible for the filter to be implemented.
* Hillary Rodham Clinton). At the end, the announcer says, "I'm Jerry and I approved these sandwiches."
* Hillary Rodham Clinton good. On the other hand, many people in Washington agree that Hillary Clinton herself was instrumental in getting Bill to the top, and might have been biding her time until the public was more ready for a woman in power.
* Hillary Rodham Clinton had the opposite effect and basically turned Pepe into a symbol of the counter-culture instead.
* Hillary Rodham Clinton). She and her husband are something of a political institution; when she left the State Department in 2013, it was the first time in 30 years that neither one of them was serving in the federal or state government.
* Hillary Wolf, a child actress best known for playing one of the McAllister kids in the first two
* Hillbilly Armor Makeshift armor like steel plates, sand bags, railroad track or caterpillar track idlers strapped, bolted or welded to protect the engine and crew.
* Hillbilly Elegy of victim-blaming the culture it supposedly attempted to portray with nuance.
* Hillbilly Esther is one she cannot return, because of her "inclination". It's left ambiguous what her inclination is, but it doesn't involve Rondel as anything more than a friend.
* Hillbilly Hare", Bugs gets chased by two hillbillies who follow him into a dynamite shack. Unable to see a thing, Bugs loans them his lighter and quickly leaves the house before it explodes.
* Hillbilly Hare", he does it by turning the barrel of a long rifle round after the trigger has been pulled.
* Hillbilly Hare his two opponents into a hay baler. After going through it, they're ejected, bundled inside bales of hay.
* Hillbilly Horrors, but still, it's best to proceed with caution and be aware of who and where one is writing about.
* Hillbilly Horrors tropes, and as such, are not only willing to inbreed but actively prefer it, marrying as close to the family line as possible, with parent-on-child, sibling-on-sibling, and other combinations being a feature of ogre life and resulting in ever more deformed offspring. Their half-human relatives, the degenerate Ogrekin, are just as prone to inbreeding, and entire forests are haunted by families of Ogrekin with minds as twisted as their family trees.
* Hillbilly Horrors. When Tucker tries to tell the truth to the sheriff, it comes across as a very weak attempt at this:
* Hillbilly Moonshiner: Someone who illegally brews some unlicensed liquor.
* Hillbilly Moonshiner: Someone who illegally produces alcohol despite laws which ban or restrict this activity.
* hillbilly moonshiners, though their weirdness isn't played so much for horror, and they're presented mostly as just a rival gang trying to cut in on his business. The feud is ultimately resolved - how else? - with a hot rod race.
* Hillbilly, Rondel is armed with Lucifer's own humongous Meat Cleaver.
* Hillbilly take on rural Appalachia, crawling with hideous monsters and evil witches. Most of the people themselves, though, are okay, and the hillbilly of the

title is the comic's hero, Rondel.
* Hill Climb Racing 2 lets you unlock a specific chest, double coins earned for the duration of the run, instantly open three-hour chests, and buy low-level upgrades for free if you watch an ad.
* Hill of Crosses in Lithuania allows visitors of other faiths to bring and place their own holy symbols, as long as they are appropriate and follow the size limit.
* Hills End by Ivan Southall, one the children claims that there is Aboriginal art on the walls of the cave in an attempt to sound important to his teacher. Later, when they are lost in the caves, they stumble into a chamber containing Aboriginal cave art and the bones of megafauna.
* Hill Street Blues A court witness with transactional immunity (meaning he couldn't be prosecuted for any crimes related to his testimony) when asked why he was so sure about a date said "because that was the same day I killed a cop."
* Hill Street Blues also came out of this deal, and these were successful shows.
* Hill Street Blues, a man sat right in front of the salad bar and refused to leave until he'd "eaten all he could."
* Hill Street Blues) and ends up attacking and taking hostage a man who's supposed to be servicing the boiler. Once both have been rescued from this ludicrous predicament and are being taken to County Medical, Captain Furillo remarks to Detective Caitano that they'd better let City Hall know what's happened.
* Hill Street Blues and Officer Joe Coffee both served, and are clearly haunted by it. Several even more badly affected veterans show up during the series, one of whom ends up causing a hostage situation.
* Hill Street Blues appeared in several episodes as a crooked cop named Sal Benedetto. One or two years later he reappeared as the non-crooked but otherwise identical character Norman Buntz.
* Hill Street Blues, as one of the main characters is a Public Defender. In fact, Captain Furillo sometimes uses the fact a particular suspect has asked for a lawyer to his advantage; since they're refusing to speak to the police until they have counsel, they've no excuse not to keep their mouths shut and listen while he delivers a few hard truths about how much trouble they're in.
* Hill Street Blues: At roll call, Sgt. Esterhaus sounds more like an academic orator than a police sergeant, never letting one simple word suffice when he can demonstrate the extent of his vocabulary by using four obscure, polysyllabic ones, preferably of Latin or French origin, instead.
* Hill Street Blues) attends in person, and is clearly badly shaken by what he learns from the detectives on scene.
* Hill Street Blues, Captain Frank Furillo's ex-wife Fay shows up at the police station every few episodes, usually asking Frank to help her with something. Even though this sometimes irritates Frank, they still seem quite fond of each other. Part of the equation is that Fay has custody of their son, Frank Jr. Frank's new girlfriend Joyce Davenport is also usually on quite friendly terms with Fay, even though she's a rival for Frank's attention.
* Hill Street Blues: Frank Furillo spends much of his working life trying to prevent one of these from kicking off in his precinct, with mixed results.
* Hill Street Blues had this come up regularly. On one occasion a murder trial nearly collapsed because the impound lot where a search of a seized car had lost its contract with the police department mere hours earlier, which meant that chain of evidence regs were technically violated for the murder weapon; fortunately the judge ruled it admissible despite this oversight. Another time a man on trial for rape had the charges dismissed because he claimed he didn't speak English and couldn't understand the officer giving out his Miranda Rights, and a sting operation had to be set up with an officer wearing a wire in order to prove he'd lied so that a retrial could go forward.
* Hill Street Blues has a rookie police officer shoot an armed suspect in an alley. When his veteran partner asks where the suspect's gun is, the rookie can't locate it. Not wanting his young partner to get railroaded by Internal Affairs, the senior officer produces a second firearm, puts the suspect's fingerprints on it, then announces that he "found" the perp's weapon. Later the suspect's actual weapon is

found and both officers are put under investigation under suspicion of planting false evidence.
* Hill Street Blues, Howard Hunter had frequent moments of this, much to the frustration of Ray Caitano.
* Hill Street Blues: In the season 5 episode "Davenport in a Storm", a number of female officers and detectives pose as streetwalkers to catch a serial killer targeting prostitutes. This is not played for fanservice (it's winter and even the street walkers wear covering clothes) but it is emphasized that the operation is dangerous; in fact, Det. Patsy Mayo asks to ride as backup rather than pose as a prostitute because of the risk.
* Hill Street Blues: Inverted during a story arc involving a lengthy murder investigation, where a supposed witness was giving a description that was so detailed and such a perfect match for their suspect that Captain Furillo was a little suspicious, especially since reward money was involved. He was right; turns out the guy's girlfriend worked for the police department, and coached him with details that they deliberately hadn't released to the media.
* Hill Street Blues is a 1981s series that follows the lives of the staff of a police station in a large city and has inspired many other shows of the same genre and theme.
* Hill Street Blues Jeffry Tambor played a cross-dressing lawyer who was doing so on advice from his psychiatrist to "resolve his feminine-identity issues." (The "cure" worked, and the same lawyer later became a highly-respected judge on the series).
* Hill Street Blues Jesus Martinez. The perpetrator turns out to be Martinez's heavily pregnant girlfriend, who would like him to quit procrastinating about fulfilling his promise to offer her honourable marriage. The judge who's supposed to be trying her for a firearms offence ends up conducting a civil wedding in his office... with Renko loaning Martinez a ring for the purpose! You might well ask if this is really the basis for a stable and happy relationship, but the next time Jesus shows up at Hill Street Station he's resigned the gang, enrolled in night-school and is making an honest effort to go straight.
* Hill Street Blues : Lt. Ray Calletano arrives at the precinct wearing one, thinking it makes him look younger. He proudly relates this to Capt. Furillo, who tries in vain to keep a straight face. Later, some gang members start a fight, and Calletano helps to break it up, resulting in his toupee halfway ripped off and sticking straight up in the air.
* Hill Street Blues seemed to call him while he was trying to book in a suspect.
* Hill Street Blues: The final scene is the precinct office, still in business after a fire. The last words: a police officer answers a phone with "Hill Street."
* Hill Street Blues; The officers at the eponymous police precinct fought a constant running battle with their vending machine, which stubbornly refused to dispense anythng that might be edible; at one stage, an enraged officer blew it to pieces with a shotgun!
* Hill Street Blues to let the audience in on Furillo and Davenport's secret relationship.
* Hill Street Blues variety, Captain Francis Furillo of the Hill Street Precinct.
* Hill Street Blues was a very low-rated show in its first season, but won a large number of Emmy Awards due to its quality. In the second season opener, one of the statues is sitting on a file cabinet in the station, and Lt Henry Goldblume picks it up and carries it off without any comment as he walks through the scene.
* Hill Street Blues was Belker constantly booking the same criminal for various minor offenses and the criminal always giving him a fake name. This went on for years, until the criminal was accidentally caught in the crossfire of a gunfight he had nothing to do with. He was mortally wounded and asked Belker to call his mother, finally giving Belker his real name. Belker did so, telling the criminal's mother that her son had been a fine, upstanding citizen.
* Hill Street Blues was one of the first shows to include them as a recurring plot element, as well as one of the more rounded portrayals.
* Hill Street Blues was saved by a letter-writing campaign and went on for several

more seasons.
* Hill Street Blues worked undercover wearing a chicken suit in two episodes. He even made an arrest wearing it.
* hill trolls in sunlight, and Aragorn had previously pulled a bit of a prank on the hobbits that relied on this fact.
* Hill Valley, which is ostensibly set in the same town some hundred-odd years in the past.
* him. Afterwards, he starts to think about going to night school to learn how to be a tooth fairy or an Easter bunny or "some other imaginary creature".
* him alive (upside down, to boot). Fortunately for everyone, although the Gravedigger came back as a geist and hooked up with a miner who'd eaten his coworkers to survive a cave-in, the first krewe they met instantly pegged them as bad news and destroyed them.
* Him always wears a lot of makeup, and he's basically the devil with lobster claws for hands.
* Him & Her, sees Steve all ready for some much needed alone time when Becky and co unexpectedly come back to the flat.
* him and Aristogeiton murdered Hipparchus, but they changed his age, so his relationship with Aristogeiton.
* him, and Kaza whines that he's unable to hit his own image. This shows how cowardly he is, because this wouldn't have worked on any of the heroes.
* Himari is not Kanba and Shouma's blood sister; she is actually a girl rescued from the child broiler and was adopted into Kanba and Shouma's family, and she is in love with Shouma.
* Himaruya himself has also been inconsistent when it comes to hair and eye colors: Prussia originally had dark blond hair and blue eyes, but now his hair varies from being platinum blond to outright white or grey, while his eyes are now either red, "red-violet", or pink. Russia, Finland, Latvia, and Iceland originally had blue eyes, but appear with violet ones in later illustrations. Belarus and France also occasionally receive violet eyes instead of their usual blue. UK's shade of blond varies throughout all colored illustrations, Canada's hair was originally two-toned, and Hungary is either a blonde or brunette. Monaco was also originally a brunette with brown eyes, but was quickly changed to a blue-eyed blonde (and even then, her shade of blonde can vary).
* him asking why the group is so upset at him for murdering Clover, as well as engineering the Ninth Man's death and trying to kill Snake since they'd barely even known any of them for a few hours. Basic human empathy seems beyond him.
* Himawari! features Momota, a cute animal sidekick who frequently attacks with his gas. He also at one point uses his backside as a watermelon-seed machine gun.
* Himawari! has two. Yusura describes things being "[adjective] like a(n) [animal]". Azami has "According to my information, [useful information]. Also, [useless trivia]."
* Himawari! is a male spy at an all-girls' ninja school, and wears the appropriate clothing. Everyone knows he's a guy and doesn't mind, because the whole spy thing means inside info for both sides.
* Himawari Uzumaki is like this with her daddy Naruto, even forgiving him when he sent a shadow clone of himself to her birthday when he got
* Himawari!. When he whined to his mother about it, she declared that they would make him the best tree ever. And they did, drawing and making many paper leaves together.
* Him being Born Unlucky is actually explored in an episode Lazlo where
* Him being trapped in the time void) tries to get hooked up with Layla, only to end up with Angelica.
* him Dark Magician Girl too; DMG's reaction in the original version was very unsubtle.)
* Him", Dawn and RJ are laughing while dirty-dancing together at a party. Buffy also giggles when she first falls under the love spell.
* Him Diddle Riddle" when as part of a task by Him she has to make her way to a phone in the Chinatown district of Townsville without flying. She takes the subway

and encounters a long line waiting to get tokens.
* Him duology by Sarina Bowen and Elle Kennedy is a sports M/M erotica about two hockey players from different colleges, Ryan and Jamie who used to be friends in a summer sports camp until Ryan tried to distance himself from Jamie after making a move on the latter. The first book focuses on how the two reunites and Jamie discovers he is bisexual while the second book, titled "Us," focuses on how the two struggles in hiding their relationship as Ryan goes through his first year going pro and Jamie becomes a hockey coach for junior team.
* him during training, essentially using himself as a human training dummy.
* Himechan No Ribon - after the fiasco that establishes Sei Arei as a Jerk, Himeko wants Daichi to hit her. He refuses. She forces him.
* Himechan No Ribon by saying that he knew who Pokota was even though Hime-chan had never told him, which is how she realised there was something more to him than originally thought.
* Hime-chan no Ribon get one. Daichi's club causing direct trouble for Hime-chan when the rumours of them dating start spreading around. At least the main leaders of said group have badges with his face on it.
* Himechan No Ribon has Daichi become the secret keeper for Hime-chan about her ability to magically transform after she had to do it in front of him to save somebody.
* Himechan No Ribon Hime-chan says that her only stage experience is playing a flatfish in elementary school.
* Himechan No Ribon, Himeko acquires the ability to increase or decrease the size of things. She's able to transform herself into a giantess, but since she is trying to keep things secret, she seldom uses the growth ability.
* Himechan No Ribon is very much like this even though they spend a huge amount of time apart, saying they love each other, etc.
* Himechan No Ribon. Nonohara Himeko is a magical tomboy of the cute witch type who can transform into anybody in the human world for one hour. This is due to her getting a magic ribbon from her alternate universe counterpart Erica, who just happens to be a princess in The Magical Kingdom.
* Himechan No Ribon was brought alive by magic and serves as the animal sidekick.
* Hime-chan no Ribon, when Himeko is caught hiding in her crush's room while disguised as said crush's little sister.
* Himechan's Ribbon, Himeko uses the titular ribbon to shift her shape into that of another (real) person. The catch? They wear a pendant that resembles the ribbon.
* Hime Cut: A haircut, usually worn by Japanese girls of upper standing—long, straight, with long bangs cut blunt and straight.
* Hime Cut: A proper, upper-class Japanese girl with a traditional haircut. It has three parts: long length in back, straight even bangs and sidelocks.
* Hime Cut—hair that is styled into three parts (straight bangs, sidelocks, and long hair in the back) that is meant to show that a (most likely Japanese or Japanese descent) girl as proper, upper-class and/or traditional.
* Himegami Aisa possesses the ability 'Deep Blood' which makes her blood seem attractive to vampires and kills them when they drink it. A vampire attracted by this ability converted her family and friends into vampires resulting in their deaths.
* Himegami had to explain that the Tenbi region is essentially a small autonomous nation. And in chapter 15, Haruko and Inaho had to tell him what Amanohara was, even though it's a landmark that's visible from anywhere on campus.
* Himegoto - Juukyuusai no Seifuku, is the awkward stand-out since it's a played straight romantic comedy.
* Himekei Doll, Ayumu is obsessed with Renji, who's not only popular but a fashion designer as well.
* Himemiya Komari can get close to people so easily. As Komari put it, "Yukio-chan's fans are weird".
* Himeno is this to her younger cousin, Shiho. Shiho herself acts as a Cool Big Sis to an even younger centaur girl from the same kindergarten, Maki.
* Himeno, one of the more experienced devil hunters, has an eyepatch hiding her

right eye she lost against a devil who also killed her buddy at the time.
* Himespetchi was born on February 14th (Valentine's Day), and her primary characteristic is that she has a huge crush on Mametchi, especially in the

* him forcing her to satisfy his libido in the bathroom of the arcade to make up for the fact that she had two siblings. He then shouts, "UNFORGIVABLE!" at the end. However, after watching the rest of the video, this only proves that he is an extremely angry person who gets upset about minor things.
* Him for her beloved, she gets him up on a desk with naughty things in mind... in time for her lovesick little sister to walk in and catch them (and for Xander to scold Buffy).
* him for the damage that her husband's murder did to her family. As opposed to, say, blaming the murderer.
* him for why the dealer is so protective of his privacy to throw the cops off the trail.
* Him" has a scene where Xander and Willow are checking out Dawn at The Bronze, before they realize who she is.
* HIM has a severe case of violating the limit. One of their line-ups featured Mikko Paananen on bass, Mikko Lindström on guitar, Mika Karppinen on drums and Jussi-Mikko Salminen on keyboards. Oh, and speaking of drummers, they had Jukka Kröger and Juha Tarvonen in different points of their history. To prevent confusion, all the band members, except for vocalist, use nicknames.
* him/herself doesn't know the character they're playing is the killer. Needless to say, they're a ton of fun.
* him, he thought love would conquer all. It eventually failed. All over the walls, floor and ceiling.)
* HIM HIM we're talking about after all), but one possibility is that it's about being in a very one-sided relationship where you settle for being mistreated just so you can stay with the other person and still have your partner whisper all those sweet nothings into your ear. Very flowery nothings in this case, since they are Ville Valo's lyrics in this song.
* him Hobgoblin was actually Roderick Kingsley (his original choice when he created the Hobgoblin). Kingsley also had a reason to single out Flash, however; Flash had been on TV calling the Hobgoblin a "creep and a coward", among other things.
* Himiko becomes this in the second trial, when, during her magic show,
* Himiko has two, her childishness and unwillingness to face her feelings. During the second trial, she
* Himiko pulls the brim of her hat over her eyes when she's uncomfortable.
* Himiko Toga can shapeshift to resemble anyone whose blood she's drank, but shapeshifting clothes to match theirs destroys whatever she's wearing and leaves her naked should she drop the disguise. Doesn't stop her from trying to shank Izuku and Aizawa during their raid on Overhaul's base.
* Himiko Toga, so in combat she relies on a knife and being fast and skilled enough to get the drop even on Heroes in training.
* Himiko Toga's Stain, though there are hints she wants to do this to either Midorya or Uraraka.
* Himiko Yumeno initially doesn't express her emotions because she thinks it's "tiresome".
* Himiko Yumeno, who tends to go along with what other people do because she's simply too apathetic to think for herself. She
* him in season 6 of the parent show after being released from his bottle); also, since Cyrus had been returning the water he stole, his brothers and Will are all returned to normal.
* him in the first two films. More of the same, different bodily products and delivery methods. (one example also fits the trope: he drinks from a beer left by a couple in a bedroom. Which Kevin mockingly describes as a "Pale Ale"...)
* him into a giant rat that was unable to eat anything besides his own young.
* Himi, the second Venus adept in the party is able to cast all of the plant-based Psynergy in the game.

* Himitsu Kichi mistakes a sixth grader for a college aged student. In turn he mistakes her for a kid his age when she's 16 years old.
* Himitsu Kichi. She's so short her boyfriend thought she was in elementary school too.
* Himitsu no Akko-chan, communicating the character's sweet and plucky, if somewhat naive, nature. She retains her trademark hairstyle in the '80s and '90s anime remakes as well.
* Himitsu no Akko-chan. Manga started in July 1962, Anime in January 1969.
* Himitsu no Akko-chan, she no longer possesses the ability to communicate verbally, and the mirror refuses her wish. The Reset Button hits itself, restoring the heroine at her original state, only after the protagonist is scared into her right Aesop.
* Himitsu no Akko-chan thanks to magical mirror that allows her to transform into anything and anyone she wants, sometimes copying their abilities too.
* Himitsu no Akko-chan was a "magical girl", but she just had magical powers).
* Himitsu no Akko-chan was pre-empted by ongoing news coverage of Emperor Hirohito's death (which all channels in the country ran non-stop coverage of for at least a week).
* Himitsu No Hanazono the four brothers work under one female name to publish their shoujo manga.
* Himitsu no Otome: A Japanese idol group consisting of transgender women.
* Himitsu Sentai Gorenger and Kikaider as heroes fighting the evil organization Crime in different parts of the globe.
* him likely thinking it was cool and being a Stain fanboy, and after this sword gets destroyed he switches to a normal sword.
* him. Luckily, the symbiote fixes her (sorta) by changing her obsession from "Be Izuku Midoriya" to "Learn to be like Izuku Midoriya".
* Himmelsdalen: Helena puts on a guard's uniform near the end (with a cap that mostly shades her face, in the dark) to escape.
* Himmelsdalen: Helena, though trained in martial arts and highly capable, is still put in tight spots more than once (including getting captured). It's mostly due to being overwhelmed by brute force or surprises.
* Himmelsdalen: Luck, a dog in the sanitorium, barks at Siri but likes Helena. Siri, it turns out, is a dangerous sociopath, quite unlike Helena. Luck also dislikes Raymond, another dangerous sociopath.
* Himmelsdalen: Raymond finds he enjoyed seeing Helena in distress before when he'd drowned her, begging for mercy. To relive the sight, he takes hostage Luck (a dog she's fond of) so that she'll beg for mercy once again.
* Himmelsdalen: Siri does with her twin Helena in the first episode, switching places to leave the sanitorium without Helena knowing (she's been drugged).
* Himmler also had a spiritual adviser named Karl Wiligut, who was quite an interesting character. While Himmler believed himself to be a reincarnation of Henry the Fowler, Wiligut believed he was a descendant of the Norse god Thor. Wiligut conducted SS rituals in Wewelsburg Castle, studied and taught the secrets of the runes. When word got out of his stays in mental hospitals, his
* Himmler believed in the existence of the Holy Grail, which he thought to be a Pagan artifact with connections to Odin. He enlisted the help of Otto Rahn, a known archaeologist and Holy Grail aficionado, to track down the mystical chalice. It was a real case of an odd alliance, as Rahn was gay, possibly part Jewish, and not a supporter of Nazism.
* Himmler has been negotiating with the Western Allies in hopes of ensuring that he'll rule some form of Nazi Germany after the war. He even claims that Hitler was either sick or dead and thus authority of the Third Reich would pass down to him. Like with Göring, Hitler flies into a tantrum, expels Himmler from his inner circle, and then orders his capture and immediate execution.
* him moments, he was taking his anger at someone else out on JD and even if not, ragging on him for something that wasn't his fault). When the moment comes, JD takes it much further than necessary, prompting Cox to warn him, "The next minute you find yourself alone, I'm gonna kill you." JD's response is, of course, "It was

worth it".
* him, Mr. Dink immediately bursts into tears and confesses to lying about being captain of his high school football team (he was really the equipment manager). A confused Doug forgives him anyway, and this gave him the idea to confront Loretta to get her confess as well.
* him, not von Hecht. We never do get to see what his reaction is when he's told the dam got blown up, sadly.
* him on fire, or they'll tell his daughter that he set the fire that killed her mother.
* him on the station and locking out his access codes, forcing him to work with the others on disabling the program in order to save his own life.
* Himouto! Umaru-chan, appears in the series as a person with a white, cylindrical head (ironic, since his pen name means "Triangle Head") and a hamster-like face. He pops up a lot in the anime, including in scene transitions, but special attention is drawn to him in the last episode when Taihei is test-driving an SUV and freaks out over "nearly" hitting him while he was crossing a crosswalk, causing Taihei to shout "A MANGAKA!"
* Himouto! Umaru-chan changes from a classy high school girl to a lazy chibi version of herself once she makes her way home. The change is evident enough that anyone who isn't her brother thinks that she's someone else.
* Himouto! Umaru-chan episode 5 opens with an ad for Diamond Service, the company that Umaru's brother Taihei works for. At the end of the ad Umaru drops in to deliver the traditional "Our program was brought to you by this excellent sponsor!" message; Taihei asks if his company is really sponsoring the anime, and a caption appears overhead reading "Nope."
* Himouto! Umaru-chan: It's left ambiguous if Umaru turning into a cartoonishly deformed version of herself is just a visual gag for the audience or she really is somehow shapeshifting. Characters who know her outdoor persona in-universe will take notice of her indoor persona and question who that is.
* Himouto! Umaru-chan surrounded by food-headed classmates, while Umaru's shows Ebina even more nervous than usual because all the classmates are Umaru's brother Taihei, for whom she has feelings.
* Himouto! Umaru-chan. Taihei suggests dividing the apartment in half using a curtain; Umaru likes the idea at first since it's like having her own place, and Taihei thinks it'll improve his productivity. However, it doesn't even take a full day before the two siblings start to miss each others' presence and decide to do away with the curtain.
* Himouto! Umaru-chan where she defeats the cold germs (which look like Umaru) with the leek.
* Himouto! Umaru-chan while a narrator tells about all the events happening. At one point, the narrator mentions Kirie slipping on a banana peel, with the injury forcing Kirie to retire from swimming.
* Himouto! Umaru-chan who would rather pig out on snacks, watch anime, and play video games. Much of their interaction is Taihei trying to get Umaru to straighten up or at least clean up after herself.
* Him!" Pinkie Pie immediately echoes her with an admiring "Him!" only to follow it with "Who?"
* HIM put the girls up to various challenges, including forcing them to "bring tears to the citizen's eyes", hoping they would do something bad enough it made them literally cry. They end up making it rain, which made it look like the citizens were crying (Blossom reasons this is "bringing tears to their eyes" instead of making tears come from them, and is technically what the challenge required; HIM accepts it).
* him saying this with a straight face and a deadpan voice And this was used again when Kaede proved Miu's innocence using Kiyo's account.
* himself accused of Communist leanings due to his "Filipino First" program of economic nationalism.)
* himself affirms that Spock is right. In both cases, cold logic is revealing a painful truth that emotion and sentiment can cloud but not change.

* himself after learning who Missy really is. It's enough to send him running and shouting at everyone in a vain attempt to warn everyone one of his most dangerous enemies has returned.
* himself and, with whom he is friends in real life. That's probably the best explanation for throwaway lines like this:
* himself asking if he'd done so. When he replied that he hadn't, Zappa said, "Well, don't tell anybody you didn't do it!"
* himself at one point, kicking in a door with such force that it rebounds and slams shut, whacking him in the face.
* himself before standing up. Apparently, because that's his real form, a partly-skinned tiger-man.
* himself, but in order to escape the Jedi (he can survive in space, and had a grappling hook that allowed him to reattach to the ship). Blast panels come down soon after to prevent others from getting blown out.
* himself. Clark died in 1988 and was replaced by M. G. Kelly for just under a season before Charlie returned in 1989. (Charlie died in 2010, and Jim Thornton replaced him.)
* himself. Ellie and Moxxi, Scooter and Ellie's mother, have argued severely in the past, disagreeing to the point of both women living on different parts of the planet. When things go bad towards the end of the game, however, Ellie asks Scooter to tell their mother that she loves her, but Scooter says that Moxxi already knows and always knew. It's really rather sweet and shows that for all their personal flaws, they're still perhaps the most loving family on Pandora. Then, Scooter returns to normal:
* himself for Russia. Nicholas was personally blamed for the massive defeats and death tolls, which along with the chaos his wife Alexandra and Rasputin were causing in the civil government pretty much stained his legacy.
* himself for three episodes. His last episode, "Bookie of the Year", was aired months after his March 2016 death, though his character remains alive in the show.
* himself from passing on from the Halls of Mandos unto Eru, which is extraordinary since Men by their design are meant to depart Arda. Due to his failures Túrin is unable to rest in peace. Can anyone blame him? Morgoth ensured he had a fairly lousy existence. It's poetic then that he is prophesied to deal the killing-blow unto Morgoth and destroy his evil influence.
* himself", giving the transplanted Native American tribes knowledge of medicine, irrigation, and agriculture.
* himself. He's mobbed by admirers at the Winter Palace ball, and among other questions, they ask if he's married. Unless he's in a romance with the Inquisitor, he deflects the question by saying that "I'm married to my work." (It doesn't deter them.)
* himself - he wanted to save his grave from being desecrated. So the first assassins killed him and buried him on the spot, and by the time the last ones were done, no one knew where the grave is.
* himself: he wrote dozens of emails to a girl but was so afraid of seeming like a stalker he never sent them, so when he started haunting her (by "disguising" himself as an invisible vampire) she had no clue who he was.
* himself, his power being to blow himself up and then reintegrate, being given this power by the Kree Lunatic Legion.
* himself in addition to the other three Chaos gods (and the Eldar gods, and the Necron gods, and the Emperor, and...): because he's the personification of hope, his final victory against the others would leave him with no one to plot against, and thus defeat his own purpose for existence. So, all his long-running and convoluted plans-within-plans require some of the others to fail in order to work.

* himself occurs). Despite all this, he is shown to truly cherish his memories of his dead mother, despite Kagome assuming he resents her for being human. In fact, Inuyasha's love for his mother is what causes Sesshomaru to use her form to discover the secret of Tessaiga from Inuyasha.
* himself states that she was a gentle person, and that she was good unlike most of the saiyans. While she did start off as a soldier before becoming a butcher, she was notoriously weak and bad at fighting, meaning it's unlikely she killed anyone. Even if she did murder a few people, she should have still gone to Heaven if she was a good person like Toriyama described.
* himself suitable (and personally despised to boot). (Burnside was proved right: After his removal, Hooker replaced him—and promptly led the Army of the Potomac into the grand debacle that was the Battle of Chancellorsville. Hooker was replaced by the far more competent—if still flawed—George Meade shortly thereafter, and Meade won his signature victory at Gettysburg within a week of his appointment.)

* "Him": Xander says that he was a bully in school. Now that high school is behind them, he is a pudgy pizza delivery guy.
* Hina desperately tries to remain professional while her crew has a dance party behind her while listening to music playing during the
* Hinagiku also has a similar level of maturity, most of the major cast in on the low end of this trope as well, showing maturity beyond what someone would expect from a 16/13 year-old. Even Yukiji seems to have it, when it's not overshadowed by her
* Hinagiku has attempted a confession-of-sorts when Hayate has taken her out on a date, but given her fear of loving someone, she does it just as a train passes by, and so he can't actually hear the words.
* Hinagiku's sister, Yukiji also seems to have gotten this when she was younger, though only Kaoru-sensei seems to still be hanging on to it.
* Hina-Ichigo also has plant powers, but she is far weaker than the twins.

* Hinamatsuri at the establishment in question, while Matsutani is a frequent customer. It doesn't help that Hitomi, afraid of anyone finding out that she's working at a bar despite being underage, acts extremely suspicious whenever the other kids ask her what she was doing there.
* Hinamatsuri: In Ep 2, Anzu and Hina compete in Rock, Paper, Scissors: Esper Edition; where they both feel the strong wind in 3 separate rounds.
* Hinamatsuri; main character Nitta is an up-and-coming member who joined through their business associations, and thus lacks their traditional experience with violence. Being a comedy series, however, they're played for laughs, along with most everything else.
* Hinamatsuri or not. The last major arc in the manga is all about the girls managing to get him to rediscover his old passion for music so they can live a peaceful life.
* Hinamatsuri. She's a selfish, apathetic, greedy, entitled, and lazy brat that causes more trouble to those around her than anything else, from demanding things like food and entertainment from her friends to basically her psychic powers to threaten Nitta into adopting her.
* Hinamatsuri, the time-traveler Mao is implied to be a clone of herself.
* Hinamizawa. It gets wiped out in the Great Hinamizawa Disaster in some of the arcs.
* Hinata and Sasuke. Ignoring the fact that their canon counterparts have had almost no direct interaction with each other, in this story their fathers are fierce business rivals, plus Hinata herself is

* Hindenburg rode the zeppelin until it crashed on the ground. Due to the massive inferno, he escaped as soon as he could but carried out the radioman. He then ran back into the still-burning wreckage to find other survivors until he was restrained by rescuers.
* Hinder and "Better Than Me" is almost completely forgotten to mainstream audiences, so "Lips of an Angel" has become a defining one-hit wonder of the 2000s.
* Hinder's "Lips of an Angel" sometimes gets used at weddings and in other romantic contexts. It's a song about cheating and not being able to move on from past relationships. Apparently people only focus on lines like "coming from the lips of an angel, hearing my name it makes me weak", while ignoring ones like "You make it hard to be faithful, with the lips of an angel" in

A lot of variants. Soviet pilots called it the "Crocodile" or "Flying Tank". The Mujahideen hated it and called it "
* Hindu (9th or 10th century), where mention is made of a travelling army of

ghosts, headed by Shiva.
* Hindu deities have eyes in the wrong places; most notably, a third eye in the forehead represents mystical sight and wisdom.
* Hindu demons have nothing to gain by trying to trick a virtuous soul into going to Hell. They don't run it. The just and righteous god Yama does. While Yama might be willing to admit someone who, for whatever reason, comes to Hell willingly, he would surely refuse to accept someone there on false pretenses.
* Hindu god Indra which is in the "Rick Riordan Presents" line but written by a different author.
* Hindu god of love, also uses his arrows to make people fall in love, except his arrows are tipped with flowers instead of actual arrowheads. (He's pretty clearly the same deity as Eros.) But other gods (such as Shiva) don't always appreciate being on the receiving end.
* Hindu gods (according to the earliest text, anyways), is the god of thunder and lightning.
* Hindu gods and demons are sometimes portrayed and/or described this way. Most commonly, the deity is portrayed with one body and many arms which are holding symbols or making significant gestures. Sometimes though, this can extend to multiple heads, or even multiple entire bodies. The reason for doing it is the same no matter which style is chosen: to represent the idea that the deity includes multiple aspects (which may have their own names and often be represented separately).
* Hinduism by saying that non-violence isn't part of Hinduism at all, and other groups engaged in the destruction of the Babri Masjid. Such groups often complain about how their temples were destroyed by Muslim invaders while forgetting that Hindu kings destroyed Buddhist and Jain stupas and temples, and indeed built their temples on top of those as well.
* Hinduism has four different ages called Yugas that cycle continuously; namely; Satya, Treta, Dwapara and Kali. The amount of virtue or vice among humans depends on the age. Currently, we are living in Kali Yuga, the worst age where vice reigns supreme.
* Hinduism. This is a notable trait of several deities and tutelary spirits, often triggered in a bout of wrath against evildoers.
* Hinduism, this trope is sometimes performed through the use of avatars. Most famously, Vishnu occasionally manifests on earth to communicate to mortals in human form. In the Bhagavad-Gita, Vishnu speaks to prince Arjuna through his human avatar Lord Krishna. At one point, Arjuna asks if he can be allowed to see Krishna's true eternal divine form and the avatar agrees. He does first have to grant Arjura a divine sense however, since human eyes cannot see or comprehend the universal form of God.
* Hinduism which has far less in common with it than say, Christianity has with Judaism.
* Hinduism who severed her own head with her own sword just to feed her two attendants with her blood. Now that's hardcore.
* Hindu myth goes that Parvati performed tapasya (meditated) in the wilderness for years so she could earn the right to ask Shiva for a boon. When her tapasya is fulfilled, Shiva approaches Parvati in the guise of an elderly human being and asks what she's praying for. She tells him, and Shiva laughs and says it's a stupid thing. Parvati furiously starts to upbraid him, at which point Shiva reveals his true identity and congratulates her.
* Hindu Mythology and Buddhist myth: all the males are ugly and all the females are beautiful. Both are very violent.
* Hindu Mythology and mount of Vishnu, is so large its wings can stop the spin of heaven.
* Hindu Mythology are said to be distinguishable from humans because they do not blink or sweat, the flowers on their garlands do not wither, and they hover slightly off the ground.
* Hindu Mythology deity Yama was the first mortal human being. His destructive abilities so impressed the gods that they made him one of them.

* Hindu Mythology. Durga in warrior mode could not defeat a demon who spawned new demons from each drop of blood that hit the ground, so she became Kali, who drank each drop before it could hit the ground, then killing the demon. But theeeen she went on a rampage that only stopped when she injured her husband, the shock turning her back to the gentle Parvati.
* Hindu Mythology had passed on Earth, and all the suitors that Kakudmi had considered as suitable son-in-laws were long dead and forgotten. Kakudmi and Revati experienced no ill effects upon returning to Earth.
* Hindu Mythology has Shakti/Devi represents Power that the various gods possess. Shakti is always shown as feminine. There are several stories that feature one or more Gods channeling their energy to create a more powerful female god. See creation myths around Kali and Durga.
* Hindu Mythology: Indra and Kartikkeya are almost always this. Shiva, Durga; Krishna on occasion.
* Hindu Mythology is ripe with several minor deities that represent concepts, Agni for Fire, Pawan for air. Probably, these were the first deities that the Hindus prayed to, and their myths got merged with other Gods as they emerged. Agni is particular holds a special status because of the use of fire in sacrifices. Agni is considered to be responsible for bringing sacrifices from the physical plane to the astral plane, and hence is invoked many times in rituals.
* Hindu Mythology retelling of a nuclear war. There is no archeological evidence of this so far, though, but it hasn't stopped some from claiming all these things really existed then.
* Hindu Mythology started off as the supreme god, lord of heaven, and ultimate warrior. He rose to power by saving the world from an endless drought through slaying the demon snake Vrtra after breaking through the demons 99 fortresses with his Vajra or thunderbolt. Nowadays it's hard to find a story where he does not lose his throne, is completely ineffective in battle, or in some way humiliated. Even his one claim to fame has been retold with either Vishnu having to save him or practically handing him his victory.
* Hindu Mythology symbolisms. Like creation, maintenance destruction; past, present, or future; etc.
* Hindu Mythology, the demon Raktabij could birth a new form from every drop of blood. Kali solved this by having the demons strangled. An alternative version is she cut off his head, then drank all the blood that flowed out.
* Hindu Mythology: The goddess Kali is often represented wearing a necklace of skulls and bones.
* Hindu Mythology, there were several lengthy ages before the current age, the Kali Yuga: the Satya Yuga, the Treta Yuga, and the Dvapara Yuga, each one being shorter than the previous era. Humanity begun in the Satya Yuga as being very devout and righteous under the rule of the gods, before declining in subsequent ages, and then starting over at the distant end of the Kali Yuga. Among the technology used during the previous ages included the vimana, a flying palace or chariot used by powerful beings such as Ravana.
* Hindu Mythology, the story of Krishna begins with his uncle Kamsa, the king of the Mathura kingdom, being told a prophecy that predicted his death at the hands of his sister Devaki's child. Out of fear, he imprisons Devaki, planning to kill all of her children at birth. Eventually, her eighth child Krishna is born and is smuggled out to be raised by foster parents in the village of Gokula. Years later, Kamsa learns of his survival and sends demons to kill him. The demons are defeated by Krishna, who as a young man returns to Mathura to overthrow his uncle, resulting in Kamsa's death at the hands of his nephew Krishna. It was due to Kamsa's attempts to prevent the prophecy that led to it coming true.
* Hindu Mythology. They would first request immortality from Brahma who would deny it since he is himself not immortal. So the Asuras would ask to be killed in the most improbable/impossible situation. Naturally the gods (usually Vishnu) would find loopholes in the boon and generate the situation where the Asura would be killed. Some of these situations were:
* Hindu Mythology, this trope is the reason Daksha didn't understand why his

daughter wanted to marry Shiva, the god of the dead. Turns out Shiva's actually a pretty nice guy, in the sense that death is just natural and a necessary part of the karmic system.
* Hindu Mythology to Eros. Other is Lakshmi, who's also associate with fortune, wealth and wisdom.
* Hindu Mythology to seduce and kill Shiva with a toothed vagina in order to avenge Andhaka, but is also slain.
* Hindu Mythology was feared for taking offense at the slightest perceived disrespect even if none was intended or was done with good reason and using his powers to curse the unfortunate victim. People would call upon any divine favors they had to make him happy or get rid of him as soon as possible.
* Hindu Mythology, who is the combined form of the god Shiva and his wife Parvati.
* Hindu Mythology with one, he was not pleased (though he later recognized that Kama had done nothing wrong, and apologized).
* Hindu Mythology, Yamraj is the god of death/hell. He has two dogs with four eyes and wide nostrils guarding the road to his abode. They are said to wander about among people as his messengers.
* Hindu pantheon names, with other lesser deities having correspondingly fewer epithets. Reciting all of these names — particularly those of Vishnu — is a religious ritual.
* Hindu were composed in more-or-less their present form during the centuries before about 1000 CE, although their origins and some portions of the texts go back to at least 300 BCE.
* Hindu without any protest, always folding at whatever she is ordered. Eventually though, it becomes so much she begs her divine mother, the Earth, to take her home, and is granted this.
* Hinges is a webcomic where the whole premise is about living toys that have created their own society entirely without humans.
* Hing Hon EK-001, can sound like they're dying if they're low on batteries, too.
* Hinjo also displays awareness of this trope in the Battle of Azure City, telling the Order to make a beeline for Xykon and take him out, or at the very least keep him distracted. "A sorcerer that powerful doesn't engage enemies, he alters the course of entire battlefields."
* Hinjo gets the Aesop - delivered using this exact phrase. His city has fallen, and he'd rather stand and go down fighting, but, as the leader of the city, he could better serve his people by surviving and retaking the city later.
* Hinjo, he even has to be talked into any sort of retreat, no matter how strategically useful.
* Hinjo offers a 5 year reduction of the sentence of any prisoner of 5th level or higher unless they are guilty of a capital crime if they help defend Azure City.
* Hinny: Their opposite, a female donkey and a male horse. They're also noticably harder to breed and are considered "hit or miss", and are smaller than mules due to their smaller mothers
* Hinoka is a total cutie on the inside when it's revealed she was a crybaby as a child when the avatar was kidnapped by King Garon, she's also very idealistic and is one of the few characters to not be that angry about your betrayal should the player choose to side with Nohr. Not to mention she is a down to earth nature lover as shown by her coddling her pegasus and especially in some support conversations when she opens up and reveals she's not as mentally tough as nails as she lets on.
* Hinomaru Zumou, however, lay off and even be a bit friendly towards you if you put up a fight against him.

* Hip-Hip and Hurra ends with a large pie and cake fight between all of the characters.
* Hip-Hip and Hurra. Even though she's more insane than stupid, she still has plenty of ditziness in her.
* Hip-Hip and Hurra has plenty of jokes based upon stereotypes of various animals. Some are however averted.
* Hip-Hip and Hurra. It goes so far that you could argue that each of the characters represents a different type of stupidity. Heck, some episodes in the second season almost feel like a race between the characters, to see which one is the biggest idiot of them all.
* Hip-Hip and Hurra loves this trope, in the main protagonists' case anyway. Hip-Hip is a Hippopotamus and his love intrest is "neck taller" Giraffe, while Hura is an weasel but his girlfriend is a three times bigger Kangaroo.
* Hip-Hip and Hurra. Not only they are bumbling in general but they usually solve cases centered around some of the most basic of natural phenomenon’s yet they

are still totally puzzled by them.
* Hip-Hop always the case. Doesn't help that core hip-hop/Rap fans kinda share the same cynical opinion about modern Rap/Hip-Hop.
* Hip hop dance crew Jabbawockeez wear creepy, blank masks to give the illusion that they are a bunch of puppets moving to the music.
* Hip-Hop DJs; while still prominent on tours and the mix-tape circuit they have all but disappeared from mainstream media. In fact a cynic could say the same thing about all of the other "pillars of hip-hop".
* Hip-Hop dominated the earlier to middle parts of the decade, though crunk and snap would eventually wear out their welcome by the time the '10s rolled around.
* Hip Hop Harry) things like how to fill up a bathtub or why its not a good idea to feed ice cream and hot dogs to a pet gerbil. The program goes out of its way to make viewer wonder how on earth he manages to cross streets on the way home.
* Hip-hop in general, with several songs consisting of little more than drums and rap.

* Hip-Hop's "Rapper's Delight" (1979) as the first mainstream rap hit.
* Hip-Hop stars who came from rough neighbourhoods/single-parent homes: first thing they do after making it big is to buy a house for their mothers.
* Hip-Hop videos that it is sometimes called the "shiny suit era". Music video director Hype Williams and stylist June Ambrose were especially influential here, with the musicians in their videos wearing shiny, brightly-colored leather suits designed to evoke a futuristic vision of men's high fashion.
* Hip-Hop" was their highest charting single and only Top 10 hit. However, they had two other Top 40 hits. Most would guess from a wide variety of songs such as "It's Like That", "Sucker MCs", "Rock Box", "King of Rock", "My Adidas", "Christmas in Hollis", or "It's Tricky". All are good guesses, but many would be surprised to learn that only the lattermost song charted on the Hot 100, fizzling out at #57. The other two Top 40 hits were the long-forgotten "You Be Illin'" (the follow-up to "Walk This Way", but has since been overshadowed by the much more enduring "It's Tricky") and "Down with the King" (released in 1993, well after their peak in overall popularity). On the other hand, a strange example in that overseas their biggest hit by far wasn't "Walk This Way", but a dance remix of "It's Like That" in 1997, which topped numerous charts worldwide but was mostly unnoticed back home.
* Hip-Hop were heavily criticized by so-called music experts. It was bashed in the 70s and 80s as not being real music and just a rebellious childhood fad that would soon pass, since there were other things that went with the music, like graffiti, break dancing, etc. Then during the 90s and 2000s, despite the music growing in popularity, it was considered by many critics to be dangerous to society and there were even attempts during the 90s from politicians to get the music banned from the States. Nowadays, in the 2010s, it still has a number of critics, yet Hip Hop has been ranked the most popular music genre in the world in terms of physical and downloadable sales.

* "Hippocratic Oath" a Jem'Hadar commander discovers that he has lost his genetic addiction to Ketracel White which his race has been bred to have in order to make them loyal to the Founders. He takes his platoon to an empty planet because he thinks the plants there have cured him, and then destroys both his ship and most of their supply of Ketracel White to get them off the stuff too. But it turns out he's the only one who is affected, and the rest of the crew develops withdrawal symptoms.
* Hippodrome may be most memorable for having your fighter wrestle the Hydra (which gives you its equivalent of "draw and quarter" as a special move).
* Hippogriff, and hippogriff characters were introduced to the show proper in season eight. (They clearly aren't what you get when a pony and a griffon love each other very much, though.)
* hippogriff as a joke on a line from the Roman poet Virgil which used "when griffins are mated with horses" as a synonym for "impossible" or "never". Although it never was truly "mythological" it is considered so today.
* hippogriff horses, not screw them). That hasn't stopped modern fantasy writers from including them in the roster of commonly-appearing mythical beasts.
* Hippolyta, Diana's mother was able to best Heracles through nothing but pure fighting skill and superior tactics. Really, any Amazon that isn't Diana, Donna or Cassie would qualify.
* Hippolyta (Lyta) Hall, the second Fury, who featured prominently in
* Hippolyta might be a millennia old queen but she's still joins in with Xander's antics, such as declaring that leaving a ship half-buried on their beach is ridiculous... because it doesn't have a mast and thus can't have a flag flapping in the wind. She also becomes near addicted to slushees.
* Hippolyta telling Diana the origin of the Amazons as a goodnight story
* Hippolyte spits his water with aspirin, right in Déborah's face, when surprised by the first return of Kevin in Season 2. She calls hims a "little spitting llama" afterward.
* Hippolytus, to the point of treating the latter with scorn. Aphrodite herself stated that she has no problem with Hippolytus preferring Artemis, but Hippolytus treating Aphrodite with scorn is a punishable offense.
* Hippomancy: Divination by observing the appearance, neighing and foot stamping behaviour of horses.
* Hippopotami. Their skin is so thick, that rifle bullets will literally bounce right off of them.
* Hippos are portrayed as docile and passive creatures, one is even shown letting young Tarzan ride on its snout. Anyone with even a faint familiarity with hippos knows that in Real Life
* Hippos are surprisingly aggressive, too. In Africa, they kill more humans than any animal except mosquitoes and other humans.
* Hippos are usually drawn with blunt canines and lacking the lower incisors, possibly due to being based on captive hippos which often have their teeth filed

down. Wild hippos have sharper and longer teeth, since they need to use them as weapons.
* Hippothoe, daughter of Mestor, was abducted by Poseidon, who took her to the Echinades Islands. She later gave birth to his son, Taphius.
* "hippy" blood, which turns the blood into floral graffiti and the gibs into mushrooms. The HD remake goes one step crazier with a "kids" option that transforms enemy gibs into the shapes of various assorted candies.
* Hippydrome Tiger (1968), where Cool Cat partakes in a cross-country road race in Paris, and his nemesis Colonel Rimfire and his mechanical elephant pursue him throughout the race.
* Hipsterdom and geekdom is discussed and played with in the comic, the main characters are vaguely nerdy guys and girls that enjoy their lives and defy stereotype of both Hipsters and Nerds (While they like video games, comics and anime, they also go to parties and have relationships which is considered un-geek by the media. They play in a indie band an have certain unusual interests but their tastes are genuine and honest instead of trying to look cool like hipsters do). The villains and antagonists in the other hand are trying too hard to be hip and appear as cool, Envy, for example, rejected her

* Hiro. He had an argument with Momoko shortly before her death, something that was apparently an all-too-common occurrence in their relationship. He was also the one who borrowed the keys from Rie to go to the bathroom, enabling him to open up the guest room where Momoko died. The latter piece of evidence means that he's the right choice of the four suspects (him, Runa, Kamen and Mika) Raiko comes up with after the questioning period... but then he winds up dead himself. While it's possible to accuse him of Momoko's murder, Raiko will conclude that if that happened, Kamen would have killed him for
* Hirohiko Araki art style, inspired by Greek form and the works of Paul Gauguin, and his heavy use of dynamic movement and intentionally inconsistent/outlandish color palettes.
* Hirohiko Araki himself also subscribes to this idea, hence why many parts of the manga feature in-depth explanations on various international cultures (up to and including Part 3 including a guide on how to barter for cheaply-priced kebab meals).
* Hirohiko Araki is widely considered the best-written and most engaging storyline in the entire franchise.
* Hirohiko Araki mentioned in an interview that he believes one of the reasons the first two parts of
* Hirohiko Araki's; while the basic elements of his design still remain, the facial build and proportions are so vastly different that he's almost unrecognizable in the latter image.
* Hirohiko Araki that the value of dollars discussed in the story are roughly equivalent to the modern dollars rather than 1890s dollars in order to convey the amounts to a modern reader more easily.
* Hirohiko Araki waiting for him to take the bait. He can't even escape through the hole he dug out in the back, fearing the guards installed some kind of guillotine in the wall, so he settles on watching it for decades.

* Hiro Mashima. Apparently, though, the names guessed up for the scanlations before Del Rey provided the actual translations are just cooler.
* Hiro Mashima, it's Pino, which he also said could very well change in the future.
* Hiromi's teammate Reika "Madame Butterfly" Ryuuzaki also counts as this.
* Hiromi Uehara: Japanese jazz pianist who originally studied classical piano before being exposed to jazz. Known for her great technical ability and musically eclectic yet cohesive compositions that seamlessly blend a wide variety of different genres.
* Hiromu Arakawa. Here are some examples of the details she puts into the work.
* Hiromu Arakawa series that takes place in contemporary Hokkaido and has no fantastic elements at all. According to Arakawa, this was intentional since she wanted to challenge herself by making a more realistic series.
* Hiromu Arakawa. She isn't very secretive about her gender otherwise, as she's referenced things like being pregnant in her blog several times.
* Hiromu Arakawa travel all over the place, it's still worth noting that they're from a small country town.
* Hiromu Arakawa, which eventually developed a completely different plot from the source material.
* Hiromu Arakawa, which has a two season anime and a live-action film.
* Hiromu Takahashi for the television title before returning to New Japan to regain the IWGP Junior Heavyweight belt.
* Hiromu Takahashi of New Japan Pro Wrestling introduced the world to a stuffed cat doll named Daryl. Daryl is incredibly over even though all he does is sit in Takahashi's corner. Bad Luck Fale "killed" Daryl during the G1 Climax tournament, but he came back as good as new and is still over.
* Hironobu Sakaguchi's reason for continually reprising the character of Cid was that he had a particular affection for middle-aged
* Hirooki Goto is a bigger fizzler than his friend. Despite receiving eight opportunities at the IWGP World Heavyweight Championship, Goto has lost all of them. Made more egregious in 2016. Goto failed in his eighth challenge for the World Championship and proceeded to finish second in
* "Hiros", "Distractions", "Company Man" and "Collision" are also episodes where no one gets killed (although the last named has Claire coming back to life).
* Hiroshi Fujioka takes the cake for allowing star Takeru Satoh to show off his singing, acting, and even break-dancing skills. In fact, odds are Ryutaros' penchant for breakdancing was created entirely to allow Satoh more opportunities to show off.
* Hiroshi Fukuda, aka Trans*Am Hiroshi of DDT and BASARA. He doesn't do an accent or speak English but is said to be American, often even wearing an American flag bodysuit. For some reason he's also lightly inspired by
* Hiroshi Kirisawa, the leader of the Special Investigations 2nd Unit in
* Hiroshima Mon Amour, in which a French actress has an affair with a Japanese businessman.
* Hiroshima Mon Amour. No resolution as to whether she will stay in Japan with him or go home.

* Hiroshima Mon Amour takes place over 36 hours, as the French actress and her Japanese lover spend time together right before her scheduled departure home.
* Hiroshima Mon Amour: The memorable opening sequence features the characters in bed, in close embrace, while they talk about the Hiroshima bombing of 1945. The film cuts back and forth between the lovers canoodling and newsreel footage, some quite graphic, of the damage and casualties from the bombing.
* Hiroshi mini-Hiroshi and creates a homunculus of her own. The two of them go off into the wilderness to make a life for themselves.
* Hiroshi Tanahashi partner, as he would rant about while on the shelf with an injury.
* Hiroshi Tanahashi: Rolling Senton, Dragon Screw, Sling Blade, Texas Cloverleaf, then the High Fly Flow.
* Hiro's superhero name, Excelsior, was originally used by Fred's father Stan back in the day. While it was assigned to Hiro by the media along with the rest of the team, Stan says he has no problem with it.
* Hiro. Suffice it to say that he ends up regretting it, and although he eventually gets over it, he doesn't actually confess his love to her for a long time.

* Hiroya Oku is a seinen manga artist best known for his sci-fi horror works such as
* Hiroyo Matsumoto. She makes the threat of "destroying" someone sound so unlike a threat at all until she actually goes through with it.
* Hiroyuki Imaishi. Known for his colorful, surreal, ultra-stylized visuals, hyper-kinetic animation style, and wacky sense of humor.
* Hirsch also appears in a cable car during the climax of "Roadside Attraction".
* Hiruko the Goblin, the former wasn't released to the states until 2002, and was left out of a Blu-ray retrospective of the director's films.
* Hiruma also shows obvious signs of this. He's definitely a genius, whether it's about American Football or anything else, and apparently, that gives him the right to carry around firearms and abuse everyone. The only way he knows off to show people he cares is by kicking them. HIS strong point? "My strong point is that I win!"
* Hiruma has shades of this, as does Megu, the manager of the Chameleons.
* Hiruma himself gives everyone a caring, sweet and kind Fucking Nickname.
* Hiruma's is a subversion. It looks like typical shonen hair, but in his flashback, it's revealed he has perfectly normal black hair. The spiky blond do is part of his image. The same with Kotaro, whose constantly bushing his hair to make it stay spiky.
* Hiruma yells for a huddle during the middle of a play for Taki, Monta, and Sena. There, he passes the ball to one of them, leaving the White Knights too confused. The enemy quarterback realizes who has the ball, but a moment too late - Sena scores the winning touchdown.
* Hiruma Youichi, who first learned poker from American soldiers stationed in Japan. After losing the first hand, he figured out the rules without anyone telling him and proceeded to gamble his way to taking all of the soliders' money. By high school, he can count cards in blackjack and earn a ridiculous profit. Has managed to figure out a way to get blackmail material on nearly everyone in the country, and many outside the country.

* Hiruzen Sarutobi, the Third Hokage, had become this by the end of his life. While undeniably still strong enough to hold the title of Hokage, Sarutobi's incredible raw power had degraded over time, as age sapped his stamina and chakra capacity. In his prime, Sarutobi was capable of using
* Hiryu. Heroic and honorable this might have been, it was still foolish as Yamaguchi was Japan's best carrier admiral and his loss was a big blow.
* Hiryu Shoten Ha) the opponent recognized the steps immediately and thwarted it; the second not only recognized it, but reversed it and used it against Ranma; the third can fly without restrictions and is therefore immune to it. There's also the limitation that it can only be fired straight up in the air, making it very awkward to set up and use even before these other weaknesses come into play. Ranma had to juggle weaknesses and variations on the technique to make it useful against these foes.
* Hiryuu Shouten Ha special technique. Ranma thanks his rival for all his help learning the technique, then wishes him a happy afterlife. Cue Ryouga reaching up to strangle him in annoyance.
* Hiryuu Shouten Ha story arc never gets around to disclosing the legendary technique's final step to Ranma. However, he figures it out all on his own just as Ryouga's fist is about to turn him into paste on the side of the mountain.
* His 11th, inspired by the events of the 1905 massacre in the Palace Square of St. Petersburg, ends with an angry march symbolizing the people's anger and resolve in response to the end. The movement is titled "The Alarm" and ends in a furry with terrifyingly loud bells ringing over the orchestra.
* His 14th symphony, a very strange work for a small collection of strings, percussion, and two voices — and is a setting of a collection of 11 poems about death — uses bells at a handful of very disturbing climaxes. The silence that they fade into is awfully uncomfortable. Needless to say, Shostakovich was not a happy man towards the end of his life, this mainly being a response to Mussorgsky's Songs and Dances of Death.
* His 2000 hit "How Do You Like Me Now?!" is his biggest hit on the country charts. At the time, it was far more cocky and in-your-face than he had ever been before, but instead of letting it be a black-sheep hit, he began changing his style to match. Similarly, the post-9/11 "Courtesy of the Red, White, and Blue (The Angry American)" was a jarring change for him as he had never done a patriotic song before, but its success led to him doing several more.
* His 2014 show, "Come Heckle Christ", invited the audience to do exactly that.
* His 2015 Melbourne International Comedy Festival Show, "Joshua Ladgrove Talks at You for 52 Minutes in Exchange for Some of Your Money".
* his 90's series is able to resuscitate Roxy using CPR after her heart stopped.
* his a big head!") It backfires; the writers think he's crazy and, when they make a break for it, leave him there.
* His ability is eventually explained: he instinctively teleports the portion of his body that would be hit by an attack into an alternate dimension to keep it safe.
* his absorption of fighters' ki to power himself via stretching his arms out in front of an attack.
* His action sequence theme song follows the tune of his humming. The next scene starts with Castle (off-screen) humming the tune again.
* His actions towards the Baudelaires throughout the course of the rest of the book and the rest of the series plays out in a very similar and cruel fashion. Oddly enough, he never physically strikes any of them again.
* His adopted daughter Harpy is no less complicated. She is a sweet and caring young woman, with a soft spot for the children her adopted father employs. Many of them come to see her as a big sister and she genuinely mourns every loss close to

her. Ultimately, she only wishes for a normal life, which sadly gets more and more out of reach for her. She is also incredibly vengeful, willing to go to great lengths to avenge any injustice she and the people she loves suffer. Her temper can also only be described as volatile.
* his adopted sister Debra walks in on him killing season 6's Big Bad.
* his adoptive father, the safer they will be from the possibility of attack.
* his affair with his sister Cersei. "The things I do for love," indeed.
* His age isn't stated, but is generally assumed to be between 9 and 16 in
* Hisagi is the sole living person who knows the truth about Yumichika's abilities. Specifically, Yumichika's shikai is actually a kido-type that drains spiritual pressure, something that he keeps secret so as to fit in with the combat-oriented eleventh division.
* His alien companion nearly gives in, but takes heart from Retief's example.
* his (alien) mother, who gave up her physical form so that he could be born.
* His alleged mistreatment of racial minorities, particularly Latinos, has also been a subject of controversy. This has resulted in investigations by the federal government and has resulted in his office being forbidden to detain suspected illegal immigrants.
* His alternate universe teenage counterpart Kid Briton introduced in
* Hisana died 50 years before the main storyline began but flashbacks reveal that she obtained a deathbed promise from her husband Byakuya to protect her abandoned sister Rukia at any cost. The Soul Society arc would never have unfolded the way it did without Byakuya's attempt to juggle two conflicting vows, one to his dead wife and the other to his dead parents.
* His ancestor/clone/descendant/alternate-universe counterpart Cronus also looks rather like a hipster but he's just pretending to be a human
* His and Her Circumstances, Arima confesses his love in the first volume, and Miyazawa struggles to confess hers later on. Also, being called out to the cherry trees behind the school for a love confession causes Arima to realize his love for Miyazawa.
* His and Her Circumstances Aya Sawada's writing skill was discovered when she wrote a story that had nothing to do with the assigned report.
* His and Her Circumstances, but their own weaknesses and selfishness, and the focus is given more to the emotional maturing of the characters rather than the relationship itself.
* His and Her Circumstances did this frequently, where extras were often drawn as white silhouettes.
* His and Her Circumstances feelings about male lead Arima. At the end of the series, he hooks up with Arima's daughter.
* His and Her Circumstances fights with these feelings in regards to his girlfriend Yukino.
* His and Her Circumstances from Kazuma's mom hitting him for not warning her that Tsubasa was coming over.
* His and Her Circumstances has an episode near the end which focuses on Yukino's two little sisters, Tsukino and Kano, that takes a delightful turn away from the romantic melodrama toward a very light hearted comedy.
* His and Her Circumstances. Hinting that the official couple will break up sooner or later, and that it's OK, is a "happy ending" for Hideki Anno. Thankfully averted in the manga.
* His and Her Circumstances his fatness so much that she tries to fatten his slimmer older self back up.
* His and Her Circumstances. In both the original and the dub, the voice actresses for the sisters would do the "Next Episode" previews in live action, with Motor Mouth that necessitates subtitles.
* His and Her Circumstances in the final episode was to read the manga.
* His and Her Circumstances in which not only is the stalker in a committed relationship with his crush, but he is also portrayed as so sympathetic that you just want to save him from himself.
* His and Her Circumstances, like the latter two of the aforementioned anime), sets

its "To Be Continued" in red, on a white background.
* His and Her Circumstances, Miyazawa and Arima are always near the top of the school's exam rankings, and Arima wins nationally at kendo. For Miyazawa, only other characters praise her sports ability, though.
* His and Her Circumstances. One arc deals with what happens when Yukino's turns against her.
* His and Her Circumstances, since Tsuda felt that there was too much emphasis on the comedy for her liking.
* His and Her Circumstances: Soichiro Arima had a mother who beat him badly on an almost daily basis and if she wasn't, it was because she left him alone for days on end as he slowly starved, locked in a house with barely any food.
* His and Her Circumstances, the dog that gets around by rolling around.
* His and Her Circumstances, Tsubaki pulls this on Takefumi when she tells him that she only hangs out with him a teacher tell her to do it. That doesn't stop them from him falling for her for real.
* His and Her Circumstances, which was more acceptable for the mangaka.
* His and Her Circumstances, who is in love with him. He tries to back off years later, but she will have nothing of it.
* His and Her Circumstances: Yukino and Arima's eldest daughter, Sakura, falls for Arima's best friend Asaba who has mentioned before that he would marry either, if given the choice.
* His and Her Circumstances Yukino is seen hiding a comedy book under a serious cover. Arima scolds her for putting up a front.
* His and Her Circumstances, Yukino's parents were childhood friends who bumped into each other on her mother's first day in middle school.
* His and Hers: Spouses have matching items labeled as "his" or "hers".
* his and Kryptonians in general have the ability to speed themselves up so fast than everybody and everything else seem to stand still.

* Hisao watches Rin when she sleeps on her desk. Then Rin kinda cries in her sleep...
* Hisao will keep his word and show up to events. Rin tends to lose since she's the one betting that he won't show up.
* His appearance also makes the occasions when he actually acts like a normal teenager all the more hilarious, such as when he challenges Sena...to a pillow fight.
* His approval rating literally falls to 0 once Usopp defeats Sugar and everyone connects the missing pieces, and found out Doflamingo was the one who destroyed the nation in the first place.
* His archenemy Vlad Plasmius is a villanious example, his civilian identity is rich and powerful businessman Vlad Masters, he was already rich, but became even richer using his ghost powers to take over other companies, invest in the stock market and commit burglaries, he uses both of his identities for his evil plans, at one point, he runs for Mayor of Amity Park, and wins by possessing the voters.
* His archnemesis, Jarvan IV, is the single highest-ranked military officer in Demacia, despite being fairly young. One would think it's because he's the crown prince, but no, J4 earned his rank.
* His archrival, Yang Wen-Li, is a more subdued example. He did made a flag rank at 28 (a Rear Admiral, to be precise), which is ridiculously young, but everyone around very much treated it as something exceptional. It was also kind of justified by Yang being a bona-fide military genius who saved the Alliance's collective ass more than once, him having friends
* Hisashi Morooka, a reoccurring commentator throughout the series, is voiced by Taihei Katou, a real life figure skating commentator and announcer for TV Asahi.
* His assaults on both John Cena's father and the McMahon family should have made him the biggest heel in the company. Instead, fans tended to cheer him more.
* His assessment of the Babarians proves sound; Gowasu brought him there to demonstrate that mortals weren't inherently evil and capable of maturation, yet even after a thousand years, there was no moral growth to observe in the species.
* His assistant Dr. Kuroe also demonstrates this, though to a lesser degree. Like the professor, he isn't satisfied with his accomplishments and desires, which leads to him going along with his plan despite some reservations. This leads to some internal conflict as the expedition continues...
* his attempted suicide and Peko's death, have events that are more tailored to the bonus mode.
* His attempts to prove Midoriya unworthy did more harm than good, as he was able to avert a terrible future Nighteye thought impossible. Though he admitted he was wrong on his death bed, his first impression's damage was already done and Midoriya thought it best to give his power to Togata, who bluntly refused as he doesn't want to use another person's Quirk, something Nighteye never took into consideration. However, even if things did work as he wanted them to, later chapters reveal anyone who already has a Quirk upon receiving One For All would suffer from Rapid Aging
* his attempt to brainwash Tony fails. Tony saves himself by realizing what's about to happen and quickly calling for JARVIS to send the Mark VII armor (which can assemble itself around him even while he's plummeting towards the ground, homing in on the bracelets he put on earlier) through the window after him.
* his attempt to destroy the Grail causes far more destruction and death

On the other hand, he does have some measure of understanding how his peers work and outside his interests in scamming, is the most normal of the three (having a fair bit in common with Kevin even.)
* His "Bung Lu Soo" character (aka "The Rooster"), who has evolved from his "generic Asian guy accent" bit. He's constantly trying to join old 70s bands and goes on weird tangents. When he's not trying to join musical acts, he's the host at PF Chang's, not allowing Adam to sit down despite his reservation.
* his bushido traditions and code and seems entirely unaware of how much of his military success relies on his son, Prince Tatsu, who is more supportive of the Empire's super-high-tech R&D division. The Emperor also gravely underestimates how treacherous the Allies and Soviets can be. His biggest failure seems to be his inability to realize that breaking the military strength of the Allies and Soviets would be far more effective than trying to break their spirit by demolishing statues and cultural sites. However, unusually, Yoshiro realizes how unsuited his methods are and eventually reconciles with Tatsu, allowing the younger man to lead

the Empire to victory.

* His dad's best - as in funniest - lie was likely the time he told Calvin that when you become a father, you get a book that explains everything in the world:

* his daemonic bodyguard, who has murdered millions can't bear to look at it.
* His damage wasn't limited to the intelligence community. Hanssen is thought to have leaked information on the FBI's manhunt for Osama bin Laden to Russian handlers. This information ended up on the black market, and eventually into the hands of bin Laden himself. This leak is thought to have helped facilitate 9/11.
* his dancestor Mituna, the Heir of Doom. The creator has intentionally has left it ambiguous on what the aspect means in this though, so it's anyone's guess which meaning they mean.
* His Dark Materials. Ahem, let's rephrase that: Polar Bears that build their armor from meteorite iron. As their king put it, "War is the sea I swim in and the air I breathe."
* His Dark Materials and kills the fanatical Father Gomez, thereby preventing him from killing the children about to save all the worlds in existence.
* His Dark Materials and "return to the universe". This makes it more like artificial nonexistence as an alternative to a rather unpleasant natural afterlife.
* His Dark Materials. And under one interpretation, God is really the Dust, while the "God" that dies is an impostor.
* His Dark Materials, Arctic foxes can speak some small amounts of English, as can the "armored Bears".
* His Dark Materials are both imbued with an uncanny ability to persuade people over to their side, to command and convince them to obey. Their daughter, Lyra, is nothing if not more so, as almost everyone who meets her takes an immediate liking to her and wants to help her.
* His Dark Materials are this to some extent, what with having their soul (daemon) appear in the shape of an animal at all times. This is most prevalent with Mrs. Coulter, who snarls and fights like her Golden Monkey, and Lord Asriel, who has a quiet intensity like his snow leopard, Stelmaria.
* His Dark Materials, as in Lyra's world the prejudice against witches doesn't seem to go beyond considering them evil (in fact, some witches did join the church), though in the second book it's implied that, in other worlds, witches are in fact burned.
* His Dark Materials. A slight variation, in that it is possible to separate a daemon from their human with specialist equipment. In this case, both survive, but both are reduced to shadows of their former selves, as the daemon represents the human's soul. Separating them by any other means is fatal to both.
* His Dark Materials, as only a duel between armored polar bears can be.
* His Dark Materials as there is such a different past in Lyra's world, but they still both speak the same basic English.
* His Dark Materials, as the victim's daemon is reputedly able to prolong life for a time by manually pumping the protruding lungs of its companion.
* His Dark Materials a witch does this, marking an arrow to use when she takes her revenge on Mrs Coulter. She never gets to use it, but her breaking the arrow is taken as a sign she is POSITIVE the target is dead.
* His Dark Materials because doing so is the only way to save the multiverse.
* His Dark Materials. Because, you know, it's impossible to just tell them where it is. Plus, couldn't the knife kill Spectres? So all Will would have to do is kill the Spectre he makes when he opens a portal and close it behind him.
* His Dark Materials", Cittàgazze appears this way to both Lyra and Will. They later come upon other a few children who are squatting there, who reveal the adults fled from the Spectres, monsters who apparently eat souls and are invisible to and uninterested in children. The city actually has many of them, Lyra and Will just can't see them.
* His Dark Materials, "Daimon" meaning minor immortal or spirit. It is the eventual root of the Christian concept of "Demon", but indirectly.
* His Dark Materials) Dust's most interesting quality, though, is that it attracts itself to sentient beings - anything made by humans to aid in thought and observation will attract Dust, such as a ruler, and Dust also attracts itself to people - adults especially, and the wiser the better. It has been implied that Dust is essentially meant to be the exchange particle (boson) for consciousness or

conscious thought.
* His Dark Materials features the witches, who live for roughly a thousand years, and so are continually having their lovers, husbands, and mortal sons dying on them (their daughters are always witches). One of them describes this as being very painful, and suggests that they eventually die when they can't take losing anyone else.
* His Dark Materials good at that) because most people are uncomfortable with facing their mortality.
* His Dark Materials, has committed at least twenty murders, and whose idea of fun is killing his victims slowly by ripping their daemons away from them over a long period of time. Daemons in this series being the embodiment of a person's soul, with the act of touching another person's daemon being described as the most disturbing and painful violation imaginable. McConville likens the sensation to reaching into a person's chest and slowly ripping out their heart.
* His Dark Materials has items that allow for interdimensional travel.
* His Dark Materials has the Gallivespians, who are vicious six-inch assassins who ride dragonflies. They make up for their relative lack of strength by having venomous spurs on their heels, which is potent enough to kill a full-grown human in minutes (though they have to "recharge" their poison reserves after stinging someone: a second sting in rapid succession will only make their second victim groggy).
* His Dark Materials has the witches. Since only females born of the witches are also witches, this is justified. In these exclusively female clans, they're deadly shots with bow and arrow, are good with knives, are quick to swear vengeance; and they attach themselves as a bodyguard to the protagonists.
* His Dark Materials has the witches. They are always female, and mate with human men. When the children are boys, they are ordinary humans, but when they are girls, they become witches.
* His Dark Materials have a single two-fingered trunk. Since even simple tasks, like tying a knot, require more than one individual, it strengthens the community's bond. They also have legs adapted to use a kind of giant disk-shaped seedpod as wheels.
* His Dark Materials have a very passionate but not really sexual relationship going on, probably relative to the fact they don't have proper physical forms.
* His Dark Materials have daemons who are the same gender as they are (most people have daemons of opposite gender and the narrative says so). When his questioner asked if it meant that those characters were gay, he basically said "sure, why not" — he had never actually come up with a reason for it.
* His Dark Materials imagery (appropriately enough given all the passenger airships, which belong more in the 1930s than the Victorian age), creating something of a Dieselpunk feel overall.
* His Dark Materials. In the context of the books, daemons/genies are your soul walking around as a sentient, talking animal, whose species reflects your personality.
* His Dark Materials is popular because he's a cool polar bear character.
* His Dark Materials is probably one of the most friendly and laidback characters, but can bring down whole teams of men with a rifle when the situation calls for it.
* His Dark Materials, it is discussed between Lyra and Will, who are both from Oxford, just in different parallel universes. There are slight differences in certain words, though.
* His Dark Materials it's mentioned that even in battle, fighters do not attack or touch each others' daemons. Which makes it all the more shocking (and physically disgusting for her) when the scientists manhandle Lyra's.
* His Dark Materials. Later, when the rebel angels gave sentience to mankind and other races, all he had to do was to send his agents and see the awestruck people convert to his cause.
* His Dark Materials) lead her to change her tune completely, but she still clings to the inner core of motivation that made him an absolute badass in his world.
* His Dark Materials, Lee Scoresby is absent from the later part of the story, and

as such he doesn't die, and Lyra and Will do not meet him in the world of the dead.
* His Dark Materials Lord Roke into this. In the books, Lord Roke (like all his kind) was a completely serious character; his tiny size was played for drama in terms of the dangers to him, but also the danger his venomous stingers posed to humans, and was a proud, competent and courageous man afforded all the respect that would be given to a human of similar personality and skills. In the play he becomes a comedic buffoon who exhausts himself at an inconvenient time running across a room at a snail's pace and is implied to be something of a peeping tom.
* His Dark Materials lost daemon's name into his mouth, treating him with the same respect that is traditionally given to Scholars at Jordan College. The body is then cremated by the gyptians.
* His Dark Materials, many divining methods are actually just "talking to Dust", the sentient matter forming most of the universe.
* His Dark Materials, many divining methods are actually just "talking to Dust", the sentient matter forming most of the universe. Averted, however, in that most religions may actually be lies created by the Authority to control everything.
* His Dark Materials, Marissa Coulter saves Lyra from the machine that severs children from their daemons (souls) solely because Lyra is her daughter. Marisssa Coulter will gleefully watch any other child go through this procedure that ultimately results in the death of the child.
* His Dark Materials: Mrs. Coulter goes from warm and friendly, then to cold, and finally to outright abusive. Then it's revealed she is actually the head of the Gobblers and knew where Roger was the whole time.
* His Dark Materials of unleashing soul-eating beings of nothing whenever it's used.
* His Dark Materials on how bad all religion is. Add to that the implied sexual relationship between children and the fact the big battle takes place off-screen...
* His Dark Materials, people who live outside their own universe slowly sicken and die. Although it takes a decade or so.
* His Dark Materials Pullman has said that the dæmon is "the part of a human that leads us towards wisdom."
* His Dark Materials receives the subtle knife, a magic knife that can easily cut through any material. It can even cut windows into other worlds. After Will gets this weapon, he almost always fights with it.
* His Dark Materials reveals that this world doesn't even have a United States; that area is instead taken up by New France and New Denmark.
* His Dark Materials said something like, "I wasn't going to look and neither should anyone else." Pullman also has no answer as to why a few people in Lyra's world have daemons that are their own sex, or when exactly the daemon appears - during birth or after.
* His Dark Materials, Serafina Pekkala, the witch Queen, discusses the impossibility of equal relationships between men and witches due to the lifespan issue; witches live for many hundreds of years. Angels in His Dark Materials live even longer; at one point an explicit comparison is made that as human life is to witches', so are witch lifespans to angels'. Pullman also inverts the trope with the Gallivespians, tiny human-shaped people who reach maturity rapidly and die after living roughly ten years.
* His Dark Materials series features giant zeppelins as a mode of transport. Interestingly, they are handled much more realistically in the books than in the movie.
* His Dark Materials series have a psychic link with their person. Justified as they're really just physical manifestations of the soul.
* His Dark Materials series never calls it "Catholic" (because the Reformation never happened), but the Church both rules the world and uses magic.
* His Dark Materials, shaped like an animal, running around outside you.
* His Dark Materials. She is so good at this she earns the title "Lyra Silvertongue".
* His Dark Materials takes this to a ridiculous extreme — it's mentioned that someone who fell in would die of starvation long before they reached halfway, then

they'd keep falling as a ghost for all eternity.
* His Dark Materials: The General Oblation Board develops a procedure called intercision, which severs a person from their dæmon/soul and has a similar effect on the person as being lobotomized.
* His Dark Materials Then again, one is a murderer, and the other is 'only' a sometimes foul mouth brawler who prides herself in her ability to lie to anyone and approves of the other being a murderer. Most other children are likewise depicted similarly, so 'innocence' is a relative concept.
* His Dark Materials there's Adele Starminster, who's introduced towards the end of Season 1, Episode 2 as a potential ally of Lyra's, only to be unceremoniously murdered minutes later by Lord Boreal when he crushes her daemon (a butterfly) in his fist.
* His Dark Materials (the witches, the fact that Dust is conscious, the armoured polar bears, etc.)
* His Dark Materials. They are supposed to have an evil spirit coiled in their spring, twisting it tighter and never allowing them to stop.
* His Dark Materials. They breed with human men; their daughters are witches, their sons mere humans. A witch species that also has male witches is briefly mentioned, but they are from another universe and never actually show up.
* His Dark Materials Trilogy, as you might expect for a series being set in the Omniverse. We have a steampunk-esque alternate earth with Zeppelins, an ambiguously powered psychic-flying-spider-thing, angels (gay ones, no less), witches, gypsies, talking bears, cowboys, the harpies, gun-toting priests, shape-shifting 'daemons' (although definitely not of the satanic variety), ghostly 'spectres' roughly analogous to energy vampires, fairies, whatever the hell the Mulefa are, and God. And that's only what we see. Its implied in the briefly glimpsed culminating battle that there's an awful lot more out there.
* His Dark Materials trilogy is it considered taboo to touch the daemon (manifestation of a soul in animal form) of another human being. At the end of the trilogy Will and Lyra accidentally and then deliberately touch each other's daemons, and the subtext couldn't be more obvious. This serves to make the procedure of 'intercision' so much more horrifying.
* His Dark Materials trilogy live roughly a thousand years. They take human men for lovers and bear children; if the children are girls, they're witches and if boys, human and short-lived. Presumably, they don't have children especially often. One character suggests that a witch dies when her heart is so broken from watching her lovers and sons grow old and die that she can't go on.
* His Dark Materials trilogy shares the spotlight with Lyra when he's introduced in the second book.
* His Dark Materials trilogy, The Authority is merely the oldest of the angels.
* His Dark Materials, various witches claim that most of what Lyra does is destiny, but that doesn't mean it's meant to happen.
* His Dark Materials (which were very expensive at that time). He even managed to continue the experiments that got him banished in the first place by having materials and equipment smuggled in.
* His Dark Materials, who apparently marks its next wielder by cutting off the pinky and ring finger of the left hand.
* His Dark Materials who inhabit the Bridge To The Stars website style themselves Sraffies.
* His Dark Materials, Will Perry's first reaction to seeing his severed fingers on the ground is to note their resemblance to a bloody quotation mark and laugh.
* His Dark Materials, with a few powerful items allowing one to travel between them. There may be no limit to the number of separate worlds and universes.
* His Dark Materials would definitely qualify, being a blade sharp enough to slice through reality itself.
* His daughter, after whom the restaurant chain is named, basically replaced him as pitchman for a few years.
* His daughter Argella is not much different. Physically, she is not particularly strong, but ever since she became the crown princess, her father subjected her to a

rigorous training, to make sure that the future queen of the Stormlands is able to hold her own in any fight.
* His daughter Astrid Mordo, who tried to kill both her father and Strange.
* His daughter Kelly is a natural brunette, but usually dyes her hair in either pink, blonde, black, silver or most recently, purple.
* His daughter Lal, however, figures it out... which causes a system overload and leads to her shutting down, telling her father that she loves him. Data tells her that he wishes he could feel it too.
* his daughter Maggie. When she was targeted in a plot to kill him, despite only learning of her existence at most 96 hours beforehand, he turned the plot against the Red Court of Vampires and destroyed the entire court.
* his daughter, so naturally seeing her as a beautiful naked woman is a little off-putting.
* His daughter. When the King discovers Griffith has taken Charlotte’s virginity, he personally whips Griffith and has him tortured for a year, then he tries to rape Charlotte while she sleeps. Last time we see the King before he dies he’s still obsessed with his daughter and still loathes Griffith.
* His days off consist of his trying to convert people with a fellow Omnian, Smite-the-Unbeliever-with-Cunning-Arguments. Entire bars full of people duck under tables and turn off the lights until they're safely past.
* his dead friend Zack, whose personality and memories he partly absorbed, repressing his own due to guilt and shame after the resident Mad Scientist
* His death in order to protect Hinata and Naruto. Just like his father, it wasn't out of duty to the Main Branch, but out of love for his friends and family.
* His death is left ambiguous, though, as he sees Lorien once again before simply disappearing, implying he simply
* His death scream completes the sentence, which would have been "till someone loses an eye."
* his death. Turns out, he's somewhere in between: he's aligned with the heroes, but he's still a cruel bully.
* His debut single "Hicktown" is still one of his most famous songs, despite only reaching #10. Also, "My Kinda Party" only got to #2 because the
* His debut smash "What Was I Thinkin'" was followed later in 2003 by "My Last Name", which for nearly seven years remained his only single not to reach Top 10 on the country charts or enter the Hot 100 at all.
* his defeat by Masamune but it takes a punch from Takeda to provide instantaneous healing.
* His degrees on the wall include a Bachelors Degree in "Writing Good" and a Masters in Greek.
* his demise, as he rejects his father's protection at a moment when his life depended on it.
* his Denizen, because she has a computer program that can see into the future and knows that John survives well after the time of the fight. Naturally, John dies and creates an alternate, doomed timeline that Dave has to fix. Terezi is much more careful about this from then on.
* His desire for the power to stop Lilith is treated as bad only partly because of the way he goes about getting it.
* His desire to help a human village ended with him in a position to UTTERLY screw over a fae—
* his Deviantart account cast. He shows off some of the pictures in his narration as well, gushing about how sexy they all are.
* his Devil Fruit power, demonstrating it on Basil Hawkins in the Sabaody Archipelago arc; though Scratchmen Apoo managed to distract Kizaru before he could go in for the kill.
* his devil trigger, Jester. And it could also be a way of unleashing his inner goofball beneath that serious facade.
* His diary features a similar relationship with the Man in Room #3 down the hall, told entirely through the notes that he leaves outside the door and Bean sticks in the book. They decide to bury the hatchet (literally!) on New Years Eve.

* His dispatching a Crow Brother to the Winterfell crypts allowed the civilians inside to escape, as the wights were concentrated on killing it instead of them.
* His divine will, but either he or the narration gets distracted and loses track.)
* His doubt may have been because the bear in question was seemingly not a Devil Fruit user, just a bear who walks and talks like a person. The post-timeskip revealed he is part of a group of humanoid animal tribe known as the Minkmen (whose existence was hinted at when looking at the slave prices in Shabody.)
* his dreams of events in the past that he never saw, Frodo Baggins has at least one dream of the future while in the house of Tom Bombadil.
* his duel with Luffy in Water 7 and the Going Merry arriving at the Bridge of Hesitation.
* His duplicator returns in another story, where Calvin has added an "ethicator" to decide whether his clone should be good or evil. It ends up not helping.
* his Dying Declaration of Love and caused both curious bystanders who'd never seen the show and former fans who had stopped watching the show long ago to check out the show and its fandom to see what all the hubbub was about.
* His earlier storyline with the team captured by Anansi was also a commentary on
* His efforts at playing it cool in "Slumber Party Panic" are also very, very awkward and unconvincing.
* His eldest daughter Eva has some major issues with her older brother and treats Natsuhi poorly, not to mention they pretty much had a "competition" to see who'd first give birth to a child who could be appointed as successor. She also dislikes
* His eldest son, Krauss, is a failure as an investor and doesn't get along with his siblings for being a
* his elimination, Noah notes that being married to a lawyer (Emma) means he won't have to bother looking for a job. Owen is amused by this, and jokingly threatens to tell Emma.
* his' empire that would fall." As a matter of fact, if people got an unsatisfactory answer from the oracle in Delphi they could ask for another one, and Croesus as a favoured benefactor of Delphi easily could have done just that. (…or attacked a neighbour that wasn't an empire.)
* his endless mass of shadow tentacles, but they're all he really needs to be one of the most dangerous villains.
* His enemies also tend to be, shall we say, "strongly themed" in their choice of accessories, lairs, vehicles... For
* his enemy Makarov, who has the power to alter the timeline, altered things so that they share the same mother.
* His energy-sapped fanboys wear freaky full-faced masks too. NPCs comment on this, too, along the lines of: "What's with all those masked weirdoes in the ruins?"
* his entire operation is dedicated toward a white-hot rampage of revenge against the cartel that killed his best friend and humiliated him. His unprofessional need to gloat over his vengeance ultimately leads to his downfall.
* his episode reviews even have "Opinionated" tacked on to them) and that it is very likely that they might not agree with him on many things. Some fans just can't stand a dissenting opinion it seems.
* his epistle not to accuse God of being this by saying "I am being tempted by God", for he says God cannot be tempted by evil, nor does He tempt anyone.
* His equivalent (and character model) in the original British series was a Territorial Army soldier (think National Guard) who insisted on his status as Deputy Team Leader after David Brent and who stood on a largely non-existent authority.
* his eternal second in command. Thus he remains a Colonel into and through the New Jedi Order so that he can be Wedge's strategist. Granted, they work so well together that it seems like a waste to split them up.
* his ethnicity: “In other countries, there’s arrangement through parents for what we would refer to as consensual marriage.” The co-host reminded him that Velshi is Canadian.
* his evacuation ends with much of the population dead, his own troops turning into

what is effectively an occupying force to keep the survivors in line while subsisting off extremely limited resources, half of his troops turn on him when they decide it's gone too far, much of the population forms an insurgency against him because the troops have gotten so brutal they're worse than having no order at all, and he ends up killing himself after the weight of this new failure becomes too much to bear.
* His eventual death comes about when he blows up a crashing tank with improvised explosives rather than risk it crashing into a place it could inflict serious damage, hurling him out to freefall into the side of a building without functional armour.
* His evil-er knockoffs in the sequel, the HK-50s, does the same thing, with the addition of
* His evil form, on the other hand, is much like Cell. Claims to be looking for a challenge from a strong fighter, but upon getting overpowered immediately freaks out and becomes a sore loser. In his case "strong fighter" apparently means someone he could beat up on for a while without dying instantly, rather than someone that actually had a chance of defeating him.
* His exact words when a dozen or more adult tigers were circling around him at a Buddhist monastery: "I'm trying to look cool, but I'm this close to having to change my underpants."
* his ex-girlfriend's and kicked his assassains' asses, that would have been serious trouble for him.
* his experience in Advanced Tax class, Chris tries to make up for his mistakes by going to the dean and begging for a chance to salvage his college career. The dean laughs in his face.
* his experiment for Raph; all he ends up accomplishing is enabling Savanti to add the monster to his ranks.
* His extreme protectiveness towards Mo Xuanyu and no less extreme attachment to his parents' mementos are considered praiseworthy, since he's acting as a filial young man. For this reason, Lan Wangji actually
* his eye can greatly accelerate his perception of motion so everything appears slowed down, allowing him to easily dodge bullets, punches, and anything else that comes flying at him so he doesn't need his Eyepatch Of Power as often, but he keeps it anyway. (Probably because it looks badass.)
* His eyes did not sustain significant injury, however his eyelids burned off. The only reconstructive surgery he has undergone is to get new eyelids.
* His facade also briefly parted during liftoff and ascent of John Glenn's Mercury space-capsule flight. And when the Apollo 11 astronauts landed on the moon, he was positively giddy.
* "His Face All Red" makes frequent mention of strange things coming form the woods. Nobody bats an eye at the thought of a monster coming out of the woods to attack their livestock, and later it seems that
* His Face All Red's comics in general are fond of this. Mostly it's the "long vertical comic" approach, but the final page of "Margot's Room" really takes the Infinite Canvas to town, making the reader scroll all over the place to follow the action.
* His Face All Red, the brothers hunting the monster in the woods pass by a tree whose leaves look like the hands of women with long fingers.
* His face has been repaired numerous times, almost always resulting in the dominance of the "good" personality. Sometimes he's coincidentally scarred again, resulting in the return of Two-Face; other times, he's unable to keep his dark half at bay and symbolically scars himself when he gives in to his evil impulses. Only once has an unscarred face resulted in the disappearance of the good side.
* His facial disguise was not the greatest, it must be said, since it was simply a de-aged version of his own face. At least he took off the bandanna...
* His facial injuries from there on out are in the shape of the electrical mind-erasing plates
* his faction, or getting "hit" so hard he falls out of the ring itself. His over-the-top heel antics provide a stark contrast to his babyface reactions, utilizing

the same tactics, but making the audience sympathize with him instead of laugh at his misfortune.
* his fallen angel partner Anduriel can listen in through anything that casts a shadow.
* his family is killed by the planet debris, he's so dull the music has to do the acting for him.
* his family's murder), he eventually has to escape the facility before it blows sky high.
* His family was persecuted due to Orochi's grandfather attempting a dishonorable coup for the Shogun position, which ended with him committing seppuku. Not content with this, the people of Wano made the Kurozumi family's lives hell resulting in several family members' deaths and others leaving Wano. It leads to Orochi harboring extreme resentment which leads him to actually overthrow Oden for the Shogun position, and begins a reign of terror on his dissidents and everyone excluding his sycophants, instead of ruling Wano properly and dispelling the nation's negative connotations regarding his family.
* his family, with his late wife and all six of his adoptive daughters being powerful mages in their own right. That's not to say that he's useless, it's just that his skills are as an officer rather than a combatant.
* His Family: World War I is a boon to Laura's husband Hal, who makes a fortune selling weapons. Laura's sister Deborah, who abhors war, is disgusted.
* His fantasy counterpart, Malefishmirtz admits that he's afraid of unicorns, whales, octopus, pegasi, scorpions, barnacles and girls. Then a few seconds later a
* His Fantasy version is better in this regard. He still has more than his fair share of blood-crazed berserkers, but many of his followers are Blood Knights who prefer fair fights to prove themselves honestly better. The same thing applies to Blood Dragon vampires; they won't hesitate to kill civilians for food but spend most of their time seeking out worthy opponents and tend to ignore anything that doesn't fit into that criteria.
* His fascination with one of the first samplers, the Synclavier, led to bizarre songs consisting of orgasmic screams, rubbed glass, sneezes, like on his album
* his father after being crown prince for half of season 3. Like his father before him he does this by out-manoeuvring the favoured child.
* his father and Cersei find out about Shae, and after Pod refuses to falsely testify in court that Tyrion murdered Joffrey, even turning down a knighthood, as Cersei is bound to take her revenge.
* his father and has him at his mercy, and the Fire Lord demands to know why he's sparing him.
* His father, as he gives Darkwing his Omniblaster gas gun (just before his space pod takes off
* His father, Baron Wulfenbach, often has the same reaction to people around him.
* his father bash his mother's head in with a lamp. He trusts Olivia the most, so she's the one who sees the picture he drew of the attack. Lots of red crayon there...
* his father, but is still a normal teenager at heart. Various episodes show him to be just as awkward, or goofy as the rest of the titans.
* His father Charles Xavier also sometimes suffers from this trope. First, in a crossover mini-series with the Micronauts there was the Entity, a personification of his dark side. Later there was the supremely powerful Onslaught, who also contained elements of Magneto's evil side. Then there is Cassandra Nova, who combines this trope with elements of the evil twin and alien invader.
* his father didn't think he was strong enough (to be fair, he was a kid when he lost his father.) Kanji ultimately realizes that he had the wrong idea of what it means to be strong, and so decides to be true to himself.
* his father had sexual relationships with men on the side, and died from AIDS because of it.
* His father has one of these as well, apparently due to having experimented on himself. Unlike K.O., he's initially unaware of it, having absolutely no memory
* his father. In the second episode, Aja is marked queen-in-waiting by Varvatos,

who would be present in the normal ceremony but not in this role, and with only her brother looking on, and in a completely different setting without much of the ritual. This has a lot of applicability to trying to maintain customs and traditions after being displaced and trying to connect to a sundered heritage.
* his father is so outraged that he resolves to go to the school the following morning and pick a fight with the teacher. The story ends hilariously with Cosby Sr. whaling on young Bill right in the teacher's office once he realizes that the friendly teacher merely wanted to discuss Bill's poor marks.
* his father Kamishimoemon is seemingly just as bad, as IIRC they met up after years
* His father Ken and girlfriend Erin both addressed the audience from that same small room on occasions where Chris was unable to make it or when their narration was thematically important.
* His father Laius abducted and raped Chrysippus (who he was the tutor of) and the gods placed a curse on his family, saying that Laius' son would kill his father and marry his mother.
* His father Lynn Sr. is this as well, as he regularly does the cooking for his family, which is traditionally considered a feminine chore. He also cries openly at times (sometimes in the most
* His father Nagi, however, seemingly played this straight. Princess Arika refused, and he took her refusal on stride...
* His father once ran a booth in a renaissance fair that featured amazing mythical creatures.
* his father opposed his wedding, and thus could not marry his fiancee and keep his place as dynastic heir unless he proclaimed Humbert II deposed from head of the House. For obvious reasons, most monarchists either abandoned the cause or recognized the Duke of Aosta as the new head of the House, and anyway the government ceased its (scarce) operations by 2002 so that Victor Emmanuel and his son could return to Italy.
* his father partway through that time he notes that this is the first time in a while that he's started thinking in words.
* his father returns, he also tries to move towards a more legal business plan.
* his father saw his homosexuality as a threat to the family’s bloodline and tried to use a blood magic ritual to rewrite his mind to make him heterosexual
* his father's first wife to death by cannibalism. Eren's not quite sure if said Titan had enough sense to desire revenge specifically against Ms. Jaegar. Yeesh.
* his father Tarquin Later, this acquires a bitter connotation to Elan.
* his father Tarquin. This time he lets him fall, but only because he knows that, as a high-level character, his father has enough hit points to survive.
* His father, the overlord, split a planet in two when his wife died.
* his father Tigerstar's. He even has help from his dad's spirit. He manipulates Mudclaw into staging a coup in order to weaken WindClan, and Hawkfrost nearly succeeds in killing the ThunderClan leader Firestar.
* his father Yasopp whatsoever, even though the guy left to go be a pirate when his son was still very young without ever returning while his wife dies a couple of years after he left. It probably helps that his wife told him to do it, and Usopp thinks being a pirate is the greatest thing in the world.
* his faults, the consensus being that if people had actually listened to him then the second one would have been avoided. Since then, his reputation has fluctuated a lot.
* his fault that Polnareff didn't know that, when they were betting on what meat a cat would eat first, the cat belonged to D'Arby (and thus D'Arby could choose which piece would be eaten). Though an interesting thing about Daniel is that he equally applies this to both himself and the person he plays against. To him, cheating is simply part of the game. Jotaro later uses this mantra against Daniel's brother, Terrence.
* His favorite character in Crocodile? Princess the tiny white dog. He very explicitly hated everyone else.
* His Favorite, Satou is exactly this to his boyfriend Yoshida whose already the

shortest kid in class.
* His Favorite trying to sabotage/harassed them every step of the way and the problems caused by their conflicting personalities, are the main couple in the series.
* his fellow conspirator Duke Lombard: Tailtiu (daughter of Duke Reptor) and Lex (son of the aforementioned Duke Lombard) for the first part, either Iuchar or Iucharba (sons of King Danann) in the second.
* His fellow Deathlord, the Lover Clad in the Raiment of Tears, is also a good example: she's conceived of a
* His fencing teammate and potential love interest, Kagami Tsurugi, suffers from loneliness, too. During the second season, she seemed to be an
* His fight against Enel (who up to this point has been untouchable) subverts this wonderfully: while Enel is unable to hurt Luffy conventionally (Enel using lightning attacks and Luffy being made of rubber) Luffy can't hurt Enel conventionally either (as Enel can dodge all his attacks) and both must resort to cunning or insane tactics respectively.
* His fight with Eneru may also qualify. With his "Mantra" Eneru was able to predict and counter all of Luffy's moves, so he just started making up moves on the spot in an effort to get around it.
* His fight with Goku. He easily thrashes Goku - while the latter is using the Super Saiyan Blue / Kaioken X20 combo - across the battlefield, but Goku did manage to (barely) keep up with him, get a small hit in, and his Kaio-Ken boosted Kamehameha actually gave Jiren a minor
* His fight with Hit similarly has Jiren utterly dominating most of the battle, but Hit still manages to get some painful hits in after he adapts to Jiren's fighting style. The fact Jiren even bothered to take the offensive is already a testament to Hit's prowess, the fact Hit actually
* His final battle is against Relius Clover, and when the fight ends, Kokonoe orders him to round the bastard up on the spot, but time gets scrambled at that point, with Tager back outside the Ibukido Ruins. Kokonoe notices something is amiss, and chalks it up to the Master Unit, with no further explanation.
* his finale, it might as well have been. He had made every attempt to get home in time for his daughter's birthday (he had not seen her since she was an infant). He got a third of the way there before having to turn around and come back to fulfill Potter's request for another surgeon. The 4077th then throws a substitute birthday party for his daughter.
* his final fight with The Hound in Season 8, he takes part of the roof collapsing on him, getting impaled, and several stabs with a knife, including one through the eye. He has to be tackled out a window into an inferno to be killed.
* His final retirement was forced on him when Dick gave the title and costume of Robin to Damian while Tim was still using it. In response Tim did a bit more research into Bruce's "death" which he rightly thought to be a disappearance instead as Tim and then took up the identity of
* His finisher, the Hyper Drive, was horrendous; it's basically just him landing on his opponent with his ass.
* His first appearance had him confront Tachyon with a conundrum: she had to deal with some bombs that would go off if she reduced speed. If she went fast enough to get to the bombs in time, she'd be going too fast to disarm them. So she dumped them all in Wager Master's lap and set them off.
* His first appearance is even scaring Nova into thinking he was being arrested.
* His first appearance on "Columbo" was more or less a version of himself with a past as a draft dodger, while his second role was practically mirror universe Kirk as a conservative radio show host.
* His first attempt was just boots (and at 10% thrust capacity)... causing him to shoot up like a cannonball, faceplant on the ceiling, then crash down to the ground. Then he gets doused with fire extinguisher.
* His first charted single "Why Baby Why" only got to #4, because a competing version by Webb Pierce and Red Sovine blunted its chart run. Although many other artists cut it over the years (most notably, both the Sovine/Pierce version and

another by
* His first claim to fame as a lieutenant was quelling the piracy in the Greater Seswenna sector, first by planning the trap that allowed the capture of the pirate queen Q'anah and her Marauders... And then putting them all men in a container rigged with broadcasting equipment,
* His first computer, the Tandy, fits this trope after Strong Bad continues to use it after it
* His first English car was a Vauxhall Victor. He got tired of pushing it and bought a Saab.
* his first episode. He even admits to doing all of that for his own amusement, saying "It's pretty fun messing with people!"
* his first game his series has had one game released per year with no stop. After all he is SEGA's mascot and prime series.
* His first instance was sneaking into Princess Charlotte's bedroom and proceeding to force himself upon her. While she agreed to the act due to her extreme devotion to him, it's pretty obvious that he would have likely done so even if she had not consented.
* his first letter instructs Christians to test any spirit claiming to be from Heaven, by verifying that the spirit in question confesses Jesus is Lord and that He came in the flesh, because demons will masquerade as angels of light to try to deceive people, but will never confess Jesus's Lordship or Incarnation before mortals, because doing so would defeat the point of the deception.
* His first love interest, Betty Brant, was a straight type-A. She was a
* His first mate, Maccus who has a hammer-head shark for a head, and a lobster on his back.
* His first move is a Space Mach Attack, occasionally going straight to the multi-directional impact barrage if starting while already airborne. Following them are the Sky Zapper and Ultimate Impact rushes (the latter the version used in the Dragon Ball Z Budokai Tenkaichi games), then a Final Shine Attack (may occasionally substitute in a cyan-accented Chrono version of his primary Alpha's design), and ended with a Sadistic 18.
* His first novel has a teacher-turned-writer protagonist. He lives in Maine? His stories take place in Maine. He moves to Colorado? His stories take place in Colorado. He becomes an alcoholic and addicted to different meds? His stories start featuring metaphors for addiction or outright addiction. Seriously, just track the recurring features in his work and you've basically written a biography for him.
* His first single "That's All Right (Mama)" was originally performed by blues singer Arthur "Big Boy" Crudup.
* his first story until the 1986 reboot, Superman's birth father died when Kal-El was a baby/toddler, and is adoptive father Jonathan Kent died of disease when Clark Kent was a teenager.
* his first two Sentai counterparts who groped Rin and lifted up her and some schoolgirls' skirts.
* His first victim is a man holding children hostage in a school. As the news cuts off before he can see exactly what happened, he isn't convinced.
* his first wife Tomoe and are surprised to find someone has cleaned the headstone and left a tribute.
* His foe Clayface is a shapeshifter. He has fought a number of other masters of disguise over his career, such as False Face, Chimera, and Jane Doe.
* his forces were still in the process of conquering it in the first place and ended up simply being a uniformed legitimate combatant in the scope of an enemy sniper.
* his former best friend Jastes this way, the first person he ever kills.
* His former boss once remarked he got a man to confess to a crime by sitting in a room and just gazing at him for four hours. The accused walked away traumatized.
* his former captain Christopher Pike. catches up with them on a shuttlecraft, Spock surrenders calmly...but only after making sure that the computers running the ship will keep on the course he set.
* His former friend turned rival, the Crane Hermit of the Crane Style School, is

this as well, due to the fact both of them are over 300 years old.
* his. For the record, Nautilator transforms into a lobster monster and is part of the Decepticons' underwater operations team.
* His fourth-series incarnation, Captain Darling, is more of a particularly British take on Il Capitano, however - Edmund's rival and nemesis, but more out of priggish professionalism than hammy bravado. He also occasionally borders on the Pierrot, devotedly following General Melchett's orders, often the butt of Blackadder's jokes and awaiting in vain to marry Doris...
* his frequent misfired jumps tend to knock out waves of bad guys and make him look like a real hero who knows what he's doing. Pretty much the only person who knows that Eugene is a bumbler in person is Spidey himself.
* His friend and a regular client brown bear Bruno. Sometimes described as "old, fat and slow", but more of a
* His friend and fellow hero Arachno-Dude points out that he's a spider-themed hero.
* His friend James Rhodes has used Stark armor many times, either taking up the Iron Man mantle while Tony was incapacitated or presumed dead, or working independently as
* His friendly rival Kageyama Tobio’s birthday is December 22nd, the longest night of the year. Kageyama means “shadow mountain” and in contrast to Hinata he has a colder and less friendly demeanour. He also sports jet-black hair and navy-blue eyes.
* His friend Lyta Alexander tells him that when a telepath is scanning the mind of a person who dies, he or she can see the person's soul going through a portal to the beyond, although she acknowledges that it may just be the only way the brain can interpret what is happening. The Minbari broke off the war with the Earth Alliance because they found "undeniable proof" of Minbari souls being reincarnated in humans, namely Sinclair and other pilots they captured. Apparently they have technology that can scan and identify souls.
* His friends freak out at first, but Rachel and Phoebe admit that he's very hot. They eventually broke up because they were at such different stages of their lives. Specifically, Monica really longed to have children and Richard was only willing to consider it because of her wish.
* His friend Shizuo Heiwajima, as a child, had a huge crush on a cute shopkeeper from his neighborhood.
* His friends Matsuda and Motohama do this also. The girls of the Kendo club are often subjected to their lecherous peeping.
* His friends told him the trip was to Sierra Leone and he spent a week there where he caught Ebola and nearly died
* his friends who had slandered his girlfriend. When the whole school finds out Steve was responsible for getting revenge, they decide to get revenge on all of them, despite Steve protesting that his friends were responsible for the slander against Debbie and pinned it on Lisa Silver, after they come clean.
* his friend too, but never even called Ted during her absence. She had apologized to Marshall, but not to her other friend she left behind (the one who had to clean up the mess she made of Marshall by leaving)
* his from the kind of villains the other Avengers usually fight, especially a street level character like Cage. On the other hand, they are also so powerful and evil that they generally threaten the planet/universe and often other heroes anyway, so Strange joining or not doesn't make them any more or less of a target.
* His full flight-ready Mark 2 suit also took some time getting used to before he had flight control. He nearly dies when he goes up so high that
* His "Future History" has regular interplanetary travel available to the majority of humanity, but also
* His "Future History" series discusses the evolution of space travel from the first manned spaceflight, to the first FTL capable vessel, to the point where it's as easy as hopping into a rental ship and flitting between star systems. This trope isn't fully expressed, however, until
* his future wife Hinata fell in love with him the same way Kushina fell in love

with Minato: Rescue Romance.
* his game counterpart. For starters, before the reboot, he had no membranes, making him technically a regular squirrel.
* his game's, promises to become the most powerful hedgehog in the universe!
* his gang, the Geomijul, is crippled following a raid that forces them to burn their lucrative counterfeiting business and their extensive surveillance network to the ground. He is also actually a Body Double
* his gave one of the quickest bailouts in operatic history. (He still thought it was his best work.)
* His generals aren't much better. First they basically betray the empire by helping Lotor, then they betray Lotor due to the abovementioned straight-up murder, then they betray Haggar to help Lotor again, then they betray Lotor, AGAIN, when he turns psycho, and when the empire is scattered and they are sovereign warlords Acxa betrays the other two for good measure.
* his genie, whom he had freed long ago. He dons the genie's cuffs to purposely make himself a genie, and passes through a series of masters (the Serum Queen and Regina, David, and then Jasmine) before Jasmine uses True Love's Kiss to both break his genie curse and revive Agrabah.
* His ghost-hunting parents have no idea he's half-ghost, even though their ghost-hunting equipment has identified him as such more than once. Dark Danny, Danny's evil self from a
* His gimmick, which centered around being and staying "hyped", was mostly seen as obnoxious and grating.
* His Girl Friday adds a curve in that the romantic protagonists are divorced as well as former boss and prize employee (editor and ace reporter).
* His Girl Friday fast-talks his way out of most problems and can get anyone to go along with anything. Hildy punctuates an especially rapid rant with "Sold American!" like an auctioneer.
* His Girl Friday her dull new fiancé, Bruce Baldwin (who doesn't notice). She ends up kicking the waiter.
* His Girl Friday Hildy mentions going to Reno to get a divorce from Walter.
* His Girl Friday is famous for this. To pack in more dialogue and allow to be interrupted without the audience missing anything essential that the characters were saying, superfluous words were added to the beginning and end of the sentences, so if you missed what the characters were saying when they talked at the same time, you could still follow the story.
* His Girl Friday is used in some Creative Writing courses to explain rapid fire dialogue for use in stage plays.
* His Girl Friday, it nevertheless suggests that the Press is the main instrument for securing justice from an over-powerful government.
* His Girl Friday though Hildy is trying to get out of it. Walter sets her up with one last story in an attempt to get her to come back to the paper.

* His mother, Alison Carter, is no slouch either, looking closer to her late 40's than actual age of early 60's, and being described as an elegantly attractive older woman.
* His mother Arika has it worse than Nagi or Negi ever did; she was framed for attempted genocide
* his mother at her apartment, she lives on the seventh floor and her room number is 707.
* His mother, Beatrice, has a more complex case of narcissism with a pot full of different shades of the spectrum:
* his mother chased after it shouting. It's hard to say how likely this incident is to have happened; skeptics have suggested that the bird that "carried" Marlon may have actually been a normal raptor that he had mistakenly believed to be larger than it was due to the perspective. Curiously, the description of the birds in question nigh-perfectly matches that of the Andean condor, right down to the wingspan (ten feet). However, it doesn't quite add up even then, as condor talons are neither strong enough to carry a human nor shaped for grasping the way that, say, an eagle's talons are. Also, needless to say, the Andean condor is not native to the Midwestern United States.
* His mother Cordelia inverts it in an earlier book, wondering why the Barrayarans value gold so much when it's only vaguely useful in some electronic capacities.
* his mother disappeared when he was a teenager so his sister practically raised him from that point.
* His mother has a fight in a flashback sequence in which she takes out a group of mooks in her home. At one point, she stabs one of them with her quindent and slams him into the door frame above them.
* His mother is also an admiral in the Navy, becoming a fully fledged Enforcer by the age of 14. Enforcers, for the record, are the elite of the elite within the Bureau, with the personal authority of a Field Officer, so his advancement to an Admiral ten years later wasn't much of a career ladder jump.
* his "mother," Juliana, is an android, with a mind based on a synaptic scan of Noonian Soong's dead wife's brain. The procedure was so successful that Juliana doesn't even know she's not human.

* His Name Is... as well, as some readers would have really liked to have heard the rest of that sentence.
* his name is spelled with two Ls on several occasions; this is because there's another Colonel Jack O'Neil in the fictional version of the USAF, one with No Sense of Humor. This is an in-joke and lampshading of the fact that Kurt Russell's version of the character in the movie (spelled with one L in the credits) was significantly less funny.
* his Nanna, Jade's Grandpa, Rose's Mom, and Dave's Bro in the first place.
* His narration doubles both as a terrifyingly astute metaphor, and a description of his own view of a reality that was long ago fucked over.
* His Nazi affiliations are addressed in small ways, like claiming that V is so cool it almost makes him want him give up Nazism, or giving Abe a speech about staying strong, or else the sub-humans will over-run the earth, and no glory will be brought to the Fatherla— at which point he wisely shuts up.
* His near-immortal protagonist, Lazarus Long (a.k.a. Woodrow Wilson Smith) mentions having participated in several wars on nearly as many planets.
* his nemesis Captain John Hart takes him back to 27 A.D. in Cardiff where Jack's long-lost brother Gray buries him alive as punishment for not saving him from an attack when they were children. He is eventually dug up by Torchwood in 1901, having repeatedly suffocated and revived for 1874 years.
* His nemesis Inspector Javert is also an example of this. Javert is the most feared policeman in France. He is described as a
* His nephew Louis Napoleon Bonaparte followed in footsteps similar to his uncle via auto-coup, taking over the Second French Republic with the military's help in December 1851. After this he first gave himself absolute power, then became actual Emperor of France and establishing the Second French Empire.
* His nephews Huey, Dewey, and Louie were introduced in a badly battered babysitter-type cartoon (his sister Dumbella leaving them in his care).
* His nephews in the original shorts speak the same way. But the Latin American Spanish dub gives them perfectly understandable kid voices.
* His new acquaintances instruct him to kill one of his coworkers at the machining shop; he has the pony run "to make it sporting", and when Miller swoops down to try and talk things out, his "victim" trips through a pane glass window, cuts himself, and bleeds out in seconds. The other gangsters arrive on the scene to see Miller emotionlessly (Miller has not gotten a hang of all the fine muscle controls that show equine emotion) watch the other pony die after "shoving" him through a window.
* His new look (as of 1998) brought about a new trend of featuring one 'epic' track on every album, including "Albuquerque" (Running With Scissors), "Genius In

France" (Poodle Hat), "Trapped In The Drive Thru" (Straight Outta Lynwood), "Stop Forwarding That Crap To Me" (Alpocalypse), and "Jackson Park Express" (Mandatory Fun). Before this, epic tracks were fairly scattered - "Nature Trail To Hell" (In 3D) and, several albums later, "UHF" and "The Biggest Ball Of Twine In Minnesota" (both UHF).

* His next fling is a (hot) 400-year vampire... who chooses to face the sun at the end. Surprisingly, Flynn feels better after this.
* His next statement is a reminder that war is difficult and "The only easy day is yesterday!"
* His next venture focused on Viktor Vaughn, a typical otaku b-boy from Latveria with a knack for technology and an ego the size of Michigan who is flung back in time to 1993 by one of his experiments.
* his niece, her friends, and the world as a whole on a pretty regular basis.
* his Noble Phantasm, Anteres Snipe, is an arrow shot from the constellation Sagittarius itself, so he does not need to call its name and can instantly deploy it. This is balanced by the fact he can only use it once per night.
* His no-brakes verbal speed could get him in trouble, though: Williams swiped jokes from other comedians. He did not do this intentionally. Instead, in his own explanation, the pace at which he improvised meant he did not have time to be sure whether a joke was one he had written or remembered from a colleague's performance — in other words, contrary to the aforementioned praise, his mouth moved
* his nose hurts on the bridge. Amelia replies that he must get off that bridge, then.
* his nostalgia, it is apparent his wife was rather unhappy about his sense of priorities.
* His "Nothin' To Die For" is similar, but subtle - the chorus the first two times says the main character would "Lay your life down for your country, for your Jesus for your friends." The third time (as the man crashes through a guardrail), he hears a sweet voice saying "Lay your life down for your country,

* His original incarnation (at least, the first to use the name Morph) in the X-Men TV series was like this too, and it was just as sad to see his real psyche.
* his original legend alignment. Assessment of her during the actual game has to be weighed against the fact that she has a rather vile Master ordering her around, and one of the routes involves her joining the heroes' side.
* His original name was actually Yeshua, which only turned into Jesus through a series of translations.
* His original reason for invading Asgard was to steal the Norn Stones for Laufey, but as Balder notes, he's more confused than acting out of any real plan.
* His other accomplishments include stealing a soul from the orb it was contained in and stealing a secret (that he never told anyone) from Black Mage. He has also boasted about "stealing things that weren't even there."
* His other achievements include getting his corps out of Russia intact (a feat in itself, though he just told us how), and
* His other bird, Cinnamon, is apparently even worse, as even if she doesn't show up often she's acquired a tendency to chew on Jon's face, leaving gashes that require makeup to cover up later.
* His other brother Michael DeLuise appeared as "Colonel Danning" in
* , his other four senses were triggered to compensate for the loss of such a dominant sense.
* his other really big knife, his katana, his chainsaw and his mask, while lecturing him on his limited taste in movies.
* His other works also have their fair share of explosions — specially after he started destroying the games after his ranting reviews. Best example being the one featuring a
* Hisoutensoku boils down to three characters seeing an impossibly huge shadow of something and going off in pursuit of whatever it was (though only one of them successfully tracks down the cause of their respective shadow). The last boss fights of Cirno's and Meiling's scenarios do this to a doll and a catfish, respectively. In the latter case, the catfish starts off as merely huge and continues to grow each time it attacks. Sanae's scenario inverts this by making her last boss the shortest character in the game.
* Hisoutensoku. The minor meme described above is essentially her battlecry when using it.
* his outfit with a sleeveless cropped motorcycle top. Still odd, but mainly the

mask—if you're a sniper, why wear something that restricts your vision so?
* His "Outguess Ebert at the Oscars" defy this, as being official contests the prizes can range as high as a private screening to the years' Ebertfest or Pixar film. The most recent prize was the highest, $100,000, a year that Ebert only correctly guessed 15 Oscars out of 24.
* His overachieving younger sister, Haley, ends up appreciating this about her when she had to take up the mantle in his suspension. The massive shift in her life wrecks her nerves a fair bit though she understands Jake more too, to where she angrily defends Jake and his reasoning against their grandfather when she accidentally confesses the reason why Jake pulled the prank after he got kidnapped.
* his own alphabet few moments after his brother, China, taught him to write.
* his own Autobot much like how the Seekers Starscream, Thundercracker, and Skywarp are different.
* his own blood (as represented by HP) to cast spells. While you have Blood Magic active, healing effects restore much less of your health than they otherwise would, which makes Blood Magic rather dangerous to use in combat if you don't know what you're doing.
* his own brain fit the profile. in a documentary that the director filmed and hosted for the Science Channel about sociopaths and psychopaths. In addition to detailing many other tests that determine sociopathic and psychopathic tendencies, the director underwent a complete psychological profile, and thus found out that he possessed many of the traits that are commonly thought of as "sociopathic".
* his own daughter. His killer was furious that he'd apparently resumed fooling around again, unaware that the young woman he'd been meeting on the sly was his illegitimate child from a previous affair, and that their relationship was entirely platonic.
* his own kind, he probably didn't), then it's likely that between traffic accidents, interrupting dangerous tasks, or simply falling from precarious places, thousands of people died. Everything is back to normal by the next episode, as though nobody outside Manhattan even noticed.
* his own mother. Also, given that she's not a Stand user and therefore can't see Stands, there's no need for her to question what happened.
* his own mother bricked him up in a wall because she didn't like his fiancée.
* his own mother. He then tries to succeed on his own with their help and proves himself to be a perfectly capable student.
* his own movie follows up on this, with Scott being recruited to fight alongside his heroes on Captain America's Anti-Accords side during the big airport battle.
* his own name, then he uses Strong Bad's name for the second attempt, and the name he finally settles on, "Sugarface", is even less realistic than the ones Strong Bad usually chooses.
* his own psychiatrist as someone who couldn't cut it in real medicine.
* his own pure rage. Rage isn't even "real," it's just an abstract concept.
* his own Rain Dance. This sounds absurd at first, but it works, because the resulting downpour gets rid of the moisture in the air, meaning the rainy conditions can't be sustained any longer.
* his own realization, something that only adds to her victim complex.
* his own self-poisoning by the same doctor who treated Mike despite both of them being in critical condition.
* his own short-lived series, K9 was plucky, brave, and well-nigh indestructible — a combination that made him both adorable and frequently hilarious.
* his own stand of Passione. After his death, Bucciarati and his team are tasked with protecting Trish.
* his own story. The same also happened with a relative of Thomas Keneally.
* his own stupidity led him to walk into a Vidiian ambush and have his lungs stolen, Neelix cannot have them replicated as they are too complicated. This forces the Doctor to develop holographic lungs as a temporary measure until the crew can either track down his stolen organs or find a compatible donor.
* his own trophy. He dies instantly amidst a fountain of bloodspray from the gaping

hole in his neck.
* his own TV show called Hammerman. It involves MC Hammer getting a magical pair of shoes and fighting crime.
* his own values in order to close a case. When he shuts her down, she worms her way into the lab to accost him in his office with the same questions. He promptly dismisses her, again.
* his own words: "Yakka foob mog. Grug pubbawup zink wattoom gazork. Chumble spuzz."
* His Own Worst Enemy: A character's biggest obstacle is their personal flaw(s).
* Hispanic Michael Trevino plays the white Tyler Lockwood who is descended from Native Americans on
* his paranoia isn't misplaced, and his mission revolves around getting it back.
* his parents had been divorced for almost ten months and separated for two years, intentionally not telling their son because they feared the news would crush him.
* his parents. However, Harry later finds out that Sr. was an unwilling participant in the marriage (Dumbledore believes she either gave him a love potion or cursed him) and she’d raped him for over a year but it’s never made clear if Jr. ever managed or wanted to find out the full story.
* his parents' murder, and the player is given the option to pay their respects. If he does so, Batman kneels down and bows his head, as somber music plays in the background.
* His parents not getting the letter and still believing his brother is alive the episode after he was killed in action.
* his particular powers, the poison takes a while to affect him but it cripples him at a critical moment and leads to his death.
* His partner Cuddy (a dwarf) gets like this about dwarfs. It seems to be a symptom of joining the Watch: Once you join the Watch, no other labels apply to you, such as race or gender, so Detritus is not a troll, nor Cuddy a dwarf, they are watchmen.
* , his partner having a squeaky voice, and a fat woman dubbed with a male voice.
* His partner, Trevor Phillips, uses similar rational, being a failed athlete (like Michael) and having been booted from the military due to his mental instability. Unlike Michael, who at least vocally bemoans the fact,
* his part of the group's RTX 2014 intro is just him running his fingers through it. Sadly, it was shaved off during the November 2015 Extra Life livestream as part of a donation milestone, though he grew it back later.
* his past association with the other main characters and even the villain. He alludes to it for a while, but it takes a rather random event to make him open up with it.
* his past, in which his former affiliation with an anti-synth gang got his wife Barbara, who was a synth, murdered. Although he killed all the gang members
* his past self just before he'd left in the first place this way (the Waaagh! collapsed in the ensuing confusion).
* his past selves He's complex enough that this isn't exactly his defining trait, but it's damn close.
* His paying a fine saved him from jail time and a criminal conviction. To this day, many years later, police in Maryland never write a ticket for serious auto accidents with bodily injury or death until a prosecutor has a chance to review the case.
* his payment includes parts from an associate of the Decepticon who hired him. too.
* Hi-Speed Jecy, Cross has no qualms about attacking a patrol ship with lethal force and sending it into a field of the WMD phantom space.
* Hi-Speed Jecy: Erin's crusade against Major Sabatini is in part because her brother got the business end of the very corruption he was investigating.
* His penchant for nicknaming actually keeps him and Zane from getting outed at work at one point. After being caught receiving a sexual text from Zane during a meeting, they're both thankful for Ty's habit of pretty much never putting people's actual names into his contacts.

* his people had been fighting against illegal immigration since 1492.
* His personality is actually due to him taking all the negative personality traits
* his plan involves having all of them die so that he can maintain the secret of his own death having been faked.
* His plan is foiled by the investigating officer believing in 'elves do not kill elves' a bit too much as well, and thus arresting Wrath's apprentice (a dwarf) for the murder simply based on the 'fact' that
* His plan is logical, but is poorly explained. He states "The needs of the many outweigh the needs of the few, or the one". Considering that he was going to die anyway if he *didn't* try his plan, it's absolutely logical for him to do so. Note also that this quote is a basic philosophical tenet of Utilitarianism, and is *not* considered an uncontroversial, absolute truth. Those who follow more Deontological philosophies would heartily disagree.
* His plan to kill Tony is botched when a bunch of witnesses are in the area, and next he tries to get some local druggies to kill Tony for him, but they refuse. Tony catches up to him soon afterwards and garrotes him to death.
* his playboy lifestyle, so he hastily contrives a reason that might convince others to let him secretly access the mainframe: "I'm on a mole-hunt!" It doesn't work as intended. Instead, this causes the real mole to make a run for it, pay for his getaway using Archer's account, and ultimately get blamed for all of Archer's financial discrepancies.
* his pocket and replaced the wallet with a note complimenting him and offering him a job.
* His pod ends up being sucked into a wormhole that throws him into the 31st century, where he lives for 7 years (as opposed to the 7 months that passed for Kara). Unable to send any messages back in time, he resigned himself to a life without her and ends up marrying Imra Adeen, Saturn Girl. He still wears the pendant Kara has given him, but it's a reminder of their lost love and everything she has taught him about being a hero. Kara also had some previous attempts at a relationship with James Olsen, but it never went anywhere.
* his points, when Red rightfully calls him out, Leonard brushes it off with "Your house was ugly!"
* his police detective bandmate had smuggled contraband into the country and killed the Interpol agent who was tracking him and his own brother turned out to be a twisted psychopath who is responsible for two deaths, used Klavier to sabotage a talented lawyer's career, and has a severe case of Disproportionate Retribution. Even if he's able to put aside friend and familial relationships to see justice done, there was no justice in Constance Courte's murder, which would surely send most characters into a swill of cynicism and disillusionment. Yet in spite of all this, his personality always remains a calm, suave, debonair ladies' man full of charm and charisma with no hint of internal struggle or pain.
* his poor base stats causing him to require some time to obtain levels and items for these traits to overtake his weakness.
* His poor reputation is even referenced in the movies themselves. In
* His portal gun bypasses being in space completely, and allows him and those he brings with him to instantly portal to another part of the universe or even the
* His portrayal of the prominent Afghan viewpoint character, a mujahideen, in
* His post-Scratch iteration, Dad Crocker, is shown to be just as much a loving parent to Jane. To make things even better, she's a few years older than John was at the start of the comic, and has matured to the point that there's no Wangst whatsoever about his doting on her.
* his Post Traumatic Stress Disorder worked the way it did (music, inexplicably, made him relive getting shot).
* his power level starts dropping if he stays in it for too long. It gives him an absolutely massive power boost, but it's mainly meant to quickly overpower and dispatch foes that are stronger than SSJ2, but markedly weaker than SSJ3, before his energy reserves have enough time to dip too low. If SSJ3 Goku is in a fight against someone close to his power, and they end up lasting long enough against him

for that to happen (such as his fight against Kid Buu), he can end up in serious trouble. However, it's hinted that this limitation happened because Goku wasn't used to having a living body after being dead for seven years, which wasn't as durable and didn't have endless energy like his dead body.
* his powers are, let alone how to use them. At one point, he puts up a temporary mental shield to protect Tony from his trauma at fighting the Chitauri again but isn't sure what he did or how he did it.
* his powers, many of his metahuman lieutenants fight to succeed him, while uprisings by the Sikh population, Nehru loyalists, and the Communist Party of India (who want a "purer" socialism than Bose's Soviet allies provide) also occur; this conflict ends with Bose's appointed second-in-command M.S. Golwalker managing to crush all rebellions and secure his control.
* His predecessor, Jeffrey Sinclair, was a bit of a twist on this: While he wasn't afraid to fight the enemy in battle (more often than not, he'd lead the attack himself), but he was also a master at defusing conflicts, often through
* His preferred method of dealing with miscreants was pistol-whipping.
* His previous band Them had two top 40 hits, but neither of them were "Gloria", the song for which they are most recognized today. This was mostly due to concerns over a suggestive lyric, "she comes to my room", in the song. As a result, many stations refused to play it, and a cleaner version by long-forgotten garage rock group The Shadows of Knight was played in its place, moving it to a higher spot of #10. "Gloria" wasn't a top 40 hit in the UK either... because it was only issued as a B-side (its A-side, a cover of "Baby Please Don't Go", was a big hit).
* his prisoner, but was hiding from Hugo Strange, who would've either recaptured her for further experimentation or killed her to keep his research a secret.
* His properties remained in the government's hands due him tracking down Diabolik and trying to force him to pay him money for what he did to him and also to promise to leave him alone.
* His protest does make sense: the Void wasn't the only thing he threw into the Sun, or at least, that wasn't the first time he threatened or offered to throw something into the Sun.
* his psychotic older brother and Big Bad Constance Courte, it's not hard to imagine why he sees the good in everyone.
* His quipping has also been called a mode of managing his enemies: if he keeps them annoyed enough, they'll only target him, as opposed to nearby civilians, and if he keeps them angry enough, they get sloppy.
* his, rather than on a national level. It was also (usually) restricted by law, as the peasants needed at their homes during planting and harvest time. Mercenaries were thus commonly used to supplement the armed forces, and in some cases (like the Italian city-states) became the main soldiery. This often backfired if the side who hired them lost, since the mercenaries would then often loot them to be paid. Later professional armies mostly replaced this until the aforementioned French Revolution.
* his reaction to make him feel better. If anything they do counts as an adventure since they're adventurers, then of course he's going to go out and do the most random thing possible for the excitement that it's also an adventure. Even Miko is weirded out by his brand of Insane Troll Logic.
* His reaction when he hears other students screaming is to leave the building. Not because he fears what might be causing the screams, but because they're too distracting for him to study properly.
* his real-life basis, he spends many evenings on the boat ride with Cerebus and Jaka drunkenly soliloquizing on the roof of his cabin.
* His real motivation is to kill Tigerstar, who once beat the snot out of him. He successfully does this, but after that he decides the forest is a pretty cool place and that he wants to stay.
* His reappearance in the third-season episode "Keep Calm and Flutter On" seems to confirm this. Here, Discord is shown as simply a powerful
* His reason for killing the main characters, however, is that he was told
* His reason for rejecting her is entirely different in the oldest Sumerian

version, where his Mother tells him that a relationship with her will make him
* his rebellious and murderous attack in an attempt to usurp Arthur's throne literally backfired when the King used Excalibur to defend himself. Ruber did not return back to Camelot until a decade later, he gathered his henchmen and a griffin to force Juliana to let them entry into the kingdom as part of his plan of revenge.
* His relationship with Roxas and Xion is very like this in 358/2 Days, with the two both looking at Axel kinda like a big brother for his knowledge on the opposite sex, emotions, relationships... he in turn is very protective of them, and his anger at being forgotten makes a lot more sense considering this.
* His relationship with Sonya rapidly collapses because she is a passion with a love of excitement and novelty, and she rapidly comes to find him simply boring.
* His relationship with Uni too. The series seems to fully be implying a sort of Tsuna = Knight in shining armor who protects and "champions" for Uni (the
* His relationship with Yuki seems to fit the trope but hits the problem that Yuki isn't just energetic, but is flat-out and rather dangerously crazy.
* his rendition of "El Coyotito" at Sean's rescue party is about how someone's personality is like a little coyote, which seems to personify about how said animal represents Arthur's Low Honor.
* His rendition of "Hey, diddle diddle" is, in fact, a drinking song.
* His replacement (and previous solo collaborator), Josh Klinghoffer, seems to be going in the opposite direction - when he started, he was trying to emulate John's melodic style, but over time, he has shown such a knowledge of RHCP's funk back catalogue that fans hope he will steer them back into that direction.
* His replacement cape has embedded flatscreens, which he uses to display a chorus line of dancing Jansons.
* His replacement, Eric "Stumpy Joe" Childs, died of choking on vomit that might not have been his own.
* His replacement Hoàng Diệu commanded a battle that almost ended in Vietnamese victory, until the gunpowder reserves blew up, killing, wounding, distracting, and demoralizing the forces. He kept fighting until defeat was imminent, then ordered the forces to scatter. He went into the palace, bit his finger, and wrote
* his replacement Joe Hawkins seemed to like alternating with Ronnie much like Matt did.
* His replacement on the original series, Anita Van Buren, never rose above the rank of Lieutenant in her seventeen-year tenure, which actually becomes a plot point: she had applied to become a Captain but, despite having seniority, was passed over for a white woman. She then sued the NYPD, which unsurprisingly has limited her prospects.
* His reply to Arlene telling him she loves him was telling her that it was a coincidence because... he also loves him.
* His reputation might have been tainted by his boneheaded move in the
* His reputation passes to his woman, erstwhile whore Etta and later Queen of the Pirate Isles, and his ward, Wintrow, their philosopher King.
* his resurrection, bulking Superman's incredible power and his frame to the point where he was scared to even try and touch Lois. He gets this fixed by luring in the Parasite, letting him absorb his massive powers, but transforming him into the more well-known monster form.
* His return home was largely ignored outside of his family and friends.
* His revealing that fact-something most men would try to keep secret-during his Rousing Speech
* His review linked to his video back when they were making Giana Sisters Twisted Dreams.
* his review of one of his own movies just to help you out with that."
* his review: "There's a very in-depth level designer built in, with a host of tutorials, you'll be tempted to go through just to have Stephen Fry's voice tonguing your coc...hlea for hours on end."
* his review, Yahtzee vows not to make a single reference to female breasts throughout the rest of the video. At around the halfway point, we get this:

* his rival, Squidward imagines Squilliam in his underwear, only to discover that Squilliam is really, really buff.
* His rival, Yuma, is even more a sufferer of this trope - he has dozens of Number and non-Number Xyz monsters, especially towards the end of the series, and his deck is full of cards with variable or changeable levels, meaning he can easily bring them out. In spite of this, he always goes for Aspiring Emperor Hope, only resorting to another Number if he's trying to do something very specific or Hope is off-limits.
* His robot Helix turned off the electromagnets in his feet and used his coolant fan for thrust. (This left very few options for steering or braking.)
* His role in the first act concluded, Quicksilver is promptly told to go his own way, only making a brief cameo at the end at his house, away from the action. He watches the final battle on TV, despite the fact that,
* His "Rosamunde" Quartet also adopted a theme, from his opera of the same name.
* His Royal Highness Prince Nigel Cluim Gwydion Rhys Haldane, Prince Regent and Duke of Carthmoor, as depicted in the
* his rule-bending ways). He doesn't soften his disdain for Batman's vigilantism one bit; Batman simply tells him "I appreciate your honesty."
* his runaway daughter to come back to him, so if she calls when he's not there to answer, the message will get through.
* his run, he deliberately shifted the book away from the superhero genre, making it more of a general Sci-Fi adventure series. The plot changed accordingly, becoming about the X-Men dealing with mutant-related crimes and conflicts rather than fighting mutant-themed supervillains.
* his run. He's a somewhat more realistic depiction of insanity than most of Batman's foes in that most of what he says is complete gibberish.
* his ruse has worked too well, Cricket says "Oh no, I broke Dad's brain!"
* hissatsu technique will use an individual grant to signal their intentions. Some even have alternate ones for very specific situations, such as Hiroto using a shoot hissatsu when Endou is the opposite team's goalkeeper. Not only does every character has their own voice lines for scoring (even those who will most likely never play offense, like the keepers), but also voice lines for shooting, goalkeeping, defending AND dribbling, even if they don't possess any hissatsu in that particular skill. Too bad the same can't be said for the announcer...
* Hiss Before Fleeing: Supernatural beings hiss and then run away when they are confronted.
* His second-in-command recognizes these issues and wants to relieve him of command as a result.
* His second instance was his attempted rape of Casca when he was severely crippled. As his body was barely functioning at this point, he's only to limp towards her and agonizingly hump her chest, generating more pity than anything else.
* His second love was Danielle, Kevin's sister, who died during an attack on Rabbit's Revenge, but her human counterpart ended up crossing over into Domain, falling in love with George herself, and eventually married him. So, depending on whether you count the formerly human Danielle as a separate person from the original Danielle, George is either on his second or third love.
* His second motive, by contrast, has him revealing that he's captured individuals that each of the residents has
* His second report was that his situation was "a bit sticky" and he needed urgent reinforcement. By "a bit sticky" he meant "catastrophically outnumbered and near overrun,
* his secretary comes in and finds Bosch reading the file, so the investigator has to make a show of throwing Bosch out of the office.
* his secretary, exactly, but she was still his subordinate in that he was a partner in the firm while she was an employee). Roger even divorced his first wife, Mona, to marry his secretary (who was about the same age as his daughter). It doesn't last.
* his secret identity and tells he likes her. Her reaction? Getting angry because

he had risked his life to save hers, tackling him and kissing him.
* his series, didn't have the crippling phobia of ethnic cheer murals that he shows later on. He originally considered the mural in his office money well spent.
* his service to Father, he responds that she understood his priorities and knew the dangers he faced.
* his seven personalities, the strongest one is Shinobu, the original one, and the only one to remain pure and innocent. His Kazuya personality, by far the most violent and sadistic, is the weakest personality shown.
* His seven sons (with the possible exception of Maglor) take after him. They get a very short fuse.
* His ship is also clearly one to the Going Merry, on top of being more
* his short program during the 2019-2020 competitive season. His elegant costume combined with the choreography and the music ("Grand Waltz" and "Russian Sailor's Dance") convey to the audience that he's gracefully "dancing" with a lady.
* His short stories go even further, offering little to no explanation for their surreal horrors. Why is there a mountain that compels people to enter its perfectly body-shaped holes, or giant balloons shaped like the heads of real people who hunt down the people they correspond to and hang them to death from their strings? Who knows, but it's terrifying either way.
* His short story "In The Lost Lands" features Gray Alys, who according to legend can sell you anything you want but that
* His sidekick Elsee is an otaku too, although she's rather quieter about it than Keima. Unusually for the trope, she has two specialities:
* His sidekick Ginger is an odd example, appearing in one story as a
* His sidekick, Morte, is a floating, talking skull with large, bulging eyeballs, and seems to be a generally good-natured and amiable character, if a
* His sidekick Robin was also known for saying, "Holy [relevant pun]" but that was more due to the TV series from the '60s.
* his side of the story and shooting rays from chickens on their armpits that turn houses into giant hygiene products ("Evil soap! Deodorant!"). And then they can merge their heads together to shoot a giant kiss.
* "His Silicon Soul": A robot duplicate of Batman goes through this trope before his programming activates. The plan of the AI that created it is only foiled because the duplicate was programmed
* His similarly acclaimed brother Branford is much more open to new styles and experimentation - he played on a
* His sister also seems to get this treatment to some extent. She's admonished for returning home when she is happily married and has no real business to be there. This has the Ootori family fulfill two of the criteria. She, however, seems to ignore it and act cheery nonetheless, going out with Tamaki on occasion to explore the world of commoner cuisine.
* his sister... and sure enough, Othar strolls back into the room in the very next panel, with an offhand comment about how annoying the Castle is.
* His sister Ange doesn't believe in magic herself, yet she is the type of person who allows it to work for other people. She's referred to as the "Witch of Resurrection".
* His sister as well. We see her being mostly a bratty bitch who ends up nearly killing Aang, torturing Zuko, and
* His sister Belarus is quite similar. Lithuania seems to have a crush on her, she agrees to go out with him once... and ten minutes later, she breaks and twists his fingers. Then, she's shown as
* His sister Kodachi also partially qualifies for her pursuit of boy-type Ranma, but before the end of the manga admits that she knows he doesn't love her. Note that this doesn't actually
* His sister Lindsay finds herself unable to cry on command like she used to, though she does finally manage it when she believes her father is dead.
* His sister, Margaery Tyrell, became nicer and friendlier to Sansa in the show where after her planned engagement to Loras was foiled by Tywin, who decided to have her wed to Tyrion. Margaery comforted her and reassures her that marrying

Tyrion might not be bad. However, her book counterpart shuns Sansa after the plot to marry her to one of her brothers fell through out of political necessity (though still feeling bad for her), with only her
* His Sister, Shadow, is right up there as she contains the supposed Goddess (Demon Dragon Goddess... Thing) Zuzushi, that created their multiverse. As a result she has obtained the ability to "create all from nothing." It's been stated but not shown that she is easily capable of manifesting universes on a whim, and even contemplated destroying and recreating the Narutoverse the current story was in after Ghost trapped her in it while a major event occurred in another universe
* his "sister" Shirley is really his mother, his dying "parents" are his grandparents, and Dean (who is his brother, not his nephew as he thought) raped Linda.
* His sister Sofia is also very close to being a female version of this trope. She's a genuinely good-hearted person, unlike her sociopath brother, and no, she's not quite stupid enough to be an airhead. But she would never have been able to make it on her own in the world because except for that she's good at playing the piano, she doesn't seem to have any other skills at all! She's just a beautiful
* His sister, the narrator, was the one who killed them both. It includes the lyric "...the judge in the town's got bloodstains on his hands."
* his sixth year, is pretty popular. He ultimately marries Ginny Weasley, who is from a poor "blood traitor" family.
* His skin and organs will turn into slime. A freshwater fish thrown into salt water will die of dehydration. That's how badass osmosis is.
* his skin to start melting off of his body, but also gains more rads from all sources - thus why he isn't a complete aversion.
* His small spaceship is the straightest example. Rick frequently uses it in his adventures with Morty and Summer, and they often leave, go to completely different planetary systems, and return home in it by the end of the same day. So far, aside from
* his snobbish rival, Squilliam Fancyson sculpture, and Squidward's "masterpiece" ends up being featured on "House Fancy", with Squidward's ruined house knocking Squilliam out of the spotlight.
* His son, also a police officer, was reluctant to take bribes and was executed by his crooked partners. Mike murdered them in revenge, then became a criminal to earn enough money to support his widowed daughter-in-law and granddaughter.
* his son a minor lord who fought and distinguished himself in the war of Ninepenny kings. The next Baelish has no martial skill, instead being a financial miracle worker who elevates the house to greater heights.
* His son Andy Jr. joins the Air Force; after he is discharged due to an injury he applies for and is accepted into Hackensack NJ's police force training program.
* His son Arlo Guthrie belongs here as well, the littering incident from "
* His son Bud sometimes caught the fancy of very large, very fat women whose appearances bordered on horrific, who dragged him offscreen despite his horrified screams. After one such experience, a traumatized Bud commented that
* his son, but is fine with Elan being a hero and looks forward to being defeated by him later at the end of his career because that will make for such an epic story.
* His son Gakushu takes after his father and unlike him, Gakushu will make very
* his song of Aristophanes." The Croaking Chorus in question is just the Greek onomatopoeia for "frog noise." So it's basically "ribbit."
* His song "Our Country" often shows up in ads of this ilk as well. While the song
* His song "The Old Dope Peddler" sings admirably of the cornerstone of any neighborhood, the Heroin Dealer.
* His song, "The Stroke" was believed to be about masturbation, until the singer revealed it's about being on the receiving end of a handjob. Which is close, but no cigar.
* His song "Yoda" (parody of "Lola"), while not being specific, still plays off the 80s-era rumors that
* His son, Hiccup, is a charismatic leader for the Dragon Training Academy: his

authority rests on the villager's belief that he can solve whatever dragon-related problem they're having. He's also
* his son Joffrey. "You let that slip of a girl disarm you?" Of course, it has just as much to do with the fact Joffrey is much older, larger, and has had years of formal sword training, unlike Arya who could only secretly spar with friends.
* His son John Sidney "Jack" McCain IV graduated from the Naval Academy in 2009, making for
* his son jumping off a building to escape one of his supervillains,.
* His son, Kaldur'ahm, can also be quite intimidating — however, unlike his father, he's firmly on the side of good.

* His son, Luke, meanwhile, has at least some excuse. The Incom T-65 X-wing setup is almost a carbon copy of the Skyhopper's, which is a small airspeeder that Luke practiced with throughout the majority of his life on Tattooine, allowing Luke to adjust fairly quickly.
* His son Marcus Johnson (AKA, Nick Fury Jr.) is a Ranger in the US Army.
* His son Mearth was born in the last season and has chronologically only aged a year, but it's unknown how old he is in "human years". He learned to speak in full sentences the day he was born but still wore a diaper and there's no mention of him using the bathroom. He goes to school, and at one point his parents think he has a crush.
* His son, Piccolo Jr, comes to know the same fear with Goku after he tanks a blast that reduced an island into dust.
* His son Raymond views wife Debra as almost a surrogate mother and he is inclined to be lazy and to let her do all the work. When prodded to do chores, he has gone so far in ineptitude as to burn out the kitchen with an accidental fire; he has bought a new vacuum cleaner for no better reason than that he found the saleswoman attractive; and his parenting of three children is wildly inconsistent, veering from permissive to Victorian Father. There is every sign that his brother Robert, who married late, is learning from a master in his relationship to wife Amy.

* his son to get him a beer at a party, with the implication that his son's life would follow the same course as his own.
* his son was killed by one, and in hunting down the killer he realized his desire to expose all the dark secrets that spirits possess.
* His son, who goes by the same name, is repeatedly trying to state now that he's a very different person than this father, all while stuffing dollar bills in people's mouths, buying people off, and carrying the Million Dollar Belt around due to being unable to win one himself.
* his spear wielding girlfriend, Saeko was captain of the school's Kendo Club, and prior to the outbreak, Hirano spent a month training at a Black Water firing range with the American military.
* His Species Doth Protest Too Much (where most of them were criminals, pirates or agents of Saren). If he survives the first game, he returns to the krogan homeworld of Tuchanka and retakes his position as leader of Clan Urdnot in order to drag his species back to something resembling the time when they were respected and glorified for saving the galaxy during the Rachni Wars, before the Krogan Rebellion lead to their defeat and disgrace.
* His sprite in the comics (save for the armor's thighs being black instead of silver and other minor details).

The episode ends with him sarcastically toasting her corpse, covered in her blood, having reclaimed his rightful inheritance while his leitmotif blares. He's back.
* His story about making surgeon in "Objects In Space" is much better.
* "His story became a legend. His adventure is one you'll never forget." —
* His Story Repeats Itself: To resolve or come to closure with something that happened in their backstory, a character experiences an event very similar to what happened before.
* His story "Shoggoth's Old Peculiar" set in the apparently original Innsmouth on the British coast, as seen through the eyes of an American tourist who isn't in the know. (The title is the name of the pub's signature beer.) The local residents have caught onto events and they don't think much of Howard P.
* his style of speech has many of his stories turn into these, as whatever he started out talking about will slowly morph into something completely unrelated and somewhat incoherent.
* His subordinates General Kroy and General Poulder are said to be competent commanders, but are handicapped by their
* His successor Connor Hawke never even bothered; at one point he took over ownership of an apartment building and was refused insurance because he was a superhero.
* His successor, Elder McNamara, isn't much of an improvement, keeping the Brotherhood's bunker locked down after the aforementioned disastrous battle Elijah got them into. His rigid insistence on following outdated protocols means that most of the Brotherhood's troops have never seen real combat, their numbers are dwindling with no new blood being brought in, and there are only a handful of Brotherhood members allowed outside. All but four of the members outside the bunker (three scouts and a black-sheep member of the order that you can recruit as a companion) wind up dead by the time you find them.

When Iznogoud's art skills have finally improved, he sketches the Caliph and tears the page in half... unaware his teacher's sketch of him is on the other side of the page, so that they are both banished, and the Caliph ends up as sovereign of the island to which they were sent.
* his teacher, who fakes his death). When SG-1 is ambushed in a later episode by a group of Sodan, Mitchell and Teal'c are the only ones to successfully hold them off, while Sam and Daniel are quickly taken down (granted, Daniel is an archaeologist, but Sam has no excuse considering the third episode in the series stated she had advanced hand-to-hand training).
* his team and some members of the Cloud village making revenge extra-pointless. Naruto, seeing where this would end up, decides he needs to do whatever he can to stop this.
* His team in the latter had them as well, except for XR, had neither this, nor the other version, but had a much larger arsenal, part and parcel with being a robot. The wrist-mounted laser seems to be part and parcel of the standard issue
* His teammate Don Dawson both subverts and affirms. While generally presented as a nice guy, in one scene he terrifies a nerdy student just for laughs. The student's scared reaction shows it is something to be expected from Don.
* His teammate Nishinoya Yuu is also acknowledged as a genius libero in his own right. He is also

* Histeria! about (Jerry) Lewis and Clark (Kent) canoeing down a river. Lewis' inability to understand Clark's directions leads to then going down a waterfall.
* Histeria! based on World War II had a skit with the leaders of the Allied Forces as a band of superheroes called "The Freedom League".
* Histeria!, Big Fat Baby survives a ton of abuse in "The History of Poland" sketch.
* Histeria! did a song based on the legend that David Rice Atchison was president for a day. A subtitle identifies him as "The 11 1/2 U.S. President."
* Histeria! did very poorly in France and French speaking countries, due to the writers anti-French bias and negative portrayal of Napoleon Bonaparte.
* Histeria! episode "20th Century Presidents", the segment about Richard Nixon had a scene where his dog Checkers peed on a table.
* Histeria! episode "Really Oldies But Goodies" had a segment where Chit Chatterson demonstrated the steps of mummification on a living man in spite of his protests. When they get to the part about the Ancient Egyptians removing the mummy's brain, the man being mummified against his will suffers no ill effects and his only reaction is to complain about having his brain removed.
* Histeria! episode "The Legion of Super Writers" has Loud Kiddington play this role to the team of the episode's title.
* Histeria! episode "The Legion of Super Writers", he voiced a superhero-portrayed Ernest Hemingway.
* Histeria! featured the classic scene of a soldier writing letters home to his girfriend, but ends up with the entire camp going insane from the violin constantly playing a forlorn "When Johnny Comes Marching Home" throughout the sketch.
* Histeria! get crushed by a canoe they're carrying. Lewis says, "stop with the heavyness from the boat of hurting!" in a very annoying voice.
* Histeria! had a character named Pepper Mills who would ask historical characters for their autograph, then realize that she had mistaken them for someone else.
* Histeria!, is seeking revenge on the cast of Histeria (especially Loud) because eight months prior to the story, he was working on an appearance-changing formula when he was distracted by an hour-long Histeria marathon, and Loud's yelling in particular. Unable to turn off the television, since both it and the remote were damaged, Gene messed up his formula and was fired from the Science Organization when the demonstration of said formula proved to be a disaster. When Loud reveals

that two of Gene's lab mice were responsible for the destruction of both the remote and the television, Gene dismisses this, justifying his hatred by claiming that, since Loud's yelling caused him to forget his formula, Loud is responsible for what happened.
* Histeria! Kid Chorus is stated to be in middle school (even the clearly teenage Toast and Pepper), but their exact ages are never stated (except for Froggo, who's ten).
* Histeria! lesson to be learned from WWII, is nevertheless worth considering.
* Histeria!, Miss Information informs us that General George Washington was named after the famous monument.
* Histeria! often times during the songs the kids singing voices were dubbed by adults like Loud Kiddington who's regular speaking voice was Cody Ruegger his singing voice was often done by Rob Paulsen when he wasn't singing in character, Charity Baazar who's regular speaking voice was Laraine Newman (who was already an adult) her singing voice was provided by song writer Julie Bernstein.
* Histeria!, particularly in a sketch featuring him as a Mountie in the episode "North America".
* Histeria! ran plenty of commercial parodies, each one centering around a historical event (i.e. a record album called "The Greatest Hits of the 1860s") or person (i.e. Raggedy Lyndon Johnson and Squeeze Me Nixon).
* Histeria! reveals that the Crooked Mouth Boy who frequently appears in the background or in songs is in fact named Chipper.
* Histeria! sketch about Rene Descartes, Toast delivers him a pizza that was actually meant for Galileo, the reason being that Toast can't get to Italy within a half-hour.
* Histeria! sketch set in World War II has Loud Kiddington shout this out several times, resulting in this cameo:
* Histeria!: The episode "Super Writers" has a short sketch about this.
* Histeria!. Throughout the sketch, he tries to think of a good invention and a light bulb appears above his head with each thought. After quite a while, Loud Kiddington points it out to him, and he decides to call it "the thing that clicks on over my head when I get an idea." Toast tells him to "lighten up" and call it a light bulb.
* Histeria! version of Christopher Columbus wrote one: "Never again hire anyone from Cabin Crews R Us."
* Histeria! was always asking for things because, as he put it, "You've got your inventions, and I've got mine."
* Histeria! where a ship the cast is on spontaneously vanishes into thin air the moment it enters the Bermuda Triangle.
* Histeria!, which had a sketch where George Washington advertises "Pachy-Dents," a set of choppers made of elephant ivory. However, it also utilizes the "wooden teeth" myth.
* Histeria! would guide people through historic events and describe them, usually getting some details hilariously wrong and needing to be corrected.

* Historia ecclesiastica gentis Anglorum) people don't die, they "pass from life into life". The reason is the same as Paul's.
* Historian Saburo Ienaga holds the distinction of being the complainant in the longest civil trial in any country on record. In 1965, he sued the Japanese education ministry over its refusal to approve to his history book, which did not shy away from depicting war-time atrocities by the Japanese. Ienaga and his lawyers argued that the refusal to approve the book constituted censorship, though there was never any ban on the sale of the book, just on its use as an official textbook in schools. In 1997, the Supreme Court finally ruled that although no censorship had taken place, the ministry had nonetheless abused its discretion in not approving the book.
* Historians can and do judge when forks reached different parts of Europe by looking for them in paintings of the Last Supper. Judging military equipment is a little trickier, as you can never quite predict when someone's depicting the cutting edge and when he's depicting a suitably "old-fashioned" type of armor, but that tends to be well-attested elsewhere.
* Historians dispute whether Hitler's ambitions were European or global in scope. While he believed that to ensure "Aryan" supremacy Germany needed to conquer a lot of territory, he knew full well that any attempt at world conquest would take a
* Historians generally agree that the American Revolution was Britain's Vietnam (though they may never use those words). They won most conventional battles, but they had no real hope of winning the war. America was on the other side of the world, meaning they couldn't respond quickly or meaningfully to events on the ground, and every victory cost them hearts and minds. Hell, the mere presence of "foreign" troops in the colonies was one of the first causes of the conflict! (See also: virtually every conflict in which an underdog has held off a vastly superior invading army.) It also didn't help that Britain wasn't using her best troops (which were stationed elsewhere in the Empire).

* Historically, the reason that Japanese restaurants display food samples started with the consumers initially being unfamiliar with many of the dishes being served. They used to have real food on display but these would attract flies, go bad after a day and need to be replaced, which is huge waste of money. Then someone had the brilliant idea of making food models out of wax after observing that wax takes on an imprint while it cools into a solid.
* Historically, the Scottish army during the Wars of Independence used massed pike formations known as schiltrons, combined with use of rough, often swampy terrain and the over-eagerness of Anglo-Norman knights, a tactic which was used successfully at the Battles of Stirling Bridge and Banockburn, but broken up by archers and heavy cavalry at Falkirk. The movie instead depicts every battle as wild, berserker charges across an open field into the English lines, success or failure being apparently determined for the most part by narrative necessity. It does acknowledge the use of massed pikes at Stirling Bridge, but in response to a single cavalry charge, and they are soon abandoned.
* Historically, this was also the fate of Treecats, as they have lifespans of 250+ years. Prior to prolong, a treecat who bonded with a human almost always committed suicide after their adopt human died. Only rebonding to another human makes it possible to avoid this suicide.

* Historical "medicines" were often at best ineffective and at worst deadlier than the disease they were meant to treat. Plants and substances that triggered some reaction from the body (rashes, coughing, itchiness, etc) were widely used to treat aliments as the body's reaction to the substance indicated it was doing "something." Harmful medicines included mercury, which was the most common "cure" for syphilis even though it probably killed the patients faster than the disease.
* Historical Person Punchline: Someone from the past is revealed to be a historical figure.

This rebellion led him to bring his former opponents to fight against an external threat; and Robert, bored of the monotony of peacetime, was secretly grateful to get the old fire back to bring the best out of him once again.
* Histories famously describes one in which children were deprived of all external speech by the Egyptian pharaoh Psamtik I (664-610 BC). He concluded that the natural language sounded like Phrygian, a language spoken in what would be today's Turkey.
* Histories pots were used to disable the Persian cavarly, not the Spartan one.
* Histories.) The Goddess responded by turning the raiders into women.
* his torture and brainwashing at the hands of Naomi reacts to it. The flashbacks are actually what tip him off that something's been done to him.
* History and Lore segments, House Tyrell is said to have risen to power in the wake of Aegon's Conquest by agreeing to surrender. They also agreed to surrender without a fight after the sack of King's Landing at the end of Robert's Rebellion. The King in the North Torrhen Stark did likewise to spare his army the same fate as the combined Lannister/Gardener army at the Field of Fire, which had 4000 men burned alive by Aegon's dragons. Henceforth Torrhen was known as the king who knelt.
* History and Lore supplements, when he relieved the Siege of Storm's End; Stannis, who was gaunt from starvation, distributed food to his wife and his soldiers before eating and did not take a bigger share despite being the lord. This action of Stannis won him Davos's lifelong loyalty; as it was the first time the latter had seen justice embodied and practiced in his life.
* History and Lore videos show that Princess Rhaenys inherited her mother's Dornish look, with black hair and brown eyes.
* History Bites (based on the premise: what if TV had been around for 5,000 years) parodied Tom Paine as a spin-doctoring pundit:
* History Bites set during the reign of Chin Shi Huangdi ended with reports from the emperor's parade that carts of rotting fish preceded him. An interview with the emperor had his prime minister pulling a very cheap ventriloquism job with his dead body, complete with a burlap sack over the emperor's head with a face doodled on it.
* History Bites set in the Roman Empire had a "channel" where a stand-up comedian (Ron Pardo) mentioned in his set that he was a recently-freed slave and sarcastically thanked his former master.
* HistoryChannel ends with humans reverse-engineering the mysterious alien metal that powers the alien's technology and stating it's the basis of advanced human tech in 2013. The framing device of the show is a conspiracy theory that the "metal" is in fact an alien life-form that manipulated the "Martians" into basing their technology on it and invading another world to spread, and that humans will

be manipulated the same way.
* History Detectives (PBS history show, 2003-12; a revamped version is scheduled for 2014.)
* History Detectives, which is about...a woman who would rather watch TV (specifically, detective dramas) than make love.
* "History has its eyes on you", first sung by Washington and repeated by others in reference to legacy.
* History has repeated itself. After the show (and the brand as a whole)'s popularity crashing and burning in the mid to late 2000s, Nickelodeon started to bring Rugrats reruns back to the network to commemorate its 20th anniversary in late 2010 to mid 2011, followed by regular reruns on
* History has repeated itself with Windows 10. When Microsoft released the operating system in 2015, they allowed that it might be free to download for a year. Then, some months later, they decided to attach Windows 10 as a 'preferred' update for any computers capable of running it, automatically downloading it. Various issues inevitably resulted, as not only were there severe driver issues with numerous types of hardware, but many computers which were 'recommended' were incapable of running it at any speed beyond impossibly slow. Netbooks were the worst offenders. The problem has also reared its head in another way: As Windows XP and Windows Vista are no longer officially supported by Microsoft, not only are they becoming more and more an example, but if the customer attempts to update the computer to 10...
* History is filled with examples of soldiers crying out for their mothers as they are dying.
* History is filled with people who thought they could perform supernatural feats with enough training and other preparations, but were proven quite mistaken:
* History Is Not Legendary with the Orion Empire led to the subversion of the emperor at that time. The Klingons fell into civil war five years after adopting their new constitution, which led to a restoration of the monarchy after a distant relation of the former dynasty was found. Some of the failed regime's ideas, such as a Bill of Rights equivalent, were kept, however.
* history itself (anything that happened before the First Age is per definition prehistoric). These Celestial Exalted, however, are merely very long-lived demigods. The more powerful of the gods themselves are older still, having been made early in the process of the creation of the universe, making them as old as the concepts they govern.
* history manipulating methodology of people suffer and die for the sake of ensuring the Earth will be ready.
* History Matters: Whenever the Treaty of Versailles is mentioned, the treaty always says "The Winners (and Belgium)."
* History Never Repeats sounds like it will be an aversion. It's actually the singer trying to convince himself of the aversion.
* history of japan: Describing how Russia built the South Manchuria Railway:
* history of japan, this is exaggerated by a whole bunch while explaining how World War I got started (and why Japan got involved). In summary, Japan likes Britain hates Germany hates Britain likes Belgium is being trespassed by Germany hates France likes Russia hates Austria hates Serbia shot the leader of Austria.
* History of Power Rangers, and the huge focus on fight scenes, making the plot and characters incredibly flat and boring in comparison.
* History of Power Rangers because the production team assumed little kids would be too stupid to remember them otherwise.
* History of Power Rangers, he cites that Flurious, one of the four villain groups of the series, took this approach by not getting too involved in the fighting and letting the others factions duke it out amongst themselves. Indeed in the end the Fearcats and Kamdor were destroyed by the Rangers, Miratrix was sealed away in the jewel Kamdor was originally stuck in (by Kamdor's own hand no less) and Moltor was majorly weakened in his fight with Mack. When he tried to go to to Flurious for help, Flurious destroyed Moltor outright and takes the crown before acquiring the remaining jewels, allowing him to go to achieve his full-powered form, thus making

him the last villain to be stopped.
* History of Power Rangers, in the final battle when the masters turn into animals as their "highest form of potential''. Linkara just gives a deadpan "no… no" for a few minutes.
* History of Power Rangers might not be consistent with the way it does in real life, as previous seasons feel like they take place later than they appear to, and sometimes what feels like greater amounts of time can come between episodes than is stated.
* History of Power Rangers retrospective with the phrase "I have not been looking forward to this."
* History of Power Rangers review he does harken back to these fans and says while they did irritate him at the time, he really is thankful to them and all of his fans for supporting him to much and showing so much love to what is basically a grown man looking for deeper meaning in a children's television show.
* History of Power Rangers was previously considered the most boring character of the most boring season, and generally disliked as a very bland example of a Red Ranger. But Linkara "instantly liked this guy" and made a case for him, and he became a fan favorite overnight.
* History of Power Rangers. While at its core a review series of the franchise, the creator is fully willing to indulge in Canon Fodder when it comes to some smaller details, as well as trying to flesh out the lore of the universe more as the series goes on.
* history of the entire world, i guess: Chandragupta after giving 500 elephants to Seleucus:
* History of the Galaxy desperately trying to hold their own against the much more advanced and militarized Earth Alliance. After 30 years, the colonists finally manage to defeat the Alliance, and only because one of the Alliance top brass has decided that the war should end and turned off many defenses in the Solar System.

* History Of The World Part 1 ("The Dawn Of Man") starts with ape-men with a rising dawn behind them rising from sleep and then masturbating until they fall back down again, exhausted, all in silhouette.
* History of the World Part I, a cat is picked up, swung by its tail and thrown.
* History of the World Part I, as the birth of the first artist is followed by "the inevitable after-birth: the first art critic." Said critic promptly pisses on the newly-made painting, expressing his disapproval.
* History of the World Part I: Count De Monet quite literally walks all over poor people and slaps servants around if they address him as the Count De Money. More small-minded and petty than outright evil, but also a typical aristocrat in pre-Revolutionary France, so probably more in the bad column.
* History of the World Part I features a lot of Borscht Belt style comedy, including a sequence where Brooks plays a stand-up comedian in ancient Rome. There are cameos by a number of Borscht Belt comedians, including Sid Caesar, Jackie Mason and Henny Youngman.
* History of the World Part I has a swimming number with Nuns and Rabbis.
* History of the World Part I, Louis XVI of France is shown playing this, although it rapidly degenerates into an orgy.

* "History Repeating Part 2 (One Last Time)": Some parts are clear on whether Mega Man or Proto Man is the singer, but some aren't.
* History Repeats and broke even at the box office, but males and general Disney fans were turned off.
* History Repeats ends up dealing with the remnants of that very incident.
* History Repeats: Far from universal, but a general rejection of the Enlightenment idea of progress made some Counter-Enlightenment philosophers adopt a cyclical theory of history, positing that each generation thinks itself smarter than the one came before them, and wiser than those that come after, but are in fact not that different from one another except perhaps in appearance and living quality.
* History repeats itself in What Lies above part 2 when Lion-O takes on Mumm-Ra (technically) again.
* History Repeats: Many have compared this decade to many other eras, including:

* History's Strongest Shinobi: When Naruto guilt-trips Ma Kensei to go see his daughter Renka, Naruto sticks around just long enough to see how happy Renka is at seeing her father before he silently exiting the buidling. Later on when Renka confronts him on this and asks why he left, Naruto admits that he felt like a third wheel intruding on their private moment only for Renka to say he didn't have to leave and how she's a little annoyed that she had to hunt him down just so she could thank him for bringing Ma Kensei to her.
* History's Strongest Shinobi: While very competent and of decent intellect, Naruto is hyperactive, has a short attention span, misses obvious social cues at times unless it involves fighting or him getting maimed and/or killed, and has an interest in fighting. At one point, the narration lampshades this by explaining how his friends honestly think that Naruto has an undiagnosed attention disorder.
* History's Strongest Shinobi would end every training session by making Naruto shoot target practice with a crappy bow. Now however, he has a high quality bow and is in a target rich environment so he can't help himself.
* History Teaches Us, Thorin has to open up to Thranduril and Legolas about the gold-sickness that runs in his family because he wants to assure them in advance that anything he might say to them in future that goes against his current deals with them will be because he isn't well rather than because he's currently lying to them.
* History tells of a Frisian pirate and rebel by the name of "Grutte Pier" ("Big Pier") who rose to prominence during the early sixteenth century. He was reported to be an enormous man, and strong enough to bend coins one-handed with three fingers. Some sources estimate his height to have been at least seven-feet tall,

based around the length of the two swords reported to be his—both seven feet in length. However, these swords reputed to be his were probably ceremonial bearing swords that were incorrectly identified as combat weapons in later times and ascribed to him through romantic speculation. According to legend, Grutte Pier was strong enough to behead multiple men in a single blow. Unfortunately, the sword was proven
* history, the only people he was ever documented to have killed were aboard the colonial sloops that finally hunted him down.
* history. The Red Sox led the Rays for the AL Wild Card by 9 games on September 3rd (the full "September swoon" can't be measured by wild card lead since the Sox ended August as a division leader), the Braves led the Cardinals for the NL wild card by 8.5, and no team had ever squandered such a commanding lead in September, with their mathematical odds of reaching the playoffs each being over 99%. Since the Red Sox are the more signature franchise and were the favorites to win it all after adding superstar Carl Crawford, they grabbed most of the headlines, much to the small consolation of the Braves, who are basically the MLB leader in this trope over the last 20 years.

* History with Celebrity: A character's backstory involves a celebrity, which can be used to bring said celebrity into the work.
* History would repeat itself when quarterback Alex Smith suffered the same injury as Theismann after a sack by Houston Texans defensive end JJ Watt. In an eery coincidence, it happened 33 years to the date of Theismann's injury. With Theismann himself in attendance, no less. Smith returned to the team as a starter two years and multiple surgeries later, even picking up the Comeback Player of the Year award, but lasting pain forced him to retire for good at the end of the season.
* his totem was his wedding ring, not the top. It's never stated his totem is the top, only that it will spin forever in a dream. However, he wears his wedding ring in dreams but doesn't in reality. He isn't wearing it at the end, which would make the ending real.
* His trainer Ash has moments of this as well, particularly in the original Kanto series where he was recurrently antagonized,

* His turn as a villain sees him gaining a new prosthetic to replace his injured left arm. This one is notably less refined and human than the right one, black metal with exposed mechanisms. While he continues wearing a glove on the right hand, he rolls up the sleeve on the new left arm and frequently uses it to commit acts of violence.

* his ultimate fate as one of the final bosses until it was decided that doing so would unnecessarily complicate things.
* His unhappiness is explained by the (rather poorly-thought out, but what isn't with these guys?) decision by Sirius Co. to create robots and AI with "Genuine People Personalities", making them more familiar with humans. Of course, combine a genuine human personality and limitless intelligence and you are going to get a rather depressed individual. Marvin was a

* His uses the same melody and similar fiddle solos, but the plot has been changed to a changeling boy earning his freedom from the Faerie Queen via another fiddle contest, and the Queen subsequently giving up on those kinds of challenges, seeing as she's lost twice, now.
* His utter disrespect for his supposed "superiors" is because he (or rather, Yuuki Terumi) is the one who founded.
* his vast experience. Surely enough, Hori later complains to Nozaki and Sakura that Kashima was being "super annoying as of late".
* His very decision to become a Questor—paired with the discovery of an old contract—puts his home village in peril. The contract stated that the previous Questor was to retrieve some artifacts in exchange for land on which to build a village. The problem: the old Questor failed to do so, and now that there's a new Questor, a political faction intends to use that contract to get Freeman Downs repossessed and thus out of the picture. Quentyn's decision? Retrieve those artifacts, knowing that if he dies in the attempt, the law ensures that the contract ends with him. He knows nothing about the true scheme at work, and the opposing faction has no idea what to do now. The legal counsel sent to deliver the bad news summed this trope up rather perfectly:
* His victim, Isaku Hyoudou (Isaac Dover in the fan translation) has an even smaller role, but a slightly bigger impact.
* His video for "Rock and Roll Dreams Come Through" is a post-apocolyptic romance with
* His video "Word Crimes" packed with them starting with Weird Al's picture in the dictionary under "accordion".
* His villainous counterpart, Megatron, is a mastermind and a charismatic leader. He came up with the plan to steal the Golden Disc, and has the strongest personality of the group. While he's not the smartest or most tech savvy of the Predacons, Megatron is very good at finding ways to turn a situation into his advantage, and playing others into accomplishing his goals. Megatron definitely has the most firepower of any Predacon, and this seems to be the chief reason to why he leads. In fact, many of the other Predacons conspire to overthrow him at some point, and the only reason they don't seem

* His voice in Disney Channel India's English dub is also surprisingly high-

pitched for a tough guy like him.
* His voice in the Italian dub alternates between tones, being still raspy but with a sorta high pitch that lowers down when he's angry and gets even higher when he's happy.
* his voicing the Genie; the motives for him doing so were never revealed.)
* His wanton lust for Asian women led him to hang out at the fried wonton restaurant.
* His weapons include the "Sword of Rupture, Ea", a weapon that Gilgamesh alone possesses. Ea was what "Split Heaven and Earth", it existed before the world as we know it and is older than the very concept of a weapon called a "sword". When activated as a Noble Phantasm "Enuma Elish", it rips the spacetime apart, dealing incredible damage even at the lowest power and utterly obliterating anything when Gilgamesh is serious, from Servants to Reality Marbles. The only known thing that can completely block Enuma Elish is

* his wife points out that the government's leadership is betraying the founding principles of the government, so Quine's "insubordination" is actually nothing of the sort.
* His wife, Senna, was likely this in life—in fact, Lucian still uses her pistol from that time. While her undead state sees her toting around a *very* slow relic cannon instead, she still has elements of the Trick Shot with her Piercing Darkness ability (which lets her fire attacks through allies, enemies, and turrets to hit distant foes or heal allies.)
* His wife's family was the same way. Her father was a retired cop, she and her brother were cops and Mom was just as tough. They used to punch each other as a sign of affection.
* His wife Sharon is a natural brunette, but is more associated as a redhead (though she went for a strawberry blonde look in late 2005-06) and in 2020, stopped dyeing her hair for a more natural grey look.
* His wife was killed by the main villain of the story when he destroyed the village where they lived, so Twoflower probably just tries to forget. Maybe he even left to travel the world to forget..

Which is to uncomplainingly be present in the pavilion to prepare and serve cake and sandwiches. And to pour the tea. To her great surprise, Bekki finds herself doing this. As a Witch, this irritates her somewhat.
* His "Woken" theme starts with Matt yelling "YEEEEEEEEEEEEAAAAAAAAAAOOOOOOOOOOUUUUUUUUUUAAAAAAAAAAHHHHHHHHHH!!!!!", which would be included in his gimmick with him yelling "OOOOOHHHHHHH...YEEEEEEEEEEEEESSSSSSSSSS!!!"
* His Womanly Ways, but the novel subverts the typical genderswap tropes by utilizing an underlying transgender theme.
* his world's version of Oliver Queen at the start of the episode he "redeems." Yet despite all that, Clark Kent feels he just needs someone to be nice to him to bring out the good he's chosen to ignore in his life of murder, and he gets away not only without any kind of punishment whatsoever, but apparently becomes Earth-2's greatest hero.
* His worst moment comes when he breaks up with Kerry. He makes her upset and refuses to apologise, even after Tara tells him that her dad died the previous month.

* Hitch, after Albert and Allegra kiss for the first time, Albert gets this huge grin on his face kind of wanders down the street.
* Hitch After that, she responds to his begging for forgiveness by basically just deliberately jerking him around for a while. Just for her own sadistic amusement. It's only after she further breaks his heart and makes him plead a bit more that she finally takes him back.
* Hitch, Albert gets his back waxed, yelling in pain with each pull. Hitch, who is on the phone with Sara while this is happening, ends up pushing Albert's face down into the pillow to muffle his cries.
* Hitch assumes he really does help guys get one-night stands and ends up ruining his career.
* Hitch centers around a pick-up artist who coaches unattractive men on how to win the hearts of their dream women. The film actually ends up justifying the trope, with the overweight, bumbling Albert succeeding in winning over the beautiful Allegra due to his charming earnestness and personality, as opposed to any of Hitch's actual dating tactics.
* Hitchcock announces at a dinner party, "Try the finger sandwiches. Made with real fingers."
* Hitchcock inspired, haunted-house-Choose-Your-Own-Adventure-1940's Noir ballet of Macbeth will ever jump out at you or even attempt to scare you and there's no conventional Haunted House elements, besides the atmosphere of dread and general creepiness of the design. After a while you get into the swing of things, the place becomes familiar and you can start to really enjoy exploring or following the story- but the first twenty minutes after getting off the elevator, faced with room after creepy room, with no direction and separated from your friends, is pants-wettingly, paralyzingly scary. Part of what they do is get groups in the elevator together and the deliberately separate them as much as possible. You are alone. You are lost and confused. Meanwhile a variant of Macbeth is going on around you.

* Hitchhiker's Guide, which Ford plays to lose.) An old Orion mining song describes its side effects as: "my head will fly, my tongue will lie, my eyes will fry and I may die". Naturally, it's an ingredient in the Pan Galactic Gargle Blaster.
* Hitchhiker's Leg: A female hitchhiker shows off her leg(s) to passing motorists, in hopes of getting a lift.
* Hitchhikers, to go with all the Arcturan Mega-Critters. In accordance with this trope, it's worth noting that the Megadonkey, for instance, has six legs.
* Hitchhiker the Sirius Cybernetics Corporation Complaints Department (its only profitable division) used to have a sign in mile-high illuminated letters bearing

their motto "Share and Enjoy", but the letters sank into the planet's crust and the upper halves now appear to read, in the local language, "Go Stick Your Head in a Pig". They're no longer illuminated, except at times of special celebrations.
* Hitchiker's Guide To The Galaxy type of game. Additional fun can be had by inputting random words into the Guide — it has entries on some very unlikely things. Also, the game will often refer you to a footnote (Like SEE FOOTNOTE 9), and when you type "footnote 9", it tells you something. If you keep on going through the footnotes (Trying footnote 10, 11, 12, etc.), eventually you get a string of "There is no footnote (number)", until you finally get "It's fun reading all the footnotes, isn't it?"
* Hitch is trying to help get together with celebrity Allegra Cole. Despite his nervousness, things go smoothly for them. While Albert and Allegra's relationship continues to progress, Hitch finds that none of his tried and tested methods are working for him, despite being a master of the art.
* Hitch to work with because he was a sleaze. Strangely zig-zagged when Sara goes to apologize to Hitch and ask for a second chance in the reversal of the usual roles. Hitch rebuffs her, but then for some reason ends up chasing her down and apologizing to her.
* Hitchups: Once Hiccup is back to Berk, he engaged into that sort of relationship with Astrid.
* Hitch was asked to improvise all of his silly dance moves, and did accordingly ("Q-tip! Q-tip! Throw it away! Throw it away!").
* Hitch, where the title character eventually comes to realize that he himself is a Magic Feather — he gave clients advice on how to woo their dream girls, and his success rate is very high, but ultimately his advice didn't matter and the ladies all fell for the guys because of things they did naturally, in some cases completely contrary to Hitch's advice. All Hitch really gave them was the confidence to make the first move by believing that with Hitch's help, they actually had a chance.
* Hitch, which is part of the reason why Albert hires Hitch to help him break the ice with her. Exacerbated by the fact that he works for as one of her many accountants.
* Hitch (who has been cast because of this racial gray-area more than once.)
* Hitch who needed help breaking the ice, and Sarah's article torpedoed his budding relationship, though fortunately, for a brief time.
* hit Claire point-blank in the face. It didn't slow her down one bit as she and Brook ended up finishing second during that race.
* Hit 'Em Up Style" deals with a woman taking revenge on her unfaithful husband by draining him of all his financial and physical assets. The song also encourages women to take similar actions to punish unfaithful men.

* Hitherby Dragons, angels are gods (supernatural beings) that answer emptiness with hope and wear jackets with holes cut out for their wings. They have various powers and are often the result of a person making a promise an ordinary human can't fulfill. Evasive A can grant wishes if the person catches her (but she's uncatchable), Magic A has a non-zero chance of accomplishing anything, Realistic A can provide a pragmatic assessment of the situation and it's best not to think about Forbidden A.

* Hitherby Dragons Sebastien the Hero mentions that he can survive a shotgun blast because he keeps his heart in a box
* Hitherby Dragons takes this trope as its main theme (and indeed, its very title): in the same way as map-makers didn't know what the world was like physically, and thus drew dragons to represent the unknown, Hitherby's characters don't know the answers to big philosophical questions, but still try to find them, in their own ways.

* Hitler and everyone who supported him were potheads. The plan fails because

* Hitler and Himmler were never members of the Thule Society, and there's also no evidence that either of them ever even attended a meeting. However, other Nazis who were either members or frequent visitors included: Rudolf Hess, Alfred Rosenberg, Hans Frank, Julius Lehmann, Gottfried Feder, Dietrich Eckart, and Karl Harrer.
* Hitler and his generals were overconfident because France had previously been considered a more formidable opponent than Russia, going back to World War I in which Germany managed to knock Russia out of the fight, only to lose to France. This time, in stark contrast, they had completely outmaneuvered and overrun France in just six weeks, expelling the British Expeditionary Force in the process. If the Germans had just curb-stomped the enemy that had beaten them in the previous war, then surely they could knock out the country they'd defeated once already,
* Hitler and the Nazis were not entirely friends of Christianity either. Hitler was publicly a Christian but the Nazi policy of state control by party meant that they clamped down on religious instructions and interfered in doctrines of the Church. Some Catholics and Protestants supported the Nazis but those who didn't could face jail time and execution or deportation to concentration camps. Jehovah's Witnesses were persecuted as a group over their refusal to swear loyalty oaths or serve in the military (both forbidden by Witness beliefs) with some being executed and many imprisoned in concentration camps. "YHVH" was even ordered erased wherever it was displayed in churches, as this was the "Jewish" name of God. In one instance, local Nazi officials ordered even crosses removed from churches, but this was a step too far as you might except. After protests, the edict was withdrawn. The Nazis also had plans to turn Jesus into an Aryan figure if they couldn't simply abolish Christianity and replace it with their own religion. For the moment, the Nazis backed a so-called "Positive Christianity" and "German Christian" movement which aligned with their ideology. Their supporters managed to take control of the Lutheran Church in Germany. The Confessing Church, made up of dissident Protestants that refused to join, was driven underground, with members subjected to the treatment stated above. Hitler initially signed a concordat with the Catholic Church on coming to power, but frequently broke its terms and by the late 1930s Catholics were actively being persecuted (even if they were not openly dissident). The Catholic bishops protest at the Aktion T4 program (exterminating disabled and mentally ill patients) which managed to stop it temporarily, especially angered Hitler, and he swore to "settle with them" after the war ended. Hitler's private beliefs are still not entirely clear, though he did denounce Christianity and of course Judaism. Even in private though he also denounced atheism, saying it was inhuman and claimed to believe in God (though perhaps of a deist or pantheist variety).
* Hitler Ate SugarJust because someone evil did something doesn't make that thing evil — but people treat it like it was.
* Hitler Ate Sugar" Of course, to him, it was just business, nothing else.
* Hitler Ate Sugar: Something is bad simply because a bad person did/liked doing it.
* Hitler Ate Sugar (though see Henderson's law for cases where it actually works); something isn't wrong because the Nazis did it, but rather the Nazis are evil because some of the things they did were evil.

* Hitler had a bone to pick and didn't hesitate to lord over the French for World War I after France's surrender in 1940. The French memorial park for WWI was destroyed on Hitler's orders, and the carriage in which the 1918 Armistice was signed was taken to Berlin. All that Hitler left standing was the statue of the French General Ferdinand Foch, who was left to look over the wasteland. A repeat of the trope on a much wider scale against many cultural sites in the city was averted in 1944 as the Allies closed in on Paris; General Dietrich von Choltitz was ordered by Hitler to destroy the city as he retreated, but the order was never carried out. There is debate about why this did not happen — Von Choltitz claimed he refused due to his love of the city as well as its pointlessness from a military perspective; others, remembering his prior atrocities, have found the prior point unconvincing. Still, others believe the Germans weren't capable of that level of destruction by that point in the war, but many museums, bridges, etc.
* . Hitler himself used meth heavily, which may partially explain his foolish choices during the war.
* Hitler, Hirohito and Stalin appear in very bizarre caricatures in the nightmare scenes from 1943's ''Tin Pan Alley Cats."

* "Hitler, I'm going to kick your ass in the name of the Father, Myself, and the Holy Ghost," said Jesus.
* Hitler Lives!. The latter was an Army information film, explaining to the troops that while the war was over, and Hitler was dead, Nazism had not been defeated, and so the Army (i.e. likely those watching the film) were going to have to stay as occupiers. The former took the same film, and reworked and slightly bowdlerized it, taking out content explicitly explaining directives for the troops (such as forbidding any interactions between US troops and German civilians) replacing them with an exhortation against race hatred and political extremism at home.
* Hitler Rants account banned, getting a Wii instead of a PS3 for Christmas, and so on.

* Hitler Rants delves into the relationship he has with his desk, explaining how he was first united with it and why he treats it as a close family member.
* Hitler Rants. Fegelein constantly returns from death, Grawitz returns after blowing himself with grenades, and so on.
* Hitler Rants got their own antic masters, Fegelein frequently had to explain to Hitler's staff that he wasn't involved in whatever embarrassment had just befallen Hitler, often with little success.
* 'Hitler Rants, in which Hitler accidentally pushes a button that traps himself and his generals in a time loop.
* Hitler Rants, not only understanding German wouldn't have you know anything extra, it takes away the fun of it immediately.
* Hitler Rants phenomenon show some of the most infamous people in history, namely Adolf Hitler and several other Nazis, doing mundane things, like cooking, playing videogames and literally shopping. Most of the time, these things utterly fail due to the machinations of Hitler's arch-enemy Hermann Fegelein or because Hitler himself messes up because of his lack of patience.
* Hitler Rants to a scene of Hitler angrily ranting (originally about a counter-attack he'd planned but was not carried out on account of it being impossible), making it look like he is ranting about whatever the video creator takes issue with at the moment. But later on, people started adding comical special effects, creating a bizarre cartoonish universe, wherein Hitler comes up with outlandish

plans to win the war, which are usually foiled by the incompetence of himself or his generals or the jokes and antics of his brother-in-law Hermann Fegelein.
* Hitler Rants videos mostly revolve around Adolf Hitler flipping his shit at nearly everything, whether it's pop culture or failure of his plans. He also doesn't appreciate stuff in the bunker like Fegelein's antics or Jodl's objections.
* Hitler Rants videos often translates Burgdorf's "DAS REICHT!" as this every time he uses the eponymous superweapon on something.
* Hitler Rants videos to yell "MOMMY! MOMMMMMYYY!" whenever he's in a dangerous situation.
* Hitler Rants video while his union was going through contract negotiations where the company was Hitler. He posted it to a closed Facebook group but his manager saw it and fired him. The judge in the case ruled that since he was clearly joking and not literally calling them Nazis, the video was protected speech and therefore his termination was unlawful. He was also awarded a cash settlement for damages.
* Hitler's birthday, which has naturally resulted in many jokes being made involving Hitler and weed.
* Hitler's Madman has the prettiest girls of the village of Lidice lined up against a wall. He picks the ones he likes best and has them sent off to the Eastern Front to be sex slaves in German brothels.
* Hitler's Madman: Karel helpfully tells the townsfolk that millions of men "in England and America" are joining up to fight Hitler. That business on the Eastern Front was no big deal, apparently.
* Hitler's mistakes when he tried to conquer Russia. The Nazis ended up meeting the same outcome of this attempted invasion as did Napoleon's army.
* Hitler specifically did not want to establish a blood dynasty, and given his personal situation it's doubtful he would have lived long enough to groom a descendant as a successor anyway. He also kept his subordinates squabbling for position within the Nazi Party as a means of holding onto power himself. Most likely if Hitler had succeeded the Greater German Reich would have
* Hitler's Time Travel Exemption Act - a time traveler killed him. However, the secret society of time travelers of the Continuum has to keep history intact, so they've had to patch the timelines so what the history books said happened is...close to accurate. This means clones, body doubles, stealing the real Hitler for a bit, etc. Naturally, the replacement Hitlers keep getting killed or abducted or saved or whatever, too. The Continuum - which includes the Player Characters, literally are the plot armor keeping history as we know it intact. Too many paradoxes actually tear reality apart, or tear people out of reality. Continuum is a weird game.
* Hitler's Time Travel Exemption Act: Going back in time to kill Hitler won't ever end well.
* Hitler's Time Travel Exemption Act: Hitler has unbreakable Plot Armor, to the point where any timey-wimey attempt to assassinate him will either fail or make things even worse. (If this features in the story, ensure there is a good reason for it.)
* Hitler's Time Travel Exemption Act: Trying to go back in time to prevent a tragedy from happening proves to make things worse.
* Hitler survived a briefcase bomb detonating just a few feet away from his legs. All that was ruined was a pair of trousers. Averted however since that while the blast appeared as something that should have been fatal or at least crippling, Mythbusters proved that the way Hitler stood made it much less dangerous than it had seemed — he was separated from the bomb by a

* Hitler: The Rise of Evil: Fritz Gerlich is contacted by a man has inside information on Nazi Party collusion with shady foreign investors. This source is later pursued by a bunch of SA men at a train station, who throws him through a window to his death.
* Hitler: The Rise of Evil: Hitler's commanding officer during World War I turns out to be a Jewish man. It's suggested that Hitler, who already held strong

antisemitic beliefs at the time, earned his Iron Cross by blackmailing the man with this information.
* Hitler: The Rise of Evil. The main character is a racist demagogue who wants to institute a new dictatorial empire and annihilate the Jews.

* Hitler was reputed to do this a bit more literally in less-public venues. William Shirer mentions at one point in
* Hitler was so unimpressed with the Soviet performance against Finland in the Winter War, he was convinced it was safe to invade and that he would curbstomp the Union just as he had done with Europe. Boy, was he in for a surprise; the Soviets weaponized the punishing weather and stretched supply lines to defeat the invaders.
* Hitler Youth often ended up manning anti-aircraft guns in Germany. This was actually a fairly sensible use for them as they could at least load and fire and the officers could be trusted with figuring out what to fire at.
* Hit List for several shows, featuring Andy Mientus, Jeremy Jordan, and Krysta Rodriguez reprising the roles they had in the show.
* Hitman (1993): One of the hardest opponents Tommy ever faced was fellow hitman Johnny Navarrone, and shoots down any compliments on winning by stating his victory was due to sheer luck. So when he hears that Johnny had a son of similar skill (who we see training on corpses) out for revenge, Tommy is appropriately panicked... until they meet, and it turns out the kid only ever trained on dead bodies, meaning he forgot to turn the safety off his gun.
* Hitman (1993): Tommy Monaghan, is the eponymous hitman. His life is hard, dirty, bleak, and short, but he's not really the villain.
* Hitman (1998). Li's character became a professional killer and expert hitman by the end of the film, as well as receiving a portion of a 200 million USD bounty money. The first thing he intends to buy with the money is a house for his mother.
* Hitman (1998)) managed to subdue the Tall Guy by damaging his ring, only for him to reveal he had LED lights in the tip of his shoes as well.
* Hitman (1998), starring Jet Li, features an assassin dressed as a priest, who carries rosary beads which doubles as a garotte wire, and hides grenades in his robes.
* Hitman (2016), 47 is sent to Marrakesh to eliminate General Reza Zaydan, who intends on using his release of con-artist Claus Strandberg to perform one.
* Hitman (2016) also has GNN, with a logo blatantly satirising real-life American news channel CNN.
* Hitman (2016), A mixologist? Sure, why not. A barber, hairdresser, therapist, medical professional, real estate agent, or even a flamingo mascot? No problem. That creepy monotone guy with the icy stare who just walked through the door can do it all expertly if it means he'll get to kill you.
* Hitman (2016) and shuriken. There are several challenges related to this.
* Hitman (2016)), and the "Legacy" cinematic shows off the canonical kills for some of the targets from the earlier games, implying they all happened even if the storylines around them didn't.
* Hitman (2016) an IKEA chair. He eventually gives in and calls for technical support, not that it helps.
* Hitman (2016) an unnamed antagonist shoots an unidentified businessman after he is given "the key".
* Hitman (2016) both have the Professional and Master level difficulties, which include security cameras to catch Agent 47 in the act. The only way to dispose of them is either to find the security room to disable them or to discreetly shoot them.
* Hitman (2016) changes the name to "Mission Stories", despite being identical in every way except the name.
* Hitman (2016) costs, again with the previous two games being able to be imported into the new one. The story arc is continuous, and the names of characters often pop up between the two. IOI have since dubbed the three games the "World of Assassination" Trilogy.

* Hitman (2016): Destroying the security footage makes all cameras in the level inactive, meaning they no longer spot you and lower your score. The latter is completely averted when playing on Professional Mode however, which allows cameras to alert nearby guards if you trespass, often prompting the player to restart.
* Hitman (2016): Guards will occasionally say "What in the fargly HE double hockey sticks is that doing there?" when they encounter a suspicious object.
* Hitman (2016) has an entire laboratory filled with scientists and guards in a cave underneath his estate. It's justified as being built by the company he's working for since he's an agoraphobe who hates traveling.
* Hitman (2016) have many of these — if 47 can disguise himself as a person of interest, he almost always has some sort of interaction that shows off relevant skills. This covers everything from playing drums to literary criticism.
* Hitman (2016). His condition also means that if you find and destroy the donor heart, the hospital will not be able to find another heart in time, thus dooming the target to a slow but inevitable death.
* Hitman (2016): If you read into Silvio Caruso's family tape's song as being a reflection of his adolescence, the "There were candles burning as we made love" gets a whole lot more disturbing.
* Hitman (2016) is Claus Hugo Strandburgh, an investment banker who nearly bankrupted Morocco with massive investment fraud. Interestingly, Agent 47 isn't hired to kill him to punish him for his crimes, but because a Moroccan military leader wants to use his crimes as a pretense to initiate a military coup that the client wants to foil.
* Hitman (2016) is stated to lack any actual combat experience and earned his position through a mixture of wealth and nepotism. Like all targets, if 47 confronts him openly, he won't fight back and instead insults and threatens him.
* Hitman (2016), it's down to 47 to ensure he joins the infamous 27 Club.
* Hitman (2016) method, which was unpopular with Agency trainees and rendered many of the extra guards moot.
* Hitman (2016), one of 47's targets in Colorado is Maya Parvati, an ex-LTTE fighter before she left Sri Lanka after it was defeated in an all-out offensive by the Sri Lankan military and became a mercenary. At one point, she was a pirate who operated in the South China Sea.
* Hitman (2016), resulting in the following three missions to foil said plot.
* Hitman (2016), set at a hospital, one of the available starting options is 'undercover at the morgue', with Agent 47 beginning the mission on a trolley in said morgue. Not that the morticians ever notice that he's gone.
* Hitman (2016)'s "Freedom Fighters". All the NPCs, excluding the targets and hackers, are armed and the entire map is hostile. There are 4 targets, who, along with being bland compared to the previous targets, are spaced out, forcing you to run from one point of the map to the other. If that was not bad enough, the game forces you to infiltrate a house and break into the basement to leave.
* Hitman (2016): The final mission of Season One brings you to the most advanced hospital in the world, where one of 47's targets, a person who suffers the condition Situs Inversus (Mirrored organs), is about to have a heart transplant. 47 can destroy the mirrored heart that was meant for him, which, in theory, dooms him to die at the operating table because mirrored hearts are extremely rare and they would have no time to find another. In practice, however, patients suffering from Situs Inversus can receive non-mirrored organ transplants. The operation is a lot more complicated but, again, we're talking of the most advanced hospital in the world...
* Hitman (2016). The game even notifies you when a conversation you're overhearing could lead you to an assassination opportunity.
* Hitman (2016) "The Icon". also has a pair of NPC's that references this backlash, and one of them wants Dino replaced with a guy named "Dave Bateson", and will form a petition to do so.
* Hitman (2016)), they completely ditched the format, and in continuing to make critically-beloved games, they've since received proper financial returns that fully saved them from near-bankruptcy.

* Hitman (2016), which is part of the reason he's immensely distrustful of his colleague Francesca De Santis. While writing his memoir, he expresses a desire to eventually overcome it and have children, although he's killed before he can do so.
* Hitman (2016) whose modus operandi is founding cults and convincing them to commit ritual suicide.
* Hitman (2016), you can spike your targets' drinks with rat poison, then follow them to the bathroom and drown them in the toilet bowl, while they're throwing up.
* Hitman 2 a challenge requires you to drag the unconscious body of the local “sweet” muffin making old lady to the room where her victim once perished. Doing so will cause the doors of the room to open and shut repeatedly.
* Hitman 2 and blending in at the canvas has 47 do a painting of a stylized face of your target, Dawood Rangan, in about 30 brush strokes.
* Hitman 2, and so defected to one of Providence's enemies to prevent that. Their defection persuaded Providence to hire Agent 47 to kill them.
* Hitman 2 as a Berlin nightclub patron, selling weird drugs, bath salts, and live tigers.
* Hitman 2 can make their own slasher fic, where 47 just kills everyone in the level.
* Hitman 2, completely ignoring the entire point of the mission, and trigger an automatic game over. Doing this completes a challenge.
* Hitman 2, guards will throw flashbangs at you if you get into a firefight. 47 also has a few flashbang gadgets, such as the ICA flash phone and flash grenades of his own. 47 is also able to pick up enemy flashbang grenades if they're laying about in a level.
* Hitman 2 in the mission "The Finish Line". One of the targets you must eliminate is a race car driver during her big race, and you can manipulate events to get her or her opponent disqualified, resulting in the other person's victory. Doing either will open up opportunities to eliminate her.
* Hitman 2 is an exercise in hair-pulling because of the way the civilians are handled. Their starting positions and walking routes are randomized, and they run to get the nearest guard immediately if they see you with a weapon. This is mitigated somewhat by the fact that without a weapon, they don't even notice you exist. Unfortunately, this is a sniping mission, so you have to carry a rifle from either the start of the level or your contact elsewhere to the nest. AND you're liable to get noticed while you're waiting in the nest for the motorcade to pass by, AND it's quite possible to go through all of this and then miss the shot anyway. This is especially annoying if you're trying for Silent Assassin rating.
* Hitman 2 is to disguise Agent 47 as a barber and wait for him to come in for a shave.
* Hitman 2 mission "The Finish Line", the two targets to be eliminated are a race car driver and her father during the former's big race.
* Hitman 2 on this trope, and has a massive worn out "2" sticker on the lid, and the homing speed is super-slow, a nod to the games' "Slow Homing Briefcase" bug).
* Hitman 2 plays with this trope in its Miami mission for Sierra Knox. The game never lets Sierra win the Global Innovation Race by herself, and the only way to do so is for 47 to interfere with her gameplay loop in some way (killing Moses Lee, her direct competitor, or disqualifying Moses Lee).
* Hitman 2: Silent Assassin, 47 must kill a rich hacker who's having a party with women in his jacuzzi inside the Petronas Towers in Malaysia. He must also steal money in the man's safe so it'll be covered as a robbery gone wrong.
* Hitman 2: Silent Assassin through no fault of their own. This would happen about four times out of five and could happen at any point in the mission, even when you were just seconds from reaching the exit. The only solution was to just keep trying again and again and hoping you got lucky.
* Hitman 2: Silent Assassin which kills him in one hit and is something the player should probably be good at doing by now.
* Hitman 2: Silent Assassin, you are paid to assassinate a general in an Eastern European country. If you go to the suggested snipers-perch, you can see him clearly through a window - but if you shoot at him, he doesn't fall, and alarms goes off.

If you sneak into the building, however, you'll be able to see him from behind and realize that he's a propped-up cardboard cutout. The whole thing is a trap, and a counter-sniper is waiting to kill you.
* Hitman 2, started publishing slanderous articles on celebrities after his acting career tanked, and is the object of a contract from someone angry with him sitting on information about the danger of an anti-depressant until the first suicides.
* Hitman 2: Steven Bradley, the resident tech guy and cracker of Haven Island, spends most of his route working out at the gym and running laps of one of the islets, all the while wearing a "Hello, World" vest.
* Hitman 2 usually wears a suit and tie or some kind of low-key civilian outfit befitting his subtlety, but the intro mission Nightcall starts 47 off in an all-black wetsuit with a red zipper on the back instead.
* Hitman 2, which 47 can feel free to wear wherever if the player so chooses. If you choose to "blend in" and sit down next to a random bodyguard while wearing it, he'll ask about it as things go in an... interesting direction.
* Hitman 2, you can encounter a random NPC who's heavily implied to have murdered the previous owner of her house and did this with his remains. Interestingly, she's otherwise not related to the game's plot, and it's very easy to go through the mission without knowing anything is amiss.
* Hitman 3, If 47 chooses to take the memory wiping serum, he will collapse to the ground. Some time later, an amnesiac 47 wakes up in a padded room as Edward greets him.
* Hitman 3), so the Carpathian Mountains mission is usually considered more of just a perfunctory epilogue to wrap the series up.
* Hitman 3, which was just astounding. Not only that, but previous owners of the two games get those DLC's for free!
* Hitman: Absolution, 47 can do this when detected by enemies, feigning surrender by holding his hands in the air before disarming and knocking unconscious whoever is holding him at gunpoint when they approach him. If other enemies are nearby, 47 will instead take them hostage as a human shield, giving the player an advantage in the gunfight to follow.
* Hitman: Absolution, 47 can snap his targets' necks if he needs them dead and has no weapons equipped. Note that the kill is automatic upon grappling an assassination target in Absolution.
* Hitman: Absolution after killing his former contact and deciding not to turn over the girl she was trying to protect to the Agency.
* Hitman: Absolution controversy, which prompted heavy debate about sexualized depictions of female characters in video games.
* Hitman: Absolution: Dom records himself and his cronies torturing staff members when they turn mutinous.
* Hitman: Absolution: Fodder for some black humor in "Blackwater Park". As 47 presses the elevator panel to go up, a gasping delivery boy carrying a big tray of sushi dives in the elevator at the last minute. His attempts at small-talk fall flat on the mute Mister 47. When the elevator doors open, he gets shot to pieces by Layla's guards while 47 zips up the emergency hatch unharmed.
* Hitman: Absolution has 47 track down Sanchez to an underground fighting ring where he is scheduled to face off against a masked fighter known as The Patriot. A special way to complete the mission is to disguise 47 as The Patriot and go into the ring to kill him in hand-to-hand combat in front of a cheering crowd who doesn't realize that the two of you are fighting for real, even after 47 takes off his mask halfway through the fight.
* Hitman: Absolution has the genetically engineered Agent-in-the-making Victoria, which Agent 47 spends the first half the game trying to safeguard/rescue from Travis,a top member of the ICA. Alluded to throughout the game, and finally shown when late in the game when Victoria suddenly kills a group of Dexter's soldiers in an impressive display of deadly reflexes. She is dependant on her necklace, which contains some kind of isotope, otherwise they get real tired, real fast.
* Hitman: Absolution have cameos in the first stages of Act II. Kane is seen in a bar while Lynch is at a shooting range in a gun store.

* Hitman: Absolution in the first act, he takes a razor blade and cuts his barcode tattoo open, and sports a bandage over it for the rest of the game.
* Hitman: Absolution is planned to contain fewer such areas, increasing the difficulty of concealing bodies.
* Hitman: Absolution level) contains: a failing shoe salesman flirting with a maid; a woman arguing with her unemployed partner (who is having a midlife/existential crisis); a territorial landlady bickering with security; a woman arguing with "an asshole" over the phone; two guards discussing an absent colleague; and two electricians discussing a friend who was struck by lightning and who can now light bulbs by touching them...
* Hitman: Absolution nerfed Instinct to no longer slow down time when it's activated.
* Hitman: Absolution: Sanchez is a defective super soldier experiment after the treatment gave him gigantism, he can't blend in the crowd and is easy target in a gunfight but the muscles he gained alone is enough to make him a great bodyguard and is one of the few who take down agent 47.
* Hitman: Absolution, there is an achievement for stealing the All-American's disguise (The Patriot), then beating the Monster (Sanchez) with your bare fists, in the arena. From then on, getting a Silent Assassin rating is practically a shoo-in, since the crowd wants to see violent, gladiatorial combat.
* Hitman: Absolution, the rooftop of Blackwater Park is shrouded in mist, making sneaking up on him and dealing with him via headshot or strangulation rather easy.
* Hitman: Absolution when 47 finds himself riding an express elevator to his target's penthouse alongside a very real sushi deliveryman. When the elevator doors open, genre savvy guards immediately riddle the sushi guy with bullets; 47, however, has long since escaped through the hatch in the ceiling.
* Hitman: Absolution with others in the desert, as the facility is destroyed by the nuke's explosion in the background.
* Hitman, a drug baron who also produces several highly-regarded wines, plays the cello as a hobby, and collects rare butterflies.
* Hitman, After Agent 47 has killed the man he's going to impersonate later and taken Nika back to their hotel, Nika, who is pretty drunk begins to seduce 47, going as far as undoing his pants and straddling him on the bed. Just when they get close enough to kiss, Agent 47 jabs her in the neck with a sedative.
* Hitman afterward. In a separate throw-away gag, Bueno is shown surprising a murderous male scientist. A newspaper article later reports the death of said scientist due to severe internal injuries.
* Hitman, Agent 47 gets into a gunfight with 3 other assassins in a subway station. But after a call to "die with dignity", all the assassins drop their guns, pull out two swords secretly hidden on their backs, and proceed to have a swordfight.
* Hitman, Agent 47 is this canonically, and the player is encouraged to play the game as such (only killing the assigned target via the most covert manner possible, leaving no witnesses or evidence) in order to get the best rating on missions. However, the player can just say "screw it" and massacre the entire level with a machine-gun while dressed as a clown if they want.
* Hitman (Agent 47) traveling to various locations around the world in order to kill each target on his hit list.
* Hitman, and after another brief standoff in which the 4 assassins cross their swords a la the 3 musketeers, they then have a swordfight.
* Hitman, and as such it contains many rather unflattering portrayals of DC's superheroes, and by extension at the superhero genre as a whole.
* Hitman, and he had his arms tied behind his back as well. Tommy talks the mook into pointing his gun at Batman, then leaves since nobody is pointing a gun at him. Batman later disarms the mook, because he's Batman.
* Hitman, and he is made from the damned souls of five Waffen SS officers.
* Hitman: Blood Money, 47 bumps into a gangster who has a man tied up on a spring ride. A gas can is close-by, indicating the poor soul is drenched in gasoline and about to be killed. Of course, 47 can kill the gangster before he lights the man on fire.

* Hitman: Blood Money. 47 can use this opportunity to nick the necklace without resorting to violence.
* Hitman: Blood Money, 47 encounters rival assassin Maynard John while on an assignment. John has been looking forward to this for some time, and because he wants to prove himself superior, challenges 47 to a one-on-one gunfight in a soundproof room — no sneak attacks, traps, or tricks. He even leaves guns on a table in the room for 47 to use.
* Hitman: Blood Money 47 kills an innocent postal worker as he is a potential witness.
* Hitman: Blood Money, 47 sets a lady on fire at a party. She then manages to fall into a shark pool and the crowd applauds 47. And the more corpses you throw in that tank, the bigger that shark gets.
* Hitman: Blood Money According to his obituary, the Swing King was once a much-beloved local personality: rich, successful, handsome, and witty, no social event was complete without him making an appearance. By the time 47 catches up with him, Swing King has been reduced to a flabby, neurotic, washed-up recluse.
* Hitman: Blood Money, and another FBI agent who likes sniffing his charge's daughter's panties, which can be powdered with ether to also knock him unconscious.
* Hitman: Blood Money, and ordered him placed in isolation, where the orderlies routinely give him powerful psychoactive medication and perform rigorous physical therapies to treat his "insanity."
* Hitman: Blood Money contains a level where your target is the groom and his father, and you are hired by the bride, other than all of the guards carrying shotguns around 47 can use one for the assassinations.
* Hitman: Blood Money during a ride, killing and injuring many people. The owner escaped justice, filed for bankruptcy and has since thrown his lot in with a group of local gangsters. He is, of course, your target.
* Hitman: Blood Money features one target who performs onstage above a shark tank. The pyros can be rigged to set her on fire, forcing her to dive into the tank, where she is promptly eaten.
* Hitman: Blood Money for "I have no clue what I've written." (It should be "No tengo ni idea de lo que acabo de escribir.") Another, oddly, says "Read a book or play outside; to play a game will only make you dumber."
* Hitman: Blood Money had a scene in most promotional material that featured 47 in Vegas. All right, so Vegas is there for two levels, but the first is a hotel/casino and the second's a highrise.
* Hitman: Blood Money has a specific mechanic whereby you can climb onto the roof of any lift in the game to achieve this effect, in probable homage to Leon/The Professional.
* Hitman: Blood Money: In the mission "A New Life", one (noisy and inelegant) means of retrieving an objective necklace involves sabotaging the target's backyard grill so it will do this when the wearer tries to light it, then collecting the necklace off her corpse.
* Hitman: Blood Money is "Allan please add details," likely referring to artist Allan Hansen, who never did. This has become a meme in the community.
* Hitman: Blood Money is a white suit with a cool, white mask with a black scar-type thingy over his right eye. It's probably only made of flimsy plastic, though.
* Hitman: Blood Money... leaving bodies just lying around is asking for trouble, and unless somebody actually sees you do it, stuffing it into a handy container will ensure that it isn't discovered 'till well after you've vacated the premises.
* Hitman: Blood Money, one method of killing John "Pappy" LeBlanc is to shove him into his brother's open grave while he's standing over it mourning him.
* Hitman: Blood Money: one of Agent 47's primary weapons is a syringe that can be used to inject targets at the jugular or to poison food. For efficiency's sake, instead of using a single poison, a mixture of chemicals is used: sodium pentothol, pancuronium bromide, and potassium chloride. Since this is the exact combination of chemicals used in lethal injection executions, the victim dies quickly and noiselessly.
* Hitman: Blood Money on the people who've been screwing him over for the entire

game. The mission objective is given as the trope name.
* Hitman: Blood Money. On the way to its destination, the cake can be dropped, used to smuggle guns, poisoned, and rigged to explode - depending on how the player wishes to carry out Agent 47's mission.
* Hitman: Blood Money Should you follow her and wait for too long, she will stab 47 repeatedly.
* Hitman: Blood Money. Then, when one of the targets shoots the other and comes to check, drop a lighting fixture on them. It would be hard to explain that with a series of a freak accidents.
* Hitman: Blood Money), the picture is one of the recently deceased target.
* Hitman: Blood Money, the tutorial/opening level is set in a semiabandoned amusement park which was permanently closed after a freak industrial accident killed dozens. Outside of the gate is an old set of bloody footprints leading up to an abandoned car.
* Hitman: Blood Money with a motorized wheelchair and a half-flayed face. His left eye is also a discolored yellow.
* Hitman: Blood Money, you get the opportunity to be a Bad Santa yourself, by dressing up as him in a Christmas party to carry out your latest hits.
* Hitman, but Agent 47 presumably blends in by speaking the local language wherever he goes.
* Hitman, but he is also capable of turning nearly anything into a weapon. His less successful missions have made him an urban legend and earned him a reputation as the perfect assassin. His most successful missions were never recognized as assassinations at all.
* Hit Man by Lawrence Block. A hitman decides he's going to retire, but needs a hobby to occupy his mind during retirement. So he takes up stamp collecting. But stamps can be expensive, so the novel ends with him deciding to stay with his chosen profession.
* Hitman, certain NPCs are tagged as 'Enforcers' who know everyone on their payroll and will see through any disguise in the family they belong to: the head chef will know the faces of every one of their waiters, for example, but will be fooled by a janitor's uniform.
* Hitman: Codename 47, 47, who is a clone himself, has to kill a pack of other upgraded clones before taking out their creator.
* Hitman: Codename 47: After beating a bunch of jumped up super clones with miniguns, you then have to face... a weakling scientist with a tazer.
* Hitman: Codename 47, all of your missions are coming from the same buyer: Dr. Otto Ortmeyer, a human cloning pioneer and "father" to 47. He uses 47 to kill the other genetic donors and reap the rewards for himself. He is later killed after summoning 47 back to the lab he originated from.
* Hitman: Codename 47 Because of this (and because the first game was PC-only while the others had console ports) the "Hitman Trilogy" re-release only features the 2nd, 3rd, and 4th games.
* Hitman: Codename 47, if 47 doesn't take down Ortmeyer before he attacks, 47 will wake up in his bed chamber, having been mind wiped.
* Hitman: Codename 47: In the Thermal Bath Hotel, the pool guy will direct you to the changing booth where you'll find some complimentary swimming trunks. If you wish, you can pick up your weapons after changing (and magically stuff them into your chest, mind you), but it's not necessary to shoot anyone.
* Hitman: Contracts, but also his family lawyer who helped him get away unpunished with kidnapping and killing a small child.
* Hitman: Contracts contains a level where the protagonist must rescue the potential victim of a human hunt from an English manor.
* Hitman: Contracts example below) which the description lists as being "constructed from five-star ultra-dense musashi cardboard". Hitting an opponent with it sends them sailing in a nearly flat trajectory, usually only stopping when they strike an obstacle. Awesome.
* Hitman: Contracts has a subtle one. In the manor level, if you look closely at any of the clocks they are counting down.

* Hitman: Contracts has Inspector Fournier. Considering that you have to dodge dozens of heavily armed and armoured GIGN officers to get to him, he's just one unarmoured guy with a pistol and a megaphone who goes down as quickly as any other target.
* Hitman: Contracts; shortly after they storm the ship he's holed up in, he activates one of these to force them to comply with his demands.
* Hitman: Contracts, where the Meat King got off on a technicality for murdering your client's daughter. The "technicality" is implied to be some form of bribery.
* Hitman: Contracts you can poison some soup with laxative to help lure your target to the toilets. That or to get rid of his bodyguard, who he makes tastes his food.
* Hitman: Contracts, you have to disguise yourself as a waiter to infiltrate a party. However, it would be a very good idea to knock out the real waiter first, or else the security guards will easily catch on when they see too many waiters running around.
* Hitman currently impersonating a general to gain access to an air force base. At one point he can be heard threatening a guard that if he doesn't become more co-operative he'll find himself shoveling penguin guano at McMurdo.
* Hitman dies, his old comrades come "from South America" for his funeral.
* Hitman featured another burger joint called "Bucket Burger", which was also rife with parody(for example, almost everyone in the restaurant except for the title character and his buddy are obese slobs).
* Hitman features a dead woman who has been electrocuted by a toaster in a romantic candlelit bath.
* Hitman film culminates in the arms dealer failing to kill 47 with twin light machine guns.
* Hitman games, just running or even walking "suspiciously" can get you shot.
* Hitman, get caught strangling a security guard to death with piano wire? Met with deadly force. Get caught taking the clothes of a dead or unconscious construction worker? Deadly force. Wave a handgun or knife around? Deadly force. Enter the employees only area of a restaurant? Deadly force. Walk around a hotel in your bathing suit? Deadly force. And finally, set off a metal detector with what could be car keys or a watch? Without even checking to see if you did in fact have a weapon, immediate deadly force.
* Hitman. Going back to earlier missions with fully upgraded weapons, you'll wish there were more people to kill.
* Hitman got into this situation in WW2. It provided a tragic backstory because naturally, when the ship got into trouble, he was tossed first into the lifeboats.
* Hitman: Hacken's hand (which he chainsawed off after it was bitten by a zombie seal) would sometimes be drawn as a stump/prosthetic and sometimes drawn in as if it were healed.
* Hitman had Tommy and Natt hunting a radioactive homicidal maniac in a Santa suit at Christmas. That's Gotham. And the narration was verse in the meter of "The Night Before Christmas".
* Hitman, Hakan gets bitten by a zombie penguin and immediately cuts his hand off to avoid infection. Subverted when he later learns that it wasn't infectious.
* Hitman has Defenestrator, a member of Section Eight who is a loony superhero wannabe armed with a window frame. He throws criminals through it.
* Hitman has Hacken, who has his compatriots cut off his hand after he's bitten by a zombie penguin. They later revealed that he was never in danger.
* Hitman he could no longer disguise himself as someone with a notably different skin tone (though later games once again lets him disguise himself as almost anyone).
* Hitman, he even makes a stop at his usual tailor to get a new suit before the big finale.
* Hitman. If someone's firing guns for another reason (like to celebrate a wedding), you can kill someone and use their gunfire to mask the sound of yours.
* Hitman introduced a mechanic wherein the player character can retrieve the tape from the security office rather than destroying the cameras themselves.
* Hitman involves the titular Hitman hunting down a radioactive murderer in a Santa

suit on Christmas eve in Gotham, all with surreal narration meant to resemble "Twas the Night Before Christmas."
* Hitman is a combination of the Woo, Trick Shot and has shown shades of the Quick Draw.
* Hitman is to show up at his operating table in 47's classic suit. The shock coupled with his weak condition is enough to kill him on the spot.
* Hitman: it's all he's able to do. His attempt to retire at the opening of the second game only led to him being drawn back into the job. The money is just there to keep him on top of said job.
* Hitman Miami has 47 living in Miami and spending most of his days surfing and tanning on the beach, so he wears a pair of sunglasses throughout the entire first chapter.
* Hitman Miami, near the beginning, mentions the name "Vladimir Cutzurnutzov". The humor in this story isn't very subtle.
* Hitman movie, all of the gear that the super-secret Organization gives its assassins is emblazoned with the group's logo. More than that, all the gear is made with their distinctive design aesthetic, like they're Apple. It's partially justified in the original games, as the fleur-de-lis Agent 47 uses was originally Doctor Ort-Meyer's logo and has no affiliation to 47's current employers, the covert International Contract Agency.
* Hitman, or rigging an on-set explosion during an action movie filming.
* Hitman, ranging from throwing coins near guards, to planting remote explosives and detonating them to slip past, it's a very useful game feature.
* Hitman released and buffed it to not count towards the "Body Found" score.
* Hitman saying it because he's about to take on a pretty good-sized chunk of the CIA and doesn't want her around for it. Whether or not a reader thinks he would have said/done it if not for the whole CIA thing varies.
* Hitman series gives you the option of being a Psycho For Hire through your actions as the player, though it's heavily discouraged.
* Hitman series has several antagonists who are corrupt members of law enforcement.
* Hitman series is defined by his signature black suit and red tie. Of course it can be changed via disguise, but it's that suit which makes him most iconic. Indeed he's a very dark character, who can kill effortlessly and get away with it without batting an eye.
* Hitman series of games. Walk calm, wear the right uniform and carry the right gun in the right way (ie. out-of-sight or in off-hand), and no one will notice you're a six-foot-tall, pale, hairless man with a bar code tattoo'd on the back of your head.
* Hitman series, this is pretty much the only reason 47 will kill an innocent (in canon), as his existence is already very volatile and he cannot afford to let anyone (other than a select few) know about him.
* Hitman's hero, Agent 47, has a barcode on the back of his skull, in both video game and movie versions. Its significance is most important in the final level of the first game: the only access to Dr. Ortmeyer's lab is through a airlock chamber with a barcode scanner out of which the 47 clones are unleashed to go after 47 and kill him (they get scanned before being unleashed). If 47's head tattoo is scanned, access is denied and he gets gassed to death. If 47 uses a dead clone of himself on the scanner, access is granted and the gate of Ortmeyer's lab opens.
* Hitman, stating that it was all good if not for the shooting gallery segments that had been obviously ripped from the video game on which the film is based. At no point did he take into account the distinct lack of events like this in said video games.
* Hitman, the developers also made "Silent assassin, Suit Only" a challenge.
* Hitman: The ICA and Puissance Treize (French for "Power Thirteen") are this, only for assassins.
* Hitman Their name originates from the Eye of Providence, the symbol typically associated with the Illuminati.
* Hitman - the near-final script that can be found in the Internet makes no mention of 47's childhood whatsoever.

* Hitman, then you've done this at least once. Alarm goes off, and instead of (or at the same time as) cursing the gods for your failure, you whip out the dual silverballers and make things messy before you go.
* Hitman, there are two flamingo mascots of the motorsport arena whose costumes you can wear, which can open an opportunity to get close to your targets.
* Hitman. There's a reason their team is named after the clause for leaving the Army due to insanity.
* Hitman: The series involves various methods to poison, sabotage, or nudge your victims to death without directly implicating yourself. While the majority of missions allow you to kill almost anyone at any time with any implementation, killing indirectly means less evidence to clean up for your handlers and therefore nets you a larger score.
* Hitman to make a final last stand with his wounded and trapped friend Nat.
* Hitman, Tommy gives ex-Para Bob a tombstone consisting of his gun, and a scrap of wood with "God is airborne" written on it.
* Hitman: Tommy Monaghan was a sniper in the USMC before returning to Gotham to become a professional hitman.
* Hitman to the original games. He not only puts the bodies in a shipping crate but nails it shut as well.
* Hitman was given very useful powers (telepathy and x-ray vision) from an alien, when it sucked out his spinal fluid, and he survived.
* Hitman, which is him wearing a white rolled-up summer shirt and some sunglasses.
* Hitman with a Heart: A career killer, but not an indiscriminate murderer.
* Hitman with a Heart Ah Jeong accidentally grazes a noncombatant nightclub singer with a bullet during a shootout in a bar. She is blinded, which is a source of great regret for Ah Jeong which causes him to insert himself in her life and go to great personal risk to get money to pay for her cornea transplant
* Hit Me: A la Blackjack, if the contestant picked grocery items with cards that brought their score to 22 or higher, meaning THEY bust and forfeit the game regardless of the house's score.
* Hitmen for Destiny, an otherwise apparently invulnerable assassin is killed by portal-cutting his lower body off. His dead upper body shows up at several points later on, apparently still invulnerable as it shows no signs of decay.
* Hitmen for Destiny as well (yes, even more so than the usual dwarf).
* Hitmen for Destiny by starting with Play-Doh. It's loyal, but since it can't hear instructions and is from an ultra-weak material, it kills itself by trying to move.
* Hitmen for Destiny has one character grabbing hold of a ledge inside the invisible castle, and calling for help. The drop isn't lethal.
* Hitmen for Destiny has this down to an art form. These usually come in the form of Professor Lostclock Dripkettle's incredibly descriptive narratives about the various odds and ends of the monsters that inhabit the many worlds of the comic from the stomach monsters who find their prey through living portals that lead to a giant stomach; to the fibra, who may very well be the least efficient creature to ever live.
* Hitmen for Destiny is probably the worst shapeshifter of all time. He doesn't bother to try to act like the people he's impersonating, and when questioned, he panics severely.
* Hitmen for Destiny: Jymre hides in a closet onboard the cruise ship.
* Hitmen for Destiny's backstory states that its world is actively sliding along the scale, and every prophecy that someone manages to break causes destiny to weaken throughout the universe. Both Destiny and Free Will have secret agents actively trying to keep/prevent prophecies coming true.
* Hitmen for Destiny (the protagonist is revealed to be a lesbian, and there is a romantic subplot involving her and another female character)
* Hitmen for Destiny which can turn themselves into rocks for extended periods of time, but can't move during that period. A few strips later, they're used as projectiles and as a perpetual motion machine.
* hit nothing, and shatter it, before being sent to the other end of space-time.
* Hitodama Light: Another Japanese variant, where a coloured flame (usually purple)

is attached to the ghost or showing a person possessed by a ghost. People wearing candles on their head are invoking this appearance.
* Hitodama Light: Orbs of flame that surround Japanese ghosts/possessed people.
* Hitohira: Shy school girl — check. Situation that forces change—check. Affectionate friends to help her—check. It's still very well done, though.
* Hitohira start a brutal fight which leaves them both unconscious, but it apparently doesn't leave any bruises.
* Hito Hito no Mi, in which he claims to have been able to change the seven forms he can transform into, and on a side note reveals he now only needs the Rumble Ball for one of the seven.
* hitokiri translating into "manslayer" or "assassin." They were considered more or less impossible to defeat by normal swordsmen.
* Hitomi-chan Is Shy with Strangers: After going to the water park, Yuu and Hitomi fall asleep next to each other on the train. Yuu's sister Kaoru takes a photo to tease them with later.
* Hitomi-chan Is Shy with Strangers, before turning into a serial manga, the one shot chapters were a little different in tone, it was just about how Hitomi interacted with different characters, and how they initially mistook Hitomi as a scary delinquent; there was no building romance as Yuu did not exist in that prototype run.
* Hitomi-chan Is Shy with Strangers: In Chapter 36, Kaoru and Hitomi's brother walk in just as Yuu and Hitomi are giving each other a taste of the food they just cooked.
* Hitomi-chan Is Shy with Strangers relationship, despite him being a year older.
* Hitomi-chan Is Shy with Strangers. They switch places and she watches, though they're still intimately close.
* Hitomi-chan Is Shy with Strangers where Yuu and Hitomi have to rush for the train to school, Hitomi insists they stop to help an old woman climb some stairs and help another woman collect her dropped goods. They end up missing the train and having to take a shortcut.
* Hitomi-chan Is Shy with Strangers: Yuu is treated to one courtesy of Hitomi in Chapter 62.
* Hitomi, who starts off by mind-controlling and robbing people before moving on to mass murder, comes to Midori's attention, who contacts Mai and lets her know that she might be linked to Nao's alleged attack on Yukariko in some way. As a result, Mai and Natsuki delay going after Nao, and the group is able to cooperate against Hitomi and the other SUEs (even Nao overcomes her reluctance to associate with the other Himes by virtue of
* Hitori Bocchi No Marumaru Seikatsu still continues to run, having attained a level of popularity its sister series never reached.
* Hitoribocchi no OO Seikatsu, Bocchi asks her mother for a smartphone but is told that she won't get one until her second year of middle school. In the anime, Bocchi's mother changes her mind and gives Bocchi one at the start of the last episode of the first season, shortly before the end of Bocchi's first year, with Bocchi mentioning that her mother thought it would be cheaper to do so at this point.
* Hitoribocchi no OO Seikatsu has Bocchi Hitori, the main character. She has long brown hair and despite being eccentric, is rather intelligent, and probably one of the better students in the class. In fact, the only reason why she didn't get into her best friend Kai's middle school was because she was too scared to attend the interview.
* Hitoribocchi no OO Seikatsu: Sotoka is a foreigner who has come to Japan because she's obsessed with Ninjas. She mistakes Bocchi's furtive people-avoidance for ninjutsu, nd refuses to take no for an answer. Bocchi ends up 'training' her in entirely fake Ninja techniques, mostly involving origami shurikens.
* Hitoribocchi no OO Seikatsu that the fact Bocchi went through the effort of washing a cup of Yogurt and bringing it along might make it funny after all.
* Hitorijime My Hero follows the relationship between a male student and his Math teacher (who also happens to be his best friend's older brother).

* Hitori no Shita: The Outcast, the plot is sparked by an act of grave robbery. Protagonist Chou Soran's grandfather's corpse is stolen.
* Hit or Myth, King Roderick attempts to escape his arranged marriage to Queen Hemlock by foisting his job off on court magician Skeeve.
* Hitoshi Morishige is a similar, yet less extreme case. He has already gone through the training and it shows when we see him play, but is still very rough around the edges. I.e: he's seen performing an excellent slam dunk, but then gets scolded by the referee for knocking two opponents down while at it.
* Hitoshi Shinso isn't exactly popular when he's first introduced because of his
* Hitoshizuku-P's song "Sunflowers of Parting Regrets," sung by Kagamine Rin and Kagamine Len, is about a brother and a sister living in Japan during World War II. Though the siblings wanted to go through life together, watching the sunflowers in their garden grow, the brother is drafted into the army, to the sister's dismay,
* hit over the head with a sledgehammer and woken up by being hit again.
* Hit Point, all of these instakill techniques require the opponent to be incapacitated in some way, either by direct game mechanics or simply to keep the foe from taking the (usually quite simple) steps necessary to prevent their impending doom.
* Hit Point lost causes the reader to temporarily lose a point of Strength.
* hit points again will see this happen after a fight in which any player characters were hurt even a little as a simple matter of common sense — usually at least one PC will have some relevant skill, be that mundane or magical. It's relatively unusual to see such a scene played out to much actual dramatic effect beyond the odd bit of inter-player squabbling about who needs the help first or more, though.
* Hit PointsA number attributed to your health that indicates how badly injured you are.
* Hit Points: A number attributed to your health that indicates how close to death you are.
* Hit PointsA stat that tells you how close your in-game avatar is to dying.
* Hit Points damage and paralyzes the victim. If both tentacles hit the Sluggoc pulls the prey to its mouth and bites it.
* Hit Points damage, drain 1 point of Constitution and 1-3 points of Strength.
* Hit Points), Formless Spawn of Tsathoggua (Strength damage bonus), Servitor of the Outer Gods (double Strength damage bonus), Star-Spawn of Cthulhu (1/2 Strength damage bonus)
* Hit Points of acid damage and a chance of biting the victim's head off.
* Hit Points of constriction/crushing damage thereafter. Once per melee round he can extend his tentacles up to 30 feet away to surprise an opponent who thought he was out of range.
* Hit Points of constriction damage. Once a tentacle hits it won't let go until either the Squig or its victim is dead. If four or more tentacles hit the same creature the Squig will pull the victim to its mouth and bite it.
* Hit Points of damage and drains 1-2 points of the victim's Constitution.
* Hit Points of damage and if two or more tentacles hit the same target the mantapus will get an automatic hit with one of its weapons.
* Hit Points of damage as well as rusting any ferrous (iron or iron-based) material it touches.
* Hit Points of damage isn't sufficient to kill them, they're likely to have a fairly decent fortitude save.
* Hit Points of damage on a hit and 1-8 constriction damage each melee turn thereafter until the victim breaks free.
* Hit Points of damage (plus poison) on a hit, which is more than most monsters.
* Hit Points of damage (with a saving throw for half damage) to all within 10 yards.
* hit Rudolph in the head with Rudolph's own helmet. The act caused Garrett to be suspended indefinitely the following day, making him miss the rest of the regular season. At the time, it was the longest suspension in NFL history for a single on-the-field action.

* hits an emotional nadir that they become dangerous, and unfortunately it's almost impossible to tell when or who those are beforehand.
* hits a serious depression (and Jerry, who suffered a similar fate) sitting on some railroad tracks, waiting for a train to run them over.
* Hitscan ability of the bullet-based guns. The relatively slow velocity of the rockets make them pretty easy to dodge and he has the least amount of maximum health compared to the other bosses (even Dr. Schabbs has more health than Otto). In addition, the room he's in has no Mooks to provide support for him and contains four cutaway walls flanking the north and south sides that provide easy cover from his rockets and there's another adjacent room with two more cutaway walls, giving you plenty of space to prepare for his rockets.
* Hitscan: Since bullets travel really fast, they really travel instantly to their destination in a straight line, right?
* Hit's face when he sees how pissed Champa is for him losing and saying how he's going to kill him.
* Hit Somebody (The Hockey Song), there's thirty seconds left in the game when the main character, Buddy, gets the puck and successfully shoots a goal. There's no indication given that it was game winning, but it's still important because it's Buddy's final game before retirement and he's dreamed of shooting a goal his entire career.
* hits ordered by Moriarty, some of them done just to make it look like M is a genuine serial killer.
* Hit SparkEvery kinetic impact makes a bright, fireworks-like effect.
* Hit Spark, it helps you know when one of your attacks hit something.
* Hit Spark: Just in case you missed someone getting slapped in the face.
* Hit Spark (Those lines surrounding the spot where the stick lady kicks the stick guy in the face in the above illustration)
* Hit Spark: When said punches aren't being covered up by the above trope, appears when they hit something.
* Hitsugaya and Hinamori are childhood friends of the brother/sister type. Since blood families are almost unheard of in the Rukongai, families of adopted strangers spring up instead. One old woman in the 1st District became a grandmother to both Hitsugaya and Hinamori and raised them together. Hitsugaya's conflict with Aizen becomes more personal than the conflict between Aizen and other captains because of Aizen's exploitation of Hinamori and Hitsugaya's desire to protect her. This gets much, much worse before it gets better.
* Hitsugaya has an immature bankai because his young age limits his power. As a result, to use its more powerful abilities he has to wait for the atmosphere to fill with a certain level of moisture first. Although he can circumvent this by using one of his zanpakutou's most basic abilities to control the weather, he doesn't like using it as it's also the hardest power to control and, because of his immature bankai, his lack of control can potentially be a problem.
* Hitsugaya hates being called "Shirou-chan" by Hinamori, but has the grace not to retaliate with the nickname he used to give when they were younger, which was "Bedwetter Momo".
* Hitsugaya himself is seen screaming and crying in utter rage and grief
* Hitsugaya is (biologically) only 12-13 years old but doesn't behave like a typical child his age due to having been thrust into the role of youngest captain in history. Aizen works out that the truth is obscured and that Hitsugaya does actually have the in-built weaknesses associated with his biological youth (such as lacking both the life experience and emotional maturity of a grown adult). When Aizen triggers this weakness, the
* Hitsugaya mentions in passing that "commoners" are those who died and came to the Rukon district, while "nobles" are born in Soul Society, but doesn't elaborate on how the noble families are established.
* Hitsugaya's Advance Squad was a warband of shinigami assigned to Karakura Town in anticipation of the Espada threat. It consisted of Hitsugaya, Renji, Rangiku, Ikkaku, Yumichika, and Rukia. Rukia and Rangiku were the two women.
* Hit Team: The only Hong Kong movie that centers on the Hong Kong Police Force's

secretive Surveillance Support Unit.
* Hit the big loop and then the right ramp in a combo is a Super Skill Shot.
* hit the bottle really hard after splitting up with Angus. So hard that she was brought to hospital with alcohol poisoning.
* Hit the Jackpot target next to the Haunted Forest to start a Haunted Scoring mode.
* Hit the lit B-A-L-L target to instantly spell BALL for a Crystal Ball mode.
* hit them very hard until the blood turns clear again. And there's their tongues, which are longer than the rest of their body, and contains a spectrum sedative capable of knocking out almost any living creature it touches.
* Hit them with the ol' "My city's team, right or wrong." Or just call fans of good players and teams, "front runners."
* Hit the Wicked Witch for a bonus and to start a Witch Hurry Up mode.
* Hitting and pitching have separate difficulty levels and sliders, so players can find a sweet spot for both stages of the game independently. The game also offers dynamic difficulties for both, where the game will slowly raise or lower the difficulty level batter by batter depending on how well/poorly the player is doing. Even the scale of how much the game auto-adjusts difficulty can be adjusted.
* Hitting an enemy in the back with fire from the Pyro's Backburner flamethower.
* hitting himself over the head with the phone in the back of the seat in front of him. Much to Marge's disappointment.
* Hitting him with a newspaper (or a frisbee, abet that was accidental)
* hitting it people once the user has found them, but might not be so hot at actually finding them in the first place.
* Hitting moonsaults while weighing around 91 kg at 1.70 meters (201 pounds and 5'7") was impressive enough, but
* hitting on him ''very'' hard. At one point she presents him with a glass of champagne, raises her own, and says, "To us." Sam promptly downs the entire glass.
* Hitting people with Rita's spellbook is a possible melee option in
* hitting the charioteers and the horses with thousands of arrows and javelins to throw in their path (they had invented them due the Celts of Northern Italy using a different model of chariot, and were so efficient that by Caesar's time the only Celts who still used it were the more isolated Bretons, who apparently had not yet gotten the memo).
* Hitting the coin return once produced a zero-value coin. Using the zero-value coin produced a lunch utterly devoid of taste, nutrition, texture, or really anything else. The test-subject who ate it said it didn't fill her up at all. Hitting the coin return
* Hittin' the Trail for Hallelujah Land (1931) [probably the least offensive of the 11] – The only black & white short on the list.
* Hittin' the Trail to Hallelujah Land (1931) features dancing skeletons too.
* Hit You So Hard, Your X Will Feel It!: You're gonna hurt so bad that someone close to you will feel the pain once I'm done with you!
* Hivebent with Feferi. Simultaneously, Feferi does the same thing for the same reason.
* Hive Caste System, sometimes (especially among ants) further specialising the workers into sub-castes like soldier ants.
* Hive Caste System to reshape planets by slicing down the landscape with pillars of water.
* H.I.V.E. fits this, believing that evil should always be intelligent in its design and stylish in its execution.
* Hivefled, and there's enough detail in Hivefled proper to know exactly what was going on. The sidechapters are pretty brutal as well.
* Hivefled, and when speaking to the readers he implies he plans to rape and torture them to death in the same way he did two and a half thousand teenage trolls and attempted to do to his own children.
* Hivefled: Equius has become a little less repressed at the age of eight sweeps, to the point that he takes an obvious opening for a sexual insult towards Eridan, but still doesn't swear. The gang know something is horribly wrong when he utters

the word "crud".
* Hivefled features, among other things, characters commenting on the way they're drawn.
* Hivefled features an IM variation. Gamzee, held captive by the Grand Highblood, manages to get hold of his computer and tries to message his friends. Suddenly, he gets a response from an unfamiliar username: "Did you know you're horrible at faking sleep?"
* Hivefled genderqueer, though he doesn't currently know there's a word for it.
* Hive Fled: GH and the Handmaid were only about six sweeps old when they teamed up with Condesce to battle her ancestor.
* Hivefled has several ghosts who bear the wounds of their deaths; Keskay Sigsia's arm is missing as it was eaten before she died, while Ukuthe Lorain died of blood loss when her arm was torn off and now has it floating beside her shoulder stump.
* Hivefled: in his youth, the Grand Highblood killed his flushcrush the Handmaid out of jealousy, then spent days in his room painting a portrait of her in her own blood.
* Hivefled: in one of the less grimdark scenes, the four trolls with the smallest and thus most easily-concealed horns dress up as humans to go food shopping. Not only are they wearing hats and gloves in June and concealing their grey skin only with face-paint, but John only just manages to stop them talking about eating babies in public.
* Hivefled. Later on, when the trolls meet the humans, values clash. The trolls are shocked that humans sleep on beds (a.k.a. "concupiscent couches", used only for sex by trolls), bury their dead (trolls think death is something to be faced, not hidden), have separate words for consensual sex and rape (among trolls rape is disapproved of but not actually illegal, victims are given little sympathy, and the word for it is actually the word for the consensual variety pronounced more patronisingly), and don't eat babies (troll grubs are born in such vast numbers that they'd strip the planet bare if significant numbers weren't eaten).
* Hivefled. Nobody's ever bothered to even try before, and they hook one up out of junk they have on hand.
* Hivefled proper details the aftermath and the gang's plan for revenge/ensuring it doesn't happen again.
* Hivefled sets in and the plot kicks off, these issues are usually rectified.
* Hivefled shows Gamzee, locked in a torture chamber and sure he's going to die, performing the last rites due all trolls sacrificed to the Mirthful Messiahs for all the previous victims of the cell. Admittedly, it was done partly out of spite for his captors, but still.
* Hivefled, then went into action thriller, then into a light-hearted adventure, then back to the action until the two stories met, upon which the genre did a 180 and became a wacky comedy, though now it's becoming a dramedy.
* Hivefled, this is Rose's method for preventing people from noticing the poorly-concealed trolls. "Here is some money. Is this enough to forestall further questions?"
* Hivefled; trolls don't make a gender distinction in the promiscuity stigma. Eridan, when he joined the fleet, slept with anyone who looked at him in a desperate attempt to fit in, and rumours of him committing theft got mixed up with stories of him fucking everyone and got him arrested for illegal prostitution.
* Hivefled) was Laneen, who was probably Condesce's daughter. They also have some interesting plans for their confirmed offspring, Gamzee and Feferi, though death may be the least of their worries.
* Hivefled when the normal social rules of trolls would entitle Harkol to beat the hell out of him, just to see him be disappointed.
* Hivefled; while raping Dualscar, the Grand Highblood forces him to try to tell a joke with the promise he'll be allowed to live if he finishes the joke before GH is done with him.
* Hivefled would do him good (the implication being that he needs a stabilizing influence).
* Hive. Great Collective, Huddling of the People, Fecundity Tower (yeah...), Sea

Collective, and, of course, The Hive.
* Hive Mind (2016). Amber and Lucas share one once they become a couple.
* Hive Mind (2016): Amber does this occasionally to take a conversation off-the-record, such as talking to the Hive Politics team about Blue Upway.
* Hive Mind (2016): Exaggerated and justified. Losing even one telepath could doom the Hive, so telepaths can do more or less whatever they want with no repercussions. Amber executes someone that the Hive wanted alive; Morton kept a woman prisoner for a year in an attempt to make her love him. Keith frees a dangerous prisoner and puts another telepath in danger, and even that doesn't get him in trouble in any significant way.
* Hive Mind (2016): Hive England uses tracking chips to control sociopaths and other people who are considered irredeemable. The chips can be remotely triggered to explode if necessary.
* Hive Mind (2016): Hives are allowed to choose limited numbers of individuals who can have 'duty children' via surrogate mothers. One in one thousand is allowed to have six duty children; one in one million is allowed to have twenty-five. Duty children can be raised by the parents or adopted out; there is high demand for them as adoptive children due to the high likelihood that they will come out of Lottery at a high level.
* Hive Mind (2016): In the past, those classified as criminal or socially undesirable were barred from having children. This led to a population crash due to weakened disease resistance and assorted useful characteristics being mistakenly marked as negative. The controls were removed in order to reverse these problems, and Lottery was created to help channel personality traits that could be negative if expressed in an antisocial way. Joint Hive Treaty Enforcement mandates that all adult citizens are allowed to have two children if they want, and certain individuals are allowed to have many more 'duty children'. There do not appear to be rules against having more than two children, but below certain levels it is considered socially unacceptable.
* Hive Mind (2016) is set in a future where humanity apparently lives almost exclusively in arcologies called Hives. The main characters live in Hive England, a hundred-million-person enclosed city that provides almost all its own food, water, power, and other needs. They do trade stuff with other Hives, but not for much — the only trades we see on-page are for extremely advanced medical technology.
* Hive Mind (2016) Lucas is convinced that Amber is going to dump him for her teen level boyfriend Atticus, but the trope is ultimately subverted as she stays with Lucas.
* Hive Mind (2016) moment between Adika and his deputy Rothan where (due to regulations) Rothan must take command, ordering Adika to step down and threatening to stun him if he doesn't comply. Several days later, Adika gathers everyone together, making Rothan think that he's getting demoted, and tells them that Rothan did exactly the right thing, congratulating him for both being willing to step up and for successfully handling the crisis.
* Hive Mind (2016) offers Morton's love for Celandine. They knew each other for one year, and she spent the whole time very openly hating him until she faked her death to get away from him. Forty years later, he's still in love with her.
* Hive Mind (2016): Played for laughs. Caleb's level 91 parents, once they get over their fear of offending their level 1 son, complain that he was always too daring and wonder why he couldn't have been a nice, normal son like his level 89 older brother.
* Hive Mind (2016) rare - one in a thousand people are borderline telepaths, and one in five million are full telepaths - so they can't afford to let any do anything else.
* Hive Mind (2016) series has about 0.1% of their population with borderline telepathy. Real telepaths are much rarer, about one in every five million. Exactly where this ability came from is unknown.
* Hive Mind (2016), telepaths are assigned teams of bodyguards, and since they often have to be in very close contact with these bodyguards for extended periods

of time, they're supposed to be people the telepath finds attractive. This results in the male telepaths having bodyguard teams full of hot badass women.
* Hive Mind (2016): The Hives are of the deliberately-constructed kind. Hive England, where the main characters live, holds 100 million people in 10 zones, with 100 residential levels and 50 industrial levels above that. There are one hundred and seven Hives in all, where humanity almost exclusively lives; it is unclear whether Hive England is relatively large, small, or in-between.
* Hive Mind (2016) where living on a higher level is more prestigious and gives nicer living arrangements, uses "high up" as a generic positive and "low down" as a mild negative. More severe negative emotions are vented with "waste it" or similar.
* Hive Mind After that, they're right back to trying to wipe out humanity so they can make Earth their new home.
* Hive Mind: A link so strong that the individuals function like a single mind.
* Hive Mind and Earth is recovering thanks to the remaining Deep Ones. The giant monsters also thank the readers for their time and attempt to end their partnership on amicable terms.
* Hive Mind and like to extract planetary cores. There's also a lot more than a single fleet.
* Hive Mind and the harder it is for the Dead spirit to keep them animate.
* Hive Mind and then went on to slowly trick you into doing what the virus wanted. Human sensory systems are entirely too primitive for affines to work on them, but the seemingly benevolent AI overlord of a planetary colony might one day start turning into a brutal dictator and slaughter huge numbers of its former citizens without a care.
* Hive Mind assimilate all other AIs into their Singularity if they wanted to but they've also explicitly stated that violating the sanctity of the mind is one of the very few moral boundaries they're unwilling to cross.
* Hive Mind because he did thought that a giant man with a purple helmet would not fit the grounded tone of the Ultimate universe.
* Hive Mind by the Xel'Naga, are sapient intelligent predators that have spent generations hunting, killing, and adapting. They consider the other Zerg to be corrupted.
* Hive Mind called "the Union" which possessed telepathic and telekinetic abilities.
* Hive Mind composed of trillions of sentient beings, many of whom were assimilated against their will, the Borg suppress individual thought and initiative. Their preference is to acquire new knowledge via assimilation rather than through innovation.
* Hive Mind, containing the sum of its combat experience and memories and deployed when the swarm faces a truly fearsome enemy and can be recreated if its dies. When the time comes for it to go elsewhere, it suffers the same fate as the lowliest organism: it gets reabsorbed into biomass and its consciousness is injected into the body of another Swarmlord on a different battleground.
* Hive Mind each of them produce nectar, and find their way home from two miles away. Once home, they relay these facts to the rest of the hive by dancing.
* Hive Mind empires, be they organic or robotic. There's no political division between the physical extensions of a single massive mind, so these empires are truly united and immune to rebellions or civil war. They do, however, have to split up their territory into sectors and assign local governors to exercise efficient control just like individualist empires do, although in their case it's probably more akin to sharing network load between several servers or computers instead of forming semi-independent fiefdoms.
* Hive Mind here, being very selfish and prioritizing its ambition above all else, and manipulating and coercing its ex-boyfriends to help with its plans.
* Hive Mind. However, the Hive Mind will occasionally invoke this trope by making parts of the Hive Fleets go to war against each other. In-universe, the explanation is that the Hive Mind is culling weak elements out of its swarms and strengthening those that survive (out of universe, this is just to give players an excuse to have Tyranid vs Tyranid battles).

* Hive Mind in addition and makes her invested in making people happy, but it also makes her vulnerable. There are also borderline telepaths, who only gain flashes or "insights" of telepathy and, while still rare, are more common than true telepaths like Amber.
* Hive Mind is fond of "man what" (no punctuation) as a response to any completely brain-spraining statement.
* Hive Mind liquid called antidermis, made into biomechanical cyborgs whose life process involves their musclemass, organs and minds turning into gas at a certain age, after which they gain the ability to leave their bodies and possess machines and lose all biological needs.
* Hive Mind of countless trillions of alien, animalistic beings ranging from feral beasts to immense starship-scale brains, the sheer amount of thoughts moving throughout their fleets casts a "shadow" in the warp similar to a radio jammer. The mere presence of this "shadow in the warp" effect dampens psychic powers and cuts off communication. On the extreme end is Hive Fleet Kronos, a specially-engineered Tyranid force that uses its shadow to hunt down Chaos fleets and completely shut down their Warp sorceries and banish daemons.
* Hive Mind of planet-spanning forests who turned the worlds they lived on into paradises.
* Hive Mind of snake-like lawyers. There's a standing bounty on them so the crew kill them at every opportunity.
* Hive Minds, and is now out to kill all the other organics in the galaxy. As with Fanatical Purifiers, Devouring Swarms and Determined Exterminators can't conduct normal diplomacy (though the latter can treat with other Machine Intelligences, at least) but gain boosts to war production and weapon damage to compensate.
* Hive Mind's orders to each individual 'nid in range. Taking out a synapse creature (which can best be summed up as "shoot the big ones") causes momentary confusion amid the 'nids until another synapse creature gets in range.
* Hive Mind, so that each new generation becomes closer to a pure Tyranid).
* Hive Minds planets. Their description says that the entire Hive World is one single giant organism linked to the Hive Mind, and any foreign being that makes planetfall is instantly attacked by the very ground itself.
* Hive Mind that will occasionally run survival-of-the-fittest tests on itself, and the latter has recently been broken up into multiple rival "dynasties", some of which are lead by rather... damaged individuals.
* Hive Mind. Their technology is ugly, industrial, but functional; they have no real sense of aesthetics or artistic creativity, and no purpose other than to consume and expand.
* Hive Mind, there's no need for names at all, the Cerebrates are the only ones who can even be called individuals in the Swarm, except for the Overmind. There can't be enough Cerebrates to warrant last names.
* Hive Mind, the sacrifice of any number of expendable drones (i.e. the people they assimilated and are supposedly "helping") in the pursuit of their goals, and the annihilation of races deemed inferior or threatening, and those few who get de-assimilated are shown to be extremely traumatised by the experience and have trouble re-adjusting to normal life, if they even remember who they were in the first place.
* Hive Mind to build their vast machines and constructs, then install an organic "mind fluid" of living Vex into these machines to control them.
* Hive Mind to Peter, he's killed off in his debut when all of his spiders die.
* Hive Mind works, are actually the good guys in a number of stories. They started out as a handful of scientists who linked their minds as an experiment and subsequently released a virus to assimilate more minds into the collective, but later their goal became simply to survive. They consider conscripting their enemies a more humane alternative to killing them.
* Hive monkeys have displaced raccoons and other small-to-medium sized omnivores in North America, and are capable of killing humans.
* HIVE pretends to be excruciatingly absent-minded in front of his students so that he can observe them more easily without suspicion. Because this is just a front, he

thinks of himself as being actually very put-together and clear-minded. In actuality, he is really only marginally less absent-minded than he pretends to be.
* Hive Queen that speaks through the bodies of the dead and dying and her species did engulf the galaxy in war several centuries ago, but she isn't inherently evil. In fact, she's just been imprisoned and enslaved as a means of creating shock-troops; if you release her, she joins forces with you out of gratitude and honours her promise without any backstabbing.
* Hiver Princes can vary in size depending slightly on their mother, but most of them are intended to do battle for a princess' favour and tend to be larger and more powerful than warriors.
* Hivers are organized in clans centered around a princess, who has birthed all members of that clan. Aside from birthing princesses, hivers come in three kinds: Workers (scientists, engineers, artists, etc.), warriors (heavy manual labor, high-risk work, soldiers, etc.) and princes (sexually active and otherwise basically big, intelligent warriors). Each of the castes can apparently be further divided, as the princess is able to modify her eggs to slightly specialize the role of the hiver that hatches from it — she can, for instance, make a clutch of soldiers slightly more radiation-resistant than normal to work in fallout clearance, but she can't make soldiers with wings and acid-spitting. Hivers thus use a panoply of technology (guns, tanks, starships, armour, etc.) roughly equal to those of humans and tarka, and nothing strictly prevents a worker from picking up one of their guns and using it... Apart from the problem that said gun was likely built for a soldier and weighs a bit more than your average worker can handle.
* Hivers tunnel drive is similar to humans' but being able to form their own paths comes at the cost of not being as fast (their paths also collapse over time, accelerated by continuous use). Whew!
* Hivers used to send and receive messages. While ship-sized gates require being in the gravity well of a planet-sized object, the mass of the ship is enough for a communication gate.
* Hiver to a few K'kree colonies, they were so horrified that they sterilized the planets in question.
* H.I.V.E. Series and convinces local contractors to lend a hand in fixing the orphanage for free, with the promise of them making it on television. Obviously, they don't.
* H.I.V.E. Series as increasingly tragic events happen around and to him.
* H.I.V.E. Series but then he returns in book six, when he is finally killed. We think.
* H.I.V.E. Series, develops this ability in book three to a limited degree and improves over the course of the series. He has a somewhat limited knowledge of computer programming, however, so when he tries to hack something he generally leaves an obvious trail. For this reason, when subtlety is required, Laura will do the hacking, but if it's an emergency Otto will retrieve any information the protagonists are after.
* Hive Series features a race of Nebish — four feet tall, four toes, pink blood due to lack of hemoglobin...
* H.I.V.E. Series: "G.L.O.V.E."', or the Global League of Villainous Enterprises. A council of the leading supervillains controlled by the sinister 'Number One'.
* H.I.V.E. Series is this, which she passes on to Wing, who attempts to pass it on to Shelby, although both Alphas are still working at it.
* H.I.V.E. Series, this is the mark of someone who has been infected with Animus. They also have black blood.
* H.I.V.E. Series. This only serves to screw up Otto and keep him away from romance for a while afterwards.
* H.I.V.E. Series when first taken to the Island. It doesn't work, but the routine really irritates everyone.
* hive species travel around in cosmos crafts that are about the size of a small planet.
* Hiveswap are granted the ability to order normal toppings, such as pepperoni.
* Hiveswap being "Having said fan trolls survive more than one panel"), two people

genuinely did pledge $10k to have their fan trolls in the comic and Hussie had to immediately limit the tier to two people to stop any more pledges from being made. Sure enough, Hussie kept his word, included the trolls and immediately killed them off afterwards.
* Hiveswap Friendsim has some fun with this. At one point, you're offered a meal of "grubcakes with boiled tree blood and churned dairy product"—IE, pancakes with syrup and butter. When you wonder if the drink is "brown bean juice", you get a bemused "No, that's just coffee" in response.
* Hiveswap Friendsim isn't bad-looking, but his personality is so repulsive that players often consider the good ending of befriending him to be a bad thing.
* Hiveswap introduces us to an isolated kid whose authority figure doesn't understand them, their bedroom full of interests, their special personality/weapon, their character quirk, has them communicate with other kids, has them communicate with Trolls...
* Hiveswap is now more explicitly likened to Japan, as it is mentioned specifically in regards to manga, anime and hentai, but also solidifying the heterogenous nature of Alternian society.
* Hiveswap often does this with troll slang with insectoid, biological, and "evil" pun themes for many real-life equivalents. There's "Cruel Aid" for Kool Aid, "Chittr" for Twitter, "Goregle" for Google, "Tomewriggler" for the term "Bookworm", etc.

* HIV is often falsely suspected to be one of these; seen under microscope, the virus is an incredibly layered and complex virus. It also has a very low incubation time, which would be important for an artificial virus to enhance its spread potential. And, while it was probably originally contracted by blood contact with apes being harvested for food, actually confirming this beyond a doubt is problematic. Naturally, thanks to these facts, conspiracy theories run rampant.
* HIV only attacks cells expressing the ccr5 or cxc4 receptors (usually cd4 t-lymphocytes).
* Hiwatari Sr. has many, very creepy moments with Satoshi, his adopted son. From "I missed seeing your face" to "I'm doing this for you, my precious son" to "I don't want to lose you" to "One has to take good care of their tools" to a scene in Stage Four (manga volume 15) in which he forces Satoshi to transform while holding him down over a table — yes, the entire thing has very disturbing rape undertones.
* Hiwatari's transformation into Krad is very painful, one of the factors being the fact that he usually fights it quite hard. Contrast with Daisuke's relatively easy transformation in to Dark, only experiencing pain for the first time and

* Hjältekväde nobles go out to fight, they're just as vulnerable as anyone else...
* Hjältekvädet, the hero keeps getting killed in battle for fairly understandable reasons, with the narrator having to retcon each event with all sorts of implausible coincidences (he gets shot with an arrow to the head, but a goose lands and takes it for him; he gets stabbed from behind, but he happens to carry a sack of potatoes on his back for some reason; he gets crushed by a panicked horse, but it gets distracted by an attractive elk and leaves instead; and he gets hacked to pieces by a superior swordsman, only to instead just win without further explanation). This is because the narrator/songwriter is getting paid to make a heroic ballad, not a realistic one.

* H. L. Hunley. The original crew died on a test run when it sank. It was salvaged, and the second crew (along with its designer) died similarly on another test run. Its third crew is believed to have been sunk and killed because it was too close to the torpedo explosion that sank its Union target.
* H.L. Mencken could be the poster child for this trope, until he fell madly in love with a chronically ill fellow writer.
* H. L. Mencken. The man hated everything about America, his columns bemoaning all the evils that plagued the United States in the '20s and '30s and tearing apart every politician he could get his hands on. Particularly notable is the fact that he predicted and answered the probable question:
* HLN" cases and "humorous" police news, dubious medical/consumer news and/or advice, "fads," Hollywood/sports news and rumors, overblown coverage of certain criminal trials (e.g., Casey Anthony, Jodi Arias), and confrontational editorializing — over-serious investigative/watchdog journalism and commentary.

* HMAS Sydney. The use of the false flag, camouflage, and signal trickery combined with slack handling by Sydney saw the two ships enter very close range, at which point the surprise of the Kormoran allowed it to gain an upper hand on the heavy cruiser and pound it with torpedos and heavy gunfire. While Sydney was able to sink the Kormoran in retaliation, the majority of the German crew survived and were rescued, while the Sydney went down with all hands (the largest Allied ship to be lost with all hands) in a major blow to Australian morale.

* HMNB Devonport, in Plymouth, UK, tests the Nuclear Accident Siren every Monday morning at 1130. This is a massive, WWII-esque 'The bombers are coming!' alarm that can be heard about a mile away in parts of the city and is a little unnerving if you haven't heard it before or aren't expecting it.

* HMS Bounty in 1789. The descendants of some of the mutineers still live on the island they sailed to. Pitcairn Island is one of the most dysfunctional societies on the face of the Earth, featuring a system of institutionalized child abuse: the older men have complete sexual access to young girls from puberty to marriage. This was kept an absolute secret from outsiders for well over a century, until some people finally left the island. Fletcher Christian has a lot to answer for.
* HMS Chronabelle and Edward Von Arkham, respectively) are but three of the crews of dirigible aviators sailing the skies between their hometowns and conventions.
* H.M.S. Defiant placed in the time of Spithead mutiny, the crew plans it from the beginning, and Dirk Bogarde's super-evil, sadistic first lieutenant gives them pretty good reason to do it.
* HMS Dreadnought, which redefined battleship design for the 20th century, was constructed in a year and a day: Her keel was laid down on 2 October 1905 and she began sea trials 3 October 1906. This was accomplished by several months of stockpiling and prefabricating before the formal laying down, combined with a very large crew on a 69-hour workweek.
* HMS Furious was one even before it became an aircraft carrier. It was designed as a "light battlecruiser," with very light armor, shallow draft, and a very big gun on a single mount, to operate in shallow waters.
* HMS Glowworm got into the same situation in 1940 vs the German cruiser Admiral Hipper. Although by the end some of her manoeuvres were random (her bridge had been destroyed), the 1,350 ton destroyer fought so hard against her 16,270 ton opponent that her commander was awarded the Victoria Cross posthumously, partly on the
* HMS Leviathan, about a troubled aircraft carrier, a mentally unstable misfit pilot buzzes the conning tower several times seeking to pluck up the nerve to commit suicide by crashing into it, so as to take the ship's hated senior officers with him. He badly botches his suicde and after he goes kamikazi, the ship needs emergency refit.
* HMS Leviathan describes a new generation of inexperienced young officers, Bird and Stiggins especially. Commander Markready, a commanding officer with nearly three decades of service, notes with distaste that practically all of them are on short-service commissions of two or three years - as if they are playing at being Royal Navy officers, and are not prepared to fully commit themselves.
* HMS Nightingale, Alexis, now a lieutenant in command of a customs corvette, uses her power of impressment as a favor to a local magistrate to take some repeat offenders off his hands.
* H.M.S. Pinafore after being turned down by Josephine. Subverted. It moves her to declare that she loves him after all.
* HMS Pinafore, First Lord of the Admiralty despite lacking any naval experience.
* H.M.S. Pinafore has two potential mates, the wealthy Sir Joseph Porter and the lowly Ralph Rackstraw. She even has a dramatic aria comparing the two, though at other times she obviously favors the tar over the lord.
* HMS Pinafore Hugh Childers who, while well-regarded as a politician, was a

dreadful First Lord of the Admiralty.
* H.M.S. Pinafore: "I'm Called Little Buttercup", "I Am The Monarch of the Sea" and "When I was a lad" (Sir Joseph), "I Am The Captain of the Pinafore" (Captain Corcoran), "We sail the ocean blue" (the crew).
* H.M.S. Pinafore in a law firm. "A British Tar" presents the average sailor as being this trope, however.
* H.M.S. Pinafore, it renders Josephine too low on the caste ladder for an admiral to woo. Lord Admiral Porter heaves a sigh and avers that he will propose to his second cousin Hebe instead so that his time aboard the Pinafore won't be a total waste.
* H.M.S. Pinafore, little Buttercup, the captain's nursemaid, ends up marrying him.
* H.M.S. Pinafore plus on board at the right time to reveal it, etc., etc. But hey, look at that, it happens to solve both the A- and B-plots in one fell swoop! Cue the finale, it's time to go home!
* H.M.S. Pinafore: Sir Joseph enters "accompanied by the admiring crowd of female relatives who follow him wherever he goes" ("relative" is a euphemism here). Sir Joseph obviously enjoys the attention, but doesn't actually want to marry any of them. On the other hand, Hebe is the only "relative" actively pursuing him.
* H.M.S. Pinafore speaks with exceedingly purple prose for a "humble sailor".
* H.M.S. Pinafore the cat. More specifically, the cat-o'-nine-tails the Captain can't stop himself from waving, in spite of knowing he has to stay hidden.
* H.M.S. Pinafore the first name of the character Ralph Rackstraw is pronounced Rafe, as was usual in the UK. (The name is rhymed with "waif" in "A many years ago.")
* HMS Surprise. Unlike many other examples, there isn't much reason to believe they are distilling behind the backs of their superiors at all. At the time, the rum ration was hallowed tradition and medical common sense in the Royal Navy and one of the reasons Jack Aubrey chose to return to the Galapagos Islands was to replenish his food stocks. To assume that "food stocks" includes some form of liquor to replace or stretch the supply of regulation rum isn't that big a stretch.

* Hoax Hunters investigate supernatural phenomena and cryptids. Then, after finding them (they usually do), they do their best to cover them up, using their TV show to denounce whatever it is as a hoax.
* Hoax Hunters is set in a world where magic and monsters are real, but unknown to the general public. That last part is due to the efforts of, duh, the Hoax Hunters, who investigate incidents, cover them up, and use their TV show to say it was all a hoax.
* Hoax Hunters is something like this. He was an astronaut whose consciousness was split among a murder of crows when he died; the crows now share a hive mind and inhabit a space suit.
* Hoax Hunters — they're paranormal investigators with a reality TV show, disproving supernatural phenomena wherever they find it. Naturally, the stuff they're debunking is basically always real; why cover it up when you can decry it?

* "Hobart's Funnies" were a complete armoured division (the 79th) of specialised armoured engineer vehicles, mainly tanks, which were crewed by the Royal Engineers and used as specialised assault vehicles to breach German defences during the Normandy assault and the break-out into France and on into Germany. The range of specialised engineer vehicles, developed by the British, were offered freely to the US Army who largely refused them for a variety of reasons. This lack was keenly felt by the Americans when they had to beseige German-held ports in Brittany and on the French coast and had to call for British armoured engineer assistance. Canada was not so myopic and took all the Funnies they could get for Juno Beach, which is part of the reason why the Canadian Forces were able to punch through so quickly on June 6th, 1944.
* Hobbes, depending on your interpretation. Aside from Calvin, the characters treat Hobbes as inanimate (though Susie has occasionally interacted with Hobbes similar to how Calvin does). When Calvin's mom laundered Hobbes, he stumbled around a bit after coming out of the drier. The creator of the strip, Bill Watterson, has stated that he does not believe Hobbes is either truly alive

* Hobbes Was Right as they have poor judgement, but fear and tyranny will keep them in line!
* Hobbes Was Right: Humanity defaults to evil. A very cynical worldview.
* Hobbes Was Right: Humans need to be ruled with an iron fist in order to stop us from fighting all the time.
* Hobbes Was Right: Predominantly among the British schools of Enlightenment thought, historically.
* Hobbes Was Right: The belief that humans are inherently base and cruel, and that they require tyranny to be kept in line.
* Hobbie Klivian also had a scene where Biggs hinted that the same fight that took Hobbie's arm also left him needing artificial genitalia.
* Hobbit and the book can be mildly Anvilicious about that sort of thing, though fortunately, the author's skill keeps it in control.
* hobbit, but centuries of living under the Misty Mountains under the corrupting influence of the One Ring gradually turned him into a degenerate nocturnal creeper.

* Hobbit, could qualify. Especially since in the Lorwyn block, they are the creature type closest to what you would expect from humans (live in cities, have pink skin, use tech rather than magic...) They have the proportions of hobbits and lead idyllic, pastoral, cooperative lives. Lorwyn deliberately had no humans in it at all unless planeswalkers count.
* Hobbit fan can easily deduce from the title, the whole company (except Bilbo and Gandalf) is actually female. This backstory is the reason why they want to reconquer Erebor; they want a place to live in peace. While others seem to cope relatively well with the (marital) rape, Thorin, having been raped out of wedlock, is so traumatized she becomes insane ... just like in the original, but for very different reasons.
* Hobbit, Fem!Bilbo first fell in love with an abusive jerk who just wanted to use her for sex because she's infertile, which makes her ineligible for marriage in Hobbit culture. Thorin is her second love.
* Hobbits: Also known as "halflings". A small people who live in pastoral country and like simple pleasures. They're rarely a particularly powerful or influential faction, but depending on the context may be portrayed as having a down-to-earth, folksy wisdom other races lack.

* hobbits) are a short human subspecies prone to thieving, drinking, and fornication at the drop of a hat. They are, however, excellent snipers and cooks, the first of which makes them accepted by officers and the second by the Guardsmen. They also have a reputation for running the informal black markets that pop up in every military camp anywhere.
* Hobbits: Chilchuck is a halfling with keen senses. He is so light that he can avoid setting off pressure plate traps, and also has a very youthful appearance. Because of their diminutive stature, fast aging compared to other races, and child-like appearances, halflings tend to suffer the most discrimination.
* Hobbits divide themselves into three main breeds or tribes, one of which is named for their fair skin and hair: the Fallohides. Most hobbits have brown hair.
* Hobbits have this quality, mental resiliency. Their ability to shake their troubles and get past horrible experiences is often mentioned. One example is Merry and Pippin strolling around in Fangorn forest being curious about their surroundings and seemingly with hardly a care in the world. This after they've been abducted for the purpose of
* Hobbitskiye Igrischa and various plots from its history. The rest is vodka, traumatism, total lack of seriousness and plot driven by inter-team warfare.
* : Hobbits see braiding as an activity only done by women and something that's not very beneficial, whereas dwarves braid as a sign of status, courtship and friendship, as well as training the fingers and their eye-to-hand coordination for fighting and craftsmanship.
* Hobbits setting. Their entire racial fluff is about how they are eternal children, full of hope, innocence, wonder, and optimism, and so they never fall into evil behavior or mannerisms.
* Hobbs & Shaw: Deckard Shaw becomes upset when he notices Luke Hobbs is attracted to Shaw's sister Hattie and tells him he had better not try anything, but Hobbs taunts him by saying soon he will have "horizontal hula sexy-sexy time" with his sister.
* Hobbs & Shaw has a version of this. Hobbs, jumps through a window and rappels down the side of a building after their antagonist, while Shaw takes an elevator along the building exterior that he knew about all this time, mocking his partner through the window.
* Hobbs & Shaw playing Brixton is probably meant to play into that.

A shovel could fold to fit in a pocket, a self-deploying multi-wing modern surgical hospital in a single (rather heavy) shipping container, needing only the addition of perishable supplies, a water source, and staff.
* Hob Gadling. Hob lives forever, thanks to the whim of Dream. He meets up with Morpheus every 100 years, allowing for several instances of Such Memories in their conversations with each other; the changing times get a visual reference in the differing costumes and backgrounds shown; ranging from the Tudor tavern they first meet in to the glass and chrome, trendy wine bar in which they're shown at the end of
* Hobgoblin Dragoon, which rides a giant cicada and fights skillfully with a lance.
* Hobgoblin is effectively a palette swap of the Green Goblin, albeit with a hooded cape. There is an in-story reason, as the person behind the Hobgoblin mask intentionally dyed it a different color.
* Hobgoblins are also called "hobbos" by Durkon during the battle for Azure City.
* Hobgoblins, are generally more of a militaristic society than one composed of PMCs, but that just makes them more valuable when they do hire their units out to others.
* Hobgoblins are quick to turn tail when the odds are against them. One example is a hobgoblin mercenary Oglah Khan, who constantly switches sides when the side he is on is losing.
* Hobgoblins are the English cousins of the Brownies. They have a stronger temper than that of the Brownies, and may react unfavorably to families moving out of the household.
* Hobgoblins gang by the person who directed it. "It shoots right to the top of the list of the worst movies we've ever done," writer Paul Chaplin commented. Enough interest was generated in it that a sequel was made for it, 21 years after its original premiere.
* Hobgoblins, some of the characters visit "Reputation Road." The area is surprisingly well organized, including helpful signposts to tell you where to park if you want to just make out, or if you want to "go all the way".
* Hobgoblins there for players to slaughter en masse, after all), but lack the hobgoblins' formal militarism.

Sure enough, Bobo is persistently ignored, complete with drink pouring, which becomes a problem when he tries to get help in joining the circus.
* Hobo Bros, and react with mock horror with almost everything Barney does in-game.
* Hobo Bros hilarious, and often do it themselves, calling it the "Asian voice".

* Hobo Bros levels. In one episode, which is even titled "SMG4 (Luke's nickname) RAGE QUITS", he gets so fed up that he has to get up and leave the room in order to stay calm.
* Hobo Bros. Luke, wearing a hoodie, claims that he's dressed as a "scary hobo" for Halloween.
* Hobo Bros props and characters while Kevin reads a list of words or phrases that Luke has to work into the story.
* Hobo Bros sometimes do "Asian voices" that use this accent. The brothers note that they have Chinese ancestry themselves, but still find the voices funny.
* Hobocop had a Pilot called "Nose Corruption" which was mistakenly aired in the TPH children's cartoon block.
* hobo; Ernest Borgnine's character briefly climbs inside a burning boxcar, and proceeds to almost cough his lungs out from smoke inhalation.
* Hobo Johnson describes being in love with someone who's in a relationship, while continuing to be a supportive friend to her and restraining yourself from making a move.
* Hobo Johnson describes being out for coffee with someone he likes who's in a relationship and tries to stop himself from confessing to her:
* Hobo Johnson discusses the trope namer's tendency to fall in love easily both by using it as a metaphor for Hobo's own string of failed relationships, and by suggesting that if the two characters survived the play, they would have gotten divorced.
* Hobo Johnson - "Happiness": about Hobo's girlfriend leaving him due to his comments about her career, while he regrets his actions and wishes her success without him.
* Hobo Johnson, humanity evolves, discovers it's going to die, invents religion and government, and conflict accelerates until humanity destroys itself in a nuclear war. The cockroaches survive, become intelligent, and the whole cycle repeats itself.
* Hobo Johnson - "Mover Away" and "Moonlight" are about Hobo's girlfriend leaving him. "Mover Away" reminisces fondly about how much he loved her and wanted to things to work out, while "Moonlight" pus the focus on the despair he feels about her being gone.
* Hobo Johnson's music frequently juxtaposes very sad lines with mundane ones, lending humor to both. From "Subaru Crosstrek XV":
* Hobo Johnson song "Me and the Cockroach" describes a society of intelligent cockroaches that arises after humanity destroys itself in a nuclear war. They succumb the same pressures as the humans and are pushed to develop a doomsday weapon, but cockroaches are immune to nukes so they need to come up with something else. The cockroach doomsday weapon is a missile tipped with a giant foot.
* Hobo Johnson's "Sex and the City". The song, which is overall about relationships and Hobo's sex life, has a vignette about what would happen if Hobo was hotter. He'd be in LA, or at your mom's house... eating all the sandwiches.
* Hobo Johnson's style, which often goes from soft, conversationally-delivered lines to screamed phrases. The chorus to "Peach Scone" goes:
* Hobo Johnson that goes into so much detail about the specifications of the car that it's practically a commercial for the car, particularly in a spoken outro that in the video is overlaid by text disclaiming that it's not a commercial or sponsored by Subaru in any way.

* Hob, the youngest member of Cain's cult, makes them look innocent in comparison. He's not above killing cops, even trying to garrote Lewis while Murphy is beating up Officer Duffy, and uses his age to avoid getting gunned down by RoboCop.
* Ho Chi Minh was a rebel against Japanese occupiers and French colonialists in the late 40s and 50s. Among the American anti-war left, despite being the leader of the North Vietnamese government, he was seen as a rebel against the US Government.

* Hockey goaltender Patrick Roy was famous during his active career for naming his goalposts and talking to them, thanking them when a shot bounced off one of them instead of going in. Considering his highly successful career, he was probably on to something.
* Hockey has some extremely detailed rules about extraordinarily unlikely scenarios, most of which have never come to pass, (and an unusual number of them surround goalies). Most hockey fans - even dedicated ones - are unaware these rules even exist. For instance:
* Hockey Homicide (1945): During the utterly insane climax, one of the hockey players skates toward a goal gathering pucks with a snow shovel, making the goalie jump out of his uniform before he gets hit with them.
* Hockey in particular is notable for one trait. The padding more closely resembles medieval plate armor than safety equipment, and for good reason. A hockey puck is a rock (or more accurately, ice)-hard piece of frozen vulcanized rubber often hurtling around at 90 miles per hour or more. Players are moving at what foot sports would consider sprinting speeds nearly constantly, and can put on even faster bursts when necessary, resulting in players
* Hockey Mask and Chainsaw: Although in references to these films rather than in the actual films.
* Hockey Night in Canada began airing on radio in November 1931 and moved to television in November 1952 (the first year of regular television broadcasts in Canada), and is the world's longest-running sports show.
* Hockey Night in Canada, CBC promoted the contest and the competing composers with coverage on its news site.
* Hockey Night in Canada, due to various licensing agreements with teams and broadcast agreements, was widely seen as "The Toronto Maple Leafs Show" with the occasional spinoff "The Montreal Canadiens and Someone Else". This problem eased significantly when the show went to a two-game format, the later game finally allowing the western Canadian teams to get regular national airtime.
* Hockey Night in Canada may be a good mid-game commenter, but it's sometimes hard to tell what he's saying over his extremely loud and varied wardrobe.

* Hockey Night in Canada The network quickly started to simulcast NBC's feed, but it too was messed up for a few minutes (the top of the screen was at the bottom and pushed the rest up).
* Hockey player Alexandre Daigle, after being picked first overall in the 1993 NHL Entry Draft, said "I'm glad I got drafted first, because no one remembers number two". And then heapfuls of irony kicked in, as Daigle was an underachiever who was out of the league by the age of 25 (he came out of retirement 2 years later, but only had some success playing in Switzerland!), while the second pick, Chris Pronger, was a dominating defenseman who won a Stanley Cup, two Olympic golds and an MVP award.
* Hockey player Eric Lindros was called the "Next One" by pro scouts in the late 1980s, in reference to Wayne Gretzky's nickname of the "Great One" as the single best player to ever put on skates. Lindros seemed to have it all, from massive size to impressive speed to a gifted scoring touch. When he made it to the National Hockey League, he was one of the most dominant players in the league...and one of the most injured, which led him to top both the scoring charts and the injury reports.
* Hockey player Gordie Howe was said to get a goal, an assist, and a fight in every game. He continued playing in the NHL into his fifties, even through its notoriously violent era, long enough to play with his grown sons. After his retirement, he even suited up for a charity game in the minors, whereupon a local radio DJ offered a large cash prize to any player on the opposing team who fought Howe, by then in his seventies. No-one was stupid enough to take up the offer.
* Hockey player Taylor Hall is very unlucky, only entering the playoffs in his eighth season (and second team) and once missed the All-NHL Team because the league chose to put
* Hockey skates are built for sharp, sudden, motions. Their blades are short and curved on both ends, with dual-edged blades to maximize control and maneuverability. Their boots are tall and thick, providing extra reinforcements for the ankle as well as protection from the numerous heavy collisions the sport involves. However, the short blade makes high speeds harder to maintain over long distances, and the heavy boot is more restrictive of one's range of motion.

* Hocus Pocus & The All-New Sequel of the film. A group of teenagers fight against evil witch sisters on Halloween.
* Hocus Pocus & The All-New Sequel stars Max and Allison's seventeen year old daughter Poppy as she meets the Sanderson sisters, just like her parents had twenty-five years ago.
* Hocus-Pocus and Frisby", a group of aliens mistakes Frisby's tall tales about his own past for an incredible variety of impressive accomplishments because they have no idea what lying is, and tries to abduct what they think is a remarkable alien specimen for their own zoo.
* Hocus-Pocus and Frisby", the aliens have a Venusian specimen who can sing at eight different pitches simultaneously and accompanies himself with his tail.
* Hocus-Pocus and Frisby, the aliens' leader tells him that they will be taking off in "fourteen minutes, by your measure of time."
* Hocus Pocus: A non-lethal example. When snooping in a house where witches used to live, and informed that a virgin lighting the candle will return them to life, the clueless teen protagonist does just that.
* Hocus Pocus; both of which really stand out in a filmography made up of kids material.
* Hocus Pocus die this way when the power of the Black Flame Candle runs out.
* Hocus Pocus has a graveyard, but relies on elements from the rest of the movie to add the creepiness factor. In fact, the film establishes that the cemetery is the safest place to be as being hallowed ground, witches can't set foot on it lest they be turned to stone.
* Hocus Pocus has this in both the object and the place variety. Apparently, witches cannot cross a ring of salt, nor can they set foot on a graveyard. They can

fly over the graveyard, though.
* Hocus Pocus, Ice, hates being called "Ernie." This is presented as a fairly pathetic effort to seem cooler.
* Hocus Pocus; it also contains the recipe for the potion used to keep her and her sisters forever young - at the cost of the lives of children.
* Hocus Pocus Max is able to scare the witches long enough to flee with his friends by convincing them them that he has powerful magic. He does this by setting off the sprinkler system with a lighter, neither of which the witches have ever seen.
* Hocus Pocus — an extreme version, who offers up various comments about her Big Brother's non-existent sex life. (She's only eight.)
* Hocus Pocus" — no, not the same Master as the one in the example above — and his bickering wife are played by brother and sister Garry and Penny Marshall in uncredited roles.
* Hocus Pocus on an annual basis during Halloween, gaining a cult following that grew year after year, and within 15 years it entered the cultural mainstream and has become a beloved Halloween movie.
* Hocus Pocus one night. He and his young daughter were sitting outside and his neighbor's black cat strayed by. Kirschner invented a tale of how the cat was once a boy who was changed into a feline three hundred years ago by three witches.
* Hocus Pocus. She spends most of her time "prancing around idiotically" in the words of her elder sister.
* Hocus Pocus: Thackery Binx and Emily both appear in death at the end.
* Hocus Pocus, the witches force various people to drink their potions.
* Hocus Pocus, the witches sing "I Put a Spell on You" to a crowd of party-goers. It puts them into a trance.
* Hocus Pocus". They get better from that as well. The thing that finally kills them is sunlight, because the candle that brought them back only worked for the night of Halloween, and they were unable to obtain the potion that would have enabled them to survive.
* Hocus Pocus, the youngest of the three witches, Sarah, sings a magical nursery rhyme to lure young children to the witches' home, where they will be sacrificed to preserve the witches' youth.
* Hocus Pocus this, but Winifred is too stubborn to listen, and they're too dim-witted and obedient to press the issue once she's shot it down.
* Hocus Pocus this is played with as the witches return to Salem after 300 years. When Max uses his lighter they believe he makes fire with his hands. He trips a sprinkler system and makes them believe it is 'the burning rain of death'.
* Hocus Pocus. Three kids have to fight for their lives against three homicidal witches hunting them.
* Hocus Pocus to them, give them a spelled potion, then suck the life out of them until they're dead (not just prematurely aged, like with Ravenna) in order to stay alive and not continue to age.
* Hocus Pocus was cursed to live forever as a cat. In one scene, he is run over by a car and is clearly dead. Then as the other characters are screaming and crying in horror, he re-inflates, stands up, and says, "I hate it when that happens."
* Hocus Pocus, where the book apparently had some degree of sentience (it had a moving eye and eyelid). It had apparently been given to the witches by the Devil and was made of human skin.
* Hocus Pocus: Winifred Sanderson gives Emperor Palpatine a run for his money with her powerful magic lightning.
* Hocus Pocus. Winnie mentioned he talked so much that she sewed his mouth shut before killing him. Once re-animated, the first thing he does of his own volition is to grab a pocketknife and cut the stitches so he can curse her out.
* Hodges' 'death' (actually a scenario for his board game) in "You Kill Me" turns out to be this.
* Hodges Pond does not know what a vegetarian is and can't spell the word "scholar".
* Hodges Pond still loves Trixie despite the fact she put him in a 3-week coma.
* Hodges was kind of dancing around Morgan too, but he later gets engaged to an

Italian girl.
* Hodgins and Angela break up in season 4 and then get back together and marry a season and a half later
* Hodgins and Angela. They both work in the Jeffersonian scientific institute, so their relationship might be less (or more) complicated than the FBI/consultant cases.
* Hodgins and Brennan wake up in a car buried underground in “The Aliens in the Spaceship.”
* Hodgins "borrows" another piece from the Smithsonian in a tenth-season episode: a
* Hodgins carried his wedding ring for Angela in his wallet after their initial breakup because he hoped she’d come back.
* Hodgins had several ways trying to propose to his longtime girlfriend Angela. Eventually, he accepted that she didn't want a commitment, signifying this by spelling out "I Love You" with glowing shrimp (long story). She immediately turned around and proposed to him.
* Hodgins seems to have an active history as well, though that's more an
* Hodgins, three times. Once he knew the victim and another suspect and hid evidence of it. Caroline was not amused. Then he was suspected of being Gormogon or his apprentice in season 3. Finally in season 10, he had to prove he didn’t kill a woman who once stole an idea of his and patented it.
* Hodgins was terrified of meeting Angela’s dad. But then, it *is* Billy Gibbons, so maybe not too surprising. Hodgins always acts scared of him even after marrying her.
* Hodgman the Hoboverlord in Hobopolis, who has 25000 HP, gains buffs depending on whether his
* Hod, god of darkness and winter, is The Smart Guy to the Norse kids in
* Hodgson has also attributed the idea to the artwork for the Elton John song
* Hodgson has implied for long tours and see his kids grow up with an unavailable father.
* Hodor's name turns out to be a corrupted, inadvertent version of this in
* Hodor, who is the most gentle, good-hearted character in the whole series and dies a gruesome death at the hands of the White Walkers in Season 6.
* Hody Jones and his crew after the side effects of using E.S.S. take hold. Vander Decken also attempted to use it in the past on Shirahoshi, who was 8-years-old at the time, to try to age her up to be physically old enough to marry (even if not chronologically so).
* Hody Jones does this to a fellow fishman, what contrasts his personality to Arlong's, who was
* Hody Jones, on the other hand, takes this to extreme. He wants to destroy the world government and kills humans whenever he can, even going so far as to kill Fish-men who sympathize with them, in response to wrongs
* Hoedown from his "Rodeo" (itself based on an older folk tune), and not immediately think "Beef, it's what's for dinner"?
* Hoenn is based off of the similarly mountainous and volcanic Kyushu (rotated 90 degrees), with the eastern water routes being based off of Okinawa. Another thing is that Sootopolis, while located near Yakushima, is actually based off of Santorini in Greece.
* Hoenn Wars, Ricky's trainees are really sick of his Diglett sinking them into the ground.
* Hoffman, no less), but with all methods of escape removed. The film ends with them still there, and presumably staying there forever.
* Hogan finds out that one of the new prisoners of war is actually a German spy, so they pretend to trust him and tell him they're going to take him to their secret hideout blindfolded. They then let some false information slip out while talking and make noises that imply their hideout is under the watertower.
* Hogan Knows Best, rumored to be some of the most heavily scripted "reality" shows ever made.
* Hogan's Heroes) adds its own laugh track, containing a single recording of a

couple of women cracking up.
* Hogan's Heroes, after a lady prisoner nearly brains Hogan with her high heel:
* Hogan's Heroes, all of which might be slightly worrying if he wasn't such a nice guy.
* Hogan's Heroes, although in this case it's usually the heroes who set the bomb. Much drama comes of having to escape the area before it goes off and much comedy comes of Carter's bombs going off a few seconds later than his eager countdown.
* Hogan's Heroes, an American prisoner is brought to camp, and Hogan notices he's got a black thimble lens. When he looks into it, Klink asks him what he's seeing:
* Hogan's Heroes) and bark on their command whenever it was necessary to the Heroes' scams to pretend to be captured "trying to escape".
* Hogan's Heroes are token black characters. Given that they're all prisoners and obviously not all from the same unit, WWII segregation isn't really an issue.
* Hogan's Heroes, as his actor Werner Klemperer was apparently very talented at it.
* Hogan's Heroes') as (naturally) part of a scheme to divert attention from a heist.
* Hogan's Heroes" because he knew how much trouble the Heroes could cause him.
* Hogan's Heroes, before the war Sgt. Schultz was the owner of Germany's largest and most successful toy manufacturing company. The company got taken over by the German military to make munitions. Col. Klink asks him for a bookkeeping job when everyone thinks the war might be ending.
* Hogan's Heroes, but given that this is Klink it's probably on his back.
* Hogan's Heroes, Carter counts down an explosion, "5, 4, 3, 2, 1" and nothing happens. Once, he will then say, "I said 'one'." BOOM!
* Hogan's Heroes. Carter is trying to get himself arrested as part of the plan. He walks into a bar and purposely introduces himself as an American. Everyone he talks to thinks he's a Gestapo agent.
* Hogan's Heroes: Colonel Hogan does this to Colonel Klink all the time. Later episodes suggest Klink knows he's doing this, and is going along to oppose the Nazi regime he despises.
* Hogan's Heroes: Colonel Hogan gets most of his ideas this way. A typical scenario involves pacing while the others discuss a problem. He then pauses, smiles, and says "Wait a minute," before outlining the plan.
* Hogan's Heroes, Colonel Hogan once set the spiked helmet from Colonel Klink's desk down on the commandant's chair just before leaving the office. He'd almost made it to the outer door when Klink sat down and screamed.
* Hogan's Heroes. Colonel Hogan wants to keep convincing Klink that a killer is after him, so he laces the kommandant's tea with what's probably a powerful herbicide and serves it to him—then, at the last moment, notes that the tea might be poisonous and pours it into Klink's office plant instead. The plant dies dramatically and Klink believes Hogan's story.
* Hogan's Heroes: Colonel Klink is a horrendous violin player. His actor Werner Klemperer was apparently very talented at it. His father Otto was a famous symphony conductor who left Germany in 1933 when Hitler came to power and served in the US Army during WW2.
* Hogan's Heroes: Comic misadventures of prisoners trying to disrupt the German war effort from right under their noses.
* Hogan's Heroes: Commandant Klink. The irony of it is that the women he has the most success with are actually enemy agents seeking to use him in some plot. Otherwise they would run a mile.
* Hogan's Heroes competent, to the point that the prisoners count him as an ally (he's in on it, though he wishes he wasn't) — but he's also an adept ass-kisser whose vast wealth as a toy manufacturer gives him some leverage. Both Klink and Schultz see their jobs threatened over the course of the show, only for the prisoners to maneuver to keep them around.
* Hogan's Heroes didn't normally show people smoking, but it did have a running joke in the form of Hogan stealing Klink's cigars whenever his back was turned, as well as frequent attempts to bribe Schultz with cigarettes.
* Hogan's Heroes doing?" Followed by Schultz thinking better of it. "I know

nothing! I was never even here!, I never even got up this morning!"
* Hogan's Heroes easy to see why serving on the Eastern Front was a post that people would rather avoid.
* Hogan's Heroes episode, "Everybody Loves a Snowman", in which Hogan and his men have to figure a way to smuggle out a downed flight crew while the Gestapo is in camp searching for them. They're temporarily relocated to a barrack that has no access to their tunnels, so the gang build a hollow snowman to hide the entrance of the new tunnel they're digging, though later, Schultz ends up catching a glimpse of one of the flyers slipping into the tunnel through the snowman.
* Hogan's Heroes episode "The Collector General" a Nazi General planning on using an old mine to stash art he stole from France ends up on the receiving end of this from Hogan and his crew. When he threatens Hogan that he'll reveal his activities Hogan responds with "When you steal from a thief, one sure thing, he'll never call the cops."
* Hogan's Heroes Even Hochstetter, the die-hard Nazi Gestapo major, is horrified at the thought of what would have happened if Newkirk hadn't been there.
* Hogan's Heroes had a few instances when they would set a bomb and Carter (the team's munitions expert) would count down the explosion "5, 4, 3, 2, 1" and nothing would happen. He'd then say "I said 1!", and the bomb would go off.
* Hogan's Heroes has multiple propaganda broadcasters. The first, "Axis Annie," wants to record POWs admitting that the Germans follow the Geneva Conventions so she can persuade Allied troops to surrender more easily or to desert. The Heroes cut a deal with her in order to get into town and pass on a message to an Underground cell (and then destroy the recordings to prevent getting court-martialed for treason). The second, "Berlin Betty," is used by the Heroes to get a time-sensitive coded message to London after their radio is damaged.
* Hogan's Heroes has the guys sabotage a flak battery and topped it off with BANG flags when the Nazis try to bring down the Allied planes.
* Hogan's Heroes, he also built up a very large and successful toy business in the interbellum years, and only re-enlisted because his factory was appropriated for the war effort and he was conscripted.
* Hogan's Heroes, however, take the time to build a bow and arrow set, which he shows little skill with, despite claiming winning a lot of trophies for his archery skills back home.
* Hogan's Heroes. If they need to dispose of a document, they'll usually just burn it, but occasionally someone will mention eating some secret papers to prevent them from falling into enemy hands. One even involves a planted secret document that they wanted the Germans to find.
* Hogan's Heroes - In addition to his monocle, carrying around a swagger stick tucked under one arm is the trademark of Colonel Klink.
* Hogan's Heroes in "At Last, Sergeant Schultz Knows Something": The Heroes are trying to find the location of a laboratory being used for atomic research, and Schultz (who is going to be assigned to guard the lab) is the only one who knows that they have access to. They dose him with sodium pentothal under the guise of an inoculation for his new post. As sodium pentothal is a low-level anesthetic and not a magic drug like the Heroes expect, Schultz doesn't just tell them, but he acts dazed and dopey (rambling, breaking into song) and gives them enough hints during a conversation with LeBeau about the food there that they can figure out where the lab is.
* Hogan's Heroes - In one episode Hogan tricks Klink into calling a nighttime fallout rollcall. After all are accounted for and the men are allowed to be at ease, Klink lets the POWs have a smoke. What Klink doesnt know is that the men are arranged in the form of an arrow, the glowing cigarettes showing an American bomber overhead the correct way to go for their target.
* Hogan's Heroes in one episode in which the grounds have even more snow than usual, and the POWs have built a snowman. At one point, Col. Hogan indicates a particular patch of dirt and claims that it is "the only spot in camp that doesn't have a tunnel under it."
* Hogan's Heroes is actually a surprisingly complete aversion. Of the main cast,

which included French, British, American and German characters, only Sgt. Shultz was representing a different country-he was Austrian.
* Hogan's Heroes is enthusiastic but generally oblivious and he tends to get teased for his cluelessness—until they need something blown up. Or Hitler impersonated. He's scarily good at impersonating angry German officers of various calibers, despite his puppy-esque normal demeanor.
* Hogan's Heroes is in a German prisoner of war (POW) camp during World War II. The premise of the show is that the prisoners of war (POWs) are actually using the camp as a base of operations for Allied espionage and sabotage against Nazi Germany as well as to help Allied POWs from other camps and defectors to escape Germany.
* Hogan's Heroes is known only to serious classic film and theatre buffs.
* Hogan's Heroes is often remarked as the Jews' "silent revenge" against the Nazis.
* Hogan's Heroes is on how Klink (hardly a smart man in his own right) is constantly moaning of the antics of Schultz and others under his command.
* Hogan's Heroes. John Banner (Sergeant Schultz) supposedly told someone, "Who better to make fun of them than us?" There's a reason you never see any of the Germans with their forearms bared, after all.
* Hogan's Heroes keep Sgt. Schultz from revealing their plans by blackmailing him with the fact that if he tells, they'll tell that he knew about their earlier plans and didn't say anything. It's a bit cyclical.
* Hogan's Heroes kept an espionage/sabotage operation going in a Luftstalag for three years.
* Hogan's Heroes; Lebeau specializes in food, both to supply the Heroes with actual nutrition and to bribe German soldiers with gourmet French cooking, while Newkirk makes a tidy living on various black market contraband such as radios, watches, German clothes and uniforms, and memorabilia stolen from some of Germany's top brass (such as a cigarette lighter he nicked from Herman Goering or a beer stein from Adolf Hilter's personal collection).
* Hogan's Heroes loud on the radio so Carter can use the jackhammer in the next room.
* Hogan's Heroes, most of the guys are so exhausted they just crashed without even taking off their jackets, and Hogan drapes blankets over Kinch and LeBeau. It's a quick heartwarming moment, even if it doesn't last.
* Hogan's Heroes). Only one of the recurring German characters belongs to the Nazi party and the anti-Nazi resistance movement among German civilians is frequently featured. Hauptfeldwebel Schultz mentions that he was a card-carrying member of the Social Democratic Party until the day his party was banned by the Nazis, and has nothing but contempt for Nazi ideology.
* Hogan's Heroes, pickpocket and card-cheater. Good thing he only uses his skills on the Nazis.
* Hogan's Heroes, requiring the Heroes to rescue the daughter/father/what have you of the blackmailed individual.
* Hogan's Heroes, Robert Clary (Lebeau) always wore long-sleeved clothes to cover up the serial number he had received in childhood at the concentration camp of Buchenwald.
* Hogan's Heroes seems absolutely clueless when it comes to women or the appeal of women, while all the other characters jump at the chance to even hang out with attractive girls. He has had one girlfriend, later his fiancee, later leaving him for a man of lower rank a year after he was captured by the Germans, but unlike the other men, he only describes her in romantic terms rather than anything relating to her physical appeal.
* Hogan's Heroes: Sgt. James Kinchloe is the primary radio operator for Col. Hogan's crew, replaced for the final season by Sgt. Richard Baker.
* Hogan's Heroes showed anachronistic ethnic equality views by characters, with the only major implication of Kinchloe's blackness being that he can't impersonate Germans in person (although he's great at it over the phone). This may be excused by the idea that being in prison together forces them to ignore such issues to fight the larger enemy, and that the group has very strong unity. The Germans also never have much reaction to his race, though Nazi antipathy toward Africans was far

more downplayed than that against their favored targets (however, Germans of mixed ancestry were forcibly sterilized by the regime, and they planned to colonize Africa again). African-American soldiers were not even in the same units as white ones at the time (although they would be held in the same POW camps), and this didn't change until 1948, after the war was over. A lot of films and TV shows at the time ignore this, or the other racism prevalent against them.
* Hogan's Heroes shows Colonel Klink (who's in charge of Stalag 13) initiating the salute. As mentioned above, that's not how it works. Then again, all the Germans on the show are idiots.
* Hogan's Heroes sitting right next to the radio receiver, listening intently. Hogan refers to this as "calling room service".
* Hogan's Heroes stay upright when Bruno has metal hidden in his gloves. Kinchloe does eventually throw the fight after knocking Bruno mostly unconscious. It's clear to everyone who the real winner is.
* Hogan's Heroes, the crew learns from a spy that the meeting was actually to give the generals the plans for the defense of France in preparation for an Allied invasion. The spy, after learning of the plan, leaves his copy in the dining room after it had been cleared out so the Heroes can steal it. This meant LeBeau had to ride the dumbwaiter back up to the room (he'd done so earlier to try and disarm the bombs, but a pair of guards foiled his attempt). He makes it back just before the bombs go off, though a dejected Carter notes the bombs went off one minute later than he planned.
* Hogan's Heroes. The episode "One Army at a Time" used an American M7 Priest self-propelled artillery vehicle painted up in German colors to represent a generic German AFV. It was a good choice because the Priest is an obscure enough vehicle that most of the viewing public (particularly back when the show first came out) wouldn't know what it really was... The same Priest had, however, previously tried to stand in for a Tiger tank in an earlier episode called "Hold That Tiger", which wasn't such a good choice as the two look nothing alike...
* Hogan's Heroes. The first season, really. The show always relied on broad humor, but as the season progressed, the humor became more subdued and sophisticated. The first season, however, really showcased considerable amounts of cartoonishly slapstick humor that the wartime sitcom could almost be offensive; such as Klink jumping out the window from his burning office, expecting to be caught in a blanket flimsily held by Newkirk and Carter, but they walk away at the exact moment Klink jumps.
* Hogan's Heroes, the group tries to help a downed Russian pilot. The pilot keeps insisting that Russia is superior (a Russian invented the telephone, the Volga is the longest river in the world, etc.). This is justified because he had been fed this sort of propaganda all his life.
* Hogan's Heroes, the Heroes have blown up a fuel truck. Hogan makes a comment, addressed to Klink, to the effect that the driver should have put up a "No Smoking" sign.
* Hogan's Heroes: The main characters are operating an underground resistance movement out of a German POW camp. They also pretty much run that prison camp in everything but the official paperwork. They also have a habit of leaving whenever they feel like it.
* Hogan's Heroes, the POWs suspected that a German spy has been placed among them. The suspect, who passed the usual questions about American society and such, told them that he didn't speak any German. They staged a fake fire while the man is sleeping, and as the suspect is waking to the confusion, Kinch, who spoke fluent German, told him to go out of the window, which was located across the room. When the suspect immediately went there and started to try to get out, the men knew he was a spy.
* Hogan's Heroes, the surrounding trees were full and green, and the actors are occasionally seen sweating.
* Hogan's Heroes, this trope is the only half-way plausible explanation of how Hogan's headquarters could stay hidden beyond manipulating Col. Klink and Sgt. Schultz. This depends heavily on the episode; in the first season especially

Schultz is openly aiding them, and Klink has been heavily implied to be an Allied agent a few times.
* Hogan's Heroes to escape or be exchanged because they can do more good for the war effort at less risk to themselves by running an intelligence/sabotage network out of the camp). As for the German cast members, Hogan's people go out of their way to make certain they stay right where they are because if Klink or Schultz got promoted or demoted out of their current jobs, they might be replaced by somebody competent. (The feeling is evidently mutual, neither Klink nor Schultz wanting to be sent to the fighting war or put in a position where they'd be on the hook when something goes wrong respectively.)
* Hogan's Heroes to get him to do something. One of them has made scripts, and the page turn causes some problems. (From memory):
* Hogan's Heroes turns out to be a general or field marshall's nephew. In one episode, Hogan even disguises a Russian soldier as such an officer. After he's annoyed Klink for a while, Hogan has him "disowned" by his "uncle", and Klink sends him to the Russian Front — where he's been insisting on going all episode.
* Hogan's Heroes used it a lot, to the point where they have an entire wardrobe full of various German uniforms of differing ranks and positions tailored to fit each of the Heroes. In one notable case, a pair of British spies impersonated an SS film crew to film the camp unnoticed.
* Hogan's Heroes uses stock footage for scenes of parachutes dropping, bombing raids, submarines, and so on. However, it appears to actually be WWII-era footage, which fits well with the WWII-set show and probably saves a lot of money on renting fighter planes, anti-aircraft guns, and tanks. However, this led to multiple occasions where Hogan and his men needed a supply drop, only to show a parachutist jumping out of a plane, before being replaced by a parachuting crate in the next shot. The stock footage of every parachute drop is from a C-119 Flying Boxcar. While the Boxcar and its predecessor the C-82 Packet were developed during the war, they did not come into service until after the war.
* Hogan's Heroes were technically POWs, but this Trope could apply a lot. In fact, in one episode, Col. Hogan made a public announcement over a radio (giving support to the German army that was obviously sarcasm) that even got Hitler's attention. Hitler's orders were: "If this man ever tries to escape, LET him!"
* Hogan's Heroes - Werner Klemperer (Col. Klink) was a world-class violinist, and the son of a classical composer and noted orchestral conductor. Klink, on the other hand, played the violin like a cat losing a fight with a band saw. However, other episodes did showcase the singing talents of the cast (noticeably Robert Clary, Richard Dawson and Larry Hovis). Bob Crane also got to show off his drumming chops in one episode. (He also played the drums for the show's theme music.)
* Hogan's Heroes. When a black woman turns out to have access to secret Nazi plans, she also turns out to have been the high school girlfriend of Kinchloe (the only black member of the group). They make out at the end of the episode.
* Hogan's Heroes. When a field marshal defects and is chased by Major Hochstetter and the Gestapo, the POWs plant a dummy in the marshal's car along with a time bomb. When they make it look like the field marshal is getting away, Hochstetter tries to stop the car by shooting the tires. The time bomb goes off the exact moment Hochstetter fires, making him think he hit the gas tank instead.
* Hogan's Heroes, whenever Hogan needed someone to do a dangerous mission, he'd usually single out Lebeau and thank him for volunteering, despite him not saying anything, much to his chagrin.
* Hogan's Heroes whenever the allies are about to perform an offensive or the Germans have rolled out a new radar detection device. Usually this presents a problem as previous intel given by the heroes has either gone stale or turned out to be bait for a trap.
* Hogan's Heroes when he attempted to use "killer judo" on a large German officer.
* Hogan's Heroes when the prisoners have let Schultz think he's boss for various reasons and have found it difficult to 're-tame' him.
* Hogan's Heroes). When they needed to refer to the nearby town, it was always Hammelburg, a real town in Germany where two POW camps with names similar to Stalag

13 were historically located. It's pretty close to the center of Germany, though, so driving to Paris and back in a day isn't going to happen. In one episode where a map showing the locations of a number of unresolved instances of sabotage was briefly shown, this seems to be the right vicinity.
* Hogan's second career resurrection came after his legendary Wrestlemania 18 with
* Hogan Vs Flair Nash would always insist on winning (and get his way most of the time.)
* Hogan Vs Flair wrestlers under other names, ostensibly for just this reason. For example The Dudley Boyz/Team 3D are called "Team 3rd Dimension", with Bubba Ray billed as "Bowling Shirt" and D-Von called "Camo Pants".
* Hogatha, a short, dumpy hag who's bald (but wears a wig), snorts when she talks (which is how she got her name, apparently), rides a vulture, and can cast evil spells. Most of her schemes either involve trying to find ways to make herself beautiful or force handsome princes to marry her (and naturally, the smurfs always get caught in the middle of these plans).
* Hogatha in "The Fake Smurf" when she thinks she has poisoned the Smurfs' soup refuses to eat the soup when Greedy tries to force her to eat it, saying "I'm on a low-poison diet."
* Hogatha's mirror cracks when she inspects herself and sees that she has dry skin in
* Hogback pulls this after hearing that Luffy curbstomped Moria, though that may be anime exclusive.
* Hogback reveals that he hated being a doctor and regarded his patients as a nuisance and only helped them for cash. Chopper
* hog-farming a few years later, as Canterbury and Knight reverted to their real names and changed the name of their team to Southern Justice. (And poor Tony Anthony—aka Uncle Cletus—wasn't really their uncle, either, needless to say.)
* Hogfather about his rather boring life instead of answering her questions. Susan describes him as a very small, very weak bully, who couldn't find anyone smaller or weaker than him to bully and so took to making people's lives just that little bit more difficult.
* Hogfather about how hushing things up seems to be the only thing governments do reasonably successfully.
* Hogfather. Albert reminisces about a toy horse he wanted as a kid. "I must have spent hours staring at it with my nose pressed against the glass, until someone heard my cries and unfroze me."
* Hogfather also has the ghosts of dolphins accompanying the ghostly ship.
* Hogfather and the wizards who concocted it are puzzled by the lack of humorous side-effects. Meanwhile on Dunmanifestin, Bibulous the God of Wine reports hearing "a sort of descending note" as those side-effects travel over the connection that gives Bilious all the hangovers.
* Hogfather and ugly childhood memories. Catseye's fear is of the dark, and basements, prompting this exchange:
* Hogfather appears in one of the movie's final scenes as the Toymaker.
* Hogfather aristocrats have done this, apparently assuming their servants will be too stupid to tell what's in the bottles and hence, won't steal drinks on the sly. The same footnote points out that this seldom works ... and that the servants trust that the aristocrats would, themselves, fail to notice that the bottles had been topped off with "eniru".
* Hogfather, as a dark room where people have drinks while discussing business. "The business generally involved the transfer of ownership of something from one person to another, but then, what business doesn't?"
* Hogfather, a young woman with a part-time job as a tooth fairy is abducted by villains who roll her up in a carpet.
* Hogfather be responsible for a mundane process (e.g. the Hair Loss Fairy) is popping into existence. The Dean immediately tries to exploit this new phenomenon by invoking the Give The Dean A Huge Bag Of Money Goblin; this fails, because he doesn't normally receive large bags of money for no visible reason, but it was

presumably worth a try.
* Hogfather, but on occasion he even moves when people are looking right at him.
* Hogfather came to be an orphan. While it's not explicitly stated, Lord Downey is quoted as saying "We should have wondered a bit more about that."
* Hogfather centers on what happens when someone manages to bump off an Anthropomorphic Personification. The book also goes into the purpose of such beings; according to Death, minor beliefs and incarnations such as the Hogfather help humans to establish the beliefs in justice, mercy, duty — the things that make them truly human.
* Hogfather, Death informs his granddaughter Susan that he is standing in for the missing Hogfather, and advises that she should not get involved. Naturally she gets involved. Death knows his granddaughter well.
* Hogfather, Death was able to reverse the flow of sand in the Match Girl's hourglass.
* Hogfather explores the extremes of this idea with such characters as the Verruca Gnome and Bilius, the Oh God of Hangovers.
* Hogfather" ("Father Christmas, Father Christmas, white beard, old grandpa")
* Hogfather has Alien Geometries based off the poor understanding of size, proportion and three-dimensional imagery present in a child's drawing. The massive white gap where there ought to be a horizon is particularly unsettling.
* Hogfather has an artificial eye that is portrayed like this, while his remaining natural eye has a shrunken iris the size of a pinhole.
* Hogfather he hands to a little girl, before being hastily convinced that a fully functional weapon might not be the best idea (he just turned the blade to wood). Or a girl wants a real life pony to be in her home... in a second floor apartment. Overall, he gives children toys that they actually want, rather than what their parents consider appropriate for them. Sometimes it's a good thing, sometimes not.
* Hogfather. In accordance with the age-old law of cats, shelves, and delicate, irreplaceable, and easily broken things thereon...
* Hogfather is her grandfather. Teatime simply points out that everyone meets Death eventually.
* Hogfather is in a Christmas cracker and says "Help help help Ive fallen in the crakker machine I cant keep runin on this roller please get me ou-". Someone says it's the same old mottos as when they were kids.
* Hogfather, is so repelled by Teatime that he planned on having him killed until he realized Teatime's corkscrew of a mind might be just the instrument needed when the Guild is commissioned to inhume the Hogfather.
* Hogfather it's noted that mud and old boots-based cuisine eventually caught on across the city's posh restaurants.
* Hogfather joins Susan on the horse Binky, and innocently puts his hands around her at an inappropriate height. As he's only existed for a few hours, she doesn't smack him for his ignorance, just corrects his position very firmly.
* Hogfather (long story). Teatime tries to convince the children that he is good and that Death is the one they should be afraid of and ends up with the poker being run through him, with one of the kids pointing out that the poker "only kills monsters".
* Hogfather may be that his glass eye is made out of a scrying crystal.
* Hogfather, Medium Dave and Banjo were apparently brought up to be criminals by their mother, who is fondly remembered for her ruthlessness by other criminals.
* Hogfather, Nobby complains that people can't take a hint. The hint in question is that he's told them he rarely takes baths, in the hope that they'll stop giving him bath stuff every Hogswatch.
* Hogfather). "Now look at this. Leathery bacon, green bread, and a piece of cheese you could shave. She hasn't been here in some time, believe me."
* Hogfather, one of the thugs' great childhood fear was a wardrobe with a carved door that vaguely resembled a face. And in the night...
* Hogfather on his assignments, which, in his case, means not only killing the target but nailing the target's head to the wall and killing his family, servants, and household pets on the way out for fun. Oddly enough, he actually likes

animals—he just doesn't think of drugging a guard dog instead of nailing it to the ceiling.
* Hogfather... only to wake up in the afterlife surrounded by a lot of deities with pointed sticks saying, "We're going to show you what we think of Mr. Clever Dick in these parts."
* Hogfather plays with this by having several Auditors turn into vicious dogs in order to interfere directly with events. They are horrified to discover that life is addictive and that they can't turn back, and because they are now alive they are now also no longer immune from Death (who is, by this point in the story, royally pissed off at them...)
* Hogfather" reacts to his boss's disappearance by getting very, very drunk, even saying that he'll have "the mother of all hangovers in the morning".
* Hogfather, Ridcully says he had an uncle who drank an entire bottle of Wow-Wow Sauce as a hangover cure. And it worked, sort of. He looked very peaceful at the wake.
* Hogfather Ridcully, who normally doesn't understand technology, solves the problem by typing DRYD FORG PILLS into the keyboard, reasoning, "If it can get the idea of being sick, it can get the idea of being cured." It works.
* Hogfather Since the Hogfather is the personification of a collective human imagination, he's not exactly dead, but he's also not currently existent either. In some adaptations Death does describe him as "dead", but keeps the line about this not being an appropriate word for what happened to him.
* Hogfather, Susan does this to Teatime. It doesn't work quite as well as she thought it would.
* Hogfather, Teatime's first death comes about from a fall. However, it's one he suffered when hanging on to Susan's leg, who asked herself "Is this guy crazy enough to kill the person holding him?" and based on the obvious answer, kicked him.
* Hogfather (that he's technically doing another job at the time) to go against his natural role, just this once. The action leaves his servant Alfred flabbergasted and the angels very much miffed that things did not go according to the script. Then Albert starts pelting them with snowballs.
* Hogfather: The Bogeyman was the original personification of primitive man's terror at the darkness and what hid within it. After they mastered fire other bogeymen were born, lurking in the shadows cast by fire but never knowing the primordial darkness that spawned their ancestor.
* Hogfather, the Death of Rats collects a mouse that fell prey to one of these.
* Hogfather, the extra, unused belief-energy made any imaginary creature that was even slightly plausible (like a creature that eats odd socks, and a bird that eats pencil stubs) come into existence.
* Hogfather; the Lilywhite boys greatly respect their deceased mother, as much out of quivering fear as love. They turn on Mr. Teatime after he snaps and goes, "To blazes with your mam!".
* Hogfather: the series deconstructs Pascal's wager (the notion that it is existentially safer to believe in God than not to) with Ventre, an Expy of Pascal, dying and waking up in a circle of gods holding nasty-looking sticks and one of them said, "We're going to show you what we think of Mr Clever Dick in these parts..."
* Hogfather the Sock Eater does this when the wizards surprise it, because its instinct to flee is being countermanded by its desire to keep eating the Lecturer's socks. Its mouth keeps chewing while its legs ineffectually scrabble around underneath it.
* Hogfather: The wizards find a nailed-shut door in Unseen University, and naturally have Modo the handyman un-nail it. After Ridcully has explored the full capabilities of the B. S. Johnson bathroom behind the door, he has Modo nail it up again; but Modo leaves the nail-heads sticking out a little to make it easier next time the Gentlemen want it opened.
* Hogfather, they suddenly get a whole lot more interested when they learn he's surrounded by naked maidens).

* Hogfather until Teatime threatens unspeakable consequences if she doesn't shut up.
* Hogfather, when Ridcully asks the Senior Wrangler why they always hang up mistletoe at UU's all-male Hogswatchnight dinner. The Wrangler's improvised answer, as Ridcully points out, is essentially that the mistletoe is an important symbol ... of mistletoe.
* Hogfather, when speaking to the spirit of a recently deceased man (who hasn't yet realized he's dead):
* Hogfather, where the God of Hangovers actually considers himself the oh god of hangovers, because people always invoke him with "oh god...".
* Hogfather (Which was used in a previous book as an explosive), sending the other wizards diving for cover. When Ridcully dumps the stuff in, nothing happens, but just as Ridcully is berating the other wizards for their lack of backbone, the mixture lets off a fireball that sends the Archchancellor tumbling. Luckily, wizards are naturally-padded, so no serious harm.
* Hogger raid, an unusually strong but ultimately low-level enemy encountered very early in the game, where large amounts of extremely low level players gang up on him in a kind of false raid.
* "Hog", "jolly up", "rag" or "romp" - a dance, party or dance party!
* Hognose snakes are really good at this; they even produce a smell to make sure any predator with a sense of smell thinks they're dead. (They also pretend to be venomous snakes; the weird thing is that they
* Hogs of War part comes when, in the ending, we find out that the glasses-wearing soldier seen in the opening got dumped by his girlfriend and is now homeless due to his house having been destroyed during the war.
* Hogs of War plays this to comedic effect with the Japanese squad members.
* Hogwarts: A History, although nobody but Hermione has ever read it. (Though, as Harry and Ron comment, why bother? They can just ask her.)
* Hogwarts: A History; Hermione asks if they're ever going to read the book, and Ron says "Why? We can just ask you."
* Hogwarts, but it contains virtually everything relevant to the plot of the story.
* Hogwarts creates a brand-new House for Harry and his friends after he becomes estranged from most of the other Gryffindors during the Tri-Wizard Tournament. Since as a building it possesses limited sentience, it christens the new House "Your House," which creates some confusion at dinner when Dumbledore tells Harry that he's now a member of "Your House."
* Hogwarts exists: underage wizards are expected to make mistakes and/or release accidental magic, and it's better to have them all in one place with competent adults to fix the disasters. Plus, with magic medicine, anything that isn't instantly fatal is generally fixable.
* Hogwarts Exposed Timeline, revolves around the Statute of Secrecy being irreparably breached and the Wizarding world deciding to cut their losses and come forward to the non-magical world, and the repercussions of this such magic now being allowed to influence Muggle society while the majority of witches and wizards are exposed to electronics and the like for the first time.
* Hogwarts function, to suit the immediate specific needs of the user.
* Hogwarts has three large dungeons, all associated with Slytherin. The most prominent one is the Slytherin Common Room, which is partly located beneath the Great Lake, giving it a greenish hue. The second is the Potions Classroom, rather fitting since the two professors who teach the subject are Slytherins. The third is the Chamber of Secrets, the lair of Salazar Slytherin's basilisk.
* Hogwarts. However, Dumbledore confiscated it from the Restricted Section years ago, and is implied to have done this because Tom Riddle used the book as a reference to create not only one, but seven Horcruxes.
* Hogwarts is also established to have its own spirit... which may or may not be
* Hogwarts is a milder example, owing to the fact that the stairs move and the
* Hogwarts is meant to be located in Scotland, but the movies were filmed almost entirely in England. Hogwarts environs were sometimes filmed on location in Scotland and sometimes not. The Forbidden Forest and the Black Lake are located

within short distances of each other in-universe, but they were filmed in Buckinghamshire and Highland respectively.
* Hogwarts itself, and with it most secondary characters, during Deathly Hallows.
* Hogwarts Legacy 3’s COVID-19 related delay from its own Q4 2021 release to July 2022 taking some heat off of it, or perhaps some combination thereof.
* Hogwarts Retold, most characters can use their patronus as Familiars, Nathan has Leafy-Sea Dragons, Eddie has Squirrels, Elizabeth has Robins, Fang Lei has Tigers, Marc has Chameleons and Rean has Wolverines.
* Hogwarts School of Prayer and Miracles, all women except aunt Petunia are this. Hermione even talks about cleaning the kitchen, although God literally puts the food on the table and provides lots of other miracles on request. It must be assumed the women like tidying up, as no reason is given as to why they can't pray for removal of the dirty dishes.
* Hogwarts School of Prayer and Miracles by the narration regarding Hermione.
* Hogwarts School of Prayer and Miracles disclaims ownership of the "original books" in these exact words.
* Hogwarts series. The Hogwarts ghosts are mainly there to add color, while the Black family mansion is "haunted" by his mum's deranged talking portrait and several dangerous artifacts.
* Hogwarts. The two leads had been dating until an hour or so before curtain-call, at which point the boy dumped the girl for one of the other actresses. The resulting disaster led to school plays being banned rather than just dropped.
* Hogyoku ex Machina, and tells his friends what he knows from the future.
* Hogyoku ex Machina asks, "Kurosaki, is there anyone you've fought that you haven't become best friends with?"
* Hogyoku ex Machina, Hollow Ichigo constantly expresses his attraction to Neliel. Everybody in Soul Society is horrified, until they find out about Neliel's adult form.
* Hogyoku ex Machina. However, due to the nature of how they go back, Ichigo keeps all his power-ups from the final battle, while Aizen does not. This has advantages and disadvantages for both of them.
* Hogyoku ex Machina, Ichigo gets really angry when he learns of his sister Karin's past attraction to Hitsugaya.
* Hogyoku ex Machina into action again, while Ichigo tries to stop it.
* Hogyoku ex Machina, Kenpachi laughs and says this when Ichigo's memory of Aizen turning into a butterfly is shown.
* Hogyoku ex Machina, where Unohana is particularly disturbed to learn that Mayuri installed surveillance devices in Ichigo's hospital room long before his arrival in Soul Society, claiming that it was a "necessary precaution".
* Hohenfriedberger March, supposedly written by Frederick the Great, about the Battle of Hohenfreidberg, where his Prussians crushed the Austrian attempt to remove him from Silesia.
* Hohenheim also has a pretty big chin, which admittedly is mostly blocked by his beard. On the flip-side, so does
* " Ho ho ho! Everyone's dead! Stay tuned for another tale of holiday hilarity!"
* Ho, hum, hi, he's, the jolly Green Giant you see on the label with golden corn and tender peas, the jolly Green Giant will set up your table
* HOI4 democratic nation on Earth to form the Grand Alliance faction as protection from the new Axis.
* Hoid is perhaps the most important worldhopper. He has appears at some point in nearly every book, and seems to be traveling around collecting magical abilities from each series. His exact origin is unknown but he seems to be one of, if no the most, knowledgeable people about the nature of the Cosmere.
* hoist by her own petard because the referee, annoyed, gave her a yellow card and added three more minutes of extra time. The US scored in this extra time and eventually won the game in the shoot-out.
* Hoist by His Own Petard: A character (usually a villain) who is defeated and possibly killed as a result of his or her own plan, weapon, et cetera.
* Hoist by His Own Petard: A person's undoing is brought upon by their own actions.

* Hoist by His Own Petard, he was trying to act shocked and confused about her disappearance, but was saying things that were a little too detailed for someone who didn't know anything. The reporter caught on to this and revealed that a body was found, but she is not sure if it was Giddings. The facial expression from McDaniel gives him away, along with his panicking during the rest of the interview where he gives more details about things he shouldn't know.
* Hoist by His Own Petard, hung on the gallows he built for his rival.
* Hoist by His Own Petard out. (Or at least a particular component that stayed lit up red for several seconds after being ripped out).
* Hoist by His Own Petard: Someone is killed by what was supposed to be helping them.
* Hoist by His Own Petard; the house the titular antagonist resides in burns down a few years after the protagonist and their family move out. Mr. Widemouth was surely killed in the fire, and given his obsession with tricking children into getting themselves killed doing dangerous stunts, it was most likely his fault the fire started in the first place.
* Hoist by His Own Petard: You bring your own failure directly upon yourself.
* Hoist Hero over Head: You know the villain is strong if he lifts the defeated hero over his head.
* Hoity Toity calls the dresses at Rarity's first fashion show a "piled-on mishmash of everything but the kitchen sink". Cue a thoroughly-embarrassed Rarity hiding a kitchen sink behind the curtains.
* Hojo duped Sephiroth into believing this thing is his real mother. Thanks to the Jenova cells in her body, Lucrecia was unable to die, though; instead she fled, eventually winding up in the Crystal Cave where she turned herself to crystal (as a penance and, perhaps, to stop herself from mutating).
* Hojo mutated into various monstrous forms, presumably as a result of injecting or ingesting excessive amounts of his own special Jenova cell-based Psycho Serum.
* Hokages 1-4: All currently in the stomach of the God of Death, though it turns out the Uzumaki Clan had a counter for this as well.
* Hokas. They love human literature but can't quite seem to grasp that fiction isn't real. As a result they often act out scenes from famous books, with comically chaotic results.
* Hoka: The aliens look like teddy bears, but they are indeed a menace. To your sanity, at least.
* Hoka, the Hokas reenacting the Space Patrol take over Alex's courier ship. They solemnly explain that showing the Space Patrol badge entitles them.
* Hokkaido Gals Are Super Adorable!: Tsubasa's mother tries to control every aspect of his life and behavior from birth. He starts getting away from this after he moves to Hokkaido, but he is ever fearful that he will be dragged back to Tokyo and be under her thumb again.
* Hokkan (under the watchful eye of Genbu and Takiko) is based off of Inner and Outer Mongolia.
* Hokuou Kizoku to Moukinzuma no Yukiguni Karigurashi getting to know each other and fall in love over the course of a one year "trial marriage".
* Hoku's "Another Dumb Blonde", where she calls out an ex for thinking of her as a
* Hokushou Kairi answering the phone half-awake, and her lower range led to her father assuming there was a boy in her room.
* Hokuto ga Gotoku, with each actor's characters sharing qualities with each other. To name a few examples:
* Hokuto himself. He holds the nihilistic view that all life, human and monster alike, is naturally evil and violent, with living things destroying everything around them for no good reason. He himself is just as violent and destructive, with Jovian and Jacqueline's aforementioned rampage in Act IV being done on
* Hokuto is afraid something like this will happen to her brother Subaru in
* Hokuto no Ken 3 that featured a new storyline set several years later that revolved around the next Hokuto Shinken successor.
* Holby City has managed to time storylines so they appear onscreen at the same time a story is just becoming big news thanks to industry insiders - the producers

received a heads up on a story about dodgy breast implants in France several months before it actually broke, and the story was only becoming a major scandal at the same time the resulting related plot appeared on screen. As well as this, there is a recent series of episodes involving John Gaskell and a "Miracle Cure" for someone to walk, which is based on the David Noakes Scandal.
* Holby City is still alive off-screen in Australia, despite the 2003 death of actress Laura Sadler.
* Holby City smiles giddily. It's an almost unbearably intimate sight.
* Holby City, the annoying new anaesthetist is messing around with the defibrillators while in surgery... and shocks himself. He dies, not that many of his colleagues mind too much. Being set in a hospital, there are plenty more boring versions of the Magical Defibrillator.
* hold a bridge. The general consensus among the characters seems to be that Tavi is completely insane.
* Hold Back the Dawn, made the same year, in which a Viennese refugee asks an American writer to marry her so she can stay in the United States.
* Hold Back the Dawn shenanigans to his superiors. George is allowed to rejoin Emmy in the United States.
* hold both katar and pata. They're not attached to the arm; they're just held with a grip perpendicular rather than axial to the blade. That being said, they are almost certainly the inspiration for this kind of weapon in fiction.
* hold break a truce, but will revoke it and inform their enemy of the revocation before they attack.
* "hold bricks on their heads while others smash it to bits with a sledge hammer" This is only the regular forces, but there is a reason why their special forces won 8 1st places in the 2009 international military competitions in Slovakia, first place in the 2011 Sniper World Cup, and best overall performance at the Fifth Warrior Competition organised by the Jordan Armed Forces at the King Abdullah II Special Operations Training Centre. In other words, they competed against US, UK, and Russian special forces and won.
* hold crime while the "charge" lasts. And now he's fought Team Kimba and discovered what those kids can do...
* hold down the fire key to slot in more rockets and fire off up to six of them all at once.
* Holden Shearer (also a freelancer) was His Prophet, until he became an assistant to the developer.
* Hold Fast to Dreams, Emmy Lou Jefferson must overcome racism in order to become a dancer.
* Holding also wrote "The Photographer and the Undertaker". The Photographer is hired to kill a mortician, but realizes that the mortician is also stalking him. He determines that his target is the Undertaker, another assassin, and that their mutual employers wanted to downsize staff, by setting their best hitmen to eliminate one another and retaining the services of the best one.
* Holding Back the Phlebotinum: Unless there's a good reason for it, withholding a powerful weapon or ability when it could help you is just a plain boneheaded move.
* Holding Both Sides of the Conversation: Character pretends to be talking to someone who is not there, poorly done attempts at this fool only the really dense characters.
* Holding Both Sides of the Conversation: Faking a person's presence by pretending to be them during a feigned conversation.
* Holding court with three lovers on a small island before World War II, then promising to come back to that same island in the future to choose who she loved best—while she never returned, the three men did in what history knows better as
* Holding down the left flipper button when plunging enables three separate Super Skill Shots.
* holding everyone in the bar at gunpoint, a la the gun-toting couple from Pulp Fiction.
* Holding Hands: A classic romantic gesture is lovers locking hands with each

other.
* holding him to the dentist chair, Denbo is able to slip free immediately.
* holding his neck out, but if the result of a botched job is having said executioner hack at your neck over and over — with you feeling every stroke — this may have just been a wise precaution.
* holding its breath while it flew to another planet was explicitly likened to whales.
* holding Jo Grant's hand", in which the Doctor asking Rose to take his hand is a big deal and serves to symbolize her becoming the companion.
* Holding Onto Strings Better Left to Fray (#7 to #8) even though the latter is easily the best known song from the album.
* Holding Out for a Hero. And the white cowboy shoots the black riders off their mounts one by one.
* Holding Out for a Hero burn down Bonnie's house and attack her just for fun in the music video.
* Holding Out for a Hero in the music video, and they invoke a choir of angelic singing for a cowboy hero to show up.
* Holding Out for a Hero: People don't bother saving themselves in hopes that a hero will come and save them.
* Holding Out for a Hero: People grow too reliant on a superhero for their protection.
* Holding Out for a Hero shows it can hurt people by making them too used to them fixing things to take care of problems themself when the heroes aren't available.
* Holding Out for a Hero use glowing neon whips to frighten Bonnie in the music video.
* Holding Out for a Hero was used as the secondary focus on Tyler in many other shots in the video.
* Holding Out for a Hero, which is also mentioned in the song ("Isn't there a white knight upon a fiery steed?").
* Holding Poseidon's trident enables the villain Queen Clea to manipulate the ocean.
* Holding the Man adaptation of a memoir telling a story of its writer and his lover's love life from 1976 to 1992.
* Holding the Man doesn't really show much typical gay mannerism or characteristics, being the captain for his high school football team and was regarded as the best among his peers all across Victoria.
* holding the power of four Alicorn Princesses at the time, two of whom are Physical Goddesses.
* Holding the Zero, a novel by Gerald Seymour, goes into some detail on the history of sniping. A British civilian marksman goes to help a Kurdish rebellion again Saddam's government, and finds himself up against an Iraqi sniper.
* Holding the Zero is about a civilian target shooter who goes to (pre-invasion) Iraq to help the Kurds. The book goes into detail on the history of sniping and the mentality needed.
* holding up the book to taunt the villain with and him zapping it. As Olympia and Otis duck behind a plant to protect themselves, Olympia apologizes to Otis and places the blame on her for pressuring him to use his new jacket too much, but Otis tells her that she had a point with her doing so and deduces that if he pushes more buttons on his jacket, he'll defeat Mr. Lightning — and that he does.
* Holding Up The Universe by Jennifer Niven involves an obese young woman who is subject to unwanted media attention after her house has to be partially demolished in order to get her to the hospital, loosely based on the case of Georgia Davis, but taking place in the US rather than the UK.
* Holding up your index finger and middle finger while spreading them apart. In some countries, this is a symbol for peace, in others, it represents "V for Victory", but in Britain, it depends on which way the hand is facing. Facing palm outwards, it's both a symbol of peace and of victory but if the palm is facing inwards it's a version of
* Holding Your Shoulder Means Injury: An injured character holds their shoulder

with their other hand.
* "Hold it right there!" before describing what the bad guy is doing, why it is wrong, and giving an
* "Hold Me Thrill Me Kiss Me Kill Me" was done similar to a comic book.
* Hold My Glasses: Removing one's glasses and handing them off to another before a fight.
* Hold Off on the Nukes: Nuclear weapons are not employed straight off for political reasons. Sometimes they're not used at all. This is based on NATO's assumptions about probable Warsaw Pact actions during the Cold War; while some sources asserted that the Soviets had a nuclear-first plan all along, they were misinterpretations of plans found in East German archives, where nuclear use was in reaction to NATO preparing to launch a nuclear strike. The highest Soviet imperative in any conventional scenario was to prevent the war from escalating to nukes.
* "Hold on Loosely" by 38 Special is sung by a guy who pushed away the girl he loved, looking back on his mistakes. "Usually it's too late when you realize what you had."
* holds a grudge over Matsuri staying in town with Suzu when his mother moved away. Thus, Matoi would rather Matsuri get together with Reo, who is literally subordinate to Matoi and eager for "mother's" approval.
* holds a Guinness World Record for being the world's first official fan-made music video!
* holds a piece of Oryx's soul and will eventually warp its wielder into him.
* holds a razor to his throat when he refused to tell her something about his personal affairs.
* holds off a massive fuel dump explosion with his force abilities so that his love Hera and the crew can escape. He is granted Dying as Yourself
* holds off an entire team of Denarians with finesse beyond the comprehension of Harry.
* Holds true in the 2003 series as well, although it's made apparent that Leo and Raph are deliberately holding back to avoid killing anyone. For example, in
* Hold The Back Page, Ken Wordsworth forgets his son's birthday and so hands him the dictionary his co-workers gave him as a joke present at his farewell party earlier that day (he was a journalist leaving an upmarket paper to work at a tabloid). He did this mostly so his ex-wife wouldn't realise he had forgotten, but it turns out the son quite appreciates the dictionary.
* Hold the Dark is an American production set in Alaska (and filmed in Canada), and...weirder than some of the classic examples, but it qualifies as a take on the genre.
* Hold the Line, both of which completely outclass the final boss in every way, making them the real climax.
* Hold the Line guarding, but it can be done. Doing so completely stops the attack until the scripted event begins where Archimonde scales the mountain personally. In fact the base can be destroyed suprisingly easily since once the main base building for the human or orcs is destroyed, the undead set up a new base where they just destroyed one before. During this time the base is at its most vulnerable, you can stop it from getting built to the point where it can pose a threat.
* Hold the Line if you stay on the defense as intended. The human bases are all sorrouned by elevated terrain that can only be crossed by flying units, with towers on all sides and the only to enter on the ground funnels units through an entrance that leaves them open to get shot at by the towers and vulnerable to AOE spells used by the bases' heroes. Nonetheless it is possible to destroy the human bases, though again, you still have to wait for the timer to run out before the mission ends.
* Hold the Line section also happens on a bridge in 'Requiem', where the path is blocked by a barricade on the bridge, which is defended by two overlooking MG42s and snipers on both sides of the bridge. The player is required to hold off German infantry trying to reinforce the barricade until a supply drop containing a Bazooka arrives, allowing the player to breach the barricade and proceed with the mission.

* Hold the Line to buy time for his wife and daughter to get to safety.
* Hold the Line. Trying to go the offense is risky since it takes units away from defending the player's base. The enemy bases are well defended, very large, and one has a level ten hero. The defenses for one of the bases can however be largely bypassed by using siege units to blast the trees down. The second base will still send attacks but as long as the player keeps some units defending their base it is possible to repel them. Though even if the player destroys the undead bases they still have to wait for the timer to run out before the mission ends.
* Hold the Unsolicited Ingredient: Character orders something, and specifically asks for it without a particular ingredient.
* hold this entire massive fortress. Predictably, it ends poorly for him.
* Hold up a quarter, the sun's about the same size (not really, but the real answer is much more complicated), and babies being bought at Sears, as a kit (Calvin was a Blue Light Special from K-Mart, however. "Much cheaper, and almost as good"). Calvin's mom is usually around to correct things, though.
* "Hold up the train. Ammunition ship afire in harbour making for Pier 6 and will explode.
* Ho L during the game. If the character cannot get out of a situation and has points in Grace of God, they can say "Praise Jesus", which allows the DM to use any random, nonsensical, and/or inexplicable means they can think of to solve the character's dilemma.
* Hold Your Breath makes a brief appearance as the place where Klaus was executed.
* Hold Your Hippogriffs: A work of fiction has the characters use different versions of familiar phrases and figures of speech due to the setting preventing the normal versions of the statements from making any sense.
* Hole in Flag years, followed by another eight years of small-scale insurgency before Russia (barely) asserted control. Ultimately, it did little more than showcasing that the once-feared Red Army was not even a shadow of its former self.
* Hole in the Wall, if players didn't successfully contort themselves to fit through the cutout shapes in the wall, chances are they'd end up destroying part of the foam walls by accident.
* Holes adaptation set in a post-apocalyptic world, original author Louis Sachar wrote the final screenplay himself, keeping the film very faithful to the book.
* Holes: After Stanley has learned to no longer expect water from the vengeful Mr. Sir, Mr. Sir surprises him by refilling his canteen that day. But then he takes it to his car and gives it back a minute later, still full. Then he waits for Stanley to drink from it. When he's so thirsty he can no longer bear it, Stanley pours out the entire contents of the canteen, refusing to drink from it thanks to his suspicion.
* Holes always calls them by their given names. Except Zero, because nobody really likes him or knows his real name.
* Holes, and a handsome and muscular young man who genuinely loves her, she decides to use the method of "I'm thinking of a number between one and ten!" After she does this, Elya realizes she isn't worth it and leaves.
* Holes, a plot-important wrecked rowboat sits in the middle of the dried-up lake.
* Holes as a filler name for the main character, planning to replace it later with a more normal name. He never did, and Stanley's weird name even ended up becoming a plot point.
* Holes by Louis Sachar has an interesting take on this. The main story involves Stanley Yelnats at Camp Green Lake in the present day, with the other two stories of Kissin' Kate Barlow and Elya Yelnats taking place far before the events in the present. The characters in the latter two stories are of course dead by the time Stanley's story takes place, so arguably, you're seeing them as flashbacks or snippets of the past (though they aren't framed as such).
* Hole's death). Funnily enough, the song was replaced with the song "Olympia", but the name on the album's cover wasn't changed.
* Holes has Kate Barlow, who kills the sheriff who tried to blackmail a kiss from her in exchange for sparing the life of her boyfriend, whose only crime was kissing a white woman (Kate) while being black. However, she loses most of her sympathy

points when she becomes a full-fledged outlaw, robbing and killing men who'd never done a thing to her.
* Holes is a masterpiece of Chekhovian gunmanship. Onions, spiced peaches, foot odor cures, and yellow-spotted lizards, and more all come back in some form in the second half of the book.
* Holes is still regarded as faithful to the original book. Louis Sachar had a big hand in the adaptation.
* Holes just barely qualifies, as it has two subplots which are not connected to the main plot until towards the end of the book.
* Holes, Madame Zeroni is an old Egyptian woman with dark skin and a very wide mouth. She puts a curse on Elya and his descendants for not carrying her up the mountain so she can drink from the stream.
* Holes, makes a cameo in the film version as Mr. Collingwood, a bald man who Sam the onion picker gives a supposed "Hair tonic".
* Holes, Part 2": "Butt of the Joke" is a song by Horse's tail about how he loves being a comedian and in the spotlight.
* Holes's back story involves a man getting lynched because he was accused of rape by a third party. His partner was consensual.
* Holes: Stanley (Caveman) is returning to his sleeping quarters after a late night of digging early on in his stay at Camp Greenlake. He turns to find Mr. Sir pointing his revolver seemingly at him and thinks it's all over when Mr. Sir fires. Mr. Sir was not aiming at him, however, but at the deadly and extremely poisonous yellow-spotted lizard that had snuck up behind him. Earlier in the movie and in the book, Mr. Sir says, when Stanley is seen eyeing his revolver nervously, "This is for yellow-spotted lizards. Don't worry; I wouldn't waste a bullet on you."
* Holes, Stanley has the book thrown at him after getting hit in the head with a pair of shoes that happened to have been stolen.
* Holes, Stanley Yelnats is sent to a juvenile detention camp when he is found with a stolen pair of sneakers that were supposed to sold at a charity auction. In truth, they literally landed in his lap when Zero, the real thief, threw it off a highway overpass trying to get rid of them.
* Holes tells him this how his great-grandfather, Stanley I, met his wife, delusional and thinking she was an angel after he was rescued from the desert he was abandoned in.
* Holes that reveal information that the protagonist, Stanley, does not know:
* Holes. The kids see a cloud in the sky, the first they've ever seen in this arid desert, and start joking about how they need to start building an ark with two rattlesnakes, two scorpions, and two yellow-spotted lizards. It's all just to get their hopes up, as Camp Green Lake hasn't had rain for a hundred years.
* Holes. There is also, in the backstory, Kissin' Kate Barlow, a woman who takes revenge for the murder of her beloved by becoming a bandit.
* Holes, the Warden starts to lose her patience with the diggers and both Mr. Sir and Mr. Pendanski's incompetence, leaving the scene while uttering:
* Holes. Things just seem to stick to him wherever he goes. Unfortunately, a lot of those items don't belong to him, so he wound up at the juvenile camp.
* Holes, this is the idea behind Madame Zeroni's deal. Elya is to carry a pig up to a spring at the top of a mountain each day, in order to impress a woman, with its eventual weight as a dowry. However, the true purpose is to have Elya carrying a gradually growing pig; over time, it would develop the muscles that would truly impress the girl. Subverted when the woman turns out to be stupid, and Elya leaves without her.
* Holes up a mountain, where the severely dehydrated pair finally find water after wandering for days in the desert, and as they drink, Stanley absently sings an old family lullaby — a translation of the same song that Elya was meant to have sung to Madame Zeroni. In this case, no one in the family was aware that the curse even had an escape clause, and Stanley also had no idea that Hector was a descendant of the woman who cursed his family; he was simply trying to save his friend's life, and the rest just happened to fall into place.
* Holes, we have the tragic case of Miss Katherine and Sam, though in love with

each other, cannot be together because she's white and he's black. When the rest of the town found out that they had kissed (a huge crime back in their day), they burned down Miss Katherine's schoolhouse and killed Sam in front of her.
* Holes, when Kate Barlow recognizes Trout Walker's accomplice as a former student of hers, she actually seems disappointed that this is what's become of her.
* Holes, who initially tried to gain weight but stopped when Sachar himself told him that it was more important that he focus on depicting the character's diffidence. Film-makers also said it would have been difficult to have an overweight 14-year-old actor gradually losing weight like his character did in the book due to the digging.
* Holes), Zigzag was arrested for burning styrofoam on a school lawn until the flames got out of control and burned down a classroom. He insists "I wasn't trying to hurt anyone. I just like watching things burn."
* Holey Moley does the best dives (while the actual contestants rarely do better than a belly flop), but the judges hate him and always give him a 1.0 or worse (including Goph).
* Holey Moley features an outer space- and planet-themed hole in its second season. Naturally, it's named "Uranus" and the hosts' commentary exploits this for all its worth.
* Holger, becoming able to sense when two people have a thing for each other.
* Holger Danske (Holger Dane) crosses the line between this and a legendary hero.
* Hol has Frank, the Were-Guy, who's so manly every full moon he can only turn into something even more manly.
* Ho L. His description makes a point that the stitching is done with special bioengineered regenerative, thermal-adaptive wire, to make sure it's not going to be easy to remove.
* Hol Horse has the same way with women, which he uses to take advantage of them - not in
* Hol Horse. While fighting White Album alone, Mista shot himself twenty times—and survived.
* Holiday-Appropriate Weather: It's always appropriate weather for a holiday.
* Holiday contains a discussion between Linda and Ned Seton about this. Linda, mortified to find she has fallen in love with her sister's fiancé, contemplates getting drunk on champagne and asks her brother what it's like. In the end, she decides to be stoical about the situation and goes to join the engagement party instead.
* Holiday ends with Linda running after John, who has just broken up with her sister Julia. Her brother Ned drinks a toast to them and to his grandfather. Curtain. We're never told what kind of relationship John and Linda end up having, we can only hope that Linda wins John's heart in the end. The 1938 film adaptation adds an extra scene of the couple reuniting, and ends on their kiss.
* holiday episode at the end, by having the characters remark 'Aren't we forgetting something?', with a meaningful close-up on Kenny (as if he was about to get killed once again), before the 'THE END' pops up, and Kenny lets out a triumphant "Woo hoo!".
* holiday episode, he thanks Gary for his help and offers him a Santa Claus Pez dispenser as a Christmas present. Gary is touched but bemused; Michael then confesses that he stole the Pez dispenser off his business partner's desk at the last minute.
* Holiday episodes are also part of the regular rotation in the United Kingdom too, at least on Channel 5's Milkshake block.
* Holiday in Cambodia (the urban variant, involving seedy Asian cityscapes)
* Holiday in Cambodia (which is set in Vietnam, but filmed in the Philippines).
* Holiday Inn Express has a series of TV ads where someone attempts some highly skilled job (taking over flying a plane when the pilot is unable to, major surgery, a freestyle rap battle, etc...) When someone asks them if they are qualified, they reply, "No, but I did stay at a Holiday Inn Express last night".
* Holiday Inn four years later, although this was not the original plan.

* Holiday Inn: In universe. The set used to make the movie "Holiday Inn" is the same set used to make the "real" Holiday Inn.
* Holiday Inn — the same film which gave us the immortal song "White Christmas".
* Holiday Inn was originally to have been produced on Broadway as a plotless revue.
* Holiday Inn was the inspiration for the name of the popular real life hotel chain.
* "Holiday Knights" has a more restrained example — The Joker interrupts "the Toilet Bowl" while dressed as a referee, implying that he's specifically targeting the broadcast of a football game.
* Holiday, Linda reacts this way to discovering that she has fallen in love with her sister's fiancé.
* Holiday, Linda realises she has fallen in love with her sister's fiancé. Being a good sister, she refuses to do anything to disrupt the relationship, but she still struggles with her own feelings.
* Holiday. Linda, who loves her sister, staunchly refuses to act on her feelings until the end of the movie.
* Holiday on Ice, currently a Europe-only production which has given the continent shows featuring:
* holiday-related tropes alone has 15 out of 71 tropes that had been launched in December.
* Holidays has various horror stories taking place on Father's Day, Valentine's Day, Easter, New Year's Eve, Mother's Day, St. Patrick's Day, Halloween, and Christmas.
* Holiday, she confesses that she has fallen in love with their sister Julia's fiancé. Ned advises her to act on her feelings, but Linda refuses to betray Julia.
* Holidays: Heidi is constantly mocking Maxine, and shoves her into the pool off the diving board when she hesitates over jumping. She even stoops to mocking Maxine's dad's suicide.
* Holidays In Hell National Affairs Desk. (And frankly, anyone who can come up with an article title like "How to Drive Fast on Drugs While Getting Your Wing-Wang Squeezed and Not Spill Your Drink" has at least a touch of HST in him.)
* "Holidays in the Sun" features another cut from the Bollocks sessions that was left off the album, a recording of "Satellite," an older song about playing unpleasant gigs in small towns around London in the band's early days, trying to build a following. It's nothing groundbreaking, but it's a fine song and a damned energetic performance that really benefits from the bigger-budget production and fuller sound available to the band at the time of recording.
* Holidays. Maxine is cruelly, constantly bullied and teased by other students, with their leader Heidi even mocking her dad's suicide.
* Holidays of Future Passed man. Otherwise the plane fits negative stereotypes of subways: the interior is identical to a subway, with people cramped and standing, filthy and noisy, full of hobos, weirdos and people too poor to afford other transportation.
* Holidays of Future Passed, then goes by District 10, a more upscale neighborhood filled with Prawns.
* Holidays on ICE instead with those placards. One asks him to "Say something Jeff Goldblum-y." He stammers — and the next card says "You just did".
* Holiday Special 2017, a snipped starring Astrid and Korrina has the former remark that they've put the Christmas decorations way earlier than they should have.
* Holiday Special 2020 her boyfriend, which her friend quickly points out much to her embarrassment.
* Holiday Specials to snap Volkner out of his holiday funk. Volkner of course doesn't buy it.
* Holiday Star, but he sees no significance in it. Birds don't wear clothing much - to him, skirts are basically like an apron or any other uniform.
* Holiday Star, so instead this is an alternate universe in which the human girl did not fall in love with anybody.

* Holiday Star, Yuuya pushes Hiyoko out of the way of a tank shell and is burned too badly to stand for his efforts.
* Holidays: Teenage Maxine is attracted to her forty-something teacher. When he gives her a Valentine for consolation over her bullying, she goes off the deep end to give him a gift in return.
* Holidays Unwrapped, where she bursts out of a snowman to pelt Rarity with snowballs... by yelling first "SNEAK ATTACK... that you aren't expecting." Naturally, Rarity sees the snowballs coming and stops them with a diamond shield.
* Holidays with Holmes, Watson elbows Holmes in the ribs to get him to shut up when he starts chuckling and making comments about an overweight woman passing by at a Christmas party.
* Holidays with Holmes: Watson mentions that at one past April Fool's Day, he had retaliated against one of Holmes' pranks by hiding an enema in his lunch, leading to a mutual agreement to leave edibles alone.
* "Holiday": There is a device that swaps Daniel's consciousness with that of a very old man (who had apparently built the device for that purpose, to prolong his own life), as well as the minds of O'Neil and Teal'c.
* Holiday Wars kills Santa Claus and declares war on all the other holidays.
* Holiday Wars: Superbowl Sunday is nothing but cannon fodder and killed off at almost the very start of the story.
* Holiday Wars when Labor Day says The Easter Bunny is trying to capture her.
* Holidaze (2019), Jingle is introduced magically turning the neighborhood into a Christmas Wonderland on Halloween night, implying that he represents the sudden shift between holidays.
* Holidaze (2019) when Jingle and Jangle are reading a story about him.
* Holidaze and is an anthology of Krampus-themed stories with other holiday icons.
* Holidaze establishes through Jingle and Jangle's friendship that Halloween and Christmas are not so different from each other. They both like candy (Jingle offers a candy cane, Jangle summons a mountain of Halloween candy with a magic trick), they both have holiday-themed drinks (Jangle enjoying a peppermint latte, Jingle having pumpkin-spice), they both have their own scary stories (Jangle taking Jingle to a monster movie, both of them later meeting Krampus) and they both think very little of Thanksgiving (both of them mocking a turkey with a pilgrim hat, presumably Thanksgiving's arbiter).
* Holidead against Mariachi Loco and Lil' Cholo at Sabotage Wrestling's October 7, 2016 show, Cholo had Thunder Rosa in a Pendulum Swing with the intention of having her face go into Mariachi Loco's crotch, with Thunder shaking her head "no", and the commentator saying the same thing, until Mariachi simply stomped on Thunder Rosa's head. Then Holidead ran in, saying, "This is a family show, you pervert!"
* Holidead. Debuted in 2013 and joined Stardom in 2015. Has done indie shows and lost to Io Shirai on an episode of NXT.
* Holidead, October 14, 2017. One of the commenters said she was "thicc as hell," and another said, "That zombie's got a nice ass."
* Holidead, towering over her opponents and generally seeming crazy and uncontrollable.
* Holier Than Thou: An arrogant character who acts like they're better than everyone else.
* Holier Than Thou and single-handedly beat down Daemon Primarchs (in previous fluff, one Primarch required an entire crusade and one hundred Grey Knights to stop, and he killed them all to a man before falling).
* Holier Than Thou: I am the most righteous person on the face of this earth!
* Holier Than Thou isn't beyond salvation (it's established clearly that he is at that point) and doesn't want to destroy him, even as he's consuming the world at that moment...
* Holier Than Thou lawful servant of Helm, would be a bit out-of-place for a chaotic evil charname;
* Holier Than Thou, misogynistic dimwit who desperately clings to a hopelessly untrue vision of himself as a respected badass, devout Catholic despite him barely understanding the religion and misinterpreting the bits he does know (it's usually

Dennis, who is openly an Atheist, who corrects him). He likewise needs it spelled out to him why he shouldn't tell people in advance that he plans to manipulate them, or why he should keep quiet important information, until after he's struck a deal out of knowing it.
* Holier Than Thou: There's no need to explain ourselves. We are purer than you!
* Holland dedicated to destroying speed cameras erected at the roadside. A legitimate criticism of such cameras is that their primary purpose is not road safety or driver education re speed: that a device that clearly photographs number plates, and can follow this through with a fine via the driver's letter box, is just another way to tax road users. In Holland, protest groups have set up to find clandestine and creative ways to destroy the cameras, or at the very least to render them unusable. Gambits have included squirting expanding insulating foam inside the works, or deliberately sabotaging the shutter mechanisms with superglue. When all else fails, use of angle-grinders to cut the poles and bring them crashing down has been tried. Cameras have been left undamaged, but deliberately turned to face away from the road and into bushes where they might photograph speeding birds. This form of protest began in the Netherlands and has spread to Germany, France, Britain, and the USA.
* Holland, gay singer notable as one of very few openly LGBT K-pop stars.
* Holland". The lady dancing through the streets in I'm so Afraid also wears it.
* Holland". They do not kiss on the beach, but do so in the next scene.
* Hollie was a cute-looking girl with a good character design and a dynamic of being
* Hollins University, which is an all women's university in Roanoke, Virginia, may qualify. The school has secret organizations, such as Freya (members wear black, hooded robes, remain anonymous in their lifetime, and pass out cookies during finals), as well as traditions such as Ring Night that require junior class volunteers to do silly stunts. Other traditions include things like Tinker Scares, in which the senior class runs through dormitories banging pots and pans yelling that Tinker Day has come. The seniors will perform several of these before Tinker Day actually arrives — during which time classes are canceled, and students and faculty dress up in strange costumes and climb Tinker Mount in Roanoke. It's worth noting that that last tradition dates back to when the university was a seminary institute in the late nineteen century.
* Hollow Ataraxia at least about the way they're linked, though he still treats her as a little kid. Which is okay because she definitely acts like one. However, there's a genuine example of the trope in that Taiga used to have a huge crush on Kiritsugu which caused her to initially get along poorly with Shirou. Given that she's only 24 now, he died 5 years ago and she had that crush for a pretty lengthy amount of time, you can guess that the crush started when she was no older than middle school age.
* Hollow Earth Expedition and hold them up in the air for the Sun God (the Hollow Earth sun) to gaze down upon.
* Hollow Earth Expedition. A person wearing a flamethrower is a potential walking bomb if gunfire hits the flamethrower.
* Hollow Earth Expedition can encounter inside the Hollow Earth are giant meat-eating arachnids that are 10 feet long (not including the legs). They hunt like normal spiders, injecting a paralyzing poison with their bite and cocooning the prey to eat later.
* Hollow Earth Expedition. Cannibal tribes are known for their skill in creating poisons. Some of them include small doses of poison in their meals to build up an immunity to them.
* Hollow Earth Expedition. Cargo cultist tribes live by collecting items from the surface world that reach the Hollow Earth as flotsam and jetsam or inside beached ships or crashed airplanes. They worship the gods that they believe send them the items and even create "landing fields" to encourage them to send more.
* Hollow Earth Expedition found there as an energy source and/or extremely powerful explosives.
* Hollow Earth Expedition get too close, the mother will charge them, and if they

attack the child, she will become enraged.
* Hollow Earth Expedition supplement mentions Nutrient Pills as a possible Artifact Resource. Swallowing one replaces eating a normal meal.
* Hollow Earth Expedition supplement, the Paranormal Investigator archetype works for the FBI's Special Investigations Unit. He investigates and deals with supernatural events and things and covers up the truth from the general public. He even has a Neuraliz... er, Amnesia Ray device.
* Hollow Earth Expedition. There is a time dilation effect inside the Hollow Earth that causes time to pass at a slower rate than in the surface world. Because of this, dinosaurs that became extinct on the surface millions of years ago still exist in the Hollow Earth.
* Hollow Earth Expedition. The Terra Arcanum is a secret organization created by the Atlanteans to prevent humanity from finding out about or entering the Hollow Earth. Over the centuries they have become a network of power brokers who control the Earth's leaders and institutions.
* Hollow Earth Expedition. The Wandering Hero archetype is a monk from China who wanders the Earth fighting against injustice and helping people.
* Hollow Earth Expedition. Thousands of years ago the Atlanteans were masters of the Earth. They reached heights of technology so advanced that modern day scientists can't understand them. Before they disappeared, their human followers considered them to be gods and built temples to worship them.
* Hollow Earth Expedition. Titans sometimes pose as gods in order to receive offerings (food, water etc.) from primitive tribes. They are helped in this trickery by the fact that an adult titan is twice as tall as a human, and an old titan can be as much as thirty feet tall.
* Hollow Earth Expedition. When a shaman uses the Spirit Journey ritual their spiritual self leaves their body and travels through the spirit world. If their spirit spends too long away their body will waste away and die, stranding them there.
* Hollow Earth Expedition. When the Atlantean language is spoken properly it can be understood by any sapient being that hears it as though it had been spoken in their native tongue. In other words, it's a language that translates itself.
* Hollow Earth Expedition will guide lost travelers to the edge of the Northern twilight region so they can return to the surface world. If after taking a few steps to the south they turn and look back, he will have mysteriously disappeared.
* Hollow Fields has Lucy's stuffed dinosaur (later converted into a grappling hook) Dino.
* Hollow Fields, the story's namesake school has an entire class dedicated to the subject.
* Hollow Fields where bad grades are punishable by death, and a homework assignment is sewing a parrot's head on to a fish while keeping the resulting monstrosity alive.
* Hollow Fragment. Although suspecting she's not real, Kirito is hellbent on protecting her at all costs so she won't die again. Eventually Sachi reveals she is indeed not the real Sachi. She also remembers the words the real Sachi never got to say to Kirito, which leaves him distraught and shaken, but also giving him closure.
* Hollow Kingdom Trilogy: Although not in the trilogy proper, this is the ending for one of the villains. Thorn, after having spent a lifetime abusing his wife and bullying the small group of elves he leads, is punished by the goblins for trying to steal back his wife, with the same afflictions he had hurt his wife with or abused her for. This goes on for several years until he is found by the Elf King, who forbids him to remarry due to his history. Thorn attempts to live as a good elf until the day an elf woman is widowed. Because of elvish society, only children take their own shares of food, while men take their and their wife's shares. So that she isn't humiliated, Thorn takes a share for her. The Elf King decides that it can only continue if the elf woman chooses to marry Thorn, which she does. This finally seals Thorn's redemption.
* Hollow Kingdom Trilogy) and claims to want to journey to find her human nature, but really to chase after him.

* Hollow Kingdom Trilogy, both the Elf and Goblin Kings only ever have one son apiece. None of those messy succession debates here, no sirree!
* Hollow Kingdom Trilogy, Kate sacrifices herself to the goblin King, Marak, and becomes his wife in order to save her sister, Emily. Sad ending, right? Nope. The story then skips ahead more than a year for the last few chapters and introduces a new sorcerer villain who is out to enslave the goblins.
* Hollow Kingdom Trilogy. The kings of both must marry outside their species in order to carry their magic forward (humans for elves, any sentient species for goblins).
* Hollow Knight a clownishly inept jagoff that the Hunter could not even be arsed to go after him.
* Hollow Knight, at the end of the tutorial, you find a sign telling the Knight (and pressumably any other traveller who happens to visit) that they are entering the "Last and only civilization. The Eternal Kingdom; Hallownest." Even then, it is clear that there is little remaining of this so-called eternal kingdom, and that only becomes more obvious as you go.
* Hollow Knight is about the same size as the Knight, who is heavily implied to be a young child. However, he speaks with the voice of a grown adult. Most characters implied to be adults are at least taller than the Knight.
* Hollow Knight opens his boss fight with a bellow. It sets the tone admirably.
* Hollow Knight originate from his videos). Whenever a new fan wants to learn more about the game's lore, veterans usually recommend watching mossbag's videos.
* Hollow Knight's Flukemons and Flukefeys look nothing like parasitic flukes, and are closest to annelid worms, particularly leeches.
* Hollow Knight: Silksong does much the same thing with Hornet. When she is defeated, she hovers in pain, screaming as her silk fades away from her and she is engulfed in darkness.
* Hollow Knight's NPCs are named after the Kickstarter backers who designed them, e.g. Tiso by Tiso Spencer, Joni by Joni Kunelius, and Marissa by Marissa Brice.
* Hollow Knight's theme is a series of very low and very slow notes. They are actually part of the game's main theme, slowed by about 500%.
* Hollow Knight that controls their corpse after you strike them down.
* Hollow Knight that doomed the plan, making all the sacrifices pointless.
* Hollow Knight: The game has three achievements for speedruns (under 10 and 5 hours, plus under 20 hours with 100% completion).
* Hollow Knight, the Grey Mourner refers to her canonically female lover as male.
* Hollow Knight, the shade the player leaves behind when they die is this, but it's far from the only example of this trope in the game. Case and point:
* Hollow Knight, the Volatile Mosskin and Fungified Husk enemies release largish clouds of toxic gas around them as their primary attack, and both also explode into a cloud of toxic gas shortly after being killed.
* Hollow Knight, you can encounter her in the Pleasure House. To get your money back, you are required to smack her around, and your stolen money will fall out from her body.
* Hollow Knight, you're treated to a brief cutscene of him hammering at the nail as it glows.
* Hollow Man 2, the antagonist Michael Griffin was one of these even before being injected with the invisibility serum. His commanding officer kept him from being charged for war crimes committed in Iraq so he could be part of the project. Since the real purpose of the project was to create a perfect assassin to kill off the project head's political enemies, a test subject with little to no morality was just what the project needed. When Griffin becomes even crazier due to the lethal side effects of the serum which only a special chemical booster can alleviate, his former commanding officer learns the hard way that giving a murderous sociopath invisibility powers and a reason to hate you can backfire.
* Hollow Man, as well as making the previous test subject visible again.
* Hollow Man Caine, and doesn't realize anything's amiss until it's too late. (We, however, see a very cool ghostly outline of the submerged Caine.)
* Hollow Man, Elizabeth Shue's character is grabbed and pulled off a ladder by

Kevin Bacon's character and falls on top of an elevator.
* Hollow Man has one character MacGyver an electromagnet from a defibrillator and a drawer handle to open a locked walk-in freezer.
* Hollow Man, Linda is fast asleep in bed with the windows wide open. Suddenly, the bed covers slip off of her and Caine crawls onto her bed, takes her underwear off, and begins to rape her. And then she wakes up with the bed covers still on her.
* Hollow Man" monologue, the heroine takes a couple of screws, cups, strings, and other extraneous items and somehow manages to create an entire bulldozer, destroying the wall and allowing them to escape.
* Hollow Man occurs when the room fills with steam, prompting a character to declare "The goggles are worthless!"
* Hollow Man's character uses his invisibility power to rape his female neighbor.
* Hollow Man: Sebastian Caine, after using a serum that renders him invisible, slowly gives in to his darker inhibitions by pranks at first, then escalation to attempting to violate an attractive neighbor and murdering his colleagues slasher-style and destroying the laboratory when he finds out his mentor Kramer is told about his activities.
* Hollow Man, the heroine is trapped in a supply room, which is barred shut by the bad guy. She improvises an electromagnet from wire, metal, and an emergency defibrillator, then uses it to draw the steel bar aside from the other side of the door.
* Hollow Man, the main character says, "You'd be amazed what you're capable of when you don't have to look at yourself in the mirror any more." as he starts to go insane from the procedure.
* Hollow Man, the token minority black woman tells one of the other scientists that a guy at the coffee shop told her "'I like my women like I like my coffee.' Can you believe people still use that line?" His reply is "Maybe he meant cold and bitter."
* Hollow Man wears a good-looking calf-length leather jacket in several scenes.
* Hollow Man, when the crew tries to locate invisible Caine via heat sensors.
* Hollow Places Cindy has this reaction upon learning that Austin has discovered an anomaly and is using it to help others.
* Hollow Places features Austin finding Isabella slow-cooking in a glass box, having been captured by a serial killer. Austin places his palm over Isabella's through the glass and promises to get her out.
* Hollow Places features a variation of this trope. Austin does end up with Isabella, but by then she's so different from the woman he fell in love with she could hardly be called the same person.
* Hollow Places for dead bodies isn't entirely sane, it's made clear he knew exactly what he was doing.
* Hollow Places Its layout transforms with every visit. Rooms change in shape and order. Corridors alter directions. Formations appear and disappear. On one occasion, the cave led up to what should be miles in the sky rather than descend into the ground (which, of course, could not be seen from outside). During Austin’s (the protagonist's) final trip, he encounters paths that loop into each other in impossible ways. The only consistent features are the presence of the inscribed column and the primary anomaly wherein people are teleported to the location of their choosing after walking eighty-one steps past said column.
* Hollow Places manages to torment one of his surviving victims while in court simply by showing her a disturbing smile.
* Hollow Places mentions the upper management of Shore State Corrections. They institute policies that purposefully foster recidivism in their prisons in order to increase profits.
* Hollow Places refrains from using the word 'love', thinking himself too broken to ever truly feel an emotion worthy of being referred to as such.
* Hollow Places was published in 2016 and takes place in 2023. It features a few minor technological advancements including holographic clocks, prison cutlery able to cut food but not human flesh, and cellular services that extend deep underground.
* Hollow Point wings that all distrusted each other and, after being pushed by the

protagonists, collapsed into fighting each other.
* Hollow Realization, they chose to use an item necessary for their current quest to revive her and eventually they recruit her into their group to have more adventures.
* Hollows and shinigami are post-death beings. In short, ghosts. Although it's possible to kill them without actually cutting off their heads, they can potentially survive truly severe injuries. As a result, the only way to be absolutely certain Hollow or Shinigami is dead is decapitation. This can lead to extraordinary measures being taken to ensure the most powerful Hollows or Shinigami are definitely dead from their wounds and stay that way. Even then, being a Buddhism-influenced story, this will free the souls to continue along the wheel of transmigration, allowing the soul to be reborn as a completely new being.
* Hollows evolve as they get stronger by eating other spirits. First, you have a regular cannibal ghost. Then, that Hollow gets strong enough (usually by eating and/or merging with other Hollows) to become a Gillian, the first level in what's called the "Menos Grande" class. If that Gillian keeps a mind intact, it can keep eating to become a smaller but stronger Adjuchas. In extremely rare cases, this development can continue and result in the human-sized, insanely-powerful Vasto Lorde.
* Hollow Undead are even more of a pushover, especially past the first few levels. Come to Duke's Archives, and you'll be greeted with Crystallized Hollows. Heavy defense against physical attacks, nigh-invulnerable to magic, and usually backed up by
* Hollow World — a regular planet, but hollow inside; the inside surface is usually inhabited.
* Hollow World setting, where the Blacklore elves' "advanced technology" is secretly powered by magic. This allows the Immortals who oversee the Hollow World to preserve the high-tech culture of the Blacklore elves (who've forgotten how their own machines work and can't tell the difference), while ensuring that actual technology won't spread to other parts of the HW setting and disrupt other preserved cultures.
* Hollow World that almost destroyed Mystara, and the Immortals would like to avoid that happening again.
* Hollow World: The world is a hollow shell, and something lives in it.
* Holly and Hal Moose: Our Uplifting Christmas Adventure, the two title characters spend most of the film at the North Pole and therefore naturally spend a lot of time with both Santa Claus and Mrs. Claus.
* Holly and the other first-year Gryffindor girls sneak into the Hogwarts kitchens to make a cake. After Lavender and Hermione sneeze, they all end up covered in flour.
* Holly Blue Agate from "Gem Heist" and "That Will Be All" keeps calling the Amethysts made on Earth "off color". In the episode "Off Colors", Steven meets a group of flawed, misfit gems who reveal that "off color" is a term for Gems who don't fit into Homeworld's
* Holly Blue Agate is abrasive and insulting to her inferiors, excessively butt-kissing towards her superiors (to the point where it even annoys them), and none too competent. She's also the supervisor of the remote Human Zoo, in charge of a bunch of unruly and sometimes defective Gems in what is essentially a memorial to someone most Gems haven't even heard of. These two facts are probably related. Naturally, she doesn't see it this way, often
* Holly Dunn, a country music vocalist of the late 1980s and early 1990s, once released a song called "Maybe I Mean Yes," whose lyrics about enjoying the chase gained controversy after several women's groups claimed that the song endorsed date rape. "... Yes" stopped short of the top 40 of the country charts, and Dunn never had another hit single again.
* Holly Dunn's two most famous songs by far are "Daddy's Hands" and "Maybe I Mean Yes". The former only got to #7, and the latter didn't even crack Top 40 quite possibly for the reason that it is among her most famous — she withdrew the song less than two months after its release, due to concerns from listeners that

its lyrics condoned date rape,
* Holly earlier in Part 3, where she tickles him in the middle of the Tokyo-Narita Airport as an affectionate form of punishment for not visiting sooner.
* Holly Gauthier-Frankel (voice acting example, but has also done some live-action work)
* Holly Gauthier-Frankel, was a burlesque performer for a while after the show went off the air.
* Holly Hills is a borderline example. In the books, she's only seen from afar, since Greg was never able to directly talk to her, but she generally seems like she preferred her own social circle, only seen interacting with Greg once and that backfired
* Holly Hobbie and Friends Amy likes peanut butter and tuna fish sandwiches.
* Holly Hobbie and Friends includes a subplot in which Holly's brother Robby Hobbie and his friend Kyle Morris try to convince everyone that Robby is Santa Claus when he takes a job as mall Santa. He has trouble getting it to work, due to his small stature and his use of the family pig, Cheddar, as his reindeer, despite his best attempt at a booming "ho ho ho" voice. One girl tells him that he can't be Santa because he is not fat and does not have any reindeer, and he tries to convince her that the pig is really is reindeer and that he is skinny because he has gone on a low-carb diet. "Fine! I won't leave you any cookies! I'll eat them all myself!" Despite this, he manages to get the Deegan twins (the sons of the widow in the film) to tell him their true Christmas wish, which, in a twist, isn't something like wanting their father back or seeing their mother happy (though they would like this), but rather to have an earwig farm.
* Holly Hobbie and Friends often hatch them, though they often turn out to be both inspired and work out well.
* Holly Hobbie and Friends onwards has this due to a Nicole Bouma taking over from Alyson Stoner. However, while Alyson Stoner does her own singing, Nicole Bouma was paired with Mariella Piluso (apparently related to the producer of the show- hence the rampant accusations of nepotism), and it wouldn't be a problem if the two hadn't sound so different that their voices hardly matched up.
* Holly Hobbie and Friends's desire to shun Christmas and things related to it following the death of her husband/their father.
* Holly Hobbie and Friends show aimed at girls but it's never really escaped the stigma of being exclusively for them.
* Holly Hobbie and Friends, though his subplots often involve him having entirely separate adventures with his best friend Kyle.
* Holly Hobbie and Friends, when Holly says that old man Scranton's "bark is worse than his bite," Amy thinks that Scranton bit Holly.
* Holly Holiday is a quirky, sexy, fun-loving, restlessly spontaneous substitute teacher. Through his platonic and then romantic relationship with her, Will learns how to let loose and live a little. However, she admits that she's a mess, and incapable of any kind of commitment.
* Holly identifies Plato as the inventor of the plate, while Rimmer thinks that Columbo discovered America and calls Marilyn Monroe "Mary Magdalene". However, this might be because Holly's computer-senile and Rimmer is an idiot, rather than because it's the future. Holly also loves practical jokes.
* Hollyleaf, one of the heroes and point-of-view characters, appears to die in
* Hollyleaf, when she returns after a year of having been thought of as dead, and then is instantly revealed to her Clanmates as a murderer (though her family covers for her, claiming Ashfur attacked her.)
* Holly Lisle About one day later, we find this quote: "And indeed, she felt happy. Or, if not exactly happy, then free at last of the dark burden of [her hometown's] annihilation." After that, the horrible events are never ever mentioned again, and Faia never angsts or even thinks about it. So Lisle was smart enough to give Faia some real pain, but then she erased that pain pretty quickly. Ask anyone: emotional pain of that scale doesn't heal in just a couple days.
* Holly Lisle is a textbook example of this trope: the protagonist is a female cop who goes undercover as a stripper to find a serial killer.

* Holly Maddux disappeared after returning to her abusive ex-boyfriend's apartment to collect her things. 1.5 years later, her remains were found stuffed in a trunk which was itself stuffed in the back of his closet. The position of her body—arms outstretched—indicated that despite the severe bludgeoning he administered, she was still alive when he placed her in the trunk and died trying to get out.
* Holly Marie Combs. For her second pregnancy in Season 8, she just wore a lot of black and loose clothes.
* Holly Marie Combs's departure in Season 4. But she was forced to stay by contract and had bills to pay.
* Holly Marie Combs, where her character cuts a fringe to hide a bruise.
* Hollyoaks, after Becca Dean was murdered, her husband Jake moved on to and married her sister Nancy in fairly short order.
* Hollyoaks featured a storyline in which a character was forced to marry an illegal immigrant so he could stay in the country.
* Hollyoaks features Brooke Hathaway, played by Tylan Grant; both are on the autism spectrum.
* Hollyoaks has both dramatic and comedy stingers. They range from scorned lovers looking longingly at a photo of their lost love to relatively young women having random dreams about seducing the middle-aged pub landlord.
* "Hollyoaks" has Brendan Brendan for his on-again, off-again boyfriend Ste Hay.
* Hollyoaks have cancer (and, therefore, that the resolutions for her loved ones were equally imaginary).
* Hollyoaks. Her actress Ashley Slanina Davis decided to cut it for charity, so in the soap, her abusive boyfriend cut it off because he thought it looked childish.
* Hollyoaks, India eats a pizza that Hayley has laced with laxatives. This leads to her winning the contest for Josh's car when she has an accident and causes everyone else to flee in disgust.
* Hollyoaks, India eats a pizza that Hayley has spiked with laxatives. She wins a contest for a car where the last person to leave the car wins after she soils herself and everyone else runs out because they can't stand the smell.
* Holly Oaks: In the September 11th 2015 episode of the soap-opera, Reenie gives her daughter, Porsche, a wedgie for insulting her.
* Hollyoaks involved popular character David "Bombhead" Burke being unable to accept his mother's death and keeping her corpse in the house for months, talking to her and cooking for her as if she is still alive. He is only found out when friends break into his house and find the body.
* Hollyoaks involves the sixth-formers stealing a minibus to drive Jono and Ruby to Gretna Green to elope. The bus's brakes are faulty and they crash into a building where other characters are having a double wedding ceremony. Some leaking fuel ignites, and the bus explodes spectacularly, killing Neil who is trapped inside after Maddie chooses to leave him to die.
* Hollyoaks is also prone to this trope as well, and will be doing so more over 2011.
* Hollyoaks, John-Paul's failed romance with Hannah leads him to realize that he is actually gay and in love with his friend Craig. This was also used to kick off Hannah's controversial eating disorder storyline as she refused to accept his sexuality and believed it to be a nice way of telling her she was ugly.
* Hollyoaks returned from Dublin just in time to see his estranged brother murder his sister.
* Hollyoaks: Sarah Barnes, a part-time model, is lusted after by just about everyone. Hannah Ashworth is so jealous of Sarah's looks and popularity that she develops a severe eating disorder in an attempt to look more like her.
* Hollyoaks, secondary school teacher, Becca Dean falls in love and embarks on an affair with a teenage student, Justin Burton. Many years later the show repeated the storyline with Jen Gilmore and her student Tilly Evans.
* Hollyoaks: Texas Longford dies on her wedding day when she's pushed out of a window by her new husband.
* Holly, particularly when he used the mobile monitor on wheels or appeared on

Lister's watch in Series 2.
* Holly Short was initially going to turn down her promotion to Major because she didn't want to be taken out of the field. Just before she is about to officially turn down the position to
* Holly's preferred form of locomotion in Series II is a large and unwieldly CRT monitor on caterpillar tracks.
* Holly Summers in is fond of launching salvo upon salvo of missiles
* Holly, the AI interface aboard the Red Dwarf, starts off as male but undergoes a virtual-sex change (as part of an
* Hollyweird, a comedy/horror hybrid about friends solving crimes in Los Angeles.
* Hollywhoot, doing something awesome (like evolving a new parody character) will net you Golden Tickets, which you can exchange for prestigious awards once you rise to Prominence. You can then start over again from the beginning with a boost, so it feels like you're a director who's slowly improving your reputation and track record, which makes the process of achieving Hollywood success easier and easier.
* Hollywood Accounting at it's best, he's not upset despite the 'billion dollars' it's made for WB with him seeing almost nothing off DVD sales.
* Hollywood Acid: Acid in Hollywood movies does not act exactly like real acid would, and is often much more dangerous.
* Hollywood Acid: Acid is always depicted as dissolving whatever it comes into contact with.
* Hollywood Acid, if they dissolve the body or parts thereof in some kind of corrosive chemical;
* Hollywood Acid into the hole in his neck, followed by a harpoon. Then he tricks a baby White Killer Eel to slither into the hole in Darkness Cody's neck, which causes him to dissolve.
* Hollywood Acid. It also gets where they secrete the venom from wrong. In real life Komodo dragons secrete venom from a pair of sacks in their lower jaw, not from the upper jaw like Gosha does.
* Hollywood adaptation for years, with many different people suggested to be a part of the project. The earliest project supposedly would have starred Geena Davis as Queen Beryl, and the most recent rumor suggested Lindsay Lohan as Sailor Moon herself. None of these ever came to pass (and how real any of these actually were was often questioned despite their prevalence in the rumor mills).
* Hollywood, A.D. forty-two times. He claims that the sheer badness of the film numbs his brain, allowing him to make intuitive leaps and solve problems that have him stumped.
* Hollywood Atheist due to some controversial views and statements, most notably their blatant misogyny (such as the Elevatorgate fiasco) and their attempts to normalize blatant Islamophobia as "criticism of religion".
* Hollywood Atheist: Some flavors of this trope appear in Romantic works, with atheists portrayed as having lost something essential, being nihilists, arrogant and even villainous if they embrace supposedly more "rational" ideologies that cause great harm.
* Hollywood Atheists: There is no God, and you must join us in that belief and not listen to anyone who says or tries to prove otherwise!
* Hollywood Atheist. The protagonist has made up his mind that there can't be a God because of the trauma he endured from the cult he and his father was in scarring his arm and killing his dog, but he mentions briefly that he also has rational reasons to not believe in God and he tells the reader to only stear clear of dangerous cults rather than foresake attending church in general.
* Hollywood Atheist: The stereotype that atheists are condescending douchebags to everyone who has religious beliefs or are like that because they've concluded that the suffering and injustice they and/or others endure is proof that there isn't a God.
* Hollywood Atheist: The stereotype that atheists either lost their belief in God because of misfortune they suffered, or are close-minded jerks to everyone who has religious beliefs.
* Hollywood Atheist: The stereotype that atheists either lost their faith because

they determined the suffering and injustice they and/or others endure is evidence that God can't exist; or they are close-minded jerks to people with religious beliefs.
* Hollywood Atheist: We atheists support science and logic! We're way too smart for that fairy tale garbage you Christards believe!
* Hollywood Atlas: It's expensive to shoot on multiple locations, so different places are collapsed into each other.
* Hollywood Autism: Autistic people are all white, male, quiet or talkative, nerdy, stoic, heartless, and severely disabled.
* Hollywood Autism: The stereotypical portrayal of autism, almost always male, unemotional, lacking empathy, with their autism being portrayed as a tragedy to them and others.
* "Hollywood Babylon", Dean has a crush on an actor named Tara Benchley. When he meets her on the set of a horror movie, they end up having sex in her trailer.
* "Hollywood Babylon", Dean is revealed to be a fan of low-budget Horror movies.
* "Hollywood Babylon", Dean, who is a big fan of an actress named Tara Benchley, gets to be a production assistant on a horror movie starring her.
* "Hollywood Babylon", Dean Winchester is mistaken for a production assistant while on a movie set. When Dean asks Sam what a PA is, Sam replies, "I think they're like slaves."
* "Hollywood Babylon", the monster for the horror movie being filmed is a skeleton in a suit holding a fraternity paddle surrounded by a chainsaw blade.
* Hollywood Beauty Standards: Fiction makes people more good-looking than in real life.
* Hollywood Beauty Standards: In general, Hollywood having its own beauty standards, having attractive characters be so in the same ways, "plain" characters actually being beautiful, etc.
* Hollywood Board Games: Board games most commonly played by characters, with the games connecting to the characters' personalities somehow.
* Hollywood Boulevard is a cheap, sleazy, slightly exaggerated, and darkly funny look at the world of cheap, sleazy, 1970s exploitation film.
* Hollywood California: A large portion of American films and TV shows are made and/or filmed in California, and even then in only a few select sections of it. This gives a biased impression to the rest of the world (and sometimes even to the rest of the United States itself, including other parts of California) of what the U.S.A. is like.
* Hollywood California: California only has four places, according to Hollywood. These places are South Central, Hollywood/Los Angeles, San Francisco, and Orange Valley.
* Hollywood CB). It was a short-lived boom, though. By 1983 even the FCC considered CB past its prime and dropped the license requirement.
* Hollywood CB: The radios always work perfectly, you talk only to the person you're addressing, and you can interrupt people. Especially the bad guys.
* Hollywood Chainsaw Hookers: The Master is chainsawed and his cult are rounded up by the police, but the Master's body disappears.
* Hollywood Chameleons: A chameleon can use their color-changing ability to blend in with their surroundings.
* Hollywood Chameleons: Chameleons have an unlimited color-changing ability and can even mimic patterns to become invisible in their surroundings.
* Hollywood Chameleons: Fictional chameleoons have amazing color-changing abilities.
* Hollywood Costuming: Clothing, hairstyles, and makeup don't fit in with the time period of the work.
* Hollywood Costuming: When Hollywood doesn't bother researching historical costumes
* Hollywood Cyborgs. Thing is the guys that remain bad guys were always crazy.
* Hollywood Darkness - A character switches off the last light in the room, a vaguely bluish weak light switches on
* Hollywood Darkness: Even though it's dark, blueish light allows the audience to

see and characters not to bump into anything.
* Hollywood Darkness in the dark. Being forced to rely on senses other than sight can be done well in media, but it can also make things confusing.
* Hollywood DarknessIt's dark, but not so dark that we can't see what's happening.
* Hollywood Darkness, until their leader actually tries to flee from Batman rather than attempting to kill him.
* Hollywood Darlings wrestling with their fame as 1990s TV show kids and often clashing with other former child stars playing themselves like Solei Moon Frye.
* Hollywood Dateless: Character is said to be unable to get a date, yet is shown getting dates left and right.
* Hollywood Dateless: Despite having dated people in the past, this character is treated as though they can never have a relationship.
* Hollywood Dateless: Despite often being ripped on for being dateless, a character has a good number of love interests.
* Hollywood Density: Just because two blocks of material are the same size doesn't mean they're the same weight.
* Hollywood Density: Objects don't weigh the same as they do in real life.
* Hollywood designers Edith Head and Helen Rose deserve mentions as well, giving film an inspiration to fashion.
* Hollywood Dreamtime: People in the West don't even know what the Dreamtime even is, so of course Hollywood is just gonna throw darts onto a board to decide what it is supposed to be.
* Hollywood Dress Code: The clothes that characters wear are first defined by their personalities.
* Hollywood Drowning: Drowning people are portrayed as screaming and violently splashing for several minutes as opposed to quietly and quickly sinking.
* Hollywood Drowning: In movies, drowning victims thrash and scream for help. In real life, they're far more likely to paddle quietly for a few seconds and then sink.
* Hollywood Encryption: Computer encryption is portrayed with many inaccuracies and/or as very easy.
* Hollywood Exorcism: Attempting to rid a possessed person of their demon through religious rituals.
* Hollywood Fire: Fire in Hollywood movies does not act exactly like real fire would, and is not quite as dangerous.
* Hollywood Game Design: Creating a video game (let alone a very successful one) is portrayed as a simple process that only includes a bit of coding and creating 3D models.
* Hollywood Game Night came up with a game where, as it went on, one person has to manage holding more and more sports balls (beach balls, basketballs, footballs, etc.) until they can't any more. The game is naturally called "Hold My Balls" and milked for all the innuendo it's worth.
* Hollywood Genetics: Biologically related characters look way different.
* Hollywood Giftwrap: The typical gift in Hollywood is a box and a lid, each wrapped individually, with nothing securing the lid to the box, with a very elaborate bow on top.
* Hollywood Glass Cutter short story "The Adventure of Charles Augustus Milverton", 1904
* Hollywood Glasscutter: With the help of a device, a diamond ring, or even incredibly sharp nails, cutting out a perfect shape from glass is as easy as cutting paper.
* Hollywood Hacking coupled with flashing images, 3D models, and a lot of made-up techno talk.
* Hollywood Hacking hacking is actually quite boring and would become worthless after the technology is exposed.
* Hollywood Hacking: Hacking is fast and easy! No need to spend days finding weaknesses in the system, coding viruses, or anything un-dramatic like that.
* Hollywood Hacking: Modern mad scientists have the capabilities of exploiting the technologies for their own causes among other reasons.

* Hollywood Hacking. That's how they pancake the plane as proof of their threat. A piece of fridge logic does set in when the other planes don't land after the first crash. Debris on the field?
* Hollywood Hacking, this still occasionally shows up whenever there is a hacking scene.
* Hollywood Healing: Heroes never get scars, even if they logically should.
* Hollywood Healing, he's shown with the hand still obviously injured for at least one subsequent episode, and the interval between episodes on this show is usually somewhat indeterminate.)
* Hollywood Healing: Injuries are never permanent and never cause permanent side effects.
* Hollywood Healing: No matter how badly he's injured, the hero never ends up with permanent scars.
* Hollywood Healing: No matter how serious the wound, the character will heal quickly and without permanent damage.
* Hollywood Heart Attack: Heart attacks are portrayed as more dramatic than they are in real life.
* Hollywood Heart Attack: Media portrays heart attack-induced deaths as dramatic.
* Hollywood Hijinx included a "lucky" palm-tree swizzle-stick, a Hollywood gossip tabloid, and a signed picture of Uncle Buddy with clues on the back.
* Hollywood History, and the painting was actually vandalized by a museum patron for being historically inaccurate).
* Hollywood History on the film maker's part, as Oher was a football player since at least Jr. High.
* Hollywood History: Since Hollywood popularized the genre it often informs biographical misconceptions of famous figures.
* Hollywood Homely: An average or attractive actor plays an unattractive character.
* Hollywood Homely: Character isn't as unattractive as the show would have you believe vs. character isn't as attractive as the show would have you believe.
* Hollywood Homely: Holy crap. Every main character in an average drama can pass for a supermodel, no matter how hideous they are supposed to be.
* Hollywood Homely: In-universe, a character is treated as hideous at worst and unattractive at best. To the audience, the character seems perfectly average, if not beautiful.
* Hollywood Homely that there is nothing more important to a woman than physical appearance and that men are allowed to be much shallower about their standards than women.
* Hollywood Homely. The Romans had different ideas about male beauty, which didn't really include the rugged look.
* Hollywood Homicide was originally going to be a drama before Suge Knight complained to the producers. The film was subsequently turned into a comedy.
* "Hollywood" Hulk Hogan and the demise of the company two years later. So they failed at what they set out to do, found success, but ultimately planted the seeds of their ultimate demise.
* Hollywood Hype Machine: Hollywood plugs a potential star. If they succeed, great. If not, dump them and move on to the next one.
* Hollywood Hype Machine: When Hollywood chooses one specific actor to turn into the "Next Big Thing", slapping them on every tabloid and gossip magazine.
* Hollywood, in general, is very fond of mixing Bible and bathos — especially Psalms 23:4. You know the one. Here's from
* Hollywood Jehovah's Witness: The stereotypical depiction of Jehovah's Witnesses in media, cult-like, invasive, and only having one or two of their beliefs presented.
* Hollywood Kiss: A fictional perfect portrayal of two people kissing.
* Hollywood Knights at the local drive-in diner...with hilariously loud results!
* Hollywoodland is a deconstruction loosely based on a real detective, Milo Speriglio.
* Hollywood Law: A legal situation with no resemblance to how it would be handled in the real world.

* Hollywood Law, using Big Data to identify and pre-emptively detain potential troublemakers in Xinjian.
* Hollywood Law workings and proceedings for law and justice are changed for dramatic purpose.
* Hollywood Magnetism: Magnets can work at any distance, with only the object being pulled to the magnet and not both at once, and can work with any vaguely metallic substance.
* Hollywood Mid-Life Crisis men go through mid-life crises, and after a brief period of being adventurous, the problem is solved.
* Hollywood Mid-Life Crisis: Middle age period includes depression and self-doubt.
* Hollywood Mirage: Mirages shown as full-out hallucinations of lush green foliage and glittering blue water.
* Hollywood movies focusing primarily on the Western front the German defeat, by the middle of 1944 the German war effort was in fact already doomed. Even if the Germans had managed to repel the Allies at D-Day, they still had the whole issue of millions of pissed off Soviets marching on Berlin to deal with, not having time to contemplate invading the UK and the US.
* Hollywood Natives has to live in wherever it is the protagonists are visiting.
* Hollywood Natives: "Natives" being scantily clad, dirty, and overall unintelligent savages wildly inferior to the "civilized" group.
* Hollywood Natives: Stereotypical aboriginal/indigenous/native tribes.
* Hollywood Natives: Stereotypical aboriginal/indigenous/native tribespeople.
* Hollywood Nerd, an actual nerd), he deliberately engineered a situation where Vic would get swarmed by backslapping military brass. The nerd eventually wins over Bartlet, of course.
* Hollywood Nerd and bookish, weedy little guy, who at the game's start would have had trouble picking up and carrying Fiora at all, let alone after
* Hollywood Nerd. Baptiste is also just as badass, which makes sense, since all of them went through the same school.
* Hollywood Nerd in season 3, so they don't remain as friends in the end.
* Hollywood Nerd mentions that he played shortstop for his high school baseball team in one episode.
* Hollywood Nerd: Nerds that the audience is supposed to like will be attractive, almost always wearing glasses, and interested in some geeky subject or another that's relatable.
* Hollywood Nerds As Penny gets to know them better, she develops more respect for their hobbies, even participating in some of them.
* Hollywood Nerd Tao to talk to a Chinese family that apparently does not speak English — Tao speaks to them in English, then dryly informs Provenza that he's a third generation American, and does not speak Chinese. (He does speak Japanese, but that's because his wife is Japanese.)
* Hollywood Nerd to be accepted by the "in-crowd", when in fact, most nerds are perfectly capable of social interaction and are perfectly happy being nerds.
* Hollywood Nerd work-mate Irma into a giant in the episode "Attack of the 50 Foot Irma".
* Hollywood New England: Lobster, cod, baked beans, and Boston accents mashed together in ways no real New Englander would recognize.
* Hollywood New England: New England is distilled to its stereotypes and portrayed as a coastal town with a big lobster or fish fishery where every one is a Ivy Leaguer.
* Hollywood Nuns (1965) solidly reinforced the trope. Because they were so popular, they were used as templates for nuns in film forever after.
* Hollywood Nuns: Common stereotypes associated with Roman Catholic nuns.
* Hollywood Nuns: Nuns always wear their habits, and are either very old or very young, very strict or very nurturing.
* Hollywood of course had to export their remake around the world. Wherever the original
* Hollywood Old: An actor of a much younger age portraying an older character.
* Hollywood Old: A young and attractive actress plays the role of an elderly woman

without alterations to her appearance.
* Hollywood Old: Diana Rigg plays a character, who in real life was much younger than the actress.
* Hollywood Old, proving one more time that old age is a female character's doom.
* Hollywood Pinafore, made Ralph Rackstraw a lowly writer for Pinafore Pictures who loves, alas, above his salary.
* Hollywood Police Driving Academy: Policemen drive like maniacs on the road so long as they are pursuing a criminal.
* Hollywood Provincialism: If it takes place in the USA, expect the setting to look like southern California.
* Hollywood Provincialism since the age of consent in New Jersey is 16.
* Hollywood Provincialism suggests that since Peter's his best friend, he respects his daughter slightly more than most women.
* Hollywood Psych: Psychology, including psychological disorders, is treated with a lot of liberty in Hollywood. Most commonly, anxiety, paranoia, etc. are treated as things that characters can willingly get over.
* Hollywood Pudgy: Alice isn't noticeably slender, so she's treated as unappealingly obese.
* Hollywood Pudgy: Being even slightly overweight automatically makes a character fat.
* Hollywood Restraining Order: A restraining order portrayed as forbidding someone from getting too close to the person who issued the restraining order.
* Hollywood Restraining Order call the police on them, but even then, it might not do much.
* Hollywood Restraining Order. It's then revealed that Snake is in the adjacent cell for trying to kidnap the president, and Wiggum's fellow officer Lou is in the cell next to him for bringing Wiggum cold coffee.
* Hollywood Restraining Order: You are forbidden from approaching the vicinity of a specific person.
* Holly Woods, a serial novel about a young actress in Hollywood as she struggles to make it in show business and deals with romantic issues along the way.
* Hollywood Satanism: Satanism is portrayed as an evil cult, complete with dark robes and lit candles.
* Hollywood Satanism: The stereotype that Satanists are evil people who worship the devil
* Hollywood Serenade, whose career was then in serious decline. Ironically, this was one of the few times Keaton ever threw a pie in his movie career; he was normally on the receiving end himself.
* Hollywood Shuffle, the sketch "Black Acting School" features a cartoonishly erudite black man demonstrating that he can teach black actors to play thugs and lowlifes, implying that these are the only roles available to black actors in Hollywood.
* Hollywood Silencer mute a gunshot and are available to any gun owner.
* Hollywood Silencer: Silencers for guns make firing the gun inaudible and are readily available with the guns.
* Hollywood Skydiving: You can skydive whenever, wherever, and as long as you open your parachute before you hit the ground, you're good.
* Hollywood Spelling: Characters know how to spell something correctly even when they shouldn't.
* Hollywood Spelling: In fiction, people will always spell a name correctly even if it has more than one spelling.
* Hollywood Spelling: Names are standardized vs. names are spelled eccentrically.
* Hollywood Squares game from 1988 is a more faithful and fun adaptation!
* Hollywood's reaction to television was a panic attack, all but blaming TV for the
* Hollywood Steps Out a hotfoot. As her shoe is burning she stays silent before letting out a very dull "Ouch".
* Hollywood Steps Out" bears particular mention for featuring 46 then-contemporary celebrities at a ritzy nightclub party costing $50 a plate (roughly $830 today).

What was intended to poke fun at the pop culture of the time has become something of a '40s time capsule.
* Hollywood Steps Out: chairs for Blondie and Dagwood, a high chair for Baby Dumpling, and a hydrant on the floor for Daisy the dog.
* Hollywood Steps Out shows caricatures of famous Hollywood actors of the time, including the Three Stooges poking each other's eyes in tune to the music.
* Hollywood Style: An index for all tropes dealing with the liberties and logic of Hollywood.
* Hollywood Style: An index on how things are unrealistically portrayed by Hollywood.
* Hollywood swordmaster Bob Anderson. Chances are, if there was a swordfight in a film during his 50 years in action, he probably choreographed it.
* Hollywood Tactics when 10,000 soldiers made a charge against him, and his army all knew how to use crossbows. The result is that while Mat lost some people, he killed the entire enemy army.
* Hollywood Thin, curvaceous bombshell look of the ‘50s was phased out for the waifish, wispy, bug-eyed crane-legged look.
* Hollywood Thin, may not be far behind it, as it's also receiving backlash for promoting the unhealthy ideas that people who are thin are somehow inferior to those who aren't.
* Hollywood Thin: Thin was in for women this decade, as shown with the svelte supermodels in the first half and the nearly emaciated "heroin chic" look in the next half.
* Hollywood Thin: When the only "attractive" body type is thin and petite, even when someone is worryingly underweight.
* Hollywood Tone-Deaf: Bad singers do so with a ridiculously nasally and unnatural voice.
* Hollywood Tone-Deaf cover of Toto's "Africa". We then see an important moment between two other characters, and suddenly instead of hearing Lester we're hearing Toto, being played as background music.
* Hollywood Tone-Deaf: People who can't sing well sound exaggeratedly awful.
* Hollywood Torches: Torches can be made from anything, can burn forever, and produce no smoke.
* Hollywood Tourette's: The stereotype that people who have Tourette's Syndrome have a habit of constantly swearing for no reason.
* Hollywood Tourette's to swear. Named after Sergeant-Major Floribundi, whose men mutinied after being called "You quite vexing gentlemen".
* Hollywood Tourette's: Tourettes Syndrome is stereotyped as the person habitually swearing.
* Hollywood Tourette's, who was faking having Tourette's. The episode itself actually depicted Tourette's Syndrome quite accurately.
* Hollywood Undead are portrayed as such in certain songs. Charlie Scene, however, is definitely the worst offender, even getting an entire song based around this concept:
* Hollywood Undead has animated segments reminiscent of arcade fighting games.
* Hollywood Undead has three albums where they’re shown in their masks on the cover.
* Hollywood Undead member and current solo rapper, Deuce, has a music video for "Let's Get it Crackin" where he spends most of the video dancing with hot girls in typical rap star fashion, but then takes out a gun and nonchalantly shoots them all dead for no apparent reason. Despite the sheer randomness of this, fans still liked the video a lot, possibly for two reasons. First, because the video started out so typical, and then had a never-before-done twist. Secondly, randomness aside, it's still sex and violence. Which is almost always a win.
* Hollywood Undead. Namely Charlie Scene, Johnny 3 Tears, J-Dog, and Funny Man. Then there's Daniel Murillo, who's stage name is... Danny. Though, Charlie does not like fans calling him by his real name, Jordon.
* Hollywood Undead, some of the band members fit the surburban wannabe stereotype, while others came from impoverished and crime ridden neighboorhoods.

* Hollywood Undead" sprinkled throughout the song, with the soon added "Wrap a wrap around your head and watch you as you take flight."
* Hollywood Undead's signature "Undead" was easily their biggest hit on alternative radio, where it hit #12, and their only song to go anywhere near the Hot 100. However, on mainstream rock they had one song chart higher by a single spot: "Hear Me Now", a #9 hit, which is almost completely forgotten and not even as well known as their other, much lower charting songs such as "Young" and "Everywhere I Go". Even "Bullet", which did not chart due to never being released as a single, is probably better known overall.
* Hollywood Undead that go hand-in-hand with the party tracks. The fact is, they haven't had any hit on any format, but are still well known for their appearances.
* Hollywood Undead. What also helps is the fact they’re both the tallest members of the band.
* Hollywood, USA, isn't associated with any characters in particular, but Reaper was born in Los Angeles.
* Hollywood Voodoo can survive anything except having his head cut off and thrown into a meat grinder.
* Hollywood Voodoo: When it comes to voodoo in Hollywood, it rarely gets any deeper than voodoo dolls and tarot cards.
* Hollywood Zombies which features parodies of celebrities as flesh-eating zombies.
* Holmes also relied heavily on Watson whenever force would be needed. Several times telling him to pack his revolver or giving a gun to Watson.
* Holmes & Watson: After rendering Queen Victoria unconscious, Holmes has to puppet her body in order to convince the Royal Guardsmen that she is fine.
* Holmes & Watson, although Holmes thinks it is the other way around.
* Holmes & Watson critics' score on Rotten Tomatoes, though it finished at a still-pitiful 9%.
* Holmes & Watson: During Moriarty's trial, Watson and Holmes go through a long string of unusual euphemisms while attempting to explain to the court that the man in the dock is a masturbator. Eventually realization dawns and someone in the gallery says "Oh, he's a wanker!"
* Holmes & Watson, has had his missing hand replaced with a functioning tattoo gun. He also mentions a frosting attachment for icing cakes.
* Holmes & Watson, Holmes and Watson spend a minute or so attempting to stuff Queen Victoria's body into a trunk that is too small for it.
* Holmes & Watson, Holmes discovers a body concealed in his giant novelty birthday cake.
* Holmes & Watson, Holmes is growing a gigantic marrow of which he is inordinately fond. It is squashed by Watson's abortive suicide attempt.
* Holmes & Watson, Klinger starts to explain the conspiracy before stopping and announcing he received a knife in his back. Holmes takes this as a metaphor before Kilinger topples forward with a literal knife in his back.
* Holmes & Watson moment as he calculates the perfect way to piss, which is spoiled when he discovers he has forgotten to unzip his pants.
* Holmes & Watson moment were he is about to tell Holmes the details of the conspiracy, but instead announces that he has a knife in his back. Holmes thinks this metaphorical, i.e. he his partners have betrayed him or 'stabbed him in the back'. But then Klinger keels over with a literal knife in his back.
* Holmes & Watson plots to assassinate Queen Victoria with a bomb concealed in a kettle drum.
* Holmes & Watson resembles nothing that has ever happened in a British courtroom. The judge wielding a gavel is just the beginning of the problems. Later, Dr. Watson is arrested and sentenced to hang without any trial occurring in between.
* Holmes & Watson's engine room, so his head will be crushed by a cog when the engines start turning.
* Holmes & Watson, Watson announces Holmes' arrival by bursting into the Old Bailey firing his revolver wildly: shooting—amongst other things—the judge's gavel, the clock, and—in a 'blink-and-you'll-miss-it gag'—a

spectator in the gallery.
* Holmes & Watson, Watson knocks out Queen Victoria when he turns around while carrying a box camera with a tripod.
* Holmes & Watson, Watson misinterprets Holmes' attempts to suggest other means of killing himself as Holmes talking him down off the roof and telling him that he loves him.
* Holmes & Watson. When Watson attacks Holmes' birthday cake with a halberd, it starts leaking blood. Holmes initially assumes it is raspberry sauce.
* Holmes & Watson, who is a 'slave to her carnality', and uses Dr. Watson's bedroom for her countless assignations. She suggests that he burn his bed on account of the unspeakable depravities that have occurred there.
* Holmes & Yoyo is one of the earliest TV examples, as it ran from 1976-77. It was a more comedic take on the idea than the later shows that would run with it, as Holmes tries to conceal the nature of the frequently-malfunctioning Yoyo (aka Gregory Yoyonovich) from the rest of the department.
* Holmes & Yoyo It's why Holmes wound up being paired with Yoyo. Ask any of his former partners, who wound up in the hospital.
* Holmes & Yoyo: One's a human cop. One's an experimental robot cop. They Fight Crime!
* Holmes becomes a much worse friend after coming back from the dead; before that, despite being a know-it-all and thoroughly annoying as a housemate, he was a reasonably pleasant comrade who clearly valued his friend-and-colleague, never seriously deceived Watson without a good reason, and certainly never forced Watson to do anything. The really impressive thing with Watson from the start is that his self-esteem appears to be under no threat one way or the other from hanging around with an insufferable know-it-all.
* Holmes find a workaround, however: Massaging the wound while having sex.
* Holmes gets hit with this a lot, since he's both immediately recognizable and
* Holmes has been faking a terminal illness the whole time and he's just confessed to a murder. You can hear the character's face collapse, the word is so deftly underplayed by the actor.
* Holmes himself has described the perfect crime as a "routine" mugging or murder in the streets, with nothing grotesque or outre about it.
* Holmes inspired a long line of similar imitators. It was to the point that Holmes

* Holmes Makes It Right: One episode ended with a tribute to crew member Craig Lowe, who had died in a scuba diving accident shortly before the episode aired.
* Holmes of Kyoto Holmes' grandfather, Seiji, is a more classic example: he's in his sixties, while his long-term girlfriend is in her early forties - and looks to be in her early thirties.
* Holmes Of Kyoto one case that Holmes takes on hinges on the differences in two of these notes. The neatness of the job in making the notes is the deciding piece of evidence that allows Holmes to conclude the case.
* Holmes on Homes when Mike Sr, informs his son Mike Jr, who turned 19 the day the episode was filmed, in front of the entire crew how proud he is of him. Then he gives him his birthday present, a new pickup truck.
* Holmes on the Range, and received signs that she loved them back, and at the end are left wondering if she was merely manipulating one or both of them in order to make enough money to quit the life. Given that she's dead, they never get an answer to it.
* Holmes on the Range is presented as having been sold as factual memoirs (although many in fact are not, others are), with the Alingmeyer brothers publishing their own.
* Holmes on the Range speech after Gertie was murdered as him confessing that he'd killed her.
* Holmes on the Range there's a multi-tiered one, first one train robbery that simply robs a few passengers, then a greater one when the leaders of the gang

remain hidden onboard the train, holding the express clerk hostage, while planning to steal the heavier, and more valuable stuff in the baggage car later on.
* Holmes wears one as part of his disguise to infiltrate Moriarty's gang in
* "Holmgang": the villain, a humanist, is part of a movement to break down the order of society, increase the amount of variety in human institutions, and end the decadent society because mankind can be safe and sane for only so long. He reveals that in fact, he's part that will forcibly push mankind into this breakdown, and an eruption of violence.

* Holocaust 2000: After having sex with Sara, Robert has a nightmare where he sees the world being destroyed at the hands of the Antichrist that he helped spawn.
* Holocaust 2000: After his wife is killed, the near-retirement Robert Caine (Kirk Douglas) starts a romance with a much younger Israeli woman named Sara Golan and later has a child with her. He didn't tell his adult son Angel initially because he's a bit embarrassed about the age gap, but Angel approves nonetheless.

* Holodeck Malfunction episode, the simulated 1930's people mistake Captain Picard's Starfleet uniform for a bellhop's uniform and laugh at him.
* Holodeck Malfunction that causes handedness to flip serves as the crucial clue to figuring out what Moriarty is up to.
* Holodeck Malfunction theme. In order to buy time so they can rescue the crew, Bashir pushes the "submerge the world" button, drowning all but the highest mountaintops. Everyone is just shocked at this, including the villain who was planning on doing it.
* Holodeck Malfunction to have an independent power supply, and they can't shut it down any better than the warp core.
* Holodeck Malfunction to simulate the environment, objects and people, which means that theoretically it could make simple items like paper or water that could be removed from site, but later works emphasize that the system is primarily force fields holding photons together and require a holographic emitter to maintain form.

* holograms in this series appear to be very flexible in their ability to adapt to inconsistencies in the behaviour demonstrated by the human (and humanoid alien) players. They have demonstrated the ability to cross the line between specialized intelligence into general intelligence (sapience) several times.

* holographic exuberance, Sovereign Colonies technologies used more practical, down-to-Earth transparent touchscreens... which one flipped through like the pages of a book.
* Holographic projections are also commonly used for long distance communication, at least for folks important enough to make direct calls to Commander Shepard, a list that is generally limited to leaders or representatives of powerful organizations.
* Holographic Terminal capable of fully 3-D projection to show instant previews of arena manipulation.
* Holographic Versatile Discs, developed from 2004-2008 with the intent of being used for archival storage. With an impressive 100GB (which is Blu-Ray's maximum storage space) to up to 6TB of storage, it sounded really good. But there's still nothing on the market and with a $15,000 drive and $180 per disk cost along with its original developer going up in smoke, it doesn't look like it's coming out soon.
* Holographic viewers did appear in a few early Next Generation episodes (such as "The Last Outpost") but rarely show up both because of the cost of the effects and the reasons mentioned above.

* hololive, and Gura Gawr is an Atlantean who lost count of her age around 5000. The only member who seems to be of a normal age is Amelia Watson, but even that's debatable given her being a time traveller.
* hololive", and speaks in a very childlike way to reflect that. However, her speech is comparable to "babbling" with both Japanese and English fans agreeing that they can't understand her.
* hololive=] and Suisei). However, Sora does not claim or act to be above anything or anyone and is just as prone to being silly or participating in any multitude of events as the others, albeit not to such drastic degrees as some are known to do. One particular example was when Pekora wanted to trick someone into blowing up a mountain on their Minecraft server. Sora, who was watching at the time, logged in to help with the construction (by constructing her mascot's face on the front of the mountain) and then played along by feigning shock and pretending to be upset

when she "discovered" that Towa had blown up her mountain.
* hololive are both virtual youtuber based groups with the former focusing on idolsinger aspect and the latter focusing on variety content. However, some members are allowed to collaborate.
* hololive are still the bulk of their output. They also have an interesting relationship with traditional idol culture: At first, the talent were made to adhere to it and presented themselves with the expected pure and sweet image befitting idols, causing friction with some of the raunchier and more chaotic within their ranks (notably Matsuri Natsuiro and Coco Kiryu), until management stopped doing so when they realized how popular Hololive was getting precisely because they weren't "pure idols" and were given freedom to be themselves and become the eccentric bunch they are better known as.
* hololive at that time (which they saw it as "Hololive kowtowing to China"). Fortunately, the controversy has died down since then.
* hololive describes her as having "a series of cooking videos in which she commits atrocities." A few notable horrors include:
* hololive English exhibited some amazing talents, many in their debuts alone, which endeared them to not only their target English-speaking audience, but to Japanese fans as well, helping them achieve stardom practically overnight.
* hololive Fubuki Shirakami is a fox-girl, having fox ears and a tail. She's frequently mistaken by viewers as a cat-girl, especially since her avatar usually only shows her upper body, so her tail isn't visible. Her tendency to exclaim "Nya!" (the sound cats make in Japanese) when surprised doesn't help matters. She tends to get annoyed and proclaim "I am a FOX!" whenever this gets brought up.
* hololive has cute anime-like v-tubers, but some of these v-tubers can be rather raunchy, including a horny pirate girl and a foul-mouthed dragon girl.
* hololive has over 50 talents. Each sorted by generations, both from Japan and overseas.
* hololive", he reveals to the audience and his staff that his dream to have the idols actually have fun using Cover Corp's technology while fulfilling his talents dreams has been his greatest joy and the talents are clearly fulfilling it. It's these traits that fans will claim that YAGOO will always be the "best girl".
* hololive hololive star to break a million subscribers, helping to solidify her place, as well as those of her companions, in the video game streaming landscape and the Vtuber industry.
* hololive in that the worst she did was insulting the chat members watching her stream and finding the original Gura's "cheerful idol persona" to be grating.
* hololive is a bit of an unusual example. She is actually one of the agency's more popular original talents... as a musician. Gaming content isn't (and has never been) a focus of hers, and her sub count is among the lowest in hololive since the fanbase does not translate the same way. On the other hand, she's quite popular and respected domestically.
* hololive, is a very upbeat girl who, in her own words, "turned out pretty good" in spite of her harrowing childhood experiences, including (but not limited to): nearly biting her tongue off while eating ice cream, nearly splitting her head open when she fell while jumping on the bed (for which she has a scar on top of her head), slicing off the tip of her thumb while trying to peel an apple, and having crayons melt and scald her lap while sitting in a hot car.
* hololive is famous in VTuber circles for what she calls "sub-par reactions" to scares whenever she streams a horror game. Where her peers might be screaming their heads off, she will be giving dull acknowledgement. She even claims to her audience that she usually goes to sleep to horror streams.
* hololive is known for is her ever-increasing list of nicknames, with "Tokino Soda" being the most persistent and consistent.
* hololive is known for liking horror media and, consequently, being difficult to scare. Beyond simply liking them, she finds them comforting and sometimes listens to horror streams as a sleep aid.
* hololive is noted by her fellow idols to be wearing nothing but Adidas tracksuits (and products) in real life. This eventually led her to acquire a new casual outfit

for her Live2D model, one with a jersey. Her room mate, Amane Kanata, who is notorious for having bad fashion sense, saw an improvement when she adopted the same style.
* hololive is tightly knit with one another, but there are many individual examples of camraderie and sisterhood:
* hololive member Kiryu Coco would often comment that the tail she sports is actually a butt plug that she could remove at any time. It was also the preferred method of adminstering her drug Asacoco.
* hololive: One of the first things people notice about Oozora Subaru is that she is incredibly energetic. She's loud, upbeat and has so much energy that some of her peers were downright intimidated by her before they got to know her better.
* hololive playthrough, cementing her as the group's "toxic gamer" character.
* hololive regularly get marriage requests from their fans. Shirakami Fubuki is noted for giving this response, saying "Not waifu, just friends!"
* hololive's Gura Gawr, whose official backstory says that she's an Atlantean who got bored with the ocean and decided to see what the surface world was like.
* hololive spends a lot of her stream time yelling excitedly, and all of her tweets are styled in ALL-CAPS to reflect this. She properly made her 2D debut by screaming at the top of her lungs, and will often introduce herself in others' streams with an excited shout as well. People have (jokingly) noted that being in Ollie's streams has a tendency to cause hearing damage, especially if she gets excited.
* hololive status with the addition of chibi models in his art style for April Fool's Day 2021.
* hololive, such as one reading, roughly translated, "Quantum chicken soup grass big chungus", along with Japanese/English amalgamations such as "Yametekudastop" (which had her guest, Matsuri Natsuiro, busting a gut).
* hololive, Tanigo Motoaki, is this; he is not afraid of his talent or the fans making jokes at his expense and will actively go along with their more harmless gags. His nickname of "YAGOO," for example, was the result of Subaru misreading his name and instead of correcting her, just went along with it and (according to Noel) even encourages people to call him that sans honorifics. He also has engaged with his talent as part of one-off gags, such as voicing "Hellshake YAGOO" for Kanata, congratulating Polka for her 3D(ays) anniversary and becoming the company's primary merchandise model.
* hololive: The English Vtuber Amelia Watson is set up to be a British detective in the vein of Sherlock Holmes, but any time she attempts a Cockney accent, it's pretty obviously fake. In-character, she admits that her accent is indeed fake, because she's "undercover".
* hololive Virtual YouTuber Amane Kanata stands at 149 cm, but has an impressive grip strength of 50 kg, she can open jars and remove shower heads with almost no effort.
* hololive VTubers, apart from a couple that can speak fluent English (including Kiryu Coco who was apparently raised in the United States), are this. Justified since English isn't their first language but they want to learn it to better communicate with overseas viewers, which has led to a number of fun and/or cute moments.
* hololive: Watame does this in Subaru's face in an animated short after consuming coffee. Surprisingly enough, she likes it.
* hololive whenever she isn't rapping. She also apparently teaches scythe-swinging classes for younger reapers (she herself doesn't have an age, as she's been around for as long as there have been things to die.

* hololive which are joke after joke involving the large cast in strange situations.
* hololive without a Statuesque Stunner. The second tallest, Paviola Reine, is only 172 CM or 5'7".
* Holo matches this trope to a glimmering 'T'. She is a wolf spirit/god of the harvest. She's a lot savvier about the way humans live than the others, though. She has lived with humans several times in the past, and spent centuries watching the

people of a single village. Indeed, she often understands people better than they understand themselves, and isn't above emotional manipulation when it suits her. She is carefree about certain human conventions, but not because she doesn't understand them — she just doesn't care. She also goes centuries without interacting with humans, so her social awkwardness often stems from being so out of touch with the times.
* HoL only prison, who are dumped there alongside everything from candy wrappers to used nuclear weapons and left to fend for themselves.
* Holo sees absolutely nothing wrong with being naked, she is a wolf after all. It outright angers her that Lawrence expects her to be clothed.
* Holoship introduced the titular project starship, crewed by hundreds of holograms.
* Holoship", Rimmer has all the knowledge and experience of two officers of the ship transferred into his own mind so as to pass an exam. Kryten warns him, however, that it could "reduce him to a gibbering wreck". It doesn't, and the result is slightly unnerving.
* Holoship since Lister was revived. This is true, as Rimmer and Lister were the only surviving crew members and Rimmer outranked Lister. Lister needed only to pass the chef's exam in order to assume command, but he couldn't manage that. However, as Lister and Cat are able to fly Starbug and Kryten was the most knowledgeable of the bunch, you have to wonder in what way Rimmer is really in charge from season 5 onwards.
* holosuite. One of these is sneaking up on holo-Quark and performing this maneuver, leading the real Quark to lampshade this trope by exclaiming, "Did you hear that sound? Of bones snapping? I don't want that to be the last thing I hear!"
* Holovision is a device that can project three dimensional images. They can display TV shows, games or other forms of entertainment.

* Holy Backlight: When a character is lit from behind by a blinding, usually white, light. Common for angels and gods, especially when escorting someone to the afterlife.
* Holy Bibble as this to Adam, since she is created from his rib. Due to the comic's simplistic art style, this is primarily shown by her having a similar curly forelock to him, as well as the same skin and hair colors.
* Holy Bibble, Satan is very real and involved in the lives of mortals and angels alike, while God has only shown up once, and under dubious circumstances.

* Holy Bibble, showing up mostly in the backstory as a morally ambiguous, dark hooded figure.
* Holy Bibble starts from the origin of the universe and begins to unfold the story of all myths, using character types (such as the God of War) to merge multiple gods into one person.
* Holy Bibble when God strikes Laban dumb, this is how he chooses to communicate for the rest of the arc. Including signs that make death threats at Jacob.
* Holy Bibble where he is a bit of a trickster, though several comics have implied that he has more up his sleeve than we're initially led to believe.

* Holy Burns Evil: Religious objects can protect you from demons, vampires, and other unholy sinister creatures.
* Holy Burns Evil: Sacred religious objects can harm vampires, usually because of their demonic nature.
* Holy Church of hunters dedicated to exterminating vampires and other threats to mankind. Among them we have the Burial Agency, seven (plus one) people or creatures chosen not for their faith but for the power and the will to exterminate the most dangerous creatures in the world that the Church finds inconvenient. Including the 27 Dead Apostle Ancestors, with the exception of the one who is among their numbers.
* Holy City: A city that is especially sacred to a particular religion.
* Holy Corpse Rising: Amala and her mooks enslave a village and confiscate all the food, killing anybody who attempts to take some. However, if anybody actually succeeds in taking some, she rewards them by inviting them into her inner circle. As she puts it, only people with the strength and will to eat deserve to eat.
* Holy Corpse Rising ends with Nikola and his harem managing to end the war between humans and witches. Then they go on a new journey and his harem bickers as usual.
* Holy Corpse Rising: Nikola points out to his peers that it is pretty much impossible for a regular human to fight a witch. To defeat them, they need witches of their own.
* Holy Corpse Rising: When Nikola is rendered catatonic by torture, Upsula manages to revive him by kissing him. Everyone present is shocked and asks how she did that, and Upsula claims her love revived him, which pisses off the other members of Nikola's harem.
* "Holy Ghost intoxication" is usually written off as this by critics of this religious teaching, suggesting that the recipients of this so-called "blessing of God" are actually falling for a placebo effect through autosuggestion.
* Holy Grail grew to be the entire raison d'être of the Arthurian Court, taking on aspects of various magic hamper/magic mill myths, and creating a mythological snarl whose origins modern scholars are nowhere close to deciphering.
* Holy Grail nothing, but his insanity has convinced him it's the true grail.
* Holy Grail. One would think something with that level of potential for abuse would have been guarded better.
* Holy Grail Wars tend to be pretty weird in general, but this one is worse than usual because no one realizes that the Grail is being controlled by Iri, who died in the previous War, and is now using the new War as an excuse to get her son Shirou a harem. Not only is every Master and Servant a beautiful woman, but many of the Masters were contracted without their explicit permission (which is odd), and several aren't even mages (which is
* Holy Ground: A place that is considered to be religiously sacred, such as the site of a temple.
* "Holy Guardians" are the "Fanatic Spiritualist" variant of Fallen Empire. They are similar to the Isolationists, but their dogma comes with a religious spin; rather than attempting to dissuade expansion toward their own empire, their ire is

reserved for those who attempt to colonize their holy worlds, which can be identified as "Gaia" worlds with special names. As with the Isolationists, attempting to colonize these worlds will prompt them to demand the colonies be abandoned, and persisting may escalate the conflict.
* Holy Guardians/Fanatic Spiritualists protect the sanctity of certain Holy worlds across the galaxy by purging anyone who sets foot on them. When they awaken into Doctrinal Enforcers, they'll attempt to force the entire galaxy to accept their religion at plasma-cannon-point.
* Holy Halo: Halos placed above or around the head to make someone look divine or holy.
* Holy HaloOne of the most iconic aspects of modern angels is a floating circlet.
* Holy Hitman, and his mere presence immediately makes several powerful drug gangs halt their plans.
* Holy Invasion of Privacy, Badman! What Did I Do to Deserve This? IP.
* Holy Islamic Federation: formed by Middle Eastern Islamic nations and exerts loose control over all of Africa. Capital: Cairo.
* Holy Is Not Safe: Divine power being dangerous to humans as well as evil creatures.
* Holy Is Not Safe: Holy powers are usually good yet just as unpleasant as evil powers.
* "Holy King Jewelius I", the ashamed heroes acknowledge the validity of the villains' criticisms. When they regain their social standing in the epilogue, they publicly apologize for their screw-ups.
* Holyland. Although the cause is more psychological than physical, the result is that Yuu loses his form, and with it, most of his fighting ability. The local thugs, many of whom were afraid of him until that point, take advantage of this.
* Holyland: Despite his time on the street, he was trained in karate first rather than street brawling. When he gets into trouble in a certain fight, he instinctively falls back on his karate base, which only makes things worse.
* Holyland extends to attacking drug pushers, which leads to one of these telling Masaki to put a lid on Yuu's activities lest the latter wants their attention. Later on, he shows up again to tell Masaki to do something about the teen gangs pushing Shiromon / True before the adults have to get involved.
* Holyland fight is clearly one-sided, but Yuu still manages to get in a few hits, including a solid kick that the other thinks might have cost a rib.
* Holyland fights end after the second or third exchange and a character (Izawa) constantly reminds everyone else that basic movements are the best option; he claims that he doesn't do it because it looks cool, but because it's the safest way to go. Two of the best examples are Yuu's second fight with Osada and his spar with Yamazaki:
* Holyland: In Chapter 170, King somehow slices a beer bottle's neck off with his bare hands.
* Holyland is shown scratched and bruised and loses at least one molar, but nothing permanently changes his appearance.
* Holyland mentions how judo and other wrestling or grappling styles can be very effective on the street because getting thrown or taken to ground on concrete or asphalt is a very different - read: more painful - beast from falling on the mat in training or competition. Also, being on soft ground like grass allows the wrestler Tsuchiya to go all out without fear of hurting himself from a whiff.
* Holyland, Ryuu puts a mask on after his first fight with Yuu, for no obvious reason though.
* Holyland to aim for, with regards to humans from time to time. For example, a good chop to the back of the neck can stop takedown attempts quickly, but hitting the head above the cheekbones is generally a bad idea.
* Holyland: Yuu just wants to be left alone. However, being forced to take down bullies that try to have their way with him leads to developing a reputation as a fearsome bully hunter and in turn leading more punks to fight him.
* Holy Motors is dedicated to Russian actress Yekaterina Golubeva, the woman of director Carax’s life and the mother of his child. She tragically died in

August 2011, right before the film went into production.
* Holy Musical B@man!, Alfred is fired by Bruce, later returning as "O'Malley the Irish Butler" who is just Alfred wearing a hat and a ginger beard.
* Holy Musical B@man! before going face to face with the Man of Steel and starting their duet.
* Holy Musical B@man! features multiple examples of characters yelling out incredibly specific body parts that Batman has injured, including patellar tendons and tibia.
* Holy Musical B@man! He then tries to make him feel better by saying, "Come on, nobody cares who Superman is."
* Holy Musical B@man!: In the great Star Kid tradition, Batman's jet is represented by a small model that goes over his shoulders, and Superman's flight is achieved either through Jim Povolo carrying him or Brian Holden sticking his arms out and making whooshing noises like a five-year-old.
* Holy Musical B@man!: Superman has the ability to reverse time by flying around the earth in the opposite direction. Also, apparently Batman's butler Alfred is Spiderman.
* Holy Musical B@man! uses this a lot. There's even a song for Batman and Superman's fight called "Fuck You!"
* Holy Musical B@man! with his candy-themed puns. Every time he makes a candy pun, he pulls the type of candy he was referencing out of his jacket. The correct one. Every single time. Without fail. The man makes pun-making into an art.
* Holy objects burn/repel be culture-specific and/or depend on having a pure heart or strong faith).
* holy object which will only hurt the guilty—historically, this often involved consuming food that had been blessed by a priest or otherwise enchanted. Refusal to partake is seen as an implicit admission of guilt, so this particular trial can work even if the blessed food is actually a placebo.
* Holy Ordos. Psykers that don't have the potential to be of any use to the Imperium are shipped to Terra and hooked up to the Golden Throne, where their psychic powers run the Astronomican until they shrivel and die. Plus the other races' psykers and the Chaos psykers.
* Holy Pearl" For added irony points, the speaker is later saved by the man in question...and falls in love with him.
* Holy Pipe Organ: A pipe organ means that something is sacred or religious.
* Holy Potatoes! We're in Space?!: Any weapon blueprints you find are destroyed once you craft a weapon with that blueprint. Any weapons that are destroyed at the end of battle explode and cannot be repaired. It's implied that Captain Cassie really is that big of a reckless klutz to be responsible for both.
* Holy Relic everyone comes in with an earpiece enabling them to hear everyone and everything else in their native tongue.
* holy relics that the incredibly powerful beings known as "the Prophets" exist in a state outside of time and are perfectly capable of giving visions and inspiring prophecies. A few officers at least come around to the idea that the "wormhole aliens" are definitely powerful beings that have a relationship with Bajor, but worshipping them is exclusively the province of Bajorans themselves.
* Holy Roman Emperor) played this up a little when assuming rule on her behalf. She clearly had a screw loose, in addition to being a woman - two major handicaps for any sixteenth-century would-be monarch.
* Holy Roman Empire and Spain, and the Royal House of France (first the Valois, then the Bourbons, but both were branches of the same dynasty) which goes back at least to the Italian Wars of Charles V (Carlos I of Spain) and Francis I and went on for centuries despite frequent marriages between members of the two rival houses. Later, when nationalism arose, the "hereditary enmity" between the Habsburgs and their French rivals came to be reinterpreted as something between the French and German peoples.
* Holy Roman Empire. It was created presumably for the anime producers to explain away the Chibitalia side stories being adapted after the main story was, with them being HRE's "dreams".

* Holy Samba Night event. She does cheat somewhat in that she uses her ice Magecraft to let her skate on the ice to achieve high-speed movement, but that does nothing for the weight she's carrying.
* Holy scriptures. Any holy scriptures. ANYTHING involving Gods as protagonists.
* Holy shit, Nyna and Camus, presumably to follow and confront Camus. Their subplot is never resolved.
* Holystone. Mortals already share their bodies with gods as a matter of day-to-day life, but the Union combines them into one more powerful creature.
* Holy Terra as a whole is made of this trope, mostly. The Ecclesiarchal Palace, for example (contextually equivalent to the St Peter's Basilica example above) covers an entire continent (Australasia, to be precise) with a single contiguous structure. It's avoided by a number of other structures, such as the Hall of the Astronomicon, which is what you get when you hollow out and structurally reinforce Mt Everest, then fill it with cells and living quarters for the most powerful telepaths humanity can provide. The actual Hall itself takes most of the available volume inside the mountain, and is a single room stuffed, from top to bottom, with psykers, life-support systems and psychic amplifiers.
* Holy Terra is so densely populated that its soil is utterly barren and its atmosphere is a fog of pollution. Massive, labyrinthine edifices of state sprawl across the vast majority of the surface. Its oceans have long ago boiled away. Many mountain ranges have been leveled, perhaps all of them except the Himalayas, which seemingly remain all but untouched due to the laboratories said to be underneath and the chambers of the Astronomican that course throughout the whole mountain range. No specifics are given on the population anymore, just "billions", possibly at least a trillion depending on the source.
* Holy Terror. His preferred method of stopping someone? Killing them.
* Holy Terror, the Fixer despises the terrorists for their lack of concern for their own comrades and innocent lives... right before announcing his intent on killing them. In fact, a lot of his actions are just as gruesome as theirs.
* Holy Terror, the terrorists attack with suicide bombers before sending in jets and stinger missiles.
* Holy to do even more damage. You get the Lightbringer by betting the Ragnarok in the Colosseum, which is also a very good sword in its own right, though inferior to the Lightbringer. Originally, the weapon was translated into "Illumina" which may be the more prolific name among the English community.
* Holy Umbrella bent on world domination. At one point, he runs scared of being robbed by Donderamaid before the heroes point out that Donderamaid is his own minion.
* Holy Umbrella, for some reason, the cottages in Vegette Town are full of penguin statues.
* Holy Umbrella, one of Dondera Magoon's attacks is to summon two of these to come after you from opposite sides of the screen.
* Holy Umbrella, the umbrella found and wielded by the player character has a "Legend of the Holy Umbrella" about it.
* Holy Umbrella, Viper tries to take out several bosses this way, but usually just gets curbstomped.
* Holy was to reach "the origin" which, unsurprisingly, is Akasha. The Holy Grail is a means to channel The Origin's powers by pulling Heroic Spirits from the Akashic Records and make them fight as Servants in the war. When all seven Servants are returned to the Grail, it will access the Akashic Records and allow the granting of one wish through the temporary omnipotence of the Grail.
* Holy Water often burns vampires like acid; drinking or total immersion in it will obviously exacerbate the effects, and are generally lethal.
* Holy Wood (In the Shadow of the Valley of Death). Adam attempts to lead a revolution though music, but is taken into the fold and becomes another part of the machine. He falls in love with a woman called Coma Black, who may or may not be Coma White as well (more on that in a bit), and possibly impregnates her (that too) before killing himself. Finally, there is the interconnection.
* Holy Word and deafened three members of the Linear Guild, banished another (an

evil Outsider), leaving only one high-level member to battle effectively (and he retreated to save the rest of the Guild). The only one who could have taken him on? The guild's absent-from-that-fight cleric.
* "HOMЯ", When Homer goes to the bank to withdraw his family's life savings, he's informed that the money cannot be withdrawn unless both he and Marge agree to it. He goes to the other side of a nearby plant to pretend he's talking Marge into agreeing and then he forges her signature. He also pretends Bart is there asking for a bonbon.

* Homage once had an issue where the Defenders found themselves in a dimension with two lands named 'Here' and 'There' who were locked in a war. The Defenders eventually learned that the reason for the war was that the people of 'There' objected to the people 'Here' referring to their land as 'There', when it was obvious that they were really 'Here' and the other side was 'There'.

* Homage to Catalonia describes the efforts of the Unified Socialist Party of Catalonia to discredit the Workers' Party of Marxist Unification:
* Homage to Catalonia, many of the people in Orwell's company, included himself, have no prior war experience though that is likely because many of them are still teenagers. They don't even get any decent training before going to frontlines.
* Homage to the poem, she imagines herself hearing the heart in the gym floorboards. So, yeah, subversion.

* Homare used to be an up-and-coming figure skater with a lot of potential, but a failed jump resulted in an injury that ended her career. Her injury has since healed, but she's still traumatized by it and has distanced herself from anything to do with figure skating. After becoming Cure Étoile, she returns to skating and eventually gets a gold medal in her comeback performance.
* HOME (2013), where the Batter asks the Judge why he can't simply climb over the IWH Floating Cubes. The Judge reacts like the Batter has lost his mind.
* Home: Adventures with Tip & Oh episode "Garbage Day" has Oh invent a do-over machine to let Tip try and fix her extremely bad day. Unfortunately, she becomes trapped in a loop due to her determination to make the day perfect, and keeps resetting over and over each time any minor inconvenience occurs until the machine begins to damage space-time.
* Home: Adventures with Tip & Oh has tomboy Tip enter a beauty contest in her own fiercely competitive way. She becomes so determined to win that when she

actually has a decent shot at it, she notices she no longer even remotely recognizes herself at all, and immediately changes herself back, costing her the competition.
* Home: Adventures with Tip & Oh, Oh shows Tip the Boov sport of Nuttypunny. Contestants are set out into a field of random trials with no real direction and are graded with "Compliances" or "Blunders" based on how they do. Oh reveals that the game is literally impossible to win and is just about having a fun time. When Oh and Tip play together the "right" way, they still get an equal amount of Compliances and Blunders, even getting a Blunder doing the exact same thing that was worth a Compliance earlier.
* Home: Adventures with Tip & Oh, the alien Oh takes great wonderment at various human things. He explicitly sends a letter to space through the human postal system rather than the far more efficient and suited to that task Boov postal system simply because he finds the entire process fascinating.
* Home: Adventures with Tip & Oh, the Lords n Lasers Juggler class appears to very loosely use the shower style but also seems to involve psychic manipulation on top of that; once Tip's juggling skill reaches maximum level, she is able to make the balls orbit her with minimal movement on her part.
* Home: Adventures with Tip & Oh, Tip and Oh play a virtual reality video game and Oh is given the shape-shifter class, but he has such a poor imagination, he only shape shifts into the most straight forward and practical thing to resolve the task at hand; Tip suggests Oh shape shifts into a giant dinosaur with a tractor for a face to dig a hole, Oh transforms into a shovel. Tip suggests Oh become a shooting star to illuminate a dark hall, Oh becomes a flashlight.
* Home: Adventures with Tip & Oh: Tip tries to make some spare money by taxing Boov around all day; at the end of the day she and Oh count the large piles of currency they have collected only to find out the 6,034 Gleeblos they have are worth $3.00 USD.
* Home: After discovering that nobody wants to attend "warming of house party", Oh stands there in sadness. A banner proceeds to fall down onto his head.
* Home Alone 2. After Harry soaks his burning head in a toilet full of paint thinner, the entire first floor of the house blows up, but luckily Harry survives with only a burn on his scalp, a damaged hat and some ash on his face.
* Home Alone 2 brought on by a massive letter-writing campaign by fans of the film.
* Home Alone 2 contained a scene in which Marv grabs a piece of cheesecloth to try to wipe the paint off his face, not knowing Kevin soaked the cloth in superglue; the cheesecloth sticks to Marv's face, and when he rips it off, he ends up tearing his beard and eyebrows off. (In the film the scene is replaced by the famous electrocution scene.)
* Home Alone 2 ducks into the Hotel elevator just as the staff is finally getting off the floor to try and grab him.
* Home Alone 2 for the NES and SNES was ridiculous. Not only did every random stranger in the hotel try to get you, but so did vacuum cleaners, luggage, and mop buckets (both the moving mop and the inanimate bucket).
* Home Alone 2, given that the concierge is planning something dastardly.
* Home Alone 2 has Buzz being delivered his little brother Kevin's room service bill. Their father, Peter, is not happy.
* Home Alone 2: Lost in New York, Harry and Marv plan to break into Duncan's Toy Chest and steal the large charity donation fund at night.
* Home Alone 2: Lost in New York, Harry and Marv sneak up behind Kevin as he's looking at a map of New York City. Harry says, "Hiya, pal!" which makes Kevin drop the pocket knife and map he just bought at Duncan's Toy Chest.
* Home Alone 2: Lost in New York, Harry gives a sad, pathetic whimper of a "no" upon seeing that a heavy metal pipe (which sent him flying down the stairs a few seconds earlier) is now about to fall on his chest.
* Home Alone 2: Lost in New York. He's doing his job and is right that Kevin used his father's credit card illegally to book a room, but he's overly motivated in catching Kevin and it looks like he's doing it out of spite.
* Home Alone 2: Lost in New York is mainly about Kevin trying to make sure the

hotel staff doesn't wise up to the fact that he's staying in the hotel alone, but after they discover what he's up to and he escapes from the hotel, the rest of the movie involves his conflict with Harry and Marv.
* Home Alone 2: Lost in New York, Kevin has possession of his dad's credit card and uses it to check into the Plaza Hotel. At the end of the film, it's revealed that he spent nearly $1000 on room service alone.
* Home Alone 2: Lost in New York Kevin says, "Here we go, another Christmas in the trenches." just before kicking off another booby-trap war against the bandits.
* Home Alone 2: Lost in New York, Kevin's mother is looking all over New York for him. After searching for him in her brother-in-law's house, she doesn't find anybody so she hails a taxi and leaves, moments before Kevin arrives on the scene luring Marv and Harry there.
* Home Alone 2: Lost in New York: Kevin's mother waits outside the unoccupied house where Kevin has set up his traps, in the hope of finding her son. She eventually gets a taxi so she can search elsewhere, seconds before Kevin shows up at the house.
* Home Alone 2: Lost in New York, Kevin tricks Harry and Marv into getting onto a makeshift see-saw, launching Harry into the air and onto a car.
* Home Alone 2: Lost in New York, one of Kevin's traps lights Harry's head on fire, Harry puts it out in the toilet, not knowing it is filled with kerosene and blows the entire first floor up. Luckily, Harry only has second-degree burns on his scalp (as well as soot on his face and teeth and a damaged hat) to worry about (not to mention the fact that kerosene doesn't really explode when exposed to an open flame).
* Home Alone 2: Lost in New York owns a truly amazing toy store, and donates the Christmas Eve proceeds to the children's hospital.
* Home Alone 2: Lost in New York: Peter has one when he discovers Kevin did not accompany the family to Miami.
* Home Alone 2: Lost in New York. Stereotypes, stereotypes and nothing else...
* Home Alone 2: Lost in New York that take place in New York were actually shot in Chicago.
* Home Alone 2: Lost in New York: The black/white mafia movie that Kevin watches (and includes in the security system) has one of the criminals claim that they're convinced the other character is innocent... except the gun they have isn't convinced and opens fire on them.
* Home Alone 2: Lost in New York the chain to inform the parents that Kevin missed the flight.
* Home Alone 2: Lost in New York to the first movie. This time, Kevin is left alone in New York and even sets up a bunch of traps to take out Harry and Marv.
* Home Alone 2: Lost in New York: Uncle Rob's number has 555 in it, as does a dumpster near his brownstone.
* Home Alone 2, Marv gets hit by several bricks dropped by Kevin from three stories above, which normally should've killed him (but then again, so should a lot of the other traps).
* Home Alone 2 stayed here before. Kevin mistakes him for the vacuum guy.
* Home Alone 2, the motel the McCallisters are staying in Florida according to the condition and their shocking gasps.
* Home Alone 2 when their characters try to trick Macauley Culkin into thinking they've been hit by paint cans.
* Home Alone 3) actually like it better than the previous two for reasons like better traps and a more plausible reason for being home alone (being sick from school rather than being mistakenly left behind while his family is on vacation at some point).
* Home Alone 3 after Alice hits him with a crowbar when attempting to hit Doris the rat, who had crawled into his pants.
* Home Alone 3, Alex's mom calls while he's home alone with the burglars.
* Home Alone 3 has two of the villainous spies, Unger and Jernigan, being defeated by falling into a pool with cold water in the middle of the winter. When the cops find and arrest them, the two are covered in frost, but otherwise fine and even

perfectly able to walk afterwards.
* Home Alone 3: Jernigan enters through a second story window in search of Alex and falls through holes in the floors to the basement. While that should be three stories, he appears to go down seven floors.
* Home Alone 3, the crooks are victims of Alex's booby traps during their attempt to break into the house to steal the chip, and Alice, the only female of the foursome, is not an exception. The same goes for Vera in the fourth film and Jessica in the fifth film.
* Home Alone 4, in lieu of set booby traps, Kevin simply triggers the gadgets of his smart home at just the right time and lets the bad guys' bumbling do the rest.
* Home Alone 4, Marv slides downstairs soaked with water right to Kevin's feet, stares for a minute while attempting to regain his vision, and, seeing Kevin, shouts, "YOU!"
* Home Alone 4 subverts and averts this trope. The main character believes that the butler of his dad's rich girlfriend helped two burglars (his old enemies) get into her high tech Mansion. He made quite a mess driving them away so everybody believes its just an excuse (he was about 9 years old). It turns out it was the , erm, nice housekeeper who is revealed as one of the burglar's mum.
* Home Alone 4 was set in Chicago. Unlike them, it was filmed in Cape Town.
* Home Alone 4, when Kevin is lip-syncing and dancing, they blur him entirely when he takes off his robe.
* Home Alone accompanied by whimsical music and a shot of a very angry-looking Santa decoration hints this could be some kind of Christmas magic at play.
* Home Alone agreed that some of the humorous moments could have worked better in a Baby Herman cartoon.
* Home Alone and his band's touring van. He asked her "You don't mind riding with a bunch of polka bums?" and she indicated she was grateful for the ride. The band played polkas the whole way back to Chicago.
* Home Alone and its sequel involve friendships between the prepubescent Kevin McAllister and an older stranger who appears creepy at first, but turns out to be nice. Said older stranger also ends up saving Kevin from the Wet Bandits.
* Home Alone and stayed very high in popularity for about 10 more years.
* Home Alone, and yet Harry escapes with nothing more than a few minor burns and getting his hat ripped open.
* Home Alone announced they would begin to deliver a limited run of pizzas branded from Little Nero's Pizza.'
* Home Alone, believe it or not. Kevin McCallister finds some magazines in his older brother's bedroom and thinks it's gross that nobody's wearing anything.
* Home Alone, burglars Harry and Marv are forced into this when they try to monkey bar across a tightrope to Kevin’s treehouse in pursuit of him and Kevin picks up a pair of lawn choppers.
* Home Alone, but seems fine afterward. In the same sequence, Marv takes several bricks to the head from three stories up; you can easily make the case that he has super-powers, for all the injuries he inexplicably survives.
* Home Alone" deadline advertised on the side of their boxes. Granted, the first time he is seen, he has over $100 worth of pizzas.
* Home Alone effect throughout the kitchen. Afterwards, everyone blames Kevin for the mess and is sent to the third floor by his mother while everyone ignores the fact that Buzz started it.
* Home Alone features 8-year-old Kevin singlehandedly defending his home from a pair of pesky burglars through a series of booby traps.
* Home Alone film have problems with this. Leaving him behind once can possibly be justified (particularly since the film clearly shows they mistook the annoying neighbor kid for Kevin,) but not keeping track of a child two years in a row simply because they were afraid to miss a plane? No one in the family notices a child missing for the duration of a flight from Chicago to Miami (and a child who's been missing before, no less?) And once they report it to the police, they JOKE about it (out of nerves, but still?) In real life, this magnitude of neglect would certainly prompt at least an interview with social services.

* Home Alone film, Marv engages in some petty theft with literal sticky fingers: covering one of his hands in tape and then sticking it into a Salvation Army bucket full of change as he walks by.
* Home Alone films, Harry and Marv survive all manner of injuries that should be crippling or fatal, especially in the second film, with only minor lumps and bruises.
* Home Alone films. They're just competent enough to pose an actual threat to Kevin, but also bumbling enough to be entertaining.
* Home Alone franchise typically shows a series of brief clips of the protagonist child preparing his traps before the climactic showdown, with the intent of the traps not being fully revealed until they've each been sprung on the Bad Guys.
* Home Alone had Buzz doing this, apologizing and being very contrite to the family for his part in the choir debacle, and then when Kevin is ready to do the same, he whispers, "Beat that, you little trout-sniffer."
* Home Alone has Kevin using a sawn-off bike handlebar to slide from his window to his treehouse.
* Home Alone. He addresses the man next to him on a plane, who then begins babbling extensively in French. Kevin slowly turns and gives a good long "Why me?" look at the camera.
* Home Alone he wanted to take. The reaper had no idea the Cool Old Guy had just bought some handy tools from the company the ad was advertising, and used them to boobytrap the entire house.
* Home Alone. Imagining that children are naturally most scared of robbers, Hughes also worked that aspect into the plot of the film.
* Home Alone. In the first two movies, it helped set the scene for the conflict between Kevin and his family.
* Home Alone, in the Mansion, Buzz's pet spider crawls along the ceiling, occasionally knocking down either Kevin, Harry, or Marv if they get near him.
* Home Alone in the third movie, where the criminals are a team of professional international thieves.
* Home Alone in which he pulls Kevin's pants down. Then there's the bit in the second film where he tells Kevin that if he ever saw him naked, he'd grow up never feeling like a real man.
* Home Alone, is a nice look for him, despite him being a bumbling crook.
* Home Alone jumps a hedge the same time another spy jumps from the other side. Their heads collide.
* Home Alone, Kevin and most of the other McCallisters (besides Kevin's parents, who have a separate room) are seen sleeping squashed together everywhere other than the bed. Guess who's got that huge bed all to himself (with Coke cans all over it, no less)?
* Home Alone, Kevin can assemble homemade weapons by finding items in the houses and in the snowmen he knocks down. He needs a platform, operator, and ammo for each. They are auto assembled in the Beginner difficulty, but he has to assemble them himself on the Expert difficulty.
* Home Alone: Kevin gets angry at his brother Buzz for eating all the cheese pizzas and shoves him into some drinks which spill over, creating a mess in the kitchen. Chaos thus ensues among the family, and everyone directs their anger towards Kevin. As a result, Kevin's mother makes him sleep in the attic (Kevin is scared of the attic) without dinner.
* Home Alone, Kevin goes to buy a toothbrush at the pharmacy. While there he runs into old man Marley. Kevin backs away in fear, then runs away while still holding the toothbrush, leading to one of the employees calling him a shoplifter.
* Home Alone, Kevin has a great fear of his basement, including his furnace, which he envisions as a growling, groaning monster. He eventually overcomes his fear of the basement in one scene: the furnace is growling and groaning at him like usual, and he simply says, "shut up." And it does.
* Home Alone: Kevin is scared of going into the basement because he envisions the furnace as a monster.
* Home Alone, Kevin recoils at a photo of older brother Buzz's girlfriend. We see

the picture too and she is very much this trope. Her "actress" was actually a boy in drag; this way, director Chris Columbus could play up "her" ugliness as much as he wanted without humiliating an actual girl.
* Home Alone. Kevin then asks him to relay the message that he wants his family back.
* Home Alone, Kevin uses several tricks, one of them a cardboard cutout of Michael Jordan, to fool the bandits into thinking the house is occupied and having a party.
* Home Alone, Kevin was scared of going into the basement because of a furnace that he imagines opens its grate and talks to him. He later gets the courage to tell the thing to "Shut up!" and comes to the conclusion that it's not so scary as he had originally thought. He ultimately incorporates the basement into the final battle and sets up several traps in there which Marv triggers.
* Home Alone: Macaulay Culkin's Overly Long Scream became practically iconic, and his "scream face" made up 90% of the trailers and marketing materials.
* Home Alone movie (as pictured above) except for the second one, which still manages to set the majority of the climax within a derelict, trap-ridden building because it's the battlefield the children choose for their anti-burglar schemes.
* Home Alone movies, became an accomplished judoka, representing the US in Judo at the 1996 and 2000 Olympics.
* Home Alone movies give the preteen protagonist a massive home field advantage as they trap their house.
* Home Alone movie, the protagonist is home sick from school and witnesses the burglary of a neighbor's home, but can't get anyone to believe him.
* Home Alone movie, when Kevin applies aftershave and "feels the burn."
* Home Alone. Never mind the fact that essentially Buzz is ruining the Christmas Pageant just to act like a jackass behind Kevin. The Choir Director doesn't even seem to notice his antics, yet every single member of the audience does. Buzz is lucky he wasn't suspended.
* Home Alone notably reconciles with their family out in the crisp-white snow.
* Home Alone (not even appearing to be set during Christmastime), has weak graphics, and the gameplay it features is very slow and boring.
* Home Alone. Once the McAllister family (minus Kevin) and their neighbors leave for their winter vacations, Harry and Marv intend to ransack the empty houses at night. Though after Kevin scares them off the first time, they return in the daytime and systematically break into the houses, leaving the McAllister home for last, where the climactic showdown takes place at night.
* Home Alone, one of the homemade weapons Kevin can assemble is a snowball launcher, which temporarily turns Harry and Marv into this if he uses it on them.
* Home Alone, one of the traps Kevin can set in one of the five houses is tar, which can slow Harry and Marv down when they walk across it. He can also assemble a glue gun to use against Harry and Marv and temporarily stun them.
* Home Alone. Said action ends up biting them in the butt in the climax where they are arrested for every single house they robbed.
* Home Alone, scratched up, battered and bruised, and either completely humiliated or arrested.
* Home Alone (Sega), one of the homemade weapons that Kevin can assemble on the Expert difficulty is the Sonic Wave Gun, which emits a Sonic Wave that temporarily stuns Harry or Marv.
* Home Alone (Sega): The Country House has a cat in it that attacks Kevin, Harry, or Marv if they get near it.
* Home Alone (Sega), this happens to Harry and Marv if they get hit by a blowtorch or Kevin's hot coal rifle.
* Home Alone, so apart from getting banged up, neither of them get fatally hurt.
* Home Alone style. We cut back to Homer who says "Eh, I'm sure it's nothing."
* Home Alone: The Holiday Heist 25% for Sinclair. They eventually settle for one third each.
* Home Alone The Holiday Heist is the first to not involve Chicago at all (it's set in Maine) and the first to be filmed in Canada (specifically Winnipeg).
* Home Alone the main characters are this, to the point that they are accidentally

left behind on family trips.
* Home Alone: The McAllisters don't realize Kevin has been left behind until their airplane is already in the air. Granted, they were all in a rush so that they wouldn't miss their flight, but it also makes them look a bit foolish for not remembering about Kevin.
* Home Alone. The rest of the family forgot Kevin, thus setting him up to be the most famous security system ever unintended.
* Home Alone, the third had different characters (who still had striking similarities to the previous characters), and the fourth introduced a third robber but otherwise, they were almost identical movies.
* Home Alone: The Wet Bandits are arrested by the police after their defeat at the end of the movie. There was originally going to be a scene showing them in jail, but it was cut. They do come back for the sequel, then get arrested a second time.
* Home Alone this sparks the fight between Kevin and his older brother Buzz when the latter taunts the former about having eaten the last slice of cheese pizza before Kevin even got any.
* Home Alone thought there was no way the great Williams would be interested in a modest family film. To his surprise, Williams loved the rough cut of the film and was looking for the opportunity to create a Christmas-tinged score and quickly signed up.
* Home Alone when Harry attempts to bite off Kevin's fingers as revenge for the torture he and Marv went through. However, Old Man Marley stops Harry by hitting him in the head with his shovel.
* Home Alone when Kevin suspiciously looks back over his shoulder as they tail him in their van. Kevin gets even more suspicious.
* Home Alone". When they are arrested, this comes back to bite them. One of the officers sarcastically thanks them for identifying the houses they hit.
* Home Alone, where Kevin McCallister manages to drive away Marv by shooting him between the eyes with a b.b. gun when he pokes his head through a doggie door.
* Home Alone who are forced to negotiate a Death Course, designed by the protagonist.
* Home Alone, written by an ER doctor, details the horrific injuries the burglars would sustain from Kevin's traps if they weren't slapstick comedy characters. Although they did choose to break into someone else's house and to not withdraw when they found that the house was occupied by someone prepared to defend it, so YMMV on whether you feel sorry for them.
* Home and Away added an extra twist: John Palmer has a daughter named Shandi, but the Shandi he met was an impostor. Eventually, the real Shandi had to show up.
* Home and Away, a guy on the race turns the arrow around and his competitor (who is already going the wrong way) just follows it.
* Home and Away, and later Lucas and Naomi. In the latter case, the two had met and hooked up before she knew she'd be teaching in Summer Bay.
* Home and Away attack. And that's before you get on to the hiring hitmen and arson. Despite this, no one really seems to consider her mad and no diagnosis is made, possibly because no one can think of a mental illness that would turn you into an Angie.
* Home and Away (Australian soap opera running since 1988, 7,400+ Episodes)
* Home and Away: Belle was killed off, apparently paving the way for Aden and Nicole.
* Home and Away. Dear god, that show had the lamest fight scenes. Simply involved both participants rolling in the sand and somehow getting massive black eyes and other cuts and bruises. However, there was a storyline where Ric was hospitalized after an illegal street fight. That fight actually did involve some reasonable-looking punches.
* Home and Away featuring Lottie feels obliged to have someone point this out.
* Home and Away, first having a short-lived crush on her English teacher Miles, then two years later falling in love with her music teacher and songwriting partner Liam. The latter did not end well.
* Home and Away had Stephen pulling a fake cover from a book Frank was reading.

* Home and Away had the Samoan Australian actor Jai Laga'aia's character, although the moment another non-white actor got a part Lagai'a was fired.
* Home and Away: Happened repeatedly, at least three or four times in Irene's house.
* Home and Away has used this, with the audience never being quite sure about certain things such as Hugo's role in the 2009 mystery, or what the hell actually happened at the Sands on the night Penn died (assuming British viewers have caught up, here's one for those just starting to watch the week of this writing: Will killed him in self-defence after he threatened Shandi/Daria). They usually accomplish this by showing another storyline that ties into the characters involved in the scene.
* Home and Away, including Ric's clothes stolen by Cassie in 2005 and Matthew's stolen by Ruby in 2008. The latter, which was filmed, ended up going viral.
* Home and Away, Kirsty got Laura to take her place during an exam. Unfortunately for them, Dan had seen everything.
* Home and Away, Laura Degroot, who had been swapped at birth with another girl who was brought up as Kirsty's twin sister Jade; Christie Hayes played both Kirsty and Laura.
* Home and Away, Martha discovers that her boyfriend is in a marriage of convenience. Surprisingly, this does not remind her of her love affair with Ash nearly three years earlier, which ended because he was married with kids and wasn't about to leave them.
* Home and Away, Martha had four boyfriends, Jack had one girlfriend (later wife), and all were obvious false leads. Jack's wife was sympathetic until her jealousy of Martha and some derailment turned her into a homicidal maniac. Martha's first boyfriend after their separation was an old friend of Jack who kept from her that he was married with children and wasn't prepared to get divorced any time soon. Her second was a much older sleaze bag who recruited her as a pole dancer. The latter two were much more popular, and even some Jack and Martha shippers would have been happier to see them actually move on than draw out the "off-again" stage any longer.
* Home and Away, Matt and Evelyn had a meet cute when he bumps into her in the Summer Bay high school hallway.
* Home and Away mostly averts this, in particular with Sally Fletcher (Kate Ritchie) who grew up naturally from eight to twenty-eight, but there are exceptions:
* Home and Away, most recently with a bomb placed under a bus that would explode if anyone got off (although the bus wasn't moving at the time). With help from an explosives expert on the bus, Hugo was able to cut the right wires, disable the timer and remove it. However, he fails to notice a second timer until about ten seconds before the bomb goes off.
* Home and Away: Nicole accidentally stands Liam up when her phone is broken thanks to a water fight.
* Home and Away, police officer Angelo Rosetta is investigating a people smuggling ring operating out of the bay, and confides in Charlie that he suspects Hugo, Martha's new boyfriend. In the season finale, after several months of Angelo focusing on Hugo, it's revealed that, yes, he is involved.
* Home and Away, Rachel has twice set her coworker Julie up with her male friends, only to discover that said friends were more interested in her. This was previously done to Rachel when Dan and Leah tried to set her up with Peter only to discover that Peter was in love with Leah.
* Home and Away revealed that sisters Charlie and Ruby Buckton were actually mother and daughter, one website brilliantly proclaimed that it made shipping them feel even more wrong. They even seem to have acquired their own couple portmanteau, even if it is mostly used in a familial context.
* Home and Away's Sally Fletcher appeared in the show's pilot as a nine-year-old schoolgirl; by the time she left twenty years and four thousand, six hundred and nine episodes later she was the school's principal.
* Home and Away storyline from 2005 centered on the paternity of Hayley Lawson's

baby became unpopular with the fans, who were aware that Scott was the father from the beginning (the test results had been switched by the vengeful ex-girlfriend of the other prospective father, Kim) but were forced to sit through months of near misses with at least three other characters finding out but being prevented from revealing it for various reasons. The story is now dubbed "Paternitygate" on the Backtothebay message board.
* Home and Away that he will die if he falls asleep. He spends several days not sleeping, eventually collapsing from exhaustion on his desk. If he hadn't been woken up a few minutes later and walked away from his desk, he would have been decapitated by a falling ceiling fan.
* Home and Away. Three years later Kane is captured and is charged with a number of robberies that he committed while on the run. To protect Kirsty and their son, Kane pleads guilty to these and accepts jail time. However, later in the year, Kane decides to appeal and is somehow released even though he was never exonerated for the original robbery, to say nothing of the ones he did commit.
* Home and Away when Robbie couldn't believe that the front page story in The Coastal News was a planned resort for the bay being announced, only a day after the apparent death of serial killer Eve Jacobsen/Zoe MacCallister, AKA the Summer Bay Stalker.
* Home and Away when Shane and Damian offer to assemble a water bed for Alf. Shane offers to do it for fifty bucks, Alf offers twenty-five and demonstrates a unique approach to haggling...
* Home and Away, where Romeo encourages (the fully literate) Jai to write love poems to Annie. Annie believes Romeo is the source of the poems, although whether or not Romeo is fully honest has yet to be properly revealed.
* Home and Family starting in late October into New Year's Day. Due to the network's success with them, Hallmark started airing them throughout July, using "Christmas in July" festivities as an excuse to air them.
* Homebodies, from 1974, an agoraphobic, elderly woman is chased outside, where she is greeted by the dazzling sun, which momentarily blinds her, allowing her pursuer to get closer.
* Homeboys in Outer Space: Two men and a lovestruck computer explore the universe.
* Home, Captain Smek does this in a deleted opening available on the Blu-ray, breaking in on all human electronic entertainment to announce that the Boov are taking over.
* Home chemistry sets used to be quite popular for young science nerds. However, fears of poisoning, acid burns, and explosions soon brought the combination of lawsuits and
* Homecoming, 2026: An entity programmed by Mei Hartford manifested as a portrait on a video screen, "before stepping 'out' of the screen, leaving a static image behind. [and turning into a] [...] holographic figure[.]
* Homecoming, 2026: Cyberpaths, an alternate name for those with the power, are mentioned, with the implication that their power involves manipulating computers with their minds.
* Homecoming, 2026 fanfic about the titular homecoming at Whateley Academy.
* Homecoming, 2026: Mothwing, who, in lack of other implication, is humanoid like most everyone else in the story:
* Homecoming, 2026: The statue of the founder of Whateley Academy is noted:

* Homecoming), because she appears to everyone as their ideal of beauty.
* "Homecoming": Buffy and Cordelia spend the episode competing for the title of Homecoming Queen. At the Homecoming, it turns out there's a tie. Buffy and Cordelia immediately assume that it's the obvious heartwarming ending — but instead, it's a double
* Homecoming by Cynthia Voigt, the children's grandmother tries to invoke this when Sammy disobeys her, but Dicey points out that going to bed without dinner wouldn't be much of a punishment because he already knows what it's like to go hungry, due to having lived on the run and a tiny food budget for months prior.

* "Homecoming" crew so they can blow up the carrier. Fortunately, Hera manages to talk him out of it, and Cham gets the explosion he wanted by destroying the Imperial cruiser also stationed at Ryloth.
* Homecoming (Drizzt), Yvonnel Baenre II was infused with the memories of the original Matron Mother Yvonnel Baenre. As a result, she was born a self-aware and powerful priestess and mage. Yvonnel II grew weary of her infanthood quickly and used an older version of the Haste spell with the side-effect of aging the caster one year with each use to become a beautiful young woman.
* Homecoming has lawyer Alex tracking down former vet Walter to find out what he knows about her sinister company. Alex carefully researches how to pose as a veteran herself, down to getting a fake tattoo matching a certain unit and knows all the jargon. But she finally messes up when she mentions how the sniper in her unit was able to hit a target at several hundred meters...not grasping that snipers always use "yards", not "meters" to judge distance.
* "Homecoming": Hera does this after Chopper releases her from being handcuffed to a chair.
* Homecoming, in a scene where they are silhouetted against the doorway of a tent as the snow falls outside.
* Homecoming: Marty thinks Clara gets too nervous about such things as the way he plays with her sons, although he cuts her some slack since she's new to the time period.
* Homecoming out of commission for the foreseeable future thanks to the Super-Hive, the Tau'ri are seriously lacking in available ships, and no new hulls have been laid down due to the global economic crisis. By contrast, the Alliance has plenty of old Goa'uld warships to refit and use for their own purposes.
* Homecoming Saga , and mankind departed for Harmony, as well as at least forty other planets.
* Homecoming Saga: The deity of a human colony world, the Oversoul, is in fact an AI in orbit around the planet, which provides certain favored characters with "magical" devices to get them to return to Earth because the society it created is breaking down. Humanity is developing resistance to the Oversoul's Mormonism-inducing mind-control, leading to an outbreak of atheism and violence.
* Homecoming Saga, the Earth was rendered uninhabitable by human wars, and mankind departed for Harmony, as well as at least forty other planets.
* Homecoming Saga years since this stuff was built. Naturally, some of it broke down anyway and characters are amazed that even more isn't broken.
* Homecoming: The first season, released in 2018, has a subtle and downplayed example. In the year 2022, a bowl of chowder at a casual diner apparently costs a whopping $18.50, suggesting that the dollar has inflated by about 100% in only four years.
* Homecoming, the Vulture's gang has Phineas Mason, who jury-rigs stolen alien and Avengers technology into weapons and gear to sell on the black market, as well as for the gang's own use (as seen with Shocker's gauntlets and the Vulture's exo-suit).
* "Homecoming Upset", the fire hose Ron is holding starts spraying all over the place when Bonnie hugs him.
* Homecoming (Walsh) Mazor are perfectly capable of vocal speech, but consider it incredibly crass and barbaric. They prefer to communicate with sign language.
* Homecoming when she discovers Peter's identity, and how Peter convinces her to let him continue.
* Homecoming" (with "Slayerfest '98"). And in the Buffyverse, there is no game more dangerous than a Slayer. They all got killed, either by each other or by Buffy, and it's frankly astonishing that they expected anything else to happen. This seems even dumber when one considers that Faith was supposed to be there as well, but Cordelia ended up there instead. So instead of two Slayers, they were facing one Slayer preoccupied with looking after a normal, basically noncombatant human - and they still all died.
* Homecoming, with the weakening of the Faerzress, the magical radiation barrier of the Underdark, all sorts of demons and demon lords start to pop up in the cave

systems. The only way to get rid of them is killing them — and so banishing them from the material plane for a hundred years.
* "Homecooked Eds": Played straight when Eddy attempts, and fails, to move the Kankers' trailer.
* Home Counties this, by saying the standard operating procedure for an alien conqueror was to establish a beachhead in a relatively rural area of a small landmass, make their way from there to the local power centre, and then use that as a centre for taking over the rest of the planet.
* Home Counties to double for overseas locations, or even British locations further from London:
* "Home" deals with several backwoods-horror tropes, including this one. The local police force with Mulder and Scully's help conclude there must be a woman kidnapped and held by a family of young men who is probably responsible for the murder of a deformed baby. It turns out there is a living woman in the house — she was just assumed to be dead by locals.
* Home desperately wants to have friends, and is all too often disappointed by the other Boovs dislike of him. After his journey with Tip he gets one not only in Tip, but also in a number of other Boov, who finally realize what a great guy he is after he stands up to Captain Smek.
* "Home Economics": Pierce becomes a keyboardist in Vaughn's band, allowing
* Home ends with Tip, Oh, Lucy, the Boovs, and some of their human friends dancing with each other, along with the Gorg and several species of aliens we're unfamiliar with in the space around Earth.
* Home Entertainment Center and is centered on procrastination. Steven Banks is a businessman who loses the speech he wrote for his boss to deliver that night, so he needs to rush to re-write it, but instead he's repeatedly distracted and spends the entire show dicking around, baking cookies, playing dress-up, and singing songs. He never gets past "Ladies and gentlemen, board of directors..."
* Home Entertainment Center is about a young guy who pretends that he's starring in his own musical variety show whenever he arrives home. He frequently addresses the audience when announcing what's happening on "The Steven Banks Show," but he's really supposed just talking to himself.
* Home field advantage is why a resistance/insurgency is so dangerous: the occupying force is in a foreign land, generally far from logistical support, and depending on the nature of the occupancy, possibly among hostile locals. The insurgents/resistance fighters, on the other hand, have familiarity of terrain, diverse logistics, and depending on the popularity of the uprising, an entire population of help.
* Homefield Advantage that leaves Kong on death's doorstep. Despite that Kong managed to get a number of hits in throughout the fight and even when pinned under Godzilla's foot, he after he's clearly beaten he gets in one last hit on a wound he made with the axe.
* Home Field Advantage, where one side has a distinct advantage based on terrain or location.
* Home Fires. The traveler is a female soldier, and her husband ages a couple of decades to her two years.
* Home for eternity. A duplicate contract immediately appears in the drawer.
* Home: Frank Money receives a note that says, "Come fast. She be dead if you tarry." This causes Frank to start his journey home to save his sister.
* Home Free in their music video cover of Andy Grammar's "Honey, I'm Good". The group is having a bar night, but every time the song lead Rob takes a drink (even accidentally), he, and only he, has to start the night all over again.
* Home from network television for years after its production, owing to its rather unsavory plotline of an interbreeding family in rural Pennsylvania.
* Homefront all wear bulky armor that wouldn't look out of place on a bomb suit. Amusingly, they still can't take as many bullets as the crazed t-shirt wearing survivalists fought later in the game.
* Homefront," an admiral who nearly topples the UFP government says politicians are armchair military.

* Homefront breathes of this all throughout the campaign; reinvigorated by its annexation of South Korea, Japan, and numerous Pacific nations in the wake of its newfound nuclear and economic might, North Korea establishes itself as the dominant superpower of East Asia and under the reign of Kim Jong-Un spreads false messages of peace as it tightens its grip on the world abroad as the globe is ravaged by economic depression, disease, and the decline of American influence politically and militarily. Taking advantage of this, the North Koreans paralyze the with an EMP that blacks out all vulnerable electronics nationwide and irradiates the Mississippi River, paving the way for a massive invasion in which the entire continental US west of the Mississippi has been occupied, with Hawaii and Alaska in tow. Without the US Army able to enact an organized and decisive counteroffensive, the Western United States is defined by a system of totalitarianism that sees the North Koreans indiscriminately imprison and massacre droves of civilians with or without provocation, mass graves, the loss of power, food, and all critical infrastructure, disease, starvation, and constant fear of being tortured by the North Korean Army. A few pockets of American resistance are all that stand against the North Koreans in the absence of the US Army or its overseas allies, and every attack against the enemy risks massive reprisals against the civilian population. That said, the situation bodes badly for a shattered United States that doesn't have the fuel, technology, or reach to drive the Koreans out of their country.
* Homefront but even he balks at the efforts of another group of resistance fighters who behave like the KKK.
* Homefront: Even before the Korean invasion, the United States was a mess, with gas prices skyrocketing, and the nation's states threatening to go to war with each other. Both Canada and Mexico closed their borders in order to stem the wave of refugees flooding in.
* Homefront fame, and he truly outdoes himself here, even seeing fit to include the page quote.
* Homefront, had a rendition of Johnny Mercer's "Ac-cent-tchu-ate the Positive" as its theme.
* Homefront is obviously banned for depicting both Koreas united under Northern rule.
* Homefront level, two of the survivalists are talking about the resistance fugitives (you) and mention Tokyo Rose by name.
* Homefront makes mention of the individual states squaring off amidst the chaos, Illinois threatening Texas with military action after border guards killed several migrating Chicagoans and such. That and the country literally being divided when the GKR occupies the Western half of the country and poisons the Mississippi with radioactive waste.
* Homefront North Korea has conquered South Korea and is now Greater Korean Republic, and invades the USA when it launched a EMP attack against it.
* Homefront territory. Out in the boonies, the militia fighters are just as bad as the Koreans.
* Homefront: The basic plot of the game is the United States under occupation by a resurgent North Korea.
* Homefront, the final boss of the game is the exact same weaponry (tanks and helicopters) that you've been fighting throughout the entire game. The only difference is that you get to rearm anti-aircraft guns to take them out.
* Homefront the Korean soldiers spend the first few minutes at the beginning of the game brutalizing American citizens. A group of them shot a couple in front of their own child, and the Resistance sees that the Koreans are killing the prisoners and burying them in mass graves.
* Homefront: The Revolution: The US is occupied by a ultra neo-liberal North Korea, who in this timeline became the world's number one technological super power and high-end arms supplier, leading to most of the first-world depending on their technology and weaponry. After the US government is unable to pay a huge debt to the North Korean Government (who is controlled by the APEX Corporation), they decide to turn off the entire American military with a kill-switch and later occupying the nation under the pretext of giving aid to the American population and

restoring order but secretly using them for slave labor to "cover the debt".
* Homefront: The Revolution where the KPA weapons are biometrically secured and the resistance, including the player, must make do with traditional weapons.
* Homefront. We never see any other American quislings on-screen, although one normal collaborator shows up at one point.
* Home Game: All the fun of the game (hopefully), without the fear of cameras or a large audience. Or the pleasure of actually boosting your bank account.
* Homegrown Hero: The hero of the work hails from the creator's hometown.
* Homegrown, spent 45 years after its 1975 recording kicking around in stasis (due to the raw honesty of its recounting of Neil Young's separation from Carrie Snodgrass making the executives uncertain about its sales potential) before finally being released in 2020.
* Home Guard. The British had taken a considerable hammering in France and had little in the way of proper equipment to spare for the newly-formed Local Defence Volunteers... But it so happened that the majority of said Volunteers were farm workers, exempt from conscription as they were performing essential war work. Farm workers tend to own shotguns and small-caliber rifles for pest control and sometimes hunting small game, and use them often enough to be quite good with them.
* Home Guard trope in the case of many regiments who are meant to be available for deployment outside of Ultramar a bit like the Imperial Guard.
* Home has the Gorg, who only attacks the Boov to repopulate his species with the children taken by Smek.
* Home), he didn't know how to show any empathy towards other species, besides his own. Spending time with Tip allows Oh to learn.
* Home, he lured Walda and his baby brother to the kennels to have his dogs devour them.
* Home, Horde Prime ate and drank things other than amniotic fluid and "[partook] in the flesh", something that the horde clones think is forbidden for them. While the Speaker thinks that Horde Prime is a perfect being and is allowed to do such things, Hordak takes it as a sign that the fact that he "would break his doctrine when it suited him" meant he wasn't a leader worth following.
* Home Improvement, “Tim ‘The Landlord’ Taylor”), Brad comes home from the mall wearing a new (and very loud) shirt that he’s very proud of. When he leaves the scene after showing the shirt to Jill, Randy immediately walks in wearing the same shirt. When they see each other wearing identical shirts, they get in an argument and spend the rest of the episode bickering with each other over who gets to wear the shirt when so that they are not both wearing it to school on the same day. While Brad is wearing the shirt at the end of the episode, Al comes by the house to talk to Tim...and takes off his winter jacket to reveal that he is also wearing the same shirt.
* Home Improvement after Al manages to hit it off with a woman since her friend falls for Tim. Tim's wife Jill is amused by all of this; Tim is not.
* Home Improvement, after she got laid off from her journalistic employment. Her education lasted through the remainder of the series' run.
* Home Improvement Al doesn't get the joke until several moments later.
* Home Improvement, Al shined a flashlight on the side of Tim's head, and the light shone through to the far side of the set.
* Home Improvement, Al uses straightforward handyman techniques and good general craftsmanship that work every time.
* Home Improvement and checks his (very long) insurance policy; when he sees there's no "beam droppage" clause, he talks to his insurance dealer to add it. The dealer responds that he saw the show.
* Home Improvement and he scores in the eighties range...out of three hundred. Tim retaliates with his own test, giving her a score in the nineties.
* Home Improvement), and she for not realizing he wasn't catching on and just straight up telling him. Of course, in the end, just as Jill is about to apologize to Tim, he apologizes first... and Jill doesn't bother.
* Home Improvement, and the attractive young man she's with is... some guy who isn't Tim. The picture they eventually dig up of Tim has him wearing a dorky '70s

mustache.
* Home Improvement and was suffering from stage fright. Heidi, who was played by Debbie Dunning, advised him to picture everyone in their underwear. For clarification; his boss's extremely attractive co-worker told a teenage boy to think about people in their underwear. Brad gets a sort of stunned look on his face while the audience laughs.
* Home Improvement, and when Tim starts lagging behind he brings out a chainsaw to finish the job.
* Home Improvement appeared to be a normal manual at first, only for the player to open it up and see the instructions were covered up by a large sticker reading "Real Men Don't Need Instructions!"
* Home Improvement a rule limiting the amount of Christmas lights and electricity used in the neighborhood decorating contest was known as the "Tim Taylor Rule"
* Home Improvement (astronaut Ken Bowersox showed up with both crews).
* Home Improvement, Brad and Randy say that anyone who calls Mark a dork for wearing glasses will have to answer to them because they are the only ones allowed to call him a dork.
* Home Improvement by wheeling out a portable wall decorated to resemble Al's plaid shirt, work pants, and tool belt, and then pretends he can't see Al when he walks in front of it.
* Home Improvement cartridge from the console and replace it with a better game.
* Home Improvement, Debbe Dunning played a one-off role in the season two episode "Overactive Glance" before she started playing Heidi in season three.
* Home Improvement did a bunch of these in an episode concerning magazine compatibility tests.
* Home Improvement directions, Tim refuses to use them, and they end up in Ohio instead.
* Home Improvement employed a unique wipe, and they always had something to do with the plot or the conversation at hand. For example, if Tim was talking about mowing his lawn, then a large lawnmower might appear and "mow" the current scene away to reveal the next.
* Home Improvement episode "'Twas the Night Before Chaos", Tim tries to get his father-in-law, who happens to be an army vet, to help him put up his Christmas display to beat his long-time rival, an eighty-something retired proctologist. He doesn't want to get involved in their rivalry until Tim mentions that the man was in the navy. Then he's only too eager to beat "that navy butt doctor."
* Home Improvement episode "Unchained Malady", Tim has been having a string of bad luck which he starts to believe is from his not forwarding a chain letter that he had scoffed at earlier. One of the warnings at the end of the letter was that "a naval officer in Borneo disregarded this letter and three days later he was decapitated". Tim talks to Wilson for reassurance later, and has this exchange with him:
* Home Improvement, especially in earlier seasons, often had Tim and Jill pulling these in response to their children's antics in order to teach them a lesson.
* Home Improvement, especially in the earlier episodes, when they were too young to really know better.
* Home Improvement, for instance interviews about his experience working on the show, with his face obscured.
* Home Improvement. For some reason, it was on the tank's road and not the cart path it crossed.
* Home Improvement. For the record, Tim does eventually break down at the funeral. They also explain that the reason why Tim handles grief so well is that his dad died when he was pretty young and he knows how to cope.
* Home Improvement game had pretty interesting things attacking you ranging from ants and dinosaurs to mechs.
* Home Improvement, Glenn. Tobolowsky decided he was too busy and audiences responded well to Richard Karn's portrayal of Al, so they simply kept the character in.
* Home Improvement got into the act in later years, which only made sense, with

three mid-to-late teenaged sons. One of their titles included "Shakespeare In Lust".
* Home Improvement had an episode where Jill's dad died and the family had gone to Texas for the funeral. Randy was constantly making jokes about it and upsetting Mark. He later admitted to Tim he didn't know why he was acting that way. Tim said he was the same way when he was 11 and his dad died, and suggested to just be careful around certain people like Mom and Mark.
* Home Improvement hadn't done so already). Bob went for hundreds of dollars, while Tim's situation got so dire that his wife Jill (who was running the thing as the auctioneer) had to step in and make a bid herself because nobody else would.
* Home Improvement has an episode where Tim, attempting to show the efficacy of the anti-theft system he's installed, has a guest star thief try to break in. Moments after saying that he's engaged the system, the front door opens and the thief walks in. He explains that he used a credit card to slip the lock. Tim replies "Sure, if you don't mind destroying your credit card doing it" to which the thief says, "That's why I used yours" and hands Tim's wallet to him.
* Home Improvement has the show's logo in stop-motion during the cold open. One episode has a dream sequence done in stop-motion with wooden figures.
* Home Improvement. He told Tim about the time he went to a seafood buffet and ate eight plates of shrimp. When he tried to eat a ninth plate of shrimp, "I was TKO-totally keeled over," and said that it taught him the important lesson of needing to know one's own limits: eight plates of shrimp.
* Home Improvement he was doing it right and did things like double-check measurements and read the manual.)
* Home Improvement in "an expert like Tim" wielding a giant sledgehammer while Al held the stake...
* Home Improvement: In "Heavy Meddle," Jill decides to play matchmaker for her friend Karen with Tim's friend Dave. Several episodes later, Tim gets dragged into it when Dave cheats on Karen. They end up splitting for good.
* Home Improvement: In the episode "Let's Go To The Videotape", Tim videotapes Jill making a speech at a library fundraiser and then shows his friends at the hardware store how to use the video camera. Then, not knowing the camera is still recording, he starts complaining about how boring Jill's speech was and how he's tired of listening to her talk about her psychology classes. Of course, Jill ends up seeing the tape later, and she's not happy.
* Home Improvement is said to be one, though she never appears onscreen.
* Home Improvement is sponsored by the in-universe company Binford Tools. Tim will stand behind Binford's products, and has no problem promoting them on his show. However, in one episode, Tim is told to plug a new product that he thinks is terrible, and is torn between his honesty and his obligations. He eventually trashes the tool on-air and even puts his boss on the spot by roping him into it. However, a positive spin is still put on it, by saying that Binford prides itself on making only the highest quality tools, and that when a tool doesn't pass the test, it doesn't go to market. They then proceed to destroy the prototype.
* Home Improvement it out of the vent (and into a pot of soup on the stove).
* Home Improvement. It's a textbook example of this trope, where he and the other kids act like having one noticeable pimple is a rare and horrible occurrence.
* Home Improvement Jill bests Tim in front of all his buddies. He actually gets the final strike to win, but walked over the line. (When the game first begins turning against him, Tim tries to save face by claiming that he's letting her win because of her mother's conviction for grand theft auto.)
* Home Improvement, Jill has occasionally mentioned that people tried to talk her out of marrying Tim.
* Home Improvement: Jill knew that Tim was basically useless when the Detroit Lions, Tigers, Red Wings, or Pistons were playing.
* Home Improvement, Jill meets Tim's ex-girlfriend Stacey, whom Tim never officially broke up with. Jill is less than pleased by this news, but she and Stacey get along well enough that it makes Tim nervous.
* Home Improvement Jill's mom is distributing presents to her daughters; Jill wants

an old antique clock that was always special to her, but that goes to her sister while she gets an old tea set. It turns out that her mother actually thought this would be meaningful to her, though - apparently, she and Jill used to play tea party with the old set when Jill was a child, though as an adult Jill sheepishly admits she can't remember that at all.
* Home Improvement, Jill Taylor's father is a gruff war veteran who fought in World War II and the Korean War.
* Home Improvement: Jill Taylor, she can even drive a tank and likes chipped beef on toast.
* Home Improvement, Jill walks in on her son Brad and his girlfriend making out in his bedroom. This gets Brad in trouble because Brad wasn't allowed to have girls in his room.
* Home Improvement, Mark, who was about seven at the time, refers to his mom as his "woman":
* Home Improvement. Meanwhile, Randy runs into a bully at the alley's arcade.
* Home Improvement: Namedropped, though one doesn't actually happen, during the start of the "Tool Time" episode featuring "The Man's Dorm Room".
* Home Improvement, one of the students from Tim's shop class does this with Jill's cake when Tim has them over for dinner.
* Home Improvement originally had actress Francis Fisher playing Jill, but producers were uncertain about her take on the character (playing her a lot more exasperated over Tim's antics) and this led to her being replaced with Patricia Richardson for the series itself.
* Home Improvement. Possibly justified, as any debilitating accident on the show immediately calls for a cut to commercial, and Tim has been conditioned to get these words out as soon as possible.
* Home Improvement: Randy actually does mean to insult Tim, but not in the way he thinks.
* Home Improvement. Randy's girlfriend decides they're going to a costume party as Raggedy Ann and Andy. But then she gets mad at him over a minor matter...and shows up in street clothes, making his lame outfit look even lamer.
* Home Improvement. Randy's having a birthday party and the pretty girl slips on the dance floor that Tim overwaxed, twisting her ankle. Not have a bag of ice, apparently, Tim soaks her foot in the bowl of punch to keep down swelling. When her father arrives to pick her up and helps himself to the punch, he comments on its good taste. When told his daughter "helped make it", he says it tastes like she had a hand in it.
* Home Improvement, recommends that he put a thick steak on it. Al says he thought you were supposed to put ice on a black eye, to which Foreman says, "But when you're done with ice, you can't barbecue it."
* Home Improvement: Referenced in season 8's "Love's Labor Lost, part 2", when Tim brings home a lot of stuff he swiped from Jill's room in the hospital. He claims it's expected.
* Home Improvement regarding her weight (she was Tool Time's biggest fan, etc). But the last laugh comes indirectly from Wilson, when he starts calling the list of pall bearers. It was awfully long because he'd reached about ten names and was still going at fade-out.
* Home Improvement, saying "How hard can it be to make lame puns and screw up all the time?" Turns out, pretty hard.
* Home Improvement shook their presents but heard nothing and concluded that they were clothes.
* Home Improvement storming out of the garage upset. It's then that Tim realizes what just happened.
* Home Improvement studio audience, and you can see how people are laughing at the gags on the show as though they were at a sitcom taping.
* Home Improvement, "Taps" is the title of the episode in which Jill's Veteran father dies.
* Home Improvement" than "Doesn't know what he's doing". As far as his family goes, Tim is a little closer to the standard for this trope, usually not always

understanding how he should act in various circumstances, as having effectively raised himself after his dad died, he's not clear how a family works. This conversely means that in any episode where someone dies, Tim ends up being much more competent and capable.
* Home Improvement that he gets into accidents that would normally fit Impossible Insurance, but not regular insurance.
* Home Improvement, the actress who plays Jill's sister Carrie is married to Richard Karn, who plays Al.
* Home Improvement: Tim Allen and Patricia Richardson each directed one episode in season eight.
* Home Improvement, Tim Allen takes applies 2 nodes to his chest, beep.....beep.....beep. He starts breathing heavily and tries again, beep..beep..beep..beep. He then puts the nodes on his head to which it flat-lines.
* Home Improvement, Tim claims to have a machine that can scan anything and make a color of it. Perfectly reasonable at first, but then Tim scans Al, produces "A nice can of Al", and proceeds to paint his portrait on a wall with a paint roller. Everyone else is shocked or amused by this, so in-universe it's probably just a magic trick.
* Home Improvement, Tim finds out that Heidi stayed overnight at Al's place and he spends the episode being obsessed with finding out whether they did it or not. Turns out Heidi was just crashing at Al's place due to marital issues with her husband.
* Home Improvement. Tim has a business meeting in a Japanese hotel, and has to join his bosses in a full Shiatsu massage. While they enjoy themselves, Tim is clearly in pain when the masseur starts stepping on his back.
* Home Improvement, Tim has already long given Brad The Talk, being that he is supposed to be about 15, but things are a bit complicated when there is suspicion that Brad is active with his girlfriend. This leads to Tim having to specify concepts of safe-sex and things get even more awkward when Brad asks him about his first time. They have an honest discussion, which finishes with...
* Home Improvement Tim is getting ready to set up his usual over the top holiday decorations when he is told that there are new rules for the contest this year. Namely, that the three wise men of the Nativity must be the actual three wise men, not the Stooges.
* Home Improvement: Tim manages to rig an obscenely bright snowman decoration during the Christmas season it's so bright they need to put on goggles and Tim advises his family not to look directly at it.
* Home Improvement: Tim points out Jill's attempts to pair the spares, and Jill responds, in an angry tone, "Because I want everyone to be as happy as we are."
* Home Improvement, Tim's hated rival Bob Vila made several guest appearances, often dismissing Tim's show as a ripoff of his own.
* Home Improvement. Tim Taylor is a good and loving father to all his sons. But it's oft mentioned that he favors Brad over Randy and Mark because he and Brad have more common interests. This leads to Tim spending more time with Brad and allowing him special treatment, like standing in for Al on Tool Time. Somewhat subverted in that Tim is aware that he favors Brad and feels genuinely bad about it. Enter Wilson...
* Home Improvement, Tim Taylor's boss, Mr. Binford, who was like a second father to him, dies, and he is unable to cry for him or show grief the way the other characters do. After a bit of thinking (and a visit to his neighbor Wilson), he realizes that he just doesn't show grief the same way as everyone else. Notably doesn't end with a scene with him breaking down in tears. The episode said that Tim cried at the actual funeral, but didn't show it on-screen. Part of the story was that he didn't want Brad to think crying isn't "manly" because everyone shows grief differently.
* Home Improvement Tim Taylor's typical suggested answer to every issue is it needs "More Power! Hrah hrah hrah hrah hrah hrah..!"
* Home Improvement, Tim thanked the audience for making it "Michigan's fourth-highest-rated cable tool show."

* Home Improvement: Tim thinks it's his wife in the shower so he enters the bathroom and takes off his clothes, but once he pulls open the curtains, he instead sees his sister-in-law. Noticing his subsequent awkwardness, his wife teases him with "You liked what you saw, didn't you?"
* Home Improvement, Tim wants to impress Bob Villa, who is guest-starring on Tool Time to answer viewer questions. Tim tells Jill to call and ask a difficult question for him to answer, and when he answers the phone, her response is "Hello! This is Jill...een. Uh, uh, Jilleen!"
* Home Improvement to create an innovative new dish and Tim ends up making this kind of dish: caramel flounder with chocolate chip chutney.
* Home Improvement to discuss "Women on Top", where she makes comments that make Tim look bad.
* Home Improvement. To make Tim change his mind, his wife threatens to get up each morning and cut out the sports section of the newspapers they get if he continues to refuse to stop and ask for directions. It works.
* Home Improvement to perform a musical number using mostly tools such as power saws, wrenches, screwdrivers, and an actual musical saw.
* Home Improvement. Twice. After Al has explained — at great length — why he's thankful for his girlfriend:
* Home Improvement using nail guns but also putting it on a turntable.
* Home Improvement, usually with Al on the receiving end. And once with Bob Vila.
* Home Improvement was arrested for DUI and the creative team realized it would be hypocritical of them to do the episode so it was scrapped.
* Home Improvement, when Jill doesn't feel like visiting with her Dad, she out-of-character makes up a white lie as an excuse for why she has to skip town and miss him. He dies. Naturally, her last words to him were another lie to get him off the phone.
* Home Improvement when Jill insists that Tim carry her like this, unaware that he'd pulled a groin muscle earlier. It doesn't end well.
* Home Improvement when Jill is trying to cheer up Mark: "Would you like a piece of angel food cake? I made it myself... It was real hard to find fresh angels this time of year."
* Home Improvement when the kids get revenge on a bully by gluing his butt crack closed. Tim, the father, is impressed and makes only a token effort to tell them they were wrong, and that only after his wife gets mad.
* Home Improvement, when Tim and Al were showing hand signals for crane operating, Tim swung his arm and accidentally broke Al's first model crane. Al then says he has one more hand signal for Tim that wasn't in the manual.
* Home Improvement when Tim and Jill leave for the weekend to attend Jill's class reunion, they get Al to look after the boys. They end up running amok and locking Al out of the house.
* Home Improvement, where the character is actually a set of triplets, who cause Tim trouble in multiple cities. Each one claims to be the nice one.
* Home Improvement, where Tim is going to rewire the dishwasher with youngest son Mark watching. After first cutting power at the circuit breaker (maybe; appropriately for the trope he has labeled the breakers in pencil and they've faded), he marvels at the bundle of wires under the appliance and demonstrates that he should first cut the ground wire... if he can figure out which one that is. First he guesses green, then eventually settles on yellow because the sun's yellow and it heats the ground. Snip, zap.
* Home Improvement, where Tim Taylor tells Al that Jill was cheating on him with their supposed milkman as an extremely lame cover story.
* Home Improvement, where wife Jill was a self-admitted feminist and Tim was the one who screwed up 99.5% of the time.
* Home Improvement, which turns out to be true in Jill's case (Tim preferred beer). The parents discuss whether they should tell Brad the truth, and eventually, they do and she explains the trouble it caused her and that it was a mistake she doesn't want him to make.
* Home Improvement, while driving his attractive female mechanic home, Tim makes a

hard stop at a stoplight and reaches out to stop her from going forward, grabbing the wrong area in the process. When she asks why, he says that since he has three kids, it's basically a reflex. Unfortunately for him, the Detroit area just got cameras installed to take pictures whenever somebody goes through a red light.
* Home Improvement, Wilson's basement is a deep, dark, dank, very spacious cavern as shown in the pic of this page.
* Home Improvement with all the times Tim exclaimed "I didn't blow up his house!", followed by, of course, the clip of the house blowing up.
* Home Improvement, with Tim as the bumbling-but-wisecracking Wise Guy and Al as his competent-but-long-suffering Straight Man sidekick, but at one point they switch roles accidentally and have Tim play the straight man when they do a cooking show.
* Home Improvement would sometimes cut to these when Tim injured himself somehow. Such as the time he nailed his foot to the floor, and one of these pops up. Then we hear the sound of his co-host pulling the nail out...
* Home. In just one example, Oh finds a cookbook as he sets up his housewarming party. He cooks it.
* Home, in regards to the Boov. They were only looking for a place to call home, but in doing so they deprived other species of their homes.
* HOME is addicted to sugar, so much that he eats an entire room full of it.
* Home is described as a very resourceful girl. This proves to be true, when she's able to take care of herself when her mother is kidnapped.
* Home is quite mature for a young teen and often acts as the adult between her and her mother.
* Home is Where the Hate Is. The Monarch plants one of Sgt. Hatred's miniature explosive devices at the base of Dr. Venture's spine. After bragging to Hatred that Venture will soon explode in his home (thus violating the Guild of Calamitous Intent's bylaws and ruining his career), both are shocked and terrified when the unknowing Venture joins them in the hot tub they are sitting in. They brace themselves for the blast, but it turns out to be little more than a bubble of air that Venture dismisses as flatulence.
* Home, it momentarily looks like Oh was crushed by the Gorg's machine, but there was an indentation in it large enough for him to fit without being crushed.
* Home, just how many planets did the Boov lead the Gorg to that were then destroyed, and how many of them were inhabited?
* Homeland: An angry young Muslim man who'd been charged with (and cleared of) supporting terrorism is set up to look like a suicide bomber after he was released by some government officials who wanted to stop the President elect's reform.
* Homeland, but from Season 4 on, the show continues to follow the CIA careers of the remaining characters. Notably, the Israeli series upon which it was based stays focused on the POW story for its entire run.
* Homeland, Carrie has one when watching some musicians play at a bar and realising that Brody doing the same might be a signal.
* Homeland, Carrie manages to sever her bonds this way when held prisoner by Abu Nazir, but her escape is unsuccessful.
* Homeland, Carrie Mathison watches Brody's life through a series of cameras and mikes she has installed at his house.
* Homeland. Carrie, understandably, storms in and retakes control. Quinn's anger vanishes the second he steps outside and Saul realizes it was just 'theater'. 'Good cop needs a bad cop.'
* Homeland, Damien Lewis confesses he did it and "he gave me a 'seriously?' look he's clearly become used to."
* Homeland during the battle with another house. Mind you, no one is fooled. Later, it is mentioned that wizards cannot participate in surface raids - because some guy killed a few drow with a fireball in a raid and claimed it was a malfunction of his magic due to the conditions (the investigators were in no hurry).

* Homelander spies on Stillwell with his X-Ray vision while she's using breast pumps.
* Home Land From Carrie's obsession being because she did not stop the New York and Washington attacks to drone strikes in Al Qaeda and ISIS to 4chan social media cyber war against foreign and domestic terror.
* Homeland has as its season six antagonist Brett O'Keefe, an analog for Alex Jones and James O'Keefe.
* Homeland has Pakistani characters played by Suraj Sharma, who is Indian, and Shavani Seth, who is a Brit of Indo- and Afro-Caribbean descent.
* Homeland has the CIA investigate USMC veteran Nicholas Brody in order to figure out if Palestinian terrorist Abu Nazir turned him into a terrorist.
* Homeland: In season 4, Quinn effectively becomes one after the CIA cease official operations in Germany. He's given targets and paid operation funds with confirmation of each kill.
* Homeland" ("National Security" — a clever one, as "Homeland" is a reference to "Homeland Security" and there is no direct translation of the word "homeland" to Portuguese).
* Homeland once the Brody story petered out and the creators wanted to continue with the characters they still had.
* Homeland role in relation to her, as she plays them against each other and later on, attempts to evade discovery and capture.
* Homeland she has been fired by the CIA. At the beginning of Season 2, she seems to be recovering mentally, and then gets asked by the CIA to go back into the field to deal with a source she had recruited years earlier. She does excellent work, and thinks that this might be her way back in; when she is then humiliatingly dismissed with a pat on the head, she is so depressed she attempts suicide. Then, just when she is at her lowest, Saul shows up with ironclad, smoking-gun proof that she was right all along.
* Homeland the love interest of Saul leaves him because he has a time-intensive job (as if she hadn't known before) and she wants to fulfill herself by demanding that he gives up his job and moves with her to India for charity work. Because working for the Government is not important at all, so this wasn't really giving Saul options, it was a break-up.
* homeless, and partially because she's so depressed that she doesn't care about her personal hygiene.
* Homeless Hero: The protagonist lives a nomadic lifestyle for some reason.
* Homeless shelters. The homeless are often seen as imposing many negative effects on the residents and businesses in any area. So the homeless shelter is located in some place that makes it hard for the homeless to have access to any of the good parts of the community.
* homeless. Then he became a rapper and is now worth about $5 million.

* Homemade Inventions: Gadgets built on a budget and out of whatever happens to be on hand.
* Homemade Inventions: whatever it is, and however much of a mess it should leave behind, everything vanishes without trace by the time she tries to show their parents.
* Homemade Sweater from Hell: A cheesy tacky itchy sweater that no one wants for a gift.
* Homemade Sweater from Hell, the sweater is both tasteful and fits well on him. Jon immediately heads for the phone to call and check on her.
* home. Many of the crew (and not a small number of the adopted Maquis) no doubt found this significant in some way, shape or form. Contrast Naomi and Seven, whose entire lives (or new life, in Seven's case) existed on that ship (and Naomi is only half-human). To them, the ship was home.
* "Home" — presumably, the magician's own mind, in the form of a subway station.
* home movie from the 80s, with videotape quality and fashion sense. However, if you do the math, her childhood would have been around the early 2000s, when VHS cameras were starting to become discontinued and the 80s wardrobe would have been considered an embarrassment (at least for a child or teen).
* Home Movie has this trope prominently displayed on the cover, which depicts a desecrated photo the father finds in his psycho kids' clubhouse.
* Home Movies, a background character repeatedly tells Brendon "You suck!" and that he's going to lose an upcoming fight.
* Home Movies - at the Medieval Faire, McGuirk is talking on his cell phone - faire organizer Lynch swipes it away from him. McGuirk starts yelling "He has a PHONE! BURN him!!!" Several faire goers advance on Lynch with torches.
* Home Movies: Brendan Small is a parody: Everyone claims that he is very intelligent but in reality, he is egotistical, incompetent and a failure at everything.
* Home Movies: Brendon comes home to find his mom and her boss looped on wine. On seeing him the boss shouts "Well, look at you! What a perfectly adorable little young lady!". Brendon anxiously replies "Ah...well...I'm not so little...". Brendon is considered to be kind of girly by lots of folks, including his friends.
* Home Movies, Brendon keeps good-naturedly mocking classmate Junior Ahlberg, then gets karmic payback at the end of the show when a 'funny home video' show makes a big hit of his mom's tape where a younger Brendon sings and then wets himself. It gets shown repeatedly on the evening news.
* Home Movies: Brendon pushes himself on Cynthia a bit too much at a Battle Of The Bands competition — as she runs off, he runs onstage and, grabbing a microphone, declares in a highly embarrassing manner that he's "in LIKE" with her.
* Home Movies, Brendon's grandpa has boxing gloves and offers to teach Brendon to fight. Brendon is understandably hesitant but grandpa's repeatedly goading him with girly name-calling gets him to get in some punches. And grandpa lined the gloves with ball bearings for extra "oomph". Painfully, awkwardly funny.
* Home Movies - Brendon Small struggles to improve his grades, with the help of a pump-up song "Trust Yourself", by the real Brendon Small.
* Home Movies, Brendon's mom assigns him one after he films a movie with his friends containing gratuitous profanity.
* Home Movies, Brendon's mother reacts this way to Brendon asking to go to the library — multiple times. The first time she does it is out of legitimate shock, but then she keeps doing it, seemingly just to annoy Brendon.
* Home Movies - Cho, the goalie who had it in for Brendon, confronts him and his friends - Jason, in his nasal deadpan, intones the three-note "BUM-pum-pum-m-m-m..." breaking off at the commercial break and resuming after: "...-m-m-m-m-m-m!"
* Home Movies, Coach McGuirk is absent from the episode "Brendon Gets Rabies" from the original UPN run, even though his voice actor is still in the episode voicing Jason and the veterinarian. McGuirk will appear in every single episode afterwards.

* Home Movies Consequently, when Brendan makes a movie featuring several historical figures, all the information is faulty, and worse, he's flunking history in school.
* Home Movies, created by Brendon Small, should really need no further explanation.
* Home Movies during their "impressionable years." McGuirk later on goes on a disastrous date with the school nurse, and one of the first questions he asked was if her father was fat. In another episode, he drunkenly tells his date "Y'know, I think it was Charles Darwin who said that men want to marry their mothers. So maybe that's why I like you, cause you remind me of my mother. Which is funny, because I hate my mother..."
* Home Movies episode "Broken Dreams", a badly concussed Coach McGuirk spouts three solid minutes of non-sequiturs before finally falling unconscious in a library.
* Home Movies episode "Coffins and Cradel's". Brendon is his stepmom's Lamaze coach. Ironically leading into a screaming birth in the same episode.
* Home Movies episode "Cradles and Caskets," the woman that Brendon's dad marries is seen eating a bucket of fried chicken and dipping it in butterscotch.
* Home Movies episode "It Was Supposed to Be Funny," Brendon and Jason take balloons and candy over to Melissa's house, and after she says, "It'll take more than balloons and flowers for me to forgive you, Brendon Small," and upon her departure, her dad says to the boys, "Could I have some of that candy?" the three male characters suck in helium on Melissa's dad's couch — the moment highlights that they're all very stuck in boyhood.
* Home Movies episode "Shore Leave", Brendon is staying the weekend at Fenton's house and walks in on Fenton's mom in the shower. As he has his camera with him and shooting a movie, he catches the moment on video. Coach McGuirk ends the show trying to put the footage online.
* Home Movies features commentary on a few episodes of their DVDs. One of the more bizarre ones being for the season 3 episode, "It's Time To Pay The Price", which begins Brendon Small and H. Jon Benjamin doing a improvised jam session, and it doesn't stop until around halfway through the episode!
* Home Movies frequently use male voice talent for female characters. Then there's McGuirk at the Medieval Fair reading his line "in Elizabethan".
* Home Movies had a schoolteacher who was a former prison guard locking the kids in a cell for a few hours in order to scare them straight. They used the time to brainstorm about their next film project.
* Home Movies has an episode at Fenton's birthday party, with a birthday song so annoying and asinine that it's an object lesson against copyrighting tunes like 'Happy Birthday'.
* Home Movies: "Hello Franz Kafka! My name is God! I think you are going to like it here!"
* Home Movies; he seems to regard himself as a father figure to Brendan, but he's a beer-swilling lout who dispenses lots of spurious advice.
* Home Movies. In spite of his lack of ability to express himself verbally, he is a highly talented guitarist and has written a rock opera based on Franz Kafka.
* Home Movies is more accurate. In one episode, he and his mother are shown eating nothing but rice for dinner, as though it's a regular occurrence. Maybe a nutritional deficiency is partly responsible for his behavior.
* Home Movies later revived the series, airing the unaired UPN episodes and ordering three more seasons.
* Home Movies, Melissa is forced to join a girl scout-esque troop to be more feminine. It ends up being played as a cult/pyramid scheme.
* Home Movies mistakes a male cop for a stripper, who arrests him for not writing an essay.
* Home Movies of drunk and disorderly offences, when he attends a court date with Brendon the Judge wonders if he's seen him before (to which McGuirk replies "several times" without going into detail) and he admits he can't abandon the field trip because he'd lose his job, do something stupid and wind up in jail "again".
* Home Movies outline between certain objects, such as Coach McGuirk's yellow collar having no border between it and his red shirt).
* Home Movies plump up at the same time, they show a montage of their "fat" movies,

one of them is called "The Pregnant Monk meets the Pregnant Buddhist".
* Home Movies program. However, they took them to a white-collar prison, which the kids considered akin to this trope. Coach McGuirk even remarked that the cells were better than his apartment.
* Home Movies' "Renaissance" episode, Jason is wearing a fake boar's head he'd picked up, creeping the others out shouting "Ple-e-ease don't eat me-e-e!"
* Home Movies Season 2 "Class Trip", Brendon, Jason, and Melissa are filming a scene in a hotel room. When Jason's character enters the scene, Melissa's character explains to Brendon's character who he is and what he's going to do. Jason tells her that she actually spoke a couple of his lines, which Melissa apologizes for.
* Home Movies (the actors provided a general outline but not a definite script).
* Home Movies. The actors were given outlines of what would happen in the episodes and the dialogue was mostly made up. An infamous scene in the first season about McGuirk and his tattoos was completely improvised by H. Jon Benjamin and Brendan Small. As well, the basis for Lynch's appearance was based on a description that McGuirk ad-libbed.
* Home Movies, the episode "Yoko", Eugene urinates in Coach McGuirk's canteen. After taking a swig from it and spitting it out, McGuirk demands to know which of the kids is responsible, asking rhetorically, "You know what that tastes like?" Brendon and Melissa counter by asking him, "How did you know what it was?" and "How did you identify it so quickly?" McGuirk admits that he's tasted it once before.
* Home Movies - the guys are confronted by the angry goalie Brendon got a goal off of (by the ball bouncing off his face):
* Home Movies. The main trio consists of two white boys (Brendon and Jason) and a black girl (Melissa)
* Home Movies through the entire cast, though Paula became an exception when her original voice actress, Paula Poundstone, was replaced.
* Home Movies tried to do this with one of his films, but did it badly.
* Home Movies uses it in the season one finale when McGurik hides in a heckler's car and pops up to fill his rear view mirror while he is driving home.
* Home Movies uses the twist where every time Brendan tries to introduce his friend to the girl he has a crush on, his friend runs away so the girl thinks he's the one with a crush on her. Later, when Brendan tells his mom about what's going on, she again thinks he's talking about himself rather than his friend.
* Home Movies was done this way to make it sound like 3 kids talking in real life. Even the scripts only had small notes on them and jokes to fall back on if the voice actors couldn't think of anything to say.
* Home Movies where McGuirk calls Erik and tries to arrange a get-together with him and all their other friends. Erik, looking for an excuse to not go to said get together, lies and says he is looking at his schedule and can't find any free dates. McGuirk then reveals that he is looking in through Eric's window and doesn't see the schedule Erik is talking about.
* Home Movies - while on a field trip to a hotel, the kids sneak off and shoot a movie on location. They're filming in a room when the lodgers come back - Brendon and Melissa hide in the closet, but she gets so anxious and keyed up that she bursts out the door screaming. Jason is found, in costume, sitting on the toilet and demanding some privacy.
* Home Movies - YTV aired the first two seasons with a PG rating, while Teletoon afterwards aired the show with an 18+ rating despite no difference in content.
* Home Movie: The Princess Bride, is the final actor to play the Grandfather, and passed away three days after recording his scene, the day the series premiered. The series as a whole is dedicated to his memory.
* Home Movie: The Princess Bride precisely, takes on a darkly humorous bent considering that this series was shot remotely in quarantine during the COVID-19 pandemic, when everybody was urged to wear masks in public.
* Home Movie: The Princess Bride several years late, or old-school YouTube content from the mid/late 2000s.
* Home Movie: The Princess Bride's turn as Humperdinck, which has him for the scene where he rides up on horseback to send Westley to the Pit of Despair. Except

instead of a horse, Oyelowo rides up in a golf cart, and exits stage left by putting the golf cart in reverse and backing out of frame.
* Home Movie: The Princess Bride supposed to be a home movie. For the scene where Westley and Buttercup roll down the hill, a stairwell stands in for the hill, and the characters are substituted with garbage bags loosely stuffed with some other clothes for weight and volume, "dressed" in the characters' costumes, and then tossed down the stairs with their dialogue dubbed in post. (The "Buttercup" trash bag has a blonde wig affixed to it, and the wig falls off once it reaches the bottom.)
* Home Movie: The Princess Bride: Tom Lennon plays Prince Humperdinck during the initial search on horseback for Buttercup soon after Vizzini kidnaps her. In true "kids making a home movie" fashion, the horses are replaced with the family dogs, held up to his chest so it's like he's leaning forward over the horse, as he crouches and replicates a horse gallop.
* Home Movie: The Princess Bride, which was created to raise money for the World Central Kitchen during the COVID-19 pandemic. Director Jason Reitman instructed all of the actors to "think like kids" for their respective segments, leading to the scrappy "kids' home movie" feel of the production.

* Home, Oh makes a few modifications to Tip's car so it can fly, which apparently made it semi-sentient, as its expression is shown to change occasionally.
* Home, Oh mimics Tip and refers to Lucy as "Mymom," because the concepts of a mother and families are alien to him.

* Home on the Range: Alameda Slim's plan is this overall. He is out for revenge not by killing people, but instead by driving the people he worked for out of business. He uses his unnatural yodeling to steal a farm's main source of income, cattle, and sells the cattle on the black market. He then waits for the farms to go up for auction and uses the money from the cattle he sold to buy the foreclosed farmland.
* Home on the Range, Buck the Horse implies someone had been taking stupid lessons from the villain's buffalo, Junior. He then feels someone snorting down his back, and sees Junior.
* Home on the Range films at the time, resulting in a messy film that is generally considered one of Disney's weakest works.
* Home on the Range got a PG for this one line alone, right around the time the G-rating was falling out of fashion:

* Home on the Range has an animated short part of its continuity called "A Dairy Tale" where Mrs. Calloway tries telling a story about the three little pigs. All the other farm animals keep interrupting her and pretty much derail it before she even gets to the wolf blowing houses down. She's initially angry at them, but the piglets she was telling the story to said it was awesome, and she changed her tone right away.
* Home on the Range has gotten this from viewers who see it as the catalyst for Disney backing out of traditionally-animated films, if not killing off the commercial appeal of them altogether.
* Home on the Range, Mrs Calloway fends off an amorous steer’s offer of protection from Alameda Slim thusly, “You have exactly ten seconds to remove your hoof before I snap it off at the knee.”
* Home on the Range: Rico is this for Buck after it's revealed that he's been Alameda Slim's lackey all along.
* Home on the Range showed that Slim was going to use the cows as an army in a hostile takeover plan to become the next president of the United States. This was cut because the people of Disney believed that it was too silly. However, genuine fans of the film have gone on record saying that they would've liked how this idea played out and that it would have actually been fitting since the movie itself has a rather silly tone to it.
* Home on the Range, which effectively removed a clear motivation for the villain — to sell the cows for slaughter — so that McDonald's (a hamburger chain) would collaborate with Disney on a Happy Meal promotion.
* Home on the Range, you'll notice that it has a decent fanbase who compare it to Disney's films from the '40s and '50s.

* Home on the Strange shows Tom and Karla spending multiple strips arguing about whether a bear or a shark would win if fighting in a tank half-filled with water.
* home, or being used as a business-place. The second is how magical the creature is. A wizard can enter any home uninvited without damage, but their magical abilities will be weakened while in there. Creatures like demons use bodies of magical ectoplasm to exist in the world and so trying to enter uninvited disrupts their magic, weakening their abilities much more than wizards, and can destroy their bodies entirely. The strength of the threshold determines how severe this effect is.

* Home Porn Movie: A couple have a homemade video of themselves having sex.
* Home Porn Movies without having to develop film with setups for recording and playback that were much less cumbersome than with 8mm film.
* Home Porn Movie: Two characters film or photograph themselves naked and/or having sex.
* Home Quarters Warehouse used a (slightly) product-specific reworking of "Rescue Me" by Fontella Bass which worked "HQ to the rescue" into the refrain.
* Homer’s relationships with Bart and Lisa are an interesting example of this because, while Homer clearly prefers Lisa to Bart, he spends more time with Bart because he is the one he has the most in common with and is the most willing to go along with whatever ill advised thing he’s doing that week.
* Homer abhors Ned Flanders, out of both jealousy for his good lifestyle and popularity as well as his insufferably pious and goody goody demeanour. Ned was almost always jovial and kind in return, though by later episodes starts showing some mutual contempt after everything Homer does to him.
* Homer accidentally jettisons the two presidential candidates out of Kang and Kodos' ship in a Treehouse of Horror episode.
* Homer acquires one of these (made up of elderly female opera fans!) in
* Homer Alone" has Homer looking after Maggie, while Bart and Lisa are at Patty and Selma's apartment and Marge is at a resort following an arrest for obstructing traffic.

* Homer Alone" has Marge going through a very particular hectic day. She had to drop Bart and Lisa off at school after they missed the bus, had to get Homer's bowling ball fixed, and is annoyed by the radio station playing a cruel joke. What sets her off is Maggie spilling milk all over Homer's newly-cleaned outfit.
* Homer Alone"; whilst Marge is away on vacation, Maggie runs away. Marge calls home, and Homer takes the opportunity to find out what her reaction would be if the dog ran away. Marge is upset. Homer finds this discouraging.
* Homer also had a similar one in reaction to Mr. Burns asking "Who the devil are you?" in Who Shot Mr. Burns Part One.
* Homer also has an Enemies List, according to the Season 6 episode "
* Homer also has "Save me, [person who isn't there]!" Examples include "Chaka Khan, Chaka Khan", "Jebus", "Superman", and "Tsisnajini".
* Homer also makes for a great opera singer while he's horizontal. Also a great painter. Both on the same episode.
* Homer also proves to know less than he boasts, particularly in the episode "Homer Goes to College," where he interrupts a professor's lecture on a proton accelerator; the teacher finally asks him to demonstrate because he
* Homer also shows signs of this one. For example, this exchange in "
* Homer also tears up in the episode "Saturdays of Thunder" when he's on hold with the National Fatherhood Institute and "Cat's in the Cradle" starts playing.
* Homer and Apu", he corrected Apu on the nature of karma, using somewhat more complex words than usual in this scene.
* Homer and Apu travel to India to meet the head of the Kwik-E Mart, only for Homer to accidentally ruin Apu's chance of getting his job back.
* Homer and Bart fleeing an angry mob in a parade float that tops out at 5 m.p.h. in "Bart's Inner Child".
* Homer and Bart get whacked by this trope again in "Bart vs. Australia". Bart mistakes a "Rand McNally" logo on his globe for a country, causing Lisa to mock him: "In fact, in Rand McNally, they wear hats on their feet and hamburgers eat people!" Later, Homer looks at the globe, spots Uruguay, and laughs and says "Look at this country! 'UR Gay'!
* Homer and Bart join the crew of a fishing boat. While at sea, they are caught in a heavy storm. When the boat crests a huge wave and begins a precipitous drop, everyone screams for a few seconds,
* Homer and Flanders both lost a bet over a children's miniature golf tournament, forcing each to mow the other's lawn while wearing their wives' best Sunday dress. (Flanders, in what is probably a moment of
* Homer and Jasper's wheelchair race in "The Two Mrs. Nahasapeemapetilons". Unlike most examples of this trope, it is shot to appear as a high speed chase... only for Homer to jump out of the chair and jog to the dining room.
* Homer And Jethro sing a song about a man who never gets Maggie alone. Every verse ends with a punch line:
* Homer And Jethro, "Someone get a hammer there's a fly on Papa's head."
* Homer And Jethro's "The Battle of Kookamonga" has this line: "We learn to make sparks by rubbing sticks together." In a live performance, they flubbed the last occurrence of the chorus line as:
* Homer and Langley Collyer, while Homer, who had gone blind some years earlier, was trapped by the rubbish and slowly starved to death.
* Homer and Marge, although Marge's attractiveness has been played up over time and Homer has usually been shown as rather average-looking in his younger years when he started dating Marge. The episode
* Homer and Marge Turn a Couple Play", Homer is heading to a ballgame with his family, then proceeds to yell out that he's selling the tickets when a cop walks by.
* Homer and Selma had to fake marriage in order for Selma to be allowed to adopt a child from China. Apu and Marge did the same for Apu to get out of an
* Homer are considered universal pillars of literature and storytelling.
* Homer as a high school student skipping English class in 1974 in "The Way We Was": "English? Who needs it? I'm never going to England! C'mon, let's go smoke!"

* Homer, as a prison snitch, gets things like a plasma TV, a "Snitch Life" bling chain, and even a Segway from his "Mother".
* Homer as if they were. Homer is still admired as the first iconic writer/poet of all time and his legacy survived many centuries.
* Homer attempts it in another episode, but trails off after "then comes", muttering to himself "Dammit, I
* Homer at the Bat, based solely on the fact that he claims to be from there), they're right that the old "one phone call" isn't a thing.
* Homer at the Bat), but Canseco's then-wife, Esther Haddad, objected. Al Jean admitted that he found him to be intimidating.
* Homer at the Bat". During the episode, Smith visits the "Springfield Mystery Spot" which turns out to be some kind of interdimensional portal. Smith said in an interview years later he'd like to do another guest appearance so he can get out, as for all we know he's still hurtling through time and space, snapping pictures of weird stuff floating by.
* Homer at the Bat". He disliked the character model they came up with for him, and both he and his wife at the time objected to the original reason he misses the final game (waking up late in bed with Edna Krabappel), and Canseco basically intimidated the showrunners into changing his character's appearance and part in the show.
* Homer at the Bat, Mr Burns tells Smithers he as 24 hours to find him major league baseball players for his team.
* Homer at the Bat", Steve Sax is pulled over by Eddie and Lou for speeding and ends up being charged for every unsolved murder that's ever happened in New York, with the only evidence they have being that he is from New York.
* Homer at the Bat", there is the "Springfield Mystery Spot", a shack attraction ("Where logic takes a holiday and all laws of nature are meaningless"). Ozzie Smith goes into it and...
* "Homer Badman": Homer tries to salvage his reputation on public access television, and the technician
* Homer Badman", where, at the candy convention, Homer sees the stunning candy which will eventually get him in big trouble:
* Homer buys a gun and uses it for such things as opening a can of beer, turning off lights, and turning on his TV (complete with a Mook from a Western falling off a roof at that exact moment). He becomes a member of the local gun club, and despite how trigger happy they are, even they are horrified at his total lack of responsibility and expel him immediately. By third-act, Marge takes the kids and moves out of the house until Homer can learn to control himself. Considering all the things she's put up with from him, this actually says quite a lot.
* Homer caused similar trouble with the garbage men in 'Trash of the Titans', and with the bag boys union in "Simpson Safari".
* Homer converses with his brain several times. They generally have an antagonistic relationship. ("Shut up, brain, or I'll stab you with a Q-Tip.")
* Homer decides to start running at night, next scene has him already crawling due to exhaustion and stops in front of a mailbox... the one of his neighbor Flanders.
* Homer Defined": Having failed to pay attention to his training, Homer resorts to the "Eeny, meeny, miny, moe" method to press the right button to avert a reactor core meltdown, saving Springfield. After being hailed as a hero and brought in to the Shelbyville nuclear power plant to give a speech, he uses the same technique to stop a meltdown at their reactor as well (at which point it is discovered that his heroism was just dumb luck).
* Homer did a variation in the beginning of one episode, where the entire house was covered in waterfalls before running out of the house to go to Moe's, although in this case, we actually
* Homer dies of a heart attack when Mr. Burns fires him. His ghost decides to come back from the dead when he hears Mr. Burns tell Smithers to send a ham to Marge as consolation. However having come back, Mr. Burns cancels the ham.
* Homer, digging around for a lost peanut under the couch in season 5's "Boy-Scoutz N the Hood": "Ow, pointy! Eww, slimy! [Scream]! Moving!"

* Homer does it again in the episode when he helps redecorate Moe's bar.
* Homer doesn't lose his job as frequently, but it's happened enough to notice, and Mr. Burns has as lax a set of criteria for firing employees as his predecessors (never mind the fact he can never seem to remember Homer long enough). This has been
* Homer does this at the beginning of "Homer the Moe" after he attempts to dig a hole with Bart and tires out after only a few seconds.
* Homer does this by accident when trying to hit the jukebox and make it start playing a la
* Homer does this in an ill-considered comedy performance for Mr Burns' birthday in "
* Homer does this in early episodes when he spits mouthwash on the mirror.
* Homer draws bunny faces on electrical sockets to scare Maggie away from touching them. When Marge points out that Maggie's not scared of rabbits, Homer replies "She will be."
* Homer dreams of being tried by a jury of donuts. He ends up taking a bite out of his Defense Attorney. It doesn't help his case.
* Home re-fi commercials on radio use this ad nauseum. Once they get to a pivotal point of the pitch, a record scratch is used before the announcer delves into the product in question.
* Homer empties an entire can of lighter fluid on the grill, and then gets a second can and adds some more. The resulting fireball could be
* Homer envisions what would happen if he used his new gun to rob Apu's store.
* Homer even manages to do a variation where he doubles the punchline.
* Homer exchanges his American dollars into Japanese yen, he (and the rest of the family) thinks that everything in Japan is very expensive because of the large prices. In reality though: 100 yen is worth about 1 American dollar. This doesn't stop Homer from buying what he calls a "50 dollar pretzel."
* Homer experiences the other side of this trope with Frank Grimes, who hates Homer's guts, while Homer thinks they're friends, but only in the first act. And then his son, who takes revenge on Homer, "How is old Grimey?"
* Homer followed his coworkers to the Stonecutters' headquarters. He gets inside by falling through the skylight and is instantly surrounded. They declare that he has seen too much and must pay "the ultimate penalty". So they toss him out the front door.
* Homer, following the siege of Troy, the Trojans took the armor off dead Greek warriors and put them on in an inevitable resistance. Any poor Greek who thought he was joining his allies was racing towards his own death.
* Homer gave tips to Bart on how to avoid jury duty. "Just say you're prejudiced against all races."
* Homer gets all enthusiastic about the napkin dispenser in a 1950s-style diner, acting like it was some fantastic antique. Lisa tried to point out that they have those in modern restaurants but to no avail.
* Homer gets his tongue stuck to the ice sculpture at Otto's wedding.
* Homer gets one in "Home Sweet Homediddly-Dum-Doodily" when Flanders is about to baptize Bart.
* Homer gets so annoyed he proceeds to punch his liver. With rather obvious consequences.
* Homer goes as far as suing the owners of a seafood restaurant with an all-you-can-eat buffet because they threw him out after closing time, even though he hadn’t yet had “all he could eat”. Marge is dragged along through the whole ordeal against her will and much to her embarrassment.
* Homer Goes to College", after an accident with a proton accelerator while at college, Homer was assigned some outside tutoring by the Dean. Homer decides to get revenge by prank calling the Dean:
* Homer Goes to College", after Homer causes a meltdown in class when the professor asks him to demonstrate how a proton accelerator works. The clean-up crew arrives to stop the problem:
* Homer Goes to College" features a deliberate case, where a nuclear physics

professor introduces himself with the joke "Out with the old, in with the nucleus!", which manages to get a laugh from everyone in the class (except Homer, who doesn't get it). Then when the professor drops his papers, Homer laughs uproariously for a good fifteen seconds, being the only one in the room to do so.
* "Homer Goes To College" features the infamous "The rock tumbler or the TV?" scene during the episode of
* Homer Goes to College", he left the classroom to chase a dog, running merrily around a tree.
* Homer Goes to Prep School about how whenever Homer leaves they go into stasis... and then they all sit immobile in silence for about 3 seconds before it cuts to Homer.
* Homer: "Good news, everyone! I got in a fight with the garbage men and they're cutting off our service!"
* Homer had a few actually, including this one from "Homer the Heretic":
* Homer has a fantasy about a roast pig that involves said dish removing the apple from its mouth, shaking its behind and cheerily proclaiming, "The best meat's in the rump!"
* Homer has also torn and spilled chocolate on the US Bill of Rights
* Homer has a recurring flashforward to a nightmarish future where he's a member of Skull Crushers Local 521 and his group protests against
* Homer has had several humorously out of character Smart Ball moments, that showcase his stupidity at the same time. In "
* Homer has managed to attract several bombshells over the course of the show of the time.
* Homer has shown some elements of being a Stage Dad, but more for Lisa than for Bart. The biggest example is "A Star is Torn", where he manages Lisa in a talent contest and bullies everyone behind the scenes to help her win. But in his first such appearance, he
* Homer has trouble making a connection with his employee benefits and his family's needs:
* Homer. Hector was an honorable man and considered a worthy foe by many of the Achaean heroes fighting at Troy. Achilles had no such feelings for the man; he spent the early parts of the war pissed at his own leaders and the later parts in nothing less than a homicidal rage toward everyone after Hector killed Patroclus, and spent a lot of time and effort trying to desecrate Hector's corpse. Although he did relent after he'd taken his revenge and cooled down a bit. Achilles actually seemed to think more of Hector's father, Priam, as a worthy opponent (in the overall war) when the latter came to beg for his son's body for proper burial. Achilles agreed to allow Hector the honor he deserved, but Priam's love for his son and his bravery in coming alone to the Greek ships also got to him.
* Homer himself, despite being famous for his bumbling ways, is capable of almost oddly remarkable talents when the episode calls on it, and is consistently shown to have a professional standard ability with the piano. Homer has been seen speaking Japanese, Chinese, Spanish, and
* Homer himself impersonates the Terminator in "Principal Charming", as he uses
* Homer himself is a particularly extreme example from "My Mother, The Carjacker":
* Homer himself. One Season 1 episode had Homer get plastered in mud, which resulted in him being mistaken for Bigfoot. He is taken in for scientific examination, and after cleaning of the mud and a series of extensive studies, the conclusion was that he
* Homer himself played it quite straight when he became CEO and overthrew Mr. Burns until he realized that he was missing out on his family and gave up the position. (Burns has a seemingly heartfelt conversation with Homer about the time running the plant costs someone, only to hit him with a tranq dart and attempt to wall him up in a mausoleum. Being as frail as he is, he's barely finished a row of bricks by the time Homer wakes up. The bemused Homer puts a blanket on Burns's shoulders and walks off while Burns continues to add bricks.)
* Homeric mentions the dispute between Ajax and Odysseus for the right to Achilles' arms, after the two had brought Achilles' body back to the Greek camp after

Achilles' death.
* Homer in "The Boy Who Knew Too Much." He stalls the verdict in order to keep staying in the hotel where the jurors are sequestered, unknowingly giving Bart time to agonize over whether or not he should admit he skipped school and saw the alleged "crime".
* Homer in "The Last Temptation of Homer": "Another day, another box of stolen pens."
* Homer. In this case, a spell was actually placed on the land so that Odysseus wouldn't recognize his homeland until he asked someone where he was.
* Homer is a member of the International Brotherhood of Jazz Dancers, Pastry Chefs, and Nuclear Technicians.
* Homer is a pretty good example of this trope. Though he's usually fairly exuberant, he's attempted suicide at least three times in the series, and during the early seasons, was often shown to be insecure about the way he looks, not to mention the stress related to his job. In the modern episodes, Homer's childhood was revealed with his parents constantly fighting and his father taking out his frustration out on him, bringing about Homer's constant eating habits.
* Homer is awarded the key to the city in an earlier episode, but is forced to return it. He admits trying to eat it, believing it to be chocolate wrapped in tinfoil.
* Homer is brought to tears when he attends a hotel that trusts him enough to leave the batteries in the remote.
* Homer is frequently shown to be stupider than his own brain, and frequently argues with it, to the point where in "Boy-Scoutz 'n the Hood" Homer has to ask his brain to explain how money is more useful than a peanut.
* Homer is hired by Mr. Burns to help him write an important speech. At the time he was hired, Homer had been using medical marijuana and found everything funny. Since he was clean now, and no longer found Burns funny, Marge suggests Homer
* Homer is in one episode about to quaff a beaker of acid, but it's knocked out of his hand by Frank Grimes. It splashes all over the wall, creating a hole big enough to drive a car through. Grimes is then chewed out by Mr. Burns for destroying the wall. And for wasting his priceless acid.
* Homer isn't the only character sensitive to lost food. In "Bart Gets Famous", we learn Kent Brockman really loves his danishes. When Bart swipes Brockman's Danish (
* Homer isn't the only person to walk in the win on an HBP: an episode of the obscure sitcom
* Homer is often forgetting about Maggie. Sometimes he just refers to her as "the baby", sometimes he forgets about her completely.
* Homer is so stupid that his inner self is usually shown as similar to those
* Homer is stalked by Julia, a gorgeous black-haired woman in an episode of
* Homer is tormented by multiple floating heads of Mr. Burns on his drive to work, upset because Burns can't remember his name. He stops concentrating on the road while yelling at them, and they advise him to look out while he crashes through the gate.
* Homer, is vengeance against the Greek commander Agamemnon for taking his trophy wench. His withdrawal from the fighting (and the subsequent plea to Zeus to give victories to the Trojan cause in Achilles's absence made at his behest by his mother) leads to his cousin's demise.
* Homer is virtually incapable of remembering holidays, and will invariably resort to this for almost every occasion;
* Homer J. Simpson once asked if it's weird to have fantasies about Cleatus the Fox Sports Robot. He adds that it's for a friend, "a friend called Moe".
* Homer: "Lisa, if you don't like your job, you don't strike: you just go in every day and do it really half-assed. That's the American way."
* Homer loses his temper and shakes him shouting "Homer Simpson! My name is Homer Simpson!" before security guards drag him out.
* Homer loses the Employee of the Week award to an inanimate carbon rod, and does not receive a Town Pride Award, which everyone else gets.
* Homer Loves Flanders": Flanders drives Homer to a sports game. When Homer notices

Lenny and Carl he pushes Flanders' face down out of sight because he is afraid of being seen with him. Carl notices Homer's car is driving without a chauffeur and assumes he's driving "one of those robot cars." As the car crashes Lenny sarcastically remarks: "One of those AMERICAN robot cars."
* Homer manages to get his head stuck in a beehive, then coat the beehive in blueberries, and then roll around, tangling himself up in the green picnic blanket. When he stands up, he looks like he is impersonating Marge. (He even lost his voice from yelling, so all he can make are scratchy noises like Marge makes.)
* Homer manages to pass himself off as a Marine to a former Marine, and almost loses it when he says "Semper Fudge", prompting the guy to ask "Did you just say 'Semper Fudge'?" and Homer to respond "No, I said the right thing".
* Homer murders the manual transmission of a truck in "Maximum Homerdrive".
* Homer must climb Mount Murderhorn (a gigantic mountain that is said to be worse than the Everest). One
* Homer, Odysseus survives a shipwreck while the entire crew dies, courtesy of divine retribution.
* Homer once drove a Pizza Hut out of business by abusing their "Free Soda Refills" policy.
* Homer once needed flowers for a float, and so he picked Ned's garden clean.
* Homer. One of the finest examples of enemies united in grief in the history of literature.
* Homeroom teacher Kinshiro Morooka, aka "King Moron," seriously needs a dentist. Possibly a dentist with a hacksaw. He also bears a striking resemblance to Steve Buscemi, which just makes things worse. (His replacement, Miss Kashiwagi, is not exactly a gonk, but is a
* Homerpalooza", Homer embarrasses his kids with his taste in music, which hasn't changed since his teen years in the 1970s. A flashback reveals that he felt the same way about his own father, who gives him a dire warning:
* Homer, Patrocles's funeral — and Hector's, once Achilles gave it up.
* Homer Price Dulcey Dooner claims to be Secretary-Treasurer of the Sign Putter Uppers Union. It's pretty obvious from context that he invented it on the spot to get paid more for putting up street signs.
* Homer Price stories, "Michael Murphy's Musical Mousetrap", is about a man who's spent 20 years in the mountains designing and building a better mouse trap. It doesn't quite work as planned.
* Homer Price story, the town hires a pied piper type who uses a mechanical contraption to play the music in order to lead mice out of town. Homer and his friends decide to follow along and see what happens, but since Homer has all the kids stuff cotton in their ears so they won't hear the music. Despite this, when the adults see the piper with a gaggle of kids following behind they fear the worst.
* Homer Price the actor who plays the "Super-Duper" in movie serials makes an appearance at the Centerburg theater and Freddy asks if he could do some horseshoe bending or flying for them. Disillusionment sets in later when the actor's car ends up in a ditch and needs to be towed to Homer's father's filling station.
* Homer puts a trick ice-cube (featuring a fly in the middle) in Dr Hibbert's drink. As Homer recalls it, it was frightfully droll and the toast of the high-brow evening Marge had planned. In reality, however, Dr Hibbert doesn't find it amusing and instead points out the ice-cube contains dangerous chemicals, and the night goes downhill from there.
* Homer says this word for word at the beginning of "The Wettest Stories Ever Told", when he figures out the pattern of the wall decor and Lisa points out a break in the pattern.
* Homer's Barbershop Quartet drives past for the sole purpose of pointing out that it's already been done. Of course, the entire episode is a riff on the career of the Beatles, so pretty much everything that the B'Sharps did had been done before.
* Homer's Barbershop Quartet for DMR, making the joke pointless since the original line-up came back together in early '00s.
* Homer's Barbershop Quartet", Homer wins a Grammy thanks to inspiration from

Marge's purchase of a then-trendy "Baby on Board" sign for the family car. ("Now people will stop intentionally ramming our car!")
* Homer's Daughter is based on Samuel Butler's theory that the Odyssey was written by a young woman, who based it on her own realistic experiences, and based the character of Nausicaa on herself.
* Homer's "D'oh!" was scripted as "(annoyed grunt)", and still is to this day, even when it renders episode titles (like "E-I-E-I-(ANNOYED GRUNT)") nonsensical.
* Homer sees a US Marine guarding the American embassy in Australia and, apparently confusing him for a
* Homer's Enemy", Bart combines a swivel chair and a fire extinguisher for some real fun.
* Homer's Enemy", Frank Grimes has a breakdown and starts impersonating Homer, whose consequence-free stupidity drove him to this point. This ends when he has a moment of genuine stupidity and electrocutes himself. Unfortunately, the same rules don't apply to Grimes and this mistake costs him his life.
* Homer's Enemy In real life, children are mandated by law to go school, and child labor would prevent a four-year-old from being made to work.
* Homer's Enemy" involving Frank Grimes: "the man who had to struggle for everything he got in life."
* Homer's Enemy, Moe angrily snatches the list back and adds his name to it.)
* "Homer's Enemy", wherein hardworking Frank Grimes, who has had to struggle his way through life, learns that incurably lazy Homer has, among other accomplishments, met ex-President Gerald Ford, toured with a rock group, and been to outer space:
* Homer's Enemy" which centered on the conflict between Homer and a new co-worker, Frank Grimes (a hard-working professional whose ethics conflict with Homer's gross inepitude and poor social graces). Eventually, Frank is killed after touching live electrical wires, and at the funeral, Homer falls asleep and mutters "Marge, change the channel!" The other funeral-goers and even Rev. Lovejoy to burst out laughing, and inspires Lenny to remark "That's our Homer!" The tombstone simply has "Grimey" written on it, Homer's nickname for Grimes which he himself despised; Lovejoy also referred to Grimes as "Grimey," as though he accepted the name with affection.
* Homer's father, Abraham "Grandpa" Simpson is a pretty strong example. He was old enough to serve in
* Homer's favoritism rather than actual chauvinism. They eventually realize their relationship is more important and make peace without deciding a winner.
* Homer's first European Spanish voice, Carlos Revilla, passed away in 2000. To solve this problem, Carlos Ysbert was called in to keep the dub alive. This was made worse by Ángel Egido (Abe and Smithers) also dying, and Pedro Sempson (Mr. Burns) and Eva Díez (Milhouse) retiring around the same time. And worse still, Revilla was also the localization director, so the whole voice acting suffered his absence as a result.
* Homer's first "Mr. Plow" ad, which aired at 3:17 AM on Channel 92 and featured
* Homer's "food sense" is so pronounced he can smell the letters on a birthday cake and
* Homer's heart attack in "Homer's Triple Bypass" is also considered a highpoint in the series.
* Homer Simpson camps for some Springfield Isotopes tickets, and is pleased when there's only one person ahead of him in line (despite a random man telling Homer that he could have saved himself the trouble by actually going to work and earning the money to buy the tickets ahead of time). However, that person proceeds to buy every one of the 30,000 tickets, despite only having ten dollars.
* Homer Simpson does this a lot, like playing with the adjustable hospital bed in "Homer's Triple Bypass": "Bed goes up, bed goes down! Bed goes up, bed goes down!"
* Homer Simpson gets passed over for an "Employee of the Week" award to an "inanimate carbon rod". Later in the episode, he stuffs another inanimate carbon rod in a space shuttle door to prevent a Columbia-like disaster, but instead of being heralded a hero, the carbon rod he stuck in the door gets a parade.
* Homer Simpson himself became one after a video of one of his rants went viral

and was hired by a news channel. He became so popular he convinced people to wear gravy boats on their heads and almost endorsed
* Homer Simpson). In the Halloween episodes, he is often seen killing others because of his idiocy.
* Homer Simpson in their crossover episode. In fact the only other person who can come close to Jay's skill is author Eudora Welty.
* Homer Simpson in the year 1974, to his cynical father: "No way, man! We're gonna keep on rockin' forever....forever....forever....
* Homer Simpson is rather off-put when he gains a personal enemy in the appropriately-titled episode "Homer's Enemy". Moe tries to comfort Homer by saying that there are people who don't like him, too. Homer refuses to accept this. Meanwhile, the aforementioned enemy is later off-put himself
* Homer Simpson is the king of this trope. He goes through everything from falling off a cliff (twice), to slamming into a tree in his car, suffering from skiing incidents, waterfall plunges, animal maulings, getting shot by a nailgun, amateur brain-surgery, amateur heart surgery, and
* Homer Simpson is the leader of a small crowd of such characters from
* Homer Simpson needs to go to pee really badly after drinking way too much crab juice. He clutches his hands between thighs and starts hopping. Moments later he's desperately rolling about the bonnet of his car and pressing his legs together. He also hops up and down in the elevator as he tries to reach the bathroom.
* Homer Simpson's cognitive deficits vary from season to season and even fluctuate episode to episode — in some cases, he comes across as
* Homer Simpson's "D'oh" in itself was borrowed from somebody else, namely actor James Finlayson from the
* Homer Simpson shouldn't be working as an inspector at the Springfield Nuclear Power Plant. He's grossly incompetent, monstrously stupid, and frequently leaves his job to pursue insane "lifelong dreams" and spur-of-the-moment opportunities. Yet no matter how badly he screws up, even if he leaves, even if he's
* Homer Simpson's mother was based on a member of the far left group The Weather Underground.
* Homer Simpson, when trying to give advice to his children, is an endless source of these.
* Homer Simpson who haven't been able to order pizza because they're assumed to be pranksters.
* Homer Simpson, who is typically a dumb oaf at the best of times, is a respected military commander, raising valid concerns about communicating with the Martians. He also takes action to have Bugs arrested when it turns out Bugs is working with the Martians, though this doesn't amount to much.
* Homer's liver once cheered when Homer thought he had to stop drinking. Homer angrily punched his liver to shut it up... then doubled over in agony
* Homer's "Mmmmm... [food item or something that sounds like one]..." *gurgling sound*
* Homer's Night Out by Marge shouting "Why, you big...!" and trying to strangle Homer.
* Homer's Night Out etiquette towards exotic dancers which would make a fine moral on its own: don't touch them, don't insult them, and pay them fairly. Another unintended moral is "Don't take a picture of people in a compromised position without their consent," since it was Bart's photo that started the whole mess in the first place.
* Homer's Odyssey", Bart is being disruptive during a field trip and Mrs. Krabappel punishes him by making him sing "John Henry Was a Steel-Drivin' Man" in front of everyone on the bus. This is intended to humiliate him, but he sings with great enthusiasm and obviously enjoys it, to the point that Mrs. Krabappel has to yell at him three times before he reluctantly stops the song.
* Homer's Odyssey" while the Simpsons visit city hall, Chief Wiggum reports on the roving graffiti artist "El Barto" and distributes a sketch of him which looked like a mean, teenage version of Bart. Homer's response: "Wouldn't want to meet him in a dark alley," completely oblivious to the fact that it's his son.

* Homer's Phobia and having him be the one who allegedly influences Bart.
* Homer's Phobia (though the Aesop of "Gay folks are no better or worse than straight folks and don't always follow the camp or overly macho stereotype" is a good message that needs to be taken to heart).
* Homer squirts way too much lighter fluid onto a barbeque, to the point it becomes an
* Homer's reaction to Flanders saying he has a home business in "Das Bus":
* Homer's "stupid Flanders" has changed on occassion to add another adjective: "stupid sexy Flanders", "stupid best friend Flanders", "stupid misleading silhouette Flanders"...
* "Homer's Triple Bypass" averted this trope by giving Dr. Nick Riviera the perfectly functional phone number 1-800-DOCTORB ("The B stands for 'bargain'!"). However, this number belonged to a real doctor, whose lawyers objected; the area code was changed to 1-600 for all future broadcasts.
* Homer's Triple Bypass" has a flashback where Grandpa Simpson is in a church listening to Homer, as a young boy, singing in a church choir. Homer's voice then suddenly switches from a high-pitched youthful voice to his normal deep one and his singing goes from sounding good to sounding terrible.
* Homer's Triple Bypass", Homer gets out of a diet by claiming to spot a bug in the oatmeal Marge prepared. Later, while he's eating something he likes to eat, when Bart points out there's a bug in it he doesn't really care.
* "Homer's Triple Bypass", Merry Widow Insurance Company has a neon sign featuring a widow happily dancing on her husband's grave while holding money.
* "Homer's Triple Bypass" not only has Homer giving multiple wild takes while having a heart attack, but the scene
* Homer's "Why you little!" changes in "Home Sweet Homediddily-Dum-Doodily." He gets upset at Cletus and shouts, "Why you cotton pickin'!"
* "Homer the Great" showed Homer's commute to work; several miles over a heavily-trafficked highway, a gridlocked detour, a huge, full parking lot with the only remaining space being at the very far end next to the chain-link perimeter fence...abutting his own backyard. Annoyed Grunt!
* Homer the Great"), Soloflex, Bart (listed as "the boy"), Stern Lecture Plumbing (the plumbing company from earlier in the episode), and Econo-Save (the company that makes the stool that just broke under Homer's weight).
* Homer the Great" when Homer becomes the leader of a Stonemasons-style secret organization and decided that the best way to use his new-found power was to get a bunch of monkeys together and re-enact the Civil War.
* Homer the Great", where Homer takes the Stonecutters' Oath, which says that if he violates the organization's trust "may my stomach become bloated and my head be plucked of all but three hairs". Moe interrupts, saying that he thinks Homer should have to take a different oath, but Number 1 insists that "Everyone takes the same oath."
* Homer the Heretic episodes, it was quite adamant about showing Springfield as a multi-cultural town of many different faiths, favorably depicting Krusty's Jewish faith and Apu's Hindu faith alongside the Protestant Christian Simpsons.
* Homer The Heretic", Homer tries to exaggerate the value of the loss:
* Homer the Moe borrows Homer's "Mmm, [food item]..." while eating tofu turkey, saying "Mmm, curds..."
* Homer, the oldest written examples of many tropes. Homer himself was blind and illiterate, so his works were transmitted by oral tradition.
* Homer the Smithers, he pours some cereal and milk, and even it catches fire. Earlier in the episode, Homer tries to ask Smithers what to do in case of fire, but Smithers can't hear him. Homer turns his head to discover that Mr. Burns is actually on fire. He doesn't know what to do, so he just quietly says, "D'oh!"
* Homer the Smithers He thanks Homer for this just as Smithers is coming back, and Smithers ends up fired. Eventually, Homer injures Burns again and thus Burns relies on Smithers once more.

* Homer the Vigilante who unapologetically bulldozed an orphanage to build a plastic surgery clinic. Lou points this out to Wiggum, but he doesn't want to hear it.
* Homer throws Mr. Burns off a balcony into a crowd of people. Burns is promptly crowd surfed before being shoved into an idling taxi. Homer thinks this looks like fun, jumps off the balcony, and ... is crowd surfed as well, suffering no
* Homer: (to another hooked smiler) "What the hell are YOU smilin' at?"
* Homer, to Bart and Lisa: "Are you kids hugging the TV?". That said, Homer himself seems to be a little too attached to the TV as well, describing it as his "secret lover" in a "Treehouse of Horror" and listing it as a member of the family alongside Maggie and the family pets in another one.
* Homer To The Max", after Homer is embarrassed at a bumbling TV character sharing his name, he changes it to the decidedly more respectable "Max Power". When complimented on his new name, he replies "Thanks, I got it off a hair dryer."
* Homer to the Max", Homer is teased because of a buffoonish TV character with his own name. He goes to the show's producers and begs them to "please leave my dignity!" His impassioned plea is undercut when he walks face first into a cactus on his way out. Later in the same episode, Homer's co-workers are watching him work in the hopes that he will do something stupid and entertaining. He looks back at them and says, "Well, I'm sorry to disappoint you gentlemen, but you seem to have me confused with a character in a fictional show." He then proceeds to knock over a fondue pot on the console and causes unspecified (but presumably very serious) problems in other cities' power plants. In a third scene in the same episode, Homer's friends at Moe's Bar mock him. He attempts to leave in a huff and flings his scarf over his shoulder — it catches in a fan on the ceiling and whirls him around like a rag doll then flings him out the door.
* Homer tries his own hand at this style of comedy in another episode, saying, "See, white people have names like Lenny, while Black people have names like Carl." He laughs hysterically, while no one else reacts.
* Homer tries to remember the fire safety plan at the nuclear power plant: "When the fire starts to burn, there's a lesson you must learn.
* Homer tries to teach Grampa this technique, complete with an explanatory song.
* Homer tries to wear a very tight girdle to fit into his Pie Man superhero costume. The poor girdle pops seconds after he puts it on.
* Homer tries to withdraw his and Marge's life savings from the bank. The banker insists that he needs both of their signatures.
* Homer turned into a gigantic, carnivorous blob as part of one Halloween episode. In the same episode, we see a 50-foot Lenny bemoaning that everyone's paying attention to Homer - except for
* Home Run Hitter, so mangaverse Naru's Megaton Punches might be literal as well.
* Homer unintentionally mutinied against the Naval Captain while part of a Naval Reserve Sub Crew (It makes sense in context). The captain had to clean out a bunch of items (specifically contraband junk food that was implied to have been belonging to Homer.) and promoted Homer to captain in his stead. However, shortly afterwards, the sub Homer was on was about to collide with another submarine (which Moe claimed was an enemy sub). Homer, when wondering what his captain said, decided on saying fire the torpedo. Unfortunately, he forgot that his captain was still in the torpedo tube, and... well... he was fired into the enemy sub, comically making an impression on the enemy sub. Similarly, the enemy sub also considered using their officer to do so (although only because of
* Home Run Solitaire features a sports announcer duo, one of whom spends the entire game making bad puns and tortured analogies. The other one asks for a score prediction when the home team is up against the Nevada Aliens.
* Homer vs. Dignity, a male panda mistook a panda costume-clad Homer for a female and implicitly raped him.
* Homer vs. Lisa and the 8th Commandment I made my choice, and I stand by it."
* "Homer vs. Lisa and the 8th Commandment" with Homer putting his foot down about an an argument with Marge about keeping the free cable.
* Homer vs. Patty and Selma", Patty and Selma are caught smoking at work and are

about to be fired. Homer, initially gleeful about this, sees Marge's distress and gallantly claims that both of their cigarettes are his and smokes them, claiming between coughs and gags that he is "in flavor country." Surprisingly, their boss buys it.
* Homer vs. Patty and Selma", where Homer is disappointed in his own actions, and ascends the stairs quietly, saying "I'll understand if you want to sleep on the couch tonight." It's unknown if she did.
* Homer Vs. The Eighteenth Amendment", after Bart gets drunk at the St. Patricks Day parade, the city is forced to reintroduce a 200-year-old law banning the sale of alcohol in Springfield. Of course, at the end of the episode, it's revealed that the law was repealed 199 years ago.
* Homer vs. the Eighteenth Amendment", the punishment for disobeying Springfield's prohibition law is to be launched out of the city by catapult.
* Homer was an important part of the heroic literature, and books of chivalry were pleased to develop it, (Amadis of Gaul has a similar scene). In that chapter, Don Quixote takes three pages to describe the forces of what he sees at two contending armies to Sancho, who only can see... two droves of sheep. Lampshaded by the author:
* Homer was banned from Moe's Tavern for spilling sugar on Moe's table as a prank, while previous pranks included Moe getting bitten by a cobra and being set on fire, which was considered funny.
* Homer was definitely trying for the look when he restyled himself as "Colonel Homer", manager of Lurleen Lumpkin in the 3rd season episode of the same name. He brings the suit out again in Season 19's "Papa Don't Leech" when Lurleen returns to Springfield.
* Homer waves his fingers back and forth when he's excited or worried.
* Homer when trying to get a health insurance form from a shredder: "Ow, my hemophilia!"
* Homer will often also subvert this whenever it's funnier for Homer to have random knowledge and sophistication when the audience isn't expecting it. A critique of the music from
* Homes also get a sort of this as any creature of Nevernever must either use mirrors or reflections to weaken the protection or be invited inside. Even wizards are weakened if they come in uninvited.
* Homescapes Austin has one with lightning when he scolds the cat for chasing his parrot Captain Flint.
* HomeSchooled: Juan the gardener has an infatuation with Dulce the housekeeper, despite the fact that they're second cousins. This disgusts her to no end.
* Homeschooled Kids one gets hinted at in a dream depicting his childhood circumstances, when his nanny seems happy that he "finally" made a friend upon noticing an intruding dream-walking Lalli.
* Homeschooled: Similar to Newcomer, the character has grown up or lived away from others. May or may not come with interesting psychological quirks.
* "Home" sees Mulder and Scully tackling a trio of murderous inbred hicks.
* Home Shopping Club Overnight Service was a spinoff of HSN as a shopping network for the things that didn't get sold on the main channel. It was renamed Home Shopping SPREE in 1989, became America's Jewelry Store in 1997 (to reflect the change that resulted in them exclusively selling jewelry) and was shortened to America's Store in 1998. The channel ultimately shut down for good in 2007.
* Home shopping networks in the Philippines would sell any item at a five or four-figure price that always ends with 995.
* Homesick: My Own Story Jean Fritz describes an incident where a Communist agitator made a speech in front of the YMCA where her father was director. Her father slipped behind the agitator and winked at the crowd until he finally figured out what everyone was laughing about.
* Home, Smek tells his people that humans are mere primitive animals, and the Boov honestly cannot understand why humans would have any complaints about being abducted from their homes and relocated to concentrated housing developments in Australia without so much as a by-your-leave.

* "Home Soil": The ship is taken over by intelligent microscopic crystals that call humans (and every other sentient being on the
* Homestar advertises his Malinko-flavored water as being "crystal clear, like domestic [American] beer".
* Homestar does not seem to wear any pants, but he does wear a shirt, shoes (
* Homestar himself could be considered this as well, seeing how his general cluelessness has often drifted into to
* Homestar is occasionally portrayed as a celebrity in-universe, and some shorts show him being used as endorsement for drinks, hosting a recurring game show, and even starring in a long-running email series like Strong Bad's.
* Homestar Ruiner, Homestar says "Ow, my snot!" after he falls out a window with the other party-goers who have invaded Strong Bad's house. The joke is that your original goal through the episode was to "Beat the snot out of Homestar."
* Homestar Runner 2014 (after a hiatus of nearly four years) featured a worn-out version of the website's "Welcome" page, with the "come on in" and "watch intro" buttons falling apart and now reading "com_ on in" and "w_tch intro".
* Homestar Runner actually begins and ends with Strong Bad singing "When E-mail Comes to Town, It's Like a Rainstorm in your Browser."
* Homestar Runner actually lives in the King of Town's grill. Occasionally, we actually get to see Strong Sad be stuffed inside the grill, and in one Strong Bad Email, there is actually a pizza parlor inside the grill, and both Strong Bad and The Cheat actually fit inside the grill.
* Homestar Runner, a fact she herself lampshades in one of the old flash games. A DVD-Exclusive toon called "Why Come Only One Girl?" touches on this subject and shows off various failed attempts to introduce another girl to the cast.
* Homestar Runner after having had nothing to eat all day but thirteen pudding pops.
* Homestar Runner, after shooting Strong Bad's computer with a shotgun: "It's in a better place, Strong Bad. Or rather, it's in the same place, but now it's got a big hole through it."
* Homestar Runner, albeit as static, accessory-less figurines.) One episode even features a classic "roll call" introduction for a new team of villains, ending on "Each one is sold separately with rifle and gear!"
* Homestar Runner. All he remembers was that step one was to steal Homestar's drink and step two was have the Cheat pee in Homestar's drink. Somehow, his plan got from that to Homestar ending up stranded in the Arctic Circle while Strong Bad somehow has a satellite feed of Homestar drifting on an ice floe.
* Homestar Runner alternately references and parodies this a few times:
* Homestar Runner and attempts to kidnap the Poopsmith, but once again the "police" (which includes Homestar, Bubs, and Coach Z) manage to easily recapture him.
* Homestar Runner, and Dangeresque, a.k.a. Strong Bad, sounded like his head was about to blow off his body. This was just one of his many instances of hamminess, however.
* Homestar Runner and ended with the two of them watching a satellite feed of Homestar drifting on a tiny ice floe in the Arctic Ocean.
* Homestar Runner, and his costume is so good he gets mistaken for the real Strong Sad and disqualified.
* Homestar Runner and hitting on Bubs and The Cheat, indicating Homestar's paranoia. Contrastingly, Cardboard Homestar gets pulled out when Marzipan wants some peace and quiet and doesn't want people inquiring after the whereabouts of the real Homestar. Cardboard Homestar is an indication that Marzipan feels greatly unappreciated, because she provides all of his dialog and his only lines are variations on "Marzipan, you're so smart".
* Homestar Runner and occasionally getting his own back on Strong Bad. Therefore Coach Z and the King of Town have filled in as "pathetic losers" in his place.
* Homestar Runner and other merchandise. It has become so successful, that the store is basically the creators' jobs.
* Homestar Runner, and shouting, "Science! Science again! I said science again!".
* Homestar Runner and Strong Bad are bemoaning the fact that The Cheat and Marzipan

are going on a date.
* Homestar Runner, and was eventually adopted as its official name in-universe.
* Homestar Runner: A number of examples, including the "videos" on the character page and Strong Bad's "most amazing e-mail" from "Weclome [sic] Back".
* Homestar Runner: Any time it looks like Coach Z might be catching a break, something needs to get in his way.
* Homestar Runner apparently loves computers like this and uses them by choice. He mocks his friend/pet/lackey The Cheat for using a modern Apple that doesn't have a text-based interface, he thinks a flat screen means someone cut half of the monitor away, and he thinks the Apple mouse is a bar of soap.
* Homestar Runner are not required to wear pants (or any clothes). Strong Bad is one big Walking Shirtless Scene; he thinks it's better to show off his abs. Homestar has had his shirt removed a few times, but nobody knows if he wears pants or not, so...
* Homestar Runner are prime examples - crudely-drawn stick figures being killed in ridiculous ways.
* Homestar Runner are some sort of Calvinball; even the name "Homestar Runner" derives from a friend of the creators totally mangling baseball terminology.
* Homestar Runner are treated as characters, like The Stick. Some of them, like Strong Bad's computers, seem to actually have minds of their own!
* Homestar Runner - A site famous for its webtoons but also contains a number of popular games.
* Homestar Runner as part of a recruiting ceremony performed by the Brothernal Order of Different Helmets. And yes, neither of them have arms.
* Homestar Runner assumes that he'd have to somehow be Blessed With Suck:
* Homestar Runner attempts to clear things up a bit. Emphasis on "a bit".
* Homestar Runner at the end of one cartoon starring it even revealed its voice box to be a red lightbulb after it exploded.
* Homestar Runner: At the end of the early short "The Reddest Radish", Homestar and Pom Pom fall over out of shock when Marzipan reveals the radish Strong Bad stole wasn't her real entry in the contest, and reveals an even bigger, redder radish sitting just offscreen.
* Homestar Runner, Back-Sassing Animatronic Strong Bad and the Grape-Nuts Robot, get into an argument like this during an Easter egg scene
* Homestar Runner because he forgot to put on "moon-screen" while taking a midnight walk on the beach.
* Homestar Runner because he has the only shop within city limits, as far as the viewers know.
* Homestar Runner book, the Announcer and the Grape Fairy are too busy admiring the trophy, so they don't notice Strong Bad's obvious cheating.
* Homestar Runner "Brett Bretterson" apparently tells her that she's filled out nicely over the summer, and she says the same to him.
* Homestar Runner "brianrietta", Strong Bad gets an email talking about how hot he is and how the sender would like to go out with him... that turns out to be from a guy named Brian. Strong Bad bluntly replies "Look, man, unless Brian is short for... Brianrietta or Brian-Sue or something like that, it's just not gonna work out between you and me, okay?"
* Homestar Runner". Bubs draws a sketch of The King of Town's description of Strong Bad ("Had a head like a big ol', red ol', nasty ol' egg and hands like biscuit dough!"), only for it to look nothing like him—in fact, it's a perfect match for someone Coach Z identifies as Biscuit Dough Hands Man who, in later cartoons, is revealed to actually exist.
* Homestar Runner, burninating peasants is a great way to achieve your objectives.
* Homestar Runner, but Marzipan claims that they have an open relationship, which Homestar doesn't agree with. They break up very often but are usually seen back together by the next episode. Marzipan's character introduction video even reflects this, with Marzipan saying "Homestar Runner and I are one hot item when I say we are," and can follow up with either "and today, we are" or "and today, we are not."
* Homestar Runner but never quite materialized; this didn't keep subtle references

to Homeschool Winner from cropping up in a few toons, and Trivia Time is officially Pom Pom's pet cookie jar.
* Homestar Runner, but realizes it doesn't work and ends up switching tapes with the machine.
* Homestar Runner but that's just the kind of show Homestar Runner is.)
* Homestar Runner, but the distribution of brains between the two is clearly unequal.
* Homestar Runner "caffeine", Strong Sad becomes far more talkative than normal when he's on a caffeine buzz.
* Homestar Runner cartoon "Cheat Commandos...O's", where the titular cereal is shown next to a piece of chocolate cake, some caramels, and a glass of marshmallows, with the caption "Nutritious Breakfast", where the word "nutritious" has been crossed out and replaced with "delicious". There is also a subtitle that reads "Gallon of Ice Cream not pictured", and the cartoon ends up describing it as a "ridiculous breakfast" in the end.
* Homestar Runner cartoon, Coach Z is given a message via Strong Mad's back, saying "Your tiny bathing suit demeans us all!" He then takes off the pink, furry thong he was wearing under the water, and the water around him begins to turn black. Cue Strong Mad screaming "PUT IT BACK ON! PUT IT BACK ON!"
* Homestar Runner cartoon "Cool Things". Homestar needs to buy some paint from Bubs' concession stand, but Bubs insists that he's closed. Then Homestar asks Bubs if he'll bum some paint for him, and Bubs says that he never misses a chance to stick it to the man (who is actually himself), and gives Homestar the paint free of charge.
* Homestar Runner cartoon "Costume Commercial", the ghosts used as decoration are typical white blobby ghosts, until the announcer says "and for the ladies..." at which point it's a pink background and the ghosts have bows on their heads.
* Homestar Runner cartoon "Date Nite", Homestar and Strong Bad sneak along on Marzipan and The Cheat's date, and try (and fail) several times to sabotage it.
* Homestar Runner cartoon "Fall Float Parade", Strong Sad goes into an unexplained trance whenever he hears the phrase "covered bridges". At least until Strong Bad starts hitting him with nunchucks.
* Homestar Runner cartoon "In Search of the Yellow Dello", Homestar doesn't know what to get Marzipan as a present, and Coach Z has some advice that ultimately inspires Homestar's search for the eponymous Yellow Dello:
* Homestar Runner cartoon "Jibblies 2", Homestar saves his friends from the Rocoulm (the monster in the Horrible Painting in Strong Mad's Closet that's given everyone else "the jibblies") by offering to be his house guest "for all eternity". The cartoon ends with Homestar pestering the Rocoulm with questions like "So, is it eternity yet?"
* Homestar Runner cartoons had credits featuring a variation of "Written, Drawn, Directed and Animated by the Brother Chaps", with voice credits to Matt Chapman and Missy Palmer. This would be increasingly lampshaded in later shorts:
* Homestar Runner cartoons, Homestar had a tendency to not notice Strong Sad's presence, only to be surprised once Strong Sad finally got his attention. This was phased out early on, however.
* Homestar Runner cartoons, on both its website and DVDs, have in-character commentary.
* Homestar Runner cartoon, Strong Sad imagines all the rest of the cast meeting horrible fates. He drops an O from the Poopsmith's name and has him pop Pom Pom, leading to:
* Homestar Runner cartoon "The Baloneyman" uses Strong Bad's good and bad angels together as a (neutral) personification of his brain, which he tries to "fool" into feeling refreshed by rubbing a baloney sandwich shaped like a popsicle on his head:
* Homestar Runner cartoon "The Luau," Strong Bad throws a party and gives everyone "Crap For Brains" nametags, so he can call everyone Crap For Brains.
* Homestar Runner cartoon "Weclome Back"[sic] had Strong Bad talking about checking an e-mail in mid-air. Unfortunately, he pulled the "mash stop when you think you're mashing record and mash record when you think you're mashing stop" routine, so all

we get is footage of Strong Bad in an airplane talking about how excited he is, and then footage of Strong Bad talking about how incredible the whole thing was, mentioning that they met various celebrities and apparently encountered a narwal. Of course, this being Strong Bad, he might have exaggerated it.
* Homestar Runner cartoon "Why Come Only One Girl?" has a montage of scenes towards the end showing what might happen if any of the planned female characters were ever put in a cartoon. Cue Strong Bad...
* Homestar Runner characters are commonly seen using technology from the 1970s and 1980s. Most notable are Strong Bad's computers and television; it took three upgrades for him to finally get a modern PC, and only one was by choice. Heck, even the site itself never modernized until the retirement of Flash, still looking the same as it did in the early 2000s.
* Homestar Runner characters saying, "DNA Evidence", it seemed like the former group of fans was right... until a new toon paid off the utterances of the phrase by revealing a heretofore unseen connection.
* Homestar Runner: Coach Z actually tries to convince everyone that he is both Damp Towel Man and his creatively-named secret identity, Dan Towelman. As usual, nobody cares.
* Homestar Runner, Coach Z believes himself to be superhero Damp Towel Man, and his mild-mannered alter ego Dan Towelman.
* Home Star Runner: Coach Z's character evolution has made him creepier and creepier, from multiple jokes about his hygiene issues and "anatomy" to his crush on Marzipan turning into a borderline obsession. He's even famed in-universe for "butt patting".
* Homestar Runner commentary on a DVD. Even when Strong Bad was talking about him in a 2009 update of "Pumpkin Stencils", he wasn't even refered to by name.
* Homestar Runner could make fun of names and spelling errors, if he didn't have to type through his boxing gloves.
* Homestar Runner (created as a children's book parody in July 1996, website created in January of 2000.)
* Homestar Runner creators Matt and Mike Chapman voice a majority of the show's cast, including Strong bad and the title character.
* Homestar Runner: Dangeresque has an oppressive boss who constantly yells at him for breaking the rules.
* Homestar Runner, disrupts recording by making a series of increasingly ridiculous demands. In the end though...
* Homestar Runner, distinctly Apple-inspired computers are branded as Tandy, which, ironically, was an actual real-world computer brand.
* Homestar Runner doesn't have a particular target audience. It's enjoyed by people of all kinds and ages, from kids to the elderly, from geeks to relatively "normal" people. With squeaky clean PG rated humor with nothing worse than a mild innuendo, that is kid safe, geeky parodies and references for the geeks, pop culture references for the "normal" adults, and zany, wacky, and surprisingly clever humor for just about everyone. There might be some parts one person might not laugh at, but another scene will get them cracking up.
* Homestar Runner: Doreauxgard. The only source for the spelling of his name is an XML file.
* Homestar Runner DVD-exclusive Strong Bad Email "Accent", a Eurostile-like font called Square721 BT is the font used on the Zappy XT6, Strong Bad's computer from "five years in the future".
* Homestar Runner DVDs have a few Easter eggs, much like the site itself.
* Homestar Runner episode "dragon". Trogday would be officially named and celebrated in-universe in the 2006 toon "Happy Trogday".
* Homestar Runner-esque storyteller and gives each of the other residents of Free Country, USA a terrible, ironic doom in the vein of this trope... That is, except for Coach Z.
* Homestar Runner, everyone else awkwardly backs away as he does a victory dance.
* Homestar Runner, except with doing jumping jacks instead of holding up grapes, and Pom Pom is the one who throws the match to uncover Strong Bad's cheating

instead of Homestar.
* Homestar Runner "fan club" inspired some Homestar fans to start calling themselves "Deleteheads", after Strong Sad's own fan club from the email.
* Homestar Runner "fan club", when Strong Bad is trying to prove that adding the word "club" to the end of something usually makes it more exciting.
* Homestar Runner" features the characters telling a light-hearted campfire story - until Strong Sad's turn, when he suddenly packs the story with all kinds of depressing and disturbing twists:
* Homestar Runner features The Cheat, who only speaks in his self-titled language (which sounds like cute grunts), and Pom Pom, whose "voice" is a bubbling sound; both have had instances where they were told to watch their language.
* Homestar Runner for Memorial Day car dealership sales, with Senor Cardgage's "Senorial Day Tent Event Suprasale" and Bubs' "Bubsotathon". However, at no point does either commercial explicitly state what they're offering "vera low prices" and "huge savings" on.
* Homestar Runner for the benefit of the audience, but in this case it's justified; Strong Bad and The Cheat are trying to retrace their steps to figure out A) how they got Homestar onto an ice floe somewhere in the Arctic Circle, and B) how they have satellite coverage of Homestar on his ice flow in the Arctic.
* Homestar Runner frequently admits to embezzling money or items from pretty much any fundraising event he takes part in. Nobody seems to really mind, though.
* Homestar Runner, frequently ending sentences with "...rumble?" Then there's Homsar's "AAaaAAaaAA..." and drawing out vowel sounds in words.
* Homestar Runner frequently makes jokes about obscure Halloween costumes, either during the annual Halloween cartoon or during the fan costume commentaries:
* Homestar Runner game "Strong Badia the Free", Strong Bad gets everybody to secede from the King of Town's domain. He thinks everybody is going to join the now-autonomous Strong Badia, but instead they all go off and create their own countries. The rest of the game is him trying to convince everyone to band together to overthrow the King.
* Homestar Runner giving names to the minor characters (the Visor Robot, for example) among other things.
* Homestar Runner gloves. Which, again, are apparently his actual hands.
* Homestar Runner Goes for the Gold, including attempts to shoehorn a new character named Dijjery Doo into the plot.
* Homestar Runner Goes for the Gold", Strong Sad's burst of good cheer when he takes the lead in the flying contest causes him to suddenly get long, feminine legs. Everyone except Coach Z ("I am into this!") expresses disgust, with The Homestar Runner's reaction being "Um, no... just no."
* Homestar Runner got us!" Cut to a warehouse full of dusty crates marked "eStrong Vague Online Investments".
* Homestar Runner had the King of Town consume an entire mound of salt (even the shakers) this way.
* Homestar Runner Halloween cartoon is called "Doomy Tales of the Macabre."
* Homestar Runner Halloween cartoon, where the eyes of a painting literally follow the Homestar Runner across the room. He notices, and takes down the painting, revealing that it has holes in the eyes, behind which are "a pair of weird, one-eyed crows."
* Homestar Runner has a belly button... ...but it was created by Strong Bad's power drill.
* Homestar Runner has a big toothy grin permanently plastered on his face, which results in making some already decidedly non-happy situations downright creepy with him around.
* Homestar Runner, has a luchadore mask for a face, giving him a perpetual scowl.
* Homestar Runner has an in-universe example of this in "Videography." Strong Bad is trying to create an advertisement for his video editing service with a straight face, but when he starts listing occasions that would make good videos, and gets to "droopy drawers", accompanied by a picture of his younger brother's low-riding underwear, but cannot continue without chuckling.

* Homestar Runner has a particularly odd example: in the 14th "Teen Girl Squad", we learn the yearbook picture was scheduled for the same day as "Tape-a-dead-thing-to-your-face day".
* Homestar Runner has a relatively small core cast (twelve main characters), but add in all the spin-offs that are counted as part of the series' world and the list of recurring characters and one-shot characters alone pushes quadruple digits. Some of these characters are a popcorn maker, a printer, or a wagon full of pancakes. Not anthropomorphized. Just a regular popcorn maker named Frank Benedetto.
* Homestar Runner has been known to have long gaps in between updates, especially when The Brothers Chaps were working on the video game. Notably, the series was on a complete hiatus from December 22, 2010 to April 1st, 2014, after which scarce updates have taken place.
* Homestar Runner has Coach Z attempting to be the announcer for Free Country USA's "firty-tirst annual Fall Float Parade". His co-announcer Marzipan is not amused when the K.O.T.H.S. Marching Band decides to "break it down" and he gets distracted trying to do a freestyle rap.
* Homestar Runner" has Coach Z put his own extra-gross twist on this after Strong Bad tricks him into eating a bowl of sour cream and The Cheat fur.
* Homestar Runner has: "If I had to choose a word to describe myself, that word would be 'Fluffy Puff Marshmallows'. Or Homestar. Either one, really. They both fit!" Strong Bad's attempt to compare emails to fish also counts.
* Homestar Runner has its resident brute in the form of Strong Bad's brother, Strong Mad.
* Homestar Runner has Lem and Bev Sportsinterviews and Senor Havingalittletrouble.
* Homestar Runner has Marshie and Senor Cardgage, characters who radiate nightmare fuel played entirely for laughs.
* Homestar Runner has several, all of whom have tables at the Strong Badia Vaguely Military Career Fair.
* Homestar Runner has started this in later entries, as a way around his vow of silence.
* Homestar Runner has Strong Bad and the Cheat stretching their arms far above the earth to high five in outer space.
* Homestar Runner has Strong Sad. He is constantly getting beaten up or worse by other characters. He ends up doing all the dangerous stunts in the Dangeresque films. And in one email, The Cheat decides to curry favor with Strong Bad. We don't see what happens, but we hear what sounds like a power drill and Strong Sad shouting "Ow! Both my face and hands!"
* Homestar Runner has Sweet Puttin' Cakes, a mini-golf course based on the incredibly trippy show Strong Bad invented. It exists in its own universe that can only be accessed by talking about mini-golf, the first hole is home to a talking worm, and the 18th hole has a par of infinity.
* Homestar Runner), has the boss hand off an assignment to Dullard, saying "I need this on my desk by five." Dullard proceeds to pass it off to a co-worker, who passes it off to a female co-worker, who passes it off to a comb-over co-worker, who passes it back to the boss, all with the same "I need this on my desk by five."
* Homestar Runner has the Fluffy Puff Bite-Size Nibblers, a smaller version of the cartoon's Fluffy Puff Marshmallows. The ad promotes them as being good for newborn-type babies and that they help the mouth strain of having to eat a normal-sized marshmallow.
* Homestar Runner has to think that one over several times to decide if he should be offended (or offended on Pom Pom's behalf).
* Homestar Runner has used a number of real e-mail addresses for the characters (generally ending in @homestarrunner.com) but at least one of Bubs's buisness cards lists his e-mail address as bubs@bubs.bubs.
* Homestar Runner: Heavily implied in the cartoon "Bug in Mouth Disease". After Strong Bad puts his underwear for sale on an online auction, Strong Sad tries to track them down, especially "the blue ones".
* Homestar Runner. He calls Marzipan's machine while feigning an important-sounding conversation in order to impress a "hot blonde" who is, in fact, Marzipan herself.

* Homestar Runner, he is both an alternate version and a future version, with the manual even saying that he's been working out, making it clear he is the same character.
* Homestar Runner. He is sad, but absolutely nothing makes him strong.
* Homestar Runner "helium", Strong Bad breathes in helium and thus ends up with a high voice. He starts singing a song about being part of the "High-Voice Crew", only for the helium to wear off in the middle.
* Homestar Runner he runs out of the house "naked, somehow" despite having been wearing a shirt in the previous scene.
* Homestar Runner he's talking about, Strong Bad starts to wonder if his imagination is broken.
* Homestar Runner himself is usually not a very good singer, prone to not only being slightly off-key, but also to singing songs with bizarre and nonsensical
* Homestar Runner. His idea of reading is looking at a waffle with "BUG" written on it in syrup. "THIS BOOK IS TOO LONG!"
* Homestar Runner, Homestar and Strong Bad do this on purpose to Marzipan and The Cheat.
* Homestar Runner Homestar by claiming "Homestar gained a hundred pounds and shrank two feet for this role."
* Homestar Runner", Homestar finds he somehow left his hat in the refrigerator, "between the milk and the cold ones".
* Homestar Runner, Homestar urinates on firewood used at Strong Bad's party, thanks to thirty-two glasses of melonade.
* Homestar Runner. However, no one has yet discovered how he manages to type with boxing gloves on.
* Homestar Runner "hremail3184", Strong Bad enjoys (causing) these, enough that he considers "coolest explosion I ever saw that had one of those blast-wavy Saturn rings around it that've become so popular lately." as an entire category of the best explosions he's ever seen/caused.
* Homestar Runner ("I'll chop off your legs!") The chain is evidently endorsed by a hip-hop artist who promotes their "Thick n' Nasty" burger. (EEEEEEEEUNGH!) Strong Bad also wears a hot-dog-shaped "sad clown" mascot costume (the "Crying Clown-Dog") at one point to advertise Bubs' Concession Stand.
* Homestar Runner I'm missing that one. NO. WAY." Fade out and fade in on the couch now empty. It turns out he was just sitting right in front of the TV with his head taped to the screen.
* Homestar Runner in a commercial for the "Strong Bad Sings!" music collection: "Refunds not available in Maine or Arkansas."
* Homestar Runner: In "Best Caper Ever", Strong Bad and The Cheat send Homestar to the Arctic (to which they inexplicably have live satellite feed) by having The Cheat pee in Homestar's melonade. Due to not remembering all of the details of their caper, Strong Bad and The Cheat are at a loss trying to figure out how it happened.
* Homestar Runner: In his blog, Strong Sad describes getting "joke invitations to online singles sites (which I don't discover are 'joke' invitations until after waiting around the proposed meeting location for 4-8 hours. but hey! you never know when one might turn out to be legit!)."
* Homestar Runner" in "Moving Very Slowly" parody the overblown epic tone of much death metal, while "Circles" is one big bash on the typical college blues band.
* Homestar Runner: In "No Hands On Deck", Coach Z shows that he's won four Tony awards.
* Homestar Runner interview and hands Strong Bad his "resume", not realizing it's his grocery list.
* Homestar Runner: In the 2018 Halloween cartoon "Mr. Poofers Must Die", Homestar and friends try to tell a scary story in which an adorable dog named Mr. Poofers gets killed off. But no matter how much they try, their stories go off the rails, leaving everyone convinced Mr. Poofers is "too powerful".
* Homestar Runner in the bonus email "accent" on the "strongbad_email.exe" DVD, where Strong Bad started to worry about the softening of his accent, and tried to

get his old voice back.
* Homestar Runner: In the Halloween cartoon "Happy Hallow-Day", the gang investigates why it's still daylight out on Halloween night.
* Homestar Runner in their 2015 fan Halloween costumes round-up, with Strong Bad "recognizing" a humidifier in the background as "a dead-on Humidibot costume", and we're treated to a brief scene with Strong Bad interacting with a talking humidifier named Humidibot.
* Homestar Runner. In the Sbemail "original" Strong Bad mentions that "There've been like twelve King of Towns.", as well as an Original Bubs, Senator Cardgage Bubs (Senor Cardgage filling in for Bubs) Crack Stunt-Bubs (Crack Stuntman filling in for Bubs), and "fan-favorite" Onion Bubs, before the current Bubs took his place. Marzipan at the end of the email reveals that "Strong Bad made it all up".
* Homestar Runner: In the toon "The Search for the Yello Dello", Homestar and Pom-Pom do this to boost Strong Sad up to the Yello Dello so that he could tell it a boring story that would put it to sleep so that they could catch it.
* Homestar Runner is decently popular in its native United States. In other English-speaking countries, it's not quite as popular; in non-English-speaking countries, it has even fewer fans.
* Homestar Runner is definitely a Casanova Wannabe. In one e-mail, he slips and admits "I don't really know anything about the ladies either... I mean I do! I mean... WHGT! JGTH! YES I'M AWESOME!"
* Homestar Runner is drowned in a giant pot of mutton stew, and Bubs gets his head bitten off by his own concession stand after accidentally bringing it to life.
* Homestar Runner is filled with odd-looking eccentrics. The sentient beach ball who speaks entirely in bubble sounds is probably the most normal character. Then you have alternate worlds like those in "Sweet Cuppin' Cakes" and the "Powered by the Cheat" cartoons.
* Homestar Runner is generally a nice guy, but he also has a notoriously poor grasp on most things.
* Homestar Runner "i she be", The Cheat sets up a meeting with Great Looking Girl at the local food court, but appears to be setting her up to meet with his pal Strong Mad.
* Homestar Runner) is Homestar leaving messages gushing about various fads that came and went during the seven-year gap between this and the last edition of Marzipan's Answering Machine, including planking, the Ouya, Google Glass, and Jeremy Lin.
* Homestar Runner: Is it what the Internet was invented for? Some say yes.
* Homestar Runner is simply a blender with a Game Boy floating in some strange green liquid.
* Homestar Runner is the only place you'll find a chronological list of the toons and games.
* Homestar Runner is whatever size and sophistication level it needs to be for the current cartoon.
* Homestar Runner. It gets really silly, since the games in-universe aren't supposed to be made by people who don't speak English.
* Homestar Runner, it's mentioned that Homestar's stupidity occasionally reaches such heights that it "flips back to smart", and shows him answering the calculation "2 + 2" by defining Coulomb's law. When this is pointed out, he reverts to normal, revising his answer as "22".
* Homestar Runner "japanese cartoon", Strong Bad describes himself as having a volumetric mouth if he were a Japanese cartoon character:
* Homestar Runner jingle for Senor Cardgage's financial services company.
* Homestar Runner) just to bring Homestar to tears. It works a bit too well, as Strong Bad almost starts to tear up himself at the end of the cartoon.
* Homestar Runner", "lawsuits" in Free Country USA consist of little more than pelting the defendant with water balloons or snowballs, sometimes followed by a mugging.
* Homestar Runner like their appearance would seem to suggest they sound.
* Homestar Runner lives and breathes this trope across the entire series of

cartoons.
* Homestar Runner "local news", we see Homestar, Marzipan, and the King of Town standing in line at Bubs' Concession Stand... in front of a sign that says "Wait In Line: $5". Homestar turns to Marzipan and remarks "Best five bucks I ever spent."
* Homestar Runner loses. Even in "Kick-A-Ball", where he tries to play fair, he loses because he'd previously cheated by altering the rulebook, meaning that Homestar's "cheating" to win was actually allowed.
* Homestar Runner: Many things that are considered part of the overall Homestar Runner universe such as Trogdor the Burninator, Sweet Cuppin' Cakes and Limozeen started as Strong Bad's random ruminations before bleeding into the world proper. This has been lampshaded at least once.
* Homestar Runner marshmallow trills in a creepy voice and regular marshmallows suddenly appear with nails in them, for starters.
* Homestar Runner Marzipan and asks "is that a new... skin you're wearing?"
* Homestar Runner means nothing to someone who isn't familiar with the cartoons, but it's the name of the supposed main character. It originated when the brothers' friend (James Huggins of
* Homestar Runner Movie Trailer and Strong Mad's claymation short "Doug the Dino" in the email "the facts".
* Homestar Runner My brain is splitting in half!") He screams and runs away when the real Homestar walks in, offers him a back rub, and calls him "sweetie".
* Homestar Runner. Naturally, the two unrevealed things are two of the biggest mysteries of Homestar Runner.
* Homestar Runner never removes his "mask?" Too bad we don't get to see him without the mask on because of that armchair he got in the email where he actually took off his mask.
* Homestar Runner never says anything worse than "crap" or "freakin'", he uses those particular two words a lot.
* Homestar Runner notably, begins with Strong Bad getting an email comprised of demented code, which mocks him when he tries to delete it, and things get weirder throughout the toon.
* Homestar Runner now the ones infringing on Malinko's "highly intellectual property", and "counter-sues" by throwing snow balls at Strong Bad and The Cheat.
* Homestar Runner occasionally engage in capers. These ventures rarely turn out to be successful.
* Homestar Runner, of all things, in this way. She even names it "Homestar Jr.", much to Homestar's annoyance.
* Homestar Runner of euphemisms for the buttocks that are "Okay For Mom":
* Homestar Runner of Strong Bad shouts "Holy crap!", and the after-images dash after the originals.
* Homestar Runner Old Timey cartoons take place in a vaguely Depression era setting, where all the characters deal with comic levels of poverty, only having things like parsnips and "water soup" to eat. Sickly Sam bears the brunt of it— he's basically a skeleton who says he hasn't eaten for years, and wears a dirty "potate" sack instead of clothes.
* Homestar Runner once claimed that he writes an advice column for a girls' magazine under the "pseudoname" Cara Carabowditbowdit.
* Homestar Runner on getting hilariously maimed so he wouldn't have to spend Decemberween visiting Marzipan's parents.
* Homestar Runner on the Strong Bad E-Mail "geddup noise". Strong Sad was a fan of The Geddup Noise until it became a cultural sensation, after which he takes to wearing shirts that say "Corporate The Geddup Noise Still Sucks" and calling The Geddup Noise a sell-out.
* Homestar Runner originating from a Strong Bad/Homestar fic - is included, but the costume is mistaken (by Strong Bad at least) for a canon!Homestar costume.
* Homestar Runner "other days" had Strong Bad begin answering the email with "Again with the 'Dear Strong Bad'..."
* Homestar Runner: Parodied in "A Decemberween Mackerel", where the tagline for a bizarre holiday drink called "Hot Pooey" is "Oh Dear God, What Have We Done?"

* Homestar Runner: Parodied in the Strong Bad E-Mail "japanese cartoon".
* Homestar Runner parody, and insists "There's no such thing as 'mysterious'."
* Homestar Runner, particularly the scene where Strong Bad accidentally leaps off the screen and cannot jump back in, and at the same time, Homestar Runner (whom, as a result of him being affected by the Virus, has The Homestar Runner's torso) detaching his own head and using it to pick up certain icons on the navbar on the bottom of the screen. Then several windows resembling pop-up windows show up on the screen, one of them being an actual pop-up browser window, which most modern browsers will often block.
* Homestar Runner pokes fun at the occasionally-formulaic nature of SBEmails as Strong Bad shows the viewers how to "answer emails like a true Strong Bad".
* Homestar Runner powers, asks (no one in particular) if it would be all right if he could have the power to "change into almost anybody". He then finds he can only turn into about half of people, such as the right half of the King of Town, or only the legs of Bubs.
* Homestar Runner "radio", where college radio is depicted as being run by a "bewildered freshman" who mumbles and stutters through his announcements.
* Homestar Runner reference with a joke about being visited by "Jim Davis' lawyers".
* Homestar Runner referred to this phenomenon in a Strong Bad Email, acknowledging its omnipresence and the nigh-impossibility of fixing it. Strong Bad asks Bubs to fix the clock on his VCR, and Bubs "fixes" it by duct-taping another digital clock to the VCR.
* Homestar Runner, respectively. The Cheat loves to cheat. Pom Pom is a big round ball.
* Homestar Runner resulted in zero sales. (This was, by the way, before food trucks became a thing.)
* Homestar Runner, revealing his missing left half. Then when Strong Bad tries to game this by turning into Bubs-from-the-waist-up (since he's always behind the counter of his concession stand), he, of course, turns into Bubs-from-the-waist-down instead.
* Homestar Runner reveals that Coach Z's aunt is Bubs's uncle, which makes them sixth fourth second fifth cousins thrice removed, according to Bubs.
* Homestar Runner RPG, was announced in 2006, and was cancelled in 2008.
* Homestar Runner "secret recipes", Strong Bad claims his family is from "Bumdumbourge". "It's near, uh, Totalslava."
* Homestar Runner seemed to be based on the band spending most of their time simultaneously running from and giving backstage passes to all the screaming "babe-liens" of the galaxy.
* Homestar Runner sells donuts shipped from a third-world country named Homemáde, so he could legally print "From Homemáde" on the box.
* Homestar Runner series. In this case, it's also in-universe; it's actually Strong Bad doing the voice-overs of his comic series.
* Homestar Runner series. To add to the retrauxness, the employees of Videlectrix are the Brothers Chaps dressed up in polo shirts and fake mustaches. And their games are programmed on an Apple IIe.
* Homestar Runner series, was this by necessity in the early days, when there might only be one message worth answering any given week, but continued to rely on last-minute execution right up until the long hiatus, with episodes often being finished in the wee hours of the morning the day it went up. Most famously, "dragon" was originally going to cut straight from Strong Bad burning his brother's drawing to wrapping up the email at his computer, but then Matt improvised the Trogdor song at "4 or 5 o'clock on Monday" while making breakfast and they knew they had to make it a whole thing.
* Homestar Runner series with "civilian contractor" Reynold, about whom it's said, "You can't shoot and you can't fly, if you came with us, you'd prob'ly die!"
* Homestar Runner several times at the gruesome sight of his friend's polyester innards.
* Homestar Runner "shapeshifter", Strong Bad always prefaces his transformations

with "Shapeshift unto... (something)!" Then, the transformation would be accompanied by a "DWAYNE!!" sound effect in Strong Bad's own voice.
* Homestar Runner shoddy at first glance, but includes a pinata that turns out to be full of broken glass instead of candy.
* Homestar Runner short "2 Part Episode: Part 2" has the Topplegangers' "Ramshankle", a large swamp boat with jet fighter wings on the back and a tank turret awkwardly mounted on the front.
* Homestar Runner short "Characters From Yonder Website" is that Homestar and the gang are hallucinating being in an "unbelievably soothing children's program" after drinking some Smarty Juice, which expired in 2007. Strong Sad ends up deciding to drink some as well, and joins them in an Easter Egg.
* Homestar Runner short "HREmail 2000". Homestar puts on a regular puppet show for Marzipan using his shoes, which "gets cancelled after the third season":
* Homestar Runner short "Sickly Sam's Big Outing", the eponymous 'big outing' is an attempt by Old-Timey Strong Bad to ambush Sickly Sam and sell him to the glue factory.
* Homestar Runner short "Strong Bad Sings", the song plays during the "Strong Mad Forgets the Words to His Favorites" scene. On the DVD version, it's changed to Hot Cross Buns.
* Homestar Runner should be repeated until "your friends that didn't go on the road trip will want to... kill your legs... every time you bring it up."
* Homestar Runner "sibbie", Strong Bad's frustration at accidentally writing a song about Sibbie (and then somehow creating a follow-up to that song called "I Freaking Hate Sibbie") drives him to repeatedly body-slam Homestar's radio while screaming in frustration for five straight seconds.
* Homestar Runner. Since point-and-click adventures had become self-parodying since their early years, it was a natural format.
* Homestar Runner, Sir Shmallow (a 1930s version of the already-horrific Marshy the Marshmallow) briefly assumes one of these while screaming at the viewer to "Look lively!"
* Homestar Runner sits alone in his sketchy day care singing "Where is Tompkins? Where is cole slaw? Here I am!"
* Homestar Runner smiles, it's this kind of smile. Things often backfire on him, though.
* Homestar Runner, so he fully expects that he's about to win even though the award had just been given to Strong Bad and the show is now over.
* Homestar Runner, so it's possible he can't truly be killed anyway. One Halloween-themed Main Page has an animation of a zombie Strong Bad rising from his grave, saying "I have come back from the dead to whoa-whoa-whoa holy craaap..." as his head falls off and rolls away.
* Homestar Runner: "Some people wears glasses. Beth looks like a dude."
* Homestar Runner ("So straight-to-DVD it hurts") that are put in grocery store check-out lines to trick grandmothers into buying them.
* Homestar Runner so that he can return for the zombie apocalypse, his funeral dirge will be death metal, he'll record his own eulogy (which will, of course, be accidentally recorded over), and at the end, he'll come back to life in order to prevent his brother from performing an interpretive dance.
* Homestar Runner speaks entirely in bubbles, which were made from blowing bubbles into a glass of milk. Only one recording for Pom Pom was ever made, and it is still being used to this day. Additionally most of the character's motions are reused, cutting down on production time.
* Homestar Runner's Strong Mad and The Cheat, and Bubs and Coach Z. Homestar and Pom Pom are supposed to be this, but in later cartoons it became much less apparent.
* Homestar Runner started as a children's book made by the creators in 1996, "The Homestar Runner Enters the Strongest Man in the World Contest". Ten years later, they did a cartoon remake of the children's book, with the characters retaining their current, more over-the-top personalities:
* Homestar Runner starting its own space program. Its first mission involves

sending "15 Earth dollars on a round trip to the closest reaches of space" in the hopes that, according to Strong Bad's very poor understanding of the Theory of Relativity, it will have multiplied to one million dollars by the time it returns.
* Homestar Runner starting with Jibblies 2. The costumes Strong Bad is wearing in the teasers for upcoming Halloween toons are never the ones he wears in the toons themselves.
* Homestar Runner states all of the main characters (save The Cheat) are human, the recurring extra character Crack Stuntman is the only one who really looks like one.
* Homestar Runner, Strong Bad admits to having "an extremely unphotographic memory. ... like a drawing, or a doodle. Like a doodle memory," to explain why his memories of high school, middle school, etc. are so cartoonish and confusing.
* Homestar Runner, Strong Bad compliments Homestar's same-shirt-he-always-wears.
* Homestar Runner", Strong Bad decides to "wait it out" for the upcoming Ladies' Choice Awards. There's a brief segment that goes in fast-foward, showing Strong Bad doing various things to pass the time, like typing in a BASIC program to make the Compy say "STRONG BAD IS AWESOME!" on a loop, playing with Peanut Strong Bad, bringing up (and deleting) a third email, and playing a computer game called "Pigs on Head". We also see Homestar leaving a message on Strong Bad's computer saying he tried to make a time machine using Strong Bad's blender and Game Boy.
* Homestar Runner - Strong Bad declared, in the sbemail "Secret identity", that he uses the name Cara Carabowditbowdit when writing articles for a popular women's magazine.
* Homestar Runner: Strong Bad does a "growly" variation for his "Teen Girl Squad" toons.
* Homestar Runner: Strong Bad drowns his sorrows when he finds out that his friend The Cheat is dating Marzipan.
* Homestar Runner). Strong Bad even contemplated making an entire dictionary "fo' his own words".
* Homestar Runner", Strong Bad gets an email from a "typical college girl" named Daphne who hopes Strong Badia has a pizza joint she and her "girls" could come visit. Strong Bad is so excited at the prospect of meeting hot college girls he falls off his stool.
* Homestar Runner, Strong Bad himself takes the white man's place when he first enters the Videlectrix mainframe.
* Homestar Runner, Strong Bad is very abusive and cruel to his younger brother, Strong Sad. To a lesser extent, so is the oldest of the brothers, Strong Mad, but he mostly just follows orders.
* Homestar Runner", Strong Bad kept pre-empting the special "investigative news report" on "The World In Crisis" for other stories, to the point where it wasn't shown at all. Even better, they continued the hype for it by saying it will be on next time.
* Homestar Runner: Strong Bad provides a mundane example. He can type with any part of his body, regardless of which keys are being pressed. This comes in quite handy when you have boxing gloves for hands.
* Homestar Runner, Strong Bad receives an email from someone named Trevor, who says "I am a vampire and"—and his message ends right there. After mocking him for leaving his sentence unfinished, Strong Bad suddenly comes to the conclusion that Trevor couldn't because someone put a stake through his heart while he was writing.
* Homestar Runner, Strong Bad remarks that his made-up animal Sterrance is "way cuter than that smelly old washed-up The Cheat". When the Cheat turns out to be standing next to Strong Bad, and understandably annoyed, SB says to him "I know you heard me, and I stand by it!"
* Homestar Runner, Strong Bad's #1 fan, Fabrosi, is probably out ladying with that fake moustache he's always wearing.
* Homestar Runner, Strong Bad's anime alter ego, Stinkoman, is a good example of a (comedic, and not very bloody) Blood Knight; he's always "looking for a challenge".
* Homestar Runner", Strong Bad tries to drop a "65 mile-per-gallon hybrid piano" on Marzipan and Strong Sad.
* Homestar Runner: Strong Mad gets like this when his best friend, The Cheat, is

physically abused.
* Homestar Runner. Strong Sad calls in to Strong Bad's "home shopping" show to complain about his brother putting wildebeest pheremones in his laundry, but his call is interrupted by the sounds of an agitated (and possibly amorous) wildebeest.
* Homestar Runner Strong Sad plays this role, suggesting various horrific fates to befall his friends.
* Homestar Runner, such as this exchange in the Strong Bad Email "narrator":
* Homestar Runner tends to be kicked around and abused quite often. But given his criminal tendencies, he definitely deserves at least some of that kicking.
* Homestar Runner tends to make rhymes with his bizarre fictional accent. For instance, in the Strong Bad Email "rampage", he rhymes "sport" with "The Cheat" (which he consistently pronounces as "The Chort").
* Homestar Runner that now makes up the majority of the content on the site.
* Homestar Runner the addition by explaining he's an Expanded Universe character, who appears in novelizations and read-along storybooks.
* Homestar Runner. The Brothers Strong do not look at all similar, but it later turns out they really are brothers.
* Homestar Runner", The Cheat is scared into insomnia by a "shock-u-mentary" about gingivitis, so Strong Bad and Strong Mad have to think of oddly specific ways to comfort him to sleep. One of these is a "lullaby" where Strong Mad revs up a chainsaw and Strong Bad yells the lyrics to a non-sequitur rhyme over it.
* Homestar Runner: The Cheat's "4rt B4ndit" persona, who vandalizes paintings.
* Homestar Runner: the creators have intentionally used Xtreme Kool Letterz in ways that make no sense:
* Homestar Runner the date, but in the end Marzipan decides she doesn't care for The Cheat anyway.
* Homestar Runner, the DVD-exclusive Strong Bad Email "Comic Book Movie" had Strong Bad describe how Hollywood would handle a movie of his comic book character Strong Badman: badly.
* Homestar Runner. The events are different each year, though there are a few traditions, such as an appearance from The Goblin, Coach Z going as a hip-hop artist, an Easter Egg involving Homsar and activated by clicking on or near the Poopsmith, the "Witch's Brew" catchphrase, or Marzipan cross-dressing (Lampshaded when Homestar said that Marzipan going as a guy every year was starting to freak him out):
* Homestar Runner the evil Blue Laser are all shopping at in "Shopping for Danger."
* Homestar Runner: The Halloween 'toon "Doomy Tales of the Macabre" consists of Strong Sad's imagined revenge on all the people who didn't invite him to their Halloween party, in increasingly odd ways. For example, the King of Town is dunked into a vat of boiling-hot mutton stew, Bubs has his Concession Stand brought to life and bite his head off, and Homestar is turned into a macrame owl.
* Homestar Runner, there are a lot of alternate universes. Just to name a few...
* Homestar Runner the rest of Blubb-O's restaurant did.) Those who try to place a drive-thru order find the voice on the other end is prone to confusing and vaguely disturbing non-sequiturs.
* Homestar Runner: The short "Strong Bad is in Jail Cartoon", as the name implies, features Strong Bad going to jail. In fact, Strong Bad goes to jail twice; he breaks out, goes on a crime spree, then gets caught and sent back to jail.
* Homestar Runner: The titular character has a tendency to twitch his head back and forth whenever he's speaking.
* Homestar Runner: The toon/game "One Two, One Two" has Strong Bad doing this, and for some reason he's singing a girly pop-rock sing (with lyrics like "I'm a woman on the prowl, and I stick up for myself" and "Look out world, I'm an independent girl").
* Homestar Runner, the two Dangeresques caught the guy responsible for one time stealing their curly fries...
* Homestar Runner. They use a distinctly different sound effect for it than most works.
* Homestar Runner they've added over the years), and the brothers' songwriting

skills, which they started showcasing every few episodes or so by 2008-ish.
* Homestar Runner, throws a Luau party where the only food is a giant block of tofu, and the only entertainment is Maripan playing the ukulele to accompany Strong Sad's Polynesian poetry (which sounds like incoherent cooing). The whole thing is treated as pretty weird and boring by the other characters, but it all fits Marzipan's free-spirited personality.
* Homestar Runner titled "Kind of Cool", Strong Bad describes himself as being a tall pot-bellied creepy guy before it is revealed that his description was that of Senor Cardgage whom he deeply admires despite everybody else finding the guy to be a creep. After some time though, even Strong Bad started to find Senor Cardgage to be more creepy than cool.
* Homestar Runner to have one of these, but the creators decided against it. She can be seen in the background of at least one cartoon, though.
* Homestar Runner to just a jerk that occasionally inconveniences people, but for the most part can get along with them. Either way, for all the grief he gave, he recieved plenty in return.
* Homestar Runner toon "I Killed Pom Pom" shows Pom Pom being (temporarily) popped. A possible scenario is shown with a zombie Pom Pom returning, with the many pieces of his inflatable body being crudely stitched together.
* Homestar Runner toon "The Baloneyman", Bubs operates a baloney truck, selling sandwiches as if they were these. One of them is "the unrecognizable summer movie tie-in sammich".
* Homestar Runner to the front page of its website. The "Watch Intro" button was where "Come On In" was for over 5 years.
* Homestar Runner universe, Coach Z applies most of the time. Bubs and Homestar are the only ones who can tolerate him with in any consistency, and even they think he's a creepy, depressing, weird, disgusting loser to be avoided when possible — which he is, to be fair.
* Homestar Runner universe when the script called for a car. Their sister Karen joked about it in the commentary for one cartoon: "These guys are so lazy, they're pulling stuff out of the hat that they used five years ago."
* Homestar Runner unlicensed seller, is selling this way ("I'm a public flasher!" "Yeah, right, you ain't got no nudity under there!"), but his goods are actually of a higher quality than what he sells at the concession stand.
* Homestar Runner uses this joke in conjuction with the "Old-Timey" versions of the characters:
* Homestar Runner uses "world" products almost exclusively, with a few exceptions, like Mountain Dew (which invariably appears with the 1973 logo). Interestingly, most of the products, both names and the products themselves, sound sensible at first but on second reading turn out to be complete gibberish ("flavor taste-style chewing powder" ...?)
* Homestar Runner usually pronounces the misspelled words the way they're spelled, though occasionally he will tab up into the message and edit the errors. Among other things, the character of Homsar was born this way... his name was originally a misspelling of Homestar in an early sbemail.
* Homestar Runner" version of The Ugly One, and tries to save face by claiming the picture is a piece of pizza and eating it. Strong Sad isn't fooled for a moment: "Uh, Strong Bad, were you just first-basin' it with that piece of loose-leaf?"
* Homestar Runner was made up as a joke just for this trailer and was never playable.)
* Homestar Runner. We never get to see what it looked like. Sir Strong Bad is also briefly seen piloting a Wright Flyer.
* Homestar Runner: Went from Stage 2 to Stage 5 just within a few years thanks to widespread word-of-mouth and popularity on the internet, but then fell to Stage 6c after the 2009-2013 hiatus began. When the hiatus ended with the 2014 April Fools' Day toon, it rose to Stage X.
* Homestar Runner were flubbed lines from the various cartoons, often with the VA corpsing.
* Homestar Runner were originally created based on a wrestling tag-team, they both

have brash personalities. Their brother, Strong Sad, however, is creative, sensitive, and depressed.
* Homestar Runner, were quite open with their fanbase, making public appearances and even featuring their children in some shorts, but in 2009 they started to appear less and less, which has been attributed to the birth of Matt's second daughter and work burnout (having produced content nearly every week from 2002 to late 2009.) In 2014, they broke the silence and confirmed the return of Homestar Runner, even saying they hadn't planned on the hiatus being so long. Even with that, they're only open about themselves and the content they provide and keep nearly everything else private.
* Homestar Runner when he started to also focus on fixing his own unpopularity.)
* Homestar Runner When Strong Bad and The Cheat get trapped in an old car that doesn't open from the inside, Homestar comes along to "break it up." "All right, young lovers. Move it along! What do you think this is, Make-out Point?"
* Homestar Runner" when Strong Bad is arrested for trying to break into Bubs' Concession Stand.
* Homestar Runner", when Strong Bad makes excessive use of quotation marks when describing, in increasingly explicit terms, why The Cheat is such a diligent lackey.
* Homestar Runner, where a typo from a sender's email results in him trying to kill "Homsar":
* Homestar Runner, where Bubs is turned into the gigantic "King Bubsgonzola Supreme" and goes on a rampage, so, Strong Bad, Homestar, The Cheat, and their friends must find a way to stop him.
* Homestar Runner, where one of the montages created is one of Strong Bad falling in love with a Wagon Fulla Pancakes.
* Homestar Runner, where Strong Bad remarks on what it would be like if he and Homestar were to be stranded on a desert island.
* Homestar Runner where Strong Bad runs a local news program that constantly alludes to a "World in Crisis" story coming up. At the end of the news show, he says to tune in next time for the "World in Crisis" story.
* Homestar Runner, where Strong Bad sets up one of these apparently for the sole purpose of hitting Homestar with a folding chair.
* Homestar Runner, whether due to ravenous eating habits or just plain ignorance.
* Homestar Runner, which gets canceled in the middle of broadcasting the pilot episode. The cartoon characters have just enough time to react to their impending cancellation.
* Homestar Runner, which Homestar had carelessly doodled on. Depending on the choices made, the final potion has one of five effects on Homestar, turning him into either a cyclops, Tofu Homestar from the earlier short "The Luau", a suave Frenchman, a clone of Marzipan, or the Goblin.
* Homestar Runner, which involved Homestar wearily saying these words after a long silence, as if he was obliged to continue the gag.)
* Homestar Runner Wiki. Used by the creators themselves. Also known for being accurate to the point that it frightens said creators.
* Homestar Runner (with a few exceptions: Compy computers, Videlectrix video games, and Cold Ones beer).
* Homestar Runner" with the number 555-55-55855-55-5-SENOR-MORT-GAGE-TODAY.
* Homestar Runner wonders if Strong Bad's house is his own. Strong Bad says that if he did live there, he'd have "fewer non-broken bones, and more crushed spirits".
* Homestar Runner "yes, wrestling", with characters like Il Cartographer (a wrestling explorer) and Gardenboy (a wrestling farmer).
* Homestar Runner: "You MURDERER! You killed my brother!...I mean computer!"
* Homestesque, Tyler has an Unbelievably Shitty Laptop with a CRT screen.
* Homestuck^2: Chapters 8 and 9 happen around the same time, with the speakers respectively asking about an old friend and writing a half-hearted eulogy.
* Homestuck Additionally, Nepeta was the Rogue of Heart, and had the person she cared about most taken away from her just before her death.
* Homestuck after getting sick of being forced into clown outfits. In the Alpha

session, she's presumably killed offscreen by the Condesce, who takes her position.
* Homestuck: After Jane nearly gets blown up trying to retrieve the mail, her dad sends her to her room. She is glumly certain she is now "perma-grounded for life."
* Homestuck, after the rebellion fails the Psiioniic is forcibly grafted to the empress' flagship and is made to power it with his telekinetic powers, allowing her the pleasure of being the first of the invasion force to reach any hapless planet her army encounters.
* Homestuck a great deal, due to both of them involving the musical genius of Toby Fox.
* Homestuck (a knight) manages to convince the townspeople to let her go.
* Homestuck album are versions of the "Endless Climb" song played that come across as this. "Clockwork Contrivance," too, to a much lesser extent.
* Homestuck, all teleporting devices are built with failsafes to prevent time paradoxes, and pumpkins aren't destined for much.
* Homestuck almost everyone has died at some point, and almost all of those people were resurrected, brought back as ghosts, etc. John in particular has now died three times, and that's not even counting at least one alternate timeline death. The author has compared their many deaths to the way extra lives/ save files work in video games, only in this context the characters are aware of their alternate dead selves.
* Homestuck also bioluminesces, though she is better able to control it.
* Homestuck also does the variation where the events of certain updates correlate with the days on which they were released. For example, an update showing
* Homestuck also has an incredibly complex storyline, the like of which would probably be impossible in pure print media.
* Homestuck also has the Class and Aspect system, which parodies classes in RPGs. Every player has an Aspect - a fundamental aspect of reality - and a Class - how they make changes with or to their Aspect. Some get very useful powers, like Roxy's ability to conjure items from nonexistence, Terezi's ability to see
* Homestuck: Alternia, the home planet of the troll race. The trolls are shown to have a diverse culture, with vast differences between the castes that emerge from the "hemospectrum", their variety in blood color and associated physiological traits and societal standing.
* Homestuck, although actual rose motifs only extend as far as her using a pair of weapons called the Thorns of Oglogoth.
* Homestuck, although he's yet to reach a definite decision and has at least seriously considered a relationship.
* Homestuck, although this is a borderline case, since this ability comes from watching the clouds on Skaia, which anyone can do, so the only special thing about it is that she's awake before the game starts.
* Homestuck among the fandom. He prefers, however, to call it "doing jokes", which is an alternate name for this page, to emphasize that he isn't doing this out of malice, but just a sense of fun.
* Homestuck, and any time two end up talking it turns out like this. Probably the best example is the flash 'Seek the Highblood' in which Nepeta and Equius share a conversation purrfectly filled with cat puns and horse puns.
* Homestuck, and because what Eridan is doing with Vriska is the source of all those dead lusii for Feferi's lusus.
* Homestuck, and creating a new universe entirely for all of them to live in.
* Homestuck. And Dave manages to keep track of several said time loops in his head. (Granted, he does have help from Terezi.)
* Homestuck, and don't even have a word for monosexuality. It's not too hard to come up with an in-universe justification — it would be consistent with canon if some characters had mild preferences for one gender, and all of those characters had opposite-sex love interests — but it's clear that Hussie hadn't come up with the idea of all trolls being bi until later on.
* Homestuck, and exploration of LGBT identity that started emerging around that time.
* Homestuck), and her screen name, "grimAuxillatrix" is taken from "Virgin Maria

Auxiliatrix", and is also derived from auxilium, meaning "assistance" in Latin.
* Homestuck, and implied other classes. It's actually inverted in the case of the Thief and Rogue classes, who are normally female, with male players being the notable examples.
* Homestuck and is ever-ready to take offense on someone else's behalf whether they want it or not. In contrast, he is completely unaware of sexism and does not seem to notice his own misogynist attitudes even when they are pointed out.
* Homestuck, and its moments of genuine lightheartedness never go away completely, coming back especially in force at the beginning of Act 6. (Not that this puts a damper on the seriousness at all)
* Homestuck and Kanaya replied coyly 'maybe'. And the shippers rejoiced.
* Homestuck and limited page sizes mean several characters are out of the limelight for any amount of time spanning anywhere between days and weeks because:
* Homestuck, and Meenah's needling over the matter made her snap and go completely mad. In addition to killing Meenah and rendering Rufioh quadriplegic, it's heavily implied that she killed Horuss as well. It's implied that she still has lingering feelings for Rufioh, even though he doesn't really want to date her anymore.
* Homestuck, and none of them give a fuck anyway. He is also incredibly dismissive about other people's actual issues and social problems, despite priding himself on avoiding "triggers".
* Homestuck and quite possibly the audience. This means that most narrators have narrators of their own when it time to focus on them. It's possibly the single most meta example of this trope ever.
* Homestuck and scratch their session, rebooting The Game into a "void session" that at least preserves the possibility of human survival, so long as they eliminate certain outside threats.
* Homestuck and some that just flat-out hold neo-fascist beliefs. The fact that troll culture and civilization is easily one of the most richly detailed and interesting parts of the comic doesn't help either.
* Homestuck, and so on. No wonder those twelve kids beat Sburb in less than a month.
* Homestuck and starts being this, though the human kids have trouble telling where the line is.
* Homestuck, and takes many other elements from it, particularly its sense of humor and characterization.
* Homestuck and Tavros's legs after having been a wheelchair- then hoverchair-bound paraplegic throughout their game session (since Vriska psychically coerced him to jump off of a cliff).
* Homestuck. And that doesn't even get into her ghostly affairs. Or the fact that she's absolutely terrifying when she's angry.
* Homestuck. And the black romance version, Karkat gets ♠'s in his eyes after falling in hate with John. The emoticon versions are used more often: <3 for redrom, <3< for blackrom.
* Homestuck and the humans are many. For one example, a bucket is considered inappropriate to leave lying around, as it is actually used in troll reproduction.
* Homestuck, and the Kids are really good at the whole "friendship" thing. The stand-out example of one of the Kids being diplomatic with a Troll is probably John with Vriska.
* Homestuck And then Karkat kindly informs everyone that if they will just wait, he will be functional again in a moment.
* Homestuck, and then turning those same arc numbers into future release dates.
* Homestuck and the ones following it. They start off with twelve. Currently, they're down to four (five and a half if you include Aradia and Sollux), and Kanaya expresses an interest in making it three.
* Homestuck, and the staff was unprepared for the gigantic mob of fans that showed up. Those outside of internet-comics communities who are aware of its existence generally either have friends who are fans, or are only aware of the comic due to the rampant chaos some fans stirred up at conventions in the fandom's early years (infamously, some cons were overrun by mobs of troll cosplayers who failed to

properly seal their body paint, left gray paint smears everywhere, and behaved very inappropriately).
* Homestuck and you've got several more shirts and prints, plus two books.
* Homestuck, anyway), he's constantly having to tip-toe around sensitive subjects without letting anyone else find out what anyone else feels or that he knows about it, often questions whether it's even true in the first place or he's all just egotistically imagining it, and is showing signs of wanting to get together with one of them partly because he feels guilty about rejecting everyone.
* Homestuck, a queuestack is actually a real data structure, although it's more often referred to as a double-ended queue, or deque (pronounced "deck") for short. And yes, you can in fact make an array of them, although there's not usually much reason to do so.
* Homestuck, Aradia is eager to try a human "corpse party," since trolls don't have funerals and since she doesn't know that they're supposed to be somber affairs.
* Homestuck. Aradia's soul remains inside a robotic body for much of the Hivebent Arc. In addition, Dirk's Autoresponder is a computerized copy of his brain that lives inside of a pair of glasses.
* Homestuck, Aranea visits Jake in a dream, and he is instantly smitten, even calling her the "girl of my dreams." Ultimately subverted, as when they finally meet in person, he isn't in a psychological state for a relationship and . The whole scenario was likely invoked by Aranea in the first place in order to be able to activate Jake's Hope powers.
* Homestuck are first shown in this mode, before switching to the stockier, traditional "Sprite Mode" in the next page. The backgrounds, objects, and other characters were not adjusted to the new scale.
* Homestuck are implied to have this, seeing as though all adult trolls are sent offworld to conquer and plunder other planets.
* Homestuck are locked in a constant, unwinnable war until the arrival of Sburb players.
* Homestuck are longer than Earth years. To clarify, trolls are about the same age as the kids (13 years).
* Homestuck are Lovecraftian monsters that are quite capable of wiping out an entire species with a single glub or driving people insane by appearing in dreams, but they aren't all that bad and even help out the heroes sometimes when their general eldritchness doesn't get in the way. Some of the characters have referred to them with joking terminology as well. Then there's the Squiddles, cute collectible squid toys that may or may not be based upon humanity's subconscious awareness of the outer-space seafood diner.
* Homestuck are obviously supposed to be obscene, although troll words are really just strange compounded English words, and they use excessive amounts of ordinary profanity, too. Some constructions like this are things like 'bone bulge', 'nook', 'bulgereek nookstain', 'shame globe', 'phlegm lobe', 'seed flaps', and so on. For instance, Vriska at one point talks idiomatically of someone having their head stuck up their nook, much as we'd talk about someone with their head stuck up their ass.
* Homestuck are only connected through IMs, bouts of confusion are common.
* Homestuck are the mythological Rogues of Heart, Void and Breath respectively.
* Homestuck. Arguably, everything bad in the entire story can be traced back to Caliborn's desire to destroy his sister and everything his sister loved.
* Homestuck - arranges what she clearly intends as her first date with Kanaya.
* Homestuck as a comparison to the consequences of the players' use of a similar powerup.
* Homestuck as a friendly thank-you gesture for her kind gift to him on his birthday.
* Homestuck as an outsider, purely out of scientific interest in popular culture and the way it reflects society... but secretly admits to legitimately being very fond of the character Rainbow Dash.
* Homestuck a session creates a new universe where the players and guardian roles are swapped. It is thus easy to meet and work with counterparts.

* Homestuck a similarly aged version of John's mother from the same parallel universe. Dave has a great deal of trouble processing this.
* Homestuck (as in the story, somehow) where all the text came out as partially-intelligible gibberish.
* Homestuck, as it depicts the trolls' battle against the massive abomination that is their session's Black King, prototyped with Gl'bgolyb.
* Homestuck, a space-traveling tyrant also known as the Baroness, aka Betty Crocker. Their descendants either play this straight or subvert it, though the Condesce's descendant, Feferi, totally inverts it by being one of the nicest members of the cast.
* Homestuck, as Rose is facing annihilation by meteor, her cruxite bottle falls into the river. She rushes to the waterfall and jumps to catch it in midair.
* Homestuck as surprises. Now, good luck finding a discussion on the trolls that doesn't mention either of these.
* Homestuck. As the characters from the original universe travel to the new one (a trip which takes three years), the story of their journey is told through a series of vignettes in the Act 6 Intermissions, stopping at the beginning of the journey, 1 year into it, 2 years into it, and the end of the journey.
* Homestuck, as the kids try to figure out what powers they have and how to use them.
* Homestuck as well as force its players to play, meaning the destruction is predetermined and inevitable.
* Homestuck (as well as his Alpha Universe counterpart) has a rocket board. He's proficient enough with its usage to use it more like a skateboard than a surfboard, though.
* Homestuck as well as other hugely Troperiffic franchises are in part responsible for some of the recent server crashes. They have so many tropes they are crashing the site.
* Homestuck as well. In addition, both Karkat and Dave are literal knights. Other characters with traits along these lines include Rose Lalonde and Sollux Captor.
* Homestuck at one point when WV's enthusiastic commands become increasingly rude.
* Homestuck attempt to show their superiority over the humans at every possible moment. In practice, however, the kids outwit their attempts at every turn and end up becoming so powerful that they could kill the trolls any time they wanted to. Good for the trolls that they're all buddies.
* Homestuck. Basically, go into any flash update before "Seer: Decend" where a controller icon is in the top right corner and press Ctrl+T. Something will always happen.
* Homestuck Becquerel doesn't either, but no-one's sure if he really doesn't or if it's also stylistic.
* Homestuck before she has a chance to put any of her plans into effect.
* Homestuck before the actual Invasion, due to her latent Seer of Light abilities. In most cases her dreams and gut feelings resulted in things like building the mass underground cities for humanity and an alien invasion siren. All of her 'feelings' are spot on the money.
* Homestuck beginning with "Cal." (Calliope, Caliborn, and the questionably-canon Calamity.)
* Homestuck between drawing despicable, sickening porn for him or letting an innocent person die. Dirk agrees to do it before uu can even give him his other option.
* Homestuck, between Equius and Nepeta, and later Arquiusprite and Dirk Strider. (Interestingly, all these couples have two heroes of Void and two heroes of Heart among them)
* Homestuck between Jake and the Felt is interrupted upon Nannasprite delivering a vast load of cookies, both sides stopping to indulge in them.
* Homestuck between the two and the occasional implication of an actual relationship, but nothing concrete either way.
* Homestuck, both WV and AR are infatuated with PM, but PM either is oblivious/doesn't have a preference.

* Homestuck: Build up, get through the gates, fight the denizens, kill the Black monarchs...though the kids are often more concerned with their own hijinks.
* Homestuck bullies him to break him out of this peaceful mindset, and she's very angry that it hasn't worked.
* Homestuck, but she hates being in contact even for a second with his acerbic, hate-filled psyche.
* Homestuck But she's 0kay with that. She's 0kay with a lot of things.
* Homestuck, but the deaths themselves are nearly always undignified and often even comical.
* Homestuck but they both rejected him and hooked up with each other, prompting his murderous rampage.
* Homestuck by claiming to be able to use her space powers to teleport an enemy's internal organs out of their body.
* Homestuck by Jake as he remarks on his experience fighting robots: they never simply power-down and deactivate the way he hopes. Instead, to his dismay, they only ever explode.
* Homestuck by nature. It only gets worse when he's propositioned by Gamzee (and later Dave, who does so as a joke- though Tavros doesn't realize that). This is likely because Vriska's abusive stalking turned him off towards romance as a whole.
* Homestuck, Caliborn apparently gains access to a terminal that allows him to view other characters anywhere, even in the shower. Jane is understandably creeped out when he gleefully informs her of this.
* Homestuck Caliborn frees himself from his sister's chain by chewing his own leg off.
* Homestuck Calliope (UranianUmbra) admits to writing fanfic about the Alpha Kids.
* Homestuck call years "sweeps", although the Alternian year is equal to around 2.16 Earth years.
* Homestuck Cal may have promoted Beta!Bro Strider's abusive tendencies.
* Homestuck "Cascade"), 11/11 (the start of the Alpha Kids' session), and the other kids' birthdays in early December get celebrated in the fandom too.
* Homestuck, cherubs serve this function, which promotes the development of civilizations that can play SBURB and thus allow the universe to reproduce itself. Things start going off the rails when a young cherub is given a copy of SBURB, since cherubs were never meant to play SBURB themselves.
* Homestuck, collects photos of women from beauty parlours. Several characters comment on it as being creepy.
* Homestuck comics...until we find a meteor on a collision course for the main character's house.
* Homestuck coming from them about internal body parts that would make more sense on an insect.
* Homestuck constantly goads both Jake and Jane to try to make them go to "SEX LAND". Meanwhile, Dirk's own AI double tries to play matchmaker between him and Jake.
* Homestuck could be considered this. Most fans don't even remember that they didn't appear until Act 3 and they were retroactively added into the earlier story through flashbacks.
* Homestuck, currency in the form of "Boondollars" are awarded to the players (the children and the trolls) for advancing on their echeladder and doing sidequests. It is pretty much regarded as worthless and considered "useless bullshit money" by Dave.
* Homestuck (D8 Night Version)" has a track art showing John holding a stereo over his head.
* Homestuck, Dave gets blood on his hands when he finds the dead body of his alternate self. He ends up staring mutely at them for about ten minutes. Also lampshaded when Dirk kills his session's Hegemonic Brute:
* Homestuck. Dave has no idea how his time traveling powers work and doesn't plan on changing that.
* Homestuck, Dave visits his old room and spends some time looking at all of his stuff. He starts laughing as he remembers all of the silly things he used to do

before he learned about Sburb. He starts crying at the same time as he mourns the life he lost.
* Homestuck deliberately once they were already reading. However, the more dramatic and overcomplicated aspects of Homestuck later became much more famous than the silly humour, meaning that most of its fans started reading after hearing tales of the less Problem Sleuth-like later acts. For these fans, the beginning of the comic is actually generally the hardest to get through, and it won't be until they see signs of that complexity and badassery that comes later on that they'll be won - when that happens will vary, but it's generally somewhere between [S] WV?: Rise Up and the end of act 4 flash [S] Descend.
* Homestuck: Dirk Strider is upfront about the fact that he's only attracted to men. At the same time, most of his interests — like rap, robots, and swords — are stereotypically masculine and he dislikes having his sexuality reduced to a label. Since he's an alternate universe version of Dave's Bro, Bro is probably also gay.
* Homestuck, Doc Scratch indulges in this after all of his plans have been realized. The very last word he leaves behind before he dies?
* Homestuck does this constantly, mainly due to how readily it invites theorizing. At one point the narrator even lampshades it:
* Homestuck don't really buy it all that much, and love to snark about or criticise it at many opportunities.
* Homestuck, Dualscar, had her favorite slave assassinated after she had mind controlled the terrified slave into partially unbuttoning her shirt in front of him.
* Homestuck due to the times he's been killed off before in previous incarnations. Needless to say, he gets killed off again.
* Homestuck, each of the main characters can allocate their STRIFE SPECIBUS, essentially selecting the type of weapon they can use.
* Homestuck Equius Zahhak is quite skilled at building robots and cybernetic limbs. He does this so that he can blow off steam by fighting killer robots.
* Homestuck Eridan attempted to sabotage Feferi and Sollux's "genuine love" romance by trying to make Feferi mediate between himself and Sollux, which would push them out of their preferred quadrant.
* Homestuck, especially Rose. We probably won't know where for sure the series comes to rest between the two extremes until the story ends, and we find out whether the kids really do manage to succeed in their quest or not.
* Homestuck, even being pretty true to what John had been doing at that point.
* Homestuck, ever since about the end of Act 2, very early on in the comic's story, and continuing all the way to the very end. Around the time of Act 5, a common fandom joke was that the story will focus long enough to resolve one plot thread... and then make you realize that it introduced three others to do it.
* Homestuck exaggeration of this trope. While he claims to be a kind, sensitive soul, the fact that he only ever does anything nice in the hopes that the other person will sleep with him (and when that offer's off the table becomes downright abusive) and absolutely refuses to take no for an answer makes him so much of an asshole that he's the only one in his group that absolutely no-one else can stand.
* Homestuck, Exiles commonly talk to the kids using something along the lines of: Hey you. You there, boy/girl.
* Homestuck expresses difficulty with Rose's "human sarcasm", but has just as much trouble with alien sarcasm.
* Homestuck fanbase, as one of their dildo colouring options resembles the colours of troll horns, which may have inspired the sponsorship.)
* Homestuck fandom are responsible for a few migrations to reality; among them the puppet Lil' Cal, plush Squiddles, and the Warhammer of Zillyhoo.
* Homestuck fandom itself has had a few forced memes trying to ride on the success of "What's in the box, Jack?", involving before-after reaction pictures of characters.
* Homestuck fanfiction, so when a fanfic manages to predict some canon plot twist, we can be reasonably sure it's this trope. For example:

* Homestuck fans love crossover ships, especially with the quadrant system allowing for greater shipping potential. Tavros <3 Fluttersy (
* Homestuck fans making weird sprite edits during the pauses. It concluded with a large-scale walkaround featuring the fan-favorite Beforus trolls.
* Homestuck features Doc Scratch, who narrates the story for a brief while. We find out partway into his arc, though, that a good chunk of his story is merely a doomed timeline that is being told, and as time passes, with an increasing amount of speculation.
* Homestuck features the character Gamzee, who loves drinking Faygo, and this has increased Faygo sales a bit, especially in places where you can't find Faygo in stores and have to order it over the web.
* Homestuck features twelve characters, the trolls, all of which have a theme animal. When the troll is a match for their theme animal, it's usually played straight, as with the eternally angry Karkat, whose theme animal is a crab; but on the other hand, Tavros is a general subversion of his bull, being shy, slow-tempered, and generally harmless, as opposed to bold, easily-angered, and intimidating.
* Homestuck, Feferi's pet cuttlefish are noted to easily swim through the bars of the birdcages she keeps them in. She's fine with this, possibly because she plans on applying this "adoption" to her fellow trolls.
* Homestuck fic has Eridan wearing a shock collar to curb his swearing. Since the collar was made by Equius, it sets off at words as innocuous as "darn", and after a major accident Eridan resorts to "Goodness, you've cracked my skull!"
* Homestuck for all their friends. Equius specifically mentions that he's scared of what he might be without Nepeta tacklepouncing him and making him talk about his feelings.
* Homestuck for each other tend to win out of the incestuous slurry, and troll gender is irrelevant to reproduction. And that doesn't even go into all the bizarre anatomical details hinted at by "auricular sponge clots," "bone bulge," "chitinous windhole," etc. However, this may just be an artifact of the Trolls' language, as a bathtub is called an "ablution trap".
* Homestuck for pretty much no reason. On the other hand, she seems genuinely regretful of that, and has been talking more and more to John lately, who seems to be steering her down the right path. All in all Vriska's Wild Card days seem mostly over, though it's not out of the question she'll revert back to her old ways...
* Homestuck for them, only for that to be retconned), not counting all the doomed timeline background fodder.
* Homestuck for the most obnoxious IM behavior, among other things pathologically replace letters with Xtra Kool ones, or with numbers.
* Homestuck from their own perspective, which is actually not how time dilation works.
* Homestuck from the tomboyish Thief outfit (which Meenah still complains about and refuses to wear whenever possible) to the Sylph's elegant dress.
* Homestuck gain power and change shape as players join their game. But while the Queens retain their more or less human height, the Kings grow with each change until they're mountain-crushing colossi.
* Homestuck: Gamzee's and Dave's rap-off, stated to be "one of the best rap-offs in the history of paradox space".
* Homestuck gets a ton of mileage out of this trope. As of yet, the numbers have no actual significance, but that doesn't stop the fandom from speculating wildly whenever they show up.
* Homestuck gets bionic legs, the first step is removing his old ones. His friend Kanaya Maryam takes care of this. With her chainsaw.
* Homestuck gets scratched, reducing the events of the battle to a few panels.
* Homestuck get wings but are still capable of flight, the Troll wings are pretty much assumed to be completely superfluous.
* Homestuck. Given that it's an ersatz RPG in webcomic form, it's probably a homage to the palette-swapping practice in general.
* Homestuck goes down with her. Doesn't stop Spades Slick from fatally shooting

her, though.
* Homestuck got this in her conversations with John. Eventually subverted, because she didn't really change, she just spilled her guilt and insecurities to John and went right back to her old ways with a less burdened conscience.
* Homestuck happening at the same time or if the events are in different timelines altogether.
* Homestuck has a complex series of intra- and inter-species romantic incompatibilities.
* Homestuck has a creepy horse obsession, he made the body in the shape of a mechanical horse so Rufioh would better fit Horuss' ideal vision.
* Homestuck has a quick synopsis of the Epilogues accessible from every page so that people don't have to actually slog through the real thing to get up to date.
* Homestuck has "brought down the house" on several occasions, particularly with its Flash updates.
* Homestuck has Caliborn, the epitome of evil who speaks exclusively in ham large enough to overshadow his constant use of capital letters and who speaks so much about conquering everything that you'd wonder if he could just talk them all to death.
* Homestuck has had quite a few unpleasant deaths during Act 5 Act 2, but Neophyte Redglare's takes the cake. She either a.) didn't know about or b.) severely underestimated Mindfang's mind control abilities. As a result, Mindfang manipulates the angry mob at her trial into lynching Redglare and hanging her with one of her own nooses. Given that the story is written from Mindfang's point of view, it is highly unlikely Redglare survived the encounter.
* Homestuck has Rose and Jade. Rose's outlook is quite jaded, while Jade's outlook is initially quite rosy. Their color schemes (pink and green, respectively) match their names, though.
* Homestuck has the line "I'm giving out bitches like cheap cigars", and subsequently convoluted metaphors about being an expectant father handing out cigars and the phrase "giving out X like cheap cigars" become recurring jokes in the comic.
* Homestuck has the LOHAC Stock Exchange in his back pocket thanks to this trope.
* Homestuck has these. Although technically, the dreams are just waking up in another body. Eventually, players go there as their waking selves, either by traversing their gates, building/flying their way there, or more rarely, via god tier resurrection.
* Homestuck has the Trolls, who at first simply appeared to be simple internet trolls but later turned out to be one of these. One page makes a casual reference to them conquering star systems.
* Homestuck has this example, thanks to Dave's "ironic" love of terrible gear, in this case a two-way radio shaped like a puppet's rear end:
* Homestuck has this. He leads an uprising made of combined Dersites and Prospitians against the war their two kingdoms were having, and actually was doing quite well... but it ultimately ended in an absolutely crushing defeat that wiped out his rebellion almost down the last man, with only he himself surviving. It's implied the experience broke him, and his childish actions and personality are a coping mechanism.
* Homestuck has this in Caliborn, who partially functions as a parody of the fans of the comic that criticize its glacial pacing. In a particularly slow part of the comic, while talking to Dirk, he points out the angst that the Alpha kids constantly have, wanting them to get on with the actual plot.
* Homestuck has this kind of atmosphere, a (likely deliberate) bending of the laws of chemistry as xenon in real life is non-toxic but asphyxiant (and tends to pool at the bottom of the lungs as it's difficult for the body to expel). However, the characters refer to it as poison gas and use gas masks to protect against it (rather than oxygen tanks, which is what you'd actually need).
* Homestuck has this subverted. A functionally omniscient character says there is no such thing as magic, but there are such things as unexplainable technology, superpowers, gods, and quasi-magical pure forces of the multiverse. Several

characters continue to refer to their powers as spells anyways.
* Homestuck has to be altered, which leads to either A.) A story that diverges completely and ends up doing something well that we never expected, or B.) A story that fills itself to the brim with paradoxes. Most simply have no time for the research required in outcome A.
* Homestuck have a fondness for hats: The bigger and more elaborate, the better. Jack Noir himself is saddled with a "ridiculous hat" during Act 6.
* Homestuck have been portrayed doing this in fanfic at least once. Gamzee did canonically make out with a severed head, so really it's not surprising.
* Homestuck He may embarrass his son sometimes, but pretty much everything about this man results in a heartwarming moment.
* Homestuck, her montage shows her do it behind Gamzee so Terezi can push him.
* Homestuck her. (The characters given the names already knew this, and had been silently laughing at her misunderstanding the whole time.)
* Homestuck? He's a fascist who helped a genocidal program known as the "Hilarocaust". This quote sums it up the best:
* Homestuck high bears very little resemblance to the original Homestuck, with the only thing even remotely related to the alleged source material being the character names and the title of the fic itself, and after the first chapter has nothing to do with high school.
* Homestuck high; Eridan carries a guitar in his pocket. Particularly bizarre in that the canon actually has sylladexes, a form of technology which would actually permit this, but they seem to be absent from the rest of the fic.
* Homestuck high features a text version; the characters all respond to the completely bizarre happenings involving magic and demons with nothing more than "oh okay".
* Homestuck, his legs fail to handle them properly and he trips down them. Repeatedly.
* Homestuck. His parenting style was basically "Make the troll happy, and if nothing works, tail-whip him,"
* Homestuck holding true indefinitely), but even aside from the age disparity Aranea isn't really interested in him and probably only brought it up as a more polite way of rejecting him.
* Homestuck ("HOPYWOODOO"), either replacing the original one, or somewhere else entirely.
* Homestuck However, in the intermission between the 5th and 6th Acts, he does appear.
* Homestuck, however, it proves that the Health Vial does not apply in situations where death is instant.
* Homestuck.) However, many characters interact with their own future or past personas.
* Homestuck, humans are depicted as being enslaved by Trolls, John being one of them. We get three Wham Shots when someone asks if he's met any other humans:
* Homestuck. In addition, doomed timelines can exert influence on the Alpha Timeline. This influence is in fact necessary for the Alpha Timeline to exist. So the failure to create a Necessary Fail is itself a Necessary Fail.
* Homestuck includes Terezi trying to teach Dave to smell colours by sticking crayons up his nostrils.
* Homestuck, including an 'other' team who were allowed to write about any ship not already covered by a team. To make things worse (or better, depending on your opinions), this series' version of Trolls canonically have four different kinds of romance, and people commonly like to apply those to their ships, often with very strong opinions about why they ship pairings in one quadrant but not another.
* Homestuck in different ways. It's also thought the fans of the former latched onto the latter because the former is on hiatus leading up to the final act.
* Homestuck indistinguishable from himself, referencing the test indirectly.
* Homestuck) in particular seem to fit the trope; Nepeta and Equius probably do as well though it's hard to tell since there don't seem to be any non-stylized canon images of the two of them together.

* Homestuck: In [S] Caliborn: Enter, PM and Jack Noir stop for a moment to survey the foreboding cracks in reality.
* Homestuck intermission, a Humble Salesperson confuses John, Rose, Dave and Jade for really accurate cosplayers with exquisite taste, and sells them merchandise themed after themselves.
* Homestuck. In the main session, this is the Wayward Vagabond, who openly hates the monarchy and wants to create some form of democracy in its place.
* Homestuck in the meteor laboratory (implied to be one of many), it's apparently how both armies are created.
* Homestuck in the physical books, the implications are probably intentional in-universe as an example of the kind of snarky, off-colour humour thirteen-year-olds are fond of.
* Homestuck in total length). Even when the characters have important things to discuss, they still lapse into random topics at length.
* Homestuck in-universe as a game disc. The disc gets a nasty scratch, resulting in visual glitches reminiscent of an unreadable DVD. This leads to Doc Scratch taking over the narration while he fixes the disc.
* Homestuck is a bit more extensive than it's been seen so far, anyway.
* Homestuck is also quite knowledgeable for her age of 13, which only expands when she reaches her God Tier as a Seer of Light.
* Homestuck is an essential part of their romance system. Parodied with the Leprechauns, a homosexual race with nine forms of romance.
* Homestuck is a script-based version of this. The story is well known for its word-count and a format that sometimes edges closer towards an illustrated novel than a traditional comic.
* Homestuck is a sweet, caring, practical girl who also happens to really love wearing fake moustaches in the style of famous detectives from novels.
* Homestuck is a tea party date between new characters with no plot relevance whatsoever.
* Homestuck is brought back in a different way from normal though. Equius builds a robot body for her ghost to use, giving her a physical form to interact with the other characters.
* Homestuck is chock-full of references to video games, pop culture and bad movies, but its biggest bonuses are probably in astrology.
* Homestuck is doomed to be destroyed by the universe sooner or later.
* Homestuck is engaged in an escalating war of passive aggression with her Mother (or so she thinks, anyway).
* Homestuck is exactly why babies should not be allowed to dual-wield flintlock pistols."
* Homestuck is made largely of chatlogs, there are tons of fanfics for it that are based around just one long chatlog.
* Homestuck, is only seen communicating through emotes. Despite this, her close friend Roxy describes her as quite the jabberjaw when recalling their off-panel conversations.
* Homestuck is over and the next story has begun, he's taking cues from the fans; he's said that "ninety percent of 'calling it' is actually suggesting it in disguise."
* Homestuck is quite an example of this trope in her alluring catsuit.
* Homestuck is really cute and adorable-looking. However, this does not change the fact that he is a boring, self-important asshole, or make people respond to him in any more positive a way.
* Homestuck, is regularly referenced by other characters. He has become this outside the comic as well.
* Homestuck is specifically only attracted to females, which is considered unusual but normal.
* Homestuck is this, even clownish Club Deuce has killed his fair share of adversaries. The main characters are quickly becoming this, as well.
* Homestuck is this to Kanaya. Kanaya is initially intimidated by her, and hesitant to talk to her. When they finally do meet, you hear the tail end of their

conversation, where Porrim has taught her more about her biology and how to control her powers, and telling Kanaya she's proud of her for what she's accomplished as well as wishing her luck on her quest.
* Homestuck is very prone to this: fanfic, roleplaying and forum adventures based on homestuck near enough always begin in the exact same way, a kid has his/her birthday, gets Sburb discs somehow, contact their friends to be server players for them, have their server deploy all the required items, release their sprite and prototype it, use the required items to obtain their entry item, use the entry item to enter the game and then wander about. They'll also often meet consorts, go through their first gate, fight a denizen, become godtier etc. Understandable though as Sburb is a game and these are necessary in order to both survive and continue playing the game, but it is nevertheless very formulaic.
* Homestuck) it has been drawing more criticism by those who either believe these elements to have stemmed from it or from those who classified the epilogues as strictly non-canon to begin with.
* Homestuck. It however doesn't seem to be sentient in the traditional sense and isn't anywhere near omnipotent.
* Homestuck. It is clearly not just a bunch of buildings built around a central point. The core of its moon is hollow, and there it can be seen that the moon is somehow held together by chains that are loose and just float there.
* Homestuck, it probably won't stick, which means she'll be able to do it over and over again, "until you finally get tired of dying and follow your orders".
* Homestuck, it's believed that the only reliable way to kill a nigh-invulnerable First Guardian (or a creature possessing its powers) is to send another to fight it. This isn't precisely true; it's just that the First Guardians possess so much raw power that they're in their own tier, and very little even comes close. It is suggested, for instance, that God-Tiered Vriska at her full strength, making full use of her luck-manipulation powers, and cheating her ass off (as she usually does) would have a chance at defeating one... if a slim chance.
* Homestuck it seems Paradox Space is about as sentient as gravity or destiny. It's also a term that describes everything that exists ever.
* Homestuck, it's never made clear how similar or different trolls are to humans anatomically, as despite having an insect-like lifestyle trolls look like humans with horns and odd coloration. Terms like "bone bulge", "nook", and "seedflap" are used but never explained, meaning that fanfic writers tend to go in pretty much every direction when writing erotica pertaining to trolls.
* Homestuck, Jack Noir/Spades Slick in all of his incarnations is rather fond of puns. Unfortunately, he's pretty terrible at them.
* Homestuck, Jade Harley owns a Pictionary Modus. It misidentifies an advanced bass for a mecha, the Tangle Buddies for a pair of gloves with some coins and the Magic Cue Ball for the Magic 8 Ball.
* Homestuck, Jade's grandfather was an adventurer and big game hunter. His hunting trophy room is her least favorite in the house, and she finds Grandpa Harley more difficult to face now that he himself is stuffed and mounted in the living room.
* Homestuck; Jake represses insights he has in order to avoid uncomfortable thoughts and play the part of his action hero persona.
* Homestuck. Jane and Feferi, the Maid and Witch of Life respectively, both have the ability to heal wounds, though with Jane's being the strongest. Aranea Serket, the Sylph of Light, plays with this: she can heal others emotionally and physically, but only by allowing them to look at things and others honestly, meaning that she acts as more of a catalyst than a direct healer. As Kanaya is also a Sylph, she could have similar abilities, though they are never shown.
* Homestuck: John has been seen charging around wielding the Pogo Hammer in one hand and the Wrinklefucker in the other. He later stopped dual-wielding and settled on using just the Warhammer of Zillyhoo.
* Homestuck. John's Dad picks it up. After they were both transported to the Medium along with their respective children thirteen years later, he returns it. Romance ensues.
* Homestuck, John tries to be this, but fails. He's still not bad, though.

* Homestuck, Kanaya greets Rose and Dave in the middle of their conversation by asking what liquor is, completely startling the latter.
* Homestuck, Kanaya is more concerned with her rapid blood loss leaving an easy trail to follow and worrying her friend Vriska, than the fact that she is losing so much blood that it causes her to pass out.
* Homestuck, Kanaya threatens Vriska with such an unfortunate accident of spilling a load gaper (their filthy commoner speak for "toilet") over Vriska's head if she doesn't make ramps for Tavros to travel around his house.
* Homestuck, Karkat, being an alien, has very little idea of human units of time:
* Homestuck Karkat encourages Dave and John to hook up with Jade and Rose respectively because their only other romantic options are trolls, and at that point Karkat disapproves of inter-species romance. However, he has a secondary motivation: wanting to keep them away from his crush Terezi.
* Homestuck Karkat goes blind, and Terezi has to teach him to smell and taste colors before the culling drones find him in this no-Sgrub-AU. Needless to say, she's not as good at teaching him as she thought.
* Homestuck, Karkat is extremely reluctant to explain anything of use to John, even though it would be immensely helpful. This is because he's organising the conversations in a reverse temporal fashion (his first talk with John is John's last, and vice versa). Thus, he's already explained those facts and doesn't want to repeat himself every time, which means John either figures it out himself, gets the information from another source (which pisses Karkat off) or waits until Karkat is finally good and ready to explain. When Karkat later trolls Jade, she enforces a password system for the explicit purpose of not letting him do this.
* Homestuck: Karkat routinely calls everyone in the near vicinity idiots or similar terms of abuse.
* Homestuck Karkat's bedroom posters show that many Earth actors have Alternian troll equivalents.
* Homestuck, Karkat wrongly thinks this is what has happened between him and Nepeta.
* Homestuck keyboard, while the computer itself is the size of a lunchbox.
* Homestuck kill you!' As troll society considers gender largely irrelevant and considering how aggressive trolls are in general, this would probably be seen as normal.
* Homestuck leading to each others' Lands. Passing through all seven is required to complete the game.
* Homestuck leans more heavily on the "funny" side in comparison though.
* Homestuck. Legislascerators gather evidence of crimes committed. This evidence is presented to His Honorable Tyranny, who dispenses justice if the accused is brought to court. The only crimes seen in-comic that have been prosecuted, however, were all pretty major ones (murder - Vriska; murder, pillaging, and property destruction - Mindfang; and embezzlement from royal funds - Lemonsnout) so it is possible that minor ones are just not brought to court since they aren't worth His Honorable Tyranny's time. It is stated, however, that even if the accused later turns out to have not committed the crime they were convicted of... well, they're now guilty of wasting the court's time, aren't they?
* Homestuck likes to show scenes in whatever order seems most dramatically convenient. It often leads to the narrator lampshading how we're DEFINITELY going to see what's coming next.
* Homestuck live off-planet in a perpetual campaign of Alternian conquest, declaring war on whatever alien civilizations they come across.
* Homestuck manages to get unstuck from the story itself, bouncing around all of time and space until they finally manage to gain some control over it.
* Homestuck, manifesting itself in a few different ways. Karkat Vantas compares himself to a god for assisting in the creation of the kids' universe. Many other trolls, like Sollux Captor and Tavros Nitram, have powers that would make them superhuman on Earth.
* Homestuck. Many of them were probably already dead when they got there, since Vriska kills people in a variety of ways other than luring them to her hive.

* Homestuck Marquise Spinneret Mindfang, had sexual relations with at least one of her slaves, heavily implied to be Kanaya's ancestor the Dolorosa.
* Homestuck — although the only ones important to the story haven't been fielded yet, being the equivalent of thirteen years old, there isn't really any other word to describe a society in which everyone above a certain age leaves their birth planet and joins the military. Oddly, each and every one of the trolls we see in-story is actually a social or societal reject for one reason or another, and the majority of them would probably be culled long before they were ever recruited.
* Homestuck — blue- and violet-blooded trolls make up to the elites and the nobility, while purple-blooded sea dwellers rule as they please. Gold-, orange- and rust-blooded trolls make up the lowest stratum of society and can be killed, maimed, or enslaved by the highbloods with little consequence.
* Homestuck — since four kids and their guardians are the only (presumed) living humans left.
* Homestuck" — trolls from the past with the same blood color and symbol. Young trolls are then encouraged to seek out information about their ancestors and follow in their footsteps; even if they don't, their personalities and roles in society wind up being eerily similar.
* Homestuck. Meanwhile, both Mom and Dad are able to defeat giant monsters bare-handed.
* Homestuck, measures years in "solar sweeps", with 6 sweeps equating to roughly 13 Earth years.
* Homestuck, Meenah and Aranea are constantly fighting to remain relevant, to the point that Meenah has probably become a more essential part to the story than even her dancestor, Feferi, was.
* Homestuck. Meenah is blinded by the glare and says, "The goggles do nothing [to help]."
* Homestuck, Meenah Peixes desires wealth (in addition to power). She really desires it, and will take every opportunity to profit from it. When she's given an entire flash walkabout to herself, she spends much of it picking up items belonging to other characters, with the stated intention of pawning them at the first opportunity. And when one of her friends sets up a booth selling information, it was Meenah getting paid, because said friend really wanted to talk and knew money was the way to get Meenah to sit through it, if not actually listen.
* Homestuck: Meulin and Kurloz apparently get stoned on catnip together. Catnip does have relaxing and euphoric effects similar to weed when smoked by humans in real life, but it's not potent enough to get anyone stoned enough to completely space out for about ten minutes like Meulin suspects 'nip' made her do. Damara is shown smoking a blunt and asks Meenah to get stoned with her, but it's never explained what exactly she is smoking.
* Homestuck more sense in context; several characters are indeed stuck at home at various points in the story.
* Homestuck) more than anyone else. It's interesting to note that he is also one of the less violent trolls, and only spars with his robots.
* Homestuck. Most likely due to his upbringing as an orphaned, isolated inhabitant of a deserted jungle island, Jake has a tendency to be oblivious to the feelings of others, mostly Jane's. It's also implied that in his previous incarnation as Grandpa Harley, he was similar and ran away from home and from Nanna without apparently considering how it made her feel.
* Homestuck movies without feeling guilty, so any poster on his wall is this by way of stealth insult.
* Homestuck narrative, our Spartans and Romans were actually inspired by the genetic memories of our precursors.
* Homestuck natural lifespans than humans, and somewhat higher up the hierarchy are trolls with humanlike lifespans, and so forth.
* Homestuck. Not the purest example, though, as they have interacted before through an instant messenger client, and there's a certain amount of time shenanigans involved as well.
* Homestuck notwithstanding. Skaia and The Battlefield within it are large but

still fairly small for a planet.
* Homestuck of five or six whole acts into about two hours of gameplay.
* Homestuck of made-up words, many of which go on to become very popular with the fandom, but probably the most common is "Fuckass".
* Homestuck of robots and cyborgs, but it also plays around heavily with fantasy tropes and themes such as princes and princesses, knights, dragons, quests, and magic.
* Homestuck of Sburb, in which natives and dreamers of Derse and Prospit dress according to their planet. Subverted in the kids' session, when the Black Queen liked harlequin colors enough to enforce it in uniform, and apparently so did the White Queen, as both Black and White armies dress similarly. The Kings still wear their own color.
* Homestuck", one can hardly blame him for wanting a bit of...additional security.
* Homestuck, one of the four human children lives on a dormant volcano. Naturally, it erupts about the same time they were dawdling too much in leaving Earth for the Medium.
* Homestuck one of the stages of the Condesce's plan to take over the Earth involved pulling one on the entire planet. She announced herself as an alien who will conquer the world and let the nations of Earth start preparing for an invasion that never came. This not only created mass hysteria, ideal for fracturing a society and preventing it from maintaining or defending itself, but also allowed her pick of the weapons built to confront her.
* Homestuck, on planet Alternia, a troll known only as The Signless or The Sufferer led a revolution much more subversive than any the war-torn planet had seen. When the Sufferer was killed, all record of him was stricken from history, and it was made illegal to speak or write of him, even in private journals. However, his movement went underground and secretly kept his memory alive.
* Homestuck on this in Act 6, noting that FTL travel is a completely different concept from teleportation.
* Homestuck part 3 shows up as a game cartridge and gets clogged with "special stardust", entire lands get obscured by visual static, scenes get skipped over because they're "unplayable," and some text is rendered illegible. These glitches happen in-universe, and some of the the protagonists (usually in contact through a chat program) can't reach or don't understand each other.
* Homestuck Perhaps justified as her species is implicitly invertebrate (Gamzee calls Karkat his 'iNvErTiBrOtHeR').
* Homestuck plays. The second times it happens, directly after he finishes shooting him, Caliborn complains about the music and the person he's talking to says they were doing it on purpose and that, in punishment for shooting an innocent person, they will play it every time Caliborn shoots him.
* Homestuck. Probably a rare use in that it's solely because it looks cool.
* Homestuck problems with this idea, the fact that he's hitting a girl never even seems to occur to anyone. (For what it's worth, Meenah was so blinded by awe over her genocidal alternate counterpart that she barely noticed.)
* Homestuck, prototyping the kernel with an item causes all of the denizens of the players' planets to take on the characteristics of that item. When John prototypes his kernel with a harlequin doll, this populates his planet with clown-themed monster mooks. These come in a shapes in sizes but share a clown-like appearance and a propensity for japery and visual gags.
* Homestuck-psychopath who wants to kill everyone for the sheer hell of it and is apparently more than powerful enough to do it.
* Homestuck ran on user inputs, so the heavy influence of fan suggestions is a natural extension of that. Examples include:
* Homestuck, recurring villain Jack Noir sits between no sense of humor and a subdued sick sense of humor. His most competent sidekick, the Draconian Dignitary, sits firmly in lack of humor territory, as embodied by this conversation over the status of two missing heroes (the Prince of Heart and the Rogue of Void):
* Homestuck refuses to believe that magic exists and insists on calling it science, even calling the magic that he uses "White Science". Earlier, in a trans-temporal

memo made by Karkat, Kanaya asks him if magic is real. While he says he's not sure, the point is moot since all the equipment Sgrub has leaves nothing for magic to really offer. They kind of have magic in the Alchemy already.
* Homestuck (related to negative emotions like anger and fear, with a heavy emphasis on restriction).
* Homestuck, renders Eridan unable to even do this; Equius makes the eponymous device to prevent Eridan swearing. Eridan eventually resorts to "Goodness!", which freaks everyone out.
* Homestuck, resulting in a "skeleton army" of zombie turtles, iguanas, salamanders, and crocodiles.
* Homestuck, romanized Japanese for 1 - "Itchy", #7 - looks kind of like a crowbar - "Crowbar", #13 - baker's dozen - "Biscuits").
* Homestuck room with a bed and lots of treasure chests. Guess what you can do.
* Homestuck, Rose's Chumhandle is "tentacleTherapist". While it has not led to an actual confusion, it's most certainly a nod to this.
* Homestuck). Roxy began wondering if John was "boyfriend material," and the two do end up spending time together, but Roxy had a number of moments with Calliope that could be interpreted anywhere from romantic to platonic. The ending features the three going for a walk through the woods, again leaving it to the audience to decide who hooked up. Finally there was the doomed version of Vriska and the Game Over timeline Terezi, who reconcile in the afterlife during a montage, with their meeting point marked with a distinctive red (the color of Matespritship) and an embrace. Neither character is present in the finale.
* Homestuck: Roxy Lalonde spends the first three parts of Act 6 hammered. And she's a teenager. By the fifth part, she admits that she had a problem.
* Homestuck, Roxy persistently hits on Dirk despite knowing that he's gay. She later expresses regret over her behavior and acknowledges that it was annoying and inappropriate.
* Homestuck, Roxy tries to help her "bffsy" Jane win over the guy she has a crush on — even though Roxy sort of has a crush on the same guy.
* Homestuck's abilities. She normally perceives the world synaesthetically, via smell and taste... But in the fanfic, she gets a cold, effectively making her blind and entirely debilitated.
* Homestuck's Act 5 Act 1 focused exclusively on the trolls, who up until that point had been heard from a fair bit but rarely seen.
* Homestuck's Act 6 Intermission 5 (and the subsequent Interfishin), Vriska, Aradia, Meenah, and Aranea could be considered a pirate-themed spin on this.
* Homestuck's ancestor) was raised from a grub by Doc Scratch in order to be a servant of Lord English. Under English's orders, she sowed chaos throughout Alternian history and became regarded as a demon.
* Homestuck's, and Karkat's. Although in Karkat's case, it's not so much the fire that kills him as being right in front of a person causing a massive explosion powered by green fire.
* Homestuck, Sburb, also features an "echeladder" that seems to parody an RPG's level system— and since the lines between Sburb and reality are so blurry as to be nearly non-existent, this could be said to apply to the story's "real world" as well.
* Homestuck's dead planets (the ones of the Alpha Kids) are this. After they're killed, the bones just reassemble, making them almost impossible to permanently kill.
* Homestuck secrets. Officially, he did it himself out of guilt for making Meulin deaf via a nightmare-induced scream.
* Homestuck, see above), and react as though it is the single scariest thing in all of existence.
* Homestuck seemed to think so when he spent time there, but Dad Crocker, being a normal, classy human who loves the luxurious provisions, seems to be spending his time there nicely.
* Homestuck sees a good deal of camaraderie with Bronies, partially due to both franchises tending to dominate attention across the internet and being resultant.

Naturally, this also causes some strife. The fact that fan favorite badass Dirk Strider is a Brony serves to smooth out the edges.
* Homestuck's entry in the webcomic section, who accidentally damages the magical turntables that give him time powers, thus freezing time permanently unless he keeps moving the turntables by hand.
* Homestuck separate prototype features including some nearly gamebreaking psychic abilities that made the Black King almost unbeatable.
* Homestuck's Eridan finds Ahab's Crosshairs, "just about the most powerful weapon [the riflekind] specubus will allow." It was left by his Ancestor, and due to the nature of the game he was probably set up to get it long before he entered the game proper.
* Homestuck series often used as a punchline for a crazy fandom. It doesn't help anyone's case that the creator of the series himself won't allow for a dedicated Homestuck convention to exist.
* Homestuck, set in the desert wastes of Earth after it was scoured of life by the Reckoning.
* Homestuck, several characters use swords regularly and all use katanas, though it's usually subverted:
* Homestuck several times on their Twitter account. They were once asked if they were aware that their CEO was an alien troll queen attempting to destroy the universe. Their response was "We can neither confirm nor deny."
* Homestuck sexist and never shows any respect to anyone he doesn't consider an "alpha male."
* Homestuck, she is just doing things that had to happen anyway, but is inserting herself to make herself more important.
* Homestuck She is the only troll to start out with multiple different outfits (that she made herself) and whenever anyone wants some sewing done she is the go-to-troll for that.
* Homestuck. She justifies her constant abuse and even sacrificing her teammates as being "for the greater good". Sometimes it seems she actually is right, but most of the time her "helpfulness" is ambiguous at best.
* Homestuck, she makes sure that the only outcome that preserves the "Alpha Timeline" (essentially the main narrative) is the one where she wins.
* Homestuck. She writes "BR34K SH4CKL3" over and over again, first on one wall and then on all the walls. When she wakes up and licks the words, she goes screaming insane. Gamzee has no idea what the hell is going on, and neither does she.
* Homestuck shook as well, links and all, causing the little candy corn at the top of the screen to fall onto the table in the image and bounce around, all as though the MSPA website itself were somehow contained in that computer.
* Homestuck, simply because she finds their society preferable to hers in every way.
* Homestuck, simultaneously inverting and playing this trope straight at once.
* Homestuck's Jade Harley is an expert markswoman, and has her Strife Specibus allocated with the Riflekind abstratus.
* Homestuck Sollux's ancestor, the Ψiioniic, suffered this fate as a punishment for rebelling against the highbloods. Instead of being executed, he's grafted into the spaceship of the Condesce, the empress of the trolls and the one with the highest blood of them all, due to his innate psionic abilities being more useful to her with the Ψiioniic alive rather than dead. Thus, he became known as the Helmsman, the ex-rebel who powers the Condesce's ship at the cost of great physical pain.
* Homestuck song "Time On My Side" breaks down early on and slows down before picking back up again (somewhat appropriate, seeing as the track was written for a character with time-based powers.)
* Homestuck so there are a lot of shipping opportunities. The characters are fun and quirky and pretty much everyone can relate with at least one of them. There is a metric tonne of pop culture references and the humor is sharp and witty, especially the references to 90s internet and gaming culture that'll go over the heads of some younger readers. Also, there are 25 albums worth of fan-made songs

covering a wide range of musical genres. The action sequences are awesome and fast-paced. Add all that to the complex plot that really gets people thinking and all the suspense of waiting for the next update makes Homestuck an appealing work of art.
* Homestuck: Spades Slick, Hearts Boxcars, and Diamonds Droog of the Midnight Crew all qualify. Clubs Deuce... not so much.
* Homestuck's plan, the most mysterious of the three by far, is quite firmly dashed by outside circumstances. To clarify:
* Homestuck's punch-card alchemy process lets you convert objects into punch-card codes and back, and by merging the codes, you can create merged objects.
* Homestuck's Sburb has an extra life, it's still possible to be killed permanently if that life is destroyed. Still, one of the people killed this way has come back, so who knows? And besides, they still exist in afterlife in some form, from which they can be summoned if their remains are used to prototype a sprite.
* Homestuck's Summoner underwent an extremely rare secondary pupation in trolls sometime during his early adulthood and ended up with a large pair of butterfly wings. He could fly with them, too.
* Homestuck stands out. The fun begins with "so at what point in the future am i supposed to look forward to you whipping up this titanic hankerin for my knob", and then proceeds through "throbbing beef truncheon", "crotch-dachshund", "naked spam porpoise", "little boy peckers" and "vienna sausages".
* Homestuck started with this trope as a goal and succeeded admirably.
* Homestuck starts out somewhat like this, hence why her fingers are covered in reminder strings.
* Homestuck starts with naming the main character Anger Crabman. Things just get worse/better from there.
* Homestuck still appears to be the same across both instances, even though he would be the son of a different person as a result of the switch. Hidden lore from the "Skaianet Systems" website implies that he was a result of cloning from the same parents, but the lore was deleted for unrelated reasons and was questionably canon to begin with.
* Homestuck's Tinkerbull is a tiny little bull with wings. Its species is known to swarm hapless adventurers in order to cuddle them.
* Homestuck streak. Some of the trolls (Tavros and Gamzee in particular) also spring to mind.
* Homestuck's treatment of the Incipisphere, where all action in Sburb takes place, makes it seem less like space than a collection of celestial bodies orbiting Skaia with the entirety of anything outside of the gravitational pull of planets filled with oxygen. This is a necessity of the game, as characters gain the ability to move between planets without teleportation and you don't want to kill them unfairly.
* Homestuck's trolls, who are nocturnal and live on a world where the nastiest threats all come out under the blistering rays of the sun.
* Homestuck subsist entirely on meat and candy. The first thing a newly hatched Cherub eats is its own sugary egg-shell.
* Homestuck: Sylphs are capable of healing as a function of the class' powers, while Life aspect characters seem to have the ability to bring people back to life.
* Homestuck takes this to an extreme, not only is the game total immersion, it destroys the universe to create a new one.
* Homestuck, Tavros attempts to troll Dave by rapping at him, but his raps keep becoming unintentionally homoerotic, which starts to confuse him and opens him up to some spectacular counter-trolling from Dave, who hits on Tavros insultingly until he gets upset and blocks him.
* Homestuck, "Temporal Shenanigans", includes a metronome to mimic the sound of a ticking clock.
* Homestuck. Terezi confronts Vriska, who used to be a friend but has now gone too far and must be brought to justice (i.e. stabbity death).
* Homestuck: Terezi is based on the zodiac sign Libra, which is symbolised by scales. Her dream is to be a legislacerator (the mix of elite detective and of

attorney on her planet- Alternia has no defence in the judicial sense and thus no lawyers as the very word is sacrilegious in a courtblock...er, courtroom.), her favourite hobby is to host court cases for her plush dragons, which usually end with said dragons hanged. She's also legally blind... as in, she cannot see with her eyes but was taught to use her tongue and nose to make up for it.
* Homestuck that it ends up being one of the only ways they can even damage their enemies, let alone defeat them.
* Homestuck that's killing them, and their horrifying communications are pleas for help.
* Homestuck that the human session of Sburb is highly unusual, even for a video game designed to destroy planets, create universes, and turn its players into demigods. While a lot of the things in their session can be attributed to the Trolls botching the creation of the human universe, it is only in the two human sessions shown that all of it seems to fall together.
* Homestuck that trolls wear the same clothing nearly all the time, because "trolls think fashion is stupid."
* Homestuck: The Battlefield actually changes shape. It starts as small flat world, then becomes a larger flat world, then a cube, then finally ends up as a sphere.
* Homestuck, the Battlefield, Skaia, is contained in the King's scepter. Said king is fighting on the Battlefield. And there are two kings.
* Homestuck, the crocodiles who live on the Land of Heat and Clockwork greet Dave Strider—the hero of their land—by sticking him in a cauldron of hot water and pelting him with onion slices. Dave just climbs out, and the crocodiles don't bother him again. Whether they actually wanted to eat Dave, or the entire thing was just a weird greeting (as Terezi claimed) is never clarified.
* Homestuck, the Dream Bubbles are these maintained by the dead or sleeping individual whose memory it is. They can manipulate it at will, once they become aware that it is a memory. Witches and Sylphs of Space that have reached God Tier can travel to others' dream bubbles at will.
* Homestuck: The entire Rogue and Thief classes are based around stealing entire concepts.
* Homestuck The Feferis from other timelines are implied to have had a much bigger impact on their timelines, with one even ascending to God Tier, but aside from that, she's a minor character.
* Homestuck, the Kids share a skill with their Guardian, but not as well: John is always bested in prank wars by Dad, Rose falls short of Mom's insane passive-aggression, and Dave is just not as cool, fast, or ironic as Bro. They still try to build up these abilities as part of their core personalities.
* Homestuck: The Land of Pulse and Haze is this. Not only are there oceans of blood, but there are broken ramparts and bridges from which beating hearts peek out of the masonry. Bonus points for the fact that this entire construct is basically one big fuck you to the player for this land.
* Homestuck, themed around the origin and purpose of Sburb and presented as a series of cryptic clues to its true nature, yet not a specific tie-in to any group of characters in particular.
* Homestuck: The Midnight Crew and The Felt are engaged in a fairly long one; when we first come into that part of the story, it's pretty much at its conclusion as the Crew mounts an assault on Felt Manor.
* Homestuck, the MMORPG META has a policy of determining the players meant to play the game by compiling a list of everyone the server player knows. If anyone on that list does not install the game within one day after the server starts, they inexplicably die. On the planet Seconia (pop. 12.5 million), the ithicans are all connected with each other through some natural network, and thus everyone would know each other on an unconscious level. Unfortunately, only eight copies of the game were made on that planet, and only the owners of those eight copies survived the ensuing near-extinction of the species.
* Homestuck, the pawns serving both armies on the Skaian battlefield are examples of this.
* Homestuck, there are a number of these (although we only see the one) in the

future of Alpha Timeline Earth after the Condesce floods the planet, where Roxy and the timeline's Exile population live. Unlike the shiny high-tech version of this trope you usually see in science fiction, these are ugly blocks of prefab housing stated to be basically floating slums, since the well-being of her subjects isn't terribly high on the Condesce's list of priorities.
* Homestuck, there is a BFG called Ahab's Crosshairs wielded by the pirate Orphaner Dualscar, and later his descendant/ancestor (it's complicated) Eridan Ampora.
* Homestuck there is the Skeleton Key Badge that god tiers can earn. While it is just a badge it basically means those who have earned it are living skeleton keys who can unlock most everything just by trying.
* Homestuck, there's a lot of room for interpretation as to how attractive the characters are:
* Homestuck there's no way to ensure the other respects it, but with leg irons that stretch a bit over half way across the room, and that only the personality that puts them on can unlock. The zone reached by both chains is neutral territory.
* Homestuck. There were something like six or seven fights happening simultaneously. Most of them were wrapped up in that animation, the one exception being the war against Lord English himself, which lasted a few more updates.
* Homestuck, the SACRED URN of NANNA'S ASHES is introduced as this. John notes the comic inevitability of it tumbling and shattering, but doesn't seem to find it priceless, or concerned with how priceless it may be to his father. As a veteran jokester, Nanna may appreciate the use of her remains for a gag, and when she's later incarnated as a clown spirit she doesn't even mention it.
* Homestuck. These videos tend to more than double in views and comments overnight, to the bemusement and (usually) gratefulness of whoever uploaded them.
* Homestuck: The tapestries displaying the elemental symbols of the four kids hanging in the white castle read thus:
* Homestuck, the troll concept of "Moirallegiance", one of their four kinds of romance, is most similar to this.
* Homestuck, the Troll Queen aka Betty Crocker's attempts to recreate Alternia on Earth lead to mass flooding and the extinction of humanity. Among other things, she tried to force humans to adopt troll culture and romance which was impossible due to basic biological differences. Humans don't mix their genetic material in buckets to make new larva, for example.
* Homestuck the trolls usually have two names that are each 6 letters long, 12 in total; for example: 'Karkat Vantas'.
* Homestuck they come back to life, but neither of them is Sburb players, the event doesn't seem to take place in Sburb anyway, and the whole thing was never foreshadowed beforehand nor alluded to afterward...so it really doesn't make any more sense in context at all.
* Homestuck (They didn't donate enough to have them survive for more than a single panel).
* Homestuck. They overcome their differences to defeat the evil Black King and prepare to receive the ULTIMATE REWARD for defeating him; then a scratch in spacetime releases an invincible demon who kills their robot army and forces the Trolls to hide deep in an asteroid field until they can think of a way to over ome the demon.
* Homestuck. They vary significantly in design - a Seer's is a normal hood, but a Knight's is a close-fitting coif, while a Witch's is split and looks like a pair of stockings. Some are even more abstract; a Bard's isn't even a hood but a conical hat.
* Homestuck they would allow his master to enter the fray. He succeeds as he is omniscient, multi-dimensional, and an excellent host.
* Homestuck. This being a webcomic which portrays Betty Crocker as a maniacal alien dictator.
* Homestuck: This is the point of moirallegiance; two moirails are supposed to balance each other's negative traits, thus allowing their other relationships to be more successful and facilitating self-improvement.
* Homestuck, this is what Karkat and Terezi's relationship adds up to. It's been

going on since before we knew those characters by name. They were never officially in a relationship, but they have had plenty of romantic tension. For example, Dave has stated once that he believes Karkat is jealous that his "girlfriend" (Terezi) has a thing for him, though neither Karkat nor Terezi (especially the former) like to talk about their relationship.
* Homestuck, this may be the result. An animal and a human results in the human mind being dominant with a few personality tics, while combining two sapient ingredients results in this trope, with the two minds attempting to work as one, with varied results.
* Homestuck, this occurs in-universe: John Egbert gains the power to effectively rewrite the existing narrative without causing any timeline splits, which manifests in a couple of ways when he goes back and muddles with established events:
* Homestuck this quality, and his other interests are almost completely ignored.
* Homestuck: This sort of thing happens quite often when a character tries to come up with a grandiose or dramatic analogy.
* Homestuck This trope is pretty well justified when it comes to sex: trolls are born in hatcheries en masse, with no knowledge of their genetic parentage, and any romantic coupling (male/female, female/female, male/male) is equally viable for breeding. Since biological gender became completely irrelevant to them ages ago, it makes sense that they don't feel the need to split up their galaxy-conquering firepower with sexism. Officially, anyway; according to Porrim Maryam, the fact that the trolls are ruled by an empress does not make the lower blood ranks less patriarchal.
* Homestuck, though it's developed beyond that. It's treated as a character in its own right, superficially similar to Dirk but with its own quirks and eccentricities.
* Homestuck thrown in for good measure - with his incredible psychic abilities, he's implied to not only steer but also power the Condesce's flagship, to which he is literally fused.
* Homestuck thus preventing Cronus from learning anything from the experience.
* Homestuck ties several colored strings around her fingers, each of which reminds her of a different thing. She removes most of them much later when the absurdity of SBURB makes them pointless.
* Homestuck to better prepare them for the game. However, in both canonical instances of the Scratch, the players who initiated it managed to escape its Ret Gone-ing influence.
* Homestuck to fulfill her own vanity rather than being productive about it.
* Homestuck to fully understand, and the 16 main characters, commonly abbreviated to only two letters, to keep track of. It's all worth it, though.
* Homestuck to overwhelm and kill them, but in fairness, he's perfectly capable of killing the heroes too (and has already).
* Homestuck to post an image, they should post a fake one he made himself.
* Homestuck to recount the events of a single day. Lampshaded at various points.
* Homestuck to take over Karkat's mind, but finds his thoughts so distasteful that she refuses to do so.
* Homestuck to talk Rose out of her suicide mission devolves into a fantastic series of bungled sports metaphors; they're both aware that neither has any idea what they're talking about.
* Homestuck to tear apart her world in the Incipisphere in order to find the answers she wants.
* Homestuck, to the point where even the humans, who have just met them, comment on it.
* Homestuck, to the point where the author has a tendency to unveil them pretty anticlimactically whenever a twist was guessed by too many in advance. For example:
* Homestuck to work out his issues with the older version, specifically his use of irony to pretend that he wasn't in a deeply unhealthy relationship.
* Homestuck tried this on a mass scale, it created a bunch of four-eyed cats, and more than a few seriously deformed ones.
* Homestuck tries making Earth more like her homeworld Alternia, introducing

Alternian life and flooding the planet.
* Homestuck, troll movies are apparently named this way, due to the troll civilization being so old that all the good movie titles are taken.
* Homestuck, Trolls are raised by wild beasts called lususes. Several of these are horrible monsters, most notably Vriska's "Spidermom", an enormous, troll-eating spider and parental figure. Vriska is forced to regularly kill or lure to their deaths other troll kids in order to feed her lusus. Vriska even keeps her chained up next to her castle.
* Homestuck, trolls right at the very bottom of their blood-colour based social structure are called "rustbloods". The more neutral term is "lowblood". At one point, Meenah also gets very offended when Mituna calls her "chumbucket", as it's apparently an anti-seadweller slur.
* Homestuck. Trolls with higher blood also live longer: trolls with red or yellow blood are unlikely to meet the next generation, while trolls with purple blood often live for centuries.
* Homestuck, twin M9 Berettas, inherited from his grandmother. In fact, nearly all the handguns he has been seen wielding are paired up for this particular style of gunslinging (dual flintlocks, twin M9s, matched golden guns), to the point that his Strife Specibus is this, formally known as Double Pistolkind (2xpistolkind).
* Homestuck two years ago on an inactive Formspring" and the fandom is especially active and prolific.
* Homestuck. Ultimately subverted, as Nepeta turns out to have been killed.
* Homestuck unsportsmanlike (not to mention downright silly) trick Caliborn had played and that she only continued to play in an irritated attempt to humour him, well, it was probably justified.
* Homestuck, until Eridan developed flushed (romantic) feelings for her and wanted to transition their moirallegiance into a matespritship; however, not only did Feferi reject him, she also broke off the moirallegiance, since it had become emotionally exhausting for her. Feferi and Sollux later end up dating, and as a result, not only does Eridan's one-sided crush on Feferi remain, he also develops caliginous feelings (a hate-crush) for Sollux, who definitely does not feel the same way.
* Homestuck use a variation. They hit their heads against their keyboards once, then use their left hand to hammer their forehead in.
* Homestuck uses flash as a way for viewers to explore the environment, scrolling both horizontally and vertically. More to the point, Homestuck also makes use of animated and interactive adventure game segments, which would obviously be impossible in print.
* Homestuck, Vamuin is so used to innuendo and phallic symbolism no one can stand him saying he's going to "introduce everyone". Even when he means it.
* Homestuck version of this every time he tries to have a glass of milk... or a glass of anything, really.
* Homestuck versions of the main characters' biological parents. They also consider the alternate versions of the main characters as their parents/grandparents/older brother, since due to time shenanigans they were older in this universe.
* Homestuck video game kickstarter was aimed entirely at people who had already read the comic, so it contained spoilers for ALL the major updates as of the time it was made. At least the spoilers were flashing by so fast that new readers missed half of them and didn't know enough to recognize many of the others as spoilery.
* Homestuck Vol. 5" when he was caught accidentally plagiarizing another song.
* Homestuck Vriska rips out Karkat's heart. Incredibly, he still lives long enough to kiss her (and, it's implied, to be saved through cyber-prosthetics).
* Homestuck, Vriska Serket, who up until this point had been manipulating events in the B1 session, has one after killing Tavros.
* Homestuck: Vriska tries to keep her metaphorical fingers in all the pies (all of them) so that her ultimate (planned) victory over the demon will be that much greater. This includes being responsible for Jack getting prototyped with Bec, and for Bec being created in the first place.
* Homestuck; Vriska uses her powers to kill, disable, and maim many other trolls,

but this is in fact entirely legal and entirely natural and commonplace on Alternia.
* Homestuck (VW, Warweary Villein, Wandering Vagabond.) Many unlikely allies have taken up arms for him, and even the kids and trolls traveling with him agree that he's awesome, even though they don't know him or anything he's done.
* Homestuck warns all the other trolls to stay awake, or else they will have to face the Horrorterrors (who actually aren't malevolent, Karkat's just really scared of them). He himself has refused to sleep for nearly a month, the only rest he's gotten being a couple of occasions where he was knocked out.
* Homestuck weapons are alchemized from a weapon combined with other, often random objects, and have a tendency to look very silly (and be named silly things as well.) Some especially silly examples:
* Homestuck wears a pair of shades with cracked lenses to hide some really huge bags under his eyes, has stringy hair, a set of broken teeth and tends to sweat a lot.
* Homestuck (well, one of them), is expressly fond of doing this. To the point that near the end of his most active arc, he has far more trophies than he can actually wear and has to decide between them.
* Homestuck: We see in some flashbacks that the Kids have been getting contacted by the trolls periodically throughout their lives, but they've never believed that the trolls were anything other than... well, Internet trolls. When the Sburb session starts up and they get transported into the Medium, and all the other weirdness that happens, they are suddenly much more inclined to believe what the trolls have to say.
* Homestuck, when all is said and done a grand total of six planets have been involved in devastating collisions.
* Homestuck: When characters are warped into the videogame Sgrub, there's a mechanic where any time a player sleeps, they assume control of a "dream body"—a completely healthy version of themselves that can also fly. Tavros is paraplegic (and has dreamed of flying even before he lost the use of his legs) so when he enters Sgrub, he spends as much time flying around in his dream body as possible.
* Homestuck when he was indecisive about fighting two powerful enemies.
* Homestuck when John attempts one of these and Rose suggests that he hire a speechwriter.
* Homestuck: When marooned on a moon that's about to get blasted, Jane takes advantage of the Felt's arrival to have everyone hide in Biscuits' oven.
* Homestuck when the narrative then explains the joke by pointing out that 420 is "the weed number", but Jane is too innocent to understand that.
* Homestuck when the reality-altering video games come into the plot. According to the author's Formspring, this is one hundred percent intentional. The rest of the first act, even though it is the shortest real act you'll see in the entire comic, is about a kid messing with inventory systems and a video game's mechanics until a meteor comes and almost pulverizes his house.
* Homestuck. When they did receive dark humor, it often came off more meanspirited. Characters did come back, but there were occasions when it'd come off more like a plot contrivance than anything previously established. After a certain point, characters dying went from a central part of the story's theme to almost literally a joke.
* Homestuck, where "everything is considered unsuspecting prey by everything else".
* Homestuck, which contains the rest of the comic after Disc 2 finishes at the end of Act 6 Intermission 5.
* Homestuck which encourages all younger members of the species to play deadly games and take justice into their own hands. The theory behind all this is that any troll who gets culled by this wouldn't be fit to be a soldier anyways, and those who do survive will be all the tougher for it.
* Homestuck, which for many made Gamzee more terrifying than his unabashed murder attempts earlier in the comic.
* Homestuck - which is something a human most likely wouldn't think to do.

* Homestuck, which the fandom did actually respond to with genuine sadness.
* Homestuck. While Karkat's negligence was by far not the only factor in this outcome, and waiting longer to beat the Black King may have been untenable (because Sburb gets harder to beat the longer it goes on) it definitely didn't help an already bad situation.
* Homestuck, who are both within the top three highest ranks but aside from that expressing borderline-revolutionary beliefs is liable to get one culled.
* Homestuck who can't stand the actual issues readers have pointed out (long waits between updates, long, difficult-to-read chatlogs).
* Homestuck, who claims that if he believes in something hard enough that makes it partially more true. Jade replies:
* Homestuck, who joked about the 'revolving doors' of her quadrants, and according to Meenah, she used up the extensive amount of spare time she and her group was gifted with by sleeping with most of her friends.
* Homestuck who was near-immediately established as a genocidal orphaner with a love of gunplay. Almost all of his darker traits were quickly overshadowed by his pathetic love life, though anyone who remembered his original introduction probably expected his turn to evil the instant his various romances were sunk.
* Homestuck with calm, cool kid Dave as the "ice" and the hot-headed and emotional Karkat as "fire".
* Homestuck, with even some of the more important moments being retold rather than shown.
* Homestuck with lounge music each time he tries to gun down another character that's trying to help him. It works.
* Homestuck without truly bringing her back as the person she was before her death.
* Homestuck with the forces of Derse and Prospit battling on Skaia (a planet with chessboard soil).
* Homestuck works, ancestor/descendant pairings may or may not have hints of this, though it's closer to incest; ancestors and descendants are born centuries apart and happen to have very similar genetic makeup.
* Homestuck works is very different, and many assumptions that a reader might initially make are later disproved.
* Homestuck. Worse, they knew it was going to happen... but fought the bad guy anyway because as Jake said when told what had happened, that's what heroes do.
* Home Sweet Home (2005) is a horror film where a new couple moved into a high-rise apartment in uptown Hong Kong, only to discover an urban legend about a mysterious "monster" lurking in it's basements. Said monster then abducts the couple's only son, and all hell breaks loose.
* Home Sweet Home: A character is just trying to settle things so they can stay home.
* Home Sweet Home: A character settles down at home after a long adventure.
* Home Sweet Homediddly-Dum-Doodily", for instance, he expresses shock that Bart and Lisa are unfamiliar with the story of the "the Bridal Feast of Beth Chedruharazzeb."
* Home Sweet Homediddly Dum Doodily" had Bart stick a sign on Lisa's back that read, "I'm a stupid baby!" That sign somehow found its way on Maggie and was mistaken for a label Homer and Marge put on the baby when the Child Protective Services officers inspect the Simpson house.
* Home Sweet Homediddly-Dum-Doodily" has Homer and Marge go to a spa and the Child Welfare officers find Grandpa asleep on the couch, Maggie drinking from a dog dish with the sign "I'm A Stupid Baby" on her back (which was meant for Lisa in a previous scene), and Santa's Little Helper having sex with another dog on the dining room table (not seen, but implied, according to the list of offenses one of the Child Welfare officers gave to Marge).
* Home Sweet Home, Jay mangles Mistake's electric guitar and portable power supply, and electrocutes him with them. It is the most well lit night scene in the entire film.
* Home Sweet Home: The killer manages to escape captivity and go on a rampage during Thanksgiving weekend.

* Home Sweet Home, the protagonist flees political instability but never stops wishing to return, and eventually does get back to Egypt.
* Home Sweet Pinapple Nematodes are later mentioned by a realtor who is helping Squidward sell his house ("Opposite Day"), and it's implied that they are the undersea version of termites.
* "Home taping is killing music!". Now which genre of music does the record industry get most of its profits from these days?
* Home Team Advantage magazine, has alien Arcturians winning a baseball game, with the prize being that they get to eat the entire human race. By the vote of fans, Julius Hawkline, the Howard-Cosell-expy, is chosen to be the first devoured. After the Arcturian coach bites off and chews The Hawk's nose for long minutes, it's decided that humans are inedible and some other form of compensation will need to be worked out. The Hawk is one tough old bird.
* Home, the Boov (especially Oh) regularly mix up tenses, verbs, nouns, and English grammar in general with phrases like "Can I come in to the out now?" and "It should to hover much better now."
* Home, the Boov gather all the articles they consider useless in spherical piles floating in the sky. Among the items given this treatment are cars, bicycles, trashcans, toilets and in Paris, statues and monuments.
* Home, the Boov take over Earth because the Gorg destroyed their homeworld.
* Home. The conflict of the film is because of the Boov finding refuge from them.
* Home, the Gorg's shoulder spikes are adorned with several tiny skulls.
* Home, there is a scene where Oh consumes a urinal cake and urine from a urinal.
* Home, Tip laying out her make-up kit before disguising Oh is treated as one.
* Home: Tip manages to survive an alien invasion and other harrowing predicaments on her own (unless you count her cat, Pig), until she meets Oh, who isn't much help anyway. And she's a young teen, too.
* Home, to get the other Boov to move out of his way, Captain Smek says that he's carrying a baby. We later learn his Shusher's rock is an incubator.
* Home", Tom Neville appears in a suit. He is a male example of this trope.
* hometown (because he's forced to do it by the person who summoned him), he drops all sorts of hints that the petrification isn't permanent, and goes out of his way to not hurt any of the girls when he fights Negi, and gives him some useful advice.
* hometown for a while, since the promotion ran shows in all three areas.
* Hometown is a tireless, hard-working, conscientious sheriff who cares deeply for his community. He is also a good father...and he considers it his duty, as a good father, to ensure that his daughter has no further contact with her lesbian best friend. Who knows what happened during all those sleepovers over the years?
* Hometown Nickname: When a character is referred to as the place they're from.
* hometown Nodoka couldn't use her mind reading book to tell what was going on inside Negi's head save for three sentences "Make them atone. Don't Forgive. Kill them all."
* Hometown Story and some of the villagers are hunters whose job explicitly include protecting the village from said monsters.
* Hometown Story. Granting the wish makes the item vanish. During one of such events, someone needs the item to become stronger to be able to fight a bully. At the end of the fight that was won by the wish-maker, it turns out that the feather-shaped item didn't vanish.
* Hometown Story, Harvey, one of the village children, has a crush on the village witch Sue, who looks teenage at best but is a couple of centuries old. Sue accepts to go on a date with him and bakes for him, hinting she might not mind getting something going once he gets a little older.
* Hometown Story-inducing item later, the boat ticket is thrown in the ocean by the girl and she decides to live in the village permanently.
* Hometown Story is both the actual older sister and the smithing mentor of Cling and Clang, who are quite friendly with her and naturally address her as "master".
* Hometown Story (notable today mostly because it is an early appearance of Marilyn Monroe) is essentially an entire film of this. A former senator returns home to run the town paper. Wanting to increase his popularity so that he can retake his Senate

seat, he starts looking for a "cause" that he can champion. After failing to prove that the local factory is polluting the river (because it isn't), he starts running a daily opinion piece about the dangers of corporate profits run amok. Unfortunately, he completely ignores the real social and economic arguments on this issue and instead basically just asks "why should big companies make so much money?" This makes it easy for the local business tycoon (who owns the aforementioned factory) to show up and decimate him with a short speech about how "the real profits are all the benefits consumers get from these products." Then to drive the point home, the newspaper man's little sister is trapped by a cave-in, and the "big corporations" jump in to save her.
* Hometown Story. The trope came into play when a giant version of one of the setting's run-of-mill monsters attacked it.
* Hometown Story, which comes with a dragon plush if you preorder in different colors depending on where (green for Gamestop, red for Amazon, and yellow for Natsume's store).
* Hometown was already well aware that she liked girls, but she tried heterosexual sex with her friend Jason to determine if she might not be bisexual. She was not.
* Home; "Travelin' Soldier" a cover of Bruce Robison (Ty England also cut it in between); and "Godspeed (Sweet Dreams)" a cover of Radney Foster.
* Home turn white when extremely shocked, as opposed to yellow for merely scared.
* Homeward Bound 4, Jake, Josh, and Shannon all play animals named Jake, Josh, and Shannon.
* Homeward Bound II: Lost in San Francisco are taken with their human masters to the airport for their trip to Canada. However, the animals break out. They try to stop their masters from taking off in the plane by sitting on the runway to get their attention. The airplane does not stop and just barely takes off over their heads. A puddle emerges from underneath Chance.
* Homeward Bound II: Lost in San Francisco, Sassy wakes up and finds herself lying next to that runt dog with fleas. Sassy recoils in disgust and says, "Yuck!" The dog responds, "That's not what you said last night!"
* Homeward Bound II: Lost in San Francisco tearing off a dognapper's underpants.
* Homeward Bound series, has Johnathan Yeager discover, to his amusement, that the Race has the same attitude towards lawyers as humans, and spends some time exchanging jokes with appropriate cultural alterations.
* Homeward Bound: The Incredible Journey. After coming back from the same hallway she went down for four or five times, she struts back on-screen from the opposite hallway, congratulating herself.
* Homeward Bound: The Incredible Journey against a much bigger Mountain Lion), the third time was when Kate was busy feeding Chance, she accidentally stepped on Sassy's tail. The last time it happens is when the dogs rebounded when trying to escape a pound.
* Homeward Bound: The Incredible Journey and the animals continue their own quest for home.
* Homeward Bound: The Incredible Journey Chance launches Sassy into the air when Hope sets her on a seesaw at the wedding reception and later recreates the same trick with a balancing stone in order to launch the mountain lion stalking him and Shadow off a cliff.
* Homeward Bound: The Incredible Journey, Chance's "if I don't survive" speech helps Shadow figure out a way to get rid of the cougar chasing them.
* Homeward Bound: The Incredible Journey, Chance the dog is chewing a shoe and offers a piece to Sassy the cat. She replies "No thanks, I'm not into leather".
* Homeward Bound: The Incredible Journey moment from Chance when he turns around.
* Homeward Bound: The Incredible Journey, Shadow the dog does this to the vet at the pound to allow Chase to escape.
* Homeward Bound: The Incredible Journey, she says they don't drink out of the toilet. Chance can't figure out why.
* Homeward Bound: The Incredible Journey, the animals and their owners pass each other on the road without realizing it.
* Homeward Bound: The Incredible Journey, the railway is literally the last thing

* Homeward Bound: The Incredible Journey, they mistakenly believe that they are being imprisoned and subsequently escape before their family arrives.
* Homeward Bound: The Incredible Journey vibe; the three pets love their humans, but simply never have any idea what's going on.
* Homeward Bound: The Incredible Journey when Shadow, Chance, and Sassy make it to the top of the first mountain, they (and the audience) get a good look at just what lies ahead for them.
* Homeward Bound: The Incredible Journey, while Chance is being treated for injuries and mistakes it for torture:
* Homeward. Worf condemns Nikolai for never fully thinking things through and expecting others to clean up the messes.
* Home, when Coda voices his concerns of the kind of scandal Entrapta's relations with Hordak could cause, Entrapta ensures him that they have only been "exploring." Hordak immediately excuses himself from the table.
* Home, when Oh repairs Tip's car, he accidentally wires the brakes and gas backwards.
* home, when Stormy asked the ASHDTV to show him porno bloopers, it showed him one featuring Debbie and, based on context clues, Hesh. Debbie was more offended that the guys didn't think her breasts were real.
* Home, which resembles a giant mech but is actually manned by a soft starfish-like creature.
* Home, while the Boov do forcibly relocate the humans, they do so without harming them. They offer them ice cream during the trip to their new settlement (which already has plenty of houses for them), and even provide them with an "Ask a Boov" station for inquiries. However, this is mostly due to Captain Smek telling the Boov that humans are a backward species that need their "help."
* Home, who made modifications to Tip's car to make it fly using various machines found in a convenience store, primarily a slushie machine.
* Home, with Oh pleading that he won't screw up again and Smek arguing there's a chance that he might.
* Home with the Fairies. The bandits want to watch as Maddie and the other prisoners bathe in a stream. They all refuse to bathe.
* Homeworld 2 after prolonged use) inhibitors are passive-effect modules that can be built onto any module-compatible vessel.
* Homeworld 2 and it's only due to their hyper-advanced technology that these ships seemed so formidable at first.
* Homeworld 2 and using combinations of different ship and squadron types to meet specific tactical needs.
* Homeworld 2, as Makaan's mothership is escorted by the elite of the Vaygr fleet. Sports also a good example, as the player-controlled Mothership Fleet escorts Karan S'jet in her desperate counteroffensive against the Vaygr.
* Homeworld 2. Destroying those planet killers (using the mighty warship you killed Makaan over) is your last mission.
* Homeworld 2 factory/carrier ship, the Shipyard, was added. It could build the largest ships in the game, which the regular Mothership couldn't, but was even slower and less maneuverable.
* Homeworld 2 features a few ships with plasma-based weaponry, Bombers and Progenitor Movers in a forward mount as well as Progenitor Dreadnaughts in a dual-barreled underside turret. The non-controllable Progenitor Drones are armed with a rapid-fire version. Many mods feature the heavy use of plasma-based weapons.
* Homeworld 2 fighters like Carriers or the Mothership, but they do have facilities where fighters can dock and repair.
* Homeworld 2 has the enemy command carrier pull this as a last-ditch attack. If you've killed all its forces and have it cornered, it'll launch a wave of fighters to kamikaze the closest thing they can find. It's more for spite than anything, as your attacking force will only be mildly inconvenienced by the loss of the few ships destroyed.
* Homeworld 2 includes assault parties breaking into enemy ships via beaming and

hull-breaching infiltrator pods.
* Homeworld 2 the player obtains a Progenitor Dreadnaught, and ancient warship built by the Precursors. The first time it goes into battle is in a cutscene, where the Dreadnaught effortlessly reduces an enemy battlecruiser to scrap with a single shot from its main cannon. When the player controls the Dreadnaught, its power is drastically reduced to where it will barely survive a duel with a battlecruiser completely identical to the one it vaporized in the cutscene.
* Homeworld actually manages to incorporate the Lensman-like game mechanics directly into its plot (and incidentally, the game is heavily inspired by the Lensman books).
* Homeworld. Admittedly, Bentusi were generally nice guys, not at all arrogant or condescending to Kushans. They were just VERY afraid of said galactic threat and the fear embittered them.
* Homeworld among them. And if that weren't bad enough, the Taiidan have enlisted of the Turanic Raiders to quash the survivors. Suffice to say, the Kushan are desperate to ensure the survival of their kind when it becomes apparent that they are waging a desperate war against an empire they remember almost nothing about.
* Homeworld, and as such requires machinery to keep his body alive and linked up. While it is entirely possible for an Unbound to be extracted the process is extremely difficult and potentially fatal.
* Homeworld and capable of building her own fleet through the course of the game.
* Homeworld and its sequels use opposing combat philosophies to varying degrees.
* Homeworld, and the Kushan's route just happened to cross the area), while the other involves placing a large, powered asteroid directly in the Kushan mothership's path, to both drop it out of hyperspace and careen into it. Additionally, Hiigara is protected by a number of hyperspace inhibitors, at least one of which must be destroyed before it can be assaulted.
* Homeworld - as war crimes to use, possibly even build. Firing one burns up the target planet's atmosphere, infrastructure and population.
* Homeworld at least with the Kharaki/Hiigarans. While the species itself is unified, it's mentioned there are various, distinct clans and houses that serve as countries onto themselves.
* Homeworld call their autonomous machines "robonoids" instead of "robots". Steven had to explain the latter term to Peridot.
* Homeworld, Captain Soban's frigate is swallowed up into the hanger bay of a Vaygr carrier.
* Homeworld: Cataclysm actually nerfed the ramming mechanic by making collisions non-fatal unless the 'kamikaze' order is given. Too bad it's not that useful in the campaign where physical contact with a Beast ship will instantly infect the frigate as well.
* Homeworld: Cataclysm also introduced the unconventional Somtaaw Leech microship. It's incredibly fast, undetectable to low-end enemy sensors and can be instructed to quietly attach themselves to the hull of enemy craft, screwing up systems and chewing holes in the hull.
* Homeworld: Cataclysm and killed the emperor. In the time of the expansion, the Imperial capital is controlled by the exiles, and the rebellion is establishing a new government. However, this fails to stop several Taiidan warlords and splinter factions from trying to attack the still vulnerable ex-capital and try to establish the empire again. By the time of the full sequel, what’s left of the Taiidani joins the Vaygr in trying to destroy Hiigara.
* Homeworld: Cataclysm-class assault frigate, and he gathers a crew of individuals, who voluntarily join his kiith. They become well known in the bounty hunter circles for bringing in plenty of Taiidani war criminals.
* Homeworld: Cataclysm-class composed vehicle (a corvette), which can bring down much larger ships with its EMP generator. A few missions feature the Bentusi originals; they don't have all the extra tricks of the Somtaaw version, but since their guns will tear through enemy craft of all kinds like tissue paper they don't need them.
* Homeworld: Cataclysm, features the Sentinel pods, which can project defensive

shields when in groups. In order to form a complete "bubble" over the target, 12 Sentinels are required (the game has a max cap of 24 Sentinels). These shields come in three varieties: green (protects against kinetic weapons), yellow (protects against kinetic and missile weapons), and red (protects against kinetic, missile, and ion weapons). Each level must be researched first. Shield sections disappear when overloaded and take time to regenerate. The shields are of a one-way variety, so the protected ship can still fire its weapons. The Sentinels themselves are unprotected and weak, so it is easier to destroy them rather than the shield. Large objects (e.g. ships) can still pass through the shield.
* Homeworld Cataclysm is both. It converts spaceships and control them with its conciousness, but at the same time absorbs all the data it finds and uses it to form its speech pattern.
* Homeworld: Cataclysm's pilots are all civilians, hastily trained no less.
* Homeworld Cataclysm: The huge cannon you weld to your mining-vessel-turned-mothership has the problem of only working once before requiring major repair. The ship it's attached to is initially civilian, and energy conductors and heatsink systems suitable to power a cannon about a third of its entire size were not included in the original designs. Searching for them is a major plot point taking up several missions - though it does, eventually, give you a cannon whose reload rate doesn't include an inter-mission cinematic.
* Homeworld: Cataclysm. This goes some way towards balancing the fact that you can't manufacture frigates or capital ships until quite late in the campaign compared to the previous installment.
* Homeworld Cataclysm, which take several real-time minutes to charge, and even when the fire button is hit, the shot takes an extra few seconds to charge up.
* Homeworld Command, a Unified Combatant Command under the U.S. Defense Department charged with all matters relating to planetary defense. In addition to the SGC, it also controls the United States' budding fleet of
* Homeworld. Conflicting reports on the canonical size of in-game units doesn't help clear this up.
* Homeworld creates one of those upon impact. Also used for explosions of the largest class of spaceships. Explosions have spherical effects, however, regardless of the visual.
* Homeworld: Deserts of Kharak about the terrible doom and catastrophe that will befall Kharak as a result.
* Homeworld: Deserts of Kharak, albeit for reasons that have a lot less to do with divine wrath than the Gaalsien believed.
* Homeworld: Deserts of Kharak carriers are factory/aircraft carriers on treads.
* Homeworld: Deserts of Kharak for them, to say nothing of what happens when both forces team up and push back against the Gaalsi.
* Homeworld: Deserts of Kharak. In one of the early missions they discover the wreck of the “first” expedition’s carrier.
* Homeworld: Deserts of Kharak of the kiithid to the north of the Great Banded Desert, which takes up the majority of the surface of the planet. Not much is stated about the Southern kiithid, though. The primary conflict in the game is between the Coalition and the Gaalsien religious fanatics. Later on, you also have to fight Kiith Siidim, who betray the Coalition.
* Homeworld: Deserts of Kharak reveals why they have this reputation; the descendants of one of the two main religious factions secretly built their forces for centuries and made a nearly successful attempt to conquer the world and destroy what little temperate land still existed on the planet. Then the descendants of the other side snapped during the war and tried to form a third faction. It turns out that the main elements are actually true, although mistakenly ascribed to a god rather than a rival star empire.
* Homeworld: Deserts of Kharak said that they intended to make a "naval" game. What with the aircraft carrier on treads. Wind-powered sand ships capable of making the trip from pole to pole appear in the backstory.
* Homeworld destruction, its core was salvaged by the Vaygr, making it the Third Core that allowed them to move against the Hiigarans.

* Homeworld Evacuation: An entire planet is no longer inhabitable, so its residents have to pack up and leave for other worlds elsewhere in space.
* Homeworld Evacuation: Someone's homeworld becoming inhabitable, forcing the populace to leave.
* Homeworld Evacuation: Some people — maybe even everyone — manage to get off the planet before it's destroyed.
* Homeworld Evacuation: The planet is no longer inhabitable, forcing (a portion of) the populace to pack up and leave for elsewhere.
* Homeworld fame is acknowledged as a major influence on the art design.
* Homeworld features the Missile Destroyer, which has 4 missile launchers and has a special feature that allows it fire 32 missiles in about 5 seconds. It could single-handedly wipe out entire fleets of strike craft.
* Homeworld game has coloured space(s); in imitation of the art of Chris Foss, often seen on paperback covers of the seventies and eighties. Ship design and colours, too.
* Homeworld game has the eponymous progressive rock song from Yes as the credits theme. This is only a borderline case: Yes wrote the song because they really, really liked the premise of the game, and the devs asked them if they could use it.
* Homeworld games, your mothership is a space factory/carrier, able to manufacture everything else in your fleet and house all of its smaller craft, while also able to maneuver(or even make hyperspace jumps) to any part of the battle area like any other ship. However in the original game, on its own, it's still fairly vulnerable.
* Homeworld game was originally designed as a colony ship to reclaim the newly rediscovered Hiigaran homeworld, hence the onboard factories and cryo-trays. But after their current homeworld is destroyed by the Taiidan, it is used to produce warships.
* Homeworld had been allowed to remain intact for 4000 years. Not very pretty.
* Homeworld had you doing this as well. The Somtaaw in Cataclysm start out as just a mining kiith.
* Homeworld, half-human, half-machine Fleet Command still maintains her composed speech.
* Homeworld has a bad case of this. Missiles and kinetic rounds fired from ships will magically disappear into thin air (or thin vacuum?) once they reach their maximum in-game range. This is especially ironic considering that in the first Homeworld, missiles that don't hit a target will be seen flying off into distant space rather than disappearing. Realistically it should also to be possible to fire such projectiles from across the map and have them hit the large and slow motherships.
* Homeworld has Advanced Sensor Arrays buildable on Hiigaran super-capital ships that can detect enemy ships in hyperspace.
* Homeworld has a lot of mods. These come in two flavors, discounting total conversions:
* Homeworld has cloaked ships, and the second game has distortion probes. Cloaked ships can only be spotted via proximity sensors unless they reveal their position by opening fire.
* Homeworld has them sell the Somtaaw the designs for a downgraded variant of their own fighter design, and in-game allowed the player to built the actual fighter for the final battle.
* Homeworld have to spin their whole body around their axis before they can fire for no reason.
* Homeworld II expansion as canon, then a good number of them fled to another galaxy through a slipgate.
* Homeworld, in all its incarnations, makes this a plot point and a game mechanic at once. In the story, hyperspace cores and drives are used as a blitzkrieg weapon on more than one occasion. The tables have been turned against hyperspacing fleets just as much, provided a ship has a gravity well generator installed to interfere with the hyperspacing equipment. The same ideas stretch onto actual gameplay, although in much smaller scales than those found in the plot, for balance reasons.
* Homeworld includes many ships armed with plasma bomb launchers, notably the

Attack Bomber and Assault Frigate.
* Homeworld in multiplayer opening a hyperspace portal on top of another ship would result in both ships being destroyed. With super bad luck this could result in a destroyer opening a portal on top of a fighter and being destroyed, or with super good luck a frigate opening a portal on top of a carrier or even an enemy mothership instantly destroying it.
* Homeworld, in which the only real entity that can be called a character is the Mothership.
* Homeworld is way more advanced than anything anyone in the galaxy has, including an intergalactic hyperdrive, an inertialess sublight engine, and disassemble weapons that can take any ship apart in seconds. The Bentusi, afraid of the Beast, decide to flee the galaxy for another one using a powerful slipgate. Since the sequel almost completely ignores the expansion, this trope is once again in effect, except, perhaps, the fact that most of the Bentusi are gone.
* Homeworld is your fleet executing one: to reach Hiigara you have to penetrate the Taiidan Empire and the short way means you have to face the mighty Imperial border defences, so you pass through the Great Nebula, where the only defence is a small fleet near a research station because nobody (before you) has ever entered the nebula and lived to tell the tale.
* Homeworld mentions that the technology was developed based on certain Kharakian creatures that are able to hibernate for long periods of time. Maybe we should study bears.
* Homeworld more advanced. In terms of performance, Kushan and Taiidan ships are identical to their respective counterpart (barring a better turret emplacement of some Taiidan ships and the better hangar protection of Kushan carriers and Mothership), Turanic attack ships are the worst but their capital ships are better armed and armored than the playable races, Kadeshi fighters and frigates can dish and take a lot of damage but sacrifice respectively fuel capacity and speed, and the Bentusi are implied to be powerful but tend to get into situations that are barely survivable even for them.
* Homeworld. Neuroscientist Karen S'jet came up with a plan to use a brain for the task and insisted that she herself be fitted into the ship.
* Homeworld on Hiigara chose this moment to strike and managed to destroy the Imperial cloning lab along with samples of the Emperor's DNA. When the Emperor himself was killed aboard his mothership, this ended any hope of continuing the Imperial line.
* Homeworld preparing to evacuate their homeworld... Because they had realized Kharak was slowly becoming uninhabitable, hence the constuction of the Mothership to try and find Hiigara, planning to eventually moving their entire population there.
* Homeworld quips that the player race scientists realized that the most powerful directed energy system of the strike craft was their own fusion drive system. Hence they made a strike craft that can divert part of its drive thrust into very powerful plasma bombs.
* Homeworld series also features the defense field frigate, which projects a protective energy field for short amounts of time. Its usefulness is debatable though, as it requires a fair bit of micromanagement to actually shield other ships from enemy fire.
* Homeworld series of space RTS can have different formations depending on situation, like forming a wedge when attacking or spacing out when on the defensive. They're almost playing with the trope, though, as the formations actually have descriptive names like "X" and "Sphere".
* Homeworld series. The first time is when in the ancient times the Galactic Council had been called to settle a territorial dispute between Hiigara and the Taiidan Empire and favored the latter: when the Hiigaran found the Second Great Hyperspace Core (that allowed the ship with it to just go everywhere in the galaxy bringing a fleet with it) they just laid waste to the Taiidan homeworld, with the implied threat that they could do it to anyone. This backfired horribly, as the Galactic Council set on them the Bentusi, who had the First Great Hyperspace Core

and enough firepower to destroy their fleet. Then, with the Hiigaran utterly defeated and the Bentusi traumatized by the battle into disarming themselves, the Taiidan Empire was left as the single strongest military power of the galaxy: the Council ordered to leave the now harmless Hiigarans alone, but the Taiidan continued burning Hiigaran worlds until the surviving Hiigarans accepted to cede their homeworld and leave in exile on a desert planet.
* Homeworld, setting a vessel to aggressive tactics is usually met with the ship captain responding "Weapons set to full power. Show no mercy."
* Homeworld's in-engine cutscenes exemplify this trope. Big capital fleets squaring off set to dramatic music and voice-over basically sets up half the key missions.
* Homeworld's three chief Empires, the Kushan, Taiidan and Vaygr all trace their ancestry to advanced human Precursors. The Bentusi are cyborgs merged with their ships, and while their origins are unknown, their technology also came from the Precursors. The only distinct non-human intelligence is the Flood like virus known as, "The Beast" and it was successfully sterilized after a brutal war.
* Homeworld. Strangely enough (or, more likely, so as not to confuse the players even more), all four calendars have the same length of the year.
* Homeworld, the ancient Hiigarans left their hyperspace core to be discovered by their descendants 3000 years later. But the Ancient Hiigarans never built the core, they found it. It was made by a still older race known only as the Progenitors, who, according to legend, are said to have originated from beyond the galaxy.
* Home World, the Hiigarans' (and presumably other races') ships are designed with micro-thrusters that provide force opposed to the direction of the engines' thrust, thereby simulating drag. This was done partly for safety reasons, but mostly to keep the pilots from going crazy trying to figure out how to maneuver in a vacuum.
* Homeworld. The Mothership describes the destruction of Kharak with a tone of disbelief in her voice. The Fleet Command, meanwhile, audibly struggles against breaking down. The fact that they both pull themselves together quickly only makes this slip all the more jarring.
* Homeworld. Then again, everything the Progenitors did was on a massive scale.
* Homeworld. The narrators in particular help the scene by just barely maintaining a calm and collected tone.
* Homeworld: The powerful fleet that destroyed Kharak seems geared for being the final enemy, but prisoners quickly point out it's just a small and unimportant frontier force.
* Homeworld, the radiation clouds from a damaged hyperspace core were instead written as an area of space in which ships would be sucked into fiery tentacled hyperspace gates. The script describes them as "looking like they lead straight into hell". This interpretation would fit well with all the other religious symbolism in the game, but you can see why they dropped it; The radiation shields the Hiigarans eventually implement are much more believable than "portal into hell" shields.
* Homeworld: The Taiidan Empire. In ancient history the Hiigarans were the dominant power before the Taiidan overthrew them.
* Homeworld The titular Homeworld is named Hiigara, the word in their culture's ancestral language for "home", after an archaeological dig turned up a fragment of a plaque or tablet on which had been carved a starmap pointing to a region of space that was labelled as such. What their ancestors called the place while they were living there never really comes up, but apparently they decided to make it official and are referred to as "Hiigarans" in all subsequent games.
* Homeworld. The upper-class protagonist is initially surprised at the idea that the proles might be rebellious, as the government lets them have all the drugs and booze they want.
* Homeworld, they were also albinos. One of the generation ships is still floating in the center of the nebula, unmanned and slowly spinning in place.
* Homeworld, to be class names invented by the latter race's Fleet Intelligence. The native Taiidani names were never revealed.
* Homeworld to become the Mothership's core, and is now the Mothership's voice and "soul" through the entire game. In the sequel she continues being the Mothership,

but the ship itself changes.
* Homeworld to reach the place you have to transit through the Great Nebula, where the locals treat you as an invader in spite of being just passing through and willing to leave without damaging anything.
* Homeworld to say the least. Orbital bombardment would appear to be the wrath of a vengeful god to a primitive people.
* Homeworld trilogy equip their ships with hypervelocity railcannon firing kilogram balls of aluminum (because beam weapons are useless at long range) so rapidly that the stream of cannonballs looks like a solid bar.
* Homeworld truly lives up to this title. Characterized by his extraordinary corruption and paranoia, the Emperor maintained law and order over his people across the galaxy through sheer military might, resorting to brutal and insane tactics to put down anything he perceived as a threat to his own power in the Empire, which only sowed dissent among his people who grew disillusioned with the regime. When informed that the descendants of the defeated Hiigaran Empire, the Kushan, had established hyperspace technology and intended to seek out their former homeworld which now serves as the seat of Imperial power, the Emperor brazenly launches a major assault on the Kushan's home planet to ensure the destruction of their race. He then boasts of the fleet's success to the Empire, which instead triggers a determined rebellion within the Taiidan ranks against their leaders, in turn fueling the Kushan Fleet's fight against the Empire. Subsequent efforts to massacre sympathizers of the rebellion along with the peaceful Bentusi who aided the Kushan quickly turns the entire galaxy against the Emperor, all while his many fleets face a series of devastating defeats at the hands of the Kushan and their rebel allies. Ultimately, his own paranoia serves to unravel his empire as his actions trigger a brief but massive war that sees the destruction of his armada and ultimately himself as he oversees the Empire's last stand, leading to the dissolution of the old regime and his enemy's reclamation of their long-lost world.
* Homeworld Turns out to be a subversion. The Taiidan knew all about the colony and, even after four thousand years, still monitored it. They just didn't announce their presence.
* Homeworld want to antagonize the Hiigarans - Makaan learned that the hard way.
* Homeworld was not universally popular with the fans, to put it mildly.
* Homeworld. What they could have belonged to, and who could have possibly built such structures, is never explored.
* Homeworld, where a religious faction on Kharak also opposes any attempt at developing space technology or studying wrecks of spaceships and even attacks the civilized kiithid, who attempt to mount an expedition to the strange object in the deep desert. The reason they are attempting to do that is because Kharak is becoming less habitable year after year, necessitating progress.
* Homeworld, where the song "The Ladder (Homeworld)" by Yes recaps the story of the Kushaani's epic voyage to their original homeworld, Hiigara. Notably, while it's done as a rock ballad, the lyrics are reminescent of a cryptic ancient chant straight out of a mythic retelling of their famous journey.
* Homeworld, whilst equipped with point defense weaponry, cannot target an enemy ship visible on radar tracking, which is out of visual range.
* Homeworld whose technology the third game revolves around didn't have anything remotely that advanced.
* Homeworld, with a yet-unknown release date (as of the time of this writing — the company has said they will provide a specific time frame in 2020) and using the company's propietary 2d20 system.
* Homeworld with significant carrying and production capacity, and there are examples of most other ship types.
* Homeworld you can send a right click command KAMIKAZE! to turn your ship (regardless of size) into flying torpedo. In skillful hands, even the humble unarmed harvester can rack up quite a kill score. A ship simply trying to move through the space occupied by another can lead to spectacular results as well, though both ships will take damage; courtesy of some oddities in the engine and AI, the weird needle-shaped super-carriers in the nebula missions seem to score most of

their kills when they sideswipe your ships whilst trying to aim their forward guns. Then there's that one level when the enemy strap a thruster-pack on a planetoid and use it as a really big missile...
* Homeworld. Your race's planet is burned while you are out testing your brand new colony fleet. You then set off towards your original and long forgotten homeworld, fighting all that oppose you and making use of whatever resources and allies you can find on the way.
* Homewrecker turned on their heads), turned one room into one of these.
* homicidal for such a feat. Some of the Foundation's staff are even wondering if 682 can truly be considered 'alive'.
* Homicidal Lord Winder turned Ankh-Morpork into a police state out of paranoia.
* homicidal maniac, he's not good at it, but somehow the kid seems to stay pretty okay.
* homicidal' schtick. (It doesn't hurt his closest friends, writers and castmates are gay.)
* Homicide also recounts how they'll often treat the rookie to a greasy breakfast before heading to the morgue for much the same reason.
* Homicide: A Year in The Killing Streets, he claims that convicting innocent men is unlikely unless lawyers convince them to accept a plea bargain.
* Homicide: A Year on the Killing Streets, another police show set in Baltimore, which also includes a storyline about newspaper reporters.
* Homicide: A Year on the Killing Streets, a uniformed cop is chowing down on a beef sandwich after a particularly gruesome body is found. He explains that they only get one meal break per shift.
* Homicide: A Year on the Killing Streets he discusses one cop who ran an entire African-American family through the police databases after they moved in next door, yet was diligent in his pursuit of any murderer, regardless of the race of the victim. Simon portrays it mostly as about pride; they're not about to let a little thing like their own blatant racism get in the way of proving their smarts.
* Homicide: A Year on the Killing Streets is essentially a compromise between a court system that wants to see the rights of the accused protected, and a society that wants to see crimes punished (because confessions are, by and large, the most effective vehicle for that).
* Homicide: A Year On the Killing Streets, one of the detectives receives a phone call from a police officer reporting another body and asking what they want done with it.
* Homicide: A Year on the Killing Streets. Rule #10 in Homicide: There is such a thing as a perfect murder. Always has been, and anyone who tries to prove otherwise merely proves himself naive, romantic, and a fool who is ignorant of the first nine rules.
* Homicide: A Year On The Killing Streets" several times between being photographed at the precinct and being dropped off at central booking.
* Homicide: A Year On The Killing Streets took much of its inspiration. Whilst acknowledging that genuine police brutality does exist, the author notes that since most of the murders that the detectives face occur either between criminals or to people that the detective has no particular personal stake in, there's actually not a great deal of incentive for the cops to risk the case, their clear-up rates, and their careers to rough up some local criminal simply to get him to confess to killing another local criminal. Of course, the book did have an example of a case blowing up when one detective said that they had a phone book in the interview room to look up an address while the accused said they had beaten him with it.
* Homicide: A Year on the Killing Streets, when they're sent to investigate a murder during a foggy Baltimore morning, "just like Sherlock Holmes".
* Homicide became tag team partners to take on the partnership of Adam Pearce and Brent Albright.
* Homicide Hunter: A cop working with Lt. Joe Kenda (the "hunter" in question) notes this as the reason why he's suspicious of a missing woman's husband—aside from the man's detached demeanor, the man hasn't followed up with the police once since reporting his wife missing several days

ago—something highly unlikely for a concerned spouse.
* Homicide Hunter. Although Kenda isn't this, he mentions that contrary to what TV depicts, even a detective will spend a lot of time at a desk doing paperwork—several episodes opened like this.
* Homicide Hunter and doesn't have enough evidence to prove it in court.
* Homicide Hunter cases that haven't been covered in the TV show (but is in Kenda's new book) involves an elderly man who shot his slacker grandson after the latter wolfed down the Popeye's chicken wings he'd just bought.
* Homicide Hunter), he's gotten numerous people to admit to what they did by assuring them, "I know you didn't mean to do it." and pretending to understand their feelings.
* Homicide Hunter. Lt. Joe Kenda arrives at a house to find all five family members dead. Initially perplexed, as there are no signs of violence, he soon notices their cherry-red complexion—the classic sign of carbon monoxide poisoning. It turns out that rather than hire an expert, the family's landlord decided to replace their heater himself, but obviously had no idea what he was doing.
* Homicide Hunter, Lt. Joe Kenda notes that several of the cops threw up and that he himself had to struggle to not do this.
* Homicide Hunter: Lt. Joe Kenda, since it covers cases from all through Kenda's career, frequently runs into this in the recreations. All the vehicles are contemporary to when the show was produced (2011 - on), and thus you see may a case set in the late 1980s where police cars not only have modern styling but LED lightbars and a supposedly low-income hotel has a 42" LCD flatscreen TV in the lobby.
* Homicide Hunter segment, Joe Kenda notices a hole in the living room wall of a dead woman and quickly deduces that her husband is lying through his teeth about their happy marriage (presumably, he caused it when trying to hit his wife).
* Homicide: Life on the Street, a hotel clerk tells the detectives everything they want to know about a guest in one of her rooms by explaining, at length and with not a hint of irony, exactly what it is she's not allowed to tell them.
* Homicide: Life on the Street, a man accused of killing a woman with his car just starts repeating "I was drinking" over and over, to the point where it becomes creepy in itself.
* Homicide: Life on the Street, a man (played by Vincent D'Onofrio) falls in front of a subway train and gets pinned between the train and the platform. When told he will most likely die within an hour, he asks them to find his girlfriend, who's out jogging. They don't find her and at the end of the episode when the paramedics were taking him away, she's shown jogging by.
* Homicide: Life on the Street, a man's corpse was found at the site of his murder ... inside the morgue.
* Homicide: Life on the Street asks Bolander what kind of music he likes, and Bolander grudgingly admits to liking Elvis. Munch responds, "The man's left the planet."
* Homicide: Life on the Street as well as feature films. Kyle Secor also directed one episode. Steve Buscemi, who appeared in a guest role in Season 3, got to direct at least one later episode, in which he did not appear.
* Homicide: Life on the Street, Bayliss discovers that Luke Ryland, a child molester he'd arrested earlier in the series, had been released because court backlogs had delayed his trial so long that the case was thrown out (on the basis that you couldn't just detain someone indefinitely without trial). At the end of the episode, Bayliss quietly packs up his desk and leaves the department, just as two of the other detectives discover the body of Ryland.
* Homicide: Life on the Street because of character John Munch. SVU has a dozen seasons more this predecessor and has survived the retirement of his character.
* Homicide: Life on the Street, believing them to be real law enforcement personnel.
* Homicide: Life on the Street by spreading rumors among the various factions. It actually blows up in the squad's face, although unlike ex-partner Kellerman - who had previously roiled things by killing Luther Mahoney - Lewis keeps his job.

* Homicide: Life on the Street Calpurnia Church, who had numerous husbands and other relations murdered after taking out life insurance. Her family were well aware of this, but they were convinced she had voodoo powers and could not be stopped.
* Homicide: Life on the Street case which resulted in the same. Of course, Baltimore (where both fictional and real-life murders took place) is notable for having a particularly large majority African-American population, which may explain it.
* Homicide: Life on the Street, Detective Howard has just quit smoking (though we don't know it yet), and naturally, everyone around her is smoking, which eventually causes her to go ballistic. Detective Bayliss also tries to quit, and they eventually have to work together because their respective partners (Felton and Pembleton) refuse to quit.
* Homicide: Life on the Street: Detective (later Sergeant) Kay Howard is the only woman detective on the squad the first few seasons. She despises women police officers, calling them "secretaries with badges", and is notably harsher with them than her male partner, Detective Beau Felton, is.
* Homicide: Life on the Street: Detective Paul Falsone goes by the boxing stage name "Paul 'Sugar Ray' Falsone."
* Homicide: Life on the Street: Det. Pembleton is a rare example of "empowered" Non-Action Guy; Pembleton is constantly portrayed as an ace detective and as one of the most prominent and charismatic characters of the show, and yet he detests weapons and is a lousy shot.
* Homicide: Life on the Street did this at least twice, with the same twist both times: the cop killer is himself killed shortly afterward, and the unlucky detective assigned to the case finds that nobody cares about justice for a dead cop killer.
* Homicide: Life on the Street due to some implied infidelity on Lewis' part.
* Homicide: Life on the Street ends with the death of at least one major character (and one ambiguous but strongly implied death).
* Homicide: Life on the Street episode "In Search of Crimes Past", Bolander discovers that the reason that the wrong man was jailed 16 years ago was because he didn't ask whether the victim was having an affair with the true killer's wife. He later wonders how many other cases he might have unknowingly stuffed up because he failed to ask the right question.
* Homicide: Life on the Street featured someone firing two guns at once, it was a maniac shooting up several police officers in the third-season episode "The City That Bleeds".
* Homicide: Life on the Street frequently went to plea bargain by the end of the story.
* Homicide: Life on the Street: Gary D'Addario, a retired police commander, inspired the character Al Giardello, and played a recurring role as QRT head Lt. Jasper.
* Homicide: Life on the Street had Emma Zoole, played by 5'1.5" Lauren Tom, briefly dating Tim Bayliss, played by 6'4" Kyle Secor. Before that, she flirted with the 6'2" Lewis.
* Homicide: Life on the Street had Meldrick Lewis frequently tell the same filthy joke, of which the audience only ever got to hear the punch line: "You're not here to hunt, are you?" In one episode, his partner Kellerman only says that line, to which Lewis replies that the build-up to the punchline is the whole point.
* Homicide: Life on the Street; he's not exactly lovable and cuddly, but he'll walk through fire in order to stick up for his detectives.
* Homicide: Life on the Street, if you count Muppet versions of the character. All this also fits into the Westphall Hypothesis above.
* Homicide: Life on the Street: Interestingly enough, we never see the man in question. When a beautiful woman reports her husband's disappearance and presumed murder, suspects include his equally gorgeous mistress (who's innocent). One of the detectives expresses complete shock and confusion as to how a "2", as he describes the victim, was able to not only snag two "10s", as he describes the women, but was

also able to string them both along when they both could have easily dumped the cheating lout.
* Homicide: Life on the Street investigating the case; official policy is not to let on to the locals, hence their apparent lack of interest. Satisfied, the cop agrees not to let on that he talked to them.
* Homicide: Life on the Street, involving two men put on trial for murdering one of their business partners, with the fact that the body was never found raising questions about whether a murder was even committed. In his closing argument, the defence attorney dramatically declares that the 'victim' is in fact about to walk right through the courtroom doors, prompting everyone to turn in astonishment... but when he doesn't show, the attorney confidently declares that, since everyone was nevertheless convinced he would, the only possible option is to acquit his clients since no one can be certain that he is dead. When, against all probability, the jury convicts, the astonished attorneys corner one of the jurors, who reveals that while everyone was looking at the doors, she was looking at the defendants, who were the only people in the courtroom not to turn around.
* Homicide: Life on the Street. Kellerman's persecution in Season Five is mostly bad luck and the cold treatment Gharty received is based more on apparent cowardice on his part.
* Homicide: Life on the Street may hold the title of longest single Good Cop Bad Cop sequence. The Emmy Award winning episode "Three Men And Adena" is literally a single, forty-five minute long episode set in an interrogation room, with the two main cops taking on the necessary personas.
* Homicide: Life on the Street mentions that one of the detectives had been called home by his wife to deal with a rampaging mouse. "I disposed of the body, but considered leaving it as an example to others."
* Homicide: Life on the Street, Munch organises and attends the funeral of his ex-wife's much-hated mother, a literary critic. The only people who attend are Munch, his ex-wife, a shill who has been paid to sit in the front row and wail at the top of her lungs and the author Peter Maas, who has only turned up to make sure that she's dead owing to a bad review she gave of one of his works. Munch later ends up giving her a flattering, if tactfully-phrased, eulogy in front of his co-workers at a Christmas party later in the episode.
* Homicide: Life on the Street once had a murder at an exclusive country club, that appeared to be one of these. After a Christiesque setup and a cutaway, the BPD detectives had the case closed by the commercial break.
* Homicide: Life on the Street originally made up as fiction by an American forensic scientist.
* Homicide: Life on the Street, several of whose characters made guest appearances on the TV program. The second shift commander even became a regular character for one season.
* Homicide: Life on the Street, so he's been at least a demiurge for some time.
* Homicide: Life on the Street, some detectives are discussing someone's easily-punned last name. Kay Howard wonders aloud whether the guy in question got teased a lot as a kid, prompting her partner to reply:
* Homicide: Life on the Street than as the child-killing pedophile he happens to be. Unfortunately, his attempt at confessing reveals that he's completely ignorant of how the shooting went down.
* Homicide: Life on the Street. The detectives are so used to dead bodies that seeing corpses has practically no effect on them and they're prone to gallows humour. This makes the cases that do stand out all the more powerful such as Adena Watson, or the shopkeeper murdered by Luther Mahoney. The more difficult aspects come from shooting people on the job or working cases where children are the victims.
* Homicide: Life on the Street. The "Documentary" Episode discussed this at length by implying that it is only natural for a man, even an innocent one, who has been arrested, accused of a violent crime, dealing with hostile or indifferent officers, and generally terrified, to ask for an attorney. They also show that the reason many criminals don't ask for Legal Aid is that they fear being charged without

saying their piece or offering an explanation.
* Homicide: Life on the Street (Though he was more an intellectual snob than racist)
* Homicide: Life on the Street. Tom Fontana (co-creator of the former) noted that the Law and Order actors wanted to do more humanised, character driven shows following their appearance on Homicide. As a result, the next two seasons were something of a compromise.
* Homicide: Life on the Street uses a white board with victims' names on it to track case progress.
* Homicide: Life on the Street, Walt McPherson played a uniformed officer in the first season who finds a piece of evidence. He appears later, starting in the third season, in a recurring role as homicide detective Roger Gaffney. Gaffney rises from detective to lieutenant to captain.
* Homicide: Life on the Street with the Detectives often cracking jokes at crime scenes or wondering about the correct pronunciation of "Araber."
* Homicide: Life on the Street would sometimes start with a standard cold opening in which the detectives start their investigation or some other plot point is introduced, but some would just be like sitcom openings - little sketches unrelated to the actual story.
* Homicide: Life on: "This show contains adult content and is brought to you by the letter H."
* Homicide). The Baltimore PD Homicide Unit tried to take down the real board, citing poor morale and the fact that it encouraged rivalry between detectives instead of information-sharing, but ended up leaving it in its various precincts after officers stated that it was a useful tracking tool.
* Homicide, the stabbing man of FIP, Ring of Honor and Rottweiler fame
* Homicide Trinity). Wolfe singles out Paul Hannah as a suspect because he's been paying his rent on time despite not having a job.
* Homicide was described in such terms by the Warriors Of Wrestling commentary. He's good on the mat, in the air, in a brawl and can literally carry men much bigger than himself. Unfortunately he's spent a good deal of his career against men who can do it all better like
* Homicide was this during his Ring Of Honor feud with Colt Cabana. Yes Cabana had said racially insensitive things within Homicide's earshot, but that hardly warranted attempting to murder the man with drain cleaner. Unless you were the ROH fans that is, as they cheered Homicide the entire way through.
* Homing Boulders: Where any projectile homes into its target—even things like arrows and boulders.
* Hominids and early humans used to be eaten rather regularly by extinct saber-toothed cats, such as
* Hominids by Robert Sawyer is about a Neanderthal scientist from a parallel universe who falls into our universe as the result of a lab accident. A news dump at the beginning of one of its chapters has:
* Hominids Zona was shown to have an extremely large and rounded pregnancy bump from chapter 6 onwards.
* Homo are known to be able to manufacture tools, and the latter lineages, such as Neanderthals, have been shown to be capable of elaborating art. There is also genetic evidence of two of those extinct lineages (the Neanderthals and the poorly known Denisovans) having mated with modern humans.
* Homo drakensis have extremely fast metabolisms, one side effect of which is that they metabolize alcohol so quickly it's almost impossible for them to get drunk. The protagonist is shown downing several double brandies one after the other, which apparently has the same effect on her that one glass of wine would on a human.
* Homo epimetheus, about as intelligent as non-human apes. Their stated goal was to embrace a technology- and language-less existence in order to be closer to the true nature of the cosmos, but it seems that this was part on an elaborate scam by the foundation of sapient humans and AIs that were entrusted with their funds and possessions. The downgraded epimetheans, however, notably outlived the foundation by millennia.

* Homo erectus like. The different subspecies are so obviously different that for a very long time their remains were believed to belong to almost a dozen different hominid species; this was only resolved with genetic testing. Meanwhile, anthropologists can't even tell the "races" of modern humans apart from skeletons.
* Homoerotic Dream involving homosexual relations, generally from a straight character.
* Homoerotic Subtext and their interactions not changed is anyone's guess.
* Homoerotic Subtext, Faith entices Buffy out of a chemistry test for some vampire slaying by breathing on the window, then drawing a love heart with a stake through it.
* Homoerotic Subtext. The Sumerian goddesses Inanna and Ninshubur could be as well.
* Homoerotic Subtext: When homosexual expressions are forbidden, some authors resort to this to put them in anyway.
* Homo Erraticus is supposedly written by Gerald Bostock, adapted from a manuscript he discovered. The manuscript was written in the early 20th century by Ernest T. Parritt, who, due to malarial fever, had delusions of past lives in history, as well as dark prophecies of the future.
* Homo Faber couldn’t have known that the young woman he slept with was his daughter.
* Homo floresiensis or a completely different species from another branch of the family. Neanderthals (and Denisovan humans, to a degree, at least they left DNA) on the other hand have left more remains to go on. They were pretty closely related to us and there is (some) evidence for small amounts of interbreeding.
* "Homo for the Holidays", where Queer Duck and Openly Gator visit Queer Duck's family for the holidays.
* Homo genus are about that old too. This is not a coincidence. There is a reason why we're apex predators practically everywhere we wish to go and why everything short of another apex predator tends to leave us alone.
* Homo habilis due to having mutated so much — the special root didn't grow right on Earth, so we mutated far too much without any Protectors to keep us in line. Human Protectors' ability to work together is probably a consequence of another of their quirks: a significantly heightened tendency to adopt the entire species as their bloodline (it seems to come naturally to human Protectors, whereas for Pak Protectors it is a rare reaction to the already rare situation of losing one's entire bloodline but somehow still surviving). It tends to be easier to work together if you have the same goals.
* Homo habilis in Eurasia. They appeared 2.6 million years ago and were phased out 1.7 million years ago, 900,000 years later.
* Homo heidelbergensis are shown to be smaller, aroiund the size of regular humans or even Neanderthals, which hints at a great diversity amongst them, akin to our species.
* Homo heidelbergensis, was hit with the same hard object, likely a rock, on two different areas of the skull shortly before his death, which excludes an accidental impact. A little more ambiguous is "Skull 5" from the same site and era, who received a single blow to the face and died months or years later from an infected broken tooth. Atapuerca itself has instances of cannibalism going back over 800,000 years, but it can't be excluded that those were eaten after their natural death.
* Homo homini lupus (The man is a wolf unto man) is thoroughly offensive. It shows poor taste to compare a ruthless and ignoble beast to an intelligent, compassionate and social creature with such beautiful golden eyes and silvery mane."
* Homo Magi and her innate magical power from ritual spell-casters such as Felix Faust who must wrangle their power from supernatural sources. DC Comics does have Metahumans too, which are Humans that have been modified through scientific or non-scientific means, such as evolutionary processing, genetic experimentation, birth, training to gain powers, wish granting, enchantment, blessing, etc without their physiologies being altered. Superhumans mainly use superpowers, whereas Homo Magi mainly use magic, though they are both based on modification, unlike mutation, where a being goes through physical transformation and deformation. However, there does exist Metahuman-Homo Magi hybrids as well, yet Jinx, Artemis, Blackbriar

Thorn/Druid, Charlotte Gage-Radcliffe/Misfit, Deborah, Giovanni Zatara, and June Moone/Enchantress are good examples of this, as they use both magical and regular superpowers.
* Homophobia among werewolves is partially explained by the near immortality of the species. Many or most are centuries old, born when
* homophobic behaviour (for the record, he's the only gay character in the movie). And then there's all the racist and sexist unironic caricatures...
* Homophobic Hate Crime: If such an attack results in the victim's death.
* Homophobic Hate Crime: The evil gays and lesbians deserve to be injured or killed!
* Homophobic Hate Crime: The unfortunate situation of people being attacked or killed because of homophobia towards them on the attacker's part.
* homophobic, racist and several other things (like Chelsea's mother), but comes out and connects with an old army buddy, with whom he becomes romantically involved.
* Homo said, when speculating on the possible existence of other beings, that if they wore clothes, used tools, domesticated animals etc. this would show they were sapient and (for Augustine) possessed souls.
* Homo sapiens cosmonatalis, custom-made by Lightbearers as space station slaves — Spaceborn.
* Homo sapiens cyberis — Mechanists. Not quite true to the trope, but in-universe it would be considered proper scientific nomenclature.
* Homo sapiens idaltu or "Elder human" was an actual human subspecies that lived in Eastern Africa between 160 and 150 thousand BC.
* Homo sapiens, if you condense the age of the Earth into 24 hours, the entire human history can be summed up in 10 miliseconds.
* Homo sapiens invictus), who have been modified enough to be considered a subspecies. Along with being taller, faster and smarter, they can breathe chlorine and have bone blades growing from their arms.
* Homo sapiens sapiens), who have thick skin, bony protrusions on their elbows, brows, and chin, and latent psychic powers; and the Talus (''Homo sapiens talus"), who have short noses, high cheekbones, and more importantly, prehensile tails. Unlike nearly every other species in the game (except amazons and ogres), they are genetically human enough to interbreed with each other and baseline humans.
* Homo sapiens sapiens who remained in Africa never encountered any Neanderthals.
* Homo sapiens suprahomo, genetically polished and cherry-picked, but not quite supermen — Lightbearers, extinct as a consequence of Andolian and Shapers finding out about Spaceborn.
* Homo sapiens, two species (sometimes thought of as the same species) of human being, who were very similar to each other, intermixed during the later Pleistocene. The result is that most people today have some Neanderthal genes.
* homosexual behavior is much more common among zoo animals than among the same species in the wild, and is even displayed in captive species that in the wild are rarely or never homosexual (such as koalas). The same article briefly discusses this trope as applied to humans — 40% of high school football players admit to having engaged in same-sex kissing or similar acts.
* Homosexuality in the Royal Navy was the subject of one episode of the Channel 4 parody news show
* Homosexuality itself is not a cause for exemption in Finland; "homosexualism disturbing to oneself" is. Many
* Homosexual men in fiction are sometimes given gender-bending names to emphasize their
* Homosexual people very often develop sibling-like relationships with their friends of the opposite sex.
* Homosexual Reproduction. The most cherished are the Children of Love who are born from a combination of genes from two people who are in love with each other, even if only one is legally recognised as the parent.
* Homosexual Reproduction: Two characters of the same sex somehow have a child that is biologically related to both of them.

* Homosexual Reproduction: Two individuals of the same gender manage to produce a child.
* Homosexual Reproduction: Two people of the same gender manage to produce a child.
* Homosexual Reproduction: Two people of the same gender somehow manage to produce a child.
* homosexual, this was the traditional custom among pederasts who would, with the help of their target's friends, snatch the younger male away and shower him with gifts and attention. It was never to keep him away altogether, as he was always returned safe and sound by the end of the ritual, but that always took two months and the only one who really had a choice in this situation was the older guy who attempted to buy his love.
* Homosocial Heterosexuality: Women are passive things for men to fight, barter, or haggle over.
* Homo Sol accept the other aliens as equals. The sequels show that this actually works perfectly.
* Homo Superior: equal parts technology and biology, it uses the best of both worlds.
* Homo superior", it's established that mutant powers are actually the result of a simple genetic carrier, "the mutant gene" (which somehow gives mutants powers which can break all the known laws of physics).
* Homo superior. With a very active immune system, psychic powers, and looking like young adults when they're only children, they're the ideal evolutionary step.
* Homo was a species of early human with large feet and short height, and lived only on the island of Flores tens of thousands of years ago. Various parts of the world, such as the Americas and Australia, were not colonized for millennia because of the expanses of water surrounding them. Eventually modern man got to both.
* "Homo" (which contains another example on this list). Though the last example is inherently funny anyway.
* Homo, yet have cranial features that would not be out of place 2 million years ago.
* "HOMR", after which Itchy puts a shark in his place while Scratchy closed his eyes.
* Homsar and Senor Cardgage even indulged in a competition on that very topic in
* Homsar has never said "I was raised by a cup of coffee". That was Strong Bad, doing an impression of Homsar. It doesn't help that one of the
* Homsar only speaks in non-sequiturs, which is most likely the result of being hit by the Heavy Lourde in his first appearance.
* Homsar the painting, where it turned out that the Rocoulm just wanted someone to come in so he could entertain them. For eternity.
* Homs do, but they have a longstanding tradition of having a Homs consort in their royal family. The same goes for the half breeds that have resulted from such unions, and you help one get together with her Homs boyfriend on a particular quest. They never really seem concerned by the differences in their longevity in either case, though.
* Homunculi are also rendered immobile if the red nodes on their bodies are penetrated. This is shown in the manga where Wrath captures Greed by piercing his katanas into his nodes and Lan Fan throwing her kunai into Envy’s forehead. We also see this in the 2003 anime when Lust is punished and kept nailed to the wall.
* Homunculi, creatures created by alchemy, are stated as unable to reproduce. They exist outside of any ecosystem.
* Homura Akemi fights using regular guns. Thanks to her magical powers (namely, a

* Homura and Koharu, the two members of the Konoha Council, always make their appearances together. They were teammates and seem to have stayed together through the decades.
* Homura and Kyoko, lampshaded in Homura's case. It seems that in the show, hair length is inversely proportional to how happy and girly you are as a character (at

least initially).
* Homura. Because he's linked up to her temporal abilities, it doesn't work.
* Homura, even moreso. When she actually bothers to fight, she neutralizes powerful witches and
* , Homura explains at length why she considers Sayaka a clueless buffoon, to the girl in question. This is not because Homura doesn't know to be civil, but because she doesn't care about it.
* Homura had a Face–Heel Turn, she blew both of them out of the water.
* Homura himself also denies this, in spite of his 'married' status to Minato. Like Minato, no one believes he is still straight. While Homura is perhaps the only member of Minato's harem who didn't join the fun
* Homura's goal to defeat Walpurgis Night and preventing Madoka from becoming a magical girl, and
* Homura, she declares "Let's just become monsters together... that would be an ok ending, too."
* Homura's magically granted "weapon" is non combative, a small buckler shield that grants her unlimited storage space and controls her special ability. Therefore, she must rely on non-magical weapons from outside sources, like homemade pipe bombs, pistols and shotguns
* Homura stepped in to fight - Jack immediately asked her to step aside not because she had lost, but because he didn't want her to get caught in the crossfire.
* Homura was originally a dorky version of a cute one in the original timeline; glasses, pigtails, kind yet unsure of herself, etc. The contrast with
* Honami is very energetic which goes along with her status as a social butterfly.
* Honda debuted the Civic Type R on the 6th-generation EK9 hatchback Civic platform, exclusively in Japan on August 1997. Europe got their first Civic Type R in 2001, on the 7th-generation EP3 platform, not too much of a wait. Where does that leave North America? We didn't get the Civic Type R until
* Honda has also fallen victim to this. A new model was to be introduced under the name "Fitta", when it was discovered that the word is a crude term for female genitalia used in Norwegian and Swedish. The car was renamed to "Jazz" in certain markets and "Fit" in others.
* Honda, in its sporty Civic Si model, decided for the 2012 model year to add an indicator light that lets the driver know when VTEC kicks in.
* Honda: In some dialects of Indonesian, Honda is became the generic word for any two-wheeled motor vehicle with internal combustion engine regardless what brand it actually is, of all brand names.
* Honda is sometimes hit with this. They used to make comparatively tiny cars that were practical, fuel efficient, and sporty, all at the same time. Now the Accord is a veritable land-yacht and the Civic is barely a compact car, and they're not particularly fun to drive. The fanboys cry that Honda has abandoned them, nevermind that Honda is a publicly traded company with a duty to maximize profits, and it's very hard to make a business case for targeting specifically a very small section of the market to the exclusion of the rest. The kicker is the Honda Fit, which is everything Honda used to stand for, all in a modern, safe package.
* Honda is still doing this with all its adverts, failing to mention a single car or why their cars are better than the rest, only that Honda likes complicated puzzles and skydiving. In the UK, anyway; their US ads tend to be of the "
* Honda's "Cog" ad- a 2-minute long Rube Goldberg machine constructed from car parts. It was actually two sequences spliced together, but otherwise used no tricks. They're known as a 'Heath Robinson' contraption, in the UK.
* Honda seems to like to have one of these long feature adverts per year. One of them featured a full choir performing the sounds of a car during its journey, using nothing but their voices. This was, like Impossible Dream and Cog, only shown in full in cinemas (with crowds sometimes joining in the choir's singing).
* Honda's "Happy Honda Days" Christmas commercials twice featured famous 80's toy lines advertising Honda cars, with the voice actors who voiced these respective characters reprising their roles.
* Honda's "Hate" advert, and its associated web-advergame. LSD trips to sell

diesel engines.
* Honda's NSX sports car was produced from 1990 to 2005, and entered the nameplate hiatus of 12 years before receiving second-generation model. There was a planned
* Honda took a page from Domino's (see below) regarding their bread-and-butter Civic compact. The current design, introduced in 2011, was panned critically and commercially, with even Consumer Reports
* Hondo and Cortez date clandestinely due to fraternization rules preventing a relationship between them (she's his superior too). Once they get caught, it forces them to break up.
* Hondo-City Justice members they happen to see. Asahara manages to overcome it.
* Hondo is the only black member of the main SWAT team. When the white leader shoots a black youth during a raid, commander Hicks makes Hondo the team leader at a press conference despite the fact that Deacon is next in line. Hondo himself complains over this being an obvious policial move to soothe tensions. Indeed, when things calm down, Hicks presses for Deacon to become leader, but Deacon makes it clear he doesn't want to be part of some political game undermining Hondo. Several episodes have Hondo relating how he had to fight to prove he wasn't just a "token" member of the team.
* Hondurans are notable in that they don't have an accent, however their speech pattern is still distinguishable to other Spanish speakers because of this trope.
* Honduran white bats look like tiny puffballs with wings, black eyes, and a yellow leaf-shaped nose. They are also known to huddle together underneath leaves.
* Honedge, Doublade and Aegislash are ancient metal swords possessed by spirits, but are still considered ghost-types.
* Hone-onna, so it can be disconcerting at the least to see one's master flirting with a walking corpse. Her problem is her love comes off as a selfish sort of love; when she is found out she becomes desperate and the more desperate she becomes the more her "lover" drains away until he dies or is nearly-dead.
* Honerva, prior to becoming Haggar, though she regains her true form in Season 6.
* Honerverse's without first giving the planet a chance to surrender, is named after the world of Epsilon Eridani, which was leveled by such an attack.
* "Honest Abe Has a Close Shave" had a chunky felon named Boss Man try to steal Wrinklin' Lincoln from Mt. Rushmore so that he could glue him onto a headless sphinx to serve as a replacement head.
* Honest Action video about the injuries Harry and Marv sustain in the two films. Turns out it would take nine Harrys and fourteen Marvs to complete the two films. The five extra Marvs are from a series of bricks he takes to the head, thrown from several stories up, in the second movie.
* "Honest Apple" is more about not ruining someone else's good time than it is about what you choose to do with yourself.
* Honest Apple opinion. By having something she cares deeply about disparaged to her, Applejack realizes that she'd been doing the same thing when it came to the fashion show, and seeks to make amends.
* Honest Bob and the Factory-To-Dealer Incentives covered Head Like A Hole by Nine Inch Nails, complete with a talkdown in the middle.
* Honest Corporate Executive in public in order to ward off suspicion.
* Honest Corporate Executive, keeping all her money-making schemes within the bounds of the law and helping others.
* Honest Corporate Executive: The head of a corporation is a good person and refuses to use their company for unethical purposes.
* Honest Corporate Executive: The head of a corporation is honest and refuses to use their company to do anything illegal or unethical.
* Honest Corporate Executive: The inversion of the above; a businessperson who is decent and honest, and refuses to do anything illegal or unethical with their company.
* Honest Hearts can also be talked down, but only in one of the two ending quests. Otherwise, he is unceremoniously executed or runs away on his own.
* Honest Hearts DLC also practice this trope, and have never developed any skills, such as agriculture or foraging, that they'd need to survive in the Wasteland

without it.
* Honest Hearts DLC, if you side with Joshua Graham to crush the White Legs, the immediate path through the canyon will be blocked by a rockslide halfway, separating you from Joshua and forcing you to detour through the caves.
* Honest Hearts him and his mooks easily even if you do nothing at all.
* Honest Hearts, personal terminal entries found scattered around various caves in Zion Canyon point heavily to him having suffered from this.
* Honest Hearts, the entire Happy Trails Caravan party is killed by the White Legs, leaving the Courier to make the trek through Zion alone.

* Honey Honey sets up the quest. She has rich suitors from around the world after her fabulous fortune, and frustrated at her options, she sticks her enormous diamond ring into a cooked fish and throws it outside. The main character's cat eats the fish, swallowing the ring, and runs off. The princess says whoever can retrieve the ring will marry her, setting off the events of the series, which is a wacky chase across Europe for a poor young waitress and her cat.
* Honey Hunt when she tearfully announces to the press that she no longer considers them her parents and that "people like them should just burn in hell". Even after that though, she still shows instances of this trope at times.
* Honey, I Blew Up the Kid, Adam Szalinski was played by twins Daniel and Joshua Shalikar.
* Honey, I Blew Up the Kid after a Giant Adam is hurt by the static shock a tranquilizer dart that hit the Hard Rock Café guitar he was playing, the confused and frightened child begins to call out "Mama," through his tears, unaware that his mother now dwarfs him by a good fifty feet. The impact of the moment is enough that the once frightened crowd below is silenced and looks upon the child with sympathy, compassion and concern.
* Honey, I Blew Up the Kid commandeers an ice cream truck to distract the giant baby, Adam, while his dad gets the shrink ray ready.
* Honey, I Blew Up the Kid. Cue Wayne and his sons having a meal of peanut butter sandwiches.
* Honey, I Blew Up the Kid, Diane Szalinski (Marcia Strassman) is turned into a 250-feet tall giant, in an attempt to stop and pacify her accidentally giant-sized baby son, Adam. She grabs a helicopter in which the villain attempts to shoot Adam with a pacifier gun.
* Honey, I Blew Up the Kid movies ensues... The subtitles lampshade it:
* Honey, I Blew Up the Kid, they attempt to distract the giant Adam with an ice cream truck topped with a huge ice cream prop. He yanks it off and takes a bite out of it. Later, he yanks the guitar off the Hard Rock Cafe and tries to play it.
* Honey, I Blew Up the Kid, Wayne Szalinski's 2-year-old son Adam gets hit with a growth ray. The more electrical appliances that the little guy gets exposed to, the bigger he gets. Near the end of the movie, Adam goes to Las Vegas and gets even bigger, and at one point, two Japanese tourists briefly appear:
* Honey, I Blew Up The Kid whenever the child playing Adam refused to co-operate, including Wayne pretending to be a waiter when the kid starting insisting he wanted to go to a restaurant.

* ''Honey I'm Good'' has the main character being rewound to the beginning of his evening out with his friends every time he takes a drink. In true Groundhog Day form, he's the only one who notices.
* Honey is clad in only honey while suggestively feeding herself the same confection.
* Honey, I Shrunk The Audience opens with Wayne Szalinski crashing his hover-pod into an illuminated sign reading "INVENTOR OF THE YEAR AWARD". Afterwards, the remaining letters spell out "NERD".
* Honey, I Shrunk the Kids, a cat accelerated to human intelligence and body-swapped with a human learned English by watching television.
* Honey, I Shrunk the Kids), accidentally shrunken and wind up getting into some kid's McDonald's Happy Meal. The kid's mother had filled out a card for a contest that the restaurant was holding, so Mrs. Szalinski and the restaurant staff were able to get the address off the next card on the pad by adding lemon juice and heating the card.
* Honey, I Shrunk the Kids, Adam finally convinces Wayne to let him go to Baseball camp instead of Science camp. Where Wayne discovers he enjoys the statistics of the game.
* Honey, I Shrunk the Kids: Adaptation of the film series, focusing on the further adventures of Wayne Szalinski and his family.
* Honey, I Shrunk the Kids, after finally finding the Szalinskis, the four kids make all the noise they can, but the two of them simply turn away and head back to the house not noticing them. Ron, the youngest of the Thompsons, is in despair.
* Honey, I Shrunk the Kids after his wife finds a pack of cigarettes in his baseball cap.
* Honey, I Shrunk the Kids, Amy fantasizes about her history teacher who is too old for her. She then uses a time machine to go back to 1976 so he would be the appropriate age.
* Honey, I Shrunk the Kids: Amy has blonde hair in the movies, but in the T.V. series, she's a redhead.
* Honey, I Shrunk the Kids. Amy's boyfriend Ray does this on Nick, but Nick punches him in the stomach.
* Honey, I Shrunk the Kids and didn't want the wrestlers fraternizing in any kind of way.
* Honey, I Shrunk the Kids and he continues to improve the device there.
* Honey, I Shrunk the Kids and its sequels, the Szalinski household housed a few of these. In fact, it seems standard for inventors to riddle their houses with them in fiction.
* Honey, I Shrunk the Kids and save the titular kids from a (comparatively) giant scorpion.
* Honey, I Shrunk the Kids, and they are stuck that way until Wayne thinks to use a freezer-like device to slow down their molecules to normal speed.
* Honey, I Shrunk the Kids, a scorpion nearly consumes the children who take refuge inside a Lego brick.
* Honey, I Shrunk the Kids as they were at full-size. There should be no plot, because there's no way they could get swept up in the garbage by accident, and they should have the strength to jump up and activate the machine themselves - assuming their incredible density didn't make them fall straight through the floor.
* Honey, I Shrunk the Kids: a stray baseball landing on the shrinking machine is what actually makes it work. Though Wayne Szalinski is able to figure out why the baseball made the machine functional, and replicate the results.
* Honey, I Shrunk the Kids at worst, considering the reason why and how he and Diane got shrunken.
* Honey, I Shrunk the Kids doesn't hold up as well as the first two movies.
* Honey, I Shrunk the Kids does this with an ant and a piece of the discarded cookie the kids found.
* Honey, I Shrunk the Kids: either the calorie count of enlarged food remains identical, or some other side effect of using the shrink ray as an enlarger showed up in a way that threatened the food supply and somehow ruined that dinner.

* Honey, I Shrunk the Kids, end up having the appearance of Big Creepy Crawlies onscreen.
* Honey, I Shrunk the Kids episode, "Honey, We've Been Swallowed by Grandpa", a motorist drinking some takeaway coffee yells at the Szalinkis for nearly colliding with his car... only to find they've suddenly shrunken out of view. The bewildered motorist then exclaims he's going "decaf".
* Honey, I Shrunk the Kids had a group of these. They were involved in all sorts of conspiracies, up to and including the meaning of the pyramid on the back of one dollar bills. They are themselves aliens, and are killed by the family by tricking them into eating shrunk car tires that expand to their original size shortly afterwards.
* Honey, I Shrunk the Kids has four kids shrink to the size of ants and end up in the back yard, and their parents report them missing. Ron says to Amy, "I hope your face ends up on a milk carton."
* Honey, I Shrunk the Kids: In "Honey, I'm Wrestling with a Problem and the Chief", Nick and his friend, Joel, do this wearing a long trench coat, a hat and a fake beard, and they do this to sneak into a wrestling arena to try to help Wayne and police chief Jake. Joel brings along his accordion and tries to play "Pop! Goes the Weasel" to see if Jake could hear it and fight better so he could win.
* Honey, I Shrunk the Kids, is at least knowledgeable about it, as they have Quark do VERY little in the show. Though, at least one episode includes quite a lot of reaction shots from him...
* Honey, I Shrunk the Kids long tongue. The Power Perversion Potential was explicitly stated when, after rescue, Wayne promises his family to immediately reverse their changes but Diane, when the others leave, smiles and says she can wait a bit, and then gives him a kiss that has him wide-eyed.
* Honey, I Shrunk the Kids, Nick gets affected by one of Wayne's experiments, giving him the ability to suck other peoples' intelligences. As he becomes more intelligent (and evil), he develops an overly large, bald head.
* Honey, I Shrunk the Kids of the bumbling dad. But he is far from irresponsible, even though his inventions have done bizarre things to his loved ones. Big Russ Thompson, on the other hand...
* Honey, I Shrunk the Kids parodied this, when Wayne attempts to talk a home-security computer to death. It appears to work, but then he realizes "that only works in cheesy sci-fi shows!" and the computer springs back to life.
* Honey, I Shrunk the Kids putting the machine back together to return them to normal size.
* Honey, I Shrunk the Kids series, it's revealed that Wayne keeps embarrassing Diane every time they go to her law firm's picnics together since he keeps making these jokes.
* Honey, I Shrunk the Kids: The Thompsons are obnoxious neighbors, but never actually do anything wrong, and once they realize the danger the kids are in, are equally committed to saving them. In the end, the families seem to have become friends. The scorpion is a genuine threat, but it isn't malicious, just an animal driven by instinct.
* Honey, I Shrunk the Kids: The TV Series. Amy develops a boyfriend after she time travels into the '60s. However her time watch has a fail safe that'll activate and transport her home after a given time. After a bit of this, Amy decides to stay in the past permanently, sending her watch back in the process. However we find out that the fail-safe was due to the fact that anyone who stayed in the past for too long would be frozen and combust (sorta the timeline's own failsafe). Wayne is force to go back into the past and retrieve her before that happens.
* Honey, I Shrunk the Kids TV spin-off, a hipper Diane gives Nick a wedgie.
* Honey, I Shrunk the Kids, Wayne makes a high-tech eclipse viewer, which somehow allows him to see the near future. When he tries to show the truth to his neighbor, a cop, the neighbor just concludes that the only reason these things are happening (e.g. a car swerving and crashing) is because Wayne is the one causing them (e.g. running out in front of said car to try to stop it, resulting in the swerve and crash).

* Honey, I Shrunk the Kids, when Ron and Amy get into an argument, Ron plugs up his ears and hums "Stars and Stripes Forever". She gets back at him later by handing him a fistful of mud while softly humming the same tune.
* Honey, I Shrunk the Kids, where Wayne Salynzkie admits to memorizing a mnemonic device (a running gag in the episode) to decide which wire to cut, but gets it confused with the Mnemonic for Coral Snakes ("Red and Yellow, kill a fellow... Oh God, that's snakes!") He eventually calls up his son for the mnemonic... and it turns out to be wrong. In the end, the bomb is disposed of by shrinking it to the size of a firecracker.
* Honey, I Shrunk the Kids, which was pretty par the course for that show.
* Honey, I Shrunk the Kids with ease. Could be justified if she had absorbed at least a scientist's mind... But so far she had only met two lawyers. Seemingly, if you're smart enough, scientific knowledge generates spontaneously inside your brain.
* Honey is "in your morning, on your breakfasty toasty, in a jar, kind of."
* Honey Lemon shifts into genki mode whenever she's doing anything chemistry-related.
* Honeymoon: Bea's strange behavior would be kept mysterious through most of the film if not for the fact that the bright, descending lights pouring through her window on the first night make it pretty obvious that aliens are to blame.
* Honeymooners has Ralph winning a trip to Europe in a write-in contest sponsored by a diet food company, with the catch that he has to send in "before and after" photos of himself to prove he actually uses their product. He attempts to use Ed Norton as a stand-in for the "after" picture, with predictable lack of success.
* Honeymooners were among the other networks running various movies on January 1.

* Honey, We're Killing the Kids is a reality show that teaches families how to live healthier lifestyles. Each episode starts with the parents being shown pictures of their kids artificially aged, and told "this is what your kids will look like in

thirty years with their current lifestyle." The subjects are fat and have bad skin — and ugly clothes, messy hair, and slack, stupid facial expressions. At the end, after learning how to exercise and eat healthier food, the parents are shown new pictures of their artificially-aged kids — and this time they're smiling, made-up, and dressed well in addition to being thinner.
* Honey, We Shrunk Ourselves is about a guy who shrinks himself and his friends.
* Honey, We Shrunk Ourselves parody, their father and nanny) be shrunk, while the kids party, thinking they're home alone.
* Honey, We Shrunk Ourselves, telling them "This is the voice of... GOD.", scaring them out of the house.
* Honey We Shrunk Ourselves, the mother yells to overcome the noise of a nearby construction crew. The noise stops just as she's yelling about one of the kids having clean underwear, much to his embarrassment.
* Honey We Shrunk Ourselves), Wayne Szalinski describes the gramophone to his son as "an early record player". He then has to clarify that the record player was "an early CD player".

* HoneyWorks, and reveals their thoughts on the events and the person.
* HoneyWorks has this as its central premise. The singer is a typical teen playboy who fools around with girls and takes life in a lax manner, but only one person seriously dislikes him for it— and that very same person is the only one that makes him start reconsidering his actions, leading to an honest romantic pursuit.
* HoneyWorks - "Nakimushi Kareshi" is about Miku and Len breaking up. It has a sequel "Hajimeshi no Sayonara", which is about Miku wanting to get back together with Len, but realizing that he's already with someone else.
* HoneyWorks. She eloped with the poor suitor and seemingly got killed on the run. Flash forward to the future, the girl is now dating a nice, brunet who looks like the poor lover, but their time together is constantly disrupted by an unpleasant blond who is rather reminiscent of the rich fiance. Later, it's revealed that the brunet is actually her past rich fiance who's just pretending to be nice, while the blond guy is the poor lover, who's behaving crudely because he knows of the other guy's scheme.
* HoneyWorks. She started to reciprocate his feeling, but near the end of the music video, she saw him sweet talk other girls to get out of trouble, causing her to wonder if the things he's said to her is all a lie.
* HoneyWorks song "Love@Liar" follows a young girl, inspired by the sound she heard of a particular band, disguising herself as a boy in order to join it and pursue a music career.
* HoneyWorks' song "Mama", the daughter of the title character would eventually marry a man who looks a lot like her father.
* HoneyWorks tells the story of Mio Aida, who fell in love with her school mate Haruki, and the two were really close, but she never found the courage to "close the last 10cm distance" between them, and they eventually parted ways and moved on from each other. Tragically, Haruki's song, "Goodbye, Our Mutual Unrequited Love" reveals that he actually feels the same way about Mio, but likewise was too scared to actually confess to her.
* HoneyWorks tells the story of two students who see each other at the train car on their way to school everyday, and have spent weeks after weeks practicing saying "good morning" for each other, but neither ever worked up the courage to approach the other to say the simple greeting.
* Hong Kil Dong to Kil Dong, and brings his bandit buddies along as Kil Dong's warriors as well.

* Hong Kong '97: The entire soundtrack, as well as the only sound in the game, is merely a five-second clip of a song called "I Love Beijing Tiananmen" looped ad nauseam. Even getting a game over and restarting the game doesn't stop it.
* Hong Kong '97, which was released in 1995 but takes place during the transfer of Hong Kong's sovereignty in 1997, involves the mainland Chinese resurrecting the deceased "Tong Shau Ping" (i.e., Deng Xiaoping) as a weapon against the player character. Deng Xiaoping was alive in 1995, but he did end up dying in 1997.
* Hong Kong Action Theatre, a character with the Mysterious Death signature move never dies in a way that would leave no doubt, and usually involves something that engineers this situation. Then, upon spending all your Chi pool or a number of Star Power points, the character can come back.
* Hong Kong Action Theatre, as a matter of style. HKAT's penchant for multiple attacks makes blasting somebody to hell with both guns blazing very, very possible.
* Hong Kong Action Theatre if their opponent scores a natural 20, dodge grenade explosions that would kill lesser characters, and even survive getting blown up provided that they can take the damage.
* Hong Kong Action Theatre style, knows Kung Fu. You even get to select your character's specific style of Kung Fu upon creation!
* Hong Kong Action Theatre). Under the reloading rules, you only run out of bullets on a gun if you roll a 1, 2, or 3 on D20, meaning as long as your dice luck holds out, you can blast off as many times as you want, though once you do run out of bullets, reloading takes a full turn.

* Hong Kong Phooey: Hong Kong Phooey's Hong Kong Book of Kung Fu. Not that it does him any good...
* Hong Kong Phooey is all this and a bag of chips. His kung Fu "prowess" on bad guys is negligible; it's his cat Spot that corrals the crooks, yet Phooey thinks he did it so fast it even amazed him.
* Hong Kong Phooey.) Lampshaded in that Phooey does hardly anything in the episode, as they point out at the end.
* Hong Kong Phooey needs help from his cat Spot in both the brains and brawn department.
* Hong Kong Phooey subverts this one, with the main character's constant referral to his "Hong Kong Book of Kong Foo", yet he is incompetent at it.
* Hong Kong Phooey, the title hero changes into his kung fu get-up in a file cabinet and goes down a chute from an ironing board cabinet into a dumpster where his Phooeymobile is housed.
* Hong Kong Phooey uses the villain's device to revert him to his real form with prison clothes instead of the regular outfit he's seen wearing while not disguised. Phooey just thinks the villain decided to surrender once hearing his name.
* Hong Kong Phooey: When a criminal disguises himself as Hong Kong Phooey to claim

the rewards offered to the real one, the viewers can always tell who's who because the real one wears a red kimono and the false one wears a black one.

* Honkai Impact 3rd for the team, which will block incoming damage until it's destroyed. She also has another passive skill that lets the "burst" of the bubble shield damage nearby enemies.
* Honkai Impact 3rd has multiple ways in which enemies' alertness of your presence influences gameplay:
* Honkai Impact 3rd, Rita Rossweisse is the only Valkyrie with this hairstyle, which covers her left eye. This serves both to accent her beauty and mark her as an antagonist, as she's introduced late in the game's Story mode as an agent of the madman Otto Apocalypse and opposes the more heroic Valkyries multiple times.
* Honkai Impact 3rd's "St. Freya Fiesta" event featured an interactive area where chibi versions of the characters could chat and pick up and exchange prizes. One of the possible commands was to have your chibi do the Macarena.
* Honkai Impact 3rd, the "harbingers of Honkai", are able to absorb the ambient Honkai energy (which are normally "corrupting" to normal humans) to be used to fuel their specific abilities.
* Honkai Impact 3rd, Theresa drags Kiana off for extra training as punishment for skipping her classes.
* Honkai Impact 3rd: The two major organizations, Schicksal and Anti-Entropy, are both fighting against the "Honkai" phenomenon, a force that tries to eliminate humanity. The two are also constantly scheming against each other because of the friction that occurred between the two years before the game's present; both of them have done questionable deeds in the past, supposedly for stopping the Honkai threats, and both have good and bad members of their own.
* Honkai Impact 3rd were completely powerless against the 14th one, the aptly named "Herrscher of the End", who survived everything they threw at her and wiped out what little was left of human civilization. Humanity only avoided extinction because the last few survivors managed to hide underground in cryosleep, but it’s heavily implied that should the Herrscher of the End ever return in the current era, humanity would be doomed.
* Honkai Impact 3rd: While assuring Fu Hua that she'll get the intel she seeks, Wraith asks her to change outfits. Fu Hua, who spent half a day on the run from "Welt" half-naked, is confused until Wraith points out that she's not even wearing pants and that the Singaporean police arrests people for indecent exposure.
* Honker dispatches a pair of giant slugs with the salt packet from his french fries.
* HONK!", the goose Greylag, modeled after a WWII fighter pilot, fits this trope ideally, causing his wife Dot to lament that "his cabin lights are rather dim."
* Honky Tonk Man as one of the top midcard heels of his era, and the longest-reigning Intercontinental Champion in history. What they may not know, however, is that he actually got his start in the WWF as a babyface. Fans refused to buy into the idea of an Elvis impersonator as a good guy, however, and after a series of "Vote of Confidence" promos and an actual poll where the fans (as expected) weren't behind him, he was turned heel and the rest is history.
* Honky Tonk Man nearly lost his right index finger in an accident at a photo op,

when someone wanted to take a picture of him swinging his guitar, but it broke and cut into his finger. The injury forced him to skip or cut short several matches, as he was in too much pain.
* Honky Tonk Man than by himself directly. This includes both men being quickly and unexpectedly defeated by super faces, The Rock and The Ultimate Warrior, to lose their belts. JBL could also be considered the version of this angle that occurred seven years before Punk.

* Honoo no Alpen Rose is repeatedly rejected by the heroine Jeudi, but he keeps trying to make her his mistress no matter what. Lampshaded by the Count's wife Francoise, who tells Jeudi that the Count's impressed by Jeudi's ability to tell him no repeatedly, and confesses that she also envies Jeudi for it.
* Honoo no Toukyuuji: Dodge Danpei is an entire anime series based on this.
* Honorable Marriage Proposal: A man offers to marry a woman in order to salvage her reputation.
* Honorable Marriage Proposal: Largely died in the Western world as it became less relevant for a woman to stay a virgin until marriage. Still crops up in more conservative places.
* Honorable Marriage Proposal: marriage offered to preserve a woman's sexual reputation.
* Honorable mention and space to 1947 Earth. In this case it's the backwoods of Michigan rather than the deserts of New Mexico, but the Robinsons et al. are mistaken for aliens, and their disc-shaped craft is witnessed (and attacked!) by many locals. It's a strange example, given that it predates the pop culture resurgence of Roswell itself by over a decade.
* Honorable mention goes to Gintoki and Kagura for the epic troll faces they pull on Shinpachi in the 9th opening.
* Honorable mention goes to Primus and Unicron, who are simultaneously tremendously hammy, and
* Honorable mention: prior to Starz taking on co-production duties, the UK series
* Honorable mentions go to Truck Transportation, Farm Mechanics, Pulp and Paper, and the politically questionable Indian Lore.
* Honorable mention to Ernest Shackleton and other polar explorers of late 19th and early 20th centuries, who may not have been men of war but were nevertheless amazingly tough and disciplined lot. Bonus points for their ships actually being wooden, as wooden hulls could better withstand impact with icebergs than steel, given the technology of the era.
* Honorable mention to German Count Felix von Luckner and his warship the
* Honorable mention to Gibbs' reaction to catching Tony looking at "Page 57" of a men's magazine — since Gibbs is too far away to deliver a dope slap, he catches Tony on the back of the head with a scrunched-up ball of paper. Certainly gets his attention.

* Honorable mention to the fireworks O'Neill threatens his SGC recruits with during a training exercise in "Proving Ground". The recruits can't figure out how to disarm the "bomb" before the timer goes off, so the team leader aborts the exercise.
* Honor also has a minor fit when her Grayson associates recommend that she hire a maid. She is originally unsure about being waited on, and questions the practice of having servants at all. However, a Grayson ladies' maid is expected to be able to handle anything related to her mistress'´appearance and presentation. This can mean anything from sewing a formal dress from scratch to hairdressing, to make-up, to keeping her mistress up-to-date on the rumor mill and helping ward off unwanted male attention. Honor quickly realises that her new servant is not a

menial, but a well-paid, well-trained and highly skilled professional, and worth every penny of her quite sizable salary.
* Honor Among Enemies and pass it off as a suit failure. Unfortunately, the culprit tried too hard by disabling the comm system as well, and any savvy engineer knows that those two systems aren't connected.
* Honor Among Enemies not only invites captured enemy naval officers to dine with her, but actually involves one of them in a planning session to take out a pirate.

* Honor Among Thieves, and housed in a building disguised as a convent for an apparently fictitious religious order.
* Honor Among Thieves: Han spends an entire night searching for Rebel spy Scarlet Hark after her message drop was compromised before he could reach it. He knows which local criminal betrayed her, but not where he is, so he gets the address of a known associate, who says he's with his girlfriend. But she's already broken up with him, so Han steals her datapad with his contact info. The criminal doesn't know where Scarlet is, but knows a Rebel sympathizer who does. But, Scarlet has already abandoned her apartment, so Han breaks in. The trash indicates she orders the same meal delivered every morning, so he goes to the restaurant and gets her hotel room off that morning's order.
* Honor Among Thieves next. For all that, Han is able to convince him to join forces by promising greater rewards from the device everyone is after.
* Honor Among Thieves: Professional courtesy that is expected between criminals.
* Honor Among Thieves: Scoundrels agree on clearly defined limits to their villainy.
* Honor Among Thieves: Thieves turn out to be remarkably honorable fellows in fiction, especially amongst other thieves.

* "Honor and Glory" shows that, back when he was a rookie, Reinhardt was a brash, overconfident
* Honor and Hamish Alexander have a secret relationship for a while due to a number of circumstances, namely a) he's already married (though his wife, who's almost completely paralyzed, approves of and even encourages their relationship); b) Hamish is Honor's superior officer and, like in virtually all military forces, fraternization between Manticoran officers in the same chain of command is forbidden; and c) Honor's adopted planet, Grayson, is very religious and does not approve of out-of-wedlock sexual relations (they're not on Grayson, but Honor's high status in Grayson society could have been damaged if it were known). The issue is eventually resolved when Honor marries Hamish and his first wife in a polygamous marriage (not that unusual in the Honorverse, and completely acceptable and even expected on Grayson), taking care of the first and last issues, and by that point Hamish is the civilian head of the military, so the second issue is no longer a problem.
* Honor and Nimitz establish their reputation with the people of Grayson by saving their head of state from an assassination attempt by religious fanatics in

* Honorary Aunt, which is substantially nicer than we see her when interacting with the other Avengers.
* Honorary mention goes to the Schützenpanzer lang Hs. 30 also known as the Schützenpanzer 12-3, the fisrt German APC/IFV after the Wiederbewaffnung. At a time were other APC only sported an .50 machinegun or equivalent it was armed with a 20 mm autocannon that could, under the right circumstances, even threaten

* Honor Before Reason: Doing the honorable thing even if it's not the sensible action to take in the current situation.
* Honor Before Reason: Doing the honorable thing even when it wouldn't be the sensible thing to do.
* Honor Before Reason: Doing what's "right", even if it's otherwise foolish and has dire consequences.
* Honor Before Reason: Doing what you think is right regardless if it is the smart thing to do.
* Honor Before Reason: Doing what you think is the honorable thing even if it's not the sensible thing to do in the present situation.
* Honor Before Reason: Do the right thing, even if it's detrimental to yourself.
* Honor Before Reason: Famous for being polite enough to return a bow, even if this will cause the water on its head to spill out and leave it helpless.
* Honor Before Reason for the Space Marines, Sisters of Battle and Imperial Guard (those who aren't secretly worshiping Chaos, at least) respectively.
* Honor Before Reason mentions Marcus Atilius Regulus, who had been captured by Carthage in the Punic Wars. He was sent to Rome to negotiate a Roman surrender, with the promise that he would return to Carthage. If he was unsuccessful, the Carthaginians would kill him. Regulus went to Rome, argued AGAINST surrender, and then returned and accepted execution by a Carthaginian sword.
* Honor Before Reason or were otherwise outmaneuvered by ComStar and defeated, with only Clan Wolf being effective enough to achieve both objectives, while Clan Jade Falcon and Clan Ghost Bear both achieved a draw (the Falcons actually succeeded in completely one objective before being forced to retreat, while the Bears failed to complete either objective but did so much damage before they were repulsed that ComStar counted it as an effective completion anyway). Thus, the Clans withdrew and the Inner Sphere gained a badly-needed period to recover and re-arm.
* Honor Before Reason: Reason would suggest talking this out. Honor mandates we blow your brains out.
* Honor Before Reason society doesn't exactly reward being an engineer.
* Honor Before Reason: Sticking to your moral code is noble and all, but doing so in a way that screws you and other people over shows a lack of intelligence and/or good judgment.
* Honor Before Reason (when used in cynical contexts; e.g., "The right thing isn't always the smart thing").
* Honoré de Balzac,but as series goes on he ends up marrying her daughter.
* Honoré de Balzac is a good example, and was filmed twice as a horror comedy, even closer to this trope.

* Honored Enemy, the elf Tinuva must go and duel his brother to put an end to a

centuries-long vendetta and buy time for his human allies to escape. His friend Gregory refuses to leave him, even when Tinuva points out that there is no possible way he could help and that he would only be killed out of hand. Tinuva goes as far as slashing his hand to keep him from using his bow and threatening to cut his other hand so badly that he'll never draw a bow again - and only then does Gregory accept that there's no way he'll be able to accompany Tinuva.
* honor encourages him to make two seasons worth of bad decisions, to the point that he's made seriously ill by compromising his goals.
* Honor Guard the reincarnated saint (again, long story), and he spends much of the rest of the book standing around looking dumbstruck, which for him, is not much of a stretch.
* Honor Harrington. A couple did switch sides but most just tried to stick it out - and some did manage to make improvements in their own countries by doing so. As time has gone on and the government changed, Haven is no longer an obvious "bad guy".
* Honor Harrington again with the Verdant Vista/Torch rebellion. Overlaps with type 1, as it's a multinational effort involving people from Haven, Manticore, Erewhon, and the slaves themselves.
* Honor Harrington" aircraft carrier, the LACs themselves are more akin to Torpedo Boats. Manticoran CLACs tend to be dreadnoughts, as their LAC doctrine favors using them for attack. Meanwhile, Havenite CLACs are superdreadnoughts, as their primary goal is to protect the fleet from enemy LACs, which requires a larger number of LACs to provide greater coverage.
* Honor Harrington, Alfred was able to track her down and rescue her. Their romance progressed rather rapidly after that.
* Honor Harrington also features a few lightworlder characters, such as Joachim Alquezar from the Talbott Quadrant world of San Miguel. They are described as being tall and lightly built.
* Honor Harrington also follows the beats of the Napoleonic Wars from the British perspective, with some SF twists. At least until someone nukes Napolean.
* Honor Harrington, a massive space station that is also the primary dockyard for the Royal Manticoran Navy.
* Honor Harrington an admiral!" Later, Fleet Admiral Filareta notes that his staff astrogator is an admiral; it's a responsible job, but no way does it need flag rank.
* Honor Harrington, and act as sex slaves. Also, it's heavily hinted that Haven used drugs in the drinking water and food supply to keep a lid on rebellious proles in their welfare state gone wild. In a slightly more benevolent mode, it's a given that all the militaries which have men and women serving in the same units require them to be on contraceptives while on active duty. This is also apparently the policy regarding prisoners of war, explicitly stated as being the practice on the Havenite prison planet Hell where the food was laced with them.
* Honor Harrington and actually coming in range to support her. Such is the danger of belonging to one of the few sci-fi writers who DOES have a sense of scale.
* Honor Harrington, and doing the latter to avoid being seen as a coward for doing the former.
* Honor Harrington and empathic, and are evidently unique in the universe in that trait.
* Honor Harrington, and removing one from their human results in both pining away.
* Honor Harrington and see nothing wrong with having had no major battles in 300 years nor a tiny R&D budget with no major upgrades in the last century.
* Honor Harrington and the only problem she has is in dealing with the archaic units of measurement.
* Honor Harrington and would have been able to do it unmolested if their plot hadn't been so revealed.
* Honor Harrington apparatus and political commissars are cleared out entirely, and the finest generals Haven has available can use whatever means they have at their disposal to fight the war with everything they learned in the first war. The second war does not start out well for Manticore.

* Honor Harrington are meeting aboard Honor's flagship. Her steward, MacGuiness, asks everyone if they would like refreshments. Elizabeth considers having a rather strong drink but decides against it.
* Honor Harrington are shown to be rather cultured themselves, with one senior operative shown to be a fan of Manticoran classical music.
* Honor Harrington as diplomats; their inability to lie well makes their honesty equally obvious.
* Honor Harrington, a State Sec general figures out that the prisoners have taken over the prison because the warden failed to send his next chess-by-mail move in the mail delivered by a courier ship.
* Honor Harrington as the "out there wuppin ass" group from Manticore.
* Honor Harrington: Attempted several times by Haven early in the series.
* Honor Harrington. Besides, the Manties, when they find out about it, realize that by going along, they are helping their own cause, and hurting Mesa's.
* Honor Harrington books, at least one character muses on what a fair exchange rate on prisoners would be, given that most battles had been stacked heavily in favor of the Manticorans' superior training and technology versus the Havenites' massive quantity of ships and troops.
* Honor Harrington books each have a great big space battle or two somewhere. In fact, that's their emphasis; the titular heroine is a starship commander.
* Honor Harrington books feature tribarrels, the largest of the major types of hand weapons. They seem to be essentially high-tech miniguns. Plus, military doctrine when it comes down to actually firing boils down to "put as many missiles into space as is humanly possible."
* Honor Harrington books is that the spaceships used in the battles are virtually invisible when the "wedges" that normally propel them are powered down, and the rare obedience to physics means that a powered-down ship is not motionless and can coast on a ballistic course with virtually no chance of detection. They're almost incapable of maneuvering, though. Honor uses this trick, along with a ridiculous amount of luck, to get the drop on a Havenite fleet guarding the Cerberus system, from which she and a few hundred thousand POWs and Peep political prisoners are attempting to escape.
* Honor Harrington books occasionally mention time dilation, though generally in the context of reducing perceived travel time in hyperspace by a few days or as an extra wrinkle of a few minutes during combat rather than as a significant alteration to characters' lives.
* Honor Harrington books. The majority of them seem to be outright pirates using a Letter of Marque as a shield to protect themselves if captured, particularly in poorly policed places like the Silesian Confederation, but more respectable ones turn up occasionally.
* Honor Harrington (both in-verse and out) Victor Catchat is a tenor (highest male voice within the modal register).
* Honor Harrington branch series led to major events slated for the later books to occur sooner than intended. As a result, dealing with those major developments fell to Honor, since there was no way things could conceivably stay the same for the necessary 20 years, and she was spared.
* Honor Harrington but had a major issue producing enough food due to native bacteria that ate chlorophyll. When Gustav Andermani "invaded" the planet he brought along a team of geneticists to take care of this, with the end result that his invasion was treated more as a rescue mission.
* Honor Harrington But prolong has been around only about 2 generations so there are few people over 120 yet.
* Honor Harrington, but several of the societies described have specific historical parallels. The People's Republic of Haven takes on some of the characteristics of revolutionary and Napoleonic France, while the Star Kingdom of Manticore's society and military parallels the United Kingdom during the same era. There's also the emperor of an overwhelmingly ethnic Chinese interstellar polity who nonetheless modeled his empire after Prussia and the German Empire. Before the time period of the novels, Grayson was a moderately-backwards colony akin to feudal Japan,

changing to pseudo-Meiji Japan during their first appearance. Other "neobarb" colonies that have lost contact with the outside world and regressed technologically are also shown. And, of course, the space technology of the novels, at least in early books, is set up precisely to allow classic Age of Sail battles in space.
* Honor Harrington, but the Manticorans note bitterly that they now have no choice but to introduce the weapons to the more friendly Medusans, so the Medusans can defend themselves. The long-term consequences of this are not shown, as the series never revisits Medusa.
* Honor Harrington, but the real reason is to protect Ginny and Victor in case the next Havenite political shakeup results in Kevin facing a firing squad. Victor hates it, partly because it makes him out to be a total scumbag, and partly because Ginny really enjoys teasing him. The ruse is abandoned after Victor gets an actual girlfriend.
* Honor Harrington), but this only works within a system, and initially is roughly as fast (in terms of bandwidth) as Morse code. The technology undergoes multiple improvements, and in the later books is capable of carrying video.
* Honor Harrington by a Mesan Alliance agent, who takes advantage of the fact that he's publicly engaged to his (secret) contact to get privacy in which to report to her.
* Honor Harrington by her grace and lethality in a fight. The next time either of the characters appear, they're married — and Harkness is no longer brawling with Marines.
* Honor Harrington call themselves The People and call humans "two-legs". This is not out of disdain; they are in fact rather in awe of humans.
* Honor Harrington can apparently pull this off masterfully. Given their propensity for mischief, it's highly appropriate.
* Honor Harrington can leave you blazing past the enemy's fleet without time to take a shot at him.
* Honor Harrington carry a death sentence, with the verdict given as a "hung jury" on the others.
* Honor Harrington causes brain damage, allowing the guards to place the inmates in scattered, isolated camps, and punish rebelling inmates by cutting off their food supply. When Honor ends up there, she organizes a mass breakout.
* Honor Harrington-class cruiser, the same exact class as the one that destroyed his last command, he is filled with a burning desire to smash them. He admits that his desire for revenge may be why he chose a plan of attack that put his ship at a somewhat greater risk in order to ensure he could bring the enemy to action. Played with in that his plan worked more or less perfectly, with the enemy cruiser reduced to a floating wreck and his own ship unscathed.
* Honor Harrington comments that he spends more time helping heartbroken naval personnel deal with "Dear John" or "Dear Jane" letters than he does actively trying to seek out disloyalty.
* Honor Harrington, complete with breaking the officer's sword. It also happens at least once in flashback, in the backstory of a villain who is an ex-military officer.
* Honor Harrington consist of the Chaplain imploring God to not let all the various things that theoretically can go wrong on a spaceship and kill the entire crew actually happen. In excruciating detail, for fifteen minutes.
* Honor Harrington counterpart to Hornblower, is very straightforward. She can be deceptive militarily but isn't a very good liar otherwise.
* Honor Harrington court-martialed, but his family connections mean he's only dishonorably discharged rather than shot for desertion.
* Honor Harrington cut their hair short, and it seems that you can take the girl off Grayson, but you can't take the Grayson out of the girl.
* Honor Harrington) darn near ended the planet for good, but it got back on its feet as the capitol of the largest human polity (based in Chicago, presumably one of the few major cities not destroyed). Nevertheless, things are implied to really suck for a decent percentage of the population. The undocumented population doesn't

officially exist and lives in ghetto and squalor, while the average citizen does pretty well compared to even Manticore and is thus very complacent and apolitical.
* Honor Harrington deeply impressed by her some twenty years later, when Matsuko is serving as Imperial Governor of the Talbott Quadrant and Honor is several light-centuries away.
* Honor Harrington, designed to provide some protection in the hazards of space combat.
* Honor Harrington didn't even get a chance to make a move before she took his head off. Interestingly, Manticoran law recognizes duels as a substitute for a civil trial. Therefore, the first duel technically counts as this for libel and battery.
* Honor Harrington do it regularly, of course (there is NO romanticisation of piracy in that universe).
* Honor Harrington: Early in the series, up to at least book 6, the novels always have a skip of at least one year between them. As the plot gets more complicated, this practice comes to an end.
* Honor Harrington edit those parts out, but will "accidentally" include the raw footage to help support the claim that these were all natural and un-coereced statements.
* Honor Harrington, ensuring that it would be impossible to return to the "sinful" Earth. They didn't wreck the whole thing, though, which is fortunate because it turned out that the planet was basically one huge Superfund site and there's no way they would have survived without the ship's resources.
* Honor Harrington escape pods, both their own and the enemies, because any pods not picked up immediately are highly unlikely ever to be found.
* Honor Harrington example can be found in the short story "The Grand Tour". There are very few intelligent alien species, only about 12 known ones in human space, and none currently advanced enough for space travel. One species which died out was advanced, and are simply known as the Alphanes. There are large crystal pillars that remain of their architecture which are considered quite beautiful.
* Honor Harrington example: Captain Terekhov's maneuver at the Battle of Hyacinth in the novel "The Shadow Of Saganami". Bonus points for the maneuver leading to a puny light cruiser beating a heavy cruiser three times its size.
* Honor Harrington familiarity with the smuggling process instead. (One of whom becomes a series mainstay and, among other things, uses his sneakiness and computer hacking prowess to pull off a truly phenomenal rescue later on. So good move there.)
* Honor Harrington (for insubordination and cowardice) are split fifty-fifty. As a compromise, Admiral Hemphill proposes that they declare themselves unable to reach a verdict on the most serious charges (which carry the death penalty), meaning Lord Young is dishonorably discharged but still alive to seek revenge on Honor.
* Honor Harrington for Manticore, though both nations recovered from these pretty damn quickly, and with a vengeance.
* Honor Harrington for the book in the opening epigraph, followed by a quote from Robert Wilson Lynd:
* Honor Harrington frequently adorn their ships with nose art in a direct reference to the nose art used on aircraft.
* Honor Harrington giving them exactly the shooting incident they wanted.
* Honor Harrington Hades. He was a corporal in Internal Security before the Harris Assassination, but after his StateSec promotion he hacked his personnel records to say he was a Marine captain pre-coup.
* Honor Harrington has been quietly lowering its standards with regards to re-enlistees in preparation for the war with Haven, resulting in troublemakers like Randy Steilman being kept in the service.
* Honor Harrington has had some instances where she has to duck the press, due to their sensationalism. The one time she uses them, it's to terrify Pavel Young.
* Honor Harrington has held its own against the navies of far larger star nations, with setbacks, for a long time, one of them over the span of several decades.
* Honor Harrington has the General Quarters (GQ) alarm. While the default sound that plays over the speakers is a harsh buzzer, some navies allow captains to

choose their own sound for the "we're going to attack someone soon" variant. The "oh crap we're being attacked without warning" variant, however, remains the normal, recognizable, harsh wail.
* Honor Harrington has this as a defining character trait. So much so that virtually every person she knows comments on how 'intrinsically sane' she is in the face of the horrors she's been through.
* Honor Harrington has this exchange between Honor and a misogynist reactionary Grayson minister who crashes a party at her Steading.
* Honor Harrington have a "hyperlimit". Ships can't transition to or from hyperspace inside that limit. Attempting to leave hyperspace inside the hyperlimit is instant death.
* Honor Harrington have to practically force her into taking her doctor's medical treatment and taking it easy for a change
* Honor Harrington have very high acceleration, but they're dead meat to anything that actually manages to hit them.
* Honor Harrington. He convinces the Royal Manticoran Navy to offer Honor Harrington, a major thorn in his side, a return to RMN service as senior captain of a Q-ship squadron in Silesia fighting pirates (who happened to be threatening his shipping). He figures either she'll succeed and protect his interests, or she'll fail and likely be killed while doing it.
* Honor Harrington: Helen Zilwicki happens to bear an extraordinary resemblance to Suzanne Bannister, Bernardus van Dort's late wife (or, at least, a younger version of her). Nobody actually confuses her for Suzanne, but it proves somewhat disarming for Steve Westman (who had had a crush on Suzanne) to see her doppelganger in a Royal Manticoran Navy uniform, and arguably helps him soften towards Manticorans and ultimately give up his struggle against the annexation.
* Honor Harrington. Her own husband thinks of her as the Handmaiden of Death.
* Honor Harrington herself, in the short story "Ms Midshipwoman Harrington".
* Honor Harrington he was picking on goes through some marine close combat training, the tables are quickly turned.
* Honor Harrington hit near the bridge. Not so much when you take one to the inertial compensator; everyone on the ship is instantly turned to "strawberry jam".
* Honor Harrington: Honorverse dates use the PD system. It is eventually revealed that 1 PD is 2103 C.E., and the year length stays the same.
* Honor Harrington in a universe where people are used to the comparatively quiet "pew pew" of a pulser, and that it's easy to sneak into places because modern weapon scanners only search for a power source which a "chemical burner" like the M1911 simply doesn't have.
* Honor Harrington, including main character Honor Harrington. This is slightly subverted in that Harrington only commands "one ship" in the first book; afterwards, she acts as CO to task groups and fleets.
* Honor Harrington in Earthlike gravity. Unfortunately, she reacted to the near-rape in stereotypical female fashion, giving Young time to report his injuries as sustained "falling down the stairs". The academy instructors didn't believe it, but Honor refused to press charges.
* Honor Harrington in her youth, with attendant self-esteem issues, had large implications in the early books.
* Honor Harrington initially gains renown as a tactical genius with other Manticoran officers primarily concerned with strategy, when the war against Haven finally ends and Manticore and its allies find themselves facing the massively larger Solarian League, the allied political and military leadership is surprised when Harrington reveals that she had been thinking of the possibility for years and has developed the grand strategy they immediately adopt to survive and win a war with the largest and most powerful entity in human history.
* Honor Harrington. In no case does it seem to be an actual plot point — not that the fanbase cares, as she's an extremely popular character.
* Honor Harrington in one of the books explaining the different calendars in use. It's used thoroughly enough to be distracting sometimes, especially since the capital planet of most of the protagonists is only a half hour per day off of Earth

time and has roughly the same years and months, yet the terminology will be stuck to even in emotional speeches or casual conversation.
* Honor Harrington in order to keep the Navy from turning on their government. Both governments fall in part due to supposedly loyal agents in their own ranks turning on them for various reasons while in positions that made them above suspicion.
* Honor Harrington in the backstory results in roughly 2/3 of males being miscarried. This state of affairs continues for almost a millennium, until they get access to advanced enough technology to figure out what happened and reverse it. It's a lot less destructive than most other examples, however - they pretty quickly adopt polygamy and move on with life.
* Honor Harrington is an example of a science fiction communist state, especially after the revolution against the Legislaturists.
* Honor Harrington is convinced she has one of these, and goes out of her way to avoid showing any sign of having a sense of humour in response. She apparently inherited it from her mother, who has a similar opinion of her own.
* Honor Harrington is created, receiving prolong is made a fundamental, inalienable right of every citizen.
* Honor Harrington, is where the series really starts to find its stride.
* Honor Harrington, it's how bomb-pumped grasers shape the blast towards the lasing rods, and it has provided a revolution in cheap interstellar transport of goods and skyscraper design.
* Honor Harrington, it's mentioned that Saganami Island has a backdoor that allows enterprising students access to a restricted tactical database for study. Getting caught isn't punished (a student brings up one of the battles inside to Honor in one of her classes), but the instructors on the Islandlook favorably on students who are sharp enough to find the backdoor and study the database.
* Honor Harrington, it's mentioned that the Andermanni Empire was founded by a particularly capable mercenary captain named Gustav Andermann. He first captured the planet of New Postdam (though considering that the planetary microorganisms ate chlorophyll, the inhabitants were happy to be captured by anyone who could clean up their planet and give them enough to eat), then went on to build an empire from there (at least partially financed by organizing and hiring out mercenary companies).
* Honor Harrington: It's not quite living forever, but pretty much everyone agrees that Prolong, an anti-aging treatment which extends the active human life to around three centuries, is pretty damn awesome. Amongst other things it lets you spend fifty or so years in a Naval career and still have over two centuries left to do other things if so desired.
* Honor Harrington, killing one of the PRH's top three officials in the process.
* Honor Harrington labeling themselves as "rebels") they manage to upset many surviving Navy personnel. The remainder stays quiet for most of the series, but then the truth of the rebellion comes out.
* Honor Harrington later, with a cumulative thousand-to-one loss ratio, they finally realize there's some truth to those "wildly exaggerated" reports of Manticorian weapons performance.
* Honor Harrington, leading to their Havenite handlers losing all control of the situation.
* Honor Harrington legislative process centers around "debates, arguments, shouting matches and occasional fistfights".
* Honor Harrington like the Sphinxian titular character, while Grayson has so many heavy metals in the environment that even the adapted colonists need to grow their food in isolated domes.
* Honor Harrington made a substantial amount in prize money (see Real Life section below) under some of her earlier commands. Even some of the junior officers did fairly well out of more successful anti-piracy operations.
* Honor Harrington, male spacers (there are no female Masadan spacers) can be easily identified by their short hair and clean-trimmed facial hair, in contrast to everyone else having long hair and beards.
* Honor Harrington — their friendship is a running thread throughout all

subsequent novels; Honor is always at her easiest and most uninhibited with Michelle, no matter how many other close friends she makes throughout her life.
* Honor Harrington means that, in at least one interesting example, a small, patchwork force took out one far greater numerically without even being fired upon simply by using chemical thrusters to get moving and then opening up with all the weapons at point-blank range against an opponent who had no clue they were even physically in the system.
* Honor Harrington means that there's no point to being subversive or subtle in Treecat society: They all know what you're thinking anyways. It's a mild example because, while that's a rule in Treecat society, they understand that such a mindset is not shared by most Humans and behave themselves while amongst them.
* Honor Harrington mentions that the Manticoran military doesn't have a Chaplains' Corps because of the sheer diversity of belief systems. Manticoran warships do have nondenominational chapels aboard but any services are done by lay leaders. This is contrasted with the Grayson Space Navy: the Graysons are mostly members of a Christian offshoot sect called the Church of Humanity Unchained (akin to fundamentalist Mormons with bits of conservative Islam for flavor) and their ships do carry chaplains. When women were allowed to enlist in the GSN due to manpower needs after Grayson allied with Manticore, they were only allowed to serve on the biggest ships because only superdreadnoughts had room for separate men's and women's quarters.
* Honor Harrington muses on the fact that crossing the Hyper wall for the first time tends to bring about the same kind of ceremonies as crossing the international date line on old earth. Since she is from another star system and has thus already done this, she gets to be on the bridge rather than with her friends being shoved into a zero-g module blindfolded and in their skivvies and told to complete various disgusting but ultimately harmless tasks.
* Honor Harrington normals -> first-gen -> second-gen -> third-gen, where people that are in their seventies and have a full space-navy career can appear to be in their early teens to those who have not experienced the effects.
* Honor Harrington. Not only are the politics directly analogous to the Revolutionary/Napoleonic wars and the physics carefully designed to have spaceship battles play out in the same way as in the Age of Sail, but some of the books follow almost identical plots to those of Hornblower. This becomes less pronounced as the series progresses, with political shifts and advances in technology causing the setting to diverge more and more from the historical analogues.
* Honor Harrington novels a weapon is introduced that can bring down an enemy ships shields, which would be an in universe game-breaker, if its range wasn't so absurdly short that you're considered to be in 'point blank' energy range at roughly four times its firing range. And that doesn't even factor in the missiles which have orders of magnitude more range anyway.
* Honor Harrington novels, it is common for bonded treecats to suicide after their human partner, or treecat romantic partner, dies. Since the natural lifespan of a treecat is considerably longer than that of a (pre-prolong) human, the bonding pretty much meant that bonding with a human meant that the treecat would sacrifice many decades of their lifespan. It is also stated that a human whose 'cat dies is likely to give up on their own life as well.
* Honor Harrington novels state that humanity has, in the two millennia they have been tooling around the galaxy, encountered approximately twelve alien races. However, though there is at least one extinct race that achieved inter-stellar flight, the technology level of the other species is never mentioned. Alien races show up only as flavoring (the Sphinxian treecat, shown in almost every story) and a minor background element in two stories. For all practical intents and purposes, it is an all-human galaxy.
* Honor Harrington novels when WEB Du Havel responds to Anton's demand that he keep an eye on the Princess and Anton's daughter with the derisive comment that he's an absent minded professor and that they'll outwit him left and right.
* Honor Harrington observation that if they were ever attacked, he would hold her coat while she dealt with the problem.

* Honor Harrington of acting like this for political reasons, at which point the lowest ranking officer there turns around and accuses him right back. Eventually, one of the dissenting admirals negotiates a political compromise and agrees to vote with White Haven (breaking the deadlock 4-2) to convict on the lesser charges, provided they remain hung on the capital ones, resulting in Young's dishonorable discharge and setting the stage for the second half of the book. The other two never change their votes. Though since it's a military tribunal, the simple majority is enough.
* Honor Harrington, often features Plucky Middies In Space. Due to the Prolong treatments that retard aging, they usually even look like the teens that were taken into service in Hornblower's time, further cementing the homage. A handful show up as main characters:
* Honor Harrington of the story. The shadowy cabal that controls Mesa was eventually revealed to be closing in on the end of a centuries-long plan to control the known galaxy via long-term political and military manipulation of every other government, all so they can reintroduce widespread genetic engineering to the galaxy and eliminate any opposition to it.
* Honor Harrington of the vanilla variety (by hyperspace) for everyone, but featuring a wormhole network that allows for instantaneous travel between its termini, thus radically cutting on a delivery times. Naturally, the heroes' homeworld has the biggest bunch of those holes. Wormholes in the Honorverse don't really form a network, though. Various wormhole termini are usually too far apart for anyone to get from one to another, without hyperdrives that also allow FTL travel. They just supply a few very convenient shortcuts between some places.
* Honor Harrington one. There is also "moustrapping" where a fleet about to be engaged (or in some cases already engaged) in battle will send a single ship into hyper to tell the reinforcements hanging out there that they are needed. Naturally, this does require a good bit of prior preparation.
* Honor Harrington or a planet-side post. As the novel states, it may not be fair, but neither is biology. Then again, the Manticoran Navy does cover up to 75% cost of "tubing" a baby (i.e. putting the fetus into a tube to be grown to term), so a pregnant woman doesn't have to be "out-of-commission" for the full 9 months. The medical technology is so good that tubing is considered an outpatient procedure (i.e. no overnight hospital stay). At the same time, Honor's mother laments that many women are missing out on the "experience" of giving birth. Meanwhile, the other women think that she's insane for suggesting that.
* Honor Harrington Paul does this to Honor while they are riding in an elevator. He manages to time it just before the elevator arrives so that she doesn't have time to get revenge before the doors open.
* Honor Harrington: Pavel Young lived and breathed this trope, abusing the heck out of the North Hollow family's position as one of the more powerful noble houses in the Star Kingdom to satisfy his basest desires and avoid any responsibility for his actions.
* Honor Harrington plants obviously manufactured evidence that (correctly) names him as the one responsible for altering diplomatic correspondence which started the war all over again. Fortunately, the Pritchart administration picks up on this fact and never makes the evidence public.
* Honor Harrington plays the trope even straighter than the novels. When ships battle they just sit there in parallel positions lobbing missiles at each other until one is destroyed. At most they might "roll" to use their impeller wedges at shields occasionally.
* Honor Harrington portrayed the least bit sympathetically. Piracy is universally a capital crime, and for excellent reasons.
* Honor Harrington: Rob S. Pierre is a ruthless Dolist manager who clawed his way up to become the head of the People's Republic of Haven. He did it mostly to fight off the other factions who would have done it anyways and been worse than him, and he actually has a plan to fix everything. It actually works, and when a democratic revolution after his death establishes a stable and free government, they owe his efforts at fixing the economy.

* Honor Harrington saw that they were "better" than humans - so they started a war that could have destroyed Earth.
* Honor Harrington says this in a speech he gives to the Mesan Alignment Navy after their successful completion of Operation Oyster Bay.
* Honor Harrington scenarios. The later development of faster-than-light communications (by a handful of factions) and various types of stealth further complicate things.
* Honor Harrington's crew can claim they weren't knowingly coming to the aid of a Manticoran ship.
* Honor Harringtons Crowning Moment Of Awesome listing, and you'd be forgiven for thinking the series was entirely about Victor Cachat rather than, you know, Honor Harrington.
* Honor Harrington series addresses this in a appendix to the first book. Every planet has its own clock and calendar, usually with a period after local midnight called compensation or 'comp' to deal with days not having a whole number of hours. Local years are divided up into (fairly arbitrary) number of months. Everyone uses Earth dates for international time-keeping, usually expressed as T-years, though in the Post-Diaspora calendar. Since the Star Kingdom of Manticore contains three different inhabited planets with wildly varying calendars, time conversion software comes standard on their computers.
* Honor Harrington series, after the prisoners on Planet Hell revolt and overthrow the Peep prison guards, they hold trials to punish the Peep officers that previously abused the prisoners. They make a point to try the Peep's under their own civil laws and military codes of conduct to prevent accusations that they were just after revenge willy-nilly. One Peep officer accused of the rape and murder of a prisoner confesses to the rape, but steadfastly denies the murder. The members of the judge panel all agree that this is probably what's happening, since murder carries the death penalty under the Peep laws but rape does not, but do not have concrete proof to support the murder accusation. They drop the murder charge, and sentence the officer to prison for the rape.
* Honor Harrington series are among military personnel with every reason to avoid the trope, it does come up a couple times:
* Honor Harrington series are mentioned in passing as being members of their armed forces' Reserves. Typically, such characters will be a bit older and wiser than their similarly-ranked companions, and officers of the Grayson Space Navy reserve forces are mentioned as having slightly different rank insignia.
* Honor Harrington series. At one point, "training Ensign Newbie" is described, only slightly satirically and in almost as many words, as the primary job of senior noncoms.
* Honor Harrington series, beginning with the crown Prince of Manticore who was a naval officer, to Honor herself, as Steadholders are heads of state. Abigail Hearns, who goes into service in the Royal Manticoran Navy, is the daughter of a Steadholder, and thus technically a princess. Queen Berry Zilwicki's sister Helen is also a naval officer. The Imperial Andermani Navy is commanded by the Emperor's first cousin as well.
* Honor Harrington series, by all sides of the various conflicts. The first and probably most notable one involved a double deception involving false orders and sealed orders to throw off enemy spies allowing Admiral White Haven to ambush a Havenite attack force in Yeltsin.
* Honor Harrington series. Characters age as the books cover about 30 years of conflict. However due to quasi-magical 'prolong' therapy, the vast majority of characters will live for about 300 years and be at peak physical state for most of that.
* Honor Harrington series, Damien Harahap (AKA Firebrand) is captured by the Grand Alliance. He decides to come clean and fully cooperate with them, realizing that he was nothing more than a tool to the Mesans. Things go even more fully in this direction when he ends up being adopted by a treecat named Clean Killer (who was originally assigned to Harahap to kill him if necessary). Now (after feeling Clean Killer's pain at losing his sister during the Yawata Strike) Harahap fully embraces

the Alliance and resolves to destroy the Mesan Alignment by any means necessary.
* Honor Harrington series features paparazzi in a few novels. They're the only foe Honor is afraid to face. If the paparazzi are after her, she usually just stays aboard her ship.
* Honor Harrington series. Grayson is an exception here: they lack a dedicated branch for Marines and use troops borrowed from the Army for the tasks (boarding actions against pirates and planetary assaults) other nations use Marines for. The Manticoran Space Marines use a mix of regular infantry and powered armor with customizable loadouts (for example, high speed long lasting scout configuration or bulkier, slower assault configuration). Troops in powered armor are considered the 'modern' equivalent of tanks.
* Honor Harrington series have this attitude. In particular the People's Republic of Haven's Legislaturalists, their successor the Committee of Public Safety, the Star Kingdom of Manticore's High Ridge Government, and the Solarian League's "Five Mandarins". All these groups consistently make the same blunder in overestimating just how much the people they rule over are willing to put up with and continuously trying to game their respective systems when it's abundantly clear they're making terrible mistakes.
* Honor Harrington series, including the titular character. Generally, implicit in the "main" novels, explicit in the anthologies.
* Honor Harrington series is about life in one of these, lovingly detailed. As the series goes on, the reader is shown other space navies and how they operate differently, for better or for worse, than the Royal Manticoran Navy.
* Honor Harrington series is full of Mnemosyne names like Manticore, Sphinx, Medusa, Hades (nicknamed Hell, see symbolic names), and Gryphon. There's also Beowulf and Grendelsbane. Some other mythological names include Asgard, Durandel, and Enki.
* Honor Harrington series, it is explained that it's cheaper to ship bulk cargo from one system to another than to ship something from two locations on the same planet. The catch is that you must be ultra-rich to afford even the tiniest spaceship, and interstellar travel is not exactly safe or fast.
* Honor Harrington series it's noted that many of the most dedicated loyalists to the Star Kingdom of Manticore are refugees (or the descendants of same) who fled the takeover of their home systems by the People's Republic of Haven. When the Star Kingdom becomes the Star Empire, the same sort of thing is seen among the planets who voluntarily join.
* Honor Harrington series. It was his possession of a firearm that shouldn't have been possible for the native population to develop on their own and ravings about a religious leader that alerted the Manticorans something serious was going on. The resulting series of events secured Harrington a promotion and the notice of her superiors, which put her into position for more critical events that the junior captain of an old destroyer wouldn't have been.
* Honor Harrington series, like Admiral Khumalo and to a lesser extent Admiral Caparelli. While they lack the sheer genius of many other characters in the series, they make up for it by being hard-working, determined and good at delegation and are in fact acknowledged to be better at their assigned tasks (commanding officer of the Talbott Sector and senior uniformed officer of the entire Royal Manticoran Navy, respectively) than their more inspired and "flashy" colleagues would have been.
* Honor Harrington series, most space battles result in the complete destruction of enemy ships, however on several occasions, enemy ships are captured and then used against the enemy.
* Honor Harrington series, most species are named after terrestrial animals, but except for a very few cases these refer to indigenous species of other worlds that aren't very similar to their namesakes. Lampshaded in the short story "A Beautiful Friendship".
* Honor Harrington series of books, most notably including Admiral Harrington herself (her father being a retired Navy surgeon).
* Honor Harrington series, people from the two planets of the Mfecane System have

Sub-Saharan facial features, understandable since the original colonists were Sub-Saharan Africans, but conditions on the planets ended up selecting for albinism so the present population is predominantly light-skinned with blonde, white, or silver hair, and light-coloured eyes.
* Honor Harrington Series plays with this. Earth is the homeworld, the richest planet in all of space, with the capital of Solarian League in Old Chicago. However the economics are stratified; the poor, who don't officially exist, live in ghettos as bad as anywhere. The technology hasn't really progressed in centuries, and really the eldest colonies like Beowulf have been the hubs of innovation and economy since the 'final war' well over a millennium ago. Their political position is now also in threat due to hundreds of years of believing they were impossible to ever be threatened.
* Honor Harrington series, ships that have their fusion bottle fail just have a "single, eye-searing flash," and then are gone. It's also mentioned that nuclear warheads are only useful as weapons in space if they get a direct hit (which is highly unlikely, though it does happen on occasion), which is why missile weapons had moved on to using bomb-pumped lasers by the start of the series.
* Honor Harrington series since every ship has one in charge of the Engineering Department.
* Honor Harrington series, since the species as a whole is telempathic.
* Honor Harrington series, specifically Honor Among Enemies, there's a double version of this; a terrorist has taken over an entire planet, and when Honor tries to liberate it, he reveals that he has bombs planted under major population centres, which he can detonate himself, and will be detonated if she tries to take him out with an orbital strike; he uses this to bargain for safe passage out of the system. When he leaves the planet's orbit, he'll be out of range and can't set them off any more - so he insists on having Honor as a hostage until he can meet a waiting ship. Honor agrees, but brings her own dead man switch; a charge on the outside of their shuttle that will detonate if she doesn't enter a code at regular intervals. Unknown to the terrorist, she has another plan; her "switch" is concealing her old-fashioned gun, undetectable by common modern technology, and when they're out of range she uses it to kill the terrorist.
* Honor Harrington series, starships can enter Hyper and travel at effective FTL speeds as distances in Hyper are shorter than in realspace. The "higher" the Hyper band, the greater the speed-multiplication. Dangers include Gravity Waves and "walls" between different levels of Hyper.
* Honor Harrington series, the convention is for individuals to use their own gender as a generic pronoun, unless there is some indication otherwise. Many characters still, however default to "men".
* Honor Harrington series, the monarch of Manticore is required by law to marry a commoner.
* Honor Harrington series. There are even laws in place stating that a clone is legally the child of the tissue donor and can legally inherit from them — so long as the cloning was authorized by the donor or the donor's estate. That caveat is to prevent cases where someone clones a rich man, kills the rich man, and then has the clone claim his "father's" fortune on behalf of his creator.
* Honor Harrington series, travel between planets is casual to the point of day trips to other planets by middle class people being possible (with favorable orbital positions). Midway through the series Honor commutes for a time between the Naval Academy on Manticore and her home planet of Sphinx.
* Honor Harrington series when it's discovered that Arnold Giancola forged diplomatic documents that resulted in a resumption of the war between Manticore and Haven, and then he dies in a legitimate car accident before he can be questioned. The Grand Alliance leadership later assume he did it at the behest of the Mesan Alignment in order to further weaken Manticore and Haven, who then killed him to silence him. In fact, he did it for personal gain to be seen as the hero who would step in at the last minute to stop the war, and the Mesans had nothing to do with it.
* Honor Harrington. Several books later, the two are apparently on conversational

terms, and Honor has admitted the other woman was essentially right in her viewpoint.
* Honor Harrington: Several of the space navies have their own prefixes.
* Honor Harrington's genetically enhanced metabolism requires regular stoking, preferably with hot cocoa.
* Honor Harrington: Shannon Foraker, who is pretty much the reason the Republic of Haven managed to stay within shouting distance of Manticore's technology. Unlike most Havenite tech-heads, she saw Manticore's technical superiority as a challenge.
* Honor Harrington she does onscreen is observe how nice the ass of Honor's second-in-command is, and telling her she needs to tap that.
* Honor Harrington she gets an artificial eye and arm. Rare in this society because the normal techniques used to regrow limbs doesn't work on her. She has a pulser in the arm and the aiming camera in her eye...
* Honor Harrington short notice after defeating and capturing a numerically superior force mostly intact is something of a minor headache for Michelle Henke.
* Honor Harrington short story "A Ship Named Francis" has to trank at least one person every week.
* Honor Harrington short story "What Price Dreams", the control officer of an assassination attempt was detected and mobbed by treecats, to such a degree he screamed for help and made a full confession more or less on the spot to the rangers and bodyguards coming to the scene.
* Honor Harrington shows humanity as the single spacefaring race in the 'verse. The only three alien races we've seen firsthand are the Medusans (roughly bronze age), Gremlins (stone age), and treecats (tribal forest dwellers). One of the short stories shows there was once another spacefaring race, but they are know purely via archaeology.
* Honor Harrington show up, and not only do the uprisings succeed, but by the end of the novel, OFS has lost an entire sector. What was particularly stupid was that the Mesan agent in question actually told the resistance just how to contact the nearest Manticoran fleet, figuring that their admiral wouldn't move without orders from above. Apparently, he forgot that the RMN has a tradition of officers taking the initiative to launch operations without clearance from above, with the idea that if their superiors disagree, they can disavow what happened. This was rather stupid of him, as one of his previous operations failed in part because a Manticoran captain (Aivars Terekhov) did just that, and came out with a promotion and a knighthood.
* Honor Harrington, since the agent in question is aware that he or she is not in control of the body but can't do anything about it. After the agent is dead, the nanites self-destruct, leaving no trace for anyone not specifically looking for them.
* Honor Harrington, so messages are instead run between starsystems via specially designed Courier Boats, which are basically some cramped living spaces and a very powerful hyperdrive crammed into a hull with not much else. Occasionally, characters will hitch rides on these as the most expeditious way to get to a location quickly.
* Honor Harrington So when Arnold Giancola, a Havenite politician interfering in attempts of the new restored Republic of Haven government to negotiate a peace with the Star Kingdom of Manticore, meets a very natural very untimely death in an aircar accident, the government officials are at a loss for how to avoid looking like they had him assassinated.
* Honor Harrington spends a couple years as commandant of the Advanced Tactical Course at Saganami Island while grounded undergoing medical treatment.
* Honor Harrington's record as a cadet came from an incident where she buzzed the Commodore's yacht during the annual academy regatta.
* Honor Harrington star-crossed lovers and that every minute they have is borrowed time; they just happen to love each other so much that the inevitable heartbreak is still worth it.
* Honor Harrington stories believe that their superior genetics mean that they should be running the galaxy.

* Honor Harrington stories, everyone can do it, but no one does because of the "Eridani Edict." Anyone indiscriminately bombarding planetary targets will themselves meet the same fate when everyone else in the galaxy turns around and does the same to them.
* Honor Harrington stories, is twelve years old, and she kills a couple of men who attempt to rape her, with her bare hands.
* Honor Harrington strikes again, with the planet Grayson, named after a religious leader who founded it. And also Monica, Barnett, Gregor, Halliman, Hamilton, Hancock, Parmley, Trevor's Star, Yeltsin's Star...
* Honor Harrington sub-series. It seems to have worked, as it's also gained her quite a number of new fans — and given readers a chance to know her quite a bit better than they had.
* Honor Harrington Super Dreadnoughts, which carry enough firepower to depopulate a planet, and are at one point described as having enough energy weapons to shatter a small moon, though that may have been hyperbole.
* Honor Harrington supremacists, although ironically environmental conditions selected for albinism, so the majority of the population has light skin, light hair, and light eyes with sub-Saharan African features.
* Honor Harrington than every other nation in the universe they have not had an actual war in several centuries. Frontier Fleet, which is dedicated towards policing, disaster relief, exploration and other peace-keeping roles, is the component which has actual service experience. As such, Battle Fleet is generally slovenly and lax even in routine procedures since they have no combat history, much to the disgust of Frontier Fleet and the other space navies that are encountered throughout the series. As members of the Royal Manticoran Navy point out, accidents can happen even in peace-time, so there is no excuse for being so inattentive to proper procedures and protocol.
* Honor Harrington, thanks. As the series progresses, new technologies that extend the range of ship weapons make the Kingdom of Manticore Navy one of the most dangerous navies in the region.
* Honor Harrington that, and spends two years convinced he's lost her forever. Unfortunately, by the time he learned she was, in fact, still alive, he could no longer stuff the proverbial genie back in the proverbial bottle....
* Honor Harrington that are also generated by the impeller nodes but are substantially weaker than wedges. The bow and aft remain vulnerable until the invention of bow walls.
* Honor Harrington. That event also cements her reputation among the Havenites as well.
* Honor Harrington that if the failsafes on certain systems (Notably the reactors and the inertial compensators) break down, they'll all be dead before they can try to fix it, so they make certain that critical systems are in good repair at all times to prevent spectacular accidents.
* Honor Harrington (the commanding officer is apparently the only one seriously inconvenienced by the rules). The general rule seems to be no fraternization with someone who is in your direct chain of command and no fraternization between Officers and Enlisted.
* Honor Harrington. The gravity manipulation that's de rigeur for the series allows them to simulate things like losing gravity generation and the ship shaking when taking significant damage.
* Honor Harrington, the Grayson military's uniforms come with ties, and Honor has to wear them sometimes. She can't do the tie, so her steward MacGuinness does it for her.
* Honor Harrington the Manticoran and Havenite military forces are completely gender-neutral so there are plenty of examples. The Grayson Space Navy was male-only until the second novel and is slowly changing.
* Honor Harrington, The Manticore System serves as a Gate, housing the Manticore Wormhole Junction which provides Manticore with a lot of economic clout.
* Honor Harrington: The mythologically-named planet Manticore is located in the star system of Manticore.

* Honor Harrington. The new Arc is a war between Transhumanists and baselines that started as a break in philosophy.
* Honor Harrington, then kill them off at the end of the chapter, if not the end of the page. This is done mostly (but not only) to make the war feel real; Honor and other major characters can only be so many places at once (and are not likely to be on the losing sides of absolute massacres off in the boonies, but then again...), so giving a name to, say, the LAC pilot who will be killed shortly helps to make the reader realize the human implications.
* Honor Harrington. The only reason they were mounted on Honor's light cruiser is to complement the gravlance, an experimental weapon that can take down sidewalls with a single shot, allowing the torpedoes to finish the job. Unfortunately, the gravlance has a ridiculously short range, making it utterly useless in actual space combat.
* Honor Harrington, the population of Grayson developped resistance to heavy metals poisoning, enabling them to survive on this planet, although with shortened lifespans.
* Honor Harrington: There are plenty of "new" planets in the series, such as New Berlin and the city of Nouveau Paris on the symbolically named planet of Haven. New Dijon and New Geneva are also examples.
* Honor Harrington there are several ships like this. At one end of the extreme are outdated Solarian Navy ships which put more focus on offensive weapons than counter missiles and point defense lasers. Likewise, Maya's Arsenal ships which are capable of carrying thousands of long range missiles, but are just converted freighters and have no defense at all.
* Honor Harrington, there's an internal version when Admiral Chin wonders about the strange maneuvers of the Manticoran force that just hypered in behind her. Over the course of several paragraphs of narration, it dawns on her exactly which formation she is looking at... and what they're armed with.
* Honor Harrington. The Royal Manticoran Navy has nearly 50-50 gender equality, and many characters are referred to as their title, i.e. Admiral, Captain, Exec., etc. To compound this, many of the women are given masculine nicknames, like Michelle becoming "Mike", while some men are given female nicknames, such as a Gervais becoming "Gwen". You may need to take notes.
* Honor Harrington: This was employed by the Royal Manticoran Navy against the Solarian League by blockading wormhole termini in Solarian space.
* Honor Harrington, though 20+ years of war is adding names with terrifying regularity.
* Honor Harrington to cover the openings at the front and rear of the wedge, so "up-the-kilt" and "down-the-throat" shots are also desirable.
* Honor Harrington "Torch of Freedom", the protagonists realize that something is seriously screwy with the Mesa Corporation when one of their agents resorts to this rather than be captured. Victor Cachat also carries one everywhere he goes; other spies find this somewhat excessive.
* Honor Harrington. To top it all off, every one of her victories, titles and ranks was earned by her own hard work, talent, and fierce determination. If only all of our toils paid off as well as hers!
* Honor Harrington: Treecats are a sci-fi telempath version of familiar. Treecats are biologically telepathic within their species and able to pick up the emotions of humans to a fairly granular level. When they encounter a suitable human, they form an intense bond with them, and for the rest of their lives, the treecat and human can, at a minimum, share emotions (and the treecats can communicate knowledge of things like murderous humans via meaningful posture and gestures). The main character of the series has been able to further the bond to the point of also being able to pick up emotions. The "rest of their lives" part had a downside for a long time in that treecats normally live around 200 human years, and would commonly suicide when their bondmate finished their normal human lifespan — in the modern days of the series, this has been mostly nullified by prolong extending human lifespans.
* Honor Harrington troopers get called "Black Legs", owing to their black uniform

trousers.
* Honor Harrington universe is explicitly modeled on the conflicts between the British Empire and Revolutionary/Napoleonic France.
* Honor Harrington universe is this. Many characters in-universe have commented on her parents' apparent precognition at having named her Honor.
* Honor Harrington universe. Justified by the ubiquity of counter-grav technology.
* Honor Harrington universe. The distance between two points in normalspace may be shorter in hyperspace (progressively shorter as you go to each higher band of hyperspace, but at the cost of needing better particle shielding to survive up there), but it still takes a while to get anywhere even at those faster apparent speeds (wormholes are extremely lucrative for the controlling star systems because they're near-instantaneous and can shave hundreds of light-years off a journey). In addition, hyperspace is populated by gravity waves that will tear a ship apart; until someone figured out how to sail along the grav waves and the major ones were well-plotted, hyper travel was extremely dangerous. It's still not advisable to just sail randomly throughout hyperspace because the grav waves do move, and most of the galaxy and major grav waves in hyperspace haven't been mapped. You can, of course, travel in normalspace, which is how the cryo-sleeping original colonists of many settled worlds first got to those planets, but that would take hundreds of years.
* Honor Harrington universe, the Treecats of Sphinx (small, six-limbed arboreals) were originally thought to be nonsentient. It began to dawn on the human colonists that they were wrong when they were seen to use stone-age tools (chipped stone hand-axes and woven nets).
* Honor Harrington universe use the Impeller Drive, which create gravity waves that the ship can "surf" on at over 500 G's acceleration. A starship requires far less energy from its fusion reactors to run its Impellers than the amount of kinetic energy it gains from that acceleration.
* Honor Harrington vaccinate their members against various drugs to prevent enhanced interrogation.
* Honor Harrington, was a heroic version of this, having served on a ship that refused to surrender after their planet was enslaved and spent the next few months attacking Haven ships before being captured.
* Honor Harrington was brought on the original colony ship to Grayson. A humorous example comes from people who grew up on a space station and among other things believe that the people of old Earth used to believe in the Dollar, a boogieman responsible for ... a lot of problems that money has caused, but interpreted as daemonic possession rather than just the problems of capitalism. In another short story (also by Eric Flint), a Havenite secret agent is apparently unaware of what a dollar is... despite their country being at war with Manticore, whose currency is the Manticoran Dollar.
* Honor Harrington was convinced to move the next generation plot up about 20 years.
* Honor Harrington was that some members tried pushing their new developments into the fleet before they were ready, which is why said developments tended to fall short of expectations when in the field.
* Honor Harrington, Weber mentions that several other star systems, influenced by Haven, enacted similar reforms, but they actually pulled it off without gutting their economies, by virtue of having relatively honest politicians... until, that is, they got conquered by Haven.
* Honor Harrington well, or she and the man she loved faced certain execution.
* Honor Harrington when Andrew LaFollet is considering Honor's training remote and notes that no training remote has ever gone berserk and risen up against it's master. However he also is aware that if you misjudge your own skill level when setting the robot's skill level it can and will injure or kill you.
* Honor Harrington when and where the ships are going to exit hyper) to engage a force outside the hyper limit. This is rarely seen, due to the difficulty of knowing exactly where the enemy will appear (spies are only so good) and the fact that, unless you have a crushing force advantage, the enemy will be able to hyper

out again before you do significant damage.
* Honor Harrington, when a pair of Peep battlecruiser squadrons accidentally runs into a Mantie dreadnought. First we see the watch officer on the dreadnought (a communications officer and a self-proclaimed tactical ignoramus) order his ship to swing around to port simply because the starboard sidewall came up first, and then we cut to the flag deck of the battlecruiser squadron:
* Honor Harrington when Emily Alexander is confronted with a reason she never tried having a baby. A horrific accident left her wheelchair bound because she was one of the rare minority who couldn't use regeneration technology to heal. She feared her child having the same problem and ending up in the same situation.
* Honor Harrington, where the prolong anti-aging therapy allows for very long careers. The title character is in her 60s and many admirals, such as Hamish Alexander, are centenarians. Horace Harkness is a particular example, being in his 70s with a tendency to take less experienced officers and enlisted under his wing for seasoning.
* Honor Harrington while on a secret mission to Mesa, Victor Cachat employees a number of street urchins to serve as a spies and couriers. The Mesan organized crime bosses also employ lots of these. And Victor himself served as one to Noveau Paris' criminal elements in his youth.

* Honor Harrington with one of these and one of the most immortal lines in science fiction.
* Honor Harrington, without the tourist industry to justify it. This is what happens when a planetary autocrat decides he's the reincarnation of Frederick the Great. Other than the crazy, he was apparently quite a good ruler - he took his role model seriously. Harrington herself is also a big fan of 20th century naval warfare, and the Havenites Kevin Usher and Victor Cachat are fans of 20th century movies.
* Honor Harrington without waiting for the official start so even if Honor hadn't shot him the officer supervising the duel would have executed him immediately anyway.
* Honor Harrington wore an eyepatch in one book after her left eye was damaged before she had it replaced with a cybernetic eye (with telescopic vision). Later, she also acquired a synthetic arm.
* Honor herself, and everyone else in Manticore, has ready access to Prolong, a treatment that pushes human longevity up to several centuries...if it's administered at a young enough age. The people of Grayson, the planet which adopts Honor as its own, only get it in the present, and many of the people she gets close to are too old for the procedure and thus she'll outlive them by a considerable margin.

* Honor Thy Abuser: When the victim learns to forgive their bully(s), usually if they've already reformed.
* Honor Thy Parent: Parents are seen as deserving of deferential treatment, and people who don't render this are called out for it.
* Honor Thy Parent (Sumerian wisdom literature dated to c. 2600 BCE) advises, "The instructions of an old man are precious, may you submit to them" and tells sons to treat their father's words like the words of a god.
* Honorverse, but the desperation with which they miss each other definitely takes a toll on them personally.
* Honorverse by his fellows in the Royal Manticoran Navy, has a voice which is consistently referenced in the text as "deep", even in comparison to other male characters in the series.
* Honorverse doesn't have Space Elves but Graysons, a short, stocky, stubborn race of humans whose dome cities make an acceptable substitute for underground kingdoms, who, once they opened up showed a considerable talent for the tech side of things and who sequester their women, make for more than plausible Space Dwarves. Likewise the Skrat, genetically engineered by the Mesans into their thugs are acceptable Space Orcs.
* Honorverse essentially opens with them facing yet another separation as he is deployed to a distant part of the galaxy.
* Honorverse has several wormholes but rather than a tunnel in space they are described as points where extremely powerful standing grav-waves that normally exist in hyperspace overlap with real space and allow effectively instantaneous travel between their two ends. They all come in clusters of at least two and a large portion of Manticore's wealth comes from shipping fees of their own six, later seven, terminus wormhole junction, the largest in the known galaxy.

* Honorverse has this issue inverted on the planet Grayson, which has far more heavy metals than Earth. The colonists that had gone to Grayson had intended to forgo all high technology (believing the planet to be their Promised Land and technology to be a temptation by Satan) and still tried to do that, making a bad situation much worse while some practical religious leadership worked hard to square their ideals with reality. Some of the last remaining technology was used to genetically engineer higher resistance to heavy metals, but at the cost of a 1/3 male/female birth ratio, accentuating the conservative patriarchy of an already polygamous society (they are roughly Space Mormons with Japanese influences). By the time of the series a millennium later, the planet is still behind the galactic technology curve, but has domed cities, orbital farms, and better fission technology than anyone else since they forgot fusion and had loads of uranium lying about.
* Honorverse later, the April Tribunal's goals were fully realised with the Theisman Coup, the restoration of the original Constitution, and Eloise Pritchart's election as President of the Republic of Haven.
* Honorverse). Soon, though, as Flint effectively became a Weber's equal co-author, Cachat joined the main cast in earnest.
* Honorverse, the exodus from Earth led to the creation of several star nations, most prominently Manticore and Haven, most of which are sufficiently small to avoid major problems with governance. The major exception is the gargantuan Solarian League, whose poorly-written constitution renders the federal legislature virtually powerless, causing it to become overrun by corrupt bureaucracies and the (unelected) politicians who run them.
* Honorverse, Theisman becomes Pritchart's rock and absolutely the closest relationship she has. It doesn't hurt that he is one of less than a handful of people she can absolutely trust.

* Hoodwinked!: After the villain brags about his evil plan to Red and sings his song "Top of the Woods", it shows Granny, Wolf, and the Woodsman watching the whole thing from outside.
* Hoodwinked!. All four of the parties in a simple domestic disturbance turn out to have separate encounters with them, and they're the only common thread in everyone's testimonies: Red Puckett meets them once while she's riding her bike and then again in the cable car, suggesting that she's being tailed by them (she's the only one who encounters this person more than once), the Wolf asks them for a shortcut to Granny's house, they are the first person to show up after Kirk's truck is raided, and they ask Granny for her autograph before the ski race.
* Hoodwinked! and her Granny were behind the thefts on a misinformed tip from one of his informants. Both of them are innocent regarding the thefts and are

subsequently released after their alibis are confirmed so that Flippers can identify the real culprit.
* Hoodwinked! and loaded into a tramway cabin filled with dynamite, and it's up to Granny to rescue her.
* Hoodwinked!, and the detective Nicky Flippers mentions that she was "flying a flock of birds without a permit".
* Hoodwinked!, and though he doesn't see it he realizes she's there because the drop smells of hairspray.
* Hoodwinked! appears to have this when the Wolf hails a taxi in order to catch up to Red after she runs away. The ride only lasts under fifteen seconds.
* Hoodwinked! are contemplating how to get to Granny Puckett's house when Boingo shows up and offers directions:
* Hoodwinked!, a series of police interrogations conducted at Granny's house segue to corresponding flashbacks. The one constant in every flashback points investigator Nicky Flippers to the mastermind behind the Goodie Recipe thefts.
* Hoodwinked!, as Hansel and Gretel are the true villains of the story.
* Hoodwinked! attempt to attack and devour Red Riding Hood and her grandma before the timely arrival of the Woodsman and his team of yodelers. Subverted in the end where the spider is befriended by Granny's redeemed rival.
* Hoodwinked!, at which point he sobers up and says "I'll bring him in."
* Hoodwinked! a woodsman." So Kirk goes off into the woods with an axe and makes several attempts to cut down a short tree for practice, but his attempts are so pathetic that he looks like the world's worst lumberjack:
* Hoodwinked!, Boingo announces his plans to fatten up children by adding his addictive chemical "Boingonium" onto baked goodies so that they'll buy more goods.
* Hoodwinked! definitely qualifies, being an "Extreme Sports" ace, and world-class skier. She keeps this secret from Red because she doesn't want Red to worry about her.
* Hoodwinked! does one in the first conversation between Red Puckett and Nicky Flippers:
* Hoodwinked!, during the "Schnitzel Song", Kirk is waltzing back to his truck with the children. As another verse is about to begin, cue a needle scratch and quick whip-pan that reveals that during this number, someone has come by Kirk's truck, emptied it of supplies, and also taken off the tires and mounted the axles on cinder blocks.
* Hoodwinked! features this gag when Twitchy stops Chief Grizzly and Flippers on the road while high on caffeine. They actually have to have him speak into a tapedeck and play his voice back at quarter speed to understand what he's really saying.
* Hoodwinked! flashbacks. Notably, once all four are complete, the film has quite a bit to go.
* Hoodwinked! Friend to All Living Things, though, as she does use physical violence on the Wolf and on Boingo at separate points in the movie.
* Hoodwinked! has Japeth, this mountain goat who lives in a shack in the middle of nowhere. When Red finds him on the porch, he's strumming on a banjo:
* Hoodwinked! has Red Puckett, who impressively has a black belt in karate and beats up the Wolf.
* Hoodwinked!, he gets up close to her and makes a last-ditch effort to get answers out of her, prompting Red to respond, "Oh, Granny! What bad breath you have!"
* Hoodwinked!. In fact, there are two points where the carts Red and the Wolf are traveling in pass each other, but neither party sees the other - Red's cart is going down a steep drop that goes under another track at the exact time that the Wolf and Twitchy are going over that track. Later, an explosion caused by Twitchy mistaking a stick of dynamite for a candle blows up part of the track behind his and the Wolf's cart. The resulting blast causes the cart right behind them - Red's cart - to go off the track and crash.
* Hoodwinked!, Kirk is this sort of guy. He drives a truck around, selling schnitzel on a stick, and leads several children in a big singing number, cut off by his truck being discovered vandalized.

* Hoodwinked! mainly takes place at night, with Red, Granny, the Wolf and Kirk's stories happening earlier that day. As a whole, only two days pass.
* Hoodwinked!: Near the end of the movie the squirrel gets a cup of coffee to run down the mountain and get the cops. They have to tape his message and slow it down to hear it properly.
* Hoodwinked! of the humiliating story of getting beaten up by Red Puckett. Altough in this case, the humiliation mostly comes from the fact that Red is younger than Wolf, rather than her being a girl.
* Hoodwinked!. Red calls Granny when she is in Japeth's shack, unaware that Granny is in a ski race and dealing with the fact that the bandit's ski team henchmen have eliminated Granny's teammates.
* Hoodwinked!, Red comes across Japeth, a goat who claims he can only sing everything he says:
* Hoodwinked!, Red Puckett falls at least 200 feet from a cable car cabin into a heavily wooded forest. A fall from that height would either kill you or very likely break a lot of bones in your body. However, she also hits several tree branches before hitting the ground, so when she's getting up afterwards, it appears that she was only bruised mildly.
* Hoodwinked!, Red Puckett gets taken hostage and is put into a cable-car cabin that is loaded with dynamite and padlocked.
* Hoodwinked!: Red Puckett is hurt when Granny's secret extreme sports life is revealed.
* Hoodwinked!, Red Puckett practically is a master of this, as there are at least four or five that she gives during her story.
* Hoodwinked! sees Granny Puckett participate in a ski race that doesn't seem to conform to the rules of any sanctioned ski race. In the real world, the four members of Boingo's all-human ski team would be disqualified immediately for dirty racing by intentionally wrecking the other members of Granny's team. Not to mention that their methods of taking out Granny's teammates would legally qualify as battery. Also, we're pretty sure most sanctioning bodies have a rule against using dynamite charges to trigger an artificial avalanche on the course. And against the contestants throwing snowballs at each other.
* Hoodwinked! slide inside a police truck taking them to jail for their crimes.
* Hoodwinked!: the porcupine whose car seems to be ruined by trees. He shows up when Kirk is on a tree-cutting spree where his car gets crushed. It gets ruined again by another tree falling on him later (the result of Kirk and Wolf driving Kirk's tank-tread converted truck into a tree that is uprooted). A different driver appears earlier driving a similar blue sports car, who is startled enough when Red throws a book out of her tree-house that lands on his windshield that he swerves violently and crashes into a tree.
* Hoodwinked!, the villain gives out orders to his henchmen and ends up telling the one named Keith to think of a more scary name.
* Hoodwinked!, the Wolf and Twitchy are convinced from a conversation with an informant that Granny Puckett is the thief who's been stealing recipe books in the area, and her granddaughter Red Puckett might have information. They use a high-powered radar dish to listen in on Red as she rides a cable car up into the mountains. While they listen, Boingo asks Red if she delivers goodies up this area, and Red replies, "Well, not usually. But I was thinking about what you told me earlier? About the Muffin Man? I need to protect Granny's recipes from that bandit's evil plan. They're gonna shut down everyone in the forest if we're not careful." Unfortunately, the Wolf's equipment fails to pick up every word, so he only hears "....But I was thinking of....the Muffin Man....Granny's recipes....an evil plan....to shut down everyone in the forest," which seems to confirm his prior suspicions.
* Hoodwinked!, this snarky conversation that Red has in her first conversation at the cottage with Flippers:
* Hoodwinked Too! Hood vs. Evil: Early in the film, Red gives a rampaging troll a wedgie while beating him up.
* Hoodwinked Too! Hood vs. Evil (filmed in 2008 and released in Europe) had a long

wait before U.S. release due to mixed reactions in Europe and distributor difficulties (the original distributor Senator Entertainment went under); it was eventually released in October of that year.
* Hoodwinked Too! Hood vs. Evil led to the quiet demise of Maurice Kanbar's production company, Kanbar Entertainment, as they have not attempted another project since. Kanbar himself has since stuck to his normal careers as an entrepreneur and inventor.
* Hoodwinked Too! Hood VS. Evil, Moss does an evil laugh at the bridge scene after an 18-year-old Red tells him, "Bring it!".
* Hoodwinked Too! Hood vs. Evil, the movie wouldn't see release until over a year later.
* Hoodwinked Too! Hood vs. Evil. The poor Wolf just keeps flipping channels, and the TV just gets more ridiculously pointed.
* Hoodwinked! was just one huge coincidence. Really, he had no idea she was there. (As it turns out, he's telling the truth.)
* Hoodwinked!, when the Wolf is interviewing Woolworth, a sheep who is a paid informant of his, he gives a payment to learn Red's name and Granny's name.
* Hoodwinked! when Twitchy pulls out the dynamite and goes "Dee-na-mee-tay. Hmm, must be Italian."
* Hoodwinked! while everyone else doesn't give a second thought about trusting him.
* Hoodwinked! will show the Wolf and Twitchy in the front POV shot from Red's cart going down the drop, and Red's cart dropping in the background when the Wolf and Twitchy are traveling along the mountainside).
* Hoodwinked!: Wolf and Twitchy are in a mine cart and enter a tunnel. Twitchy looks for candles.
* Hoodwinked!, Wolf uses a clipboard as part of his disguise as an evil lair inspector.
* Hoofstuck after they hear Rainbow Dash shout something about baby-making.
* Hoofstuck. But if you fail, it's called ''hubris'... but it's really all the same thing!"
* Hoofstuck homage, with Fluttersleuth engaging in some absurd puzzle solving on the side.
* Hook. After that, Jack starts smashing a room full of clocks, for everything Peter did that annoyed him.
* Hook and Sarah Jane becoming a dancer and chorus girl instead of a waitress.
* Hook) and "When You're Alone" (a lullaby Maggie sings to comfort herself in Neverland). One of the dropped songs, "Childhood", is a big motif in the underscore. Bricusse included the original version in the book, explaining that everyone was crushed to lose that song, but they couldn't figure out a way to perform it onscreen if the movie wasn't a musical.
* Hook are put into the "Boo Box", a chest which is also inhabited by several scorpions.
* Hook as the Banning family heads to England at the beginning is provided by Dustin Hoffman — who later appears as Hook himself.
* Hook, as Tinkerbell flies the grown-up Peter Pan to Neverland, she leaves a trail of pixie dust in her wake. We see it fall on a couple embracing on the tower bridge, and they begin to rise.
* Hook as well in Season 4. He gets defined almost entirely by his status as Emma's boyfriend, and all his storylines revolve around his relationship with Emma. Season 5, however, reversed this by giving Hook a character arc that, while Emma heavily factored into it, spanned other elements and relationships with other characters as well. As of Season 6 however, he was right back into it.
* Hook attempts this on Peter Pan after Peter simply doesn't bother to kill him after their battle.
* Hook before he's eaten by the crocodile. The film is a thematic exploration of growing up and the relationship between children and their parents during the process, with Hook shown to have the body of an old man but the childish mentality of everyone else in Neverland.
* Hookbill the Koopa is defeated by knocking him down then ground pounding his

stomach.
* Hook, Captain Hook has a number of swappable attachments for his missing hand, including a cup-like device he uses to hold a glove for the impromptu game of baseball he sets up to try and win the love of Peter Pan's son.
* Hooked on Monkey Fonics": "I wonder how Cartman's getting on with his home schooling?"
* Hooked on Monkey Fonics", Liane buys Cartman a Hooked on Monkey Fonics spelling aid that comes with a live monkey. The cassette advises calling 1-800-555-4500 to replace the monkey if it arrives dead in the box.
* Hooked on Monkey Fonics Rebecca, who is unfamiliar with the public school system. When he asks her to come to the dance, she says that she might see him there. Kyle explains that he meant going to the dance with him, but Rebecca explains that there is no need for that since her father will drive her there. Once she leaves the room, Kyle bangs his head against her chair.
* Hooked Up Afterwards: A minor couple are implied to get together in the ending, with the actual relationship occurring post-story.
* Hooked Up Afterwards: At the end of the story, two characters are shown to have started dating.
* Hooked Up Afterwards - Two characters look like they'll hook up, but then it ends.

* Hookers and Blow: Someone who is decadent has lots of sex and/or does drugs.
* HookerVerse, and has only continued since that author left the fandom.
* HookerVerse. Subverted later on, as more people view it as dressing like "white trash".
* Hooker with a Heart of Gold: a kind-hearted sex worker (usually a love interest).
* Hooker with a Heart of Gold) and Seiichirou (30-something manga editor) strike with the younger Dragons of Heaven. (High school age, or in the aforementioned Yuzuriha's case, middle-school age.)
* Hooker with a Heart of Gold and she scratched him. Basically, the scars represent how despite his pretensions to being a cool rogue, he's just a thug.
* Hooker with a Heart of Gold: A sex worker who becomes a love interest.
* Hooker with a Heart of Gold: A sweet, innocent flower under the sexy persona.
* Hooker with a Heart of Gold has Shamhat, a temple prostitute who introduces Enkidu into human civilization by sleeping with him.
* Hooker with a Heart of Gold: I may be a prostitute, but that doesn't mean I only care about your money.
* Hooker with a Heart of Gold that Youji befriended, and got tortured to death by her pimp for her troubles.
* Hooker with a Heart of Gold: They may make a living selling their body for sex, but they genuinely care about people and want to make them happy other ways.
* Hook (even sometimes quoting the book in the script), in that much of the characterization and dialogue that was left out of the Disney version has found its way into the live-action sequel (although some of the signature quotes are paraphrased).
* Hook finally learns to both defend himself and unstopper his imagination in a battle of insults with Rufio:
* Hook Hand: A character has a missing hand and replaces it with a hook or similar.
* Hook Hand: Another common staple is for pirates to use hooks as prosthetic hands.
* Hook Hand originated from a mangled retelling of this urban legend.)
* Hook Hand with a hook for a hand has escaped from the local insane asylum. Scared, they decide to call it a night and drive home, but the car appears to be snagged on something. The boyfriend floors the gas pedal and they're able to break free and go home... but when he drops his girlfriend off at her house, they notice a hook hanging from the car door.
* Hook has a scene where Peter's daughter Maggie sings a song for the pirates. This

is a leftover from when the film was planned as a musical. The school play also has a song called "We Don't Wanna Grow Up".
* Hook has the Windcoaster Ramp, a gigantic spiral ramp complete with red chase lights.
* Hook, he meets Wendy while trying to catch his traditionally-animated shadow.
* Hook, however, bears only a passing resemblance to the play's version. The Disney version is much closer with the silent, jealous portrayal. After all, the theatre version was played by a spotlight.
* Hooking scams were common during the carny days of wrestling, and even in isolated pockets afterwards. A wrestler would challenge members of the audience to a match, with a small amount of money required to compete and a much larger sum as a prize, much like boxers sometimes did. Usually, the first match would be against
* Hook is a similar offender. Around midway through Season 4, he becomes defined almost entirely through his relationship with Emma.
* Hook, is thrown into the trunk, and has a bunch of scary scorpions dropped on him while the others scream "Boo!"
* Hook killed his own father (his only identified parent) out of anger at being "replaced" by a younger son after Brennan had sold Hook and his older brother into servitude aboard a ship in order to escape being arrested.
* Hook, levitating yogas, bees, giant acorns, penguins, dragons, innocent-looking fish, dynamite sticks on balloons, boulders out of nowhere and parrots for whatever reason.
* Hook, Line, and Screamer", Chris lets the players watch horror movies until night time in preparation for a prank challenge designed to make the campers think they're stuck on an island with a hook-handed murderer (played by Chef) on the loose. Everyone but Heather falls for it and then the stakes get raised when an actual hook-handed murderer makes it to the island.
* Hook meets his end when the crocodile he had stuffed and turned into a village clock comes back to life, swallows him alive, and ends his meal with a satisfied burp. It is not explained how the crocodile came back to life, but the power of imagination emphasized earlier in the movie might be involved.
* Hook, meets his end when the Crocodile he "had stuffed and turned into a village clock" (paraphrased) comes back to life at the end of the movie, and swallows him alive.
* Hook, Nana the dog senses that the titular Captain is about to invade the Darling home and starts barking.
* Hook, Peter Pan continues to visit Wendy as she ages. One day he returns to find her an old woman and is distressed that the girl he loved has grown old and forgotten how to fly. She tells him about her own granddaughter, Moira, who is asleep in her old bed. Peter promptly falls in love with Moira and decides to stay and grow up to be with her.
* Hook, Peter Pan does this with Captain Hook at his mercy, only to have Hook lunge at him and claw his arm instead.
* Hook. Peter promises to visit Wendy every spring, but his visits clearly don't occur at regular intervals. This is averted in the book. While Neverland has no seasons, and sunrises and such come and go whenever they feel like it, the relative time for people inside and outside is the same, and the children really are gone for months. While Peter's 'springtime' visits don't come at regular intervals, it's because he doesn't know/care how much time is passing, not because it isn't.
* Hook, Peter's voice goes briefly high-pitched after he's hit with a (thankfully-blunt) arrow in the groin.
* Hook requires the player to launch the ball into one of three highlighted chutes.
* Hook. Seeing the food he imagined hitting someone's face manifest itself is the catalyst for Peter believing again.
* Hook shows up for a final round, he has to spend most of the movie learning to be Peter Pan again.
* Hook's original sum-up of his crocodile problem in the 1953 movie made it clear that the Crocodile only started chasing him because he liked the taste of his hand when Peter fed it to the croc, and has been wanting more ever since. Even then,

* Hooktail herself, by whom Goombella wanted to get her butthole ravished.
* Hook: The first time we meet Tootles, he's searching frantically for something. When Peter asks him what he's doing, he says, "I've lost my marbles!" Which Peter of course interprets metaphorically, thinking that Tootle's has gone insane. Much later in the movie, Peter learns that Tootles used to be a Lost Boy, and that he left his (quite literal) marbles behind in Neverland.
* Hook, the grown Peter Panning says he doesn't believe in fairies. Tink 'faints', awakes, and tells him that fairies die when not believed in. The way she yells at him to clap harder seems to indicate that she's feeling just fine. (But then, she has a pack of Lost Boys believing in her.)
* Hook, the grown up Peter regains his ability to fly when he remembers the love and joy he felt when his son was born.
* Hook, the Lost Boys' feast of imaginary food doesn't become real for Peter until he begins to believe in it.
* Hook there are a few instances of this. A few pirates are shot, Peter and Rufio kill at least two pirates each, and later Rufio is fatally stabbed by Captain Hook, all with no visible bloodshed. Some blood is seen, however, when Hook slashes Peter's arm with his hook.
* Hook. The scratch marks on the wallpaper, combined with a maid's hysterical report, indicate that Hook sauntered through the house, scraping his hook along the walls, until he caught up with the children he was after.
* Hook, Tootles, a former Lost Boy and now elderly man, complains that he has “lost his marbles.” It turns out he actually had a bag of marbles, which were his “happy thought,” but he left them in Neverland. Once they are returned to him he is able to fly (with the help of pixie dust).
* Hook tries to set up a chant for Jack during his compensatory baseball game. Hook's pirates mix things up and start chanting "RUN HOME, JACK!" This proved costly for Hook, as it stirs Jack's thoughts of home and his sister. Smee has the pirates switch places, and the pirates start chanting "HOME RUN, JACK!" There are also a couple of chants of "Two, four, six, eight! Who do we appreciate?", both after that game and after the game Jack's team loses at the beginning of the film.
* Hook was initially enthusiastic about the system, but a series of failures on the test reels encoded for him caused him to change his mind, and hearing such a prominent voice in the industry disown CDS prompted everyone else to stay away in droves, ultimately dooming the first ever digital sound system before the second one, Dolby Stereo Digital, even made it to the big screen.
* Hook: Wendy reveals that everyone in the real world knows about Peter Pan because James Barrie wrote a book based on Wendy's stories about him.
* Hook went on the record to say he'd never work with her again. To her credit, Roberts owned up to her behavior later on, stating she was having relationship problems off-set, but admitting that it was no excuse for such bad behavior.
* Hook, when an entire sword (hilt and all) springs out of the Captain's sleeve, and into his hand.
* Hook, where Hook is about to pierce Peter's son's ear and tells him 'Brace yourself, lad, because this is REALLY going to hurt.'
* Hook, who left Neverland to experience fatherhood. He ends up returning there when Captain Hook kidnaps his children, whom Peter had grown distant from.
* Hook, with a literal line in the dirt between the supporters of Rufio and the supporters of Peter.
* Hooky by opening a portal beneath him that opens into one of these. As per his luck and overdeveloped sense of responsibility, he (reluctantly) extracts himself from the amorous women "before (he) really start to enjoy it."
* Hooky: Damien is very emotionally distant and cold, but really has soft spots for William, Monica, and his younger siblings, Dani and Dorian.
* Hooky has him meet an immortal young woman pursued by a hideous monster she calls a thunder roach, who has the power of only getting hit by any spell once, after which it won't work again.
* Hooky, leaving him naked in front of Pearl and her friends who laugh at him before he runs off home naked and humiliated.

* Hooky: Monica and William have one of these, due to being a princess and prince. However, things get complicated after the time skip and Monica has developed feelings for Dorian, while William is torn between his duty as a future king and the possibility of his reciprocating Damian's feelings.
* Hook! You stupid, stupid MAN!" (Especially pathetic because his previous insults had also been borderline examples and only slightly creative, such as "scab-picked bandage" and "camel-cake.")
* Hooky prince William is abducted by witches and later put under a curse of eternal sleep from which only a kiss of true love can save him.
* Hooligans: Storm over Europe, which is a tactical RTS specifically about hooligans — from the hooligans' point of view.
* Hoomania is about a boy who gets transported into a board game where the pieces come alive. The scenes in the board game world are done in Claymation.

* Hoop Dreams: Documentary on the development and college recruitment of two Chicago high-school stars.
* Hooperman, the title detective finds out that a criminal he put behind bars is getting out.
* Hooper starts with a long scene of the stuntman Sonney Hooper (played by Burt Reynolds) donning protective gear.
* Hooper was originally intended to die in the screenplay (as he did in the Peter Benchley novel). However, some footage captured by Spielberg's secondary crew, of a
* hoops&Yoyo's Haunted Halloween, Hoops, Yoyo, and Piddles are all trapped in North Escapades Mall after it closes for the night. Lightning strikes a sign displaying the mall's name, leaving enough letters lit up to spell "No Escape".
* Hoops And Yoyo, Hoops, Yoyo, and Piddles hitch a ride on Santa's sleigh and wind up falling through one of the many wormholes the hi-tech sleigh travels through. The three end up stuck in the past, before Kris Kringle started his toy-delivering tradition, and have to help when he doesn't feel like making toys.
* Hoops, Matty has adamantly refused to join the basketball team. Ben spends most of "The Pilot" trying to convince him to do so, even going so far as to hire a hooker to try to get him laid. The plan doesn't work out and both Hopkins and the hooker get arrested before the hooker even makes it through Matty's door. At the end of the episode, however, when Ben is about to throw in the towel, he finds that Matty has joined the team. Matty says that he did so because what Ben did is the first time anyone has ever done anything like this for him.

* Hoosiers, about a small-town high school basketball team in early '50s Indiana, employs a subtler version of this than most films.
* Hoosiers. Coach Dale gets himself taken out of one game, challenging Shooter to step up into the role of coach. After a little fumbling, he does, with some support from his son.
* Hoosiers has the Big Game between tiny little Hickory High and powerful South Bend Central for the state championship.

* Hoosiers), Hickory's town drunk and father of one of the players, has no Milan equivalent (Wood didn't have an assistant at all).
* Hoosiers is based off the real story of tiny Milan's victory over giant Muncie Central. The game was won by a shot at the last second.
* Hoosiers is based on the true story of the tiny, country school of Milan (Hickory in the movie) defeating the big city school of Muncie Central (South Bend Central), a very rare feat given the advantages a bigger school would have. The movie even included a prayer before the championship game that featured the Bible verses of David versus Goliath.
* Hootie & the Blowfish, and dwindling ability of the band to write hit songs.
* Hootie & the Blowfish is a cover of a song by 80's Canadian alternative rock group 54-40.
* Hootie & the Blowfish — to him, a sign that there was a vast market of rock fans who didn't like grunge and had been left sorely under-served by the major labels. Twenty million records later, and Sommer's hunch was very much vindicated.
* Hoot Kloot cartoon featured the eponymous sheriff being assigned to protect one of these (who really was called "The Hanging Judge" by him and others throughout), due to him having numerous enemies that are out to get him. Sheriff Kloot, due to his cluelessness and incompetence, ends up getting the Judge nearly killed, with the cartoon ending with the Judge angrily chasing after him.
* Hoot: Mullet Fingers is mentioned to have been sent to one by his mother, who wanted nothing to do with him; he promptly ran away from it and has been living off the grid ever since.
* Hoot, Roy punches Dana in the face while being choked and is subsequently punished.
* Hoot, the villain is arrested for trying to destroy a habitat for endangered owls, driving a bulldozer without a licence, and "many other things".
* Hooty looks like a full-grown owl and can fly, yet Eileen once claimed he was either four or six, and one video says that he's just starting school. In addition, there's a
* Hooty's Moving Hassle", after Luz, Willow, and Gus accidentally brings the Owl House to life during the Moonlight Conjuring, they decide to take the house out on a joyride. As they control the Owl House, they walk past a demon hunter who appears in the foreground and decides to pursue it with his group.
* Hooty's reason for not being able to speak. The official website first said that he was autistic, then later it said he was just learning English as a second language.
* Hoover Dam. Double points when the Boomers commence their bombing run on whichever faction you're fighting against.
* Hoover (vacuum cleaners), in Britain. One of the most pervasive examples of the trope in the UK as the name is a near-universal verb for "cleaning". Nothing
* Hooves of Death for good measure. Despite adorable cartoon unicorns on the side of humanity, the hordes of undead are just as persistent as ever, and the genre's dangers like being ripped apart by zombies or refugee camps from lack of food remain always hover over the characters. Judging by a flashback, the zombies' ultimate origin might be equally as magical as the unicorns themselves.
* Hopalong Cassidy films insists that "El Camino Real" is Spanish for "The Real Camino", to hide the fact that he has no idea what a camino is. (Or "Real", for that matter, which means Royal.)
* Hop, a lot of the fanbase shipped human protagonist Fred O'Hare (James Marshden) with his sister Sam O'Hare (played by Kaley Cuoco). As most of their interaction together come off as a couple rather than as siblings. Sam is the only adult female on-screen dedicating the most of her time to Fred, she lets him sleep over her bosses house (she housesits for her boss) and then drops over unannounced to check up on Fred. A lot of her behavior towards Fred comes off as "overly concerned girlfriend" rather than sister. Even Carlos shipped them together when he interviewed them in disguise at the behind-the-scenes movie premiere.
* Hop discharges jelly beans on the hood of Fred O'Hare's car, as a proof that he's the heir apparent to the Easter Bunny.

* Hope also set in the 1940s, this time a private investigator delving into the occult side of Hollywood.
* Hope & Faith, Faith provides the Gooch with a diagram of a position she wants them to try. He turns the piece of paper upside down and remarks "I don't think I bend that way."
* Hope & Faith has Hope try to teach a class of teenagers about sex using sock puppets such as "Abby Abstinence", "Peter Peer-Pressure", "Polly Pregnant" and "Donny Dropout".
* Hope & Faith one episode has the two sisters pretend to be a lesbian couple.
* Hope & Faith: Played with. When the two title characters get office jobs together, the ever-immature Faith dangles her computer mouse into Hope's cubicle and yells this trope name.
* Hope & Faith starred Kelly Ripa and Faith Ford in the title roles... but Faith played Hope and Kelly played Faith.
* Hope & Faith takes responsibility for the act so her nephew won't get in trouble. Hope and Faith spend the rest of the episode trying to replace the ball by pretending to be sport reporters who want to interview Roger Clemens.
* Hope & Faith. The season 1 finale parodies this even further, featuring a soap style plan to humiliate Faith on live TV.
* Hope & Faith: The title characters, trying to disinfect Hope's daughter Sydney's pierced tongue, head into the shower with her, dressed, so as not to spill hydrogen peroxide on the rug. Just then Hope's husband Charlie comes in asking for her. Hope, who doesn't want him to know about the unauthorized piercing, claims to be showering, so Charlie drops his bathrobe to join her and pulls the curtain, inadvertently exposing himself to his daughter and sister-in-law.
* Hope and Fear, Harry Kim tells Seven of Nine that Earth has hundreds of alien species living on it.
* Hope And Gloria reunion on Dupree's show which ends in a Thicke on Thicke fistfight.
* Hope and Gloria villainess Julie Newmar also playing herself. The main character was led to believe he was her father. The program referenced his autobiography and his real name of Bill Anderson.
* Hope And Gloria, when Hope sleeps with a guy, and then gets a clue that misleads her to believe he's her half brother.
* Hope and Glory: Has a dogfight as seen by a civilian from the ground. Billy stares up in fascination but all he can see is contrails looping around in the sky.
* Hope and Glory, the two children are trying to catch fish and having no luck, when an airplane drops a bomb in the lake they're fishing in (the film is set during WWII); suddenly, dozens of dead fish float up to the top of the pond, which the children take back home, much to the shock of their parents and grandparents.
* Hope and Lightning. They spend a good amount of time alone together when the party splits up and Lightning does take Hope under her wing, to toughen him up. Their interactions can easily swing between motherly/mentor feelings on Lightning's side, but can just as easily be seen as romantic.
* Hope and Red, Red thinks his longcoat is one of these: "deer leather, finely tanned, and soft as velvet." His friend Nettles refers to it as his "mole rat coat," though, so maybe not.
* Hope and Red. The humming sound the blade makes when it moves through the air is said to be the loss it feels at every death.
* Hope and Red, things are briefly awkward after Nettles breaks up with Red, but they eventually settle into this.
* Hope Arc is even more divisive; you'll see opinions ranging from "deserved happiness" to "cheap pandering" and everything in between.
* Hope Bringer: A usually heroic character who inspires hope in others.
* Hope Bringer finally does away with this and has the world acknowledge Goku as a hero, with there being a statue of him still standing at the site of the World Tournament 100 years after he was last seen.
* Hope Bringer. Shepard's handshake with Legion was considered so significant that it was preserved in the geth consensus, as it was the first time that an organic

had ever treated a geth as an equal, giving hope for a peaceful resolution with organics.
* hope can sustain several seconds of enemy fire on Insanity. They'll need it. And that's not getting into the Infinity +1 armor mods.
* Hope/Clarke is a popular ship within the fandom, despite the fact that Hope has nothing but hate for Clarke and that Clarke has repeatedly threatened the lives of Hope's friends. This is mainly due to a lot of fans feeling they are similar to Damon and Elena from
* Hope Comes to Brockton Bay and flight, thinks Legend's ability to make lasers turn corners is bullshit.
* Hope Comes to Brockton Bay explicitly has a minor superpower that prevents anything from sticking to her. It has all sorts of interesting interactions, including making her one of the very few people who can't be held by containement foam and allowing her to perform surgery without needing gloves or having to wash her hands.
* Hope Crusher: A villain who enjoys taking away hope from their victims.
* Hope Crusher: A villain who specializes in taking hope away from other characters.

* Hope for the Heartless and weapons usage) and exceptionally educated (and mostly self-taught).
* Hope for the Heartless are assigned to temporarily serve and counsel the Horned King, they are bound within the borders of his castle courtyard.
* Hope for the Heartless, despite resembling them, gwythaints such as the two he kept aren't dragons. He did once encounter a true dragon, which was built like a gwythaint but had four legs and bronze-colored scales, and was as large as two peasant houses put together. It didn't breathe fire (but he has heard tales from people who have actually seen firebreathers), but spat lava instead, something some dragon types can do by eating rocks and digesting them into a lava-like substance.
* Hope for the Heartless. He doesn't feel hunger like mortals do, but his body needs nourishment now and then like with mortals. However, since he lacks the sense of smell and taste, the mandatory act of eating is pleasant neither for him to experience nor others to witness. It is implied that he can require sustainment through other means, but those other options aren't available for him at any point.
* Hope for the Heartless how he received his monstrous appearance. His explanation invokes this trope beautifully.
* Hope for the Heartless. It remains to be seen if the Horned King manages to save his soul from eternal damnation.
* Hope for the Heartless — who stumbles upon his castle during one stormy night — to keep his return a secret from Prydain. He threatens to kill her and her loved ones should she try to escape, but grants her request to say the proper farewells to her family. During her short stay with her mother and brother, she asks them to keep everything a secret to prevent mass panic from erupting due to the Horned King's resurrection. They eventually agree reluctantly, realizing that they can't possibly do anything without potentially endangering Avalina's life.
* Hope for the Heartless, recognizes her as a bright child and a passionate learner. For example, she can read better than many grown men, even if she mispronounces some things and halts in odd places (reading is a passion she's not have had much time for before her capture), but her arithmetic is at best poor and handwriting barely decipherable and she can't read maps. Not satisfied with such potential being wasted in meager duties, the mostly self-taught warlord decides to

educate her himself, and she makes great progress.
* Hope for the Heartless severe burns. Snow causes that also if it melts on him. Diluted water (such as tea) burns him as easily as pure water, though not as severely. However, he seems to be able to digest wine.
* Hope for the Heartless, she takes him back to his castle to be tended even though she wants to be free of him and is aware how sinful he is, knowing in her heart that she could never leave someone to die willingly and live with it.
* Hope for the Heartless shove a cream pie straight to the Horned King's face. Avalina is unable to contain her laughter, and the lich grudgingly takes the humiliation with dignity, proving the plan a success.
* Hope for the Heartless, since "Mrenagy" is the word "Germany" rearranged.
* Hope for the Heartless that his former henchmen haven't needed him to continue their barbaric lifestyle.
* Hope for the Heartless that other than flies, maggots and gnats, no scavenger has touched the meat of the wolves driven murderously insane by a disease similar to rabies.
* Hope for the Heartless. While it's not stated exactly how long he existed before his imprisonment, it's known that he plagued the mankind at least centuries before his former apprentice came into existence. Note that the Horned King is over a thousand years old himself.
* hopefully die on the battlefield); this, incidentally, is where we get the term "cadet" for a trainee officer ("cadet branch"=junior line of a noble house). If the line were about to expire, a monk or priest in such a position might be permitted to leave the Church and marry. That's where Münchhausen's last name comes from, BTW.

* Hop-o'-My-Thumb uses the "Seven Mile boots" to cross great distances in a small amount of time.
* Hop on Pop included a line "When I read I am smart / I always cut whole words apart. / Con Stan Tin O Ple, Tim Buk Too / Con Tra Cep Tive, Kan Ga Roo." to make sure his publisher was actually reading the manuscript. (He was, and the line was changed, as Seuss planned.)
* Hopper’s biological Sara was also this to him, making light of her death due to cancer, is the quickest way
* Hopper and Damien act out a version of this after kidnapping Torrez. Damien is a gangster while Hopper is a police detective, so the latter frequently has to restrain the former from attacking Torrez. This ends disastrously when Damien shoots Torrez in the middle of the interrogation.
* Hopper frequently steals the show away from the main kids, with major focus being given to his character kicking ass and taking names as well as his relationships with Joyce and later Eleven.
* Hopper is like this in Season 3, towards to Joyce, his old highschool sweetheart. He sets up a date with her at a restaurant but unfortunately she instead goes to Mr Clarke (the science’s teacher) to ask about why
* Hopping: You can't jump on your own, but it jumps for you every couple seconds.
* Hoppity Hooper episode "Colonel Clabber—Limburger Cheese Statue" featured a villain who was stealing the world's great landmarks and having them transported to his estate because he was unable to travel to see them.
* Hoppity Hooper: Fillmore really does not know how to play that bugle.
* Hoppity Hooper, he'd make several funny poses, accompanied by mechanical sound effects.
* "Hoppy Bunny" has Frylock develop popped-out veins after Shake extracts his jewel from his body.
* HoPR property and Ji a thief for swiping it) start with Lewis chuckling before he launches into the rant by asking who the hell Ji thought he was for doing that.
* Hopscotch anyone can swap bodies with anyone else. One of the protagonists rents his body out to people who want to avoid unpleasant experiences.
* Hopscotch, both voluntary and involuntary. The most ethical (and richest) of those who wish to live forever bid on the bodies of those sentenced to death, as portrayed in a rather repellent scene reminiscent of a slave auction. Those who lack sufficient funds must steal their new bodies, and usually can't impersonate the people they've "become." They're forced to hide out in the most secret of places and live a sort of half-life, constantly fearful of both justice and the coming time when they must steal another body or finally let old age catch up with them.

* Hopscotch: "Follett couldn't pinpoint his own backside in broad daylight!" A subversion, in that Kendig wanted the Feds to stop by and destroy his former boss' summer home. "I figure you've had enough time to trace this call so I'm hanging up now."
* Hopscotch: Gekrepten, Oliveira's wife/girlfriend/whatever back in Argentina. She immediately accepts him after running away to Paris and never complains the fact that he stays all day at her place, never working. Heck, she even takes care of him after the trap incident. Subverted in that, no matter what she does, Horacio will never respect, care or love her because she isn't as intelligent/interesting as La Maga or Talita.
* Hopscotch— Stale Beer. The writer wanted to take a James Bond story and take out all the sex, gadgets and over the top action.
* Hop so well that his outfit remains intact while his bonds were eliminated.
* Hop the Easter Bunny is a title that is passed on from father to son, but only bunnies have ever accepted the title. The plot begins when the next in line refuses to pick up the mantle, and the human being Fred wishes to accept it instead. Unfortunately, so does the main antagonist: a chick named Carlos.
* Hop the Moai statues on Easter Island (where all the bunnies are from) are the secret entrances to the Easter Bunny's whole operation.
* Hop to It and Alya have just spent the last several weeks treating Jack as a rival for Adrien's affections, which Jack was completely blind to.
* Hop to It and Kwamis created by Omega Labs, each suggested to be cloned from the canon Kwamis: Rabbit (equivalent to Ladybug), Dog (equivalent to Black Cat), Swan (equivalent to Butterfly), Chameleon (equivalent to Fox), Mantis, Dragonfly (equivalent to Peacock) and Firefly.
* Hop to It has Rabbit, an American Miraculous holder who used to be about as accepted in Los Angeles as Ladybug and Chat Noir are in Paris. However, around the time she moves to Paris, she accidentally acquires her partner's power, Dogstruction, which activates when she tries to use her own power of Lucky Strike. As such, her run through a Paris neighbourhood while trying to avoid an akuma results in her causing over a million dollars in property damage and several injuries. Chat Noir accepts her explanation quickly enough, as does Ladybug when Chat tells her, but Rabbit is first mistaken for an akuma by the media and then for a supervillain in her own right, earning the nickname "Jack Hammer". She does earn a few more defenders when she helps out civilians during the Road Rage attack, including Nino, but the media continue to question whether she's a hero or a menace. Alya even makes a Ladyblog video painting "Jack Hammer" as an agent of Hawk Moth, which persuades most of her class, some of whom have family members that were affected by the first "rampage". Alya eventually turns around on her after she helps save her from Cottontail and makes her a second video with the other heroes, but Rabbit still hasn't quite escaped her "Jack Hammer" reputation.
* Hop to It portrays Max as this even when he's speaking a second language.
* Hop to It, Rabbit meets another American girl in Paris named Colleen who was a fan of her superhero persona when they both still lived in Calfiornia. Colleen gets akumatised after getting angry over a Ladyblog video attacking Rabbit, and proclaims herself Rabbit's sidekick Cottontail. Hilariously, Cottontail and Colleen's reactions to meeting Rabbit are almost the same:
* Hop to It spends several chapters treating Jack as a rival for Adrien's affections, though Jack is completely oblivious to this. They only find out what was going on after Jack happens to mention her boyfriend Diego to Alya, who panics and scrambles to call off the cruel prank Marinette had set up.
* Hop to It star, and no one over the age of forty will let her forget it, leading her to go by the name Jack instead.
* Hop to It, transforming into Rabbit, and trying and failing to purify it. She then tries to use Lucky Strike, only to somehow cast Dogstruction instead and tear up the street while trying to escape. After she asks herself "How did everything come to this?", the story cuts back a few hours.
* Hop to It, when Chat Noir describes an akuma only he can see, thanks to his night vision:

* Hop. "We call this a coup d'etat. It is French for—coup d'etat."
* Hop, we have the Pink Berets, a squad of female bunnies described at one point as "the Easter Bunny's royal guards".
* Horace and Jasper also do this, swerving all over the road as they attempt to cut off the fleeing truck the dogs are on.
* Horace and Jasper. Everything from their disproportional builds to their huge noses makes
* Horace At certain points in Chapter 7, Horace can eat a cake that will inflate him like a balloon, allowing him to cross over obstacles for a time.
* Horace prefers a simple one-handed sword and a buckler shield. The combo is pragmatic and effective, just like Horace. Ironically, it's the shield that gets more mention, fitting for someone whose main drive is to protect others.
* Horace was not being sarcastic when he said, "Dulce et decorum est pro patria mori." (it is sweet and right to die for the fatherland). Wilfred Owen, who fought in WWI, took the line and threw it back in
* Horacio Altuna's erotic fiction also includes a lot of comedy, usually a five-page set-up ending on a gag or punchline.
* Horatio Alger, Jr.'s books tend to be left to their own devices to get ahead in the world. Charities exist, but are overstretched and can do no more than provide minimal food and shelter in bad weather for the children.
* Horatio Alger, Jr.'s corpus of work under this theme was practically a genre unto itself. Most often, the hard-working child has been observed by a wealthy adult who then mentors or adopts him.
* Horatio Alger, Jr. story ever written follows this same plot. Poor boy works hard, is virtuous, and is helped by a kindly older man, and he eventually makes his fortune, relatively speaking.
* Horatio Alger, Jr., the hero Fred is sent into a seedy bar in Canada where he plays pool with a robber to endear himself to him and get access to his stolen loot.
* Horatio Caine moaned about it in an episode, telling a reporter to cover the missing (non-white) girl they're looking for that week.
* Horatio himself is unusually old to be a midshipman. He comes aboard the ship at 17 and has viewers wonder whether he's plucky. Good news! He is. He saves the day several times in the very first episode.
* Horatio Hornblower (1951). Starring Gregory Peck in his prime in role of Captain Hornblower. Virginia Mayo played Lady Barbara Wellesley.
* Horatio Hornblower (1998 – 2003) has two examples from "The Even Chance" (AKA "The Duel"):
* Horatio Hornblower, a British Royal Navy officer created by C.S. Forester, had numerous encounters with privateers over the 11-novel span of his career.
* Horatio Hornblower, a crime novel that was adapted into a play and movie.
* Horatio Hornblower action. This is where ships that take shelter close to shore are boarded via boats launched from a pursuing ship, usually by night to ensure stealth. There are occasionally the more familiar direct ship-to-ship boarding actions as well.
* Horatio Hornblower, Admiral Leighton launches a raid on a the Spanish harbor of Rosas, in order to attack and sink a squadron of damaged French warships while they attempted to make repairs.
* Horatio Hornblower after a harrowing contest to stay ahead of a much more powerful French frigate in stormy weather, in which he not only succeeds but creates an opportunity to fire on her unopposed. After such a struggle, the simple act of putting down his speaking-trumpet and turning to his first officer "took on a highly dramatic quality in the eyes of the crew."
* Horatio Hornblower. Although, being a Napoleonic Wars-era Naval officer, and the timing of military operations being dependent upon friction—wind, rain, sea conditions, road conditions, partisan attacks, the idiot who got drunk last night, et cetera—he has no way of predicting for certain the movements of his enemies, even if he knew what they intended to do. And he's generally brilliant at it, so really no reason to complain.

* Horatio Hornblower (an adaptation of the book), several characters receive corporal punishments.
* Horatio Hornblower an additional advantage, Hornblower's maneuvering is so clever that he not only evades the bigger ship, he actually gets it into a position where he can fire a broadside unopposed. Although he doesn't destroy it, he confounds its attempt to chase him away from his station and forces it to run off home.
* Horatio Hornblower and most surviving ordinary seamen as well as officers are shown to care about giving them "a decent send off", as bosun Matthews puts it. Captain Sawyer orders to have one poor young seaman thrown over the side without a funeral. Hornblower is reluctant and gets "this" close to disobeying Captain's direct order, but Matthews pleads with him that they can "read over" the dead kid later.
* Horatio Hornblower and often feels bitter, being overshadowed by his friend's amazing luck and heroic qualities. When they accidentally get together in Spanish prison after Archie was lost at sea in "The Duchess and the Devil", Archie is completely broken. Horatio insists that he needs him to survive, but Archie doesn't believe him. In "The Frogs and the Lobsters", Archie suffers a panic attack when he's in charge of holding a strategically important bridge. Horatio tries to calm him down and insists that he's a capable officer. Archie thinks he has no place being an Acting Lieutenant and he keeps panicing. (He later gets over it when he has to steady his men.)
* Horatio Hornblower and other similar book series depict such captures on average at least once a book, if not more. It would be impractical to list every incident.
* Horatio Hornblower, and surprisingly, he doesn't die of his illness and old age.
* Horatio Hornblower, as mentioned above, includes a few of these. The mini-series adaptation has mostly older midshipmen who are supposed to be in their mid to late teens. The following are the most prominent Middie characters.
* Horatio Hornblower because that only complicate things further and a subsequent court-martial screws the poor men over.
* Horatio Hornblower) bigoted statements about the Irish. It's plain as day what he means to everyone but Horatio, who seems to find it a non-sequitur.
* Horatio Hornblower, blockade service on his ship tends to be a lot more eventful than on others.
* Horatio Hornblower books. Granted, he's an English naval captain from the early 1800's, so isolation is part of the job, but Hornblower takes it beyond what would normally be expected because he's so cautious and self-conscious about saying something that might bite him later. He makes a point of never indulging in "unnecessary words." The few instances where he does let his reserve drop are notable, and he usually ends up regretting it.
* Horatio Hornblower books, Hornblower has this problem almost every time he's in an involved military operation. You'd think, say, the Spanish, as their allies, would give the British Navy all possible assistance when trying to retake crucial military positions. Nope. He has this problem with other elements of the British Navy, too.
* Horatio Hornblower books is a highly decorated hero, and Hornblower is initially excited to serve under him, but disappointed to find that Sawyer is a brutally cruel paranoiac, always convinced that mutiny is only a breath away. With the ship's doctor unwilling to declare the captain mentally unsound, which he obviously is, Hornblower has no choice but to begin plotting a real mutiny.
* Horatio Hornblower books mention the "traditional blasphemous prayer" that sailors utter when they're forced to wait for an enemy ship to deliver a broadside: "For what we are about to receive..."
* Horatio Hornblower: Captain Pellew is magnificent when he fake-chews out Hornblower. He starts dressing him down, reprimanding him for breaking rules or not following his orders, and then says how excellently executed Hornblower's action was. Sometimes it's followed by handing him a promotion.
* Horatio Hornblower Captain Sawyer threatens to have the last man down flogged. He then orders to have him thrown over the side of his ship without a funeral.
* Horatio Hornblower character who was lost and presumed dead in a similar fashion,

leaving a convenient way back when the people writing the series decided they wanted to put Jamie Bamber in more episodes.
* Horatio Hornblower confront a language he doesn't know and has to rely on someone else's interpretation skills.
* Horatio Hornblower: Corporal punishment like flogging or caning appears often, sometimes presented as just punishment, sometimes as injustice. As a commander, Hornblower hates to administer floggings, because he believes that it breaks the spirit of good men, and makes bad men worse. He's squeamish about them, as well.
* Horatio Hornblower dangers of working with black powder are explained. Men who work in the powder store have to wear slippers because shoe nails can strike a spark that would send everyone sky-high. When Hornblower rigs a powder store to explode, he continually thinks of himself being surrounded by violent death.
* Horatio Hornblower do surgeries as well. Interestingly, in all those cases laudanum might actually be useful since it is an analgesiac and has sedative properties. Given the state of medical science back then, laudanum (alcohol laced with opium) was considered a "miracle drug". A large enough dose and you *will* feel better.
* Horatio Hornblower (exposed to the rather nasty English Channel weather) so that he might "learn to watch his footing".
* Horatio Hornblower for once, and the fact that they are palatable is just a nice bonus. Unfortunately, this makes Styles who was Hornblower's previous steward of the Lethal Cook variety very jealous.
* Horatio Hornblower Frenchmen are always referred to as "Frogs", and the Spaniards are called "Dagos".
* Horatio Hornblower has, in the first episode, the very creepy Inquisition scene in which Simpson gets a couple of other midshipmen to pin Horatio to a table, then leans in way too close to him and asks him what his "dirty little secret" is, starting with "A fancier of other boys, perhaps?" Additionally, there's a lot of subtext and hints dropped ("You don't know half of what he's capable of"; "Jack's missed you, boy"; etc.) that before Horatio arrived, Simpson was sexually abusing Archie. Which of course just makes the Inquisition that much worse.
* Horatio Hornblower. He deserved them, but he probably Styles probably compensated for the fact that he couldn't be smacking Mr Hunter.
* Horatio Hornblower" He even ensures that his men won't fire at Doughty, warning them not to shoot in the direction of the neutral American ship he is swimming towards.
* Horatio Hornblower He goes for a hug, but remembering his rank, he just grabs his arms with both hands and shakes them, and he laughs with apparent pride and relief that his young hero is back safe and sound. This trope is often played to feel awkward or express problems showing affection, but this particular Air Hugging is very sweet.
* Horatio Hornblower, he's nearly hit by a pulley block and Horatio knocks him down just in time.
* Horatio Hornblower. He starts as viciously critical and unjust, continues to be extremely paranoid and ends up genuinely, tragically mad. His lieutenants are in an unenviable position, especially when the ship's surgeon is the captain's friend, an alcoholic and unwilling to pronounce him unfit for command. Whatever steps they consider to take would be ultimately a mutiny.
* Horatio Hornblower. He tries to get help for him from Don Massaredo, the commander of the Spanish prison they're in. Conveniently, it's also raining and it looks very dramatic.
* Horatio Hornblower High production values and extraordinary quality. There were some notable changes from the original book. Hornblower's solitary hero and man alone got a pal Archie Kennedy and was close to a fatherly Captain Pellew, as introspection and inner dialogue are hard (and potentially uninteresting) to translate into visual media. It has all elements required, and you will think pirates are lame after watching the Navy guys in action in this series.
* Horatio Hornblower: Hornblower and his men go ashore, swim across a lake, and successfully destroy a French coaster. Upon returning, they find an angry woman has

thrown all their clothing into the lake they crossed. When Hornblower boards the Sutherland again, he has to receive his salute naked.
* Horatio Hornblower: Hornblower as Midshipman has been having some difficulties to be respected by his men. He's visibly pleased when surly Styles voluntarily salutes him after he praised their division and showed concern for their fallen lower-deck fellow.
* Horatio Hornblower, Hornblower desperately needs to escape a reception line at an imperial dinner because he's realized the Finnish translator provided to him plans to assassinate the Czar (using pistols stolen from Hornblower) and provides "the only excuse he could think of" to the master of ceremonies to get away. Though that excuse is not explicitly named, that Hornblower hopping from one foot to the other in his haste adds to the effect makes it pretty clear.
* Horatio Hornblower. Hornblower is shown eking out his half-pay during a truce with France. In his case, he had it less bad then some as he had the talent to be a professional card sharp at a club.
* Horatio Hornblower. Hornblower knows the merchant captains will report him to the Admiralty as soon as they return to England, and is hoping to secure enough success in the meantime to avoid getting skinned for it.
* Horatio Hornblower hour. What the sleep deprivation does to him is quite terrifying, until saner minds step in and let him sleep.
* Horatio Hornblower, however, Bush has no problem filling him with lead.
* Horatio Hornblower: Implied with Archie Kennedy's reaction to Wellard's beatings. Wellard is a young midshipman who suffers the most because of Captain Sawyer's growing paranoia. It is Lieutenant Kennedy who tries to intervene, openly calls it an injustice and is visibly upset while other Lieutenants try to hand-wave it at first as Captain's harsher ways and common naval discipline. In the first series, Archie was the young midshipman who suffered at the hands of a powerful bully.
* Horatio Hornblower; impressment was limited to merchant crews during wartime. Pressing landsmen was an invitation to deep trouble for any officer who tried it).
* Horatio Hornblower In a later book, he is appointed as a Colonel of Marines, a sinecure position granting him extra pay with no extra responsibilities, as an indicator that the Crown is pleased with his performance.
* Horatio Hornblower in Archie). Bush comes aboard pleased to serve under the heroic Sawyer, gets irritated at the other lieutenants' criticisms of Sawyer's erratic behavior, and observes with an unreadable expression. So when he seeks out their mutinous assembly in the middle of the night, they're quite frozen, until he expresses his own opinion of Sawyer's unfitness and that if they're planning to do something, he'd like to join them.
* Horatio Hornblower indicates that they first met as adults, when Hornblower was staying in the Masons' boarding house.
* Horatio Hornblower. In "Mutiny," Bush has only climbed aboard when Horatio has to tackle him out of the way of a wayward cargo net, causing Bush to remark on the "interesting welcoming ceremony" and take a bad impression of Horatio's abilities as a lieutenant. Less dramatically, they reunite in "Loyalty" by colliding with each other on the street and getting snappish until recognition kicks in.
* Horatio Hornblower in the days of Napoleon. In "Mutiny" the sailors have significant trouble manning their stations properly since Captain Sawyer has just given them all double rum.
* Horatio Hornblower is a brilliant sea warrior whose men are devoted to him, who managed to make several women fall in love with him, and who managed to manipulate the French into two of their greatest military disasters in history (Trafalgar and Russia). He also absolutely hates himself.
* Horatio Hornblower is aground and under gunfire from the Spanish. Styles loses his patience and shoots Randall in his foot. Randall promptly hops aside in pain and makes way.
* Horatio Hornblower is prone to sea-sickness and he is really afraid of heights. Excellent material for an officer in the Navy, isn't it? His fear of heights is referenced quite often, and he has to climb in the riggings or onto the fighting top several times when he has to deal with shortening sails and similar things.

He's also shown trying to fight and overcome his fear voluntarily.
* Horatio Hornblower is the only book of the series written from the POV of a character other than Hornblower (in this case, newly-assigned Lieutenant Bush). The Captain falls down a hatchway and is put in a coma. Through the course of the book, it's unclear if he fell by accident or if he was pushed by either a much-abused midshipman or Hornblower himself. Things are not made more clear by Hornblower appointing himself head of the investigation in the confusion caused by the power vacuum, nor by his insistence that they press on a planned attack on a Spanish fort, keeping everyone too occupied to look into things too closely. By the end of the book, the Captain is killed in a Spanish attack on the ship, the authorities refuse to probe into the matter for the sake of Sawyer's reputation (it should be noted that he had started to go mad), and the Midshipman is mentioned in the denouement as being lost in a storm a few months later during the Peace of Amiens, meaning only Hornblower may know the truth, and is keeping it to himself.
* Horatio Hornblower, it is suggested that he pushed his dangerously insane captain down a ship's ladder. His fellow lieutenants suspect this, but no one calls him out on it.
* Horatio Hornblower, Jack Simpson tries to kill his shipmates in the middle of a raid by setting knocked-out Kennedy adrift in a boat and shooting Hornblower (he hits him in the head and he falls from a mast into the sea). Kennedy goes M.I.A. and is presumed dead. Hornblower is saved by Finch, a lower-deck sailor from his division. Unfortunately, Hornblower has no proof that is was Simpson who shot at him. The dispute is solved with Simpson's challenge to a duel.
* Horatio Hornblower. Junior lieutenant Hornblower is menaced by a tyrannical captain, there's a mutiny, and then the ship engages in a victorious action on a Spanish target that distracts from the toxic atmosphere, after which the captain is permanently disabled by someone he'd victimized and Hornblower is promoted. In the story, Captain Courtenay is crippled by the seaman Fletcher during the attack; Hornblower sees it happen but declines to intervene or make it known, and he ends up as first lieutenant of the ship. The novel greatly expands on the abuses a captain could inflict unchecked. Captain Sawyer is incapacitated after a fall which shatters what sanity he had left, but it's made a mystery—he could have been pushed by a midshipman he'd singled out for abuse, by Hornblower himself, or he could simply have tripped. Hornblower claims not to have witnessed it, but that it's most likely the last one. The ship goes on to destroy a Spanish fort, and Sawyer is killed when their prisoners mutiny. Hornblower ends with a promotion to commander (though only temporarily, thanks to the Peace of Amiens).
* Horatio Hornblower, Lady Barbara managed to needle Captain Hornblower by co-opting his catch-phrase, a "Hm-Hmm" throat-clearing sound which he used whenever he couldn't think of something appropriate to say, and turning it on him in conversation.
* Horatio Hornblower: Mariette from "The Frogs and the Lobsters" is given very little personality. She is there just so Hornblower can fall in love with her and she reciprocates. Nearly everything she does in the episode is related in one way or another to Horatio. For example, when she's insulted by the chauvinistic Marquis, it's just a set-up to show that Horatio acts like a gentleman even to a French peasant girl.
* Horatio Hornblower." — Oh, Archie!). He also informs us later that the French has killed their king.
* Horatio Hornblower men for whose lives he feels responsible) are sent to die in a doomed mission.
* Horatio Hornblower, Midshipman Hornblower is sent to pick up supplies from the city of Oran on the day of a plague outbreak. Facing a three-week quarantine in a plague city with a crew of panicky men and a delay in desperately-needed foodstuffs, Hornblower asks and is allowed to spend the period on the ship—they're more effectively quarantined at sea than anywhere else and it gets them back to the fleet quickly (fortunately, they evade contagion).
* Horatio Hornblower miniseries, Colonel le Marquis de Moncoutant has his personal guillotine. He gleefully uses it to behead half the village for treason, which was

actually stuff like selling old bread. It bites him in the butt, though, because when Royalist forces collapse, the villagers execute him, equally gleefully.
* Horatio Hornblower miniseries, this is how Mr. Buckland deals with being an Acting Captain and not quite fit for command — drinking lots of port. He starts with "freaking drinks" to calm himself down and ends up getting drunk on a regular basis. He's once found napping in a net in his cabin, holding an empty bottle. One scene depicts him sadly pouring himself port, and the wine overflows the glass and he just sadly watches the stream flowing on the table.
* Horatio Hornblower, mistaking them for Spanish, and demanding the British leave the area, asserting it is not their fight.
* Horatio Hornblower, Mr. Bush is perplexed when Lady Barbara notes that he's fond of Captain Hornblower because it's hard to fit such a sentimental notion into his fundamentally British way of thinking (although she's quite right).
* Horatio Hornblower, "Mutiny" and "Retribution": Black slaves are in rebellion against their Spanish masters in Santo Domingo. The British Royal Navy tries to use it to their advantage because there is a nest of Spanish privateers menacing their trade in Samana Bay. Their goal is to get control of the Spanish fort and capture their ships. It turns out the fort is really under siege by the rebel slave army and the rebels also killed British deserters because they mistook them for Spanish soldiers.
* Horatio Hornblower: Nearly every male character fancies the Duchess of Wharfedale who is an older yet very sexy and cheeky woman. Sailor Styles starts describing her hotness to Mr. Hornblower, an Acting Lieutenant who is in command of a prize ship and supposed to give Her Grace a passage home to England. Hornblower has to stop the excited Styles from gushing.
* Horatio Hornblower: not a genius like Hornblower, but solid, steady, and uncomplicated. He's frequently shown to e an excellent sailor who can always carry through Hornblower's plans reliably (and tries, if he can, to make sure Hornblower actually eats and sleeps).
* Horatio Hornblower novel. Hornblower starts to lecture Lady Barbara on the impracticality of bringing a huge amount of luggage onto a warship, but she irritates him by showing that she only has a couple of sea-chests, which is a perfectly reasonable amount.
* Horatio Hornblower occasionally gets thrown into the mix as well, though not as often due to Sharpe being a soldier instead of a sailor.
* Horatio Hornblower of, at the time, well-known British naval officers, particularly Lord Horatio Nelson. Many of Hornblower's adventures, as well as his career progression, closely parallel Lord Nelson's. These days, all but Nelson are largely forgotten by those who aren't historians or military strategists, and Nelson himself is little-known outside of Great Britain.
* Horatio Hornblower, officers of the Royal Navy are shown to be struggling to survive on half-pay during the truce with France. Horatio has to pawn many of his possessions, including his coat in the middle of a freezing winter, but can't get a good price because every other officer is doing the same. Luckily, he can occasionally supplement his meager income by playing cards.
* Horatio Hornblower One fellow midshipman later accuses him of "cheating" tactics for stealing uniforms later, and he gets called incompetent by the (admittedly paranoid and insane) Captain Sawyer for firing a half-loaded gun to scare off a couple of frigates who caught them off-guard.
* Horatio Hornblower plays with this in "An Even Chance". When Jack Simpson decides to cheat in their pistol duel and fire early, Horatio declines to fire back in cold blood (even though it would be within the rules). After Horatio justifies this with Jack being "not worth the powder", Jack decides to go all out, attempting to stab Horatio in the back. It's at this point that Captain Pellew decides to interfere with an improbably but awesomely accurate musket shot.
* Horatio Hornblower, plus memories of sexual abuse from Jack Simpson and Lt Eccleston's turning a blind eye.
* Horatio Hornblower running like clockwork, so that Horatio can deal with the overall mission and not worry about minutiae like incompetent midshipmen or

irritating French expatriates working for England.
* Horatio Hornblower: self-assured, competent, and compassionate. The Cutie who has found his strength and confidence.
* Horatio Hornblower series popularized long before you ever heard of the series itself.
* Horatio Hornblower, so it was a reasonable call (especially since Eccleston knew Simpson from their previous ship). Simpson's tantrum convinces the petty officers and sailors to follow Horatio's orders instead, and he leads their prize to a heroic action against some corvettes that have ambushed their home ship.
* Horatio Hornblower: Some naval captains receive this treatment, and more often than not, it causes problems.
* Horatio Hornblower, so when Maria starts calling him that he's rather mortified. (Not that he says anything about it.)
* Horatio Hornblower stories in particular often have young Hornblower comparing his new, actual experiences of sailing and war to what he's read about in books.
* Horatio Hornblower successfully implements a plan to gain their unconditional surrender and triumphant return to British authorities (marred only by a prisoner uprising… which he also manages to quell, although that by force).
* Horatio Hornblower tease him and his particular friend Archie jokes that there is a complete stranger among them.
* Horatio Hornblower telefilm, Horatio accidentally sails his tiny dispatch ship into an enemy fleet thanks to the fog—several Spanish frigates of which anyone could reduce his vessel into splinters if they make a fight of it. Horatio tries to play it off lightly.
* Horatio Hornblower telefilm when Horatio and Captain Foster are trying to steer a fire ship away from the British fleet. Foster catches some flames on his clothes after he almost falls into the burning hold, but Horatio has the sense to smother it with a blanket. Then another spurt of flame catches Horatio's coat on fire, whereupon Foster gets them both into the water.
* Horatio Hornblower. The British occupying forces and Irish rebels have recently achieved a fragile peace in Ireland. Hornblower discovers letters to rebels not known to the authorities. If he turns the letters over to the authorities, they'll go after the rebels and cause another outbreak of violence. He decides to throw the letters overboard instead.
* Horatio Hornblower, "The Duchess and the Devil": Horatio uses this phrase when he wants to prevent one of his sailors from staring at the Duchess who is coming aboard.
* Horatio Hornblower, "The Duchess and the Devil": Hornblower and his sailors end up in Spanish prison. Midshipman Hunter, the surly seaman of the week, feels they must do the prison break asap. Hornblower wants to escape as well, but insists they must develop a more elaborate plan, and more importantly, he wants to wait for his friend to fully recover — he's not leaving the place without Archie. (Archie however is not so keen on escaping, because he tried five times and always got caught and punished.) Hunter convinces about half of the men to try to escape under his lead. However, his plan involves attacking fully armed guards with their improvised weapons in full sunlight rather than avoiding them and going unnoticed and their escape attempt fails miserably.
* Horatio Hornblower, "The Duchess and the Devil": Hornblower doesn't appreciate that his sailors stare at the Duchess who is supposed to be given passage when she comes aboard. Styles points out he hasn't seen a woman in six months.
* Horatio Hornblower, the Earl of Edrington. However, he soon turns out to be okay as he's a competent and reasonable officer and a wellspring of good, well-meaning and only slightly patronizing advice.
* Horatio Hornblower the Frenchie into putting his own ship in irons. This is also what makes Hornblower an excellent whist player.
* Horatio Hornblower, "The Frogs and the Lobsters": Hornblower watches Mariette (his French crush for the episode) sleep. There are two French Royalist soldiers who seem very eager and want to have their way with her, so Horatio throws them out and offers Mariette to stay. She agrees, they kiss and she goes to sleep, but

innocent Horatio just watches her from a chair.
* Horatio Hornblower, "The Frogs and the Lobsters": The Royal Navy and British Army barely tolerate each other, but neither of them gets along well with the French royalists. They are assigned to a joint mission in France and are supposed to fight against the French Revolutionaries.
* Horatio Hornblower, the heroes are trapped on a beach, facing the French army. The heroes form up in ranks, and fire off a volley at the French in desperation, and are completely surprised when their little muskets cause massive devastation. They turn around to see that their ship, "H.M.S. Indefatigable", has suddenly arrived and is shooting at the French. It's a great cavalry scene, if one sets aside the fact that ships' cannon of the period were so inaccurate that the ship had a better chance of hitting their own troops than they did the French. But their own troops were about to die anyway (unless they surrendered), so it was presumably worth the risk.
* Horatio Hornblower, the opposite of “blowing one’s own horn.”
* Horatio Hornblower, the supplies office gets on his case for using what they deem is too much shot, powder, and cordage while at serious blockade work for months, but Cornwallis fortunately has his back there.
* Horatio Hornblower: The titular character, after being released from a Spanish prison to aid in a rescue mission at sea, refuses to stay on British ship that eventually picks them up, because he had given the Spanish his parole.
* Horatio Hornblower third series, most of Horatio's crew seem to believe his hasty wedding to Maria is because they don't want to miss the opportunity with war freshly renewed. Bush alludes to it himself, but he's also more acquainted with the matter—which is that Horatio is only doing it because he can't figure out how to turn her down. At least everyone else enjoys the festivities.
* Horatio Hornblower to do the right thing. Unfortunately, despite his awareness of his inadequacy, he acts mostly cold towards his wife Maria, who adores him unconditionally in return.
* Horatio Hornblower to Moncoutant's face. Liberty, equality, fraternity!
* Horatio Hornblower TV film took place at the Royal Navy anchorage in Spithead, with the midshipmen discussing the ongoing revolution in France. In particular, the fact that King Louis XVI had just been captured.
* Horatio Hornblower we know it didn't work, mainly because Kennedy and Bush quietly stayed behind to help him.
* Horatio Hornblower: When Hornblower and his men are in Spanish prison, the Duchess of Wharfedale brings them some fresh fruit from Don Massaredo's garden. Styles tries to take one, but Midshipman Hunter gets furious, and scurvy or no scurvy, he says he prefers British beef and British beer, and he crushes the basket underfoot and throws the battered fruit into an oubliette.
* Horatio Hornblower. While quarantined at sea, one of the sailors starts weaving and swaying, prompting the others to try and toss him overboard using spars until Hornblower steps in. There's a tense moment when Hornblower gets close to the man, but a sniff of his breath shows that he's just drunk. Later, the reckless Dreadnought Foster takes some cattle before the quarantine is up, over Hornblower's voluble protests.
* Horatio Hornblower who is fighting in the Wars of French Revolution and the Napoleonic Wars, and thus has some opinions that are regarded as a touch "Republicist" by those who he has offended (or who just feel like needling the nervous skinny guy for fun). Mind you, the author, C. S. Forester, an Englishman though born in Egypt, eventually moved to California to stay, and was likely aiming the books at an American audience. Making Hornblower the same age as the U. S. — and why not exactly the same age? — helps fix his place in history in the readers' minds.
* Horatio Hornblower with a knife and is killed by Captain Pellew, their commanding officer.
* Horatio Hornblower, with culturally British and trade-oriented New London opposing the culturally German and militarily expansionist Republic of Hanover mostly by itself for an extended period, and trying to get friendly but militarily

neutral powers into the war on their side.
* Horatio Nelson. At the Battle of Copenhagen in 1801, he was signalled by superiors to withdraw. On being informed of the orders, he put his spyglass to his right eye and declared, "I really do not see the signal." He had been blinded permanently in his right eye in an action at Corsica in 1794. He then proceeded to demolish the combined Danish-Norwegian fleet. (The episode, incidentally, gave rise to the expression "to turn a blind eye".)
* Horatio Nelson at the cusp of his greatest victory at Trafalgar, although what rendered him conspicuous was probably less his officer's uniform than the decorations he wore.
* Horatio Nelson did this several times. When he was blinded in one eye at Calvi by debris struck by a gunshot, he wrote to Lord Hood, "I got a little hurt this morning; not much, as your lordship may judge by my writing." When he was fatally shot in the back at Trafalgar, he said: "Why, my dear Hardy, I do believe they've done it at last. My backbone is shot through. Take care of Lady Hamilton for me."
* Horatio Nelson during the battle of Trafalgar, as the English fleet went on to destroy the French even after his critical injuries.
* Horatio Nelson explicitly referred to his sea captains as a Band Of Brothers, and when once asked what he meant by the phrase, he explained that they were a brotherhood forged together in seamanship and blood.
* Horatio Nelson had only one arm, the other having been amputated some years earlier.
* Horatio Nelson's death. Cut to Nelson being thrown from a high window. He does manage to scream "Kiss me, Hardy!" on the way down.
* Horatio Nelson. The man was heavily into self-promotion, but he earned every accolade, and his ability to inspire men was even termed 'the Nelson effect'.
* Horatio Sanz Hispanic from the looks of him. He was often cast as Italian characters.
* Horatio warns Hamlet that the ghost might do this to him, and the ghost himself warns that just "telling" Hamlet about purgatory could do it:
* Horcruxes Horcruxes a difficult task. Dumbledore however, points out that Voldemort's fatal flaw is vanity and he would never store parts of his soul in anything he doesn't deem "worthy" of him (the diary being just his first attempt at creating one).
* Hordak’s military strategy is measured and restrained. In “The Price of Power”, he initially refuses to “squander” troops on a “wasteland” like the Crimson Waste, and only changes his mind when he recognizes
* Hordak (founder and leader of the Horde) is among the tallest characters in the show. The top of Catra's head only reaches the middle of his chest.
* Hordak), he at least knows how to engender loyalty in his troops. Catra was about five minutes from defecting because of Shadow Weaver's incompetent brutality when Hordak managed to get her to stay with a few compliments and a promotion. He also develops a trusting and respectful relationship with Entrapta when the two collaborate on his portal project. Finally, unlike his 1980s cartoon counterpart, Hordak does not lash out at his minions at the first sign of failure.
* Hordak is a central antagonist but his anger over Shadow Weaver and Catra lying to him makes sense. Trust is an important trait in relationships and lies means the person can't be trusted.
* Hordak is one of many clones of Horde Prime who does everything he can to please the original. This initially manifests as him being a brutal conqueror in attempted imitation, but Horde Prime deems him to be a defect due to being split from the hive mind, and he has Hordak mind wiped. Hordak's friendship with Entrapta ultimately redeems him and motivates him to turn against Horde Prime.
* Hordak plans to execute Catra, but Entrapta persuades him to spare Catra. Instead, Hordak sends Catra to retrieve First Ones technology in the Crimson Waste and admits to Entrapta that it's a suicide mission.
* Hordak's biggest fatal flaw is tunnel vision. Hordak is so fixated on projects of immediate importance to him that he overlooks dangerous developments right under

his nose. Notably, he failed to grasp the full implications of She-Ra's re-emergence, the power contained in her sword, or her ability to unite the Princess Alliance.
* Hordak's eyes are a flat red glow, without iris or pupil. He's the
* Hordak warms up to Entrapta because she's friendly and cheerful, and isn't afraid of him. When he confesses to her that
* Horde of Alien Locusts: A horde of aliens characterized by their perpetual hunger, and the conversion of all organic matter in the universe into more of them.
* Horde of Alien Locusts and were demanding the Tyranids actually be allowed to win.
* Horde of Alien Locusts, but they take it so far as to destroy entire planets after consuming everything on them and before spreading out further on the remains, and at least one of their leaders, Leono, sees it as their species' religious duty (as opposed to just a way of feeding and multiplying) to do so. In his belief, the universe has spiralled out of the control of its Creator from the start, and She has sent this species to consume it.
* Horde of Alien Locusts converted by peaceful religion, and Tyr Anasazi, a member of the Nietzschean race of genetically-enhanced humans who are screwing the galaxy (Pride wiped out by the dominant Drago-Kazov Pride), but he never claimed to be on the Hunt side.
* Horde of Alien Locusts exposed in "Might and Power" there's immediate panic, at least until that invasion force is defeated.
* Horde of Alien Locusts of the Tyranids, all of which would stand a good chance of wiping everybody else out even if the civilized races were willing to cooperate with one another. A few characters or factions recognize that cooperation is likely necessary for their survival, but they tend to be few, far between and not especially likely to be listened too.
* Horde of Alien Locusts who use a multi-stage infestation. Once all resistance is eaten, the tyranids assemble in reclamation pools, where all the ingested organic matter is dissolved (that is, the 'nids themselves throw themselves into the pool). Then the main hive ships suck up the soup in the pools and atmosphere. The result is a completely barren and airless rock undergoing volcanic activity due to tectonic imbalance.
* Horde Prime and the Galactic Horde was based on "suicide cult" leaders such as Jim Jones.
* Horde Prime calls Hordak "Little Brother", but his treatment of Hordak is anything but brotherly.
* Horde Prime, garners the willpower to take him on evenly after Catra and Entrapta are threatened.
* Horde Prime), though the scars ended up never happening in the show. It's been presumed by fans that this is along with her mystery fanfic provide evidence that Noelle has personal AUs.
* Horde Prime uses mind control to deny his clones free will, personalities, and even names. He's capable of entering their minds and probing their most intimate memories. Most frightening of all, he can perform a mind-wipe on any of his clones, as he does to Hordak at the end of season 4.
* Hordes designers left to start Privateer Press for the purpose of not only making a better game but in their opinion a better game company.
* Hordes from the East taking lands too far away to guard, his son Peter I, even if he had 40 years of nominal peace (absence of open war but not rebellions and incursions), ushered in the empire's downfall.
* Hordes from the East: They're savage. They're foreign. They come from the East. And there's a lot of them.
* Hordes from the East who put military discipline and coordination first, allowing them to use highly advanced tactics (in addition to other advantages).
* hordes hilariously reads "Romero gets some lovin'." Romero specifically states getting bitten doesn't cause zombies, but it sure does hurt like hell.
* Hordes of black bitches (as in female dogs) chase and maim those who destroyed themselves through carelessness in the Forest of Suicides.

* Hordes of the Things begins with the Crown Prince Veganin giving the mighty hordes of Albion a rousing speech about how they will stand fast though Albion is surrounded by the hordes of evil. His speech is interrupted by the wizard Radox, who informs him that the mighty hordes of Albion can't make it today, but have left a sick note.
* Hordes of the Things compares the average fantasy world peasant's attitude to magic to the average modern person's attitude to nuclear energy: "I have no direct experience with it, it is sometimes reputedly beneficial, certainly often very nasty, and the further it is from my back yard the better!"
* Hordes of the Things) has Radox the Green, Badedas the Blue, Fenjal the Pink, and several others based on the names of bubble bath products.
* Hordes of the Underdark and conversation options you choose, such as: order him to drop dead, order him to return to Hell, or even order him to give you command of Hell and become your either you partner or lackey. Your choices have major effects on the epilogue.
* Hordes of the Underdark has dialogue that includes curses in Undercommon.
* Hordes of the Underdark: You first meet Nathyrra when she is trying to get you not to kill her for being a drow so she can give you important information to help you defeat the evil drow faction. And when your new character meets Aribeth, you just literally defrosted her and she immediately attacks you, following which you either have to convince her that Tyr hasn't abandoned her or that it doesn't matter.
* Hordy Jones' men force the people of Fishman Island to step on a picture of their beloved, assassinated Queen Otohime to prove their acceptance of Jones over the old monarchy. Somewhat subverted, in that Hordy Jones plans to kill those who had signed Otohime's petition even if they did go through the Fumi-e.
* , Hori attempts this several times with Kashima, and is repeatedly thwarted by her aloof and carefree nature. He is finally confirmed of her feelings not by her, but Mikoshiba of all people.
* Hori has a leg fetish and was born on Nice-Knee-High's (as in the socks) day (11/28),
* Horimiya and she's helping him of her own volition to make up for all the times she bullied him when they were younger.
* Horimiya: Despite looking like a shōjo series, it is serialized in Monthly G Fantasy, a shōnen magazine.
* Horimiya has Miyamura pretend to be Konoha, Hori's cousin, when his Bishounen self interacts with Yuki, Hori's best friend.
* Horimiya has something of an inversion where Sawada tries to compete with Miyimura for Hori's affection, but she quickly comes to view him as an older brother since they're next-door neighbors and she recently lost her actual brother.
* Horimiya have known each other their entire lives (their parents went to school together), with Hori having almost constantly bullied Sengoku until they entered high school. Their relationship is completely devoid of romantic subtext, with both having their own love interests.
* Horimiya - he bumps into walls, mistakes one person for another, and is generally hopeless without them.
* Horimiya, Hori only saw Miyamura as that gloomy-looking long-haired guy in her class who kept to himself, always wore long sleeves, and was probably an otaku. Then he ended up helping her little brother when the latter was injured. Downplayed in that this simply led to the two of them becoming friends. The actual romance didn't come until later.
* Horimiya in a bad mood), well... let's just say that they never tried messing with him again.
* Horimiya let anyone else have Miyamura and repeatedly shouts "He's mine!". Afterwards, she never again denies her feelings for him.
* Horimiya, Miyamura confesses he'd liked Hori for quite a while now when he thinks she's passed out due to a fever.
* Hori Miya, Miyamura is not as intelligent as people think despite his smartish looks.

* Horimiya. Miyamura keeps his body tattoos hidden while he's at school (to the point of always wearing long sleeves, even in the hottest of conditions), but it's just because he doesn't want to be bullied or get in trouble with the school board. He freely shows them off outside of school (along with his piercings), and even gets more tattoos early on in the story.
* Horimiya, partially out of affection and partially to encourage him to grow his hair back out (since it'd be the only way for him to cover the mark).
* Horimiya revealed that Miyamura saw Hori messing with Sengoku during the winter of their final year of middle school. Neither of them are aware of this in the present.
* Horimiya Sawada for Hori's attention. Hori is less than amused by them fighting over her and just avoids both of them until they start getting along.
* Horimiya sets up this type of relationship with Miyamura (A), Sawada (B), and Hori (C). Hori and Miyamura are dating, Miyamura and Sawada have a brother-sister dynamic, and Sawada has a crush on Hori. It was initially type 4, but Hori was annoyed watching Miyamura and Sawada compete over her and basically forced them to hang out and get along.
* Horimiya start dating when Hori's father asks if they're already going out (Hori initially stutters, but gives a very annoyed "yes, you got a problem with that?").
* Horimiya. When Miyamura confesses having some sort of feelings for Hori, he says it right in the middle of telling her relatively trivial information. This ends up backfiring by making Miyamura feel pathetic and giving Hori a mixed message.
* Horimiya. Yuki had a brief crush on "Konoha" (Miyamura's out of school appearance) in the webcomic and manga, but this is completely skipped over in the anime.
* Hori produced a special Joy-Con L that replaces the directional buttons with a proper D-pad, designed for games that strictly use 8-way digital directional movement. Unfortunately, because it doesn't connect wirelessly, it can only be used in Handheld Mode, not in TV or Tabletop modes.
* Hori's relationship with Kashima often consists of him yelling at her or complaining about her, but if she ignores him for
* Hori wears a blue shirt rather than white, and is never seen with a blazer.
* Horizon Chase to certain franchises. That said, there are also some rather... strange choices (the Cable Guy, anyone?).
* Horizon Forbidden West game, being sequels to two of Sony's most acclaimed and commercially successful titles during the PS4 era. Mitigated a little in the former's case, whose announcement as a cross-generational title for the PS4 was met with mixed responses.
* Horizon: In one scene early on in the story, Zhia is in a hotel room trying to repair the chip in her head. While she's doing this, the TV is on, but the words are all anagrams of what they should be. Once she fixes it and puts in back in her head, though, it changes to perfect English.
* Horizon in the Middle of Nowhere, but they eventually give in and Toori is more than happy to have them.
* Horizon in the Middle of Nowhere spends an inordinate amount of screen-time naked except for his portable, always-present magic censor. This is because his matron god is Ame no Uzume, Japanese god of merry-making, whose part in getting Amaterasu to leave her cave... was stripping naked and telling jokes.
* Horizon in the Middle of Nowhere. Their official character profiles even list them as 'Lovers'.
* Horizon in the Middle of Nowhere this becomes the more apparent, the more new characters are introduced and become paired with original characters.
* Horizon in the Middle of Nowhere types. Armed characters will do anything from be a shield, to cut anything they want, to summon legions of the undead instantly, to ground flying ships in single blows, and anything in between.
* Horizon in the Middle of Nowhere uses Judge and Tes, short for Judgement and Testament, as replacements for yes in their homelands, this also doubles as an easy way of knowing who is from where.
* Horizon is in, a military drone is sweeping the wheat field they're moving

through looking for them.
* Horizons at Magic Kingdom also features a robot butler in its post-show, as a tribute to the closed attraction.
* Horizons contained one of the earliest examples of this trope in a theme park attraction. Its finale allowed riders to choose from one of three POV fly-through films depicting their journey back to the future point from one of three out of the four futuristic communities it featured (Brava Centauri, Mesa Verde and Sea Castle, dubbed "Space", "Desert" and "Undersea" respectively on the choice tree).
* Horizons controlled via telepresence. Jumping out or moving more than 30 kilometers away will cause the fighter to self-destruct, and if the mothership is destroyed - with your body still in it - you get booted out of the fighter and ejected back to the insurance ship rebuy screen.
* Horizon started out with two factions, the Empire (the faction in which the protagonists are playing) and the Coalition. Later installments introduce the Order, which is hostile to both, causing this trope to happen.
* "Horizons" was actually built as an sequel to General Electrics' Carousel of Progress having the same sponsor. The issue was keeping the ride section current and not jarring when you exited in the exhibit space it also had an choose your own ending feature where you could enter the Zeerust future of your choice. This would later show up in Spaceship Earth in an updated form.
* Horizont-Al and Verti-Cal, they give Al and Cal a speech about how they should go back to being friends. They briefly ponder this... then decide "Naaaaaaah!" and return to killing each other.
* horizontal tension lines" that stretch between large celestial bodies (e.g. stars, planets) within a certain radius to guide ships traveling to another star. When arriving to a star system, the crew had to quickly initiate the "surfacing" procedure before the ship got caught by another "horizontal" and continued on its way. Without mass-detectors, early ship had no idea where they would end up and didn't know if there were any other objects at the location.
* Horizon Zero Dawn after he has been imprisoned. First he will declare that he'll escape. Then he begins to mock Aloy, then threaten her. In the end he begs her to leave him alone.
* Horizon Zero Dawn: Aloy helps her War Chief track the people who attacked her tribe back to their base. She sneaks in and blows up thier stockpile of explosives taking down a wall and allowing the Nora to bypass the fortified main entrance.
* Horizon Zero Dawn and not get bogged down in mourning him. She feels less optimistic.
* Horizon Zero Dawn. A scientist working on this looks at a sibling project and instantly responds with Longfellow. "Humanity, with all its fears, with all its hopes of future years, is hanging breathless on thy fate!"
* Horizon Zero Dawn attacks, using their collection and purification tools as weapons. Not to mention the machines that were actually designed for combat, which are worse.
* Horizon Zero Dawn: A war waged by the Carja tribe against virtually every other tribe is continually referenced as you travel around. It lasted for the ten year reign of the Mad Sunking, who conducted raids on the neighboring villages and tribes to collect human sacrifices. It ended when his son managed to overthrow him and establish a more benevolent rule. Despite his efforts at outreach, there is still simmering resentment and anger among the various tribes man against the Carja.
* Horizon Zero Dawn, but a worthwhile one given the value of what she already uncovered, and copying the data from the backups to the new Focus is a matter of pushing two buttons and waiting.
* Horizon Zero Dawn can seem confusing until you actually start the game and get far enough in to learn about Project Zero Dawn.
* Horizon Zero Dawn: Carja are often given single-word descriptive honorifics for various reasons. A priest in charge of making reparations for his people's crimes under the Mad Sun-King is known as Mournful Naman, and one of the Mad Sun-King's advisers who was secretly working against him the entire time is Blameless Marad.

The youngest of the Sun-King's sons is Radiant Itamen, and while his older brothers used to have this honorific as well, Avad gave it up when he became Sun-King himself. These titles are exclusively used as part of their names, never on their own.
* Horizon Zero Dawn: Corruptors are large, scorpion-like robots mounted on four legs and armed with clamps on the tips of their tails and grenade launchers mounted on their backs.
* Horizon Zero Dawn: Despite suffering what should have been a VERY final end of the world scenario, the planet seems to be recouping very nicely. Aside from a few bad apples, human society has been reborn and the ecosystem has been revitalized. Even the roving giant mechanical beasts have become more of a background to life than a horrible threat. It'd actually be quite idyllic if it wasn't for the conspiracy to destroy the place.
* Horizon Zero Dawn: Downplayed. Far future humanity is just as phenotypically diverse as modern-day humanity, but all the tribal and social groups portrayed have members of a wide variety of phenotypes. While all characters are more than willing to snipe at each other for a plethora of reasons relating to culture, religion and customs, race simply doesn't play into it, and it seems that race as a social construct didn't survive the end of the world.
* Horizon Zero Dawn; during the Proving the goal is to fashion a trophy from one of the grazers and carry it through an obstacle course (a rival destroys Aloy's, so she has to get another), and the Hunter's Lodge demands these as proof of advancement. Speaking of the Lodge, they have the corpse of a Thunderjaw suspended from the roof of the Lodge itself, the first Thunderjaw ever recorded killed.
* Horizon Zero Dawn, even if things didn't turn out quite how they intended.
* Horizon Zero Dawn. For Aloy though, its size and weaponry make it a boss fight by itself.
* Horizon Zero Dawninherited traits of intuitive genius, indomitable will, and a compassion to heal the world, and you have a secular Messiah.
* Horizon Zero Dawn in the console's history, in addition to garnering critical acclaim.
* Horizon Zero Dawn in the famous Sun Ring. Then the Derangement started, with the machines becoming more aggressive and dangerous. The thirteenth Sun-King, Jiran, went mad and desperately tried to appease the Sun with ever more human sacrifices. The Red Raids, where they attacked every nearby tribe for slaves and sacrifices, went on for almost twenty years until Jiran's son Avad raised a rebellion against him and killed him.
* Horizon Zero Dawn is literally titled as a "Corrupter", and it's function involves — you guessed it — corrupting other machines, turning them berserk.
* Horizon Zero Dawn is the best example as most of its wiring is exposed.
* Horizon Zero Dawn: Most of the Oseram you meet in the game are Freebooters, mercenaries who fight for pay. Erend admits that makes them sound a lot less loyal than they really are. The only Freebooters you meet are those serving directly under the Sun-King Avad. He hired them to help overthrow his mad father, and they've been serving him proudly ever since.
* Horizon Zero Dawn. Once Sylens explains the concept of a network to Aloy, she comes up with the idea to crash it.
* Horizon Zero Dawn, one of the audio logs contains a snippet where the speaker compares himself to the great killers of history.
* Horizon Zero Dawn projected through a Focus device. Since Aloy is one of the only people with a Focus, companions will often ask why she appears to be listening to nothing or manipulating the empty air with her hands. However, holograms did exist, they were just rare. In the "Frozen Wilds" DLC, Ourea's Spirit and the facility she controls makes use of holograms.
* Horizon Zero Dawn run. In New Game+ proper, the prologue as young Aloy is skipped, you can earn special Adept equipment, and the difficulty setting is locked.
* Horizon Zero Dawn: Since all the machines are built to look like animals, there's

naturally a machine horse, called a Strider. Aloy can tame them and use them as mounts once she figures out how to hack machines.
* Horizon Zero Dawn six months in-universe passed between the end of the first game and the sequel.
* Horizon Zero Dawn society of viking-like clans battle enormous robot dinosaurs and each other.
* Horizon Zero Dawn: The Bellowback type machines get their names from the huge liquid storage containers they have on their backs, which are used to power their short range elemental attacks (a flamethrower for Fire Bellowbacks and a freeze-thrower for Frost Bellowbacks). They also have a smaller but still promenant throat sack that they use for their long-range attacks. Both can be targeted and will cause massive elemental explosions upon being destroyed- Bellowbacks are resistant to the element of their type, but it will still inflict massive damage on them and quite plausibly kill any other enemies that are nearby and lack their resistance.
* Horizon Zero Dawn (the humans of 2060 AD) is one of the big mysteries of the game — that and why there are all kinds of cybernetic animals running around.
* Horizon Zero Dawn wandering everywhere; the Nora use composite bows made with metal parts and wire strings with explosive tripwires, the Carja wear metal "feathers" as a fashion statement and armor, and the Oseram deconstruct the machines to create high-tech weapons like a magnetic railgun that fires explosive balls. The other tribes are less clear because they don't get as much time in the limelight. The Utaru appear to have discovered agriculture but never advanced past it, while the Banuk are Stone Age like the Nora but have also discovered a few primitive ways to control the machines, giving them some advantages over the other tribes.
* Horizon Zero Dawn. What exactly happened to us is one of the two great mysteries the game's story is centered around (the other being why half the planet's wildlife now consists mainly of cybernetic animals).
* Horizon Zero Dawn: When Aloy first travels to Sunstone Rock, it is under attack by two Behemoths, leading to this exchange between two of the Carja guards:
* Horizon Zero Dawn, whom he has a particular beef against because she is an Outcast elevated to a Brave, and then to a Seeker. Thankfully, there is a quest to find Sona and get her back to take command again.
* Horizon Zero Dawn will have Aloy muse that she could use her Focus, if the player doesn't catch on right away to do this in order to accomplish a mission objective.
* Horizon: Zhia is wearing a blue hoodie at the end of Issue #6 after the mission's over.
* Hork-Bajir are a literal example, frequently described by the Animorphs with variations on "eight-foot-tall walking razor blades". They have natural blades growing from all of their limbs, sharp horns on their heads, and claws on their hands, and because of this the Yeerks favor them as shock troops. However, in their natural state they're harmless herbivores: the blades are all for stripping bark from trees.
* Hork-Bajir are covered with blades, which have the innocuous purpose of helping them trim edible bark from trees. They have two hearts and a
* Hork-Bajir have a personal name and a surname that passes from father to child; females don't change theirs when they marry. For example, Jara Hamee married Ket Halpak, and their daughter was Toby Hamee.
* Hork-Bajirs conquered their planet. After the Animorphs have freed the first Hork-Bajirs from the Yeerks who rule them, they realize how good-natured they are.
* Hork-Bajirs right now. The Yeerks use them regardless of gender because both genders are strong.
* Hormel Foods Corporation would prefer one to not use an Internet slang term in association with "unsolicited commercial e-mail" or "unwanted junk e-mail", even suing the makers of software applications using this term, however, they seem to be more welcoming of this term in recent years, as consumers may subconsciously program themselves to be craving of delicious canned meats.
* Hormone-Addled Teenager: Almost always the heroine's daughter's boyfriend or her son. If a girl ever shows anything similar to a sex drive, she's either punished

for it or becomes/already is an evil slut.
* Hormone-Addled Teenager: A teenager who is impulsed by their perverted thoughts.
* Hormone-Addled Teenager: One of the worst offenders of this section. Upon entering adolescence, nevermind the typical uneasiness that most teenagers experience with their changing bodies, girls will automatically turn into shallow skanks, whose major goal is to look like sluts and be with a boy so they can be complete. Boys automatically turn into lecherous perverts whose main purpose will be to prove their masculinity by losing their virginity and acting boorish. And if they don't fit in these two categories, something is wrong with them.
* Hormone-Addled Teenager: Puberty causes teenagers to become sex-obsessed.
* Hormone-Addled Teenager. She was very popular with the fans, but she was obviously an interesting character to the writers who gave her lots of opportunities to shine. She even had her own spin-off vlog.
* Hornblower and his loyal first officer William Bush fit this trope quite well. Though Bush is in no way unusually rough for his time — it's rather that Hornblower has very modern views about discipline and punishment.
* Hornblower and the Hotspur while he's training the ship's hapless junior officers. Hornblower doesn't approve of actually cursing at them, so Bush winds up bellowing things like "you careless... you careless young gentleman!" at the top of his lungs.
* Hornblower, as Horatio was held there too, facing rain, cold, hot sun and rats.
* Hornblower) despite or perhaps because he's exactly the kind of officer Sharpe would despise if he was incompetent. Major Edrington isn't, so he's precisely the officer Sharpe wishes he was.
* Hornblower fans (mostly fan girls) are known to organize postcard drives from time to time. Unfortunately to no success, but hope never dies. (The last installment of the miniseries aired in 2003.)
* Hornblower genre, had a couple of examples from the Navy. Sometimes the seasoned and experienced sailors were patient enough with them, sometimes... not so much.
* Hornblower has two important mentor figures in the miniseries adaptation
* Hornblower, leaving Hornblower to figure out an appropriate reply on the spot while Pellew grits his teeth. The Spanish guy ends up impressed, never realizing that Pellew was seething.
* Hornblower Maria "Horry". The first one is clearly meant to be offensive, but Maria genuinely doesn't know that he dislikes it.
* Hornblower never gets as much of this as he likes because he is too busy fighting the war to turn aside to trifles like prize-money. Almost every time he does get any, something keeps him from profiting.
* Hornblower, the paranoid Captain Sawyer becomes convinced that his officers are beginning to conspire against him. He begins to act increasingly irrational, vindictive and erratic towards them... leading them to begin conspiring against him.
* Hornblower wanted to settle an issue with his seaman Styles who was beaten nearly to death by Randall. By that time, Captain Sawyer was paranoid and unable to judge clearly. He told Hornblower that he was too squeamish and that he would lay no charges. When Hornblower pulls
* Horn Crown — where a woman talks with him and realizes he's from the future and gives him some aid.
* Horndog, and is killed by his roommate, Bob. If that wasn't enough, he is reincarnated as a teenage boy, but is killed by a chupacabra.
* Horndog had a strip where Bob the Dog is telling his friend that "God is 'dog' spelled backwards. I'm a dog, therefore I'm God."
* Horndog: Issue 3 has a strip that reveals that Bob has the ability to perform oral sex on himself.
* Horndog portrays African-Americans as black cats, and police officers as pigs.
* Horndog, returns as a zombie, and is killed by his roommate, Bob. If that wasn't enough, he is reincarnated as a teenage boy, but is killed by a chupacabra.
* Horned devils, or Cornugons/Malebranche, and Orthons are both rank 8. Horned devils are Hell's elite flying infantry, while Orthons are a dead-end career path

that serve Hell as trackers and hunters.
* Horned Humanoid: In Egyptian artwork, the goddesses Hathor and Bat were often depicted as women with the horns of a cow.
* Horned Humanoid in the book illustrations, and Mymbles and Snufkins (at least in the first book) are treated as a species.
* Horned lizards) are colloquially called "horny toads" due to their blunt faces and squat, round bodies.
* Horned toads (actually small spiky lizards) not only flip onto their backs and hold still and stiff to fool predatory snakes, but they also flatten themselves and suck in their bellies to look like a dry, desiccated carcass whose innards have shriveled.
* Hornet allowed the dive bombers to inflict massive damage on three of the Japanese carriers, putting them out of action, and greatly contributed to the eventual U.S. victory.
* Hornetaur are relatively docile beetle-like small monsters that jump and try to stab you with their horns once angered.
* Hornet during the Doolittle's Raid sequence, with reasonably good reproduction and restored B-25s (of a model which didn't exist until a year after the raid) flying off it. Trope played both ways.
* Hornets' Nest done to SS Major Taussig by his colleague in the Wehrmacht, Captain von Hecht, after Taussig refuses to admit that the vulnerable Della Norte Dam is in danger.
* Hornets' Nest. He is extremely well-spoken and urbane compared to his brutish SS colleagues. His uniform is more immaculately kept than the other Germans', and he also wears blue cloth gloves instead of black leather ones.
* Hornets' Nest. He sees partisans (civilian resistance) as unlawful combatants and treats them accordingly, however, he considers ordinary Italian civilians as being off-limits. He'll use threats to try and dissuade them from helping the partisans, however, he is never shown actually going through with it, and looks down his nose at the SS because he disapproves of them targeting civilians as revenge for partisan activity.
* Hornets' Nest Partisan leader Scarpi is a skilled rifle shot who ruthlessly snipes one of his own men for talking under torture.
* Hornets' Nest, the hornet queen throws every moment of doubt Mike Yates has ever had of the Doctor at him in order to break his trust, heedless of the fact that they're contradictory. So in one breath, she criticises the Doctor for abandoning Earth, then she suggests that he's not really a time and space traveller at all and Mike's been conned, and then she asks Mike if he's not jealous of his Time Lord powers.
* Hornet's Sting, Major Cleve-Cutler falls in love with a beautiful woman who happens to have lost a leg (we never find out how).
* Horn of Valere really is, who has all sorts of bizarre abilities that aren't connected to the One Power, though mercifully he seems to be the only wielder of the "Mordeth Power".
* Horns are a common source of this for fans, including Keine in her hakutaku form, Yuugi, and Suika.
* Horns are a popular one, mostly in fanfiction but increasingly in original work too, cropping up in fic regarding succubi/incubi, tieflings, demons etc. This one in particular is illogical because horns by definition are bony growths with an outside layer of hard keratin, the same substance hair and fingernails are made of. Meaning that there is no feeling in them except at the base (which is less the horn itself and more the connected tissue and muscle) and
* "Horns don't exist. They're just something somebody put on your head".
* Hornsmoke: A Horse Opera, the four characters never speak, but they sometimes play their musical instruments in the manner of speech.
* Horns, the DNA evidence from Merrin's body which would have cleared Ig of her murder is destroyed when the building where it is being stored burned down. When Ig's horns start compelling people to confess truths to him, his father confesses that he got a friend to destroy the evidence on the assumption that Ig was guilty.

* Horns to avenge his girlfriend's murder. Part of the package is a goatee.
* Hornswoggle as the years have gone by, WWE instead retired the cruiserweight division.
* Hornswoggle. Debuted in Wisconsin in 2004, made his WWE TV debut in 2006.
* Hornswoggle got him to shout, "MOOSE!" at Vickie Guerrero. Except now he's able to talk, thanks to a wish from Santa (yes, really).
* Hornswoggle. Michelle saving her friend from getting raped by a leprechaun should get her a medal.
* Hornswoggle So yes, on WWE shows, under the ring is officially Hammerspace. It's also been known to contain a portal to Hell.
* Hornswoggle took to shouting "Look! It's that little bastard!" whenever he'd show up, so the nickname "Little Bastard" stuck. Nearly a year would pass before Finlay finally revealed that the leprechaun's "real" name was Hornswoggle.
* Hornswoggle won the very last Cruiserweight Championship Open in 2007, coming up from under the ring and running across the mat just as the starting bell rang, only to exit the ring and disappear back under it...until he suddenly reappeared several minutes later and performed a jumping splash on Jamie Noble, pinning him for the title.
* Horny Devil, is a subversion, as being a succubus she doesn't really have the personality.
* Horny Devils: Succubi and Incubi have an out of control desire for sex, the nastier the better.
* Horny Devils: Succubus/incubus demons who have sex with humans for nefarious purposes.
* Horny Devils: The incubus and succubus, which are (respectively) male and female demons that sexually seduce female and male humans for nefarious purposes.
* Horny Devils, wearing just enough that they aren't technically showing anything but implying they could be at any time. Earlier versions of the models were outright topless.
* Horny Scientist: A scientist has a crush on the lead female character.
* Horny Vikings and resourceful people who traded, raided and settled wherever they went.
* Horny Vikings: If you don't have horns on your helmet, how will anyone know you're here to loot and pillage?
* Horny Vikings Kermit to alter his description to "quaint, old-world charmers".
* Horny Vikings: Vikings (essentially medieval Scandinavian pirates) are often depicted wearing helmets with horns.
* Horowitz Horror: Spoiled rich girl Harriet is proud of the fact that she's managed to get four nannies sacked from her family's house. The last one was only there for three weeks.
* horrible a job the person involved is doing, with many jobs using tools either having them neatly arranged (and thus obviously unused), or not being present at all.
* Horrible Bosses 2 actually did plan on using Rex as hostage to get a $500,000 ransom. Rex fell in love with the idea of extorting money, so he added another 0 to the ransom's digits.
* Horrible Bosses, Dale is labeled a sex offender because, late one night, drunk, he unwisely chose a playground close to a bar in which to stop and urinate.
* Horrible Bosses: Harken's wife is a very beautiful glamorous seductive blonde with a massive set of cleavage as opposed to him being very ugly walking on a hunchback semi-bald and very grumpy.
* Horrible Bosses has her way with male patients while they're under the gas.
* Horrible Bosses in spite of all the hard work Nick did for him, he immediately imagines throwing Harken out of the nearest window to the delight of the other mistreated employees.
* Horrible Bosses is a bit sex-obsessed. At one point he sees a picture of Mrs. Harken and declares "I'd like to bend her over a barrel and show her the fifty states," prompting his friends to ask what he means. The only answer he can provide is "Y'know, it's in that movie." In one of the outtakes, he turns to the camera and

announces "Well, it is now."
* Horrible Bosses. Many of the employees believed that Marge was pregnant as she put on weight quickly.
* Horrible Bosses name-checks both the above movies. Of course, they miss the important points that they shouldn't know each other, and they should have alibis when the other murders happen.
* Horrible Bosses: Second film scene. When Rex makes an offer to buy the protagonists' invention and have it manufactured in China, they refuse because they want their product to be made in America and still be in charge. They change their minds when Rex says he intended to pay three million dollars but Rex says it's too late.
* Horrible Bosses them, and he does indeed manage to get laid with her.
* Horrible Bosses the reason Dale is forced to work for Julia is that no one else will hire him: he is a registered sex offender and thus assumed to be a pedophile. The reality is that one evening, while drunk, he staggered out of a bar into an alleyway and urinated against the wall. It just happened that the bar was across the alley from a playground, and he was seen by a cop. It was night, no children were at the playground, his back was to the playground, and absolutely no one was hurt, but he was still arrested for indecent exposure and forced to register as a sex offender.
* Horrible Bosses. This is why you should not hire assassins off the internet.
* Horrible Bosses times, but the audience always sees the cat long before they do... sitting extremely still waiting for the perfect moment to suddenly jump out and startle them as if this trope is that cat's favorite thing in the world. The description here really doesn't do the gag justice, though.
* Horrible Bosses, when Nick, Dale, and Kurt start arguing about whether or not Dale should have sex with Julia and risk jeopardizing his marriage so that she doesn't call the police on them, Dale's wife Stacy finds them, overhears everything, and runs off thinking that her husband is cheating on her.
* Horrible Camping Trip episode where Homer ends up in his underwear, covered in mud and mistaken for Bigfoot. Taken to hilarious extremes when, even after getting captured by authorities and cleaned up, experts can't agree if he is a dumb human or a brilliant beast.
* Horrible Camping Trip fic. Since they don't have their usual paramedic equipment, Roy has to keep John alive until they can get help.
* Horrible Camping Trip, Jason bets Peter a dollar he can't hit a tree with a hatchet. Peter takes that bet, and hits it perfectly. When Andy is angrily chewing him out for doing something so dangerous, Jason considers the show a dollar well-spent.
* Horrible Camping Trip: Someone goes on a camping trip that ends badly.
* horrible cook and having a tendency to trip over things. This has since been Flanderized to the point where she occasionally just seems mentally disabled, such as her being so desperate to get the new neighbors to like her that she kidnapped their dog planning to heroically "find" it later.
* Horrible Gelatinous Blob is probably the most frequently appearing example in the show, outside of Zoidberg and Kif, as described above.
* Horrible Harry and the Dragon War, the class has to make animals out of papier-mache for a project. Harry and Song Lee both decide to make dragons, but Harry makes a fierce, greedy, fire-breathing Western dragon while Song Lee (who is Korean) makes a beautiful, wise, and kind Eastern dragon. When Harry calls Song Lee's dragon stupid, the entire class ends up in a boys-versus-girls war.
* Horrible Harry books, Ida ends an essay with a page and a half's worth of "very"s to describe how fun the subject matter was. The teacher gently explains to her that one "very" is enough.
* Horrible Harry in Room 2B: prevented her from pulling off a speaking part, so she asked the teacher if she could be a dead fish like Harry, who suggested it first.
* Horrible Harry is many young readers' first introduction to Korean culture. One of the main characters, Song Lee, is Korean-American, and many aspects of her culture are referenced in the books. They're also accurate and well-researched.

* Horrible Harry series, Harry and Sidney are always fighting, usually because Sidney does something to annoy Harry and Harry retaliates by playing a gross prank on him. Still, they have their share of friendly moments.
* horrible (her mentally damaged state also provoked Guts' freak out).
* Horrible Histories about the gruesome activities of historical grave robbers Burk and Hare.
* Horrible Histories about Vikings actually featured a Black Viking as an extra.
* Horrible Histories: After discussing her marital prospects on a Skype equivalent with William Cecil, Elizabeth I announces that she is married to England. Cecil says goodbye and then mutters "She's finally lost it", prompting Elizabeth to respond "I'm still here, Cecil!"
* Horrible Histories after they have a slang match. Unsurprisingly, he is betrayed by some of his army and dies on the battlefield, leaving Henry Tudor to revoke his dignity by hanging Richard's naked body on a horse on a parade float around England.
* Horrible Histories and more concerned about his daughter's suitor's bad language than the fact that he's on fire. (To him, words like "bottom", "trousers" and "leg" aren't fit for mixed company.)
* Horrible Histories and stare straight at the camera: "It grown-up drink. Not for children."
* Horrible Histories animated series, stating that he had a "negative experience" with it.
* Horrible Histories assertion that [concept X] is not British because it didn't originate in Great Britain (citing tea as a specific example): yes, the British didn't invent or discover tea nor is tea drinking culture uniquely British, but the version of tea culture that developed there is definitely specific to the British Isles.
* Horrible Histories At the end, he finally realizes what's happening and yells "My trousers! My legs! My BOTTOM!"
* Horrible Histories BC sphere, it'll knock you into flat last regardless of how many rounds you've won, because the positive scores are things like 1066 and 1492. And winning more rounds makes you more likely to grab the dud. It's quite possible, although unlikely — most year spheres are positive — to win no games, gain no spheres, score zero, and be declared champion because the other two competitors got negative scores.
* Horrible Histories book, someone goes to a talking dog for advice, but the only "advice" the dog has is "trees are good to wee on".
* Horrible Histories called "Wicked Witches". The sketch is an advert for Witch-finders Direct who claim to find some innocent woman and blame your misfortunes on her and have her burnt to death. They might also send witches' cats to prison.
* Horrible Histories covered Tudor medical treatments. One of them involved covering live spiders in butter and feeding them to the sick victim. They were about to try it, but couldn't, because they forgot to feed the spiders.
* Horrible Histories' "Cowboy Song", Mike performs a "solo thanks to beans".
* Horrible Histories: Death likes to make people tell their stories of how they put the "mortifying" into "mortal", before allowing them into the next world.
* Horrible Histories eating soap to make it look like he is foaming at the mouth.
* Horrible Histories, Elizabeth I is this, giving her courtiers such nicknames as "Pygmy" and "Frog."
* Horrible Histories Especially funny if you're aware of the vast ammounts of smut the Victorians produced. In fact, watch the clip once you reach the bottom of the page.
* Horrible Histories feature 'paramedics' from different historical eras applying period remedies to modern day patients, and usually leaving the patients in a worse condition than when they started, to the horror of the patient and onlookers. Similar ideas are used in the "Historical Hospital" and "Historical Dentist" sketches.
* Horrible Histories features several of the worst Roman examples in one song, including the trope namer himself, plus Commodus, Elagabalus, and Nero.

* Horrible Histories frequently plays this for laughs, although the show's goofy energy, as far from stuffy as possible, always shines through.
* Horrible Histories had a musical number where a group of cowboys sing about what the life of a real cowboy was of like. One of them farts a solo because of all the beans they eat.
* Horrible Histories had a sketch about a pair of suffragettes attempting to have themselves mailed to 10 Downing Street. Rattus tells us that suffragettes really did attempt to have themselves mailed to the Prime Minister, and this was the reason why a law was passed making it illegal to send humans through the Royal Mail.
* Horrible Histories had a sketch about the Earl of Sandwich inventing the sandwich. This was then followed by the culinary creations of his friends Baron Hotdog (silly) and Lord Turkey of Twizzler (very silly).
* Horrible Histories had a sketch in which an unlucky couple must face the awkwardness of dining with the Raleighs and having to make conversation with Sir Walter's severed head.
* Horrible Histories: Happens to one of the ladies in the Georgian Court Toilets sketch, where they have to wait in line to ask the queen permission to use the toilets.
* Horrible Histories has a sketch about a lady of the Georgian era putting on her hair and makeup; the end result is ugly, albeit in a silly way, and most of the makeup is made from dangerous or disgusting stuff. (Among other things, she shaves off her real eyebrows and replaces them with mouse fur.)
* Horrible Histories has had several sketches about the British Home Guard.
* Horrible Histories has several (of course), notably that of famous robber Jack Sheppard.
* Horrible Histories has shown TV shows made by the Ancient Greeks, Romans, Aztecs, medieval Europeans, and even cavemen.
* Horrible Histories has the Shouty Man, a character who "advertises" historical products in a very loud voice.
* Horrible Histories Henry VIII, including one where he specifically talks about how rich the Tudor nobles' diet was.
* Horrible Histories. Historical consultant Greg Jenner appears occasionally in nonspeaking roles, and producer Caroline Norris makes a blink-and-you'll-miss-it appearance in the "Stupid Deaths" introduction.
* Horrible Histories: In a segment on the sign language of Saxon monks, a monk's attempt to tell his brothers that the Vikings are attacking is first interpreted as "the gorillas are making clay pots" and then "the gorillas are ringing the bells".
* Horrible Histories: In a sketch about Edward III's wedding in the unfinished Yorkminster, his bride - Philippa of Hainault - gets clonked on the head when a workman carrying a beam turns around.
* Horrible Histories in order to argue over which of them was the greatest composer.
* Horrible Histories in "Spartan School Musical". Stealing is okay, what's wrong is getting caught!
* Horrible Histories: In the Boudica special, Boudica snatches a pot off a Roman who has come to the reading of her husband's will. When she finds out he has left evrything to the Roman Empire, she drops the pot, and and the Roman complains about her breaking his pottery.
* Horrible Histories: In the "Scary Special", a deliveryman delivers what is obviously a scythe wrapped in brown paper. Death wonders what it could be, and when the deliveryman tells him it's a scythe, Death tells him off for ruining the surprise.
* Horrible Histories) in which Laurence Rickard played a character named Laurence.
* Horrible Histories is hosted by a talking rat puppet, who, naturally, isn't a fan of cats. Especially not in one segue when a loud and angry meow is heard, chasing him offscreen.
* Horrible Histories made by the dueling Celtic warriors in the "Boast Battle" rap.
* Horrible Histories makes fun of bad people from history all the time (and

everyone else from history, for that matter) so it's not surprising they've had one or two instances of poking fun at the Fuhrer. "If we wake him up, such a paddy he will get in!"
* Horrible Histories: Not shown, but very much talked about in the Roman funeral sketch:
* Horrible Histories of Richard the Raker. The gunge is usually meant to be poo.
* Horrible Histories. Only able to hear Churchill's side of the conversation, and believing it is an actual toilet, the soldiers think Churchill is talking to his poo.
* Horrible Histories portrays Guy Fawkes and his band of conspirators as this.
* Horrible Histories reading "Cranberry sauce, strawberry jam, milk and a packet of biscuits. Wait, these aren't my lines...".
* Horrible Histories recruit his jester to tell him about his wife's alleged infidelities in this manner. This is because the jester's the only one who can consistently give the king bad news and not be punished for it.
* Horrible Histories segment on how Victorian schools were run (by the students repeating whatever their teacher said).
* Horrible Histories series, reminds us constantly that the "Britain wins the war" variant (often taught to British children) is just as untrue as the American version. For instance, the RAF Pilots introduce us to their Eastern European members and go out of their way to mention that "some of our bravest men were Polish and Czech", and a sketch taking place in a trench in World War I features a British soldier trying to find the British unit he's assigned to, but instead meeting French-Canadian, Australian, and South African soldiers (with extremely silly accents) fighting as part of the British Army.
* Horrible Histories: Shakespeare is offended when the best that his opponent in an insult contest can do is "rogue" and "saucy knave". He proceeds to knock him out with a string of proper Shakespearean insults.
* Horrible Histories showcase historical deaths that were extremely embarrassing.
* Horrible Histories shows a Victorian teacher thinking her students' names are fake only to find out they're all real (this includes names like "Scary Looker" and "Princess Cheese" so it's completely understandable). Her own name turns out to be Miss Farting-Clack.
* Horrible Histories sometimes has to find rhymes for words such as "Elagabalus" and "Paleolithic".
* Horrible Historiesstein was the one with a monster. Now print an apology!"
* Horrible Histories talking about Tower of London executioners has an instructor talking to a trainee about the nooses used at different times of the day:
* Horrible Histories tends towards this in the "Woeful Second World War" sketches.
* Horrible Histories that attempted to explain how WWI got started, a British Army captain tries to explain things to his men using an analogy of the countries being "best friends", culminating in two of the soldiers singing "Germany and Austria, sittin' in a tree!"
* Horrible Histories: The book no Newton illustrates one of Newton's lectures by showing the nearly-empty lecture hall and the one attendees' response to Newton asking if there are any questions: "May I sweep up now sir?"
* Horrible Histories: The books have a very sarcastic tone and don't shy away from criticizing the British army, royalty and colonial system throughout its historical track record of atrocities.
* Horrible Histories: The cop in charge of investigating the Great Fire of London tells one of his subordinates to "Clear his desk!" and then dramatically sweeps everything off the desk to emphasize his point. His subordinate then looks from the desk to his boss and says "That's not my desk".
* Horrible Histories. (Their parody commercials really wouldn't be mistaken for out of show ads, though.)
* Horrible Histories. The titular character warns her french contact to be careful with what appears to be a bottle of wine. It's actually a bomb to be used if she's ever trapped by Nazis. She even mentions making landmines look like cowpats. However this doesn't extend to the one her contact is holding.

* Horrible Histories (to boost the business of the wool merchants.) In the end, Elizabeth asks if there's a law about having "a naked man in my throne room"; apparently, there isn't.
* Horrible Histories uses this often and even has a recurring sketch, "Stupid Deaths," dedicated to the subject.
* Horrible Histories, want to tell Henry VIII his wife is unfaithful, so they call on the court jester to deliver the news. The jester manages to do so in a way that keeps Henry from reacting until the jester's out of the room. "Hmm, do you think he was trying to tell me something?"
* Horrible Histories with an insult contest between Thomas and the gentleman whose ale he spilled -Shakespeare. Who had a habit of making up his own insults.
* Horrible Histories with their ads for (usually genuine) historical products, such as Paule Revere's gunpowder toothpaste. This ads always contain the line "Here comes the science-y bit" as the voiceover explains whatever bizarre logic was behind the product.
* Horrible History in 2012, citing fatigue with Sabaton's touring schedule and a desire to have more of a role in songwriting. Sabaton frontman Joakim Brodén says they're still friends but admits things were tense at the time.
* Horrible History Metal channel in which Indy explains the history behind the music and the band members give behind the scenes stories of the songwriting.
* Horrible Holiday Series wherein Krampus overthrows Santa along with one of the elves.
* Horrible Hollywood: The media and entertainment industry is full of morally corrupt people.
* Horrible Housing: A character lives somewhere crappy to emphasize their bad living situation.
* Horrible Housing: A house in poor condition, meant to highlight the residents' poverty.
* Horrible Judge of Character and will cause her to be a bit slow in detecting antagonists.
* Horrible Judge of Character: Someone who is very bad at telling whether a person can be trusted.
* Horrible Judge of Character: The character is unable to tell when a person cannot be trusted.
* Horrible Judge of Character: Too stupid to realize that someone is obviously not a good person.
* Horrible Judge of Character: Trusts people who really shouldn't be trusted.
* Horrible Judge of Character who couldn't read or relate to other people.
* HORRIBLE minions. Unfortunately, the Flying Dutchman realized that they'd make better dinner than slaves.
* Horrible Science book "Shocking Electricity", it claims that the only things robot cats can do that real cats can't are catch mice and pee on the carpet.
* Horrible Science: In "Gruesome Guts", Mark gets food poisoning and leaves Lucy to close the show while he dashes off to the toilet. She reads his closing speech from the autocue, ending by reading "Smile. Wave to camera".
* horrible story about picking up a (probably heavily sedated) girl in a dentist's waiting room, having sex with her, and accidentally "tripling" himself mid-coitus (it's "when you cum, puke, and shit yourself all at once")
* horrible thing from beyond the world when Malachai, another human thaumaturge, merges himself with the Beast and takes over as its guiding intelligence. And then you kill Malachai and destroy the Beast's hearts along with him. Similarly, the Beyond and Breach temporary leagues had demons invading the world as a game mechanic, mostly so you could farm them for loot.
* horrible things to your economy as everyone stops trading with you for several turns (which can be devastating for any faction that relies on trade routes and external income, as in the other Civ games) and you get temporarily chucked off the Council.
* horrible treatment. Also, during a Foot attack, April realized that Donnie and Casey were right as it convinced to call the Turtles for help. Through this act of

being there for her and understanding their always be her friend, April was convinced to forgive the Turtles and apologizes to them for her awful behavior towards them, especially Donnie.
* horribly allergic. Ultimately played with: when Radar quotes the trope Potter gently admonishes him. "An act of kindness is never for nothing, son."
* Horribly, and now all that's left of her is her un-buried hand with a ring that he gave her. He "marries" her, or more accurately her hand, and only then she can rest in peace.
* Horribly averted by an Israeli TV broadcaster in 2002, when a reports from a suicide attack in Jerusalem were broadcast side-by-side with a soccer match, to avoid having to cut off the match. The decision is infamously known in Israel as the
* horribly can be produced regardless of gender, the only requirement being the parents must be a human-vampire couple, although either participant can get pregnant. Since this is a horror story, it does not end well.
* Horribly deconstructed with Regina, in the second game. She often gets her way and has plenty of admirers because of how adorable she is, but she's very naive about it all and this causes quite a few problems. There's a fair bit of drama in the circus over who gets her hand in marriage, and it turns out that
* horribly inaccurate. The all-sheet metal construction also gives it several sharp edges and uncomfortable angles on the grip, and it's not any easier to control in semi-auto fire thanks to the bolt's very aggressive back & forth rocking with every shot.
* horribly outmatched when the American forces absolutely annihilated wave after wave of Japanese aircraft (this coming to be known as "the Great Marianas Turkey Shoot"), with only minor damage on a battleship to show for it. Then American submarines sank two of their best fleet carriers—including the brand-new and pride-of-the-fleet Taiho, and the American counterattack still managed to catch up to and sink one more fleet carrier. The battle completely dashed any hope of the Japanese Navy turning the war around.
* horribly, the aforementioned crags are missing, and XP parties play somewhat like Dynamis runs.
* horribly the majority of these young women are. By the end of the series, they're not as broken, and it shows.
* Horribly used when Ran, Conan, Sonoko, Sonoko's sister Ayako and Ayako's friends see a mysterious bandaged man carry a kidnapped girl away in his arms, right before
* horribly wrong with Sun thinks that he's just going through a rough patch and needs some friendly support.
* Horribus is also only vulnerable on certain parts of his body. Even when Torg uses a magic, kill-anything sword, he can still only take Horribus down by either decapitating him or stabbing him right through his soul (located roughly in the center of his chest).
* Horrid Henry book, revolves around Henry being the ring bearer of his cousins' wedding. As expected, he goes out of his way to ruin the day for her and everyone, by tearing the bride's dress, losing the rings, ruining all the pictures, eating the wedding cake early and finally making it crash right into Polly. Needless to say, he's banned from weddings from that point onwards.
* Horrid Henry episodes had a character (mostly Henry) scream "NOOOOOOOOOOOOOO!!!!!" or "IT'S NOT FAAAAAAAAAIRRRRRR!!!!!!" and would mostly zoom into the character's mouth accompanied by suspenseful music. This sequence is often used to start and end each episode.
* Horrid Henry, Peter finds a dog's hair and analyses in his "lab", where he finds that it isn't a human hair, "and it isn't one of Henry's either".
* Horrid Henry's jaw drops in one story after noticing a coin while shaking Perfect Peter's moneybank.
* Horrid Henry: The Movie, Henry does this to hide from and ambush Margaret.
* horrific 60s print ad from Mobil distorted face. Interestingly, this image is actually of a dancer named Killer Joe Piro, and the original photograph was taken mid-dance, giving it its creepy look.

* Horrifically averted: Adam is thrown by a fully augmented human through a computerized display made of extremely thick glass at the beginning of the game, forcing him to become augmented to survive. They even
* horrifically hits Preston Northwest in "Weirdmageddon", courtesy of Bill Cipher. If that wasn't enough, in the final episode Preston was forced to sell the family mansion after going bankrupt investing all his fortune in "weirdness bonds" during Weirdmageddon. While he still has enough money from liquid assets to live comfortably, for him it's utterly humiliating.
* Horrifically, in which Agamemnon scolds his brother Menelaos for showing mercy to a Trojan:
* Horrifically subverted in Sierra Leone's own civil war, when rebel war criminals would ask their victims, "Short sleeves or long?", then amputate their hands at either the elbow (short) or the wrist (long). Either way, victims' survival depended on whether the bleeding could be stopped, not on what they chose. Some rebels practiced a straight version of the trope, merely asking "Hand or head".
* Horrificator", the eponymous monster's goo can neutralize both Ladybug and Cat Noir by sticking them to walls on a direct hit. They're in a hurry to escape before it hardens. Cat Noir even calls the trope by name in the English dub.
* Horrific, Dr. Jordan and Morty stuff the body of the dead prostitute into a crate and hide it in the attic. It only takes about ten minutes for another character to discover it.
* horrific featured a mousy, dowdy-looking woman who was so jealous of the attention other women would pay her devoted and incredibly handsome husband, that she convinced him to seduce and lure women into their plot; she would go as far as to pretend to be one of the victims, and play up a rescue only to dash their hopes, by pulling back her hands while her husband would drag them to their deaths, all so she could see the look of terror in their eyes, while her husband would kill them with a loving gaze fixated on his wife.
* Horrific: In ''Masters of Death", six people trapped in a cabin a presented with a prophecy that three of them will be killed by the other three. Roz is convinced that Len is going to kill, and winds up killing him. She believes she has cheated the prophecy (he can't kill her if he's dead), but the others point out she has changed nothing: the prophecy never specified who would kill whom, and there is still one murderer and one victim.
* Horrific, Jordan has converted his apartment into one for his experiments in accessing the 8th dimension.
* Horrific, Kristof stages a practical joke where he tells his friends that they Calvin has died and they will be attending a private viewing of the body. However, once at the funeral home, the still-alive Calvin sits up in the coffin.
* Horrific Necktie as seen in the game is multicoloured, mostly green and blue with red accents, and has a mixture of paisley and floral prints in clashing colour schemes. However, at one point, it was orange. This can be seen in the portrait for the "Sensitive" prebuilt archetype, which shows the detective caressing the Necktie (as it tends to become a prominent character in builds prioritising PSY), with it being bright orange and having a consistent paisley print. Kim also references the tie being orange in one specific line of dialogue in his Debriefing scene at the end of the first day, when complimenting the player on their shoes - "I like the green. Goes with the orange."
* Horrific Necktie, which the narration notes is a 'metaphor for Revachol in the 30s'.
* horrific stretched out lengthwise like an exploded-view schematic drawing.
* horrific. That isn't saying much, however. It spawns in the wet season of the Wildspire Waste, its eggs hatch soon after, and the young sneak into an orifice of large monsters passing by, latching their sharp gills to the monster's innards and feeding on them a la candiru.
* Horrific, the giant eye comes from a parthenogenic race. However, because it crossed into our dimension through a male host, it now needs human females to propagate its race.
* Horrific, the giant floating eyeball impregnates Rita and Jane to create an

invasion force for its species.
* Horrific, the undead executioners have red eyes, as does anyone possessed by the ghosts of the witches.
* horrific who is pursuing them romantically to get them to come around, if s/he waits patiently.
* horrified at what had happened, compounded with killing his father, leading him to blame himself for it all. Ironically, Lelouch and Suzaku would both precipitate a repeat of this, with Suzaku joining the Knights Of Round and conquering countries, and Lelouch accidentally causing a country-wide riot, and eventually leading his own massacre, AND ruling the world with a bloody iron fist. (The latter is part of a Thanatos Gambit
* Horrified by how that must have sounded, he clarifies by telling her he has a note from his physician in the pocket of his pants (he was wearing a hospital gown at the time).
* Horrified has the players compete together against the classic Universal Monsters cast: Dracula, the Wolf Man, Frankenstein and his Bride, the Mummy, the Invisible Man and the Creature from the Black Lagoon for the fate of a town.
* horrified reaction. Especially considering that she tried to commit suicide before the fact came to light.
* horrified to discover that his late father, James Potter, was also one of these in his youth.
* horrified when he found out. He was actually disappointed when the ZAFT government refused to put him on trial for war crimes.
* horrifying, but instead spends his last moments demanding Clegane to confess to his murder of his sister, Elia. Clegane ends up tripping him, then kills him in the same manner as Elia's.
* horrifying effect's short story "The Creeping Terror," which was originally published as "A Touch of Grapefruit." The story, which is presented as a thesis for a Master's degree, describes strange occurrences throughout the Midwestern United States, including citrus trees growing in corn fields, increasingly balmy weather, and people looking for the ocean and talking about driving to different locations in California. As it turns out, the city of Los Angeles is alive... and it's spreading. At first, the populace at large takes this as a joke, but soon, people across the whole nation begin to completely lose their minds, destroying their homes and property, as the city moves from the Midwest to the rest of the nation. By the end, Los Angeles has taken over the whole country, with the entire population now brainwashed by it... and the final lines of the story imply that "Ellie" is beginning to spread to the countries surrounding the United States as well.
* Horrifying Hero: A good guy with (mostly) good goals who horrifies people around them by their nature/look.
* Horrifyingly, Rep. Cynthia Davis of Missouri suggested that cutting lunch programmes for children in schools that performed below standards would be a great way to "motivate" kids to do better.
* Horrifying Metamorphosis: . The victim experiences a disturbing slow change into his new form. The end result does not have to be body horror, but the process of adopting an entirely new body plan is likely to involve quite a bit of body horror.
* Horrifying the Horror: Something is so scary that it freaks out a being who is already horrific and terrifying in their own right.
* Horrifying the Horror: Something is so shocking that even the monsters are scared of it.
* horrifying this trope was how you gained Surgebinding powers, and deliberately jumped off cliffs and otherwise put themselves in deathtraps in hopes of bringing back the Surgebinders. Since at that point it was impossible to create new Surgebinders (the spirits that allowed it having retreated to their own world after the humans killed most of them), all the Envisagers succeeded in doing was killing themselves in horrible ways.
* Horror abounds in a California Milk Advisory Board that depicts a woman's skeleton shucking off the rest of her flesh in order to gulp down some of the

calcium-rich fluid. The husband is oblivious as he watches t.v. in the other room, the skeleton retains the woman's voice... and the remaining flesh, left on the floor like a full-body sweatsuit, rolls its eyes as the skeleton keeps talking.
* horror, and high production values. In this, it has often been described as a throwback to the horror films of the '70s.
* horror and they tend to have meager budgets compared to other genres. Even the most critically lambasted movies that only manage to rack up gross in the lower double-digit millions can still be considered successes, because their budgets are in the range of single-digit millions.
* Horror Classic Gamebooks you were either the monster or its creator.
* Horror Comedy and every three years, it resurrects. As it runs on horror movie logic, it can't be killed the same way twice and thus a new way of killing it is needed each year.
* horror/comedy is based around Halloween, and proudly features many of the tropes surrounding it (including the popular conception of Halloween as an old Celtic pagan holiday).
* Horror Comedy: Splatstick films tend to wind up here, but where they land in the spectrum varies widely.
* Horror Doesn't Settle for Simple Tuesday: A horror-related work has the story take place on a holiday or special occasion.
* Horror Doesn't Settle for Simple Tuesday: Horror plots happen on Halloween or another holiday.
* Horror Doesn't Settle for Simple Tuesday: Horror plots occur on the holidays.
* Horror Doesn't Settle for Simple Tuesday: Scary events happen on a holiday or special occasion.
* Horror Doesn't Settle for Simple Tuesday: These films usually take place on holidays and such.
* Horror Express, Captain Kavan brutally lashes a man with a cat-o'-nine-tails for calling him a fool.
* Horror Express people are trapped on the Trans-Siberian Express train with a prehistoric monster which was found frozen in ice but has thawed out.
* Horror Express, the alien enters a compartment containing three sleeping children, and approaches threateningly towards them, but leaves without killing them: presumably because they possessed no knowledge it wanted to absorb.
* Horror Express: The alien kills the baggage man and places his corpse in the crate he had escaped from.
* Horror Films action movies and you've got yourself some Lovecraft Lite.
* horror flicks who likes obscene phone calls to stay on the line so they can get a trace.
* Horror Game runs this risk, even though there have been Let's Plays long before PewDiePie came onto the scene.
* Horror Hates a Rulebreaker: In horror stories, those who have done wrong are especially likely to suffer the wrath of the supernatural terrors.
* Horror Hates a Rulebreaker: The moment you break unspoken rules, the supernatural will kill you.
* Horror Hates a Rulebreaker: The supernatural's standards might be arbitrary, but they're there.
* Horror Hates A Rule Breaker, when a rule must inevitably be broken to allow a horror story to begin.
* Horror Hippies and the Manson Family being the primary inspiration for most evil hippies in fiction.
* Horror Hippies: Hippies played for horror and evil, often inspired by the Manson Family cult.
* Horror Hippies: These guys don't really mean to bring love and peace with them.
* Horror Host: A character common in works of the horror genre whose purpose is to serve as a narrator in the story or collection of stories' framing device.
* Horror Host: Many works of the horror genre have a framing device where a creepy individual is presenting the story to the audience.
* Horror Host to ensure they survived (given that the comics he now appeared in

were under Code rules) at least in all witnessed cases.
* Horror Host: Works in the horror genre often feature a framing device where the featured story or stories are introduced to the audience by an eccentric and creepy narrator.
* Horror Hunger: An undead character who feels a supernatural and irresistible hunger for living humans.
* Horror Hunger: A person starts to crave blood after being turned into a vampire.
* Horror Hunger as he got home to Mary Jane and Aunt May. Hilarity ensued.
* Horror Hunger resulting in their deaths and Miki's, with Akira again being too late to save them since he was injured in an earlier fight and couldn't fly to their aid.
* Horror Hunger: When a character feels a supernatural and irresistible hunger for other humans.
* Horror in Hollywood, Strabalda tries to dispose of her brothers by tricking him into entering a random pond which just happens to house an alligator who can't believe his luck.
* "Horror Movie". Even the Killer does an eye roll and has a look on his face that simply says "Pretty sure I'm doing the genepool a favor at this point...".
* Horror movie franchises are infamous for this, such as killing off the
* horror movie Psycho Killers — at least the ones who got sequels.
* Horror movies used to be seen as lowbrow and pulp entertainment, opposed to family values and of dubious merit. Yet some movies escaped the ghetto:
* Horror movies usually avert this trope, with their stars (particularly the
* Horror movie villains (particularly slashers). They have a tendency to return from the dead, especially
* Horror novelist Ruby Jean Jensen wrote extensively about creepy dolls:
* Horror of Dracula: Lucy, after becoming a vampire, preys on her niece as one of her first victims.
* Horror of Dracula, where Van Helsing gives his coat to a scared little girl and then tells her "You look like a teddy bear."
* "Horror of Fang Rock": Everybody on the island except the Doctor and his companion, dead.
* Horror of Fang Rock" has a clear negative effect on the Doctor's mind, sending him moody and paranoid and, most of all, pants-wettingly terrified.
* "Horror of Fang Rock", Skinsale sabotages the wireless to thwart Palmerdale's schemes. Of course this means they can't call for help or warn anyone about the impending alien invasion.
* "Horror of Fang Rock", the Rutans (eternal enemies of the Sontarans) mention that Earth is valuable because it is strategically placed, rather than anything on the planet. This explanation is as good as any until we get to the subject of all those other rocks that are pretty much in the same place but put up less of a fight.
* "Horror of Fang Rock" when a Rutan claims Earth is in a good strategic position. This would explain many of the other invasions.
* Horror of the Zombies starts with two models on a motor cruiser staging a publicity stunt to stir up interest in the boat itself.
* Horror on the Orient Express. Successful Accounting rolls are useful twice: while examining Makryat's account books, they reveal that he bought and later sold a special train set, and while studying the Gremanchi Doll Work's records, they show how the Conte ordered the purchase of the Left Leg and later used it.
* Horror ("Softer" science fiction with only a few unrealistic elements may also qualify.).
* Horrors of the Black Museum, Bancroft creates a serum that uses on his assistant Rick, that grants Rick the 'gift' of absolute obedience. It also grants him superhuman strength, drives him into a berserk fury, and distorts his face into a hideous mask.
* Horrors of the Black Museum, Bancroft decides that Angela knows too much and hypnotizes Rick into murdering her.
* Horrors of the Black Museum, Bancroft disposes of Dr. Ballan's body by lowering it into a vat of acid that strips the flesh from the bones in a matter of seconds.

* Horrors of the Black Museum, Rick and Angela take a ride on the Tunnel of Love at the funfair. While they are in the tunnel, Rick tranforms into the killer and stabs Angela just as the boat emerges.
* Horrors of the Black Museum that dissolves all of the flesh and muscle within seconds: leaving behind a spotless and undamaged skeleton.
* Horrors of the Black Museum, the killer uses a portable guillotine to decapitate Joan in her bed.
* Horrors of the Black Museum, the police arrest a man named Tom Rivers who confesses to all four murders, with enough detail to make him convincing. However, he later starts confessing to additional murders, and talks about a death ray he is inventing, and the police realize that he is a serial fantasist. He is ultimately confined to a mental institution.
* Horrors of War: Captain Mitchell, a thuggish American soldier who's abrasive to his own men at the best of times and rapes civilians at the worst of times. He seems to genuinely believe that there are no innocents and anything he doe to people is deserved.
* Horrors of War: The poster does this with Adolf Hitler and his zombie hordes.
* Horrors of War: These are ravenous creatures stuck in wolf form by mad science, only kept in check by shock collars until they're let loose to kill as many people as possible until slain themselves. They resemble humans with semi-lupine features, but no more hair than they had in life. The disease is transferrable via bite, and somehow turns into more traditional lycanthropy when spread.
* Horrors of War: These are undead beasts that exist solely to kill with their brute strength, and can only be put down by a bullet to the head. Even the, sometimes it takes two.
* horror. Some of the most terrifying characters in the show are modeled with CG.
* Horrors source book), but probably the straightest example of a Tome of Eldritch Lore is the Book of Scales. According to legend, a group of powerful Horrors captured a dragon and forced it to write a history of the Horrors, using the dragon's own scales as pages and its own blood as ink. The dragon then scattered the scales as far apart as possible to minimize the damage. The Book of Scales allegedly contains valuable information that can be used to battle the Horror, but is so tainted that carrying around a single scale (not even reading it, mind you, just carrying it) will eventually drive a person mad.
* Horror taint becomes the only game where your character's life may come down to a successful Needlepoint roll.
* Horrorterrors. They’re where players’ dreams take place when their dream self (or their regular self, either or) is dead. They were originally ephemeral and unstable, exposing dreamers to the highly unpleasant effects of the Outer Ring and its denizens, until Feferi convinced the Horrorterrors to make permanent ones. The final product results in shared dream dimension that is constantly shifting appearance as dreamers recall and dismiss memories and as bubbles, carrying their passengers with them, merge and split, resulting in pretty surreal and patchwork landscapes as places and things from many different worlds end up side by side. They also double as the afterlife, with the souls of dead characters remaining there permanently but still able to interact with living dreamers. As the Ring exists outside universes and thus causality, the dead from all possible timelines end up together, making the Bubbles fairly crowded.
* Horror: The traveler finds themself being actively hunted down by some menace (natural or supernatural), not necessarily because of anything the traveler themself has done, but just because
* Horror Video Games: A game that exploits the fears of players to cause anxiety, fear, and ultimately thrills.
* Horror with every story has their own collection of nightmares. To give you an example,
* Horrorwood featured The Lizzie Borden Band and Axe Corps, who carried around what you might expect considering their namesake.
* horse. After that, she's only too happy to be swapped into Professor Oberon's body (again).

* Horse Archer. Again, Jamuka will reply via saying that he loves only her now.
* Horse Archers are not great at a) conquering the kind of heavy-duty fortifications that medieval Europe was full of, b) dealing with increasingly disciplined heavy cavalry sorties from said fortifications in confined spaces. The Mamluks worked out the same thing (though instead of waiting for the grasslands to run out, they just set most of the Middle East on fire and exploited fortresses developed during the wars against the Crusaders and territorial advantages).
* Horse Archers. It also helped a lot Subudei, Baidar and Batu were the most brilliant generals of the era — the later Mongol generals were not up to their par.
* Horseclans: After a few centuries, the Undying in many cases forget their past.
* Horseclans. At first, this requires mechanical help, but they later learn to do without that.
* Horse Clans, Sergeant Jethro Stiles identifies himself and Milo as these. Stiles considers himself to be doing penance for an unspecified moral failing which happened in his past.
* Horseclans: Sir Geros Lahvoheetos, a gentleman's valet who earns a knighthood and myriad other honours through his chivalry and courage. Honest, humble and kind to others, convinced of his own cowardice - because in his eyes wetting himself in terror outweighs such suicidal courage as running into a blazing inferno to rescue a wounded comrade pinned beneath debris.
* "horseclaws". Nausicaä looks shocked. It's even more blatant in the original Japanese, where they're simply called "horses".
* Horse Feathers, as there is no way anybody could possibly think that the ref would let somebody ride down the field in a chariot and use every spare football in said chariot as a separate touchdown, no matter how much bribery was involved. Also, Groucho's team (Huxley College) received a kick-off from rival Darwin College after scoring a touchdown, as opposed to kicking off to Darwin. (This is actually a bit of Truth In Television, since some college all-star games used to do this to make the contests more competitive: in the Hawaii Bowl, for example, a team would get the ball back if they trailed by more than two touchdowns in the fourth quarter.)
* Horse Feathers featuring Delores Costello as the title character, Jane Witherspoon. The daughter of a professor, Jane was technically a bit young to be considered a true college widow but filled the role anyway. This itself was a remake of a 1915 silent film of the same name, in which Jane was played by Ethel Clayton.
* Horse Feathers, Huxley College hires two professional football players for an upcoming game against Darwin College. In retaliation, Darwin's president Wagstaff (Groucho Marx) tries to do the same, and ends up hiring a stockboy and a dogcatcher instead.
* Horse Feathers) is no lawman, but at one point he invokes the trope in song anyway:
* Horse Feathers marries Groucho, Chico and Harpo's characters simultaneously. (Zeppo is left out as his character was Groucho's son, and that would be squicky.)
* Horse Feathers.' Now I'll give you one more guess." Of course, Wagstaff's next guess is the correct password.
* Horse Feathers, one of Chico and Harpo's plays involves the use of banana peels for offensive blocking — but Harpo is enjoying it so much, he tosses one under teammate Zeppo, who is running with the ball.
* Horse Feathers. One scene, shot shortly after, has Harpo, trying to kidnap two football players and getting beat up, while Chico sits in a chair and directs him.
* Horse Feathers - subverted in typical Marx Brothers fashion, as Frank Wagstaff (Zeppo) congratulates his father (Groucho) on becoming college president:
* horse for directions. Naturally, there's a nearby sign that reads, "Do not talk to horse."
* Horse Girl: At the end of the film, Sarah lies on the ground before being levitated and absorbed in a white beam of light into the sky. Whether she's time travelling, being abducted by aliens, or simply ascending to heaven is left

ambiguous.
* Horse Girl. Darren brings up the conspiracy theory that aliens built the pyramids and kickstarted human civilization, which Sarah finds fascinating and immediately believes after hearing it.
* Horse Girl: Sarah is seemingly suffering from delusions and hallucinations throughout the film. However, it's left ambiguous what is real or not.
* Horse Girl, Sarah's character arc parallels her grandmother's life story: becoming increasingly delusional and paranoid, and ultimately being institutionalized. Sarah seizes on this as evidence not that she should seek help, but that she literally is her grandmother or a version of her through some kind of cloning or time travel.
* Horse Girl Speed, Spider-Monkey girl Solitaire and Sarahebi the snake teacher.
* Horse Goddess, a Demythification of Celtic gods as actual human beings, the blacksmith Govnu (Irish god Goibniu) becomes famous for discovering and working meteoric iron.
* Horsehair worms when they are ready to rip through its chest and begin their free-living existence.
* horse. He must have learned both Baby and Horse at some point before that incarnation since Nine and Ten spoke to a baby Rose, several cats and a horse from pre-revolutionary France lost on a spaceship.
* Horse hooves were always simulated with coconut halves in golden age radio shows. But by then, the automobile had almost completely replaced the horse as everyday transportation. Thus, the common man came to think that horse hooves actually sound like coconut halves banging together, simply because he didn't know any better. This misconception has persisted to the point that while it would be a simple matter to digitally insert actual horse hoof sounds into a work, audiences won't believe it sounds like horse hoof sounds because
* Horseland episode "The Can-Do Kid" was interrupted by a CBS News discussion on the death of Osama Bin Laden.
* Horse Land had Chloe and Zoe attempt to bring a lot of useless gadgets with them on a camping trip. MP3 player, curling iron, hairdryer, smartphones, etc.
* Horseland has Shep the sheepdog telling the events of the episode in flashback. This was mostly dropped by Season 3.
* Horseland has two types of these: one of these is a sun flare blurring the screen for a moment, normally used to transition to and from the main story as a flashback by Shep. Another commonly used wipe is the background changes behind the character leaving in them in the foreground for a moment before they fade away moments later.
* Horseland while the older one, Chloe, still looks like Paris dead-on.
* "Horseless carriages" that people shake their heads and tsk at, claiming
* horse-like aliens, were not thought sentient until they were seen wielding spears.
* horse-like Zwoots. The Sun Folk plan to hide in the caves until the stampede is over, but the Wolfriders decide to turn the stampede so that it avoids damaging the village. When Leetah spots petite Dewshine heading out to join the other Wolfriders, she objects.
* Horseman armour is glorious, and it's certainly more awe-inspiring than his previous costumes.
* horseman, Femine. He likes to hang out in the pub enjoying some pie. When Mot states that he doesn't need to eat, his answer is that he likes to. It appears that he's only one of Four doing that, so it might be connected to him being a personification of hunger.
* Horseman Of Famine Trelmarixian, so he could have just been a low level mundane class, but you'd still think he'd have at least one class level.
* Horsemen of the Apocalypse also qualify. War drives a red 1965 Mustang, Famine a black Cadillac Escalade, Pestilence a green 1972 AMC Hornet with the license plate "SIKN TRD", and Death a white 1959 Cadillac with the license plate "BUH*BYE".
* Horsemen of the Apocalypse, a man with a very skeletal appearance. Death is not actively malicious. He views humanity in much the same way we might view microbes—barely noticeable and utterly insignificant. He also claims to be at

least as old and as powerful as God (neither of them can remember who's older anymore), and states that, in the end, he'll reap Him too. He's portrayed as more of a typical Grim Reaper-type being in "Appointment in Samarra", which makes it clear that his task is to maintain the natural order. He views the Winchesters as slightly more significant this time around—enough for him to be annoyed at the way they keep coming back from the dead, anyway. He also likes fast food—so much so that when the Winchesters summon and bind him at the beginning of season 7, their "please don't kill us on the spot" bribe is a bag of pickle chips.
* Horsemen of the Apocalypse eat the locusts and drink the blood, or as they call them "fried chicken and fruit punch."
* Horsemen of the Apocalypse were each skeletal figures wearing cloaks.
* Horsemen series, featuring romance between human women and centaurs.
* Horsemen War claims that he has been responsible for most of the conflicts throughout human history, specifically citing both World Wars, the Middle East, and the Sudan for the past century.
* Horse of a Different Color — The saying is a metaphor that means "another matter entirely". The trope is about non-horse animals being used like horses.
* Horse of a Different Color, the giants who live north of the Wall ride woolly mammoths into war like men ride horses. Several mammoth-mounted giants are seen within Mance Rayder's Wildling army.
* Horse Overboard. In the past when a ship was carrying too much cargo they would have to put something overboard to stop it from sinking, and the horses would be the first to go. With that in mind the line "My wife is a horse" makes sense (it's about leaving your wife). Out of context however, it is a hilarious line, made funnier by the fact "horse" is of course a derogatory thing to call a woman.
* Horse Play", after the fireworks have gone off and Applejack splashes water on the smoking decor, a projector falls from the ceiling as the final touch to the scene's complete disarray.
* Horse Play written, totally unknown or thought of as only legend, the princesses alone can explain because they were there.
* Horses are animals whose primary purpose seems to be the conversion of piles of money into manure. There's a reason horse-racing is known as 'the sport of kings'. It's wildly expensive and incredibly finicky.
* Horses come in thirty-five varieties (five patterns and seven colors), while Tropical Fish come in over three thousand (two body shapes, six patterns per shape, sixteen colors for the main body, and sixteen colors for the pattern).
* Horses exist, but they can only be found in one secluded corner of the continent, making them extremely valuable everywhere else. Nobles use them for travel and cavalry charges, but one of the most important parts of warfare is getting the horses out of the way immediately after their charge because they're too valuable to leave in danger. The standard beast of burden is the chull, a placid giant crustacean with a rock-like shell that can be carved into a seat. They are slow and stupid, so many characters find horses far too intelligent and dangerous to bother riding.
* horseshoe orbit. A horseshoe orbit does not require vast differences in mass, and an object in one with Earth could temporarily be opposite the sun. However, it would still be detectable.
* Horseshoes and Hand Grenades and having to beat him up with a pillow.
* Horseshoes and Hand Grenades for the first 13 chapters for Gentaro and more.
* Horseshoes and Hand Grenades has Gentaro resurrected, but not by Kengo and the Cosmic Switch. He was revived by an evil serpent known as Ophiuchus who twisted his mind to focus on how his friends left him to die when Ryusei killed him. As shown in future chapters, people who have died just like Gentaro also are resurrected badly. This includes Shun, Shotaro and Haruto.
* Horseshoes and Hand Grenades has many adventures running parallel to the Kyoto Arc:
* Horseshoes and Hand Grenades, Miu has one regarding the good guy's plan for the second day in Kyoto in the Den-Liner.

* Horseshoes and Hand Grenades the Kamen Rider Shows involved and lots of OC characters, major and minor that each have a small part to play in the whole universe.
* Horseshoes and Hand Grenades they weren't helpful. This ranges from Shun not taking a step forward in the Power Dizer, JK not getting intel on Ryusei sooner, Yuki only screaming "Stop!" but otherwise not rushing toward her friend's side, etc.
* Horseshoes and Hand Grenades, this role is filled by Rumi Egawa and Taira Katagiri.
* Horseshoes and Hand Grenades who was once a former monster called a Zodiarts.
* Horses Of The Dawn fantasy-xenofiction series by Kathryn Lasky. This time, the protagonists are horses who escape from Spanish conquistadors and establish the first herd in the New World.
* Horses' other purpose is to get sick in almost uncountable ways. Overexertion will kill them. (Riding a horse to death). So will
* horses out of China. The Mongols were perfectly capable of using ladders or steps to get up the wall if they really wanted to, but horses were too tricky to get through, and horses were as important to the Mongols in ancient and middle-ages Asia as fighter jets are to air forces today.
* horses said suicide. Monk walks in, says murder. "Where's the water?" The room had no water! Simple. Eight people in the room, but nobody saw that.
* horse's weight into it as well. Needless to say, a sharpened metal-tipped stick with that much weight and speed behind it is all but unstoppable, and the use of it and it's unstoppability was the basis for medieval warfare.
* Horses with solid-colored coats have consistently better strength, stamina and speed than horses with white patterns. This scales with the amount of white present — horses with extensive white patterning have worse stats than ones with smaller marks such as socks or blazes, while horses with completely solid coats have the best stats of all.
* HORSE the Band's 10.5 hour 'Earth Tour' epic drops the title sequence directly following a character commenting that "the real tour starts here." This occurs
* Horse Women film, is only partially done. The first part came out in 2014, the second part came out 2 years later, and that has been it.
* Horsin Around, Todd has "Hooray! (Something related to the topic of conversation)!"
* "Horsing Around" has Uniqua, Pablo, and Tyrone as jockeys in a horse race. Pablo and Uniqua both insist that they have the best horse this side of the Mississippi, but Tyrone's tiny donkey is the definition of
* Horsing Around: You fail at getting the steed to do what you want it to.
* Horslips, assert that the one thing which will persist past the end of all other things is the Irish tendency to violence and bloodshed.
* Horslips, deals with the older people sadly withdrawing themselves from Ireland as they cannot compete with the changing ways of Men and the advent of hostile Christianity.
* horslips'' retelling of the Irish mythology plays on this trope: Queen Medhbh is seen as greedy, capricious, imperious, and callous.
* Horslips) set Irish mythology of the Mithril Age to music, largely updated Irish folk standards with new lyrics based on the myths, re-arranged for rock band plus traditional instruments. Blending traditional Irish music and modern rock instrumentation on both traditional and electric instruments, this band is credited with being the father of the Celtic Rock movement.
* Horslips were an Irish band, and generally regarded as the inventors of Celtic Metal. "Dearg Doom" is a part of a concept album based on The Táin, and somehow manages to kick even more ass than the original legend. They're a difficult one to call, though. There were costumes, electric mandolin solos, Heavy Metal renditions of Traditional Irish Folk tunes and their lyrics embraced Celtic Mythology in the same way many Filkers embrace
* Horta. Not many other life forms could really expect to survive in the conditions on board.

* Horten Ho 229,. Many a gamer can be forgiven for thinking it was just standard dieselpunk hijinks.
* Horton and the Kwuggerbug and More Lost Stories: Horton sneezes after the Kwuggerbug shoves the beezlenut shells into his trunk, blowing said Kwuggerbug so far away he never manages to get back to the Beezlenut tree.
* Horton and the Kwuggerbug and More Lost Stories: Officer Pat sees a gnat about to bite a drowsing cat, and thinks about the increasingly nasty consequences from this, which ends with the town being blown up. To prevent this, he swats the gnat.
* Horton Hatches the Egg", a fish (a caricature of Peter Lorre) does this after seeing Horton, sitting on a nest in his tree, going by on the deck of a freighter.
* Horton Hatches the Egg, and explains that it grew elephant features from Horton's care and Mayzie's neglect. The birth father is never even mentioned.
* Horton Hears a Who! after Horton actually does make a pretty good comeback, but admits he usually "Doesn't think of that stuff 'til later."
* Horton Hears a Who!), and storyboarding (with Bob Ogle). Dr. Seuss himself is listed for writing the original book, as well as co-producing with Jones (credited as Ted Geisel), lyrics, and teleplay for the adaptation.
* Horton Hears a Who! as Horton is being roped and caged, a Wickersham in the cake has this happen to him as Horton accidentally sits on him.
* Horton Hears a Who!, as it turns out, had been doing much more than playing with his yo-yo, he had built incredible, giant mechanisms to create music.
* Horton Hears a Who," entitled "Horton hears domestic violence in the apartment next to his but doesn't call 911."
* Horton Hears a Who!-esque) when Horton imagines that he's a heroic ninja.
* Horton Hears a Who! has sent Vlad after Horton. Horton inquires as to whether he means Vlad the Vulture, or Vlad the bunny who gives out cookies. (It's the vulture.)
* Horton Hears a Who! Horton crosses a rickety wooden footbridge (the only way to get to Mt. Nool), destroying it in the process. Later in the film, the other characters somehow follow him, despite the bridge being gone. It’s possible though that they found an alternative route to get to Horton.
* Horton Hears a Who!, Horton has to cross a bridge to Mt. Nool with the entire Who planet dangling on a speck of dust on his trunk!
* Horton Hears a Who!, Horton is triumphant getting his neighbours to believe the microscopic Whos exist and is hailed a hero of the ages. However, he can't help but notice the Sour Kangaroo is now alone, ashamed and hated for what she did to him and almost to the Whos. Fortunately, Horton has a heart as big as his ears and he immediately goes to offer his forgiveness to the Kangaroo. The Kangaroo, realizing how lucky she is to have a friend as noble as Horton, immediately offers to help him shelter the Whos for the trip to Mount Nool.
* Horton Hears a Who!, Horton shouts, "I'm talking to the mayor!", but because the mayor is invisibly small and the bird he was next to is not the mayor, the bird is confused and slowly backs away.
* Horton Hears a Who! inspired by a children's book by Dr. Seuss — puts it comfortably here.
* Horton Hears a Who! likes to insert little impressions in all of his movies. Here, as Horton (played by Carrey) is being chased by the Wickersham Brothers, he randomly does an impersonation of... Henry Kissinger, of all people.
* Horton Hears a Who!)—takes him to the highest point in town and has him make a loud "YOPP!" This added to all the other Whos' noises finally allows the animals to hear them, saving the town.
* Horton Hears a Who! meanwhile still portrays Jane as a snobby meddler, but most of her worst actions are more down to her pomposity or lack of foresight snowballing disasters, with her usually repenting and trying to fix her mistakes when she realises she has hurt someone (especially if that someone is her beloved son, Junior).
* Horton Hears a Who! Morton shows up to warn Horton about Kangaroo sending Vlad the eagle to snatch the clover, and the following exchange happens:
* Horton Hears a Who!, occasionally referred to as "the Kangaroo" or similar.

* Horton Hears a Who!, the birds describe Horton as "manic, depressive, retrogressive, recessive, and 'progressively, excessively, possessively, oppressively acquessive'."
* Horton Hears a Who! (the CGI version) ended on the cast singing and dancing to "Can't Fight This Feeling".
* Horton Hears a Who!, the kangaroo rallies all the other animals in the jungle against Horton with this cry.
* Horton Hears a Who!, the Mayor is at the dentist when an earthquake (caused by the speck the Whos all live on moving) occurs, and the Novocaine needle ends up in his arm, which remains limp and useless for some time afterwards.
* Horton Hears a Who!: The Whoville residents set up an Epic Hail of "We Are Here!" in order to save themselves from complete annihilation.
* Horton Hears a Who! was Seuss literally embodying the regret he had for demonizing the Japanese in the pro-war effort before Hiroshima and Nagasaki were nuked, in this instance Seuss is Horton empathizing with a race his fellow people at the time do not care for. shdr
* Horton Hears a Who! were all voiced by kids. Most notably, Katie was voiced by 8-year-old Joey King in one of her earliest acting roles.
* Horton Hears a Who! where the mayor of Who-ville hears voices coming from a Who-scaled dust mite...
* Horton Hears a Who!. While answering the mayor's "hypothetical" question, Dr. LaRue whips off her safety glasses on the obvious dramatic line. In a later scene, she whips them off on an innocuous word so she can put them back on for the most dramatic line.
* Horton Hears a Who! with a rousing speech explaining why he is so devoted to protecting a speck on a clover which contains a microscopic community on it. At the end, even the Sour Kangaroo notes that the speech is moving, but immediately orders Horton bound and caged anyway.
* Horus' betrayal, but being attacked by the Wolves drove the Thousand Sons into the traitors' camp.
* Horus for the "Attack of the Sphinx" story, as the first of the Egyptian Gods William faces.
* Horus Heresy accept his death believe that he already has a resurrection scheme in place.
* Horus Heresy. Afterwards those who aren't dead, presumed dead, or might-as-well-be-dead have become subversions as they've either vanished from the Imperium or spend most of their time doing Emperor-knows-what on some daemon planet in the Warp.
* Horus Heresy. Also, the book gives us an idea of how much Space Marines stink after some time in their powered armor. On the other hand, most Primarchs, who are even taller than Marines, are godlike beautiful.
* Horus Heresy, a marine explains to a civilian why they're attacking a planet that has robots: According to him, "mineral" intelligences always have thought patterns incompatible with organic ones, which inevitably leads to rebellion.
* Horus Heresy and blessed by the Chaos Gods, he survives, and by the present of the setting, ten thousand years later, he seems to have regrown it.
* Horus Heresy, and ends with an Iron Warrior and Emperor's Children mixed force on an Eldar crone world attempting to set up siege lines... only for the situation to reverse when the wraithguard walk.
* Horus Heresy and weren't particularly worried about things like collateral damage or war crimes. This scared their allies so much that many Imperial forces preferred to die en masse than call upon the Space Wolves.
* Horus Heresy books The Emperor also intended for the Space Wolves to be this, specializing them to hunt down other Space Marines that went rogue, but apart from the usual battles against Chaos Space Marines they don't seem to do this much anymore; Leman Russ realized, after the sheer brutality of the attack against Prospero, that if the Wolves kept insisting on behaving like executioners, they would find no support or allies.
* Horus Heresy by everyone else. Ironically enough, in creating their story they

had to retcon Matt Ward's version, which was restored in full later by Robin Cruddace seemingly by accident.
* Horus Heresy, Dantioch's men hold Lesser Damantyne for exactly a year and a day before it falls.
* Horus Heresy. Didn't stop him from becoming the Champion of Slaanesh, exulting in causing and receiving pain.
* Horus Heresy, Erebus. Not only did Erebus try to have Sanguinus possessed, he also corrupted Lorgar and Horus, essentially dooming the Imperium and kickstarting the Heresy.
* Horus Heresy, Fulgrim presented Horus with the polished skull of Ferrus Manus after the Drop Site Massacre. Later, he chopped the head off one of his commanders, Eidolon, when he felt the Astartes was being too mouthy, but had it sewn back on when he realized Eidolon was still a useful commander to have around.
* Horus Heresy get back together, and in fact end up some of the most passionate enemies of the entire civil war, culminating in an entirely sincere effort to kill each other.
* Horus Heresy, he denied this trope. Unfortunately for everyone, he was lying, and the Chaos Gods were not just intelligent, but actively scheming to ruin the galaxy.
* Horus Heresy, Horus's attack on the Marines on Isstvan IV was motivated to prevent this. The survivors were uncommonly enthusiastic about opposing him and the rest of the treacherous forces thereafter; they bogged them down for months.
* Horus Heresy in the entire setting, after fencing a primarch to a standstill with an unpowered sabre, and wounding him.
* Horus Heresy isn't really the best example as GW proper does not produce any Heresy-era miniatures (their sister company Forgeworld announced a series of Horus Heresy campaign books and models, but the book series had been going for years before). Many BL books heavily feature special characters from the games and sometimes you can catch hints of new models in books released shortly before a new codex/armybook that feature the army in question.
* Horus Heresy Konrad Curze and Rogal Dorn both get a strangely similar card reading, featuring The Moon, The Martyr and the Monster (this Tarot has a number of unconventional cards), as well as The Emperor and The Dark King (which both take to mean The Emperor and Curze respectively) and finishing with the obligatory Death card for Curze (who believes this means he will die by the Emperor's hand) and the titular Lightning Tower for Dorne - achievement at a high price. For the reader who knows the outcome of these stories, several obvious meanings present themselves.
* Horus Heresy novels, Eidolon of the Emperor's children wields a big-ass hammer.
* Horus Heresy novels have implied that there's more at work in the augmentation process than "just" super science. It's been hinted that a bit of the Emperor's own psychic power is passed on through the gene-seed, and without it the augmentation would always fail. This is why Blanks, humans who negate psychic power, cannot be made into Astartes.
* Horus Heresy novels, he's killed one Primarch, came within inches of killing a second (admittedly one on his side), and is ultimately going to mortally wound a third. Any Traitor Primarch could qualify if the loyalist heroes they've butchered get counted, but Fulgrim goes the extra mile by being the one with the most Primarch blood on his hands.
* Horus Heresy novels. It's implied that this is because the gene-seed may contain a fragment of its progenitor the Emperor's psychic power which is crucial to the transformation's success. Thus the blanks are incompatible with the gene-seed.
* Horus Heresy novels — unsurprisingly, considering the fact that the heresy was a tale of the corruption of the Imperium.
* Horus Heresy novels place the Legion in a new light. Leman Russ frequently puts on the persona of being the rough barbarian king. This isn't just a convenient affectation for political purposes; it's also a coping mechanism for the things that he has to do. In a similar way, the Space Wolves socially act like ancient Norsemen but plan their attacks with complete and total precision.
* Horus Heresy novels. Somewhat different in that rather than scheming to kill Warmaster Horus, Erebus schemes to corrupt him.

* Horus Heresy, Numeon's companions gradually start to use his "Vulkan Lives" catchphrase/prayer, to the extent that at one point, you'd think it became Salamanders' new warcry.
* Horus Heresy on life support, and started ten thousand years of the worst regime imaginable as mankind slowly shudders its way towards extinction.
* Horus Heresy, rapid decompression, immolation, crushing, starvation, impaling, fork to the chest, suffocation, orbital drop, beheading, getting shot (multiple times), stabbing (multiple times), magic spear to the heart and finally getting thrown into a volcano. Nothing worked.
* Horus Heresy records do recognize it as the first common name the planet was referred to by ancient humans before first political unification.
* Horus Heresy series, all myths are considered false by the Imperium, and while the warp is known to be dangerous, daemons are not known to exist. Key figures in the Imperium are granted the secret knowledge that the warp sometimes spits out unintelligent energies that look like creatures and can do bad things. Not even Horus knew about the Chaos Gods, let alone that daemons could work together or even think. This kind of caused problems.
* Horus Heresy series, but a few battles stand out in particular for the sheer scale and epicness (and most have suitably epic names to boot);
* Horus Heresy series, the Emperor repeatedly and vehemently denies any godhood. This trope gets inverted, however, because half the stuff he does SEEMS like it should take a god to accomplish, so no matter how much he denies it, the "true believers" just say "only a true god would deny his divinity while also demonstrating it."
* Horus Heresy, Temeter, seeing Horus's treacherous attack on the Space Marines on planet, refuses to get into the bunkers: "My men first." Since not all of them can make it, he dies with them.
* Horus Heresy. The captain's sole reaction is to correct him: it's not mutiny, it's barratry because it's the captain doing it.
* Horus Heresy, their method of atonement is to hunt down these Fallen Angels and "redeem" them by torturing them to death, and it's hinted that perhaps the original Dark Angels were traitors themselves who were sitting out the Horus Heresy until a winner emerged.
* Horus Heresy: The pre-Heresy Imperium is often this, building a massive interstellar empire in only two centuries, often by wiping out less advanced alien cultures and more primitive human offshoots that had been cut off for millennia.
* Horus Heresy. The protagonist notes that this is happening at an alarming rate all over the young Imperium, due to the cataclysmic event of Old Night and the increasing dominance of monolithic bureaucracy. The organization he set up is intended to counter this very trope. It isn't working too well; another character mentions that it must be working because they have managed to recover copies of all three of Shackspire's plays.
* Horus Heresy, the Raven Guard ship carrying the survivors of the Drop Site Massacre slowly crawls its way out of the Isstvan system under minimal power, hoping to obscure its EM signature against the background radiation of the system.
* Horus Heresy, the Word Bearer Xenut Sul lets himself be captured by the Ultramarines and taken to their Fortress of Hera so that he can assassinate another prisoner, the renegade Word Bearer Barthusa Narek, and steal the fulgurite, a weapon capable of killing primarchs. He successfully breaks out and goes on a murderous rampage through the Fortress dungeons, but is killed before he can achieve either objective.
* Horus Heresy to wait and see which side won. The truth is more complicated, but it's one of many things that have raised suspicions about the Chapter's motives.
* Horus Heresy traitor legions. Out of hundreds of thousands of loyalist legionaries, only a few thousand escaped the Drop Site Massacre.
* Horus Heresy universe, we know that Perturabo will take them directly to Horus.
* Horus Heresy." Unlike other examples, it's not detailed if these were actual clones or if they simply accelerated the traditional Space Marine "recruitment" process. Nonetheless, these modifications were so extensive that it managed to

affect the geneseed of subsequent generations, causing them to lose some of the superhuman organs the geneseed was suppose to provide.
* Horus Heresy, when Curze is on the loose in the Temple of Hera, the entire forces at nearby Residence sets out to hunt him down. One of the members of the strike force, Gantula, wonders aloud whether Curze is a predator, using a wolf as his example. Then this happens:
* Horus Heresy when Fulgrim presents him with the severed head of Ferrus Manus.
* Horus Heresy, when Loken is distressed by going up against rebels, their own people, rather than outsiders and worries about other rebellions, his friends intimidate they might report him for treason, and laugh at his reactions because he's so straight up and down.
* Horus Heresy, where Guilliman calls out his brother Alpharius on his conquests of several worlds, citing his own record as a model. Because Guilliman never explained why he was showing this to Alpharius (he was angry over how Alpharius' tactics caused enormous unrest on the worlds the Alpha Legion captured that often lasted for months after a conquest), Alpharius thought that Guilliman was simply rubbing his victories in his brother's face, which was a contributing factor to the Alpha Legion falling to Chaos.
* Horus Heresy (which split up the old Legions into multiple chapters) that would reform the Imperial Fists Legion in times of crisis to protect the Imperium. As the decree was still active by the time Koorland died, the gathered successor chapters deemed that, for the moment, they were all Imperial Fists and so even if the last actual Imperial Fists Marine died, the chapter technically did not. Several members of each successor chapter then decided to take on the livery of the original Imperial Fists, effectively "reforming" the chapter before the decree was ended. The vast majority came from the Fists Exemplar chapter (a portion of said chapter, under the First Captain, Zerbryn, had lost contact with the Imperium during the war and was forced to ally with a Warband of the Iron Warriors traitor legion and all but one company of that force defected while said one company joined the Imperial Fists reform along with the remaining loyalists of their Chapter and all files regarding the Fists Exemplar were deleted from public record on orders of Maximus Thane, who himself went from being the Fists Exemplar Chapter Master to being Imperial Fists Chapter Master).
* Horus Heresy (who wants to command his own ship one day and betrays them to Typhon), to Horus himself.
* Horus himself admitted that he felt Sanguinius was a more appropriate choice for Warmaster. That is just how well-regarded Sanguinius was among his brothers.
* Horus himself carries a golden sword, forged for him by one of his battle brothers when he was made Warmaster.
* Horus Horus. He has good reasons to be mad even to this day, however.
* Horus is a very straight example. He doesn't seem to care for most of Primarchs who sided with him, calling them 'broken monsters' but he knows he's never going to beat the Emperor alone. Likewise, he offers extremely generous terms to the Mechanicus because he knows he can't fight Earth and Mars at the same time. Hell, despite his demonic corruption he doesn't even seem to particularly care that much about the gods of chaos. His death almost completely destroys his forces because he's apparently the only man in all of chaos to appreciate practical compromise rather than Revenge before reason...
* Horus Lupercal embodied the Emperor's ambition, and that ambition led him to ruin.
* Horus Lupercal's favored strategic approach, both before and after the Heresy, was raiding enemy headquarters to kill their leaders. It informed his decisions to attack Terra directly and to lure the Emperor aboard his flagship.
* Horus: Prince of the Sun despite there being a lot of war and destruction there is no visible bloodshed, a few notable examples include a wolf getting stabbed in the face with an axe, one is shot through the head with an arrow by one of the villagers, a giant fish is shot in the eye, and Hols slices the leader of the wolf pack in half with a giant sword.
* Horus: Prince of the Sun: Since Grunwald's powers are ice-based, flaming arrows

and bonfires contribute a lot in the final battle. The power of the sun is what wins it.
* Horus' successor as leader of his legion, Abaddon the Despoiler, is similarly disillusioned with his own Primarch, angry that he led the Traitor Legions to defeat during the Siege of Terra and failed to kill the Emperor. He renamed his legion from the Sons of Horus to the Black Legion to symbolically wipe his and their hands of Horus' very name, and after discovering Fabius Bile
* Horus the Black Flame Dragon Lv 8 can negate any spell cards activation, barring a few exceptions.
* Horus was the most favored of the Primarchs until the Chaos Gods tricked him into becoming their champion as he lay dying from treachery. The war he waged turned the Imperium into a dystopian nightmare of cosmic proportions, and it was exactly the future he wanted to avert.
* Hosea is captured by the Pinkertons and shot in cold blood in front of the gang during the failed Saint Denis bank robbery. Doubles a

* Hoshi and the Red City Circuit four years ago after almost getting beaten to death by riot cops and never came out. People will say almost anything in front of him, so he has all the latest news about the upper layers of the underworld.
* Hoshi and the Red City Circuit has RCPD inspector Cassandra Sorreno, who was Hoshi's primary sponsor before she was emancipated, and is now one of her closest allies.
* Hoshi and the Red City Circuit is beaten up in a hate crime, she tells her integration officer that she fell downstairs, as she knows she could be stripped of her freedoms if she shows any sign of weakness.
* Hoshi and the Red City Circuit memorized the names of all 4000 of Red City's original settlers when she was two.
* Hoshi and the Red City Circuit: On 26th century Cassiopeia Prime, "slop" means "to tell," with a similar connotation to "spill" or "dish."
* Hoshi and the Red City Circuit that allows her to spy through sensorcams undetected, and was able to parry his increasingly unsubtle attempts. Finally Hoshi was granted autonomy, quit codebreaking, and became a private detective, and Martin got her post, but he still holds a lot of resentment for her.
* Hoshi and the Red City Circuit that's visible outside their bodies to function. When Hoshi finds a drawer full of gears and motors, she compares it to someone in the twentieth century finding a drawer full of dildos and pictures of sodomy.
* Hoshi and the Red City Circuit, the planet Cassiopeia Prime has a greenish-blue sky during the daytime. At night, two moons are visible, silver Cepheus and red Phoenix.
* Hoshi and the Red City Circuit to masculinize her face and deepen her voice and bulky clothes to hide her curves.
* Hoshi and the Red City Circuit who had somehow escaped sterilization. Her parents were killed for their crime.
* Hoshi cusses T'Pol out in Vulcan in the pilot. T'Pol's response is something along the lines of "Very impressive, but I thought we were speaking English on this journey."
* Hoshi is only really in command of the civilian ships and whatever military units are left when the Galactica goes off on its final mission. There are still plenty of more senior officers but they are all going on the mission. His new rank will not become effective until they are all killed (very likely at that point). At this point the military rank structure is shot anyway and being competent and loyal

gets you the job.

* Hoshizora no Memoria, Mare was revealed to have been reborn as the daughter of You & Yume.
* Hoskins has a very high rank within InGen as head of security operations, which is not an inconsiderable leadership position given the sheer size of the company. As for being large, he's played by the 6 ft. 3.5 in. Vincent D'Onofrio.
* Hospice tells the utterly soul crushing tale of the doomed relationship between the narrator, a hospital worker, and the deeply troubled patient for whom he works as a home visitor. Suffice to say, things don't go well. An extraordinarily harrowing album about despair, pain and hopelessness, but through it all, love.
* Hospital Epilogue: The story ends with a character waking up in a hospital bed.
* Hospital Hottie: Doctors, medics, or nurses who are very attractive.
* Hospital Hottie goes to work as the school nurse, its said every boy in school injured themselves as an excuse to ogle her. Another time, when a girl wasn't wearing a bra during PE, all the schoolboys tried to grope her during Rugby.
* Hospital Hottie: In reality, hospital personnel dress for practicality.
* Hospital Hottie: The medical personnel are as helpful as they are attractive.
* Hospitalier, participated in the Great Siege of Malta, defending the island from the Ottomans.
* Hospitality for Heroes: A shopkeeper gives away something free to show gratitude.
* Hospital Massacre: A janitor is killed by having his head dunked in a sink that was randomly full of acid (or some kind of corrosive chemical).
* Hospital Paradiso: A seemingly perfect hospital or other workplace. Often rejected by a hero who wishes to focus on the downtrodden instead of the kind of people who can afford to get help there.
* Hospital Playlist despite not being able to sing very well, drinks a glass of raw eggs before the band plays, to lubricate her throat. It doesn't help her very much.
* Hospital Playlist: Ik-joon, a surgeon, gets his head stuck in a Darth Vader helmet because his small son was goofing around with some super glue. He goes to the ER, only to get pressed into service to perform an urgent liver transplant. Which he does, while wearing the Darth Vader helmet.

* Host Bob Barker announced the deaths of announcers Johnny Olson (in 1985, shortly after his death but before his last-aired episode) and Rod Roddy in October 2003. Both times, Barker remarked how much each announcer added to the show and that they would be missed.
* Host Brooke Burns once opened the show in the nude with a golf club saying, "Somebody has to get a hole in one or they might have to get naked!"
* Hostel. A scalpel is used to cut an outline onto the face, before the torturer uses the scalpel to pry away the top layer of skin. Then, using his hands, he slowly peels off the rest while the man being tortured screams in absolute agony, being alive afterwards while an audience of rich elites watch in enjoyment before the torturer places the skin on a mannequin head like it's an art piece. It's definitely one of the harder example to watch.
* Hostel-esque setting, starts ripping Foxxy's fingernails. When Foxxy has finished saying her comfort words, Clara actually has one of her fingers in the pliers.
* Hostel film. Played by Mexican-American Jay Hernandez, the character's Ambiguously Brown status goes unremarked-on until he is about to be tortured to death (by someone who's paid a lot of money to torture and kill an American): "Look at me! I'm not a fucking American!" But then the torturer is shown Paxton's U.S. passport...
* Hostel got absolutely slated by Czech and Slovakian critics and audiences, which is understandable given how the region is inaccurately portrayed in the film as a poverty-stricken, crime-ridden hellhole permanently stuck in the 1980s.
* Hostel has a backpacker hostel in Eastern Europe that is the front for a secret criminal organisation that allows wealthy international sadists to rape, torture, and murder the guests.
* Hostel is more like 60 minutes with jerks as it's only the very end that has any horror at all.
* Hostel loses a couple of fingers and later gets revenge by maiming the villain.
* Hostel Part II and instructs everyone to let him bleed out, several of the hunters can be heard chuckling.

* Hostile Takeover (Swann) in place over their homeworld, programmed to destroy anything that makes orbit.
* Hostile Takeover (Swann) seem to maintain these. We mostly see the Occisis Marines, who are devotedly Catholic and ethnically homogenous, like the planet of Occisis. A large division of the Marines are seconded to Klaus Dacham. Their commander, Captain Shane, plays a major role.
* Hostile Takeover (Swann) series, Communes based on an extreme cult of personality are called "hubbards" as an obvious reference.
* Hostile Takeover (Swann) that accelerates projectiles to half the speed of light. It is unique in the universe, not because no one else has the technology to build one, but because no planetary government would allow such a thing in orbit around their planet. Bakunin has no government, so when Proudhon Spaceport Corporation built it, no one bothered to stop them.
* Hostile Terraforming: Alien life invades and starts shaping the planet to suit their needs at the cost of the natives'.
* Hostile Terraforming: Making a planet suitable for aliens, but in the process making it unsuitable for the natives.
* Hostile Terraforming over the centuries since his victory, the Earth has become a Death World to humanity when they return after 20,000 years. The air itself is unbreathable. The plants — which are offshoots of Godzilla — have become hard enough to break a knife and with razor sharp leaves, and release metallic pollen that messes with radio communication and long-range sensors. That's not even getting into Flying-Type Servum — dragon-like creatures that are offshoots of Godzilla and can shred armored vehicles with their claws — let alone Godzilla himself. The planet has literally evolved to kill humans.
* Hostile Terraforming turned it into a massive forest in an attempt to keep anyone from doing anything useful with it, though this might have been done by a rogue Orokin to allow the Earth to recover after the rest had ruined it. Earth maps have massive trees winding through technological ruins. The Grineer are trying to poison the forest so that they can use the planet as an industrial base, while the primitive tribes of Ostron have adapted to it without too much trouble. There are also a few clear areas, such as the Plains of Eidolon.
* Hostile Waters Antaeus Riising: The aliens embark on a great xenoforming project of Earth itself, starting with Greenland. Given that they are, in part, living universal constructors, it becomes of vital importance to stop them.
* Hostile Waters: Antaeus Rising has your Battle Room interface glitch out during an early mission, making issuing commands harder. It's mostly meant to convince the player to try out the alternate method of issuing commands.
* Hostile Waters: Antaeus Rising, humanity in the future have put down their arms and achieved global peace, ushering in a new golden age. Then warmongers and corrupt corporations decide to take over the world. Unprepared and unarmed, the rest of humanity dig back into the museum and break out the retired nanotech warship Antaeus, which can manufacture a high tech army out of raw materials.
* Hostile Waters: Antaeus Rising makes an effort to play this as straight as possible while also subverting it. Antaeus Cruiser 00 is in remarkably good condition after spending 20 years on the ocean bed. It manages to surface and set sailing just fine despite the long rest. Thankfully, nothing essential got damaged too badly, so after a visit in a dry dock the ship is at (or at least, near) full operational capacity, though they are signs she never gets as good as new. 00's sister ship, 04 isn't as lucky. She doesn't wake from her nap on the ocean bed. They justify this through the use of advanced nanotechnology. Both 00 and 04 have creation engines on board with trillions of the little things, which would have repaired 04, too, if it had received the signal.
* Hostile Waters: Antaeus Rising of the old guard, seeking to tear down this system and reinstate scarcity so they can reclaim their old power and influence.
* Hostile Waters: Antaeus Rising that has re-surfaced and is planning to bring it

all down again.
* Hostile Waters: Antaeus Rising, the "alien" antagonists have a Disassembler cannon which fires nanites that are programmed to rip apart matter on a subatomic level. This avoids the usual grey goo problem of endless replication, as the nanites just run out of steam, while still producing similar destruction. It fires at a city and reduces it to mush. It's up to you to blow up the cooling radiators before it fires its third salvo and destroys Central, the world capital. Once you do that, the next shot blows it to hell and spreads disassemblers throughout their base.
* Hostile Waters: Antaeus Rising. They were said to the copies of the minds of dead soldiers in AI form. Though they could be duplicated you were not allowed to, because it had been found that if two copies of the same personality became aware of each other each would consider the other an impostor and they would fight to their destruction.
* Hostile Weather: Weather conditions are inconvenient or harmful vs. weather conditions are beneficial.
* Hostility on the Set: People involved in the production didn't get along well.
* Hostility on the Set: People involved with the production who didn't get along well.
* Hostility on the Set: Two or more actors clash with each other, or with the director.

* Hot-Blooded bodyguard when Tougo fails to show Teltina proper respect.
* Hot-Blooded boils, causing problems for the symbiotic clothing that drinks it.
* Hot-Blooded...but he was shown in one of the Nordic strips being cool in the beginning and almost losing it at the end.
* Hot-Blooded: Characters who go about their life with a fiery passion.
* Hot-Blooded fighter, which tends to clash with the philosophies of Airbending, the least offense-oriented style of the four) rather than this trope.
* Hot-Blooded. For instance, it is said that in common showers or public bathhouses

it's best not to bend down for soap when Georgians are around.
* Hot-Blooded Hashira, almost unusually cheery and upbeat no matter the situation, Kyojuro is energetic and prefers offense to defense. His Flame Breathing relies greatly upon the swordsman's mobility and is focused on swift dashes forward followed by a slash or a lunge to deliver a decisive blow.
* Hot-Blooded Hungary and her ex-husband-but-still-love-interest, the straightlaced and even more stern than Germany Austria.
* Hot-Blooded in her youth. Her wisdom and strong will are emphasized more than humility and kindness.
* Hot-Blooded is because she's the only one who can beat him in a fight.
* Hot-Blooded is ruthlessly firing at cops while letting himself show a little hate, and jumpiness when shots hit near him.
* Hot-Blooded: Mesopotamian goddess Inanna. Aside her devastating prowess in battle as a war goddess, and her habit riding into town on the back of a lion, she was also known for physically dragging men out of taverns to sate her, erm, appetites.
* Hot-Blooded Sideburns—hotblooded characters with big sideburns
* Hot-Blooded Steam Gunner (though he has the ability to equip heavy armor, something steam gunners can't do).
* Hot-Blooded temper results in Sionis developing more than a passing interest in him.
* Hot-Blooded, was enraged when Prince Rhaegar Targaryen abducted his sister Lyanna. Brandon marched into Kings Landing with a handful of men openly demanding the prince "come out and die." The Mad King did not take kindly to this threat, executing Brandon's noble entourage and all their fathers. Brandon himself died alongside his father in a cruel execution. The fallout from this was all out war and rebellion.
* Hot-Blooded, where a character is like this due to the passion in his or her heart.
* Hot-Blooded who frequently clashes with Scott. In the show, Alex is a friendly and easy-going person and he and Scott get along great.
* Hot-Blooded with severe issues and clings desperately to Nanako, whom she sees as the first real friend she's made in her whole life.
* hot blood inducing machine Gespenst Mk II S. Have her execute the Gespenst Kick, and she'll pretend the enemy is Arado and yells out "A-ra-do no.... BAAAAKKKAAA!!" and delivers a Megaton Kick to the enemy.

* Hot Bot as well as a clearly synthetic voice. Bardot starts to lose hers as she gains self-awareness and her own personality.
* Hot Bot, Benny takes Bardot to one called the Colonial Motel to hide her from the authorities. Limus pays for the room with his emergency credit card. Apparently the Colonial has this reputation because when the charges show up on his statement, Limus' father goes ballistic and wants to know if his wife has been going there behind his back.
* Hot Bot can detect arrousal in humans. During the television interview, Sophia lays her hand on Nigel's chest and tells him that his heart rate is elevated, and then adds that he is getting erect.
* Hot Bot has an advanced sex bot named Bardot (actually her model name) ordered for a senator and lost in delivery before being discovered by two teenage boys. The model is built to learn and form its own personality, and decides it wants more than to be someone else's toy.
* Hot Bot, Huffy and Nard work at a fried fish and doughnut outlet called Batter Up where they are required to wear baseball uniforms.
* Hot Bot, Huffy and Nard work at fried fish and doughnut shack called Batter Up, which is every bit as depressing as it sounds.
* Hot Bot is built to learn and form its own personality, and decides it wants more than to be someone else's toy; especially after the hero's kid sister exposes her to the Bible.
* Hot Bot, Limus and Leonard's parents come to the conclusion that they are in a

relationship.
* Hot Bot, Limus, Leonard and Bardot manage to to cut across in front of a freight train; leaving their pursuers stranded on the other side of the tracks.
* Hot Bot Sophia reaches out and places Nigel's hand on her breast. Nigel awkwardly comments on how pliant it feels.
* Hot Bot superhuman strength and the combat prowess to take down a dozen police and government agents?
* Hot Bot, the Hot Bots speak in a monotone with stiff speech patterns as well as a clearly synthetic voice. Bardot's voice become more human as she breaks free from her programming and develops her own personality.
* Hot Bot. Thrilled at the chance to finally have sex, Huffy and Nard go to great lengths to protect their newest discovery.
* Hot Bot: While chasing Huffy and Bardot into the airport, Agents Frazier and Koontz make the mistake of trying to charge their way past a security checkpoint. Flashing their credentials doesn't impress the security officers, and things go from bad to worse when the officers discover Frazier and Koontz are carrying guns. Huffy and Bardot get clean away, and a post-credits scene shows Frazier and Koontz still in the airport, being strip searched and with security preparing to do a cavity search.

* Hot Chip seems to be from the perspective of a couple who have (or had) nothing else keeping them together beyond some vague notion of love.)
* Hotchkiss (stapler): In Japan, they sold the first stapler. Now all staplers are called Hotchkiss (Hocchikisu), despite the demise of the manufacturer.
* Hotch's ex-wife Haley and their son Jack are put under protection when a serial killer targets them. It's mentioned off-hand at one point that they're being moved because Haley contacted her mother, but this still didn't enable the killer to find them.
* Hotch, stabbed multiple times, is not rescued by his teammates, but rather by the Reaper, who ambushed him, and who takes Hotch to hospital to makes sure that he survives to suffer.
* Hotch was also beaten in a fight by Foyet in "Nameless, Faceless" and tortured with multiple non-fatal stabbings.
* Hot Coffee Minigame: No need to call Freud — these characters are in fact making out or having sex.

* hot cross buns on sale during the first week of January and in some cases even Boxing Day (December 26), even in years where Easter occurs late.
* Hotdog and Pizza Pie - The fourth and fifth-generation Mitsubishi Lancers respectively, mainly used in the Philippines. Said nicknames are in reference to the cars' tailight designs, which bore a crude resemblance to a sausage on the fourth-gen Lancer and a slice of pizza on the succeeding model.
* Hot Dog Bush, former U.S. President George W. Bush gets expelled from the White House as punishment for failing his duties and desperate for money he sinks down to street vending hot dogs and burgers.
* HOTDOG is initially a fairly one-note character that gets removed very shortly after his initial appearance. Then he shows up again
* Hot Dog On A Stick, as opposed to publicity costume, ever. Better (or worse) yet, since HDoaS is an employee-owned company, it was voted in by the very people stuck wearing it! Just how terrible were the OTHER options?!
* Hotdog Storm whose title continues to confound gamers two decades later. The only thing within the game even approaching an explanation of the title is the image of the squadron's badge on the title screen, which features a prominent illustration of a hot dog.
* Hot Dog - The Movie: "Here are the rules for the Chinese Downhill - there are none!"
* Hot Dog Vendor dies at least once, with some characters dying multiple times an episode. If you live in Nevada, you WILL die.
* Hot Drink Cure: A sick, hoarse, injured, or hypothermic character is given a hot drink.
* Hot Drink Cure: Giving a sick, injured, hoarse, or hypothermic character a hot drink.
* Hot Drink Cure: Giving someone a hot drink to help them feel better.
* Hotel, a mystery/crime drama set in a California hotel, is primarily told from the perspective of detective John Lowe and his family as he investigates a series of murders that turn out to be the work of a serial killer. Other primary characters include the mysterious Countess, the literal Vamp owner of the hotel and her string of eerily similar lovers, hotel staff such as manager Iris and bartender Liz, longterm residents (not all of whom are alive) and a revolving door of guests (including several real-life serial killers).
* Hotel Artemis optic implant that lets her livestream her kills to her clients.
* Hotel Artemis that allows her clients to watch her kills, and mentions an extra...activity.
* Hotel Artemis when Everest throws a patient/guest out into the street and threatens him:
* Hotel Beau Séjour: Out of all the police interrogations depicted in the show, the only character to request a lawyer was Varderkerk, a notorious drug dealer. (He was innocent of the murder in question but wanted to conceal his drug business.)
* Hotel Beau Séjour: The main characters have important information for the police but won't be believed if they approach the police directly, so Charlie talks to a local man who falsely believes himself to be psychic, and implants the information while making him believe that it was a psychic vision and then convinces him to go to the police.
* Hotel Beau Séjour, the nearby horses start pawing at the spot where she was buried, alerting the farmers.
* Hotel Beau Séjour they feel guilty and explicitly asks them if they are hiding anything from her.
* Hotel blogger Emir and Stevie engage in flirty banter as she pretends to be a guest so she can talk up the motel. When Emir asks her to lunch, she confesses the truth before their drinks arrive.
* Hotel California is not only a concept album, it's an indictment of an industry and a lifestyle.
* Hotel Dusk: Room 215 allows the text to be sped up, as well as an optional new puzzle that expands upon the ending if you figure it out. The dialogue between Hyde

and Rachel also becomes noticeably flirtier, in contrast with their more sarcastic banter in the first playthrough.
* Hotel Dusk: Room 215 and others. Through the course of one night at Hotel Dusk, Kyle Hyde manages to "take out [all of their] garbage" with evidence, questioning, and occasional tough love, and give them the strength to keep working to resolve their problems. He doesn't even want to arrest the person he's looking for despite what he did, he just wants to ask him "why?".
* Hotel Dusk: Room 215, but flashbacks to various points of this decade is integral to the plot.
* Hotel Dusk: Room 215 does this stylistically, especially in the post-chapter summaries. The main character's a former NYPD looking for a friend who apparently betrayed him.
* Hotel Dusk: Room 215 has you fix the lights to a room, which requires that you turn on both switches required to allow the lights to turn on at the same time. This would be fine if it weren't that the touch screen works against you.
* Hotel Dusk: Room 215 improved on all of that, as well as providing more insight and development into the returning characters.
* Hotel Dusk: Room 215 involve Christmas time. The first game involves a quick plot detour to help Melissa celebrate the Christmas she missed. The second games play it a little more with Kyle dealing with his misgivings about the holiday, due to his father being murdered around that time when he was a kid.
* Hotel Dusk: Room 215, is about Kyle learning more about his dad and why he died.
* Hotel Dusk: Room 215, Kyle has a digital pager in 1979, back when pagers weren't generally in use outside of hospitals and fire departments due to their short range and bulk.
* Hotel Dusk: Room 215, Mila falls unconscious and Kyle has to perform this to save her.
* Hotel Dusk: Room 215 On the plus side, the European version does have the language options that would be expected of an American release (save for a few differences in regional variants of English, Spanish, and French that would be pedantic to complain about), and the DS is region-free, meaning that North Americans willing to pay somewhat more than usual can just import a copy.
* Hotel Dusk: Room 215, the body of Kyle's traitor partner, Bradley, isn't recovered after he was shot. Kyle naturally suspects that Bradley is still alive and goes looking for him.
* Hotel Dusk: Room 215 version of its own story to help you review how the story has gone so far.
* Hotel Dusk: Room 215: Very borderline. It's set just mere days before 1980.
* Hotel Dusk: Room 215. While the arrival of many of the guests is indeed sheer coincidence, several of them had or were arranged to arrive on that specific date.
* Hotel E: At the very end, a farmer rabbit in overalls has a carrot stuck up his rear, and lit on fire. Via cartoon logic, this inflates the rabbit, and the gas shot out propels him a ways.
* Hotel for Dogs, the protagonists have to housebreak all the dogs because they step in poop, so they make them two separate bathrooms for peeing and pooping. The villains end up falling down the dogs' poop toilet.
* Hotel Hell after the owner, who is also acting as the head chef, is unable to serve him a proper soft-boiled egg.
* Hotel Hell, Gordon Ramsay is pointing out to the innkeeper, Karan, the insanity of the idea of there being her personal wardrobe in his room. She says that the wardrobe is locked and he doesn't have to deal with it and he tells her "But you didn't tell me that when you took my money," getting him this response.
* Hotel Hell: Karan of the Town's Inn, after receiving a makeover, looks decades younger. Not only that, but she also becomes much more confident and assertive.
* Hotel Hell to get ready for Ramsay's arrival, but once again they are always embarrassed and shocked when it turns out that Ramsay notices dust everywhere.
* Hotel Hell when he's finally fixed the restaurant or hotel, but the owner(s) wish he could stay longer.
* Hotel. Humanity are precursors to the sentient computers, one (Louis) whose task

is to ensure that the DNA of all Earth life is protected and a second who's task is to protect the DNA of humans in order to colonize another world in hopes of saving the species. While the creations of Louis may or may not be independent sentient robots separate from itself the creation of his counterpart in space certainly are ... we're assholes who did nothing but cause Earth to die and died in the process ourselves leaving Earth an unlivable wasteland.
* Hotel is a deliberate case. The main character is a robotically controlled, self-repairing structure designed to preserve the genetic data of Earth's creatures for billions of years after global warming has destroyed everything.
* Hotel Mario and looking about 300 pounds overweight, leading to the nickname "Fat Mario". It has more memes:
* Hotel Mario; And that's not even mentioning the atrocious writing and voice-overs.
* Hotel Mario intro which goes, "Where there's smoke, they pinch back." This comes from a combination of two of the game's infamous lines: "Be careful, when you pinch Wendy's pennies, they pinch back," and, "Remember, where there's smoke..." which clearly shared cels for Mario, to the point that you could paste the "smoke" bit before the "pennies" bit and only the background would change. Mario would not move one iota.
* Hotel Mario reviewed it he said it would have been a better game if it had come out ten years earlier (it came out in 1994).
* Hotel Mario: "We gotta find The Princess! And YOU gotta help us! If you need instructions on how to get through the hotels, check out the Enclosed Instruction Book!"
* Hotel Mario, where Roy kidnaps Princess Peach, but he also saves her from falling from a tree and potentially breaking her neck.
* Hotel Moscow mob boss Balalaika wears a heavy wool Soviet Army greatcoat (which was designed to be worn in the subzero Russian winter) draped open over her shoulders on top of a low-cut dress business suit... in tropical Thailand. It exemplifies the trope.
* HOTEL. Okay, so it's a standard film noir dive owned by third-rate mobsters. Max, an undercover cop, has free reign to climb all the way to the penthouse suite; however, once his cover is blown, the fire escapes are locked and the hopeless elevators aren't buzzing to life anytime soon. Max has to blast his way back to the lobby. The hotel itself is falling apart, as the only customers are drug dealers and johns.
* Hotel on the Corner of Bitter and Sweet, the Chinese Henry Lee was played by a Filipino actor, while Keiko Okabe, who is obviously Japanese, was played by a Korean.
* Hotel on the Corner of Bitter and Sweet, the widowed Henry rediscovers his lost childhood friend Keiko in New York, herself now a widowed parent.
* Hotel Paradiso, inspired by the "bedroom farces" of French playwright Georges Feydeau, which were immensely popular during the period.
* Hotel Pennsylvania in New York City, which continues to use the number to this day.
* Hotel Rwanda a member of the Hutu militia menacingly drags his machete across the pavement of the road.
* Hotel Rwanda, and one of the children says "Please don't let them kill me. I promise I won't be Tutsi any more". She is killed anyway.
* Hotel Rwanda has the titular hotel act as a sanctuary for war refugees, with various amounts of success. The last leg of the story is centered on the refugee truck column heading out from the hotel and towards a safe zone.
* Hotel Rwanda on the events and points out historical liberties. The film's director Terry George is also there, but he's clearly comfortable just letting Rusesabagina tell his story and acts like more of an interviewer for the most part.
* Hotel Rwanda, two of the most prominent characters are a Canadian UN officer and an American reporter, both of whom were at least semi-fictional.
* Hotels/hostels that allow late night check-ins also often have the issue that the worker has to constantly switch between days since the newcomers are from

"yesterday", but the check-outs are from "today". Switching shifts can become equally confusing when someone asks if you can take over Saturday without being clear whether the night Friday-Saturday or Saturday-Sunday is meant.
* Hotel Transylvania 2 — she and Johnny have a son named Dennis, but Mavis looks more like his sister than his mom. This is because Mavis is a full-blooded vampire and she doesn't age as quickly as humans do. His father Johnny, who is a normal human, doesn't have this excuse.
* Hotel Transylvania 2, as well as websites such as Screen It!, misquoted it as "And remember, diabetes is the scariest monster of all". The actual line is "Slow down, Wuzzlelumplebum! The scariest monster of all is diabetes!".
* Hotel Transylvania 2: Drac, Mavis and Johnny does this at the Phantom of the Opera.
* Hotel Transylvania 2, Dracula attempts to teach his grandson how to fly by throwing him from a tower. His friends protest, but he claims that was how he was taught. It doesn't work and Dracula has to catch him.
* Hotel Transylvania 2 Dracula becomes the subject of a viral video when he was filmed at a summer camp for vampires, in an attempt to try to teach his grandson vampire skills. It doesn't take long for the remixes and parodies to become similarly popular.
* Hotel Transylvania 2: Dracula's daughter Mavis and her boyfriend Johnny get married and have a seemingly human son. Drac wants to train Dennis to become a vampire.
* Hotel Transylvania 2, Dracula spits his drink (which looks like blood) in shock all over Linda when he hears that Mavis invited his father Vlad to Dennis's fifth birthday.
* Hotel Transylvania 2 has a similar logo, but with different monster sounds (they sound more like gurgling).
* Hotel Transylvania 2 has the characters seen dancing as they resume Dennis' birthday party.
* Hotel Transylvania 2: Inverted with Dennis, his father, Johnathan, is a human while his mother, Mavis, is a vampire.
* Hotel Transylvania 2, Mavis craves ice cream with anchovies when she's pregnant with Dennis.
* Hotel Transylvania 2: Murray tries to show Dennis how to be a monster by summoning a sandstorm. He chants and spins around, and then hurts his back, only producing a small whorl that Dennis happily plays with.
* Hotel Transylvania 2, the voice of Vlad is provided by none other than prolific comedian Dieter Hallervorden.
* Hotel Transylvania 2, this happens to Frank, who unfortunately has a deep fear of fire that causes him to freak out and rampage, resulting in him smashing through a camp and spreading the flames to the buildings.
* Hotel Transylvania 2: Vlad pulls out his false fangs, to the disgust of his family, who ask him to put them back in.
* Hotel Transylvania 3: Summer Vacation, Drac falls in love with Ericka who is a Van Helsing. While at first she wants to kill him and the other monsters on the cruise ship, she too falls in love with him.
* Hotel Transylvania 3: Summer Vacation: Drac hears that he can get a date over the Internet and attempts to ask his smartphone to set him up on a date, but the phone keeps misunderstanding his instructions.
* Hotel Transylvania 3: Summer Vacation: Dracula, his family, and his friends go on a monster cruise.
* Hotel Transylvania 3: Summer Vacation, Eunice Frankenstein asks her husband to rub moon screen on her back to prevent moonburn.
* Hotel Transylvania 3: Summer Vacation. Frankenlady is, for the most part, conventionally attractive. It's not her face but rather her huge, hulking right arm that scares off Drac.
* Hotel Transylvania 3: Summer Vacation, Mavis gets the idea to book the cruise for the vacation after being unable to click away from a television commercial for it. Given that it's unlike Erica and Abraham would have wanted to leave their plot to

chance, it seems very possible they deliberately engineered it this way.
* Hotel Transylvania 3: Summer Vacation, the main cast board Gremlin Air, where the crew is made up of gremlins that are dismantling the very plane they are supposed to fly.
* Hotel Transylvania 3: Summer Vacation, this is done to the audience - after everyone leaves Hotel Transylvania for the vacation, we are shown a sleek aircraft labeled "Modern Airlines" in the sky, but then pan to a bright green aircraft labeled "Gremlin Airlines" which is literally falling apart around the passengers as they fly.
* Hotel Transylvania 3: Summer Vacation, Tinkles angrily barks nonstop at the presence of Abraham Van Helsing.
* Hotel Transylvania 3: Summer Vacation who have dedicated themselves to eradicate monsters everywhere, with Dracula himself being their #1 target. In the case of Abe himself, Dracula evades and thwarts all of his attempts on his life to an almost absurd degree. Subverted with Drac and Abraham's great, great granddaughter Ericka as he had absolutely no idea that they were trying to kill him and just happened to waltz around the traps incidentally.
* Hotel Transylvania 3: Summer Vacation with shipwrecks piled up in the middle.
* Hotel Transylvania 3, the film abruptly cuts to the closing credits.
* Hotel Transylvania: A harmless (and very cute) version of this happen during the prologue — while Dracula is overseeing the plans for the movie's titular hotel, a blob of saliva splatters onto the blueprints. When Drac and his contractor look up, it turns out that the drool came his (then-young) daughter, Mavis, who happens to be playing on the ceiling.
* Hotel Transylvania crazy" instead of "batshit crazy", and Mavis repeatedly says "Holy rabies!" instead of a stronger interjection.
* Hotel Transylvania directed the film. Many people were not interested in the film itself and just wanted to see it because they thought it would help his career if they did.
* Hotel Transylvania, Dracula and Johnny are lost in the secret tunnels, and walk in on a skeleton woman taking a shower. Drac is quick to apologize, and the skeleton woman's husband asks "What is wrong with you people?", as Johnny had stuck his hand in her ribcage, earlier.
* Hotel Transylvania, Dracula tries to do this on Johnny and fails due to Johnny's contact lenses blocking the effect.
* Hotel Transylvania, Frank pulls a practical joke on Murray the Mummy by standing behind him and farting, leading to frantic denials from the latter.
* Hotel Transylvania goes to extreme lengths to keep his daughter safe. He even built an entire village and dressed all his zombie employees up as townsfolk in order to convince her that humans were evil. He also insists on taking an active role in every aspect of running the hotel. He even corrects his friends when they call him "Captain Control Freak" by telling them that it's "COUNT Control Freak".
* Hotel Transylvania has stitches all over his body. These apparently don't hold well, as he mails his disassembled parts to the Hotel, and falls apart after an extra-high dive into the pool.
* Hotel Transylvania have their families, most notably Dracula and the Wolf Man.
* Hotel Transylvania is also becoming this with a number of sequels and spinoffs in development.
* Hotel Transylvania: Johnny sets off a chicken fight in the pool slash moat of the castle slash hotel. Frankenstein tries a super high dive off the tongue of a sea monster and it ends in a hella belly flop. Johnny tries the same thing until Dracula uses a gelatinous cube to arrest his fall.
* Hotel Transylvania — A series of CGI animated films. Three movies and a television cartoon since 2012.
* Hotel Transylvania: Murray, a fat, good-natured mummy with an American accent and Cee Lo Green's singing abilities (including autotuning), is one of the main characters.
* Hotel Transylvania: One of the main characters is a male werewolf named Wayne.
* Hotel Transylvania's singing abilities (including autotuning). His wife is also a

mummy, a tall, slender one with traditional Ancient Egyptian headgear.
* Hotel Transylvania status, Drac is extremely doting and overprotective of her. Likewise, Drac loves his daughter immensely, with nearly all of his actions in the movie being driven by his desire to see her happy and keep her safe. The song he sings to her when she's little is all about her Daddy's Girl status and is titled "Daddy's Girl" to that effect.
* Hotel Transylvania that he couldn't have possibly known what Griffin's hair looks like. After a cut, we see other monsters getting annoyed.
* Hotel Transylvania, the cabby for the hotel turns out to be a monster that uses a greenish, detachable jack o'lantern instead of an actual head, driving a motorized carriage instead of a horse.
* Hotel Transylvania, the entire world has come to acknowledge and accept monsters, even thinking of them as celebrities.
* Hotel Transylvania. The main characters are Dracula and his daughter; their friends and guests include a mummy, a werewolf, Frankenstein, witches, an invisible man, a blob, and more. Justified by the title setting being, well, a hotel for monsters.
* Hotel Transylvania: The Series episode "Creepover Party" has Mavis being visited by two members of her girl scout troop who were both werewolves. They power down into their human forms, which poses a problem because the hotel has a strict "no humans" policy.
* Hotel Transylvania: The Series films that focuses on Mavis and her monster friends.
* Hotel Transylvania: Transformania is set to be released in October 2021.
* Hotel Transylvania, when the letters of the logo come together, monster grunts and roars play in the background.
* Hotel Transylvania, when the monsters are at an annual Monster Festival, one of them asks them to prove that the Dracula they're with is the real deal. Dracula then hypnotizes him to smash his mug against his forehead. He casually accepts this as proof.
* Hotel Transylvania. Winnie is a Werewolf pup and, until the sequels, is the only girl among her 300 brothers.
* Hot Foots are a kind of fire-based enemy resembling a living flame, found in later fortresses. They normally wait in candles, but when one of the brothers comes close the flame will hop off the candle, sprout legs and try to run into the brother in question to damage him, standing still if the player turns to look at it.
* Hot Fun and Cold Fun among them. Soylent has even been used as one type of food as homage, as well as fitting nicely with the colour-coded security clearances. (Soylent Red, Orange, Yellow, etc.) There is no real quality-control process, however, or at least none that hasn't been compromised by cost-cutting technicians; the number of flavor varieties available to the player, meanwhile, depends on his security clearance.
* Hot Fuzz, a bullet shatters a jar of pasta sauce, showering it on one of the Andies' face. The other Andy shouts in despair, thinking the aforementioned Andy has been hit and is bleeding.
* Hot Fuzz, a journalist asks for Nicholas' opinion, to which he replies in the most emotionless and unenthusiastic voice ever "...highly enjoyable."
* Hot Fuzz, all of the characters have trade or occupation-related surnames (Paver, Reaper, Draper, Butterman, Messenger, and, yes, Angel). These names tend to fit with the character's current profession. Simon Pegg has stated that the use of old-fashioned trade-related names was to serve as an indication of how insular, endogamous and xenophobic Sandford had become. There are no Patels in Sandford, because anyone named Patel who tried to move there would be encouraged to seek his/her fortunes elsewhere.
* Hot Fuzz and some flashbacks early on). Nicholas is sent to Sanford in the opening scene and arrives there late at night. The next evening, he's invited to an NWA meeting where Joyce mentions that a local woman has given birth to twins. The night before the climactic shootout is established as being only a few days later,

when Joyce mentions that same woman has named her twins and scheduled their christening.
* Hot Fuzz. Angel and Joyce shout "fascist" and "hag" at each other, with their mutual loathing seemingly coming from nowhere - before it's revealed they're just solving a crossword.
* Hot Fuzz. A particularly long one occurs at the end due to the huge number of suspects, each of the antagonists in the sorry shape the climax left them in.
* Hot Fuzz are the incompetent boobs. Doubly averted when, in the big climactic fight, the detectives prove that they're just as competent as the next man if you load them up and give them riot gear.
* Hot Fuzz arguably counts, as she's your run o' the mill cute blond but has a 'very distinctive laugh'. Only natural as she is played by Lucy Punch, who tends to go for those types of characters anyway.
* Hot Fuzz: Both Frank Butterman and Tom Weaver are too wrapped in their newspapers to notice Sgt. Nicholas Angel walking right by them.
* Hot Fuzz. Both names have the same origin: they both mean "wagon maker"
* Hot Fuzz, by the same creative team, Nicholas Angel breaks a glass storefront and jumps through it to pursue a killer. Keep an eye on the writing on the glass panes. He throws his baton through the window, then jumps through the door.
* Hot Fuzz commentary, director Edgar Wright expresses his surprise that Timothy Dalton, even at sixty, can still cause "ladyquakes."
* Hot Fuzz commentary has Edward Woodward talking about using "Baskets!" on a show he used to work on back in the day, and then continuing to use it through the rest of the commentary.
* Hot Fuzz: every death in this film is done in a weirdly twisted, but comical way.
* Hot Fuzz fire two pistols at once, he doesn't hit anything until he puts one away and takes an aimed shot with the other gun.
* Hot Fuzz: Frank Butterman is revealed to be the mastermind behind the NWA, after being the jovial mentor to Sergeant Angel during his time in Sandford.
* Hot Fuzz gets shot and is caught in an explosion. The movie tries to make you think he's dead, but it's really his mother's grave.
* Hot Fuzz gives Angel after he says "Yes I can, I'm the Chief Inspector" looks like he's really enjoying transferring Angel out.
* Hot Fuzz has several commentaries, including one of two actual police officers from Wells, Somerset (where it was filmed).
* Hot Fuzz has this as his defining trait. It's why his ex-girlfriend Janine broke up with him.
* Hot Fuzz. He came up with a complicated theory about why they were killed that had nothing to do with those offhand comments, and he found the killers before he was told their motive.
* Hot Fuzz. He eventually mellows out a little after spending time with the comparatively more relaxed cops there.
* Hot Fuzz in a little convenience store. Inspired, he buys a pair of cheap sunglasses that make him look disproportionately badass. He later hands off a spare pair to his partner when they meet up.
* Hot Fuzz: in an early scene with Angel giving a presentation to some school kids, he asks for questions. The only hand raised is that of his partner, who asks, "Is it true that there is a place in a man's head that, if you shoot it, it will blow up?" Our hero is not amused. DVD extra Fuzz Facts states that they were unable to find such a place on the human head.
* Hot Fuzz included a feature entitled "Hot Funk: The TV Version", which takes some scenes from the movie that involve swearing and replacing them with typical TV edit dubs, leading to lines such as "What the funk?!" and "Aw, peas and rice!"
* Hot Fuzz includes a special feature called the Fuzz-o-Meter, which pops up bits of trivia about the film. Much of the trivia includes bits and pieces about the story or characters that had been written into the script, but never made it to film. One of the 'facts' claims that the film was inspired by true events, only they involved zombies.
* Hot Fuzz is this for all but one character, who had the misfortune of having the

bomb sitting in his lap.
* Hot Fuzz lets us know that Sgt. Angel is far and away the most effective officer in London. Subverted in that this only makes his coworkers annoyed and gets him reassigned to a village out in the boondocks, at which point crime back in his original precinct immediately spikes upward.
* Hot Fuzz mother and sister are one and the same. Implicitly, this is why Lurch is mentally handicapped.
* Hot Fuzz, neither of which does anything to improve his personality (which, while not entirely humorless, was already pretty damned abrasive).
* Hot Fuzz, Nicholas Angel shoots a bear trap hanging from a wall to make it fall on a bad guy's head.
* Hot Fuzz, Nicholas covers a child bystander's eyes when one of the bad guys impales himself on a model building.
* Hot Fuzz. Not the film itself, but the DVD extra features, which includes a mini-doc of Simon Pegg, Nick Frost, and Edgar Wright on tour in the USA premiering the film. At one point, Frost has a birthday, and a fan gifts him a cake. Since he can't easily take it with him on a flight, he flushes it down the toilet in his hotel room.
* Hot Fuzz. Okay, we all know how this goes by now. So say it with me. On the count of three. One, two, three:
* Hot Fuzz one of the teens Sergeant Angel arrests for being drunk and disorderly is wearing a traffic cone on his head.
* Hot Fuzz parodies the hell out of this in one scene where some form of eyewear is removed for basically every line. That one scene is the peak of it, but most of the times the detectives speak they remove some eyewear. However, for that scene, the detectives had multiple lines- so they were wearing riot helmets as well as their sunglasses, just for the sake of drama.
* Hot Fuzz plays with Buddy Cop movie tropes and clichés, and it's awesome.
* Hot Fuzz redubbed most of his lines from the second half of the movie to make his voice sound more like an 80s action hero.
* Hot Fuzz Series of murders made to look like accidents → part of a decades-old conspiracy that mercilessly executes anyone who would jeopardize the reputation that Sandford, Gloucestershire has for serenity and cleanliness. "Have you ever wondered why the murder rate in this town is so low, and yet the accident rate is so high?"
* Hot Fuzz: Sgt Angel eventually gets tired of everyone in the village saying that what they're doing is for "The greater good":
* Hot Fuzz, Simon Pegg and Nick Frost almost kiss repeatedly before eventually pretending to snog passionately in the graveyard scene.
* Hot Fuzz so good at his job he gets reassigned to a small town because he was making his co-workers inadequate, while the plot is him investigating a series of gruesome murders that nobody else except him cares about.
* Hot Fuzz, spends most of his onscreen time asleep, except for about a minute during the final confrontation.
* Hot Fuzz starts to think that he's going insane after everyone in the village ignores the increasing amount of evidence that there is a murderer on the loose in the village.
* Hot Fuzz thug who serves as the villain's muscle and whose grandfather was also his father.
* Hot Fuzz: Timothy Dalton's eyes, for a split second, stare right down the barrel of the camera. Director Edgar Wright apparently found it amusing enough to leave in the finished film, also timing the faint sound of an old-style cash register in the background to coincide with it.
* Hot Fuzz when Danny describes to Nicholas Eve Draper's sexual history.
* Hot Fuzz, when Nicholas Angel gets an idea towards the end of the movie, he says 'Idea!' in a dramatic voice.
* Hot Fuzz, when Nick Angel accuses Simon Skinner. The trope is set up perfectly and Angel even triumphantly announces his evidence of Skinner's Just One Little Mistake - a cut on his leg sustained in a chase. Except the cut isn't there, and

Skinner smugly hands over evidence that he was in his grocery store all day.
* "Hot Garbage"'s message seems to be that never taking out the trash and letting it pile up is an acceptable thing to do.
* Hot Gimmick: Azusa does this to Hatsumi, making her fall in love with him before trying to have his friends gang rape her out of revenge.
* Hot Gimmick has the Azusa, Ryoki, and Hatsumi love triangle. Between Ryoki and Azusa, poor Hatsumi is like some kind of Yandere-magnet.
* Hot Gimmick love interest Ryuuki because maybe she can change him once they're together. (This is true only for the manga: In the novelization, Hatsumi considers this trope, realizes it's bull, and goes for a slightly less awful love interest instead: Shinogu.)
* Hot Gimmick turns Hatsumi (and every other female character) into a Valley Girl even though she is a quiet, unconfident and rather poor Japanese teenager (seeing middle-aged conservative Japanese housewives saying "oh my god, Asuza is, like, such a hottie" is very, very jarring).
* Hot Gimmick was already established as a Jerkass due to the cruel and abusive way he treats his girlfriend/slave Hatsumi. It seems like he's not so bad when he saves Hatsumi from being raped but his qualifying status is reinforced when he immediately forces a kiss on her afterward and habitually sexually assaults her.
* Hot Goblin Girl Nitrine and her archfoe Halfling Sorceress Morgana satisfy our
* Hot God as well, but here he's a bald, short, stout man with dark glasses.
* Hot Guy, Ugly Wife: A man considered attractive is married to a woman considered unattractive.
* Hot Guy, Ugly Wife: An attractive man marries an unattractive woman.
* Hot Guy, Ugly Wife episode. A mousy, dowdy-looking woman was so jealous of the attention other women would pay her devoted and handsome husband, that she convinced him to seduce and lure women into their plot. She would go as far as to pretend to be one of the victims, and play up a rescue only to dash their hopes, by pulling back her hands while her husband would drag them to their deaths, all so she could see the look of terror in their eyes, while her husband would kill them with a loving gaze fixated on his wife.
* Hot Gypsy Woman, as her relationship with the Gentleman Caller has him out-Vamping her; their offspring is supposed to lead to the destruction of Gabrielle's people.
* Hot Gypsy Woman: Romani women are stereotyped as being beautiful in a very sensual way.
* Hot Gypsy Woman when you consider that Gypsies were mistaken as Egyptians by medieval Europeans.
* Hot Head: A cluster of Von Neumann machines mining the Jupiter system go cancerous. The result is the Massive: it's growing exponentially and heading for the richer pickings of Earth. This is a classic Dumb Object: a gigantic mouth on the move. Ironically it's also anything but dumb: behind the mouth is a lump of computing substrate the size of a small moon. It's got so much virtual reality real-estate that the real world it is gobbling up is simply being overlooked.
* Hot Head by Simon Ings features The Massive, a computational device of astronomic size better suited for modelling civilizations than people. Characters who enter become... mythic. Godlike. The Massive is rabidly assimilating — it is a mouth attached to a brain, and the mouth is a cancerous clot of Von Neumann machines. Left to its own devices, it would consume the solar system; it may offer transcendence, but not choice.
* Hotheaded Amira, and ifrit, is understandably represented by the color red.
* Hotheaded, headstrong waterbender Korra and serious, collected firebender Mako, who fit several of the dynamics listed:
* Hothead face seems to be based on an angry Arnold Schwartzenegger parody in terms of voice and demeanor.
* Hothead Paisan: Homicidal Lesbian Terrorist story had Hothead shove a telephone pole up a random man's ass as retribution towards women getting raped and her belief that all men had claimed that women liked getting raped.
* Hoth is an utterly unremarkable, nigh-uninhabitable snowball of a planet whose

sole significance was a major Rebel base built there specifically
* Hoth is like Tatooine, except cold and worse. If the subarctic temperatures and howling blizzards won't do you in, the wampa ice beasts will.
* Hoth, one of the last permanent bases that the Rebel Alliance had before the Empire discovered it, necessitating a complete evacuation.
* Hothouse: A large number of plants have adapted their tendrils and roots into workable tentacle equivalents, and use them to great effect in hunting each other and the few remaining animals. Particularly notable is the killerwillow, a coastal plant that lives and moves entirely underground and uses its root system like the tentacles of a monstrous octopus.
* Hothouse: In the distant future, after the Earth has become tidally locked with the Sun, millions of years of intense humidity and heat have allowed plant life to completely dominate the world. The greatest of all these plants is a single, titanic banyan fig that covers the entire dayside surface of the Earth, forming an immense three-dimensional jungle. Scattered human tribes live at various levels within the volume of the canopy, avoiding the dangers of the dark, rot-shrouded Floor and the sunlit Tips where the most active predators flourish, alongside hardy eusocial insects and an endless variety of carnivorous plants.
* Hothouse: In the distant future of the Earth, there are very few animal species left, and plants have become mobile and intelligent to varying degrees. As many plants have long since evolved equivalents to nervous and muscular systems of animals, these are more often than not entirely capable of ensnaring and devouring humans, the other surviving animals, and each other. In many cases, they're entirely mobile beings that can actively stalk and subdue their prey. In the ocean, the algae are no less mobile or hungry. Many do not feed on flesh or other plants directly, instead using their prey's rotting tissues fertilize their roots, but others are carnivorous in the more direct sense. The future humans — themselves tiny and green-skinned — are on the constant lookout for predatory plants that want to devour them.
* Hothouse: Numerous offshoots of humanity exist in the distant future, at varying levels of intelligence and adaptation to their often hostile environments.
* Hothouse: The brains of the future humans contain records of the entire human species' history, stretching back to the present day and far into prehistory. These is normally buried too deep for them to recollect, although a species of symbiotic brain-fungus can access them if it bonds with a human. This ends up putting the fungus in the position of being the first creatures in a billion years to live in more than just the moment, granting it recollection of the past and a sense of perspective and time that no other creature in the world-jungle has.
* Hothouse: The Moon was terraformed, largely by accident, by immense plants called traversers. These originally wove their webs towards the Moon to have somewhere to anchor lines with which to bask in solar radiation and away from their predators on Earth, and their migrations gradually carried over seeds and wisps of gas that slowly seeded the Moon with air and plant life.
* Hothouse: The morel and the Sodal Ye are genuinely and by a good margin the most intelligent, imaginative and well-informed characters in the story. They are also intensely arrogant and condescending, and make little secret of their contempt for other beings.
* Hothouse: The Sodal Ye is a sapient dolphin descendant. It has a good claim to being the most intelligent creature in a world where most sapient beings range from stolidly unimaginative to simply idiotic; as a consequence, it's also incredibly conceited and condescending.
* Hothouse: The surviving insects of the far future — tree-bees, plantants, tigerflies, and termights — have grown much larger and more fearsome than their forebears, matching the shrinking future humans until they both reach roughly the same sizes.
* Hothouse: They're not actual spiders, but traversers are plants roughly analogous to spiders in shape and capable of spinning a form of vegetable fiber. They're also each a mile in length when in the atmosphere and much larger in pressure-less space, and their webs are strong and extensive enough to connect the Earth and

Moon.
* Hot in Cleveland are this trope. While the ladies aren't crazy rich they are used to the much more upscale lifestyle of Hollywood. In the pilot episode, Melanie can't stop gushing about how the first guy she hooked up with is a plumber and all of the women talk about how they always wanted to date guys who would "actually know how to fix stuff."
* Hot in Cleveland certainly isn't a big A-lister or anything, but in promos, she acted like one, because the character she played was an egotistical and diva-ish former television star (much like Malick herself, and pretty much all of the cast members of this show).
* Hot in Cleveland features the gals crashing a funeral in order to obtain a rare copy of "Soap Opera Digest" which featured Victoria. Such things as climbing into the coffin, losing a ring, and believed the deceased was in fact murdered all occur.
* Hot in Cleveland has multiple romantic interests of her same age just in the first season.
* Hot in Cleveland has Victoria Chase, a largely washed-up soap actress who also starred in number of Lifetime Original Movies, all of which have overly exaggerated titles, such as "Lady Storm Chaser", "Concrete Pillow", "The Princess and the Plumber" and "Soccer Mom Ninja."
* Hotin Cleveland in a trash bag-dress when she causes it to ride up in "Duct Soup".
* Hot in Cleveland Victoria dreams of the day that she's achieved enough fame that she can sell out for a boatload of money. She ends up doing a commercial for adult diapers. (They preserve the freshness of crotch!)
* Hot in Human Form: A nonhuman becomes attractive after shifting into human form.
* Hot in Human Form: A non-human character becomes human and is seen as very attractive in-universe.
* Hotis went on to become a recurring antagonist later in the campaign, as Rakshasas are vengeful and don't permanently die unless killed in the Nine Hells.
* Hot Lead and Cold Feet ends with him sinking in quicksand brought about by heavy rains. Don Knotts really did get swallowed up by quicksand on camera, and it took an hour to get him cleaned up after they pulled him out upon completion of the take.
* Hot Lead and Cold Feet know he knows I know he's here, but I know. So I got the edge!"
* Hot Librarian: An attractive librarian, an occupation associated with books.
* Hot Librarian, given she's a personification of an operating system.
* Hot Librarian Nodoka sometimes does this as well (usually to Haruna).
* Hotline Miami 2: Wrong Number by the killer within the film after making out with his girlfriend.
* Hotline Miami 2: Wrong Number - despite going up against armed criminals, they do that for the sake of violence, aimlessly improvising targets for their massacres on the go and quickly finding themselves doing favors for their friends after finding out there's not many people to kill.
* Hotline Miami 2: Wrong Number during one of the Miami Mutilator investigation scenes.
* Hotline Miami 2: Wrong Number is a detective working for the Miami Police. The first time you play as him? He goes to a shopping mall who's under siege by criminals, takes a shotgun from the trunk and slaughters them all.
* Hotline Miami 2: Wrong Number, right-clicking while Jake is using the Dallas mask causes him to whip out nunchucks and turn into a human buzzsaw that shreds any mooks he gets near to, plus greatly increases his speed. However, it has a long windup and cooldown time during which he's completely immobile.
* Hotline Miami 2: Wrong Number sees the Son and two underlings attacking a bank belonging to the Colombians.
* Hotline Miami 2: Wrong Number: The Colonel says that he's being promoted to Lieutenant General when he returns stateside. However, Lieutenant General is a three-star rank, and the rank after Colonel would be Brigadier General, a one-star

rank.
* Hotline Miami 2: Wrong Number, the protagonist Hammarin, is entitled to a toaster offered by his bank. He goes to the bank and kills everyone on his way to the toaster.
* Hotline Miami 2: Wrong Number, too. If he appears to a character who didn't appear in the previous game, it's as good as a spoiler: they're not going to survive.
* Hotline Miami 2: Wrong Number, where it doesn't matter who you consider the hero, because everyone dies.
* Hotline Miami 2: Wrong Number wields a bright orange chainsaw as her sole weapon, capable of ripping even the heftiest of enemies apart.
* Hotline Miami, a cop is seen vomiting outside the building when the detective shows up.
* Hotline Miami, a katana is one of the better melee weapons you can find, having both good reach and speed (damage being unimportant since everything dies in one hit).
* Hotline Miami, and as a result walking too fast causes the screen to go pale, static to take over the edges, the character to sway as he walks and screeching sounds to play exceedingly loudly. If you don't stop moving every now and again your character will be stunned completely for a second or two. To make matters worse, it's an unarmed stealth mission, something that doesn't happen anywhere else in the game.
* Hotline Miami and you're forced to walk through the carnage you just caused to leave the area.
* Hotline Miami begins with the crew jumping out of the crates Bain used to ship them to the Commissar's fortified tenement building.
* Hotline Miami has the Bodyguard, a blonde woman who attacks Jacket with a katana after Jacket has dispatched the panthers. Serves as the penultimate boss before the Father
* Hotline Miami is a little more on the action movie/psychological thriller side of things, but there's something to be said about the main character being a silent, masked killer that murders droves of criminals using a variety of sharp implements.
* Hotline Miami or thrown weapon, you need to confirm the kill by ground-and-pound or the enemy will just get back up. This doesn't apply to guns or melee weapons.
* Hotline Miami, served in the Hawaiian conflict as part of the Special Unit called Ghost Wolves alongside with Beard before becoming a hitman for the 50 Blessing terrorist organization attacking Russian Mob associated with Russo-American coalition.
* Hotline Miami shows this in the very first mission. Jacket will throw up after killing the homeless guy (this is probably his first kill, while in the game you have already killed other dudes, the timeline's a bit fuzzy.)
* Hotline Miami that are intentionally drawn to look "ugly" (for lack of a better word), adding to the surreal atmosphere of the game.
* Hotline Miami, the player is able to kill the two responsible if they want. Once they shoot one of them, the other simply flips the bird to the player.
* Hotline Miami, there is a locust mask called Carl. If equipped, the player starts out with a power drill that can be used for gory executions.
* Hotline Miami, the revolvers are most notable for their ability to pierce multiple enemies.
* Hotline Miami, which in itself is a Genre Throwback to the same thing) and is covered in the garish neon colors of the era.
* Hot Lips and Empty Arms is one of Loretta Swit's favorite episodes, because even though this was still fairly early in the show's run, it was already clear that Margaret had a lot of internal conflict, regarding her military career, her affair with Frank, and even her overall life in general.
* "Hotlips" Houlihan; an early Running Gag was that even while she was dating Frank Burns, she still had side projects going with various Generals. After she dumped Ferret-Face, she was briefly faithful to her husband, then after the divorce went back to making the rounds.

* hotly contested (and his role in Mann vs Machine even more so), he is considered an overall lesser pick in Medieval Mode because, like Engi, his main abilities (flanking and fire damage) are gone. He is slightly better than Engineer, seeing as he has more health and a number of his melee weapons have decent uses; the Sharpened Volcano Fragment sets people on fire with every swing, the Axtinguisher can crit people who are set on fire by a Huntsman-wielding Sniper, and the Backscratcher deals more damage and heals Pyro more from the small health kits everyone drops on death (and sometimes the Hot Hand if they're just messing around). Otherwise, Pyro has a history of questionable melee weapons, not a good start for a gamemode where they and arrows are your only means of attack.
* Hotmail may have been one of the first to use the Internet this way when they attached ads urging people to use their email service to every outgoing email. This model was appropriated by almost every other free, web-based email client, until Gmail came along and made the lack of such ads a selling point.
* Hot Money, and was only discovered because one of the perpetrators was busted for an entirely different offence).
* Hot Money, where a group of cleaning staff for the Bank Of England steal some of the old money that's about to be incinerated, by stuffing it in their underwear.
* Hotohori is initially mistaken for a woman due to his effeminate appearance.
* HOTOL (Horizontal Take Off Or Landing) project, cancelled in 1988 after development problems.
* Hot Ones: Each episode always ends with host Sean Evans inviting the guest to look into a camera and "tell everyone what you've got going on." Due to his vague wording, many guests don't understand that they're supposed to plug their product, forcing Evans to prompt them more overtly.
* Hot Ones is to feed guests a succession of spicy wings with increasingly difficult questions to go with them. In fact, a variation of the pictured Blair's Mega Death Sauce was the hottest sauce for seasons two and three.
* Hot Ones spicy. There have been a few episodes where the guest makes it through all 10 wings without hesitation, but a couple of instances stand out:
* Hot on His Own Trail: A stupid character follows his own footprints/trail thinking it's someone else's.
* Hotori and Tattsun pull one of these on Moriaki-sensei, the squarest man on Earth, in
* Hot Oven", Owen and Paige teases Molly about having Brendan over for dinner and embarrass her further by thinking about showing off their dance to welcome Brendan.
* Hot Oven", the Tillermans finally learns the truth about Bitsy thanks to Brendan, who reveals that she's his great aunt, and that she's plotting to buy Central Park.
* Hot Oven", when Owen tells Molly she should invite Brendan over for pizza night, Molly brings up that Owen's pizza can be challenging, then we flashback to Owen holding a slice of his pizza that falls apart.
* Hot Pepper Gaming Reviewers are either asked to drink whole shot glasses of the stuff, or to dunk an already spicy pepper in super hot sauce and then eat the result. The end results are as might be expected: mostly consisting of sobbing and swearing.
* Hot Pepper Gaming, tasking reviewers to drink shot glasses full of it before reviewing, or dunking an already spicy pepper in the stuff and eating that. Some reviewers make it through in one piece. Quite a few more are reduced to tears and profanity.
* Hot Pie. Arya sees through his attempts to lie. He does manage to grow out of this in Season 4, when he glibly dismisses the Starks as all traitors and denies any knowledge of them to Brienne and Podrick until he can be sure he can trust them.
* Hot Potato's only initial use is to melt ice blocks in the Frostbite Caves, though she also becomes capable of removing octopi in Big Wave Beach once leveled up enough.
* Hot Potato wrong. Having aired at Noon for its first thirteen weeks, the show ousted its unique three-of-a-kind contestant teams ("...and WE'RE telegram singers! ~") on April 23, 1984 in favor of solo players being paired with two celebrity

teammates. The trouble with this was that the celebrities were usually comic actors or comedians who took their wisecracks more seriously than they did the game. The show was canned ten weeks later.
* Hot Properties one of the girls suspects her boyfriend is a chubby chaser and decides to raid his porn stash to find out.
* Hot Pursuit 2010 allows Cops and Racers alike to shoot EMP blasts and drop spike strips at each other. Cops can even order helicopters to do the latter for them and call in roadblock units; Racers have Jammers that can interfere with police department equipment, preventing them from attacking, as well as Turbo boosts for extreme bursts of speed.
* Hot Pursuit, cop Cooper and drug lord wife Daniella barely escape when masked killers shoot up a mansion. Cooper calls for help and is met at a diner by cops Dixon and Hauser who said they were responding to her call. Cooper reflects on how she only put out the call 20 minutes earlier and to arrive here from the station so fast, Dixon and Hauser would have had to have been doing 180 miles an hour. She then sees their car's fuel gauge indicating they have only traveled about 30 miles which is where the mansion was. The clincher comes when Cooper sees Hauser has the same arm tattoo as one of the masked gunmen.
* Hot Pursuit involving police vehicles pursuing a criminal suspect on the road.
* hot. Ranma will generally attract whichever temperature water is the most troublesome at the moment (and since Ranma was born male, this usually translates to cold water and this Law).
* Hot reading, mentioned in the trope description, is a comparable trick but
* Hot Rod as Rod gets over himself to compliment Denise but then loses his nerve and tries to back out of it, and it backfires.
* Hotrod featured all-manual cars. Pressing space moved you up a gear. It rolled over after 4th whereupon you dropped to 1st and dropped your transmission. Most players never learned how to go down a gear in-game and were only able to either accelerate or slow down, stall out, and start over at 1st.
* Hot Rod has stuntman Rod Kimble. Though he may shrug off injuries and accidents that would otherwise kill or permanently cripple people and still be determined to save his step dad...very little actually goes right for him throughout the whole movie. You could probably count on one hand the number of times something does go right for him without a hitch on one hand.
* Hot Rod (Melvin Donner) was a bank robber, mob enforcer, and smuggler, before
* Hot Rod, only to be joined by a crowd of people who all start singing. The song grinds to a halt when a guy takes advantage of the distraction to rob a store, starting a riot. As people flee in chaos, a bagpipe version of "You're the Voice" starts playing, and eventually a group of men playing the bagpipes is shown.
* Hot Rod Rodeo after the bad guy, who has a much better car than he does, is disqualified. We (and Larry) never find out what exactly he was disqualified for but he was seen by Larry either cheating or doing things the easy way instead of the responsible way several times, any of which, or some other incident we don't know of, a spotter could have seen too.
* Hot Rod / Rodimus proves himself no slouch in the first issue he appears in, back in
* Hot Rods & Gun Bunnies (modern action; bends the convention a bit).
* Hot Rod to his crew, each one of them keeps copying his "My name is [name], and I like to party" line. After a bit of back and forth, Rod finishes with this outburst:
* Hot Rod ultimately sacrifices himself to aid in defeating Megascream (a reformatted Starscream) and Unicron, when he survived to the very end of the original cartoon even after he gave the position of Autobot leader back to a resurrected Optimus Prime.
* Hot Rod when the main character changes his sentence into something worse instead of something innocuous when he suddenly backtracks on his brief moment of having enough nerve to compliment the girl he likes.
* Hot Ryu is treated. He's still Ryu and likes fighting and training, but he's understanding, takes you into account with things, and treats you like royalty.

* Hot Sauce Drinking: A character drinks hot sauce, either accidentally or intentionally.
* Hot Sauce Drinking could win a competition without going through the immense pain of downing an actual bottle.
* H.O.T.S.: Both the H.O.T.S and PI sorority girls during the strip football game.
* Hot Scientist: A scientist who's seen by the other characters as hot.
* Hot Scientist assistant, Ann Reilly. Her nickname is "Q'ute," which explains a lot.
* Hot Scientist Carlos, who had come to investigate the titular paranormal town.
* Hot Scientist Dr. Plimpton wants to have a foursome with Raj, Leonard, and Howard.
* Hot) scientist he met on the Internet; Giganta, a size-changing ape-turned-human, and Tala, a witch. He's got taste.
* Hot Scientists. One of the aforementioned Hot Scientists was Operation Overdrive's own Pink Ranger, providing the show with a double-dose of geek girls.
* Hot Seat again... but this time at a 2 AM timeslot. It returned once again with new episodes at a 4 PM time slot around April/May but quickly vanished after about a month.
* Hot Seat did except it aired at the low-clearance 12 noon spot) that had couples being asked questions about their married life while attached to a device that measures emotional levels.
* Hot Seat in which married couples are attached to sensors that gauge emotional levels while answering yes-or-no questions about their married life.
* Hot Set challenged the contestants to construct a futuristic bordello in which three sexbots would perform an erotic dance.
* HOTS had one during the strip-football game. Memorably, all the girls are topless.
* Hot Shots!, Admiral Bensen beats up one of the corrupt weapons dealers who sabotaged the pilots' planes.
* Hot Shots!, a guy at a boxing match comments that both fighters are working for the same manager. One of them goes down after a single punch - which rather obviously didn't connect.
* Hot Shots!, and a marching group uses "Dreidel, dreidel, dreidel, I made it out of clay".
* Hot Shots! a pilot miraculously survives the mid-air destruction of his fighter, only to be shot by hunters as he now bears an uncanny resemblance to a moose, thanks to some sticks that have become stuck on his helmet.
* Hot Shots! has his father's eyes. Literally. He keeps them in a little velvet case.
* Hot Shots!, in which the male hero, seeing his girl (apparently) fall into the arms of his rival, gets into an F-14 Tomcat and takes off; she mounts an inexplicably-present horse and chases him down the length of an aircraft carrier but is unable to stop him.
* Hotshots only big hit a few years earlier. The sequel song "Return of the Red Baron" scraped the top 40 a few months later.
* Hot Shots! parodied it as well with Michelle having apparently broken three Thighmasters with hers.
* Hot Shots! Part Deux: A guard that Rambo... er, Topper is shooting arrows at does this a dozen times, only realizing it after Topper ran out of ammunition when he turns around and sees the door behind him filled with arrows. Then Topper improvises.
* Hot Shots! Part Deux"; and after about 250, called it "the bloodiest movie ever". Not bad for PG-13. Topper does have a record number of kills in that movie. It's actually 103 according to body count lists, and the higher ones came out later.
* Hot Shots! Part Deux" (another film they both starred in, where they played father and son).
* Hot Shots! Part Deux, before labeling itself as the bloodiest movie ever.
* Hot Shots! Part Deux bullets at them. Part of that scene even has a "kill counter" that points out when the scene's kill count has surpassed that of other

films, finally declaring the film to be "The Bloodiest Movie Ever". If that weren't enough, there's also Topper standing in the last little bit of the boat up to his waist in spent brass as he decimates the Iraqi navy.
* Hot Shots! Part Deux. But with a screwdriver and squeaky bed. Yeah...
* Hot Shots! Part Deux, Colonel Walters is imprisoned inside a cage. He slips through the bars, grabs a set of keys, and slips back inside the cage. He then unlocks the door and leaves normally.
* Hot Shots! Part Deux enters the battlefield. After a moment, they open fire on the Bunny, celebrate for a moment, then Topper kills the Mook.
* Hot Shots! Part Deux giving him a sharp-jawed appearance. The Prime Minister then is so startled by this development, he leaps into the arms of his wife from sheer terror.
* Hot Shots! Part Deux had The Clapper installed on his manor in a quick gag.
* Hot Shots! Part Deux has Charlie Sheen's character tossing a pineapple grenade at an enemy soldier. It lands in his mouth and he reflexively swallows it and blows up.
* Hot Shots! Part Deux has this one: "On October 15, the President of the United States ordered a covert mission in the Persian Gulf for the purpose of rescuing soldiers taken hostage during Desert Storm. Only a handful of our highest government officials were aware of the operation, as it included an attempt to assasssan... assisss... kill a guy. "
* Hot Shots! Part Deux. He says "President Bensen" as a greeting and Bensen tells him that he's President Bensen, and that Topper shouldn't go around impersonating the President, it's just not credible.
* Hot Shots! Part Deux. It turns out to be more effective than an arrow.
* Hot Shots! Part Deux, Michelle Huddleston gives Topper Harley a mole from her face after sleeping with him. It later becomes a plot point.
* Hot Shots! Part Deux: Parodied — Colonel Walters has his two index fingers tied together by the bad guys with a Chinese finger trap, when he is freed, he begins rubbing his wrists instead.
* Hot Shots! Part Deux parody when President Benson and Saddam Hussein suddenly whip out lightsabers during their climactic duel.
* Hot Shots! Part Deux, Ramada disguises herself as a man since only men are allowed to fish. When they are stopped by a patrol boat, the disguise initially works, but then their cover is blown when Ramada, still in disguise, goes into the ladies restroom revealing the ruse.
* Hot Shots! Part Deux. Ramada Thompson rips off a piece of clothing to patch up Topper Harley. The rest of the members of Harley's squad immediately start complaining about their minor injuries hoping to get her to rip off more clothing pieces.
* Hot Shots! Part Deux retirement from the military, he's called back to duty when his old boss is captured while on a rescue mission.
* Hot Shots! Part Deux, Saddam speaks with a raspy Darth-Vader esque voice. He then uses an inhaler, and starts speaking in a normal voice.
* Hot Shots! Part Deux: Some merchandise was advertised in a home video version of the film, with the narrator mispronouncing "Deux" with an American Accent to sound like "dew" (or "do"). One of the merchandise had the writing "Just Deux it!", while it was pronounced "Just do it!".
* Hot Shots! Part Deux. Their only solution is to blow it up, and one of the team protests that "it's not our property". And a few scenes later, Topper uses a grappling hook to climb over an extremely short stone wall that he could have easily walked around.
* Hot Shots! Part Deux; Topper swings a sword through a candle, and it passes clean through... only for the sword to break a moment later.
* Hot Shots! Part Deux, where President Benson and Saddam Hussein's shadows are shown fencing against each other, and then Benson and Saddam walk by in the foreground, drinking Gatorade and toweling off their foreheads.
* Hot Shots!, Ramada left Harley because she realized that her never-before mentioned husband was still alive. Topper rescues his ex-lover's husband from an

Iraqi prison camp in the second movie, but then Dexter accidentally backs off a cliff while taking photographs, freeing the two lovers to be together again.
* Hot Shots! that can apply.) At his funeral, Topper tries to offer some money to his widow... who just hit the lottery, and says she'll blow the cash on hats. Later, their C.O. mistakes the 21-gun salute for an enemy attack... and responds in kind.
* Hot Shots! The bugler gets trampled by the crowd running out of the billets.
* Hot Shots!. The one from the first film is the page quote up top. From the second film:
* Hot Shots! Two characters are watching a boxing match and one comments to the other that both boxers work for the same promoter. The "fight" is over after one whiffed punch.
* Hot Shots! uses a small dog that somehow constantly manages to be sat on no matter where people are. He gets lucky at the end of the movie when two slabs of beef are dropped on him.
* Hot Shots! when Topper's dad tried to make repairs to his fighter as it was crashing. This included everything from stapling sheet metal onto the nose to holding the wing on by hooking his feet to the fuselage.
* Hot Shots!, where a character successfully ejects... right into another plane. His head is stuck in another pilot's cockpit for a good long while, his arms and legs flailing around uselessly as he begs said pilot "Don't land!"
* Hot Shots!, where Topper and his gal feed each other. At one point Topper fries an egg on her belly.
* Hot Shots! with the carrier crew cheering the victorious pilots' return to the ship.
* Hot Skitty-on-Wailord Action — The same as above, but with the partners being significantly different (e.g. a giant alien being able to reproduce with a human).
* Hot Skitty-on-Wailord Action: Romance between a larger animal and a smaller animal of both vastly different sizes and species.
* Hot Skitty-on-Wailord Action: Two creatures of different species have sex in a way that's unclear how they did it.
* Hotspots in investigation locations now have a checkmark like the discussion topics to avoid repeating dialog.
* hot spring cutscene, Zelos attempts to take a peek at the females in the party while they are bathing. Lloyd, being far less of a pervert than Zelos, catches him in the act and loudly tells him to stop. This, of course, causes the girls to march out and "catch" Lloyd in the act, while Zelos escapes.
* Hot Springs Episode and allows them to arm themselves before fighting him.
* Hot Springs Episode and is promptly smacked by Suzuka's sheathed sword.
* Hot Springs Episode has Noboru realize that the brochure for the inn he went to used this. The place is cheap and broken-down, but Kuu loves it regardless.
* Hot Springs Episode is mortified enough to cover himself and let out a girlish shriek.
* Hot Springs Episode, Jim notices Gene is missing and figures he's up to no good. Cut to Gene sneezing far from the springs and wondering if he's caught a cold.
* Hot Springs Episode of all people was also checking out the guys while in Laphicet's body.
* Hot Springs Episode reveals that this is general attitude of the Empire.
* Hot Springs Episode that saw the Elements of Harmony fully awakened, and the final build up to the Magic Arc's finale.
* Hot Springs Episode: The cast finds a reason to spend time in a hot spring and fanservice ensues.
* Hot Springs Episode, the OVA simply removes that part and has Takiya use the community explanation.
* Hot Springs Episode tries to climb the wall to the girls' side using his Quirk.
* Hot Springs Episode wall that separates both sides. While he tries to see while riding on Simon's shoulders, he asks Gimmy to "find a hole". Gimmy ends up finding Simon's..." personal hole" and sticks his finger in it, which causes Simon to jump

in pain high enough to get a glimpse of the other side. When Kamina finds out what he managed, he asks Gimmy to poke him as well.
* Hot Springs Episode while the cast was relaxing in the springs he felt that Misato, Maya, Asuka, Rei and Mana were getting upset... so he openly walked into the only women side, reassured Mana and left with no bodily harm inflicted upon him. His male friends instantly bowed down.
* Hotspring Souls!, just when it looks like the Chosen Undead and Rhea are about to have their Relationship Upgrade, Solaire completely ruins it by blasting Van Halen on his boombox.
* Hotspring Souls!, the guys are all traumatized when they see Solaire's swimsuit— an excruciatingly tight and eye-searingly bright yellow speedo with a red sun logo smack dab in the crotch area.
* hot springs scene where (in the Japanese version anyway) she practically begs Pit to take off his clothes.
* Hot Spur, Carlo plants a bear trap on the trail leading to the cabin where he is holding Susan. Tom steps in it while fleeing Carlo and breaks his leg.
* Hot Spur: When Jason arrives to free her, Susan mistakes him for Carlo and stabs him to death in a blind fury.
* Hot Spur: When Susan is tied up in the mining shack, she is able to grab a knife off the table with her teeth and drop it on the floor, then get it with her hands and use it to saw through her bonds.
* Hotstreak went from Martin "Biz Money B" Scaponi to Francis "F-Stop" Stone.
* Hot Stuff is about the responsibility of using fire and what could happen if one's careless with it.
* Hot Stuff, the caveman who received first is thought to be the main character, but then he dies halfway through and passes on the fire to future generations.
* Hot Stuff, the first man is shivering and freezing due to the cold weather of prehistoric Earth to the point that he sneezes violently. This is what causes the gods to take pity on him and give him fire.
* Hot Stuff) when they offer to give him warmth, he tells her to stay out of it, with his snake adding "Go back to your apple turnovers!".
* Hot Stuff where the first person to possess fire passed it on to future generations in this manner.
* Hot Sub-on-Sub Action notwithstanding. WW2 and earlier subs, largely blind underwater and equipped mainly with unguided torpedoes, were basically incapable of attacking each other at all unless the target happened to be on the surface (in which case it would have been just as vulnerable to gunfire and aircraft), and while more modern ones are equipped with weapons that can seek out and destroy another submarine those weapons can often be just as easily be mounted on other platforms (such as helicopters, against which a submerged sub under attack cannot even return fire).
* Hotsuma does this to Yuki when the latter expresses concern for him.
* H.O.T.S. when the H.O.T.S girls steal their clothes, tape the van shut and tow it away with them in it. The naked couple finally escapes from the van on the front lawn of the school.
* Hot Target by Suzanne Brockmann. He points out that if you were pregnant in Ohio in the early seventies, marrying a gay guy was probably everyone's best option. Mom is never mentioned as dating anyone, though his adoptive dad had a live in Uncle Riley.
* Hot Teacher in her classroom with zooming and audio feeds. Quite the perverse video.
* Hot Teacher in the second half of the series and this trope is lampshaded all the time.
* Hot Teacher. Luckily she is able to secure Ben's help and makes it back to her office undetected... only to find the headmaster and the Department representative waiting for her inside.
* Hot Teacher Midori decides to accept the marriage proposal of Senbei.
* Hotter and Sexier) and consent (leading to higher public condemnation of rape and sexual abuse, culminating with the #MeToo movement in 2017-18) with the argument

that sex in media was vulgarized mainly as the result of the increased objectification of women during the latter half of the 20th century. On the other hand, pop culture takes on sex began shifting back to the coarser mood of the late 90s and 2000s during 2019.
* Hotter and Sexier: An instalment in a franchise adds or increases fanservice compared to previous instalments.
* Hotter and Sexier (if not outright smutty) takes on fairy tales, at least some of which are clearly intended to subvert the supposed innocence of the original story (or stories). But in addition to being darker than they're generally portrayed nowadays, many of the original fairy tales were also somewhat more lewd.
* Hotter and Sexier's very sexualized imagery set a trend for many female pop singers in her wake.
* Hotter and Sexier: The adaptation contains more nudity and/or sexual content than the original work.
* Hotter and Sexier: They're not referred to as "The Saucy Seventies" for nothin', baby. In fact, the sexual revolution of the late 60s only took hold beginning in 1970.
* Hotter and Sexier, to the point that fans have lovingly nicknamed them the "Purple/White Pants of Sin".
* Hottie 3: The Best Fan Fic in the World certainly runs the Midnight Cage and his chain of over 150 conquered alternate Earths like one. His title is "Emperor" for crying out loud.
* Hottie 3: The Best Fan Fic in the World. It was given to her by Finn.
* Hottie 3: The Best Fan Fic in the World. There are a total of thirteen multiverses in the omniverse.
* Hot Topic, in turn, also suffers from this. People who aren't part of the goth or emo subcultures hate how the store promotes them. On the other hand, abiding by this trope, actual goths and emos hate Hot Topic because it became "mainstream"; this resulted in jokes about "mall goths" who are just wannabe "poseurs" who think that just because you shop at Hot Topic, that makes you goth. (Granted, there are probably plenty of cases of this, but not as many as people claim.)
* Hot to Trot is being woken up, he mumbles, "I don't wanna go to school..."
* Hot Tub Time Machine and is seen as a billionaire when everyone else returns to the present, having used his knowledge of the events in between.
* Hot Tub Time Machine and the fact that Lou was carrying Chernobly, Blaine assumes that all of them are Soviet spies.
* Hot Tub Time Machine away, and he had to mark it so he'd know which box it's in.
* Hot Tub Time Machine back to 1986, the fully-grown middle-aged adults appear as their younger 1986 versions to everyone but them. Adam's nephew, Jacob, however, is the only one who appears as his 2010 self perhaps through some weird effect of not even being conceived yet in 1986.
* Hot Tub Time Machine, believing Lou to be asleep, Nick and Adam start having listing off all the reasons why Lou's life sucks and why he'd want to kill himself. Lou is not asleep, and he calls them out for it.
* Hot Tub Time Machine, believing the choices he made in his life are pointless.
* Hot Tub Time Machine, everyone takes the appearance of their younger selves with the exception of Jacob, who was conceived on the day the group travel to.
* Hot Tub Time Machine has Lou, who is a both a big jerk and a loser that no one seems particularly fond of, but he's been ostensibly a friend of two out of three of main characters for years and they still run out to the hospital after hearing he attempted suicide.
* Hot Tub Time Machine, Lou tries this to a girl. She's staring at him but ignores the shot-glass, which shatters on the wall next to her. As does the second one.
* Hot Tub Time Machine (made in 2010, the protagonists travel back to 1986.
* Hot Tub Time Machine. Played surprisingly straight, she just appears in Adam's life, fixates on him (particularly odd, since she's apparently an established music journalist and Adam's a teenager), takes him out of the dull funk that he's in, and even engages in some low-level breaking and entering for the sake of romance.
* Hot Tub Time Machine setting the time travelers on their way. Jacob even

lampshades it, by noting that the repairman's words perfectly support either theory, and asks if it would kill the repairman to just give him a straight answer.
* Hot Tub Time Machine t-shirt. Making him a pretty typical 1980s metalhead.
* Hot Under The Collar, both Regulus and Sirius—who are brothers—want to be Remus' boyfriend.
* hot was how well the crew blended in to the San Francisco crowds by merely removing their emblem pins.)
* Hot Water Music briefly changed their name to The Hot Water Music Band for their album
* Hot Wheels Acceleracers only takes place over half a day, and possibly as short as two-and-a-half hours. The movie begins with the Cosmic Realm opening and the drivers getting ready. Around 20 minutes after the hour allocated to complete the Cosmic Realm ends, Vert and Gelorum get into the eponymous ultimate race. That Vert is able to complete the race on just one tank of gas (plus the scenes showing what everyone else is doing in the meantime) suggest that it only takes one or two hours. The film ends about ten minutes after the race does.
* Hotwheels Acceleracers: Vert Wheeler finishes the Storm Realm by the time the portal closes after the time is up, resulting the Deora II being cut in half and destroyed. This also happens with Taro, after he accidentally gets into the Racing Drones HQ and has to start the Water Realm over, finishing nearly at the same time but with the very back of the Riveted cut off and the car surviving for the next Realm.
* Hot Wheels, and with their innovative suspension and wide plastic wheels, they could be smoothly raced on both flat wood and linoleum surfaces (like tables or kitchen floors) and specially designed tracks at speeds that would cause other toy cars of similar size to crash and go flying. Other toy companies, most notably Matchbox, had to scramble to catch up with Hot Wheels' innovations, which are now the standard for toy cars save for some "boutique" collectible companies.
* Hot Wheels at least acknowledges its recolors for different model years are the same cars, but one can pinpoint which model year a certain car comes from by the paint job.
* Hot Wheels Battle Force 5 brother Krytus from leading them on a multiversal conquest. When Krytus and her have their final confrontation, she tells him she did it because he was a threat to not only her entire race but the multiverse and she had to. Krytus' response? "You were right!" It says a lot when the guy she used it on is well aware that she was justified for doing so and doesn't care.
* Hot Wheels Battle Force 5 have awakened and the battle is far from over.
* Hot Wheels Battle Force 5, the team needs to head to a nanotech stabilizer and can't afford to go through a Battle Zone first, so Saige reveals a crystal that lets them skip the Battle Zone and go straight to their destination. When asked why they don't always use such a crystal, she reveals that she only managed to obtain one, thus limiting its use.
* Hot Wheels Battle Force 5 to second-in-command because a wise one once advised him about this trope.
* Hot Wheels in particular, is where the Alternate Racing Dimension thing comes from.)
* Hot Wheels, Matchbox and Micro Machines release accurate versions of ships and vehicles from a licensed series, and also release four-wheeled
* Hot Wheels/Matchbox (toy racing cars, specifically "1:64" scale models of real cars): Both are registered to Mattel. If in the UK before Mattel acquired Matchbox in the mid-1990s, Matchbox was far more commonly used, along with Corgi.
* Hot Wheels, presumably because it's cheap, durable enough to stand up to kids, and one of the few radar guns you can buy in the toy section of any store.
* Hot Wheels: Stunt Track Driver of any car crash, including this trope. The same sound is used earlier on in the level when you buzz right past the cat's tail as well.
* Hot Wheels toy franchise started in May 1968 with the release of its first 16 toy cars (known as the "Sweet 16") and has been running since.
* Hot Wheels World Race: Tezla likes to communicate using massive revolving screens

that just show his face.
* Hot Wind: In reality, wind does not appear just to make someone's hair and clothes move around seductively.
* Hot Wind: Wind blowing behind an attractive character to make them look sexier.
* Hot Wind: Wind blows the hair of a character someone else is sexually attracted to.
* hotwires. Incidentally, due to its strength the whole process literally takes it 5 seconds, about as fast as most people take to start a car with a key.
* Hotwire's PDA malfunctioned after Kat's death. Turns out that's what happens when a human consciousness stores itself in a pocket-sized communication device.
* Hot Witch: Not unheard of. The Evil Queen from “Snow White” is the most obvious example. Can quite frequently be encountered in Eastern European tales.
* Hou$e of Lie$ opens with Marty regretting a night spent with his ex-wife. Doesn't stop him from doing it again in other episodes.
* HOUBA! On the Trail of the Marsupilami (another Alain Chabat movie): Pablito and General Hermoso have a lengthy argument over Chouniño, Pablito's coati pet.
* HOUBA! On the Trail of the Marsupilami appears as herself, leaving a video message to a big fan of hers.
* HOUBA! On the Trail of the Marsupilami: As in Franquin's comics (see above), the Palombian soldiers have a weird salute, with the thumb touching the head, the pinkie raised and the other fingers closed.
* HOUBA! On the Trail of the Marsupilami, Kiki the ara commonly insults his owner Pablito, including while they both are in the process of swindling some tourists of their money. ("Crook." "Imposter." "Mythomaniac.")
* HOUBA! On the Trail of the Marsupilami nudges Marsu with the barrel of his gun, eliciting a pained squeal. Hermoso takes that as a "yes".
* HOUBA! On the Trail of the Marsupilami: Old botanist Hermoso, when trying to give a demonstration of "Austrian Savate", gets stuck from a back pain. And later, after falling from an elevator platform, he stays stuck for three hours before Pétunia comes help him.
* HOUBA! On the Trail of the Marsupilami: When the earth shakes in the TV studio, the letters for Dan Geraldo's name start to fall, leaving only "DAN GER".
* HOUBA! On the Trail of the Marsupilami: While traveling on pirogue in the Palombian jungle, Dan Geraldo is recording his reportage and mentions his guide, Pablito.
* Houdini & Doyle: Doyle and Houdini actually were friends, although they had a falling-out over spiritualism. They never solved crimes together, but Doyle investigated a few cases and exonerated wrongly convicted prisoners. Houdini went on a debunking campaign against mediums, while Doyle retained his spiritualist faith to the end.
* Houdini & Doyle has Houdini use this to shoot down a police officer's claim that no human could've broken into the walled property where one of the "Springheel Jack" attacks took place.
* Houdini & Doyle where his wife Louise Delamere played his wife in the show. He commented on how weird it was to film love scenes with his real wife.
* Houdini frequented this. Tricks seem more impressive if the audience only thinks they're difficult, for example in escaping from being locked in a safe. Ask yourself: are safes designed to keep people in, or out?
* Hougyoku does this to anyone it comes in contact with. Not only is it responsible for Aizen's many transformations in the Deicide Arc, but its presence in Karakura was also partly responsible (along with contact with Ichigo's overactive reiatsu) for Chad and Orihime unlocking powers in the first place.
* Houkago×Ponytail, and got black belt in both karate and taekwondo.
* Houken of Zhao is undoubtedly the most skilled warrior in the series, being a path-seeker who devoted himself to training. He is also monstrously strong and durable, capable of
* Houmei also has a very toned build, and her clothing reveals her well-defined abs.
* Höryjyrä (literally "steamroller"). The voiced 'h', frontal 'ö'

and 'ä' phonems, labial 'y' and rolling 'r' are almost impossible for anyone except native Finns to pronounce.
* "Hound Dog" is another, first recorded by blues singer Big Mama Thorton. There's a reason Elvis is sometimes known as "The Prince of Thieves."
* Hounddog. It was finally ready in 2009 but was almost completely pulled from distribution at the last moment (only having 22 screens at most). It's been available on DVD since fall 2010.
* Hounded, Jay's brother), while his dad is demoted to secretary. Jay ends up getting his scholarship after all.
* Hound from the fourth movie has an assault rifle, two shotguns, two large handguns, two smaller pistols, at least three grenades, and a combat knife.
* Hounds of Light as they are basically the pets of the King of High House Shadow. They are also thousands, if not hundreds of thousands years old. Shadowthrone claims confidence in the Hounds' loyalty and guarding of his Shadow keep, but his right hand man Cotillion, the Patron God of Assassins, prefers to keep a wary eye on these 'pets'.
* Hounds of Love. Vicki learns, however, that their marriage is less than ideal, and though Evelyn joins John in the crimes for a "bonding" activity, she's jealous of John's fixation with his victims and he really runs the show.
* Hounds will come in packs regularly to attack you, in more numbers as time goes on.
* Hourai immortals technically don't need to eat, but not eating will eventually cause them to feel hunger pains, which can become unbearable if ignored long enough. Fujiwara no Mokou, for instance, feels it's more her style to just endure some pangs of hunger, but if it gets too out of hand, she will go and find something to eat.
* Hourglass of Falces in this story, thus the snarky, well-rounded fighter Milina fits this trope.
* Hourglass of Summer the protagonist tries to warn the girls of the future events he's seen from traveling randomly through time against Lee Jane's warnings not to. It fails because nobody believes him and the tragedies happen to them anyway.
* Hourglass Plot. "The Day" has Sylvia trying to wake a sleeping Wander as the two escape Lord Hater's ship, while "The Night" has Wander trying to help Sylvia, who's worn out by the events of the previous episode, get some sleep, while Hater's watchdogs try to capture them. "The Night" ends with Sylvia and Wander back in Hater's dungeon, right down to Sylvia waking up and seeing where they are.
* Hourglass Plot: Two characters on opposite ends of the moral or at least conflict spectrum change roles over the course, but are still opposed to each other.
* hour-long episodes were cut down to a half-hour, a few references and jokes were left orphaned. Example: in the "Superdogs/Superjocks" episode, there was a warning in "What 2 Look 4" for an obscene number of dog-puns. The subsequent edits chopped out the majority of them. (there were still some groaners, but not enough to justify a warning.)
* Hourman, being the physically strongest and toughest of the original line-up, is the original
* Hourman, this one an android from the 80,000 years in the future. He has a somewhat human personality and emotions but falls into this trope when he chooses to limit his nigh omnipotence to a typical superhero power level and live in the 20th Century. He even falls in love.
* Hourman was shot. Though they were aware of the time loop, no matter what they did, at the end of five minutes they would always end up standing on the same street corner.
* Hour of Darkness she would be the one angel who utterly refused to believe that demons are incapable of love, befriend her target to prove it, and by doing so forge peace in the endless conflict between Celestia and the Netherworld.
* Hour of Devastation serves as one for the entire Gatewatch arc. After spending the last few blocks solving crises, like defeating Ulamog and Kozilek on Zendikar, repelling Emrakul in Innistrad, and leading the rebellion to victory against the Consulate in Kaladesh, here in Amonkhet, the God-Pharaoh

* Hour of Penance is almost assuredly banned from Alicante, Spain after an incident where they were scheduled to play a club in the city near the tail-end of a European tour, only to have their performance cancelled when then-drummer Mauro Mercurio drunkenly caused thousands of dollars' worth of damage to a backstage area in the club. The band was nearly arrested, Francesco Pauli voluntarily quit the band, and Mauro was unceremoniously ejected as a result.
* Hour of Power ended, and it would take quite some time for the Omnitrix to let him change again. Also, it sometimes gave him the wrong one.
* Hour of the Horde idea and being able to catch falling things is usually helpful too.
* Hour of the Oxrun Dead and affluent bedroom community. Half the men seem to work for New York banks and law firms.
* hours after being declared as having the best performance in the challenge for the fourth time.
* 'hours...': Although all the children at Bethel Woods Orphanage are above average, Seth takes the cake. By age 9 he had to purposefully dumb down his algebra schoolwork so as not to destroy the bell curve, and by age 11 he invented a machine which defied known physics (out of duct tape and spare parts, no less).
* hours because she's convinced her pen was stolen by someone in the group.
* hours. Constant efforts must be made to hold back the explosive plant growth, and failing for as little as six hours means your carefully constructed building is now mostly consumed by plant life.
* 'hours...' features a couple of scare chords, although tastefully done using an original sound effect which fades into a creepy musical jingle.
* hours of this, it cuts back to Bass High, where all of the kidnappers have already gone home and left Akira tied up.
* 'hours...', one hour of regular time can equal any amount of time in the Waving World, from tens of minutes up to many days. This is because the perception of time in the Waving World is based on events, not physics. Happenings of great import, such people dying, take up more real time than do mundane tasks.
* 'hours...': the symbol drawn next to the first Finn's name keeps cropping up in odd places.
* hours. The team quickly learns that being "immortal" is no picnic...
* hours. Which means no retreat if something goes wrong and makes tactics as used above very risky. And sending your ships in one after another would just give the other side a chance for some target practice.
* hours without arcwine can cause them devolve into the mindless Withered.
* hour the basis for a song. Many existing songs also have new lyrics added.
* "Hour Two". So basically, a creator's post-series notes brought to TV.
* House’s employees live in perpetual terror of being fired, but barring the mass interview, the chances of anyone actually staying gone are slim to none.
* House (2020): If you save Tabby's mom from slipping on the wet floor she falls asleep on the chair after eating the sandwich. Then the fridge opens a ghastly arm sprouts out of it, grabs the mom and pulls her inside. If you act quickly and chop off the arm then a monster crawls out of the fridge and chases Tabby.
* House, a beautiful teenage model appears to be female, but turns out to have Complete Androgen Insensitivity, with her symptoms being caused by a tumor on one of her undeveloped testicles. She is horrified to discover this, as is her manager/father, with whom she had been having sex. House's response to the manager's horror is priceless:
* House about chasing diseases instead of criminals. Now it's a Crime Time Soap about chasing criminals instead of diseases.
* House, a disgusting, nightmarish monster that attacks and tries to kill main hero Roger Cobb. But any pretenses of it being scary quickly fade when it speaks, as it talks in a high-pitched chipmunk voice.
* House, a fifteen-year-old girl claims to have gotten emancipation but in reality, she stole someone's identity and forged the necessary papers.
* House. After all, they're a bit late to provide any benefit to the patient they're digging up.

* House. After a tense discussion, House turns on the speakers again... which start playing a Jewish folk song. House turns it off and says, "That wasn't as dramatic as I had hoped."
* House after Foreman fails to save a patient. He wears splints for his broken fingers for an episode or two afterward.
* House after House thinks that his attraction to a female doctor is interfering with his diagnostic skills.
* House all have shiny, colorful covers—except the fifth season, which has a gray cover. Now take a guess which season is considered to be the worst by most people.
* House almost every time Wilson gets a girlfriend. The current one is fighting a secret war with House to see who'll win in the long term... When Wilson was with Amber, House actually did come up with a "custody contract", which Amber reluctantly agreed to and later added "penalty clauses" to.
* House. Almost immediately after she was revealed to be bisexual, she started picking up one-night stands, and eventually became involved with Foreman. This behavior stemmed from the knowledge that she was slowly dying, and eventually she accepts her shortened lifespan. She is later shown settling down with another woman by the time she leaves the show for good.
* House Amnesia: An angry character forgets they're not in their own house and orders the owner to leave.
* House) and Cary, and the episode "Misconceptions" was based on the disappearance of Etan Patz.
* House, and during the scene in the elevator in which House searches her genital area for a tick, Trachtenberg said she played a joke on Laurie by putting a note between her legs that read "I Love You."
* House and only real friend. Most of the time it's hard to point a finger at it though, because with House's personality, any of the sexually loaded comments (including some of the "I'm so gay for you" and "will you marry me" sort) could, and most likely are, just sarcasm so thick it's impossible to say what House actually means. Wilson, again, has learned to sometimes pay House back with the same thing. And in the end, the only thing actually happening between them is friendship and constant teasing; both have heterosexual interests and relationships/activity of their own.
* House, and the entire episode is in first person perspective, as they guy is helped to get back from his current state.
* House, and were even at one point engaged to be married. Subverted in that the actors had broken up before the characters got married.
* House and Wilson nearly text. This was not the first, the last, or even the most blatant hint for the two.
* House any, but Wilson's not been told anything about that and is clearly just hurting.
* House: a Patient Of The Week is buying drugs while sleepwalking and House sends Thirteen and Taub to get some of the product to see if it can be the cause of the patient's condition. When they find the dealer she starts to make a run for it (since she had already seen them tail the patient earlier, which is why they found out about the drugs in the first place) but Taub attempts to defuse the situation:
* House Ardoc in the city of Kaer Maga specializes in animating golems and other magical constructs.
* House are directed in the distinct style of a different kind of series or show, so much that they may confuse a less savvy viewer.
* "house arrest" penthouse suite in the Presidential Hotel is completely barren and devoid of furniture save for a single table in the living space on the first floor, as well as the fully furnished bedroom and the penthouse's secret "mission control" room where Fisk can give orders to his criminal flunkies. Midway through the season, Fisk's personal belongings begin to be moved into the penthouse, and by episode 7, the place is fully furnished in preparation for Vanessa's return in episode 12.
* House Arrest wears a hairpiece that accidentally gets pulled off by one of the

other moms. Her hair isn't that much shorter so she goes without it for the rest of the film.
* House. A Season 5 episode reveals that House and Wilson met at a medical conference in New Orleans, where Wilson (very depressed and drunk from finding out his then-wife had filed for divorce) started a fight at a bar and caused property damage, and House bailed him out. It wasn't until years later when House got Wilson arrested for speeding (long story), that Wilson learned that the state of Louisiana still had an outstanding warrant for his arrest. House points out that all he did was pay Wilson's bail; he still needed to show up at the arraignment and sort things out. However, given that the charges were minor and Wilson had paid back the cost of the damage, they ultimately decide it's not worth it to pursue the case and the warrant is effectively vacated anyway.
* House, as he had undergone a regenerative coma, and had inhaled a lot of tea. House also suggests he hadn't gone to the bathroom before going comatose.
* House, a sleep-deprived Dr. House carries on conversations with a hallucinated vision of Amber Volakis, who died in the previous season. He knows she's not actually a ghost, but since she remembers things that he knows but thought he forgot, he uses her as a hotline to his subconscious. He eventually covers up talking to her in public by wearing a Bluetooth headset.
* House as strictly as can be, the overall show always has two women: Cuddy and a female duckling who is pretty much interchangeable. In the final season, Foreman replaces Cuddy but House's team gains two new women: Adams and Park.
* House: As the canonical Wounded Healer, Dr. Gregory House's medical genius bestows a second chance at life to almost all of his patients, while his own prolonged state of misery implies that he himself is unable to enjoy life.
* House at one time had a very convincing "this number has been disconnected" recording for his answering machine.
* House Atreides takes its name from supposedly being descended from Atreus, father of Agamemnon and Menelaus of Greek myth. Needless to say, they were not actually real people, featured only in
* House at the end of season four, there is a sense of this after House survives a bus crash.
* House Baratheon has two civil wars at the same time. Robert's brothers fight their "nephews" (who they know are not real Baratheons, but claim to be), and they also fight each other.
* House Baratheon is primarily known as a family of warriors and Lord Renly is viewed as something of an embarrassment because he is often criticized by his older brothers for being a non-fighter. King Robert is especially disparaging of his youngest sibling's masculinity, calling him a "boy" during their hunting trip because he doesn't consider Renly to be a "real man."
* House Blackfyre, on the other hand, played it straight. They are a Targaryen offshoot house that descended from Daemon Blackfyre
* House Bolton has a long enough tradition of this activity to make a flayed man their sigil, though it is supposed to be banned in the North by Eddard Stark nowadays. Lord Roose Bolton, who doesn't seem deterred by this, provides the page quote: "A naked man has few secrets; a flayed man none" and it is his preferred method of interrogation. Roose's bastard son Ramsay does it for
* House Bolton is, as a result, directly in their crosshairs thanks to how terribly Ramsay treated Donella when he forced her to marry him — then "let" her die alone.
* House Bolton is effectively extinct, with all their members being killed by Ramsay and him finally meeting his end after the Battle of the Bastards. Sansa confirms that their lands, name, and titles will be completely erased from history.
* House Bolton members dress themselves in black and grey armor, in contrast to their
* House Bolton starts out as the Stark family's own psycho-for-hire bannermen, which is somewhat interesting as the Starks are generally good guys and the Boltons are now considered the
* Housebound: The basement is full of life-size sculptures of saints. Human-shaped

looming figures with overtones of bloody death? Thanks, those will cheer this basement right up.
* House, but Cuddy gets her own back with her last fantasy in "Bombshells", with a load of young shirtless male nurses, and a few loving pans up and around House in his eyeliner and showman's outfit.
* House, but he still came across as vindictive and petty, and the fact that he was going up against Our Favorite Jerkass didn't help.
* House Cadmus in particular determines leadership in annual hunts of the mutants who replaced their homeworld's extinct megafauna.
* House called "Airborne", Cuddy becomes sick during a flight from Indonesia to the US, having rashes, nausea and a fever, all because she believes she's been infected with meningitis from another passenger. Who turned out not to have meningitis at all.
* House called "Distractions", a buggy explodes in a fireball after slamming into a pile of steel tubes. The ridiculous factor is cranked up to 11, since this pile of tubes is sitting in the middle of a forest.
* House Calls is a sitcom from the 1970s about a British doctor in an American hospital dealing with her strange colleagues.
* House Calls regular Wayne Rogers (whose old show immediately preceded this one in CBS' Monday-night lineup) and Lynn Redgrave played the roles originated by Walter Matthau and Glenda Jackson.
* House. Cameron is also prone to this with "broken" people, like her ill husband and House himself.
* Housecarls are a deliberate invocation of this trope. The primary function of a housecarl is to loyally defend the life, property, and loved ones of the person to whom they are pledged. The Jarl of each hold has one, and the
* housecats. They intentionally utilize cuteness proximity to control the minds of the cast.
* house centipede. They also serve as a radar; an abundance of these benevolent creepy-crawlies will give you a heads up that you undoubtedly have an as-of-yet unnoticed infestation of something else.
* House Cerberus and his cronies, eventually kicking off a movement to free the roleplay from his tyranny.
* House, Chase tells Foreman a joke that ends with "... and the bear wipes himself with the rabbit!"
* House cheat on two of his wives and told them about it later). This trope is actually the entire B-plot of "Fools for Love", in which it's subverted — it's not Wilson that Nurse Wendy is dating, it's Foreman.
* House Clegane, of the attack/guard dog variant. Both Clegane brothers were trained from a young age to serve as the Lannisters' most loyal, skilled, and brutal fighters.
* House Clegane serve no other purpose than killing. Sandor makes numerous speeches that it is what knights are at the core and Gregor shows it. They are regularly used by the Lannisters to kill specific targets such as a butcher's son and former heirs to the throne.
* House. Comes across as mousey and repressed, 95 per cent of the time. The other five per cent she's accusing Dr Adams of wanting to masturbate over her, or casually claiming to have had sex with over thirty guys (which she then admits is a lie; whether the true figure is higher or lower remains unknown).
* House constantly bullies his fellow staff and patients, violates laws and ethics left and right, and never seems to take the hint that his behaviour is unbecoming of a doctor. He's also one of the best doctors in the world. Not only can he not be fired, but apparently he can't even be arrested. His job is threatened several times over the course of the show, but it is always saved because Wilson and Cuddy vouch for him and his ability to treat patients that no one else can. Cuddy mentions that the hospital gets House for cheap because no one else will bother to hire him, and that the savings are occasionally (but not always) used to pay for the lawsuits arising from House's antics. House himself believes that he can never lose total respect as long as he's a brilliant doctor, and cites his experience at

a Japanese hospital where a doctor was made so "untouchable" as to become a janitor — and yet the other doctors kept asking him for advice because he was so brilliant.
* House co-stars Jesse Spencer and Jennifer Morrison were dating at the same time as their characters, Dr. Chase and Dr. Cameron, started their romantic relationship.
* House created a universe with three states of matter and 300 solid or liquid poisons that could cause his symptoms." Puzzled, Taub asks, "Arceus?" House casually replies, "Look it up."
* House crossover fic "Insurance and Insolence" when Blackadder starts on a tirade about hospital deans being crusty old men and changing his tune in mid-sentence in order to flirt with Cuddy.
* House crossover "Insurance and Insolence" has Dr. Blackadder claiming House "wouldn't know fun if it bit him on the arse". Cut to the next scene which has Wilson in bed with House doing exactly that.
* House crossover "I Want To Ride It All Night Long", House and Wilson's threesome with Catherine Willows gets interrupted because she's called out on a murder case.
* House, Cuddy catches Thirteen attempting to recover from a night of debauchery with some sort of self-administered IV solution.
* House: Cuddy confronts House about something or other, and he says, "Who squealed? Taub?" Cuddy responds, "I'll never tell. But yes."
* House, Cuddy's mother had converted to Judaism for her husband. While House is dating Cuddy, she asks whether he intends to convert to Judaism as well. As he claims to be atheist, she just says that so are most Jews and that it's more about community.
* House danger. Unlike most examples here, it's plausible that the line would break, as a shotgun can damage a whole section of the rope rather than just one small spot.
* House Davion favors skirmishers, autocannons, and high tech, willing to lower armor or employ vulnerable components to get the job done.
* House Davion is the Cannon faction for the Inner Sphere, in an unusually literal sense. Davion units favor ballistic weapons such as autocannons, and tend to be faster but fragile due to either a relatively low armor profile or using more vulnerable components. In exchange, Davion units often hit like trucks and can be a nightmare for foes who get outmaneuvered by them. The
* House did it in episode 4-12, "Don't Ever Change", when Roz needed an ultrasound. House asked Thirteen, "You do it both ways, don't you?", and after Thirteen took it the wrong way, he stated he was talking about two different ways to do the ultrasound.
* House did not have an official paintball episode, the one-hour retrospective which aired before the series finale ended with Robert Sean Leonard and Hugh Laurie having a paintball match in the defunct set of the Princeton Plainsboro hospital.
* House did this in its fourth season. They got a whole new team for House but at the same time kept all the previous regulars as well.
* House discovers that the elderly couple he's been giving relationship advice are actually having an affair when he asks them how long they've been married and they give different answers—the lengths, one assumes, of their respective marriages.
* House does feature a subversion in the episode "One Day, One Room", when he takes down a patient that's freaking out and injects him with something. Cuddy is initially surprised that the patient still has his eyes open, and House gleefully announces that he didn't use a sedative, but a paralytic, meaning the patient is still in pain. And will stop breathing quite soon.
* House does it sometimes to confuse patients or family. For example, he explained to the parents of a teenager patient that the underlying cause of her problems is a growth in her abdomen, which they will remove in a very common operation. In other words, it's a pregnancy complication and they're performing an abortion. In this case, House is doing this specifically because he's legally barred from telling them the specifics.

* House does this all the time. Pretty much whenever House is shown doing regular clinic check-ups, you can bet that something that happens in the clinic will be co-incidentally be the key to him figuring out how to save that episode's main patient.
* House Dozel in general is specialized in axe use, whether their members can use the Helswath or not. From there alone we have
* House: Dr. Amber Volakis, otherwise known as "Cutthroat Bitch", is an example. First appeared in Season 4, Episode 2, died in Season 4, Episode 16 (the finale of that season). But a hallucination of her is vital to the plot of the following season's finale.
* House: Dr. Cuddy must have been one. She finished second in her graduating class and was disappointed with the result. Something similar happened when social services examined her house to determine if she was fit to be a parent.
* House: Dr. Gregory House takes a hit of LSD to cure his chronic headaches and experiences synesthesia.
* House: Dr. Gregory House was shown to have (apparently accurate) visions of his future patients' outcomes during a near death experience (a rather odd choice of subject-matter for a psychic dream). He chose not to believe in the supernatural anyway. Apparently forgetting all about this — and his other, also very trippy near-death experience — he deliberately gave himself a heart-stopping electric shock to see if he would have any visions, and declared there was no afterlife because this time he didn't.
* House: Dr. House becomes one of these when he briefly takes up cooking.
* House: Dr. House recruited Dr. Foreman because he had a criminal record for burglary from when he was a poor black teenager, which piqued his interests. House also needed a guy to break into patients' homes to check for drugs and such, since House does not trust patients to be honest about such things.
* House: Dr. House says to a female patient he dislikes, "If you're gonna kill me and rape me, please do it in that order."
* House, Dr. House's first encounter with villain Tritter begins when House sticks a rectal thermometer up Tritter's butt and leaves it there for several hours.
* House: Dr. House uses one of these to explain a child's odd behavior to her mother:
* House during the Cuddy-centric episode, she gave a big "YEEESSS!!!" when she got the 12 percent increase from the insurance company.
* House: During the Season 4 "reality show" where House was whittling down the candidates as the episodes went on, those who would not make the final cut were not told until the week of filming for that episode began.
* house elves are at their happiest when they serve wizardkind and fall into a severe depression when they are fired. Even Dobby, an eccentric by house elf standards, as he loves to be free, had to talk his employer Dumbledore down in terms of salary and days off, because he loves working more than being free. However, if a house elf really dislikes their master, they are able to differently interpret or even outright defy their orders.
* House episode "All In", House chases the medical case that he was never able to solve: a young boy comes in exhibiting the same symptoms as a patient House earlier lost.
* House episode "Brave Heart" concerned a patient who was convinced he was going to die of a heart attack. When he had his heart attack, Foreman called House in to observe so that he could get his answer. The man began screaming seconds after Foreman started slicing him up the middle.
* House episode "Damned If You Do" are treated as sympathetic but very quirky characters, and end up producing some pretty funny moments (like when we catch them watching wide-eyed a hunky-looking surfer on the hospital room TV, and hurriedly explain to the team that they were just looking for the remote that controlled the bed...).
* House episode "Euphoria," House suspects the current patient got an infection from the pigeon droppings they discover he uses as free fertilizer for his marijuana crop.

* House episode "Euphoria," when House suspects the patient's symptoms are caused by an infection he got from using pigeon droppings as free fertilizer for his marijuana crop.
* House episode "Failure to Communicate", a patient finds himself suffering from aphasia after hitting his head, saying a bizarre combination of synonyms, rhymes, loosely-connected words and similar-sounding words instead of the words he intends to say.
* House episode "House Divided", Cuddy is trying to sober up House's team.
* House episode "Let Them Eat Cake", House begins to grope Cuddy in the middle of a serious conversation.
* House episode "Merry Little Christmas", House refuses a deal (two-month rehabilitation instead of jail) and subsequently detoxes, overdoses on pills and is left in a pool of his own vomit as Wilson leaves in disgust. He then attempts to take the deal but it's been removed since.
* House episode "Mob Rules", a man repeatedly brings a toddler to the clinic because he keeps shoving stuff up to his nose. House eventually realizes that the toys (policeman, fireman, and fire truck) have something in common. He gets a strong magnet and gets out the first toy, a small metal cat. The kid was "sending in teams to save the cat".
* House episode "No Reason" has a patient with a swollen tongue that swells so much it fills up his entire mouth.
* House episode 'Simple Explanation' Kutner does not turn up for work and Taub puts forward an obviously fictitious cover story for him, saying that his dog is sick and he will be there by lunch. At lunchtime House looks at his watch and says "Look at the time. It's half past Taub-was-lying-about-Kutner."
* House episode "The Itch", House is bugged by a mosquito bite all day. That evening he chases the bug around his house with a rolled up magazine, accidentally breaking off a propane tanks valve and lighting his gas stove. The obligatory explosion is revealed to be all just a dream.
* House episode, there's a photo which shows House as a cheerleader in high school. When Cuddy sees it, she dismisses it as fake; however, at the end of the episode, it's revealed that while that specific photo was faked, House really was a cheerleader.
* House episode "Three Stories" depicted how House ended up with his limp.
* House episode where the mother of a preteen girl covers her daughter's ears so she won't hear the word "masturbation".
* House, especially with House and Wilson, and with references to Chase.
* House "Everybody lies". Possibly done in order to emphasize that Tritter and House aren't so different.
* House fanfic "I Am Not The Walrus" has one of these when House orders two shots of whiskey and a beer in response to another character ordering a beer. The other character says, 'How'd you know I was in the mood for a whiskey?" and House replies, "Oh, do you want one, too?"
* House fanfic "Invasion of the Cuddy Snatchers" House finds out he's been having sex with a shape-shifting alien who had been pretending to be Cuddy (and whose true form is never actually revealed); however, his reaction is "I've been having sex with an alien? Cool."
* House featured Allison Cameron making a Freudian slip-up in front of a documentary crew by saying "I love House!" When next we see her, she's frantically trying to find some way of qualifying that statement without making matters worse and failing. On first reveal she is talking to a mirror; on second reveal, her current boyfriend is on the bench behind her looking put-upon for being forced to listen to this.
* House featured a patient who turned up in the ER with no memory of who she was. When they find out she's married, she seems repelled by both her husband and by the life she turns out to have (having no memory of their history together, or of the events that catalyzed her choices). Naturally, this disturbs her husband, but the team explains that her memories are unlikely to ever return, while he thinks of her as his wife, she sees him as someone she's just met. He appears to take their

advice to court her and try to rebuild their marriage from the beginning, and she appears to be receptive.
* House featured a video game developer who succumbs to a medical complaint while testing his new virtual reality game, depicted using very expensive-looking CGI. Not only do House's team find an excuse to give us another look by playing the game themselves while supposedly investigating his symptoms, but the patient is also obliging enough to develop hallucinations that incorporate similar CGI elements. In addition, whenever any future episodes show characters playing a video game, it is always this one. The controls have inexplicably been mapped from the original virtual reality system to standard console controllers while the graphics remain as pre-rendered shots from camera angles that would make gameplay very difficult, but at least it gives the show an excuse to reuse the CGI footage again.
* House featured a young boy who believed he'd been abducted by aliens, and he had the bleeding anus to prove it. This obviously led the team to believe he'd been sexually abused, which (predictably for House) turned out not to be true.
* House features a young girl diving in a competition. Standard procedure with the claiming of slight illness and shots of insides. She dives in, emerges and finds the judge on the floor, vomiting blood. After the title sequence, it transpires the entire audience and swimmers are being tested for meningitis. It's at this point the girl turns up again, with bizarre symptoms which aren't meningitis.
* House features this trope, as the patient of the week and their relatives fail to provide crucial medical details and end up being misdiagnosed.
* House Fey: A fairy who lives with and helps take care of a human family.
* House Fire: A plot revolves around a character's house getting damaged/destroyed in a fire and dealing with the aftermath.
* House Flipper and removes the flickering lights and supernatural phenomena, but keeps the spooky music.
* House Flipper DLC, instantly destroys garbage in a wide area and can be useful for clearing large quantities of trash quickly. It also needs to be refueled regularly, destroys furniture items as well, and will also obliterate your lawn if used outside.
* House Flipper DLC the yards can get in on the "fun" too with piles of pallets and boards, concrete bags, gravel debris, and molehills.
* House Flipper: Jimmy Traitor and Raphael Erko. Jimmy's bio lists his likes as "parties, alcohol, girls" and both of them want a double bed so they can share it with a female companion. Jimmy also mentions wanting a sauna in his house so he has an excuse to ask his female friends to walk around in a towel.
* House Flipper: Many of the descriptions for houses and jobs conveniently fail to mention major problems, or downplay the amount of work that will actually need to be done. Of course, anyone who's worked in construction or real estate, or who has bought a house before, will tell you that this is depressingly true to life. A few specific examples:
* House Flipper starts the player out with barely any money, and living in a tiny shack. Through hard work, however, you'll end up flipping houses worth hundreds of thousands of dollars, and being worth millions yourself.
* House Forrester wipes out all of House Whitehill (except for Gwyn) for siding with the Boltons.
* House frequently approaches this trope, although the characters usually have become unconscious or lost muscle control. In season 2, for example, two consecutive episodes ("Need to Know" and "Distractions") started with the main patient driving a vehicle and dramatically hitting the accelerator at a key moment from their illnesses.
* House fully encourages the use of drugs in some cases in order to reach an epiphany he thinks is already trapped in his mind. Well, drugs, and in one case, electric shock therapy.
* House Goliath mentions that, due to years stimm-abuse and selective breeding, many members of rival Houses consider the massive Goliaths to be a strain of abhuman.
* Houseguest), putting his intelligence in question as well. Unlike some of these

examples though, the mobsters might be inept but their presence is what drives the plot of the movie.
* Houseguest. Sinbad is on the run from the mob and finds Phil Hartman and his family waiting to pick up his childhood friend, so Sinbad impersonates the friend and goes with them. When he's caught, it fortunately turns out that the friend grew up to be a jerk.
* Houseguest, Sinbad's character is posing as a man known as a top-notch dentist. At one point, some other dentists ask him to demonstrate his technique on a tooth extraction. He starts off by accidentally washing his hands with Novocaine, and things just go downhill from there. He does somehow manage to get the tooth out, though.
* Houseguest who (at least at first) doesn't care about improving the lives of the people he meets, but ends up doing so anyway.
* House had a black eye he'd gotten while boxing, so they just wrote it into the script that someone had punched House. Given House's personality, it wasn't much of a stretch.
* House had a group of 30+ doctors following around Dr. House, the permanent characters were not listed in the opening credits of Season 4 episodes.
* House had a patient like this. A boy had a few groups of cells throughout his body that were the result of two fertilized eggs fusing together immediately after fusing to the uterine wall.
* House had a young married couple who both turned out to share the same rare genetic disease... because unknown to the couple, the man's father had slept with the woman's mother and they were half-siblings. On top of that, the half-brother wants to stay together; while the half-sister is disgusted. The episode ends without resolving the situation, leaving the brother/husband hoping that she'll come back while Foreman (who supports the relationship) keeps him company.
* House had done this earlier in the finale for himself on awakening with a concussion and retrograde amnesia.
* House. Had he simply ignored/put up with House's attitude, Vogler would've likely gotten full control of the hospital with little to no resistance.
* House had House insulting a clinic patient. It backfires later when he discovers Tritter is a cop.
* House had Hugh Laurie play both the piano and the harmonica AT THE SAME TIME. How's that for show off?
* House hallucinates having had a one-night stand with Cuddy after she helped him Going Cold Turkey
* House Harkonnen also makes a point of poisoning all of the captured Mentat Thufir Hawat's food, then giving him the antidote later to keep him from betraying them.
* House has a dream sequence with House and Wilson raising Cuddy's daughter in a sitcom setting, complete with laugh track.
* House has also forgiven some bad behavior from Wilson, such as not telling him he'd cured a patient, thinking it would teach House humility, but instead plunged him back into Vicodin abuse.
* House has a patient who has been incapable of falling asleep for several days. When we first see her she is in bed, eyes wide open, as the sound of the faucet seems thundering to her.
* House has on multiple occasions made snarky jokes about viewing porn in his office and masturbating. Given most of the walls are made of glass one hopes he is joking. Being that he's House, who knows.
* House has several of these between House and Wilson. In season 2's episode "Clueless", they were sidetracked from discussing a patient's illness by debating whether or not a music room and a conservatory are the same thing.
* House has shown narcissistic tendencies, which has not escaped the notice of any of the main cast.
* House has the last scene playing a song on House's iPod, then accidentally cutting to the Hava Nagila. Then, after turning off his iPod, the song returns as background music.

* House has the main cast (from the first several seasons) huddled around presumably the point of view of the patient.
* House has the non-word "swoft" filled in and realizes she's not as smart as she claims to be.
* House has this gem, ending with a blank stare that truly makes the moment:
* House having been given a drawer in his season 5 sleepover relationship with Cameron.
* House He also said it was probably the mother's fault, which usually is in more real cases of bullying or teenage rebellion.
* House he is all set to openly tell his supervisors about it. They gets better.
* House He leaves a ransom note made of letters cut from a newspaper taped to House's wall. When House sees this, he barges into Wilson's office to reclaim his guitar. Wilson smugly proclaims his innocence, then signals the conversation is over by opening his newspaper... the paper with all the bits cut out, causing House to do a (hilarious) double take.
* House he'll add a moment of unbelievable jerkassery. Some people (in story and out) believed that his crankiness is because of his leg problem — and then it's shown that he was a jerk even before that. He has later gone through therapy, gotten clean, and has become slightly but consistently less of a jerk who even starts subconsciously manipulating others to their benefit, rather than his own.
* House himself and Cuddy, his boss, started a relationship. She's a director at Plainsborough Hospital and House's direct superior.
* House, himself, has a more humorous example during one of his rare
* House himself, however, is horrible to work for. Several characters have noted that prolonged employment by—or contact with—Dr. House has a corrupting influence on the soul. In early Season 4, Foreman can't get work anywhere else because of the behaviors he's picked up from House.
* house hippos. Basically the point was to get kids to question what they saw on TV. The result was a generation or two of kids who will jokingly blame house hippos for missing mittens.
* Household appliances and kitchenware can often be this if given by a man to his wife/girlfriend, due to the
* Household Gods: As a result of her experience in the past as Umma, Nicole stands up for herself more, pushing to get the job she deserves and her ex-husband's delinquent child support.
* Household Gods) but Nicole stops that, not liking the idea of being a pimp.
* Household Gods: Nicole, a modern woman from the late 20th century, is sent back to the 2nd century Roman Empire. She knows very little of how things are done (hence her over-romanticized view about ancient Rome, which prompted the wish to begin with) and struggles mightily with adapting. The people around often think there's something off with her as a result.
* Household Gods: Nicole frees Umma's slave Julia upon becoming Umma the first chance she gets since as a modern woman she finds slavery utterly abhorrent.
* Household Gods: Nicole is sent into the body of her ancestor, a 2nd century Roman woman, and finds herself stuck without a way to get back.
* Household Gods: Nicole is sent into the body of her ancestor, Roman woman Umma, in the 2nd century. Her body meanwhile is in a coma the whole time.
* Household Neurotoxins on Google, implying that she is not as well-intentioned as she seems.
* House: House accuses Cuddy of being this for Vogler in Season 1, even name-dropping the original. Vogler buys his way into the hospital board's chair with a $100,000,000 donation, and when he starts using his position for ethically questionable practices, the board (and Cuddy) adopt a policy of appeasement so as not to lose the money. Cuddy eventually comes around when Vogler starts firing board members for voting against his motions.
* House. House actually did have a The One Who Got Away in Stacy, whom he rejected anyway after realizing that he could never love her like her husband Mark could.
* House: House and Cuddy do this when Cuddy is forced to temporarily share House's office. This includes dividing the desk into two sides.

* House: House comes home to his apartment trashed and fears a burglar, only for his nemesis Detective Tritter to appear with a search warrant and a massive number of confiscated painkillers. He says he almost didn't bother coming but figured House would be too vain to bother getting rid of them when he came under scrutiny of trafficking.
* House. House decides to call in Wilson for a second opinion just so he can appreciate them as well.
* House, House decides to try to break up Cuddy and Lucas after deciding that he might just be interested in the former.
* House- House informs his potential hirees of a patient and hands out tasks to about 2/3 of them. Amber asks "What about the rest of us?" Cut to them washing House's car. In regards to people actually getting him coffee, Chase and Cameron each did that a bit. Also he sent Foreman's girlfriend to get him coffee in "Sports Medicine".
* House, House is interrupted from a conversation when some nondescript Christian missionaries knock on his door. Before slamming the door in their faces, he says, "Oh, you're selling religion. No thanks, I just bought loads of Islam last week."
* House: House's hallucinations of Amber turn out to be this when it is revealed that "she" gave him a wrong diagnosis on purpose.
* House. House uses some kind of heat sensor to detect that Cuddy got warmer in his presence and thus is actually attracted to him. Or maybe just angry. Or both.
* House, House uses this to prove that the sick passengers on a plane who were thought to be suffering from a deadly outbreak of meningitis (which started when one passenger exhibited real symptoms of a meningitis-like illness) in fact are simply under the effects of mass hysteria and psychosomatic illness. He announces that the original sick passenger did indeed have meningitis and that they may be infected if they have any of a long list of symptoms, including the nonexistent symptom "trembling in the left hand." Cue a planeful of suddenly shaking hands.
* House: House, Wilson and a clinic patient are watching a baseball game in an exam room when it comes up that our favourite diagnostician has a date with Cameron. Cut to House exiting the room while Wilson and the clinic patient sing: "HOUSE AND CAMERON, SITTIN' IN A TREE, K-I-S-S-I-N-G!"
* House how that group likes fighting for its own sake and will choose the right side when everyone else is against it.
* House Hugh Laurie, create an unstoppable sonic weapon. As you expected it might, the weapon, played by Kate Bush in a ghost outfit, rampages around and kills everyone horribly. Hoorah!
* House. Hugh Laurie is 6'2.5", while Lisa Edelstein is 5'6", putting them 8.5 inches apart.
* House Husband: A husband who stays at home and does housework while his wife goes to work.
* House Husband: A man stays home and cares for the house while the wife works.
* House Husband: Men have only recently become accepted as homemakers and caregivers, the traditional "motherly" roles, in contradiction to the literally centuries of assumptions that the only personal value a man could have in a family setting was as breadwinner.
* House II: The Second Story, someone in a haunted house full of portals thinks he hears something ominous, but it's just a harmless dogerpillar. He is then jumped by Mayans.
* House II: The Second Story, we have Bippy, the dog with a caterpillar body that was found in the Triassic period.
* House I know it looks like we're cleaning dishes, but actually we're having sex."
* House: In one episode, the title character triumphantly demonstrates a tick that was causing the Case Of The Week; in a close-up, one can clearly see it has six legs, as every insect does... but ticks are arachnids, and, like spiders or scorpions, they have eight legs.
* House: In one of the petty battles between Cuddy and House, Cuddy replaces House's Vicodin with laxatives. Being House, he finds a way to amp up the stakes:
* House in "Recession Proof" from season seven, when the titular character flops,

drunk and soaking wet, on to a couch with Cuddy, head in her lap.
* House in Season 3), but their arcs were resolved rather abruptly, as the creators of the show were well aware that a villain did not really fit the show's dynamic.
* House Inspection: A character must fix their house before an inspector comes.
* House: In "The Dig", the team treat a man who they believe to be a hoarder after seeing his house, whose illness is a result of this. When they search his house more thoroughly, they find his wife, even more sick than her husband and the actual hoarder.
* House. In the episode "Locked In", House is hospitalized after an accident. The patient in the next bed has locked-in syndrome, but his doctors don't recognize it, recommending him for organ donation.
* House in the first season, an episode opens with House telling Vogler he has liver cancer and a better chance of dying than living, but House assures him they'll do everything they can, elating Vogler, who finally admits out-loud that House is damn good and is humbled by this treatment after spending so much time torturing House because of his "unorthodox" ways. Of course, House is daydreaming.
* House in the later seasons, to the point where the "soap opera" part of the plot in several episodes was entirely about Taub, or Taub and Rachel, or Taub and his baby mama, or Taub and his daughters.
* House in this case because he may have been hallucinating due to his alcoholism (an early theory that was ruled out when he presented other symptoms).
* House: Inverted. Season One box set features the main cast looking down at you in a circle with a surgical light over all of their heads as if you were a patient.
* House involved the medical staff at the hospital being called to the scene of a disastrous building collapse. One woman is trapped underground with heavy debris trapping her leg. The only way to save her life is to amputate her leg, which House volunteers to do and does successfully with minimal tools.
* House is also able to work out that somebody spiked his coffee with narcotics when he realizes his mouth is dry.
* House is forced to apologize to Cuddy's mother: "I'm sorry... that we saved your life," he starts, and then steers it back to a straight apology: "...in the way that we did." Wilson gives the apology a B+.
* House is like this, with "badge" replaced with medical license. On top of being generally misanthropic, he makes crude racist remarks—despite his background and linguistic abilities being quite cosmopolitan.
* House is nevertheless absurdly calm when nearby patients show catastrophic symptoms. For example, in the 4th season episode "97 Seconds", House watches a clinic patient stab an electrical outlet to electrocute himself. Fitting his personality, he's more curious than concerned, first saying "Interesting." before doing anything else. After calling for a crash cart he pokes the man's lifeless body with his cane and says "I didn't do it."
* House is not fond of physical contact and often will refuse handshakes, regardless of who they're from.
* House is this towards his best and only friend Dr. Wilson and any man interested in Dr. Cuddy.
* House is trapped in a burning building and dies when the building collapses on him. Paramedics pull a body out of the rubble and confirm that the body was indeed House. At his funeral, Wilson receives a text message from House during his speech. It turned out that House actually faked his death so he could be with Wilson during his final 5 months instead of spending it in prison.
* House is used called 'House', composed by Scott Donaldson and Richard Nolan for the show. Once you've heard the Massive Attack version of the credits, the other one will really grate, because the cuts in the credits are perfectly timed to fit with "Teardrop", and they are a lot less powerful with a different song.
* House. (It eventually comes to light that these characters-of-the-day are fifth graders, which is actually about the right time for kids to begin putting aside their "girls/boys are yucky" feelings from when they're younger.) The kids then manage to show that they're much more mature than House when it comes to handling relationships.

* House It's never made clear whether he stopped claiming he was in Nam - it's implied, when he's telling House what really happened to his arm, that he just finds it easier to let people think it was Nam rather than deal with the questions that the truth would spur.
* House: It's something that recurs with some regularity; House finds a perfectly rational explanation, but it's a big enough coincidence that the believers aren't convinced that it's not the supernatural at work.
* House, it's usually House and Wilson usually engage in a war of verbal one-upsmanship every episode.
* House Jews in the cast—although the absence of East and South Asians is even more glaring.)
* House: Juan "Alvie" Alvarez, a friend the title character made in rehab, is a variation. He's actually from Puerto Rico, which makes him a US citizen, but he doesn't have the papers to show it, endangering his planned move to Arizona.
* House kept upping his salary until he was the most highly paid dramatic TV actor in the world.
* House, "Known Unknowns", House and Cuddy at the conference's '80s party.
* House Kurita forces were defeated with Inner Sphere subterfuge specifically exploiting the Clan rules of engagement.
* House Kurita prefers PPC weapons, Gauss rifles, and later their homegrown Omnimech technology, banking on long ranged power to win the day.
* House, Kutner sets fire to a patient with a defibrillator, earning him the name of "professional defibrillist" from House. He also shocked himself unconscious when he used a defibrillator on a wet patient. He seems to like his nickname though. Despite being promoted as a less-drama-more-medicine medical show, House's team has about a 50% chance of incorrectly trying to shock a flatline instead of administering the proper medications.
* House Lannister as a whole falls into this by the end of Season 4. They've won the War of the Five Kings and now rule Westeros, but the kingdom is a mess, and they are millions in debt to the Iron Bank of Braavos, casting serious doubt on their reputation for repayment and have to rely heavily on the Tyrells. The king whose rule they fought to cement has been assassinated and the next king is just an untrained boy. The Riverlands are in ruins and the North is
* House Lannister musters 60,000 men when the hostilities begin and every time the Starks and the Tullys shatter a Lannister host (which happens in several battles), they just raise another. When the Tyrells come into the war on the Lannisters' side this is literally true, since the Reach is (in terms of area) the largest region of Westeros after the sparsely-populated North, as well as the most fertile and densely populated. Best summed up by the opposition in Season 3: Edmure Tully tells Robb Stark that they've been inflicting more Lannister casualties than they've taken, but the angry retort is "WE NEED OUR MEN MORE THAN TYWIN NEEDS HIS!" Of course, even though they've won the war, the heavy casualties ended up being proportionately high enough to leave them tapped for manpower and weakened for garrisoning Westeros.
* House Lannisters (each branch thereof) firmly believes that throwing money at a problem will certainly either fix it or, at the very least, shut it up. But, those who throw good money after bad (like Tywin's father or Cersei tried) find this not to be true. Most spend their money and monitor it working for them. It mostly works out. Unless they're dealing with
* House Liao is the sneaky and pragmatic faction, primarily employing ECM jammers, stealth suites, and economical long ranged weapons.
* House Liao is the textbook Subversive Inner Sphere faction. Favoring lighter, faster units as well as use of sneaky stealth armor and electronic warfare equipment, House Liao will often lose a straight-up fight against most foes but can sneak objectives or critical kills out from under the noses of their enemies. House Liao has managed to streamline the production of iconic flexible lightweight designs such as the
* House Made Of Dawn narrative, describes all of Abel's childhood in this fashion, though it's blatantly obvious the "you" is just Abel.

* Housemaid Rosanna Spearman is hopelessly in love with protagonist Franklin Blake in
* House, making calls about things like a dying cancer patient getting a C-Section, purely because he can threaten to withdraw a 100 million dollar donation if everybody doesn't say "How high?" whenever he says "Jump!"
* House manifests his arrogance in different ways (he prefers putting others down to puff himself up), but he justifies his attitude by always being one intuitive jump ahead of the rest of the staff. It makes it very difficult to train his staff, because he'd rather cut them off at the knees than let them draw their own conclusions. (House's worst nightmare, according to "No Reason", is his subordinates solving the cases before he can.) His behavior is appropriate given the connections between House and Holmes (see Literature section above).
* House Marik is the oddball—their combat doctrine is unfocused, but they show a distinct preference for lasers and unusual missile launchers.
* House Martell is effectively extinct. The only Martells by blood are the Sand Snakes, but they're illegitimate and much-despised kinslayers. In Season 7, two of them are killed off by Euron Greyjoy while the third one is dying of poison in the Red Keep dungeons. While it is confirmed that Oberyn has eight bastard daughters, the five remaining ones are too young to take up the leadership, which left their House and rest of Dorne in a power vacuum. In Season 8, Varys confirms there's a new Prince of Dorne; however, he's never named in the show and it's unknown if he's a distant member of House Martell.
* Housemates, during a visit to the Avengers mansion, the Avengers, minus Tony Stark, find a secret cabinet in the back of the DVD case.
* House — The number of times they give immunosuppressant steroids to people who end up having infections, thinking they have some autoimmune disorder, is amazing.
* House, M.D. fanfiction "Woman" has House and Cameron having a bet by trying to predict the storyline of one of House's soaps that he watches.
* House, M.D., from "The Honeymoon", House doesn't appear to have many friends.
* House, M.D. Hugh Laurie) calls a clinic posing as an English doctor and is told his accent is obviously fake. Justified in that Laurie was deliberately exaggerating his accent for the scene.
* House, meaning "obsidian heart, arbiter of reckoning," is responsible for maintaining the House's honor. In the words of Eamon Flannigan:
* House meets a doctor when he's looking to replace his fellows and, in flirting with her, offers her a
* House mildly), Chase reaches for his glass, presumably of champagne, and downs the whole glass in one gulp.
* House moment between Thirteen and Taub, with their in-game avatars seen discussing the diagnostic while blasting monsters. Later, the patient also hallucinates the decors and characters of his game supplanting the hospital and staff, respectively.
* House, most of the time inspired by Dr. Wilson. It's actually stated on the show that House will seek out Wilson to talk about unrelated subjects because it helps to jog his mind and inspire Eureka Moments.
* House), much like how many Americans volunteered to fight for Canada and other Allied countries before the USA entered WWI and WWII.
* House Music and progressive house were there at the start, then big room house showed up for 2013, and in 2014, the commercial success of Disclosure brought deep house into the mix.
* House Music as a whole. That is, 128BPM. There is, of course, significant variance, but they never stray too far. Most electronic genres are similarly centered on a particular tempo.
* House Music in her single, "Vogue", the genre remained popular throughout the decade, spawning sub-genres like deep house, rave, and acid house.
* House Music, was a critical and commercial success (Hitting number one on the UK Singles Chart, and charting highly in Europe, North America, and Australasia), and has been hailed as one of the best dance songs ever composed.

* house name. The house name is usually omitted in introductions, but the crest is worn on their metal sashes. A couple variations have been seen:
* House needs to find out if a man vomiting with sores and severe headaches is suffering from meningitis, or something else. If it's the former, they're all dead. Turns out, he's got decompression sickness, and everyone else just has mass hysteria.
* House Nothing happens, of course, and he opens his eyes again and says, "See?"
* House, notices a symptom in one of the actors. He then kidnaps him in order to cure him.
* House. Not only is he the greatest diagnostician, but he has also mastered all the manipulative aspects of human sociology and psychology. In addition, he speaks several languages, plays a mean guitar, and has the expertise needed to turn his own apartment into an ICU. Despite all this, he still manages to have no social skills, has no friends, and is an unapologetic, drug-addicted criminal.
* House objectifying his hallucination of Amber, he must have feelings for her.
* House of 1000 Corpses Captain Spaulding, who turns out to be part of the killer family.
* House of 1000 Corpses has a group of teen being massacred by hillbillies on halloween
* House of 1000 Corpses, in a brief moment where Baby (played by Rob's wife, Sherri Moon-Zombie) is getting nasty with a full-blown skeleton, having it grope her breast.
* Houseof 1000 Corpses. In the former, Otis guns down Denise's father, then he skins off the face and chest, wearing it to taunt the captive Denise, even trying to kiss her. In the latter, Otis holds two men at gunpoint in the desert, before a fight breaks out and he kills one and injures another. He grabs the wounded one after he shot him in the throat and uses his combat knife to skin off his face while he's still alive. He then wears the face in front of the man's wife, then forces her to wear it.
* House of 1000 Corpses running a literal nightmare fuel station: a gas station with a spooky ride attraction based on local legends built onto the side (free fried chicken with each ticket!).
* House of 1000 Corpses. This may be because he's completely covered in burn scars and can't hear very well.
* House of 9. She's so innocent that she was one of the very few who did not succumb to the temptation to kill for the prize money. Even in her final confrontation with a homicidal maniac, she attacks in self-defense and only kills him by accident.
* House of Anubis Additionally, he also sold Ms. Andrews the same dress too, as an extra little gag before things got serious.
* House of Anubis, after he was revealed to be Eddie's father. He tried hard to rebuild their relationship, but was a bit clueless, making it get awkward for the both of them at times. However, he wasn't a complete moron, he was just not used to being a father.
* House of Anubis: After Nina, Fabian and Amber successfully get the information they need to play their "hopscotch" puzzle, Nina and Amber high-five. Fabian wants one, too, because he played a minor role... but Amber decides he only deserves a "three, maximum".
* House of Anubis after Patricia accidentally sat on the school speaker button, while the two of them were in the principal's office, and they accidentally revealed that Eddie was the principal's son to the entire school. When they got out of the office everyone had gathered to mock Eddie.
* House of Anubis, ancient secrets haunt Anubis House, and it seems to be a hotspot for ancient evil activities, as well as endless dangers the students face daily just to sometimes simply survive. The school WAS only started for the teachers to succeed in their plots of achieving immortality...
* House of Anubis and completely sick. When Mara comes in to talk to him, he is initially able to hold a normal conversation. But soon after, Jerome frantically asks Mara to get him a bucket; she does so just seconds before he throws up.

* House of Anubis and needed to get her out of the way. When ostracizing her failed, and they believed she attempted to go after Patricia, she was instead locked away in her bedroom alone, with a sign on the door warning people that KT was "dangerous" and "crazy". This failed for two reasons: Patricia was the actual Sinner and had successfully turned everyone else against KT, and Willow let KT escape without even knowing what was going on. By the time they all realized they were wrong about KT, it was too late to fix everything.
* House of Anubis at best, using his brains for trickery and amusement. Alfie, meanwhile, is a lot less intelligent by comparison, but also less mean, getting along more easily with the house members and being the one manipulated by Jerome rather than an equal partner.
* House of Anubis before kissing at the end. This is a particularly controversial pairing because the two of them had barely interacted in the show before they were paired together.
* House of Anubis believed that it became overpowered by the romance in the second season, despite the mystery being the main plot. It got to the point where the characters themselves seemed more interested in romance than the life-threatening curses they were under.
* House of Anubis. Despite the fact that he does much of the research and saved most of this friends from danger on numerous occasions, he has been continuously pushed around by everyone, most notably his own crush and (ex) girlfriend, Nina Martin. It gets to the point where he struggles to be more assertive and demand his respect for the things he does for the others, resulting in this one line:
* House of Anubis developed this trait in the second season. Whenever she was given some sort of authority, be it being in charge of setting up the school dance, being the main editor of the school blog, or being in charge of the Senet game, she had a tendency to get very pushy and stubborn, keeping everyone working and making sure they were doing things her way. Fabian eventually calls her out on this.
* House of Anubis, Eddie calls Patricia "Yacker." In a strange twist, this actually started as an insult, then took on a new meaning when they started dating.
* House of Anubis, Eddie intentionally drops Patricia, causing her to hurt her hand. When she complains about it before the party, Eddie massages her hand to try and make it feel better, which she admits does actually help. This helps to warm Patricia up to him for the rest of the party, but it unfortunately sours again by the next day.
* House of Anubis, Fabian does this to Jerome in the first episode, following a remark Jerome made.
* House of Anubis- Fabian does this when pressured to ask Nina to the prom. It's the expressions from all his friends, especially Patricia's, that sells it. Here's the entire conversation:
* House of Anubis: Fabian's the only character whose parents had never even gotten a single mention during the course of the series. Naturally, fans are interested in exploring his missing backstory, often trying to come up with a reason why he never mentioned his parents.
* House of Anubis: Following the discovery that police officer Sgt. Roebuck is a member of Victor's Secret Society, is therefore untrustworthy, and that he'd openly lied to Patricia about Joy's safety and whereabouts, Sibuna had developed a general mistrust of cops. On two separate occasions afterward, a newbie would make the suggestion to take the situation to the police, and would get immediately shot down by the more experienced Sibuna members.
* House of Anubis for all of season one and part of season two. They did date, but Alfie was still pulling most of the weight and they eventually broke up. Then, as Alfie fell for another girl...Amber grew feelings for him and was now the one chasing after Alfie.
* House of Anubis, gaining glowing red eyes for a second or two when they get angry or feel particularly "evil".
* House of Anubis got involved) but it still manages to remain a secret. Which is odd, considering the students talk about it in the middle of the school like it's homework and not a life-threatening mystery.

* House of Anubis had many, at least one for every couple on the show. Most infamous, though, would probably be Joy, who made no secret of her love for Fabian or her dislike for him and Nina dating.
* House of Anubis: Happens when Patricia loses her voice and types up stuff to tell Eddie. Includes things like, "You should apologize for whatever cheeky comment you just made" and "Don't pretend like you have a packed schedule". Which of course, he did.
* House of Anubis, he still seemed to care about her. He hasn't been on the show since season 1 but this pairing is still wildly popular.
* House of Anubis: In an episode following Patricia's kidnapping and ensuing rescue, she has a minor PTSD freakout when the Sibunas get taken to and locked in Victor's office under mysterious circumstances. In response to Patricia demanding she be let out, Amber jumps on the bandwagon and claims she's "Too young and too pretty to die."
* House of Anubis- including the descendants of his archaeology team, who'd raided the tomb and been responsible for the curse.
* House of Anubis: In one episode, Eddie talks Jerome into a bet that involves Jerome eating several gallons of creamed carrot, all in one sitting. After a montage of Jerome forcing himself to choke down the food and nearly throwing up at the end, we next see him lying down in his bed, feeling sick and exhausted.
* House of Anubis: In one episode, Sibuna is discussing the possibility that KT is working for Victor. When Alfie jokingly calls her evil and starts leaning a little too close to Fabian while laughing, Fabian nonchalantly shoves a roll in his mouth to quiet him up.
* House of Anubis in season 2. She had a tendency to get mad at her friends for trying to help save her life, because it was putting themselves in danger, too.
* House of Anubis: In season 2, the students discover a secret antechamber in the cellar, which not even Victor or the teachers knew existed. This antechamber leads to a series of trap-filled tunnels guarding an important treasure, but the antechamber is treated as a separate place in-and-of-itself, a secret study room for Frobisher-Smythe.
* House of Anubis is so pure that, no matter what they tried, Miss Denby and Robert Frobisher-Smythe couldn't get her to sin and turn into a Sinner.
* House of Anubis it, and they wanted to keep Rufus from getting it. Jerome soon solved the problem by throwing it at the ground near Rufus himself and bolting, allowing Sibuna to escape while Rufus was attacked by the swarm of sandflies.
* House of Anubis. It once belonged to the Gods of Egypt, until Anubis' lover Amneris stole it. He got so angry that he broke it into seven different pieces, but gave the chance for it to be rebuilt- once every seventy-five years, a descendant of Amneris could rebuild the cup. The search for it, and the race to build it, is what drove the first season of the show.
* House of Anubis it seems that Joy's name will never fit her life, considering she was kidnapped, the boy she loved for a while rejected her constantly and rather harshly, her friends all seemed to like Nina more, and when she finally fell in love again it was ripped away from her at the end. No wonder her nickname is Joyless...
* House of Anubis, Jerome is caught as the dollhouse thief and is forced to explain what happened to the Sibuna members. After telling Amber and Alfie, he went to go explain his situation to the others... only for Amber to jump in and say everything before he could, each time he tried to speak, making him really annoyed.
* House of Anubis Jerome refers to the search for the gem as a 'bonding thing' with his father.
* House of Anubis, Jerome was quite uncaring and sneaky, and did things only for his own benefit, usually monetary. The first thing he did when he decided to meet Rufus was take money from him in exchange to spy on Sibuna. He also set up "Donkey Day" in season 2 to get money, but it was played with- he needed to pay off a Private Eye he hired to find his father, so it was much less selfish this time around.
* House of Anubis- Joy went through a phase of this during the beginning of season

3 when she was trying to get over Fabian and re-invent herself and found Mara and Willow's sympathy to be annoying.
* House of Anubis keeps various stuffed creatures, including his raven Corbierre. Every one of them is creepy as heck.
* House of Anubis — In Season 2, Eddie brings this up when he thinks Patricia and Alfie might be into each-other, stating that it might be what Alfie is thinking.
* House of Anubis — Patricia seems to get in trouble for basically everything she does, even if it's something other characters do frequently.
* House of Anubis Mick are a couple at the beginning of the series; however, despite sharing their ditzy personalities, they still end up breaking up when they realize they have no common interests.
* House of Anubis: Mick Campbell is a jock, yes, but also thought to be one of the sweetest and funniest people in the house. His close friendship with the nerdy, unathletic Fabian proves he's a good guy.
* House of Anubis: Miss Denby catches Patricia sneaking around by the gatehouse with Denby's bag. In the next scene with them we see Denby and Patricia were simply 'having a nice tea' while Denby was interrogating Patricia in the nicest manner possible. Patricia was visibly horrified the entire time, because who knows what Denby would have done if she really tried to flee or fight?
* House of Anubis next to Alfie, one would expect him to let her down gently like he'd done all throughout season two. Instead he rejected her in an incredibly harsh way, leaving her utterly heartbroken and to quit Sibuna.
* House of Anubis of "Want a bite?" while showing off his fake vampire teeth.
* House of Anubis, once someone becomes a sinner, they obtain red eyes when they are feeling particularly "evil". It's merely for a second.
* House of Anubis: One episode has the Sibuna characters admitting and discussing their fears. Patricia's turns out to be feet, which immediately garners weird looks from the others, who are afraid of things like bugs, skulls, and tight spaces.
* House of Anubis Patricia's fake initiation ceremony for Nina included both having to steal from their house father, to sneaking into the forbidden (and rumored to be haunted) attic at midnight, with the goals of getting Nina scared, humiliated, and into trouble. In the end she even locked Nina up there.
* House of Anubis. Pretty much every pairing had this happen to them before.
* House of Anubis Season 2. The characters discover an old dollhouse in the attic, and though it's rather innocent, it's considered creepy due to it being an exact replica of Anubis House, which is considered creepy enough as-is. Throw in the fact that the ghost of Season 1's Sarah Frobisher-Smythe ends up possessing it, giving clues often by moving the figurines around the house or making it light-up and smoke, it's just a bit unsettling.
* House of Anubis season 3, KT is the only person not paired off with anyone. She doesn't mind, though.
* House of Anubis she had for accidentally poisoning Alfie. She returned at the beginning of the very next episode.
* House of Anubis. She has his manipulative skills and knows how to use them, which causes a bit of riff between them, at least until their relationship with their father brings them closer as well.
* House of Anubis. She tried to avoid him all together because she never had a boyfriend before.
* House of Anubis that Amber had a crush on Jason Winkler, especially by the way she was looking at him in the premier. It's a different case from him and Patricia down below, as he never really showed signs of liking her back beyond just being a nice and caring teacher.
* House of Anubis that greets them proves Eddie's fears correct, though the embarrassment eventually subsides as the two grow closer.
* House of Anubis: The Sibuna members, who team up in each season to uncover the mysteries of the house and stop the antagonists in their evil plans. The team was nearly a FMB barring gender restrictions in seasons 1-2, but roster changed a bit in season 3, with two members leaving and two new members joining in their place

making it a traditional band.
* House of Anubis to Patricia and Eddie. As such a beloved couple, the fans were outraged and confused when they broke up over the summer with no given explanation. It's speculated that Patricia broke up with him because the relationship was moving too fast, but it was still jarring to the fans.
* House of Anubis traits took a lot of backbone he didn't have before, considering how earlier he was mainly working to just not upset her or Nina.
* House of Anubis- when Patricia gets kidnapped by the villian, she still manages to keep being the strong character she is and does everything she can to escape, from leaving a clue behind when she was taken to trying to knockout the villian. Despite this, it is her friends who end up rescuing her. (After two of them have to be saved themselves after a first failed rescue attempt). Immediately following her rescue Patricia goes on to furiously blackmail one of the teachers into telling the secret about her missing friend.
* House of Anubis when she and Joy tag along to see how the date's going, with Patricia having to pretend to be Piper pretending to be Patricia when she's caught trying to eavesdrop. Eventually, they get caught in the act by a very unhappy Mr. Sweet.
* House of Anubis where everything from important information to kisses are interrupted on almost a daily basis, and the characters are forced to try again later, often to the same result.
* House Of Bamboo: An American military policeman in Japan convinces the widow of a murder victim to pose as his girlfriend, and she eventually falls in love with him.
* "House of Bloo's Part 1": Where Bloo opens the gate and walks into Foster's.
* House of Broken Mirrors: Where someone gone mad from loathing their appearance has smashed all their mirrors and left them.
* House of Cards-esque British MP who schemes his way up to being Prime Minister via various sneaky and some downright evil acts.
* House of Cards for more power. In Shakespearean tradition, he frequently gives snide, sneering and self-satisfied asides to the audience, letting the viewer see inside his twisted mind. Also applies increasingly to his wife Claire as she gets more and more focus and power. They're both pretty damn evil, really.
* House of Cards, Frank Underwood's alma mater is "The Sentinel," which is obviously a thinly-veiled version of the Citadel, the military academy of South Carolina. We see it when he goes to the dedication of the library named after him.
* House of Cards Frank Underwood throws out his speech on the occasion of having a library named after himself in favor of a heartfelt thanks to his old friends.
* House of Cards, is just as much of a political schemer, and just as willing to resort to murder to get what he wants. And he's still considered a personal friend of the (apparently genuinely non-corrupt) President, as well as being quite popular with the public.
* House Of Cards novels. Both of the first two books end with Urquhart defeated (in the first he jumps to his death on being exposed, on the second he is left facing an election defeat), only for the TV adaptations to end with him triumphant (throwing the journalist who would have exposed him to his death and easily winning an election). The books then carry on from the TV version instead of the earlier books.
* House of Cards, Ruth dismisses Michael when he tries to tell her that Sally regularly climbs onto the roof.
* House of Cards's fall from grace, but to discredit it being formative in shaping up the service's popularity today would be denying history.
* House of Cards, there is a distinctly creepy relationship between Francis Urquhart (53 at the beginning of the series) and Mattie Storin (23 or 24). She actually calls him "Daddy," and although he's clearly using her for his own ends, it seems both are into this whole father/daughter dynamic for their own, twisted reasons (although we never quite fully figure out what they are).
* House of Cards (UK) after getting snubbed for a promotion that ends with them in higher positions than they were originally hoping for. But they enjoy the power so much that they keep climbing the political ladder on top of several careers and

bodies.
* House of Cards (UK) constantly feeling the need to stir up trouble just so he can have something to do.
* House of Cards (UK) had appearances by Angela Rippon in the first series, reporting on Henry Collingridge's ascendency to Prime Minister and the Conservative Party's leadership contest following his resignation.
* House of Cards (UK) indulged in doubling, using Manchester Town Hall for The Houses of Parliament internal shots. This was half because the town hall was designed to be a perfect replica of parliament in some areas, and partially because getting permits and time to film in the actual parliament buildings is problematic at best.
* House of Cards (UK), Mattie Storin falls off a roof onto a car and dies.
* House of Cards (UK). Throughout the first part of the story he appears to be the faithful ally and Chief Whip to Prime Minister Henry Collingridge, all the while plotting the PM's downfall. Ironically, when Collingridge is forced to resign he throws his support behind Urquhart's own campaign to become PM, still completely unaware of who his betrayer actually was. Urquhart had tricked him into thinking it was the Party Chairman, who was angling for their protege the Enviroment Secretary to take over.
* House of Cards (US) actually is a brunette, but dyed it blonde some time prior to the start of the show. She reverts to her natural color for a couple episodes in Season 3 when she's reconciling with Frank after a falling out in Chapter 32.
* House of Cards (US): After manipulating his way to the presidency, Frank Underwood pardons his predecessor Garrett Walker and businessman Raymond Tusk. Initially a fairly clever move, it comes back to bite Frank in the ass in Season 4 when Walker is able to go on the record about how he was innocent in the money laundering scheme and the Chinese trade war in Season 2, which seriously imperils Frank's administration on the eve of the 2016 presidential election.
* House of Cards (US) also became an executive producer beginning in season 4.
* House of Cards (US). Bisexual males have absolutely no problem with him, mainly because while he has used sex as a tool to manipulate, his actual relationship with his wife and ex-boyfriend in college have been portrayed rather sympathetically if a little shaky with the former.
* House of Cards (US) came back strong in Season 4 with a re-focus on Frank Underwood's administration, political scheming, and the follow-up of plots from the first two seasons.
* House of Cards (US) cast Kelly AuCoin as Doug Stamper's brother Gary due to his similar appearance to Michael Kelly.
* House of Cards (US), Claire Underwood has had an on-and-off romance and affair with photographer Adam Galloway. When they resume their relationship after a gap of a few years, the two reminisce over photographs that Adam had taken of her in the past, and when political enemies of Frank Underwood attempt to expose the affair, they release the photographs as evidence. To defuse the accusations, the Underwoods claim that Adam took the pictures at their request as a present for them, and the romantic nature they contain is a reflection of Frank and Claire's relationship.
* House of Cards (US), Frank Underwood being scalded by coffee (and the subsequent "I despise children" line) was written in after Kevin Spacey accidentally burned his hand during a promotional photoshoot, in which he had to hold a burning American flag.
* House of Cards (US): General Brockhart, who is selected as Will Conway's running mate. He's not a natural politician. As a result, lying does not come easily to him and Frank sees right through his poor attempts at deception.
* House of Cards (US) has this exchange in the pilot, when Rep. Russo is pulled over for drunk driving:
* House of Cards (US). He is determined to destroy the traditional American safety nets (Social Security, Medicare, Medicaid, etc.) in favor of forcing all American citizens regardless of poor health or disadvantage to just get a job so that the weak can be eliminated. Frank also has no qualms about the many heinous acts he commits (murders, defamation, betrayal) or the people he must destroy first to

become President of the United States.
* House of Cards (US): In 2x12, Posner makes Lisa go away to eliminate any threats towards her from a constantly opinion shifting Stamper.
* House of Cards (US). In real life, this is what people who know a lot do to protect themselves.
* House of Cards (US) is problematic, so she resolves to break up with Tom. Frank on the other hand believes that Tom is good for Claire and that she really loves him. He essentially vetoes her decision which leads to a heartwarming pep talk that reveals his views on polyamory and his long-standing relationship with Claire:
* House of Cards (US) is set in Washington DC, with parts in exotic locales like China, St. Louis, New York, Kansas City and California. But due to high costs of filming in Washington, nearly all location shots (and some interiors like restaurants and hearing rooms) were done in the Baltimore area, which is cheaper to shoot in and much closer to the show's sets in Joppa, northeast of Baltimore City. Averted in the second season when one plotline does take place in Joppa.
* House of Cards (US): Lucas Goodwin, incarcerated by Frank Underwood's manipulations, manages to get himself into a program with information on the Armenian mob. But it's merely to get himself out of jail, since Lucas immediately sneaks his way to Heather Dunbar's campaign trying to convince someone that he's not crazy. That fails, so Lucas subsequently tries to assassinate Frank at a rally, only succeeding in crippling Frank and killing one Secret Service agent before being gunned down himself.
* House of Cards (US), prostitute Rachel Posner is played by Rachel Brosnahan.
* House of Cards (US) was raped in college. It becomes prominent in the second season after she runs into her rapist (now a Marine general) and launches a campaign to curb sexual assault within the military.
* House of Cards (US) with Underwood's chief Secret Service agent, Edward Meechum.
* House of Cards (US): Zoe Barnes getting thrown in front of a subway train in the second season premiere.
* House of Commons Masonry is fueled by the rage of the entire Nazi war machine and can blow with the combined firepower of the London Blitz which is comparable to a nuclear blast.
* House of Cool is about an amnesiac, Rastafarian ninja who was found in the North Pole and who is wanted dead by a gang for reasons he can't remember.
* House of Cosbys, the Bill Cosby clones get increasingly bizarre defects, however the main character keeps making them as every tenth Cosby has superpowers with each "Super Cosby" being more powerful than the last. Unfortunately, Cosby #100 happens to be pure evil.
* House of Dark Shadows says this was the original plan) twist on the ending of said arc.
* House Of Doors, the centerpiece of the titular House is its Library, the home to the spell books of magical lore that separates Keyholders from normal people.
* House of Dracula explanation and has it ultimately cured in the ending.
* House of D. Richard Roeper described this as "a bit of casting that would knock Freud off his chair".
* House of exotic diseases, even as it warns that it's utterly stupid to diagnose yourself with them.
* House of Flowers had a spot where she could ad-lib a different line of dialogue every night. On the cast recording, she says: "I'm supposed to have an ad-lib filled in here for the record date, but we've been so terribly busy over at the theatre we haven't had time."
* House of Flying Daggers has the two male leads fighting one another with their swords. Eventually the fight devolves from them fighting skillfully to them just slashing each other.
* House of Flying Daggers: Throwing knives are the signature weapon of the eponymous underground rebel group, and feature in some very impressive camera shots.
* House of Flying Daggers to show off what a great dancer she is. She trained extensively as one before embracing an acting career.

* House of Frankenstein (1997) (a woman bitten by a werewolf) and the hero (the cop). Lampshaded when a monster expert mentions that vampires love lycanthropes; "Their own little animal — you know what men are like."
* House of Frankenstein. This is really the template for most of the scripts he's put out.
* House of Frankenstein to kill a travelling showman and takes his place and uses this to get near those who got him to prison.
* House of Frankenstein, whose purposedly chase them straight into a nearest bog where it sinks with the scientist.
* House Of Fury. The father is a retired martial artist and ex-secret agent, and when enemies from his past catches up on him, his children — both whom have inherited their dad's ass-kicking skills — embarks on a daring rescue mission to save him.
* House of Games. They can't simply divide the cash and leave without properly laundering the money. The banker mark can launder the money, but the cons say they don't trust him to send them their share when he's done, so they persuade him to buy out their share with his own money and keep the whole briefcase. Once he's given them his money, they'll swap the briefcase with an empty one just before leaving. The mark can't complain to the cops about being ripped off while trying to launder money.
* House of Games: Two con artists show the protagonist a nickel-and-dime Pig-in-a-Poke scam that involves pretending to seal a $5 bill into an envelope in front of a cashier and then using the envelope to make change, having already slipped the bill out before sealing it.
* House of Gold & Bones backstory that is briefly visited for moments at a time in flashbacks, but it is never thoroughly explained how he ended up where he is. We know about his childhood with an abusive stepfather, and we know that he might have drowned attempting to save the daughter of his neighbors from drowning in a nearby lake. Beyond all of that, the rest is up to interpretation.
* House of Gucci played a 47 year old Patrizia Reggiani and 46 year old Maurizio Gucci, respectively.
* House of Gucci, the alleged inaccuracies in the book on which the film is based, and the casting of high-profile actors to play people who weren't connected with the murder. She also said that the Gucci family will decide what their next course of action will be after watching the completed film.
* House of Harmony: In 1920s Singapore, a Chinese girl who picked up medical skills from her father nurses back to health an American businessman who had been severely wounded by muggers. He falls in love with her, and before long she reciprocates the feeling.
* House of Leaves after the family comes back from vacation, which wasn't there before.
* House of Leaves and nested stories", and secondarily as a horror novel.
* House of Leaves apocalyptic logs, embedded within each other; reading the story keeps driving people over the edge.
* House of Leaves begins with a page containing nothing but the statement, "This is not for you."
* House of Leaves. Either half of it, or all of it, or if you're really brave, none of it.
* House of Leaves events. However, within the world of the fictional editor, the documentary doesn't even exist.
* House of Leaves has some Wall Of Text passages that are deliberate - they illustrate a character (who, arguably, never had his shit completely together to begin with) slowly going crazier and crazier and talking and writing in more of a stream-of-consciousness style as his sanity leaves him. It's not pretty, and it's not supposed to be.
* House of Leaves has Zampano, who wrote his manuscript in the form of a film review despite being blind and therefore unable to view films.
* House of LeavesHowever, it's not simply that there is no such as independent thing as the Minotaur. People even seem to get killed by it.

* House of Leaves inverts this. The wife/mother of the family is in denial about the supernatural nature of the House; the dog and the cat are explicitly stated to not be affected by the supernatural stuff at all; the two children pick up on it but don't seem to grasp the full severity of it. But the husband/father of the family gets totally sucked into it - to the point that he makes his long-lost brother arrive, plus a team of explorers, and decides (he's a filmographer by living) to go make a movie about the weird stuff happening - against his wife's wishes.
* House of Leaves is a complicated example: a book that exists about a dissertation that does not exist, about a film that does not exist, about a house that does not exist. It's also implied that the book itself occurs in our reality, which would make the entire thing prophetic, by definition, if it were true. Topping it off? The book is filled with hundreds of footnotes, referencing a lot of things that do exist, but even more that don't.
* House of Leaves is scary enough in itself, the really disturbing parts of this book tend to revolve around painstakingly detailed portrayals of mental illness and interpersonal abuse.
* House of Leaves It's a book about a book about a documentary about a labyrinth; but simultaneously, the book IS the labyrinth. Within the documentary within the book within itself.
* House of Leaves one might not be certain what the heck we're talking about any more.
* House of Leaves parts. The various levels of fictional editors comment that the references are nonexistent or have nothing to do with what is being talked about, though some of them do contain codes and hidden messages.
* House of Leaves) provides translations for most of them and complains about it, especially since most have nothing to do with what's being talked about.
* House of Leaves story the wake of his father's death. Pieces of the book were published online, and a proper book was released in 2000. Over time, word of mouth (quite a lot of it stemming from This Very Wiki) turned the novel into a juggernaut of horror and a fine example of experimental fiction, pleasing genre writers like Stephen King and literary writers like Brett Easton Ellis alike.
* House of Leaves the boundaries of reality and the text are somewhat thin.
* House of Leaves: The family that moves into the titular House and who are the protagonists of the core story, are a husband and wife and a son and daughter (plus a dog and a cat).
* House of Leaves, the Navidson children draw entirely black pictures when asked to draw their blue house. Eventually, the narrator starts doing it too.
* House of Leaves think this is because of measurement deficiencies, but in retrospect... Also, this discrepancy disappearing is, believe it or not, the cue for things to get worse.
* House of Leaves, to boot—but never works up the nerve to talk to her.
* House of Leaves (usually Latin, as indicated in another of Pelafina's letters).
* House of Leaves. When material samples from inside the house are analysed, the summary is that they're nothing out of the ordinary, chemically speaking. Oh, and by the way, that's a fascinating range you've got there. The oldest samples must have come from meteorites, because they're older than the solar system. Where did you say you found all these, Antarctica?
* House of Leaves, who actually keeps a list of his conquests, their prominent features, and how he had sex with them.
* House of M and have military-application superpowers to counter stock superpowers... but they can't hold a candle to a pissed off Phoenix protecting her students and academy from shock troopers enjoying their scalpel guns.
* House of M and his army managed to conquer the world. Thunderbird mentions that he joined Magneto's cause precisely because of the racism he suffered as a Native American, a form of discrimination that he no longer experiences in a world run by mutants.
* House of M and Miss Marvel are only tentatively accepted as equals to mutants.
* House of Many Ways, Charmain has to deal with the kobolds going on strike from

their house and garden chores.
* House of Many Ways strings around almost all of his fingers in order to navigate the titular House.
* House of M as an instance of this by Scarlet Witch. Rather than "simply" rewriting the 616 history she essentially copied an existing one over it.
* House of M featured a story involving the New X-Men as being part of a private academy. While many characters had similar personalities as their main universe selves, Sooraya Qadir is a radical departure as she goes from a modest, fundamentalist Muslim to a quintessential valley girl that rivals Tabitha "Boom Boom" Smith in vapidness. This is on account of being friends with actual Valley Girl (from LA no less) Jubilee in that reality. Their fellow students know them as "the Shallow Twins" and live in dread at their passing. (Still, they're just as willing to get involved in the story's adventure as everyone else.)
* House of Mirrors, and her daughter showing the Admiral what happened by replaying it in one of her many mirrors. The house has been uninhabitable since...
* House of M leaves, Clint finds out that he's actually dead in the real world, then when everything goes back to normal, Clint is restored to life with all the memories of House of M.
* House of M, Magneto has Sabretooth teleported into Wakanda to assassinate T'Challa. T'Challa cuts Sabretooth's head off and sends it back to Magneto in a box.
* House of Mouse accidentally swallowing a numeric keypad at an information kiosk.
* House of Mouse, aired on March 31, 2001, the day prior to said holiday.
* House of Mouse, all the video reels go missing. Who's responsible? Certainly not Pete, because...
* House of Mouse and is turned into an actual piece of ham at the end of the episode.
* House of Mouse, and then proceeds to add fuel to the fire as their paranoia sets in and their stupidity takes over.
* House of Mouse and the rest of the crew kicked out of the building that gets renamed into "House of Villains".
* House of Mouse. At the end, Goofy attempts to pull this trick in his own "goofy" fashion.
* House of Mouse, but the guard says filing the doors would never work and the easiest way to escape would be to knock the guard out and take his keys.
* House of Mouse cartoon "Hickory Dickory Mickey" has Mickey becoming annoyed by Goofy's loudly-ticking alarm clock and decides to block it out with music. He turns to the "all-tick station" and the "all-tock station", then turning on the TV to "The Tick-Tock Channel".
* House of Mouse cartoon, Mickey lives in an old house where this is one of the many noises that keep him awake.
* House of Mouse, causing Minnie to become upset and assume that Mickey will leave her for a mousedroid. Ludwig rubs salt in Mickey's wounds by showing him a busty mouse gynoid right in front of Minnie. After all of the mishaps that Mickey and friends suffer, they hook Ludwig to the machine in an attempt to give him his just deserts, but Ludwig doesn't mind because he gets to spend time with a duck gynoid.
* House of Mouse, Cleese not only argues with the characters and gets flustered by the confusing casting (including flat-out lying to Donald about the Rat King's ultimate fate to get him to actually do the part), but he also manages to kick Ludwig von Drake out of the picture (temporarily, to his great frustration).
* House of Mouse: "Congratulations, you would like to: Pay your bill."
* House of Mouse describe Donald...er...The Duck Formally Known as Donald as being "super-duper duckariffic".
* House of Mouse, Donald and Goofy get into one after Goofy thinks Donald was going to fire him.
* House of Mouse: Donald Duck has set up his computer. A viewer would tend to expect that the computer would take all day to start up. Just 15 seconds after he turns it on, however, the screen reads "Startup Done", just long enough for the viewer to think "Huh?" before the word "Almost" is added to the screen, and it ends

up taking all day after all.
* House of Mouse, Donald makes a few changes to the House while Mickey is away temporarily. At one point, he removes a framed picture of Mickey labeled "Our Founder" and replaces it with a giant gold statue of himself reading "Our Leader".
* House of Mouse episode, "Big House Mickey", when Mickey goes to jail, he calls Goofy to come and help him out of the big house.
* House of Mouse episode "Halloween with Hades" has Hades give two such quotes.
* House of Mouse episode "Max's Embarrassing Date" has Mickey introducing a cartoon and saying that Max loved it since he was "a tiny tot in diapers" and proceeds to show a baby picture of Max on a tricycle.
* House of Mouse episode "Mickey and Minnie's Big Vacation", when Mickey and Minnie come back from the vacation to see the club burned to cinders.
* House of Mouse episode "Mickey and the Culture Clash", where Mickey reads a letter in the newspaper saying Minnie wants a more 'sophisticated' boyfriend. He tries to be more fancy, but then finds out it's all a trick by Mortimer so he can steal Minnie away from Mickey.
* House of Mouse. For example, "Organ Donors. We donate organs!" (as in musical instrument) or "Roller Coaster Painters. We paint roller coasters!"
* House of Mouse for no reason; one of them he fishes up out of the water...already lit.
* House of Mouse, goes on vacation, leaving Minnie to hire the bears from Brownstone Park as temporary replacements.
* House of Mouse: "Goofy for a Day" has Max make a remark on how easy he thinks Goofy's job as a waiter is, resulting in Goofy having his son temporarily take over his responsibilities as waiter. Max learns the hard way that setting tables and handling orders isn't as simple as he assumed, but manages to make it through with help from his father. At the end of the episode, Goofy states a desire to take over Max's job as parking valet, similarly assuming that his son has the easy job.
* House of Mouse, Hades, the god of the Underworld, calls Goofy over because an item on the menu uses his name without his permission. Hades tells him "A word to the wise, I know all the lawyers."
* House of Mouse has Mickey and Baby Shelby playing "The Blue Danube". Mickey plays on Shelby's shell like a xylophone, and Shelby does "ha ha"s to do the notes.
* House of Mouse has Mickey Mouse and his friends running the titular nightclub while screening their cartoons for the audience.
* House of Mouse has Practical Pig and Miss Turtle. They often give the people around them a nasty look on their faces because they feel this way.
* House of Mouse has the short "Car Washers", which ends with Mickey telling Pete that his car shrunk in the wash (actually, he, Donald and mostly Goofy had wrecked the car so much they decided to buy a new one as a replacement, but could only afford a miniature model). Pete is incredulous of this, but then he ends up forced through the car wash and becomes tiny, yelling at Mickey, Donald, and Goofy in a high-pitched voice.
* House of Mouse: In "Dining Goofy", Mickey and Minnie go over guest problems arising from Goofy's constant screw-ups as a waiter.
* House of Mouse: In "Gone Goofy", Mickey, as a last resort to solve the club's budget problems without having to fire Goofy, goes up on stage to announce that he's quitting. The scene then cuts to Mortimer Mouse telling a few villains, "I told you boys the mouse wouldn't last. Now, pay up!"
* House of Mouse: In "Goofy's Menu Magic", Goofy goes into the kitchen to find the kitchen a mess and Chef Gus overstuffed.
* House of Mouse: In "House of Genius", several guests are waiting impatiently in line at the club's reservation desk, thanks to Daisy overbooking.
* House of Mouse: In "Hydro-Squirter", Professor Ludwig von Drake accidentally turns his shower into a teleportation machine, leading to several embarrassing incidents as he tries to travel back to his lab.
* House of Mouse: In "Pete's One-Man Show", Mickey and the gang create a fake audience to humor Pete when nobody shows up to see him perform, which ends up backfiring when Pete announces that he's starting his own club and invites his non-

existent audience to go there.
* House of Mouse: In "Super Goof", Goofy, who thinks Clarabelle isn't into him, sits outside the club and repeats to himself "She loves me not" while eating peanuts.
* House of Mouse: In the short "Daisy Bothers Minnie", Daisy stays over at Minnie's house and starts a bath in her tub, and soon forgets about it while leaving the water running. Later, when the two are cornered by an escaped lion, the bathroom door finally gives way and floods the house, and also washes the lion back to the zoo.
* House of Mouse: In the short "Locksmiths", Mickey, Donald and Goofy are locked in their office and try to find their door key. Goofy takes out his keychain, which becomes an excuse for a series of "key" puns. Eventually, Goofy takes out the spare key hidden on the roof of his mouth.
* House of Mouse: In the short "Pluto's Penthouse Sweet", after Mickey leaves Pluto home alone while goes out with Minnie, Donald and Daisy.
* House of Mouse: In the short "Pluto vs. the Watchdog", Mickey tries to test Pluto's watchdog abilities by pretending to be a burglar, but he's only interested in playing with him, prompting him to buy another dog. Little does he know that the new dog is actually working with Pete to help rob the house, but Pluto ends up foiling both of them.
* House of Mouse involve him undergoing this as well, especially if he's trying too hard to impress Minnie.
* House of Mouse is in no mood at all to share his books, scaring Mickey off and throwing the whole chain apart.
* House of Mouse lamp and ventures deep into the prop room to get it. When he delivers it, it turns out that Jafar just wanted Mickey's table lamp.
* House of Mouse lampshades this by mentioning Minnie's obsession with hairbows, sometimes making it part of the plot. In one episode Mickey and Donald had to crossdress as their own girlfriends (pictured above) to replace a picture of Minnie and Daisy they broke while playing football inside the house.
* House of Mouse, Ludwig Von Drake deduces that the perfect partner for someone would be an Opposite Sex Clone. The two can't stand each other, and she breaks up with himself.
* House of Mouse. Max was afraid his father Goofy would embarrass him on his date when the rest of cast did it for him.
* House of Mouse, Mickey and friends get back at him by subjecting him to a roast.
* House of Mouse, Mickey and Minnie Mouse are "punished" by the court for breaking the town rules by having to go on a tropical vacation.
* House of Mouse: Mickey, whenever he's dealing with someone doing something stupid, would introduce a cartoon with "Here's a cartoon X oughta watch."
* House of Mouse, Mortimer Mouse tries to hit on Minnie and Daisy. They elude him by propping up a mop and a hat rack to take their places.
* House of Mouse, Mortimer suggests that the winner of a volleyball game will be the one to ask Minnie out. Mickey makes the mistake of replying "So, what, we should treat Minnie like she's some sort of trophy?!" Mortimer then relays this sentence back to Minnie later, while of course leaving out that it was rhetorical. Mickey is so flustered by Mortimer revealing this that he can only stammer in response. (On the other hand, Mortimer DID manage to tempt Mickey into the volleyball game, but it was still Mortimer's idea in the first place.)
* House of Mouse response is to say "No, it is you who will be fired" and uses his candles to set Mortimer's rear ablaze.
* House of Mouse rival, Mortimer Mouse. Mortimer hails a taxi and tells the driver to take go "to the other side of town and step on it!" The Taxi moves about half a block, stopping at the intersection of "Other Side of Town St." and "Step On It Lane".
* House of Mouse Season 3 "Pete's Christmas Caper", in the cartoon segment "The Nutcracker", when Ludwig Von Drake is about to give Minnie a nutcracker doll, the narrator interrupts him and spoils the surprise for Minnie, which annoys Ludwig.
* House of Mouse segment where Mickey, Donald, and Goofy are hired to bring an

organ to a demented toymaker that wants Mickey's heart to bring his doll bride to life.
* House of Mouse short actually ended with Louie the Mountain Lion accidentally swallowing Goofy's radio.
* House of Mouse short "Big House Mickey" has Mickey being falsely accused of theft and is told to make a call. He calls Goofy to help break him out.
* House of Mouse short "Computer.don", Donald Duck can't get his computer to understand him, or even speak his name correctly—it keeps calling him "Duwald."
* House of Mouse short "Donald's Goofy World", Goofy screws up and Donald tells him he doesn't want to see his face again.
* House of Mouse short has the Big Bad Wolf telling his son that catching pigs is "ninety-nine percent" whatever lesson he's trying to teach at the moment. When they get to the third attempt, the son dryly informs him they're up to 297 percent.
* House of Mouse short "Hickory Dickory Mickey" had "The Tick-Tock Channel". Sure enough, with Mickey trying to drown out the annoying tick-tock and an annoying clock, guess what the only thing is that the channel plays.
* House of Mouse short "How to Haunt a House", Goofy puts a bedsheet over his head to scare Donald, only to mess up from not being able to see through the sheet. The narrator then tells Goofy to put eyeholes in the sheet, promoting him to say this.
* House of Mouse short "Mickey's Cabin", Mickey is held hostage in his cabin by Pete and his cousin Zeke after they rob a bank, and Mickey outwits the two by convincing each of them that the other is going to steal the money they took.
* House of Mouse short "Mickey's Piano Lesson" has Mickey putting off practicing for a piano recital with Minnie to do other things, like eating pie, giving Pluto a bath, going on a picnic, skating the half-pipe and skydiving.
* House of Mouse showed new and old Disney cartoons with a framing device of the characters working at a nightclub where all the Disney characters would gather together.
* House of Mouse singing a song about hats ("Hats that are tall, and hats that are small, and hats that are totally off of the wall!"). Another was Goofy getting sidetracked in one of the trio's business cartoons by trying on hats in a hat shop.
* House of Mouse's interactions. After watching an episode of himself and Mickey racing up a mountain that involved him constantly getting hurt (including being repeatedly mauled by a polar bear) he is seen laughing at it and calling it "delightfully entertaining".
* House of Mouse sometimes features a "mouse on the street" segment where Mickey interviews various Disney characters about a particular subject.
* House of Mouse, thanks to its premise as a nightclub showing cartoons, frequently reuses crowd shots, and pads out the length of the episode with shots of the band performing.
* House of Mouse, the club is expecting a critic. Mortimer is mistaken for the critic and takes advantage of Mickey's hospitality.
* House of Mouse the door rather than close it, which is admittedly not as scary.
* House of Mouse, there is some proof that Pete is a cat, as evidenced by Mickey telling Pluto that Pete's the only cat he's allowed to chase.
* House of Mouse. The safe was dropped after the monkeys decided that disguising the violence with novelty sounds was an acceptable compromise. When the safe hit, it sounded like a squeaky toy being squished. One of them even opens the safe and sticks his arm out to show everyone they're ok.
* House of Mouse: The short "Mickey's Mountain" has Mickey and Pete racing on Unnamed Mountain to rename it (Mickey wants to name it after Minnie, while Pete want to name it after himself). At the end, it turns out that Minnie made it first, having taken a ski lift.
* House of Mouse titled "Mickey and the Goat Man". Mortimer promises the Goat Man to give them a spectacular show if the Goat Man lets him, Mickey, and Minnie go. Minnie, however, tells Mickey to perform lousily, which Mickey does by purposefully screwing up his parts in the performance. In the end, the Goat Man lets Mickey and Minnie go saying that he keeps the things he likes having loved Mortimer's

performance but hated Mickey's.
* House of Mouse) to distract the Phantom Blot by having him his name on clipboards, while Mickey (who was hiding in their cardboard box) sneaks past him to obtain Professor Von Drake's unlimited credit card, which the Blot stole.
* House of Mouse tosses away a peel and Goofy slips on it. Because he was trained to be "un-Goofy", Goofy manages to keep the tray he is carrying put while he slips.
* House of Mouse tries to become a celebrity and changes his name to the "Duck Formerly Known as Donald." Mickey ended the episode by calling himself "The Mouse Currently Known As Mickey".
* House of Mouse: Twice in the short "Donald's Shell Shots", Donald chases Baby Shelby around a department store and goes through the women's clothing section, resulting in Daisy spotting him wearing a dress.
* House of Mouse, when Pete first tried to evict Mickey, he failed because Mickey invoked a clause preventing Pete from terminating the rental contract for as long as there are patrons at the house. Pete said there should be a law against legal clauses.
* House of Mouse, where Von Drake presents "new inventions" that were already done (e.g., presenting a telephone as the "Tele-finger").
* House of Mouse (which he claims isn't even his) before finding the notepad, after which he asks "Now where's my hat?".
* House of Mouse, which shows that Goofy himself was a fairly reckless driver when he was younger. Mickey, Minnie and Donald even all call out Goofy on this.
* House of M storylines that'd been done better before, leaving fans scratching their heads as to the editors' and writers' grasp of the moral situation they'd set up.
* House of M tie-in series, Professor Xavier and Magneto become friends fighting for mutant equality. Xavier sees Magneto talking to Quicksilver, Polaris and Wanda (the latter powerless in this reality). After they leave, Xavier dryly says that "if you don't want them to know you're their father, you shouldn't dote on them so." When Magneto accuses Xavier of reading his mind, Xavier replies there was no need. "Pietro looks just like you, Lorna has your powers and Wanda bears a striking resemblance to the woman in the portrait who I presume was your wife."
* House of M, where mutants are the ruling class and humans are the persecuted minority, humans are referred to as "sapes"(short for Sapiens).
* House of Mystery and mystery fiction in the mid-50's due to backlash against horror comics and the introduction of the Comics Code, added in Superhero fiction during the Silver Age, and returned to a horror setting in the 70's.
* House of Mystery, but not before telling Adam he'll now know the truth. Adam is then transported back to the day he was saved, finding himself an immobile scarecrow while the flames creep closer and there's no Meg to save him.
* House of Mystery farrago, he keeps changing bits of it, and remembering things he forgot to say earlier. The art, meanwhile, plays along by showing exactly what he's saying at the time, even if this means everything has to change completely in the next panel.
* House of Mystery's "I... Vampire" series, was to stake his own mother. Kind of an odd encounter, given that she'd been turned when Dmitri was a small boy and he'd been hunting her for decades, so his mom looks a good fifty years younger than he does.
* House of Pain. Their only hit song "Jump Around" hit #4 on the Hot 100. He currently has a solo career again (performing "folk rap"), but his one solo hit "What It's Like" was nowhere near as big and remembered as "Jump Around". Inversely, Everlast's follow-ups to "What It's Like" are much better remembered today than anything else House of Pain has recorded.
* House of Payne has Will and Sasha trying to give the talk to their adoptive son, Joaquin. They spend the entire episode fumbling every attempt until Mr. Brown steps in and asks Joaquin point-blank if he knows where babies come from and if he wants to know. Upon receiving a "no" on both questions, Mr Brown sends him off to play and tells the stunned couple to wait until he's older before trying it again.
* House Of Robots: E ends up starting one in chapter 8. In the school cafeteria, he

sees Bobby Hatfield throw a tangerine at Tom Heffernon, and comes to the conclusion that they're still in gym class. As a result, he starts throwing potatoes at Bobby, making Tom think E threw the tangerine and causing both him and Bobby to hit him with more food. Before long, everyone is throwing food at everyone.
* House Of Robots has Brittney 13, a robot designed to experience "adolescent human emotions," which she does... all the time.
* House Of Robots has Cooper Elliot, who singles out Sammy (whom he calls "Dweebiac") and Trip for the brunt of his abuse.
* House Of Robots: Mr. Moppenshine is a robot butler who cleans they Hayes-Rodriguez household, and makes meals.
* House Of Robots Robot Revolution: E tries to help the other robots break the monotony of their routines by programming new jobs into their code. He makes Groomatron Sammy's personal advisor, puts Brittany 13 in charge of grocery shopping, makes the Breakfastinator to laundry, has Mr. Moppenshine be the gardener, has Hayseed cook meals, and has Blitzen attempt to fix the SUV. Sammy considers the idea a failure right off the bat.
* House Of Robots Robot Revolution's father, and his Spanish teacher) speak in Spanish sentences to him. Examples include...
* House Of Robots Robots Go Wild comic series cancelled, thus losing his job, all Mr. Rodriguez can do is sit at his writing desk, staring at the blank piece of paper, not able to think up a single thing.
* House of Saddam chronicles the rise and fall of Iraq's infamous former dictator.
* House of Saddam: Saddam Hussein places members of his family in high-positions of power once he becomes President. In an ironic twist, Saddam's predecessor was his own cousin, who had made Saddam his deputy before being overthrown.
* House of Saddam: Saddam spends the last episode hiding from US forces outside his own hometown on the Euphrates river, becoming unlikely friends with a local boy who doesn't know who the now powerless old man with the scraggly beard really is.
* House of Saddam: Saddam with his own mother at first, before telling her that she "gave him nothing" on her deathbed. Played straight with Qusay and Uday concerning their relationship with Sajida. Uday brutalizes a confidante for setting up his father with a new mistress to protect his mother's honour.
* House of Saddam: The execution of several Baath loyalists. Even worse was that those that were spared were ordered to do the killing.
* House of Sand and Fog opens and ends with the same scene of Jennifer Connelly's character staring blankly at her house.
* House of Sand and Fog, the male lead doesn't want to admit to his family that the only work he can find is as a construction worker. He makes a point of wearing a suit and tie whenever he's at home.
* House of Secrets had a group of white men discover a tribe of natives that had been gifted extraterrestrial technology. They had things like hovercraft for travel and a miniature sun to use for cooking.
* House of Secrets tale makes the issue that having no shadow would mean invisibility a plot point. A scientist discovers that an opal was changed by radiation to absorb any shadow it touches, casting it again once light is shone through from another angle. Using it to capture the shadows of multiple objects, he successfully uses them to pull of a robbery, evading arrest when pursued by capturing his own shadow. Later, he reads in the news that the objects whose shadows he's taken have become invisible, before realizing the same has happened to him. The story ends with him contemplating confession and imprisonment on the chance both his shadow and visibility can be restored before it's too late.
* House of Secrets, whose brother Cain has convinced him to catch a snipe in a graveyard at night. Cain peers cackling around a gravestone.
* House of Summers, Jean Grey is usually quite pleasant... unless someone is making a play for her boyfriend Scott.
* House of Summers: "Wait For Me" begins eight years after the end of "The Girl From Tomorrow". "Heart Sees Through Lies" is set twelve years after "Wait For Me".
* House of Suns are one-time humans who found a way to live forever at the cost of never-ending growth. Curators live in zero-gravity, so square-cube law is not a

problem for them. The only Curator we meet is about 700 meters tall, and has lived inside his spacesuit for 100,000 years, after outgrowing many previous ones. He speaks and does everything else v-e-r-y s-l-o-w-l-y. Oldest Curators are some ten times his size, and ten times slower still.
* House of Suns are used to encapsulate stars that are about to go supernova.
* House of Suns by Alastair Reynolds. One character plays in a virtual reality game which malfunctions and replaces his personality with that of his game character. Eventually he has to be wired permanently into the machine as he can't function properly outside it any more.
* House of Suns features a planetoid that held the Gentian household in the distant past. It had standard Earth gravity which was hinted to be due to a small black hole contained within the planetoid.
* House of Suns goes even further, with the galaxy completely colonized over millions of years by a human diaspora, evolved and adapted in countless ways including squid/whale-looking aquatic forms, colossal vacuum-dwellers, and sapient weather patterns. The central characters are still reasonably recognizable as human only because they've spent so much of the intervening time flitting around at relativistic speeds, and thus have had a much shorter subjective experience of the intervening eons.
* House of Suns, human civilizations surge up before withering away after a few thousand years from internal pressure. Every system that the protagonists visit have some trace of human habitation, such as an asteroid belt littered with derelict ships or nanotech-infused clouds on planets.
* House of Suns most of the time. One tense scene in the novel takes place in the cargo hold of a ship, which itself is akin to a vast cavern kilometers across.
* House of Suns pass millions of years despite experiencing only thousands.
* House of Suns, the various posthuman clone houses, such as Gentian Line, consist of male and female clones of a single individual.
* House of Suns, though their mass makes them agonizingly slow, especially for the already slow, non-FTL interstellar travel.
* House of Suns to trap the protagonist's starship inside a enormous world-ship.
* House often took quite a while to stop expecting House to goggle mindlessly or burst into Upper-Class Twit Speak ("I say, Jeeves, this fellow's looking jolly green about the gills, what?").
* House of the Blooded characters have an inbuilt Fatal Flaw that cannot be legally circumvented.
* House of the Dead 2 has a hydra-like boss known as Tower. In its first fight, the player kills 4 out of its 5 heads, but the last one has to be hunted and killed at either a watery or a sand-filled arena, neither environment stopping it from just swimming through.
* House of the Dead 4 is a hulking, gigantic zombie who is completely invincible... save for its tongue. You spend the entire boss fight pumping Uzi rounds into the tongue as it tries to chomp on you, and it goes down after having its tongue riddled by what seems to be two hundred or so bullets.
* House of the Dead and deliberately aims for a grindhouse B-movie approach.
* House of the Dead, being about zombies, encouraged this. In most games, you can kill them by way of pumping their bodies full of lead, but the quicker way to down them was to blow off their heads, which usually killed them in three shots.
* House of the Dead, cannot be injured with bullets. Since this is a light-gun game, that bodes ill for the main characters. The only way to defeat it is to fight your way to the top of a clocktower, lure Temperance under a giant clock face, and drop it onto the monster's head.
* House of the Dead can't leave the island because zombies are swimming in the surrounding waters. Same thing happens later when they barricade themselves into the titular shack.
* House of the Dead, comes in three different colours; green, brown and black. Kageo also has multiple skins.
* House of the Dead flinging Washington using Motherfucker all the time except with Clement, which he somehow relates into how deep down, Washington actually likes G

as a friend.
* House of the Dead game consist in a tiny petulant imp controlling a huge axe-wielding suit of armor. The armor itself is invincible, and the only way to stop it is to shot the imp instead.
* House of the Dead has enemies start to go up in a puff of orange or blue flame and blacken the moment they're killed, so even if a zombie is still standing while going through its death flops, the player knows it's safe to stop firing on it and start targeting the next threat.
* House of the Dead has Moowls. Zombies that resemble owls, they attack the players from the air.
* House of the Dead II: Dead Aim), zombies are revealed to hunt by scent. One of the main characters soaks his clothes in zombie blood to get rid of his scent, and then proceeds to walk slowly through a zombie filled room, trying not to do anything distinctly un-zombie.
* House of the Dead is a colossal, demonic-looking entity with wings whose body is actually shaped during the boss battle himself, using whole hordes of zombies to grow bigger and bigger.
* House of the Dead lumbering towards you with a see-through shotgun hole in their stomach.
* House of the Dead of the "fast zombie" archetype, where zombies could run and have more intellect. Fast zombies have become common in zombie movies and video games since the 2000s.
* House of the Dead), others not so much (Chariot from the first game is an armored humanoid with a spear)
* House of the Dead: OVERKILL and a freakshow complete with a freak as a boss. A freakier freak than a normal mutant.
* House of the Dead: OVERKILL explaining this as a genetic mutation in the victims.
* House of the Dead: OVERKILL, scoring enough consecutive hits without missing a shot sends your character into "Goregasm" mode.
* House of the Dead series. Director Takashi Oda deemed the word zombie as "trite", preferring to call them "creatures" instead because they are created and cloned in labs, making them more similar to mass-produced, Frankensteins's monsters.
* House of the Dead series. In the first game, it's isolated to a mansion and the associated research facility. In the second game, it's taken over Venice. In the third game, it's finally consumed the entire world. The fourth game takes place before the third and it's starting to spread.
* House of the Dead series take minimal damage if hit anywhere other than a designated weak point, though blasting at that weak point really will deal out huge damage to them. However, the first boss in the first game — Chariot — subverts this just a tad by having its armor blown off when its health gets down to a third, allowing you to fire at the soft, pink body underneath anywhere you wish.
* House of the Dead series takes place during the day, with only a few levels during nighttime.
* House of the Dead's first three games had gibs that flew off based on the placement of the shots - you could blast chunks into fat zombies' stomachs and chip away at a zombie's skull. The fourth game and OVERKILL removed this feature.
* House of the Dead shows up not just once but TWICE! One of the characters comments on its one-track mind and persistence.
* House of the Dead, the first boss, Judgement, is a headless suit of armor (Kuarl) controlled by a flying goblin (Zeal) that you have to hit.
* House of the Dead, where not only do headshots take down enemies faster, but each boss has a specific weakpoint, and cannot be damaged (or only take minimal damage) if shot anywhere else. The best one is the one with a huge gaping hole in its chest that opens to reveal its heart every time it beats (how... not easy...).
* House of the Dead with multiple screens and a spinning seat and other assorted jazz, features this as its bad ending. If you fail to hit the Magician's box with a grenade, he clones himself multiple times, and the game ends with G and Kate probably about to go down fighting.
* House of the Dead you face several tentacles in one level, later revealed to be

part of the Sun boss.
* House of the Scorpion, clones by law have to be made brain dead. El Patron, however, has enough power and influence that he can ignore this law and make fully functional ones.
* House of the Scorpion Clones, in order for the general populace to be able to accept their status as nonhuman, must be given drugs at birth to stunt their intelligence. The protagonist Matt is an exception to the rule.
* House of the Scorpion: Justified, as the horses were all eejits- meaning they had computer chips in their brain that made them only able to do one command until they are told to stop, and thus if you never told them to eat, sleep or drink, they wouldn't.
* House of the Scorpion live off of plankton. Subverted in the fact that it is not done out of necessity, better food exists and is obtainable, but because the Keepers won't feed them anything more decent. One character mentions the plankton is used only for animal feed.
* House of the Scorpion: Matt, while he is not privileged in any way because of his status as a clone in the society, is referred to as an aristocrat (a dirty word in the society he is in) because of where he came from, and because he can play the piano.
* House of the Scorpion: People clone themselves so when needed, they can kill the clones and use their organs to extend their lives. One of the central characters lives to be 148 through this method.
* House of the Scorpion: People clone themselves, then kill the clones in order to harvest their organs and to prolong their life. And the best organs come from clones under age thirteen.
* House of the Scorpion: Somewhat implied. The Rio Grande is so polluted that Tam Lin berates Matt when he simply just goes near it. The Gulf of California has been drained to a small river, and Matt finds skeletons of whales within it.
* "House of the Seven Gargoyles". Dietrich (Norway's greatest acrobatic dwarf, who's dressed as a gargoyle) does this while following the others to Professor Ericson's demonstration.
* House of the Sun, Chihiro is complaining to her best friend Mao about how her love interest Oda is an idiot. Mao agrees, saying that he is an idiot. Chi quickly shoots back that Mao is not allowed to call him an idiot.
* House of the Sun, Mao whose father just wants to get rid of her moves in with her childhood friend Hiro who happens to be living alone.
* House of the Witch begins with a teenage boy approaching the titular house to swipe the address numbers off the front door. He's pulled into the house, and then the movie jumps ahead one year.
* House of the Witch: Dax gets a wound on his back early on. As time goes on, the wound somehow turns into a large collection of pustules covering half his face.
* House of the Witch: The kids find a collection of framed photos on the fireplace mantle of the foyer in the house. One of them takes a photo off the mantle to get a closer look at it. During the inspection, the faces in the photoes become freaky with solid white eyes, scaring the holder and making them drop the photo on the floor.
* House of the Witch: When Taylor notices that she can stick her finger into the mirror in the foyer, she decides to stick her whole hand in, which results in said hand getting grabbed by something. The others pull her out, but by then, one of her fingers was cut off in the mirror.
* House of the Wolf Man is an attempt at a Monster Mash in the vein of the classic Universal films.
* House of Tomorrow — about inventions has a device designed to answer children's incessant questions; the child turns it on and asks an unending series of questions until the machine roars, "Oh, shut up!" and fires a plunger to cover the child's mouth.
* House Of Traps after all), the ceiling can extend spiked grates that impales anybody attempting this method.
* House Of Traps (as an unfortunate infiltrator finds out early in the film). It is

possible to out-maneuver the staircase trap by leaping into the air, but the ceiling will then unleash a spiked cage that impales or traps anyone that gets too close. Either that, or they dodge the ceiling... and end up landing on the spikes on the ground level.
* House of Tremere still exists in the modern nights - but the Tremere will never admit or acknowledge it.
* House of Tribes, every single member of the mouse tribe "Invisibles" has that kind of a name; Hearallthings (deaf), Goingdownfast (an excellent swimmer), Ferocious (the meekest one), etc.
* House of Tribes last words are "Push on, he says. I couldn't push a spr-" His friend is noted to spend the rest of his life wondering what the last word was going to be. "Sprout? Spring? Sprocket?"
* House of Tribes stars a yellow-necked mouse named Pedlar who, like all mice eventually do, leaves his home to visit the far-off House, where he meets various warring tribes.
* House of Usher: After Madeline claws her way out of her coffin, Phillip eventually finds her by following the trail of blood from her cut-up hands.
* House of Usher had Roderick bury his sister alive, to keep her from marrying and perpetuating their cursed, criminal family line.
* House of Wax (1953), André de Toth, had only one eye and thus couldn't see any of the film's 3-D sequences.
* House of Wax (2005), a bunch of teenagers (including Paris Hilton) driving on their way to a holiday (or some such) wind up in a seemingly deserted town in the middle of a forest, and fall prey to a pair of serial killers who turn all who come there into wax statues.
* House of Wax (2005). Anyone still alive but petrified by the waxing process can only move their eyes and breathe.
* House of Wax (2005) had one of these that ran under a (admittedly small) town.
* House of Wax (2005) is a middle-grade slasher flick whose claim to fame, and chief advertising gimmick, is the chance to see Paris Hilton die messily.
* House of Wax (2005) is played by Elisha Cuthbert - who is usually blonde herself - but is a brunette for the film.
* House of Wax (2005) operating a small facility in the middle of nowhere.
* House of Wax (2005) saw Carly emerge as the lone female survivor of what unfolds as a "real-life" horror story in the ghost town of Ambrose, Louisiana; her brother, Nick, also is alive at film's end, both having escaped the burning wax mansion (the town's centerpiece) seconds before it collapses into itself. It's downplayed as Carly is shown sleeping in the same tent as her boyfriend and does strip off on camera when she's changing (though is tastefully covered by her friends). The other female character she's contrasted with - her best friend Paige - is portrayed more sympathetically than normal (she's dealing with a possible unplanned pregnancy).
* House of Wax (2005) shut by one of the psychopathic brothers. She manages to pry them apart to scream for her brother to rescue her, leaving her lips red and briefly bloody.
* House of Wax (2005): The 2005 version features six college-age students traveling to the big game, when they stop in a rural Louisiana town to camp for the night. One by one, each of the six are targeted by a pair of brothers running the town's museum...and four of them are killed in the most violent of manners. (The two survivors later discover that most of the town's inhabitants have been killed by the brothers through the years, and have to escape the town before they're next.)
* House of Wax (2005). The pageant is discussed a couple of times earlier in the film at least.
* House of Wax (2005) was shot in Queensland, with areas around the Gold Coast doubling rather unconvincingly for Louisiana.
* House of Wax (2005) worrying about moving to New York or not, as well as tension between her brother and boyfriend. The film at least spends time developing a creepy atmosphere before the teens start getting killed.
* House of Wax had to wear a brown wig to hide from the paparazzi if she wanted to leave her hotel room to exercise on the beach.

* House of Wax had to wear a brunette wig if she went out in public to do her exercises. She wasn't recognized, if the "making of" TV spin-off is to be believed.
* House of Whipcord is that he was actually inspired by a prison governess from Victorian times - who was dismissed for being too cruel to the prisoners. The similarities between Mary Whitehouse and Margaret Wakehurst are purely coincidental; as Margaret was the real warden's name. Pete Walker stressed that Mary Whitehouse was more of a "kindly librarian" sort than the religious zealot Margaret is, so if there are resemblances, they're purely subconscious.
* House of X, we see the giant head of "Mother Mold," a Master Mold Sentinel who makes more Master Mold Sentinels. It's in orbit around the Sun and the X-Men basically have to go on a suicide mission to destroy it.
* House of X with Wanda out of the picture, Mags treats Lorna like this as he likes having her by his side while teaching her.
* House on Bare Mountain belongs to UWA 37: United Werewolves of America.
* House on Bare Mountain invade a costume party being held in a girls finishing school (although Dracula and Frankenstein's parts in this scheme are comparatively minor.)
* House on Bare Mountain Krakow are running an industrial scale still in the basement of the school.
* House on Bare Mountain: The Wolfman, Dracula and Frankenstein spy on a girls' school in the mountains, where most of the girls sunbathe in the nude.
* House once actually showed up outside Wilson's apartment after they'd had a falling out in the hope that if he could get Wilson talking long enough, he'd eventually say something that would give him an epiphany. It didn't work.
* House once mentions that using more than one reason means you don't have a good one, you are looking for one the other will accept.
* House once used a Cat scan as a lie detector, observing which parts of the patient's brain were active to tell when he was lying.
* House one clinic patient was a married couple who identified as asexual but still loved one another. After House determines the husband has a medical condition causing his lack of libido and cures it, the wife bashfully admits she's had sex before but was willing to be asexual for him.
* House. One memorable example had House saying his staff's diagnosis was wrong, because they weren't wearing the right shoes — if the diagnosis was right, they'd all already be at a bowling alley.
* House, one of House's team will make a sarcastic suggestion that is hugely dangerous, bordering on unethical, whereupon House will say something like 'Well let's do that then' or 'That's just what I was thinking.' Once used the other way around, when House sarcastically snarls that since their patient is a kid they should cure her with puppies and sunshine. Which leads to Chase solving the mystery.
* House, one of Wilson's ex-wives tells House that she named their yappy unpleasant dog Hector because the dog reminded her of House, and "Doctor Greg House" is an anagram of "Hector does go rug."
* House on Haunted Hill (1959). He's the actual owner of the house, renting it out to the Lorens for their party, and early on he gives a brief tour of where in the house the various murders have happened.
* House on Haunted Hill (1959) in 1959 had a tank full of acid in the basement as big as a swimming pool, still caustic enough to reduce human bodies to skeletons.
* House on Haunted Hill (1959). In theaters, it was originally set up to have a plastic skeleton on wires fly over the audience, but it posed a tempting target to kids with slingshots and other projectiles.
* House on Haunted Hill (1959), Nora finds a (fake) severed head planted in her suitcase.
* House on Haunted Hill (1959), Nora Manning (played by Carolyn Craig) belts out her ear-splitting scream throughout the entire movie. Her scream is the first sound heard in the film, even before the opening credits roll!
* House on Haunted Hill (1959) (the Vincent Price version). Most of the supernatural elements in the movie are explained away as tricks but it's never

resolved just who or what those drops came from (which is why this is here and not in form one).
* House on Haunted Hill (1959). To say much more would ruin the surprise.
* House on Haunted Hill (1999), and logically decide to visit the control room. Hey, there's a maintenance guy, let's see if he can open SWEET ZOMBIE JESUS WHERE DID HIS FACE GO?
* House on Haunted Hill (1999) for his "opinion". The Doctor responds by shaking his head in a blurry fashion.
* House on Haunted Hill (1999) has a group of people being paid to stay overnight in a haunted house on Halloween
* House on Haunted Hill (1999) has Mr. Price hallucinate many horrifying things. One of them is his wife holding his living head in his hands.
* House on Haunted Hill (1999) is in fact haunted, but the different ghosts are actually all part of a single entity.
* House on Haunted Hill (1999) is set in an abandoned mental institution. (The original merely took place in a Frank Lloyd Wright-designed haunted house.)
* House on Haunted Hill (1999): It turns out that the house isn't merely haunted, but the ghosts have amalgamated into a single entity that speaks with multiple voices, and wants to devour the souls of the visitors to add to its consciousness.
* House on Haunted Hill (1999) plays with this, having designed a roller coaster that will fling the train ahead of you off the track, making you think you're about to die horribly... only for you continue along the same stretch completely unscathed. He's kind of a sick bastard.
* House on Haunted Hill (1999) points out this is a terrible idea, but is ignored.
* House on Haunted Hill (1999) , Pritchard, who knows the lethal history of the house, spends most of the movie sitting in the most central, well-lit room possible and drinking heavily. However, this doesn't do him much good. Interestingly, in the original version of the script, he was the one who survived, while the black guy died.
* House on Haunted Hill (1999) (the remake), the host and his wife are planning their own roundabout ways to kill each other during the party. Shame it should just happen that the house really is haunted, and filled with exceedingly sadistic and powerful ghosts.
* House on Haunted Hill has one. She's blind and gives quite a fright to poor Nora. And the audience is too, if her first appearance doesn't make them jump.
* House on Haunted Hill — Horror series. One film and a two-film remake series since 1959.
* House on Haunted Hill that terrified Nora moves by gliding rather than walking.
* House opens with police chasing an unnamed fellow who navigates the alleyways using this technique. One of the cops pursuing him discovers Parkour isn't as easy as the suspect on the run makes it look.
* House parodies this in a third season episode "Lines in the Sand" when he conducts a differential in the lobby:
* House Party (2017) comes with a terrible pick-up line as one of the first options in their dialogue trees; it instantly lowers the girl's opinion of you when used.
* House Party: After being refused entry to Play's party, Stab, one of the bullies that was harnessing Kid at the start of the movie, tries to burn the house down in revenge and starts to do so by getting some gasoline and dousing the side of the house. His brothers, Pee-Wee and Zilla, aren't exactly onboard with the plan however but Stab tries to kowtow them. Luckily some passing cops spot and prevent them from going through with it.
* House Party films (at least the first and third films) are a comedy version of this. The third one especially is more skewered toward this this, involving some bits of the aforementioned examples.
* "House Party" has Robot have several imagine spots of Gramps Unit killing his human guests.
* House Party is spent trying to get the attention of one of the available girls. Amy is participating in a scavanger hunt, and one of the item she needs is a condom, which fellow party-goer Frank has. But if you ask him for it, he thinks

you're hitting on him and refuses to talk to you until you either "confess" to having feelings for him or prove beyond the shadow of a doubt that you're straight. You're completely welcome to make that confession, which leads to him taking you aside and giving you a blowjob.
* House Party (Note that there are scripts of this movie online, but the dialogue in the actual movie seems to be adlibbed somewhat. This is from the movie, not the script):
* House Party: Robin Harris, who played Pop (Kid's father), died shortly after the first film was released. The sequel reveals that Pops died in between films, and Kid has been living at his best friend Play's house since his passing.
* House Party) was hosted by Art Linkletter, who'd interview children in hopes they'd say something amusing; one of his favorite tricks was to ask "What did your mother tell you not to say today?"
* Housepets!, after being reassured that the brontosaurus is an herbivore and therefore won't eat anyone.
* Housepets!, after receiving a (platonic-ish) kiss from Grape, who he'd nursed a crush on since ever. Not so much catatonia as motor function failure, but he doesn't mind.
* Housepets!: Animals do eat each other but this not explored very much. The only time in the comic it is actually shown happening is in an early comic where Grape kills and eats the leader of a group of mice that were annoying her.
* Housepets!" between a Dragon and a Gryphon (with a Kitsune GMing). It eventually ended in a stalemate, with both combatants being declared losers when the pawns decided not to play anymore. Though there was a winner: one of the pawns, King.
* Housepets! book, looking at King's swinging collar instead of King himself. Although to be fair, it's about all you'd expect from a pup who's only words (so far) have been "Hi! I'm Daisy!".
* Housepets!, but also admits that she is not romantically attracted to dogs.
* Housepets! engineered a water gun war between the cats and dogs of the neighborhood so he could test a new line of squirt guns.
* Housepets! even mentions MacGyver by name. The ultimate solution to his dilemma is, however, somewhat more directly violent than most of MacGyver's solutions.
* Housepets!, Fido keeping his relationship with a cat, Sabrina, a secret had let his superior, Sgt. Ralph, to fear his odd behavior was hiding illegal activity. Finding this out was a relief, though it came about after an international incident (Fido interrupting Sabrina's arranged marriage with Jata) that got Fido suspended from the force for three weeks.
* Housepets! Fox asks his cousin Bailey about a hypothetical dog with a romance problem, but she in turn cuts straight to the chase and tells him to just go ahead and hook up with the object of his newly discovered affections.
* Housepets! game... played by two celestial beings who happen to take the respective forms of a giant eastern-style dragon and a griffon.
* Housepets!. Grape even throws a lampshade on it while simultaneously humoring him.
* Housepets! had Spot (Superdog) claiming to see the future. His girlfriend says his super-vision can't do that, but he simply replies, "Spinning was involved."
* Housepets! has a character called "what chicken" that always appears (and looks indignant) when a chicken-related joke is made.
* Housepets! has stated that he doesn't really care how you pronounce it unless it ever spawns something with spoken words.
* Housepets! have this sort of dynamic. Peanut is a soft-hearted and sweet comic book nerd whereas Grape is a tough and sarcastic tomboy.
* Housepets! if Rock doesn't take Tarot, Sabrina and Bailey home from Australia with them.
* Housepets! is trying to explain this to his girlfriend, she asks if she's expected to believe this, and he says no, it's utterly unbelievable and nothing he can do or say could prove it. She suggests telling her something only Marion would know, and he describes what was clearly the most embarrassing experience of his life. However, the logically-minded Lois still finds the very idea of such a

transformation so unbelievable that she immediately jumps to a more "rational" conclusion instead.
* Housepets! It's happened twice in the arc "Jungle Fever"; one by Fido in reaction to Sabrina explaining the return of a foreign old flame, and one by Maxwell when he's begging Kevin to help him beef up to impress Grape.
* Housepets!, it's not actually a marriage, but Spirit Dragon had her avatar, Tarot, take Peanut for a boyfriend in order to block Pete from taking him as an avatar. His potential character class could not power up quickly if in a relationship.
* Housepets! Jack looks angrily at Peanut over it but then lets up in the last panel, saying he was just messing with Peanut.
* Housepets!, Sabrina once threatened her boyfriend, Fido, with erasure from existence.
* Housepets! Sasha practically gives everyone a nickname, mostly due to her cheerful personality. Grape also calls her boyfriend, Maxwell, 'Maxie', which she also claimed to Peanut it's something only she can call him by. Maxwell in return called Grape 'Kitty Whiskers' one time, which also belonged to his Ex-Girlfriend at one time.
* Housepets! so she could use him for a dog show. Apparently he only asked King, originally a human born at the tail end of the Cold War, just for "papers". King was a bit unnerved.
* Housepets!: Squeak has a fetish for being stomped on by giant paws, which both impresses and appalls—impalls—Spo after he tried to hit on her.
* Housepets! Squeak is a mouse who likes being stepped on by cats. In one comic this saves her life when a cat trying to catch and eat her is grossed out by her reaction and lets her go. Her boyfriend Joey is a dog who likes to wear a catsuit, which is treated similarly to both cross-dressing and fursuiting. Their relationship is also weird due to the huge size difference between them.
* Housepets! takes this literally when one of King's pups, Olive, develops a crush on the cougar cub Pueblo.
* Housepets! that he completely misunderstood the phrase "I want your puppies".
* Housepets! the ad selling a product aimed at people supposedly too stupid to operate a regular drinking glass.
* Housepets!, then uses the trope straight with the next card being The Tower.
* Housepets! the sapient anthro characters endure in their world very difficult to ignore or reconcile and have become frustrated and baffled not only by how very little (if any) protests or rebellions against it are demonstrated or how little progress is made to remedy the bigotry by Keene in the comic's lengthy run. But those same readers are also often baffled by how most of the "Pet" animals seem either apathetic or oblivious to the oppression they endure, leaving some readers giving up on reading it with a bad taste in their mouths.
* Housepets! the Series has a false alarm variety. Peanut was in a coma after fending off a mad dog to save his family. The doctors are alerted to a Code Blue in his room, and they rush in...to find Grape hugging a miraculously-awaken Peanut. She hugged him so passionately, she dislodged his ECG leads.
* Housepets!: The wealthy Henry Milton leaves his fortune to his six pet ferrets.
* Housepets! to teleport directly into the inner sanctum of Pete's temple. Though later on in "Temple Crashers II" she doesn't have that and they need to grind their way through the traps and monsters like the first time they were there.
* Housepets! was turned into a dog named King by Pete partly to teach him a lesson and partly because Pete needed a convenient avatar for his cosmic game (of D&D), he starts off hating it and everything about it. In time though, he starts enjoying it so much (especially after falling in love with a dog called Bailey) that when offered a choice he recognises that his new life is better than his old one and decides to stay as a corgi.
* Housepets! when looking for a sitter for their puppies. Or rather, King goes through one (and King being a massive worrywart does not help his search) while Bailey's brother Fox jumps straight to calling Peanut and Grape.
* Housepets!, when Miles the wolf becomes a substitute teacher his teenage son

Rockstar is show insisting to his human friends that "Mr the Wolf" is no relation.
* Housepets! When Sasha's boyfriend, Kevin, walks in on them, Fox bites Sasha's tongue.
* Housepets! with the in-comic comic, Spot (Superdog). "And now we will shoot him with our not special guns and kill him with regular bullets!"
* House pilot, Wilson and the patient have a conversation about the titular doctor and whether he cares about Wilson. When she says it's what you do that counts, Wilson confirms that House does care about him. While House does fuck Wilson over a lot, by the s8 finale he's proven the above a few times over; big ones being risking brain damage to try and save Wilson's girlfriend, and giving up his job/faking his death to be with Wilson when he's dying of cancer.
* House: Played with in the episode "Frozen", where the A-plot is centered on a female scientist (Mira Sorvino) stationed at a small research outpost in Antarctica suffering from a mystery illness serious enough to make her cough up blood. Because of the impracticality of sending a medical team over, Dr. House and his staff communicate with and diagnose her from the safety of their offices in New Jersey through a satellite feed. House even manages to get into a near-affair with her despite being separated from each other by thousands of miles.
* House: Pointed out by House as the reason why Chase is attracted to a doctor he was responsible for hiring as part of House's diagnostics team, demonstrating this with a side-by-side photo projection which shows an uncanny physical resemblance between the woman and Chase's late mother.
* House pointed out in conversation that she was basically his female counterpart, his eyes having gone appropriately wide from horror seconds before:
* House probably didn't deal with many conventional crimes that Scotland Yard was able to deal with on their own.
* House provides an inversion when a physical therapist orders Dr. House to use a quad cane:
* House Pseudonym in 1930? Even if she had been aged just 10 at the time, that would still make her over a hundred years old now.
* House Raith of the White Court of vampires are incubi and succubi feeding primarily on Lust. If they try to feed on a person who is in a genuine loving relationship, of mutual sacrifice and trust, that person is protected by love and it burns the vampire. In
* House recaps is how useless the hospital security is, only being able to catch a gunman in House's hallucinations and not in real life.
* House Redoran... and House Redoran STILL managed to hold the line north of Mournhold.
* House refuses to meet his patients, because remaining impersonal allows for objectivity. He criticizes Cameron and Wilson for becoming emotionally involved with patients, since it clouds their medical judgement.
* House removed by an MRI machine, which implies that they're made of metal or something.
* House revolves around this with the cranky neighbor below being a Canadian veteran who lost an arm in Vietnam and suffers from extremely painful phantom limb. It's eventually resolved when House breaks into his apartment, knocks him out, duct tapes him to a chair, and... cures him.
* House Rule is that players under a certain age can't be out on the first ball they face.
* House Rules and in one variant, Lying Bastard Scrabble, players are penalized for playing words that can be found in the dictionary.
* House Rules: even after the tournament is over, nobody ever goes back to the pre-Battle City rules despite these being the official ones in-universe. Even players from alternate universes use Kaiba’s new rules for some reason! Out-of-universe, this was due to the "Expert Rules" format being introduced to the real card game (in its first few months in Japan, the card game used a Duelist Kingdom-esque ruleset), which was initially introduced as an alternate format but quickly became the only one.
* House Rules: These are often a necessity, since there are rarely any "official"

rules on how speedrunning should be conducted.
* House RulesWhen the players tweak the official rules to make the game more fun for themselves.
* House Rule where a team's score stops being increased if they get too much of a lead over their opponents and keep scoring. For example, if the limit was five and the Red Team was leading 6 to 1 and kept scoring, their score would remain locked at 6 until the Blue Team scored a goal and closed the gap, then Red could score again and go up to 7. This is to prevent the trailing team from getting so frustrated by getting their butts handed to them that they rage quit and/or lose all motivation.
* House says that House and Stacy were meant to be deeply in love, onscreen it was more like this. She's deeply self-righteous about the whole "cutting up his leg without his consent" thing and hasn't seemed to learn her lesson when it comes to her ill husband either, doesn't believe that he has any human feelings whatsoever (even when he shows her and us his adorable, romantic/cheesy side by giving her a prescription for her "heart problem") and seems to act like she wants to kill him in his sleep. For his part, he can't decide whether he wants her to be with him or if he wants her to suffer and at one point, breaks into her therapy file so he can act like the nice guy. He ended it in "Need To Know" but it really, really doesn't make him any happier.
* House's behavior towards Wilson in early Season 5 is also rooted in this.
* House Season 4, one of the applicants for House's team is Henry Dobson, a doctor in his mid-sixties with an encyclopedic knowledge of medicine rivaling that of House himself. However, House gets suspicious when he notices that Dobson always delegates medical procedures, no matter how trivial, to junior doctors. House eventually discovers why: Dobson is not a real doctor, but rather a Columbia admissions officer who audited 30 years worth of medical school lectures. He could not perform basic procedures because he never got any hands-on experience.
* House sets up bets with his underlings, friend and boss all the time, and some of them have picked up the habit from him. Generally, the audience doesn't know a bet was in progress until money changes hands.
* House's facial expression makes it very clear he's reaching for the extra strength brain bleach when he sees the result of a patient who tired to circumcise himself.
* House Shark: A couple of instances where swearing wouldn't have been out of place get this treatment.
* House Shark: Pretty mush everything about the shark in this movie SCREAMS this trope.
* House Shark's eyes), the film jumps ahead 2 months to Frank and his son, Theo, living in their backyard.
* House Shark: The shark's P.O.V. is seen through a blue screen filter.
* House Shark thinking he has a shark in his house, he spits his coffee right onto the paper.
* House. She went back blonde to play Emma Swan. Midway through filming Season 6 she opted to cut her hair to shoulder length, and just wore hair pieces for the remaining episodes.
* houses his soul, prompting his memory loss and the entire second season. the same way Ciel’s ring was used. The effect lasts much longer (in terms of screen time, at least) and plays an even more crucial role in the plot then the first example does.
* House, since House's team only handles the most complicated cases: "I look for zebras instead of horses because other doctors eliminate all the horses."
* Houses in Europe are made from stone and/or concrete and built to last generations and are often handed down to the next generation. Houses in the US are often made of wood and bought and sold like underpants. That explains the surprised reactions many Europeans have when seeing what "a bit of wind/floodwater/earthquake" does to American houses.
* Housesitter, a con artist and a pathological liar, plays this role for Newton Davis, played by Steve Martin. He's almost as crazy as she is. They're kind of

Manic Pixie Dream people to each other.
* House Sittin' for Sandy without revealing what it actually does or what happens afterward.
* Houses Marik and Kurita are Balanced, in slightly different ways. House Marik is notably a case of 'a little bit of everything' in their faction pool, with units of all weight classes and categories available. They are fast but not as fast as House Liao, tough without being as tough as House Steiner, best demonstrated by their use of the
* House's "marriage" is pointed out by a patient, who is himself "married" to his job as a musician.
* Houses, mines, farms, and ranches that previously existed in areas that have since been declared parks or protected areas are often exempt from regulations covering the rest of the area.
* Houses of the Blooded A good Narrator will do this at the worst possible time.
* Houses of the Blooded is similar. When a player rolls for something, it's generally the right to decide things about the scene or how actions turn out. The rules explicitly state that you can decide pretty much anything that hasn't specifically been established yet.
* Houses of the Blooded: John Wick talks about the Ven as if they were real, even providing a bogus bibliography.
* House, sporting an absurd deep V neck sweater that exposes half of his chest.
* House: Stacy Warner to the titular House. She loves the thrill and excitement of being with him and misses the way their relationship used to be before it fell apart. While House still loves her, he is the one to realize that all the reasons they broke up are still there and that he isn't able to change himself for her.
* House Stark has multiple examples. Sansa and Arya are the only daughters of Ned and Catelyn. Catelyn and Talisa were the only prominent women in Robb's forces. During Rickard Stark's reign, his wife and daughter Lyanna were the only prominent female Starks.
* House Stark members drop like flies. By "The Last of the Starks", only Sansa, Arya, Bran, and Jon are left.
* House, started having casual sex at Cameron's suggestion. Cameron later broke the relationship off when Chase developed feelings for her, but they did end up together at the end of the season (3) and married at the end of season 5.
* House's team. All extremely competent doctors, all competitive, all willing to bend rules to save a patient. And though it sometimes seemed they hated each other, their loyalty has actually lasted even though they've all gone their separate ways.
* House Steiner sacrifices speed in favor of more armor, weapons, and tonnage, all thrown together to slowly but surely crush the opposition.
* House still finds plenty of excuses to be at the centre of an Eye Take.
* House, such as "Baggage", where UV lights applied to the patient in the episode's last 10 minutes for a TB screening reveal that the patient had tried to remove a tattoo to which she was allergic. The tattoo wasn't removed fully, causing a prolonged allergic reaction.
* House suddenly has a seizure/heart attack/projectile vomiting/stops breathing/anything involving bleeding/bizarre rash out of nowhere, expect the screen to go black in about 3 seconds...
* House takes place, is in New Jersey (presumably somewhere in Mercer or Middlesex County).
* House Targaryen does not have to hide from House Durrandon in terms of badassery. Aegon, Visenya and Rhaenys are dragon riders and set to conquer an entire continent. Their half-brother Orys is one of the most skilled swordsmen in all Westeros and their cousin Raenna has been trained as a
* House Targaryen is this at the beginning of the series, after the Targaryen dynasty was dethroned fifteen years earlier in a civil war.
* House: Taub lampshades this when one of the other applicants was refusing to break into a patient's home looking for clues to help with their medical diagnosis.
* House, Taub pretends to have started playing racketball regularly with Wilson, but House is almost certain he's lying and quizzes him on the sport. It's almost a

double subversion in that House knows that Taub knows House is applying the trope (see the example below), but since Taub's answer was correct, he hasn't really caught him out.
* House tells Cameron that he hired her because she was pretty, not because she was "the best" ... for example, she graduated
* House Telvanni gives a quest to retrieve the Robe of Drake's Pride from the servant of another House Telvanni councilor. Killing the servant is the only way to get the robe, and you'll need to taunt her into attacking you first to prevent being expelled from House Telvanni. She turns out to be a moderately powerful spell caster, and the robe gives her several advantages when fighting magic users, which your character likely is if you've advanced in House Telvanni. After you take the robe back to Neloth, he'll reward you with...ten septims. The robe itself is worth 205, and has several enchantments a magic using character would enjoy.
* House that Chase is the least intelligent member of the Season 1-3 team. He certainly cops the most flak about it, from pretty much everyone. Yet, despite the fact that he has on average about two lines of dialogue per differential, he has solved more cases individually than either Cameron or Foreman. The one time he does firmly try to tell House that he's in the wrong, poor Chase ends up getting punched in the face.
* House the best of luck in staying clean after his court case against him fails.
* House. The Button itself usually comes in the form of House's Vicodin addiction, and not surprisingly the signal that tells us he's "back to his old self" is usually him taking a pill.
* House the corsage but then she realizes House is trying really hard and she wants him to be honest. So he tells her she only wants to date him because she likes damaged men who need to be fixed.
* House - The episode with the rocker with epilepsy triggered by chaotic music. House brings in a marshal stack and plays REALLY LOUD MUSIC... and then asks "so what were your inspirations for this" over the cacophony.
* House. The first theory is nearly always a fail. He gets it right somewhere around "Plan J", and then realizes "Plan C" was the right one all along.
* House, the medical detective, once had to solve a case through the phone while at the airport. Another case was solved over a webcam since the patient was stuck in Antarctica. Even in normal circumstances, he often can't be bothered to talk to the patient, and phones in a diagnosis via his underlings.
* House, the other guy was: something is wrong with the diver after all.
* House. The priest has been moved around frequently after a boy accused him of molesting him (causing the priest to lose his faith), but later the boy apologizes for falsely accusing him.
* House. There are exceptions, but whatever the person is concealing rarely qualifies. Not that it stops these doctors from spilling the beans half the time anyway.
* House, the show was already a big hit. Apparently, the writers knew what they were doing all along.
* House, the title character decided to make a point about how he's treated as a handicapped person by jamming his cane into a woman's foot as he passed her. He apologized in a sincere fashion and watched as the woman apologized back for snapping at him.
* House, the title doctor gets a pair of tickets to go see a Monster Truck rally. Naturally, his first choice is Wilson, who declines for various reasons. His next choice is Cameron.
* House, the titular character is forcibly taken to his father's funeral, and has to deliver the eulogy. (He hated his father and didn't want to go.) He uses this as a chance to get a piece of his father's skin to subject to a DNA test, which confirms his long-standing suspicion that the man was not his biological father. He also comments on his father's weak qualities in the eulogy, and says that 'if he was a better father, maybe I'd have been a better son'.
* House the titular character tries to invoke this trope with Cuddy. Thinking Cuddy is coming, he says "I did it all by myself, Mommy" after he'd resolved a case

without help (contrary to her instructions). It backfires, however, as the person who comes in is actually just the janitor.
* House They frequently resuscitate people with epinephrine, but it's usually administered through the patient's IV line.
* House, Thirteen does this when trying to track down what their patient's cocaine was cut with. Thirteen has a chronic case of death wish.
* House Thirteen is placed in the placebo group for a Huntington's Disease medication, which Foreman is able to find out by the nurse's small talk. Therefore, not only is the staff willing to spread this information around, said nurse even mentions that the real medication has a foul smell while the placebo doesn't, meaning they're trivially easy to tell apart which makes the whole exercise utterly pointless by countering the placebo effect.
* House. This continued after the break-up, as any friendship is gone, his annual breakdown isn't sympathy inducing cos he's acting like an abusive ex, she compromises patient care to get back at him, and even though he does get nicer in season 8 after a prison stint for crashing his car into her house, she's off the show in that season and nobody seems to care about her absence much.
* House This is not referenced again until a couple of episodes before the finale.
* House this trope exactly, since the boy himself doesn't know that the "vitamin" shots his mom's been giving him are actually testosterone to make up for his lack of natural hormones, and he has a bit of a meltdown when he finds out the truth.
* House: Though Dr. House doesn't seem to care as much about his patients as he does solving the puzzle, he still hates to lose anybody under his care; he runs into a number of obstructive bureaucrat types (Vogler being one) who only care about the hospital's reputation. Cuddy, as dean of medicine, has to balance these objectives.
* House to a couple who didn't know that their sixteen year old was smoking.
* House to Astonish live show opened with Paul declaring "Live! On fire! On ice!", which was also used as the episode title. It wasn't really on ice (or indeed on fire).
* House to Astonish money bin now the only safe haven for your money?"
* House to figure out that the man's son is a practical jokester with coins in his pocket; he placed the coins on his dad while he was sleeping.
* House to get an MRI. Only problem? The weight limit for the MRI is 450. The man in question weighs over 600.
* House to House, a memoir by an American infantryman set in the Second Battle of Fallujah, depicts the horror and chaos of urban warfare.
* House Torra and their subordinates are the Warriors to the Abbai's Soldiers, with Torra ignoring the demands of the war in favor of a strike against a perceived weak power to try and capture glory, territory and their superior technology (specifically
* House-type of problem while he's driving an ATV, which crashes and explodes in a fireball.
* House Unfortunately, the father doesn't want anyone finding out about the affair, so he doesn't admit the real reason, and the young lovers run away together.
* House uses this exact phrase when talking to Wilson about Catherine Willows in the
* House variety. She goes out of her way to 'get to know' the patients, as opposed to the other members of her department who more or less don't care and only ask for diagnostics information.
* House very rarely wears the white lab coat required for doctors at his hospital. Vogler, the hospital's chairman at the time, tries to get House to wear one in the first season. Apparently this is in line with Fox's desire for a medical show without "white coats going down the hallway."
* House, Vogler's actions to fire House end up inspiring the resistance he feared House himself would inspire.
* House want to be able to tell coworkers and customers exactly what you think of them?
* Housewarming Surprise opens with a slide show of Strawberry's recent vacation and

all the friends she made during said vacation.
* House was also promoted in this way ("You're risking a patient's life!").
* House was a movie-length inversion of all the common tropes on the show, which arguably prepared the way to a different direction in the show, thereby qualifying itself as a pilot.
* "House Washington" is described as being the first to use "atomics" (i.e. nuclear weapons), an invention of the "raw mentat" Einstein, in an "intra-provincial" war with "House Nippon" for control of trans-Pacific trade routes. Hitler, a "Pretender" to the Imperial Throne, in this history was overthrown during the previous decade.
* House went to great lengths to get pregnant. When that doesn't work out, she tries to adopt which doesn't work out either, at least at first.
* House when a detective offers a deal for House to go to rehab in exchange for temporarily giving up his license. When a depressed House shows up (on the last day of the deadline) finally beaten into accepting it, the cop says it's off the table. In this case he's not (just) being a jerk; he's gotten new evidence since he made the offer.
* House when Cuddy is trying to get pregnant, House brings one of the sperm donors she's considering in for an interview. The man had a very annoying laugh which came out when he was nervous. This was one of House's arguments for why he shouldn't be considered as the father.
* House, when Drs. Cuddy and Wilson try to force House to hire a new team. Wilson attempts blackmail by "kidnapping" House's guitar. When House still won't give in, Wilson sends him the torn off whammy bar as a threat.
* House. When things get REALLY desperate, House uses a wall in an airport terminal, much to the displeasure of the security.
* House where actresses Lisa Edelstein and Jennifer Morrison perform some of their scenes together while speaking and acting like valley girls.
* House where a man has just awoken from a vegetative state after ten years and asks what an "Ip-odd" is.
* House where a patient is having seizures. He will stop in the middle of a sentence for a few moments before going right back to what he was saying, unaware that he lost any time.
* House where a patient suddenly experiences a cranial fracture and severe hemorrhage while undergoing an MRI scan. Quoth House: "Her head exploded! How cool is that?"
* House, where the eponymous character is keeping Taub away from the latter's phone while texting Taub's wife to take her clothes off.
* House where the main character occasionally has a cold, a headache, or some other minor health issue without it impacting the plot. This comes from being around sick people constantly.
* House: While House is under hypnosis in the episode "House's Head", he remembers a bar, and looks out at the patrons but sees only a faceless crowd. After he focuses, the crowd doesn't come up again.
* House while the two are supposed to be watching her, they try to solve the situation before Cuddy finds out. When Cuddy comes home during their planning, Wilson escapes by climbing out a window.
* House: White Girl (Cameron), Black Guy (Foreman) and White Foreign Guy (Chase). Later we also get the White Bisexual Girl (Thirteen), White Jewish Guy (Taub) and Adopted Indian Guy (Kutner).
* House who confessed a series of petty personal crimes to the well-wishers who gathered, and accused himself of ever-worse activities, like sleeping with a teenager or murdering his business partner. The team learn the partner committed suicide and realize he's confessing to everything under the sun essentially at random (to test it, Chase casually mentions he can't find his spare shoes, and the guy confesses immediately to having stolen them).
* House, who had previously resigned and not even looked at the patient once, was the one who solved the case and got the money, which helps convince him that he needs to keep working at the hospital.

* House who has a string of seemingly embarrassing ringtones that he uses completely shamelessly. In fact, he appears to have chosen them deliberately to embarrass and mock his team. Calls from chronic adulterer Taub set off "Escape" (The Pina Colada Song).
* House, who plays him — except for the "diagnostician" bit (the closest he gets to that is being the son of a doctor). The writers' success at not making it too blatant varies. They have at least succeeded at not making House a novelist (that we know of). Which Hugh Laurie also is, of course. There's not much Hugh Laurie doesn't seem to be doing, so that some of it would rub off on his character seems inevitable.
* Housewife: A woman whose entire life revolves around her husband and the care of his house.
* Housewife — A woman whose entire life revolves around her husband and the care of his house.
* Housewife: The wife who stays home and cares for the house while her husband is the breadwinner.
* Housewife: Very often what the heroine is, for good or ill depending on the story.
* House, Wilson is seen "clipping coupons." When House's beloved guitar is "kidnapped" and the cut-and-paste note shows up demanding ransom, it's not exactly a mystery as to who did it. Not that Wilson's actually trying to hide his involvement or anything... House later comes across Wilson nonchalantly reading a newspaper with big holes cut out of it.
* House, Wilson unwittingly takes Cuddy to a fetish photo exhibit at an art gallery. Their head-tilt moment includes statements like "That is such a bad idea! There is no way that won't cause damage to the large intestine" from Cuddy and "Is that a bicycle pump?" from Wilson.
* House Wilson with anyone, while Amber seems to be doing it partly as revenge for House firing her and partly because she thinks that the House/Wilson relationship is bad for Wilson (there is admittedly some justification for this opinion).
* House with "Thirteen", number 13 out of however many potential people were in the pool to take over the assistant jobs with house, and who continues to be called "Thirteen" for the entire run of the series except in very rare circumstances. Her real name is Remy Hadley. The first time she's actually addressed by her name (Cuddy calls her "Dr. Hadley"), everyone just looks around in confusion.
* House with which to keep order. If any congressional members become unruly, the presiding officer can have the Sergeant at Arms "present" the mace at the offender, which is usually enough to restore order. Sadly, no examples exist of the mace being used to beat insubordinates into submission.
* House would suggest, the appearance of Jack Moriarty, the man who shot House, had repercussions beyond his brief appearance. He appeared in only one episode, and almost all his scenes took place in House's head, but his shooting House led to House's ketamine treatment, which led to him temporarily being able to walk pain-free.
* House Xorlarrin of Menzoberranzan used to start early arcane training for all male offspring with high magical talents, who were in turn given a status that was nearly equal to all ruling females (by the way, the other male children who didn't develop such talents were either sacrificed or sold).
* House. You can only wonder how so many doctors with tragic pasts ended up in the same hospital.
* House: "You're telling me to do the right thing while climbing out a window?!"
* Housfull 2, the lady playing Anarkali for JD says, "I love fools!" when she receives a flower from him. If you know Hindi, you'll understand flower = phool, which is commonly said as "fool". Therefore, "I love fools!" = "I love flowers!"
* Houshin Engi, but he is so lazy that he can spend two years sleeping continuously, and live in a special suit with an artificial respirator so that he doesn't have to bother breathing.
* Houshin Engi have powers related to the element of earth. Specifically:
* Houshin Engi. Koyuken of the Four Saints of Kuryuu Island wields the Paopei

Kongenju (an orb the size of a basketball) which allows him to summon as much water as he wants, to the point that he's introduced flooding a mountainous desert area with a colossal tsunami. During the fight against Taikobo (who notices that it's salt water), he explains that Kongenju is connected to a twin orb floating in the ocean of Kingo Island and thus it doesn't create water but rather summon the water from one orb to the other.
* Houshou Marine (a self-proclaimed pirate captain) calls her fans her "crew", naturally. She also refers to her foreign fans as "Overseas Sexy Guys/Gals".
* Housing: Soldiers with a pregnant wife are bumped up to the top of the waiting list for housing. At the very least, they will get the equivalent of a two-bedroom apartment until a house is made available for them.
* Housos — and had never pretended to be anything else — they ended up promoting it instead to cover their embarrassment. Its creator, Paul Fenech, credited this with bringing the show to a wider audience.
* Houston Astros pitcher J.R. Richard's major league career came to an abrupt end after suffering a stroke at age 30. He made a few short-lived attempts to restart his career in the minors afterwards but was unsuccessful.
* Houston drives like that. A popular joke is that Houston comes with two built in racing tracks, Interstate 610 and Beltway 8, with a third (Highway 99) under construction.
* Houston from store shelves in 2014 once they realized where most of their sales and popularity were coming from, not wanting to risk lawsuits.
* Houston Knights; the criminals he was investigating decided to get him off their case permanently, but unfortunately his wife took the car out that morning.

* Houtarou Oreki. He may initially appear stoic and emotionless but in fact has a caring inner side.
* Houyhnhnm's was meant to satirize the Age of Enlightenment of the 1700s. A few centuries later, scholars would misinterpret it as Jonathon Swift's idea of a perfect society.
* Hovedløselille to remind people of the importance of situational awareness while at train stations.
* Hover Bike: This decade saw the construction of the first working prototypes of "flying cars".
* Hover Board, Kamui Woods and Mt. Lady are given the go ahead to approach but attack Izuku without giving him a chance to explain, made worse by the fact everything he was doing was perfectly legal. Nedzu notes the two will likely be hearing all about it from their lawyers, especially since Izuku has video evidence.
* Hover Board, refusing to believe the boy made it himself. As All Might has already crushed one of Izuku's dreams, his actions cause the boy to accuse him of trying to make him suicidal.
* Hoverboards, which are featured in one part of the film, quickly lost popularity once they started exploding without warning.
* hover over the Soviet Union and be dropped if needed, wiping out the USSR and probably destroying the climate of the northern hemisphere in the process.

* How about spotting that one Lego piece you really need? That one piece you KNOW there are several copies in the same pile? That very one piece you saw FIVE times when you weren't actually looking for it?
* How about the actual broomsticks? They can travel over 100 mph, they fly more than high enough to cause fatal falls, and kids ride them without any licenses, seat belts, safety equipment, lights, or air traffic rules. Even in blinding rain and thunderstorms. Neville, Harry, and a few other characters actually sustain broken bones and concussions from falling off brooms, but nobody in the wizard world seems to think broomsticks are

* "How about this for a headline for tomorrow's paper? French Fries." James French, executed in Oklahoma's electric chair, 1966
* How about those 1940s action serials? Especially ones directed by Spencer Gordon Bennet and Fred C. Brannon. Anything that is not nailed down will get thrown or smashed during a fist fight.
* How about those contestants who never learned to swim, or the occasional person who doesn't realize that during the game you can't get cigarettes?

* how a building is used. For instance, when Angel briefly stays in the Hyperion Hotel in the 1950s, he can enter any room because the hotel is a public accommodation and no one's home. Half a century later, however, when Fred moves into the long-closed Hyperion with Angel's other friends, she must invite the vampire into her room because the hotel is no longer open to the public.
* How a Kinfolk is treated, depends largely on the Tribe. While they are indeed basicly slaves and breeding stocks to the Get of Fenris and Shadow Lords, who are very conservative, the more liberal tribes, the Glass Walkers and Bone Gnawers treat their kinfolk pretty decent and the Children of Gaia treat them as equals.
* How alive Boulder actually is is played with throughout his appearances. He's usually treated as an inanimate rock, but certain incidents throw that into question. For instance, at one point in "Maud Pie", Maud pushes him towards some food; the camera cuts away, and when it cuts back, the food is gone. No-one seems to notice.
* how amiable they're feeling to sprouting squelching masses of tentacles.
* How am I going to tell Harry?" One trip to the morgue (and a misidentified body) later and Harry sends his friends back to Hogwarts then leaves to avenge Sirius' "death."
* "How Am I Supposed To Live Without You", Air Supply's record label, demanded that Bolton make lyrical changes before giving it to the band.
* how. And mentioned it many times. Then mentioned that he hid the watch in much the same way once Butch's father passed away.
* how, and whether Sophia would mind if she knew who she was, are all open questions.
* How and why Yu and Rei died? There are hints this was a tragic affair, but it's never further elaborated in the games proper.
* Howard and Kreese give a few of these from time to time through a couple of the one-off lines. Particularly when Jack is using a Happy Pill or eating a Happy Onion
* Howard and The Robot Hand (literally no-one believes him when he tried to claim it '"fell" onto an *ahem* sensitive area) and Raj and Siri (yes, as in the iPhone software). As Sheldon put it "Good for you! You've taken a huge evolutionary step by replacing the need for human contact with a machine." He commends the "taboo love" (Bernadette and Howard on the other hand are freaked out by it). Also joked about in the first season.
* Howard, a walking, talking anthropomorphic duck "Trapped in a World He Never Made".
* Howard, Bernadette and Amy are usually invited over for a real reason like Vintage Video Game Night. Penny, on the other hand, once came over in her pajamas muttering "Out of coffee, need coffee" and proceeded to pour herself a cup like it was nothing.
* Howard Borden is friendly with his ex-wife, although his insecurity makes him competitive over impressing their son.
* Howard Caine played two different German officers in two different episodes before becoming a semi-regular as Major Hochstetter in Season Three. One appearance was in "Happy Birthday, Adolf" from Season One, playing a Major who was involved in organizing a party for Hitler's birthday while remaining on alert for an impending American air raid; in "The Battle of Stalag 13" from Season Two he played a Colonel wanting to turn Stalag 13 into a camp for local citizens to be interrogated for suspicious activity (ironically, the character wore the exact same uniform as that of Major Hochstetter).
* Howard Chaykin, as the perpetrator is known, and is pursued for his master plan.
* Howard Chaykin essentially created Dominic Fortune as a way to revive his Atlas character Scorpion for use in the Marvel Universe.
* Howard Chaykin features a scene where the protagonist spies on a mortuary connected with the villains and witnesses the mortician inviting two high-society types to have sex with the freshly embalmed and prepared (down to being dressed in sexy black lingerie and high heels) body of a beautiful young blonde.
* Howard Chaykin. While some of his conceptions were interesting and clever, the series became notorious for deliberately pissing off what he considered comic

fandom's "adult twelve-year-olds" or "juvenilists". He led off by killing all of the Shadow's original friends — in gruesome detail. He made the Shadow a sexual sociopath who defeated enemies with high-tech weaponry instead of intelligent deceptions. Today, these things are routine in comics, film and TV, but at the time even mature readers were shocked and angry. Chaykin stated in interviews that he didn't care about the Shadow or his traditional fans ("fuck'em") but was hired to do a job and did it.
* Howard Cosell breakdown on WABC, from which Dan Ingram would play portions out of context for years thereafter.
* Howard Cosell is often quoted as saying "Ladies and gentlemen, the Bronx is burning" in reaction to an aerial shot of a five alarm fire in the Bronx during Game 2 of the 1977 World Series. The supposed quote was further popularized by its use as the title of a book and subsequent
* Howard Dietz was a songwriter who often worked with Arthur Schwartz, and many of their songs were featured in the
* Howard even has an... unplanned emission, the first (and second) times he sees her this way.
* Howard Finnigan's father Paul has not seen him for thirty years by the time he shows up at the hospital where his eight-year-old son Casey has been taken after being hit by a car. Because this means he has never met either Howard's wife Ann or Casey himself, he accidentally refers to Casey as "Kevin" when he finds Howard and Ann, and has to be prompted every other time he tries to remember his grandson's name.
* Howard goes through a sudden spell of commitment issues about committing to Bernadette. His problem is that he's too attached to some fantasy of actually being with some perfect-beauty actress like
* Howard Hawks as his favourite film of his, stating that it was a movie he had complete freedom to achieve what he wanted.
* Howard Hawks - set this time in the television news industry - put the romance aspect back.
* Howard Hawks the titular 'Thing' is of course immune to bullets. "What do you mean guns are no good?!" a character demands.
* Howard Hesseman, who played Dr Johnny Fever, had a lengthy run as the teacher on
* Howard Hughes; as it turned out, the answer to that question was "eighteen months".
* Howard Hughes was a highly controversial figure due to his eccentricity and, to some extent, his wealth. His synopsis of his fame:
* Howard Lovecraft and the Frozen Kingdom and its sequels are all this, being about a young Howard Lovecraft meeting a friendly version of Cthulhu and taking on evil forces in the form of other creatures from H.P. Lovecraft's books.
* Howard Morris is an aversion of this: he was already the mischevious, rock-throwing and window-breaking mountain nut Ernest T. Bass, however in one episode, he randomly appeared as a mild-mannered, and soft-spoken TV repairman.
* Howard often makes the most jokes and insults towards his friends but he became upset when he saw an Alf toy and mentions that when his father abandoned him, his mother gave him the toy and told him that Alf took his father to his home planet and then cries after asking where his father is.
* Howard Payne used to be on the SWAT's bomb squad and he was forced to retire when an explosion injured him, resulting in the loss of one of his fingers. Howard's compensation was just a tiny pension and a cheap gold watch, which pissed him off royally since he felt he deserved a lot more for his service. This motivates him to become a terrorist and kicks off the plot of the film where he holds people hostage with his bombs and demands millions of dollars in exchange for their safety.
* Howard P. Lovecraft serve as a concrete if small-scale example of this, explicitly working towards the goal of helping bring about the "clearing" of the Earth of its current occupants.
* Howard Schnellenberger and Paul Ilyinsky both serve as Governor of Florida.
* Howards End Productions until the latter's death in 2005. Their partnership is still the longest in independent film, lasting for 44 years.

* Howard Shore was thrown out, Shore himself appears in the movie as the conductor of the pit orchestra for the Kong stage show.
* Howard Shore, which has led some people to claim he was never talented at all. Others could care less and enjoy all of his work.
* Howard's Hyborian Age is often placed in 10,000 BC, give or take a millennium or two, as established by L. Sprague De Camp in the later Conan novels and stories. In fact, Howard never dated the Hyborian Age at all, but he did date the Thurian Age (the time period of his other barbarian king Kull of Atlantis) as 100,000 BC. Calculating the centuries that pass in the "Hyborian Age" essay, one can place the age of Conan in any period from 90,000 BC to 10,000 BC.
* Howard's lack of relationship with his father and overbearing mother cause him to act out. He is by far the most outgoing and talkative of the main four but is often unaware of how much he is disliked. He also excelled in school in order to impress and bring pride to his mother. This costs him the ability to take care of his own life and he expects his mother (and later Bernadette) to
* Howard's mother and eventually Bernadette call Howard "tushie-face", something which Leonard immediately posts to Twitter upon hearing.
* Howard Stark endured ten of these by HYDRA after the end of World War II, the first one being before Tony was even born and the last one being the successful attempt by the Winter Soldier. Both Ana Jarvis and Tony's mother Maria ended up being casualties of these attempts.
* Howard Stark reveals that he discovered a new element that would perfect the arc reactor and revolutionize energy. However, he lacks the technology to create it and leaves it up to Tony to solve the problem.
* Howard Stern and claims to have watched every season of the talent show before he joined the judges' panel in Season 7 (replacing Piers Morgan).
* Howard Stern and his colleagues have often prank called stations that would otherwise be very boring. Howard has many alternate personalities he takes during these calls.
* Howard Stern, his new employer - Moti, refuses to shake Howard's hand.
* Howard Stern in 1987 to create a program that wore its right-wing partisanship on its sleeve, leading to a similar proliferation of conservative talk show hosts. Together, Stern and Limbaugh also demonstrated that there was still a lot of life left in non-music radio formats, which had been in decline for decades since the rise of television.
* Howard Stern Show, Robin joked that Howard gave Beth a drawer at his place and not too long after that she left her apartment after burning it down.
* Howard Stern surfed Rotten.com live in 1996 during his radio show, traffic spiked so much the site spent days off the air.
* Howard Stern up in arms, and as such, they've only continuously ensured that his endeavors continue to have high publicity by their very public and direct attempts to censor him.
* Howard Stern walked over to the set. Heidi moved toward the left end of the couch, and Gilbert said that she did that because he's Jewish. Rebecca jumped to Heidi's defense, saying, "Heidi is one of the nicest Germans you could ever hope to meet." Gilbert said, "That's not saying much."
* Howard Taylor of a webcomic has to be like this, since it's likely that for someone that one page is the only one they'll ever see. Given the length of the average webcomic page, more than likely it will fill up most of that space.
* Howard tells the others this when he actually does get a girlfriend. She's out of town when Leonard's mom comes over... which is unfortunate since Leonard's mom is convinced
* Howard the Duck, after Howard ends up tied to a table during a brawl in a diner, the Dark Overlord of the Universe (possessing Dr Jenning) telekinetically spins a cleaver and cuts the rope between Howard's legs - when Beverly asks Howard if he's OK, he replies in falsetto pitch.
* Howard the Duck apologizing for not having a fully-formed comic ready for publication that month.
* Howard the Duck, as in the comic, establish Howard and Bev as a romantic couple.

* Howard the Duck. As such, Phelch's name violates both the profanity clause and the ban on "sex perversion or inference to same".
* Howard the Duck enters the diner during the same scene and begins attacking.
* Howard the Duck features a pizza being described as "It's a circular Italian food object."
* Howard the Duck features one of these with the usual staples. It being the 80s, scary perms are included.
* Howard the Duck got in on the action in the third issue of the black-and-white 64-page version of his comic, where he had to save Christmas from being taken over by a villain named Greedy Killerwhatt.
* Howard the Duck has Beverly, a human being who on being asked what world they're on by an anthropomorphic duck responds with:
* Howard the Duck, Howard barely survives a butcher knife landing near his groin and he responds in a soprano.
* Howard the Duck, Howard threatens to bite someone and give them "space rabies".
* Howard the Duck, in it, even if he wasn't mentioned on the character list, are equal to or greater than 100%.
* Howard the Duck is pretty grouchy about being "trapped in a world he never made!" and is mostly just trying to get by among us weird hairless apes.
* Howard the Duck, it's often considered one of the worst movies ever made.
* Howard the Duck pulled this one twice: the first Freak Lab Accident dragged Howard to Earth; the second pulled down the alien demon that possessed Dr. Jenning.
* Howard the Duck recently used a gun actually named the BFG when going zombie-hunting across the multiverse.
* Howard the Duck retroactively helped the movie's reputation by being regarded as worse.
* Howard the Duck's enemy Black Hole has a dimensional portal thingamajig stuck in his chest like a black disc, and he can suck people and things into it. Everyone's reaction is that it's disgusting.
* Howard the Duck showed that Howard's homeworld was like this with a duck theme.
* Howard the Duck's more persistent nuisances was "the Kidney Lady", an annoying old battleaxe who thought Howard was the ringleader in a kidney-stealing conspiracy.
* Howard the Duck stories were retconned to being the work of the Krylorian Bereet.
* Howard the Duck, The Dark Overlord of the Universe takes over the body of one Dr. Jennings.
* Howard the Duck, thinking she was a bad influence on his five genetically-cloned offspring that he was raising as his sons. (He thought she was causing them to find violence attractive; sure, fighting her is going to prove it isn't, right?)
* Howard the Duck, when Cherry Bomb's manager tries to attack Howard with an ice pick, Howard grabs it from him and uses it to pin the manager right to the bar's counter through his looped earring, causing him to scream in pain. Howard then threatens to "pierce" the manager's other ear unless he pays the band their money and releases them from their contract with him.
* Howard the Duck wherein Beverly snuggles up and kisses Howard. Viewers see them silhouetted as she snuggles up toward him. Several feathers on his head stand up straight.
* Howard the Duck would fall into in this trope, except for the fact Howard is technically a flesh-and-blood being, and not an actual cartoon character.
* Howard Wolowitz knows sign language, Mandarin Chinese, Russian, Arabic, Farsi, French, Klingon, and is implied to know many more. Although it may be an attempt to
* Howard Wolowitz's mom seems to genuinely believe that he's still literally a child; she refers to his job as "school" and when he takes the day off, she asks if she should have someone bring him his homework. Then again, she
* How a Realist Hero Rebuilt the Kingdom has intentional rivalries set up in the Kingdom of Elfrieden. The King is human but there are many other races in the kingdom. The king has a small number of personal troops, but most of the Kingdom's military is split into the Army, Navy, and Air Force, each controlled by a different duke. Since the dukes aren't human, this rivalry is meant to be a check

on the king becoming a tyrant and oppressing the other races.
* How a Realist Hero Rebuilt the Kingdom, Liscia has this position among Souma's queens, as his first wife and heir to the throne of Elfrieden.
* How a Realist Hero Rebuilt the Kingdom: There aren't guns in this world, not because they don't know how to make them (cannons from the Victorian era exist), but because due to how magic works, bullets are simply not as useful as enchanted arrows or spears — the amount of enchantment you can put on an object is directly related to its size and weight, and weaponry enchantment is nigh-required to break through defensive enchantment, so bullets, despite being fast, are too light to cause damage against foes.

* "How beautiful are the feet" was originally composed as an aria da capo for soprano, with "Their sound is gone out into all lands" set as the B section. For the 1742 Dublin premiere, this number was replaced with one for two altos and chorus using a somewhat different text (the chorus coming in on "Break forth into joy"). "Their sound is gone out" was then recomposed for the 1743 Covent Garden performance as an arioso for tenor. Handel later wrote an all-new choral setting of "Their sound is gone out," and reinstated the first part of the original soprano aria "How beautiful are the feet."

* How David Beats Goliath about this trope and its subversions. It talks mainly about a girls' basketball team reaching the National Junior Basketball Championships due solely to the full-court press (Instead of the 'normal' method of immediately retreating to guard your own basket when the other team has possession, the full-court press is aggressively defending against the other team in their own court.) The main reason that the full-court press worked is that it wears down both teams' stamina much faster — and the girls' team had worked almost solely on building stamina. The girls' team rode roughshod over other teams with taller girls and better shooting technique due to the fact that the other team couldn't get shots off due to having the ball stolen when they weren't expecting it, or losing

possession for not bringing the ball back into play or in the other team's court fast enough. In some cases, they had 25-0 leads over other teams. The girls were then castigated by the other teams for playing 'unfairly' and not letting the teams 'develop basketball skills' — to the degree that fights nearly broke out. The team then lost its final game by caving to pressure and playing the 'proper' way after the referee (supplied by the opposing team) called excessive amounts of fouls. The general moral of the story is that when David plays by Goliath's rules, David usually gets crushed. However, by changing his tactics, David can become the favorite over Goliath. However, Goliath will respond in kind by using social pressure to force David to fight by Goliath's rules.

* However, as the game progresses this trope is averted. Plasma weapons become

more available as does their ammunition. If the PC acquires A3-21's Plasma Rifle this weapon is easily a match for the damage and effectiveness of any conventional firearm. Also if expansion packs come into play the Metal Blaster Laser Rifle is a match for the most powerful shotguns. The alien Destabilizer, MPLX Novasurge Plasma Pistol, Microwave Emitter, and Tri-Beam Laser Rifle are also very powerful energy weapons. Ultimately though, the best "energy weapon" is probably the Gauss Rifle, which as the name indicates, is actually a kinetic weapon that fires 2mm slugs with electromagnetism.

Crocodile is one of the few individuals that Luffy calls by name who he despise and still holds a grudge against. When fighting Arlong, he also called him by his name without ever given him a nickname. He also calls all three of the admirals by their official nicknames, despite only really 'liking' Aokiji.

* However, if the three players went in with scores of 1200, 800, and 400, it would not matter what places they finished as the points differential between them was too high to change the standings. Basically the Crag in this scenario only decided whether the 1st place finisher would finish with a perfect score or not.
* However, if you decide to unleash your Djinn to use their special powers (something that might come in handy), you might as well summon with them to do some damage and raise your elemental powers, and allow them to reset themselves on their own, rather than waste turns manually setting the Djinn.

* However, if you keep playing that Force and level up their high level area magic, you can easily clear an entire room in seconds without suffering a single attack, while a Hunter or Ranger would be swamped by the sheer number of foes. Even better, a Force with high level Jellen and Deband can raise their defense so high and the reduce enemies' attack so low that even a Force, weak armor and all, is in no real danger.
* However, Illsaide shows some attraction towards Duzzel in his Ishtar form for a little while. Even going as far as kissing Duzzel.
* However, in 2020, both Kershaw and the Dodgers defied their postseason reputation. As for Kershaw, he threw 8 innings of shutout ball in his only appearance against the Brewers in the wild-card round, with the Dodgers advancing. In the Division Series against the Padres, he only threw once, giving up 3 runs in 6 innings but still getting the win. Next was the NLCS against the Braves, who shelled him for 4 runs in 5 innings in his only start in that series; fortunately for him, the Dodgers made it to the World Series against the Rays. Kershaw proceeded to have two solid outings, getting the win in both and posting a 2.31 ERA for the Series, which the Dodgers won to end a 32-year championship drought.
* However, in 5th edition it's possible for certain paladins to fall into this trope. Paladins that swear the Oath of Vengeance set aside all their personal moral objections and will stop at nothing to achieve their objective. There's no soul-destroying act too terrible for them to take if it serves the greater good. The flip side of this is, after they're finished, they have to make up for any wrongs they've caused or allowed to happen, either through prayer, paying compensation, or some other form of penance.
* However, in a battle between a sage and a physical unit..... Except in the 4th game where offensive magical units have generally mediocre magic defense but can use extremely powerful magic or have skills making their power ridiculously high when activated (Tiltyu's wrath ability can double her 40ish power, and her daughter can double 50ish power on characters with a maximum of 30 resistance).

* However, in one episode when housing a famous criminal, Barney decides to put the one bullet in his gun for safety. Later, the criminal steals the gun and holds up Barney, Opie, and Aunt Bee while attempting a getaway, only to be interrupted by Andy. Not knowing that Barney disobeyed him, Andy is tickled at being threatened with an "empty" gun and dares the criminal to shoot him over Barney's objections. The criminal recklessly pulls his trigger at the ceiling without a shot...five times. After taking the gun away and locking the criminal up, Andy jokes about it some more and fires at the ceiling a sixth time to show how "empty" the gun is...only for Barney's one bullet to go off. Unlike most instances of this trope, Andy promptly realizes how dangerous the incident really was, and is so shaken he faints.

* However, ISS's predecessor Skylab did feature a shower. It consisted of tube-shaped container where water sprayed from the top and was pulled towards the bottom for collection by exhaust fans. Showers were strictly limited due to limited storage and processing capacity.
* However, it also conveys a sense of family — only Team Gibbs gets Gibbs-slapped. When Ziva is assigned to Team Gibbs in "Silver War", she says, "I know, when we get out there you start kicking my butt." Gibbs replies, "I don't kick butts." She looks at him in confusion — in response, he dope-slaps her, and she beams, knowing that he's essentially saying, "Welcome to the family."
* However, it also predicted that the Hub Network would still be around during all that time. While a logical assumption, the channel ended up being dissolved and retooled into Discovery Family in 2014.

* However it is a bit different from the usual trope. In most cases it's expected that the character involved would be far more effective or powerful by "grabbing the gun" and it's only a moral code holding them back. In this case, Gongenzaka uses the Superheavy Samurai Archetype to truly embody the Steadfast Dueling spirit. The archetype often requires the user to have no Spell Cards in their graveyard in order to activate their effects. Action Cards are Spell Cards. Thus in his usage of an Action Card to save Yuya he can also be seen as performing a

* However, it is implied that Cacofonix isn't that bad at playing his lyre. It is the singing voice, that is the problem. And even so, two characters in two relatively early stories enjoy even that. Justforkix in "Asterix and the Normans" tells him to go to Lutetia (Paris), where he could become a success, and Pepe in "Asterix in Spain" likes his singing as well, because it reminds him of his home in Spain (and especially of the goats)!
* However, it is inverted by Leesil. He is a half-elf, and has a human father and a elvish mother.
* However, it is later inverted because the Tok'ra say that some Goa'uld have joined them over time (and vice versa in at least one case). They also use sarcophagi as technology, which over time makes their users more and more malicious.
* However, it is later revealed to be a lie, as Eugene only used this claim as a cover story to make himself seem important so stronger people with more practical skills for surviving the end of civilization would be willing to protect him.
* However it is only important to humans, as other factions don't require the Astronomicon for FTL travel, utilizing other methods, or particularly care about Terra and its supposed holiness.
* However, it is revealed in Act Two that he has been watching over The Baker under the guise of The Mysterious Man.
* However it is subverted; they really are terrorists (who plan to blow up the entire city), their claims are just to encourage the anarchy, and their liberation amounts to letting mob rule take over, as long as it doesn't interfere with them and their plans.
* However, it is used for humorous purposes as well. After a bad fight, Thomas is left shirtless and strolls into the bedroom to find one. Harry notes that Murphy watches him and after being caught, she simply shrugs and says it's a nice view. Cue Thomas from the other room, "I heard that."
* However it may have been presented elsewhere, the "Pokérap" introducing various Pokémon was soon removed from the Finnish showing of whatever Pokémon anime series apparently for being too much like this, i.e. a commercial being presented as if it were part of the content.
* however, it means he no longer needs a flame source to use his powers.

* However, it was in Japan that the show was particularly panned, as the long-running dub of the original American series was replaced with a local dub that did little to translate the series' Western roots to Japanese audiences.
* However it was more likely a fluke that the symbol looks like a combination of those, even though it is "sort of" a letter in the canon, as it did only "become" a letter in a much later episode where we find out the Ancients DID apply sounds to Stargate symbols anyway.
* However, Ivy isn't very old, she's female, and her angst isn't so much with her parents as with the leader of the vampires, who's more like an uncle. But there sure is a lot of angst.
* However, Jake Peralta and Gina Linetti are actually this. They grew up together and he got her hired at the Nine-Nine. She even refers to Jake's grandmother as "Nana".
* However, Jenny, while at first a much different person, slowly starts to become more and more like Claudia. She ditches fancy dresses and starts dressing more businesslike and starts developing feelings for Nick, just like Claudia. In the episode where Jenny decides to leave for good, she finds a picture that Nick has always kept in his pocket and doesn't recognize posing for it. She realizes that Nick was telling the truth about the altered timeline.

* However, Marinette unwittingly puts this to the test the following day when, after tripping over into Adrien's arms, she impulsively says, "I think I might be falling for you." It leaves Adrien as flustered as Marinette usually is around him. After Marinette gets over her own embarrassment about it, she tries a couple more lines out on him the next day to enjoy his reaction, subsequently deciding to stop doing it out of guilt. But that night when she and Chat Noir are on patrol, he tells her about a girl in his class who's started using cheesy pick-up lines on him out of the blue (presenting himself as "a prime example of total composure"), leading her to figure that Chat
* However, military ordnance is designed to be very difficult to set off, except as intended; unless the weapon is armed, generally it will only explode if triggered by another explosive, such as a bomb. Compounds like TNT and C-4 are almost impossible to detonate without a proper trigger— even if tossed in a fire they'll simply burn without going off.
* However, Missandei later seems to be shaping up to be this for Daenerys — Daario even says Dany trusts no one more than she trusts Missandei.

In this case the nausea and disorientation requires a bit of willpower (though not exactly to
* However, other Pyros cannot be set on fire. They take that same (large) amount

of direct damage from the flames (subject to the flamer's wonky hit detection), they just don't catch and burn.
* However, other types of gendering in clothing do not happen. If you put a dress on a male character it doesn't turn into a suit, and the formal suits don't have skirts on female characters. Some of the cultures do have distinctly gendered standards of dress, but most do not. There are also skirts available on all armor types, and most cloth sets also have trousers as an option. Cosmetic jewelry is also retained on male characters, although they have less jewelry by default. Fans, flowers, and other "girly" accessories with gameplay purposes are also not changed for male characters, nor are ultra-masculine ones changed for female characters (except for being scaled down to fit their models).
* However, outside of piloting the same Gundam set, they had slightly different inclinations.
* However, over the course of the film, Godzilla actually proves to be a more heroic champion of nature than his original incarnation, only attacking humans after they deliberately antagonize him, and even then he only retaliates against the military.
* However, part of his character development is the realization that not everything can be solved by money and manipulation.
* However perhaps the supreme masters of this trope in the setting are the Marines of the Salamanders legion, almost their entire ranged weapons arsenal is made up of flame throwers and meltaguns, even their tanks.

As of 2019, China has the second-largest road and rail network in the world; in terms of expressway length and electrification, it is second to none. This is all the more impressive when considering that it did not have any expressways until 1988, and that it was operating steam locomotives for regular passenger service as late as 2005.

* However, see under the California heading - a lot of the interiors and some exteriors are filmed in California.
* However, several strips give an excellent illustration of alignments coming into conflict: The Lawful Good Celia, Chaotic Good Haley, and Chaotic Evil Belkar encounter a couple of Lawful Evil Hobgoblins. Belkar stabs the Hobgoblin because he just likes killing. Celia is horrified at his random unlawful murder, but Haley justifies it by saying that as they are fighting a war against evil, the unjust killing was, if not necessary, then at least acceptable. However, then they come into contact with a friendly gnome merchant, who Belkar then also stabs. Haley is horrified, but Belkar points out that the gnome's cart and donkey are of great use to the group, and likely to benefit the resistance more than his hobgoblin slaying. Celia then starts commenting on how similar the situation is, and sarcastically suggests that Haley should paint the corpse to look like a Hobgoblin so that Haley can more easily rationalize this second unlawful killing.

* However, Shawn is genuinely kind and caring and the one he has any vitriol with is Detective Lassiter who is more insufferable than Shawn. Shawn's childish nature is more due to his own issues with his father, Henry, who is a
* However, she does have a spine, even though it takes some time to dig it out. The episode "Harlequinade" demonstrated that when angry enough, she's perfectly willing to blow the Joker away (with a machine gun!) with barely a second thought. Probably the only scene in the entire series where the two showed genuine mutual respect and affection, as fits to their twisted minds.
* However, she does it only as a fan of Varric, who is also a professional writer, who uses his friends as thinly veiled "inspirations" all the time.
* However, she does show quite a cunning side to her personality when motivated, such as getting the family out of debt in "Tina-Rannosaurus Wrecks" by recording the insurance scammer's confession, expertly plays Louise in "Ambergris", hatches a successful plan to catch the mole in "Tina Tailor Soldier Spy" and in general shows quite a lot of insight into people's personalities.
* However she is finding it hard to hold true to that philosophy as she is falling in love with Clarke, telling Clarke she didn't let her die with everyone else for this reason.
* However, Sheldon puts down Raj's girlfriend Emily, an M.D., because she's a dermatologist.
* However, she's still worried that her sort-of-boyfriend Andy will see how much she enjoys watching a gay male love scene being filmed and think badly of her.
* HOWEVER, Shinji overheard their conversation and thought something had happened between them. He became distressed and spent several days on the verge of a break-

* However, slavery wasn't completely glossed over in Colonization. While slaves are not used as a trade good, they are present as actual colonists - they are as productive as regular colonists at producing raw resources, but almost useless for manufactured goods. Indentured servants, essentially people who have sold themselves into slavery for a certain time until paid off by their labour, fall between slaves and free colonists in productivity. So while the slave trade itself is not depicted (and would be difficult to include sensibly since Africa is not present at all), slavery as a source of cheap labour for the fields is.

After, it's shown that the prisoners have lost their fear of him.
* However, Stalin kept a firm grip on power and the Red Army managed to soak up the damage as it stalled for time, drawing on the large reservist population to replace the loss of numerous divisions. The Germans inspired fierce resistance everywhere through their barbaric conduct: the war of annihilation the Germans had intended backfired on them by motivating the Soviet people to fight to the death, since they wouldn’t be any better off if they surrendered. Despite seemingly low German losses overall, they were taking heavy casualties among the panzer troops who made up the spearhead, blunting their offensive momentum. Not to mention, they were facing outrageous mechanical attrition among the tanks and trucks, which was exacerbated by the lack of spare parts. The railways weren't working out either, as the Soviets were very efficient at destroying their rail systems as they retreated, and the Germans couldn't rebuild them fast enough. Because of this the infantry had to keep marching non-stop for hundreds of kilometers, leading to some men collapsing or even dying from exhaustion! The inability of the infantry to keep up with the Panzers also led to holes forming in the German encirclements around the Soviets, allowing groups of them to slip through and threaten the Germans' rear echelons.

* However, the college football rivalry (and to a lesser extent, the rivalry in other sports) between Army and Navy has to be the best example of this. Although the two teams are fierce rivals on the field, and cries of "Beat Army!" and "Beat Navy!" are heard year-round, they have high respect for each other, knowing that in a few years, they could be fighting alongside each other on a real battlefield. At the end of each game, the winning team joins the student body of the losing team in singing that school's alma mater, and then the losers join in with the winners to sing theirs.

* However, the developers seem to have forgotten this piece of background, as no system in the EVE cluster actually has more than one star (perhaps the other stars are all brown dwarfs and/or orbit very far from the other star?). However, in wormhole space, binary systems are common (although the second star exists only as a background texture rather than an object you can warp to).
* However, the directors have acknowledged his popularity, and have gone on record saying that if a sequel is made, he will have a bigger role.
* However, the disaster could have had far more serious consequences. Windscale was air-cooled. Core temperature was kept under control with a series of fans, and the waste heat was exhausted into the air. On the suggestion of Nobel prize-winning nuclear pioneer Sir John Cockcroft the cooling towers were fitted with expensive, complex air filters, which were originally pooh-poohed on account of the work involved - the towers had already been constructed by the time Cockroft found out

about them, and the filters were large, heavy structures that had to be built on top of the towers. As it turned out, the filters prevented the direct release of red-hot nuclear particulates into the environment, although the release of radiation was nonetheless substantial.

* However, the human part might not be entirely due to Celestial intervention, with it being plainly stated that the inhabitants of every world that was incorporated into Yggdrasil were altered somehow: the Aesir and Vanir became gods with lifespans that averaged five thousand years, the Alfar and Svartalfar (elves) became immortal unless thye were killed and physically enhanced to a lesser degree, while the Frost Giants and Dwarves became elemental beings with similar lifespans to Asgardians. In humans, no one's entirely sure what it changed, but the going theory is that it enhanced their ability to incorporate outside DNA — among other things, meaning that they can breed outside their species... which might relate to the X-Gene.

* However, the primary purpose of certified super teams is actually disaster relief. A good amount of space is spent describing the legal processes which allow heroes to cross state borders (and even national borders in the really big emergencies) to get to disaster zones as fast as possible and hold things together until the slower but more numerous mundane crisis aid arrives. Because of this, superheroes have military ranks (albeit as civilian militia) to help smooth out some of the problems that would otherwise arise.

* However, there's some caveats: while they are capable of soloing things other jobs can't, they cannot survive nearly as well as Paladins and Ninjas from most "Incredibly Tough" enemies. Red Mages make much better main healers in an EXP party than White Mages, but they cannot main heal nearly as well in end-game fights. They also cannot do nearly as much damage as Black Mages.
* However, there was at least one early story where Dr. Pym increased his size beyond a certain limit and collapsed, unable to move and needed The Wasp's help to shrink him back down to a reasonable size again.
* However there was at one point a trademark on the sound of a Harley-Davidson engine. The application was not based on the design of the motorcycle engine, but the noise as stock sound effect. The holder of the trademark asks for very little in royalties compared to most trademark holders and it seems to only apply in Australia and New Zealand territories.
* However, the Rogue class is a much better boss killer and tanker. While they don't have area-based damage, they have higher single-target sustained damage. Combined this with their insanely high evasion and the ability to manually evade via movement and bosses become absolute joke. This made warriors completely useless until the introduction of the incredibly powerful Spirit Warrior specialization in the Expansion.

* However, the series plays this trope dead straight with the dragons, which can grow to enormous sizes and are still able to fly perfectly well. However, there has been shown to be some connection between live dragons and the magical powers in the world, so it's possible the dragons get some magic-fueled exemption from this law.
* However, these versions don't last long on the site since this isn't official Wikipedia policy but inserted by contributors trying to intentionally use this trope.
* However, the show implies rather strongly that Zako Red is simply a drone operated by Sazabi to allow him to carry out his plans without revealing himself.
* However, the show isn't always consistent with this. For instance, in "Escape from the Pie Folk", a character in Mewni dates a check with "July 30th".
* However, the smaller pickup began to make a comeback at the end of the 2010s. The Chevrolet Colorado and GMC Canyon, the replacements for the S-10 and GMC S-15/Sonoma, were dropped in 2012, but returned in 2014 as completely redesigned midsize pickups. Ford, which had dropped the Ranger in North America in 2011 but continued to sell the model elsewhere, brought the model back to North America in 2019, also as a midsize pickup. Honda and Toyota also never left the midsize market, respectively with the Ridgeline and Tacoma. The Jeep Gladiator entered the midsize fray in 2020. Early in the 2020s, the "compact" pickup made a comeback (though in a size closer to that of pre-1990s "midsizes"). The 2022 model year saw Ford resurrect the Maverick nameplate, previously used for a 1970s-vintage compact car, for a new compact pickup, and Hyundai introduce the Santa Cruz.

* However, the super energy source is only present because Earth was one of many planets the Decepticon Shockwave seeded a few thousand years ago. Earth wasn't supposed to be unique in having this energy source, it's just that Shockwave only got to make his follow-up trip to stabilize it to Earth before getting rudely interrupted by the Dynobots.
* However the three main characters, and could only be stopped by Xavier's psychic abilities once his helmet was yanked off.
* However, the toxins from poison dart frogs are far from perfect—they work by paralysing muscles, including those used for breathing. While this means they are quickly fatal if untreated, a victim can be kept alive by artificial or mouth-to-mouth respiration and will recover entirely in a few hours as the poison wears off. The same also applies to blue-ringed octopuses, but the main difficulty with them is that they're so small and don't have an immediately painful bite, so it's hard to tell someone has even been envenomated before it's too late to keep them alive.
* However, the Transformation version was subverted at least once when
* However, the trope is played straight for the villain teams, when the series does have teams big enough to even have two women:
* However, the trope is played straight with the Peacemaker revolver, which has one of the highest DPS in the game. However, it is only available in the Desert mode/Potato mode, and is restricted to the rare .45 ammunition, which it burns through all-too-quickly. Thus, a Model 84 rifle can often be a safer bet as far as .45 weapons go, simply because of its range and more consistent damage.

* However, the World Government is, in many senses, more similar to the real-life United Nations than to a single state. It is repeatedly shown that the leaders of countries that are part of the World Government still hold considerable power, and Vivi has numerous flashbacks that show the kings and leaders engaged in debates and politics similar in style to, say, the UN Security Council. The core differences are that the World Government a) seems much more united in its efforts than the often divided and bickering UN and b) has vastly more resources at its direct disposal.
* However, they break up quickly. When Marinette learns this, she initially tries to get them back together. But it fails, and Kagami points that Marinette is a better match for Adrien than her.

* However they then created their largest Battlesuit yet, the XV104 Riptide. In order to power it, it uses an ultra-compact dark-matter fueled Nova Reactor. While it's under normal use, the suit works just fine with no issues. However, if the pilot attempts to push the mech beyond its normal limits, such as to shoot its weapons more often than normal, or overcharge it's main armament, divert all power to its force shield, or turn up its jet-pack thrusters to maximum, there's a risk of power overload, and injuring the pilot.
* However they then reveal that the only reason they intervened was so that they could kill the Sandins themselves as their own Purge targets.
* However, they were barely a foot from the surface, which makes their secondary objective of remaining undetected (it was a Ninja episode) pretty difficult in a perfectly still pond.
* However, things are a bit different when air units are involved, Orcs and Undeads being basically swapped: Undeads are air Powerhouse with frost wyrms being a huge, costly and powerful late game unit, Orcs are air Subversive with wyverns being a cheaper middle game unit that you want to mass and use for hit-and-run tactics, and bat riders being a subversive unit. Humans are still Balanced (Griffins are a powerhouse-like unit, flying machines and dragonhawks riders are subversive-like units), Night elves are still the Cannons (chimeras are very powerful and destructive, but can't attack air units and are easy to kill relative to their cost, and hippogryphs are extremely powerful air superiority units, but cannot attack ground units unless you mount an archer on them, leaving them helpless against ground units who can attack air units).
* However, things got a bit more interesting with the two. Continuing to dance around one another constantly to the point of a nearly functional relationship, then to a distant one due to fear of repercussions from their knowledge of one another's identity, the couple have certainly reheated things a bit since Bruce's return to the present... long story. Regardless, she has even accompanied him on his international travels to establish Batman Inc. But all that

The cloaking effects are temporarily disrupted when it comes into contact with water, and is basically useless under constant exposure from sources like rain or fire sprinklers. Though this is portrayed more that the cloak can't keep up with the constantly shifting patterns of water and becoming overloaded trying to mirror it instead of just shorting out and shocking the hell out of the wearer.
* However, this is still in effect in events such as evictions in Wormhole space, when a destroyed starbase drops more ships than can feasibly be extracted from the system (or drops capital ships which can't fit through the wormholes).
* However, this is zigzagged in the sense that it fluctuates between a mutual "brother-and-sister-in-arms" relationship and a one-sided attraction on Cortana's part; due to Chief having had his sex drive "deprogrammed" as a teen, he doesn't feel "love" in the way most people would know of it, and likely has no idea what to make of his own feelings.
* However, this may be due to idiomatic translation. None of the main characters are cowboys in the Western sense. In fact, the DVD extras clarify that "cowboy" in Japanese may be more like "bounty hunter" in English. Which makes sense as ALL of the protagonists are bounty hunters (or want to be). But the Old West themes are still laid on pretty thick.
* However, this only applies to cutscenes, where he's also inexplicably immune to anything and everything that his enemies can throw at him unless the plot demands that he is not; in actual gameplay he is harmed by every attack his enemies make, bladed or not.
* However, this only works if both characters fall at the same time. If one person falls off the edge just a few seconds after the first (with rather hilarious animations for the event), then the second person to fall is declared the winner.
* However, this pecking order doesn't even end at the super-eternal tier; there's three more categories above it, each of which counts as a tier of its own, namely
* However, this power is only given to him because he is within a A.I programmed world of which he has limited, but powerful enough, mental control of.
* However, this power only works without drawbacks on individuals who are willing. Her pairing of Märchen and Hiddenite resulted in deep cuts down her hand and arm which would have eventually killed her.
* However, this room ended up conflicting with the show's portrayal of the actual "Incident". In the game, the room contains a large, busted generator with electricity flowing through it, implying the "Incident" was some sort of electromagnetic generator failure. However, the show's portrayal of the "Incident" was much different: it occurred while
* However this ties into the theme that there is more to Stannis then first meets the eye. He smiles and laughs a few times, usually when his most trusted man Davos Seaworth is around.
* However, this trope is also inverted for the same characters in a season two episode, in which Kurt and his dad are seen sharing one of Kurt's favorite pastimes - cooking - as a bonding activity instead of the previously seen attempts at sports and working on cars. It doesn't work, but that's not because of the choice of activity.
* However, this trope is normally inverted, having Mandy talking before the title card.
* However, this trope is played straight for alternate dimensions, mostly because their names are descriptive. Voidwalkers come from the Void, while the helarjar come from Helheim.
* However, this trope is still in effect with Kerrigan, as cutscenes show her flying and one-shot-killing marauders. Towards the end of

* However Tywin doing what is best for his House is debatable, considering it becomes clearer throughout the books he was a horribly abusive parent who has left all of his children damaged, and that his capacity for violent overreactions carries through to his children and has turned many people against the Lannisters.
* However, unlike the other two, the civilian population of the Robotech Masters' city ships have no real justification for this.
* However, until the founding of the Interstellar Alliance, technology was a limiting factor as humans could only simulate gravity with rotation.
* However, urban combat turns your nice, neat formations into a chaotic mess, especially if you're ordering more than one unit down a street at the same time. In that case, your soldiers turn into a tightly-packed mass of swords, spears, and other pointy and/or bladey instruments of death. This can be both good and bad; bad because your troops are mixed and you've got archers with daggers fighting alongside heavily-armored knights, and good because you can pack more pointy and bladey into an area and meatgrind enemy troops under a morass of troops. Just hope the enemy doesn't have catapults or cannons.

* However what he doesn't know is that two agents were already at the cashier counter, knowing his intentions. When confronted, not only could he not come up with any good excuses, he also tries to pick a fight with them saying "People give receipts every day," claiming that it's his receipt. Fortunately, the agents manage to kick him out of the shop before things get ugly. If this wasn't a reenactment show, he might get arrested for his violent outburst.
* however what the armies of Azeroth plan to do, and it happens to the de facto leader, Kil'jaeden. The following patch even hints the Burning Legion's method of regenerating in the Twisting Nether is about to be discovered and done away with, meaning the Burning Legion across all dimensions would lose their ability to come

back. Ultimately, Sargeras himself is sealed away, causing the army to fall apart.
* However, when Alyson got pregnant again in season seven, her character was already pregnant, so there was no need to hide it. Lily actually gave birth in the second-to-last episode of the season, while Alyson still hadn't. In the season finale, she went back to carrying a (rather large) diaper bag in front of her. It could be explained in-show as post-baby weight.
* However, when Cactoblastis was introduced to South Africa to control a similar prickly pear infestation, it started to consume a spineless species of cactus that was commonly used as livestock feed too. Then it somehow spread to the Caribbean and United States, where it's now endangering native cactus species too.

* How I Became Yours, Fire Lord Zuko is called before the Fire Nation Senate to discuss his marriage with Katara, the "Princess" of the Water Tribe. His response is to essentially remind them that he established the senate, and then dismiss the meeting.
* How I Became Yours not only has scenes that don't happen on the cover, but it also has several fabricated positive reviews.
* How I Became Yours of all people, after it is offhandedly mentioned that he broke up with Suki. Subverted with Zuko and Katara; Zuko tells Mai that he never loved her after finding out that she kept Katara's letters hidden from him.
* How I Became Yours, Sokka's "sword fight" with Sho involves several panels of the two in an "en garde" stance with each other, and Sho once doing a flip. Then again, this is in large part due to the frequent copying of panels in the comic, to the point where a character will have the same expression for several panels in a row in a dialogue scene.
* How I Became Yours than the author intended her to be, which is surprising considering how much the author tried to derail and demonize her.
* How I Became Yours that she did so in order to prevent an international incident.
* How I Became Yours, they yell each other's names as they run into each other's arms in the middle of the ballroom.
* How I Became Yours, this is a recurring problem due to how much copying and pasting there is; a character might be speaking normally in one panel, and then shouting or breaking into tears in the next with the same expression.
* How I Became Yours undergoes a mystic transformation similar to that of Princess Yue in the series' canon, and is endued with white hair as part of her supernatural connection to the powers of winter and the moon.

* How I Live Now a nuclear weapon explodes in London killing tens if not hundreds of thousands. However for the kids it's an opportunity to explore some first-cousin sex, play outside a lot, and have sleepovers in the barn. Even the kids were hit by fallout material from the blast, no one is made ill by it. Additionally, it appears that the nuclear attack may have been limited only to England or even just London, with the rest of the world unaffected. However the situation becomes a lot less comfortable once martial law has been instituted, and it's revealed that the terrorists have contaminated the water supply and control parts of England (they are powerful enough to successfully fight an off-guard UK military for now at least).
* How I Live Now by Meg Rosoff, teenage cousins Daisy and Edmond fall passionately in love. Daisy wonders uneasily for a while "if that's the feeling your supposed to have when your cousin touches a perfectly innocent part of your anatomy that's even fully clothed". By the middle of the book, she doesn't care. The book treats their romance sympathetically.
* How I Live Now, protagonist Daisy quickly falls in love with her cousin Edmond (they're first cousins, her dad is the brother of Edmond's mother) and the feeling is mutual... so much so that they eventually move beyond the kissing stage.
* How I Met Your Mother: According to Barney, this is the reason why he and his brother are so horny.
* How I Met Your Mother, a depressed Barney finds a stray dog to fill the gap left from his failed engagement. When he gets a phone call from the real owner asking for his return, he cheerfully says he will, hangs up, folds up his napkin, walks outside, and starts to climb over the edge of the patio. His casual calmness leading up to it is what's played for laughs.

* How I Met Your Mother. After the show ended, both Thomas and Bays haven't been doing much asides from having a bunch of forgotten TV movies in their filmographies.
* How I Met Your Mother: After years of searching, Ted found the "Slutty Pumpkin," a girl he fell in love with at a party but he never saw again. Both Ted and the girl found the relationship awkward, but neither wanted to break it off because they thought the other person was into the relationship.
* How I Met Your Mother, all the men in the room wince and cross their legs.
* How I Met Your Mother All this after it was thoroughly established that the two did not belong together. Needless to say, a lot of people were unhappy.
* How I Met Your Mother a mall. The idea is lent credence by realizing Robin constantly talked about a friend of hers who got married way too young, believing it to be this trope. When Ted confronted her about it she even "admitted" it was true and she was married before. The reality is that she lied about that because she was embarrassed over the real reason she doesn't go to malls, she was a Canadian pop star with one hit "Let's Go To The Mall" and had to sing it in dozens of malls across Canada. It turns out that it was her former best friend and singing partner who got married young which caused them to grow apart and ended their partnership and friendship.
* How I Met Your Mother. A math professor, a tax assessor, a weight guesser..."
* How I Met Your Mother, a montage of how Ted is like a dad starts with the ending to a lame joke ("Shredded tweet") and ends with the set-up ("What do you get when a bird meets a lawnmower?").

* How I Met Your Mother and wants nothing to do with Barney from that moment on.
* How I Met Your Mother, and when Ted figured this out (due to Barney's not-so-subtle attempts to stop them from fighting and therefore having sex) he immediately called off his arrangement with Robin and allowed her to believe it was because he

was afraid he'd redevelop feelings for her.
* How I Met Your Mother, and will use elaborate schemes to get to that point. It helps that most of these women are gullible. Then there's also his long-term plan, involving hypnotizing Marshall and learning Teppanyaki in order to touch Lily's breast (who was pregnant at the time). And while he won't admit it, Ted will often go along with Barney's schemes or follow him to the strip club.
* How I Met Your Mother-and-with-bigger-boobs. In the fantasy, even the ex's current boyfriend tries to hit on her French version in front of her.
* How I Met Your Mother, an egregious (not to mention felonious) violation of privacy.
* How I Met Your Mother) are the only mainstream actors in the main cast back then. In fact, the actress who played the Mother is unknown.
* How I Met Your Mother a roadie who partied hard back in the day. He just decided to settle down at some point and become a regular suburban dad when he had his second son. This only makes it worse in Barney's eyes:
* How I Met Your Mother ("Arrivederci, Fiero"), which is how most younger fans discovered it.
* How I Met Your Mother, as does Marshall melodramatically screaming "NOT LIKE THIS" every time.
* How I Met Your Mother: A series of flashbacks reveal that the gang once decided to test this by dropping a banana peel on the floor of MacClaren's and having Barney step on it. Barney insists it won't work but ends up slipping. This turns out to be a good thing, as he falls he bumps into a woman who was about to choke and the jolt clears her throat.
* How I Met Your Mother as fake paramedics who take part in Barney's "greatest pickup line of all time."
* How I Met Your Mother asking questions about situations or conversations that relied on backstory from Ted, Marshall, and Lily's long, closely-shared history together so that the characters (or Future Ted) had an excuse to explain it to the viewer. It's implied Barney has had most of these things explained to him before 2005. By season 3-4, Robin (and the audience) had already gotten a huge amount of pre-series backstory and isn't much of a Watson anymore, and so the writers started to rely more on in-show established continuity to form the basis of these kinds of stories, usually heralded by Future Ted remarking "Kids, remember how I told you about that time..."
* How I Met Your Mother. As of Season 6, he has over 230 conquests and counting.
* How I Met Your Mother as, presumably, an older Ted) telling the long and convoluted story to his kids on... how he met their mother. Therefore, sometime during the series, Ted will, presumably, meet the kids' mother. Over the course of the series, a few other rigidly defined rules get put in to place by Future Ted: for instance, Robin is definitely not the mother, as he refers to her as "Aunt Robin", and it's a common way of providing a plot twist when Future Ted refers to individuals in the contemporary story in the present tense.
* How I Met Your Mother as their relationship goes on, with Barney getting fat and Robin getting strained to the point where she gets annoyed when he speaks. When the rest of the gang ask how they are, Robin tried to answer first, but Barney butted in, leading to her repeatedly muttering for him to shut up.
* How I Met Your Mother, as the title suggests, is the story of how Ted meets the eponymous mother... only it's been eight seasons and he's still building up to the point where he meets her.
* How I Met Your Mother, as well as occasional hints to the identity of the future mother. Watching it in close succession will help you catch a lot more of the jokes.
* How I Met Your Mother - Averted in the fifth episode of the first season. The gang goes out to a nightclub, and while on the dance floor no one can hear each other, except when there're momentary lulls in the music.
* How I Met Your Mother, Barney and Marshall prank Ted by switching a girl’s phone number on his phone with Marshall’s and texting with him pretending to be her. During the conversation Marshall tries to text Lily but accidentally texts

Ted instead, making Ted think the girl has a secret boyfriend. Barney covers by sending a text from the girl claiming that her dumb friend “Marsha” accidentally used her phone to text her husband “Billy”. Lampshaded when Robin, who knows what’s happening, hears about this and says “Marsha and Billy? Nobody strained any muscles on that one.”
* How I Met Your Mother: Barney and Robin's slow-building romantic relationship starts as this during season 3.
* How I Met Your Mother Barney and Ted always wanted to start their own bar called Puzzles. On New Year's Eve 2011 they are outraged by the high cover charge at their usual bar and jokingly suggest that they should just start their own bar in Ted's apartment. The idea takes off and news of the bar goes viral. However, as more and more people show up, the party turns rowdy. As their costs due to damages and other expenses rise, they have to keep raising their prices until they are almost the same as the real bar and everyone leaves. Also they don't actually have a liquor license.
* How I Met Your Mother, Barney begs Ted to "date" a twenty-something college student for him, since he can't after getting engaged to Robin. Afterwards, Ted shows him a picture of the girl, starting from the feet and panning up. Barney is all excited until they get up to her face, and he realizes that it's his half-sister. He doesn't take it well.
* How I Met Your Mother. Barney comments on it, telling Ted he should have had sex with the hot student in the front row because he already had his pants off.
* How I Met Your Mother, Barney does this while visiting a prison inmate in a flashback.
* How I Met Your Mother, Barney has a form letter he leaves to girls who he sleeps with and then walks out on. At one point, he cannot remember the girls name and simply fills in "Resident".
* How I Met Your Mother, Barney invokes this several times during his various Bimbo Delivery Systems, two commercials and an autodialer.
* How I Met Your Mother Barney often gets really excited about some new thing, and will spend a lot of energy trying to get his friends to be just as psyched about it. This only works about half the time, though.
* How I Met Your Mother: Barney once tried to scam his way through a dating service with the alias "Jack Package". (It's pronounced pe-KAHJ)
* How I Met Your Mother: Barney proves to Robin that the United States is better than Canada by starting a "USA" chant in the bar. Robin tries to do it with Canada and gets blank stares.
* How I Met Your Mother, Barney puts on an intentionally awful one-man play to prove a point to Lily. It doesn't take long to whittle the audience down to just the main cast, and even they can barely resist the urge to walk out.
* How I Met Your Mother. Barney's backstory reveals that he became the womanizer he is today due to being rejected by one woman. Classic trope style, Barney shaves, aggressively pulls on his sleeves, then the camera pulls away to reveal his new, entirely black suit.
* How I Met Your Mother, Barney's list of the professions of the women he's slept with.
* How I Met Your Mother, Barney's mother had a health scare some years ago, and he hired an actress to play his wife. Unfortunately, his mom lived, so he had to keep up the charade every time he visited her for the holidays, even hiring a young actor to play his son too.
* How I Met Your Mother Barney spends a month perfecting an exploding meatball sandwich. It took so long because it had the nasty side effect of decapitating the test dummies.
* How I Met Your Mother: Barney Stinson makes a reference to this trope in an episode, when talking about Robin.
* How I Met Your Mother: Barney Stinson, whose constant self-aggrandizing wisecracking, over-the-top stunts (everything from magic tricks to kidnapping his friends), and ridiculous womanizing antics are a mask to hide how utterly insecure and self-loathing he is inside, and how desperately dependent on his friends he is,

by trying to make himself look like a loose cannon who is too awesome and confident to need anyone.
* How I Met Your Mother, Barney Stinson will tell a story allegedly to illustrate a point that ends up merely highlighting his sexual prowess.
* How I Met Your Mother: Barney Stinson works for the AltruCell Corporation, and later, Goliath National Bank. Throughout the series he makes references to the shady activities his employers are engaged in.
* How I Met Your Mother", Barney tells a bad joke and asks for a fistbump, but no one in the gang wants to. Through the rest of the episode, Barney refuses to lower his fist until he gets that bump. By the end of the episode after witnessing Robin quitting her job with another pun, Lily bumps him back, and Barney sighs with relief, but not before Barney makes another bad joke and asks for a high five, to which Lily refuses. Barney only lowers his hand when Robin announces that she's moving to Japan.
* How I Met Your Mother. Barney thinks the only reason sailors mistook manatees for beautiful women is because it had been so long since they'd last seen a woman, and they were desperate.
* How I Met Your Mother, Barney uses an exploding meatball sandwich as a means of getting back at Marshall. However, he spent months perfecting it since the early versions tended to blow the heads off the test dummies and Barney is not that evil.
* How I Met Your Mother, Barney writes a formula on a huge whiteboard when he tries to figure out how to make his friend/crush Robin sleep with him again. The formula includes the right amount of nostalgia and booze. The solution is to get her to Ted's wedding, Ted being her ex-boyfriend and great friend.
* How I Met Your Mother being hit on, and Ted and Marshall hate getting hit on by every guy in the place.
* How I Met Your Mother. Being on the list is an important plot element in Season 1's "Okay Awesome" episode. Robin is on the list to get into the club since she's already in when Ted and Barney arrive and her word is enough to get them in. However, she is not on the list for the VIP room and when she exits the club to sort out the situation, she's unable to re-enter, since her name has already been crossed off. That is, until Lily joins her and takes action.
* How I Met Your Mother. Both of them are in love with Robin though Barney doesn't start to have feelings for her long after Ted broke up with Robin. In the middle of season 3, Barney slept with Robin and when Ted found out about it, he was furious and refuses to accept Barney as a friend anymore though they make amends by the end of the season. By then, Barney genuinely begins to have feelings for Robin and in an episode in which Ted and Robin have sex whenever they are in an argument, Barney takes out his frustration by breaking broken TVs. By the end of season 4, Robin and Barney started dating without any problems from Ted. Fast forward to season 8, Ted becomes jealous that Robin had accepted Barney's proposal and tries to ruin their wedding planner. Though Lily talks him out of it, he again tries to confess his feelings for Robin by going to great lengths to find her missing locket and give it to her as a wedding gift. Ultimately, he decides to abandon the idea and let go of her feelings for Robin.
* How I Met Your Mother CD in the girlfriend's apartment so that Ted becomes disgusted with her, to dressing up in the girlfriend's Darth Vader costume, pretending to be her, and telling Ted they should see other people.
* How I Met Your Mother change that drastically, but from his perspective, they became totally different people. When Barney and Robin break up at the end of the episode, they instantly revert to their previous selves.
* How I Met Your Mother claims that his funeral is the only time he won't be wearing a suit because suits are happy garments...a suit is the sartorial equivalent of a baby's smile.
* How I Met Your Mother (Cobie Smulders) was born Robin Charles Scherbatsky Jr. because her father wanted a boy.
* How I Met Your Mother comes out and sadly tells him they were unable to save the patient — one of Barney's suits. The metaphor is extended by mentioning "his" buttons being donated to another suit, as a parody of organ donation.

* How I Met Your Mother, complete with long hair and a soul-patch. When he becomes the Barney we know from, presented as the 'evil' version, he shaves it off.
* How I Met Your Mother concert in Spain. When they meet again, Heather swears that she's having a change of heart but Ted doesn't believe it at first until at the end of the episode where he helps her settle down in the city.
* How I Met Your Mother continually spouts lines that are legen... wait for it, and I hope you're not lactose intolerant because the next part is DARY!
* How I Met Your Mother counts as one, despite only being a mother in flash-forwards. Throughout the series, she appears often, though her face is always hidden by her signature yellow umbrella until the Season 8 finale, where her face is finally shown and she speaks for the first time in the series.
* How I Met Your Mother deal and explain that he's the one who gave them the idea.
* How I Met Your Mother deal, but Lily won't let them. Although, as Ted points out, they had their Relationship Upgrade months ago (in the previous season finale). They just never defined it.
* How I Met Your Mother decides to all but waive the fines and any other consequences (from $25 million and jail time for the executives who knowingly polluted the lake down to a measly fine of $25 thousand) because the company is big and powerful and it was just some stupid lake. This causes Marshall to realize the judges are the ones with the power to enact real change and punishment and he decides to become one.
* How I Met Your Mother. Deconstructed, when we learn that a fair few of his issues stem from his crappy childhood, so this story, really, is about his tipping point.
* How I Met Your Mother did the rude variant when Robin found an engagement ring in her champagne and thought Ted was proposing to her. "No. No no no no no. Ted, you cannot do this to me. No! No no no!"
* How I Met Your Mother does this from time to time such as in Life Among the Gorillas where Marshall's coworkers repeatedly come up with bizarre celebrity comparisons (where the point seems to involve who you'd rather sleep with) while asking, "What do you do? Go!" Its reframed in the last moment of the episode when Robin calls Ted to invite him over and Narrator Ted asks, "What do you do? Go!"
* How I Met Your Mother doing the same and then finally Robin herself.
* How I Met Your Mother elements to show things Ted were describing in-universe as a lot more outlandish than they actually were. As the series goes on, the slapstick and silliness of the plots are ramped up while the narrator excuse is increasingly downplayed, making the wackiness seem more like an inherent part of the world.
* How I Met Your Mother ends when Ted realizing that he really did love Robin the whole time and goes to her apartment with the symbol of their love, the blue french horn.
* How I Met Your Mother ends with Lily clinging to the roof of a moving car while under the effects of a highly caffeinated energy drink.
* How I Met Your Mother episode, although we the viewers don't see the clip.
* How I Met Your Mother, Episode "First Time in New York". Ted and Robin. "Ted?" "Yes?" "...falafel."
* How I Met Your Mother episode "Not a Father's Day" (2008): "Lily, no part of Barney Stinson does anything less than 110%. If one of my little Michael Phelpses got loose, he's swimming for gold."
* How I Met Your Mother episode "Oh Honey", Ted's passing a bottle of ketchup to Zoey but drops it when their hands touch, due to his previously unknown love for her.
* How I Met Your Mother episode "Subway Wars" parodies this by having Robin mention seeing Maury Povich, only for him to appear as a background character in almost every other scene.
* How I Met Your Mother episode, Ted is going to break up for the second time with a girl he dated much earlier in life — the first time he broke up with her he accidentally did it on her birthday. When he realizes it's her birthday yet again and she starts to say how he's brought hope back into her life, he turns to the waiter and says "Oh so much more wine."
* How I Met Your Mother episode "The Rough Patch," when Barney and Robin realize

that they are not good as a couple, Robin says what really sucks is that they can't be friends anymore. Barney says to think of it not as a couple splitting up, but two friends who managed to find each other again.
* How I Met Your Mother episode where they all try to quit smoking, Lily's "smoker's voice" is dubbed over by Harvey Fierstein.
* How I Met Your Mother episode "World's Greatest Couple", where Brad freaks out Marshall at dinner by licking his napkin and wiping a smudge of food off his face.
* How I Met Your Mother. Especially for the viewer, who already knows where he'll find his true love. Robin herself points this out to Ted. He chased her when he knew she was the wrong woman for Ted (didn't want kids, apprehensive of marriage, etc) and continued to harbor feelings for her even after their amicable breakup. He pursued Stella who was still in love with the father of her child. He went after Zoey who was married at the time and actively trying to destroy his career. His poor judgment gets called on several times by other characters.
* How I Met Your Mother features a commentary with Jason Segel (who plays Marshall) watching a Marshall-centric episode while doing a joint commentary with the writer of the episode. Eventually it devolves into both of them disrobing to their underwear in what sounds like Gay Chicken. For the third season DVD, Segel apparently demanded to have the writer do another joint commentary, for an episode the writer didn't actually have any involvement in. Segel shows up drunk, with 12 condoms. 10 condoms are left by the episode's end.
* How I Met Your Mother, first to Ted and Marshall and twice to Robin… only the first two times, he covers awkwardly and is believed, and the third time, Robin is completely oblivious to the idea he could mean it like that. Robin explains why she and Ted stopped sleeping together:
* How I Met Your Mother forces the conclusion that their Ham To Ham Combat must be a well-known, taken-for-granted fixture of the bar, or else it would draw dozens of gawking spectators or scare customers away.
* How I Met Your Mother frequently challenges himself with increasingly bizarre trials, such as refusing to take off a ridiculous set of overalls until he gets laid.
* How I Met Your Mother frequently uses this and it became a hallmark for the show. They constantly play with the use of narration in how the story unfolds and how the characters perceive a situation. One notable example was "Three Days of Snow" where Ted explains "This is a three day story" and we see three different plots going on simultaneously, only for a twist in that each story takes place on a different day. Another episode "No Tomorrow" has Ted believes himself to be experimenting with an unusually lucky night he was having at the bar. But Marshall shows him an accidental audio recording of Ted's evening where Ted's dialogue is the same but changed from curious and honest to sleazy.
* How I Met Your Mother gives us this subtle example in an analysis of the demographics of Minnesota
* How I Met Your Mother had an episode centered around this earlier in the same season, also with Marshall and Lily. Lily doesn't want a big wedding, feeling it would be awkward since she stood Marshall up for their first one, so the gang head off to Atlantic City for a quick wedding. Problems arise when they realize that you need a marriage license, and that it will take a couple of days. They end up going out to international waters to be wed by a ship captain, but ultimately decide to wait and have a big wedding after all.
* How I Met Your Mother had an episode where Marshall's mother and older brother were using phones to listen in on the conversations Marshall was having with the rest of the gang about the recent developments between Ted and Zoey.
* How I Met Your Mother had earned the scorn of most fans for this. The mother dies, Barney and Robin divorce, and the gang split apart and become shells of their former selves. For a show that was mostly lighthearted and fun the ending came as a shock to many fans, fortunately the season 9 DVD had a happier ending which many fans considered far superior.
* How I Met Your Mother had "I don't want a girl, I just want a little boy!" and "Of all the women in New York you had to go out with an eight-year-old girl!"

* How I Met Your Mother had Marshall and Lily discover a small animal living in their apartment that had the characteristics of both a cockroach and a mouse: they dubbed it a cockamouse. No such creature is ever heard of again after they threw it out the apartment window (don't worry; it can fly). The cockamouse turns up in a later episode, in a room in a rundown hotel that Ted stays in for plot-related reasons. He cheerfully reports that it's had babies.
* How I Met Your Mother had this, but since Robin was the center of the discussion, all the names were based around Canada. Read about it at www.canadiansexacts.org (a service of the Ministry of Health & Wellness).
* How I Met Your Mother has a deconstruction in Ted. Ted is a man who sees love and relationships through rose-colored glasses. He believes there's only one person for him out there, that will be completely perfect for him and that relationships, when is with your "The One", are easy and free of conflict. This is something that his future self actually lampshades to be unrealistic and that he ended up facing a lot of hardships because of this belief.
* How I Met Your Mother has a discussion on long relationships and how when they're over, both have a huge amount of knowledge they will never use. "It's the emotional equivalent of an English degree."
* How I Met Your Mother has a rather offbeat example of this. There is an episode where Marshall has an obsession with making graphs of trivial things. So much so that the gang stages an intervention.
* How I Met Your Mother has a scene with a stripper, Barney, and a smoke machine. Barney is clearly enjoying the show.
* How I Met Your Mother has a version of this, spousal instead of parental. Marshall loudly rebukes Lily for forgoing her morals for cash (accepting money to paint a nude picture of Barney). In between his chastisements, he whispers to her that he's actually glad she found a way to get so much cash and is criticizing her as loud as possible so that Barney, in the next room, will come back in and offer even more money.
* How I Met Your Mother has Barney buy tickets for the gang to see a live entertainment event, "Robots Versus Wrestlers".
* How I Met Your Mother has Barney using this in his apartment, first as training for Ted, then for fun, then Robin uses it to scare some people out of the apartment.
* How I Met Your Mother has been getting lots of mileage out of this trope. As of the fifth season, Ted has picked up an umbrella owned by the titular mother at a party, accidentally walked into and taught the wrong class that she was in, and briefly dated her roommate, and left just after seeing her... left leg.
* How I Met Your Mother has flash forwards to 2020 during Ted, Marshall and Lily's college reunion, Marshall's campaign as District Attorney in an unspecified year, and the titular mother dying in 2024.
* How I Met Your Mother has flashforwards to the birth of Ted's eldest child set in this year.
* How I Met Your Mother has her "box of shame," a whole shoebox full of maxed out credit cards until she's completely lost count of how much debt she owes. This comes back to bite her when she and Marshall are trying to buy an apartment together as her horrible credit score makes it nearly impossible to get a mortgage.
* How I Met Your Mother has his love for love is his entire reason for living. His quest for the eponymous mother was the original driving force behind the show, though at this point nobody cares. In any case, he is rarely happy when out of a relationship and constantly complains/hopes to find "The One".
* How I Met Your Mother has Lily and Marshall by default playing the peaceful couple to whatever bickering couple their friends organized themselves with:
* How I Met Your Mother has Lily and Robin camping outside a wedding boutique so Lily can get a dress when their sale starts in the morning. Unfortunately, just as they're setting up camp, a nearby car alarm goes off. For twelve hours they sit in their folding chairs, unable to sleep, unable to think as the car keeps blaring incessantly. When the car's owner finally shows up in the morning to turn it off, every woman in the line attacks him.

* How I Met Your Mother has Marshall and Lily, getting engaged in the pilot episode and having been together for some 8 years prior. Besides a temporary break-up in the early second season, they act as a unit and are seen by Ted as the perfect couple that he wants to model himself after. This forms a contrast to Ted's several complicated relationships, as well as the will-they-won't-they relationship between Barney and Robin; arguably the alpha couple after season 4. Before, Ted and Robin were the alpha couple.
* How I Met Your Mother has Robin and Lily (the remainder of the five-man band being Barney, Marshall, and Ted.)
* How I Met Your Mother has several of these: "eating a sandwich" and "reading a magazine" are euphemisms for smoking weed and masturbating, respectively. Also, many of Barney and Ted's rules, like Revertigo and The Mermaid Theory. Phrases like, "Suit up!" and "Legen - wait for it - dary!" have become more popular.
* How I Met Your Mother has some discontinuity pertaining to Robin Sparkles. First it was a one hit wonder and her only song, then she had a second song which she said tanked, then her character was based off a TV show suddenly, then not only did she have a third song, she was one of the biggest celebrities in Canada and won many awards. She even had a very public meltdown and changed her stage name to Robin Daggers, an event that apparently every Canadian alive still remembers.
* How I Met Your Mother has "Stripper Lily", who speaks with an Eastern European accent, and "Mexican Wrestler Ted", who is exactly what it sounds like. The other characters had doppelgangers as well, but not particularly oddball ones.
* How I Met Your Mother, has the company that Barney works for, Altrucel. They are implied to make all sorts of weapons for war, but want people to remember they make the yellow fuzzy stuff on tennis balls. Altrucel later acquired an ailing Mega corp, the fictional Goliath National Bank. It's taken to the extreme in one episode:
* How I Met Your Mother has the "Curse of the Blitz". Anyone who holds the curse will hold the nickname "The Blitz" and forever (or at least until they pass it on to someone else) miss exciting and once-in-a-lifetime events due to leaving too early.
* How I Met Your Mother has to eventually admit that being left at the altar gave him some serious emotional baggage to deal with.
* How I Met Your Mother has very few commercial breaks without the double take.
* How I Met Your Mother He also does this for his gay brother, and vice-versa, as their ‘targets’ never overlap.
* How I Met Your Mother he did that night. Marshall gets so excited he has to go make popcorn.
* How I Met Your Mother. He falls within his first loop around the rink.
* How I Met Your Mother. He is often teased by his friends for falling too quickly for women and trying to turn each new date into a potential wife. Still he has a line of dating several very attractive women per season (minus season 2 when he's in a committed relationship with Robin) with breaks ups often less about him and more about them. And apparently the characters in this show all think it's mind-boggling for someone to go more than a few months without getting laid.
* How I Met Your Mother. He's initially presented as a gay version of Barney, but is later revealed to have found a steady partner to settle down with.
* How I Met Your Mother. However, in fact they're pretty regular smokers, Future Ted just doesn't talk about it much because he's telling the story to his kids.
* How I Met Your Mother. However when Marshall puts it on it still looks obvious.
* How I Met Your Mother. In a flashback, hippie!Barney sings and plays a song for his then-ex-girlfriend Sharon who broke his heart, leaving him for a wealthy suit. He actually videotaped it, and he was half-singing, half-crying, begging her not to leave him. His friends see the tape and mock him, being used to his usual cool and aloof self. But they feel very bad when they find out how badly Sharon screwed him and that he considers this the most humiliating thing that has ever happened to him.
* How I Met Your Mother in an episode where we see the children's TV Robin starred in as a teenager. It's wall to wall sex jokes, including the song "Two beavers are

better than one."
* How I Met Your Mother: In "Band or DJ?", Marvin is constipated. He later proceeds to have a Baby Blowout all over Marshall, during a diaper change, euphemized by Ted as confetti.
* How I Met Your Mother: In "Dowisetrepla", Marshall freaks out when he finds the peanut butter jar without the lid, adding it to the list of inconsiderate things that Ted does. He yells at Ted and communicates to him his determination to move out. Lily confess being the one who did it at the end of his rant.
* How I Met Your Mother in its delivery, sometimes segueing to a series of flashbacks or cutaway gags to explain something, sometimes tossing in a tidbit of relevant information (e.g., stopping to tell his kids that Marshall had a temporary filling put in that day, which wasn't seen in the episode, so that the story makes sense).
* How I Met Your Mother in love with her and chasing after her, trying to cajole her into leaving Marshall. One wonders why she hasn't slapped him with a restraining order yet...
* How I Met Your Mother: In "Mosbius Designs", Ted hired a secretary to help him run an architectural firm out of his apartment. The new secretary is given the key to the bathroom and prevents Robin from using it without his permission. Robin finds this sexy and the two begin sleeping with each other. When Ted fires his secretary and he loses control of the bathroom key, Robin loses interest.
* How I Met Your Mother, in order to convince Barney to tell a painful story from his past, the rest of the gang tell the most embarrassing stories of their own lives to make it easier for him. Turns out Barney's story isn't humiliating or sad at all (at least from his perspective), he just pretended it was hard for him to talk about so he could get embarrassing stories about everybody else.
* How I Met Your Mother in "Sandcastles In the Sand" when Marshall and Lily start acting like Robin's parents and forbid her from hooking up with her ex-boyfriend. After Robin storms off Ted tries to change the subject causing Marshall, who's still in faux-father mode, to snap this at him.
* How I Met Your Mother in season 2 is that Ted's boss is completely unaware that the skyscraper design he wants to present to their clients happens to be incredibly phallic, complete with a semicircular roof and two spherical entrance halls at the base, which are surrounded by wild foliage.
* How I Met Your Mother intense about everything, and discussion ranges from the animals merits as pets, food, good luck charms, and competitors in a steel cage death match. Old!Ted describes it as the worst argument the five of them ever had.
* How I Met Your Mother interesting (not that they had actually been dull before...just less prominent) when they stopped being Ted's roommates and got embroiled in the realities of married life. Also averted with Barney and Robin. Barney's basically just his crazy, funny self no matter what...but the writers didn't anticipate the chemistry they had and wrote the break-up into the show before seeing it. Eventually, they put them back together.
* How I Met Your Mother: In the pilot, Ted the narrator announces to his teenage kids he's going to tell them an incredible story of how he met their mother. The kids look confused and the son asks if they are being punished for something. Ted says no. The kids stay sitting on the couch but look annoyed.
* How I Met Your Mother in the season four finale, in contrast to their earlier comfort-sex making out in season three.
* How I Met Your Mother involves Baskiceball, a combination of basketball and ice hockey created by Marshall Eriksen and his brothers. The rules weren't clearly defined, but it appears to basically be basketball played on ice with hockey equipment, but Marshall actually acknowledges that mostly they just "wail on each other".
* How I Met Your Mother, in which the gang tell anecdotes within anecdotes within anecdotes all trying to convince Ted not to do something. All of them have bad endings except for one. Barney's. Because he's crazy.
* How I Met Your Mother is about Ted, learning to let go of his feelings with Robin who is about to marry his best friend Barney before he met the Mother of his

children. Alas, the series finale has Barney and Robin divorced with the former becoming a single father and the Mother dying so that Ted and Robin can be together.
* How I Met Your Mother is a lot like this as a result of his long-term girlfriend Shannon absolutely crushing him shortly after college and causing him to swear off anything more serious than a one-night-stand. It's shown throughout the series that he isn't a total non-believer in love, particularly through his devotion to Lily and Marshall's relationship and then his realization of his own love for Robin.
* How I Met Your Mother, is an adult woman who enjoys dressing up her cats in silly costumes.
* How I Met Your Mother is based around Ted's search for his future wife, who has been shown to have the exact characteristics that Ted is looking for.
* How I Met Your Mother is Canadian, so of course she's a hockey fan. When she gets drunk and turns "Super-Canadian", she puts on a Vancouver Canucks uniform and starts trying to play in Ted and Marshall's living room.
* How I Met Your Mother is definitely considered attractive. Marshall once called Robin "freakishly tall." Of course, she's got nothing on the women in Marshall's hometown.
* How I Met Your Mother is feeling which, unfortunately, brings Barney and Nora back together.
* How I Met Your Mother is fond of this. In one episode, they discuss Robin's first love and ask through a series of puns if she lost her virginity to him. Narrator Ted comments that it went on for several hours, only showing us the spectacular and terrible ones.
* How I Met Your Mother is having no success selling her abstract paintings (one trendy gay couple makes a purchase just to get the frame). When she throws them in the trash, they are found by a veterinarian who discovers that her work has a remarkable calming effect on dogs, even in the midst of operations. Birds, however, just didn't get her work, and would even kill themselves in efforts to dive bomb her paintings in hatred.
* How I Met Your Mother is partially based on creators Carter Bays and Craig Thomas' younger days: Ted is based on Bays, Marshall on Thomas, and Lily on Thomas's wife.
* How I Met Your Mother is shown in the final season to be exceedingly quirky, and owns a ukulele which is her signature instrument. In fact, she owns it specifically for quirky reasons: she was given it so that she can accompany her breakfast foods as she makes them sing show tunes.
* How I Met Your Mother is shown of Barney pulling out a belt... and announcing to Marvin that this fine belt the kid would usually wear is going to be confiscated as punishment, and he has to wear a common leather belt instead.
* How I Met Your Mother is Ted's red cowboy boots, which are apparently women's. This is never discussed around him so he doesn't know.
* How I Met Your Mother is that he is a gambling addict. This comes in two flavors. Him readily and willingly betting any amount on anything, or — more appropriate to this trope — going on wacky hijinks because somebody said something (normally seducing a woman) couldn't be done in some bizarre situation.
* How I Met Your Mother is that immediately after an exchange like this...
* How I Met Your Mother is the memoirs of the male character relating the tale to his kids; the real question is, which woman does he really end up with?
* How I Met Your Mother is upset that Marshall took a judging position without consulting her, and every time she hears a legal term — "judge", "court", "trial" — she breaks the glass in her hand.
* How I Met Your Mother is wearing a beekeeping outfit doused in kerosene when he's getting food out of the oven. He runs ablaze out the front door and rolls in the snow to extinguish himself.
* How I Met Your Mother, it begins to snow. It also continues to snow while they bask in the moment and when Marshall and Lily are reunited with baby Marvin.
* How I Met Your Mother, it is revealed that Marshall once got roaring drunk and streaked across campus for what he thought was a pledge. Turned out one of his

friends, who was either not in a frat or incorrectly assumed he was, was screwing with him.
* How I Met Your Mother, it's a Mad Libs Hand Gesture: the high five and variations thereof. He's done a "phone five" (if you don't do it on your end, he'll somehow know), a "tiny five" (with a kindergartener), a "hypothetical high five" (doing nothing at all), and a "high two" (in a flashback to a time when he was considerably less Barney-like).
* How I Met Your Mother it turns out that Ted did all the shopping and owned everything useful in the apartment. When he moves out, Lily and Marshall are left without food, towels, or toilet paper, and also get on each other's nerves without him around as a buffer.
* How I Met Your Mother. It was first done in the season 1 episode "Cupcake" with two threads as the group is split between Marshall at a tailor and Lily shopping for a wedding dress. The technique's been used several times since but its more common form in the show was first exhibited in the early season 2 episode "Brunch". In this episode there are three groups rather than two and the contact points before the last one are actually different parts of the same event, as well.
* How I Met Your Mother jokes, but it remains unclear why Mandy Patinkin of all people would work as a 2010s substitute for Matlock.
* How I Met Your Mother later and Marshall is shown holding a bruised jaw, telling Ted, "The whip is not a toy". He is later seen playing with it, however.
* How I Met Your Mother lead singer of the wedding band and Ted is so angry he punches the guy in the face. The Mother, who plays bass in the band, anonymously buys Ted a glass of an even older vintage as a thank you for putting the singer in his place.
* How I Met Your Mother lend him an umbrella. Lily even lampshades it later by calling it "positive racism" in an attempt to cheer Marshall up.
* How I Met Your Mother like Duck vs Rabbit, reasons to have sex, or insults towards Canada.
* How I Met Your Mother, like JD above, is practically omniscient from the viewers' perspective, so he qualifies as a narrator too.
* How I Met Your Mother, Lilly gets annoyed that Barney can't get the twenty or so steps to make some oragami figures.
* How I Met Your Mother, Lily calls her father and tells him that she is pregnant. To Lily's dismay, her father remains nonchalant and hangs up the phone as if he didn't hear the news. However, at the end of the episode, he comes over to congratulate her; a flashback reveals that after he hung up he started screaming, "My daughter's having a baby!!!!" and made a scene at the board game convention.
* How I Met Your Mother, Lily does this after Barney hangs up on her in Season 3 Ep 20.
* How I Met Your Mother: Lily is an ex-kindergarten teacher and Ted gets her an office job at their architecture firm. Hammond Druthers is their jerk boss and Lily is so appalled by his behavior to people that she decides to start taking away his things. It's her personal form of justice, supposed to make kids and people stop being mean. The first thing she takes away is Druthers' baseball signed three times by Pete Rose. He's livid, and threatens to start firing random people if his ball is not returned.
* How I Met Your Mother, Lily is complaining about the "random skanks" that Ted brings to group stuff, and Ted points out that Robin is her best friend.
* How I Met Your Mother Lily mentions that her friend Robin (who is a woman) is many things: "Friend, confidante, occasional guest star in some confusing dreams that remind me a woman's sexuality is a moving target."
* How I Met Your Mother, Lily ruins a romantic moment by pointing out that Marshall confused your/you're. (Or Marshall ruined the moment for Lily by confusing your/you're in the first place.) And of course, the difference between "effect" and "affect" is one of only two things Marshall himself is really serious about.
* How I Met Your Mother, Lily takes a job as a waitress in a Hawaïan restaurant; she has to wear a local costume and welcome customers (among whom are her friends) with "Aloha".

* How I Met Your Mother, Lily takes Robin to a "Buyers Addiction" group, because Lily has the uncontrollable urge to buy stuff to make her feel better. When she gets up, she says "Hi, I'm Lily," to which Robin (alone) says, "Hi, Lily!" then looks around, embarrassed that no one else says it. After Lily explains her problem, she says she wants to find the pair of boots another addict is wearing and buy them.
* How I Met Your Mother List" tries to live like a 21-year-old for a weekend, and this is what happens.
* How I Met Your Mother (literally "At First Glance", the Finnish version of the English phrase "Love at first sight"), though uses the English title when it airs on FOX.
* How I Met Your Mother: Made in 2005, the show occasionally flashes back to the main characters' childhood set in various points in this decade.
* How I Met Your Mother. Marshal claims he was mugged by a monkey, but later confides to Barney and Ted that it was an actual mugger, and he just didn't want Lily to buy a gun. Cue Barney: "Are you sure it wasn't two monkeys stacked on top of each other with a trench coat?"
* How I Met Your Mother Marshall and Lily have a full dance-routine to go with "Don't Go Breakin' My Heart." Marshall, eager to fit in with his new co-workers, doesn't sing the song at karaoke. However, when he decides Lily's more important, he gets on stage and sings his half of the song, until Lily joins in halfway through.
* How I Met Your Mother, Marshall and Lily have been known to do "time outs" during their (verbal) fights to have sex or do something else more fun.
* How I Met Your Mother, Marshall and Lily have been shown to have done this on occasion.
* How I Met Your Mother: Marshall and Lily have been together since their freshman orientation at college and the mix tapes they made for each other pop up from time to time. In one episode, they eat dinner at a restaurant that used to be Lily's apartment. One of the mix tapes is playing in the background, complete with Marshall's "I love you" message.
* How I Met Your Mother: Marshall and Ted take a long drive with just one song to listen to, "I'm Gonna Be (500 Miles)". In alternating hours, they either hate it or love it (though unlike in a standard example, the moments of high "popularity" don't follow the thing's absence, but rather that it has managed to sink in).
* How I Met Your Mother, Marshall calls his wife Lily "Lilypad", while she calls him "Marshmallow."
* How I Met Your Mother: Marshall is trying to prolong a "pause" in an argument with Lily, so while they are going at it, he doesn't want to "finish" too soon. He starts thinking about things that will keep him from getting there too soon, one of the things being "bugs." Problem is that it works too well, so he tries to picture "Bugs, with boobs."
* How I Met Your Mother. Marshall only panicked when Lily was in labor because he was stuck in Atlantic City and thought he'd miss the birth. Ted remained calm for both Lily and for The Mother.
* How I Met Your Mother Marshall ordered 100 shots of tequila. Barney says he'll have the same.
* How I Met Your Mother: Marshall points out that Barney has a tiny bit of marinara sauce on his tie. Barney considers this utterly humiliating and plots elaborate revenge.
* How I Met Your Mother, Marshall remembers how his older brothers played a prank on him by making him order 12 cups of coffee at a drive-thru while naked. After that, his brothers jumped out and surprised him, causing him to jerk the car and make the hot coffee spill all over him.
* How I Met Your Mother, Marshall successfully convinces Barney that he could pick up any chick he wanted in less than five seconds by going up to a supposedly "random" woman (actually his girlfriend) in a bar and kissing her passionately. While retelling this story:
* How I Met Your Mother, Marshall wears a leather bracelet because it makes him

look "tough" to Lily and it turns him on, but throughout the episode, his hand gets more and more swollen because he's allergic to the leather, and by the end, it's like a balloon.
* How I Met Your Mother, meaning that he would not have met his future wife.
* How I Met Your Mother. Naturally, at the end of the episode this is proven true.
* How I Met Your Mother ninth season flashback episode (most were), Robin is shown wearing a purple spy-type cat-suit and being referred to as a spy. Several fans spoofed this being because "Robin Scherbatsky" was a cover identity for S.H.I.E.L.D. Agent Maria Hill.
* How I Met Your Mother. No wonder fans reacted so badly that they preferred the alternate ending, which omitted the twist.
* How I Met Your Mother of money on suits, so much so that Future Ted told his kids that he spent a "crap-load" of money per year on suits. Later, when we see a flashback to Barney's job interview, he is offered "15 crap-loads" of money for a salary. This means that he spends roughly 1/15 the annual salary of an executive level position solely on suits, per year.
* How I Met Your Mother often spontaneously morphs into one of these, due to the fact that everything that happens is either Ted's twenty-year-old, emotion-tinted, perspective-skewed memories, or Ted's extra-colorful retelling of twenty-year-old, emotion-tinted, perspective-skewed memories (or perhaps a blend of the two).
* How I Met Your Mother of the neighbors. Also referenced in another episode where Lilly tells Ted she can hear Robin's orgasms because the walls are thin.
* How I Met Your Mother of these in his apartment, each large enough to cover an entire wall.
* How I Met Your Mother. Oh, and it goes for twenty minutes, getting progressively crazier as it goes along.
* How I Met Your Mother once broke up with a boyfriend, she also "broke up" with his 10-year-old son. On realizing that nobody had broken up with him before, she was relieved that she could throw every cliched breakup line at him and he would believe her. "It's not you, it's me." "I'm going through a lot of stuff right now." "I just want to focus on my career." etc. etc.
* How I Met Your Mother one man show, which includes a skit where a robot falls in love with a toaster.
* How I Met Your Mother, one of Barney's coworkers quits spectacularly while his boss is chewing him out during a meeting, shouts to everyone that he just made a load of money in the stock market and doesn't need this job anymore, and then gets up on the conference table yelling "Here's what I think of this stupid company!" and attempts to pee on it...but has a shy bladder and can't get the stream going. His meek "Could everyone turn away for a minute?" and everyone's polite acquiescence makes it even lamer.
* How I Met Your Mother, one of her trademarks was a cute little robot sidekick.
* How I Met Your Mother - one of Ted's love interests, Victoria, was a pastry chef
* How I Met Your Mother one. The "Elixir" doesn't actually do anything and the gang were cured because they believed it was working.
* How I Met Your Mother, on the other hand, is always terrifyingly clean.
* How I Met Your Mother or another. More forgivably, he acts as unofficial legal counsel for his friends, who tend to get in relatively mild trouble and just need someone cheap with an understanding of the legal system.
* How I Met Your Mother out of the characters' (particularly Ted's) hatred of Jersey, along with plenty of jabs at the state itself.
* How I Met Your Mother outside the reception hall before so that they won't be disappointed with their public ceremony which goes exactly as poorly as they expected.
* How I Met Your Mother, particularly the episode where Marshall and Barney are prank texting Ted.
* How I Met Your Mother pipes too. Why there has not been a musical episode for this show yet is beyond me.
* How I Met Your Mother. Played straight with the alternate ending, though.
* How I Met Your Mother playing WOW. Also inverted, as at one point he met a Girl

In Real Life playing a male character.
* How I Met Your Mother plays an old boyfriend of Robin's. When we see him objectively he's fat, balding, and has bad skin & teeth. When we see him from Robin's perspective he looks like...James van der Beek.
* How I Met Your Mother plays it straight with Barney... talking to his bookie.
* How I Met Your Mother plays this for every ounce of irony it's worth.
* How I Met Your Mother plays this for laughs, having Future!Ted refer to marijuana as "sandwiches" in order to avoid outright mentioning the drug to his kids, and the live action has the characters puffing on them as though they were blunts. In one episode they baked a bag of "sandwiches" into brownies.
* How I Met Your Mother plays with this trope a few times. On one occasion, Barney and Robin record a corny duet as part of a bet. On another, Lily starts talking to her dad, learns he wants $5,000 in bail, and starts pretending to be one of these.
* How I Met Your Mother professing their love for her outside her window.
* How I Met Your Mother raps about how the word "Canada" is apparently unrhymable, only to come up with a rhyme by the end anyway:
* How I Met Your Mother realizes that the odds of the next girl he's interested in being The One are pretty dismal. It doesn't stop him from trying.
* How I Met Your Mother references this when Ted finds out that Marshall and Lily share a toothbrush:
* How I Met Your Mother, referencing David Letterman, Barney makes one of names for the moving van to which he would bring women from the bar. Names include "The Ford Explore-her" and so on.
* How I Met Your Mother reveals that Barney Stinson has an Alternate Aesop Interpretation for nearly every movie he's seen which in his mind reverses the accepted role of hero and villain.
* How I Met Your Mother reveals that Marshall and Lily engage in spank play, though he's reluctant while she eagerly eggs him on.
* How I Met Your Mother reveals that Marshall had been grabbing Barney's ass instead of Lily's all along.
* How I Met Your Mother review out of dozens of positive ones and the fact he got so many of those (plus the fact he's designing a major office building) shows he's a success.
* How I Met Your Mother right. Subverted at least once, with Barney deliberately ruffling his hair and Ted deciding that the ruffled look is actually "awesome".
* How I Met Your Mother Robin, a fact which makes her so proud she can't even hide it while Ted is reeling from the revelation of his parents' divorce.
* How I Met Your Mother, Robin catches Ted playing with his model of the Empire State Building.
* How I Met Your Mother Robin commented that, if a member of the Vancouver Canucks hockey team walked into the bar, "my panties would drop so fast there would be a hole in the floor halfway to China."
* How I Met Your Mother Robin finds that after she sets up Barney with Nora, she wants him back herself.
* How I Met Your Mother: Robin frequently complains about her job consisting entirely of these.
* How I Met Your Mother, Robin has to report a Super Bowl news story without knowing which team won.
* How I Met Your Mother: Robin is Red Bird, Lily is White Flower, and Ted is The Calligrapher (calligraphy is one of his hobbies).
* How I Met Your Mother Robin leads the bar in congratulating Ted on getting a big job.
* How I Met Your Mother Robin meets her father for dinner at a kitschy Italian restaurant where the bathrooms are labeled "Spaghettis" and "Meatballs." She picks the wrong one.
* How I Met Your Mother, Robin takes Marshall to a shooting range to help him get over Lily leaving him for the summer. He picks up the gun, shoots it, and it recoils to smack him right in the face, knocking him on his ass.
* How I Met Your Mother, rocketing by a meeting room where Marshall is leading a

meeting on a swivel chair, using a fire extinguisher for propulsion. Marshall quickly excuses himself to chase after her.
* How I Met Your Mother running away, and Ted uses this inside knowledge to clear Victoria of any blame. Awkwardly, the three of them somehow end up rooming together.
* How I Met Your Mother scenario for them both, once Marshall realized a break was good for them, telling her they should continue to figure out who they are without each other, and initially rejecting her when she tried to make up. However, they ultimately get back together a few months later and stay together for the rest of the series.
* How I Met Your Mother Season 8 episode, "The Autumn of Break-ups", Future Ted lampshades this regarding the relationships of him and Victoria, Lily and Marshall, Barney and Quinn, Robin and Nick. He narrates that for the past three months, they were all contented and happy...which he pointed out that those events don't matter in the present and that brings us to the episode proper where all the couples are arguing. At the end, Barney and Quinn ended their engagement. The following episodes have Ted/Victoria and Robin/Nick breaking up too; though in Ted's case, it's due to his feelings with Robin which is the same reason Victoria broke up with him in the first place. The three-month timeskip was most likely done due to the first eight seasons of the show taking place in real time and the show needed an excuse to pick up in September after the last season ended in June.
* How I Met Your Mother seems to randomly know a number of languages including Korean, Mandarin, Latin, French, and possibly others. He's said to speak Ukrainian to his tailor, but it is in fact Russian.
* How I Met Your Mother, separating the lies from the truth isn't so easy.
* How I Met Your Mother set-up while outdoor locations with a single camera are heavily used.
* How I Met Your Mother. She keeps saying things that can be perceived as racist remarks, confessions of fratricide, etc., then finishes the sentence after the wine sip so that it takes on a completely different meaning. As Ted is imagining literal baggage appear around the room every time she says something and it disappears when she finishes her sentence, the scene culminates with her saying something particularly bad and a suitcase appears labeled "LET HER FINISH HER DRINK, TED."
* How I Met Your Mother, she panicked when she was told that Marshall was the size of a Thanksgiving turkey when born. A Halloween episode had them dressed up as Sonny and Cher — with Lily as Sonny and Marshall as Cher. Lily once had a nightmare about Marshall leaving her for a woman who was, in Nightmare!Marshall's words, "more height appropriate."
* How I Met Your Mother. She's later caught in the lie and confesses while believing the commercial will never actually be used. Future Ted then states that it ran for seven years. In a later episode, Sandy shows all of his and Robin's co-workers various embarrassing videos she's been in, including the commercial.
* How I Met Your Mother should have said," or "But unfortunately, that's not what happened."
* How I Met Your Mother shows events from the same party over the course of five minutes, with Future Ted telling three stories about what was happening in each room of the house during the time. You have to know all three stories to understand what was happening in each of them.
* How I Met Your Mother: Some of Barney's cons to get women (though not usually) involve a disguise. For instance:
* How I Met Your Mother's penchant for writing songs about mundane things.
* How I Met Your Mother's second pregnancy. It wasn't hidden, but only because her character Lily was already pregnant. A couple seasons earlier the show had gone to great lengths to hide her first pregnancy.
* How I Met Your Mother's star drawing power is pretty up there, and they enjoy this trope. They got Emmitt Smith in the second season (What's more important than football? Dance, my friend. Dance) and Regis Philbin in the fourth.
* How I Met Your Mother story of how he met their mother. Fast forward twenty-four years to 2030, and he does, although as far as we know he never published it.

* How I Met Your Mother surprise birthday party for Hammond (many employees having missed the first). This trope's usual effect applies more to Ted than to Hammond, who just seems pleased.
* How I Met Your Mother: Ted and Barney for some time at the end of the third season.
* How I Met Your Mother: Ted and Robin are having dinner at a nice restaurant, and they order champagne. Robin sees the ring at the bottom of the glass and freaks out... while Ted protests that he didn't put the ring there. A man at a nearby table apologizes and explains the ring should have gone in the champagne meant for him and his soon-to-be-fiancée. Ted and Robin realize that her reaction indicates that they probably aren't meant to be together in the long run.
* How I Met Your Mother, Ted and Robin became a couple at the end of Season one. Season two focuses on their relationship and issues that hindered it. Eventually they concluded that because of their differences, they are not meant for each other and in the Season two finale, they revealed to Barney that they broke up.
* How I Met Your Mother, Ted and Robin finally got together in this style.
* How I Met Your Mother: Ted awakens from a nightmare to find Barney kneeling at his bedside, only to find that rather than being there out of concern, Barney was looking for condoms.
* How I Met Your Mother, Ted brings a picture that could either be a rabbit or a duck to make a point about how a date might seem right for someone but turn out to be wrong, and vice versa. Then the gang disagrees over which represented the bad choice, the duck or the rabbit. According to Older Ted, it was the longest, most intense argument they've ever had. It even drags in their regular limo driver and by the end, Marshall is drenched in sweat.
* How I Met Your Mother, Ted chickens out of dating a local news reporter. Then, when he sees her reporting on a guy who was about to jump off a building, but also chickened out, Ted gets his courage back and says:
* How I Met Your Mother, Ted finds out that he's gotten loads of glowing reviews from his students on ratemyprofessor, from "A++++" to "brilliant puns", but ignores them all and fixates on the single person who called him "boring". He spends the entire episode obsessing about it, and sure enough, boring everyone to tears with his constant attempts to prove he's not boring.
* How I Met Your Mother, Ted has been given the job of choosing the brand of lightbulbs to be used for the GNB headquarters, and worries about what will happen if the one he chooses poorly.
* How I Met Your Mother Ted has to deal with his friends all boarding his brand new car with various messy items like food and cigars. He eventually snaps once they all drop there things on the seats.
* How I Met Your Mother: Ted is a fan of pulling these off, and other characters try their hand at it as well.
* How I Met Your Mother, Ted is invited to design a new house for the extremely wealthy owner of a mansion. He's interrupted halfway through his pitch when the guy says he's not really concerned about the upper house so much as the basement... specifically, the laundry room, which he is very insistent be soundproof and easy to clean, and is exceptionally creepy about it. Everyone Ted speaks to agrees that the guy wanted him to design a murder house.
* How I Met Your Mother, Ted is on a blind date at an unbearably loud dance club. After realizing that his date is just nodding along politely and can't really hear a thing he's saying, he starts saying random silly things for the fun of it — then the music cuts out just in time for him to yell "I'm wetting my pants!" in her face.
* How I Met Your Mother, Ted knowing ASL actually came up again once or twice.
* How I Met Your Mother, Ted meets a girl at a wedding reception, but they use only nicknames. When he later tries to find out who she is, they call the bride so ask if she remembers the girl. She asks what shoes she wore - Ted remembers they were brown with sparkling snowflakes. The bride says they sound cute, but she doesn't know her. Robin however realizes she met a girl with shoes like these and knows she made a cake for the wedding. That's how Ted met Victoria.

* How I Met Your Mother: Ted meets one of his dates this way. They have several awkward elevator rides due to working in the same building until he finally breaks the ice — by spilling his guts about how horrible he still feels after having been left at the altar several months ago.
* How I Met Your Mother", Ted mentions to his fiancee Tracy in a scene from the future that the statute of limitations for marriage proposals is five years, so he proceeds to repropose right there.
* How I Met Your Mother, Ted mixes up pictures of drunk Robin on a toilet with his architectural slides for class.
* How I Met Your Mother, Ted needs to get a sulky Lily to talk to him so that he can apologize. He knocks on her apartment door:
* How I Met Your Mother: Ted receives an invitation to a high society party meant for someone else (the woman had lived in the apartment before Ted moved in). The gang goes to the party, and just as Lily is about to pose as Marissa, the real Marissa shows up. Ted talks to her, and she agrees to let the gang attend as her guests.
* How I Met Your Mother, Ted recounts how he and a girl named Jen went on a blind date ... twice without realizing it! The first time was in 2002 and the second time was in 2009. They realized they were repeating their disastrous first blind date when they exchanged the same dialogue as before. Frightened by the prospect of running out of people to date in New York, they decided to retrace their steps to find out the mistakes of their first blind date.
* How I Met Your Mother Ted regrets that he didn't know the Canadian Robin in high school. "You could've been the Canadian girlfriend I told everyone I had!"
* How I Met Your Mother, Ted takes Stella on a two-minute date. This involves them getting in a taxi two separate times in order to go one building down the street.
* How I Met Your Mother Ted thinks this with Barney, Robin, Lily, and Marshall. He assumes they're all wanting nachos, when the rest are all thinking about how ridiculous his hair looks.
* How I Met Your Mother." Ted was doing this by accident to a girl at the university library, and when he realized a girl was giving him the runaround too he sought to make things right with her. In a more long-term issue, Lily's high school boyfriend Scooter has shown up throughout the series and has made it clear he wants her back.
* How I Met Your Mother tend to fall on this kind of comedy. It usually happens to Barney due to his attempt to make his pick-up techniques work or when Ted or Robin go on a date.
* How I Met Your Mother, thanks to the premise. It just that for exactly the same reason it can't happen until the final minutes of the show, so so long as the series goes on...
* How I Met Your Mother that he was in love with her until he had a near-death experience, though.
* How I Met Your Mother that there isn't enough time to process the paperwork on a marriage before the visa expires at the end of the week.
* How I Met Your Mother: The beginning of the "Let's Go to the Mall" video that Barney shows on his laptop in an episode plays around with this trope.
* How I Met Your Mother. The camera zooms in on her face, her hair starts swirling around, she starts breathing intensely, and her eyes light up with a fiery glowing.
* How I Met Your Mother, the characters turn on Robin's morning talk show but get sidetracked by their conversation and fail to notice her putting out a fire, resuscitating a man after a heart attack and delivering a baby, all on camera.
* How I Met Your Mother, the entire gang are trapped in Barney's apartment and don't wish to be spotted by him, but they peek at him and his date through a door and their stacked heads form the stock pose.
* How I Met Your Mother: The flashforward to Barney Stinson and Robin Scherbatsky's divorce, as well as the selling of the apartment which served as the setting of the show for much of the series's run, happened in this year.
* How I Met Your Mother. The framing device is that the show is one giant flashback of Ted in 2030 telling his future kids the events that led up to him meeting their

mother. He doesn't actually meet the titular mother until the series finale.
* How I Met Your Mother the gang orders burgers. Everybody finds them delicious, except Marshall.
* How I Met Your Mother, the gang uses a March Madness-like bracket on a chalkboard to determine which of the 200+ women Barney has slept with is trying to ruin his life. They narrow it down to a Final Four who he treated the most poorly (such as going camping with one woman and then stealing her car and leaving her stranded in the woods).
* How I Met Your Mother: The main character Ted's season 3 love interest and fiance Stella. In Robin's own words, Ted was "disappearing into someone else's life". Stella would later apologize to Ted for leaving him on the day of their wedding and explained that while she did love and care for Ted because he helped her believe in romance again, she was always in love with Tony.
* How I Met Your Mother. The meltdown among fans and critics was big enough to make the news and is likely to haunt the series for years to come, although some fans have been mollified by the alternate ending released with Season 9's DVDs (which basically just leaves out the unpopular bits at the very end).
* How I Met Your Mother them. He did this a second time in the same recording.
* How I Met Your Mother, then leave their seats to go buy nachos. They get lost, and keep mistaking the line to the women's restroom for the nacho line.
* How I Met Your Mother, then when she gets annoyed with all the personality traits she first found attractive about him (trying to sensually feed her by hand, sweeping everything off the table to have sex, inviting strangers into her home), she realizes he's just a rebound and dumps him, but not to go back to Ted.
* How I Met Your Mother (the person Ted left her for in their first time as a couple), which he couldn't.
* How I Met Your Mother. There's barely been an episode in the series where he hasn't hit on at least one woman, and uses a number of bizarre means to seduce them (which are surprisingly successful). For the most part, he only does well with bimbos and desperate women. In one episode Barney was revealed to have slept with 200 women (and counting). Marshall, while disgusted, decided to crunch the numbers based on the number of women Barney hits on on average every week and calculated (albeit with quite a bit of leeway) that based on that information and his years of sexual activity, Barney's success rate with women works out at a little over 1%. There's no telling if that is anywhere near accurate though.
* How I Met Your Mother. There's even a montage of them being shown at different ages, from when they first met as children to them growing old together.
* How I Met Your Mother. The rest of the gang are clearly horrified by Jeanette's actions while stalking Ted. Unfortunately, Ted is not.
* How I Met Your Mother." They're about as successful as you might think.
* How I Met Your Mother. They use actual game animation, though, so it gets funny for the non-gamers out there when you find out that Ted is playing the female human and Blahblah is the huge male draenei.
* How I Met Your Mother, this ends up being the situation. They just can't click.
* How I Met Your Mother, this is known as the Chain of Screaming. When someone screams at a subordinate, the subordinate must scream at someone lower, who in turn screams at someone else, and so on until someone screams at the original screamer and the cycle is complete. Marshall's attempts to break the chain do not go as well as he hoped.
* How I Met Your Mother this is referenced by The Captain when he and his wife are splitting up. He says "I wear the horns of the cuckold" in the belief that she is in love with someone else.
* How I Met Your Mother, this is the reason that the titular mother waited for Ted; her first love Max died on her 21st birthday and she spent the next eight years morning his death. It wasn't until she met Ted that she really got over it. While she had a boyfriend in between, she still hadn't got over it.
* How I Met Your Mother. This would probably classify her as a World Class Beauty.
* How I Met Your Mother thy neighbor." The plot follows how not heeding this rule comes out badly for the others.

* How I Met Your Mother to accommodate Alyson Hannigan's maternity leave. The excuse was very clever; she got so upset at a dirty joke that Barney told that she didn't hang out with him. Lampshaded as well since Future!Ted specifically states that she didn't talk to Barney for exactly four weeks when it happened.
* How I Met Your Mother to a woman who forcibly kissed Marshall when she was drunk. It's rather hilarious though, because Marshall is burly, 6'4'', and a practiced fighter, while Lily is about a third of his size, small-boned, and very girly.
* How I Met Your Mother to Barney and Robin while they were dating. They'd just started having a fight before the ski lift stopped, making their usual strategies for avoiding a fight (Barney leaves the room and/or Robin gets naked) useless.
* How I Met Your Mother to be this trope, but he isn't nearly as good as hiding this fact as he thinks he is. His over-the-top, self-aggrandizing "awesomeness" is his way of overshadowing all his emotional issues.
* How I Met Your Mother, to explain away Alyson Hannigan's maternity leave, the show has Barney tell Lily a "hilarious boy joke", i.e. a dirty joke, that causes her to shun Barney for several weeks. The setup is, "What's the difference between peanut butter and jam?" It's a real joke with a punchline far too risqué for network television: "I can't peanut butter my dick up her ass."
* How I Met Your Mother to let her stay with him for a few days. He is at first reluctant, but after one of his one-night stands refuses to leave Lily manages to scare her away after the girl sees her and assumes she's Barney's wife. They spend the next few weeks pretending to be married. Their arrangement falls apart once Barney realizes even pretending to be married is too close to actually being married and he kicks Lily out.
* How I Met Your Mother to the guard slamming the book closed and saying, "He's right, let him go." Immediately afterwards another guard is hanging a sign, "No Motorcycle Riding on Casino Floor".
* How I Met Your Mother tried his best to raise his kid up to be just like him... despite being a girl. He was more than upset when he caught her kissing a boy for the first time.
* How I Met Your Mother, trying to broach the subject of whether Robin has ever been married.
* How I Met Your Mother twice a day for some time, despite being married and having children.
* How I Met Your Mother. Two of the characters will be in a situation where they can't talk openly, so they have entire silent "psychic" conversations using just facial expressions. Sometimes this works, and other times one of the characters will completely misinterpret what the other person is saying.
* How I Met Your Mother until 1993." The gag continues in a later episode, where Robin is credited in Canada with having invented grunge as a genre... in 1996.
* How I Met Your Mother until he agrees to stop doing magic tricks. Most of his exploits involved playing with fire.
* How I Met Your Mother uses hashtags with a hand signal for a hash in the air. #burn
* How I Met Your Mother, usually in the form of someone's memory or invoking a brief flashback (appropriate, given that the entire series is a flashback made of a guy's memories).
* How I Met Your Mother, waiting for her to address her relationship with him.
* How I Met Your Mother was described by everyone who met him as basically a dog in human form. He inadvertently emphasizes this impression later by taking a leak on a fire hydrant.
* How I Met Your Mother, was established as knowing sign language (to conveniently help/hurt Barney's claim that he was his deaf brother). This casually came up later, when he spoke to his ex's deaf boyfriend.
* How I Met Your Mother we have Barney's video resume. Between questions from the interviewer (Barney with an accent), Barney puts on his glasses just so he can take them off when he's answering the next question.
* How I Met Your Mother went to a tattoo parlor on a drunken dare while trying to get over a break-up and ended up with a butterfly on his lower back (or as Barney

puts it, "a tramp stamp, a ho tag, ass antlers ..."). It turns out the tattoo artist was recently dumped by the girl Ted was making out with (the one who dragged him there to get a tattoo). He gets the tattoo painfully removed in "Ten Sessions" and eventually gets engaged to the doctor who performed the procedure.
* How I Met Your Mother, we see Barney's dad taking Barney and his half-brother to a fishing-trip. Barney quickly proclaims that this is boring. However, it can be seen as an improvement of their father-son relationship that Barney has agreed to go with them in the first place. Before that, he either forced his father to join him during his own usual activities (which are partying and hitting on chicks), or completely ignored him. Also, it has to be pointed out that, contrary to most other examples here, Barney is already an adult. His father went away early in his childhood, and therefore they have a lot to make up for.
* How I Met Your Mother when Barney goes to church after hearing he may have gotten one of his one-night stands pregnant:
* How I Met Your Mother when Barney says that, given the things he knows about Goliath National Bank, he'll never be fired, but that he might one day "wash up on shore with no fingerprints or teeth."
* How I Met Your Mother, when Barney's trying to convince Robin that her relationship with Gael (from Argentina) will fail, they start to implement this.
* How I Met Your Mother when born. Ted and The Mother also qualify as she only measures up to Ted's shoulder and she has to stand on her tiptoes to kiss him when he proposes to her.
* How I Met Your Mother whenever the gang gets into strip clubs or gay bars. He is still flattered by the attention of gays, though.
* How I Met Your Mother When he calls up the old classmate to gloat, the classmate is quite disturbed and says that Barney needs help.
* How I Met Your Mother, when he tries breaking up with Natalie by saying she's "not the one":
* How I Met Your Mother. When his mom finally found out the truth, she was relieved. Turns out she'd never been able to stand her fake daughter-in-law and grandson (with his annoying attempts at catch phrases) all these years.
* How I Met Your Mother, when Lily and Robin are accusing Ted of being the "dad" of the group:
* How I Met Your Mother, when Lily announces that she is pregnant, Barney immediately screams "I've never slept with that woman before in my life!"
* How I Met Your Mother, when Marshall looks into the background of Robin, he mentions that in addition to not being married, she's "not so good at parking legally."
* How I Met Your Mother, when Robin has a 40-year-old boyfriend who the narrator admits probably wasn't as outrageously old as the group imagined. In the show, the 40-year-old is played by a man in his 60's to demonstrate the exaggerated imagination.
* How I Met Your Mother: when Ted and Marshall got into a heavy argument while holding swords (long story), they start Flynning, but as their sword play gets more elaborate as they try fancy and ridiculous moves, the argument dissolves into "Dude, how awesome is this?"
* How I Met Your Mother: When Ted calls Barney the worst student in the episode "Robin 101", he answers that his teachers said he has "AD... something. Can we have class outside?"
* How I Met Your Mother when Ted finds out that Robin doesn't plan her life and out of the blue says she might want to go to Argentina. Robin, who is Canadian, doesn't think too highly of American geography education.
* How I Met Your Mother when Ted is dealing with the fact that he was left at the alter and is seemingly fine. Marshall tells him he should go crazy and let it out, perhaps even following his own advice from a time when Marshall and Lily were broken up. Marshall says he should have followed Ted's advice and should have set all Lily's stuff on fire.
* How I Met Your Mother, when Ted tries to teach Barney how to drive Barney panics and turns on the radio when he wants to stop (... when going three miles an hour,

to avoid hitting a dog about fifty feet away).
* How I Met Your Mother: When the audience is introduced to Barney's brother James, the two do an impromptu "fashion show" where he does a fake model strut including poses.
* How I Met Your Mother when the gang learn that Robin was a pop idol in Canada named Robin Sparkles. Although her singing career was in the mid-nineties, the music video they watch looks like it's from the mid-eighties. When Ted comments on this, Robin explains that the eighties didn't come to Canada until 1993.
* How I Met Your Mother, when the protagonists try to work out who Barney's stalker is, they're told to try to look inconspicuous, and Marshall immediately reacts by acting very strangely, having no idea what to do with his hands, etc.
* How I Met Your Mother. When they eventually find him, he turns out to be Lily's fertility doctor.
* How I Met Your Mother where Barney Stinson's gay, black half-brother James announces he's getting married, Barney is shocked and appalled. Not at gay marriage, but at his brother no longer being single. He and James basically functioned as one another's wingman so James' getting married means he won't be able to go along with Barney. However, Barney did become excited since James and his new husband showed serious interest in adoption and thus, allowing Barney to indulge in being an uncle.
* How I Met Your Mother, where Ted is outraged at a movie being about himself, his ex-fiancee Stella, and her ex-husband, from the perspective of the ex-husband, and caricaturing Ted as a sleazy villain.
* How I Met Your Mother which involved this. Predictably, Barney and Ted broke a lot of glasses.
* How I Met Your Mother, which is sometimes commented on. But the rest of the male cast is still above 6' and the other female cast member Robin is a fairly tall 5'9", which leaves Lily as often wearing high heels even when lounging around at home.
* How I Met Your Mother, which was designed to get women to leave in the morning, with everything from one pillow to a porn library to a toilet seat lid that automatically springs upward.
* How I Met Your Mother. While on a date, Ted and his date discover they'd gone out together two years prior, and it did not go well. One of her complaints was hinting to him how cold she was as they walked down the city streets, and he did not offer his coat.
* How I Met Your Mother who'd have to be broken up and the various issues the writers had to raise in the Ted/Robin relationship to explain these two single supposedly "perfect for each other" people not being together all these years) hadn't been developed yet. Additionally, the ending relied on the romantic trope of making a big "romantic gesture" and living happily ever after. Unfortunately, the long-running nature of the show meant it ultimately subverted this trope by having characters making these gestures repeatedly only to definitively not end up with the person they made the gesture to, thereby showing how it's definitely not guaranteed.
* How I Met Your Mother, who has a tendency to go way over the top with every one, as well as having an inability to back down from a challenge. In one episode, it's revealed he hired actors to play his fake wife and son for years so that his mother would be proud of him.
* How I Met Your Mother, who is then compelled to have sex with them. Ted and Robin's guy both succeed... and Barney is kicked out of his hook-ups apartment completely naked, in the middle of the night, in the streets of New York. He actually has an opportunity to put some clothes on when he comes across a rack of on-sale suits on the street, but deems them too low-quality, preferring to remain naked.
* How I Met Your Mother who loves hockey, scotch, cigars, guns, and other stereotypically "manly" things.
* How I Met Your Mother), who makes a lifestyle choice with which Barney initially disagrees. Said lifestyle choice being getting married instead of living the life

of promiscuity that Barney favors.
* How I Met Your Mother, who often lectures and bosses the others around when they're uncooperative or behaving stupidly, and always seems to be the go-to guy whenever anyone needs advice.
* How I Met Your Mother, whose reason for her second thoughts about marrying Marshall, and her subsequent decision to leave for San Francisco, is because she's been with him since her first day of college and doesn't know who she is outside of her relationship with him.
* How I Met Your Mother with four of the main characters each hiding in a different closet. The episode goes on to tell the story of three of the four sneaking around and hiding in Barney's various closets as they try not to be caught.
* How I Met Your Mother with Victoria, his first serious girlfriend in the series when she moves to Germany for a baking scholarship. Future!Ted tells us right from the start that long-distance relationships never work. Including theirs.

* how InuYasha still has his kotodama rosary in subsequent episodes of the anime despite it breaking into pieces and flying off earlier in the movie.
* How I Spent My Last Night On Earth is all about this- there's a rumor on the Internet that an asteroid will hit the Earth in a few hours, so the heroine finally finds the courage to confess her love to her crush. The rumor turns out to have been only a rumor in the end, but she and a lot of her friends are happy about it because they finally were able to do similar things.

* How I Survived My Summer Vacation has a rather puckish ghost that only the protagonist can see, who at one point congratulates the protagonist on being able to do this.
* how it addresses the issue of the lions being able to live in harmony with the other animals and be respected as benevolent kings, despite the fact that the former constantly hunt down and kill the latter. The film's explanation is that when lions die, their bodies fertilize the grass, which the herbivores eat, so they are all connected. There are several problems with this: firstly, grass doesn't decide when the lions die. Secondly, the amount of grass that one lion's body can fertilize is very small compared to the number of animals one lion eats in its lifetime. And thirdly, lions aren't the only animals that become fertilizer for grass when they die.

* How it works is the EX attack is charged by danger. The more enemies and bullets the are near you, the more awesome the Macross Missile Massacre is. It's effectively a smart bomb, and you use it to get you out of trouble. The game

encourages you to get in trouble and then use it. If you destroy an insane amount of enemies, and then collect the fruit from them, you can actually gain temporary invincibility. This is also as awesome as it sounds.
* How I Unleashed World War II Franek got conscripted right before the war and he's amazingly incompetent fighter. On the other hand, he survives the entire war, visiting most of its fronts, despite being a small-time crook with zero combat training or experience. His street smarts are probably his biggest asset.

* How Jack Sought The Golden Apples", the King is quite happy to see Jack and the Princess of Melvales getting together.
* How Jack Sought The Golden Apples: The king orders Jack executed for apparently trying to poison him with rotting gilded apples. However, he feels sorry about it afterwards, and he is overjoyed when the executioner tells him he didn't actually carry out the order.
* How Jack Sought The Golden Apples: The older brothers swap Jack's golden apples for their own gilded apples and present them to the king as their own. When Jack arrives, he's happy to see his father well, but wants to show that he also tried to cure him. Unable to bear Jack even getting a little affection, the brothers accuse him of trying to poison the king.
* How Jack Sought The Golden Apples: The two older princes originally manage to convince their father that they cured him and Jack tried to poison him. After the princess arrives, the truth comes out. Their father imprisons them.
* How Jack Sought The Golden Apples": When the two older princes convince him that Jack tried to poison him, the king orders the executioner to cut off Jack's head. However, the executioner takes pity on Jack and lets him go.

* How Loathsome, Nick — a drug dealer — tells a story of how three German men followed him around, using mind-control powers to mess with his perception until he shot them dead. How much of this was a hallucination caused by drugs, how much is the truth and how much is a lie is never explained.
* Howl of the Werewolf book; whilst (as the title suggests) it focuses on werewolves and the player character's transformation into one, it also features multiple encounters with humans afflicted with other wereforms, including the Werebat, Werebear, Wererat and the Werebeast (described as "part wolf, part bear"). It also features Were-Wargs (lycanthropes who died in their wolf form and were resurrected as undead, "trapped in a decaying semi-lupine form").

* Howl's Moving Castle does act as a Soul Jar, in that you destroy it, you destroy them.
* Howl's Moving Castle. Eventually, the castle itself becomes an example.
* Howl's Moving Castle gives a gender-flipped variant. The Witch of Waste enjoys pursing "dashing men" and loves that Howl runs from her. It makes it that much more fun to try to get his heart.
* Howl's Moving Castle has a subplot about two sisters, Martha and Lettie, who are apprenticed by their mother to a sorceress and a bakery respectively, but switch places because each would prefer what the other's been given. They're not identical, but Martha concentrates on learning enough magic to disguise herself as Lettie and vice versa, and then they switch. (After the deception is revealed, the sorceress admits that the disguise never fooled her since it was based on one of her own spells, but she let it pass because she figured a girl that determined to learn should be given the chance.)
* Howl's Moving Castle heartless flirt, pursuing women passionately and then losing interest after they give in. Sophie does notice when this behavior starts to change; she just totally fails to realize that she's the reason.
* Howl's Moving Castle. He's generally more mature than his mentor, Howl, and yet still young enough to freak when a girl threatens to clean his room.
* Howl's Moving Castle: Howl and Sophie meet when two soldiers hit on Sophie. Howl uses his magic to send them away. It gets better when Howl takes to the air in order to save both of them from the blob-men of the Witch of the Waste.
* Howl's Moving Castle, Howl draws a magical diagram on the floor in chalk when preparing to change one of the castle real-world endpoints to become the house next to the hat shop.
* Howl's Moving Castle Howl sells his heart to a demon in exchange for more magical power.
* Howl's Moving Castle: Howl's night-black bird-monster form is said to be wrecking his soul, even when he does have a good reason to fight.
* Howl's Moving Castle. If she tries to, she's either interrupted or people misunderstand her.
* Howl's Moving Castle is explicitly only able to stand up because of magic. When the magic was taken out of the "castle," it immediately collapsed under its own weight.
* Howl's Moving Castle: It has been pointed out by Sophie and other characters that Howl cannot write in a way that another human being could read.
* Howl's Moving Castle. It's not clear when Sophie realizes the strange young

wizard is Howl himself.
* Howl's Moving Castle it that way — but Sophie cleans up after him nonetheless.
* Howl's Moving Castle, Madame Suliman holds Sophie's stepfather (whom she's never met) hostage, forcing Sophie's mother to betray her by planting a Peeping Bug in the castle.
* Howl's Moving Castle may be an example. There is no narration explicitly telling us that war is coming, but soon after the opening of the film we see a big parade of troops, tanks, and flying machines moving through the city to cheering crowds, and we overhear conversations on the street about rising tensions with a neighbouring kingdom over a missing prince.
* Howl's Moving Castle on which it was loosely based) the structure is maintained by the wizard's magic. Moreover, the kingdoms of the world which the film takes place actively make use of witches and wizards to fight in wars, in addition to more standard weapons and tactics.
* Howl's Moving Castle. Poor old Sophie has to clean up the whole thing.
* Howl's Moving Castle, Sophie doesn't notice that the spell that makes her look like an old woman is gradually weakening over time as her self-confidence increases.
* Howl's Moving Castle, Sophie is a teenager who ends up trapped in the body of an old woman because of a curse.
* Howl's Moving Castle: Sophie (middle-class) and Howl (famous wizard).
* Howl's Moving Castle, Sophie's curse is eventually undone but she still retains the silver hair color from her old woman transformation. This is VERY different from the book, where she was restored completely.

* Howl's Moving Castle, the Witch of the Waste manages to survive her Immortality Failure, only to age, shrink, and become completely senile.
* Howl's Moving Castle: The Witch of the Waste's love interest is the wizard Howl, who tries to escape from her in fear.
* Howl's Moving Castle transforms into and out of his bird form, the experience gets more painful and difficult.
* Howl's Moving Castle, where the first guy Sophie met was Howl. Howl, on the other hand, has met several other women.
* Howl's Moving Castle, which he declares is his gift to her. The gesture works and Sophie even changes back into her younger self for the longest time yet in the film—until she realizes that the reason Howl is doing this is that he's about to leave.
* Howl's Moving Castle, which then got an English dub in the USA that got released back in the United Kingdom.
* Howl's Moving Castle with him. This trope is played with through most of the movie, with Howl continuing to protect Sophie as necessary and Sophie looking after Howl throughout and ultimately giving him his heart back saving him from dying.
* Howl's Moving Castle with the seven-league boots. Sophie only wants to travel a short distance, so she wears just one boot (to go three and a half leagues) and walks round two sides of a triangle. Then she has to backtrack when she overshoots.

* How Luthor Met Superboy accidentally destroys his life-creating experiment. Since Lex cannot admit that his scientific breakthrough became lost forever because he is a clumsy idiot wo could not even think of writing the formula down, he convinces himself that Superboy destroyed it intentionally to "crush his greatness", and swears revenge.

* How Luthor Met Superboy, a teenager Lex Luthor achieves to create an artificial lifeform after countless experiments... but apparently he never thought of noting the formula down, since he rants about being unable to replicate his experiment when the formula is accidentally destroyed.
* How Luthor Met Superboy begins when Superboy is about to meet Luthor, and suddenly a Kryptonite meteorite suddenly crashes next to him. Later, Superboy tests Luthor's Kryptonite antidote by streaking up into outer space until finding a Kryptonite meteor swarm.
* How Luthor Met Superboy for a lab accident and started hating him. Nonetheless, before the accident Lex was already showing subtle hints of the kind of hubris, jealousy and hair-trigger temper which led him to become a villain.
* How Luthor Met Superboy he has been slighted, raising his fist heavenwards and yelling Superboy will regret "betraying" him.
* How Luthor Met Superboy. However, when a fire destroyed his lab, Lex unjustly accused Superboy of starting the fire out of jealousy. From that point on, Lex started blaming everything bad happened to him on Superboy until he got obsessed with getting revenge on that "treacherous, glory-stealer alien who was ruining his life"... and the rest is history.
* How Luthor Met Superboy into a Kryptonite death trap. As Superboy is lying in agony, Lex leans over Superboy to gloat while waving a flask of Kryptonite antidote over his face. Superboy quickly exploits Lex's arrogance, snatches the flask from his hands and swallows the antidote.
* How Luthor Met Superboy into his lab, completely clueless to the fact that his former friend now wants to murder him, Lex presses a button on his deks and the panel slids upwards, letting the rock bathe Superboy in lethal radiation.
* How Luthor Met Superboy, Lex and Superboy become friends. Unfortunately, Superboy accidentally destroys Lex's breakthrough discovery as putting out a fire which was burning Lex's lab down, and Lex becomes convinced that Superboy did it on purpose because he was jealous from his genius. Superboy tries to calm him down, but he eventually stops trying to change Lex's mind because he realizes that Lex will never believe him due to his arrogance and guilt-pushing attitude. Meanwhile, Lex's obsession with getting back at Superboy quickly escalates from being a dick to planning a murder.
* How Luthor Met Superboy saved Lex from. Nonetheless, Lex blamed Superboy for the fire which destroyed his most important experiment, and the rest is history.
* How Luthor Met Superboy, so he breathe in a powerful gust of air, causing Lex to drop the flask right on Superboy's face, who hurries to suck in the antidote.
* Howl, where it appears that the transformation into a werewolf is one-way and gradual.
* Howl: While stories of becoming a werewolf upon being bitten by one are definitely not unheard of, this take on the trope plays it out more like a zombie outbreak, slowly causing an apparently permanent transformation and turning the humans into feral predators who'll eat their loved ones and former allies alive.

* How Music Works: The Science and Psychology of Beautiful Sounds, from Beethoven to the Beatles and Beyond, composer John Powell explains how before standardization in 1939, the notes found on Western instruments were different from city to city, meaning for example, that an "A" in London would be more like an "A flat" in Milan and a "B flat" in Weimar. He imagines in a scene in 1803 in which Anton Schwarz, a famous German singer, meets Luigi Streptococci, a famous Italian singer, in a pub in Bolton and they have one of these until both are kicked out by the pub's manager because neither is singing in tune with his piano. "No wonder we used to have so many European wars in those days."
* How Music Works: The Science and Psychology of Beautiful Sounds, from Beethoven to the Beatles and Beyond, etc.) puts down the idea that vinyl/record music somehow sounds better than CDs almost entirely to this, stating that "Much of the CD/vinyl debate can probably be attributed to technology nostalgia, which dates back to cave-dwellers having heated arguments about the superiority of bronze arrow heads compared with the newfangled iron ones." He points to a study of 160 enthusiasts of either CDs or vinyl, in which only 4 could accurately and reliably identify which they were listening to. He notes that with this study having been done back in 1993 (the book was published in 2010), further improvements in technology have made it even more impossible to tell the difference.

* How the Grinch Stole Christmas! one is done in an extremely nasty way during the "You're A Mean One Mr Grinch" musical number, the "You have termites in your smile" line and we are treated to a closeup of his mouth and we see his teeth which have bugs crawling around in them.
* How the Grinch Stole Christmas! one of the things sucked up by the Grinch's large vacuum tube is a large cat, which the vacuum then blows out into his face. A few scenes later the cat reappears, this time jumping onto the Grinch himself.
* How the Grinch Stole Christmas!, one waiter serves a tray containing another waiter, and so on, until a tiny one gives a strawberry to Cindy Lou Who.
* How the Grinch Stole Christmas!: Played with. The Whos are having fun on Christmas and the Grinch, who hates Christmas, tries to make it a sad Christmas by stealing all their presents and food, but they're happy anyway because they can still sing, so the Grinch decides it's better to just give everything back.

* How the Grinch Stole Christmas! she caused a minor scandal by appearing nude in their video for "Make Me Wanna Die" - when she was only sixteen. She has since quit acting altogether and focused on her music, stating she "doesn't fucking care" about being a good role model.
* How the Grinch Stole Christmas!'s mother Jean Speegle Howard, "who loved Christmas the most".
* How the Grinch Stole Christmas!) than in the original, especially Cindy Lou, who gets half the movie to herself and has far less makeup than the other Whos, making her look even more human than the rest of them. Partly explainable as an attempt to stretch a short children's book into a feature length movie.
* How the Grinch Stole Christmas!. The Dr. Seuss estate rejected him, but then Carrey broke out of that character and did a Grinch impersonation that got him the role.
* How the Grinch Stole Christmas!, the eponymous character ends up being ejected from a garbage chute, ricocheting off a drum, pulling a banner like a slingshot, and landing with his face in the cleavage of Martha Mae Whovie. "Hello, Martha."
* How the Grinch Stole Christmas! the eponymous character is shown stuffing the PO boxes of various residents of Whoville with traditionally unwanted bits of mail. Along with jury duty notices, he throws in blackmail letters, pink slips, junk mail, chain letters, and eviction notices.
* How the Grinch Stole Christmas!, the Grinch cuts an enormous hole in a plate-glass window with his sharp fingertips. And instead of using a suction cup device to remove the cut-out piece, he sucks on the glass with his mouth.
* How the Grinch Stole Christmas!, the Grinch describes a "noisy game" the Whos play called Zoozittacarzay, which is "a roller-skate type of lacrosse and croquet".
* How the Grinch Stole Christmas!, the Grinch gets into an argument with his echo and ends it by saying "I'm an idiot." His echo responds with "You're an idiot." Twice.
* How the Grinch Stole Christmas!, The Grinch is force fed desserts by the townsfolk for a taste contest. He seems more receptive to the fudge than the pudding.
* How the Grinch Stole Christmas!, the Grinch is subjected to sampling holiday foods, a Christmas sweater that's loud, kitschy, and has about as many lights as a Christmas tree. The worst of all takes place when Mayor Augustus May-Who gives the Grinch hair clippers so the Grinch can get a haircut. This brings back painful childhood memories, and the Grinch gives May-Who a haircut instead.
* How the Grinch Stole Christmas!, the Grinch sees he has no messages on his answering machine and checks his outgoing:
* How the Grinch Stole Christmas!, their whole society is on a speck of dust.
* How the Grinch Stole Christmas!, the Narrator is a separate being disconnected from the rest of the cast. In the stage musical, the Narrator is an elderly Max, essentially turning the story into a flashback from his perspective.
* How the Grinch Stole Christmas!, then switch back (by mistake?) for a few shots, then stay blue.
* How the Grinch Stole Christmas!, the race-card version of this trope is used. The Grinch tries to hail a taxi, but it speeds on by, and the Grinch screams to the air that it's just because he's green.
* How the Grinch Stole Christmas!, the title character at one point winds up flying face-first into the bosom of his childhood crush. Without removing his head from her chest, he quickly greets her with the words, "Hello, Martha."
* How the Grinch Stole Christmas!: The title character uses the "Is your refrigerator running?" prank on an innocent Who.
* How the Grinch Stole Christmas!. They're also given ugly and gaudy outfits to match them being portrayed as more greedy and materialistic.
* How the Grinch Stole Christmas! this trope by giving a child a "present" (a saw) and telling them, "Be sure to run real fast with it!"
* How the Grinch Stole Christmas! to catch the slipping sled only to fall short and land face-first in the snow behind it.
* How the Grinch Stole Christmas! use his signature made-up words. In the cartoon,

with the bet no longer an issue, entire verses are added with the names in full effect.
* How the Grinch Stole Christmas! was also this, not only because he was also a recluse. Seuss's house and studio were on a hill in California and, every Christmas, would look down with disdain upon the houses covered in cheesy lights and decorations below him. Even more significantly, the Grinch mentions that "for fifty-three years I've put up with it now"; Seuss was 53 when he wrote the book.
* How the Grinch Stole Christmas!, where he was just nasty and the Whos represented the spirit of Christmas in its purest form.
* How the Grinch Stole Christmas!, where the Grinch is caught off guard for a moment before coming up with a cover story.
* How the Grinch Stole Christmas!: While not evil in the way of some of these examples, the Grinch started out as an ill-intentioned Santa-impersonator.
* how the Headless Horse could see anypony, and where his brain was kept. Later, Scootaloo reasons that despite Rainbow's claims, it can't eat her because it doesn't have a mouth, but notes that the idea of a headless being is still really scary.
* How the hell does a stream of water explode from hitting a barrage of sharp leaves?
* How the Light Gets In a glass of wine, only for Sara to flip out insisting with the trauma she's been through, that's unacceptably cruel. Dean eventually settles on this:
* How the Light Gets In. As far as Dean's concerned, even after they accepted her, they still considered her an outsider. In the present, she and Diggle even talk about it.
* How the Light Gets In been resurrected at some point. Sara and Dean even comment on it.
* How the Light Gets In, found the idea of rotting in a coffin horrifying, and was worried about the effects embalming fluid would have on the environment. Her parents, unfortunately had other ideas (see below).
* How the Light Gets In go to get it, and when Dean asks if they can go home now, Laurel gets upset.
* How the Light Gets In. Laurel eventually namedrops it, though Dean fervently denies it.
* How the Light Gets In. Once this is over, Dean (who has minor injuries) asks if she's hurt. Nyssa just chuckles, clearly finding the question ludicrous. Dean takes that as answer enough and moves on.
* How the Light Gets In: Sam and Dean at one point talk about when Laurel was in recovery in the hospital (but didn't want her family to know), and Sara decided that Dean "killed her, chopped her up, and dissolved her body in acid in the bathtub."
* How the Light Gets In see one another as the perfect parent; and, due to long-standing insecurities and self-loathing, they see themselves as wholly unworthy of the other's love, and as a mediocre (at best) parent.
* How the Light Gets In the trigger where she finally turned her life around and started to get better, but the attempt is a permanent source of shame for her and left a mark on her marriage.
* How the Light Gets In: Turns out Joanna and Laurel briefly dated in law school, and in fact, Joanna was in love with Laurel. The romantic relationship is over, but they remain best friends. (Until Laurel's death and resurrection at least).
* How the marines can get such clear photos of the Straw Hats (and other, decidedly less friendly pirates) so quickly is usually glossed over; Oda eventually invented
* How the Marquis Got His Coat Back out of an urge to compete with Peregrine.
* How the Marquis Got His Coat Back: The Marquis begins the story chained to pole in the middle of a room that is slowly filling with water.
* How the middle of Westeros sees Dorne; they are regarded as different and less civilized. Not unlike the North, weirdly enough. The fact that they have a different skin tone and have more relaxed cultural norms in terms of sexuality and

class doesn't help matters. When Tywin and Cersei try to invoke this to Oberyn though, the latter quickly points out the hypocrisy of the Lannisters, whose fame and power comes from vicious atrocities, in calling other people savage, especially since the Queen's daughter is living in Dorne and engaged to the Martells' youngest son.
* How the Mighty Have Fallen: A wealthy, popular character is now poor and unpopular.
* How the Mighty Have Fallen: This guy once had everything. Now he has nothing.
* How the Other Half Loves centers on two dinner visits by the same boss to his two employees on subsequent evenings — acted out simultaneously on stage.
* How the Otsutsuki Clan resurrects themselves through the use of Kama.
* How the Paladin Got His Scar. All of the Southern Continent was once under the control of the Ancient Empire, before it splintered into the modern countries (including Azure City, where much of the plot takes place). No one knows why they called themselves the Ancient Empire.
* How The Paladin Got His Scar, Gin-Jun spends a fair amount of time explaining why he doesn't believe in this when facing hobgoblins. Ultimately, all hobgoblins are part of an evil society, worshipping the Dark One, and therefore they're all legitimate targets.
* How the relationship between Jaune and Pyrrha starts. Unaware of Pyrrha's
* How The Rhino Got Its Skin is about this — the reason the rhinoceros' skin is all wrinkly is because some other animals filled it with sand when he took it off to go swimming.
* How the Scarecrow Died has a boy's grandma brutally murder the school bully for picking on her grandson.
* How the Season 2 finale ends after Miss Cackle's brief but emotional speech, expressing that they are "one magical family". It was led by Beatrice Bunch (Ynez Williams) and Mildred Hubble (Bella Ramsey) along with her mum, Julie Hubble (Nicola Stephenson).
* How The Six Made Their Way In The World: One of the Soldier's servants has the ability to blow gale-force winds, and uses it to repel a troop of the king's soldiers at the end.
* How the story ends for James's Victreebel. He traded it to the Magikarp Salesman for a Weepinbel. That one evolved and turned its eating habits on Jessie, who had Arbok blast it off. The Magikarp Salesman kicked the first one out at the same time, for the same reason. They bumped into each other, fell in love, and lived
* How the Test Was Won", Bart fills in the bubbles to write "slurp my snot" on a practice test for the upcoming Vice President's Assessment Test.
* how the two can be enemies now that the one person keeping them friends, Elliot, is now dead.
* How the West Was Won follows the Prescott family and the next three generations of their descendants from 1839 to 1889 as they move increasingly further west to the Pacific Ocean.
* How the West Was Won, the settlers (including mountain man Linus Rawlings) triumph over a gang of Indian rustlers that nearly robbed them, or worse than merely robbed them. As the survivors burn the casualties in a massive funeral pyre, Zebulon and his party offer this humble prayer to the Most High:
* how they got together, as Eddie covered Joe's shifts at the precinct so he and Iris could be with the comatose Barry, and Iris decided to thank him with a cup of coffee one day — things just spiraled from there. When explaining to Iris why he was breaking up with her, Eddie straight up tells her that (much like the John Diggle example above) there have always been three people in their relationship: him, her, and Barry. And as much as he would have liked to believe otherwise, he knows that when it really comes down to it, Iris will never choose him over Barry. He just thought he could love her enough to change that.
* how they view Stain and said ideals is how they play around with this trope.
* how This does vary per person as they infect more characters, with one vampire revealing that her mortal self actually suppressed alot of evil tendencies and embraced the vampiricism to finally indulge in them.

* How this rules-lawyering still managed to be honorable as far as the Clans were concerned can be explained by the explanation given by the Clanner who called the previous coin-flip. His reasoning is along the lines of: "What if it had landed on its edge? Think of the
* How Thor Should Have Ended instead of go back to Asgard and fight Loki.
* HowToBasic. Common steps include: Punching baby dolls, smashing eggs, rubbing food all over your naked body and making a mess of your house.
* HowToBasic delves into this sometimes. For example, the instructions on how to make beef jerky included dropping a generous amount of pre-packaged beef jerky into the mess.
* HowToBasic. He quickly gets fed up and just throws it into the trash.
* HowToBasic in all of his videos. The public doesn't know Mr. Basic's identity because his face is never shown.

* How to be a mostly consists of really bad puns substituting for connections between things.
* How To Be A Normal Person novel about a man named Gustavo meeting an asexual stoner named Casey.
* How to Be a Perfect Person in Just Three Days, Milo, the main character who is too young to drive, tries to back his brother's car out of the garage to clean it. He puts the car in gear, looks carefully over his shoulder, hits the gas, and drives forward all the way through the garage wall.
* How To Be A Pirate, Hiccup trips a Monstrous Strangulator dragon into poisoning itself with its own venom. The Strangulator (under the impression that it has poisoned Hiccup) tells him the symptoms of the venom, not realising that it is going through them itself until it's too late.
* How To Be A Pokémon Master and Misty, as well as having feelings for Brock. Misty starts a relationship with another woman named Dianne, but she has lingering feelings for Ash and Brock. Professor Oak gets into a situation involving Ash, Delia, and Drayden. Gary admits to having feelings for Ash when he almost rapes him. May likes Ash, nearly has sex with Dianne, and eventually ends up with Gary.
* How to Be: Art's parents, due to their own upbringing, have no idea of how to connect to Art or, seemingly, to each other.
* How to Be a Superhero) and a politician (as you can disappear at any time without accountability).
* How to Be a Superhero and trying to explain away the smell by claiming to have had 'an accident' in his pants.
* How to Be a Superhero as an inevitable effect of super-heroics, due to the hero's slip-ups:
* How to Be a Superhero by offering them a better benefit package than the villain.
* How to Be a Superhero has lots of jokes about why having stretching powers will make you very popular with the ladies.
* How to Be a Superhero in the section addressing aquatic superpowers. There's no places to conquer or rob underwater, so there isn't much point to underwater superheroes.
* How to Be a Superhero, in which a sidekick explains away rope burns from a

supervillain hostage situation to his teacher as him and his adopted father "getting into some really rough stuff." Naturally, this doesn't help the situation.
* How to Be a Superhero lists this as one of the downsides of having a corporate sponsor:
* How to Be a Superhero; no matter how well-meaning your significant other is, she's not going to understand superheroic issues like cleaning alien hell-slime off your costume.
* How to Be a Superhero offers several examples and recommendations, most notably The Castrator, a man in spiked body armor who wields a bloody chainsaw.
* How to Be a Superhero warns the would-be superhero about putting his name to merchandise without checking its safety, citing such previous PR disasters as Captain Feline and Blackie the Wonder-Cat's "Kitty-Fun" playsets (a variety of ways for a child to torture a cat) and the Mr Inferno dressing-up kit (one costume, one bottle of kerosene, one box of matches)
* How to be a. The sample reasoning mostly consists of really bad puns substituting for connections between things.
* How To Beat The High Cost Of Living is about about three suburban housewives who, in order to beat inflation and subsidize their alimony checks, plot to steal $1 million from a large plastic ball which is displayed in a local shopping center.
* How To Beat The High Cost Of Living plan and carry out a robbery because, thanks to the recession (this was set in the late 1970s), all of them are in financial straits for various reasons.
* How to Be a Villain, its guide to weapons contains books of evil, which more or less fit this trope perfectly.
* How to be a Werewolf, and she can only help the body restore itself to its natural state; her powers do not work on ailments such as cancer.
* How to be a Werewolf. Elias's goal and the point of the story is for her to embrace her powers and her werewolf side so that she can live life outside her incredibly small comfort zone.
* How to be a Werewolf. Malaya's parents are an American man and a Filipina woman, but the father is a small coffee shop owner, while the mother is a scientist with a strong degree. Both seem on roughly equal footing in household matters.
* How to be a Werewolf pairings like their parents is actually not an uncommon pairing.
* How to be a Werewolf. The night of Marin's graduation, she made it clear the feeling was mutual.
* How to become immortal?; once the method is stopped or reversed, they either die or become mortal again.
* How to Be Indie: According to "How To Keep Your Cool In A Heat Wave", Evil Cousin Rubi takes these very seriously. She even has a hand-tooled fighting pillow.
* How to Be Indie, as the best friend of the Indian-Canadian protagonist.
* How to Be Indie had the printers leave a decimal point out of the price on a poster, advertising a lunch that costs hundreds of dollars.
* How to Be Indie). He eyes fall on the sugar cellar on the table he declares the president is 'Gary Sugarthing'.
* How to Be Indie: In "How to be Mehta", Indie gets an F in gym. She uses this phrase when she tries to ask her siblings how she should break the news to their parents. They are not fooled for a second.
* How to Be Indie: In "How to Put Your Best Foot Forward", Indy is wearing her brother's AJ's hand-me-down shirt that is way too back for her. Marlon says "The Western hemisphere called. It wants its shirt back".
* How to Be Indie uses idiosyncratic establishing shots formed of what look like cardboard cutouts of the relevant buildings that rise up to show the transition to a new location.
* How to Boil Water the EASY Way, a humorous-but-serious account of how autism can affect self-care skills.
* How to Break a Family. Arthur is convinced to see a prostitute but is turned off when it turns out she's only fourteen. He finds out a moment later that she's his sister Kate. The two were separated when their parents divorced fourteen years

prior.
* How to Build an Antimatter Rocket for Interstellar Missions. miles long (700 km). This is necessitated by the need for lots and lots of room both for storing antimatter and for a rocket fueled by it.
* How to Build a Robot Army warns that if you use remote robots to explore a pyramid, any curses you incur will probably still attach to the operator rather than the 'bot.
* How to Care for Your Monster, in which children were shown how to treat classic monsters as essentially pets.
* How to Catch a Cold: After the man uses sports as an analogy for the immune system, the man initially gets sidetracked and says, "Hooray!", but then he realises that the man is implying he might catch a serious disease.
* How to Catch a Cold: At one point, the man holds his finger to his nose to prevent a sneeze.

* How to Get Away with Murder, and the character shown to be alive in that scene was the corpse.
* How to Get Away with Murder: Connor Walsh and Oliver Hampton are an item. While neither have stereotypically gay mannerisms, Oliver is shown to enjoy "gay" music.
* How to Get Away with Murder (drama series about an infamous attorney/law professor and her student assistants, the main central character is a bisexual woman, additionally there are two gay main characters and a bisexual female main character; subject matter includes queer male romance)
* How to Get Away with Murder is an aw-shucks well-meaning type who rides a bike to Annalise Keating's law class, a class where most of the students are already cocky backstabbers. To give it context, one of his fellows has already prostituted himself for evidence by the end of the pilot. It should be noted, though, that after a short speech by the professor near the end of the episode, he does his best to shed his naivety.
* How to Get Away with Murder, Laurel speaks to her father in both English and Spanish and then later speaks to her mother primarily in French. Her actress, Karla Souza, is fluent in all three languages.
* How to Get Away with Murder pretty much runs on this. Every character is sooner rather than later a murderer, a murder accomplice, committing crimes to cover up the murder, framing somebody else for murder, framing themselves for murder committing crimes to get out of said framing or otherwise doing very bad things to hide a very bad thing they did in the past. And since the web of lies is ever expanding in severity and number of people involved, every time there's more people willing to do worse things to get out of trouble.
* How to Get Away with Murder's push for more ethnic diversity was paying off.
* How to Get Away with Murder: uses this constantly, flashing forwards to the aftermath of a brutal murder, then back to show how it eventually happened, with the events syncing up in the middle of the first season. Season two appears to be doing the same thing.
* How to Get Married… by Me, the Bride, a picture book, by Sally Lloyd Jones and Sue Heap.
* How to Get Rid of Cellulite, the protagonists plan to get rid of a body by cutting it up, tying it up to weather balloons, and allowing them to float across the border. They first test the method using beef with GPS locators.
* How to Get Suspended and Influence People are food disaster hobbyists and gave their son the middle name "Noside."
* How to Help Your Friend Through the Mourning Process When His Imaginary Friend Gets Crushed by an Anvil
* How to Hero and alien invasions and time travel shenanigans (which makes sense considering it parodies superheroes and their stories and staples).
* How to Hero at one point when discussing the pros and cons of having a retired superhero for a mentor, mentions a new-fangled villain who has a giant vacuum that sucks up cars and compares them to an old-fangled villain who had a giant vacuum that sucked up horses and buggies and notes that the lessons learned from the older case are completely irrelevant to this newer case.
* How to Hero claims that if you don't know where the local supervillain bar is in your city, then you're not doing your job well.

* How to Hero claims that supervillains love to turn people into living bombs.
* How to Hero discusses talking animals in its entry on pets and alien pets.
* How to Hero discusses these frequently. In their entry on alien invasions, there's an entire paragraph discussing how to work the invasion to your advantage so you can secure one of these. The entry on space battles also talks about them and introduces Dirty Denny's Starship Dealership.
* How to Hero discusses this concept in their guide to maintaining a secret identity.
* How to Hero features a colony of werewolves that live on one of Jupiter's moons.
* How to Hero features a few of these. Generally as nameless archetypes such as "dark mages" or "evil wizards." Potentially your local village mystic might turn out to be one.
* How to Hero has a guide for heroes who want/need to operate in Hell. It includes methods of getting in, getting out, and dealing with Greg the Skeleton King if you run into him.
* How to Hero has an entry on Old Immortals who wish they could die and tips on how to do just that.
* How to Hero invokes this word for word in their guide to summoning ghosts.
* How to Hero is chock full of magical and mystical elements. From werewolf colonies on Jupiter's moons to the Ogre-Achievers, a team of superhero ogres to the fact that the guide takes for granted the fact that everybody has at least one mystic living in their town, there's certainly no shortage of fantasy elements here.
* How to Hero lists red eyes as a surefire indicator that someone is an evil clone.
* How to Hero mentions an old doll from the 1830s that leaks black liquid from its eyes as a potential superhero weakness.
* How to Hero recommends setting traps with peanut butter if you're looking to catch a demon.
* How to Hero riffs on this concept when the guide reminds its readers that "if you’ve got great powers you’re basically morally responsible to do lots of good stuff with them." The parenthetical voice then asks any readers with a catchier way of saying that to send them a telegram.
* How to Hero's entry on zombies presents a whole slew of different kinds of zombies. The author of the guide also repeatedly claims that his greatest fear is zombie grasshoppers. Since they're small, they can jump, and you'll never see them coming.
* How to Hero's list of reasons to change your codename, the hero formerly known as The Flaming Dick is mentioned under the reason "The evolution of language has resulted in your codename now having unfortunate implications" he now goes by "The Combustible Detective."
* How to Hero. To sum up, the guide breaks down legacy characters into four categories: Family members, sidekicks all grown up, state-sponsored legacies, and complete strangers who just take someone's established identity and run with it after they're gone.
* How to Hero, who believe that all monsters are evil, are just one more villain for the superhero to stop.
* How to Hide an Unwanted Erection uses a lot of euphemisms, and ends like this: "Congratulations. You've tamed your trouser snake. Your love gun is firmly in its holster. Excalibur is back in its scabbard. Now you can approach any situation with confidence, safe in the knowledge that no one will be able to see your big, fat, throbbing penis."
