* In a complete inversion of the phenomenon which hit fidget spinners, there are many regular toys aimed at children (including ones specifically made for babies) which are used by people of various ages in order to get their fidgeting under control - for example, anything with moving parts may simply be contorted into

random positions by an adult with anxiety, rather than being played with by a kid in whatever way was intended by the manufacturer. Toys which are soft, are scented, light up, or make noise are particularly popular among those with sensory issues.

* In Act III chapter 23, Apoch and Astreal become this to Ahakon, to the extent that they try to isolate him from Yukari completely and actually try to kill her no less than twice; after the second attempt, which nearly got Ahakon himself killed, Ahakon dumps them for Yukari, partially because of their violent actions, partially because of his own growing feelings for Yukari, and partially because he felt guilty that they were both sharing him. On top of it all, Ruby, being Apoch and Astreal's boss, explicitly forbids them from having any more boyfriends for a while, stating that their actions prove that they're not ready for such a thing yet.
* In Act III chapter 24, when Apoch and Astreal regain consciousness after getting beaten up by Inner Moka, they're instantly terrified at the sight of her and scream about how she's going to kill them. As Inner Moka points out, they have little room to talk, considering the fact that the entire reason Inner Moka beat then up in the first place is because they tried to kill Yukari. Additionally, in Act III chapter 23, they remark that they distrust Yukari to be around Ahakon because she "never learns and chases after those who are taken," and when their actions cause Ahakon to break up with them in favor of Yukari, they themselves spend the rest of the fic chasing after Ahakon, who is now already taken, and even try to seduce him and steal him back at least once.

* In Act III chapter 44, this is Kokoa's word-for-word reaction upon the revelation that Akua and Kahlua are working for Fairy Tale and have been all along.
* In Act III chapter 46, after dismissing the possibility that Akua and Kahlua are Fairy Tale agents, Kou proceeds to explain to the headmaster that the Chrono Displacement spell that Fairy Tale stole from the Shuzen estate was stored in a secret archive that only Issa and his daughters knew about. As soon as those words are out of his mouth, Kou realizes that the only way Fairy Tale could possibly have known about the archive, let alone the spell, is if Akua and Kahlua were working for them.

* In actuality, controlling one's ki is important to several real-life martial arts disciplines, therefore the supernatural part isn't the ki itself, but rather how it's being used (a classic facet of wuxia). One of the best demonstrations of this was when Gohan taught Videl how to fly: while Videl was highly skeptical at first, she was able to learn to harness her own ki relatively quickly because of her own martial arts training.
* In actuality, most if not all sports have a rule in the books that prevents a

* In actuality Rimmer never dated Lise, Lister just implanted his own memories into Rimmer’s brain as a gift.
* In actuality, that is the modern impression of them. To the Romans, the Praetorian Guard were a bunch of overpaid and duplicitous thugs who couldn't stand up to a legion that had actual combat experience. See, unlike modern elite troops, there weren't any actual military prerequisites to join the guard. You just had to be an Italian with Roman citizenship. For Italians interested in joining the army, it would be like choosing between going to Afganistan or working at a base in America and getting paid 50% more and having a shorter enlistment requirement. Incidentally, this led to the army becoming more and more provincial over time, and more often the soldiers were the sons of soldiers from military colonies (Augustus royally fucked up when he created the guard). On the other hand, they usually ended up surprising everyone by being just as effective as regular legions when civil war broke out, such as at the above-mentioned Bedriacum.
* In actuality that tactic (often called mouse-holing) predates both of the previous examples. According to
* In Act VI chapter 13, Kyouko insists that Talon can't be evil because he's targeting those who were part of Fairy Tale... and then remembers that since Dark, Akua, and Kahlua are ex-Fairy Tale agents themselves, they're on Talon's hit list too.

* In addition, because there weren't anywhere near as many Hurricanes available as Spitfires, some long shots of Hurricane squadrons in flight are actually the '109s after a quick repainting.
* In addition, being an assassin seems to be the occupation of choice in Travis's world. It's a highly glamorized job with lots of good publicity; most of the people Travis meets are either assassins, trying to be assassins, or working directly with one. Considering the sheer numbers of these guys and the impressive hits they accomplish (the moment someone acquires any sort of fame, a rival will send an assassin to kill him or her, unless that someone is an assassin or has hired one as a bodyguard), it's a wonder there's anyone left.

* In addition, even if you believe you can be hypnotized, you cannot be commanded to do things you are unwilling to do consciously. A man might be able to be hypnotized into thinking an orange is a apple, but if he believes stealing is wrong, there is no way you can force him to take money out of a wallet without permission. Theoretically he can be made to believe that the wallet is his own, but this depends on the skills of the hypnotist and the susceptibility of the subject.

* In addition, many more mounts are available as various rewards in the game plus various flying mounts, plus constant new additions available and a variety of limited edition and promotional ones. Wolves, dinosaurs, giant bats, giant lizards, ostriches, dragons, big cats, sheep, pretty much all bases are covered somewhere.
* In addition, many of the above threats are highly mobile and strike with little advance warning. It's easier to get a Mover capable of transporting a few hundred Capes to the site of an Endbringer attack on an hour's notice (and for decades, having that much lead time was actually considered a great success for the early warning systems) than it is to transport a brigade of soldiers and all their equipment in that same timeframe. The most powerful force in the world is useless if you can't get it to the battlefield on time - and with things like Endbringers, if you don't repel them in a matter of hours, there likely won't be anything left of whatever you're ostensibly trying to protect, whether you 'win' the fight or not.
* In addition, many of the cast member commentaries are hilarious, full of affectionate jabs at each other (particularly when Bruce Boxleitner and Jerry Doyle are involved). But the funniest moment of all is the one in "Interludes and Examinations" where Boxleitner apparently realises for the first time ever while doing the commentary
* In addition, many supposed superheroes and costumed vigilantes show little compunction about killing. The Dark Avenger and the Lamplighter are two of the better known examples, but far from the only ones. This isn't even considering 'heroes' like Jack Rabbit or Iron Mike, who are basically thugs and thieves pretending to be heroes.
* In addition, Max and Michelle used to live in a house across the river on the Jersey side, just before things went straight to hell for the both of them.
* In addition, Melissa Joan Hart's sisters Alexandra and Samantha guest-starred on the final season.

* In addition, the Axis powers treated their fighter pilots like warriors, keeping them in battle where they could do the most damage. By contrast, the Allies treated their fighters like soldiers: those who excelled in air combat were often pulled from combat duty to become
* In addition, the Big Daddies that protect the Little Sisters also have these eyes (or at least it looks so, given the portholes in their diving helmets glow). The Little Sisters can't harm you. If you hit a Big Daddy with a stray shot, though, they won't stop chasing you until you or they are dead.
* In addition, the chief source of meat in the Imperium is the Grox, a large, rather ill-tempered lizard-like creature.
* In addition, the chips are one single denomination, rather than the vast amount of denominations used by US cash.
* In addition, the Cybermen have been vulnerable to emotions in several appearances.
* In addition, the dragons may be ruled by Bahamut — although a figure from Hebrew and Middle Eastern mythology, Japanese media borrows the name as it was used in
* In addition, the end of the Mind Games arc sees Diamond Tiara transform into a Nightmare, but as a result of Discord's psychological manipulation and breaking of her spirit rather than a facet of herself consuming her. Her theme is Discord's brand of chaos, and she earns a certain eight-pointed star symbol
* In addition, the flashback sequences often feature popular music that likely
* In addition, the full name of Aaronev Wilhelm Sturmvoraus' only son is Aaronev Tarvek Sturmvoraus, though he is generally only referred to as Tarvek to avoid

confusion.
* In addition, the game has many different story routes, and none of them are really "canon" or "non-canon"; what you personally played is what happened in your game. Therefore, it's easy to make a case in which the character is sympathetic if you only take into account the Pacifist run, but equally easy to argue for them being a villain if you only take into account a Genocide run, and the lines only get blurrier the more routes you take into account, in what order, and how many. Not too mention that it's difficult to say how much of the player's actions on any route
* In addition, the Hyuga clan is split between a small head family and several branch families; if the Hyuga head has multiple children, then only one inherits a position in the head house, with the rest relegated to forming their own branch houses.
* In addition, their life support has almost run out, and they are suffering from carbon dioxide poisoning (actually portrayed correctly — it's not lack of oxygen but rather excess carbon dioxide that the damaged life support system isn't able to remove). The carbon dioxide levels are ALMOST but not quite fatal, so they are already in pretty bad shape when they open the canopy.
* In addition, thematic arcs showed up in the classic series: season 18 concerned the theme of entropy and decay, in preparation for the regeneration in the final episode; and each serial of season 20 involved the return of a classic enemy, building up to the movie-length special
* In addition, the original actors performed a live version of "We Are Number One" and also released a video of all the individual components making up the song. All of this was done to keep the memes flowing.
* In addition, the outdoor elements impact a home field as much as the fence dimensions. Dodger Stadium in Los Angeles is enveloped at night by the Pacific Ocean's marine layer, making it more difficult for fly balls to penetrate it for distance than a neutral park, giving the advantage to pitching, which is why the Dodgers are typically near or at the top of the league in fewest runs allowed every year. On the flip side, Coors Field in Colorado is a mile above sea level, and the thin air exponentially boosts fly balls to incredible degrees, even with the somewhat deep field dimensions. This, in effect, has turned the Colorado Rockies franchise into baseball's perpetual
* In addition, there are a couple of video games based on the franchise in which underwear is the representative of SpongeBob's health. There's even one where you see them come off and he covers himself.

* In addition, these rules apply to Hermetic magic and only Hermetic magic. Other forms of magic exist in the setting, and even Hermetic mages often have access to

some quirky abilities that violate the rules. Hermetic magic is uniquely powerful for two reasons: one, the sheer breadth of its verb/object format, which allows for virtually any effect that doesn't run up against the limits of Bonisagus' theory, and two, the jealously-guarded knowledge of the Parma Magica,

* In addition to being the focus of some episodes, this occasionally comes up as part of the backstory of a guest character, usually to explain some aspect of the character's situation or personality. In the most memorable example, a teenage girl who had been raped and pimped out by her biological father has lost her capacity to care about or empathize with anyone, to the point where she actively coerces her

boyfriend into raping her adoptive sister (the reasons for which are never explained).

* In addition to formations and players, a team may have a 'philosophy' in terms of how they choose to attack. Example of this in the modern sport are a team deciding to play defensive and then counter-attack with fast players, or to hold the ball at all costs in order to give them the best chance of creating a shooting chance.
* In addition to fossils, there are many extraordinary creatures which survived to recent enough times to have potentially influenced mythology and oral traditions of people, perhaps even providing the initial basis for creatures that would appear in tales thousands of years later. For instance there was Megalania, the perhaps 20 foot long giant monitor lizard that likely still lived when humans first colonized Australia. What's more it's living relative the Komodo dragon was once more widespread on many islands in the Pacific, and word of mouth of encounters with them could have added credibility to tales of dragons. Additionally, before widespread hunting, abnormally large individuals of living species of crocodiles, pythons and other creatures were more common and could have gained mythic status depending on who encountered them and how. Notably, many of the oldest stories/versions of dragons simply depict them as looking like very large snakes, with things like wings and fire breath being later additions.

* In addition, while looking for Scott after he "abducted" Charlie, the police arrest about a dozen Santas.
* In addition, while the show correctly predicted the prevalence of cell phones in the future, the phones themselves look more like cell phones from the late 90s when the show was made. The creators even admit in one episode's commentary that they did not predict how cell phones would shrink. If it helps any, you can think of them as satellite phones (which have shrunk, but not nearly as much) instead. This goes double when they somehow continue to work at the bottom of those vast glass-and-steel canyons where the signal from an ordinary tower would be almost indistinguishable from background radiation.
* In addition, while the "slow-as-molasses" turtle stereotype is played laughingly straight in the candle-blowing scene, in flashback Master Oogway hands Tai Lung his family jewels

Is it possible so many have been fooled for so long?" Pycelle (speaking in a normal tone) admits even he can't believe it works so well. Knowing that, you can see in season 4 Tywin glancing about when Pycelle is speaking as if asking himself "Seriously?
* In a deleted scene from that same episode, April takes advantage of her husband's global ignorance by taking him to a random patch of land and claiming that it is Four Corners (where Arizona, New Mexico, Utah, and Colorado meet), presumably to avoid having to drive out of their way to the actual place. Andy happily jumps back and forth across the imaginary state boundaries, excitedly shouting that he's in states like Arizona and Nebraska, that don't even border each other in real life.
* In a deleted scene, Superman and Lois share some suggestive dialogue...
* In a deleted scene that can be found in the script, this is taken literally, with Bruce reporting on how (with the help of his powers), two pandas are mating. Did we mention they were both males?
* In a deleted subplot that involved a Wampa running loose inside Echo Base before the Rebels managed to trap it in a side room, there's a literal interpretation of the trope name in the form of a

* In a dialogue with Rose of Sharon Cassidy, the Courier says that he doesn't know what a fish is. Fishes are not extinct in the Fallout universe (in game, some can even be found in Lake Mead), but considering that someone would not know what a fish is, it implies that they are at least at risk of extinction.
* In a different chapter, a demoness who is tied to a particular family attempts to interfere with a pair of newlyweds (one of whom is from the family in question), hoping to prevent them from ever consummating their marriage and siring an heir...but the demoness is 1. somewhat backward (she is rather surprised by the concepts of both birth control and sex before marriage) and 2. extremely pent-up (her entire existence is based around interrupting sex, so she's got years of "dirty thoughts" built up in her head). The couple invites her to join in the wedding night, and she quite happily agrees.
* In a different episode based around a heat wave, Garfield fills a kiddie pool with water, goes to put the hose away, and then jumps in...only for all the water to have completely evaporated in the interim.
* In a different episode, Bubbles gets a very powerful giant monster to leave town by asking it nicely after Blossom and Buttercup's alternating strategies (tactics vs. full frontal assault) don't work. Bubbles then turns on her bickering sisters:
* In a different episode, Cindy runs into the kitchen asking Alice if she has seen her pet lizard that escaped its box. Through a clenched-teeth smile, Alice answers, "Yes I have. He's over there." Camera zooms out to reveal that Alice is standing on the table.

* In a different episode Principal Skinner found a Kick Me sign on his back.
* In a different episode, Quagmire said he would like to see Meg without her hat on. He starts to pull her hat off, but a green hand reaches from under Meg's hair to pull the hat back down.
* In a different episode, Ray declares that if his kids were caught sneaking out

after dark, they would be grounded until they're his age. Subverted in the end when he only gives Otto three weeks of garbage duty.
* In a different episode, Togusa is able to quickly load a bullet containing an electronic tracer into his revolver and fire it into the bumper of a fleeing vehicle. He uses a similar trick in the first movie, with another character pointing out that, had he been using the standard issue semi, he could have planted
* In a different message, Cave tells the subjects to be alert for a chemical reaction that might vitrify their frontal lobes after passing through an Emancipation Grill — and also to not think about that reaction, because thinking about it induces it as well.
* In a different scene near the beginning of Kid/Coco's route, You attempts to make Kid laugh off his amnesia. If you refuse to do so, she'll resort to... sticking her finger up Sara's nose. Sara proceeds to moan sensually as "she and her senpai become one."

* In a different vein, Peridot is introduced as a technician on a routine assignment, and her inflections and expression border on mechanical. In subsequent appearances, she gets rather amusingly flustered when others meddle in her business ("I'M REPORTING THIS!"), and she becomes slowly unhinged
* in a different, which predated even the movie itself, there is a justification for this explained by Han Solo to Luke Skywalker.
* In A Different World, Kim briefly dates Freddie's (white) cousin Matthew. Kim has no problem being with him, she just doesn't want to be judged by her classmates at her all-black school so she avoids being affectionate with him in public. Matthew points out that they're going to get looks regardless of where they are or what they do so they should just focus on being together and not worry about what other people think.
* In "A Dingo Ate My Dutch Baby," the dish for the second round is bangers and mash. The first sabotage is as follows: force both opponents to take turns standing guard, meaning only one can cook at a time while the other stands guard. Whoever stood in the guard house had to wear the British Royal Guard hat.
* In a "Dirk Niblick" animated segment, siblings Fluff and Fold have three dollars to spend on birthday presents for a set of quadruplets, and they estimate that their four toys cost the full three dollars. However, because Fluff has rounded her prices up and Fold has rounded his prices down, they are four cents short.

* In a downplayed and nonspecific example, many actors playing villainous or otherwise despicable characters find it difficult to flip between being chummy with their costars offset but general assholes onset. Such actors will typically keep their distance from the rest of the cast, interacting with them as little as possible.
* In a downplayed example (because it doesn't actually happen in a shower itself): when a very minor earthquake happens (note this takes place in San Francisco and the sisters have lived there all their lives, so they should have some knowledge on how to handle these), Phoebe, who was taking a shower at the time, freaks out so over-exaggeratedly that she runs naked out of the shower into the house. When her sisters later make fun of her because of her freak-out and how that made her run around naked, she retorts with:

* In "Adventures in the Sin Trade", a flashback to back when Xena was an evil warlord showed that she once tried to assassinate Cyane, the Queen of the Amazons, while Cyane was getting a naked massage. Cyane nearly effortlessly kicked her ass, and even stole Xena's clothes and put them on.
* In "Adventures on Telly, Part III", the dogs (riding the deflated Earth) zoom past an asteroid with a sign. Bad Bob claims the sign reads "You are now entering a black hole, please drive carefully", while Wendy says it is "Dogs must be kept on a leash." You have to freeze frame to see what it really says.
* Inadvertent Entrance Cue: Circumstances conspire to describe an absent character, who then fortuitously appears.
* inadvertently (and tragically/ironically) caused the death of Sirius, a semester under the stubby thumb of Umbridge and the entire school refusing to believe what he saw... it was only a matter of time that he should explode quite messily. He may be a wizard, but he's still human.

* In a FedEx Super Bowl commercial, a caveman is fired from his job for not using FedEx (which doesn't exist yet) and in frustration kicks a small dinosaur out of his way. He is immediately stepped on by a giant dinosaur.
* In a feminine-hygiene ad, some blindfolded women try to identify the rhinoceros standing between them. Their guesses are all inanimate objects, based entirely on the shape of its body parts that are seen on screen ("It's a rope", "It's a pillar", etc). None of them notice that it smells like a big freakin' animal, that it's warm to the touch, or that
* In a few cases, the police brushed off missing people as runaways, even in places where active serials killers operated.
* In a few comments and the stories written from Holmes' own perspective, it's revealed that Watson intentionally leaves elements he noticed himself out of the stories just to make the reveal at the end more surprising to the reader, a practice that greatly annoyed Holmes.

* In Afghanistan a sailor got in trouble for writing "Highjack [sic] this, Fags!" on a bomb to be dropped. The sailor got in trouble because an AP photographer was standing there. This kind of thing was very common during World War II.
* In Afghanistan the Russians tended to *use* it carrying only four-man fireteam elements, but this was due entirely to the inadvisability of hanging around under heavy fire. It could carry a full eight-man squad, making it quite comparable to the Blackhawk or Huey. Its anti-tank armament was somewhat lacking, though; as designed, it had launch rails for only four antitank missiles, compared to the sixteen even an old AH1-T could carry. It did have stub wings with four hardpoints that in theory could carry an astonishing variety of heavy ordnance but which in the field frequently got UM57 57mm dumb rocket launchers bolted on, because Soviet airmobile doctrine envisioned using the transport helicopter in a secondary direct-fire fire-support role as a sort of flying Katyusha artillery rocket launcher. They got a whole lot deadlier when more powerful 80mm rockets with FAE warheads were installed.
* In a fight Syaoran Li will kick damn near anything from a giant icicle blade, big muscular guy with superhuman strength granted by magic to a God Bird Thing.

* In a first season episode, Dan and Roseanne have just learned that Becky's crush will be working at the bowling alley that they're going to. Leading to this exchange:
* In a first season episode, Iroh gets struck by natural lightning. He isn't injured by it (managing to use his technique to redirect lightning), but nevertheless ends up with the usual comedic charring and hair on end.
* In a first-season episode, Jessica solves a murder by realizing that the police Lieutenant who was investigating the murder dismissed a spot where a framed item had been removed as having been nothing more than a family picture could only have known that if he had been inside the home prior to being summoned, as the victim's daughter had removed the picture as soon as she found her father dead. Except that he could have potentially learned that from the various people who were in the house when the body was discovered. This is a bit downplayed, though, as the Lieutenant does not think to offer this excuse and instead pulls a gun — the murder weapon — on Jessica, who (after he is disarmed) acknowledges is the only real piece of evidence.
* In a first season episode Lilith shows up having found a note Frasier left for her a year ago asking to get back together. When Frasier explains that he no longer feels that way Lilith attempts to excuse herself so she can leave with dignity but the straps of her purse get caught in the door. She has to sheepishly ring the doorbell to free it.
* In a first-season episode, Nabiki gives aspirin to Ryōga in the middle of his first on-screen challenge fight with Ranma, and tells him that they're basically instant steroids. Ryōga, who is not the sharpest spoon in the drawer, believes her and upon taking them gets a psychosomatic boost to his already monstrous strength, allowing him to pull telephone poles from the ground simply because he thinks he is on steroids (which don't even work that way).
* In a first season episode, Phoebe learns that their handyman Leo is essentially an Angel. She tells her sisters by the end of the episode but they don't believe that Leo is magical, which is odd considering that they are themselves are witches...
* In a first-season episode, Rogue confronts Apocalypse. He hits her with an energy blast that blows back, then shreds then vaporizes her jacket. Rogue being '90s Rogue, and this being a) a kid's show and b) the Marvel Universe where pretty much everyone uses
* In a first season episode "The Woman in the Car", when the kidnapper sends one of a boy's fingers as a warning, Brennan is too upset to pursue the case, because she's not prepared for living victims whose lives are still in danger. Booth calms her down by pointing out the mistake the kidnapper made — sending evidence to the best forensics team in the country.
* In "A Fish Called Selma", some mobsters are surprised to see Troy McClure in a restaurant.
* In "A Fish Called Selma", when Selma confronts Troy McClure and demands to know if he married her simply to boost his career, he admits it quickly, and actually convinces her, at least for a while, that being a sham wife isn't so bad. (What actually makes her have second thoughts at the end is the idea of having a child; getting a child involved in a sham marriage
* In "A Fish Out Of Water", Peter is depressed that he lost his job and has gained so much weight that he's an immobile blob on the couch. As he's getting his bath, Peter decides to drop the weight and do something with his life. Within the next scene, he's back at his usual size without anyone ever mentioning about his former

weight problem.
* In a fission nuclear reactor particles routinely travel faster than light. ...Well faster than the speed of light in water. Light isn't the fastest thing around when it isn't going through a vacuum.

* In a flashback, a young Elias survived thanks to two mobsters trying to make this easier for themselves. They have been ordered to kill Elias but do not want the hassle of having to get his body out of the city to a burial site. Instead, they trick Elias into driving with them out to the woods where they can kill him and bury his body. Elias is savvy enough to realize what is going on and ends up killing the two mobsters instead. He then buries their bodies in the hole that was meant for him.
* In a flashback, Dagny, as a teenager, mentions to (also teenager) Francisco d'Anconia that she never studies but still gets straight A grades, and asks him if she should get D's just to be popular. Francisco is so disgusted he slaps her face hard enough to cause her to bleed out of the corner of her mouth.
* In a flashback episode Marge's original engagement ring is repossessed, and Homer is so ashamed at being unable to provide for her that he leaves her, but continues to mail her money with no return address. When she finally manages to track him down to the crummy fast food place he's working at he re-proposes with an onion ring. Marge is touched, but
* In a flashback episode, when she first leaves Primatech, Meredith refers to her daughter by name, 'Claire', who she believed died in a fire at 18 months old. Even if Primatech knew that Meredith had named her 'Claire' (in reality, it's not even clear that Primatech knew Meredith was Claire's mother at all), why would they retain it? Calling Claire a different name would have made it much harder for Meredith to find her (or vice versa).
* In a flashback, Father's original form was shown to be a tiny, shadowy ball in a flask that was able to manifest a single eye and mouth. In chapter ninety-seven,

* In a hilarious moment, just before the final fight with Tai Lung, Po is given a pep talk from his adoptive father — and just when it seems Mr. Ping is about to admit that the panda is not his biological son (presumably to suggest he doesn't have to limit himself to a future in noodle-making), he instead reveals the secret ingredient of his special recipe. To clarify: the
* In a hilarious take on the trope, Conan once went with the Detective Boys to watch a movie, and was seated between Ayumi and Ai. Halfway through the movie, both girls fell asleep on his shoulders, putting him an incredibly awkward situation, as he needed to go to the bathroom at that moment, and couldn't bring himself to stand up and wake them.
* In a historical example, Emperor Pelagius II inherited an empire devastated by war and famine, and almost completely broke. To solve the issue, he dismissed all of the senior leaders of the Imperial government including the Elder Council and only allowed them to have their jobs back if they paid a steep fee. In the short term, this worked to fill the Empire's coffers, but in the long term, it cost him many advisors who were "rich in wisdom, but poor in gold." He would later be assassinated by a vengeful former council member.

* In a Japanese Panasonic commercial, George Lucas muses about exploring the universe while Darth Vader ignites his red lightsaber and moves closer to his right side, accompanied by two Stormtroopers. To George's left is Chewbacca, and in front are two Ewoks. Chewbacca looks to Darth Vader, who turns off his lightsaber, as George raises his right hand to shield his eyes from the brightness of the immense Panasonic dish looming over the terrain. A blue stream of energy hits the dish while two red lasers circle its circumference, arcing around the blue stream of energy. George levitates a glowing egg shaped object from his right hand to his left, stating, "Panasonic. Itsumo something new."
* In a joke from Communist Eastern Europe, a man is so desperate he tries to get into prison. At first, he tries by stealing bread from a (state-run) bakery — but the employees just pity him, knowing well enough how much it sucks to be hungry. Then he goes to a bookshop and steals the collected works of Marx and Engels — but the employees are glad to finally get rid of those doorstops. Now he is so desperate he walks into a party meeting and shouts: "Down with Communism!" After which he gets reprimanded: "Are you crazy? Can you imagine what would have happened to you

* In a later book of the manga, the "Kunoichi" Konatsu has to use a fake sword because he had pawned his metal sword. And he's deadly with it.
* In a later book, when the crew is searching for a treasure in a temple, the last chamber contains an empty pedestal next to some broken glass. Wax realizes that this was only meant to look like a robbery when he measures the broken glass, and finds that if the glass case was reassembled, it would be too big to fit on the pedestal.
* In a later chapter Lulianne does this immediately before turning her sword on
* In a later chapter, Sonic jokingly offers Shadow a chili dog in exchange for explaining what he meant by a suspected insult, to which Shadow asks how he can even eat those. Sonic explains that he just bites, chews, and swallows.
* In a later chapter, when Ash is relaxing on Cinnabar's hot springs when he overhears three guys trying to peep on the women's side while his female companions are bathing. Fortunately,
* In a later chapter, Widow is the one who wakes up Jade, who shouts "Variable

speed muffins!" Much to Widow's confusion.
* In a later comic, again with Star Man, Star Man declared that he knew about Popularity Power and how it would allow him to defeat anyone. However, he immediately forfeits when he finds out he's slated to battle against the bigger Fan Favorite, Shadow Man.
* In a later comic, Corey (playing Luke) refers to Wedge (who Corey believes will backstab him) and Biggs (who speaks like a stereotypical American southerner) as "the yokel and the psychopath". Wedge argues that he's not a yokel, and Biggs argues that
* In a later comic Superman is fighting Doomsday again and almost dies. This time
* In a later confrontation with the same attacker, Dora casually grabs Faye's ass, much to the latter's irritation. When asked why, Dora's response is that if she's going to die, she'd rather die happy.
* In a later discussion, one of the players is talking about whether to split 8s against an Ace. This
* In a later episode a childhood friend of Wolfram's who considers them engaged due to similar circumstances appears, and Yuuri falls for the knife trick again, only this time he also accidentally points a spork at the challenger, which formally indicates that you have stolen someone's lover and intend to fight for them. Wolfram is touched.
* In a later episode, a child was abducted (a child belonging to a woman that Patrick Jane previously scammed as a fake psychic), with a balloon animal left behind, which was the mark of a serial child abductor/killer known as the "balloon killer" who had previously abducted and killed two boys, and within eight hours murdered them. However, upon raiding the balloon killer's house and shooting him in a fierce firefight, the balloon killer implies that

* In a later episode of the series, the Eurondans show a distinct dislike for Teal'c, not because he's a Jaffa (a perfectly good reason considering what the Goa'uld do), but because he's dark-skinned.
* In a later episode of the series, we see Rachel's spoiled little sister Jill. Her father cut off after she bought a boat for a friend with his money, and told her to go learn how to be responsible from "the one daughter he's proud of" (Rachel), who has become an independent career woman instead of the shallow spoiled princess she was early in the series. Of course, Dr. Green doesn't seem to notice his parenting might be why all his daughters turned out that way.
* In a later episode, Paige begins to orb every time she sneezes after catching a cold.
* In a later episode, Pam sets up her Indian American pediatrician with her Indian American co-worker Kelly. She insists she paired them up not because they were the same race but because she wants to get Kelly out of her destructive relationship with Ryan.

* In a later episode, we learn that while his twin brother Edwin may be merely a
* In a later episode, we see Francine trying to make it through her first fast during Yom Kippur. When she gets hungry midway through the day, she tries to watch TV only to see a cooking show about sweet rolls, a commercial for a chicken restaurant, and then a sitcom with a girl eating sloppy joes. Instead of watching TV, Francine decides reading is a better option, only to be confronted by books including "Food of the Gods", "Breakfast at Tiffany's", and "Who Moved My Cheese?" She picks "Little Dorrit" by Charles Dickens, only to be confronted by a paragraph on roast beef.
* In a later episode, we see he can turn himself inside out (but can't turn himself outside in).
* In a later episode, we see the setup for one of Chandler's, but never get to hear the punchline. He tells Joey to mention firetrucks the next time they see each other, resulting in Joey trying to salvage an awkward conversation by yelling "FIRETRUCKS!" out of nowhere, making it even more awkward.
* In a later episode, when Al moved out of the neighborhood, they held a parade to celebrate.
* In a later episode, when asked why, after so long, Lisa still has a thing for Nelson, she begins by insisting she doesn't... to gushing out how
* In a later episode, when low-flying planes are causing items to fall to the floor, Marge runs around trying to save them. Then she turns and sees:
* In a later episode, when she recounts this, Chandler mentions that he once walked in on his parents and a man having a threesome.
* In a later episode, when some Men of the Nights Watch say something about "let them die, we'll have less enemies", Stannis again mutters "fewer".
* In a later episode, when the Others have handcuffed Kate, Tom gives her aloe for the cuts and irritation on her wrists.

* In a later issue, The Judge appears out of thin air to inform Death that he is about to die. And also that he is actually not Death at all, just delusional. It

takes him more words to tell him this than the entire word count of the previous two issues combined. Leading to a
* In a later manga episode, Kou finds a love letter in her desk, again addressed to Kagami. It passes through Hiyori's hands to Tsukasa, who delivers it to Kagami (not without some teasing from their older sisters).
* In a later mission in Ace Combat 5, Nagase does the same thing with a SAM that was targeting you. She ejects in time, and the next mission is to rescue her.
* In a later mission they wore obscuring robes to hide their identity. They were found out because they had the full uniform, including unit insignia, underneath.
* In a later novel, Det. Bert Kling's fiancée is killed (along with a bunch of other bystanders) in a seemingly random shooting. As soon as this is known, the narration notes that from that point every cop in city was working on this case, regardless of what cases they were officially assigned to.
* In a later novel in that 'multiverse' it is explained that both happened. It is the only extant known occurrence of a timeline splitting where the protagonists could see it. The actual split? Whether or not the kitten would make a noise.
* In a later novel Lando Calrissian finds out the worst way that Thrawn's decision paid out: when he tried the same manouver used by Luke, he was tractored in, as the man Thrawn promoted succeeded in his task.
* In a later quest where you get a much more reliable set of weapons to fit each combat type. One of the Vyrelords helping you even comments the previous weapon is a complete joke and could be snapped with no effort. So not only it's subverted but possibly averted too.
* In a later scene, after Meg returns home from prison (she had been sentenced to jail for harboring a fugitive), she repeatedly rapes Peter, first by deciding to share his shower.
* In a later scene at a diner, when Violet is taken to see her love interest Tony as a surprise, Violet is

* In a later scene, Peyton and his girlfriend are at a local carnival where he spots a milk bottle toss and wants to
* In a later scene, R.J. Fletcher gives a penny to a panhandler, who thanks him sincerely. It turns out that the penny was extremely rare and valuable, so the panhandler was able to sell it for enough money to buy several shares in the station Fletcher was trying to close down.
* In a later scene, Thief is unimpressed with a so-called dark, mysterious woods the party has entered, and makes an aside remark about having seen "darker wood in Elf porn." It's enough to make Black Mage projectile-vomit in the background. His analogy certainly didn't help matters... or the readers' sanity...
* In a later scene to escape from a building-soon-to-be-destroyed, despite having superhuman augmented cyborg arms that can shatter concrete and don't feel pain, he STILL throws a chair at a window (which bounces off instead of breaking it outright) before going out of it, because his fist would leave a small, well...fist-sized hole instead of the larger one he would need to jump through. In-universe, this makes sense — most of the windows seem much thicker than modern-day windows, and after going headfirst through an intact one, Adam probably wanted to weaken it first.
* In a later scene, when Elle takes Emmett clothes shopping, she comments about how she loves shopping for men and "watching them change right before my eyes"... just as Emmett is trying on some things in the dressing room.
* In a later scene when Karen points out to Plankton what might happen if SpongeBob and Patrick succeed in retrieving Neptune's crown from Shell City, and how Plankton can be easily implicated for its theft:
* In a later season, a woman in late forties/early fifties who is sort of friends with the group gets married to a guy who all thought to be gay. She claims they

sleep together and that they have hot sex, but Carrie and co are not buying it. She later gets pregnant.
* In a later season, Bart and Lisa use an old camera to take a picture of a forest fire for a contest to see what will go on the cover of the new phone book. When Marge develops the roll of film, she finds an old picture of toddler Bart and Lisa sharing a toilet. That one wins the contest.
* In a later season coinciding with Donald Trump actually visiting Argentina for the G20 Summit:
* In a later season, Daphne gives Niles a photo, one he wrongfully assumes to be her nipple. It turns out to be his father Martin's nipple in the picture, and the immediate dialogue from Martin includes considering chicken
* In a later season Ross starts dating one of his college students. He acknowledges there's an age gap and it looks as if Joey's about to do the maths for him again but this time he reaches a different conclusion.
* In a later season Roz volunteers as an elf and develops a crush on the Santa Claus she's paired with. At first she assumes she's attracted to
* In a later season, Sheldon is forced to work with a colleague he doesn't like. When he discovers that the other guy's work is more advanced than his, he is humiliated. The other guy says it's understandable since Sheldon has a girlfriend to distract him. Sheldon goes along with the assumption, but unfortunately now the colleague wants to hear details...which Sheldon is far too clueless to provide. Hilarity ensues.
* In a later sequel, John Alucard has his own slant on reclaiming the terms: he prefers "leech" or "viper" to "Undead American" because people
* In a later series Craig's identical twin brother Steve suffers an equally sudden death, accidentally shooting himself with a gun Psycho Paul told him wasn't loaded while preparing to rescue Moz's dad.
* In a later series, Joey gets an attractive model as his roommate after Chandler moves in with Monica, who turns out to not be attracted to him at all, but he isn't convinced. They do end up getting together a few episodes later, but then she suddenly reveals she can't stand Chandler and Monica, which breaks them up.
* In a later series, Slaughter is put in charge of an elite force called the Renegades, who he trains even harder. (The Renegades are a group of mostly-reformed thugs who need serious discipline to work with the Joes.)
* In a later story, Bladedancer's girlfriend, Molly (a.k.a. "Gateway"), decides to summon up a trickster spirit to punish a notorious bully for messing with her friends. She was fortunate indeed to stipulate that it not cause him actual harm, else the karmic debt might have gotten loaded onto her in turn.
* In a later storyline, Calvin modified the duplicator so the clone would only be of his good side (in Calvin's words, "a total sap" who lives to make everyone's life easier). Unfortunately, the clone liked Susie far too much for the original Calvin's liking, and spontaneously disappears in the ensuing fight due to the "moral compromise spectral release phantasmatron" reverting the good clone back to an abstraction. According to Hobbes, Calvin might be the only person whose

* In a late season two episode, the entire kingdom is put under a sleeping spell. Arthur finds Guinevere on the floor, moves her to a bed and watches her for a few moments. Extra points for brushing a curl off her face.
* In a late-series episode, the Amoeba Boys discover that they can multiply and use this ability to steal all the oranges in Townsville. Everyone gets scurvy as a result.
* In Albania, the simultaneous collapse of a number of pyramid schemes subsequently collapsed the government as well. Demonstrations by people who'd lost their life savings quickly turned to riots, and the government called out its troops to put these riots down. However, those troops were all related to the rioters and many of them had also been burned in the pyramid schemes, so they joined the rioters. Among other chaotic incidents in the state of total anarchy that ensued, some of these deserters actually robbed a bank with a
* In Alberta, Canada, there was an incident in the 1960s where an older man married a young widow so that she'd have someone to support her and her four children. This was seen as an admirable act of charity.
* In a less accidental and more awesome example, the authors at White Wolf added "
* In a less charming example, Vorik infects B'Elanna with his own Pon Farr to extort her into sleeping with him. This being B'Elanna, he gets a richly deserved beating for it.
* In a less depressing and more black comedy scene in Episode 5 inside the red path, Kotonoha reveals to Sekai in a private conversation that she was planning to kill Makoto's new lover (who was actually Sekai) and herself with a knife, but backs off because Otome (the girl Kotonoha believed was the lover) was stronger and taller than her so she would've been easily subdued before she could reach Otome's neck with the knife.
* In a less epic vein, oysters, and the pearls they generate. For a long time this was thought to be caused by grit in the shell, but this has long since been scientifically proven false, the pearl actually forms around parasites and worms inside the oyster, which it forms in order to contain them. There's even one particularly famous pearl with a fish skeleton as its core. The idea that pearls form around sand grains still pops up a lot in media.
* In a less evil sense, there are the laser fences on the field. Which are about waist high, and often positioned in a way where, even if your characters forget how they were jumping around like lunatics during their photon arts, may still be easily bypassed by either climbing over the control panel used to open them, or in some cases, just stepping around it onto a slightly higher part of the staircase than you'd normally use.
* In a less forceful example, Suzu has literally pushed Matsuri into doing things he's not comfortable with, including making real friends with Yayo and Lu and going to lunch with Ninokuru and Ponosuke, the latter of which she does while carrying Shirogane along (though both manage to weasel out of it regardless).
* In a less gruesome version, many Asian sweatshops will hold onto their workers' first month's paycheck until they're given permission to leave their jobs, which in

practice happens very rarely. While workers aren't technically prevented from quitting, they have to sacrifice an entire month's wages to do so, and the suggestion that they
* In a less literal example, Harry finally masters a difficult spell when facing the prospect of playing chase with a dragon. He quips that now they know what to do the next time he has trouble with a spell.
* In a less literal sense, Clark often says something along the lines of this to people who think

* In all US court jurisdictions, there is a general rule that hearsay statements (statements made outside of the testimony of the current trial used to prove the truth of the matter asserted) are inadmissible. There are plenty of exceptions to the hearsay rule that allow certain types of out of court statements into evidence. One of the exceptions is the opposing party statement, where a statement by the plaintiff or the defendant can be used by the other party. In many jurisdictions, an opposing party statement is defined by the law as not hearsay, even though something being not-hearsay makes it just as admissible as if the statement constitutes an exception to the hearsay rule.
* In all versions, clerics avert the "squishy" part of the trope. Up until 3.5, they're able to wear heavy armor like fighters, while in 4th and 5th editions they can still wear up to medium armor (and about half of 5th Edition cleric specializations gain heavy armor proficiency at first level).
* In "All You Can Eat", Junior starts going by the name "CJ" instead of "Cleveland Junior", saying that many famous people only go by one name, such as Madonna and Hitler. Roberta takes offense to Junior comparing himself to someone as disgusting and scummy as
* In almost all cases where the city's defenses failed it's major weak point was the city's harbor and the walls facing towards the sea, which were by far the shortest and easily overrun.
* In almost all games, Slow is one of few effects that reliably works on enemies and bosses, which makes it one of the overall most useful status debuffs throughout the series.
* In almost any episode where the Simpsons leave Springfield, their destination is the Theme Park Version. Notable examples include France, Australia, and New York City, but the standout is Capital City, the state capital of The Simpsons' unnamed state that functions as a combined Theme Park Version of New York and Los Angeles, meant to invoke classic Big City tropes.
* In almost any game, a player who has minimal or no contact with actual members of the armed services who makes a character in the service will often make one of these. The remainder will be
* In almost any light novel with a "standard" isekai setting, the main character will die after being hit by a truck, generally attempting to save someone else in the process. The actual mechanics by which the main character is transported to another world or reborn are generally handwaved. This is parodied early on in
* In almost any mid-sized Northeastern or Midwestern city, Italian is the lingua franca for crime syndicates.
* In almost any tag team match between heels and faces, the heel team will do something to get the face outside the ring to come after them. 99% of the time the face falls for it and gets the ref's attention, allowing the bad guys to double team his poor partner.

Fox" than "we want a disabled character and if the actor's the same it'll tug at the heartstrings all the more." Which is pretty awesome when you think about it.
* In "A Lot of Hot!", Donkey obtains a massive lemon for the purposes of making lemonade, even though Duck Duck's plan calls for only one regular-sized lemon. It quickly becomes clear that there's no way she can use it - it's bigger than herself.
* In a lot of strategy games where the enemy has any chance at all of outnumbering your forces, you usually have two options.
* In a lot of the later episodes, even the background shots of the suburbs and the town are very clearly 3D.
* In a lot of work situations this is standard for new hires. Rather than just hand someone manuals and expect them to figure it all out on their own, they'll assign someone experienced to teach them and answer any questions.
* In a low-atmosphere example, SG-1 used a ring transporter to beam out a Kull warrior they couldn't stop otherwise. His death was presumably messy.
* In a lower-tech example, at one point Talon Karrde hides from Thrawn by hiding behind an asteroid on the understanding that if they so much as turn on their engines while the Star Destroyer is still there, they
* In alphabetical order. Being immortal in a universe that allows time travel, it's actually entirely possible for him to do so. (Assuming he really is going in order, he's worked his way through about 15% of the task when we meet him!)
* In Alpha Complex itself, Internal Security tortures people for information.
* In Alpha Legion Chaos Space Marines specifically mitigate this trope by having no centralized leadership. In the tabletop, this translate to the opponent being forced to kill every character in the army before they can earn a victory point for

assassinating the leaders. In the lore, thanks to a

* In Alphascape, Omega concludes that a humanoid form is insufficient, assimilating Omega-M and F into a multi-armed form resembling the Omega Weapon.
* In Al'Sahra, the Eld Witch's daughters cursed the land to burn forever. The Eld Witch killed Princess Shahrazad the day after she was crowned, and Lyra is tormented with nightmares of what happened.
* In Altara, a man gifts a woman a knife as a proposal of marriage and says that if she is displeased with him she may use it to kill him. This is not hyperbole, as barring exceptional circumstances a woman will not be found guilty of murdering her husband even if there is clear proof she killed him. Furthermore, wives are expected to slice up their husbands as punishment for minor infractions.
* In a Lucky Charms commercial, some kids do this to look over a marshmallow barrier that Lucky made. He tells them that milk is the key ingredient to open a key hole in the wall.
* Inaluna. Her whip resembles more of a slave whip though. It can also function as a fan too.
* In Alvin and the Chipmunks: Road Chip, Dave and Samantha ground the boys until they will be older.
* In a Macy's commercial promoting a Black Friday sale, a few grown men scream like girls when they encounter Justin Bieber.
* In a MAD Magazine "Hate Book" feature, one item was "Don't you hate discovering that you've been brushing your teeth with shaving cream?" This dates back to when shaving cream often came in squeeze tubes, similar to that of toothpaste, so such an error was actually possible.
* In "A Mad Tea-Party", Sophie Moore uses her diamond engagement ring to saw through the zip ties binding her and her husband Tyler to a chair. As their marriage is a bit shaky at that point thanks to Sophie having revealed her past homosexual relationship with Kate Kane, Tyler notes the irony.
* In a magazine cartoon that allows you to recreate the circumstances of the time (even if you know very little about the 60's) the two survivors of an atomic war are a black man and a black woman. The man is saying to the woman "I'm sure Senator Russell would be pleased that the last two people on Earth are not only Americans, but from Georgia!"

* In a manner befitting a gentleman, mind your manners when you visit stately
* In a manner of speaking, when a company, government entity or school district purchases new vehicles, the new vehicles are the ones used on the primary routes and/or long trips. The older vehicles are demoted to shorter routes, while the oldest vehicles in the fleet are parked in the yard and used as spare vehicles (such as when one of the newer vehicles is unavailable or in the shop for repairs). Eventually, it is the oldest vehicles that are sold off and replaced by the new vehicles, and the cycle continues.

* In "Amends", Willow goes all out to try and seduce Oz. She gets a bit worried when he stands up and she thinks he's going to leave, so says she's ready to sleep with him. Oz quickly decides he needs to sit back down.
* In America at least, the ability to use a filibuster to halt the passing of a bill became so annoying that it was decided that any use of it could be overridden by a 60% majority simply because pretty much anyone could delay a bill and piss off everyone just by talking for a long time.
* In America has the father show up at the door of his neighbor Mateo who's dying of AIDS after he's bonded with the family, and asks angrily if he's in love with his wife. His response is spoken in a bitter tone:
* In America is ostensibly set in the '80s, but in order to create a "timeless feel," the director deliberately left in anachronisms like shots of Jessica Alba's L'oreal billboard in Times Square.
* In America, it's legal to make such claims due to the First Amendment's protections on free speech. But if the faker then tries to also dress the part or gain any material benefits from their supposed military status, they're in legal trouble, because that's fraud. Plus, even if the liar doesn't try to gain any benefits besides bragging rights, actual military veterans tend to humiliate this kind of liar as payback. The term for it in American military culture is "stolen honor", and it's one of the few things that almost every American soldier comes down hard on.
* In American college basketball, Vanderbilt is claimed to enjoy a unique home court edge because of the unusual configuration of its court. The Commodores' current home of Memorial Gymnasium, which opened in 1952, was designed with the team benches at the ends of the court, instead of along the sidelines. At that time, this setup was not uncommon, but Memorial is now the only
* In American college sports, there have been several examples of this phenomenon:
* In American culture, eye contact is considered an essential politeness. In many other cultures, it is considered very rude. Many traditional Native Americans have

a very hard time with this and call it "the staring". This is often the basis of misunderstandings.
* In "American Dreamers," a skeleton is placed on the open upper deck of a double-decker tour bus. This was really more of a practical joke, but as the skeleton came from an undiscovered murder, it still fits.
* In American elementary schools, children are taught a fairly simple version of history. For example, "Christopher Columbus was the first to prove that the world was round." Then in middle or high school, they slowly begin teaching them that, no, he was not, and
* In American film and literature, many Native Americans suffer from this trope. Pick any nation you like, and if you bother to do the research, you will find a complex society with all the trimmings: a working economy, clearly defined values and morals, a deep religion, a highly developed language, and a well-developed system of governemnt. Yet some authors portray Native Americans as backward, childlike people who all
* In American football, the Hail Mary (having every receiver run to the endzone and throwing the ball up for grabs with a long forward pass) is an incredibly risky play that's just as likely to give the opposing team the ball as it is to succeed. As a result, it is rarely called. However, on occasion, when a team is losing with little to no time left on the clock, it becomes their only real chance of winning the game — and sometimes it
* In American football, the purpose of a Hail Mary toss is to invoke this trope in hopes of scoring desperately needed points.
* In "American Made" by the Oak Ridge Boys, the narrator's girlfriend is described as having "sexy long legs" and looking good in tight blue jeans.
* In "American Nightmare", Colonel Gaddafi hires an American mercenary for a terrorist operation in the United States. However the Libyan
* In American prison slang, the act of storing items in one's rectum is called "keistering."
* In American professional football (the NFL), if the teams are tied at the end of the game they go into overtime, where the first team to score points wins.
* In American promotions, masked wrestlers have cycled in and out of popularity.
* In American Sign Language, one quick way to say "bathroom" is to make the sign language "T" (Thumb between the pointer and middle fingers in a closed fist) and wave it gently side to side. Unfortunately, in some countries, that same sign is the equivalent to flipping the middle finger. Double unfortunate if someone asks where your friend went and he had gone to the bathroom.
* In American Sign Language, one way to point out a person is being stupid is to flick one's finger at the person's head, figuratively using the signal for the word "melon" to indicate the one flicked is being a

* In "America", the agent and analyst trainees are given three reconstructed rooms where a crime was plotted (which the FBI would eventually foil). Their task is to deduce what was planned and where the crime would take place (assassinating a senator, bombing Liberty Hall, and burning down a Planned Parenthood) — and then prioritize them. They figure out
* In America, their parents don't seem to know what trick-or-treating is.
* In America, when the manga was first released in flipped left-to-right format, it was rated for readers 8+. Its second release, in original right-to-left, was rated 13+. There were no substantive changes between the two beyond the flip (and maybe a few more references to Japanese culture); if anything, the original's

language was a bit cruder.
* In "A Message from Charity", Peter Wood's native time is 1985. In the short story by William M. Lee, it is 1965.

* In a meta example, viewers familiar with 1940s period fashion can tell the scene is in the present and not a dream because the agent is wearing a bra that's noticeable through her shirt (the cups of 40's era bras would have fit closer to the chest). Also, while her hair is curly (as was the style in the 1940s), the curls are much too small and haphazard to be true Victory Curls. Steve seems to notice something is off about her appearance from the second he sees her.
* In a meta example, we have this quote from Terry Pratchett explaining why he didn't provide a map of Discworld the way Tolkien did with Middle Earth (before he changed his mind and released one anyway):
* In a metagame example, the color Green often gets this treatment. All the other colors have cool spells and flashy effects to throw at you (
* In a metagame sense, this is present in with regards to the color system. For casual players, the five colors are more or less equally good. At the competitive level, blue (the color most associated with magic and "wizards") is typically viewed as the best color while green (the color most associated with creatures and hence, "warriors") is typically viewed as the worst. This is hotly contested, though, and the game is constantly being updated with an eye toward balance.
* In a meta sense, Corvo's (and the player's) actions throughout the game drastically alter the tone of the setting. It could thus be said that this trope is the entire game's
* In a meta sense, knowing the abilities of your enemy, knowing your strengths, their strengths, and possible unit compositions, is key for winning. Not an easy feat with 9+ armies, hundreds of units, and hundreds of unique rules to keep account of.
* In a meta sense, making it to a Pro Tour ensures immortality by works, especially if you make it to the top 8.
* In a meta sense, no battle plan survives contact with the enemy - especially in solo queue, and double especially at low levels, where "the plan" is generally "do your job effectively until either the teamfights start, or someone yells to go for dragon/Herald/Baron and you respond". This goes double if you were slightly too late to call your preferred position and end up forced into a role or lane you don't have a lot of experience with because people called all the other ones.
* In a meta sense, the "murder hobo" style of play can come across as this. Adventurers who are ostensibly the "good guys" (and who may even maintain a capital "G" Good alignment depending on the DM) but whose first solution to every problem is kicking down the door and killing everything in sight, regardless of whether or not a non-violent solution would have been possible. Even for the characters that aren't played as
* In a meta sense, the series went on hiatus during the Seventh Doctor's era.

* In a meta sense, you have "fluff" players who build their armies to reflect the setting's lore and emphasize the quirks of their specific army, and the "power gamers" out to use whatever combination of units gives them the greatest chance of victory.

by seeing a 150-year-old Canaletto painting of Odile hanging in a Florence gallery.
* In a morbid offshoot of this trope, some diseases (for instance, a historic plague in Athens) are sufficiently unpleasant that vultures won't eat the victims.
* In a more aggressive case, this is the reason why the Master Shark has been around since (practically) the dawn of time. If his blood is spilled, every shark in the world is drawn to his location and is sent into an extreme
* In a more amusing case, when Gohan was left in the wilderness to fend for himself he was occasionally hunted by a tyrannosaur, which he managed to fend off by removing the end of its tail. After he had taken a few levels in badass, he turned the tables (or the tails) by chasing the poor dinosaur and cutting steaks off its tail for his dinner.
* In a more benign example, it's often common for women (and some men) to change their hair after a long relationship even if it wasn't abusive, as a sort of fresh start.
* In a more benign example, on occasion you can hear behind-the-scenes banter between crew members over a slate. One such example is the August 31, 1987 edition of

* In a more calm sense, life in general. It seems like a lot of tragedies hit people in their teen years, like breakups, disappointments (not getting into your preferred college for example) and they tend to always be a crisis. In general, later in life, people mellow and develop a sense of "I've been through this once, I can do it again."
* In a more comedic example, when Misato asks if Shinji considers her a slob, Shinji cheerfully says "That and lazy!"
* In a more comically portrayed example, Commissioner Scali has a Cuban diplomat locked up for slapping one of his officers, then Scali (while demonstrating how he slapped said officer). When Scali subsequently needs a favour from the State Department they're not happy with him, as the Cubans have cut off the water supply to Guantanamo Bay until their 'political prisoner' is released.

* In a more general sense, Jade ended up being the least focused of the main four kids by a huge margin. John gets a lot of focus because he's the main character, Dave and Rose get a lot of focus because Hussie loved writing them, and Jade... Jade spends the majority of the comic isolated from the rest of her team in one way or another, resulting in her having less development than
* In a more general sense, most pinball games made from the '70s onward default to three balls per game.
* In a more general sense, Professor X doesn't encourage those who are closest to him to be fully independent as adults. Although most of his students eventually leave the school after graduation and assimilate into human society, those who are part of the X-Men never "leave the nest," so to speak. They stay together as a surrogate family while living under Xavier's roof, working as teachers, and Charles continues to exert his paternal authority over them even when they're roughly 57 years old (as shown with Jean Grey, Cyclops, and Storm in the
* In a more general sense that goes beyond the first game, there are bright lines or accessories with colors that denote the element the weapon fires. Fire elemental guns have them in red, electric ones get them in vibrant blue, corrosives are green, explosives were yellow (before Torgue took the element for itself from
* In a more general sense, there are a lot of anime fans who are also fans of
* In a more general sense, there are plenty of dangerous demons skulking around in feudal Japan, but most of them are small-fries compared to ones like Inuyasha, Naraku, and Sesshōmaru and even to some humans like Inuyasha's companions. Sango even used to make a living by killing demons that were threatening people.
* In a more general sense, the setting breaks down its armies by their role in combat, with different divisions for Dropship and Jumpship transportation and combat units. This is further split down based on the nature of combat units:
* In a more general sense, the Terrans as a race are this. It is implied that the Terrans, who are speculated in-universe to be a couple of generations away from being a psionic species, would have ascended to take the mantle if the universe was left to its own devices. It may be the reason why Amon underestimates Kerrigan.
* In a more general sense, the whole setting has some elements of this hidden in the manuals... There are rules for humans and
* In a more heartwarming example, there is the episode "Forget-Me-Not," in which Peter, Brian, Joe, and Quagmire wake up after a car crash, with no memory of themselves or each other. This trope comes into play when it is revealed that
* In a more horrific sort of way, so are the Taken and the Kalaran slave legions.
* In a more humorous case, when someone tried to slip in an "I.O.U. 500 yen" note, it responded with an empty popcorn bag containing the note "I.O.U. 41 popcorn kernels". The next time someone put 500 yen into it, it immediately spilled 41 popcorn kernels on the ground, sans bag.
* In a more humorous example, this is initially Mrs. Weasley's reaction to Bill and Fleur, but Molly gets over it when Fleur says that she loves Bill even if he's disfigured.
* In a more immediate, practical sense, a lot of gem weapons and security systems are powerful against gems but ineffective against something more meat-based, allowing humans to waltz straight through.
* In a more in-game example, the Mechanicum army list for the Horus Heresy expansion builds almost every vehicle used by the Imperium of Man, and almost every Magos and Archmagos has a plethora of custom vehicle designs. To represent this on the tabletop, the Mechanicum can take every single Imperial superheavy tank and any superheavy flyers or Flying Gargantuan Creatures from ANYWHERE in the rulebooks published by Forge World (which is an extremely extensive collection) as a Lord of War choice as long as it's appropriately modeled as a Mechanicum vehicle. Hobbyists being who they are, this soon lead to Mechanicum variants of not only regular heavy tanks, but also

* In a more intentional example, Gnasty Gnorc, the villain of the first game, was made far uglier in the remake,
* In a more justified case, the play depicts Forrest as engaged in an extramarital affair, much to the consternation of his scorned wife. The reality is less clear: in the course of their divorce, both Forrest and his wife were charged with infidelity. While the court ruled at the time that Forrest was the one having the affair (which is why this depiction is relatively justified), some historians believe that it was his wife, Catherine, who was actually unfaithful.
* In a more limited sense, the members of the Cosmic Compass who represent the
* In a more literal example, it's mentioned that Neville Longbottom's Uncle Algie made multiple efforts to "scare" Neville's hidden magic into manifesting when he was a baby — most notably by throwing him off a pier and dangling him out a window. Neville's magical nature was finally revealed when Algie simply dropped him by "accident" — and he bounced.
* In a more literal example, Superboy Prime built himself a power suit to maintain his solar energy charge and block out red sunlight.
* In a more literal sense, advanced technology weakens magic and vice-versa, because tech uses natural laws to do things, while magic breaks the laws of nature to do things.
* In a more literal sense, the AI can be installed with extra laws. Most of them are listed as Law 4 and have varying effects, but the ones most likely to cause an actual rebellion are, in fact, labeled as Law 0.
* In a more literal sense, there are also many birds that, while they have large wings, fly rarely or almost never because their bodies simply aren't built for it. This is especially common on islands, where predators are scarce and flight is not a priority. Examples include the kakapo of New Zealand (a ground-dwelling parrot that can only use its wings to glide from a high perch), the kagu of New Caledonia (which has large wings, but cannot flap them for long periods of time), and the Laysan duck of Hawaii (which can only flutter for short distances).
* In a more literal sense, this trope applied to Süleyman I. "The Magnificent", twice. First, his oldest son Mustafa came under suspicion of wanting to dethrone and maybe even kill his father. It's still unknown how warranted this suspicion was - fights for the throne were nothing new in the dynasty, and Süleyman's own father Selim I. deposed and probably killed his father; on the other hand, Mustafa had powerful enemies at court, most notably his stepmother Hürrem, whose own children were directly threatened by the possibility of Mustafa becoming the sultan. In any case, Süleyman decided to summon his son on a campaign to Persia, then have him executed en route. After that (and the death of his youngest son Cihangir of natural causes) the only two remaining sons of Süleyman were Selim and Bayezit (both sons of Hürrem), who hated each other. Bayezit ultimately contributed to his own undoing when he attacked his brother's province, then ran away from his father's wrath to Persia (it didn't help than Süleyman demanded he save his life by putting the blame on his advisors, whom Bayezit was supposed to execute). In the end, Süleyman negotiated with the Persians, who released Bayezit, and he was executed together with his little sons.
* In a more meta-example, in the Senor Wences episode, upon hearing Kermit's explanation on puppets (dolls being made to move about), Gonzo comments on how stupid that sounds and that he would never try it.
* In a more meta sense, Archangel a.k.a. Warren Worthington III, considering the
* In a more minor example, both Cory and Eric leer at an old picture in their parents' photo album of a sexy young woman in a skimpy wet outfit, only to freak out when they realize it's their own mother.
* In a more minor example, Sun Ce desecrates the grave of one of his officers before blaming it on a rival force so as to motivate his troops and officers.
* In a more minor example, the Archdemon attacks Denerim with two powerful Darkspawn Generals.
* In a more minor example, the characters' voices are provided by members of the dev team (the localization team for the English versions) rather than dedicated

voice actors - for instance, Manfred von Karma is voiced by the first game's composer, Masakazu Sugimori, in the Japanese version, while his daughter Franziska is played by localizer Janet Hsu in the English version.
* In a more minor example, the Putnams' daughter is referred to in the play as Ruth, while the Putnam daughter at the center of the Trials was Ann Putnam Jr.
* In a more modern situation, the US Air Marshals, whose entire purpose was to sit anonymously on planes so that potential hijackers or terrorists wouldn't know if there was one on board, were for some time required to dress in business attire, even if everyone else on the plane was dressed looking like they were ready to hit the beach. Even more insanely, they were required to show their ID at the gate and get on the plane before the other passengers. After this was publicized in the media by air marshals who'd been complaining that undercover agents should actually try to be undercover, they changed the rules. At least one marshal, before the rules were changed, decided to use these rules to his own advantage. Since it was practically impossible to be incognito, he would make a
* In a more modern story, Mickey and Goofy travel the small country of "Schnitzelstein" to catch a thief, but Mickey forgets that he isn't a well-known detective in Schnitzelstein, and cannot simply walk into a police office and demand their cooperation; he gets Goofy and himself wanted as criminals.
* In a more mundane example, an episode set in 1969 features an FBI agent thrown out of the service because of who he wants to marry. After he helps save the world, President
* In a more mundane example of this trope, someone (who has ended up on a repository of IRC quotes) has claimed that he saw some man in a delivery van parked on a parking spot reserved for handicapped students. So he simply slipped a note on the windshield saying he was "sorry for
* In a more narrative use of this trope, many cards equate drawing cards to gaining knowledge, and thus equate drawing at a cost with this trope. The various Innistrad series, in particular, have several cards which involve drawing and discarding or exiling cards, with the flavor being that the user gained too much knowledge that one is not meant to know and subsequently went insane, or was forced to expunge prior knowledge.

* In a more obscure part of the Myth concerning Seth and Horus's succession battles, Seth attempted to rape Horus but the falcon-headed god catches the seed in his hand, and his mother Isis cuts it off to avoid it tainting him. Later on, they spread Horus's seed in Seth's garden - Set being unaware of both Horus catching his seed and the tampering. The next day, Set declared that he was the superior man because Horus was 'made a woman'. Thoth performed a test, and showed that Set was the one who ended up pregnant.
* In a more optimistic story, a platoon of Union soldiers were invited to a barnhouse party that was nominally being guarded by CSA troops. The only people who reported to care were the Union commanding officers.

* In a more recent Czech legend (with some basis in real history), the 17th century rebel from Chodsko, Jan Sladký Kozina, said on the day of his

execution to Lamminger, the foreign nobleman who had taken away the Chods' old priveleges: "Lomikar, Lomikar, in a year and a day I invite you to God's judgement!" (Lomikar was the local name for Lamminger.) In a year and a half, Lamminger did indeed suddenly die.
* In a more recent ninja special, the professional martial artist they hired to do demonstrate arrow catching was Australian. This was lampshaded.
* In a more recent update, the Doomsday Device has been changed to a giant laser beam which is used to take out another, usually equally large, ship within a few seconds.
* In a more respectable counterpart to the Pope Joan story, Theodora of Alexandria committed a serious sin and felt called to
* In a more serious example, a peeping tom's activities kept escalating, which, according to Catherine, would eventually lead to breaking-and-entering and rape (they did). The clue to this was that, while earlier he had limited himself to peeping and stalking, they suddenly found evidence of him masturbating at the scene.
* In a more serious example, Rena believes that men are physically unable to resist when a hot woman tries to seduce them... and that's why she hates women who use that to control men.
* In a more serious example, the starting area for the Death Knight class in
* In a more serious example, when Atari lands on Trash Island when his plane crashes, he ends up with a piece of metal embedded in his brain. He carries on in spite of this.
* In a more serious use of this trope, Harry initially keeps even his own allies
* In a more sinister example, cats and dogs occasionally display similar behavior, where they'll stand/sit with their faces pressed against a wall. It can be a sign of damage to the nervous system or some other severe illness, so if you see your pet doing this, get them to a vet ASAP.
* In a more straightforward example, Homer is traumatized by a bear attack and has nightmares of being attacked by vicious bear mascots.
* In a more straight playing of the trope, one episode had Peter have an argument with a character in the show
* In a more subtle example, Spock toward the end, when Kirk offers to rescue Nero (

* In a movie about retired Mafia members living in Florida, one of the group uses the fact that he has kept in touch with every other former Mafioso to have retired to the greater Miami area to gather a posse to raid the base of a crime lord who had kidnapped the daughter of another member of the group. This leads to a hilarious scene where a freighter owned by a drug lord is attacked by a busload of gun-toting senior citizens.
* In a movie about the presidential candidate Luis Donaldo Colosio's assassination in Tijuana called
* In a movie short based on a soccer competition, the author of the manga, going by his nickname Odacchi, makes an appearance as the "world's best soccer player."
* In "Amplification" the assistant of an eccentric scientist (who had created a new, more powerful strain of anthrax) kills his mentor in an argument and plans to unleash the anthrax to show how unprepared America really would be in the face of a terrorist attack (though in actuality he was just a spiteful little man who wanted to take revenge on places where he was rejected, one of which was a military research facility).
* In & Out as every actor is listed as their character appears dancing.
* In & Out cliche). In the fake movie, Danny is a gay soldier who's being drummed out of the service after being outed. The following exchange occurs during a climactic military tribunal:
* In & Out (gay main character; subject matter includes coming out story)
* In & Out, Howard attempts to introduce Peter (who has just passionately kissed him) to his parents: "This is my Peter—uh, my *friend* Peter. We just met at the, uh, intersexual... homosection... INTERSECTION!"
* In & Out Howard. Peter even holds his arms for a bit afterward, like he's making sure Howard won't fall over.
* In & Out moment that was coincidentally what was shown on that year's Oscars telecast when Joan Cusack was nominated for an Oscar for that role.
* In & Out' Oscar acceptance speech at the 1994 Academy Awards where he unwittingly did the same thing to his own old high school teacher.
* In a "Mr. Robinson's Neighborhood" sketch, Mr. Robinson put on a puppet show, with finger puppets of poor black people imploring President Reagan to improve the economy. Before the show ended, the puppet on Mr. Robinson's middle finger stood alone, and exclaimed, "Mr. President, I think I speak for all black people!"
* In a much-anticipated 2011 interview with the fanbase (more than 10 years after the last game was released), lead writer Jason Scott did reveal a few details about what was planned for the future games. However, he did so in such a vague manner that he simply fueled further speculation.
* In a much different version of this, Marty Isenberg said they have no idea the significance of Professor Sumdac's name being "Cadmus" backwards as it was decided before they got involved.
* In a much earlier scene, which takes place when Nodoka and her friends Shizuno and Ako are in elementary school.
* In a much friendlier vein, Hawke describes Varric this way. Before leaving the school to have his wisdom teeth surgically removed, he pontificates at each of his colleagues about his affection and respect for them, and manages to leave them in a fairly emotional state since he claims he wants to say these things in case he doesn't survive the procedure. (He himself laughs his ass off as soon as he's out of earshot.) Hawke later chuckles about it with them, noting that "he was being a troll, but a sincere troll."
* In a much later arc, Tracy's friend and colleague, HPD officer Haku Kou, is depicted as being the technical advisor on a movie being filmed in Tracy's city because of the title character's facility with a blacksnake whip. Kou explains that he became proficient with that weapon (leading to his being hired as the film's technical advisor) in emulation of Chang Apana.
* In a much later chapter when Miroku had just joined the gang, there was another decent-looking woman who Miroku was about to hit on, but unfortunately she was married to a man whose league she shouldn't have been in. This mildly shocked the whole gang.

* In a much later episode, a doctor harvests the organs of a brain-dead child without her parents' consent, and Olivia is forced to stop a helicopter from transporting the girl's heart, even though a child is likely to die without it. She does, but it's clear that she's extremely troubled by this decision (and Fin actually suggests they could "[get there] too late" to stop the helicopter). Both Benson and the little girl's father later express regret that they didn't just let the heart go to the other child.
* In a much later episode, a frost giant swallows him while he's having extremely spicy food as last meal. The next moment, Johnny is drowning in a large puddle.
* In a much later episode, Castle shoots a serial killer several times, knocking him off a bridge. They never find the body—in fact, Beckett goes so far as to state, direct quote, "they never found the body". Castle postulates that the killer had planned the whole thing in an

* In a much later episode, Johnny sees a big shining sign advertising just the thing he needed at the moment. Cue the sound of a choir chanting. After a zoom-out, there's an actual boy choir standing right next to the sign.
* In a much later episode, Len says such a phrase again while he's fighting Mikihisa, Yoh's father, in a match to prove his worth and determine whether he will stop or continue searching for the grains of rice scattered across the desert by him. When Len makes many futile attempts to hit Mikihisa after recreating his copies from his spirits using faster and stronger versions of his Rapid Tempo Assault, he simply says "Impossible...!" before the Mikihisa copies move in to attack him from everywhere around him while saying "Use your Oversoul (Furyoku in the dub) to see."
* In a much later episode, this is apparently how Lois entertains herself during housework. If a certain shirt goes around three times in view, she gets to have a diet Coke.
* In a much later skit, several officials discuss why there was a cat at many disasters such as Kennedy's assassination and Hurricane Katrina (and also the above sketch). They conclude that they are being manipulated by cats. When one asks, "what can we do?", the scientist reveals himself as a cat, responds "YOU CAN DO NOTHING!", and shoots them all. Then a big "Cats are Jerks" pops up.
* In a much later strip, after the revelation at the Godsmoot, he states that one of the only things he agrees with his father about is that the gods are just scary alien wizards who "found a way to crowdsource their magic".
* In a much less extreme example, Rose Lalonde's mother is perpetually drunk and somewhat neglectful. Since they live in an isolated house in a rural area and Rose is responsible enough to make up for her mother's deficits, it's easier to see why no one's ever reported this to the authorities.
* In a much less romantic scenario, both Honeybee Inn sequences end with an ambiguous transaction between Cloud and Mukki. When Cloud's in a hot tub with a bunch of burly men, is he saying 'it hurts' because it's too cramped, or because...?
* In a much lighter example, Alphys is all too eager to answer a question about "Mew Mew Kissy Cutie" during Mettaton's quiz show, despite the fact that
* In a much milder version of this trope, it's not uncommon for parents to punish unruly teenagers by making them stand in public wearing signs detailing the stupid things they did. It's mostly done to counteract any 'rebelling is cool' attitude that they may get from their peers by reminding them that the

* In an Al Brodax cartoon, Popeye's trained fleas fly the coop on a passing dog. They leave him a Dear John letter which ends with "Help!".
* In an Alliance quest in the Jade Forest, you are given the task of training several Jinyu of various classes by having them kill wildlife alongside you. They start out weak, but by the time you take a squad of them against the Hozen nearby, they're quite able to competently assist you.
* In an Allstate insurance ad, the "mayhem" pitchman is lying on a garage roof in winter, representing a growing load of snow. At the end, he blows air at a snowy tree branch, causing a few ounces of snow to fall on him and the roof to immediately collapse under the additional weight.
* In an Alltell commercial, the nerdy personifications of Alltell's competitors get stuck in the sand, buried by frustrated customers. "Chad" (Alltell's personification) offers to help get them out but they refuse his help. Then the actual product offer gets shown. Cut to a 2 second stinger of sorts of the four, still buried, at night, surrounded by crabs, and screaming.
* In an Alpha-Bits cereal ad, three mice are being held captive by a villainous cat, who threatens to throw the mice into a cauldron as soon as it becomes sufficiently hot. The cat leaves, vowing to take a nap. One mouse escapes his bonds, and approaches the dining table, grabbing a handful of Alpha-Bits cereal. He explains to the other mice that he will spell out the word "Help" in a cereal bowl and summon

* In an alternate timeline in "Tapestry", a Picard that has remained a competent but relatively low-ranking science officer throughout his career suddenly displays an interest in promotional opportunities, especially in command. He is discouraged from pursuing this on the grounds that, while excellent as a science officer, he has never shown any real spark of ambition or initiative, implying that his superiors are consciously attempting to avert this trope. (They seem to suspect that this sudden interest in command may be due to a midlife crisis.)
* In an alternate timeline where Queen Chrysalis conquered Equestria, it is mentioned that she managed to defeat King Sombra by turning into Radiant Hope, the only person he ever loved, then striking him down when he hesitated. She also tried it on Zecora by turning into Fluttershy, but it didn't work.
* In an alternate universe Fringe Division is the main investigative arm of the Department of Defense and reports directly to the Secretary of Defense. The FBI no longer exists and Homeland Security was never created (since 9/11 wasn't as disastrous) in that version of the United States.

* In an average game, around 9 points or so are awarded before the lightning round. Each panelist gets 2 questions worth 1 point each, and 3 more are up for grabs for games like Bluff the Listener. The lightning round consists of up to 8 questions per panelist (or as many as can fit into 60 seconds, whichever is less), each worth 2 points. Thus, the only impact of everything before the lightning round is that one contestant might have a small lead (1-3 points) going in; the only time this factors in determining the winner is if the panelists score within a few points of each other in the lightning round. (To be fair, it's actually not that uncommon for that to be a deciding factor; it's only eight questions and at least a few are usually relatively easy, so two panelists getting the same number of questions right, or being within one question of each other, is a thing that happens.)

* In an episode, Entree's brain catches on fire when he memorizes the entire dictionary. Aside from occasionally shouting random words, he suffers no ill effects. This also is apparently common enough for Peri to be able to tell.
* In an episode, everyone except Rachel and Ross ends up hiding in Monica's bedroom as Rachel and Ross break up in the lounge room. Later subverted when Rachel and Ross had another highly emotional fight with the other four characters trapped in the same room. Joey, in a rare moment of planning ahead, stashed a box of food, drinks, a deck of cards and other entertainments in the room after the last time, just in case. He also included condoms, "just in case [they] had to repopulate the Earth."
* In an episode featuring Team Galactic, they easily set up and execute their counterattack in the length of time necessary for Team Rocket to deliver the motto.
* In an episode featuring the outrageously British, psychedelic villain Mad Mod, this character uses mass hypnosis to convince the city that the American Revolution never happened and that they are all under British rule, proclaiming himself "King Moddy I". The episode is full of homages to British pop culture, and at the end of a small montage set to a Not!Beatles song, the Titans are crushed by the

* In an episode from Black Box TV (a serious horror example of this trope), a couple kidnap a young girl with the intent to force her family to pay for her back, but then don't hear anything. No police report, no callback on their ransom, nothing. The couple, a man who does have some level of moral compass and a woman with a drug habit and surly attitude, begin becoming frustrated. Eventually, the kidnapped girl turns the tables, using her supernatural powers to lock the woman in her bedroom and viciously attack her with a supernatural teddy bear with razor teeth and sharp claws. The kidnapped girl then forces both the man and woman to become her "perfect parents", acting like a nuclear family out of the '50s. Should they refuse, the kidnapped girl will kill them both with her powers. It is essentially implied that the parents of the girl didn't want her back as this was the life they were forced to live as well, and likely split the second they were free.
* In an episode, Frylock reveals that he's been cloning televisions every time the other Aqua Teens destroy one. Eventually the latest television they make turns evil because having to clone the same thing over and over again causes its molecular structure to start breaking down, leading to this trope. Later in the episode, the Aqua Teens clone dollar bills and eventually end up making George Washington out of dollar bills.
* In an episode, Gibbs is grazed by a bullet that results in some rather graphic damage. He still manages to shoot the bad guy
* In an episode Grissom gets stabbed in the throat. As they were only moments away from a cliffhanger anyway, it's perhaps a pity the incident turns out to be a delusion.
* In an episode, Hal goes bowling and gets a strike every time. As the episode goes on, he develops an increasingly elaborate routine for throwing the ball, to the extent that toward the end, Hal refuses to let one of his observers go to the bathroom.
* In an episode, having just captured the assassin Deadshot who tried to kill

Aquaman, several members of the League threaten him with physical violence, which he shrugs off. Batman then takes him aside and whispers something to him, he practically
* In an episode, Herc visits his old friend Vlad, who lives in Transylvania, and learns that he's changed a bit since the old days... Apart from a couple of slips, however, the script resolutely uses the term "strigoi" to describe the bloodsucking monsters ("strigoi" being yet another East European term for a vampire, but is similar to the Classic Greek term "striga"). "Striga" is more likely to be interchangeable with "witch" than "vampire"... not, of course, that old folktales are super-careful about such distinctions. Fortunately, they're using the folklore version of Vlad and not drawing from the historical version. A "couple of slips" for Vlad Dracul would be pretty bad for anyone within a hundred miles that so much as looked at him funny. And certainly not be family-friendly Violence in the least.

* In an episode, Jesse tries to write a song for his band, only to come up with such songs as "This Land is Your Land" and the theme to
* In an episode, Jessica becomes suspicious of a man's claim of having been in the armed forces. To that end, Jessica asks if he served in X division with her husband Tom. The man readily claims that he did and describes Tom as a fine soldier and one that he admired and respected. Of course, Jessica knows he's lying as her husband's name was NOT Tom, and he served in a different division of the armed forces than the one she named. However, she doesn't confront him with this, nor reveal it to anyone else, knowing the man could easily
* In an episode Jill offers the boys "her old 45s" for a party, to which one of them responds; "You're giving us guns?"
* In an episode, Joey asks for one of the girls to remove her bra (after first asking who had the biggest breasts). It turns out he wants a piece of wire to pop the lock on a car door — they were locked out and it was snowing.
* In an episode, Joey mentions "baseball, or sandwiches, or... Chandler" as things he thinks of to keep himself from getting too "excited". Phoebe tries to follow his advice when she has to massage an incredibly hot client, but finds even baseball and sandwiches too sexy... thinking about Chandler, on the other hand, works fine.
* In an episode just before the one where McGee and Abby made a bet, there was a bet between Tony and McGee where Tony had to get Kate to admit she was Tony's wife.
* In an episode, Kermit checks his appearance in an empty frame; on the other side is Scooter's wind-up TV show host that looks exactly like Kermit, except for the wind-up key in the back.

* In an episode, Luanne is scolded for her high credit card bills due to trying to

live beyond her means, so she and Peggy join a roller derby to help pay them off. They form their own team after breaking up with their manager over pay disputes and end up getting further into debt when they use borrowed money to try to improve their team.
* In an episode, Maxwell Smart is infiltrating a camp of desert nomads when he bumps into a massive guard. "Where I come from," Max says with confidence, "we have a saying. 'The bigger they are, the harder they fall.'" After firing off a judo chop, two body blows, and a punch to the jaw that have no effect, Max muses, "Haven't heard of that one, eh? Well, maybe you know this one. 'The quality of mercy is not strained...'"
* In an episode, Michael narrates that injecting someone with a sedative might not knock them out right away so it is best to approach from behind and physically subdue them while the sedative takes effect. This was then subverted when
* In an episode, Michael's narration both references this trope and gives a more plausible alternative:
* In an episode, Mojo ties up the girls in an unbreakable filament, and they shout, "You forgot one thing!" and blast him with their heat vision, something they've actually quite often forgotten to do.
* In an episode of Disney's Doug, Doug watches recordings of a famous insult comic and becomes great at comebacks, but then he goes back to doing this at the end of the episode when he realizes that he doesn't like insulting people for laughs.

* In an episode of Jimmy Fallon, Mark-Paul Gosselaar showed up as a guest,
* In an episode of Misty hooks a tea kettle after a surprising struggle.
* In an episode of Naisho, Pop wonders what it is like to be Hana, and the two switch bodies. When Doremi realizes that Hana is in Pop's body, she takes her out of the classroom, and then Hana (who is in Pop's body) wets herself.
* In an episode of Season 5, a group of pagan gods meet to discuss the upcoming Judeo-Christian apocalypse. Lucifer finds them, explains his disdain for the pagans to Mercury, and calmly kills each and every one of these gods (except for Kali, who got away).
* In an episode of the anime, the girls actually spot an impostor Keitaro when he catches a falling Shinobu without "tripping and falling and landing with his head up her skirt."
* In an episode of the fifth season, Musa got turned into a giant mutant seal after getting hit by one of
* In an episode of The Jack Benny Program (1961), Jack gets a ticket for a noisy rooster. He then has a dream where he is on trial for murdering the rooster. He employs the greatest lawyer ever, Perry Mason (played by Raymond Burr in a terrific comedy turn) but dream Mason turns out to be an idiot (he tries dressing as Abraham Lincoln to sway the judge) and is soundly trounced by the guy who says "Yeeeeeeessssssss". Mason even winds up getting

* In an episode, Superman frees a female Kryptonian named Mala from the Phantom Zone. After a while, she starts getting jealous of Lois Lane and, when a reporter asks Superman and Mala if they're a couple, Mala immediately says "yes" and is enraged when Superman disagrees.
* In an episode, Superman learns from a swami (or somesuch) how to divide himself into two by using the power of his Super-will. It was only used once. Each is only half as powerful as the full Superman so it makes sense for him not to use it all the time; but it would have come in very handy during all of those "you never see Clark and Superman at the same time" bits.
* In an episode, the conversation lulls at a gallery opening on cue every time someone says "I'm out," prompting applause from the audience at the unintentional
* In an episode, the eponymous pair build a super computer that can answer any question with 100% accuracy. Candace asks it how she can get Mom to see what her brothers have done and it gives her the solution. It works, but not in the way she wanted. Linda does see what they did, but doesn't know they were the ones who did it. Another level to this: Candace meant "what her brothers did" as the Supercomputer that they had built, but the computer interprets it as the nice thing they did for Mom (fixing her bad hair day by exploiting the show's use of
* In an episode, the family watches a commercial for the grand opening of a steakhouse that seems to cater to their every like, including serving tofu (for Lisa) and having the world's easiest placemat maze (for Bart).
* In an episode, the guys are applying for a job at Fatso Burger, and give the worst possible answers, except for Eric. An example:
* In an episode, the main characters slide into a Prohibition-like world, where caffeine has taken the place of alcohol. Along with the clothing and music styles of the 20s, they also got speakeasies, where coffee is sold in tiny bags for $5 each, gangsters, and corrupt cops.
* In an episode, the now-addleminded Baxter walks through the wall five feet to the left of the door to April's office. April manages to trick him into leaving. When he realizes this and comes back, he walks past the hole he made earlier, past the door, and breaks through the wall on the other side. This is made funnier by the fact that the door was open at the time. Later in the episode, the Turtles run past both the first hole and the open door to go through the second hole.
* In an episode there is a society where everyone commits suicide at the age of

60. Originally to alleviate the strain of paying for keeping the elderly alive, it has become a way of honoring the individual and their family. Lwaxana Troi attempted to dissuade a man of this society from doing it, in part because they are developing feelings for each other and in part because he is perhaps the only scientist on the planet capable of stopping the planet's sun from burning out within a few decades. But he ultimately went off to after he was begged by his daughter (whose mother had already done so). Ultimatley, while she doesn't approve of or condone his choice or the society's tradition, she decides to attend his farewell ceremony/celebration to bid farewell with the other people who love and care for him.
* In an episode, the team solves a case involving a woman whose car was forced onto the track and run over.
* In an episode, this gets flipped, when they are on break from their relationship. Crichton seemingly takes something that Noranti gives him for pain and is very cold and uncaring towards Aeryn, while she is the one who is pleading with him. It turns out to be an act to prevent Scorpius from using Aeryn against him.
* In an episode, Timmy travels inside Vicky's brain to find that it is run by an army of computer technicians. It's revealed that Vicky is so nasty because the technician responsible for controlling her "nice" emotions never showed up for work.
* In an episode, Tim Taylor and Jill Taylor decided to each test-drive a tank, and Tim manages to plow several things over, including a sign that said "Tank Crossing" that was conveniently right in his path.
* In an episode, when it looks like there might be a terrorist attack on the White House, President Bartlet rejects the idea of going to the bunker, saying that when he got out he wouldn't be able to give orders to any of the people who weren't in the bunker and he likes doing that. Leo points out that the Secret Service can take him by force, if it comes to that; Bartlet responds that they better bring more than a couple of guys.
* In an episode when Meg became a born-again Christian, Peter turned to the camera and said dryly: "That's right folks. It's gonna be a Meg episode. Stick around for the fun. Here's the clicker. No one'd blame ya."

* In an episode where Dick Dastardly goes on vacation, he dives at a pool but, because of another attempt from his squad to catch the pigeon, we never get to learn if the trope would repeat or if he had already learned by then.
* In an episode where Homer and Marge have to choose between vacationing in Florida or attending an elderly relative's birthday:
* In an episode where Homer portrayed King Henry VIII, he responds to Ned

Flanders' (as Thomas More) objections to seceding from the Church by offering to canonize him.
* In an episode where it looks like Homer and Marge might get divorced, the kids are asked to think about which parent they might want to live with. Bart and Lisa both answer "Mom!" before the question has even finished being asked.
* In an episode where Marge gets agoraphobia, the family tries to ease her back into social situations by acting out a trip to the Kwik-E-Mart. Lisa is cast as a magazine rack; Homer stubbornly insists he can't write good parts for women.
* In an episode where Marge is working at Moe's bar, she learns how to do this properly, and enthusiastically shows off the skill to Homer by throwing him out of a doorway in their house.
* In an episode where Meg and Quagmire are dating, Quagmire gets Meg by surprise while they're watching TV.
* In an episode where Peter was lost at sea and presumed dead, Lois ended up remarrying Brian (who has always held a torch for Lois), When Brian discovers that Lois and Peter are having an affair behind his back he goes to confront them, but overhears Lois breaking off the affair with Peter because of the commitment she made to Brian. In response, Brian promptly agrees to end the marriage so Lois can go back and be with Peter.
* In an episode where prohibition is reintroduced in Springfield, Fat Tony and his mobsters openly drive trucks of illegal booze past City Hall, casually tossing a handful of cash at Lou and Eddie on the way.
* In an episode where RM clones himself, he ends up making clones modeled after the
* In an episode where technology stopped progressing after World War II, they find out the Quinn of that world died of polio.
* In an episode where Zoidberg's people invade and conquer Earth, the invaders end up building a gigantic walking crab-shaped robot/palace. To demonstrate its power, the robot first goes and destroys the hat-shaped billboard for Acme Collapsible Hats, by collapsing it. Then it destroys the Acme Accordion sign by squeezing it together. Then it tries to break the Acme Unbreakable Comb billboard. It tries again. It tries a third time. Then it finally just pushes the sign over and moves on.
* In an episode which has Xena and Gabrielle reincarnated in the modern-day, the reincarnated Xena does this, signaling the moment that she's stepping into her previous incarnation's shoes and is about to kick serious ass.
* In an episode, Will and Carlton went to a clinic to pick up some reference material for Ashley, who was
* In an especially creepy Real Life example, murder victim Peter Porco, after taking several blows from an axe to his head, woke up, went about his daily routine of making coffee and fetching the morning paper, then finally collapsed back into unconsciousness and died, apparently unaware the entire time that he was bleeding to death, or even injured, due to brain damage.
* In an especially frustrating example, C.C.'s name has never been revealed in any of
* In an especially jarring example, Captain Crais does this to a subordinate ONE-HANDED. C'mon, the guy has some training but he's not exactly a ninja.
* In an especially tongue-in-cheek moment, Natsumi refers to herself as a side character right before making a casual observation that turns the chapter (#257) into a
* In an even more interesting example: the large cats found near Silvermoon are called "lynx", and look like the cats of the same name from the real world (apart from color: the in-game ones are red and gold). However, identical large felids found on the plains of Mulgore are called "prowlers" (these ones are plain tan). In other instances large cats are called "tigers" or "lions" despite being the same size as the "lynx" mentioned above. In all likelihood they are actually regional variations of the same creature. The different names, probably just reflect what aspects of the creature the local people care more about. The elves being very scientifically minded, probably care much more about it's genetic relationship to

other animals. The Tauren meanwhile, care much more about it's tendency to prowl large areas stealthily. The "tiger" and "lion" meanwhile, are clearly so named just because they share characteristics with the real-world animals of the same name (stripes and manes respectively). they actually appear to be the same type of cat as the "lynx" and "prowler". As Azeroth is smaller than the real world, and the continents were only separated 10,000 years ago (rather than the millions of years our continents have been in their current formation) it stands to reason there would only be one large cat species. Particularly because it shares it's range with wolves.
* In an even more literal case, it's revealed that Revil chose, literally at the moment he held out his hand to Cat Stevens, to have Cat's disciplinary record wiped clean and restore his rank of sergeant.

* In a news awards show, Murry was told in advance he'd win for best writing; when the award was presented he rose to accept before the announcement, only for it to be given to someone else. He was the only member of the news team to not win. (a ironic jab to the recent Emmy awards, where Gavin
* In a News Flash sketch, Kermit does a report on Rapunzel, who is trapped in the Witch's tower, and interviews Prince Charming, who is about to come to her rescue. When Charming tells Rapunzel to let down her hair, it is revealed to be a wig that falls off her head.
* In a news story from the Eighties, one 7-Eleven clerk who got robbed, ran out into the parking lot to get the robbers' license plate number... and was fired. The company's rationale was that, since he technically left the store premises in order to essentially chase the guys who robbed him, he was displaying a blatant disregard for his own well-being and was therefore a liability.

* In an example that has nothing to do with the mother or the narrative, the end of "Knight Vision" had Daphne admitting that she sent Lily a text message about Marshall taking his new job as a judge, something Marshall doesn't want Lily to find out yet. The episode closes with Marshall's phone ringing at that moment. Whatever suspense that was there is ruined when you read the official synopsis for the next episode, "No Questions Asked", which is about Marshall trying to remove the text message with help from his friends, so in the end, that phone call at the end of "Knight Vision" has nothing to do with the text message.

* In a nice scenario for a Dr. Who style RPG, the player's TARDIS comes to rest in the car park of a film studio. This causes John Wayne to have to find another spot so he is late and angry for his meeting to discuss playing Genghis Khan. Instead, Ronald Reagan gets the role and cancer-inducing radiation dose. President Wayne's foreign policy isn't a great success either.
* in an ideal world...). Part of the reason the Labour Party did so badly in the 2019 General Election was due to a very extensive smear campaign being performed against Corbyn.

* In "A Night in Sickbay" the Enterprise has run out of spare parts for their warp engine. They need to get a replacement which will both help the ship run smoother and ensure that they have enough spare parts to not get stranded in space. The Kreetassens have a spare part that is remarkably compatible with the Enterprise, however, after Archer's dog pees on their sacred trees, they kick them out and eventually demand a formal apology before diplomatic relations can continue. Archer is far more concerned that his dog caught a disease while on the planet. Even when T'Pol points out to him that he is acting far more concerned about the health of his pet than the safety of his ship (which his dog just so happens to live on) he still doesn't capitulate. While the Kreetassens are unreasonably uptight, they are also perfectly helpful once they are sincerely apologized to, providing an additional spare part beyond what they needed, making Archer look even more petulant by comparison.
* In "A Night Off", at Robyn Hill's campaign party, Tyrian is hidden in the crowd. When Watts kills the lights, Tyrian massacres several people while Watts manipulates the security footage to make it look like Penny did it. Penny sees Tyrian and tries to stop him, but he slips away and when the lights come on, Tyrian is gone and Penny is standing on the stage with her blades drawn. Although Ruby sees Tyrian before the lights go out, and is able to tell Ren and Nora who really did it, everyone else present thinks Penny was the attacker. While it takes little time to prove that the footage was faked and Tyrian is the real culprit, by then Mantle has descended into riots,

* Inanimate Insanity episode 11 part 1, Fan's crazy theory ends up referencing events which occur later in the season.
* Inanimate Insanity: "Hey guys! I'd just like to let you all know that I didn't steal anything!" Right after Suitcase stole a MePhone4 battery.
* Inanimate Insanity, making her sendoff (and likely a few fans who voted for her) rather sad.
* Inanimate Insanity: Mangosteen, a member of Spoiled Lemon is the lord of this trope, as he is never, ever seen to smile.
* Inanimate Insanity, MePhone5, MePhone4, and Bow fall off the Crappy Cliff into a river, which permanently shuts down the former two and electrocutes the latter. MePhone4S downgrades himself to bring MePhone4 back, getting rid of his own personality in the process. In the second season, MePhone shows that he can't

revive Bow because she died while he was dead, so he never got the notification to recover her. In that same episode, Dough is introduced and killed, and MePhone can't bring him back because he never created a Life Icon for him.
* Inanimate Insanity's merch constitutes of t-shirts, though a few other things are also sold, such as footwear and mugs.
* Inanimate Insanity, some female characters are voiced by males. Examples include Apple, Lightbulb, Suitcase, and Test Tube.
* Inanimate Insanity (so we have the MePhone and the MePad). This also extends to the Apple corporation itself, which became Meeple.
* Inanimate Insanity. Suitcase mishears the word flour as flower, so he is looking in a flower garden for some. Balloon comes along, looks at what he's doing... and just tells Suitcase he has several flowers.
* Inanimate Insanity this trope by preventing jerk characters from being voted out too early by fans.
* Inanimate Insanity, though a few standout cases include when Paintbrush falls off a ladder in episode 7 when Fan mocks Marshmallow in episode 10, and when MePhone gives Paintbrush's painting a 0 in episode 12.
* Inanimate Insanity: Toilet is the web animation president of this trope, as he constantly shouts "MISTAH PHONE!"
* Inanimate Insanity: Tomato, a member of the Spoiled Lemon rocks a pair of shades. Cool, man!
* Inanimate Insanity uses the word "guys" in almost every sentence he says.
* Inanimate Insanity was also voiced by Adam, but upon her appearance in season 2, she got a new voice actor due to Adam being too old to play the part.
* Inanimate Insanity was telling the crew what questions to ask the audience, in order to gain information.
* Inanimate Insanity: When MePhone claims he is cured of his condition, Test Tube is quick to let him know it's pronounced conditi-ON, the way Tissues says it.
* Inanimate Insanity, which implies that Salt and Pepper are hosting a never-ending object show purely for their own amusement.
* Inanimate Insanity, which is long enough for OJ to create a hotel with the money he won.
* Inanimate Insanity: While a conversation between Marshmallow and Paintbrush is in progress, a piano is heard in the background. Paintbrush suddenly wonders where it comes from, and going through a hedge they find out that Lightbulb was playing the background piano.
* Inanimate objects are not safe from her wrath if she sees them as rivals for Torg's love, either.

* In a non-romantic version of this trope, McGee's sister ends up at his doorstep covered in blood and eventually becomes a murder suspect. He's not the one to turn her in, though.
* In a nonsensical variant, Granny Smith acts this way toward jars that will soon be holding zap apple jam. One actually cracks under the abuse, to which she yells "Court-martialed!" and throws it in the trash.
* In a non time travel-related example, the fortress of the Greek god Hades is guarded by dead soldiers from all of history: skeletal Roman legionnaires with spears are joined by undead US Marines with assault rifles.
* In a non-voice acting example, Townsville had a completely different mayor in the first WAC short. The character in that episode appeared to be modeled after
* In an optimistic deconstruction, this will cause the hero to re-examine his methods and come up with a better way to do things. In a pessimistic story, they may have actually made the situation worse by destroying their own credibility when it was important that their warning be believed, and lose a round with the villains.
* In an optional (and hysterical) scene, Snake can call Otacon on his CODEC while playing... with his "Solid Snake" during the Tanker Mission. Snake's response removes all doubt.
* In an Orange League episode, Team Rocket slams into a tree while reciting their motto. They were sliding down a zip line. They finish
* In an origin story, it is revealed that the father of the man who later became
* In a Norwegian commercial, a woman wakes up in a bed in a huge hotel room with wedding stuff thrown all around. Her confusion becomes complete when George Clooney enters the room. Turns out she married THE George Clooney while she was drunk.
* In a notable aversion, 200 million years in the future, the niche of sharks is filled by... sharks, which are every bit as efficient and deadly as they are today or were 400 million years ago.
* In a notable aversion to the "other women or their own clumsiness" rule, C.C. Babcock was the most abused character, and most of it came at the hands of Niles, the butler. He would hand her a scalding hot teapot, squirt lemon juice in her eye, "forget" to tell her he just mopped with
* In another 2012 episode, Jon's report that Obama is allegedly the worst president in history gets immediately disproven:
* In another, a bar that Courage goes to in a shady part of town is also a reference.
* In another, a bishop in all his official finery enters a jewelry shop and purchases a magnificent brooch, paying for it in cash. A short while later, a cop enters the shop with the bishop in handcuffs, and explain to the jeweler that the bills are all fake: the counterfeiter was counting on no one daring to question a high official of the church or his money. He then explains that he needs the bills and the brooch as evidence and leaves a receipt. While the bills are fake, so is the cop, and the jeweler hands over the incriminating evidence of his own free will.
* In another, a body is found buried 18" underground prompting a discussion between Gibbs and Ducky as to why humans are buried six feet down. According to the writers, that's how deep they have to be so animals don't smell them and dig them

up.
* In another adventure located in prehistory, there is a tribe of cavemen, the Munga-mungas, who sacrifice their enemies to a "God of Water",
* In another after thinking the others are dead from the rapture, Princess Clara at one point sticks her hand into the garbage disposal and cuts off all her fingers.
* In another, a gay youth counselor inherits a parrot from an old uncle. Unfortunately, the uncle was a Nazi ...
* In another, a group of teenagers stop on a track and serenely wait for the oncoming train while two of the other kids in the car find out that their doors have been locked and the locking bolts disabled.
* In another (also not voluntary) instance later in the game, Ma Mole remarks that she thinks Mario and her kids are about to drop in, while Pa Mole says they have to use the door like everyone else. Cue Mario and kids dropping through the roof on a mine cart.
* In another, a man is invited to a party where there's supposed to have a cold buffet at midnight. Thing is, the other guests are werewolves and HE IS THE COLD BUFFET.
* In another, a marathon biker is losing the race badly until he takes a swig of Solo... and then even feeble old senior citizens and little kids (on tricycles) continue to outrace him.
* In another, a mole-ster takes control of his brain and gets him to punch himself, so he pulls out the brain and pushes the mole-ster off.
* In another, an accident involving a supposed past-viewing device (it's left vague whether it's tapped into an alternate timeline or never was anything more than odd case of
* In another, an unrestrained combative patient grabs a syringe of anesthetic and threatens the staff. Col. Blake tries to talk him down and then grabs the syringe. He gets a handful of the needle.
* In another, an untranslated insult can be worked out to mean something like "Your father fucked a shit-worm."
* In another, a particularly harsh top-level nurse comes to inspect Margaret's nursing staff, which results in Margaret herself becoming particularly harsh in an effort to satisfy her (she is relieved and happy at the end of the episode when the inspector rates her staff "satisfactory").
* In another arc, a legendary, apparently unkillable sorcerer called the Magician stalks Gotham. He's very good at escaping, and a friend in the mystical side tells Batman that there's magic involved, though he doesn't think it's the Magician. It takes Batman until the very end to realize it's a group of ex-CIA agents in lightweight power armor, but only succeeds in capturing one alive, all others killed by the mob they wanted to rip off. However, when Gordon prepares for a final interrogation of the guy, he finds him dead in his cell, killed with no witnesses despite being in Maximum Security, and a Magician tarot card shoved in his mouth.
* In another arc, Linus' hobby is building snowmen; he builds lots and
* In another arc, Tedd goes white with shock when he discovers that the man who had been hitting on him earlier
* In another arc, the family goes to the zoo, and Calvin gets lost when he starts following a woman who looks like his mom. As his parents try to figure out where he's gone, Calvin's dad hits upon an idea—"Maybe Calvin's at the tiger pit, since he likes tigers so much." After walking a bit, he laughs to himself: "Ha ha, maybe Calvin's
* In another, a shark got released into a pool and attacked someone, but the shark attack was not the cause of death; the victim was already dead (of a forced heroin overdose) and the shark was drawn to blood from her injection site and bit her arm off. The shark release and the murder were committed by different people, so

* In another, a woman gets her purse snatched and yells "Stop thief!". Everybody in the immediate area (including a little boy and a dog) freeze and raise their

hands.
* In another, a wounded North Korean soldier was mistakenly brought to the ER without being cleared of weapons or ammunition first. Turns out he had a grenade on him, and tried to take the entire ER with him. Fortunately, Hawk was able to keep him from arming the grenade long enough for the soldier to be sedated.
* In another baseball episode, Perfecto Prep was easily defeating Acme Looniversity until the antics of some game crashers revealed how they were cheating.
* In another baseball example, catcher Carlton Fisk once managed to confuse a batter by talking about how he knew the batter knew the pitcher was ignoring Fisk and only throwing fastballs down the middle, and the pitcher knew Fisk knew the batter knew but wouldn't listen to when Fisk said he was signalling for curveballs (he was actually signalling for fastballs...down the middle). After an epic performance which included Fisk screaming at the pitcher to throw the curveball and going out to the mound, yelling and waving his arms around, the batter was so screwed up trying to figure out who knew what was supposed to happen he could only watch a third strike fastball go right down the middle.
* In another bit, he talks about the cops sending an APB for a black man between 6'3" and 5'4" tall, and weighing between 120 and 300 pounds. Find this man!
* In another bit of playing with the trope, Zone Tokyo is (in the 'now' of the setting) seeing a secret mini-robot war of its own — with the quirk that
* in another body, then in a flashback cameo, then we see her somewhat worse for wear.
* In another book, a Controller says the word "Andalite!" loudly to a person he suspects to be an "Andalite bandit" in human morph. In reality, he's as close to being right as you can be, as the person in question is Cassie in Rachel morph. But he's satisfied when, without missing a beat, Cassie/Rachel immediately replies as if he had just said the words "and a light".
* In another book, Enid (Elizabeth's best friend) and Todd (her boyfriend) are convinced that Elizabeth has told another guy everything about them when the guy repeats to them things they told her. When he tries the same thing with Jessica, she calls his bluff and later realizes that he stole Elizabeth's diary.
* In another book, Greg climbs up a tree to save a blanket his little brother Manny threw up into it, only for his pants to fall down, exposing his embarrassing
* In another book, Letty visits her friend Hazel's house to send her ex-boyfriend an email (since Letty doesn't have internet access at home.) His new girlfriend intercepts the message and writes a reply warning Letty to stay away from him, but Hazel's mother finds it and assumes her husband is having an affair. Hazel isn't happy with Letty.

* In another Butterfinger commercial, Bart is at bat in a baseball game. Otto shouts for Bart to "Hit a homer". Take a wild guess as to whom Bart sends the ball flying towards.
* In another, Calvin turns the stairs into a waterfall. (Though that was because he and Hobbes were taking turns doing cannonball dives into a full bathtub.)
* In another camera example, many films will add in the sound of a chemical flash bulb firing (a very recognizable
* In another C&H strip, Calvin reaches to pull back the covers and hears Hobbes say, "
* In another, Carl has been infected by a virus that's slowly turning him into a clown. When Frylock can't come up with a cure, he freezes Carl solid and decides to just wait for medical science to advance to the point where he will be curable. A flash-forward into the future then shows Frylock and Shake as senile senior

citizens who've completely
* In another cartoon, a boomerang Wile E. throws comes back with one of the dynamite darts he released earlier.
* In another cartoon, "African Diary", Goofy goes swimming in a watering hole, just as a hippo is getting out, displacing all the water. Goofy dives into a now dry waterbed, but fails to notice and ends up bathing in dirt.
* In another cartoon, Crispy is at a greasy spoon, lamenting how "nobody knows what's it's like to be hunted for food!" Which elects a squawk from the guy he's talking to, a turkey. ("Uh, hold the turkey burger," he nervously says to the waitress.)
* In another cartoon, however, he not only can swim, but can do so very well, claiming that, "When you're a skunk, you learn to hold your breath a long time."
* In another cartoon, "Knighty Knight Bugs", the Black Knight — played by Yosemite Sam — has a dragon that has a habit of sneezing fire (it caught cold for letting its fire get low), often inadvertently scorching Sam in the process. Near the end, Bugs traps them inside a tower full of explosives:
* In another Cartoon Network. commercial, a man tried to use this when his boss was firing him. After a minute of "No I'm not," "Yes you are," the man finally switched to "Yes I am." Unfortunately, it didn't work and the boss replied with "Yes ... you are." The
* In another cartoon, Olive becomes a cop herself, and Popeye thinks it's too dangerous; he tries to protect her, but only messes up and hurts himself each time, eventually being arrested (by Olive, ironically) when he gets involved in a brawl. Then, however,
* In another cartoon, "Pluto's Magic Paws", Pluto is looking for something dog-related to watch, only to find that every channel is showing cat-centric programming.
* In another cartoon, Poopdeck Pappy steals a plane to prove he can fly — and he can't. Popeye is in a hangar and hears an announcement on the PA system:
* In another cartoon, "Puttin' on the Dog", Tom Cat disguises himself as a dog to infiltrate a dog pound. When Tom is ultimately unmasked, he climbs to the top of a flagpole, and ties his own limbs into knots to keep himself anchored there, beyond the dogs' reach.
* In another cartoon, "Showdown", a crook posing as Superman comes face to face with the real deal. He empties his gun on Supes, but of course the bullets bounce off his chest. The crook then throws his empty gun at him, and Superman doesn't even flinch as it too bounces off harmlessly.
* In another cartoon, Tom and Spike are fighting over who gets to stay and who has to leave. At one point Tom sadly packs up a
* In another case, a five-year-old child lapsed into a coma and died after getting into his uncle's stash of illegal drugs and consuming a lethal dose of heroin. The child's family sprinkled some of his Halloween candy with heroin in an attempt to invoke this trope as a cover-up; it didn't work.

* In another case, a Russian criminal who's been trafficking in humans happens to have unwittingly kidnapped the daughter of the former Japanese Prime Minister. Said criminal tries to run to the embassy but they close the automatic gates on her before she has a chance to get in.
* In another case, a Tau world was under attack from the Tyranids, only for a Necron fleet to show up and slaughter them all. The grateful Tau sent a delegation of diplomats and officers to give thanks and properly introduce the Necrons to the Greater Good. The Necrons slaughtered them all.
* In another case, a video was uploaded of the protagonist answering the door; though the video was completely dark, the constant knocking was heard, following by the person at the door claiming the sun came back. In a following tweet, it was claimed that this person began to start banging again... on the window, with their
* In another case in gymnastics, two Russian gymnasts won silver and bronze in the 2012 women's all-around final. Silver medalist Viktoria Komova was in tears after

losing to American Gabby Douglas. On the other hand, bronze medalist Aliya Mustafina was quite happy after winning a tie-break against American Aly Raisman.
* In another case it's first invoked but then subverted. Megaman enters Dr. Wiley's base, but in the course of combat gets his limbs blown off. He desperately crawls on his ruined stumps to Wiley's room, where he finds the other heroes already there. They ask why he didn't use his teleporter.
* In another case of Marvel doing this within itself, 2002's U-Decide event, where a reboot of
* In another case similar to Professor Layton's hat, from Kidou's first appearance in the very first chapter of the first
* In another case, simply removing all audio and replacing it with a voiceover works. So a scene of Lennier, a Minbari, showing the reporter where the station's (mainly Human) homeless live and telling him about the social plans that Sheridan tries to use to help them, while Dr. Franklin rushes past helping a heart attack victim, turns into one in which the aliens are dominant over the Humans, and anyone who objects is sedated and taken away by Dr. Franklin to be experimented on. Plus, the fact that Delenn previously made herself a Human-Minbari hybrid is obvious evidence that they are hoping to make other hybrids using genetic alteration.
* In another case, Skyler tells Hank and Marie that Walter's illicit money came from gambling, rather than admitting he manufactures methamphetamine.
* In another case, the (highly unpleasant) patriarch of a wealthy Zaibatsu family is murdered on a cruise-ship, on his way home from his granddaughter's wedding. It soon turns out that the groom is secretly the son of a man who committed suicide after said patriarch ruined his business. The man even admits that he initially started the relationship in order to get closer to the man, so he could find a way to get revenge - but adamantly insists that he eventually
* In another case, the perp initially got away with murder by framing his victim for the sexual assault of his 12-year-old daughter. When new evidence proved that the killer was in fact the abuser, he was arrested for the new crime, one which guarantees an automatic life sentence without parole.
* In another case, the victim's husband mistakenly thought the victim, a model, was cheating on him with a photographer, when actually the photographer was
* In another case this is invoked in the comparison of Shelob to a cat who has no faith to her feeder (in this case Sauron who calls her this to his amusement) and doesn't recognise him as a master and only cares for herself merely accepting his treats (in this case his prisoners). Their relationship is based on mutual opportunism. However this comparison also makes Sauron appear like any human owner so it merely highlights Shelob's lack of subservience its not to be taken literally.
* In another case where both partners had retired by the time they married, Amy Van Dyken (multiple Olympic gold medals in swimming) and Tom Rouen (NFL punter).
* In another chapter, a convention of police chiefs is being held in Idaville. Encyclopedia comes up with the idea of making up a crime for them to solve, which involves a store owner claiming his store was robbed of a valuable diamond necklace - the solution reveals it was a glass duplicate that was stolen, and his intention was to defraud his store and his business partner for the insurance money.
* In another chapter, Gizmo went insane from a virus while saving the ship. The other crew members fix this by taking his head off (it contains his processors and memory drives), going back in time to just before he went insane, and switching heads, thus bringing his sane head back to the present while the insane one faces the virus (presumably, he can't go even insaner).
* In another chapter, Nozaki spends a day in his protagonist Mamiko's shoes — acting like a stereotypical female shoujo protagonist. Of course, being

* In another D&D campaign world's novels, the smith from the Majere brothers' home town certainly used a hammer in fighting before he had his hand cut off by the dragonarmies' soldiers. Later, he wound up with the Dwarven Hammer of Kharas which (when used in conjunction with the Silver Hand the returning gods blessed him with as a replacement) allowed him to forge new Dragonlances.
* In another deconstruction, many Alethi highprinces don't even adhere to what would be typical "warrior race" traits. For example, some of the highprinces are outright cowards who refuse to go into battle unless absolutely necessary, and will send waves of expendable slaves ahead of their armies to protect the "real" soldiers. They use deception, legal loopholes, spies, assassins, and social mores to manipulate others in a ruthless game of politics. It turns out that when a society is based around ferocious competition to see who is the strongest,

* In another episode, a burglar broke into the Bundy family home while Al was asleep on the couch. As Al woke up, he accidentally touched the burglar on the behind, before realizing what was going on and pummeling the burglar. He was later sued by the burglar for "sexual harassment" and being unable to "work", claiming that Al's punch ruined his career as a burglar, greatly exaggerating his injuries, this along with obvious signs that the burglar's attorney was having a relationship with the judge, and even tried to shake Al's hand with the one in said sling after he won. However, Al got the last laugh when he decked the burglar again, and won a Frivolous Lawsuit of his own by claiming
* In another episode a burglar had been caught and tried in a makeshift community court (which had been designed for small civil disputes) and had been serving his "sentence" locked up in the basement. He escapes and is picked up by the real cops; he's grateful to be in a real jail.
* In another episode, a camo-paint is applied to a cat's fur, causing the feline to become invisible.
* In another episode, a charred bone from a witch's bundle is identified by the boys as that of a newborn baby. Long bones of infants don't have fused epiphyses on their ends, while this one clearly has them.
* In another episode, a computer virus first takes out all personal computers and later the entire Metropolis power grid. Perry doesn't miss a beat, first having his reporters use typewriters and white-out, eventually getting the outdated (but computer-free) printing presses running with the help of the old man who lost most of his hearing running those presses for years.
* In another episode, a concert pianist loses dexterity in his hand. Unlike the football player, he doesn't hold it against his doctor but is still left with a lot of self-loathing and the belief that his gift of music is gone. Major Winchester helps him through it by giving him some sheet music for the left hand only. The man claims that he can't make a career out of those pieces and Winchester is aware of it, but he does this act to show him that, regardless of his physical ability, he still has his gift and encourages him to find other ways to share it with the world. "You and the piano will always be as one."
* In another episode, a cooler containing a body is left in a storage facility for five years. The owner of the facility has no idea what's in it but nevertheless thinks there's something not quite right about someone abandoning a cooler sealed with duct tape, and tries unsuccessfully to get the LAPD to take a look at it. Finally, he has enough and
* In another episode, a corpse is found with evidence of torture, including removed fingernails.
* In another episode, a couple of idiots killed a young woman who'd suffered a drug overdose by transfusing some of their own (incompatible) blood into her. They were imitating an urban legend about drugged-out rock stars "getting their blood replaced" as a remedy. Cue references to

* In another episode, after Steve takes the last cookie, Roger pranks him by making him think that he's adopted and that he was really a child who went missing at a boat show years ago. He destroys all the baby photos of Steve and get him to put on a blonde wig and a sailor suit to go and meet his "birth parents." Upon realizing the truth, Steve admits that he legitimately thinks that it was a totally hilarious prank.
* In another episode, after superluminal travel sends the protagonist back in time, he is still able to communicate with the base
* In another episode, after the group has returned from an investigation at the polar circle, Sheldon is having a phone conversation with his (very religious) mother.
* In another episode, a furious Homer rams his car against the power plant's parking gate, smashing it. The apathetic security guard nonchalantly looks up and opens the remains of the gate.
* In another episode a furrier has one of his trucks hijacked, fills out an insurance report, and looks singularly unenthused when the merchandise is recovered. The thief scoffs at his estimate when caught, calling the furs "worthless".
* In another episode, again Rachel claims that the "Soapy," an award Joey has been nominated for, is the third most important soap opera award there is. She's very excited this time.
* In another episode, a general walks in on a game of two-person strip dominoes.

The guy was down to his skivvies and the nurse was still fully dressed.
* In another episode, Agent P uses a secret entrance that, instead of taking him to his lair, takes him all the way through the earth to Shanghai where he receives his instructions from Major Monogram.
* In another episode, a girl reunites with her family after being missing for several years and was thought to be dead, but the detectives discover the girl is an impostor because her tattoo doesn't match. The missing girl's older sister believes the impostor had something to do with the girl's disappearance and might know if she's alive or dead.

* In another episode, a guy was stalking a woman and ended up kidnapping her. One scene shows them sitting at a table and talking, until the woman raises her hands and it's revealed that she's tied up.
* In another episode, a husband's conviction for the murder of his wife hinged on the theory he stole a brooch from her body the police later found with his mother. The defense brings in identical brooches to challenge the DA to prove the one they have is the right one. The victim's lover identifies the brooch from an engraving she'd made on the back of it.
* In another episode, a husband tells the team how he regretted cheating on his wife with an old friend while said friend thought differently.
* In another episode, a jogger had a heart attack in the park. When one of the officers on scene stepped into the bushes to, ah,
* In another episode, a kid claimed to have run over and then murdered a woman in a red dress because she looked like a prostitute out of a suspiciously GTA-esque video game, to the point where he was loudly describing the murder on the witness stand while his thumbs were furiously moving around in his lap and supposed mimicking the buttons one would push in the game. Inverted, because the A.D.A. saw right through his bullshit.
* In another episode, alien music begins to mutate those who listen to it. As those who haven't listened to the music investigate, they learn that
* In another episode Al makes a deal with the devil and when the devil comes to cash in, he tells Al he will be in hell forever and he can never see his family again. Al is euphoric.
* In another episode, a man is convicted by the DA's office of murder, only for the detectives to uncover proof that he didn't do it. Everyone immediately suspects that the man's wife is the one who framed him, and set up a trap. They make up different evidence that proves the defendant's innocence, and say that as long as the murder weapon remains unfound, the charges will be dropped. The very next day, the defendant's wife "miraculously" finds the weapon and tries to turn it in to the DA in order to "prove her husband's innocence". The DA then explain that only the killer would know how to find the weapon, and the defendant quickly realizes that it was she who set him up.
* In another episode, a man is on trial for the attempted murder of his wife's lesbian mistress (a controversial writer). He steadfastly argues his innocence until the evidence becomes overwhelming... at which point he confesses and the prosecutors drop all charges. Because the evidence now proves that his
* In another episode, a man rings the doorbell to the student's flat. He is accosted by a policeman:
* In another episode, a man spent 17 years in prison for stealing a valuable watch simply because his attempt to flee the scene caused a ridiculous amount of property damage by complete accident.
* In another episode, a man wakes up after a night of drinking. When the woman next to him wakes up, she has no idea who he is, although he insists he's her husband. He spends the rest of the episode trying to prove who he is. In the end,

* In another episode, a man who is drowned in his own fish tank reincarnates as a creepy, telekinetic little girl who, after taking revenge on her murderers, telekinetically shatters the same fish tank.
* In another episode, a man who knows he's dying is meeting his friends for one last party, but dies before he can make it there. His friends then steal his body from the morgue and throw the party anyway, with the body as the guest of honor. In the morning, they leave the body sitting outside on a park bench, with a party hat and a cigar. Interestingly, what they did is not implied to be sick or wrong, but instead a touching, if perhaps a bit unwise, attempt at honoring the last wishes of their dead friend.
* In another episode, a man with an established motive confesses to murdering the victim to protect his sister (who had killed the victim unintentionally and in self-defense).
* In another episode, a murder suspect claims to have left his job at "5 o'clock. On the button." When the detectives question his boss, DS Matt Devlin gets suspicious when the man uses the exact same phrase. While he's correct in suspecting that the two are lying and rehearsed their stories, the thought that either man could have simply picked up the phrase from the other after years of working together never occurs to him.
* In another episode, Amy has a Christmas party featuring extremely boring Victorian era party games.
* In another episode, an AI comes to this conclusion about humanity, determining that humans will always turn to violence as a primary means of resolving their differences. It seems to be proven wrong, when characters from both sides of the
* In another episode, an aristocratic woman has invited one of the footmen to visit her bedroom at night.
* In another episode, an army helicopter pilot is revealed to have diabetes. He kept it a secret for this long by scrounging his own insulin and watching what he consumes. He doesn't want to lose his career as an army pilot, but since it's inevitable when his disease is exposed, he accepts this graciously by the end of the episode and, from what he says, appears at least willing to accept a desk job.
* In another episode, Andy is eager to go on a business trip with Michael because "the old ball and chain has been more chain than ball." Fiancee Angela angrily points out that she's right there.
* In another episode, an elderly monster recounts a story how he scared a brunette
* In another episode an escaped convict tries this on Marge, but waits on the backseat of the wrong car.
* In another episode, Angela is trying to put together a toy for her son, but the included instructions say things like "put to bumblebee make happy." The illustrations aren't any more helpful, so she winds up paying three times more to get an associate at the store to put it together for her.

* In another episode, a slew of young girls have been seduced by a man they believe to be their biological father (the result of a sperm donation he made in college). Mercifully, he actually isn't (he's impersonating the real donor, jealous of his perfect life—beautiful house/family/career and trying to destroy it), but that doesn't change the fact that he used their supposed biological connection to cajole them into bed. By the episode's conclusion, he's bedded the man's actual daughter (a child that he had with his wife and raised, rather than just being a donor) under the same pretext, claiming that her mother had an affair with him and

he's the daughter's real father.
* In another episode, a slightly different version after Ted and Robin have a fight:
* In another episode, a soldier whom Hawkeye operated on insists on paying him back for saving his life. Unfortunately, the soldier is a hulking bruiser whose idea of repayment is to intimidate and bully anyone who isn't unfailingly nice to Hawkeye.
* In another episode, a superhero wannabe helps take down one of the bad guys. Gibbs goes to shake his hand — and the guy instead performs a martial arts-style bow, which Gibbs returns.
* In another episode a tape Ross and Rachel made (by accident: Ross was trying to practice flirting) is discovered. Rachel managed to get pregnant from this exact encounter, and the two are arguing about which of them made the first move. The video contains the seduction, so the friends end up watching its clothed portion to put the matter to rest. As the episode's closing gag, Ross and Rachel watch the non-clothed portion in private... only to turn it off in horror when they see how bad they look during the act.
* In another episode, a team of pursuers tracked Genma down by following the trail of signs he was leaving behind.

Then management recasts Bender as a Heel and orders him to starting throwing fights. Bender refuses, until management schedules his next match against a giant kill-bot, programmed to destroy Bender if he goes off-script.
* In another episode, Betty Rubble gets a job as an old lady running errands for a handicapped woman. Betty was given $100 bills to make purchases no more than a loaf of bread. The bills were counterfeit as part of a press set up by the woman for whom Betty is working. When Betty and gang realize what she is being manipulated into doing, they try to trap the counterfeiters by handing over one of the phony bills, but are too dumb to suspect that the crooks are on to them when the woman inexplicably gives Betty a mere $20 bill. That turns out to be legal tender so the police don't believe their story of a counterfeiting operation when they turn it in.
* In another episode, Bill is approached by a stereotypical trenchcoat-wearing flasher. After whipping open his coat to apparently flash Bill, he turns out to be an example of this trope when Bill buys something off him.
* In another episode, Bloo started his own foster home for imaginary friends, which was nothing more than a cardboard box.
* In another episode, Bob and Midge bring separate dates to Red's birthday dinner (they were separated at the time). Over the course of the dinner, they actually start flirting with one another, culminating in them kissing, then this:
* In another episode, Bobby and Joseph are trying out a book full of pranks but they keep accidentally achieving positive results. For example, trying the classic salt shaker spill on Connie causes a nearby girl to invite her to lunch.
* In another episode, Bobby is punished with summer school because he wrote in his Texas History textbook. Hank is upset, but then he finds out that what Bobby wrote was a speech Hank had given earlier about the Alamo, presenting the bare facts rather than the "pop history" version that depicts the Texans as drunken cowards. Smiling, Hank says that since Bobby has to take summer classes anyway, he might as well skip school the next day and they both take a trip to Six Flags.
* In another episode, Bobby tries to lie to cover up that Joseph made out in the janitor's closet, but Hank is not impressed:
* In another episode, Bobby tries to object to a line of questioning as "work product". The judge incredulously responds "'WORK PRODUCT'?"
* In another episode, both Annie and Shirley try to set up Abed with girls. Abed doesn't tell his dates about the other as he wants to

* In another episode, Captain Atom angrily charges at Superman, who flash steps away,
* In another episode, Captain Solok has been hassling Benjamin Sisko across the known galaxy for the past two decades, all in the name of proving that emotional, illogical humans (like Sisko) are inferior to emotionless, logical Vulcans (like himself). Somewhat subverted by the end of the episode, when the Deep Space Nine crew successfully goad Solok into losing his temper, and it's generally implied that Solok is by no means representative of Vulcans, and
* In another episode, Carla's brother gives The Todd a pickup line for Spanish chicks. It doesn't work.
* In another episode, Carl is assigned to an undercover operation with an attractive female partner. When the criminals reveal the diamonds,
* In another episode, Carter and Peter go to play polo at a country club, and Carter is stuck with "Topsy the Roid Rage Horse". The horse begins mauling him, and Peter tells him to "submit" (he meant apologize). Carter then takes off his pants and the camera focuses on Peter exclaiming "Oh my god!"
* In another episode, Carter gets caught in an explosion when trying to prep a bomb for sabotage. The others manage to pull him out of the wreckage and ask him if he's alright. His response is a very dazed "Hello, Mom."
* In another episode, Cartman bets Kyle 10 bucks that his Christian rock band will sell a platinum album before him. It backfires
* In another episode, Cartman tells Butters that the government is watching everything they do, and Butters misinterprets that as the government is a literal benevolent god. He and a handful of converts start confessing their sins at the Department of Motor Vehicles like actual church and this

* In another episode, Cartman tried to spread 'meekrob' as a swear word. Then it turned out that 'meekrob' was a word that offended God.
* In another episode, Castle and Beckett are abducted by government members and questioned about data the government believes them to possess. They are injected in the neck and returned to their car. (It is set up to appear like alien abduction, as this is what their current case looks like.)
* In another episode, Castle jokingly answers the phone by saying, "No-Hassle Castle." We only hear his side of the conversation, but apparently Beckett threatens to start calling him that.
* In another episode, Castle's agent tells him that he might be about to get an offer to write books about "a certain British spy" who uses lots of gadgets. Everyone manages to get through the entire episode without actually saying "
* In another episode Catherine (again) catches a woman who killed her daughter by which way the woman was looking when she was talking to Catherine. Catherine deduces that the woman was looking left and therefore lying. To be fair, she only brought it up after using a forensic demonstration to learn that no-one
* In another episode, Chandler and Joey make a bet with Monica and Rachel that the guys know more about the girls than the girls about the guys. Monica (in her usual ultra-competitive self) raises the bet: if the girls win, the guys must get rid of the chick and the duck, but if the guys win, they have to exchange apartments. In the end, when neither Monica nor Rachel are able to remember
* In another episode, Charles has to deal with a wounded GI who moonlights as a securities salesman and keeps pestering the other patients in post-op. He finally shuts the guy up by telling him he's damaged his "latrickium" and is in danger of permanently losing his voice if he doesn't go 48 hours without talking.
* In another episode, Charles starts dating a Korean B-girl, who apparently likes to spread vanilla pudding on her meatloaf.
* In another episode, Charlie gifts President Bartlet, who loves antiques, with a map of the Holy Land region of Southwest Asia dating back to 1709. Bartlet wants to have it framed and hung in the White House, but Toby (who, as mentioned above, is Jewish) tells him he can't, because Israel isn't on the map. A confused Bartlet points out that the nation of Israel

* In another episode, Dad is trying to watch a golf game on tv. Dexter takes this as an opportunity to bond with him and learn about sports. Dad is initially ok with this, but Dexter's lack of knowledge about golf, and his excessive curiosity causes him to talk constantly and asks questions, and get terminologies incorrect, resulting with Dad missing every play when trying to explain things to him.
* In another episode, Dagget has ingested a large amount of a stupidity-inducing potion...except that he was already pretty stupid to begin with, so it actually made him a super-genius. He then ponders what happened to Norb (who responded to the potion exactly as expected). Cut to Norb on a
* In another episode, Dale sues the tobacco companies, lying to claim that years of secondhand smoke have made his wife unattractive and destroyed his marriage. When he discovers that the company has (electronic) bugs planted in his house, he tries to exploit it by insulting Nancy at every opportunity, which completely destroys her self-esteem and nearly
* In another episode, Daniel and Sam get Sam's father's help to save Jack and Teal'c who are stuck in a runaway X-301. Jacob pushes the transport ship's engines too hard, and they end up dropping out of hyperspace in a "bad neighborhood". Almost immediately, a Ha'tak arrives to challenge the arrivals. Jacob has Daniel (who speaks Goa'uld) distract the Goa'uld on the Ha'takt using a
* In another episode, Daphne is looking through a telescope at the surrounding buildings and describing what she sees including a man she thinks is mopping up a pool of blood. Martin takes a look and tells her it's just tomato soup that the man knocked over, there's a can on the counter behind him.
* In another episode, Daphne wants to prove herself by throwing a party at Niles's apartment without any help. As is often the case in this show,
* In another episode Daphne worries that if Martin gets married his girlfriend will make him fire her. Niles, who's secretly in love with Daphne, attempts to console her but quickly starts tripping over himself.
* In another episode, Data he becomes "pen pals" with a young alien girl.
* In another episode, Dave lectures the staff about how important the office security system is and how he doesn't want them trying to circumvent it. Beth protests that they're not circumventing it, they're "just trying to get around it."
* In another episode, David and Colby are cornered by an armed suspect. Using hand signals to indicate to Colby what he's doing, David manages to
* In another episode Dean and Sam split up and Sam takes a job as a bartender. Some other hunters find him and try to talk him into helping on their current job, but he says he's retired, to get his head together. One of the other hunters says,

"What is so important that you can't come back to prevent
* In another episode Dean returns to a foster home where he briefly stayed as a boy. He is then reunited with the girl who was his first real girlfriend. She does not seem to remember who he was but then reveals that she remembers Dean quite well and is still pissed at him for leaving without an explanation the day they were supposed to go to their first dance together. She represents a life that Dean could have had if he chose to remain with the foster family rather than go back to his father and Sam.
* In another episode, declaring that she doesn't need the help of someone with sight to help put up posters, she glues the wrong side of the poster to a wall. "It's upside-down, isn't it?"
* In another episode, Dennis is mistaken for a gigolo while lounging around a country club.
* In another episode, despised neighbor Frieda Claxton dies of a sudden heart attack after Rose tells her to "drop dead!" Mrs. Claxton has no family to take care of the final arrangements, so to assuage Rose's guilt, the housemates undertake the matter. The only person who attends besides the four main characters is a woman who gives a beautiful eulogy...then realizes she's at the wrong funeral. When she finds out whose funeral it really is, she kicks the coffin. Then the funeral home cremates Mrs. Claxton by mistake.
* In another episode, Dewey begins dancing with his elderly babysitter, who
* In another episode Diane drags Sam to an art museum. On their return, she claims he enjoyed himself and learned a lot, but Carla asks him to name a single piece of art he saw there. He's unable to.

* In another episode, DNA links a suspect in one crime to an unrelated rape case, but that case is beyond the statute. It's linked by MO to several more recent rapes, but there was no DNA in those, and the victims can't identify the suspect.
* In another episode ("Dog Dale Afternoon"), after Hank successfully escorted Dale out of the college watch tower in which the police mistaken him for a sniper when he was actually exterminating bugs, a vigilante sniper locked in on Dale and Hank jumped in taking the bullet for him. Good thing Hank was wearing a bulletproof vest.
* In another episode "Dog Tags", Abby clears the name of a German Shepherd she has named Jethro.
* In another episode, Donald has an assembly line of gifts to wrap for the holidays and gets singled out by the foreman for not working adequately compared to all of his co-workers.
* In another episode, Don Karnache's sky pirates use a musical number to distract the ducks while they're being robbed. Launchpad finds it so catchy that he stops flying the plane to watch the show, and after the inevitable crash, he continues humming the refrain.
* In another episode, Don stole one of Sally's panties while she was doing laundry. He tried using this trope:
* In another episode, Doofenshmirtz admits that he really likes that
* In another episode, Dorothy, Blanche and Rose accidentally book a vacation at a clothing-optional hotel. They later decide to go with the flow and go to the dining hall completely naked, only to discover that you have to have formal wear on when at dinner. To add insult to injury, a waiter tells them that everyone would appreciate it if they stay dressed at all times from then on.
* In another episode, Doug and Patti are going out to a movie, and afterwards, Doug suggests they go to a cafe for some coffee. Patti says she hates coffee and it

tastes like chalk. Doug agrees.
* In another episode Drake and Josh bet who can get more dates in a week. If Josh wins, Drake has to give up his loft bed to him while Drake gets Josh's perfect attendance trophy if he wins. Drake ends up falling in love with the first girl he meets and stops caring about the bet so he can date her exclusively, so Josh wins this one. However, after Josh injures himself climbing out of the loft bed at night, he requests that he and Drake switch back.
* In another episode, Drakken mentions that his cousin, Motor Ed, is the Black Sheep of his family. Probably because Drakken himself has thus far managed to hide his own

* In another episode, Dr. Hibbert gives Marge a DVD of a Lifetime movie called
* In another episode, Dr. Statham steals a patient's gallbladder on the operating table and ends up trying to eat it. This, of course, is normal behaviour for Dr. Statham.
* In another episode, drug users went to the cops to report a serial killer. They were ignored because they used drugs.
* In another episode Ducky and Palmer are held prisoner by some Cuban spies and forced to autopsy their dead colleague to figure out where he had hidden a flash drive full of stolen files. The two pathologists use the cabin's stove, a cigarette, some autopsy supplies and gas extracted from the corpse's digestive tract to make a bomb that takes out one of their captors and distracts the others long enough to allow them to escape.
* In another episode, during a soccer riot, someone knocks over all the beer Barney was carrying, which makes him so angry, he lets out a loud yell before plowing through the crowd like a battering ram.
* In another episode, during the Invention Exchange, Joel presents a more practical use for this trope: leaving reminders for yourself.
* In another episode, Earl subverts this. When Charlene develops a scent that makes her attractive to an older janitor, Earl is fully prepared to play this trope straight and forbid the two from marrying. But the janitor is so much like Earl in both appearance and personality that the two immediately bond and Earl gives his blessing to the union, to Charlene's horror.
* In another episode, Eddy imitated Edd by saying "filthy, filthy, filthy." Even Ed lampshades it.
* In another episode, Eddy makes a home movie for his older brother to prove that he's not a little kid anymore, and near the end has a big party with all the kids in the neighborhood replaced with crude cardboard cutouts strapped to the backs of Rolf's stolen chickens.
* In another episode, Eddy tries to get revenge on Kevin for ruining one of his scams, and one scheme he has is hitting him over the head with Ed's rotting, moldy lunch bag. Eddy tells Double D to hit him since he's the only one of the three that wouldn't look suspicious approaching Kevin. When he refuses, Eddy and Ed tickle him until he's right behind Kevin.
* In another episode, Ed pulled of a subversion of this of sorts. He figured out Eddy's brother's complicated treasure map like it was nothing (the map was supposed to be superimposed over Eddy's face at a certain angle). When Edd was baffled and asked him how he did it, (essentially) said it was because he and Eddy's brother were
* In another episode Eek gets hit by a shrink ray and meets Elvis (not named as such, but he looks like Elvis at least), who had a shrink-ray related accident years ago. After the episode, he gets back to normal size, remembers who he is, and
* In another episode, Elaine and Puddy have won a trip to Hawaii, but the two get antsy during those several hours and get into an argument. Another passenger sitting next to them is also an unfortunate casualty of this. When the plane finally lands in Hawaii, Elaine and Puddy part ways... only to end up in the same taxi. And their seatmate

* In another episode, Elaine goes to a bar mitzvah and the kid tries to make out with her immediately after being officially declared a man. She tells him that he's still not old enough to be a real man, so he calls the bar mitzvah a sham and renounces Judaism. His father then tries to make out with Elaine, interpreting her "not old enough" comment as evidence she was interested in

* In another episode, Father Mulcahy is trying to come up with something nice to say about Winchester. He finally says "He's a VERY good doctor."
* In another episode, Ferguson gets a new rich friend who Clarissa discovers is her secret admirer and is only using Ferguson to get to her. When trying to figure out how to tell Ferguson gently, Clarissa declares, "I don't want him crushed, only slightly dented!"
* In another episode, Finn has a dramatic musical moment on top of a grassy mountain. The mountain then gets up & turns out to be the cyclops Finn was looking for at the beginning of the episode so he could use his tears to heal his broken leg. Finn no longer cares about that but the cyclops tries to kill him anyway because he doesn't believe him.
* In another episode, Flanders is driving Homer to the big game only for Homer to make him duck so that Lenny and Carl don't see him. Once they see Homer in the passenger seat of a driverless car in motion...
* In another episode, Florida (who dropped out in the 11th grade) employs this trope because she wanted to set an example for the children as well as have an accomplishment outside of being a wife and mother. James (who dropped out in the 6th grade) forbids her from going to school because he was insecure about having a wife who was more educated than him. Florida drops out, preferring to keep peace in the home. In the end, the kids and Willona convince James to allow Florida to resume her studies, with James deciding to enroll as well.
* In another episode, Francine becomes a real estate agent and Stan chastises her for selling a house in their neighborhood to a well-known openly gay couple. She is about to defend it but it turns out he doesn't like them because they are reporters. It actually becomes a
* In another episode Fran gets a famous lawyer to represent her in court, who she says does a lot of
* In another episode, Fran is in Atlantic City and runs into Steve Lawrence and Eydie Gorme by a poster advertising their engagement that night. Fran thinks they're impersonators, even when they start singing, and begins telling them how their performance should be. Humorously, after Fran leaves them, Steve talks to Eydie about how Fran is correct about one of her points ("She's right, you do need to look at me adoringly." "I ALWAYS look at you adoringly!").
* In another episode, Frank claims a Purple Heart because when he cracked open his breakfast egg some of the eggshell got in his eye. The official medical records read
* In another episode, Frank has been dumped by his longtime girlfriend Billie over a misunderstanding. He does (as Earl puts it) the one thing you should
* In another episode, Franklin is upset because he got scared by a spooky noise in the basement, so his dad gives him a little tickle under his arms to cheer him up.
* In another episode, Frasier begins having a bizarre dream. He spends the entire episode over-analyzing and racking his brain trying to figure out what the dream means and what its trying to tell him. He finally concludes that since he had been complaining about being bored at work, his brain invented some overly complex problem to keep him entertained. Simply "having a weird dream" wasn't enough.
* In another episode, Frasier dates the woman who was the head cheerleader when they were in high school- and finds her shallow and repellent. Niles still drools over her.
* In another episode, Frasier is actually dating an ex-Victoria's Secret model who previously dated an NFL player, and is going to the Galapagos Islands to research for her PhD. Through a string of unlucky circumstances, no one meets her, so they assume Frasier is making her up.

* In another episode Frasier is due to perform a solo as part of a PBS fundraiser. As the telethon is airing on February 29th he decides to "Take a Leap" and perform a challenging aria from
* In another episode, Frasier takes a call on his show from a woman who is concerned about the fact that her husband keeps his late wife's ashes in their bedroom. The conversation ends with the sound of breaking ceramics, and the words, "Oops... I have some vacuuming to do."

* In another episode, Freeze encased Miss Iceland in a block of ice, hoping that lowering her body temperature would make her fall in love with him... somehow. Batman frees her by bashing the block with an ice pick. When she steps out, she doesn't even appear to be cold. After she is liberated from her ice coffin by Batman, he ironically uses it on Mr. Freeze to preserve his life until they can move him to a better installation, making him an example played straight.
* In another episode, Friday and Gannon deal with an officer who got angry at being called a pig and having his uniform shirt torn by a drunk man. It's a crossover, with
* In another episode Friday gives the same speech to a store owner when he comments that the police always put more effort into catching someone who has killed a cop than someone who has killed a civilian.
* In another episode, Friday is picked as a defender by a cop accused of taking a bribe from a bookie. He said it was because he knew Friday would pull out the stops to defend him if he really was innocent. Friday agreed, but contended he made a lousy lawyer because he'd want the guy convicted if he was guilty. Ultimately, the guy is found guilty of a couple of the charges, but not all of them.
* In another episode from the first season, Nog was told to get rid of some Cardassian packaged food that had been delivered to the bar, since there were no more Cardassians on the station who would order that food. Jake Sisko and Nog sold the food to a trader who gave them self-sealing stembolts that a Bajoran farmer had ordered but had been unable to pay for.
* In another episode, Fry stores milk in his hat for so long that it takes on the consistency of cottage cheese.
* In another episode, Garfield is giving a lecture on Odie. At one point, he pulls down a pie chart, made with a real cherry pie, meant to represent Odie, to explain what a dog like him is made of. According to Garfield, two tiny pieces of the pie, which he eats one at a time, represent Odie's brain and common sense, respectively, while the rest of the whole pie, which he then eats, represents Odie's tongue.
* In another episode, George and another man try to park in the same

* In another episode, Hank complains that Brent doesn't do anything special like other gas stations, like giving away promotional cups, having contests to win great prizes, or offering a free car wash with purchase of gas. Brent then offers to let Hank have free run of his house, wash his truck with the garden hose, take any cup from the kitchen to keep, and eat all of his food, as long as Hank pays for the gas he's currently filling his truck with by the end of the day. Hank replies, "There's always a catch with you!"
* In another episode Hank gets a box so Bobby can hide his Treasure Troll "action figures" from people coming to tour the house, Dale points out "Aren't they called troll "dolls"?", and Hank sighs and says "yes".
* In another episode, Hank gets his old football coach to coach Bobby's team. His solution for anything is "take a salt tablet".
* In another episode, Hank is a member of the city council because he objects to the new law that makes it illegal to install normal toilets in Arlen; it turns out that one of the other councilmen owns the company that makes low-flow toilets and got the law passed. The other councilmen have never used the new toilets, but since city hall has them installed, Hank pulls a filibuster until everyone needs to go to the bathroom and realizes that they're junk.
* In another episode, Hank is trying to persuade a skeptical Artie that he can be the host at a celebrity roast planned for Larry, and to prove it, asks Artie to stage being a heckler:
* In another episode Hank's driver's license is misprinted to say that he's "Female." While he's trying to get it fixed the DMV worker calls him "ma'am" as if actually confused about his gender. Hank blows a gasket.
* In another episode, Harold finds Grim's scythe and starts advertising it:

* In another episode, he not only deduces that someone is a closet gay, but also his alibis, because when questioned he said "I was at home with my girlfriend" rather than "I was at home with Lesley"—thus showing he was afraid of saying that his girlfriend's name was a potential man's name and letting Fitz think he was at home with a man (because, of course, everybody normally says "I was at home with [name]" to complete strangers, despite the stranger not having a clue who [name] would be).
* In another episode he read "Kelly, USA" as "Kelly Usa" and referred to her as an "exotic lady from
* In another episode, Hermes and LaBarbara Conrad unwittingly vacation at a forced-labor "spa". However, the episode also subverts the trope: Hermes is freed after he uses his organizational skills to rearrange things so that all the labor can be done by "a single Australian man," making all the other slaves redundant.
* In another episode, he's able to bring a priest up on sexual abuse charges for crimes that were technically well past the statute of limitations, by arguing that his attempt to bribe a cop (who was one of his former victims) to keep his mouth shut constituted a perpetuation of his crimes and therefore reset the statute. In fact, the major court arc in that episode is the arguments over whether the statute should apply or not; as soon as he realizes it's going to go through, the priest pleads out.
* In another episode, he's been caught in a snare by poachers who mean to leave him there. He comments "It pretty chicken thing to do to King of Jungle!" A poacher replies "If there be one thing I like, it be 'Chicken à la King'!" A few scenes later, back home, George starts laughing "Ho ho! Chicken à la King!"
* In another episode he shakes hands with a succession of people; after the last one, he immediately turns to his assistant for a wipe. The problem being, the last handshakee is black, leading to much accusations of racism.
* In another episode he takes forever to finish reading a very short poem, but

instantly grasps what its symbolism is about.
* In another episode, he temporarily retires when he thinks his occasional absences are having a negative effect on Gosalyn (who hadn't been behaving in school as of late).

* In another episode, Jack confronts his new boss for focusing on a child kidnapping case at the expense of the disappearance of a lesbian case worker...which is
* In another episode Jack gets drunk with his old navy buddies and they give him a tattoo. He goes to the hospital for an operation to remove it while Janet tries to convince him not to go because she thinks the operation is a vasectomy. Even worse, Mr. Furly thinks Jack is going to have a sex change.
* In another episode, "Jack in Space", Jack fights a giant robo-gun in space and reflects their energy blast with his sword, getting a good backwash of electricity himself. The explosion sends Jack plunging
* In another episode, Jack is in a museum looking at a painting and Liz walks up behind him, to have him address her by name without turning around. It's subverted when he admits that she isn't the first person he addressed that way since he got there.
* In another episode, Jack was captured by the bad guy of the week and tried to convince him that he's a
* In another episode, Jack, who is actively trying to corrupt Kenneth and test his virtue, traps him in an elevator with eight other people and informs him that since there is only enough oxygen for eight to survive long enough to be rescued, one person has to die (via the conveniently placed pistol in the phone box). Kenneth immediately grabs the pistol and tries to blow his own brains out, and when it turns out to be unloaded (duh), tries to strangle himself with his belt. This causes Jack to flee from the elevator,
* In another episode, Jake and Amy are in a contest to see who can arrest the most escaped fugitives. In a tie, they both corner the final fugitive and begin rushing through the Miranda rights as fast as possible to be the first to finish and win.
* In another episode, Jake flipped off his teacher. Charlie decides to learn Jake's various ways to covertly flip off people: itchy-eye (scratching your eye with your middle finger), "read between the lines" (also sticking up the ring and index fingers) and the cranker - flipping the bird slowly jack-in-the-box style. The latter lacks plausible deniability.
* In another episode, Jake is in a hot-air balloon, which gets stuck in a tree, which makes him cry out, "Mommy?"
* In another episode, James Franco hires Jenna to be his beard for the tabloids, in order to throw off rumors that he's in a relationship with an anime body pillow.
* In another episode, James is showing off his chocolate Nativity diorama:
* In another episode, Jarod is pretending to be a bounty hunter. When he meets a rival, she asks him what his name is. He gets his alias, Jarod Green, from reading a Greenpeace flyer in the background. The rival then says her name is Peace.
* In another episode, Jay comes home from a business trip early and opts to stay in a hotel while claiming he's still away on business. He's just trying to get some decent sleep (his pregnant wife is snoring a lot) but when she finds out, she naturally assumes an affair.
* In another episode, JD has been assigned to videotape the birth of Dr. Cox's friends' child. Too bad JD used the tape that was already in the camcorder, which had the protection tab removed. Thus JD didn't tape anything. Efforts to videotape another baby's birth and swap the tapes are enough to fool the new parents, but fail miserably to convince Jordan.
* In another episode, JD tosses his friend Turk's basketball down a hospital hallway only to have it popped on the security guard's hook hand. JD apologizes to

Turk and comforts him with the line "Relax, they come three to a can."
* In another episode, Jeff is trying to get Troy to take up football again.
* In another episode, Jenna watches some television in an attempt to not wet the bed during a sleepover. Not the best idea, as the only things she sees are along the lines of a Scotsman patching a wee leak in his bagpipes and a
* In another episode, Jerry dates a woman who is essentially a female version of himself. He starts getting creeped out when she uses "
* In another episode, Jerry falls for a woman named Chang over the phone, believing that she's Chinese - but it turns out she's Jewish. The family name was originally "Changstein."
* In another episode, Jerry talks about the gesture (and how ridiculous he thinks it is) in his stand-up routine, saying he would be more offended if somebody gave him "the toe."
* In another episode Jerry the best friend and next-door neighbor is suspected of cheating on his wife when he's seen lunching in a restaurant with another woman. She turns out to be a marriage counselor.
* In another episode, Jesse and Becky decide to make lists of all the people they dated before they got married, and Becky eventually just starts making up names such as "Larry Couchman" (she was sitting on the couch.)
* In another episode, Jesse "invents" a face guard for spraying hairspray without getting it in your eyes. He then gets sued by the original creator.
* In another episode, Jessica and the local sheriff find a matchbook inside a woman's car after the car was pulled out of water with the woman deceased. The two argue as if the only and mutually exclusive possibilities are that the woman stopped there the night she died, and that the matchbook was planted or placed there. This is treated as an important clue, as if there are no other ways a person might have some detritus like a matchbook in their car.
* In another episode, Jinx spells out her name for Madame Rouge. This might have something to do with the fact that many fans keep misspelling her name as "Jynx."
* In another episode, Joan realises the guy she's currently seeing lied to her about being married. Sherlock does some digging and confirms the man has a still-valid marriage registered. When Joan confronts him the guy admits that he married a woman he met while volunteering for a charity so she wouldn't get deported back to her war-torn country. He stresses that they have no real relationship and are waiting until they can quietly divorce without risking her citizenship. Joan is impressed by his compassion but he dumps her when he learns how she found out about the marriage.
* In another episode, Joe gets a new police cruiser which has a robotic system for painlessly subduing perps and placing them in handcuffs. When Cleveland tries it out — Joe's sudden realization and shouted warning a second too late — a computerized voice yells out that he's resisting and arms come down and start beating him with batons. It goes further, crying out "Look out! He has a gun" and planting evidence.
* In another episode, Joel invents the Steve-O-Meter, which measures whether a given idea
* In another episode, Joe tickles Gomamon, but it's offscreen and only in the English dub.
* In another episode, Joey (again) is having to abstain from sex for a period of time for a well-paid scientific study, but then has a date with a gorgeous girl and ends up in bed. He manages to subvert the problem by following Monica's advice to "be there for her" without giving in himself.
* In another episode, Joey finds out that his father has a mistress. As it turns out, his mother already knew and is fine with it.
* In another episode, Joey is on a date, a date that ends poorly when she steals a few french fries from his plate.
* In another episode, Joey's at dinner with a woman who specifically tells him not to touch her dessert while she's in the bathroom. When she comes out, he finishes the last bite with a smile and says "I'm not even sorry."
* In another episode, Joey says he will buy the Knicks and put Rachel on them if

they collectively win the lottery:
* In another episode, Joey walks into a room, where Ross suddenly accuses him of proposing to Rachel - Joey "realises" that "This isn't the right room!" and quickly escapes.
* In another episode, John Casey kills off a bad guy right in the middle of said baddie giving off
* In another episode, Johnny goes on a date with a deer. No, not a humanoid deer, part-deer human, anything like that - an actual, albeit talking, deer.
* In another episode, Johnny goes on a date with a woman who turns out to be a werewolf, and he's actually desperate enough to try to make it work, until he discovers she's hiding an even worse secret.
* In another episode, JoJo's teacher, Mrs. Kersplatski, decides to roll call everyone by saying their last names first. Of course, this leads to JoJo's best friend Skeebo tickling her, since her name "Tickle, JoJo" sounded like an instruction.
* In another episode, Jon accidentally buys a fern that turns out to be a
* In another episode, Judy flunks her driver's test because she has trouble parallel parking. While they're out driving, Doug tries to encourage her to practice and try again. Finally he reveals the reason why. He had promised Patti that she could drive them to Bumper Car Mania that weekend. Upon hearing this, Judy becomes enraged, and starts chewing out Doug, during which time she successfully pulls off a parallel parking job. She doesn't even realize it until Doug points it out to her. Turns out she just had to not really think about it.
* In another episode, Kaeloo and Stumpy both set up market stalls. Kaeloo's is full of fresh apples, and Stumpy's is full of rotten ones. Later, Kaeloo finds all her apples stolen. Stumpy says he swears he didn't steal them, even though the fresh apples are in plain view at his stand.
* In another episode, Kaeloo uses Stumpy's "I hate your guts" catchphrase on Mr. Cat (though it's more for comedic effect than actual hatred).
* In another episode, Kagome, wanting to apply treatment to Inuyasha's wounds, orders him to undress, much to his protests.
* In another episode, Kara and Mon-El travel to a moon in a red sun system, causing both of them to lose their powers and having to free a group of slaves about to be sold using their wits. Notably, Mon-El is about to be shot by a slaver, only to be stopped by a Dominator, who
* In another episode, Karen and Jack are coming up with some type of revenge against the English Lorraine Finster for stealing Karen's husband. Jack's idea? Make her watch the American version of anything British.
* In another episode, Kathy tricked Katori into hiding in garbage in order to spy on someone.
* In another episode, Kenan and Kel are looking for actors to pose as Kenan's parents during a parent/teacher conference (
* In another episode, Kenan tries to ask a girl to the Valentine's Day dance over the phone but gets rejected, claiming that she has to wash her hair. Kenan then remembers that the girl is bald.
* In another episode, Kevin the Sea Cucumber sits in a fetal position and cries for his mommy and blankie when attacked by a King Jellyfish. The other Jellyspotters join in shortly until Spongebob saves them all.
* In another episode, Kino finds a country so likable that Kino nearly breaks the three day rule of staying in one place, yet the townsfolk mysteriously refuse to let her stay longer. When Kino leaves, the next day she wakes up to find the country destroyed by a nearby erupted volcano.
* In another episode, Klaus does this when Hayley accidentally dissuades Stan from putting Klaus in a human body, which
* In another episode, Klinger is on guard duty when Margaret speeds in with an injured Col. Potter in tow:
* In another episode, Kowalski's attempt to boost his intelligence backfires and makes him stupid instead.
* In another episode, Kramer and Frank Costanza try to sell bras for men with man-

boobs. It falls through because they keep arguing over what less embarrassing name to call it: "Bro" or "Manssiere".
* In another episode, Kramer and Mickey are asked to babysit a little boy who has recently watched a
* In another episode, Kramer turns his apartment into a cigar bar/smoking room, and the cumulative effects of hours upon hours of concentrated smoke make his skin pallid. They sue the tobacco companies and settle for making Kramer the new Marlboro Man.
* In another episode, Kyle declares they have to do something about the homeless problem. Cartman agrees, and says he knows exactly what Kyle is thinking. He then sets up a ramp and
* In another episode, Latka Gravas leads Louie dePalma — possibly unintentionally — right into one of these:
* In another episode, Leonard's mother mentions a childhood incident where young Leonard walked in on his mother swatting his father with Leonard's ping-pong paddle.
* In another episode, Lisa is cleaning out the garage and finds a thick leather bound book. She begins to read the Latin and behind her, a demon begins to form. However the horror is foiled when she tosses the book aside in favor of Mad Libs.
* In another episode, Lisa makes Bart and Homer believe they have leprosy in an attempt to
* In another episode, Lisa pretends to be a boy and is given the nickname "Toilet".
* In another episode, Lisa tells the story of Snow White. The blue-haired lawyer guy tells her she can't because the tale belongs to Disney, but Lisa counters this by claiming the tale has been out forever and isn't owned by anyone. Plus the dwarves were her own creation.
* In another episode, Liz and Frank fall for the same delivery boy, leading Frank down a journey of self-discovery. And then there's this quote from the same episode.
* In another episode, Liz needs to track down a Christmas present she sent to a needy family and asks for Tracy's help in talking to the postal clerk. He's incensed that she seems to think all black people know each other but interrupts himself mid-rant to greet the clerk like the old friend she obviously is.
* In another episode, Londo tries to put one over on the technomage Elric. He
* In another episode Lorelai and Rory are very hungry, but they refuse to go downstairs because Lorelai says they will end up having to chit-chat with Boston dentist also staying in their B & B and answer boring questions about life in Stars Hollow. Lorelai finds fuzzy certs in her purse. After eating it, she says it tasted like keys.
* In another episode, Lum forgets how to speak Japanese through some mishap and spends most of the episode working on some project. At first, Ataru goes to party his butt off and enjoy his time away from Lum. As time passes, he feels increasingly saddened at the fact that Lum is ignoring him and even went so far as to cry in her lap and begs her to talk to him.
* In another episode Mac asks a man coming out of prison why he took the blame for a crime he didn't commit, while the man insists he accidentally ran over a girl on a bicycle after having several drinks when celebrating that night.
* In another episode, Major Monogram got jury duty. When he was about to state the verdict, he was hit by an inator that makes people say double negatives, causing the defendant to be declared "not not guilty" instead of "not guilty".
* In another episode, Malcolm's parents find out Malcolm bought Christmas presents with a credit card they didn't know he had. Hal uses a pretend hug as a pretense to steal the card, which Hal then uses to pay for a trip for the entire family without telling Malcolm that he put it on Malcolm's credit card.
* In another episode, Malina and Kronk sneak around and follow Kuzco for plot-relevant reasons while a drumbeat plays in the background. He notices them, and comments on how they're "playing bongos to make it more exciting". Malina then admonishes Kronk for playing the bongos and

* In another episode, Marge doesn't want Homer going out to the annual chili cook-off, because every year he goes, as she puts it, he gets "drunk as a poet on payday."
* In another episode, Marge is astonished at Homer's receptiveness to a night at the ballet. He replies, "I enjoy all the meats of our cultural stew!" However, a minds-eye glimpse reveals that Homer, for some reason, thinks ballet involves a bear riding in a little car (
* In another episode, Marge is in the restaurant, contemplating an affair with bowling master Jacques. In order to cover the fact that a married woman is having brunch with a single man (gasp!), he uses the pepper and salt shakers to represent bowling pins and pretends to give a bowling lesson.
* In another episode, Marge listens in on Bart and Milhouse playing a card game and thinks Bart is dealing drugs. Lampshaded, where she mentions that she listened to it out of context.
* In another episode, Marge was scolding Santa's Little Helper for eating a cake until Bart interrupted her to show a series of photographs of Homer eating the cake. Among the photographs there was one of Bart with his pants down taking a photograph of his reflection on a mirror.
* In another episode, Marshall and Lily want to get married quickly, so they go to the courthouse and ask a clerk there if they can see a judge. She answers something like "Sure, you can see a judge... is what I would say if one was available." It quickly becomes an
* In another episode, Marshall comes home from work, ready to have sex with Lily, and this dialogue ensues:
* In another episode, Marshall, Rubble and Chase are playing basketball, but Marshall feels bad that he can't make a single basket. Chase and Rubble try to cheer him up by helping him reach the basket by boosting him up to it with Chase on the bottom and Rubble in the middle.
* In another episode, Marshall tries stand-up comedy, and Ted and Barney lie to him about how good he was:
* In another episode, Marshall (whose entire body is hurting from working out too much) holds up four fingers to Ted and asks Lily to help him fold down three of them.
* In another episode, Martin and Danny are interrogating a prostitute who was the last person seen with a missing judge when she mutters under her breath, "I'm a cop, so make this look good." They promptly begin yelling at her and roughing her up to maintain the facade of her being uncooperative.
* In another episode, Martok, the right-hand-man of Klingon Chancellor Gowron, is discovered to be a Changling and killed. Later Worf discovers a Changeling prison camp where the real Martok is being held captive along with other prisoners. And while there, he also discovers that the Dominion has had
* In another episode, Max and 99 are attempting to leave their staterooms while under surveillance; every time they open their door someone else in the hallway also pops their head out.
* In another episode, Max does this with a female courier when someone walks past their park bench rendezvous. Then he claims they're coming back and goes in for another round.
* In another episode, Max is tasked with drugging a suspected enemy spy with a truth pill, while she gives him a sleeping drug. A

* In another episode, Misty became obsessed about winning a series of collectible dolls.
* In another episode, Mitch and Cam are celebrating Cam's birthday, which is on February 29, leading to jokes about his age (because of course, he technically only has a birthday once every four years). At the end, Mitch makes a comment about "the eight-year-old I fell in love with," causing a nearby mom to glare suspiciously at them and take her young son away.
* In another episode, mobsters have kidnapped a boxer's girlfriend to make him throw a fight. They start by showing a few of the normal items which he dismisses, then they show him her toaster (complete with toast popping up). During the fight, he checks the crowd and the mob's man is sitting there with her clothes dryer, and he keeps displaying household items up to an entire washing machine.
* In another episode, Moe asks Homer to "steal" his car and park it on the train tracks so that Moe can collect the insurance.
* In another episode, Moe - trying to impress a date by spending big - orders "your finest food, stuffed with your second finest" at a restaurant. The waiter replies, "Yes, sir. Lobster stuffed with tacos."
* In another episode, Monica remembers precisely what time she ran into Richard despite claiming she's not still in love with him, because she'd been arguing with a clerk over whether or not a movie was late at the time.
* In another episode Monica stops to watch Chandler sleeping on her couch. He wakes up and freaks out, as that's what his creepy roommate Eddie had been doing.
* In another episode, Monk and Stottlemeyer had to arrest the mother of the first woman Monk had fallen in love with in a very long time for killing the equivalent of
* In another episode, Monk goes undercover as a reputed crime boss and speaks directly into his sleeve while describing every single detail in the boss' hotel room.

* In another episode, Montana Max owns an ice cream spoon factory and, similar to the elevator button example, makes one spoon out of each harvested tree. The rest of the tree is wasted.
* In another episode, Mork is fixing an authentic Orkan meal for Mindy: Stewed Narconium. When Fred says it sounds like some sort of chemical, Mork says that it is. Humans load up their food with chemicals; Orkans just eliminate the food.
* In another episode, Morse has to travel to Australia regarding a case involving a British criminal in witness protection who was given another identity in Australia. Naturally the local police are not impressed, and make sarcastic comment about how the British were supposed to have stopped dumping their convicts on them.
* In another episode, Moss is trying to come up with something profane to say to

curse out people he is mad at, and finally just says "Ploppers!" (meaning a turd that makes a plop sound).
* In another episode, Mr. Burns attempts to use this trick to escape a tableful of stockholders — however, being ludicrously old and not very fast-moving, he's still fumbling with the door-handle when the smoke clears...
* In another episode, Mr. Cat has an allergic reaction, and as a result, his head swells up and explodes offscreen.
* In another episode, Mr Humphries accidentally pulls the head off a Mr Humphries mannequin, and has to stand in for it. Unfortunately for him, the mannequin was meant to advertise underwear.
* In another episode, Mr. Mxyzptlk's powers are removed for misusing them.
* In another episode, "MuscleBob BuffPants", SpongeBob, wearing fake muscular arms to impress weightlifters at the beach, boasts "I start off with 20 raw eggs everyday. But that's just me."
* In another episode, Natalie's parents talk about a couple of friends of theirs who died in a car accident. When Monk hears that the car involved was a British Morgan, he becomes suspicious because the British drive on the left, and this doesn't square with the positions of the bodies at the scene. Apparently, Monk doesn't know that most British car manufacturers, including Morgan, make left-hand-drive versions of their cars for countries that drive on the right.
* In another episode, Nate figures out that his long-time rival Sterling is the real father of a girl when he keeps insisting on correcting anyone who calls her stepfather her "father". In addition, the girl is a master chess player and claims her dad taught her, except her stepfather is awful at chess.
* In another episode, Nelson's mom is in the process of getting her huge "Classy Lady" tattoo removed. Of course, only two letters have been removed so far, and it doesn't take rocket science to

* In another episode, Niles and Frasier attempt to confront Maris' German fencing instructor whom she has been having an affair with. Unfortunately, the man doesn't speak English but Niles' maid speaks German...yet she has a very poor grasp of English herself, meaning Frasier has to translate what Niles is saying to Spanish so the maid can translate it
* In another episode, Niles signs up for a dating service called 'Executive Match.' Frasier decries such services as "promising heaven but delivering a buck-toothed librarian who needs help washing her mother," but Niles' date turns out to be stunningly beautiful. While this may seem like a subversion at first it ultimately turns out that Executive Match is an escort service and Niles has been running up a huge bill taking his call-girl out on "romantic" dates.
* In another episode, Niles's maid is revealed to know German, since she worked for a German family who came to Guatemala "just after the war", which strongly implies they were Nazis.
* In another episode O'Brien, Odo, and Sisko have to pretend to be Klingons to expose a Changeling infiltrator on Qo'noS. In addition to altering their appearance, Worf has to tutor them in proper Klingon behavior, which serves as a nice window into the differences between Klingon and human social cues. Klingons do NOT turn away nervously when insulted, and
* In another episode, Odd and Yumi switch bodies following a materialization bug. While at Yumi's house, Odd finds colorful provocative clothes and decides to dress in it, much to Yumi's embarrassment.
* In another episode, Odo realizes that Garak is telling the truth when he says he doesn't know who would try to kill him because if he was lying, he'd make up a much more intricate story.
* In another episode of SVU, a teenage boy sneaks into a TV starlet's dressing room and rapes her when he finds her sleeping and drunk, under the influence of a radio show host a la Howard Stern. The kid's

* In another episode, one of Hogan's crew is trying to infiltrate a meeting of German officers under guise of another visiting officer. One of them, perhaps sensing an impostor, says he had heard that he injured his hand in a hunting accident, and asks him which hand it was: the right or the left? The spy manages to dodge the question by saying: "Thanks to superior German medical techniques, you can't tell which of my hands was injured!"
* In another episode one of the girls' minders appeared to be carrying a Filipino Floro SMG, which is an odd choice given that it is only locally used in
* In another episode, one of the Prophets of Bajor and a Pah-wraith take possession of the bodies of Kira and Jake Sisko respectively in order to duke it out on the station.
* In another episode one turtle constantly suggests that the strange things happening are a work of Krang and Shredder (the usual villains). The other disagrees each time until saying "In fact they don't appear in this episode at all."
* In another episode, Pam is being held hostage by a group of thugs who meant to snatch Cheryl to extort a huge ransom from her family, since it's revealed in the same episode that Cheryl was
* In another episode, Patrick Star rips off his front skin. SpongeBob's reaction: Eww.
* In another episode, Patrick wins a dance contest after rolling around because of a cramp. (He won by default, as the only dancer who did his own dancing.) This is followed by a fake commercial for "The Cramp".
* In another episode, Pee-wee wishes that someone would come over to alleviate his boredom. Jambi grants his wish and someone knocks at the door, but it turns out to be the annoying Salesman. Pee-wee scowls in Jambi's direction afterward.
* In another episode, Peggy accuses Bobby of breaking her lawn gnome (it was actually Hank) and as punishment, she sends him to his room and has Hank send him his dinner, but with no dessert. Hank does sneak Bobby a pudding cup though.
* In another episode, Peggy buys a pesticide because it has "eco" in the name, and she figures the Government wouldn't let anyone put "eco" on their name if it wasn't ecologically friendly. A close-up of the box reveals that "eco" stands for "Eco
* In another episode, Peggy sees a TV ad about a lawyer who helped a woman to get 2.5 million dollars from her husband for asking her to cook. Peggy tries it with Al by volunteering to cook but Al is so focused on some idea he refuses the offer and the lawsuit idea goes unmentioned for the rest of the episode.
* In another episode, Peter and friends become a chain gang after being arrested by
* In another episode Peter believes he's going to have an orgy with Lois and a couple of her friends. He then settles a few porn scenarios, the first of which is Peter the pizza boy delivering a pizza for a sorority house.
* In another episode, Peter Griffin has to repeat the 3rd grade in order to receive a promotion.
* In another episode, Peter, hosting a children's variety show, is mauled by a mountain lion during a failed comedy sketch based on the classic "Who's on First?" comedy routine by Abbott and Costello. Peter is later visited in the hospital by the same mountain lion, bearing flowers and stating "I get it now: 'Who' is the guy's NAME!"
* In another episode, Peter is eating "Store-Brand, Imitation Frosted Flakes", and the mascot Terry the Tiger says the slogan "They'rrrrrrrrrre fooooood!!"

* In another episode Peter is in Chris' room and Meg walks in wearing nothing but a towel to inform Chris that their bath is ready.
* In another episode, Peter is watching a public access show devoted entirely to talking about how awesome
* In another episode, Peter says an intro to the cutaway, then cutting to Peter explaining to the audience that to enhance their reading abilities, he'll simply show a typed transcript of said cutaway. Unfortunately for the audience it was a visual gag.
* In another episode, Peter says, "I made you and I can destroy you" to Chris...
* In another episode, Peter "she's betrayed me worse than Lady Macbeth betrayed Duncan." We then cut to a spaceship, where Lady Macbeth is fighting a bear. Cut back to Peter admitting "I don't know Shakespeare very well."
* In another episode, Peter vies for a promotion by having a robot do paperwork for him, which he assures his boss has no emotions and is
* In another episode, Phil is juggling a baby, a target, and a shotgun (and is shooting the target while juggling all three). Of course it's not REALLY unsafe until Harvey helps out...
* In another episode, Phineas and Ferb thaw out a caveman from the conveniently local glacier.
* In another episode, Phoebe and Monica declare themselves to be a hardass and wuss, respectively.
* In another episode, Phoebe learns that her apartment is fixed from the fire, but worries that Rachel is too happy living with Joey and wouldn't move back in with her. So she tries to drive Rachel into moving out by giving Joey a drum set and then a spider, both of which Rachel enjoys.
* In another episode, Phoebe meets a famous pop star, Ronnie Matthews, whom she idolizes and finds out that he's really a shallow
* In another episode, Phoebe was stunned upon seeing Monica in lingerie, saying that she had "the breasts of a Greek goddess."
* In another episode, Pinkie Pie and Rainbow Dash are hanging out at the beach. When RD wants to take a nap, she asks Pinkie to be quiet; so Pinkie, about to jump into the water (and
* In another episode, Pinky's actor is "married" to a sock puppet. When Brain's actor's wife kicks him out, Pinky said that his "wife" did the same... "or maybe she just fell behind the dryer."
* In another episode, Piper convinces a band of scavengers to help her, and they do so by building a new ship out of whatever they can find — the end result is a couple of engines and mostly weapons bolted together.
* In another episode, Plankton uses a device to switch lives with Mr. Krabs, and he begins falling through a type of portal on his way there. While he is only shown falling for a few seconds before a flash, he actually stops mid-fall/scream, takes a drink of a soda he
* In another episode, Potter believes his pet mare Sophie has run away for good. He pours a drink for Radar and himself, then offers up the trope-naming toast.
* In another episode, Potter is upset that Mulcahy was passed up for promotion again, and tells Klinger to try to contact the Pentagon. Or at least
* In another episode, "Prehibernation Week", SpongeBob promises his friend Sandy that he'd play with her everyday until she had to go into hibernation. Her ideas of "playing" turn out to be a series of painful activities such as a game of "Find the Hay in the Needlestack." He eventually decides to run away from her for the rest of the episode and go into hiding, but at the very end he confronts her rather than running from her and lets her know that her idea of "playing" together just isn't his cup of tea. But in the middle of his explanation she falls asleep and starts hibernating.
* In another episode "Promises, Promises", Jetta calls off her beach playdate with Emily at the last minute for another play date with an older girl, for which Mac gives her the cold shoulder even she gives him his favorite treat.

* In another episode, she also starts taking first-aid supplies from a hospital room when they visit Rose there, telling Dorothy: "They expect us to take it; it's like hotel soap!"
* In another episode, she dates a podiatrist; the story's humor comes from her desperation to think of him as a real doctor.
* In another episode she falls in love with her late best friend's husband.
* In another episode she hides from Arnold and Gerald in the park by pretending to be a stone chimera on a gothic building.
* In another episode, she invites Bulldog, who is working as a pizza man, up to her bedroom, making him think she wants to sleep with him; when she, instead, locks him out on her balcony naked, he thinks she's trying to invoke this trope and knocks on the door, calling out, "Pizza man!".
* In another episode, Sheldon and Amy discover that their Super Asymmetry Theory was seemingly disproven by an old Russian paper. As a way of moving on, Sheldon decides to give their paper a symbolic
* In another episode Sheldon assumes that because Mrs. Davis is black she'll want to do an elaborate school yard handshake with him instead of shaking hands normally. She just looks at him after he finishes jumping around and says "I'm going to pretend that didn't happen".
* In another episode, Sheldon describes his team for "The Physics Bowl", consisting of the Third Floor Janitor, the Lunch Room Lady and a guy who (due to Sheldon's poor skills on Spanish) is
* In another episode, Sheldon walks out of the apartment while playing bongos:
* In another episode, she pulled a similar stunt with a professional chef, asking him about a favorite recipe of hers, claiming it was a pork dish with Bearnaise sauce. This tripped up the chef because the dish in question was actually salmon. The chef was then forced to confess that he did not graduate from cooking school, which tied in with a possible motive for murder at the restaurant where he worked.
* In another episode, she's asked to eulogize a crew member who apparently adored her, but whom she can't remember a thing about. (The crew member is later proven to be fictitious; the other characters were trying to make a point about her treating the crew as if they were invisible.)
* In another episode, she steals and eats a bunch of laxative-laced cookies that some of Louie's detractors had given him.
* In another episode she tries to freak out her parents by suggesting that she might move to France and having a string of lovers, listing several French male

names and ending with "Simone." They remain stoic until she points out that the last one is a woman's name.

* In another episode, the brothers Crane desperately try to sabotage the performance of a truly abysmal actor, to save him (and themselves) from humiliation. The show goes on anyway.
* In another episode the Camdens are hosting a party with that same Muslim family, only to find nobody wants to attend. He eventually finds out that people assume the family is French because of their last name. (The episode was made around the time the Iraq War started. Subverted somewhat because people are
* In another episode ("The Cartridge Family"), an out-of-control soccer riot leads Homer to build a Goldberg-like device involving a flashlight, a magnifying glass, an alarm clock, and a fish, for the apparent purpose of alerting them when someone tries to open their front door. Since he and Marge were watching the door to see if the device would work, it's kind of pointless. Then someone steals the fish.
* In another episode, the castaways find a life raft and, after repairing it, intend to use it to sail off the island and back to civilization, only for it to sink due to everyone but Gilligan bringing along a bag of gold. As the raft sinks, Gilligan asks Skipper if he intends to go down with it:
* In another episode, the character Elaine screams at a barking dog all night.
* In another episode, the characters are arguing over who is Phillip Banks' favorite child and will inherit his fortune. In the end, Phillip tells each one that he loves them equally and the reason why. When he gets to Hilary, he can't think of anything better than "Nice earrings!"
* In another episode, the characters refer a few times to McDaniels and various generic-sounding expies of
* In another episode, the Cheers gang pulls a prank on rival bar Gary's, and the paranoia becomes so intense they shave their own heads on the idea that this will prevent retribution. Turns out Gary was out of town and didn't even know about the prank.
* In another episode, the children in Ms. Fowl's class take their final exam, which, according to Ms. Fowl, is worth 95% of their total grade.
* In another episode, "The Cow Goes Moon", Princess Irmaplotz disappears for the second time, leaving behind only her dress. (She then takes it back.)
* In another episode, the daughter of a foreign diplomat orchestrates her own kidnapping in order to derail a treaty signing, and one of her "kidnappers" gets killed. After she's found, she's sent back home without facing charges, courtesy of diplomatic immunity.
* In another episode, the detectives learn that a beautiful young black woman had visited the white murder victim at his office shortly before he was killed. His reaction toward her—looking very upset that she showed up, rushing her out of there—plus the revelation that he was sending money to her makes the detectives jump to the conclusion that she was his mistress. In reality, it turns out she was his SISTER; he was passing for white and her appearance could have blown his cover.
* In another episode, the Doctor discovers that some photos he's taken have been manipulated to edit out a crew member.
* In another episode, the Doctor encounters another ship from the same crisis. This ship has established a colony on an Earth-like world, but the robots have started killing those colonists, who experienced sadness, starting a chain reaction of death.
* In another episode, the Dogs are in Vegas waiting for a hot dog buffet to open. But just before the doors open, they happen to pull a slot machine that wins the jackpot. Now the owner tries to get the Dogs to keep playing so they'll lose the money, but the Dogs keep winning, draining the casino's funds. Finally, the owner begs the dogs to call off one last roulette bet, but too late. Instead, he offers to take over the bet, and when the dogs insist on 100 trips through the hot dog buffet and a limo ride out of town, he agrees. The trope averts right there as the roulette spin loses, but it simply means everyone's happy: the casino has its money back and the Dogs finally get to eat.
* In another episode, the Earth is invaded by an armada from an alien species that have no ears and communicate by dancing. Fry and Bender try to negotiate with the

aliens by doing a "dance of peace," but their dancing ends up translating to "We will kill you and dishonor your widows by making them gather wood."
* In another episode, the eponymous Doug is given an assignment to write a report about a classmate's home life, and he's assigned
* In another episode, the ever-cynical Detective Bullock warns a perp he's just arrested, "You have the right to remain silent, if you choose to give up that right, you're probably going to bore me to death, so just shut up."
* In another episode, the family goes to Uncle Oscar's funeral and scatters his ashes on a lake, only to have a water-skier slalom through them.
* In another episode, the family is in a witness relocation program, and given the surname Thompson. Homer is given instructions to say "Hello" back when someone says "Hello, Mr. Thompson." Homer claims to understand that he is Mr. Thompson, but doesn't respond when prompted immediately afterwards. Time passes and the next thing we see is Homer failing to even non-verbally acknowledge the agent stomping exasperatedly on his foot, believing the other agent to be the "Mr. Thompson" that the first agent is trying to talk to.
* In another episode, the family visits Canada. They pay for some cheap trinket with American cash, causing the shocked Canadian who took their money to proclaim that he was now set for life. (This was before the 2000s decline of the U.S. Dollar's trading power, when "Oh, it's only a Canadian dollar" actually meant something.)
* In another episode, the family watches the Guinness World Records, and one record is "Man with the smallest amount of faces: zero!" [muffled cries of "help!"]
* In another episode, "The Frog Princess," the title character entreats the prince to help her cook, and when he refuses on the grounds that he is a prince and thus can't cook, she sings him a song that includes the lyrics, "You could be the prince formerly known as helpless."

* In another episode, "The Headless Motorcyclist", the Headless Horseman has been pursuing Ichabod Crane, as well as the family and friends of all of his descendants for centuries. The latest descendant, a woman named Kate, lives near a bridge for protection, knowing the ghost can't pursue her over running water, though she admits that's no protection for others the ghost might target.
* In another episode, the host asks "Name an animal whose legs are featured on a restaurant menu." No one gives a response, and the host promptly face-faults onto the podium before moving onto the next question.

* In another episode, the joke is reversed when it's revealed that O'Neill has not seen Star Wars
* In another episode, the junior-most attorney has just made mincemeat of a routine deposition — in a way that is ultimately beneficial to the firm, but definitely unethical bordering on illegal. An associate is delegated to tell him off and takes him aside for the lecture: "You bad, bad boy. Don't you ever let us
* In another episode the kids go on a field trip to Springfield Glacier, which is reduced to a pathetic hunk of ice floating in a lake. Lisa spends the whole trip ranting about global warming, with the park ranger flatly denying it because "the government's stance on global warming is that it does not exist".
* In another episode, the kids use excuses to get out of a bothersome chore. Tamika claims she hears her mother calling her, and runs out. Eddie then claims that he also hears Tamika's mother calling him, and even briefly imitates her, explaining that "that's the only voice I can do."
* In another episode, the killer is a foreign diplomat, so even if Columbo proves he is the killer, he can't be prosecuted. In the embassy, Columbo manages to get him to confess to the crime — and be overheard by his boss, the leader of his country. Knowing the difference between the legal systems in his country and the US, the killer immediately waives his diplomatic immunity.
* In another episode, the Krusty Krab gets a visit from a prominent food critic. Despite everyone's best efforts, the critic dislikes everything there, except for SpongeBob, which leads to Mr. Krabs going overboard with making everything SpongeBob-themed, down to serving rotten patties that look yellow and spongy.
* In another episode, "The Last Time I Saw Maris", Frasier tries to talk Niles out of apologizing to Maris after she files for divorce:
* In another episode the main cast correct each other over people who have the words 'ice' in their names; such as musicians and athletes.
* In another episode, the Mayor is receiving a kickback from Fat Tony and says that "in future I would prefer

* In another episode, the much less attractive Fish does the same undercover detail and gains a male admirer who continues to be drawn to Fish even after he finds out he's not a lady.
* In another episode, the owner of a jewelry store has a heart attack and dies during a robbery. The robbers get charged with both robbery and felony murder.
* In another episode the prisoners find out that the Germans are trying to print fake money (British five-pound notes and American twenties) at Stalag 13. They manage to trick one of the workers (who was against counterfeiting anyway) into thinking that as soon as enough money has been printed to ruin the economies of the Allied nations,
* In another episode the Professor invents a mind-swapping machine and while the first two mind-swaps are simply Farnsworth swapping with Amy, when they find out each other's bodies aren't as great as they thought, Farnsworth trades Amy's body to Bender and runs off to join the robot circus to become a daredevil, to the horror of Bender, who needs his body to trade it with the Robo-Hungarian Emperor, and Amy trades Farnsworth's body with Leela to binge and for Leela to get a seniors discount, and ultimately all the characters end up trading minds and bodies like baseball cards, and not always on honest terms.
* In another episode, there is construction in Frasier's apartment. Daphne and one of the construction workers are struggling to have a conversation. There's a lull just in time for everyone to hear Daphne say,
* In another episode there's a world where all the remaining adults are sterile, and steal the kids from the
* In another episode, there's the "Rosetta Crone," which translates antiquated to modern English and vice versa.
* In another episode, there was a door that'd only open if someone told how many jellybeans there were in a nearby jar. Buford ate them all and answered "zero". The door opened.

* In another episode, the smoke in was parodied. Johnny had unwittingly summoned up a devil from the underworld with a ritual that ended with a puff of smoke in his living room, but with no infernal adviser showing up. To his credit, a devil came in through the front door Within the next few seconds, rushed to the spot where he should have appeared, and laughed maniacally before introducing himself.
* In another episode, the Sparta police go after a cult leader for reported rapes of young girls.
* In another episode, the squadron is seen fighting on the ground alongside a conventional infantry platoon. The platoon is commanded by a lieutenant, making it possible that
* In another episode, the Superfriends travel back in time to stop the time-traveling villains from meddling with their origins. Flash worries that he might have arrived too late to stop them, apparently not realizing that if he is, he can just go back further in time.
* In another episode, the Tallest sent Zim's ship flying toward the sun.
* In another episode the target of an assassination attempt lives in a mansion with
* In another episode the team discovers a caldera where an Ancient device sped up time within several times. Col. Shepard was trapped in there for several months while the others spent hours trying to rescue him.
* In another episode, the team encounters a green, extraterrestrial dog that they mistake for Beast Boy. After some wacky hijinks, the dog explains the situation to them.
* In another episode, the team got a lead on their case from a bartender played by
* In another episode, the town is set upon by rich people (who just so happen to be black), and the rank-and-file residents try to get rid of them. Mr. Garrison proposes dressing up like
* In another episode, the video communication of Clark proving his implication in Santiago's death is mentioned to have a digital authentication signature.
* In another episode, the whole gang is crowded inside a small trailer.
* In another episode they allow themselves to be committed to a mental institute to investigate the deaths of patients. When they are done, they just walk out of the place with minimum of effort.
* In another episode, they are alone for the first half without meeting anyone. This one has no disguised villains, just a malfunctioning robot and an inventor trying to repair it, and his wife, who doesn't like robots, and only appears at the very end.
* In another episode, they deduce who the killer is when they realize that the inscription on the victim's tombstone is a Bible verse that one of the suspects quoted to them.
* In another episode, they deliberately drove a Toyota Hilux through a shed as part of a series of tests to see how much abuse the truck could take before it stopped working. The collision didn't do any significant amount of damage.
* In another episode, they get a tip that a man's wife and daughter might have been kidnapped, so they go to the house to investigate and find the daughter's sweater lying on the walkway. Cate declares that it's proof that "Either she left in a hurry or she was forced to" over McGee's objections, because "little girls aren't typically slobs." Where to begin?
* In another episode, they go to get their hair cut from a buxom hairstylist. Just being near her breasts while she shampoos their hair gives them erections that last all day. She waits so long for them to go down that Todd shows up and decides to cut their hair himself so that he can take her out on a date.
* In another episode, they hire an exterminator to kill a termite infestation. The Sarcastic Middle-Aged Man says that to find the bugs he'll have to "think like a bug, act like a bug, become a bug!" He then starts gnawing on the table.
* In another episode, they meet a morally gray demon hunter who condemns Rin and the humans in Inuyasha's group for even associating with demons/youkai and half-demons/hanyou, going so far as to brand
* In another episode they played this trope straight, with the pyramids being

built by alien cats but they did so to rob Earth of its rotational energy, which seems to be a play on a Real Life theory that pyramids are giant hydrogen engines used to power a microwave power station, which in turn power starships in orbit.
* In another episode, they stumble upon their personnel files. Rimmer's says "There's a saying amongst the officers: if a job's worth doing, it's worth doing well. If it's not worth doing, give it to Rimmer".
* In another episode, they tell the victim's family (which they already know includes the killer) that they have a witness who saw the gun they believe to be the murder weapon being thrown from a car somewhere along the freeway, but that he wasn't sure exactly where since he wasn't local. They also tell them that they'll have patrol officers find the gun, but that it will take about two weeks since it's a pretty long stretch of road to search. In reality, they've already found the murder weapon, and thus just have to stake out the place along the freeway where it was found and wait for the killer to show up and try to remove it before the police can find it.
* In another episode they use a variation on this. Across a period of time, the crew basically stalk the mark while using items (such as coffee cups, newspapers and so on) plastered with a logo for a fake venture they want him to take interest in. When combined with some overheard conversations it works remarkably well.
* In another episode, this philosophy is seriously subverted. Ben has the opportunity to cheat on a test, but does not; he ends up getting a bad grade and is scolded by his parents. His friends
* In another episode, this time being The Good Seed, the pigeons eat an entire bag of seeds, only to get fat again. They, of course, return to normal by the next episode.
* In another episode, this trope was turned on its head, when Jerry starts going out with this cute, perfect girl. The only thing is, everybody else - including her closest friends - talk about her as if she were a loser, like he's doing her a favor by going out with her. George and Kramer are so worried about Jerry's mental health that they even stage an intervention to try and get Jerry to break up with her. Naturally, Jerry obsesses over what hidden trait could possibly make her undesirable. He eventually becomes so desperate for
* In another episode, Thomas is put into the Pit of Demons Who Are Too Violent Even For Hell.
* In another episode three launch officers stationed in nuclear missile silos are revealed to be moles for a radical organization. Two of them end up stationed at the same silo but a failsafe prevents them from launching their missile without an authorization from the President. However, the system has an override that can be activated by the two launch officers of another silo. One of those people is also a mole so he kills his partner and then gets around the two key lock by using a mechanical device that turns both keys at the same time.
* In another episode, Timmy, Cosmo, and Crocker are trying to replace the money that Crocker spent after Cosmo gave him a stolen pot of leprechaun gold. Timmy and Cosmo enter a figure skating competition and two of the judges give them a 10, but Crocker (who somehow became a judge) gives them an F due to force of habit.
* In another episode Timmy is entrusted with protecting his parents' cabinet full of glass figurines. It's destroyed as soon as they get back, but his mom decides to start a broken glass collection.
* In another episode Timmy's Dad decides to get a new job on the Internet, so Cosmo and Wanda pose as interactive characters on the website. He pokes Cosmo with the arrow and he says "Ow, my spleen!".
* In another episode, Timmy's dad drives the station wagon into the living room:
* In another episode, Timmy walks across a TV showing a broadcast saying everything wasn't fine immediately after Timmy said everything would be fine.
* In another episode, Timmy wishes for Vicky to become nice. As a result, All of Vicky's evil leaves in the form of a bug that starts inhabiting other people. Eventually, the evil bug tries to take control of the President of the United States, who controls some of the most powerful weapons on the planet, and even rigs a detonator that the main trio initially believe will blow up the Earth. By the end

of the episode, after Vicky sacrifices herself to save the President (and goes back to being evil as a result), Cosmo presses the button and shockingly, instead of destroying the Earth, the detonator blows up Pluto.
* In another episode, Timmy wishes Jorgen to his location while the latter was making a soufflé. Jorgen then threatens Timmy that if his soufflé were to fall, he would
* In another episode, Timon becomes convinced that a group of flamingos on a small island were hiding something from the way they were just standing still. After spending the episode getting to the island and then failing to get any answers out of the silent birds, he gave up and left convinced that Pumbaa was right that they were just standing around.
* In another episode (titled "My Fair Freddy"), Fred, under the tutelage of the
* In another episode (titled "Subway Wars") announcements made by a subway conductor are completely unintelligible over the garbled intercom. Lily claims that, because she's a native New Yorker, she can "speak conductor", but her interpretation of what the conductor said is always dead wrong; after hearing the train will be down for 20 minutes due to track maintenance she gets off, and it immediately peels out.
* In another episode TJ proudly said that a whoopee cushion was his science project.
* In another episode, Tom acquires a slightly used shuttle and volunteers Harry to help him restore it.
* In another episode, Tommy and Sally pull this trick on a frightened neighborhood kid. They're trying to find the kid that egged their house, and the duo pull off the technique surprisingly well, for aliens. Sally, of course, is the bad cop.
* In another episode, Tommy Balowski, drunk cousin to Jerzy, asks Mike if he could use the house's bathroom. Mike tells him no, to which Tommy replies "I didn't think you would, so I pissed in your garden."
* In another episode, Tony and McGee are interrogating a suspect who conspired with a terrorist and murdered a marine captain. When Tony gets in his face about how pissed-off he is, the suspect tries to invoke the "good cop" half of this trope by asking McGee to step in. McGee's response: "You're on your own."
* In another episode, Tony and Ziva act out a wild sex scene in a hotel room they know is rigged with cameras and bugs, to sell their disguise as married assassins.
* In another episode, Tony is arrested for murder when he is tied to a bite mark on a dismembered leg via dental impressions.
* In another episode, Tony is offered his own team away from Gibbs and the others, but denies the opportunity out of concern for Gibbs, who had just come out of yet another coma.
* In another episode, Tori has to give blood before a play where she's starring as the lead. Jade, her understudy,
* In another episode, two characters talk about hiring a babysitter. One urges the other to carefully read the ads, because an ad's stating "has toys and willing to spank" doesn't means it's for a babysitter.
* In another episode, two cops see Johnny, Dukey, and Bling-Bling Boy (All transformed into babies) drive by in motorized baby carriages. They also pour out their coffee.
* In another episode two officers, a rookie and his training officer, are shot apprehending bank robbers, one of whom escapes. The older officer dies shortly after coming out of surgery and, according to the end of the episode, the captured robber was sentenced to death.
* In another episode, two rangers, Sydney and Gage arrive at someone's home to ask if his brother (their murder suspect) is there. The man says no and tries to close the door on them, only for Gage to push it open and force his way into the apartment—without a warrant, and against the man's clearly expressed refusal to let them in.
* In another episode, Unit operator Hector Williams starts dating a retired Airborne Ranger Senior NCO's daughter. Said retired NCO is contemptuous of Hector because he is just a logistics clerk. After learning Hector's true job, he starts

being nice to Hector... and his daughter ends up dumping him since the entire reason she was dating a "logistics clerk" was so that she could have a husband that could easily transition to a post-military career, which a "gunman" cannot.
* In another episode, "Valentines Day", Patrick makes a valentine for SpongeBob out of stone when SpongeBob calls him. Patrick thinks SpongeBob is trapped inside the rock and smashes it in an attempt to rescue him.
* In another episode, Verminous Skumm and Duke Nukem planted nukes in Israel, in Northern Ireland, and in South Africa... giving one controller to each side of every conflict. The Planeteers had to split up to fight them.
* In another episode, Vicky is seen on the Tunnel of Love with a bag of cash.
* In another episode, Wakko's being psychoanalyzed by Dr. Scratchnsniff, who follows up one of his statements with, "Can you expand on that?"
* In another episode, Warmonga is tricked into going away when one of the Tweebs, wearing a blue
* In another episode, we find out that Stan avoids unpleasant topics by going to a "marriage counselor" who uses hypnosis to erase Francine's memory of whatever she wanted to talk about. Eventually Stan ticks him off and he brings the memories back, kickstarting the plot of the episode.
* In another episode, we have this where one character pushes a button and changes the world from black and white and into color, which promptly reveals that the characters are naked. Panic ensues.
* In another episode, we're treated to a clip of an intoxicated motorist ranting in the backseat of a cruiser, inflicting harm on himself, and threatening legal action against the officer, mentioning his attorney known as Gilleto. Cue the cast putting on a fake informercial for the Law Offices of Gilleto, Gilleto, and Gilleto.
* In another episode, we see a 1950s sci-fi B-movie where the captain responds to a hull breach by shouting
* In another episode we see in Tak's flashback how Zim ruined her life by getting a humongous mecha to obliterate a vending machine that took his money, destroying half of the planet's power supply.
* In another episode, "What Was Missing", the aforementioned Marceline sings a song to Princess Bubblegum about how she resents that she's malicious towards her for a reason she can't remember. (The two have barely interacted in the show up to that point.) The song practically comes out of nowhere, and Princess Bubblegum is reasonably surprised.
* In another episode, when a girlfriend expresses concern about her father's behavior (he's been kidnapped and replaced with an impostor), Michael chats with him about the Disneyland tickets he had supposedly asked him for. When the man responds enthusiatically, Michael and the girl know he's a fake — they had never made any such plans.
* In another episode, when Baldrick asks for permission to ask a question, Blackadder replies "Granted, as long as it's not the one about where babies come from."
* In another episode, when Chef is campaigning to have the town's flag changed because he thinks it's racist, the townspeople in favor of keeping the flag the way it is are none too happy to learn that the KKK is on their side. Jimbo and Ned disguise themselves as Klansmen and infiltrate their meeting to convince them to switch sides... by straight up telling them that pretty much everyone hates them and will vote against whatever side they support on principle, so they should pretend to support the side they want to
* In another episode when Courtney is in the confessional talking about Duncan and his pet spider Scruffy, she mentions that she'll "get that immature hairy beast... and his pet spider."
* In another episode, when Kaeloo talks to her friends about growing up, Mr. Cat imagines Quack Quack turning into a giant and squashing him.
* In another episode, when Kirk Van Houten was arrested, Chief Wiggum told him the cell he's going to wouldn't be so cold and damp as Van Houten's apartment. In fact, a normal prison cell felt like the trope for him.

* In another episode, when Lisa attempts to skateboard she ends up bearing down on two stacks of salsa jars - one "mild" and one "hot and spicy". "Please mild please mild please mild..."
* In another episode, when Lucy and Ethel exceed their shopping allowance while in Florida, Lucy comes up with a plan to ask Ricky and Fred to take her and Ethel fishing with them.
* In another episode, when nervously excusing themselves from Gypsy, Crow says he has to go clean his room. Servo? "I'm gonna go clean your room too."
* In another episode when Peter becomes one of the New England Patriots, he does a local spot for a car dealership complete with monotone reading, eyes following cue-cards, forced football references, and crappy redundant jingle.
* In another episode, when Pikachu knock-off/Japanese stereotype Ling-Ling refuses to give into an extortionist's demands, he threatens to send his accomplice over to Ling-Ling's house and have him walk around
* In another episode, when Rose needs to be hospitalized, the doctor introduces himself. Upon hearing his last name, Blanche brightens up and exclaims, "Dorothy, Rose is going to be all right! Her doctor is a Jew!" Dorothy rebukes Blanche for the comment, and then immediately asks, "How is she, Dr. Jew?"
* In another episode, when the Bundys go to a charity basketball game, the announcer introduces "...your NBA All-Stars...and Danny Ainge."
* In another episode, when the heroes are testifying at an alien trial (

* In another episode, when Tracy is even later for rehearsal than usual:
* In another episode where Mojo Jojo turns the entire world into dogs, the narrator called him out on it. In response, Mojo Jojo turns the narrator into a dog too.
* In another episode where Mr. Kraft announced he was retiring, the students actually threw a bacchanal.
* In another episode where Steve finally gets a date with a hot girl, he tells her he needs to "check his schedule", so he opens up a day planner and we see that his plans for every night say, "Whack it".
* In another episode where they are looking for a special cactus, Gwen finds it by sitting down on it.
* In another episode, where two alligator girls are fighting over Buster, their father uses the "bigamy" joke from
* In another episode, while Hank and Bobby are out camping, Peggy runs around nosing her way into everyone's business and telling them how they're wrong or trying to show how much smarter she is. Ultimately this results in her going into a crime scene like she's a
* In another episode, while Plankton is announcing the entrance of his champion for the Fry Cook Games, as the stadium shakes with the stomping, a couple of adult fish cover the eyes of a kid fish (presumably their son) in the middle of them. The kid replies in kind by covering
* In another episode, while searching the house where the female victim of the week lived alone, Sara dramatically announces "the toilet seat is up—a man was here!"... without even entering the bathroom to check if maybe the victim had been vomiting in the toilet (they'd just found a lot of spoiled food in the fridge, after all), or whether she'd been interrupted in the middle of cleaning the bathroom, etc.
* In another episode, whilst searching an Air Force base for Sideshow Bob, an airman opens the door to Hangar 18 before quickly closing it again after seeing a Grey with a glowstick. The airman proclaims, "Watch out! He's got his probe!"
* In another episode, Wiggum reports "a 318 - Waking a Police Officer".
* In another episode Wilma and Betty do this: they don't actually hit each other; rather, as they're running past, they hook arms and fall on their butts.
* In another episode, Wilma suspects Fred of cheating, though with better cause: He's coming home late from work, unusually tired, and when she follows him, she

finds him in a romantic nightclub him with a very sexy blonde. The blonde is a charm school instructor, and Fred has been taking courses in dancing, small talk, and related matters so as to make their upcoming anniversary more special and memorable. That night was the final exam/dress rehearsal.
* In another episode, Worf travels to an alternate universe where the Bajorans are enemies of the Federation and they overpowered the Cardassians.
* In another episode, Yu's cousin and surrogate little sister Nanako visits his school. She then proceeds to struggle to remember what a fortune teller (actually Margaret) called Yu... Before revealing it to everyone, and causing this to occur.
* In another episode, Zim becomes paranoid that he'll become infected by Earthborn germs that he has no natural resistance to, so he creates a suit of germ-repellent
* In another episode, Zim decides to steal organs from the other kids and swallows them as a part of an awful "human" disguise, replacing the stolen organs of his victims with miscellaneous objects. He gleefully points at "his many human organs" when questioned, and the school nurse blindly swallows his
* In another episode Zim is shown to be enduring Gir's messing around with base's computer for a
* In another episode, Zoey is chosen for an international-themed ad for the fictitious holiday "Daddy Day," because the ad executives think she looks ambiguous enough to appeal to all racial demographics. When she refuses to do the commercial, the role goes to her friend Maya, who the execs similarly think looks ambiguous enough to fit the ad. In real life, Yara Shahidi (Zoey) is half-black and half-Iranian, while
* In another episode, Zoey is heading outside to light the White House Christmas tree with her father. She's not dressed for the occasion because the duty was supposed to belong to her nephew, but he's throwing a tantrum because his grandpa hasn't had time for him all day. Her ex-boyfriend Charlie immediately loans her his coat, and she replies, "You're a prince, Charlie," revealing the renewed affection between them.

* In another fairy-tale, Hans trades all the way down to nothing (but is still happy, because the last thing he traded for was a freaking huge millstone that did nothing but weigh him down).
* In another fanfic called “It’s a Twilightful Life”, Twilight Sparkle wishes she was never born after she and her friends fail to save the School of Friendship on Christmas Eve from its debt. Princess Luna plays the role of the guardian angel who shows her what Equestria would be like if she was never born. In this alternate universe, Granny Smith and Big Macintosh are over-the-top hillbillies, the Cutie Mark Crusaders never got their cutie marks and are selling fried chicken for a living, Starlight Glimmer is rampaging throughout Equestria making more ponies equal, Rainbow Dash is a lesbian artist, Pinkie Pie is a homicidal cannibal, Rarity is obsessed with sweets (especially marshmallows), Fluttershy is a hippy, Applejack is working with the Flim Flam Brothers at Las Pegasus, Spike is a pick-pocket, and Princess Celestia is...well, let’s just say she’s a total mess! This fanfic was divided into seven chapters:
* In "Another Five Short Graybles", Jake Jr. pours herself some more "juice" in response to Finn and Jake being annoying.
* In another, Flack has to open the door to leave the room he's been in with the CSIs. Doing so makes him remember the door at the crime scene had been locked from the outside, so the killer would've had to have had a key.
* In another flashback, Susan Delgado masturbates for the first time a few hours after meeting Roland.
* In another for the same company, a man finds the name "Brad" keyed into his car, but his policy only covers full names. If it had been "Bradley" or even "Brady," it would have been fine.
* In another, Frank goes to Ireland to stop a shipment of drugs from coming in. He finds that the local drug-running Protestants and Catholics are quite happy murdering each other without his assistance.
* In another Frank-related moment, Frank trying to figure out Chinese handcuffs in
* In another, Garfield falls asleep and dreams he's in "the Land of Large Breakfasts" where he eats a giant pancake. He wakes up, and says it was a great

dream... Then he turns around and exclaims, "Where's my blanket?!"
* In another, George says the next song is loaded with mood and tells Ringo to bring out something appropriate. Ringo brings out a cow.
* In another German tale, set in Brunswick, a headless horseman called "the wild huntsman" blows a horn which warns hunters not to ride the next day, because they will meet with an accident.
* In another, Grace is feeling insecure because her husband Leo is going on a Doctors Without Borders trip to Guatemala with a very gorgeous female colleage (played by Nicolette Sheridan.) When Leo tries to tell her she has nothing to worry about because she's not his type, Grace quickly snaps, "Oh, please, she's everybody's type, hell,
* In another Halloween episode, a cyborg Bart comes home to challenge his robotic replacement, who holds up Homer in an "if you want to kill me, you have to kill him" gambit. Bart bisects them both without a second thought and Homer has to use the robot's legs to replace his own, before

* In another Japanese Panasonic commercial, an X-Wing flies away from the Death Star as George Lucas films with an enormous camcorder. C-3PO comes to life, and the camera focuses on a set full of Star Wars models behind a walking AT-ST. George Lucas moves his focus to a model of Jabba the Hutt moving his eyelids. On the set, R2-D2 and C-3PO move and beep around George. Levitating a glowing egg shaped object with his right hand, he declares, "Itsumo something new."
* In another Japanese Panasonic commercial, George Lucas introduces his creation, "Sparky." Sparky, a robot, waves his right arm and says, "Sparky." Sparky

approaches a VHS player and pushes a VHS tape, labeled "Sparky + R2-D2", into the player. A non-physical screen appears in mid-air, showing R2-D2 following Sparky. Sparky looks at the screen and turns the fast forward dial. On screen, Sparky and R2-D2 appear to travel faster, until Sparky launches from his three underside thrusters, leaving his three-wheeled rolling platform. Sparky's forehead glows with bright green sparkling lights. Later, George stands to next to Sparky. Sparky says, "Panasonic," and again, his forehead begins to sparkle with bright green lights.
* In another Japanese Panasonic commercial, George Lucas stands amidst a wheat field, wearing jeans and a black shirt. He stands, arms folded, then moves his arms behind his back, crossing his hands, left hand firmly settled in his right. Walking in the field, he extends his right hand and is accompanied by an Ewok on his right. A second Ewok appears at his left, and a third in front, walking with him to a group of three Calamarians, C-3PO, R2-D2, Chewbacca, a Gran, and Darth Vader surrounded by two Imperial Guards, and seven Stormtroopers. The crowd applauds at George Lucas.

Later in the same episode, he decides not to shoot another unarmed Japanese soldier — but then a few rookie Marines gun him down instead and blow off Sledge when he disapproves.
* In another scene, a Marine is cutting the teeth out of a live Japanese soldier's head while the soldier screams in pain. Snafu shoots the guy in the head, putting him out of his misery while saying that it "makes it easier". Although it was legal to take war trophies, taking the personal effects of dead soldiers was not allowed. This included the mutilation of bodies and the removal of their gold teeth.
* In another scene, babies fall from the sky in baskets with umbrellas, a variant upon the Stork myth. A man sees a baby outside his own house, and joyously shouts to his wife that the baby is here, then pauses and adds "
* In another scene, Perry attacks Doof in a fancy restaurant. This is part of Doof's plan, since a special agent like Perry would know that you can't just make a scene in a fancy dining enviroment, thus trapping him by societal convention.
* In another scene she has her powered armor crash into an enemy in mid air and saves herself by jumping out just before the impact. Breareos and Thereos still have some time to chat and make plans what they have to do and then decide who should catch her. It's not the least plausible part of the film.
* In another scene, some high-ranking US and Vietnamese officers complain that the Marines stole money from a bank vault and demand a court martial of those responsible. The Marine CO, who's got more sympathy for his men than these people, retrieves the money and claims they 'found' it. The Vietnamese officers promptly divide up the cash among themselves.
* In another scene, Sulley suggests to Mike that they replace their four teammates with scarier, more competent monsters. Mike retorts that they can't do that... because he checked, and it's against the rules.
* In another segment, Orson tries telling the story of Cinderella to Booker and Sheldon, and they insist on altering the story so that the King's messenger becomes a rapmaster and the stepsiblings become ninjas. The story's still recognizable until they insist that the protagonist run into the Big Bad Wolf while fleeing from the ball. Orson tells them there's no place for a wolf in Cinderella, but they say all fairy tales have to have a wolf. After they insist on a new plot twist where the Earth opens up and dinosaurs emerge, Orson gives up. He stops the story there, gives a fast summary of the real Cinderella story, and then leaves.

* In another story, she wants to get a job like all her friends have, but she's just not motivated enough to actually apply for one. In one comic chapter, everyone is busy with their summer jobs... except Veronica. She has no siblings (that we see, anyway), and her parents are busy running the family corporate empire, so she's pretty much alone and already bored with the empty days of summer vacation. She wishes she has something to do, even a job because this boredom is driving her crazy. Archie eventually comes by and visits, telling her about this one position open at the jewelry shop in the nearby mall. He says this position would be perfect for her since she wears so much of it. Veronica looks like she's going to accept...

then decides not to, because she's so wealthy she doesn't need to work. Apparently, having loads of money means one can never get an actual job, even if it's just to pass the time.
* In another story, the Four found themselves on an enormous alien environment with human giants that were many miles tall. Reed Richards thought that what they were seeing was not real, as the human body would be unable to support its own mass if it grew to that height.
* In another story, the gang has a baseball game, but Charlie Brown isn't available. He has to push around his sister, Sally (only a toddler at the time and officially making her debut in this storyline), in a stroller. Everyone is upset including Charlie Brown himself. * In another strip, Tagon and Kevyn are looking for another Demolitionist for the company. The only applicant is Pi.
* In another strip, the occupants of a castle brag about how strong their door is. Hagar hits it with a battering ram and the door is unharmed. The rest of the castle fell down around it.
* In another strip, the Pointy Haired Boss discovers that his schedule calls for him to "give a vigorous wedgie to myself." In the next panel, Dilbert and Wally are peeking into the Boss's office and commenting that he really will do anything that's on his schedule.
* In another strip, the remote's batteries die and Jon and Garfield, rather than going to change the channel on the set, decide to
* In another strip, the Sergeant tells the Cook he's tasked with carrying the "special lunch" to the ill Captain. As soon as the Cook warns him not to spill it, the Sergeant swallows the whole tin and asks him what he's going to do now. Then the Cook mentions that said lunch included a powerful laxative medicine prescribed to the Captain. Cue to the Sergeant running for the toilets.
* In another strip, two cats disguise themselves as a dog, but the dog discovers this by smelling.
* In another strip, Vaarsuvius preemptively executes Kubota as he lays out his plan to get away with his crimes. However, V's interest is not in justice or revenge, only in removing a tedious distraction.
* In another strip, Walt gets angry at a song Jeremy is listening to, resulting in this exchange:
* In another strip, we actually see him knock over one of these when he's pretending to be a Tyrannosaurus.
* In another strip, when Andy asked Jason how it was like golfing with his father, Jason replied that it was "colorful". Andy then asks whether he meant the color of nature, the ball, the clubs, or his dad's orange plaid golf pants, Jason elaborated to mean that he was actually referring to Roger's language. Cue Roger swearing.
* In another strip, when the local rock band's DeathTongue's latest record is played backwards, the message urges the listener to attend church and tithe.
* In another strip, while Sherman and Megan are in Greece, Sherman shows Megan a picture of the "Corfu Sea Monster" that they're looking for. Megan's reaction is this...
* In another Sunday comic, a bunch of cute woodland creatures gather around Pooky and even a rainbow appears behind them. Disgusted, Garfield says "
* In another Sunday strip, Calvin and Hobbes play a two-person football game, and keep introducing bizarre new rules to give themselves advantages. At one point, Hobbes claims that he swapped the two teams' end zones, so if Calvin scores a touchdown he'll actually earn points for Hobbes' team instead.
* In another Sunday strip, Sarge falls asleep after watching football all day, and dreams he's a star quarterback at the Soup Bowl, paid with food by his team, able to throw off the opposition by burping, rewarded with a chocolate football when his

team leads at the half (one with almonds when they win the game) and in contention for the world record for hot dog eating. He wakes up, and says "I have that same dream every time I fall asleep with my hand in the popcorn..."
* In another Superbowl Ad, Burt Reynolds gets hit in the groin - among the list of 20 different cliches of a Superbowl Ad.
* In another Super Mario cartoon series, Luigi heard a bossy king shouting "Duck, you idiot!" Luigi, assuming he was being commanded to get down, did so but the king was actually shouting at a servant for a roast duck.
* In another Sylvester and Tweety cartoon, after various failed attempts to catch Tweety, Sylvester decides to swear off birds. Right after that happens, a flock of birds perches themselves on Sylvester's shoulders. Sylvester merely mutters, "Sufferin' succotash! I picked a fine time to go on a diet!"

* In another TOS episode ("Let That Be Your Last Battlefield"), there is a war between two different ethnicities from the same planet. (The skin of one is black on the left side and white on the right side of the body, the other one's skin white on the left and black on the right.)
* In another tragic example of losing railroad history, the New York Central's famous 4-6-4 Hudsons almost had one survivor, which the Smithsonian Institute attempted to buy for posterity. However, the railroad's long-term oriented President, Alfred E. Pearlman, didn't want to preserve any of the larger locomotives, and ordered the yard where the last Hudson was stored to scrap it. Only two large NYC engines (4-8-2 Mowhawks 2933 and 3001) survived, and it was entirely on accident, slipping away from Pearlman's grip long enough to avoid the torch.
* In another Treehouse of Horror episode Bart becomes Stretch Dude and is able to stretch everything, including his eyes.
* In another Treehouse of Horror segment, Bart acquires the keys of a Time machine and travels back to 1974 (so he can get a comic book cheap). While there, he finds out that if his parents never met, he would be rich. So he splits his parents up and travels back to 2012 (the present when the episode aired). Even though Marge married a rich man, he, Lisa, and Maggie are still born. The mansion they live in is in the same place as his old home as well.

* In another "Treehouse of Horror" short, a gypsy curse makes Bart's neck stretch until he's too weak to support it and drowns in a bowl of cereal across the table.
* In another turn of events, you can see a top-down racing game cabinet labeled
* In another TV-channel version, while Shaun is channel-surfing, he switches on the news to find they're talking about the zombie plague...and promptly changes the channel. But the chunks of speech from the various channels all continue the sentence from the previous channel (even when switching to and from non-news channels, like a football broadcast and nature documentary).
* In another twist, it's also hinted that the C'tan is known as The Deceiver and the Chaos god Tzeentch may also be the same.
* In another twist, the Christian temporal refugees fighting the Chronotic Empire make an actual
* In another (two-part) episode, a Starfleet admiral brings down Earth's power grid and blames it on Changeling sabotage, so that the Federation will declare martial law (which he thinks is necessary to prepare for a Dominion invasion).
* In another two-part episode, Mac puts together an ancient device explaining at length what it does, defining it as an "optic pump". When the Girl of the Week asks what an optic pump is, he says, "a laser".
* In another variant, God is the name he most commonly uses to address
* In another variation of the trope, the combat droids relay orders and communicate with each other verbally. A possible explanation is that they're built to be inaccessible over networks to prevent hacking.
* In another, Veronica turns down a date offer from one Virgil Venom, and as revenge Virgil starts writing bad reviews of The Archies. (According to Veronica, her reply "Put a large hole in his ego") They get back at him by playing songs written by the son of Virgil's publisher, said to be a great songwriter, but keep that fact hidden until
* In another version, Aphrodite turned Medusa into a monster for the crime of being prettier than the Goddess of Love and Beauty.
* In another version, Arachne challenged Athena to a weaving contest, and while Athena admitted that Arachne's weaving was technically flawless, the image that Arachne wove was one of the gods and goddesses acting like idiots and making fools of themselves. So the punishment was for, on top of everything else, not showing proper respect to the gods. Athena was generally one of the more level-headed deities in the myths, but
* In another version, Hephaestus built a chair that trapped Hera in it, and he refused to free her unless he could marry Aphrodite.
* In another version, his initial wish was to visit the Moon but forgot it due to all the other great places the devil took him. However, when the devil was about to take his soul, he reminded him of the original wish, and since the Moon is a heavenly body, denied of demonic creatures, the devil was forced to break the bargain. The man still ended up on the Moon, somehow, and apparently became immortal in the process.
* In another version, it is turtle instead (which are natural enemies of scorpions). The scorpion says
* In another version, Kali instead strangles Raktabija, killing him without spilling any blood.
* In another version of the joke, they're each hiding in a tree; the first one says "Meow," the second says "Tweet tweet," and the third says "Moooooo."
* In another version of the story, the girl is babysitting and there's a creepy clown statue that stares and unerves her, even seems to move ever so slightly. She calls the parents and asks if she can cover it up or move it so it doesn't bother her.
* In another version of the tale, the prince agrees to marry her while she's in tatters but is confused as to why she goes around riding a goat and dressed in rags, while carrying a wooden spoon and with her face always dirty. With each question he has about her appearance (her mount, her clothing, her face, and her spoon), she replies that she only keeps those things because she wants to, and shows him that she is able to turn them into more beautiful things (a white horse,

a gorgeous dress, a clean face, and a wand) should she desire. The prince gradually catches on and at the end, he doesn't even ask about the spoon, already knowing why she carries it.
* In another version of the Two Man Rule, nuclear missiles stationed in foreign countries had an American officer and an officer of the host nation in possession of a launch key. However it was pointed out that some of those nations (such as Turkey and Italy) had experienced military coups, so the locals could simply hit the American officer over the head and steal his key.
* In another version, the box contained a mirror, and Taro only believed that he was in the future when he saw his reflection for the first time since he'd gone to the palace and sees that he's gone from young man to wrinkled ancestor.
* In another version, the final line is "Because this is the Middle East."
* In another version, the moral here is about honesty — the guy wants an honest bride, so he has his sister (the only one who can see him) vet the candidates by telling them that the right girl should be able to see and describe him while he's invisible. They all lie, making wild (and wrong) guesses at his appearance, until the heroine, who admits that she can't see him. He makes himself visible for her (or involuntarily becomes visible, due to the mystical power of truth-telling), so she's able to tell his sister what he looks like and passes the test.
* In another very early strip around Halloween, Garfield explains that around that time cats become bewitched. His eyes began to turn red among other things... that is until he saw himself in the mirror, screamed turned white and passed out.
* in another video, the producers likely wanted to preserve their resources for more important episodes.
* In another Weekend Update sketch, one host began to read about the story of the death of Pope
* In another, when Bart and Milhouse are looking after the Comic Guy's shop, Milhouse makes a terrible investment by buying a lot of comics starring a nerdy hero called "Biclops". Bart complains that they'll never sell it and not even birds will use them for their nests. On cue, an angry crow flies into the store with a copy in its talons, which he proceeds to angrily rip to shreds before leaving.
* In another, when Fran and Max are trapped in an blacked-out elevator.
* In another, when he mentioned that he found a drunk girl passed out on the couch in his and Chandler's apartment (following a party), in response to everyone's horrified questions of "What did you do to her?", he rather angrily declares, "I put a blanket over her in case she was cold and a bucket next to her in case she needed to throw up!", making it abundantly clear that he never even
* In another, when Malcolm is driven home by the parents of the children he babysits, arriving while Hal and Lois are having a half-naked screaming match in the front yard while Dewey and Reese root around in the mud like animals, Malcolm tries to claim he actually lives on the next street over.
* In another when she asks "where is the place where you undress", Bud answers; In your case, the principal's office.

* In another, Wile E has once again fallen off a cliff and as he plummets he holds up a sign asking "Can we end this cartoon before I hit the ground?" Cue
* In another Witches book, Nanny Ogg mentions a relative of Magrat's who clearly enjoys sex, as evidenced by her sizable brood of children, but who gets
* In another, Woody passes by a group of funny Wanted Posters outside a sheriff's office: Buffalo Bill (a man with a buffalo's face), Bat Masterson (a guy with bat wings hanging upside-down), Wyatt Urp (the face on the poster burps), and Wild Bill Hiccup (the face on the poster hiccups).
* In another Woody Woodpecker featurette, "Witch Crafty", after the witch rides the flying broom into a tree at one point, the broom is left stuck there as well as her purple mini dress which she falls out of and lands on her feet on the ground. Noticing the viewers see her in her pink corset (or bustier) and white bloomers (or pantalets), she modestly tries to cover up with some shrubbery and exits the scene.

* In another world, the Mane Six themselves are the giants, being big enough for Rainbow to flatten an acre of forest just by sitting down.
* In Another World with My Smartphone aggressive about it. On top of this, Touya eventually becomes king of his own country and many women under his command also show an interest in being a mistress or otherwise having a romantic relationship with him.
* In Another World with My Smartphone. Guess what he gets to bring with him.

* In Another World with My Smartphone haven't done that!", and all of the girls still compete for Touya's immediate attention in more light-hearted fashion. Further, Yumina later tells Touya that she doesn't care if he has a handful or dozens of concubines—but he had better take care of and love all of them.
* In Another World with My Smartphone, Touya Mochizuki, too soon, he decides to give the boy a second chance at life in a magical fantasy world while giving Touya one wish to make up for killing him. Touya asked him if he could keep his smartphone. Now it has service in and GPS maps of said fantasy world, can access the internet of Touya's home universe, and can make direct calls to God. Touya mostly uses it for maps, selfies, and looking up how to make ice cream online.
* In another, Zebra introduces his dog, Ike, who he says can point, saw through a block of ice, and jump on a Kurdish man's head. To demonstrate, Pigs says "Ike, aim!" and Ike points. Goat points to a block of ice and says "Ice, saw!" and Ike saws through the ice. Rat points to a Kurdish fellow who appeared nearby and says "Ike, on Kurd!" There's a beat panel where Rat realizes what was just said, and the final panel is Rat standing next to Pastis, holding a shovel, and saying
* In another Zero example, Schniezel winds up obeying Zero in the end because Lelouch geassed him to "obey Zero" rather than "obey me". This is very significant, because
* In another, Zim orders soldiers under his command to hold onto each other and fall across a pit to form a bridge he can use to cross.
* In a no-US example, during a quarterfinals match up at the 2018 Japanese High School Baseball Championship or the Summer Koshien, the biggest competition in Japanese sports, Omi Brotherhood High School clung onto a 2-1 lead heading into the bottom of the ninth, Kanaashi Nogyo High School loaded the bases with no outs, and won the game on a 2-run suicide squeeze.
* In an out-of-series example, Brent Spiner, Patrick Stewart, Jonathan Frakes, Michael Dorn, and LeVar Burton produced
* In a novel set after the Master's capture (but before he was placed in a prison with hypnotism-resistant guards), the only reason he hasn't escaped is that he doesn't want to just yet. He's quite put out when his allies "rescue" him because that wasn't in his plan.
* In a novel, the slayer Athena/Nina learns that her friend Leo, with whom she has been in love for years, is a half-demon. At first she is scared, but also because she mistakenly thinks he is a murderer. When the matter is resolved, she takes it surprisingly well. At the time of this unveiling, both are not actually lovers, but are already in love with each other.

* In Antarctica, the primary difference between "Summer" and "Winter" is how much sunlight the continent receives, and how bad the storms are. Same in the Arctic.
* In Antarctica, there aren't many, if any, plants to eat. As a result, the few animals that thrive there are mostly carnivorous or piscivorous.
* In "Anthology of Interest II" Professor Farnsworth tries to win a Nobel Prize for turning Bender into a human using reverse-fossilization.

* In Anthony Armstrong's short story "The Warlock's Daughter", a king assigns his daughter's suitors the task of finding water in a desert. The protagonist, having encountered the title character, uses a charm she gave him to summon her and asks her to create a river. She does, but having seen her, the hero decides he'd rather marry
* In a number of C. J. Henderson's stories, becoming a sufficiently accomplished mass murderer in and of itself nets you an extended lifetime by way of absorbing souls to snack on later. It's just that the exchange rate is too low to really benefit unless you really get depraved about it.
* In a number of D&D cosmologies living creatures ultimately basically "ran" on "positive energy" (as opposed to the "negative energy" powering undead), which might even have its own plane of existence dedicated to it. Healing spells basically channeled an extra dose of just that energy into the recipient to help patch them up, and positive and negative energies cancelling each other out when they met explained
* In a number of episodes, the main conflict could be easily solved if he had access to the TARDIS, but it was accidentally sealed in a vault / stolen / lost / fallen down a shaft almost as soon as the characters stepped out of it.
* In a number of his late novels (after he'd pretty much lost his marbles),
* In a number of modern militaries officers are required to have formal mess dress for special occasions, but those uniforms are not provided and the officers are required to purchase them themselves (within accepted guidelines). As a result, you can see officers from the same unit, depending on how much they were willing to spend, wearing anything from what is essentially their basic formal uniform with perhaps a bow-tie to tuxedo-like dinner jackets with cummerbunds or waistcoats.

* In an unusual example, Negi's father Nagi Springfield, known as the 'Thousand Master' for supposedly mastering a thousand spells, is revealed to be a heroic, magical version of this. In truth, he only knows something like 5-6 spells by heart, and has to perform anything more complicated than the bare-bone basics from a tome - but he backs those spells up with a
* In an unusual example, the Russian combat-transport helicopter Mi-24 Hind can carry a squad of eight men while being a full-power assault bird with gun turret and full array of air-to-air and air-to-surface guided and unguided missiles, literally intended to be the flying BMP. Apparently, the concept is successful enough to stay in frontline service from '71, as well as being adopted by countless countries, including basically the whole former Warsaw pact and India.
* In an unusual nod to capitalism, notably averted with Quark's privately owned holosuites on
* In an unusual subversion, comedian Andrew Clay Silverstein has been practically forced into a sort of Type 2 version of this trope. His character,
* In an unusual use of the trope, the giants of the Lorwyn/Shadowmoor megablock start out using this trope and end up averting it. When they wake from their

centuries-long hibernations, they take epithets as decided by their dreams, leading to such names as Worldkiller, Relicsmasher, and Stoutarm. They then go on to follow said dreams, effectively earning their titles retroactively.

* In an XY episode, while Pikachu, Clemont’s Chespin and Serena’s Braixen are making balls of snow, Chespin ends up making a snowball that is obviously too big to place on the sick Snover. As Chespin pushes the snowball, it rolls too fast, and Chespin somehow gets caught in said snowball and is helplessly sent rolling down, with Braixen dodging right before the snowball hits the wall.
* In any case, it's now known that a fairly small amount of cross-breeding between two breeding groups that are mostly separate will prevent species divergence. So even granting all that is said in the novel as true, interstellar travel will keep humans on all planets in regular contact with each other the same species.
* In any case, Napoleon's plans for global conquest was never anything more than pipe dream, since the failure of the Haitian Expedition which led to him selling the Lousiana territory to the United States, doubling its territory overnight and bidding farewell to the New World. The French navy could never hold a candle to the British Navy which restricted Napoleon to a Land Empire forcing him to capitalize on that via his continental blockade of denying English goods their biggest market: mainland Europe. This embargo actually succeeded in weakening the British trade and it was for breaking this embargo on the part of Russia and Spain, that he made the two crippling errors that finally ended his regime.
* In any case, the mutant metaphor was not apparent in the early Lee/Kirby issues. It only came in with
* In any collaborative artistic project such as film and television production there is a fundamental problem trying to quantify artist contribution and abstract concepts of quality. But in order to convey some amount of direction you ARE actually encouraged to give a percentage, as you could either spend five minutes trying to explain how loud you want the actor to scream or just say "scream at ninety percent capacity" and adjust accordingly. It's not a perfect science and prone to being

* In a ploy to steal their magical powers, some demons put Traci 13, Zachary Zatara, and Black Alice in a world where: Traci is uncontested ruler of the world, Zatara's lover is still alive and they are married with children, and Black Alice's mother is still alive. Traci rejects the fantasy because her father is dead. Zatara rejects it because he feels it is shaming the memory of his lover. Unfortunately, Black Alice refuses to give up her mother and attacks them.

* In April 2016, the question of whether super-injunctions are practical or even plausible in the internet age was raised again, when a celebrity couple identified as PJS and YMA fought to conceal details of their sex life; specifically that PJS had been engaging in extramarital threesomes with another couple. Since this was apparently something that YMA was aware of and accepted, the story probably would not have lasted a week had it been allowed to break; celebrity sex scandals are a dime a dozen. Instead, the case dragged on and so did the story, particularly since as with the Ryan Giggs story, Twitter was buzzing with the identities of the couple. The really ridiculous part was that because Scotland isn't bound by English law, people near the border could literally drive across and pick up a paper giving them all the details, including the identities of the couple. Mind you, in their defence, they argued that the super-injunction wasn't to protect them, but their young children. In entirely unrelated news, Elton John and David Furnish are good fathers.

* In "A Room With a Moose." Zim cackles over his latest diabolical plan, which will force Dib and his classmates into a pocket dimension consisting of only a room... a room... with a moose! When Dib doesn't see what's so horrible about that, the camera focuses on the moose, chewing on some walnuts... and Dib screams in terror.
* Inaros's ultimate ability, Scarab Swarm, drains his health in exchange for a proportional increase in armor. Since he has the highest health of all Warframes by a significant margin, and he has plenty of ways to regain lost health, he can

easily afford it. Unlike most instances of this trope, he can actually reclaim the lost health if the buff is dispelled prematurely. He can also choose to willingly sacrifice some of the extra armor to infest an enemy with scarabs, draining their health for him, but he'll have to give up some more health to charge the power back up again.

* In a Season 2 episode, Kenzan and Sho have a duel to determine which of them is a more worthy friend to Judai. At the end, Kenzan is about to lose, but can end the game in a draw if he uses his facedown card. He chooses not to play it after seeing

Sho's devotion to Judai.
* In a Season 3 episode the Decepticons are tricked by the Quintessons into releasing a powerful creature called the Dweller. The Dweller drains the energy of any transformer it can capture, turning them into an "energy vampire". Despite this title, they behave almost exactly like zombies — they move slowly, though not quite shambling, and drain the energy from others to make more energy vampires. They even lose all color, becoming gray and lifeless in appearance.
* In a Season 3 episode where the heroes end up having to use each other's powers, we get a variation on this — it's not a matter of knowing how to activate a power, or knowing what it does. It's that using it effectively is a lot harder than the one chosen for it makes it look. So when Mister Bug uses Lucky Charm, he gets the exact item he wants, to Marinette's annoyance — a giant mirror. However, deflecting the villain's

* In a segment, Grover returns from Jordan with a basket of banana peels. As he dumps them on the ground, he calls out the viewer's expectations that he'll slip on them ("Comedy 101!") and vows that won't happen. He still manages anyhow.
* In a semi-related example, Major Havok once wrote fanfiction about himself and posted it anonymously, figuring that nobody could get his character down better than the real deal. Cue several reader comments on how bad and unrealistic the characterization was, including one (which, on a reread, you realize is from Empowered's alter ego) claiming it completely misses the homo-erotic subtext that supposedly makes Havok such a compelling character.
* In a sense, all the player characters in the games could count, since every Pokemon that can be obtained in the games can easily become a potential ally. Something that doesn't seem to come as easily for NPC characters. This is also kinda

* In a sense of irony, the first fighter aircraft used by the Israeli Air Force were Messerschmitt Bf 109s (actually a crappy Czech variant called the Avia S99), and their pilots used Luftwaffe flight uniforms (with the swastikas removed, of course). One of the standard rifles of the nascent IDF was the Nazi KAR 98, again with the swastikas obliterated.
* In a sense, the Doolittle Raid counts as well. After Pearl, the Japanese appeared invincible, seizing island after island and colony after colony. By April 1942, they had all but swept the Allies from the Pacific. Then, sixteen B-25s were transported by carrier a few hundred miles from Japan and dropped light bombs on Japanese cities. Almost no infrastructure damage was inflicted, but it scared the crap out of the Japanese. This drove Admiral Yamamoto to fight much more aggressively, causing him to attack Midway in order to secure it and thus the Japanese defense perimeter would be complete. Then, at Midway, all four of Yamamoto's carriers were sunk...
* In a sense, the Jusenkyō springs are dangerous, which is possibly why they're advertised as "a legendary training ground."
* In a sense, the main character Kiritsugu Emiya could be seen as going through this as well. Though Kiritsugu is an adult, he still clings to childish beliefs about dividing the world into clear cut good and evil, as well as believing that he needs to become a "Hero of Justice" who can destroy all evil and create world peace,
* In a sense, the player character starts off with virtually nothing but the clothes on his or her back. As you continue to play though, you'll make a lot of bells. Some of it will go to Tom Nook, but you'll eventually end up with a mansion

full of stuff if you keep up with the payments.
* In a sense, this also happens with the (initially very central) question of whether a Trill can be held responsible for the actions of a past host. Because Curzon was proved innocent, the question becomes irrelevant, so no ruling is given on the matter.
* In a sense, this is Bizarre in how normal the reproduction was. The Visitors are reptiles from another world posing as humanoids (presumably mammalian). Somehow Robin was impregnated through what appeared to be intercourse, just like it would be between humans.
* In a sense, this is how aircraft carriers operate: one large, slow section with living quarters and maintenance, sending out relatively small and fast pieces of metal (airplanes and helicopters) to carry out or fend off attacks then return.

* In a short Italian story a king once decided to inspect his dungeons. He asked the first prisoner about his crime. The prisoner pled innocent. So did all the other prisoners but one, who confessed to numerous heinous crimes. The King ordered he be thrown out of the jail at once so that he wouldn't besmear the convention of honest people with his presence.

* In a short play from French author Jean-Michel Ribes, two people on a shipwreck are trying to write a message in a bottle requesting for help. One of them wants to write a long, flowery message, while the other proposes a much shorter message written in that style, prompting the first one to ask why help would come if the message keeps saying stop.
* In a short story about a man who decides to create an artificial human, he brings his creation to the city leader. The leader commends his effort but points out the flaws, such as lack of aging and the skin's inability to tan. He then shows the inventor an old video of a young boy and a group of old scientists. He reveals that they are the last true humans. He is that boy, the first artificial human. Unlike the flawed creation, he can do all the things real humans can. Realizing that everyone he knows, including himself, is an artificial human, the protagonist is shocked. The leader then proceeds to wipe his memory of the meeting, so that he can continue living in blissful ignorance.
* In a short story by Axel Hacke. He is talking to his sentient fridge named Bosch about this trope. Some American soldiers who were crushed by vending machines are mentioned. Bosch thinks it's the soldiers' fault, since they shook up the machines. The narrator gets angry and mentions the many times he got nothing for his money.
* In a short story by Margaret Attenborough, when God visits Kitty Heaven (which is actually Human Hell) he takes the form of a white Persian.
* In a short story called "The Truth About Annie", a woman tries to figure out why her parrot keeps repeating phrases like "Annie died" and "Annie is bleeding".
* In a short story set untold eons in the future, humanity has done, created, and experienced everything possible in every possible permutation and variation. There's nothing left to live for. So they do the one thing no one's ever done before to end their unspeakable boredom: end the universe.
* In a short titled "Ode to the Nut-shot", we see two instances of this, one straight and one played with; in one case, a lumberjack repeatedly punches himself in the nuts to no effect, and in another, one robot kicks another in the groin, at which the victim simply stands there and shrugs.

* In Asian marauder ants, the workers come in a wide range of sizes, and each particular size is assigned a certain specific task through which the different size-castes cooperate, such as when harvesting food, where a mid-sized worker plucks seeds from a stem while smaller workers cart them away. The largest of them, known as
* In 'As I Darken', Lada, her slightly younger brother Radu, and Mehmed, son of the sultan, become friends as children. When Lada and Mehmed grow older they fall in love and start a relationship, which makes Radu realize that he is also in love with Mehmed. Lada finds out and their relationship has a lot of tension, especially after Radu suggests to her that it would be weak to stay with Mehmed, knowing full well that that's the thing to say to get her to leave.

* In a similar vein, the 1985 Chicago Bears are often considered to be one of the greatest teams in the history of the NFL, but their head coach Mike Ditka and defensive coordinator Buddy Ryan did not get along at all. The roots of the problem began when their deceased founder and owner, George 'Papa Bear' Halas, hired Ditka to be the head coach in 1982 over Ryan, who had been with the Bears five years prior and felt he should have gotten the job. This effectively led to a schism in the team where Ditka ran the offense and Ryan ran the defense as separate units. Both men were able to stomach each other for the cause of winning, but their animosity came to a head on a Monday Night Football game against the Miami Dolphins, who ended up spoiling an otherwise perfect season giving the Bears their only loss that year. During halftime, Ditka and Ryan finally came to blows and

You must instead play elsewhere, and are allowed to take back on your next turn if your opponent has not played to stop that. In this case you need to make a play somewhere else that makes a threat that will cost your opponent more than he gains by consolidating the original exchange. He responds to your threat, you retake, leaving him in Ko, and so he then must make a threat for you to respond to. Both sides continue this until one player calculates the threat is not worth as much as the Ko position. Even then this may help the other player, as a dead group of stones is saved (or a live group is killed), lessening the value to the other side of winning the Ko.

* In a Strong Bad Email, Strong Bad brags that he has the only extant copy of the ill-fated Limozeen Saturday-morning cartoon, which was cancelled before the first episode even finished airing. When Strong Bad mentions this, cut away to the cartoon, with Teeg Dougland saying, "I've got some bad news, boys; we've been cancelled." This is a cartoon, meaning that technically the animators would have known that months ahead of time. Meta. Later on, Crack Stuntman, the not-taking-his-job-seriously voice actor of the Cheat Commando leader Gunhaver started making obnoxious demands about his character, leading to on-the-spot edits to make Gunhaver a lover of massage chairs or to add Crack's girlfriend as a cast member. Finally the director creates a character to replace Gunhaver until they can find an actor who doesn't have his head stuck up his ass.

Armed with knives, hatchets, axes, and anything else they could find to use as a weapon, Turner and his followers went from house to house, freeing all slaves they found and indiscriminately slaughtering the white inhabitants. More than 60 slaves joined in the rebellion, killing over 60 people before the rebellion was put down by local militia members, supported by armed sailors from nearby warships stationed in Norfolk. Nearly all the participants in the rebellion were killed or arrested and hanged, including Turner, though he managed to evade capture for nearly two months. Not only was the rebellion a failure, but it ended up even further entrenching slavery in Virginia, convincing the legislature to pass a slew of further repressive laws to prevent blacks from being educated.

* In Australia and New Zealand, calling people monkeys is mostly a playful expression of affection, used to describe children or used between adult friends. It can be racist, but only when it's referring to Indian people; racists using the term against other races is very uncommon. When New Zealander-born NBA player Steven Adams referred to his mostly African-American opponents as "quick little monkeys" in one interview, it sparked widespread outrage in America with some calling for him to be fired, and utter confusion in his native country.
* In Australia and New Zealand, sarsaparilla (which is relatively similar to American root beer) is often abbreviated down to "sars." Apparently no one there is concerned about a soft drink whose name sounds like a disease. That said, Aussies had called the drink Sars for decades before the illness became news and have continued to call it that decades afterwards. The important difference here is the second 's'. The second 's' in the drink is pronounced as in 'sole', while the 's' in the disease is pronounced as a 'z'. Interestingly, in the US sarsaparilla is pronounced 'SASS-parilla', thereby avoiding the problem (not to mention very few Americans actually drink sarsaparilla anymore since nowadays it is considered a niche soft drink compared to its more popular successor, root beer).

* In Australia, most G rated films simply state "For General Audiences" on posters or VHS/DVD covers, without any additional ratings advice. The Hunchback's home release on video was rated "G" but with an added tag of "Some scenes may be unsuitable for very young children". Later re-releases on DVD and
* In Australia, New Zealand and the UK, this stuff (flavoured, sweetened, wobbly set gelatine dessert) is never called jell-o. It's called jelly, which has never been trademarked under any prominent brand. Which means that anytime imported TV shows refer to "peanut butter and jelly sandwiches" etc. an odd mental image comes to mind, as the 'jelly' in that phrase is known as jam in these countries.
* In Australian Sign Language and New Zealand Sign Language, 12 is signed double-2, while 22 is signed double-2 with the second to the right of the first (the same rules apply for 13 and 33, 14 and 44, etc.) Hence signing "my girlfriend is 22 years old" incorrectly may
* In Australia's National Basketball League, the Sydney Kings got the nickname "Violet Crumbles" due to (1) their colors of purple and yellow resembling the packaging for the chocolate bar of that name, and (2) their tendency to disintegrate in the playoffs.
* In Australia, teams based in the eastern states can be at a significant disadvantage when playing against teams based in Perth, which is two hours behind (or three if it's during daylight saving and they're not from Queensland). The only other major city in a different time zone to the east coast is Adelaide, which is only half an hour behind.
* In Australia, the Dingo fence protects southeast Australia from dingoes. Likewise, the Rabbit-proof fences in Western Australia and Queensland were built to keep rabbits, an invasive species, out of valuable agricultural land.
* In Australia, the film was rated PG - however, unlike the American release, it at least mentions "animated nudity" as one of the reasons.

* In Australia, there is this thing called mateship. It's not the same thing as friendship, you might not even be friends with your mates — your mate could be your best buddy from Primary School who you've lost touch with, and a friend might never become a mate, because friends come and go, but mates stick up for each other no matter what.
* In Australia the Speaker of the House of Representatives, Bronwyn Bishop, got in trouble for chartering a helicopter to take her to a Liberal Party fundraiser and charging the taxpayer for it. In her response after paying the money back she said "I'm very sorry it's taken the heat off Mr Shorten
* In Australia the university fees are capped by the government, but to help the universities make money they uncapped the number of admissions. As a result the ATAR (Australia's version of an SAT) scores needed for admission have steadily been getting lower to allow more students.
* In Australia, they've apparently figured out how to make their own in house. You can still tell though, 'cause the DIY ones aren't still images. Which, if you're familiar with the show, is possibly even more jarring.

* In a variant case, Plastique's first appearance ended rather badly when she tried to blow herself up for a terrorist attack and make herself a martyr with a suit that was laden with bombs. Firestorm responded by changing the fabric of her suit into air, leaving her naked and humiliated while he gathered up the bombs to explode at a safe distance while her political credibility was equally vaporized.
* In a variant in one episode, Superman's skin is contaminated with a mass of microscopic radioactive particles that forces him to be in radiation proof containment on Earth. Here, the solution is to fly towards the sun, not to enter it, but just to enter its gravitational field to allow it to pull all the particles at once.
* In a variant of this, in the days before other football scores were reported continuously in the crawl during live games, networks showing a Sunday afternoon football game would tease the viewers to tune in at halftime to see the scores and highlights of other games. After the obligatory commercial break, the halftime show would begin by giving the score and highlights—of the game the viewers had just been watching.

* In a variation, in the 1999 AFC Championship game between the Buffalo Bills and Tennessee Titans, the team's starting kick returner, Derrick Mason, went down with a concussion and the backup was also unavailable when the moment came where the Titans' hopes would come down to making a big play on the kick return, so head coach Jeff Fisher made a split-second decision to put in Kevin Dyson, who was a top wide receiver for the Titans but was hardly ever used on special teams and rarely even practiced those plays; in fact, he was so unfamiliar with the special teams playbook that Fisher had to talk him through the play before sending him onto the field. The result was one of the most famous plays in Titans history, known as the
* In a variation, Marceline is genetically half-demon, half-human. The vampire part resulted from when she was bitten as an older teen during a fight with the Vampire King.
* In a variation of the Bluebeard tale, "Fitcher's Bird", where the husband is a
* In a variation of this, a Silver Age Superman story that saw Superman be split into red and blue versions of himself allowed one of them to marry Lois and the other to marry Lana. A more disturbing version comes in another Silver Age Superman comic where Lois and Lana find that Superman had been changed into a child and both decide to condition the kid into proposing to them when he's older. It turns out that it was actually a version of Superman from another dimension where polygamy is legal, so he wound up marrying both of them. Shown in this
* In a variation of this trope, Alec Baldwin's character is under pressure to join his acting crew and say a few lines on live TV. Unfortunately, he's a horrible actor and has no idea what he's doing in front of a camera, also having an amateurish tendency to stare directly into one. At one point a friend reminds him to avoid doing this, after which Baldwin looks directly into

* In "Avatar Day", Aang is charged for murder in a former life, imprisoned with hands and head locked in a pillory, and casually slipped out of it during a chat with other inmates. In this case, it's implied Aang wasn't being limber, the stock just seems oversized.
* In "Avatar", Teal'c is trapped in a training simulation designed to learn from him and become harder to beat as a result. It did this by either spawning enemies right around corners to shoot him, spawning new enemies after the conditions of the simulation had been beaten, or adding factors to make the enemies harder to beat. It took Daniel jumping in as an ally (with the ability to see the future as a

cheat) for the computer to finally give Teal'c a victory scenario. Worse, it turns out
* In Avatar: The Last Airbender, the Abridged series (found on Youtube) in the episode where Aang is captured for the first time by Zuko, he is taken away by two guards. In the next scene, he is in Zuko's cabin and states, "Did you really think faceless guards number one and two could hold me?"
* In Avengers 1:125 (1972), While the Avengers are fighting an alien invasion from Thanos, there's a panel showing a busted alien ship falling toward the street. * In "A Very Crappy Christmas", Stan is told to fill in for Cartman for the boys' cartoon. When imitating Cartman, Stan briefly gains his double-chin.
* In "A Very Digi Christmas", Agumon jumps out of a present box. He jumps out with his foot filling up the screen and jumps out of the camera into Tai's arms
* In a very early chapter of the manga/episode of the anime, when Kyoko, her parents and Soichiro's father, Mr. Otonashi, go to the cementary to pay omage to Soichiro, Mr. Otonashi has a very frank discussion with Kyoko, where he bluntly tells her to move on. Mr. Otonashi implores her not to forget Soichiro and although the time she and his son were married were the happiest years of Socihiro's life, he also tells her that if she falls in love with someone else, then she has his blessings to be with that someone, since it's not healthy to be so obsessed with a dead man.
* In a very early strip, Odie had an "accident" inside the house and is punished by Lyman. Garfield snarks that they should have called him "Spot" instead. (

* In a very similar joke, Ryoga once dives into the pool to save a drowning Akane, completely forgetting that he'll turn into a small black pig in contact with the cold water. Ranma even lampshades this mid-dive.
* In a very similar vein, there was a time when the Doctor himself had a previously-severed hand put away somewhere. Then, when Ten tried to stop his own regeneration, he shunted the regeneration energy into said severed hand. The hand then grew a not-so-clone of Ten (he was more Human than Time Lord). It should be noted that the Doctor himself averts the trope. While he
* In "A Very Special Blossom," our red-headed heroine steals a quite pricey set of golf clubs to give the Professor as a Father's Day gift. Not only does she lie about how she got them but she tries to frame Mojo Jojo for the theft.

* In "A Very Special Family Guy Freakin' Christmas", Lois remains calm, collected and full of holiday cheer through all the disasters around Christmas. But then... "No...paper...TOOOOOWELS?! AAAAAAAAGH!".
* In a very strange and horribly twisted way, Warboss Ghazhgkull Mag Uruk Thraka and Commissar Yarrick, though it is only one way; Ghazhkgull regards Yarrick with as much affection and respect as any Ork can muster, especially for a 'puny 'umie', as a good Ork needs a

* In a way a literal inversion, as the spell was written in the book backwards and needed to be magically turned around in order for it to work properly.
* In a way, American football averts this. When practicing, quarterbacks will wear red shirts so defenders will know not to hit them and thus not risk injuring them. This is because quarterbacks are the most important player on the offense and at the pro level, they're worth the most amount of money, so the quarterback is actually in the least amount of danger. However, it's played straight with college freshmen and rookie pros, who traditionally go through a "redshirt" year where they

only play during practice.
* In a way, any Ferengi in military service, either in Starfleet, their own forces, or otherwise, would seem to be this. Almost by definition, money invested in a military is a profitless endeavor, a necessary sunk cost with little to no expected return. However, in the 19th century, the

While he was wandering around he got hungry, he found a rabbit who offered to share its grass, but the deity pointed out he couldn't eat that, so the rabbit, not wanting him to die of hunger, offered itself as food. The god was moved and carved the shadow of the rabbit into the moon so everyone would remember it.
* Inazuma Eleven 2. Their assault on the school happens in the middle of the day, and students can be seen in the cutscene walking about the campus, indicating it must be either school hours, or the very least not too long after the final bell. Despite this, the entire school seems to be miraculously empty, as it's blown up and crumbles.
* Inazuma Eleven 3, and possibly previous games in the series, have a special shoot animation which is only played if the defending team has no available players (not even the goalkeeper) anywhere near the path from the ball/kicker to the goal. Odds are you can complete the entire game without this situation ever coming up, because the goalkeepers' AI isn't stupid.
* Inazuma Eleven 3, and strikingly so for a franchise that is supposedly aimed at children:
* Inazuma Eleven abilities every chapter to climb up the tournament. It doesn't work by the half of the game and the heroes are finally told they need to train properly instead of spending times looking for papers.
* Inazuma Eleven: Aki has green hair and green eyes, Natsumi has red hair and red

eyes and Haruna has blue hair and bluish-gray eyes.
* Inazuma Eleven and Little Gigant count as well because they grew up together.
* Inazuma Eleven and other supernatural stuff around like no tomorrow.
* Inazuma Eleven, and Space Penguin, in which the birds wear the most adorable little space suits!
* Inazuma Eleven anime, Kurimatsu has a very raspy chipmunk-like voice. In the English dub, he sounds like a normal teenage boy.
* Inazuma Eleven: Ares characters don't play soccer as it's normally played. In their world, soccer is flashy and involves physics-defying moves. The teams are also co-ed.
* Inazuma Eleven, as long as it concerns soccer, even an old hag can create wings if she learns the right skill.
* Inazuma Eleven) because the empowered teens and their descendants made an awful lot of ruckus with said powers as time went by.
* Inazuma Eleven big handwriting, no less) to make sure he doesn't get his laundry mixed up with any of his teammates. Seven episodes later, Touko barges in on the boys changing, and gets an eyeful of Endou in his underwear - and he's actually wearing that very same pair of boxers.
* Inazuma Eleven can easily count, it is most notably Handa Shinichi's main gimmick. He's in fact so normal, that it has become a meme in the fandom.
* Inazuma Eleven. Endou asks Tachimukai how he can eat this, to which he replies that he likes spicy food.
* Inazuma Eleven fame are straight up headstrong leader & charismatic leader because of their overwhelming determination and idealism.
* Inazuma Eleven, first for being stuck in the hospital and next for failing to qualify for Japan's national team.
* Inazuma Eleven for Wii has every character build up "kizuna" (literally "bond") values with each other from 0% to 100% as those characters practice together or participate in a same soccer match. The higher the relationship value, the better they perform. Some characters access secret skills and combinations through this process as well.
* Inazuma Eleven game, he is always wearing a pair of blue-rimmed goggles, except he is consistently shown without them in flashbacks to his childhood. The reason for this is explained in the third game.
* Inazuma Eleven game introduces a finishing technique named "Emperor Penguin No. 2" halfway through the game, which is likely to leave the player wondering if there's a "No. 1" anywhere. What Emperor Penguin No. 1 is, and even the reason why nobody dared so much as mention it previously, is finally revealed halfway through the second game.
* Inazuma Eleven GO. Both of these are nearly (but not completely) impossible to pull off.
* Inazuma Eleven GO: Chrono Stone variety as they believe that anyone who isn't blessed with the Second Stage Children genes should be killed and they are therefore in the way of the evolution of mankind.
* Inazuma Eleven Go! features "The Resistance", a group fighting against Fifth Sector who rule over the JHS soccer world with an iron fist, fixing matches and taking away "real soccer". The Resistance is based at Teikoku and existed before Raimon began their solo fight against Fifth Sector, although Raimon join The Resistance after they beat Teikoku in Holy Road.
* Inazuma Eleven GO Galaxy: The inhabitants of the planet Ratoniik are humanoids with insect traits (antennas, wings, sometimes insect eyes etc.) who are said to have evolved from bugs. Because of their evolution, they have shorter lifespans than normal humans (they don't live more than an year). For example Banda Kologyu died after his match with Earth Eleven.
* Inazuma Eleven GO is so much of a soccer freak (even more than his predecessor Endou) that he treats it like a person. In his mind, it can cry or be happy.
* Inazuma Eleven Go: Kirino has feminine eyes and a rose pink hair tied into two pigtails. He is actually a boy, so don't be fooled be his appereance.
* Inazuma Eleven got mixed reactions from the fanbase. Some people think that it's

much better than the original while other think it's a step backwards.
* Inazuma Eleven had its name changed to "Super 11" in Brazil (yes, not counting the Raimon reserves).
* Inazuma Eleven had this so much, that the sales for each subsequent release went down, especially when the series changed from the NDS to the 3DS. The major complaint for each title from most critics was that it was the gameplay and structure was exactly the same in each game, and that the gimmicks thrown in such as "fighting spirits" just felt like a cheap way to make it feel fresh without updating anything. This was actually admitted by LEVEL-5 as being the main reason for why the latest game's sales were ridiculously low, and it's been announced on Twitter that they're currently working on a project to completely change how Inazuma Eleven plays in the future.
* Inazuma Eleven has a number of special abilities served as this such as Omega the Hand, Maximum Fire, and Prime Legend, though it's quite acceptable since you still get to do a lot of things after you beat the final boss.
* Inazuma Eleven has a subtle version: Otomura's beatboxing and beat-counting is synced to the background music.
* Inazuma Eleven has Handa, whose stats are thoroughly average across the board and will remain roughly equal to each other as he levels up (unless you train a specific stat, of course). His short bio even points out the fact that he's a jack-of-all-trades.
* Inazuma Eleven has several scenes where one or more characters instantly collapse when they hear something they consider absurd. Though unusually for an anime, they usually fall backwards (the flip-take) rather than on their face (the anime fall). An example is in episode 5, where everybody in the room except Gouenji and Kazemaru has this reaction after Endou reads his grandfather's explanation of the Inazuma Drop, which is total non-sence.
* Inazuma Eleven has this: Endou's Seigi no Tekken and God Catch, Tachimukai's Majin the Hand and Mugen the Hand, and Kidou/Fudou's attempt to create Emperor Penguin No.3.
* Inazuma Eleven has this, which is called "Hissatsu" (Japanese for "Certain Kill").
* Inazuma Eleven. He especially likes to put chilli sauce in people's food and give them a frog when he shakes hands with them.
* Inazuma Eleven in a soccer match to create super natural moves, but none of the members in your team thinks of jumping across a small river to get to pieces of wood to create a bridge so that their van can cross, and you have to go around the whole maze-like forest.
* Inazuma Eleven: In the beginning, before Raimon entered the Football Frontier, several schools like Teikoku and Occult challenged their team to a match only because they were interested in Gouenji's strength rather than the whole team, which was considered weak. Discussed when Occult's coach angers Someoka with this very statement.
* Inazuma Eleven is able to copy Endou's Hissatsu Techniques just by watching him, on TV!
* Inazuma Eleven, is currently scheduled for a winter 2011 release, but trailers had already surfaced a whole year in advance in December 2010. As a result, the major plot points are generally consistent between the game and anime, although plenty of details and smaller points differ.
* Inazuma Eleven is described as a genius playmaker and is often responsible for figuring out how to break through opposing teams' supposedly unbeatable strategies. Fudou Akio and Fidio Aldena also fill this role in the third season, if to a lesser extent.
* Inazuma Eleven is prone to tears when he gets overly emotional. At the beginning of season 2, after Raimon win the Football Frontier championship, he cries a river.
* Inazuma Eleven. It also added a bunch of various features, bug fixes, and new optional sidequests and postgame content, plus tweaks to some of the original content.
* Inazuma Eleven, it was given an entirely new dub featuring LA voice actors.

Interestingly enough, other than changing "football" to "soccer", the script was almost entirely unedited from the EU release, which had the strange effect of mingling American accents with British colloquialisms and slang.
* Inazuma Eleven, Japan is attacked by aliens that claim they will conquer Earth with its main method of competition: football. Just before the final match at the season's finale, it's revealed that they are only kids that were given incredible speed, strength, durability and reflexes by an evil corporation using a powerful alien meteorite as fuel.
* Inazuma Eleven Kanon follows them back in time to stop them. Both parties seem to think San Dimas Time is in effect despite not having any reason to think so. Kanon even apologizes for showing up late to the final match, in spite of being able to travel through time.
* Inazuma Eleven: Kidou is one of the best soccer players introduced early in the series and has top grades at both English and Math. He manages both at the same time.
* Inazuma Eleven lampshades this with one of its managers, whose last name is Otonashi. Otonashi means "quiet"—the character is the opposite.
* Inazuma Eleven of all things to attack. In the sequel, summoning is so common it gets its own term: Keshin.
* Inazuma Eleven of the original but can also be seen without any knowledge of the older series.
* Inazuma Eleven Orion no Kokuin, Iwato writes love letters to somebody named Hikaru, whom he has a crush on despite knowing nothing about that person other than the name. In episode 8, he receives a letter where Hikaru reveals he's a guy, which shocks him enough to keep him awake all night.
* Inazuma Eleven Orion no Kokuin: The episode where Aphrodi joins Inazuma Japan was released on May 17, which is also the date of his birthday.
* Inazuma Eleven: Played for laughs in episode 41 when Endou is talking to Aki outside after they both get up early and the camera reveals that Natsumi, who likes the same guy as Aki, is eavesdropping on their conversation.
* Inazuma Eleven series for children has admittedly made many a girl swoon over middle schoolers.
* Inazuma Eleven series. For example, surfer Tsunami shows that he has potential in soccer when the team accidentally kick a ball at him while he's surfing. He manages to defend himself, with powerful kick.
* Inazuma Eleven stands out with his ugliness, even among the less attractive characters. But then, most of the other first-years aren't exactly lookers, either.
* Inazuma Eleven's teams. While most hissatsu techniques have distinctive names that are shown when they are used, those used by Protocol Omega are designated by the move's type and a number, such as "Shoot Command 01", or "Tactics AX3".
* Inazuma Eleven takes places to show how badass the bad guys are when they debut.
* Inazuma Eleven that this kind of relationship doesn't exist between them.
* Inazuma Eleven, the members of the villainous Protocol Omega teams are each named after a letter of the NATO alphabet. It's likely intended to emphasize their cold, military precision.
* Inazuma Eleven. Unlike in the game, this team never has enough raw power.
* Inazuma Eleven was originally a big fan of Endou, and even learned to be a goalkeeper by watching Endou on video repeatedly and mimicking him. He ends up as Endou's teammate and friend and even gets to fill in for Endou as goalkeeper on several occasions.
* Inazuma Eleven. When they create the storybook world, they're forcefully thrown into it as the story's characters. This leads to multiple exchanges where the protagonist Tenma is referred to as the main character, and some other characters lamenting how they're a minor character.
* Inazuma Eleven, where the aliens are completely real and all speak Japanese.
* Inazuma Eleven) who apparently is more than just a Hiroto fanboy. He stalks him while he's training, follows him in the forest and even blushes when he asks him for an autograph, but Hiroto doesn't mind him. On the other hand, none of the female characters are attracted to him and he has no fangirls, but it's not like

Hiroto expresses any interest in girls, either.
* Inazuma Eleven, who is best known for voicing Naruto (who also kept her voice into adulthood).
* Inazuma Eleven who is discovered to have a natural talent for soccer.
* Inazuma Eleven with Teikoku Academy's soccer team. They start out giving this impression, but halfway through it turns out that all the actual villainy is committed by their "commander"/coach and some of his henchmen, all behind the backs of the actual players. The players themselves actually turn out to be perfectly nice people (if a bit intimidating due to their skill and military-grade discipline) and revolt when they find out about their coach. Their team captain Kidou even voluntarily offers to forfeit the match because of it, but Endou's not the type to take an easy victory on a technicality.
* In "Babes", a teenage girl apparently commits suicide after being cruelly cyberbullied by her friend's mother. Unfortunately, there's no law on the books against cyberbullying, so the ADA has to try to twist some less-specific charges to fit. She's able to get to trial with it, but
* In "Baby Butch", Butch disguises himself as an orphaned waif so he can raid Tom's fridge.
* In "Baby Cakes" Pinkie Pie attempts to cheer up the crying Cake Twins with a standup act. This elicits
* In "Baby Cakes", Pinkie Pie gets covered in soppy dough after getting sprayed with bathwater and then dumping a bag of flour on herself to amuse a pair of baby twins.
* In "Baby Cakes", Pinkie's attempt to cheer the twins up with stand-up comedy elicits this. There's also the sound of someone coughing.
* In "Baby Cakes", Pumpkin and Pound, the Cake Twins, speak their first word in their sleep. It happens to be Pinkie Pie's name.
* In "Baby Come Back", baby girl Charlie is mixed up with a baby boy. The kids babysitting her manage to switch her back, but are ultimately busted when none of them can explain the pee stains in the living room. Earlier in the episode, we get this:
* In "Baby Doll", the eponymous villain uses a dynamite candle in an attempt to kill Spunky
* In "Babylon Squared" a Starfury pilot passes through the time field around Babylon 4 and dies of old age.
* In "Baby Race", it is revealed that Bluey learned to drag her butt on the ground before she learned to crawl. In the present day, Bluey is quite puzzled to hear that.
* In "Baby's In Black", Paul is so relieved that the girl in the vampire get-up wasn't a real vampire that he plants a big one on her. She's so ecstatic ("Paul actually kissed me!!") she starts flying
* In "Baby", the titular character delivers her evaluation of Star's magical talent to Queen Moon. When Moon assumes her daughter has failed the test, Baby responds that "Star is nowhere near your skill level at her age.
* In "Baby, You Can't Drive My Car", Homer calls Mr. Burns a crazy, wrinkly, short piece of garbage. Mr. Burns is only upset about being called "short".
* In Bach's St. Matthew Passion, the movement "So ist mein Jesus nun gefangen" starts out as a peaceful duet, only with very startling and unexpected interjections of "Laßt ihn, haltet, bindet nicht!" (Leave Him, stop, don't bind Him!). This happens several times in the duet before it turns into a chorus filled with
* In Bachuan, though, the leadership is a fairly blatant expy of 1950s Communist China.
* In "Back & Forth", Blackadder from 1999 time-travels to Elizabethan England, and to save himself from being executed, tries to offer Queen Elizabeth a supermarket loyalty card. Even if Tesco had existed back then, the ability to "earn bonus points meaning that once a month, you could buy a tin of baked beans at half-price" would do little to convince a peasant, let alone the Queen of England.
* In "Back from the Dead", Mac escapes from two mafia hit men using a fire hose to

slide down a metal wire. First cut off with his Swiss army knife of course.
* In backgammon, the doubling cube can be used to increase the value of a game. It's basically a "double or nothing" offer: A player offered a double can turn it down, at the cost of losing the current game. As matches normally run towards 7 points or more and the person receiving the double is the only one allowed to "redouble" his opponent in the same game, and as a double is usually used to force a game for 1 point, or potentially win 2 points, it takes incredible luck or a very, very poorly handled double for somebody to win in a single game if they're behind 6-0.
* In "Back in Black", Lucy hair is suddenly blonde and she wears a pink outfit instead of her usual black and white one, and starts talking like a
* In backstory history, the Rhoynar came to Westeros fleeing Valyrian conquest.
* In "Back to Norm", Crocker teams up with Norm, but instead of simply wishing Timmy to Mars (
* In "Back to the Pilot", after screwing up the timeline in the past, Brian and Stewie go five years into the future to find that everything is done in "slicker" CGI and the writing has gotten lazier.
* In "Back To The Pilot", Brian and Stewie continually travel back in time and
* In "Back To The Pilot", Brian warns his past self about 9/11 during a time travel adventure to the first episode of the series, leading to him preventing the destruction of the World Trade Center. As a consequence, George W Bush loses his re-election campaign and instead ends up leading several southern states into forming a second Confederacy and seceding from the U.S. This spirals into a second Civil War and eventually reduces the East Coast to an irradiated wasteland.
* In "Back to the Pilot", Stewie and Brian go back to the series' pilot episode, which retained the more crudely-drawn art style that the original seasons had. They later go into the future which is ultra-realistic CGI.
* In Back to the Sewers, The Incredible Shrinking Sterling, focuses on the character named Sterling, along with the toddler turtles.
* In "Back to the Woods", James Woods steals Peter's identity. Instead of arresting him for identity theft, Joe claims he has no choice but to treat James Woods as Peter and arrest
* In "Backwards", before they leave, Lister tells Rimmer that Cat has gone off into the bushes, then he realizes what this entails, and says, "We've got to stop him!" Cat comes back, hair sticking straight up, walking stiffly, horrified expression on his face, and simply says "Don't ask." (For those who don't recall the episode, they were on an alternate Earth where everything happened
* In "Bad, Bad Leroy Brown" the title character is a tough guy who learns a lesson at the end of the song when he gets beaten up by an even tougher guy.
* In "Bad, Bad Rubber Piggy", you can hear what sounds like a ticking clock in the background starting after Dib is hurt for the second time and lasting up until he flatlines.
* In "Bad Blood", Agent Mulder gets in a lot of trouble when he kills a suspect with a
* In "Bad Blood", a teenage girl gets hysterical when blood seemingly starts dripping down on her through the ceiling. It turns out that a ghost upstairs upset a can of red paint to scare her.
* In "Bad Bob", Bob and his cousin deal drugs, and find out their buyer is a cop when he reads them their rights.
* In "Bad Chicken", Chicken's paper clone mouths off the Teacher and the Teacher responds by threatening to wash his beak out with soap.
* In "Baddest of the Bands", Strong Bad tries to get the Two-O-Duo (Bubs and Coach Z) to reunite so they can compete in the Battle Royale of the Bands. Bubs thinks Coach Z has "gone soft", so Strong Bad has to pull
* In "Bad Dreams", Olivia finds herself psychically linked to a man who is
* In "Bad Eggs" while at the mall Buffy politely looks away from a couple kissing...and sees in the wall mirror that only the girl is visible.
* In "Bad Hair Day", Candace is mistaken for a rare "tangerine orangutan" thanks to mis-using Phineas and Ferb's hair-restoring machine. Candace manages to get the

hair off, only for it to get stuck to Dr. Doofenshmirtz, who is mistaken for the orangutan instead and is captured by Jeremy's mother.
* In "Bad Lemonade", Olive lets her ego get the better of her and smugly tells Odd Todd that there's no way she nor Otto would drink anything made by him. In the middle of her sentence, the ex-agent motions over to Otto as the agent grabs a cup of lemonade and drinks it.
* In badminton, a match is decided by the best of three games. Each game requires one side to win by scoring 21 points, or two more points than the opponent, whichever is higher. To shorten match times however, a cap of 30 points was added, so if the score is 29-29, the one who scores the next point wins the game. As a result, this trope comes into play when this happens in the third and final game of the match.
* In "Bad Tina", Tina shows new friend Tammy a peephole into the boys' locker room - down at floor level where all they can see are feet.
* In "Bad Tina", when Tina runs around with her new friend, bad girl Tammy, siblings Gene and Louise blackmail her to keep her bad deeds secret from their parents - but when they find out Tammy is blackmailing her, they rally to her side.
* In "Bad Vibrations", Gloria Baker asks Scott how he cleaned the ice cream off of T-Bob after he got covered in it while M.A.S.K. was looking for the last of Julian Long's vibration bombs. Scott hesitates before sheepishly answering that he didn't like seeing all the ice cream on T-Bob go to waste, so he ate it. After Matt Trakker and the other members of M.A.S.K. laugh, Scott eventually starts laughing with them.
* In "Bait", the Vomiting Cop (in fact a vomiting Coast Guardsman) was actually involved in the case -
* In "Balance of Terror", the Romulan ship heads home under cover of a
* In "Balance", the rebels kidnap Glaber's wife and offer to trade her back in exchange for a wagon full of supplies. Instead, Glaber sends a wagon full of mercenaries, and the rebels barely escape.
* In "Ball-Carrier and the Bad One", the Bad One orders his servant Lung-Woman to boil Ball-Carrier in a giant kettle, then leaves to invite guests. Ball-Carrier (who's protected by the spirits) shouts that Lung-Woman should come and taste the soup, then kicks the kettle over, takes what he came for and escapes while she's being scalded to death.
* In "Ballin'", Sarah covers Jazmine's ears when Tom starts swearing, after the basketball team he is coaching not only loses, but he misses the opportunity to have a "miracle" win.
* In "Baltimore", Tony flashbacks to when he learned his partner was dirty. When Gibbs shows up, Tony name drops the first half of this trope while Gibbs does the second, adding on, "I had a hunch."
* In Bambi II, After Bambi learns that his father was planning on sending him away to live with another doe (a deal that his father was about to cut off from), he angrily snaps at his father, going as far as to say that he wish his mother with him instead of his father.
* In "Band Candy" a spell makes all the adults revert to their teenage selves, including Giles to his delinquent "Ripper" personality. Out partying with Joyce, he notes that she's cold, so breaks a window and steals a fur coat,
* In "Band Geeks", Squidward is leading his band on a march through town and demands that the two flag twirlers spin their flags even faster. They spin hard enough to turn their flags into propellers and propel themselves into a blimp, which
* In "Band Geeks" Squidward is leading his band through downtown and orders the flag twirlers to spin faster. They spin so hard that their flags carry them into the air, and they crash into a blimp, which explodes.
* In "Band Geeks", Squidward is the conductor of a band, and urges the band to play really loudly so that they sound good, operating on the logic that people talk loud when they want to act smart. As soon as he motions the band to play loudly, the camera cuts to the exterior of the hall and the windows shattering. The camera then cuts back to Squidward's distorted face and him suggesting that maybe they

should play so quietly no one can hear them.
* In Banjo’s reveal trailer, DK, Diddy, and King K. Rool do this when the Duck Hunt Duo remove their disguises.
* In "Banned in Bikini Bottom", SpongeBob begins the episode singing an ode to Krabby Patties. He then takes in a large amount of air, comically inflating his body and busting his belt. After fully inflating, he uses the air inside him to yell out the next verse to his song, which causes Squidward and a stack of cups he arranged to fall to the ground.
* In "Banned in Bikini Bottom", there's an organization called "The United Organisation of Fish Against Things That are Fun and Delicious", or "TUOoFATTaFaD".
* In "Banned in Bikini Bottom" when Mrs. Gristlepuss shows up and says that she thinks Krabby Patties are too fun, Krabs says to SpongeBob that she can't close them down. Cut to Krabs, SpongeBob and Squidward standing outside a closed Krusty Krab, with Mr. Krabs shouting, "She closed us down!"
* In "Banner of Blood", the murderers smash in a man's head with an axe handle, and then use a cattle stampede to make it look like an accident.
* In "Barbecue Story," Angelica kicks Tommy's ball over the fence. Tommy delivers a
* In Barcelona, when the Cult of the Unwritten Book starts to summon the Decreator -
* In "Bark to the Future," von Rottweiler takes over Dog City and turns it into Rottersburg, a Ruritania-style dystopia where
* In baroque and classical concertos there is a section called a cadenza, where the soloist goes on an unaccompanied flight of fancy, before leading the orchestra in to finish the cadenza. It used to be customary to improvise these, but in modern times, cadenzas are almost always written out beforehand, and in romantic concertos, the composer often writes the cadenza as well.
* In baroque music, basslines (basso continuo) were almost always improvised on the harpsichord or, in the case of religious works, on the organ, with the conductor both playing the instrument and conducting from it.
* In "Barrett's Privateers", a Canadian crew of inept privateers tries to hunt American merchant ships during the American Revolutionary War, and their sole survivor ends up arriving legless at Halifax, damning everyone in the world.
* In Barrington J. Bayley's "The Zen Gun", the warships carry a large passenger list of sophisticated uptown types (many of them animal/human hybrids) who spend the missions partying. The ships also fight using WW II-era 16-inch battleship guns, but that's another story.
* In Barry's case, some of his enemies also know the truth, including the Rogues, after Cold forces Cisco to tell him the Flash's identity by threatening his brother. Since Cisco's brother was (presumably) in the room, he also must know. Eventually, Barry reveals the truth to his father (who pretty much knew anyway) and Eddie (whose help they needed to keep Iris from looking into her colleague's disappearance).
* In "Bart After Dark", Grampa strolls into the burlesque house and hangs up his hat, spots Bart at the desk and turns around, collects his hat and exits. Subverted in that he comes back in.
* In "Bart Carny" when Homer and Bart are working the ringtoss booth at the carnival. Wiggum tries to get Homer to bribe him, (Bart, of course, gets it immediately) but after three tries (one of which includes mentioning his friend "Mr. Bribe"), Wiggum decides "screw this", and shuts the booth down. Later in the episode, Wiggum refuses to help the Simpson family when the owners of that booth took over their house. Homer
* In "Bart Gets an Elephant" Lisa asks someone if they're an ivory dealer, with the reply "Well, little girl, I've had lots of jobs in my day: whale-hunter, seal-clubber,
* In "Bart Gets an Elephant", Marge makes everybody clean the house before going out. A sparkling clean kitchen is seen through a swinging door, which swings closed and then open again... to reveal
* In "Bart Gets an F", Bart prays for one more day to study and calls himself

God's pal.
* In "Bart Gets Hit by a Car", Homer is suing Mr. Burns for hitting Bart with his car, and Burns invites him for a private chat:
* In "Bart Gets Hit By a Car", Mr. Burns has a rhinoceros trophy which he describes as "the last Indonesian rhino on Earth". Not only there is no species called an Indonesian rhino in real life, but Indonesia actually has two kinds of rhinos, the Javan rhino and the Sumatran rhino (both still extant, but critically endangered). Also, the trophy looks more an African species of rhino than any of the Indonesian species.
* In 'Barting Over', Bart wants to be legally emancipated from his parents. Some potential law firms he visited are 'Badger, Haggle, and Bill', 'Lovum and Burnham, Family Law', and 'Hackey, Joke, and Dunnit'.
* In "Bart-Mangled Banner", the Simpsons are accused of being unpatriotic when Bart accidentally moons the American flag (and a little word-twisting) and are put on a talk show to clear themselves, the host asks "Which part of America do you hate the most?". Marge protests, sarcastically replying that if the government is built on questions like that, then she
* In "Bart of Darkness", Bart and Lisa believe Ned Flanders has killed Maude, we see him heading up to the attic, where Lisa's hiding, carrying an axe and singing "Mary had a little lamb". Even though the audience knows it must be a
* In "Bart of Darkness," Bart gets Grandpa Simpson tarred and feathered.
* In "Bart of Darkness" when Bart tries to get Milhouse to sign his cast:
* In "Bart of War", after a fight breaks out at the baseball game, Sideshow Mel suggests they sing a song. The Sea Captain recommends "Not a hymn to war like our national anthem, but a sweet soothing hymn like the national anthem of Canada". The entire crowd then joins hands in the shape of the maple leaf and sings "Oh Canada", with Marge holding Canadian and Quebec flags. "Well Bart, we've learned that war is not the answer," says Milhouse. To which Bart replies "Except to all of America's problems".
* In "Bart on the Road", Bart chooses to stay home with Marge on "Go to Work With Your Parents Day", insisting that it's his way of showing support for women in the workplace. After Marge reads that being a housewife makes her ineligible, Lisa slyly notes that Patty and Selma are two professional women, resulting in Marge deciding it would be good for Bart to spend a day at the DMV. Bart, of course, is horrified.
* In "Bart on the Road", Homer intentionally pours his drink over the safety control panel at the nuclear power plant specifically to destroy it and get a new one shipped out to him.
* In "Bart on the Road", Lisa is spending her days goofing off with Homer while he is on the job at the power plant, but after Bart calls her and swears her to secrecy as he admits that he, Milhouse, Nelson, and Martin are stranded in Knoxville after he forged a driving licence and used it to hire a car that has since been demolished, she is left grappling with an ethical dilemma. A few days later, Homer sits Lisa on his chair and spins it around and around, and when it finally comes to a stop, Lisa's reaction is a monotone "Whee."
* In "Bart on the Road", Nelson turns out to be a huge Andy Williams fan.
* In "Bart on the Road", the Sunsphere from the 1982 World's Fair in Knoxville has a sign that reads "WO__D F_IR", which Bart reads in confusion. The "R" in "F_IR" then falls off.
* In "Bart's Comet", penguins are shown flying away from the zoo as the comet comes closer.
* In "Bart's Dog Gets An F" Santa's Little Helper eats Marge's old quilt, which was a family tradition for centuries. She is understandably very upset and Homer tries to comfort her by telling her it's just a quilt. Then he discovers the dog also ate a cookie he wanted to eat, which sends him into a hysterically
* In "Bart's Elephant", two idiot DJs end up owing Bart Simpson an elephant or risk losing their job to a machine, which comes pre-programmed with "inane chatter":
* In "Bart Sells His Soul", Moe opens a family restaurant called Uncle Moe's

Family Feedbag. Not wanting to hire any waiters or waitresses, Moe takes all the orders himself, causing himself to become extremely stressed out and slowly go to pieces as the customers' demanding, insensitive, and sometimes rude behavior get the better of Moe. Krusty notices a throbbing vein of rage building up on Moe's forehead and points it out to the other diners, saying, "That guy's gonna blow." Sure enough, Moe finally reaches his breaking point when a
* In "Bart's Girlfriend", Lisa tries to get Jessica Lovejoy to confess to stealing the church's collection money, so she stands in front of the congregation and asks that the criminal confess now. As she didn't specify which crime she was referring to, everyone in town starts owning up to random things. And when Jessica plays dumb through the entire thing, Lisa just says "Oh what the heck...IT WAS JESSICA LOVEJOY!"
* In "Bart's Inner Child", Bart encourages Homer to do this to get rid of the faulty trampoline Homer got from Krusty. He has Homer tie it up with a chain and bike lock, and within seconds Snake is taking a set of bolt cutters to the chain.

* In "Bart vs. Thanksgiving", Bart hears Lisa blaming herself for Bart running away on Thanksgiving. Homer and Marge also feel bad for being too harsh on Bart during dinner.
* In baseball, intentionally walking a batter with the bases loaded is probably the single most desperate action a team can take in any game. If a batter is walked when the bases are loaded, all the runners move up one base, causing a run to score. Due to the sheer ludicrous risk, this is only ever done when the pitching team is leading by more than one run, and the batter at the plate is such a dangerous hitter that the opposing manager would rather have one run score than even give the batter a
* In baseball leagues without designated hitters, it's accepted that a pitcher might just take a strikeout without even attempting to hit, out of fear that actually trying to swing at the ball might result in an injury. This was the case on August 14, 2011, when Giants reliever Santiago Casilla came to the plate for his first career at-bat in eight seasons. He stood as far from the plate as he could, with the bat down. This threw off Marlins pitcher Jose Ceda so badly that he failed to throw a single strike and walked Casilla on four pitches. In other words, a batter who deliberately tried to strike out was awarded first base
* In baseball, one of the few trick plays that can be used is the hidden ball trick, where an infielder fakes giving the ball back to the pitcher, in the hopes of catching one of the base runners unaware and tagging him when he leaves the bag.
* In baseball, runners are allowed to run past first base and still be considered safe, as long as they come back to the base fairly quickly. This means batters can run at full speed and try to beat the throw, without worrying about being called out or slowing down to stop exactly on the base. However, since this only applies to first base — more specifically, to tagging first base without "rounding" it (i.e. turning to run towards second base, as opposed to continuing to run straight ahead) — runners have to be careful when trying to go to second or third.
* In baseball, since the teams take turns with the visitors batting in the top of the inning and the home team batting in the bottom, a Down To The Last Play moment can really only happen to the home team. This is often referred to as a "walkoff" - originally to signify the losing pitcher having to "walk off" the mound alone and (for the moment) unloved, but now the term is more focused on the home team (and their fans) walking off the field in celebration once the winning run scores.
* In "Baseball", Stu and Lou win tickets to a baseball game by answering a trivia question "Who holds the record for the most homeruns hit on the second Tuesday in April." This is likely intentional, as the answer is the team's star player, who read the question on air.
* In baseball, the Colorado Rockies, although part of it is out of their control. Coors Field in Colorado is a mile above sea level, and the thin air exponentially boosts fly balls to incredible degrees, even with the somewhat deep field dimensions. This, in effect, has turned the Colorado Rockies franchise into baseball's perpetual Glass Cannon; no matter the roster, they will be atop offensive categories in the league and at the bottom in pitching. While the Rockies have no trouble developing or signing hitters, developing or convincing pitchers to come there is a whole other story. This forces Colorado into simply bludgeoning teams to win at home, since they can even the odds against teams with superior pitching, who will be negated by the altitude of the park.

* In basketball, fans will often make as much noise as possible when a player from the opposing team is making a free throw in order to disrupt their concentration.
* In Basketball, fouling an opponent in the act of shooting (or in certain other situations) gives the opponent free throws, which are generally much more efficient than regular offense (most players make around 75% of free throws, meaning two free throws will yield 1.5 points on average, while regular offense yields about one point per possession). However, doing this also stops the clock and (most likely) gives the ball back to the other team. In late game situations, the team that is behind will intentionally foul the opponent and hope that they will miss their free throws in order to stop the clock and get the ball back. This rarely works, but it's the last option for a team that is losing to try and prolong the game to tie or even win.
* In basketball, there are separate "Great Britain" and "Ireland" teams — the GB team was only formed in 2005, and England, Scotland, Wales and Ireland still play each other.

* In Belgium the band Nacht und Nebel will remind people of the band who scored a hit with the song "Beats of Love" in 1984. Not many are aware they were named after a Nazi order, "Nacht und Nebel", which made the secret arrest of political opponents possible.
* In Belgium there was, oddly enough, no moral panic against it — jazz was actually embraced. This was probably due to the fact that Belgium had barely had any native culture of its own at that point (most popular Belgian music that was not jazz was foreign, usually French for the Walloons and Dutch for the Flemish) and the fact that a few very important jazz revolutions occurred on Belgian soil (such as the invention of the saxophone). The Belgian government of the time was eager to fund anything that was even the slightest bit nationalistic.

* In "Big League Freddie", Fred signs a baseball contract after scouts are impressed with his substitute, who was wearing his uniform.
* In "Big Murderer on Campus", a university professor is shot to death through a window, but the quadrangle where the shot came from was full of milling students at the time and no one saw a shooter.
* In "Big Pink Loser" when Patrick is working at the Krusty Krab, he tries to take a job bringing customers' orders to their tables, but eats the food. When SpongeBob tells him to make sure the food gets to the table,
* In "Big Top Rascals", the Rascals put on their own circus after being denied admission to a real circus. Darla had told the circus owner that she and the boys were tending the animals because they had no money for tickets.
* In "Big Trouble in Little Langley", Steve tries to pull a stunt with dynamite to impress a lady — just to get his thumb blown off.
* In billiards, straight pool (14.1 continuous) requires you to call every shot. Eight ball rules make concessions for play either way; it's up to the players or tournament/league director to decide, but the final 8-ball shot is generally always called. If the shot is made but the player either scratches (sinks the cue ball with the shot) or sinks the 8-ball into a pocket other than the one that was called,
* In "Bill-iever", Cricket accidentally damages his father's garden and blames it on aliens, even faking a close encounter. When he discovers
* In Bill Withers' "Ain't No Sunshine": "I know, I know, I know, I know, I know, I know, I know, I know, I know, I know, I know, I know, I know, I know, I know, I
* In "Billy the Cad," Touché and Dum Dum are summoned to capture the title Old West gunslinger.
* In "Binky Goes Nuts", Binky has a nightmare where Mrs MacGrady doesn't let him eat anything and makes him sit next to some sloppy kids with bizarre allergies.
* In biology, this trope occurs when an infection is partly eradicated by an antibiotic, but not completely, giving the thing time to adapt and thus making it immune to this antibiotic in the future, and thus creating even worse strains.
* In "Birthright", the alien infiltrators' long-term plan is to use a chemical to terraform Earth over the course of 30 years by giving it a methane atmosphere which they can breathe. Of course, this would result in humans being wiped out. The aliens claim that said chemical, BE-85, is a fuel additive designed to clean up the atmosphere, meaning their plot entails tricking humanity into releasing the

chemical themselves on a global scale.
* In "Birthright", Worf learns about a Romulan prison camp where Klingons POWs have been held for decades. When he arrives, he's shocked to see the Romulans and Klingons living amicably. He is especially outraged that the young Klingons born there know nothing about their heritage. But Tokath, the Romulan commandant, points out he had still done something no diplomats from the Klingon or Romulan empires, or even the Federation has done: forge a manageable peace between Klingons and Romulans. Particularly since he had the choice of killing them or sending them back to the Klingon homeworld, where they'd have been dishonored and shunned.
* In "Bitches to Rags", Thugnificent's career in hip-hop music ends in disaster, and is now left in deep trouble trying to pay off his massive debts. He decides to become a drug dealer selling crack cocaine, but that doesn't work out too well. He eventually settles for working a more humble job as a UPS mailman.
* In "Bits of Love", Aidan Hunter, alone in his underground bunker in the aftermath of a nuclear war, keeps himself from going stir crazy by creating holographic recreations of his parents and his best friend Griff and engaging in one night stands with various holographic women in a virtual reality chamber (since physical contact with the holograms is impossible outside of it).
* In "Bits of Love", Aidan Hunter may be the last living person on Earth in June 2047, seven months after a nuclear holocaust.
* In "Bits of Love", billions of people were killed in a nuclear war on November 3, 2046. Aidan Hunter managed to survive in a special bunker. He believes that he may be the
* In "Bitter Fruit", even as she denounces his actions, the criminal's mother testifies that he always took care of her.
* In "Bitzi's Beau" Buster and Harry have handheld Alien-O-Meters which can tell if a person or character is an alien. They are supposedly just toys that always show someone is an alien if activated.
* In "Black and Tan: A Crime of Fashion," Gus refers to a fashion model as being "one of the most popular models in the entire Santa Barbara downtown area."
* In "Black and White and Chi All Over", Drago briefly breaks into Section 13 to steal the demon chi, but is quickly repelled.
* In "Black Belt Mama", Thelma gets mugged and gets her purse stolen. She then takes a self-defense class with Naomi and Sonja. Later on in the episode, Thelma is at a bus stop with another woman when the same mugger comes for her purse. Thelma reminds the thief to remember to take the other woman's purse too, at which point
* In "Black", Blake and Adam battle security robots both in and on a train.
* In "Black-Eyed, Please", Homer tells Ned he'll only forgive him if he lets him have his wife. We get a commercial break, and afterwards Homer elaborates that he only wants her to help get rid of a substitute teacher that's been bullying Lisa.
* In "Black Eyes, Please", Ned wants Homer to punch him in the eye as retribution from Ned punching him earlier, and this exchange occurs.
* In "Black History Month", Steve tells Principal Lewis that he needs more time to work on his paper on George Washington Carver (having stumbled upon the beginnings of a mystery). The incredulous Lewis tells Steve to simply take the fact that Carver invented peanut butter and pad it out to three pages.
* In Black Jack 21, a game was made to try to find the image of Sharaku in each episode. Some being more obvious than others.
* In Blackjack, if any player or the dealer gets a hand worth exactly 21 in just their first two cards (a "blackjack"), that player automatically wins. Their opponent(s), as a result, all automatically lose (multiple players with blackjack tie).
* In "BlackJack", SpongeBob envisions his criminal cousin BlackJack now being huge and ripping him in half in the same manner as the gorilla above.
* In "Blackjack" SpongeBob invokes this by physically pulling the plug on Uncle Captain Blue's record player.
* In "Black Magic" a necromancer tries to raise a century-dead corpse only to end up with a mindless zombie. On casting the spell to turn it back into a lifeless corpse he discovers that

* In "Black Mystery Month", a detective quizzes Steve at the scene of a murder and is instantly suspicious when Steve mentions details that are
* In "Blackout Buggins", the group goes to Fenway Park to watch Roy sing the national anthem. After Roy finishes the song, a Red Sox player with the name Casey on his jersey is seen taking the field. The Red Sox have

* In "Blagsnarst, A Love Story", Roger tries to make a weapon by combining some sticks, a rock and some gum.
* In "Blame It On Lisa", during the cable car ride to rendezvous with Homer's kidnappers, Marge comments that the tension is killing her, so Bart switches the music player in the cable car to another theme, but Marge says
* In "Blame it on Lisa" Marge visits the phone company and encounters Lindsey Neagle, the fast-talking female executive who seems to work everywhere in Springfield.
* In "Blame it on the Alcohol", Rachel expresses her desire to have Blaine's "vaguely Eurasian-looking children"—Blaine's actor, Darren Criss, has a Filipino mother and an Irish father.
* In "Blast from the Past", one of Sniffles' failed attempts to use his time machine to make sure Cuddles, Giggles, Toothy and Lumpy don't get maimed on a playground involves him oiling up a seesaw. When Lumpy presses down on his end, Cuddles gets sent flying into space and instantly freezes, where he's then
* In "Blendin's Game", Blendin Blandin trips and falls while escaping from time-jail and goes "Ow, my
* In "Blendin's Game", Mabel's reaction to a piece of candy getting stuck in a vending machine is to cry out "Everything is terrible forever!"
* In "Blendin's Game", when Dipper and Mabel time-travel ten years into the past, there are plenty tucked away into the background. At the Mystery Shack, Stan is heard showing off a set of wax statues he got ("Headhunters"), Soos is getting a keyboard with sound effects, ("Headhunters", "Double Dipper"), and most tellingly, an ad for Bud Gleeful's car lot shows Bud having a "Just Had a Baby Sale" ("The Hand That Rocks the Mabel").
* In "Blink of an Eye", an alien species living on a planet where time moves extremely fast attempt to communicate with
* In "Blondas Have More Fun", Jorgen blamed Wanda for Timmy's reckless and dangerous stunt wishes when it was Cosmo who was granting them.
* In "Blood and Cicuses"", the circus's lion tamer had her throat cut before her body was mauled by a starving tiger in an attempt to make it look like she was killed by the tiger.
* In "Blood and Circuses", Station 4 has the entire surviving troupe of circus performers staying in the locked cells while the murder of the lion tamer is being investigated. One member of the troupe has a cell to himself and is stabbed to death in the night, and the weapon is nowhere to be found.
* In "Blood" an LSD-like substance was combining with adrenaline to produce a hallucinogenic substance... in the eyeball. They have visual hallucinations (or did they?) The eyeball could probably absorb it into the blood, but the coincidence is a bit much.
* In "Bloodbath," Starsky is kidnapped by cultists in a black van with curtained windows, right when he's about to testify against their leader.
* In "Blood Brothers", the rebels had formed an alliance with the pirate Heracleo who regularly sends ships filled with supplies. Eventually, he betrays them by sending a ship filled with Roman soldiers.
* In "Blood Drops," an entire family is murdered except for the two daughters, one a teenager, the other much younger. Turns out the murder was arranged by the older girl - her father had been sexually abusing her for years, and the younger girl was actually her own daughter, the product of the abuse. When their father began turning his attention on the younger girl, it was the last straw, and she convinced a couple of her male classmates to kill not only him but also her mother and her brothers (for knowing about the abuse and not doing anything to protect her).
* In "Blood Feud," Bart's allergies include both butterscotch and imitation

butterscotch.
* In "Blood Feud", Homer tries to keep Mr. Burns from reading a nasty letter he wrote by watering the inside of the street mailbox with a hose in hopes the letter's ink will run. He asks Bart to give him a signal for when the mailman arrives.
* In "Blood Feud," when Mr. Burns is dying, only Bart has a matching blood type to transfuse to save him. Later, Bart is sent only a thank you note and Homer steals the rest of the episode when he objects to Mr. Burns' minimal reward and sends an insulting letter to his boss. From then on, Bart becomes nothing more than his dad's sidekick and doesn't do anything significant except for a prank call to Moe's Tavern.
* In "Blood Fever" and "Body and Soul", attempts are made to treat the Vulcan
* In "Blood Is Thicker Than Mud", this trope is used again when Carlton's Hell Week is more extreme than the others':
* In "Bloodline", Hotch (bad cop) and Prentiss (good cop) play off each other very well while interrogating an UnSub. Which can be seen
* In "Blood Oath", Kor, the first-ever Klingon from TOS's "Errand of Mercy", complains about how the old ways are dying, using the aforementioned Klingon restaurant serving aliens as a specific example.
* In "Blood on the Saddle", the killer uses the noise of a mock gunfight being conducted in the main arena to cover the rifle shot he uses to murder the first
* In "Blood on the Scales", Felix Gaeta and Tom Zarek organize a military coup against Adama and Roslin, capturing the former while the latter continues to coordinate the resistance against them. Gaeta insists that Adama be tried for his "crimes", and has
* In "Blood on the Vine", a vineyard owner suffers multiple 'accidents' (a falling wine rack, tainted wine, brake failure) in a short space of time, which causes his secretary to hire Cannon to investigate.
* In "Bloodsport", Bolan is posing as a corrupt army sergeant selling guns to terrorists, and uses the grenade trick (a tactic used by the same terrorists he's dealing with) to get them to put their guns away and talk business.
* In "Bloom & Gloom," Apple Bloom scares the family rooster off the windowsill,
* In "Bloom and Gloom", Apple Bloom carries one in a nightmare sequence where her family kicks her out of the house.
* In Bloom, tells a story about dying relationship between two young men and aftermath of their breakup.
* In "Blooper Bunny", Yosemite Sam pops out of the cake during Bugs Bunny's anniversary celebration. Behind-the-scenes footage shows that he's not happy about it.
* In "Blue On Blue," Sam's sister Natalie is held hostage to force Spike, who had been casually dating her, to help them break into a secure building. Luckily, they underestimate Spike's ability to engineer a rescue despite the circumstances.
* In "Blue Shadow Virus", Ahsoka Tano leaps through the doors just as they're about to be shut to contain the titular virus.
* In board games, using color to distinguish sides is so pervasive that it's easier to note exceptions. For instance, in
* In "Boast Busters", Snips and Snails' are forced to help clean up the mess caused by an Ursa, a massive bear monster they lured into town to see if Trixie can actually back up her claims of having defeated one in the past. Twilight decides to give them an additional "punishment" in the form of growing mustaches on them with one of her magic spells.
* In "Boating School", Mrs. Puff responds to SpongeBob crashing during the driving test with "Oh, SpongeBob! Why?" She says it in a deeper voice because she has inflated like a deployed airbag.
* In "Boat Smarts", when SpongeBob crashes into Squidward's boat, he sends Squidward's seat flying out. For no reason other than to screw him over, Squidward then gets launched toward a vehicle with some kind of rock grinder affixed to the front.

* In "Boatswain's Call" the mate on a modern ship carries the eponymous old-fashioned whistle. As the narrator finds herself in the midst of a disturbing trip in the (also strangely old-fashioned) lifeboat with the crew, the mate blows it, making a sound that is unnaturally and disturbingly shrill and piercing, yet somehow also sounds far away. Of course, this signals that things are about to go
* In "Bob Actually", Bob and Teddy take a hip-hop dance class and get challenged to a dance-off by the teacher's son. As the dance battle begins, the son hurts himself, so Bob and Teddy win by default before they even make a move.
* In Bob and George, Doctor Light has said things such as "Fornicating Feces" when annoyed.
* In "Bob Belcher and the Terrible, Horrible, No Good, Very Bad Kids", Gene uses a crimping iron, but he leaves it turned on and plugged into the wall, and the kitchen is set alight. It's revealed later on in the episode that Louise accidentally made the fire worse by leaving a bunch of sparklers lying out and Tina left a fan in front of the iron, which literally fanned the flames.
* In "Bobbsey Twins in Stir" Mrs. Davis had been arrested after having unwittingly sold forged tickets to the
* In "Bodies of Evidence", three crewmembers of the space station Meridian were murdered by the alien entity on June 20, 2037. This episode was broadcast on June 20, 1997.
* In "Body Shifters Universe", the aliens are human sized bacteria that shapeshift into whatever form a person finds most attractive, absorbs the DNA and divides into two more shifters who continue to mate with the nonshifter parent.
* In "Boldly They Rode" you must reclaim Deep Space 9 from a fleet of Jem'Hadar. They put up one last fight to keep the station for themselves, and just when you seem like you're about to lose,
* In Bolivia, the Bolivian Communist Party outright refuses to support Che Guevara's call for an armed struggle, saying that the time is not right and they need to build a political base first. Che suspects that this is an excuse, and that the Soviet Union, who by this point regarded Che as a rogue agent, ordered the Communist Party not to help. Che and his band end up fighting the government of René Barrientos alone.
* In "Bombshell", Elliot and Olivia pose as a married couple experimenting with the swinger lifestyle to get into an exclusive swinger's club. Strangely, this one has the
* In "Bon Bon the Birthday Clown", Jackie and Star are left speechless when they see Marco dressed up for a high school dance.
* In "Bonding", Ron uses a pair of oversized dogs to bust down the door of Professor Dementor's secret lab. Dementor is the one

* In "Bonfire of the Manatees", Marge prepares to leave Homer when she sees another one of his escapades, this being shooting a porno in the house, and says "I can explain." Marge stops to hear what he has to say,
* In "Boo-Boo Patrol", Fozzie's sister Rozzie slips on one during the episode's namesake song, but Fozzie catches her before she can hit the ground.
* In "Boob Tubed", a small snippet of the theme song is played while Heffer is channel surfing.
* In "Boob Tubed", Rocko is charged for an extravagant television when he wanted to buy something less expensive. According to Heffer, the TV will cost him a dollar a month for the next 632 years, meaning that it's about $7,584.
* In "Boogie Frights", the camera zooms into the mouth of a screaming Mayor and then zooms out from
* In book #16, they need to distract the staff at the AOL expy to hack into their databases, so Rachel, Tobias, Jake, and Cassie, all in their battle morphs, provide a distraction by mopping the floor.
* In book 1, Molly and Elsie fear this will happen to Olivia's estate because they

didn't think she even
* In book 1, there is the Kamaresh Yar, which the villain attempts to use to destroy the world. However, the hero Owen Pitt is able to use it to save his comrades from a deadly ambush.
* In book 1, when Bella and Edward are on their way back to the car from Edward's first demonstration of his "sparkling", Edward offers to show Bella how
* In book 1, while a specific time is not given, "The Mummy Monster Game" notes that the longer the player takes, the harder the challenges become, and the more monsters are released.
* In book 2, Adam McDaniels is in pharmaceuticals, and mentions that every time he goes to a party, people ask if he has any free samples (and it's gotten old). Georgia remarks that
* In book 3, Dorothy and her father Drago are accused killing council member Makaleigh Veazy and kidnapping Hedyle, another member of the council (who's been freed by this point) to cover it up.
* In book 3, Georgia mentions that once, when a guy heard her name, he started singing "Georgia On My Mind". And she
* In Book 3, the Dai Li are actually loyal to their monarch this time. It just so happens that she's an evil tyrant.
* In Book 3, the four main members of the Red Lotus collectively function as the main antagonists, but of them Zaheer is the most dangerous, most intelligent, and most heavily featured in the season's story and climax.
* In book 3, "The Mummy Rescue Mission" is a real-time game where the players have seventy-two hours to rescue a woman archeologist before her air runs out and she suffocates to death.
* In Book 3, the royals are all bastards, following opposing religions. The first and third
* In Book 3, the Snake Lord claims that Orion doesn't care about his people and that he (Orion) caused Launa and Herk to be cripples. However, he also revealed in Book 1 that
* In book 4, during Bella's pregnancy, Jacob cracks a couple of blonde jokes at Rosalie. She's familiar with both of them.
* In Book 4, the metalbenders and mecha suit pilots of Kuvira's Earth Empire are able to hold their own against the heroes even when the numbers on both sides are the same.
* In Book 6, Harry sends his air spirit adviser, Bob, to find out where an enemy is hiding. Bob instead spends the time visiting strip clubs. When Harry is (to put it mildly) upset about it, Bob tries to calm him down with:
* In Book 6, it's revealed that each of the divine pantheons has its own "quiddity" or magical nature. These are color-coded and referred to by color. The fact that
* In book #7, the Animorphs are wandering around in cockroach morphs as Ax says he smells humans. Someone objects that humans don't smell, but Ax insists they do — not that it's a
* In book 7, Yerin and Lindon are both rewarded customizable cloudships. Lindon points out that they could do a lot better if they combine their rewards into one ship. Yerin stares at him, and it takes him a minute to realize he just asked her to build a home with him.
* In "Booked Solid", Detective Carter is polygraphed for her application for the FBI, and worries that it will expose her association with Team Machine. Finch advises her to lie on an early question to skew the results. So Carter confesses to having smoked marijuana in college, and the polygraph operator congratulates her on being the first one to answer that question honestly.
* In Book Four, straight-laced detective Mako gets assigned as the bodyguard to the foppish, hedonistic
* In Book II, the Fellowship finds a journal in Moria chronicling how Balin and the other dwarves were besieged by Orcs and could not escape. The last entry says "They are coming." The Fellowship is ambushed by Orcs shortly afterwards.
* In "Book of Hours," a mob boss asks for the FBI's aid in recovering a stolen

bible.
* In Book One, some thugs ride up to Mount Royal to seize Madeline, only to find that the Mains have set up armed guards to shoot in an unsurvivable crossfire if it came to fighting.
* In books dealing heavily with dwarf culture, the basic daily clothes of a dwarf include mail and a battle axe, with additional weapons and armor for specific jobs as necessary. Cheery Littlebottom, one of the first openly-female dwarfs, soon realizes the need for different
* In book seven, after hiding inside the digestive tract of Bathilda Bagshot's reanimated corpse, Nagini the snake attacks Harry and Hermione after crawling out the corpse's mouth.
* In book seven, there's a lengthy time where Ron and Hermione assume Harry's got a plan, and are pissed (Ron) and worried (Hermione) when they discover he hasn't got one.
* In books five and six, we see Canea, the Canim homeland, and their riding beasts the "taurga" [singular "taurg"], creatures that are depicted as fairly bull-like (with some rabbit-ish features), extremely large (they're cavalry for wolf-warriors that can reach 9 or 10 feet in height, with proportional weight), incredibly ill-tempered, and enthusiastically omnivorous.
* In books, the Gladers' names are revealed to be false names implanted in their brains when they were first taken in by WICKED, with their real names going unrevealed. There are three exceptions revealed in the prequels:
* In books two and three of Thorarinn Gunnarsson's "Skateboard Dragons" trilogy, this is how the rulers of the evil Alasheran Empire have survived for thousands of years.
* In "Books", when the Titans argue whether or not comic books count as real books, they're drawn as panels in a Silver Age comic.
* In Book Three, Mont Royale attracted the ire of the Klan itself. Seems the locals didn't take too kindly to Madeline assisting and educating the local blacks. They attacked the property in Book Three, causing a fire which reduced the property to cinders. More Klansmen were killed than Mains, so we can call this one a draw.
* In Book Two, a coalition of freed slaves and ex-slavers raid the property, only to be driven out.
* In Book Two's finale, the drone also features prominently in the soundtrack during
* In "Boot", Meg Austin, while undercover as a Marine private, is assigned sanitary duty.
* In Bootsvorz's backstory, a nasty crash at a test drive resulted in losing his left eye and arm, but he returned to racing after gaining a new arm and eye.
* In Boreanaz's case his character's nationality wasn't revealed until two seasons in, and he has some Irish ancestry. His Irish accent in flashbacks was rather poor, so he didn't bother using the accent when Angel was temporarily reverted to his teenage personality in one episode.
* In "Born-Again Jesus," a short story by Robert Flynn, a secret group plans to clone Jesus so that he can preach a gospel more in line with current American values.
* In "Born Again Krabs" (pictured above), Mr. Krabs is about to take a bite of a Krabby Patty that, if it were any more disgusting, would require EPA financial assistance. Immediately cut to an ambulance with the siren blaring.
* In "Born Again Krabs", the Flying Dutchman bets SpongeBob that Mr. Krabs is so greedy he'd sell
* In "Boss Mabel", Mabel gives one of these to Grunkle Stan when she gets tired of the shabby treatment he gives his employees and his customers.
* In both anime and manga, Death Phantom and Queen Nehellenia, thanks to their immense power. Double points in the manga, as they're actually
* In both anime and manga, when Akane has "traded" Ranma to Nabiki, she at one point hears what she thinks is Ranma entering Nabiki's room, which is right next door, and does the "listen through a glass against the wall" trick. Between the sounds she hears and her own imagination, the glass promptly shatters violently

between her fingers as she sees in her mind's eye Ranma jumping a not-exactly-unwilling Nabiki for sex, whereupon Akane goes storming into Nabiki's room.
* In both "Arctic Splashdown" and "The Robot Spy" there are "scramble alerts" at Air Force bases, with jets taking off. In "The Robot Spy" the Duty Officer actually says he's going to call a "Red Scramble" and pushes a
* In both armoured and naval warfare, a well-aimed or lucky hit in the opposing tank/ship's magazine can lead to that unfortunate target being blown up by its own ammunition. This is what happened to three British battlecruisers at the battle of Jutland in 1916 and to the
* In both "Arthur's First Sleepover" and "Buster Isn't Buying It", people have reported seeing UFOs. In both episodes, they remain unidentified. "Buster Isn't Buying It" also has the Megatoad (a giant carnivorous toad that's allegedly survived prehistoric times) that's mentioned but unknown to be true, however, they do say that the Megatoad's existence is extremely unlikely.
* In both cases, however, planets with an actual civilization on them will often have a more normal name as well (Chu'lak, Tollana, Abydos, Asuras, etc). Once it's known by the SGC or Atlantis, this name usually replaces the alphanumeric registry code.
* In both cases the limitation of fliers are ignored due to both being
* In both cases the re-entry blackout could be justified despite taking place in the future due to the fact there's a space war going on. According to some UC sourcebooks, Earth's communications sattelites were one of the first things Zeon targeted. In
* In both China and Japan the people have no problem accepting both the native pantheons and Buddhism. In
* In both civilian and military IED investigation and disposal work, radio silence is sometimes ordered in case the IED's trigger is operating on the same frequency as one of the radios.
* In both contrast and comparison to René, Iosef Dros, one of the few surviving original Communists, is still wearing his old, gray combat fatigues from the Communist militia.
* In both d20 versions you can also lose a character with too many Dark Side points if the GM wants to run a light sided campaign, it's mentioned briefly in both rulebooks.
* In both DC and Marvel comics, assorted alien races who have vast interstellar empires are flat out
* in both directions. You could easily make a game out of actor recognition.
* In both games, a good way to balance the challenge with gun script and bot AI enhancing add-ons is to play on a higher difficulty level. The balance is further skewed to the "challenge" side because in harder difficulties the Infected act and react faster, and the friendly fire is increased (further compounded by the extra firepower from the add-ons).
* In both games, co-op campaign had several portions where Dom and Marcus separated, meaning that if either dropped, there was no one to revive him and it was a game over. This was fixed in the third installment by the introduction of Arcade Mode, where dead players respawn after 25 seconds as long as at least one human player is alive.
* In both games, jumping out without being authorized to do so will result in a court-martial for desertion.
* In both games of Kyle Hyde's story, the criminal organization Nile is the one responsible for the character's woes despite never being confronted in-game.
* In both games the medics use the defibrillator as an instant cure from death, even from a direct headshot by shotgun or sniper at point-blank. Unless you were blown up by a direct artillery hit, anti-tank (or anti-air) weapon, a C4 charge, or killed inside a vehicle, you will be revived by a shock with the pads, if a friendly medic can reach you within about 15 seconds after your fatal wound. Considering the pace of gameplay, probably an
* In both games, the siege tank can fire significantly further than it can see in its immobile siege mode. To get maximum range out of it, you either need to use a

scan or have a different unit acting as a spotter.
* In both great wars, armed merchantmen or auxiliary cruisers (the German term for retrofitted fast merchantmen) both operating under false flags from neutral or opposing nations. While the British primarily used these ships in a defensive role to sucker their opponents (as noted above), the German ships would be used against other merchant ships as commerce raiders and minelayers, seeding well-trafficked areas with mines, but particularly in the First World War, British AMCs were also used in a raider role against German ships that had escaped the blockade. Infamously, and demonstrating the confusion that can result from this practice, in the First World War, the armed merchantman RMS
* In both "High Hopes" and "Maintenance", immediately before he is abducted, Jesse sees an image of the creepy carny that frightened him during a trip to the carnival when he was eight years old. In "Charlie and Lisa", both Jesse's son Charlie and Lisa see the same image as a prelude to abduction.
* In both his epic fantasy-retellings of the American Civil War and World War II, the slaves and the subhumans due for extermination are the white, Aryan-looking blondes.
* In both installments of this series, it probably isn't a fun prospect being a Stormtrooper ordered to take out a renegade Sith.
* In both "Irresistible" and "Orison", a serial killer named Donnie Pfaster becomes obsessed with Scully; he is seen on a couple of occasions with a demonic visage, but this could just be his victims' fear warping their perception.
* In both its first and second seasons, there was an episode where Doremi's
* In both KotOR games, injured persons recuperate in tanks of healing fluid, and prisoners are kept in cells of a similar design.
* In both Marvel and DC universes, there have been cases where people have simply surrendered when one of the major powerhouse heroes has shown up. Examples include:
* In both of Tamora Pierce's universes, magic is bounded by rules but there's quite a lot of undiscovered territory.
* In both of the last two cases, it's quite possible that more would have been done with them if not for the
* In both of these cases, their true forms are the reasons for their villainy.
* In both of those cases, Worf and Data being close to the kids was at least consulted with Counselor Troi, and Troi approved those requests. With Worf, it was because he was a fellow orphan and the child's mother died under his command, so Worf felt a degree of responsibility to help the child. With Data, it's because the child was deeply traumatized by seeing his parents and everyone he knew die around him and was emulating Data as a defense mechanism (the fact that Data is the one who rescued him from the wreckage of the ship where his parents died certainly was part of it as well), which Troi encouraged on at least a short-term basis to help him deal with the trauma. Troi would almost certainly be the most appropriate member of the senior staff, and any childcare on board would probably ultimately report to her and she'd be the one to approve at least any temporary living arrangements onboard before the child could be returned to the civilian world would make sense.
* In both pilots, it didn't matter which order the gumshoe had to find the loot, warrant, and crook in for the final round. As long as he or she found them in one turn, that was all that mattered. By the time production began on the actual series, it was changed so that the gumshoe
* In both pilots, the gumshoe sending the crook to jail wasn't used at all. Instead, it just cut to Greg and the winning contestant at the final round.
* In both "Remote Control" and "No Promises," the apparent antagonist turns out to be acting under this type of duress.
* In both sequels, her father keeps trying to tear them apart, believing Greg to be an inadequate husband. Both times, his conclusions turn out to be totally wrong (Greg is

* In both the fourth and fifth videos, there is a poster of numbers in random. The numbers 19 and 06 are next to each other.
* In both the movie and the book, it is Captain Ramius and Captain Mancuso who do the submarine tactics in the battle at the end, while Ryan gets to turn the wheel whichever way they say and pray to God that he doesn't die.
* In both the Napoleonic and German invasions of Russia, the Rasputitsa (Russian for "quagmire", literally "time when roads cease to exist") bogged down armies so much that there was practically no fighting for 6 weeks in the spring and fall.
* In both, the NWN and NWN2 Original Campaigns the trope is even more accurate than in Pen&Paper D&D, simply because of absolutely no resting restrictions. A wizard can exhaust all spells in a fight, then retreat a few steps, rest for about 10 seconds, and continue with fresh spells as often as he wants, even if it means resting every minute or so. This inherent flaw was corrected in add-ons and lots of custom content via restricting resting to safe areas, adding random encounters while resting, or even restricting resting to no more frequent than every 5 minutes.

* In both universes, the God of anger/war/hate/rage Khorne openly hates magic users, his followers considering them cowards and to be killed at every opportunity. There is no such thing as a Sorcerer of Khorne, and many game mechanics tend to forbid any magic users from following Khorne and vice versa. Magic weapons that let you kill more efficiently are fine, though.
* In both versions, and in multiple paths, the main character can be this. Narratively, his reputation at various points is strong enough that those he encounters either don't want to fight him or fight him but know they are likely to die trying. He can also promote to the above-mentioned terror knight class, and because this is only possible on the Chaos alignment route - which happens to also be the "good" route - he can be a true terror hero in combat as well. As well he should be, as a teenager he's killed trained soldiers with his own hands and led a highly successful insurgence, to say nothing of the kinds of strange company he could be keeping (hydras, dragons, gorgons, cyclopes, liches, undead, etc).
* In both versions this is justified since the games take place in only a portion of the greater world of Ivalice and the map only covers that portion.

* In "Bowser Junior Goes Bowling!", Junior, Joseph, Cody, and Toad get Chef Pee Pee to take them to the Wacky DeLuna Bowling Lane after seeing a commercial for it on television. Cody turns out to be an expert at bowling despite never having played it before (and scores a perfect game by the end of the video), while Joseph
* In "Bowser Junior's Annoying Toy!", Bowser Junior annoys everyone by playing with a ball popper toy. Fed up with this, Black Yoshi takes the balls out of Junior's ball popper and forces Junior to flush them down the toilet.
* In "Bowser Junior's Broken Leg!", Junior makes Chef Pee Pee bring him a cup to pee in since he can't walk to the bathroom with a broken leg. Chef Pee Pee does so, and when he attempts to dispose of Junior's pee, Toad arrives and mistakes the pee for lemonade, so Chef Pee Pee lets him have it.
* In "Bowser Junior's Cookies!", after a whole shenanigans full of sticky notes saying "cookies" all over the apartment and Chef Pee Pee raging, he finally goes to the store and brings cookies for Junior, only to find out that the kind of cookies were not what Junior wanted, and he really wants Chips Ahoy cookies. Junior then starts writing "Chips Ahoy" on the sticky notes and sticks them for a second time.
* In "Bowser Junior's Game Night 3", when Junior, Joseph, Cody, and Jeffy play "What's in Ned's Head?", Jeffy manages to find a real loaded gun in Ned's head. Junior and Cody even question why someone would put it in a children's board game.
* In "Bowser Junior's Sickness", due to his flu, Junior's voice cracks the whole time.
* In "Bowser's Driver's License", during a Doofy the Dragon-themed McDonald's commercial, as if the burger with nails, broken glass, and a mousetrap wasn't bad enough, Doofy also advertises nine-millimeter guns as happy meal toys.
* In "Bowser's Goldfish!", Junior plays with Bowser's pet goldfish, Charleyyy Jr., in the bathtub, until Toad arrives and tells Junior that they could take CJ on a water slide. Toad's idea on water slides for fishes, however, is flushing them down the toilet. Junior is against this, but Toad tells him that all toilets have a mechanism in them that keeps fish from getting flushed down. When Junior
* In boxing, aging former champions in their late 30s or to mid 40s (being too past their prime to win but still tough enough that beating them is beyond the ability of most) are often fed to a new contender on the rise in order to give them a credible name on their resume with relatively little risk. Former IBF heavyweight champion Tony Tucker was a perfect example, losing to John Ruiz, Herbie Hide, and Orlin Norris in rapid succession while aged 38-39 (he beat on journeymen in between these fights to prove he wasn't completely shot), each of whom later became a world champion. Or former WBA and IBF champion Tim Witherspoon, who aged 39-43 went on a losing spree against the likes of Ray Mercer, Larry Donald, Jimmy Thunder, Andrew Golota, and Monte Barrett (against, he racked up a bunch of victories in between these fights against journeymen). This doesn't happen as much in MMA due to old fighters being considered more viable there.

* In "Boxing Day", a mess-up with the technology results in several people and things being trapped in boxes. At the end of the episode, Three is in a box, making it seem like the troubles aren't over, but then it turns out that she got into the box on purpose to scare Four, Five, and Six as a prank.
* In boxing, knocking your opponent out of the ring is a legal technique to win. If they get knocked out of the ring, they have twenty seconds to get back in, unassisted. If they don’t, you win by knock out. Famously, the fight between Oleg Maskaev and Hasim Rahman ended with Maskaev knocking Rahman between the ropes and out of the ring near the announcers.

* In Brazil, football players are usually known by a single name, which can be their given name (Neymar, Romário, Marta), a diminutive form of it (Robinho, Marquinhos, Edinho), a nickname (Pelé, Garrincha, Kaká), and more rarely a family name (Barbosa, Zagallo). A given name plus a nickname is also common, but very few players are known by their full name.

* In Brazil, there are twin brothers "Fernando" and "Fabrico", their true identies are sealed as part of a court order, regularly from the time of their childhood would switch identies for fun. This developed into using the other's identity and sleeping with women. Eventually, their shenanigans ended up impregnanting a woman. The mother doesn't know which was is the actual father. The mother sought

finaincial assistance from the father, but a court-compelled DNA test can only confirm their DNA is the male parent, not which particular man is the actual father. Rather than let them off, Judge Filipe Luis Peruca chided the men for their "bad faith" actions. Judge Peruca then ordered that both men be named on the birth certificate as the child's father, both must pay 30% of Brazil's minimum wage as child assistance, roughly $60 a month, and collectively cover 50% of the child's medical and school expenses.
* In Brazil, there are two dubs, the original from São Paulo (done for the VHS) and a redub from Rio (available on DVD), both of whom have been aired on broadcast and pay TV.
* In Brazil, there's a saying: there are three things that you do just once in life: you are born, you die and "insert X here".
* In Brazil, there was a São Paulo dub on VHS that has been superseded by a Rio one first made for the TV broadcast.
* In Brazil there was a series of advertisements where people commented on their chances of having "um carro como aquele" ("a car like that") and said "Só no dia de São Nunca" ("Only in St. Never's Day"). Then a man in a saint outfit falls from the sky. One of those ads had them trying to get women as well but St. Never didn't fall from the sky that time. * In "Bread and Circuses", a local ruler captures Kirk and orders him to surrender his crew (as Merik, a previous Federation captain, had done), or else face death in the arena. Kirk chooses death, and the ruler makes it plain that he respects Kirk far more for making that choice — he dismisses Merik from the room with the sneer, "The thoughts of one man to another could not possibly interest
* In "Breaker of Chains", Margaery seems perturbed that her husbands have a habit of dying gruesomely, even though it's clear she didn't love them (well, the first two at least, the third is more ambiguous). Then again, considering the amount of political maneuvering and payoffs she and her family have to go through to get these marriages, she's probably frustrated at the extra amount of work she has to keep putting in. Upon arriving in the Human world Sunset almost immediately ran into her Human family, who were desperately searching for her hoping to make up for their mistakes. Sunset discovered that a similar scenario happened resulting in her counterpart running away and decided to use this

development to her advantage, taking her human self's place.

* In Britain if you even get nice weather for one day you WILL have cold and wet the next. For at least a week.
* In Britain in the late 1990s, several start-up ISPs (most notably Freeserve) offered "free" internet access — no contract, just dial their number. What they carefully omitted to mention is that it was free of subscription charges and contract obligations, not free of all charges; fees for online time were levied via the cost of the call (the pay-as-you-go model), and like most PAYG services, it was the most expensive way of doing it. One of their rivals advertised their (conventional) ISP services as "cheaper than free".

* In Britain's Parliament, an MP cannot say another is 'lying', as this is 'unparliamentary language'. This has led to some very inventive euphemisms, such as "the honourable gentleman is being economical with the truth" or even "I fear the honourable gentleman is perpetrating a matter of terminological inexactitude". And in the Dutch Parliament, the euphemism for lying is "verkeerd informeren" (inform wrongly).

* In Britain, with a similar system to Germany, they begin and end with something like "Now, a Party Political/Election Broadcast by the X Party" and "That was a Party Political/Election Broadcast by the X Party" (depending whether it's at election time or another time).
* In British media, the prefix "County" indicates to viewers/readers unfamiliar with Irish geography that the location in question is in Ireland or Northern Ireland. Irish naming conventions make liberal use of this trope to distinguish counties from identically-named towns and cities within them (the cities of Dublin, Cork, Galway and Limerick all sharing names with their respective counties). In contrast, the only traditional English county which conforms to this convention is County Durham—again, to distinguish it from the city of Durham.

* In British Policing (at least, say 90% of the time), whether this is any uncertainty whatsoever, the bickering will be over why one's own force shouldn't be responsible for an investigation. This shouldn't be complicated because jurisdiction in Great Britain is very simple on paper — the force which polices the area where the crime happened investigates — but it never works that way in practice. Where there are no cross-border issues, it becomes a question of which squad or team within the individual force gets lumbered with the responsibility — and then it gets ugly.
* In British Sign Language, Australian Sign Language and New Zealand Sign Language (collectively known as BANZSL), the sign for the letter Q (index finger of the dominant hand hooked onto a ring made of the thumb and index finger of the other hand) and the sign for sex (index finger through the said ring) are sadly easily confused by the uninitiated.

* In "Brother's Little Helper", Homer mentions a ten-year ban from the water park that recently ended. Fans connected this line to an incident in Season 2's "Brush with Greatness" where Homer gets stuck on a water slide and has to be rescued, although there was never an explicit connection.
* In "Brown", Dave and Burgundy hold a conversation in a crowded saloon while sliding a bottle back and forth between them along the bar.
* In Bruce Hornsby's "The Way It Is" the first stanza involves a bunch of people standing in line for welfare. A
* In Bruges, a guilt-ridden and suicidal Ray breaks down and cries into Ken's chest over committing a murder that went horribly wrong.
* In Bruges as a bonus feature, compiling all the swearing in the film. Very amusing lampshade at the end.
* In Bruges by the end of the film? Jimmy, the midget actor, of course.
* In Bruges ends with the main character losing consciousness on a stretcher being loaded into an ambulance, after getting filled with bullets. He decides that he doesn't want to die and wonder if hell is like Bruges. We don't find out whether he survives.
* In Bruges's eyebrows. There was only one scene that could genuinely be called an "action scene."
* In Bruges throws a bit of a lampshade on this one when it came to a white dwarf's coke-fueled, racist rant.
* In Bruges to get into a gunfight with the pregnant landlady right there in harm's way, and she refuses to leave, so they hilariously argue about how they can continue the fight elsewhere.
* In Bruges would have subverted this. Ray assumes that the priest he killed was a pedophile, because his boss is protective of children. However, Ken says that he was just opposing their boss' land grab.
* In "Brush with Greatness", Homer gets stuck in a tube slide at a water park. The staff sends several kids down at once in an attempt to dislodge him, but it doesn't work, so the tube has to be dismantled to free him.
* In "Brush with Greatness", there's a long line for the H2Whoa water slide. Bart and Lisa cut to the front by claiming she's a lost child and he's helping her;

Homer cuts by claiming to be a "line inspector".
* In "Brush With Greatness" while standing in line at the amusement park Mt. Splashmore's infamous water slide, the H2Whoa!, Bart and Lisa devise a successful ruse of having her crying for Marge in order to get to the front of it.
* in brutal fashion he killed Anatoly. Fisk contemplates for a few seconds as he tries to come up with an explanation that allows him to save face and then says, "It was a...a personal matter..." without much more detail.
* In "Bubble Buddy", after SpongeBob and the titular bubble unintentionally cause everyone on the beach grief and trouble, they form an angry mob and tip over the lifeguard tower to vent... followed by deciding to attack the lifeguard who did nothing. Fortunately, Squidward convinces them to focus the senseless violence against SpongeBob and Bubble Buddy instead.
* In "Bubble Buddy", some fish complain that they were made to wait in line while Spongebob's man-shaped bubble was in the bathroom.
* In "Bubble Buddy", the titular character, Bubble Buddy, is left by SpongeBob to dig a fish out of the sand. He doesn't, and the fish is killed by high tide. What suddenly makes it more horrifying is that it turns out that

* In "Bucketheads", during Milo's fashion show, Helga eats her bacon dress off her body and ends up naked. One of the Hill kids yells, "Please, God, someone poke my eyes out!"
* In "Bucket Sweet Bucket", Plankton hires SpongeBob and Patrick to redo the Chum Bucket, and SpongeBob builds him a drive-thru window that's much too high for his miniature stature. He then notices that Patrick has built a window down to his height, but it has a metal wall in the frame.
* In Buckingham Palace, wearing only a sheet, Sherlock refuses to take a case and starts striding out of the room. Mycroft Holmes steps on his sheet.
* In "Buck Saves the Day", he claimed he'd "rather slam my nose in a car door. I'd rather have a proctologist named Dr. Hook. I would rather watch Roseanne Barr do a striptease than take these little booger machines camping."
* In Buddhism, Guanyin (known as the God/Goddess of Mercy) is a bodhisattva that is depicted as either male or female. It's not uncommon for Buddhist temples in East Asian countries that have statues that depicts Guanyin as male, while others depict the bodhisattva as female. This is a justified trope, as it represents the limitless transcendence beyond gender, as gender does not have any meaning with Guanyin as long as the person understands what Guanyin represents.
* In Buddhism, one is supposedly able to perform amazing feats upon reaching nirvana.
* In "Bug Brained," (Fun-In #7) the General orders Dastardly to get Muttley back after a misunderstanding over why their secret plans against the pigeon were leaked. It ends with Dastardly on his knees pinning medals on Muttley (the only way he'd come back).
* In "Bug in Mouth Disease", Bubs tries to sell Homestar a new pancreas, which is kept in a cooler marked "EXHIBIT B", implying Bubs was caught up in organ trafficking.
* In "Bugs and Thugs", Bugs is held captive by Rocky and Mugsy. When they approach a railroad track with a sign flashing, Rocky makes Bugs get out of the car and check to see of the tracks are clear. Bugs lies and says it's ok to go. When they try the cross the tracks, a train comes and hits them. Rocky and Mugsy get the last laugh, however. They make Bugs repair the car, and then substitute for a missing

tire.
* In "Bugs Bunny Rides Again', after Bugs and Yosemite Sam have a chase which leads nowhere, they agree to play cards, with the loser leaving town. Bugs and Sam play gin rummy, with Bugs hinting at which card Sam should play; Bugs takes the card and wins the game and is about to send Sam out of town, until he sees a trainful of women in bikinis headed for Miami, and then Bugs pulls Sam's hat over his eyes and leaves him at the train station, while Bugs takes the train to Miami, saying "So long Sammy, see you in Miami", as the departing train makes a wolf whistle sound.
* In "Bugsy and Mugsy" Bugs Bunny is living in an abandoned house that two criminals use for a hideout. Bugs invokes this trope by putting up a literal Neon sign that says "Rocky's Hideaway." naturally it doesn't take long for the police to find them. Rocky never noticed the sign and thought that idiot sidekick had turned him in. Poor Mugsy gets a beatdown for nothing.
* In "Bugsy and Mugsy", Rocky manages to cut Mugsy's hat in half as well as part of the couch he was sleeping on when Rocky thought Mugsy was going to axe him.
* In "Bugsy and Mugsy", where Bugs Bunny plays psychological warfare on Rocky and Mugsy, leading the former to believe the latter is plotting to kill him. Even after Rocky has beaten Mugsy near-unconscious and left him hog-tied
* In Bulgarian it's appropriate to address women as "Miss" when their apparent age is below 30, and as "Mrs." when above. Upon mistake, the woman may correct the speaker, but usually doesn't act shocked. Boys around coming of age experience a version of this trope when people start using formal "you" when addressing them, or outright call them "sir".
* In Bulgaria, Serbia and Romania, the descendants of Judas are regarded as vampires
* In "Bullies", Valmont uses the dragon talisman to injure Captain Black. Later, as the Dark Hand attacks Fort Knox, Jackie is sneaking when he hears Valmont joking about Black's injuries, saying "I understand he had a doctor's appointment." As the Dark Hand laughs,
* In "Bull's Eyes", Daisy gets nervous when confronted with a bull on the line.
* In "Bully for Steve", Stan tries to avoid getting punished by Francine when she's about to see a video of him bullying Steve by saying he's "having an affair with
* In "Bully for Steve", when Stan starts bullying Steve to toughen him up, Steve retaliates by paying Stan's old bully, Stelio Kontos, to beat the crap out of Stan. Throughout the ensuring
* In "Bummer Vacation", Mr. Krabs forces SpongeBob to take a vacation from working, and hires Patrick as a temporary replacement, something the work-obsessed sponge can't deal with. He goes to the Krusty Krab, telling Mr. Krabs that he's only there to eat, and goes to the kitchen to check on Patrick. He scolds him for using the spatula wrong and takes it from him, just as Mr. Krabs walks in and sees the spatula in his hand.
* In "Bummer Vacation", SpongeBob is made to go on forced vacation, so he consoles himself with the Official Krusty Krab Playset. Toy!SpongeBob ends up accumulating too much vacation time as well, so
* In "Bumpy and the Wise Old Wolfhound", Bandit says he has "bum worms", much to Bingo's amusement and to Chilli's disgust.
* In "Bunker Hill", Dylan's plan to liberate Earth from the Drago-Kazof is to start a slave uprising to lure the Nietzsheans' armor into the open where he can destroy it from orbit with
* In "Burial at Sea", Atlas nearly gives Elizabeth one while torturing her for information. He even sticks the needle in and taps it a few times with a hammer. And you get to experience it all in first person! Elizabeth simply laughs it off though, saying that he'll be doing her a favor, by making her no longer care about all she's been through. He then threatens to do it to the Little Sister Elizabeth had been trying to save the whole time. She quickly gives in.
* In "buried", Strong Bad introduces his Taranchula Black Metal Detect-or as "America's coolest children's game show consolation prize".

* In Burma, there also can be people with just one name. The Burmese Secretary General of the United Nations became known as U Thant, but U is just a honorific, like Mr.
* In "Burn Baby Burn", Horatio finds a bomb in his Hummer; he calmly drives it to a piece of waste ground, takes off his sunglasses, gets out and WALKS CALMLY AWAY; as the vehicle explodes like an atom bomb behind him he CALMLY PUTS HIS GLASSES BACK ON and continues walking without showing any concern whatsoever.
* In "Burning Down the Bayit", Peter has difficulty explaining the concept of 'Buy one, get one free' to Mort who only hears non-sensical gibberish. Though only in reference to doing it in his own store since he hears the phrase just fine when Peter brings up a theoretical store doing the same offer, and asks him excitedly which store it is.
* In "Burning Down the House" (though using a split screen instead of a cut):
* In "Burning Low", Princess Bubblegum seems to be jealous that Finn is spending time with Flame Princess. It turns out that PB was trying to keep them apart because Flame Princess will explode and destroy the world if she experiences an extreme emotional reaction.
* In "Burns Baby Burns", Mr. Burns' grown-up son appears but proves to be a disappointment to his father, so he recruits Homer to fake his own kidnapping.
* In "Burns, Baby Burns" when he and "hostage" Larry Burns are surrounded by police at a movie theater, this happens:
* In "Burns' Heir", when Bart abandons his family to live with Mr. Burns, Homer arrives and challenges Burns to do his worst. Burns simply locks Homer out, and Homer responds by ringing the doorbell and running away.
* In "Burns Verkaufen der Kraftwerk" German industrials buy Mr. Burns' nuclear power plant. At first the workers are suspicious, but they change their mind. Lenny even says: "Sure, they made mistakes in the past, but that is why pencils have erasers." Finally the Germans deem the power plant to be unsafe and sell it back to Mr. Burns, who demands a large sum. They reluctantly give in to his offer, but warn him with a sinister stare that "We Germans aren't all smile and sunshine", as threatening music starts playing.
* In "Burns Verkaufen der Kraftwerk", Mr. Burns sells the nuclear power plant to a pair of Germans for $100 million and those new bosses, being a bit more grounded in reality, have the sense to fire Homer. Burns attends Moe's Tavern in jubilence only to find a drunken Homer berate him. This was profound enough for Burns to decide that he lost the "respect" (read:fear) of the townspeople, and he immediately bought it back, and hired Homer again citing this trope by name, like the example above, schemes to make Homer's life miserable/punish him but the whole thing only seemed to enforce

* In "Bushwhacked", Mal also uses his handcuffs to snap the neck of the settler-turned-Reaver who is trying to kill the Alliance officer at the end of the episode.
* In business, especially in software development, this idea is sometimes known as the "Bus Factor". How many people would have to be hit by a bus for some important knowledge or ability to be lost? If that number is 1, your business is in trouble.
* In "Buster and Babs Go Hawaiian", Buster complains that the episode appeared to have been written by 13-year-olds. The joke, naturally, was that the episode
* In "Buster and Babs Go Hawaiian," the two bunnies board a plane with several of the show's staff, as well as Charlie Adler, Tress Macneille, and Joe Alaskey, the respective voices of Buster, Babs, and Plucky.
* In "Buster's Growing Grudge", Buster forgets to study, so he writes a "report" that is about eggnog (he was meant to write about King Tut, but "eggnog" and "Egypt" were next to each other in the encyclopedia) and adds on a joke because he believes he will get a higher grade if he makes the teacher laugh. He tells Binky, who tells the joke, so Buster doesn't get to tell the joke and ends up getting a D,

which he blames Binky for.
* In Butcher's origin, there is one of a group of criminals, standing over Butcher after they'd given him a kicking after he attacked them without provocation.
* In "Butterfly Effect", Lincoln imagines Charles pooping on the couch.

* In "Bye Bye, Nerdie", Marge drives Bart and Lisa to school after missing the bus. She goes after the bus, but Otto thinks she wants a race. It ends when Marge stops the bus just a few feet away from the school but still wants her kids to be on the bus. Subverted when Otto forgot to pick up the new kid and drives back to pick her up.
* In "Bye, George", Fiscus fails to recognise Michael Dukakis when he arrives at St. Eligius with a sprained ankle. He does not believe him when he gives his occupation as Governor of Massachusetts.
* In "Bygones", when Baloo rescues a man who claims to be Rick Sky, a pilot who went missing 20 years ago during the Great War.
* In "By Infernos Light", Worf is held captive by the Dominion and forced to fight a series of Jem'Hadar to the death as a Jem'Hadar training exercise.
* In "By the Book", Olive, of all people, refers to Gooey Randall as "Filthy Paul". According to him, he gets misnamed "Filthy Paul" quite often.
* In "By the Book", the crew is examining a bizarre crime scene. Dr. Tom Loman is examining the corpse when Ryan tells him that they don't have an ID yet. Tom casually says that she is Andrea Edison. Ryan looks amazed and asks Tom how he knows. Tom calmly replied that he found her ferry pass in her pocket and hands it over to Ryan.
* In Byzantine Christian art, most Saints are drawn somewhat ugly to accentuate their Inner Beauty represented by their halo.
* Inca account of the conquest of Peru by Titu Cusi Yupanqui, who says that when the Incas first saw horses they thought of them as "large sheep in silver shoes". By "sheep" he meant llamas, who had been called "Peruvian sheep" by the Spanish (the account was written in Spanish because the Incas didn't have an alphabet).
* In "Cabin Fever" Sonic and company partake in a sandcastle building contest. One draft of a very early internal document called the "Sonic Bible", which was created at Sega of America during the production of the original game, mentions that competing in sandcastle building contests is one of Sonic's past times.
* Inca features a Tumi-shaped Inca ship fighting Spanish galleons, in space.
* In Cairo & Gavreel's first meeting in person, Gav prepares a disinfected plastic barrier with arm slots for both of them so they can finally hug. The look

of genuine joy in their eyes to experience something discouraged even for household contacts was priceless. After much buildup, the couple take off their facemasks and kiss through the barrier.
* In "Calculon 2.0", the process Prof. Farnsworth uses to revive Calculon is blatantly reminiscent of a Satanic ritual, despite his insistence that it's all science. Hermes

* In "Call of the Cutie", a recurring background character known as Time Turner slowly backs away from Apple Bloom when she gets a bit pushy while selling apples.
* In "Calvin Brain", Brain's latest plan for world domination is undone when a behind-the-scenes documentary crew films him unleashing a diatribe on the shallowness of the fashion industry and the brainlessness of those who follow its dicates. His last words on the video are even "Is that thing on?"
* In "Camelot"/"Flesh and Blood", an Ori fleet destroys a combined force of more than 10 allied ships, and miraculously the main characters (divided among three of them, the fourth floating unprotected from debris and only kilometers away in space as it all occurs) all manage to survive due to various circumstances. Par for the course for this series, it's the Russian ship which goes down (despite 2 main characters being aboard).
* Inca men of enough status could marry multiple wives. If they did, one woman served as the principal wife while any and all others were considered secondary.
* In-Camera Effects - Effects the camera itself produces, such as black-and-white in a color camera
* In "Camera Shy", though by no means done intentionally, the strange "edits" that Rocko's home movie receives winds up making it a worldwide phenomenon. Unfortunately, he does
* In "Camille", the shapeshifting GELF lover turns out to be a one-eyed pile of green glop, grossing out most of the cast, but Kryten (an android) subverts it by admitting that he has no problem with her real form and goes on a date with her.
* In campaign mode, the Terrans sometimes use cylindrical Drop Pods to land units on planet surfaces. These are equipped with drag flaps and retrorocket thrusters which activate near the ground, slowing the pod before it embeds itself in the ground. Once the unit exits the drop pod, the pod automatically falls to pieces. Notably, when the player hires mercenaries through the Mercenary Compound, they almost immediately arrive in drop pods which land in front of the Compound. At the highest level of the Protoss research tree in the Lab of the
* In C&C games with flamethrowing infantry their fuel tanks explode violently when they die, damaging nearby units. Any player who tried to build a crowd of them would find that the first death would damage all those around them, then the second or third would invariably cause the whole group to go up screaming like so many human torches, thus proving yet again that

* Incan rulers were mummified upon death but were not buried - instead, they were still considered to be an active part of the affairs of state. They were still expected to attend important functions and offer votes on state matters via relatives and servants who acted as spiritual interpreters. Since rulers left their titles to their heirs but were considered to keep their wealth for themselves, these interpreters often wielded considerable money and power. As far as we know this is a purely metaphorical example and the mummified kings were just regular dead people; except for the
* In "Can You Spare a Dime", SpongeBob violently shakes Mr. Krabs begging him to hire Squidward back. Then the lost first dime that kicked off the plot (and which is actually a huge stone coin)
* In "Can You Spare a Dime?" Squidward is fired when Mr. Krabs accuses him of stealing his first dime, and takes up residence at SpongeBob's house only to annoy him with so many requests. When SpongeBob angrily confronts Mr. Krabs and shakes him out of fury, it is revealed the first dime (actually a giant stone wheel) was in Mr. Krabs' pocket the whole time. So Mr. Krabs rehires Squidward and all is well...until Mr. Krabs begins accusing Squidward of putting the dime in his pants in the first place. As the two argue, SpongeBob quietly changes into his maid outfit, anticipating the inevitable.
* In "Can You Spare a Dime?", when SpongeBob has an unemployed and homeless Squidward stay at his house and it becomes apparent that Squid is starting to treat him like a slave.
* incapable of changing from a "cute" expression, regardless of what they are feeling, and they build underwater castles out of sunken human ships.
* Incapable of Disobeying: A character is enslaved in such a way that they can not disobey their master no matter how much they may want to.
* incapacitated near the end of "The Candidate" when he's struck by a door as the submarine begins to sink.
* In Cape Claw, there's a room with four blocks around a central support. When you step on a certain point, the door shuts and the blocks move away to the corners of a square, and you have to drag and push all of them back to stop the poison. (Why would you go there in the first place? Well, there's a good reason...)

* In "Cape Feare," Bart takes shelter in the monkey bars during recess because he fears that someone at school wants to kill him.
* In "Cape Feare", Marge scolds Bart for somehow tattooing "Wide load" on Homer's rear but then chuckles at it behind his back.
* In "Cape Feare", Sideshow Bob claims that his "die Bart die" tattoo is actually German for "the Bart the". While this is true, "die" is actually a German pronoun for females; "der" is used for males.
* In "Cape Feare", Sideshow Bob is out on parole and mailing Bart death threats. As Bart becomes increasingly paranoid, he runs into his mom, Flanders and Mrs. Krabappel:

* Incarceron, being a giant prison, is surrounded by massive steel walls.
* Incarceron has many people living inside the gigantic, living prison, and a lot of them aren't pure human, but also part robot. This is because nothing is allowed to come into or escape the prison, and as the prison is running out of bodies to use to make new people with, it instead uses metal. An odd case where some of these people have no metal on the outside of their body, so they are impossible to distinguish from normal humans, as the metal is all inside their bodies.
* Incarceron has Queen Sia, who is a master manipulator and probably had her stepson kidnapped to ensure her blood son would inherit the throne.
* In "Career Day", he winds up at McMeaties, and thinks that he'll eventually be promoted to ruler of Earth.
* In Caridin's case, he purposely destroyed his research after suffering a crisis of conscience, coming to realise how horrific his "masterpiece" truly was. It turns out that Golems are created by

* In Carlton's Chapter 1, he can be killed by a bandit with a Pickle Stabber if he refuses to give up a key item.
* Incarnate by Jodi Meadows sort of leans on this. Everyone is reincarnated into different bodies over and over, and there's no guarantee that you'll be the same gender every time. So sexuality isn't really an issue.
* "Incarnate": When the ruthless leader of a criminal gang flees to a Caribbean island that has no extradition treaty with the U.S., the IMF uses her belief in the occult to induce her to return to the US of her own free will so she can be captured and the gold she stole can be recovered.
* incarnation go by the usual adopted name of "the Doctor". He is identified in credits as the War Doctor, but this probably was not what he actually went by, if anything.
* Incarnation of Legends, Bell's grandpa's stories and Kojiro's presence inspires Bell to explore the world and gain some experience and skills before heading to Orario.
* Incarnation of Legends: Every large city of note, including Orario, has a high wall around them to keep invaders like Rakia and the Empire out. The capital of Altena, Yggdrasil, has its wall made out of ice, with strange symbols etched into it. Despite this, Bell gets the feeling that it's as sturdy as any other nation's

wall, almost beckoning invaders to try and breach it.
* Incarnation of Legends exudes this feeling despite being immortal and eternally youthful as a god. His Divine Arms techniques are the envy of everyone in the Far East as the pinnacle of martial arts, leading others to join his familia in pursuit of them.
* Incarnation of Legends, guild advisor Hikigaya Hachiman shares his given name with Hachiman, a god of war. Bell is intrigued by this, having met the godly Hachiman during his visit to the Far East.
* Incarnation of Legends, Hachiman built the Arena in Sekigahara for "proper stress relief", allowing anyone itching for a fight to find one in a controlled setting where people can come to watch instead of attacking each other in the street.
* Incarnation of Legends, Haruhime is this for Bell, a beautiful girl his age of noble status who falls in love with him after he rescues her from a grim fate as a slave to be sold to the highest bidder. In fact, her desire to one day stand by his side is so great that she renounces her noble title and gets disowned so she can become an adventurer.
* Incarnation of Legends, Kojiro challenges the Radiance, an adventurer strong enough to take on the Legiones, to a one-on-one duel as soon as they meet. She quickly plows through his skill and speed-based defense with brute force, dislocated his shoulder and bending his sword in the process. But Kojiro does damage her helmet to the point that it cracks and falls to pieces, implying that he would have cut through her head had it not been there.
* Incarnation of Legends. Lampshaded by Kojiro, who asks if there's any relation between her and "him". The Radiance scoffs at this, calling her adorable next to "him".
* Incarnation of Legends, Odin has the ability to perceive the souls of others and determine what color they are. He's eager to try to recruit Bell after seeing his completely pure soul, but he turns his nose up at Kojiro's, comparing looking at it to watching a rainbow while drunk and drowning, with so many twists and turns that it's nauseating. Odin apparently uses this ability quite a bit, which his own Valkyries consider disgusting and almost perverted as he's judging all of them by their souls.
* Incarnation of Legends, Oryou calls Haruhime "Haru", which shows that she cares deeply about her personally rather than through obligation.
* Incarnation of Legends, Oryou spends the first arc dealing with monsters on the outskirts of town with the Hachiman and Amaterasu Familia. When she enters the final battle of the arc, she crashes through the ceiling, interrupting all the fighting present.
* Incarnation of Legends over time. Kojiro doesn't exactly comfort him about it, but does tell him that only he can decide what he thinks is right and what he can live with.
* Incarnation of Legends remain untouched aside from getting used to once again having a flesh-and-blood body. As such, he, despite not having a falna, is able to fight on par with Level 1 and 2 adventurers, something that's supposed to be practically impossible.
* Incarnation of Legends, Susanoo's desire for a warrior country where the strong trample the weak akin to Kali's Telskyura frame him as this, though even he has a strong love for his children.
* Incarnation of Legends that leaves her shoulders and the upper part of her chest bare and the only thing covering her thighs and hips are the books hanging at her waste and some purple panties.
* Incarnation of Legends, the immortal, beautiful, and all-powerful gods are fascinated by mortals' ability to grow, change, learn, and perform spectacular acts of good and evil. This is why they descend so they can observe them and experience the joys and sorrows of willingly refusing to use their godly abilities as a vacation from the eternally stagnant bureaucracy of the Upper World.
* Incarnation of Legends, the Legiones declares that Bell and Kojiro are under his protection during their stay in Rakia, handing them a special gold coin as proof of this. While grateful for the honor, the same coin feels like a leaden weight in

Bell's hands because of how it simultaneously paints a target on his back.
* Incarnation of Legends, the plays Bell sees in Rakia tend to portray the leading adventurers of Rakia's rivals in an unflattering light. Finn Deimne, the Braver and the Captain of the Loki Familia, is treated as a sniveling coward. Bell also doubts that the Radiance would actually beg the Legiones for mercy.
* Incarnation of Legends to save Haruhime and goes to Kojiro for advice. To Bell's dismay, Kojiro says that in his view, those who take lives are evil, and thus he defines himself as evil. But Kojiro soon clarifies that it's only Bell can decide what will set his mind at peace, and that he'll simply have to find a way to live with it.
* Incarnation of Legends when he discovers that he's been injured in her absence, and would have returned to her original form and slaughtered everyone present had he not calmed her down in time.
* Incarnation of Legends, "Wind Blade" Shinjiro is praised for reaching the peak of swordsmanship in the Far East through the teachings of Hachiman, but Kojiro isn't impressed. Slashing twice at the same time simply doesn't compare to Kojiro's sublime and inescapable Tsubame Gaeshi, and he proves it when he defeats and kills Shinjiro in a duel.
* incarnations more than others. This is especially true in the revived series, which added a traumatizing war to their backstory to represent the years the show was off-air.
* Incarnations of Immortality: 7 incarnations, each with a book, duty, way they're selected, magical artifact(s) imbued with powers, (some) a special article of clothing or robe of office, and possibly some other things.
* Incarnations of Immortality about the horse's mouth, the newscaster takes a moment before remembering he needs to translate Mortis' neigh for the audience.
* Incarnations of Immortality and thus she's no more sensitive there than any other part of her body.
* Incarnations of Immortality: Any mortal dating an Incarnation could count.
* Incarnations of Immortality are jobs of this nature, each with its own rules. Some examples:
* Incarnations of Immortality, a succubus chooses to focus her intense sexual drives on one member of a particular rock band. This is aided by unique properties of the magical Jonah's Whale (yes, that Jonah and that whale).
* Incarnations of Immortality books, ghosts run an ethereal amusement park, where the ghosts try, and often succeed, in scaring the visitors. Amusingly, people kissing seems to scare the ghosts, in return. However, the rest of the amusement park is typical, if ghostly, fare such as a smoke ring toss.
* Incarnations of Immortality books, the protagonists have to get the hang of being the Incarnations of Death, Time, Fate, War, Nature, Evil, Good, and Night, respectively.
* Incarnations of Immortality is based on a society much like our own, only Fate, Time and Death (among others) are incarnated in humans (sometimes against the will of said humans), magic is real, and in the future timeline technology and magic merge to a large degree. (Justified in that "magic" is said to be based on a "fifth fundamental force", making it essentially an application of physics in that universe). At one point, the series states plainly that anything magic can accomplish, technology can do too, and vice versa.
* Incarnations of Immortality is this: Various concepts (Death, War, Time, Nature, Fate, Evil, Good and Night/Secrets) are held by god-like beings who are in fact mortals charged with these offices, gaining immortality and supreme power over their respective domains in the process.
* Incarnations of Immortality: It is noted at several points that Niobe, her daughter Orb, and her granddaughters Luna and Orlene greatly resemble each other. Orb and Luna were born at the same time (Niobe bore Luna's father Cedric Jr. first, then several years later, she and her son had children at the same time) and were often mistaken for twins.
* Incarnations of Immortality one mortal uses it to her advantage, after the first time where she finds this out.

* Incarnations of Immortality. Presumably, it's possible to have a new Nox (eighth book), but it's never happened - current office-holder Kerena created her position.
* Incarnations of Immortality reveals that Parry/Satan was in love with Niobe, but failed to win her over. Eventually, he marries Niobe's daughter Orb.
* Incarnations of Immortality series, customize themselves to the interests of whomever is watching them.
* Incarnations of Immortality series: the Purgatory News specifically puts together separate broadcasts for each resident, so whenever one of the Incarnations turns their office TV on, the news will always be relevant to them.
* Incarnations of Immortality series. There aren't any language barriers when it comes to War.
* Incarnations of Immortality series, when Orb and Luna are young, their father, the Magician, gives each child a magical moonstone to protect the children from harm. Some Gypsies who intend harm are literally stopped from going near the children.
* Incarnations of Immortality. Some 40 years later, she meets and falls in love again with a different man, many years after his wife also died. He even comments (paraphrased) "It's almost like Fate has been saving you until the time was right."
* Incarnations of Immortality, Thanatos (aka Zane), the incarnation of death, is described as a fairly ugly man; the woman he dates, Luna, is described as one of the most beautiful women of her generation (this is stated as fact and recognized by immortal powers such as Satan, not a subjective opinion). It helps when the Incarnations of Faith & Time team up to do some match making.
* Incarnations of Immortality the other Incarnations, who have just spent the entire series opposing Satan at every turn, have to figure out a way to get him back in charge.
* Incarnations of Immortality. The results of this encounter start the main plot.
* Incarnations of Immortality universe, magic is considered a natural force, along with gravity, magnetism, and a couple of others.
* Incarnations of Immortality use very strong supernatural powers, but they themselves are not really supernatural entities but normal people filling an office, and the powers are derived from that role.
* Incarnations of Immortality version of Atropos laughs at Japanese culture a bit. Also, Mym, a Hindu, is a bit offended by Western culture and the fact that its version of the afterlife is the "correct" one.
* Incarnations of Immortality, which shows Satan's view on the events of all the preceding books.
* Incarnations of Immortality while on duty, is impervious to bullets and anything else that could possibly harm the wearer (who is still a living human being).
* incarnations of the same person. They are usually just called "The Dalai Lama".
* incarnations, partly the fact that a time-travelling alien can hardly be expected to understand the social mores of every time and place he visits, and sometimes just the way he is:

* Incarnum: Shaping magical, item-like effects formed of pure soul-stuff to your body. These effects can be augmented with Essentia, which can also be put to other uses. The color blue is a common motif.
* In Caroline B. Cooney's Time Travelers Quartet, members of the Lockwood and Stratton families keep being pulled across hundreds of years to each other's sides, the implication being that they're meant to be together.
* In carpentry, the new guy might be asked to find a "wood stretcher".
* In "Carpet Diem," Dipper says an owl tried to eat his tongue while he was sleeping outside. That poor tongue can not catch a break.
* In "Carpet Diem", Grunkle Stan is conked by a golf-ball offscreen, and is heard yelling "Ow, my head! It hit me right in the head!"
* In "Cartman Joins NAMBLA", Kenny's father ends up getting gang-raped by the entire South Park chapter of NAMBLA after a

* In "Cartmanland", a hospitalised Kyle flatlines from stress when he hears of Cartman's huge financial success on TV.
* In "Cartmanland" Cartman buys his own theme park so he can have it all to himself. Stan reassures Kyle that Cartman is probably already sick of being in the park alone, wondering how someone can enjoy the rides without other people. Cartman is then shown in the park alone, still enjoying the rides without other people.
* In Cartman's case his actual character does not change - he's always a sociopathic brat - but sometimes he happens to get power to act his ideas in reality.
* In "Cartman's Mom is a Dirty Slut", Cartman asks his mom during dinner if he actually has a dad, considering he never knew who he was. Cartman's mom goes on to give the talk, only for Cartman to ask her "who put his who-who-dilly in her cha-cha." And after that, Cartman's search for his dad begins.
* In "Cartman Sucks" Cartman is about to trick a blindfolded Butters into letting him put his penis in his mouth. Butters' father storms in and assumes that Butters was allowing it and is gay. Butters is completely flummoxed. Of course, this is after Cartman had invited Butters over for a sleepover, then proceeds to take naked pictures of him in order to make him look gay. One of these pictures if of Cartman putting a sleeping Butters's penis in his own mouth. The other kids tell Cartman that makes him look homosexual, not Butters, so Cartman plots to reverse the gay polarity. Note that most of the conflict (and humor) arises from Butters being
* In "Cartoons Ain't Human," Popeye's nephews hiss the villain in their uncle's homemade cartoon. The villain then turns and hisses right back at them.
* In "Casa Bonita" Cartman asks Kyle when he's ever made fun of him for being a Jew, which is followed by a solid minute of clips of Cartman doing exactly that. Followed by Cartman "admitting"
* In "Casa Bonita", where Cartman is told by the police he "caused a whole town to panic, alienated his friends, and is now going to juvenile hall for a week", all in the name of going to the eponymous establishment. When asked if it was all worth it, Cartman simply replies "...totally."

* In cases of drowning and hypothermia, severe cold serves as a protective mechanism in a euvolemic victim (i.e. one not in shock to begin with). Below a certain point (usually around 32 C), low core temperatures drastically slow metabolism, preserving organs from hypoxic damage, and occasionally allowing successful resuscitation in a victim who would otherwise be long past saving. To that end, an old aphorism of emergency medicine states that hypothermia victims "aren't dead till they're warm and dead." The same effect is also exploited in active cooling therapies for heart attack and stroke patients, in which the patient is deliberately rendered hypothermic in the ICU to protect the heart or brain from further ischemic insult. * Inception came off as improbably perceptive because of a somewhat borderline example of this trope.

* Inception can pose as anyone during a dream when necessary. Thus, he's called "The Forger."
* Inception, Dom and Eames use this to find out where Dream!Saito has hidden his secrets. When they mention concealing secrets, Saito's eyes immediately flick towards a wall panel, behind which is a safe containing said secrets.
* Inception Dom didn't follow through with it, and the setup was convincing enough that he was forced to flee the country.
* Inception. Dreamers build the dream world and can alter it at will, but each alteration from the baseline helps tip off the subconscious that someone's hijacked the dream. This is why it's so important to go in with a complete picture of what the world is supposed to be. Dreamers also carry special totems whose properties are known only to them, to help them discern dreams from reality.
* Inception, Eames is a "forger", which means he can take on the appearance of other people when in a dream. Perhaps not a straight example of the trope as he can't do this in reality, but...
* Inception Eames tosses a bomb to a snow-mobile full of projections while skiing past them.
* Inception, Eames turning into a woman and flirting with a teammate for comedic effect.
* Inception, extractors design dreams with architecture like vaults, and then lure the target person to sleep. The target then fill the dream with their memories and secrets in those pre-designed vaults, as well as anthropomorphic manifestations of their memories that act to protect the dreaming target and their memories. The extractors then try to break into those vaults and get access to those memories. The extractors in a dream can start to change the dream for their own ends, like summoning weapons out of thin air, or altering the environment. However, the more they change the dream, the more attention from the projections, who sense the foreign nature of the dream, and work to protect the target dreamer and any foreign elements. In addition, the dream itself becomes more and more unstable.
* Inception features one of these as the climax of the entire film, where we finally see whether or not Fischer reconciles with the memory of his father.
* Inception for it to stick. The next complication is that the idea will grow to define their entire life... even to suicidal extremes.
* Inception has Eames and Arthur. One is a chilled out thief, the other is a slightly stuck up researcher type. The fangirls loved this.
* Inception has some parallels to the Matrix, where one of the characters in-universe (and perhaps some of the audience) question which stage of "reality" they are in, and whether death or suicide will propel them upward toward a more real existence.
* Inception involves this, with Cobb's team forced to improvise as they go. Cobb himself even says that once they enter Fisher's mind, they'll have no idea what to expect, so they have to improvise as they go deeper into his subconscious. In fact, the entire "Mister Charles" gambit is one of these that the team cooks up when they realize they're going to be mobbed by armies of Fisher's personal security guards.
* Inception is almost entirely bloodless with the exception of a main character getting hit by a single bullet. Since his wound is of major importance for the following scenes, it's examined closely, but even so, it's very small with a relatively small amount of blood.
* Inception is created that appears just like the real world. When things do get weird, it's a sign that something has gone badly wrong. The trick is then to adapt this weirdness to your own advantage before the target wakes up.
* Inception is to do exactly this, though instead of information, the goal is to implant an idea. As well, Browning suggests that Fischer Sr. may have done this to his son in the first dream layer.
* Inception — pushing someone off a chair is used to trigger a huge shock (causing a sleeping person to wake up), rather than a huge shock causing someone to fall off a chair.
* Inception movies in that she doesn't need to possess anyone, she just appears and wreaks havoc. What's really scary is that even in constructed dream worlds with

trained dream operators, she's nearly impossible to stop.
* Inception: Mr. Eames is unique among Cobb's crew as a Forger, able to alter his appearance and identity in the dreamworld. One of his multiple faces is that of an attractive blond woman who seems to have no issue flirting with or seducing male targets, raising the interpretation that Eames himself is genderfluid.
* Inception nature of the film allows interpretations all along this line.
* Inception played its cards close to the vest when it came to promotional items, but one thing that became analogous to the movie was the shot of Paris folding in on itself like a taco.
* Inception, rather than relying in CGI. Before filming started one day, a bum walked onto the blocked-off street being used as a set, and asked one of the producers if there was really a freight train in the middle of the street. When the producer answered in the affirmative, the bum decided that maybe he was drinking too much.
* Inception: Saito gives a theoretical Caper Rationalization toward the beginning of the movie, though the movie never shows whether it is true or not. On the other hand, DiCaprio's character is motivated by his desire to be able to return to his children, which Saito promises to arrange if he can pull off the titular Inception. Almost everyone else appears to be in it for the money. Except, maybe, Ariadne. She seems to just like being in dreams.
* Inception. She asks the questions about inception and extraction that the viewer would be asking. Saito is also this to some extent, at least in the beginning of the film.
* Inception. She killed or tried to kill someone in about every other scene she was in, but she still gave the hero pause when he was faced with stopping her.
* Inception. She was Cobb's wife who killed herself when she became convinced she's still in a dream and has been haunting his thoughts ever since, derailing their dream excursions more than once.
* Inception small number of people. We get a brief glimpse of an "opium cave" where people go to have shared dreams in Mombasa — this pretty strongly implies that it's illegal, and if it is, it probably has a fair deal of recreational use in the Western world as well.
* Inception somehow bribe all the flight personnel who might walk in on them during the operation. Saito reveals he had been thinking ahead:
* Inception: "So, now we're trapped in Fischer's mind battling his own private army, and if we get killed, we'll be lost in limbo till our brains turn to scrambled egg."
* Inception so that he can go back to the US and be with his children. He keeps his word and the movie ends with Cobb going through customs at the airport without a hitch and then reuniting with his children.
* Inception spotting the thread, when Saito notices that the carpet in a room he's in is made of the wrong fibre, tipping him off that he's still in a dream.
* Inception takes place in a dream within a dream within a dream. But what really takes the cake is Limbo, where a dreamer can construct their own entire world, completely from scratch.
* Inception team gets into this at various stages, including Ariadne. Some particularly notable ones are Cobb, Arthur, and Saito in black tie at their first meeting, the hotel dream levels, and Arthur's famous hallway fight, in which he wears a three-piece suit and removes only the jacket.
* Inception that dreamer. In effect, they're a sort of mental security force. Fortunately, being projections, they aren't actual people, though depending on how well-trained the dreamer is at resisting mental intrusion the projections can be anything from an angry mob of unarmed civilians to highly-trained and heavily-armed soldiers.
* Inception that you can also tell you're in a dream by trying to think about how you got to where you currently are, noticing any impossible geometries and phenomenon, or other inconsistencies like rapid weather changes. The infamous ending focuses on Cobb's spinning top totem with the film cutting to black before the audience can see whether or not it stops spinning (Cobb's awake) or if it spins

forever (Cobb's still in a dream).
* Inception, the main character Cobb has been on the run all over the world because he cannot return to his native United States due to being framed for his wife Mal's murder and would be arrested as soon as he tried to enter. Even being in an extradition-treaty country like France is a risk (though Cobb notes the French government's bureaucracy would slow things down). Saito is able to lure Cobb into doing a job for him by promising to get the charges dropped so that Cobb can return to the US and see his children in person again.
* Inception, the main character's career is doing this with ideas. The plot of the movie is an inversion: They must leave an idea instead.
* Inception This is demonstrated in the film when Dom and Mal are trapped in limbo for fifty years, waking up only a few hours after they fell asleep when they finally escape. There's drugs that make that gap even wider.
* Inception: This is how characters wake up from a layered dream into the previous one.
* Inception, this is the difference between an untrained mind's projections and a trained one. Normally, a mind's subconscious projections take on the form of waves of mindless civilians that swarm intruders in the dreamworlds, while if a mind has been trained to resist intrusion, the projections are armed with heavy weaponry and attack in coordinated groups.
* Inception, this is what the team realizes they have to do in order to escape Fisher's mind once they learn his subconscious has been militarized. Only by incepting Fisher and making him achieve catharsis can the team avoid being "killed" by the projections.
* Inception to time their awakening from the lower dream levels. At the end of the song, their accomplice on the first level will crash the van they are all in into the river. They need the musical countdown due to the time dilation effect.
* Inception, translated as "The Beginning", even though there is a much more suitable word used for the term in the movie itself. The translators later apologised for this and explained that they were given very scarce information and they misinterpreted the name.
* Inception was intended to be completely open, with the viewer left to decide if it was a dream or real. This has not stopped fans from finding "evidence" that suggests the director intended it to be one or the other.
* Inception where all Recursive Realities henceforth are named with the meme "_____ within a _____. _____ception"
* Inception, where any physical damage in the dream world, even killing yourself, has no physical ramifications in the real world; but mental manipulation within the dream world has mental and thus physical ramifications in the real world.
* Inception, where Dom and his team are hired to convince the heir of a major energy company to break up his father's company so that it won't compete with their client. In order to accomplish this, the team goes into his dreams and implants the idea that his father was not going to give him the company. Since the heir had a strained relationship with his father, they try to convince him that the disinheritance was not a punishment, but rather an encouragement to build his own legacy.
* Inception, where the team has to fight off baddies in a winterly high mountain environment.
* Inception Which is necessary as for the inception to truly work it needs to be planted very deeply in the target's subconscious so that they will believe that it's their own idea.
* Inception, which recounts the events immediately leading up to the movie. A motion comic version is included in the Blu-ray release of the film.
* Inception. While they're asleep, they are able infiltrate other people's dreams and then manipulate them to think about whatever secret the the Extractor's trying to steal. The secret will then show up somewhere in the dream, where the Extractor can study it and remember it when he wakes up.
* Inception whose more optimistic views help him get through the job and eventually get over his issues.

* Inception, Yusuf does this to a projection when he drives off the bridge to set off the kick in Fischer's first dream layer.
* In "Ceremonies of Light and Dark", the Special-Operations-turned-Nightwatch guy recollects taking seven days to kill a Minbari. He cut his victim to pieces, starting from the digits and extremities and tying off the body part to be removed next, so as to avoid his victim dying from blood loss. He ends his story with "It was beautiful, you should have seen it." And
* In certain areas, large amounts of glass are worn smooth by erosion and washed to shore to form "glass beaches," entire beaches covered in what looks like many-hued and colored rocks. The most well known of these is
* In certain circles (primarily religious ones), the Petra versions (1977 and 1984) are better known. They feature different lyrics from both the Argent original and the Kiss cover. Petra lyricist Bob Hartman mentioned fans asking him "why they let Kiss cover their song." He would laugh and gently inform them that both were covers.
* In certain countries, people were "resigned," as in they got volunteered to quit their jobs. In one case in Fascist Italy, a minister learned from radio broadcast that he had just resigned from his job.
* In certain fairy tales, a king and queen have many sons, all of whom become unfavorites in favor of a soon-to-be-born daughter, to the point of them being planned to be
* In certain fluff material, it's mentioned that some of the most famous dragonslayers were benevolent metallic dragons either in mortal disguise or not who hunted the more wicked chromatic dragons.
* In certain missions, it's actually possible to knock out/kill messengers for their clothes.
* In certain parts of South Africa, penguins will cheerfully go into restaurants... and people's cars.
* in certain rare circumstances communicate incomprehensibly: Kazaaakpleth, for example, makes what are presumably chittering noises that, apart from names, are rendered in consonant-heavy gibberish, while Mafan communicates entirely in dots, dashes and slashes which could mean almost anything.
* In certain reviews, there will be a skit involving his original characters at strategic points; often entirely unrelated to the film in question.
* In certain situations and under certain legal code, being in a position of power means you are held to a higher standard for people under you than a bystander. In the US, a random person who sees someone needing rescue but does nothing to help is generally not required to try to save them. However, if a parent sees their child in distress, or a captain sees one of their crewmates/passengers in distress they are legally obligated to try and do something to help. Otherwise, they can be sued or even charged with a crime for doing nothing.
* In certain specified and unique circumstances - flesh may indeed mark steel. In
* In certain stories, Sir Gawain had a sword (Galantine) that made him invincible for as long as the sun shone on him. He and Sir Lancelot once fought a duel starting at sunrise. Lancelot won by blocking every strike until sundown; 12 hours later.
* In certain times and places, martial arts were banned, and practitioners who wished to maintain training hid it in other practices, such as chores (as in early Karate, as referenced in the
* In certain towns in the area it was filmed some shops still have the Stuckyville name painted on their windows. Most visible at a Jewelry shop in Westwood.
* In certain US states such as Texas, common law marriage is legally recognized and has all the same legal rights as formal marriage; the only difference is that a ceremony is not performed.
* Incessant Chorus: A character who sings this particular song in every scene they're in.
* Incest-ant Admirer: When one relative is attracted to the other, but the other is uninterested.
* Incesticide, and the above mentioned "Jesus Wants Me For A Sunbeam". In an

interesting take, Nirvana covered folk songs most famously played by Lead Belly but changed the titles to match the chorus ("In The Pines" became "Where Did You Sleep Last Night?" and "He Never Said A Mumbling Word" became "They Hung Him On A Cross"). Nirvana's first single was also a cover being the song "Love Buzz" originally performed by Shocking Blue in 1969.
* Incest Is Relative: Blood relatives are romantically/sexually involved with each other.
* (Incest Song) has a similar structure an example named above: Boy meets girls, falls in love. Dad intervenes, claiming they are his sisters. Boy then talks to mom, mom: "Oh, don't worry, he's probably right but he's not YOUR father anyway..."
* Incest Subtext dysfunctional and codependent relationship that makes them, in a way, perfect for each other.
* Incest Subtext failed apparently due to there being too much love between them.
* Incest Subtext: Related characters have interactions that make them look like a couple.
* Incest Subtext, the director of Hikari's debut episode, did have a very strange interview about the incestuous undertones about their relationship. During a live stream on August 1, 2018, Hiromi Seki, the producer of the show, explicitly mentioned she had warned Hosoda about the episode, saying that the scene where Taichi returns to the Digital World "didn't seem like a parting between siblings, but a different relationship."
* Incest Subtext, the lives of Mr. Chan and his children were decidedly romance-free (on camera, anyway). The only romantic subplot ever was between the family dog and a one-episode canine character.
* Incest Subtext with her twin sister Mion, despite having a canon male love interest in Satoshi.
* Incest! The Musical there's a shot of this at the end, where the chemistry teacher uses it to pull the boy who draws phallic compound diagrams into a kiss.
* Incest! The Musical which occurs at prom, and flows easily into the Dance Party Ending. The film ends with the whole school dancing to "I Know It's Wrong."
* Incestuous Casting: A couple is played by actors who are related in real life.
* Incestuous Casting: A couple is played by actors who are related to each other in real life.

* Incest Yay Shipping: Fans ship characters who are related, especially twins.
* Incest Yay Shipping: People interpret some romantic chemistry between blood relatives.
* In "Chain of Command", Picard, Crusher, and Worf simulate storming a Cardassian base as preparation for the real thing. They program the holodeck to prepare for every eventuality, but in the field they still walk right into a trap.
* In "Chain Reaction", a body is stuffed inside a cello case (fortunately off-screen).
* In challenge maps/outside his story DLC, Red Hood's victims will be identified unconscious, and medics can revive them.
* In "Change Your Mind", the Crystal Gems recreate the campfire from the second opening at the end. The last shot of the series is the gang sitting together as Steven plays his ukulele.
* In "Chanson d'Ami" (Friend Song) sung by Zazie, the singer talks about how her relationship with one of her friends is purely platonic. Throughout most of the song, Zazie keeps telling her friend that this song isn't about her love for him, only about their friendship, with the chorus being (translated from French): "It's only a friend song; Friend, not love; It's only a friend song; I promise, not love; I don't love you; I like you." …until her friend meets another girl. The singer is obviously heartbroken but keeps denying her feelings for him. However, her real feelings become apparent in the last repeat of the chorus, when the following altered lines are sung: "It's only a song, I promise,

* In "Chaos Theory", the crew investigate a missing coed who eventually turns up dead. Although they uncover several other crimes along the way, the girl's death is actually an accident caused by a confluence of unlikely events. To make this even more dramatic, the coed's parents refuse to believe that her death was

* In chapter 17, Applejack meets a long-lost relative in the Packlands, who has learned to understand and follow their laws and way of life after an awkward start, to the point where she now considers herself a Packlander rather than an Equestrian. Part of this is because she's had trouble with ponies who outright refused to follow and respect these laws, and went out of their way to break them. When Slice n' Dice chose to stick with the new ways she'd learned, the other ponies lied to Slice n' Dice's family and the Equestrian border guard to make them think of her as a criminal; Applejack, who has a strong respect for the law and understands why Slice n' Dice would follow it, is disgusted with the ones who acted otherwise.

A blackout indeed happens (with a subsequent murder), and it's later revealed that Peko left her post to go to the bathroom. It's implied that the killer had slipped her laxatives and/or tampered with the circuit breaker in the room. Both of these are false trails; Peko's stomach problems were just a coincidence, and the killer never touched the circuit breaker (although the circuit breaker

* In Chapter 20, Ubbo-Sathala (which NERV was using as the source of LCL) awakens and breaks out of containment, overrunning much of the base, with the aid of the Rei clones that it mentally possesses. This eventually causes enough damage that the already destabilized Geofront caves in entirely, wiping out NERV HQ, with only the main characters and a few supporting ones escaping.
* In Chapter 21, a terrorist group invades NERV's German base, capturing several of the main characters.
* In Chapter 21, Chrom, Lucina and Robin reluctantly agree to meet with Validar, who has the one remaining gemstone for the Fire Emblem (or at least knows where it is). When Chrom asks about the gemstone, this exchange follows, which results in Validar springing the trap.
* In chapter 21, fifteen armed Kobra cultists rush towards Batman and Nightwing. They can't figure out why Batman is smiling.
* In chapter 21, it's revealed that Chrom went so far as to give Gangrel a proper burial after beheading him, in order to honor Emmeryn's legacy. Robin admits to Lucina that after everything Gangrel did, none of the other Shepherds would have done the same; he himself would have gladly mounted Gangrel's head on a pike and paraded it through Ylisstol.

The scene then cuts to a "certain silver haired Jonin" sneezing.
* In chapter 24 Shinji opens her eyes, finds Asuka is holding him as she sleeps and he -wrongly- thinks it is a dream, so he spends a long while gazing at her.
* In chapter 24 Shinji wakes up, sees a smiling Asuka sleeping in his arms and deduces he must be dreaming. When she opens her eyes he greets her warmly, tells he is going to make her breakfast in bed and maybe he will wash her back when she is showering, kisses her and leaves with a wink. Shortly after he realizes it was NOT a dream. And he freaks out.
* In Chapter 258 Rakan's flashback confirms above, and also shows that there is a sticking resemblance between the relationship that Negi's parents had and the one he shares with his partner, Asuna. Of course, this is only in reference to their relationships, as the personalities of the parties involved are sometimes totally opposite.
* In chapter 25—properly named "The Only Question That Ever Matters" after a long talk where Asuka opens up and talks to Shinji about her feelings of inadequacy, loneliness, self-hatred and abandonment… her lack of self-esteem, her doubts and her fears she dares to ask him what he feels for her:
* In Chapter 25, the vast majority of the crew has this reaction once they find out that Luffy has to win a
* In chapter 269, there is an example of this as it usually occurs in Western stories, a dramatic mutual confession between Nagi and Arika (Negi's parents), followed by a proposal of marriage, accepted. In a minor role reversal, Arika is the one who has trouble both
* In chapter 26 Dr. Shen says that the engineers, who had seen so much previously thought impossible, flipped out when the topic of invisibility devices was broached.
* In Chapter 26, Luffy and Zoro agree to let Ace inform Whitebeard of it.
* In Chapter 26, Tashigi tries to throw the Marines off the Strawhat Pirates' trail by sending them to Jaya... which is, in fact, their current location.
* In chapter 271 M.M. threatens to do this to Chrome. Chrome is on her way to deliver something to Mukuro and she encounters M.M. As soon as M.M. glances at Chrome she grabs her and yells at her before hitting her so hard that she falls to the ground, her mouth and nose bleeding. She then keeps calling her an "ugly bitch" and tells her: "The Mukuro-chan of this generation is mine! If you put your nasty little hands on him, I'll kill you!"
* In Chapter 27 (adopted in Episode 8), Moe attempts to take Ao away for
* In Chapter 27, after Cross consoles Nami for the events in Mock Town, resulting in her laughing and crying in euphoria, the heartfelt moment comes to an abrupt end when Luffy, Masira, and Shoujou begin singing. The mood then abruptly becomes "

* In Chapter 28, Cross does this after Isaiah, perching on Pierre's head while the latter is in his hybrid form, says "
* In Chapter 28, Cross writes down all of his relevant knowledge for the Skypiea arc, knowing that he won't be able to speak freely while Enel is around. He asks Robin to help him out because she's the one with experience in being discreet when one slip-up could mean death, because her powers will help him write faster...and because she'd just use said powers to peek at his notes anyway.
* In Chapter 28, Kyril reveals to Claudia about what he did before coming to Eostia, namely, spending a horrible amount of time killing off mobs of insane villagers and nearly dying, while seeing many people torn apart by beasts and other horrible things... which is exactly what the game is all about.
* In chapter 290, Damon mentions that bandit "conventions" were once a thing, but when you get too many crooks in one place, well,
* In Chapter 291, before Dabi can attack Endeavour and Shoto Todoroki,
* In chapter 298, Jellal trips and grabs Erza's breasts. They are both embarrassed but Erza accepts it was a mistake.
* In chapter 29, it's revealed that Haruko has an unexplained habit of ending up in other girls' beds and groping them
* In Chapter 2, a significant chunk of the Daily Life is dedicated to talking about the mysterious serial killer Sparkling Justice and then Sparkling Justice's calling card is found at the murder scene, clearly trying to invoke the Genocide Jack reveal from the first game. This turns out to be a classic fakeout; none of the students have any connection to Sparkling Justice, and after Chapter 2 Sparkling Justice is never mentioned in this game again and has no relevance to the plot whatsoever. Although, at the end of the second trial the killer (Peko) briefly
* In chapter 2 Asuka caught Shinji staring at Rei and was jealous... and then she wondered who was making her jealous:
* In chapter 2, Asuka sets eyes on Shinji for the first time, then rapidly looks away before he notices her staring.
* In chapter 2, Daolon Wong attacks Section 13 to steal the Talismans, and in the process gives Shendu the opening to summon his Ninja Khan, leading to a brief
* In Chapter 2 Hikari tells Shinji Asuka really likes him, but Shinji does not dare to believe her.
* In Chapter 2, Madison notices that Tara and Morgan seem to be a couple, and gets jealous. It's not that she wants to be with either one of them- Madison's experiment with a relationship with Tara didn't work out and she doesn't like Morgan at this point in the story- she's mainly jealous that they got into a relationship while she hasn't had much luck with love. She gets over this as she gets closer to Abigail, and sees how much Tara and Morgan love each other.
* In chapter 2, Misato calls Ritsuko to tell her that Asuka has collapsed and Shinji is examining her:
* In chapter 2 Misato reminds Shinji of his and Asuka first time and he blushes.
* In Chapter 2 of Book, question 69 simply says "LOL 69" with an arrow pointing to the question number to signify this even further. The question number must be pressed 69 times to proceed.
* In chapter 2 Shinji and Asuka kiss. After they have a long talk where they open up to each other and become a couple.
* In chapter 2 Shinji contemplates Asuka as she is sleeping, and he thinks she looks like an angel.
* In chapter 2 Shinji gets confused because Asuka called him "Shinji-kun" (in the proper series Asuka only called him “Shinji” twice: when she met him for first time and—quite interestingly—before their kiss).
* In chapter 2 the three pilots go to buy new clothes, Rei tries a new dress... and Shinji and Asuka can not take their eyes off her, noticing how the dress clung to her body and showed her curves. Asuka can not take her eyes off Shinji, noticing how yummy he looks when he wears nicer clothes:
* In Chapter 2, Tsunade hopes that Jiraiya can take care of baby Naruto while she takes a very much needed nap, but an ANBU informs her that Hiruzen requested Jiraiya's presence. When she remarks that fate must be conspiring against her, a

toddler in the Hyuga compound (most likely Neji) sneezes.
* In Chapter 30, most of the chapter is building up the expectation that Hitomi and Moji-sensei are going to have sex in the infirmary, but the thing that's "thicker and harder" than she thought it would be turns out to be his hair, which she was shaving for swim class.
* In Chapter 30, Shikamaru comments "I bet you will never see a man so obsessed with revenge" when Gaara announces he's planning to avenge Temari's defeat against Naruto. Cue Sasuke sneezing.
* In Chapter 30 when Luna reunites with Nike and Livius, she reveals she's just been put in an arranged marriage with the much older Marquis Claude Fortis. She decides to sabotage it by getting Nike to crossdress and
* In Chapter 31, Robin spits out the jerky she's chewing on when she realizes it came from Nami kissing her, who got it from kissing Cross.
* In Chapter 32, Sanji chokes on his cigarette when Cross tells him he's glad he's part secret agent.
* In chapter 331, Lucy gets magically stripped by a dragon and sent flying right into Natsu. After the initial shock, Natsu declares that he has no choice but to cover her up himself... and puts his hands on her bosom. Cue reaction punch from an already EXTREMELY embarrassed Lucy.
* In Chapter 33, Vice Admiral Jonathan does this when he realizes the full extent of the chaos the Straw Hat Pirates are capable of causing.
* In chapter 345 of the first year, one of Mack's professors gives the class a project that essentially amounts to wording a wish so that it can't be screwed with by a Literal Genie and then having them trade to twist the
* In Chapter 35, after gaining knowledge on future techniques and other info that they can use to get stronger from Cross, they enter another one: Zoro perfects the Nine Sword Style: Asura technique and works on Iron Body; Sanji works on Diable Jambe, Tempest Kick, Moonwalk, and Shave; Conis figures out just how much of a
* In Chapter 35, Pluto is helping the Plant Department to design a "carnivorous plant that eats something other than insects". She gets stuck with the project until Mercury and Jupiter's own "useless animal" project uses her plant prototype as a toilet, inspiring the trio to create a symbiotic relationship where the "useless" animal is beneficial to a poop-eating plant by being so lazy it simply craps into the plant it's eating off of.
* In chapter 37 Shinji and Asuka are showering together and Shinji asks: “I’m not dreaming, am I?”
* In chapter 39, Aya and Garrus can't believe the talk of psychic powers.
* In Chapter 39, during the standoff between CP9 and the Straw-Hats, Kumadori wonders if Cross would give him an autograph if he asked. Fukuro promptly
* In chapter 39 of the original story, Fluttershy whispered something to Page. In chapter 10 of this story, Page shares what she said with the rest of the group:
* In chapter 3: after Asuka says she'll be keeping an eye on him, Shinji throws an aside glance and wonders: "Why can't a normal, well-adjusted girl ever say that to me...?"
* In Chapter 3, during the airship ride, Vlad needs to leave the ship somehow for the story to make sense. So, they put in Vlad just jumping off the ship as a joke and placeholder. Everyone was so amused by this that it stuck.
* In Chapter 3, Mariko and Ayumi destroy the boys' reputations as cool boyfriend-material types by taping up a photo of them in
* In Chapter 3, Morgan tries to get her cat Geladura off her bed so Tara can lie down on it, only for Geladura to say, "There's plenty of room on the floor, you know." What Geladura says is less important than her confirming that she can, in fact, talk, as Morgan had insisted.
* In chapter 3, Rei participates for the first time to a physical activity with Shinji and Asuka that leaves the three of them sweating (
* In chapter 3 shows up an Angel made up by the writer. It is based on Sahaquiel: it is an enormous, floating, heavy thing that plummets downward and tries to crush Tokyo-3 under its weight.
* In Chapter 3, the guards discover that you used the secret passage in the House

of Blossoms just after you get the book you came for.
* In Chapter 3, the main characters rescue an Aerodactly named Aeron. Aeron later shows up again in Chapter 57 to return the favor by giving Blitz and his teammates a ride to Wyvern Island after one of the Axis Tower crystals is found there.
* In chapter 3, we get several: The sink where Jimin is desperately washing his hands is starting to fill with
* In Chapter 3, Welkin's unit is ordered to retake the critical Great Vasel Bridge from the East Europan army. A frontal assault on the near bank would be suicide, so
* In Chapter 3 when fiends are pouring out of the temples, the Gullwings suggest charging in exchange for helping get rid of them. Yet the player never gets any Gil for stopping the fiends.
* In chapter 3 when she climbed into his bed alleging the couch was uncomfortable.
* In Chapter 3, Wind Breaker admits to Page about his previous meeting with Diamond Back and the other griffon's love confession. Diamond Back himself reappears in Chapter 13 and inadvertently reveals the same thing to Night Blade, resulting in some lighthearted but non-malicious teasing (aimed at Wind Breaker) from him.
* In Chapter 3, with the help of the Bounty Hunter, the Sith Empire has managed to convince the entire Corellian Council, including the Prime Minister, to join them with the promise of making their elected offices
* In Chapter 409, Naruto gets "reverse-summoned" (which itself sees some more use later on) to Myobokuzan by one of his own summons, who is lounging there with other frog summons. Fukusaku says that Myobokuzan is "a month's journey from Konoha on foot". So the summons live in distant areas of the Ninja Continent, not in their own pocket realities.
* In Chapter 40, the battle between the Enies Lobby garrison and Galley-La, the Franky Family, the giants and the TDWS pauses when Nami,
* In Chapter 41, Carue states this verbatim when he realizes that Funkfreed isn't a

* In Chapter 44, the Guardians of the Galaxy- currently working as bounty hunters in the
* In chapter 45 Doctor Strange brings back Sif, who'd had her heart ripped out and Harry Dresden, who'd used his Death Curse to launch Gravemoss halfway into orbit. He's also implied to have saved/resurrected Coulson.
* In chapter 46 Ferid drives up in his car and holds out his hand to Mika and Yuu, with a flirtatious look and teasingly saying "I heard you two were being attacked by a dangerous vampire so I came to your rescue. Come take a ride with me. I'll save you." He plays mind games with Yuu and Mika throughout the chapter, and when Yuu turns into a demon to attack Ferid for showing them Akane's head Ferid tells Mika he's "worried for the poor guy (Yuu)" because he says Yuu could turn into a full demon. He states he has an antidote to cure Yuu and tells Shinoa "Let us go rescue dear Yuu." Mika is adamant to keep Ferid from getting near Yuu and says "I won't let you have your way with him!" Ferid smiles and says he just wants to help

Yuu. Mika says he's not going to let Ferid touch him. Crowley engages Mika in a fight while Ferid states cheerfully "Now precious Yuu is all mine." Ferid approaches Yuu and blushes, saying "Wow! Haven't you grown into the cute one!! Your demon is on the verge of rampage yet you still have such clear and beautiful eyes. No wonder you are the extra special guinea pig." He then lifts Yuu's face by his chin and gets close saying "Perhaps before I heal you I'll take a little sip of your blood."
* In chapter 47, Asahi is really about to confess this time, but Youko panics and cuts him with a
* In Chapter 47 of the main story, while taking a break from the Indigo League matches, Ash and Misty decide to hang out together in a street full of game stands to win prizes. They vehemently deny that it was a date, but their companions seem to think otherwise.

* In chapter 4, Stella asks Santos to deliver a letter to a friend of hers who lives in Silver Woods. As Stella starts to realize what is really going on, we see her frequently communicating with said friend via letters regarding the events of the plot. Stella's pen pal is eventually revealed to be a Mismagius named Samara,
* In Chapter 4, Taylor Armstrong relates something odd she saw in the night. The flashback looks like high-detail chalk art, compared to the more three-dimensional and full-color style normal to the comic. This is meant to convey Taylor's personality.
* In Chapter 4 the characters enter a virtual-reality world, using high-tech VR headsets. Miu speculates that if someone connected their VR headset wrong, they might "body swap with someone". After a murder happens in the virtual world, this throwaway line seems to hint that body-swap shenanigans are in play, e.g. the murderer body-swapping with the victim or something like that. Nothing like this happens, however (although the solution
* In Chapter 4, the guard barges through the door the instant you get the Keep's blueprints.
* In chapter 4 there's mention of how some of the murders have been very similar to the events of the previous game, there's a statue of Sakura in the building and the person who died, Nekomaru, was a figure who cared about the others. From this and some of the oddities of his death the player can easily be led to think that his death was a mirror of Sakura's, where he killed himself to help the group. Though helping the group was
* In Chapter 4 "Time Out" the Mandrill's soldiers wear armor based on SHIELD's Mandroid armor.

* In chapter 60 of the sequel, Harry does much the same (with father and godmother) after cracking under a

* In chapter 60 of the sequel, Strange gives them a cure he'd rather easily mixed up, allowing them to make Clark a big brother if and when they wish to. As he explains, Clark is now more independent, so he requires less constant attention (meaning that any other child wouldn't be neglected). Jonathan, cynically, asks why he didn't try and use it to buy them off in the first place. The answer? "If you had needed paying, you would not have been worth the price."
* In Chapter 613 the Ten-Tails completely revives and is very reminiscent of a familiar
* In Chapter 61, after letting slip to Koala and Boa Sandersonia that the Straw Hats were going to be scattered, he warned them not to say a word about it, or he'd tell Dragon and Hancock about

* In "Charmed & Dangerous" Piper makes a potion to replicate her exploding power. She remarks that when it turns purple, it's a mark of how strong it is.
* In "Charmed, I'm Sure", Ben as Swampfire gets dog piled by Mutant Pumpkins only to miraculously fight them off.
* In Chase's route on Wildfire's side, boy meets girl, boy asks out girl, girl bluntly turns him down. Girl sees another boy, girl wants to tap that boy, girl decides to make him jealous by going out with the first boy. Girl later beats up boy's brother and lies about it to boy. Girl's best friend tries to break them up by attempting to rape boy. Girl kicks her best friend's butt.
* In "Chasing Bobby", Hank gets very emotional about his aging pickup truck "dying" and even starts crying when he finds he's having trouble starting up the engine (what makes it even funnier is how Hank isn't very emotional when it comes to people but is consistently very much so with inanimate objects that mean a lot to him).
* In "Checkmate", Oliver actually denies that his costume is "tights" twice.
* In "Cheers For Fears", Candace says she loves the giant scrapbook for Jeremy, leading her to say, "I love it, I love it, I love it, I love it, I love it, I love it, I love it, I love it, I love it..."
* In "Cheer Up, Candace", Doofenshmirtz introduces his army of evil robot duplicates of Perry with the following:

* In "Cheeseburger Backpack", co-developer (and storyboard artist for this episode) Ian Jones-Quartey voices Steven's Mr. Queasy doll.
* In "Cheeseburger Backpack", the Gems are careful to mention how many of Steven's ideas worked along their trip to the Lunar Sea Spire, conveniently seeming confused or frustrated at every challenge, only for Steven to find a creative solution. Tellingly, Pearl is oddly dismissive of the fact that their apparent goal of restoring the statue to the spire is brushed off as unimportant. Half a season later,
* In "Chef Aid", the officers who arrest Chef hit him with their batons.
* In chemistry, a brief fanning towards your nose is the recommended procedure if you need to smell something, versus shoving your schnoz directly into the beaker which can deck you. However, this should only be done if you have a reasonable expectation of the chemical, so you know what you're smelling is not (excessively) toxic. Smelling

* In "Chew on This", for a brief moment during Adam's visit to Nurse Gazelle's

office, we can see Nurse Gazelle removing a rectal thermometer from Adam's butt. Also in hindsight, Gazelle had no reason to do that, since Adam only saw her because he felt light headed.
* In "Chez Platypus", Doofenshmirtz reinforces the lock on his door, but not the door itself, so when Perry goes to kick it down, he gets his foot stuck in the hole he made.
* Inch High, Private Eye featured robbers who left counterfeit money, including counterfeit coins, in place of the real money they stole.
* Inch High, Private Eye goes into a mousehole and meets a mouse bigger than he is. He backs up and his trenchcoat trips a mousetrap; the mouse snickers at him.
* Inch High, Private Eye has the title character on the surface of a pinball machine chased around by a pinball.
* Inch High, Private Eye loves this trope for some odd reason, taking it so far, that sometimes, the main villain of the episode turns out to be one. Nobody seems to question where the robot came from or who built it.
* Inch High, Private Eye - right there in the title, one of several 1970s Hanna Barbera mystery solving cartoons.
* Inch High, Private Eye: The end of the opening titles has Inch High, plummeting to the ground, blowing up a balloon that manages to keep him airborne.
* Inch High, Private Eye, then they would drive off to their next case.

* In Chie's Social Link, one of Chie's old friends, Takeshi, is infatuated with Yukiko. At Rank 8, he complains to her about how Yukiko had a "funky laugh" the last time he saw her, and points out that he thinks she "was better off gloomy." Chie points out that's how Yukiko naturally is, and it's subtly indicated that
* In "Child Abduction Is Not Funny", the residents of South Park ask Mr. Kim (owner of the local Chinese restaurant, City Wok) to build a wall to keep out child abductors. After complaining at length he's "not a stereotype", Mr. Kim builds it anyway. And spends the rest of the episode defending it from a band of Mongolians.
* In Child Ballad 169 "Johnnie Armstrong", he and his band are lured to court with a promise of safe conduct. He asks for a pardon. Instead the king treacherously tries to arrest them.
* In Child Ballad 182 "The Laird o Logie", May Margaret pleads for a pardon for Young Logie (or Ochiltrie). She fails but falsifies one and frees him.
* In "Child Fearing", Buttercup caps off a verbose and loquacious summary of Napoleon Bonaparte's life by calling Mojo Jojo "stupid".
* In "Children of Light", MacGyver creates a zip line to escape from the roof of a building using a steel shaft from a large TV antenna and a large rope. He ties one end of the rope to the building and throws the other end to Pete Thornton who ties it to the bumper of his van. Pete then gets the driver to move the van forward in order to tighten the line. Meanwhile Mac bends the shaft of the TV antenna into the shape of a hook and uses his jacket to protect his hand from the friction, and proceeds to slide down the line with another person (whom he was trying to free

from the building).
* In "Children of the Force," Obi-Wan and Mace Windu have to dive beneath a closing door to escape. Mace drops his lightsaber and has to use the Force to pull it back just before the door slams shut.
* In "Children of the Gods", they correctly portray a rocket launcher as having next to no recoil.
* In "Children of the Jedi", another character went through a similar process to save his life from an incurable disease. He later mentions that, apart from his hands, he has no real sense of touch. Also, all his memories have been converted to information. When remembering a picnic, he knows things like the color of the cloth, or what food they had, but it's just a text file, he can't visualize the memory. C-3P0 notes, though, that he can still do things no true droid can do, like make guesses, or eyeball measurements.

* In Chile, a security guard at a chemical plant wanted to check if the white powder in a plastic cup was sugar or salt, but it turned out to be Caustic Soda. He suffered severe burns but managed to survive, although for several months he could not eat anything solid. This was a serious case of negligence on the part of the company, since caustic soda should never be placed in a plastic cup, much less without being properly labeled.
* In Chile in any supermarket or store, every product will end with 9. For example a chocolate bar might cost 799 Pesos. Sometimes is common to see with 49 with smaller products. And with more expensive products wil be with 990. This is mostly for taxes. But that also brought the problem with the "1 peso" Coin, in supermarkets they insist if you will donate that peso or more to charity just to round up your change. And the fact that no one can buy anything with "1 peso" coins anywhere. In most places they reject those coins saying that those have any value at all.

* In China it's considered the "Mandate of Heaven" that eventually a dynasty will become corrupt, break down into warring states, and be reunified into a new dynasty

due to the cycle repeating itself for 4000 years. This was of course very convenient, as it both gave justification for imperial rule (Heaven favors this person to run the country) while also justifying revolt and rebellion through explaining the corruption that dynasties inevitably suffer over time. This historical pattern happened to them so frequently that it became

* In China, over 200 cities share a name with the prefecture they belong to. What's worse is that they (as the prefecture capital) divide themselves into districts (each district is on the same level as the counties), and all-city institutions are combined with prefecture governments—so the prefecture is called "prefecture-level city" despite it being 10-1000 times larger than urban area of the central city, creating confusion even among locals.
* In China, the classical image of a ghost is a young woman whose face is covered by long black hair, who dies due to misfortune, then comes back for revenge.
* In China, there have even been companies set up that do nothing but copy name-brand phones. Underground "shanzhai" firms are known to be extremely proficient at copying the externals of Nokia phones and those of other manufacturers, although the internals and interface are often based on off-the-shelf parts. A well-publicised example of this is Goophone, who made headlines after
* In China, the southern Song Dynasty actually held out against the Mongols until the Battle of Xiangyang in 1273, when the Mongol Empire had expanded all the way into Eastern Europe and the Middle East. It helped that the Song kept a standing, professional army rather than a feudal levy, making it a case of Soldiers vs. Soldiers.
* In China, those a few years older than you will be called "jie" (older sister) or "ge" (older brother) unless names are used. Those considered old enough to be your parents will be called "ah yi" (aunt) or "shu shu" (uncle), and those old enough to be your grandparents are called "nai nai" (grandmother) or "ye ye" (grandfather).

* In Christian traditions going back at least to the Middle Ages, Mary Magdelene was identified both with the nameless prostitute who anointed Jesus' feet in Luke 6, as well as Mary of Bethany, who also anoints Jesus' feet at one point. There are various reasons for the former connection: the story of the prostitute is followed by a discussion of Mary, and she is described as having "devils" exorcised from her. She was the traditional symbol of a repentant sinner, but the Catholic Church has dropped this association in recent years.

It baffled a
* Incidentally, Penske's NASCAR teams also had trouble winning both the championship and the Daytona 500 for much of their early existence, despite fielding former champions Rusty Wallace and Kurt Busch in the flagship #2 car. Busch himself was widely considered the best restrictor plate racer to have never actually won a restrictor plate race (at Daytona or Talladega) until breaking through the 2017 Daytona 500 with Stewart-Haas; however, at least one of his close calls came because he was helping Penske's second team, the #12 of Ryan Newman, break through to win the 2008 Daytona 500. Later, they'd shed the championship curse after Brad Keselowski was put in the #2, with Bad Brad winning the Sprint Cup in 2012, and then scored another Daytona 500 in 2015 with the second car, now numbered 22 and driven by Joey Logano; he would bring home Penske's second Cup championship in 2018 despite being regarded as a long shot compared to the other finalists at Homestead.

* Incidentally the original writers of Dark Sun didn't even know what was true or propaganda. As such the original campaign setting's lore was superseded by the Prism Petad books by Troy Denning. Which revealed the truth about the Sorcerer-Kings, the History of Athas, and why Halflings have a lot in common with Shadow Giants.
* Incidentally, the polka medleys themselves are an example of this trope. A lot of us probably don't remember Stars on 45, a Dutch novelty act which created song medleys set to disco. Al took the concept, only he set the medley to polka music instead with "Polkas On 45". While Stars on 45 is largely forgotten, Al continues to feature polka medleys on each of his albums (except "Even Worse" and arguably "Alapalooza", where instead of a medley he did a polka cover of Queen's "Bohemian Rhapsody").

* Incidentally, this tale has a lot of surface-level similarity to the Mongol epic of Jangar Khaan, who likewise was born from a bloody sac birthed by his mother that was all but impenetrable until his father, Dorzh Khaan, took out an ancestral sword and hacked him out of it. When he's born, he's ferociously strong and ill-tempered and has a blood clot in his hand — the traditional Mongol sign that he will "walk with death" — which terrifies his mother but delights his warlike father. He then grows at a prodigious pace until, at the age of three, he more or less leads his tribe to the complete decimation of various Chinese kingdoms to avenge his father's death. Which he does by sneaking into an impenetrable fortress and breaking the enemy king's legs, then his arms, then his ribs, then his spine, and then, finally, his neck. This may indicate that Ne Zha was influenced by Jangar as the latter is almost assuredly much older.

* Incidentally, this was actually the second game in this Packers playoff season to end like this: two weeks earlier in Philadelphia, Packers cornerback Tramon Williams had a game-saving endzone interception with less than a minute left to play. (The game in between these two, however, was an aversion; Green Bay blew out the Atlanta Falcons 48-21, so their victory was pretty well assured long before the final snap.)
* Incidentally, this was lampshaded by director Andrew Stanton in the DVD commentary, who acknowledged that Pixar loves emphasizing the theme of teamwork in the climaxes of their films.
* Incidentally, this was not something the film writers made up; it actually happened during the real life Apollo 13 mission (the note thing, not the jettisoning).
* Incidentally, you can actually buy that patch on their official website.
* incidental music a Restoration tragedy by Aphra Behn, is much more famous than the play it was originally composed for, which has fallen into obscurity.
* Incident At Loch Ness it is (or seems to be) a genuine documentary at the beginning of the film; where it crosses into fiction is debatable. The conceit of a genuine documentary is held on to the bitter end (the DVD even includes "commentary" by Zak Penn as he interviews a series of people and discusses the bad blood between himself and Herzog due to events in the film).
* Incident At Loch Ness. It's a remake of/tribute to Herzog's classic films that stars Herzog himself, with directing a film as his disastrous quest.
* Incident At Ravens Gate, aliens invade a small town in South Australia.

* includes this, although what this actually means as far as Celestia's status remains a mystery through AT LEAST halfway through chapter two.
* including a fairly lurid threesome with a married couple rated 15 by the BBFC; all of the other episodes are either rated PG or 12.
* including a family who had to walk along the motorway to Heathrow just so that they could get to their plane in time for their vacation.
* including a Human woman who not only married a literal Cat person, with a complete coat of fur, but actually gave birth to a litter of kittens. And the cat person finds it odd that the two Humans who live next door are an elderly lesbian couple.
* Including a parrot who had lived for several years in a care home for elderly people in Glasgow. After it was re-homed, its new owner took it to the vets saying it was sick, it seemed to be constantly coughing and grizzling with discomfort... (of course a genuinely sick parrot wouldn't cough like a human anyway...)
* Including at least three instances where the same gag was used twice only one year apart. One is at the top of the page; another was a gag where Garfield is in such a hurry to get to a cup of hot chocolate that he stands on Odie. The third one was Jon giving Garfield a new cat food that was rich in fiber, only for Garfield to pull a sweater out of his dish.

* In "Cody's Sister!", Cody is revealed to have a twin sister named Katy. Katy wears a pink shirt and hat while her brother wears a blue shirt and hat.
* In "Cody's Sister!", Cody's twin sister, Katy, owns a Barbie doll, much like how her brother owns a Ken doll. Katy hasn't even taken her Barbie doll out of its box, though.
* In "Cody the Magician!", Bowser Junior shoves Cody's 6 of Clubs card up his ass after Cody tells him to do it.
* In "Cody The Magician!", when Bowser Junior and Joseph repeatedly misunderstand Cody's card trick, a frustrated Cody tells them to do anything other than show him or tell him what it is. Junior takes the 6 of Clubs card and flushes it down the toilet, but it gets stuck in the hole. When Junior gets back to Cody, Cody somehow has the 6 of Clubs card with him.
* In "Coerced", a schizophrenic man kidnapps a child, kills one man, and injures another, but it all comes back to the fact that he genuinely believes the kid is his son and that the other people were trying to take the kid away to hurt him. What's more, he had at one point achieved a stabilized mental condition through medication, but the group home he had been living in had cut him off his medication and kicked him out because he had seen them kill another resident through negligence and then stage her death as a suicide, and they wanted to ensure that he wouldn't be believed if he tried to report it. In the end, the schizophrenic man is sent to a treatment facility rather than prison, and the group home staff are charged with the crimes he committed as a result of their actions.

* In College Basketball March 26, 2006. University of Connecticut, a team with 6 players that would be drafted in the NBA, a 1 seed in their bracket in the NCAA tournament, and the odds-on favorite to win the whole thing, takes on George Mason, a school that had only 3 tournament appearances before the 2006 tournament. The Patriots, no relation to the cheaters from New England mind you, shock everyone with an 86-84 overtime victory, sending them to the Final Four and UConn players to the coldness of the NBA.
* In college basketball, the NCAA men's and women's tournaments are a subversion of this trope, given that besides the usual powerhouses, different teams tend to appear every other year. One exception is Arizona, one of the recent men's teams with a notable tournament streak; 25 straight appearances (until 2010). In fact, one of the attractions to March Madness is that it's incredibly, exceedingly difficult for one team to make it to the Final Four two years in a row. On the women's side, however, that is not exactly the case with UConn, Notre Dame, Tennessee, Baylor, and Stanford. Any one of the five (if not two or three) is a safe bet to reach the Final Four year in and year out.
* In college dormitories where this trope still applies (usually older ones), people sometimes yell "flushing!" if they hear someone in the shower, so the person in the shower knows to get out of the way of the scalding/freezing water for a few seconds until the system clears.
* In college Football September, 1 2007 Appalachian State (a Division I-AA school) defeated #5 ranked Michigan.
* In college football, the annual University of Miami vs. Florida State University games have been among the most heated, competitive and exciting of any given year. In 2001, after a relatively disappointing 2000 season in which they considered themselves robbed of a chance to play for the national championship in spite of their 11-1 record, undefeated #2 Miami went to Doak Campbell Stadium to face #14 Florida State, the defending champions and the team chosen to play for the title in Miami's place. Miami's star defensive player Ed Reed plays the first half injured. At half-time, Miami leads 21-13, but isn't showing the level of play its coach and players expect from themselves. Coach Larry Coker, gives them an encouraging locker-room speech. Afterwards, with Reed refusing to be taken out, and heading to the tunnel for the second half, he is approached by another player who asked him if he was alright.

* Incompatible Orientation: Differing sexual orientation prevents romantic affections from being returned.
* Incompatible Orientation makes a physical consummation even less likely, Renly being rather more fond of Brienne's fellow Rainbow Guard Ser Loras than either Brienne or his own wife, not to mention Renly being one of the most handsome men in the realm and Brienne being one of the most homely women. Regardless, it being the only way for her to be close to him, Brienne puts on the armor of a knight, wins a tourney and is awarded a spot in his personal bodyguard, and pledges to fight and die for him.

* incompetent GM Isiah Thomas ran the Knicks to the ground, in 2011-12 the team saw a resurgence that still fell short as rising star Jeremy Lin had to sit out the rest of the season and the playoffs due to a knee injury in late March 2012. A month later, the Knicks would lose to the Heat in their first playoff round in 5 games. When they took 54 wins in 2013, and their first division championship in over ten years, they were knocked out in spectacular fashion by the Pacers in the Semifinals. The following season, despite stellar performances by Carmelo Anthony, the Knicks lost frequently, and a late-season resurgence fell short as they still got one game behind the final playoff spot. In 2014, the Knicks finally hit rock bottom by going on a losing streak that ended up being the longest in franchise history and finishing last overall. Only in 2021 the Knicks finally had a good team that went to the postseason... that lasted just five games.

* incomplete autobiography, Neal Cassady casually relates three episodes from his childhood and the lessons he learned from them. One was about thawing frozen hands with cold water rather than hot, the second was about using the bathroom, and the third was about how he just barely escaped being raped by a strange man on the way home from school by attacking him and running for his life. Much of the book reads like this, actually, with casual unexamined inserts about poverty and abuse slipped in between detailed descriptions of places and people he knew.

* In Computer Science, a value that's used literally inside of a block of code instead of assigned to a variable first is referred to as a "Magic Number". These are considered harmful as it makes it very difficult to determine what the number represents, or if it's supposed to be used elsewhere in the program. Therefore, good programs should have as little "magic" as possible.
* In computer science, improving algorithms can cause a laptop being able to outperform a vast cluster of super-computers in certain applications. No matter how much power you have, no matter how much you optimize the code, a better algorithm will always outperform a brute force one.
* In computer science, this is sometimes known as "picket fence" security. Even if there is a single password that is well known to everyone on the network, and it would not stop anyone who wanted to break in from doing so, the presence of security all by itself will keep people out due to simple respect. Such security systems are so named because it's like using a picket fence as protection for a house. It isn't going to stop anyone who really wants to break in; it's just there to indicate that access isn't freely allowed.
* In computing, a "Trojan horse" or more simply "trojan" is a virus that disguises itself as an innocuous program and sneaks past anti-virus programs to infect computers. They don't self-replicate, but are harder to spot and can royally mess up infected computers.

* In conference games where one team is expected to (and does) get a win by a large margin, coaches will often leave their starters and top substitutes in the game, or in the very least use their signature offensive and defensive plays, only long enough to gain command of the contest. Unlike professional wrestling, the coaches will often use reserves or, short of that, try out new offenses or work on skills they need to work on or fine tune before playing a better opponent.
* In Confessions of a Master Jewel Thief, Bill Mason mentions that in his first real crime his partner was caught. While the police didn't have any real evidence against him, his partner was on parole. The DA told Bill that if Bill confessed the partner would go clear but if Bill took it to court it would lead to the DA revoking his partner's parole. Bill's lesson here: never use a partner. He was never caught later.
* In "Confessions of the Master" by amalcolm1, Watson's war wound starts to act up more as he gets into his twilight years, and he finds that staying in the same position for any amount of time tends to cause pain. * In Conquest Born, Anzha, is a starship captain and telepath who comes from a race with an deliberately low libido. However, she is a perfect storm of recessive traits and one of the many ways she differs is her normal-to-elevated sex drive. She makes it to a sexually frustrated maturity before discovering that her problems in the bedroom are much worse than she imagined. Telepaths have conditioning instilled in their minds as a means of control, and part of hers involuntarily burns out the brains of her partners when she's turned on, making it impossible to actually consummate.
* In Conquest Born, can get a military command position, the one thing she wants most, if she succeeds at a feat on behalf of her government - a months-long trek across the ice-plains of a planet that's proving diplomatically difficult. While low temperatures and monotonous scenery are nothing to scoff at, Anzha is a signularly driven person and a little frostbite or madness won't get her down. However, the sentient, pack-hunting glacial predators give her a run for her money.

* Inconstant Moon, by Larry Niven, involves an unusually bright full moon. The protagonists work out that it must be caused by an unusually large amount of sunlight being reflected back, and that either the whole Earth is about to be destroyed by the Sun going nova, or at least the side of Earth facing the Sun has been (with bad side effects for everyone else anyway).
* Inconstant Moon: The protagonist initially believes that the sun has gone nova and the world is going to end, but realizes that that can't be the case or it would have finished ending already. Instead, the solar flare just killed everything on the side of the planet facing it.

* In Cool Hand Peter, the gang is arrested on a trip to the South by a corrupt super-racist sheriff who frames them for a broken tail light and drug possession because Cleaveland and Joe showed more integrity than Peter (who was being an asshole but was ignored by the sheriff for being white and healthy). The prison camp they're in is mainly run by the police, and only gives 19th-century technology to the prison workers. Soon after, they brutalize Cleaveland two times after Peter continues to insult them (and whack Peter in the gut for a third). And after they've served their time, the warden extends their sentence indefinitely and responds to their escape with shoot-to-kill orders extending to the police. By the end of the episode, Joe has had enough and brutalizes the Sheriff with the same methods to make it clear that his usual tactics make him a thug hiding behind a badge.
* In "Cool Things", Homestar buys a pair of "cool shades" from Bubs but stashes them inside a can of yellow paint before wearing them. * In Corridor Digital's video Lightsabers FOR MEN, Sam tries to sell the viewer manly lightsabers, such as cammoflage colored or lightsabers made of bacon. Commenters pointed out that one of them, an invisible lightsaber named "The Sealth Saber" already exists in Star Wars lore.
* Incorruptible like the Plutonian (before he went evil), and Max figured he might as well step up and fill the void.
* Incorruptible Pure Pureness: A character who is so honest and good that it is impossible for them to go bad.
* Incorruptible Pure Pureness: A character who is so nice and good-natured it is impossible for them to go bad.
* Incorruptible Pure Pureness, and is the light of his family's lives. When his hopes of finding a Golden Ticket fade and he falls into a blue funk, the change deeply troubles his loved ones.
* Incorruptible Pure Pureness: Character is incapable of being corrupted by the world's evil.
* Incorruptible Pure Pureness: Hold your ideals and never give in to corruption.
* Incorruptible Pure Pureness, including—but not limited to—sex.
* Incorruptible Pure Pureness, the first robot able to think and make decisions of his own accord, is created.
* Incorruptible Pure Pureness: The hero who is morally pure and is immune to temptation.
* Incorruptible Pure Pureness, the "relationship" doesn't last that long—and Regina is pretty asexual for most of the time. Meanwhile, Mary Margaret has no problem having a one night stand with Dr Whale or pursuing a married man.
* Incorruptible Pure Pureness. They'll still play dirty if it comes to that.
* Incorruptible Pure Pureness: You are incapable of being tainted by evil.
* Incorruptibly Purely Pure don't actually count for this trope despite the name since they were Lex Luthor's idea. Nice job creating your own enemies, Lex.

* In "Countdown", the Federation have hidden a solium bomb that will kill everyone on the planet with radiation poisoning if they rebel. The rebels attempt to seize the control room before it's activated but fail, and the plot involves a
* In "Countdown to Terror", a bomb maker named Omar Fellawi purposely fails to follow the "usual conventions" for wiring a bomb. Frank becomes the resident available expert on disarming Fellawi-made bombs by sheer dint of the fact that he's successfully done it a couple of times already in the book.
* In "Counterfeit Reality", the Secret Service agent working the case is Don's ex-fiancee from Albuquerque. Since it's still early in the series, it's more of this to Charlie (who didn't even realize Don had been seriously involved with anyone) than to the audience.

* In "Courage in the Big Stinkin' City", Eustace has his skin and flesh eaten offscreen by an unseen creature living in the wall of a motel room. He's more concerned about not being able to find anything good on TV.
* In "Courage of a Conviction", Erskine and Jim are sticking pins in a map to mark all the locations where a notorious forger has passed forged cheques. Jim comments that the only connection he can see is that they are all major cites. Erskine says that he is certain there is something they are missing. Jim replies "Well, you play your hunch and I'll play mine. That's what makes a horse race". At that Erskine suddenly realises that all the cities marked have major race tracks and, on checking the dates the bad cheques were passed, learns the cheques were all passed around the date of major horse races at those tracks, and deduces that the forger is a gambler who follows the big money horse races round the country.
* In "Coushatta," as part of his scam with Kim to pressure the ADA into agreeing to a lenient plea deal for Huell, Jimmy and his camera crew set up a series of drop phones in the back of the nail salon. While he's setting up, Ms. Nguyen thinks Jimmy's been kicked out by Kim, pours him a glass of alcohol and urges him to take her out to a nice restaurant to make up with her. * In Creation, this trope is one reason for the creation of the moon and Luna, its goddess. The Unconquered Sun's eternal presence in the sky stunted life and caused it to burn up in emulation of him, so night was created to give both the Unconquered Sun and Creation rest, and the moon and Luna were created to be night's guardian.
* incredible badasses, one and all. While the Valerians fit the larger type, the d'Alemberts are the short and stocky variant.
* Incredible Crash Dummies aside. And as they were crash dummies, dismemberment was not unheard of, and in fact was quite frequent, showing just how bad a crash could in fact be.
* Incredible Crew has the Shorts and Spoons Superstore which sells only shorts and spoons ("No pants! No forks! And you have to buy one of each!")
* Incredible Crew: In one sketch, Shauna was whacked by an elephant's trunk and struck by lightning. In another, she breathed fire during a spelling bee and ran away. In one sketch, Chanelle had her tongue pinched by a lobster at a party. In another, and during the same spelling bee as Shauna's, Chanelle cartoonishly inflated like a balloon and flew away.
* Incredible Crew: In one skit, Tristin gives himself an atomic wedgie for bumping into Jeremy.
* Incredible Crisis. Despite being an average-looking Japanese housewife, she manages to dodge heavily-armed bank robbers on a snowboard, then pilots a fighter jet into battle with a giant rampaging teddy bear.
* Incredible Crisis different games for each level — except one, which is replayed for three of the four characters. (Arguably, it's the most annoying of all the levels to have to play again.)
* Incredible Crisis father, the housewife, the pudgy son and the teenage daughter) trying to get home for Grandmother's birthday, only for each to be caught up in their own series of bizarre situations.

* Incredible Crisis has Ririka trying to sneak out of class, trying to avoid the wrath of her hot-headed, chalk-chucking teacher.
* Incredible Dracula 2: The Last Call has a general with about fifty, to the point where it looks like he has a crazy quilt on his chest.
* Incredible Dracula: Chasing Love is to help Dracula escape from a short, fat, scraggly-haired human princess with different-sized eyes who misrepresented herself on the magical online dating service he patronized.
* incredible expense of having UAVs follow everyone around, it is obviously legal; per the laws of the United States (and indeed, virtually all countries), airspace beyond what you use is considered public airspace, and open to be used by anyone with a permit to operate a flying vehicle - otherwise, airplanes couldn't fly across the country. Likewise, people are free to take pictures from public spaces, otherwise things like Google Street View (or taking pictures anywhere outside of your home) would be illegal.
* incredible (from her perspective). Eleven decides to accessorize with an impeccable top hat and tails tuxedo for the occasion while wildly gesticulating with a cane. It's absolutely incredible.
* Incredible Hercules had Phobos showing Pluto his worst fear: care bears and My Little Ponies... then he threatened to bring on the children's rock band. Pluto cracked.
* Incredible Hercules: Phobos, god of fear, coerces Pluto to open a portal to his realm for him by showing him the most horrifying thing he could ever imagine: Cuddly ponies and teddy bears.
* Incredible Hercules: Two different explanations have been provided in the comics for the use of his Roman name when everything else is drawn from the Greek myths. The first was that Herakles is his real name and Hercules is his "superhero" name, since that name is more familiar to Americans. This was later retconned into his having changed his name to distance himself from his stepmother Hera (since Herakles means "Glory of Hera").
* Incredible Hulk (6'7) is only chest height to him. Some artist's renditions of the Hulk are capable and actually have held love interests clasped between his hands.
* Incredible Hulk, albeit for somewhat different reasons. (Most of the time, She-Hulk is in control of whether she appears as Walters or She-Hulk; for a while, she appeared as She-Hulk pretty much all of the time, and once became locked in that form (a development that didn't bother her in the least).)
* Incredible Hulk and falls to the ground defeated... and then hears Betty standing behind him with a suitcase.
* Incredible Hulk and it did little more than piss off the Jolly Green Giant.
* Incredible Hulk. And preferably in his big, strong, Savage Hulk persona.
* Incredible Hulk), and the heroic Animal Resistance, led by a fast-talking Raccoon space-captain.
* Incredible Hulk, and thus built up a lot of fury within Banner that the Hulk personality latched on to, and thus that anger burst out in a big way as he now could no longer keep it under control.
* Incredible Hulk animated series has the Hulk leaping towards Doctor Doom's lair, and after smashing up his enforced cage, he makes for the door to do the same thing, until it opens by itself, to which the Hulk simply says: "Oh." Doctor Doom then says "There was a door, you destructive brute."
* Incredible Hulk arc, it was revealed that the Hulk was originally an imaginary friend of Bruce Banner's, and implied that the Hulk was really an alternate personality. One day after Bruce was bullied at school, the Hulk took over his body and planted a bomb at his school. Bruce stopped the bomb but was expelled from school. Thaddeus Ross, impressed with how advanced the bomb was, offered to guide Bruce through his education. The end of the arc revealed Nightmare has been plaguing the Hulk for years with hallucinations, misdirections, and manipulations of reality. It is thus left ambiguous on whether the flashback we saw was real or fake.
* Incredible Hulk, as aside from the age difference (she's 16, Hulk's pushing 40),

the one time these two have met involved Hulk beating the hell out of her friends and throwing her through a building.
* Incredible Hulk became "Dumb Magician", Valkyrie became "Sword Girl" and Nighthawk became "Bird Nose".
* Incredible Hulk because of her subconscious desire to look like the ideal woman.
* Incredible Hulk'': Betty Ross' eyes become a glowing yellow when she transforms into Red She-Hulk.
* Incredible Hulk, Bruce Banner clings to the axle of a van as it rolls away. His suit and back get torn up as a result.
* Incredible Hulk busted a lot of barrooms. The comics, movie and video game versions bust a lot of buildings and military equipment.
* Incredible Hulk but they've all hit a limit to their strength—except when the latter two get mad.
* Incredible Hulk by any of them, mostly due to his uniquely-unstable mentality, which gamma power feeds from.
* Incredible Hulk cameos as the priest who officiates the wedding of the Hulk's friend Rick Jones.
* Incredible Hulk can go a long way without killing anyone during his rampages. Hulk's buddy, Amadeus Cho, tries to explain this by suggesting that the Hulk is amazingly gifted, doing math to know exactly where every chunk of debris he creates will fall.
* Incredible Hulk cartoons included a shot of a giant Hulk foot stomping on artillery.
* Incredible Hulk comics, Thundra's interest in the Hulk was retconned from her wanting to test her strength against the ultimate opponent to her wanting to procure the Hulk's DNA to conceive a warrior who could break the stalemate between her all-female nation and the all-male opposing one. "Lyra, Daughter of The Hulk" is the result of this.
* Incredible Hulk costume, which is a suit of armor that shows off his abs when transformed.
* Incredible Hulk, crashing the reception and giving Marlo a silver hairbrush.
* Incredible Hulk, especially if you pissed him off by hurting his loved ones.
* Incredible Hulk. From this nexus he could go to almost any world (except straight back to Earth), with the caveat that, if he were truly unhappy in a given world, he would be sent back to the Crossroads to choose again.
* Incredible Hulk gains power not from rage, but from absorbing radiation.
* Incredible Hulk, giving the association more historical weight than it might otherwise have.)
* Incredible Hulk got a lot of attention as an ambiguous hero who was neither entirely a superhero nor entirely a monster, and his series pushed the boundaries of the Comics Code Authority by depicting the United States military as antagonists (the Code stipulated that comic books couldn't portray respected organizations in a negative light). With his anger, his inherently flawed nature, and his troubled relationship with authority figures, he also went on to become a counterculture icon, showing the potential for superheroes to act as a voice for the youth.
* Incredible Hulk, had once realized that he himself became one, as two or more of his Hulk personas have made children under contrived situations; Bruce in one self-introspecting moment felt he should be responsible for them, awkwardly attempting to connect with his estranged children. It didn’t quite work as none of them felt a connection to Bruce Banner and he didn’t try to push things much further, just accepting it as one of the many things that never works out in his life.
* Incredible Hulk has a story of Coyote Cash, an arch-criminal who's foiled repeatedly over the years by various versions of Hulk, beginning with the Hulk accidentally crushing his get-away car while escaping from the Army. After a 3rd release from prison, he tracks down Rick Jones and destroys his house with a bazooka. While he makes a triumphant speech about "being ready for the Hulk", Hulk — who had been house sitting for Rick while he was on vacation — emerges from the rubble in trademark anger.

* Incredible Hulk) has created a new mindless Hulk, who goes on the rampage Ulysses saw.
* Incredible Hulk has no qualms with your gender at all. If you've wronged him or pissed him off, you are to be smashed. Hence, Moonstone, Vapor, Mercy and Animus are treated accordingly.
* Incredible Hulk has noted that for a fraction of what General Ross and other have wasted trying to build robots/containment/powered armor to take down/control the Hulk, you could just get a satellite array going that would warn people in urban areas to evacuate when he starts getting too close. Naturally no one will consider this.
* Incredible Hulk has purple shorts. They are the only part of clothing that remain intact when he transforms.
* Incredible Hulk have made him a fugitive wanted by the United States military. Not to mention Betty's father, General "Thunderbolt" Ross, harbors an intense hatred of him.
* Incredible Hulk. He can be very innocent, loyal, and well intentioned.
* Incredible Hulk - her father worked himself to death trying to rebuild their lives after the Hulk destroyed their neighborhood. How many more like Jackie's father the Hulk's left in his wake is unknown, and probably unknowable.
* Incredible Hulk, her usage of "Hercs" as a unit of measurement for the energy radiated by mythological objects and entities is inquired about, leading to the following exchange. As she mentions later to Banner, she really did date Hercules.
* Incredible Hulk In his childhood, Bruce had a stuffed doll which served as a makeshift guardian (between his abusive dad and an abusive nanny, and burgeoning D.I.D., there wasn't a lot of love in the Banner household). Years later, Bruce's mind uses an anthropomorphization of the doll as a guardian entity.
* Incredible Hulk intelligent, he subconsciously restrains the Hulk and calculates his actions so he never kills anyone.
* Incredible Hulk, is an audience surrogate originally created for young baby boomers. He's an ordinary, well meaning teenager, but one who has more of an authority problem than previous teen comics characters.
* Incredible Hulk is for all practical purposes a Freak Lab Accident. Later versions — most notably the TV series and the two motion-picture adaptations — make it a more literal lab accident.
* Incredible Hulk is immune to pretty much every disease on Earth, including AIDS. This becomes a plot point when his old friend Jim Wilson returns to his life having contracted AIDS, and has to deal with the dilemma whether to give Jim a transfusion of his blood which could save his life, but condemn him to a life much like his. He doesn't go through with it.
* Incredible Hulk is kidnapped by baddies and taken to their underground lair. Hulk goes down and rescues her (at the time, the Hulk was intelligent), beats the baddies and proves that he's not evil after all. During the tram back up the mine shaft it's revealed that Betty has forgotten the whole event due to stress. This is while she's still in the same room as the guy who just rescued her.
* Incredible Hulk issue features Doc Samson dealing with the vigilante Crazy Eight/ Leslie Anne Shappe, who has been sentenced to the electric chair after murdering a senator. Not until after she has been executed, does Samson discover the motive for the murder. She killed the man because he had been beating his wife, who was an old friend of Crazy Eight from high school. The wife actually killed (or helped kill) her husband, the vigilante actually took the blame and died in her place, knowing it was unlikely that the wife would get a fair trial given her husband's position of power and the powerful friends he had that helped cover up the abuse. Crazy Eight sacrificed her life for her friend.
* Incredible Hulk is the canonical super-Hyde. The Hulk, over time, has been softened down from "evil" to "pure id". Not that that stops him from racking up the damage bill every time he shows up.
* Incredible Hulk: Joe Fixit often wore a purple trenchcoat, especially during the period of time where he was still repressing the Bruce Banner persona and exposure to sunlight weakened him.

* Incredible Hulk logo, with "Hulk" written in big, blocky letters meant to look like bricks.
* Incredible Hulk, most of the Gamma Corps hunted the Hulk because they wrongly believed he was responsible for their personal tragedies. To their credit, they stop hunting the Hulk once they realize this.
* Incredible Hulk Naturally, sending her through the machine again backwards returns her to normal.
* Incredible Hulk on the part of Marvel fans to assume the U.S. Air Force wouldn't have court martialed him, reduced him in rank, and sentenced him to life in Leavenworth after the property damage and civilian casualties his obsession with the Hulk has caused.
* Incredible Hulk or the Hulk actually should be able to defeat such characters is often debated.
* Incredible Hulk), Rhino (a supervillain) becomes a Mall Santa. He gives this advice to kids: "Give! Give! Give! You want everything handed to you! Why not do what I do? Take stuff! See it? Want it? Take it!"
* Incredible Hulk: "Spelling Made Easy" is a best-selling book about necromancy aimed at the layman. Reading it aloud turns you into a demon.
* Incredible Hulk's starter villain was The Gargoyle, the spy who arranged the sabotage of the gamma bomb test that turned Bruce Banner into the Hulk.
* Incredible Hulk's subsequent run explaining that it was all a hallucination brought on by Nightmare.
* Incredible Hulk's transformation could be seen as this, as it can only be triggered when Bruce Banner is in danger or under emotional stress (typically anger).
* Incredible Hulks, Umar the Unrelenting stops yet another Hulk rampage by hauling him off to the Dark Dimension to ... calm him down.
* Incredible Hulk supporting character Rick Jones, unexpectedly found herself drawn to the telepathic and telekinetic Moondragon and lived with her for a while before returning to her husband. (Before she first met Rick, Marlo had also been the Hulk's lover for a while).
* Incredible Hulk The best case scenario Banner will ever achieve is his Merged Hulk/The Professor incarnation, the Strength of Hulk but the Mind of Banner and when he goes berserk he transforms into Savage Banner, Savage Hulk in Banner's puny body. He's not rid of Hulk but at least he can't hurt anybody as much as before.
* Incredible Hulk: The New Mexico experiments with Gamma Radiation went very wrong for Dr. Bruce Banner.
* Incredible Hulk, the Sleepy's Man helps out the Hulk by fighting Nightmare.
* Incredible Hulk. They consist of Simon Utrecht/Vector, a powerful telekinetic; Ann Darnell/Vapor, who can transform into any type of gas she desires; Ann's brother Jimmy/X-Ray, who became a living field of quasi-solid radiation; and Mike Steel, a man whose body is entirely made of metal. When you look at their abilities, the U-Foes are actually far above the Fantastic Four in terms of power and could easily be a dangerous threat to the Avengers or the X-Men. Unfortunately for them (and fortunately for the rest of the world), the U-Foes are too stupid and lazy to truly take advantage of their gifts (half the time they are beaten due to their powers go haywire because they still have a novice-level grasp of them at best), and, more importantly, would much rather work as hired thugs or go around spoiling for a fight with the Hulk than put in the effort to advance themselves as a team.
* Incredible Hulk transforms extremely painfully in most instances, which is probably why Banner's attempts to keep control tend not to work once it's actually started. In his case, the pain is mental as well, as he can feel his human intellect degenerating.
* Incredible Hulk: When Amadeus Cho studies magical phenomena, he measures the reality-warping field strength in "hercs", one herc being equal to the field strength of his friend Hercules. It sounds like "hertz" so it's pretty natural to tack on SI prefixes like megahercs or gigahercs, but most of the measurements he gives are between zero and five hercs.

* Incredible Hulk when he was "mindless" to (A) get him away from Earth and (B) let him choose where he wanted to live. But he never found a place he liked and eventually he was brought back to Earth.
* Incredible Hulk, who is stronger and smarter than present day Hulk (even when PDH is in smart mode). Part of the rationale is that there had been a nuclear war, and since the Hulk is radiation-powered, this made him stronger at the expense of his sanity (well, at the expense of Smart Hulk's sanity).
* Incredible Hulk, who just look like impossibly buff people with green hair or skin, and at the other end you've got freaks like the Harpy and the Abomination. Their degree of self-control after their mutation varies from one individual to the next, too. There have been gamma-mutant animals over the years, too, (mainly dogs), but they tend not to survive beyond a single issue.
* Incredible Hulk, who only appears in two of the twelve included episodes.
* Incredible Hulk, who was even more rabid about going after Hulk than General Ross.
* Incredible Hulk with an iron fist and lives off as a hedonist that surrounds himself with concubines. He is still a dangerous foe, since he has Banner's intellect, the Hulk's strength augmented several times and absolutely no moral inhibitions.
* Incredible Hulk with nearly unlimited power and one huge limitation: he absolutely lacks imagination. He can only create by copying the desires of others.
* Incredible Hulk: X-Ray of the U-Foes can shoot off "anti-gamma radiation", which can depower or outright kill the Hulk. Fortunately, X-Ray's not terribly bright, so he doesn't have much of a chance to utilize this.
* incredible in the game to speed up just as much, making it harder than normal or just not worth using in the first place.
* incredible length of her career going to retire and she means it this time — predictably, this was met with a resounding "We'll believe it when we see it" from the gymternet.
* Incredibles 2. After Bob gets berated by the police for the additional damages caused by their attempted heroics at beginning of the movie, Agent Dicker stands up from the corner.
* Incredibles 2, after her father accidentally reveals Dicker erased Tony's memories of her, she "renounces superheroes" and unsuccessfully attempts to destroy her supersuit. Bob is later able to reconcile with her, helping her mood against the situation. Later she learns her mother is in danger and her father left to rescue her. She then "renounces her renunciation" and leaves with her brothers to rescue their parents.
* Incredibles 2 appears to set up the supervillain Screenslaver as the main antagonist, but he is fought much earlier in the film by Elastigirl, who then realizes too late that he was only merely a decoy set up by the film's real antagonist: the super-hating Evelyn Deavor who brainwashes the supers with mind-control goggles to sabotage their efforts in regaining the public's trust!
* Incredibles 2, as the movie significantly develops Helen's job life (in contrast to Bob's job life in the first movie, which was mostly covered in a montage) and Bob's home life was given significant focus as well.
* Incredibles 2: Bob, Helen and Lucius wear trenchcoats over their super suits to go to their first meeting with Winston Deavor. Nobody is particularly fooled and Violet and Dash look very suspicious.
* Incredibles 2 both have a level of technology at least several decades ahead of the movies setting.
* Incredibles 2: Dash starts emulating his dad's "yeah, baby!" in the sequel.
* Incredibles 2, Elastigirl rides an electric-engined motorbike — but it sounds like a petrol-engined bike. This is probably because most people wouldn't know what an electric vehicle sounds like, and because they expect a bike to sound like, well, a bike. This could be justified if the bike is specifically programmed to make artificial engine noises.
* Incredibles 2 for all its worth, being the character who uses the mildest profanity (one "hell", one "crap", and one "I'll be damned").

* Incredibles 2 has an ambassador of the ULN, which stands for "United League of Nations."
* Incredibles 2, Helen "Elastigirl" Parr admits to having once sported a mohawk.
* Incredibles 2. He then notices a raccoon digging through their trash and draws a comparison between it and the bad guy on screen, where he then uses his powers to drive it off.
* Incredibles 2. In particular, Voyd explicitly equates being allowed to be a superhero with being able to be herself and is overjoyed to join a group where everyone is like her.
* Incredibles 2 is implied to be alcoholic. She has a permanently disheveled appearance with eye bags and several of her scenes involve her drinking. One scene has her having a heart-to-heart with Elastigirl late at night nursing a drink, and her acting casually tipsy (slightly drawn out words, big arm gestures, kind of slow to follow Elastigirl's thought process, etc).
* Incredibles 2 is still fighting her and trying to thwart Helen's rescue attempt.
* Incredibles 2: Mr. Incredible agrees to take care of the household in order to allow Elastigirl to work with the Deavors to try and restore Superhero rights. At first, he has some rocky moments attending to everything but appears to be getting things under control, then Jack-Jack demonstrates he has powers causing Incredible to be completely overwhelmed and leading to a downward spiral of not getting enough sleep and making poor decisions to try and help Violet's dating problems and Dash's math homework. All while refusing to call Elastigirl for help.
* Incredibles 2: On the marquee at the theater Violet and Tony go to for their first date.
* Incredibles 2: On the poster, the Screenslaver overlooks the Parr Family.
* Incredibles 2: Part of the villain's plan involves framing an innocent person to lull the heroes into a false sense of security. The victim is a pizza guy because he was "surly" and the pizza was cold.
* Incredibles 2, passed away in 2014. Mirage does not return in any form in the sequel.
* Incredibles 2 proactive heroes and reactive villains aren't more common in superhero stories: Since the villain already had what they wanted at the beginning of the story, and their plan involved playing along with the heroes before betraying them in the third act, a lot of viewers came away with the impression the villain would have won if they had just done nothing at all.
* Incredibles 2: "Promote the hell out of it!", as well as the first damn, from Pixar, in any context: "I'll be damned." There are also 2 uses of "Crap".
* Incredibles 2 released on the weekend of Father's Day in 2018, which is fitting since a large part of the movie's conflict is Bob/Mr. Incredible's struggle to become a better father.
* Incredibles 2 seems to be much more durable than the average baby, flying through the ceiling fast enough to make holes in the ceiling and wrestling with a wild raccoon with no visible scratches or injury.
* Incredibles 2, she got on her husband's case for using a police scanner and thwarting crimes, wryly noting to Winston and Evelyn, "I am such a hypocrite."
* Incredibles 2, she receives a call from her son Dash, asking her where his tennis shoes are while her husband Bob yells at Dash not to call her in the background. She tells him she can't talk right now but still helps him by suggesting he look under his bed.
* Incredibles 2, something that was supposed to be an unexpected surprise in the first film released 14 years earlier.
* Incredibles 2. The absence of prominent 2010s technology such as smartphones and tablets is notable in the film.
* Incredibles 2, the Underminer uses an enormous tube to vacuum the money from the bank (and, inadvertently, Mr. Incredible) into his giant mining drill.
* Incredibles 2, the villain appears to be the Screenslaver, but it turns out to be Winston Deavor's sister, Evelyn, who has had a grudge against superheroes ever since her parents were killed when her father tried to call Gazerbeam to thwart a couple of robbers.

* Incredibles 2: Violet asks her parents if they're going to talk about "the elephant in the room," meaning the fact they were all arrested earlier in the day.
* Incredibles 2: Voyd/Karen, a fangirl of Elastigirl. She eventually helped her hero in the climax of the film by using her portals to help her defeat the villain.
* Incredibles 2, when the doorbell rings, Jack-Jack immediately knows that it's "Da-Daddy".
* Incredibles 2, which in turn, angers Jack-Jack, turning him into a monster that Edna now has to calm down.
* Incredibles 2: While Elastigirl is first trying out her Elasticycle, it revs out of control and slams her into the wall.
* Incredibles 2 (while taking other precautions against an escape) in order to gloat.
* Incredibles 2 (who has an oxygen supply) flies the jet high enough to afflict the heroine (who doesn't) with hypoxia, causing her to start babbling as she collapses.
* Incredibles 2 who will not back down from his garbage can raiding, even when facing a superhero baby whose powers include laser-beam eyes, turning into a miniature ogre, and bursting into flame.
* Incredibles 2, Winston Deavor looks just like his father, only younger and without the beard.
* Incredible Science Fiction #30, involves the first crewed mission into space on board the X-17, a spaceship designed with every comfort and precaution in mind. After three weeks everyone on board's claiming that the universe is actually incredibly tiny and that they're playing with the planets like rubber balls, ring-tossing with Saturn, etc. As the ship plummets to Earth, the mission commander notes solemnly that the sheer vastness of space has driven them completely monkeydoodles.
* Incredible Shrinking Luchador named El Tabador, named such because the company allows you to have a tab instead of a contract.
* incredibly 59,000,000,000,000,000,000,000,000,000,000,000 years for the half-life of hydrogen-1).
* incredibly '80s commercials for the toy Skip-It remained on TV from the late '80s all the way through the '90s.
* incredibly and coworkers.....or so it seems. He's implied to still not be over the death of his Academy classmate, Harima, and is later called out on this by his partner, Akira. When she attempts to kiss him, he rejects her advances by covering her mouth with his hand while wearing a panicked expression. She sadly notes this is just like him.
* incredibly, and punishing one of his sons for spreading a religion about him.
* incredibly badass. Of course everyone else in the unit passed it too, so to Price and Gaz, Soap's nothing special. The status of this trope is relative. Perhaps best exemplified by this conversation:
* incredibly bad that it leaves a bad taste in audiences' mouths for the entire genre.
* incredibly broken deck promptly cracks for the first time in the entire duel.
* incredibly, but while they were associated with and supported by Batman, they didn't have anyone to help them suit up at night.
* incredibly Catholic historically, and asking an audience if anyone had "lost a Mary".
* incredibly cheap knockoffs counts itself among these companies; whenever a Disney movie hits theatres or video, GoodTimes is there with a based-on-the-same-public-domain-property direct-to-video cartoon.
* incredibly cheap to make in massive numbers, and so was their ammunition.
* Incredibly common in British girls' comics of the period from around the 1960s to the late 1980s (by which time most of the comics had folded). One notable example was the highly-popular "Angel", set around an orphanage run by an angelic young woman who was herself an orphan.
* Incredibly common in hip-hop music. Entire careers have been built on a complete unknown managing to get on a track with a successful artist, and it's highly common that more established artists act as mentors to new talent. A few notable examples

include:
* Incredibly Conspicuous Drag: A character disguising themselves as a member of the opposite gender doesn't do a good job of hiding their real gender.
* Incredibly Conspicuous Drag: Because men in dresses are considered funny.
* Incredibly Conspicuous Drag: It's obvious that this person is dressed as a member of the opposite gender.
* incredibly corrupt and amoral one. Roy Mustang's dream is to reform the parliament, but other members of the upper brass are perfectly happy with the dictatorship. Any reform seems to be a long time coming as Fuhrer Grumman seems to have no interest in it.
* INCREDIBLY dangerous and show lack of training. It's especially hazardous with large dogs, who are quite capable of pulling full-sized adults off their feet.
* incredibly from the same series. It probably comes as little surprise that he's a serial killer.
* incredibly frustrating has fixed this particular mechanic, returning to the old continue system.
* incredibly fun to fight is now the only known thing the Orks are afraid of.
* incredibly goofy, whose botched cares have already killed at least eleven people and injured the rest.
* incredibly hostile to human life, and even with protective measures, they needed to adapt significantly to survive; they consider ordinary humans inferior and worthy of being enslaved or wiped out.
* incredibly jealous, as all of the masters are totally aware of it, and are watching to see what will happen.
* incredibly jealous, feeling like Patrick shouldn't have passed on a whim and felt like he should have won the free boatmobile instead, while also patronizing Patrick's own driving (for driving 1 mph over the speed limit). It's only after Spongebob addresses this out loud that Patrick quite literally rubs his license in Spongebob's face.
* Incredibly Lame Fun: A character finds enjoyment in doing the most ludicrously mundane of activities.
* Incredibly Lame Fun and militant hatred of almost anything other people deem cool, so if she decides on an activity you can expect her alone to enjoy it. As an example, the plot of "Monty Can't Buy Me Love" begins with her dragging the rest of the family to go on a walk with her through the most boring part of town, and not only is she the only one that thinks it's fun, she points out things she likes in the neighborhood like she was a tour guide. When the family noticed that a superstore opened nearby, she was the only one who didn't find it fun because it disrupted her walking route. In "Burns, Baby Burns", the Simpsons spend the day apple-picking at a cider mill. Most of the family ends up bored out of their minds, but Marge has a blast and leaves decked with souvenirs.
* Incredibly Lame Fun: Someone enjoys doing the must mundane of activities.
* Incredibly Lame Pun, and would wind up being an enjoyable joke on Mark's home planet.
* incredibly lazy and can't bother themselves to reach for the remote. Cyborg attempts to change the channel by extending his hand, but just ends up smashing it. Then it catches fire. They can't be bothered to put it out, and when one of them suggests calling the fire department, they decided not to because the phone is out of reach.
* Incredibly Long Note. Everyone else peed in excitement, of course. Expect this trope (especially of the soft-but-incredibly-held-out variety) when you see Montserrat Caballé on the cast list or album notes.
* incredibly loose adaptation interrupting the story and Archie Comics delaying the release of the book for the entire winter of 2016, making the arc last even longer than it should've.
* incredibly malicious, backstabbing, and ruthless, even to each other.
* Incredibly, Maria Callas began her opera career at the age of 15, as the leading lady in
* incredibly naive and joined the Holy Grail War because he thought it would be fun

and cool.
* Incredibly Obvious Bomb: When explosives are to be used, no effort whatsoever is made to conceal them.
* Incredibly Obvious Bug: A listening or tracking device that isn't disguised well and therefore easily noticeable.
* Incredibly Obvious BugBugs, tracers, hidden cameras, listening devices, and their ilk will be very conspicuous—if they were as inconspicuous as real ones, the audience wouldn't know they were bugs.
* Incredibly Obvious Bug finds it and throws it out. Then it turns out it was just a decoy and the real bug, better hidden but still much more obvious than a realistic one, goes unnoticed. Or, if double subverted for laughs, the bug that the hero ignores is significantly larger and flashier than the decoy and even more poorly hidden.
* Incredibly Obvious Bug on a chair. He sees this and realizes the hero will find the bug, so he gets rid of it and plants an even more camouflaged bug on the chair.
* Incredibly Obvious Tail: A character who is trying to secretly follow someone utterly fails at being subtle about it.
* incredibly obvious who the actual murderer is, but unless the character can account for some detail of how the murder went down, the entire claim is discredited and the murderer goes free.
* incredibly outlandish threats, to either a) help the recruit practice holding their bearing, or b) give the DI an excuse to punish the recruit or platoon. They also aren't immune to corpsing themselves. That's why they wear such big hats.
* incredibly powerful beam from within his chest, his fingers detach and turn into missiles that he seemingly has an endless supply of, and even his knees and toes can fire missiles.
* incredibly qualified to be the heir to a giant corporation, having already succeeded in business independently as a teenager.
* incredibly screwed up little girl who treats the other members of the Slaughterhouse Nine, a band of psychopathic spree killers, like a family.
* incredibly self-aware was dismissed by hardcore fans who felt that all the show did was explain the joke.
* incredibly tall and weighed around 400 pounds. Some sources say that the king's servants had to use a pulley to help the king mount a horse (poor animal!). He didn't exactly suffer from gigantism; his height is estimated to 2 meters, 11 centimeters (6 feet, 11 inches). Same as some modern athletes, such as Jon Rauch, Aaron Sandilands, and Peter Street.
* incredibly terrible-looking". We then cut to a horrified man watching this on television, going on E*Trade (an online, self-serve stock brokerage), and selling all of his shares of stock in the studio.
* incredibly that Leela is the Doctor's mother via an incredibly round-about means. (This last part has been retconned out since.)
* Incredibly, there was at least one WWE personality whose exploits stretch back all the way to the outbreak of
* Incredibly, this happened in its early days on NBC daytime. NBC president and CEO Fred Silverman made two attempts to cancel the show in 1980. The first was to make room for a failed talk show hosted by
* incredibly unfortunate even if there weren't any actual devious intentions.
* incredibly versatile choppa is that of a brutally primitive axe or cleaver.
* incredibly vile in most stories. While other villains have managed to pull off this combination, the Joker is probably one of the best examples in fiction.
* incredibly when the former tries to skip out on training, terrifying her), which usually leads to the other person telling her to stop acting like their mother. She even does it with her childhood friends (Sylvain, Dimitri and Felix) or people who technically outrank her (Dimitri, who is expected to take the throne of Faerghus when he comes of age and Claude, who is next in line to lead the Leicester Alliance).
* Incredibly widely used in popular music through the years. For example:
* incredibly, with at least one instance per episode as the characters start

imagining things in response to something another said.
* Incredipede together. He did most of the programming work, and she designed the UI and sharing elements.
* In "Creepy Crawly Much?", the girls get trapped in a human-sized roach motel.
* In "Cricket's First Menu," Cricket continues to beg for a bit after Butterbean has already agreed to let her make the day's lunch menu.
* In "Crimes of Fashion", when Lincoln is considering giving up playing superhero and discards his
* In "Crimes of the Hot", a civil defense van is calling all scientists to a global warming conference. Doubles as self-deprecating humor as said scientist's degree was from the Evergreen State College,
* In "Crimes of the Hot," Farnsworth's speech to a scientific conference confessing his role in creating the current environmental crisis is conveyed via flashback to his time with his former boss and
* Incriminating Evidence:, which is generally the more reasonable conclusion.
* Incriminating Indifference: Showing little emotion makes you a prime suspect.
* Incriminating Indifference: This trope has been around on television so long that these days the subversion is at least as common as the trope: the "non-emotional" person at the scene makes for an excellent red herring for the first half-hour of a crime procedural, but is rarely the true killer because that would be too easy. You can expect the truly guilty person to have had the wet-works on full blast, just as expected, if only to throw off suspicion.
* In criminology and studies of delinquent rehabilitation, Scared Straight programs are infamous for being, well, bullshit. Almost no credible scientific evidence has ever backed up that these programs reduce rates of delinquent re-offending (recidivism), and in fact many studies demonstrate the exact opposite trend occurring, as noted in the blurb above. For example, delinquent teens sent off to boot camp-style rehab programs often come out of them having learned new techniques for running faster, climbing higher, and building up their muscles. Basically, they're being

* InCryptid. And most humans would only ever see one at a time anyway, since they're a very antisocial species.
* InCryptid and murder their human family. When they resurface, they're fully aware of their own telepathic abilities, and their status as an ambush predator.
* InCryptid, and partially because they don't turn their victims (of course, not all fictional zombies do either).
* InCryptid and they all wear obviously fake costume pieces, which makes their very real nonhuman attributes seem just as fake.
* InCryptid and tried to drive any non-human sapient species (and plenty of non-sapients) extinct. The Covenant is still out there, so cryptids and their allies (like the Price-Healy family) work hard to keep their world secret and not attract attention.
* InCryptid (both males and females), and are intelligent enough to work together to hunt humans.
* InCryptid children: one human, one bogeyman, and one the same species as Angela.
* InCryptid, cryptozoology is a legitimate (though secret) branch of zoology, which often crosses into anthropology when the cryptids in question are sapient.
* InCryptid dangerous and need to be dealt with (or at least isolated from human settlements), so the Covenant could be heroic if they weren't so indiscriminate about their targets.
* InCryptid) describes Sarah's love for him as tasting like "maple syrup and pizza sauce". He says crushes taste more like gingerbread.
* InCryptid during sex too, but that's left to the reader's imagination.
* InCryptid has the Covenant, a pseudo-religious monster-hunting organization with the goal of exterminanting all creatures that were not on Noah's Ark (i.e. cyptids). The Price family considers them guilty of both murder and genocide, and strives to protect innocent cryptids from them.
* InCryptid heat up until their great-granddaughter Alice married the agent sent to see if they were harmless, persuading him to quit in the process. The Prices only kill cryptids if there's no other option to protect the environment, instead of the Covenant's heedless approach.
* InCryptid. Humans are nowhere near endangered, but plenty of sapient and non-sapient cryptids are thanks to the Covenant exterminating anything they see as "monsters".
* InCryptid, including giant spiders. Sarah tames and rides a small one — about the size of a Clydesdale.
* InCryptid: It's an actual broadcast television camera, rather than a security camera, but it serves the same purpose. Verity Price shoots it so the Covenant can't easily get a bead on her current location since she's on their list of traitors and currently in a spot full of the cryptids the Covenant hunts and kills.

Trouble is it had been a live feed over the air to North America at least.
* InCryptid keeping James from leaving, it's a relatively normal small New England town.
* InCryptid: Lycanthropy-w, the virus that creates werewolves, can infect any mammal (including mammalian cryptids), though it's immediately fatal in anything smaller than a dog, and ultimately fatal in all cases, since the body simply can't handle the stress of constant transformation. Treatment is possible if it's identified quickly enough.
* InCryptid makes him stay indoors almost all the time, so he doesn't have much field experience.
* InCryptid, nobody remembers to turn off the live TV cameras until it's over. Verity reasons that it's inevitable that the Covenant will find out, and gives a message to them through the camera:
* InCryptid, Sarah (a cuckoo, a naturally telepathic species) has one with certain members of the family, Verity and Artie in particular (though she does have a limited range).
* InCryptid series features incubi and succubi who are the male and female members of the Lilu species respectively. The Lilu have the ability to release pheromones through their sweat and other bodily fluids which allow them to control the sexual responses of thoose around them and hence cause people around them to become aroused and sexually attracted to them.
* InCryptid series starts with a flashback prologue to the viewpoint character's childhood, the only part of the book written in third person.
* InCryptid short story "Survival Horror", Annie and Artie play a game that tries to kill them.
* InCryptid spans at least four generations of the Price-Healy family (though only three have had their stories told so far, and only the youngest generation are viewpoint characters in the novels). The Jonathan and Frances short stories take place from the 1920s to the 1940s, their daughter Alice and her husband Thomas have theirs in the 1950s, and Alice's grandchildren (the current generation) have their books and short stories set in the 2010s.
* InCryptid species who can live in excess of a hundred years. It's unclear exactly how old Angela is, but they've been married since 1961 and more than 50 years later she hardly looks any older.
* InCryptid: Swamp bromeliads are giant flowers that can eat mammals as large as a deer, and sometimes prey on humans. Verity and Dominic rescue a boy who's trapped in one when they stop in Buckley. Their pollen also has a narcotic effect, which Dominic finds out to his chagrin.
* InCryptid, the finfolk are cross-fertile with humans. Children of finfolk mothers will always be finfolk, while children of human mothers may remain human, although they display the dementia in later years that is characteristic of the finfolk growth cycle.
* InCryptid Their beast form is the typical scabrous reptile-wolf creature, their human form is indistinguishable from a Latin American person of their age and build. For the most part, they're quite friendly and don't attack farm animals to drain their blood.
* InCryptid, the same entity responsible for James's curse, was eventually magically confined to his own house, unable to leave it.
* InCryptid, they strip her naked to make sure she doesn't have any hidden weapons. She escapes and has to fight them unclothed.
* InCryptid, this is commonplace in all the novels and some of the short stories. Cryptozoology is not a safe science.
* InCryptid to remember everything that's ever happened to them (that at least one mouse was around to witness) and calling on the gods and priestesses to protect them from predators and other humans. The Prices appear to be a generic secular American family who accept the Aeslin religion even if they don't personally believe it.
* InCryptid, Verity objects to being treated as stupid — yes, she's blond, but that doesn't make her a dumb blonde.

* InCryptid. Verity warns Dominic that her mother is the one to worry about, but both her parents ultimately accept him as their son-in-law.
* InCryptid: When Frances Healy wants in, and you don't let her in, her shotgun is how she knocks (the door off its hinges).

* Incubi and Succubi being, meaning that it can get human seed as a succubus and then use it while an incubus.
* Incubi are a different creature in Pathfinder, being a male demon born from souls that were damned for engaging in their sexual desires that were horribly violent. The likely outcome of being an incubus' victim is the sex is not consensual and death will be a relief.
* Incubus features a wallpaper-friendly variation, with "10:24" sticky notes covering the walls.
* Incubus is an aversion. Their signature "Drive" was their only Top 40 hit and the first of four #1s on modern rock. However, what were the other three? "Megalomaniac", "Anna Molly"… and then there's "Love Hurts", which isn't nearly as well known as songs that didn't hit the top like "Pardon Me", "Stellar", "Wish You Were Here" and "Dig".
* Incubus (male) and succubus (female) are demons who feed on the life-force of human beings of the opposite sex. Some sources say that they are one and the same, taking the form of both genders. Those names literally translate as "one who lies on top or in (masculine form)", "one who lies below (masculine form)", "one who lies on top or in (feminine form)", and "one who lies below (feminine form)", respectively.
* Incubus not only varied genre from song to song, but sometimes from verse to bridge to chorus. Witness 'A Certain Shade of Green', with it's funk verse, metal chorus and disco bridge.
* Incubus's breakout hit, "Drive", was much softer than their past work, though they've done more like it since.
* Incubus Tales focuses on the adventures of a traveling Incubus, and the people he meets.

* In current United States party politics, Republicans (Romanticism) versus Democrats (Enlightenment): The Republicans, now calling themselves the Grand Old Party, stand for the traditional values that defined the United States of the past. They exalt ideals like States' rights, Family Values, Religion, and the belief that with Hard Work and ambition you will succeed and achieve the American Dream. On the other side, the Democrats, now defining themselves "Liberals," are cosmopolitan and globalist-minded in their policy-making based on Scientific discoveries (e.g. Climate Change and the campaign for Alternative Energy), Gender and racial Equality, and the proposal of a Welfare State where an advanced economy should be capable of providing for the basic needs of all its citizens. The ideological contrast is further emphasized in the slogans of the contemporary presidents of each faction (Barack Obama's "Hope And Change" implicating greater progress for the future, versus Donald Trump's "Make America Great Again" giving prime emphasis on America's almighty and more virtuous past). However, this is just a tendency; there are plenty of strands of conservative thought that appeal to reason and cite scientific studies, just as liberal or leftist thought has sometimes favored emotive arguments (these tend to emphasise compassion and empathy, contrasting with the conservative emphasis on duty and honor).

* Incursion has a mixed version of this trope—pure warriors and mages are linear, rogues, priests and druids are quadratic.
* Incursion is a, well, multitude of demon ghosts who each want you to go kill and slaughter and rape and be generally depraved in that particular ghost's name, and are willing to bribe you with power for it. Zurvash is slightly more philosophical about it, making no bones about the fact that he has no regard for civilization, ethics, or foresight, and glorying in brutality and domination.
* In "Cutaway Land" the family is briefly transported back to the show's first ever cutaway gag with Adolf Hitler working out in Das Gym.
* In "Cute Poison", Michael Scoffield finishes digging a hole behind his cell's toilet by kicking through the wall. His cellmate Fernando Sucre covers the noise by loudly singing "Eres Tu", aggravating the entire cellblock into making a ruckus.
* In cutscenes and backstory, human tanks are said to be weak and virtually ineffective against the invading alien forces, playing the trope straight.
* In cutscenes, Protoss High Templars are veteran Zealots who could probably take down a dozen Zerglings while naked and unarmed, and Tassadar (who, granted, is exceptional even among High Templars) is shown extending his wristblades far enough

to cut mutalisks out of the sky. In gameplay, the High Templar is a typical
* In "Cutting it Close", Steph blames herself for causing Jessie's accident, all because she accidentally cut his hair in her pretend haircut game.
* In "Cyber Butt", the titular duo pressure Stewart into going on a porn site on the school computer.
* In Cynthia's oneshot, while she is seeing visions of the past and possible future, she sees her birth. Her father is eating a muffin the entire length of it.
* In Czech, a common joke (or riddle) is to translate a proverb into scientific-sounding language.

* In d20 Modern, which uses many rules from D&D, the Massive Damage Threshold is much lower, equal to the character's Constitution, though it can be increased by the feat Improved Damage Threshold. A failed save, however, only drops a creature to -1 hit points. This rule is there to make gunshot wounds dangerous regardless of level.

* Inda and she was betrothed to the previous heir), Inda and Hadand are siblings, and Inda is Evred's military second-in-command.
* In "Daddy's Girl", a young woman, complaining of being abused by her father, convinces her boyfriend to kill him.
* In "Daddy's Little Girl", Richard's telekinesis is so finely attuned that he can stop the flow of blood to Isabelle's brain for several seconds, rendering her unconscious. He later pins Tom, Diana and Kyle to the walls and ceiling of the safe house where he has taken Isabelle.
* In "Daddy's Little Helpers", the moms get a shirt each that says "I am the goddess [their name]." Didi's says "I am the goddess Dodo", which makes her angry.
* In "Dadi Ke Saath", among the chewed-up foods in the forest is a strand of spaghetti who pulls the "rope caught on leg"-type snare on Samosa.
* In "Dadlantis", Chloe's wish turns her and Timmy into mermaids, with Timmy becoming female in the process.
* In "Dad's Dessert Dilemma," Arthur's dad experiments with combining different desserts, to little success. One such creation is cinnamon toast soufflé, which deflates as soon as he takes it out of the toaster.
* In Daenerys' eyes, usurpers are occupying the throne of her father and her brothers, Rhaegar and Viserys. She is right though still oblivious about the kind of man her father really was. Later, in "Oathkeeper", Daenerys pulls this on Meereen when she takes up residence in the Great Pyramid, the most impressive building in Meereen, and drapes the Targaryen banner over the Ghiscari harpy at its peak. She also retakes Dragonstone, the island of her birth, after it was vacated by Stannis Baratheon, the man who chased her out on King Robert's orders.
* In Dagobert VIII's court, he and Marshal Rodak never use any additional names.
* In "Dagon", a shipwrecked sailor washes up on a newly-formed island thrown up to the surface by volcanic activity, covered in the rotting mess of deep-sea life that didn't survive the ascent - but the island already contains a mysterious stone monolith that is unmistakably the product of deliberate crafstmanship.
* In "Damage," a cracked-out T'Pol, jonesing for some literal rock, falls into a depressurized cargo bay, leading to her air hose coming undone and a frantic struggle to put it back.
* In "Damaged", Oliver Queen being polygraphed by the police is intercut with a flashback of his interrogation on Lian Yu.

* In D&D 5th Edition, the spell Vicious Mockery lets Bards literally mock the monsters— and do psychic damage!
* In "D&D Stories: funny moments from my campaign", the party rogue cut's off the blacksmith's hand arbitrarily. For the rest of the story the blacksmith refuses to do work for the party again, and only the inexperienced blacksmith's apprentice will work for them.
* In "Damp Sheets", the pilot claims that marsupials aren't allowed on the plane, so Yo-Yo has to ride in the hold. Apparently, however, this was a mistake and the rule was meant to be "No marshmallows".
* In "Dances with Smurfs", the Smurf village is destroyed by bulldozers. It wouldn't have been so funny if UNICEF had not already been there.
* In "Dancing with the Fishes," a couple are driving underneath a tramway when a the body of a young lady falls onto their windshield.
* In "dangeresque 3", Strong Sad interjects "Getting! Dizzy! Blacking! Out!" while acting as Strong Mad's stunt double and being repeatedly kicked by Homestar.

* In "Dark Designs", Inzogoud acquires a magic pencil; when he draws a picture of someone or something and then tears the paper in half, the subject of the picture is banished to an alternate dimension. He can't get the spell to work until he takes art classes, and during an idle moment,
* In "Dark Designs", when Iznogoud's art skills are not good enough to trigger a magic pencil and paper that makes anyone drawn with it disappear when the paper is torn in half, he takes art lessons from Tahbari al-Tardi (Tabary being noted for his inability to keep to a schedule).
* In Dark Eldar society, your position is directly related to birth; natural-born Dark Eldar are so treasured that they're automatically elevated to elite units regardless of their combat prowess, while vat-cloned Dark Eldar must work their way

* In "Darkness On The Edge Of Town", Felicity Smoak has a humorous moment when she starts this trope by claiming "hacking is such an ugly word"... and then is unable to think of a better one.
* In "Dark Rain", a chemical war has left most of humanity sterile, after which harsh dystopian measures are enacted to try and preserve the population. The last generation of pre-blight children are taught that it is their duty to become sexually active as soon as possible, contraceptives of all kinds are banned, and when once in a blue moon a woman does become pregnant, the government seizes both mother and child; the child to be tested for any passed-on genetic traits that could improve fertility, and the mother to be similarly tested and also to be forcibly inseminated by other proven-fertile doners to try and replicate her success.

* Inda series attains this status for his prowess in fighting pirates and later his

success in fighting the Venn who are invading his homeland. He's so famous as a commander that midway through the fourth book a coalition of kingdoms and trading ports choose a delegate to go beg him to help save them from the Venn, who are threatening to take over the strait that separates the two continents of Sartorias Deles.
* In databooks written by Kishimoto, the author of Naruto, several ages are listed for characters - for example, Anko is currently 27, Kurenai is currently 31, etc. The databooks also list other relevant ages, such as when several people were promoted to Genin or Chuunin. Kakashi is stated to have become a Chuunin at age six. In chapter 599 we see the Chuunin exams where Kakashi passes, and he's competing alongside people like Anko, Asuma, Kurenai, Ibiki, Hayate, etc. several of whom had yet to even graduate from the academy, let alone qualify for the Chuunin exams.

* In "Deal Me Out", Lincoln and Clyde try to give up things relating to their favourite superhero Ace Savvy, yet they find comics and action figures of him everywhere.
* In "De Apekermis" ("The Monkey Fair") the apes in the local zoo become intelligent and decide to escape to take over the world.
* In "Dear Sigmund," Klinger claims to have been hit in the head with a chopper blade and only able to speak in Arabic. Via subtitles, he tells Col. Potter things like, "My olive has no pit and there is no yolk in my egg" and "Grandfather, may your pomegranates grow as big as the Queen's fanny." An unusual example in that it's intentional; Klinger is fluent in Arabic (in fact it's almost certainly his first language, given that his mother doesn't speak English) and is purposefully stringing together sentences of this type to reinforce the idea that he's delirious from a head injury.
* In Death. After Craig Foster's murder, Eve Dallas ends up focusing on Reed Williams as the prime suspect. Take a wild guess on what happens next.
* In Death), and Zeus (a PCP analogue). On the other hand it has Whore&Rabbit which are aphrodisiacs that only work on women and are treated like an even more evil version of Rohypnol, but the effects are vastly different. And then there's Funk; it seems to live somewhere in the downer category of drugs but has really insane side effects including basically turning someone into an albino complete with vision issues. Some of the drugs are analogous and some aren't really classifiable in the usual categories.
* In Death Battle itself, several warriors have had their homeworlds described as this.
* In "Death Becomes Him", Daphne casually mentions how she likes her men more on the manly side. When she has trouble opening a jar of peanuts, Niles offers to do it as a means to impress her. When he too fails to do so, Frasier stops midsentence, grabs the jar, and opens in a single twist.
* In Death books is a borderline case. While she does run a homicide squad, she

spends much more time investigating murders herself than supervising her squad. Note that she is shown as being perpetually behind on her paperwork because of this, and that she knows that one more promotion means she won't be able to do the street-level investigations she loves.
* In "Death By Dinner Party", Greg is stabbed but manages to feel the killer's face and identify them, leading to:
* In "Death by Drowning", the victim was pregnant by a man who had no intention of marrying her; she was expected to marry the
* In Death Chadwick Fitzhugh like this..."His hobbies were travel, fashion, gambling, and seducing young boys."
* In Death. Clearly, characters in those categories probably would love no one but themselves.
* In Death dealing in drugs, money, and murder. Lieutenant Eve Dallas, on her part, has no interest in being promoted to captain.
* In Death: Dick "Dickhead" Berenski. He has an egg-shaped head, he is considered creepy by a number of characters, he whines a lot about how every cop expects him to put his or her case at the top of the list, and he often has to be bribed with alcohol, sports tickets, and what have you to get him to put said case to the top of the list. He is also the chief lab tech, and he is a genius in his work.
* In Death. Eve and her unit were about to arrest an assassin named Sylvester Yost when the FBI shoved them out and Yost escaped because he saw them coming in. Karma hit the FBI pretty hard on that one.
* In Death: Eve Dallas and Nadine Furst use this trope many times. It is a testament to Nadine's integrity that she always adheres to her agreements with Eve and is willing to hold onto sensitive information until Eve gives her the go-ahead to take it public - and it's because Eve knows that she can trust Nadine to do this that she bothers to work with Nadine at all, when normally she has little but scorn for the media. Nadine says at one point that she ought to pay professional stylist Trina a thousand bucks to tattoo the words "Off The Record" on Eve's ass.
* In Death: Eve has this reaction in "Glory in Death" while questioning a suspect.
* In Death: Eve sometimes wonders why a billionaire would love someone like her.
* In Death, Eve talks to Baxter about his partner Trueheart. Baxter is letting Trueheart handle a case in which a woman was found manually strangled in Upper East Side, New York City. She had a lot of money, a miserable disposition, a huge mean streak, and a dozen heirs who are all glad to see her dead. Baxter then says, "I told him I thought the butler did it, and he just nodded, all serious, and said he'd do a probability. Christ, he's a sweet kid." Clearly, Baxter was just being funny.
* In Death, Eve wonders if a "lawyer witch" can be considered redundancy.
* In Death Ground and Steve White, there are numerous examples of this trope.
* In Death Ground by David Weber and Steven White the invading aliens are a classic example of this trope.
* In Death Ground' home systems, which the Bugs could use to pounce on humanity at any time. They have to get back and warn Terran H.Q., but they can't use the back door to get there and have to go around the long way.
* In Death Ground tabletop wargame), on every human-colonized planet the Arachnids take over, they eat the locals.
* In Death has a number of reviewers feeling that the series is going to come to an end soon.
* In Death has Commander Whitney tell the prison director to hand over files or he will have a media conference where he will give graphic details of Isaac McQueen's murdering, torturing and raping, and that the prison staff will be lucky if people don't go after them with "torches and pitchforks". Isaac escaped this prison, and the prison staff actually tried to cover it up and withhold this information, so they would deserve this sort of treatment.
* In Death has stated that she will never, ever reveal what his given name is.
* In Death, he murdered her. Roarke was unhappy when he discovered all of this years later.
* In Death (he's a murder suspect and she's the homicide detective), they marry by

the end of book 4. There are over 50 books in the series.
* In Death in the syndicate's pocket, and he made sure the investigation led to nowhere. What a horrible thing to happen!
* In Death: In "Vengeance in Death", Eve asks what's in the "meat stuff" she's eating and Roarke says "You’ll thank me for not telling you".
* In Death is definitely this. Eve even refers to him as a Bible-thumper close to the end of the book.
* In Death. It seems averted at first because while Belle is definitely attractive, Douglas is not so hard on the eyes himself considering that he is a lot older than her. Then it gets played straight when a life-threatening illness he's been struggling with finally proves to be too much for him.
* In Death: Just about every reporter, except for Nadine Furst, is this.
* In Death kill (that of a blackmailer who found out about her first crime) comes off as more cold-blooded and self-serving, and therefore less sympathetic.
* In "Deathlock", Mac uses a high pressure water outlet as a water cannon to push Quayle against overloaded fuse box to electrocute and stun him, before finishing him off with a punch.
* In Death. Notable examples are "mag" (possibly abbreviated from "magnificent" and roughly synonymous with "great" or "awesome") and various terms such as "iced" which are all clearly derived from "cool." Strangely enough, only the American slang is changed. British and Irish characters still use the same words and phrases.
* In Death novels since despite Eve's kneejerk hostility to them, their gestures in the direction of investigating her are perfunctory and they're basically on her side any time someone accuses her of misbehaviour. It may help that an IA guy has a firm case of unrequited love for her.
* In Death, on the cover. She has kept it up even after it was revealed that she was the author, likely for this reason.
* In Death! Peabody is a straighter example of By-the-Book Cop but not entirely.
* In "Death Penalty Final Appeal", it's one of the two movers who had moved the victim and her father into their new home; the other mover, who had a criminal record, was blamed and convicted
* In Death: Renee Obermann and William Garnet have a relationship that is just loaded with this. At one point, she tells him to walk her out like a good boy, sounding like she's treating him like a dog. Much later, he shows up at her place, looking all furious. He shoves her into her apartment and she tells him to not put his hands on her again. He responds that he'll do more than put his hands on her. It is revealed that she had sexual relationship with him at one time, and she broke it off, because that was her way to establish control over him.
* In Death reveals that Madeline Bullock and her son Winfield Chase had been in a sexual relationship for years.
* In "Death's Dark Angel" a corrupt sheriff threatens the Van Helsings with trumped-up charges in order to get them to follow him to Wade's place.
* In Death series: Averted. A number of the murderers in the series murdered their mothers first.
* In Death series, both the text and some of the characters treat New York City with a reverence bordering on religion. In one book Roarke feels the need to point out to Eve that New York isn't the center of the universe, to which Eve replies that it should be. The fact that New York state exists beyond New York City is generally ignored.
* In Death series by J.D. Robb, set in the 2050-2060s, real meat and coffee are expensive luxuries that only the mega-rich can afford. In the first novel of the series reformed (mostly) bad boy billionaire Roarke woos Lt. Eve Dallas by giving her a present of genuine coffee beans from the Brazilian plantation he maintains at great expense for his own personal supply. It's so immeasurably superior to the vile sludge that usually passes for coffee that Dallas's coffee becomes the envy of the entire Homicide division.
* In Death series, Dallas' idea of ultimate torment is...a hair and body treatment from Mavis' friend Trina. This from a woman who regularly works herself to

exhaustion, gets shot at, beaten up, blown up, etc.
* In Death series: Defense attorneys tend be subjected to this. Then again, the story is told from the perspective of a cop who arrests criminals and then has to testify against them, so ...
* In Death series: Eve and Dr. Mira have been raped as children. Dr. Mira seems to have dealt with it, while Eve basically spends the entire series trying to deal with it.
* In Death series: Eve Dallas has gotten into trouble a few times. Sometimes Roarke saves her life. Sometimes she just saves herself.
* In Death series, Eve Dallas regularly uses this tactic with both her former partner Feeney and her eventual partner Peabody, complete with occasional disputes about who gets to be the "bad cop" (it's almost always Eve).
* In Death series has a generally antagonistic relationship with most technology, and where vending machines are concerned the feeling seems to be entirely mutual. They tend to malfunction whenever she attempts to use one. It's so bad that she habitually has someone else put her money in for her and press the button whenever she wants to buy something from one.
* In Death series. Peabody thinks of Dallas this way, while Dallas is impressed by Mira's grace, style and poise, to the point of her mental descriptions reaching near girl-crush levels.
* In Death series, protagonist Lt. Eve Dallas is a detective in the Homicide division, making the trope obligatory: she would have very little basis to investigate if there weren't at least some suspicion of murder.
* In Death series. There is space travel in Robb's 21st century, but it's mostly background, and there's no mention of non-human life. (Aside from the monsters Eve chases.)
* In Death. She is a cop who is crude, rude, not interested in money, believes in the law, and has morals that are basically black and white. He is a former thief who is suave, charming, has more money than you can imagine, believe more in his conscience than in the law, and his morals are very much grey. Fortunately, one thing they do have in common is that they both were raised by bad parents and had lousy childhoods.
* In Death. She tries desperately to ignore the millions that Roarke quietly keeps slipping into her bank account.
* In "Death Takes a Curtain Call," the defection of two lovers and ballet students is complicated when they become murder suspects.
* In Death that he always drinks real coffee, smokes real tobacco, and eats real beef. The coffee in particular is insanely expensive and is made much of by Eve and her fellow cops.
* In Death that he can afford real meat, real tobacco, and real coffee; Eve considers the food and the coffee to be the second-best benefit of being married to Roarke, after the man himself.
* In Death that the Homeland Security Organization was monitoring Richard Troy, Eve's father. They knew that she was with him, and that he was raping her, but they sat back and did nothing. Roarke tells Eve that he intends to hunt them down and make them pay for this. Eve wants him to leave it alone. So they try to ignore it and focus on other matters. Later, he brings it up, and Eve can only think "Here it was. The big glowing elephant in the room that she hoped to ignore. And it was trumpeting."
* In Death, the second book in the series, thanks to a murderer with an envious grudge against women in the limelight.
* In Death to find a young child of ten try and pick his pocket. His response? "I was better than you when I was six."
* In "Death Warrant", a ruthless bounty hunter, who took the gun from a target, gets a taste of his own medicine when the mother of a boy he accidentally killed puts a bounty on his head.
* In Death where Mavis's daughter Bella is born in January of 2060, and by the summer she is walking and talking.
* In Death: Whitney gives Eve 36 hours to either book Roarke or rule him out as a

suspect. Later, when Eve summons Roarke to answer questions, she says he has 48 hours to show up or the Station Guard will escort him. He complies.
* In debating, there is a related trick/fallacy called "Pivoting", where one person will ask a question that can either be answered with one word (such as "no" or "15") or a sentence or two of explanation, such as "because we ran out of money", and instead of answering the other person will go off topic (often rambling at length) to try to get out of answering and in some cases to drag on long enough the other person (and the audience) just forget what the original question was. Unfortunately, most novice debaters aren't adept enough to recognize this trick and say something like "you're not answering my question, did X happen or didn't it?"
* In December, 15, 2011, Garfield told a spider that was under a mistletoe to forget it and that he'd rather kiss a dog. Odie then showed up.
* In December 1939, one tank, the "Lorraine" was experimentally up-armored. After refit, her frontal armor was 90 mm thick, side armor was 65 mm thick, and she was basically invulnerable to german anti-tank guns even at point-blank range. Her weight, though, reached the 75 ton mark, which made "Lorraine" the heaviest tank still actually commissioned.

* Indeed, CIA agents are generally permitted to tell whoever it is they're in a long-term relationship with at the time, as well as certain other people if the circumstances require it. This is a lot easier (for most agents, at least) than you might think; being a CIA agent isn't usually so much about having a fake identity and running around chasing people as it is a lot of making contacts and so on while using your own name and lying about your job to everyone on the outside. As far as your parents (for instance) or any short-term flings you might have are concerned, you probably work for the Department of State or Defense or Agriculture, or perhaps even a private company.
* Indeed, considering its iconic status, "Just Like Heaven" wasn't even a

particularly big hit in the UK either, only reaching #29. They've had four top ten singles in their home country, and while most Brits would correctly guess that two of those were "The Love Cats" and "Friday I'm In Love", the chances are that most would struggle to identify "Lullaby" and "High" as the others. "Lesser" hits like "In Between Days", "Close To Me" and "A Forest" are much better remembered.
* Indeed, even the aliens acknowledge this: one major difference between Yeerks and humans is that Yeerks will give up if they know they're going to lose, while humans won't. Some, like the Yeerk that controlled Jake or Visser Three, think this is basically pointless, but Visser One was smart enough to realize this would make conquering humans a harder task to accomplish.

* indentured servant. (However, he died at the young age of 39; many glassmakers of the time met a similar fate due to the toxic fumes.)
* Indentured service in the 17th and 18th century was basically an Unreachable Promised Land. A poor man would basically sell himself as a slave to get to the Americas and work as a slave for several years at the plantation, factory or farm. Once the period of servitude was over, the indentured servant was free to live as an inhabitant of the land. Providing, of course, that he survived the harsh treatment, climate, work and diseases first.
* Indentured Servitude: A laborer who is obliged to serve someone else for a certain period of time.
* Indentured Servitude the Athenian lawmaker Draco passed a law that any man who was owed a debt by another could claim the indebted party as a slave until the debt was paid off. This caused such strife that Solon banned the practice—respecting only Athenian citizens—when he was asked to reform the city's laws.

Essentially that the administration was "arbitrary and capricious" in making a rule that would up end 800,000 people’s lives. Although in the majority opinion, Jusitce Roberts wrote that they were not ruling on whether or not the program was unconstitutional in and of itself.
* Independence Day (2008) both use this as their main point in dealing with a world full of bad people.
* Independence Day address before he and the other pilots worldwide get into their planes for their battle. It goes something like this:
* Independence Day, a decrepit satellite gets pulled in by the approaching alien mothership and explodes against it. The actual city destruction scenes avert this, though. Cars get thrown up, smashed, and consumed in the blaze, but they don't actually explode.
* Independence Day, a fighter pilot is able to fly an alien spacecraft with a relative minimum of fumbling:
* Independence Day. After Russell Case flies his jet into the alien ship's primary weapon and destroys it, the mission control personnel in Area 51 start cheering.
* Independence Day After spending 2 days escaping the City Destroyers July 4th is the day Humanity sick and tired of running across their nations launch a global coordinated attack against the Alien forces.
* Independence Day: All of the Harvester aliens are this by default. Their entire civilization is based around going from world to world draining entire planets of all their resources and wiping out all life on the planet before moving on to the next world.
* Independence Day, all the while complaining to himself of all the crap he's been through up to that point.
* Independence Day and also that the material from which the alien fighters is made seems to have been grown like a tree or something.

* Independence Day and their planetoid-sized mothership have greebles in a few spots, but otherwise they fit the bill.
* Independence Day anyway if it can be hacked by a TV repairman using Apple OS.
* Independence Day a secret even from the President, so that if anyone would ask, the President can never be caught lying and accidentally reveal it. Which is exactly what happens in the movie, when the President rebuts Julius Levinson's accusation of a cover-up.
* Independence Day, a trio of aliens who died in the Roswell, New Mexico crash are kept on display in a vault at Area 51.
* Independence Day) attack on one of the alien craft; every missile fired by the numerous fighter jets hits the ship's shields, doing absolutely nothing.
* Independence Day, audience gets to see what appears to be a chunk of a destroyed planet, having it's inhabitants wiped out by the Harvesters, just as the Harvester mothership is making her way towards Earth.
* Independence Day because of this since the official policy of the U.S. military is that there are no aliens at Area 51 and there never have been.
* Independence Day: Before the alien war, President Whitmore took a lot of crap from others who either hated his policies or felt that he was too young to run a country. Much of what happens on the news prior to the attack is pretty much everyone badmouthing him.
* Independence Day. Besides President Whitmore, he's the only official who's able to keep a clear head during the crisis, even when the initial counterattack is falling apart. He also endorses David's plan to attack the mothership as it's the only feasible plan they have left.
* Independence Day, both the child and the dog of the protagonist survive all of the events, including a ridiculous scene where the dog manages to leap out of the way of a city-levelling fireball just in the nick of time.
* Independence Day, but it catches up to them. Cut to their friends on the ground having their victory celebration interrupted by news that they had lost contact with the heroes. We get about five seconds for the mood to set in before they see something on radar, drive out to the desert and find them walking away from their crashed ship unscathed.
* Independence Day can barely contain his enthusiasm for the aliens' technology and anatomy.
* Independence Day certainly qualify. Fired down from the saucer, they can easily demolish an entire city.
* Independence Day city-killer ships: it launched countless fighter craft, and was capable of shooting a giant laser beam levelling anything on the ground beneath it.
* Independence Day crew dubs him "Foily McAntagonist" for his pointless and completely motive-free naysaying). At this point, the President gets tired of his crap and fires him.
* Independence Day cursing an unconscious alien as he drags it across the desert. A review said that the second would remain enjoyable even after the explosive effects were old hat.
* Independence Day David gets airsick on Air Force One, and an especially bad case is triggered when his father innocently babbles on about how unaffected he is.
* Independence Day, David's father berates him for being this because he's got impressive skills as a programmer and scientist but he's using them as an employee of a cable company — essentially a satellite TV I.T. guy.
* Independence Day, David's father Julius is leading a prayer from the Torah as the aliens prepare to obliterate Area 51. The former Secretary of Defense walks up to join them, but mentions he isn't Jewish. Julius looks up, remarks "Eh, nobody's perfect", then invites him into the circle.
* Independence Day, deals with another group of fighters who faced the invaders in Saudi Arabia.
* Independence Day does both this and packs a core-based death beam. The downside is that it's rather fragile and relies a great deal on its flying complement to protect it and draw fire.
* Independence Day down by swathes of Invader defender craft over the city

destroyer hovering atop the ruins of Los Angeles, another large swarm of defender craft are dispatched to El Toro, where they strafe the base and destroy any aircraft on the tarmac and any attempt at a second wave of the counterattack.
* Independence Day encased in an exoskeleton with numerous tentacles used for offense.
* Independence Day) ends up with a friend on one knee (demonstrating how to properly kiss ass) and holding a wedding ring box (which had just fallen out of Hiller's locker). At that precise moment, another pilot happens by, sees the situation, and walks off with his hands up in a "don't mind me" gesture.
* Independence Day, everyone knows about the aliens, and their technology has inspired a human technological revolution.
* Independence Day: Everyone who takes part in devising the plan to save the world is American. There is no international committee or involvement of the global scientific community. The capper comes at the end of the movie when the Americans discover how to destroy the alien ships and send the message out to everyone else in the world. When a British officer is informed that the Americans have devised a solution, he snaps, "It's about bloody time!" Many audience members interpret that to mean that the world was just sitting around waiting for America to solve things.
* Independence Day example, a rooftop full of people holding up welcoming signs to the 15-mile-wide saucers are the first to be annihilated on-screen. Hilariously, earlier in the movie a news item is shown on TV warning the people of L.A. not to fire their guns at said ships, to avoid accidentally sparking an interstellar war.
* Independence Day exists, and nobody told the President. He's not happy when he finds out.
* Independence Day featured many reporters during the first act, including Barry Nolan, Wendy Walsh, George Putnam, and John McLaughlin.
* Independence Day features something similar as the Alien Mothership explodes: The explosion spreads horizontally on the screen, eventually engulfing the camera. Might have looked like a Praxis Shockwave from another angle.
* Independence Day features two. One is aboard Air Force One, where Whitmore, Grey, and Nimzicki observe the initial counterattack. Later, the control room of Area 51 is converted into one as they process all information on the rapidly losing fight.
* Independence Day. Foreshadowed earlier in the film with discussion that he was elected as the youthful war hero, only to be seen as being too young to be an effective politician.
* Independence Day goes further, establishing that the aliens are organized into hive minds ruled by queens.
* Independence Day goes into detail on how it drew heavily from the iconography of the genre in order to make the aliens as arch and recognizable as possible.
* Independence Day goes off script when the alien turn out to be only mostly dead and psychically takes control of the poor man in the surgical suite.
* Independence Day had shots of this interspersed with action shots to drive home the scale of the aliens' attack across the world (and by "world" we mean the continental United States).
* Independence Day has almost everything fit on the 4th of July as mankind is celebrating 20 years since the first movie's victory.
* Independence Day has the aliens destroying the White House, though they were simultaneously attacking many other cities as well.
* Independence Day has the Earth defeating a seemingly unstoppable alien invasion via a computer virus.
* Independence Day" has this rhythm, as the alien ships appear in various parts around the world, literally bringing doom and war with them.
* Independence Day, he asks General Grey to transfer him back to El Toro, only for Grey to sadly inform him that El Toro has been completely destroyed.
* Independence Day, he says that people tell him that it's a "Popcorn movie", but he insists on criticizing the movie anyway.
* Independence Day. He's head of security for Area 51 and gets the first confirmed kill of an alien invader. Later, when the base comes under attack and thousands of civilians are still outside, he personally oversees their evacuation into the

underground laboratories.
* Independence Day in a captured alien fighter to upload a virus. Went well, up until they tried to leave...
* Independence Day includes the faux newscasts depicting how TV news reported on the arrival of the alien craft. One of the Making-Of featurettes used to promote the film also opened like this.
* Independence Day, in France it was the Eiffel Tower, in New York it was the Empire State Building. The Sydney Opera House and the pyramids both escape undamaged, though.
* Independence Day In the same way a poster exposed to direct sunlight fades over time the dyes used in the flags by the Apollo missions have all completely faded away leaving nothing but white pieces of fabric in their place.
* Independence Day in this one - the ship's center is hovering a teeny bit over the mast of the Empire State Building. That would mean the spaceship was scraping the tops off of the World Trade Center towers.
* Independence Day inverts the trope around by almost exclusively focusing on the U.S.A. getting reamed by the invading aliens, while the destruction across the globe is mostly just mentioned in passing.
* Independence Day is a big one. In fact, this trope seemed to be largely the premise of the entire film.
* Independence Day is "The Third Day". Probably because Israel's own Independence Day is a very important holiday.
* Independence Day. It sort of makes sense, as the alien laser, instead of hitting the people on the ground, explodes right next to the ship. Also it probably detonated the armed missile still attached to the plane (thanks to a malfunction).
* Independence Day lasts from July 2 to July 4, though supplementary material makes it clear that conflicts against alien survivors last for several years.
* Independence Day manages to outmaneuver one of the craft that chased him from Los Angeles onto the Nevada desert, and he forces it to crash and captures the enemy pilot.
* Independence Day: Marty (Harvey Fierstein), Jeff Goldblum's boss at the satellite TV company. His first reaction on hearing of the planet-threatening danger? He calls his mother, and his therapist.
* Independence Day, migrating from planet to planet, destroying the native population, and consuming all the resources before moving on, but when diplomacy is attempted with a captured alien, it's shown that they're intelligent enough to understand that other species perceive their genocidal ways as wrong. They just don't care.
* Independence Day military forces to defeat the city-sized ships in Earth atmosphere, one of whose crashed remains they're looking at. Of course the actual "fireworks" he's talking about are the remains of said mothership, now burning across the sky.
* Independence Day. Most of the major cities on Planet Earth have been wiped out, and all attempts at attacking the aliens have failed so far. But there are still planes, and pilots to fly them. And besides, it's the Fourth of July!
* Independence Day never really happened, only to be told by one of his advisors, "Uh, Mr. President, that's not... entirely accurate".
* Independence Day, one of the people who wish to meet the aliens, when shown on TV, shouts "Oh God, I hope they bring back Elvis!"
* Independence Day on the alien destroyer over the city of Houston (and obliterating the previously undamaged city below), the Secretary of Defense thinks that using another nuke on another American city might still work even though the first one failed utterly. The President overrules him.
* Independence Day, President Whitmore blames himself for not preparing for the possibility that the aliens were hostile, leaving millions of people in Los Angeles, New York, and Washington as they were incinerated.
* Independence Day. President Whitmore is repeatedly told by his wife that he's a bad liar when he tries to tell untruths. It's implied that his honesty is one reason he was elected in the first place. His staff apparently gets around this by

not telling him things.
* Independence Day, President Whitmore is talking to one of the aliens that are destroying earth's cities and killing humans. He tries to find out if there is a way to negotiate a peace:
* Independence Day: Pretty much every time there's an explosion that the heroes escape, they do so by this trope.
* Independence Day) proves vital to humanity's battle against the alien invaders.
* Independence Day ran it as a Sunday night movie and The CW on a Saturday afternoon.
* Independence Day, rather than anything uniquely "cool" about the design of the ships themselves. The mother ship was "only" 500 kilometers across, yet 1/4 the mass of the Moon. That made it 20 times the density of solid lead, on average. Tell me that ain't cool!
* Independence Day: Resurgence, being the leader of a group of aliens attemping to defeat the Harvesters. He only wants to help the Earthlings.
* Independence Day: Resurgence by having them meet. While Levinson doesn't know much about Goldblum (confusing him for both Dabney Coleman and Bowser from Sha Na Na), Goldblum is a total fanboy, even praising Levinson's mahogany eyes!
* Independence Day: Resurgence comment on the alien attacks, and on movie posters, the Statue of Liberty is replaced with the RX-0 Unicorn Gundam.
* Independence Day: Resurgence from the first film by having them plasma-drill down to the mantle and harvest energy from the Earth's core.
* Independence Day: Resurgence, humanity barely survives the alien onslaught and manages to destroy the alien fleet at great cost. Come the sequel 20 years later, a new, much larger, alien armada is on the way to put down the upstart humans, possibly implying that the first one was just a small flotilla by the alien standards.
* Independence Day: Resurgence. It's either a good movie with its moments that can hold out on its own, or it just doesn't live up to its predecessor.
* Independence Day: Resurgence: President Whitmore is treated with great respect, widely viewed as the man who lead the successful human counterattack against the aliens.
* Independence Day: Resurgence sees Brakish Okun waking up from a 20-year coma and is able to walk around and talk as if he had just woken up from a nap. After being asleep for that long, his muscles would be suffering from muscle atrophy and would barely be able to talk.
* Independence Day: Resurgence, set 20 years later. Humanity has rebuilt in the meantime and was able to study and adapt some of the alien tech, but the second alien force appears to be much larger than the first one.
* Independence Day: Resurgence. Since then, humanity has rebuilt and has reverse-engineered some alien tech to create more powerful weapons and defenses, as well as allowing humans to establish bases on the Moon, Mars, and Rhea (one of Saturn's moons). Even then, though, it may not be enough to defeat an even greater force coming for Earth.
* Independence Day: Resurgence soft-released on June 22nd, 2016, nearly 2 weeks before the 4th. Not only did 2016 mark the 20th anniversary of the first movie, but July 4, 2016 was the U.S.A.'s 240th birthday.
* Independence Day: Resurgence, suiting up and getting behind the stick again to defeat the aliens in order to protect his adult daughter.
* Independence Day: Resurgence: The Harvester Queen is much larger than its pint-sized drones, to the point one of its "hands" is the size of a bus the Queen pursues.
* Independence Day: Resurgence: The Sphere, a benevolent alien supercomputer discovered by the protagonists, has gathered survivors of the Harvester aliens' previous attacks on a secret planet to train them for warfare. At the end of the movie, it asks humanity to join and lead the war against the Harvesters.
* Independence Day: Resurgence when David Levinson watches Dubai's Burj Khalifa getting dropped on top of London's Tower Bridge. "They like to get the landmarks." Subverted when the giant spacecraft slides to a halt just before hitting the

rebuilt White House. The Eiffel Tower also surprisingly survived Paris being laid to waste.
* Independence Day: Resurgence), who passed away in December 2015 from complications of Alzheimer's disease.
* Independence Day revels in the wholesale destruction of the populated centres of the world by alien forces. Love of this trope must be the reason that a movie which features the destruction of the White House is shown on American television every year on the Fourth of July.
* Independence Day, Russel Casse attests to having been abducted by aliens. Those who don't believe him crack jokes and ask if he was ever sexually abused on the flying saucer, suggesting this trope.
* Independence Day, Russell Casse and sons Miguel and Troy have their names used several times, but never daughter Alicia.
* Independence Day, Russell Casse, now sobered-up, accidentally starts a missile launch sequence while preparing for takeoff. After frantically stopping it, he mutters to himself "I picked a hell of a day to quit drinking...".
* Independence Day's character at first, accidentally, when piloting the captured UFO. He then turns the control instructions upside down and retapes them to the dashboard.
* Independence Day. Somebody walks in on what looks like a pilot proposing to another pilot.
* Independence Day song by R.E.M was playing in the background of one of the first scenes, where the UFO on the moon is detected by the radar.
* Independence Day speak our language. They communicate with us through telepathy.
* Independence Day. Steven Hiller pays passing attention to the news and assumes it's about the "small earthquake" he and his wife felt a few minutes prior. It's only when he gets outside and notices everyone hurriedly packing their cars that he takes a good look around and finally sees the several-mile-wide spaceship. Clearly, Hiller is not a morning person...
* Independence Day-style energy blasts ... except the Leaning Tower, which they merely tip over.
* Independence Day that can torch an entire city. For defense, they possess countless fighter craft which make short work of any attempted counter-strike. In addition, we get a glimpse of transport ships getting ready to bring their ground forces to Earth.
* Independence Day that software hacking was unheard of. The flying saucers are also weak to jets crashing into their giant death rays.
* Independence Day that the alien weapons were powered by antimatter is correct.
* Independence Day, the alien mothership is mistaken for a meteor until it's discovered that it is slowing down as it approaches Earth.
* Independence Day, the aliens destroy Washington DC and several other national capitals, including London, Paris, Berlin, Moscow, Jerusalem, Amsterdam, Tehran, Beijing, and Tokyo.
* Independence Day: The aliens just show up and blow up cities, the only time they communicate with humans is when one is taken prisoner and takes telepathic control of a scientist in order to demand its release.
* Independence Day, the assembled counterattack fighters and ground commanders watch as the little dot representing the President's missile flies all by itself towards the alien ship, wondering if the plan to disable the enemy's force fields worked. It impacts harmlessly against the shield. But then the Prez fires a second missile... everyone watches apprehensively... and it flies past the terminus line of the shield and explodes against the ship itself, showing it's now vulnerable to attack.
* Independence Day: The City Destroyers' main cannon. First, the petal-like doors surrounding it open, bathing the target city in an eerie-calm blue light. As eight pylons approach the central spire, it also unlocks and lowers the firing mechanism, the "Hammer." The pylons begin charging the spire, activating the targeting laser that shines down. Then, the "Hammer" fires an energy pulse which obliterates the target building, and the chain reaction quickly moves outwards to wipe out the

target city.
* Independence Day. The closest it comes to a dialogue is when a capture alien takes telepathic control of a half-dead scientist for a pleasant chat with the President. The President asks if peace is possible; the alien curtly answers "no peace." When the President asks what they would like us to do, the alien simply responds, "Die."
* Independence Day: The control room of Area 51 has several maps and displays tracking the alien ships, along with plotting which cities have been destroyed.
* Independence Day. The film's story explicitly begins on July 2nd, the day of the film's release (which was a Tuesday), and ends on the 4th.
* Independence Day, the government sends military choppers displaying greetings in all the languages of the world. It ends badly.
* Independence Day: the monster smashes into the window but it doesn't break. And then promptly Inverted.
* Independence Day. The producers knew how vital the shot was: It was one of the first special effects shots put into production, so that it would be complete in time to be used in the trailers.
* Independence DayThe second film maintains this, as the queens' objective is still to harvest the Earth, there's just a side note of revenge. The humans by the end get invited to a coalition of other species that had survived the harvesting of their planets, with the purpose of hitting the Harvester aliens at their homeworld and exterminating them in turn.
* Independence Day. These massive ships are fifteen miles wide and appear to move slowly to their next target (one takes 12 hours to move from New York to Philadelphia). They seem to lack any weapons, short of their primary cannon which is capable of wiping out an entire city. Even when the humans manage to find a way to bring down their shields, the ship's size and armor easily soaks up their missiles until they find another weak spot.
* Independence Day the trope with the considerable concern about the collateral damage which would be caused by staging a nuclear attack on one of the alien ships, but then plays it straight anyway in the climax:
* Independence Day. They are primarily used to destroy enemy settlements and carry hundreds of fighters to take care of any potential counterattack.
* Independence Day. This is a media company that is covering the event: shutting off transmission long before others even guess of any danger would cost them millions.
* Independence Day. Three others are said to have been studied in such a manner after the Roswell crash; their remains are kept on display.
* Independence Day to let humanity know straight-out that there can be no possible peace with them and that the only thing they want humanity to do is "die."
* Independence Day tops it with a larger mothership that dwarfs the Atlantic ocean and has its own ecosystem.
* Independence Day toys with the "don't want to die a virgin" variant twice. In the first instance, after the alien ship appears over Los Angeles, teenaged Alicia Casse's then-boyfriend tries using "do you want to die a virgin?" to persuade her to have sex with him, but is foiled by the arrival of her older brother. Later in the film, Alicia herself tells another boy that she doesn't want to die a virgin, to which he replies something to the effect of "we'll both die as virgins together." The latter scene, however, only made it into the Special Edition DVD version of the film.
* Independence Day - Two of these can be heard within the timespan of a few minutes.
* Independence Day was widely marketed in posters and toys as ID4 - despite the fact that the inclusion of the '4' is completely redundant.
* Independence Day we hear this newscast in the middle of the refugee convoy:
* Independence Day we see North America, of course. It was noted that to do this, the Earth's tilt was wrong for July.
* Independence Day: What initially looks like naked aliens is later established to be some type of environmental/combat suit. Under the suit they're naked.

* Independence Day, when Marty Gilbert finds out the aliens are about to attack, he quickly worries about who he needs to warn.
* Independence Day, where the alien attackers are certainly capable of flight and combat in space, but the vast majority of scenes involving them happen within the atmosphere.
* Independence Day where Will Smith's character and his best friend are discussing brown-nosing in a locker room. His best friend is on one knee when Smith drops the engagement ring he was going to give his girlfriend. Just as the best friend holds it up to give it back, someone else on their squad passes by, makes a "I didn't see anything" gesture, and leaves.
* Independence Day, which is a safe haven because of its top secret nature.
* Independence Day: While the giant spacecraft are not exactly monsters, they're definitely treated in the same way. The ships are shrouded in mysterious stormy clouds until they actually reach the destinations cities and emerge in their full terrifying majesty. The aliens themselves are kept mostly hidden, too: the first real appearance by one is when Hiller manages to disable its ship and then knock it out, only as a bunch of lashing tentacles and a brief glimpse of it in its biomechanical suit. The alien doesn't fully appear out of its suit until even later, at the end of the second act.
* Independence Day: While the work that Dr. Okun and his team do along with their disheveled appearances scream this trope, they’ve been like that before the alien invasion started. Dr. Isaacs becomes a more literal version of this when all of the others are killed or incapacitated, although his role afterwards isn’t that huge.
* Independence Day, who managed to take out an alien fighter ship surrounded by an impenetrable force field using some tricky flying and his parachute, in a dogfight that destroyed the entire rest of his squadron. Later, he pilots another alien fighter ship in execution of a plan that would lead to the destruction of a mothership a quarter the size of the moon, and containing probably several thousand colony ships and the vast majority of the alien race.
* Independence Day who take what they need and wipe out what's left of the planets they ravage.
* Independence Day. Will Smith drives across the desert with an unconscious alien in the back of his truck. He brings it to the secret lab without incident. Very unexpected.
* Independence Day: With humanity's first counterattack failing, the revelation that the aliens' shields are powerful enough to withstand a nuclear blast, and the revelation that in the next 36 hours they will be joining the long list of species wiped out by the invaders, the War of 1996 is looking like this, that is until David gets an idea from his father that can take out the aliens.
* Independence Day worlds. Guess what happened when they picked a fight with humanity?
* Independence Day would start releasing trailers during the Super Bowl.

* Independence War 2, the digital Clay is not too happy about this state of affairs.
* Independence War in that the energy required to create a "capsule" of isolated space-time (basically, a miniature universe) is impossibly high within normal gravity fields (Lagrange points are where two major bodies have their gravity cancel out), and independent "capsules" can only last so long before being reintegrated with the main universe. Because of this, pilots can expect to jump out of a Lagrange point just to turn around and go back in several times when traveling a long way.
* Independence War that can be used for ramming attacks. Because of these

limitations, you can't really rely on them instead of dodging every shot that comes your way, but a few blocked PBC projectiles may very well make the difference between life and death.
* Independence War: There are starfighters, and you sometimes command them as wingmen in addition to fighting them, but the craft you pilot is generally much larger (usually a corvette), command section aside. You never pilot the starfighters directly.
* Independence War. There's a specific set of shields, called Aggressor Shields, created precisely to be activated at the moment of ramming to reduce damage on your own craft.

* Independent/Indie also has different connotations in pro wrestling than it otherwise would in conversations about something else. It is mostly used to describe small promotions, as even if you are owned by a television company rather than independently, such as when ROH was purchased by the Sinclair Broadcast Group, you'll still be considered "indie" until you draw 10,000 people without help from another promotion and/or gain a major network TV deal. FMW was independently owned but during its heyday when it drew 50,000 was considered "too big" to be called "indie".

* Independently-Made Partner: Two minority characters are established independently of each other. If they have any interactions at all, it's as friends and nothing more. However, this is breaking down in the Time of Tumult, and more and more Sidereals are refusing to play their elders' games.
* Independent State of Croatia), Eastern Orthodoxy was outlawed alongside Judaism because it was the Serbs' favored religion, while the State only recognized Roman Catholicism and Sunni Islam as "brother religions that kept the blood of Croats true". As such, Serbs faced persecution from both Catholic and Muslim fascists via ethnic cleansing, deportation and forced conversions.

* In Destiny, Kira keeps the Freedom but because of the peace treaty that limited use of certain technologies by the Earth Alliance and ZAFT, it is still the most powerful suit on the battlefield until Shinn exploits Kira's reluctance to kill and successfully destroys it. Kira then upgrades to the Strike Freedom that allows him to be the biggest threat once again. Athrun initially has the Saviour which is inferior to the Justice which was destroyed at the end of the last series. The Saviour is destroyed around the half way mark but Athrun doesn't get his upgrade, the Infinite Justice until much later and spends a lot of time out of commission. Other ways of affecting it still matter, though, as does, in the case of creatures, reducing toughness to zero. Creatures like Progenitus and Darksteel Colossus take it a step further; even if they somehow would die, they go into their owner's deck instead.

* India’s, Indonesia's, Malaysia's, Brunei's and Thailand's version of Disney+ (and also very likely The Philippines' version too) is to be done through a partnership with Disney-owned Hotstar. This means that most in the region need to subscribe to Hotstar to get Disney+ and there is no way to get the service

otherwise (the only exception is Singapore who're getting the proper Disney+). Also, because the account servers are technically Hotstar's, your international Disney+ account will not work and you will need to open an account with Hotstar just to keep using the service in these countries. And unlike Disney+ which uses an e-mail account for the user ID, Hotstar's variant relies on a cellphone number- if you don't own a cellphone, you can't sign up for Disney+ Hotstar. The app is also structured differently, so it will not work with a Playstation 5's media remote. Lastly, these versions of Disney+ superimposes a very revealing watermark over a corner of the video, making it dangerous to use on a CRT or Plasma display. Did we also mention that unlike the proper service, there are huge swathes of shows and movies missing, and there are local shows that people do not care about nor want injected into the service?

* India has had a “wall” of sorts to protect it from invasions for millennia — the Himalaya mountains, which are the highest in the world. It is due to this mountain range, that there isn’t much more of a Chinese or Mongol influence on India’s demographics and culture. The few times the country has been invaded, the invaders came from the western desert (Alexander, Afghans) or the sea (British, French, Portuguese).
* India has the National Security Guard aka the Black Cats. This organization was created as an elite bodyguard unit after Prime Minister Indira Gandhi was killed by two policemen on her protection detail. This group carefully screens applicants, puts them through specialized VIP protection training, and are noted for their distinctive black camouflage. One slight aversion is that the NSG Black Cats aren’t exclusively for the Prime Minister’s protection - any national or state level political leader or his/her immediate family who is deemed to be a high priority terrorist target is assigned a Black Cat protective detail.

* Indiana Jones Adventure, Mara's temple contains a chamber filled with crawling rats.
* Indiana Jones Adventure mentions that anyone who looks into the eyes of Mara will be sent through the "Gates of Doom".
* Indiana Jones Adventure, riders are greeted by an animatronic figure of Indy who says several phrases, including "don't tell me that wasn't big fun."
* Indiana Jones Adventure World, one of the scenarios involves tracking down a kidnapped Sallah, who leaves a trail of his clothes. Chibi-Indy snarks that he hopes Sallah still has his pants when he's done making the trail.
* Indiana Jones: An adventurous archaeologist opposes corrupt 20th century dictatorships (and one time, a bloodthirsty cult) seeking to use powerful artifacts for nefarious purposes.
* Indiana Jones and His Desktop Adventures as the weakest enemies in the game. They are found in both the Amazon jungle and the caverns beneath.
* Indiana Jones and His Desktop Adventures, found in the Amazon jungle and the caverns beneath. They go down quickly and do little damage, and are more mildly annoying than dangerous.
* Indiana Jones and His Desktop Adventures in a row. Bring a Demon Mask to the amateur archaeologist so that he will give you the Obsidian Knife, which you'll give to a native who'll give you a Headdress, which you'll give to a tourist in exchange for a Jaguar Statue, which you'll give to another native in exchange for a rope, which—finally—will be used in an environmental puzzle instead.
* Indiana Jones and His Desktop Adventures in the game—at the easier difficulty levels they'll barely do any damage, and it's easier to simply ignore them.

* Indiana Jones and the Fate of Atlantis, a series of massive brown tentacles emerging from a canal reveal the presence of a giant octopus luring inside. After feeding it a crab, the tentacles will stop emerging, meaning that you can safely cross the canal.
* Indiana Jones and the Fate of Atlantis, but the project was stopped due to a cease and desist.
* Indiana Jones and the Fate of Atlantis has several, including fistfights, car chases and flying a hot air balloon. You are presented with three choices midgame: solo mode, cooperative, or action. The balloon minigame has to be done on all routes (but is quite easy), whereas not picking the action route will enable you to bypass pretty much every other action scene except for one: You must beat up at least one of the guards on the outer ring of Atlantis to steal his rations for a puzzle.
* Indiana Jones and the Fate of Atlantis, Indy investigates a set of cat figurines on a table. Since there are four figurines, it would only be logical to click on each one and see if there is anything unique about them.
* Indiana Jones and the Fate of Atlantis into a fire exit (Wits), or knocking out the aforementioned guard in a fight (Fists).
* Indiana Jones and the Fate of Atlantis)— Indy and Sophia fall into a pit of alligator skeletons, which are of course long dead due to the temple being abandoned for millenia, prompting Sophia to remark that it isn't really much of a deathtrap anymore.
* Indiana Jones and the Fate of Atlantis several characters were homelier most notable with Kerner, the right hand of the main antagonist.
* Indiana Jones and the Fate of Atlantis shows that Indy loves this trope. After freeing Sophia Hapsgood from her prison they get into an argument, she hits him, he hits back, she goes to hit him again but Indy yanks her into a deep kiss.
* Indiana Jones and the Fate of Atlantis was adapted into a four part comic book series by Dark Horse Comics.

* Indiana Jones and the Kingdom of the Crystal Skull after taking off, right before it jumps into "the space between spaces".)
* Indiana Jones and the Kingdom of the Crystal Skull after the infamous 'nuking the fridge' scene.
* Indiana Jones and the Kingdom of the Crystal Skull, an amphibian vehicle lands on a huge tree that was growing on the ravine's side. The car is gently lowered in to the river below, then the tree recoils and hits the cliff wall, knocking down several Soviet soldiers.
* Indiana Jones and the Kingdom of the Crystal Skull appears, they take out several Russian soldiers but Dovchenko suffers the most when several of those ants goes inside his mouth and then they drag him into an anthill.
* Indiana Jones and the Kingdom of the Crystal Skull, as an advertisement strategy, or if they're really nuts (which is unlikely).
* Indiana Jones and the Kingdom of the Crystal Skull as villains again, prompting him to change the villains to Soviets.
* Indiana Jones and the Kingdom of the Crystal Skull as villains. When Indy's long-time friend becomes a traitor, the FBI suspects Indy himself, and he's nearly fired from his teaching job because of it. (The Dean manages to reduce this to a "temporary leave of absence", and resigns out of protest because of it.) A character that shows up briefly is Indy's former CO from World War II, who clearly thinks that the obsession over the Red Scare is absurd.
* Indiana Jones and the Kingdom of the Crystal Skull, at the end. Indy, Marion, Mutt, and Ox escape the ancient temple as it's being pulled into an

interdimensional vortex. A huge deluge of water comes after them and it forces them up, the only way out of the underground city.
* Indiana Jones and the Kingdom of the Crystal Skull banned for portraying the Soviet Union in a bad light. The film was released over their objections.
* Indiana Jones and the Kingdom of the Crystal Skull. Be careful what you want, and all that good stuff.
* Indiana Jones and the Kingdom of the Crystal Skull could easily fall in several of the above categories.
* Indiana Jones and the Kingdom of the Crystal Skull. Fairly early in the movie, he's with Indy. Then, we discover he's working for the bad guys, then about halfway through the movie, he is still concerned about Indy's health, but is still working for the villains. A little more than halfway through the movie, he says he's a double agent, then at the end, he reveals he was lying about being a double agent, but he seems repentant of his actions when he chooses to stay in the collapsing temple while Indy's friend and family escape. In all likelihood, he was just continually picking the paths that would lead to his one true goal: knowledge and treasure. His "repentance" was just the realization that the alien ship contained all he ever sought, and he no longer had any need or desire to battle that stubborn old adventurer.
* Indiana Jones and the Kingdom of the Crystal Skull for the inaccurate depiction by having Indy explain that what he and Marion are sinking into is not actually quicksand, but some sort of collapsing dry sand pit. It's parodied when Indy starts to lecture Mutt on the difference between quick sand and dry sand, only to be interrupted before he can actually explain anything informative.
* Indiana Jones and the Kingdom of the Crystal Skull got right was a scene in which Shia LeBeouf's character gets stung on the arm by a scorpion. He immediately flips out and screams that it was huge. Indy calmly tells him "Good, it's the small ones that kill you."
* Indiana Jones and the Kingdom of the Crystal Skull grossed $101 million in its first weekend, the third-widest opener of all time, despite highly polarized reviews (Roger Ebert and Leonard Maltin liked it, most other big-name critics did not).
* Indiana Jones and the Kingdom of the Crystal Skull has the chase in the forest with the car boats.
* Indiana Jones and the Kingdom of the Crystal Skull. He gets into some sort of G-force testing rocket, switches it on and fries the lot of them.
* Indiana Jones and the Kingdom of the Crystal Skull; he manages to escape, but when Irina Spalko is about to order her troops to kill Indy:
* Indiana Jones and the Kingdom of the Crystal Skull, he's gotten used to being called Henry by his friends and peers.
* Indiana Jones and the Kingdom of the Crystal Skull. Indy claims that he was one of a team of 20 experts who were called in to analyze artifacts leftover from the saucer's wreckage, though none of them had any idea what they were examining and they were forbidden from even comparing notes.
* Indiana Jones and the Kingdom of the Crystal Skull, Indy's friend turns out to have lied about being good near the end of the movie, though it's kind of obvious even before he admits it. He's shown having left a trail of beacons for the Soviets to follow.
* Indiana Jones and the Kingdom of the Crystal Skull, Indy survives a nuke by hiding in a refrigerator.
* Indiana Jones and the Kingdom of the Crystal Skull: Indy tells Mutt to punch a college student wearing a letterman jacket to escape two armed KGB agents at a malt shop. His girlfriend yells "Hey! That's my boyfriend!" and punches Mutt, causing a big fight between jocks and greasers.
* Indiana Jones and the Kingdom of the Crystal Skull. In Frank Darabont's unused draft, the technology was even more advanced than what was seen in the film.
* Indiana Jones and the Kingdom of the Crystal Skull in order to get away from the KGB agents that had them cornered. It even came with 50's brawling music!
* Indiana Jones and the Kingdom of the Crystal Skull is this on multiple counts:

* Indiana Jones and the Kingdom of the Crystal Skull it doesn't work, where Indy tries to jump onto a truck and misses.
* Indiana Jones and the Kingdom of the Crystal Skull. It's a post-Cold War map, even though the movie is set in 1957 and the Soviets are the main villains.
* Indiana Jones and the Kingdom of the Crystal Skull, Mac is seen secretly dropping little blinking radio beacons so the Russians can follow him. Why he couldn't just keep one on him and have them track that is unclear, maybe they have limited range.
* Indiana Jones and the Kingdom of the Crystal Skull mannequins posed to act as if they're engaged in various mundane activities as saccharine music plays. It turns out to be a Nevada Test Site, and a countdown starts before a nuclear bomb gets dropped to see what happens to a normal, American town.
* Indiana Jones and the Kingdom of the Crystal Skull: Mutt and his switch-blade, which he can be seen playing around with in a couple scenes.
* Indiana Jones and the Kingdom of the Crystal Skull. Of course, he escapes.
* Indiana Jones and the Kingdom of the Crystal Skull picks up Indy's hat, but Indy grabs it back from him.
* Indiana Jones and the Kingdom of the Crystal Skull plays it straight, with Mutt throwing his knife so Indy can cut the ropes that tie him (the knife opens while he tries, but what happens isn't addressed).
* Indiana Jones and the Kingdom of the Crystal Skull they go about it when the whole thing is dependent on a few bricks slotted in the right places.
* Indiana Jones and the Kingdom of the Crystal Skull, this is the reason Max turns coat on America and sides with the Soviets. The myths of Akator and legends of streets made of gold start making him think he could be richer than Howard Hughes (a comparison he makes to Indy himself). He even tries to convince Indy to side with him; he should have known that Indy was more than willing to oppose anyone who thought like this as far as archaeology was concerned.
* Indiana Jones and the Kingdom of the Crystal Skull was their treasure."
* Indiana Jones and the Kingdom of the Crystal Skull we learn Indy attained the rank of colonel during World War II while working as an agent for the OSS (the precursor to the CIA). Colonel Doctor Irina Spalko most definitely counts too.
* Indiana Jones and the Kingdom of the Crystal Skull When a KGB Agent tried to have all this knowledge downloaded into her brain...it was too much for the human physique and she was incinerated in the process.
* Indiana Jones and the Kingdom of the Crystal Skull, where it looks for a moment like Indy's hat is being passed (both figuratively and literally) to his son... until Indy picks it up and puts it back on.
* Indiana Jones and the Kingdom of the Crystal Skull. Which isn't true anyway, but that's beside the point.
* Indiana Jones and the Kingdom of the Crystal Skull who observe Indy's arrival on a rocket sled.
* Indiana Jones and the Kingdom of the Crystal Skull, with a fifth film scheduled for 2022.
* Indiana Jones and the Last Crusade’s location. However, Elsa turns out to be a Nazi supporter and this sets up a tense back-and-forth relationship for the rest of the film. With the grail finally in her hands, Elsa activates an earthquake trap that causes the temple to collapse. In the end, Indy is willing to forget her past deeds and tries to save her from falling into a chasm. Elsa, unfortunately, is too obsessed with getting the grail at any cost, and she tries reaching for it with her free hand. She refuses to give up, even though she's slipping from Indy's grip. She can’t reach it in time and falls to her death.
* Indiana Jones and the Last Crusade, after the main characters escape capture.
* Indiana Jones and the Last Crusade. Alison Doody was 22 when the movie was filmed, and while Dr. Elsa Schneider has no onscreen age, she has to be at least thirty.
* Indiana Jones and the Last Crusade, although it isn't choosing the wrong grail (that's just paying attention to Biblical history or simply looking for the cup that is the most different from all the rest), it's that Elsa keeps reaching for the grail, instead of taking Indy's hand. It nearly gets Indy, too, but his dad

manages to snap him out of it right at the last moment.
* Indiana Jones and the Last Crusade. A Nazi fighter plane does this to Indy and his father as they're escaping by car.
* Indiana Jones and the Last Crusade and several more off-screen. Indy notes the clue that "only the penitent man will pass" and realizes, at the last second, that a penitent man would kneel before God, allowing him to pass unscathed.
* Indiana Jones and the Last Crusade: An old male peasant is replacing a hubcap on his old car when it pulls away from him without warning. Indy, of course, is at the wheel.
* Indiana Jones and the Last Crusade. At the beginning of the film, Dr. Elsa Schneider lets her long, blonde hair flow while she explores Venice with Indy. However, once she's revealed as a Nazi collaborator, her hair is shown in tight buns. Her hairstyle remains this way for the remainder of the film, except in the grail temple, when her hair comes somewhat undone and messy when she desperately reaches for the artifact, but we never see the flowing locks again.
* Indiana Jones and the Last Crusade begins with Dr. Jones spending decades trying to recover a jeweled cross belonging to Coronado from a mysterious antique collector.
* Indiana Jones and the Last Crusade being nicknamed after the family dog.
* Indiana Jones and the Last Crusade built into the temple. In the chaos, both her and the cup almost fall down a chasm. The grail lands on a small rock and Elsa hangs onto Indy and can almost reach it with her free hand. However, Indy can’t keep her other hand’s glove from slipping off and she falls to her death. Thus, the last chance for the Nazis to get the grail are foiled.
* Indiana Jones and the Last Crusade, Colonel Vogel slaps Henry several times with his glove until Henry grabs his wrist stopping him.
* Indiana Jones and the Last Crusade, daddy has such helpful observations as "The floor is on fire" and "Our situation has not improved."
* Indiana Jones and the Last Crusade. Despite the chaos, Indiana manages to keep her from falling to her death in a huge chasm. In her quest to have the grail at all costs, she wildly reaches for the grail, and Indiana loses his hold on her slippery gloved hand.
* Indiana Jones and the Last Crusade Doctors Jones. Of course she's only using them but who says she didn't enjoy it?
* Indiana Jones and the Last Crusade: Donovan and Elsa both turn out to be working for the Nazis.
* Indiana Jones and the Last Crusade, Dr. Donovan warns Dr. Jones (Junior) not to trust anyone. Indy promptly puts his trust in Dr. Schneider and gets burned for it. Doubly applied, since Dr. Donovan convinced Indy to trust him enough in the first place to meet with Dr. Schneider.
* Indiana Jones and the Last Crusade Dr. Elsa Schneider had a second chance when Indiana dove for her hands as she almost fell into an abyss. All she had to do was let him lift her up to safety; instead, she pried one of her hands free to reach the grail underneath her. As she stretched, the glove on her other hand came off slowly but surely, resulting in a fatal plunge.
* Indiana Jones and the Last Crusade, Dr. Jones attempts to bluff his Nazi captors:
* Indiana Jones and the Last Crusade: Elsa Schneider is ordered to seduce both Jones to steal the Grail but ends up falling in love with Indiana.
* Indiana Jones and the Last Crusade, Elsa Schneider ransacks her own room as well as Indiana's, making Indiana blame an unknown third party rather than her.
* Indiana Jones and the Last Crusade featuring River Phoenix as a young Indy is one big Call Forward.
* Indiana Jones and the Last Crusade flying ace (played by Frederick Jaeger), only for the pair to fall to their deaths after the flying ace makes an error.
* Indiana Jones and the Last Crusade for its more character-driven story and the strength of Harrison Ford's and Sean Connery's performances as Indy and his estranged father. It helps that a number of lines from this movie have become memes.
* Indiana Jones and the Last Crusade frantically pulling out their tickets to show

to him at once.
* Indiana Jones and the Last Crusade getting to the Grail first is so important.
* Indiana Jones and the Last Crusade goes back and forth between supporting the Nazis and helping Indiana Jones. Overall, her motive is to get the Holy Grail at whatever cost, and she helps anyone who gets her closer to that goal.
* Indiana Jones and the Last Crusade had niches in the walls that contained only skulls, one to a niche. Justified in that the skull is the "densest" indicator of death, those niches were probably high-density tombs and crypts. The body may not reside there, but the skull and the soul are there.
* Indiana Jones and the Last Crusade has an important sequence set in Venice, Italy.
* Indiana Jones and the Last Crusade has a scene where Indy has been captured but has already given the all-important grail Diary to Marcus Brody, who has yet to fall into the hands of the Nazis:
* Indiana Jones and the Last Crusade has a whole catacombs full of them under the city of Venice.
* Indiana Jones and the Last Crusade has Indy apparently falling off a cliff with a tank. The group with him leans over to see the tank hit the ground and not notice him crawling up a set of vines a few feet down. Indy notices the group mourning him and leans over himself to see what they're looking at only for the group to notice him soon after.
* Indiana Jones and the Last Crusade has Indy find an entrance to catacombs under Venice by reading Roman numerals inscribed on columns looted from the Byzantine Empire's capital Constantinople during the Crusades.
* Indiana Jones and the Last Crusade has Indy getting chased along a line of circus train cars. One word: Rhinoceros.
* Indiana Jones and the Last Crusade has the fight against, around and on top of the tank.
* Indiana Jones and the Last Crusade. He doesn't know Indy's intentions and just wants to protect the grail from falling into the wrong hands, and when the misunderstanding is cleared up, he helps out.
* Indiana Jones and the Last Crusade; he just happens to be keen on cars.
* Indiana Jones and the Last Crusade, Henry Jones Sr. beans his son with a vase when Indiana jumps in through the window of the castle the Nazis are holding him in.
* Indiana Jones and the Last Crusade, he refers to the film's respective artifact as a "bedtime story."
* Indiana Jones and the Last Crusade: "I find that if I just sit down and think... a solution presents itself!" And the chair clicks back, while Indy goes bouncing down the appearing spiral staircase.
* Indiana Jones and the Last Crusade: in a pursuit between a Nazi pilot in his plane and Indy and his father in a car, they reach a narrow tunnel which breaks the plane's wings off as it grinds on the road humorously by the car it was pursuing before exploding at the end.
* Indiana Jones and the Last Crusade: Indy and Henry Sr. argue over traveling to Berlin to get the Grail diary or going to Iskenderun to save Marcus, they're at a literal crossroads, with the road sign shaped like a cross.
* Indiana Jones and the Last Crusade, Indy and his father accidentally stumble upon a communications room of the Nazis that's hidden behind the fireplace.
* Indiana Jones and the Last Crusade, Indy and his father arrive at a crossroads, debating whether they should head to Berlin to get his father's grail diary back, or to Venice, to go to Alexandretta to save Marcus from the Nazis. Given the theme of the movie, there's great emphasis upon the term "cross".
* Indiana Jones and the Last Crusade, Indy and his father Henry Sr. are flying in a biplane when they see some Nazi fighter planes approaching.
* Indiana Jones and the Last Crusade, Indy claims that the Nazis will never find Marcus Brody (who has the Grail diary) because he speaks a dozen languages and can blend in with the natives. Cut to Marcus on a busy market square in the Middle East asking if anyone there happens to speak English...or possibly ancient Greek.

* Indiana Jones and the Last Crusade, Indy comes face-to-face with Der Führer himself. We are certain something bad is about to happen to our hero, or the book he's carrying (given that this is at a book burning and the book has Hebrew in it)... but no, instead he gets Hitler's (inaccurately portrayed) autograph.
* Indiana Jones and the Last Crusade. Indy has given his father's Grail Diary to Marcus Brody, an apparently goofy, harmless professor. The villains indicate that Brody will be easy to find, but Indy tells them that Brody fits this trope.
* Indiana Jones and the Last Crusade, Indy says that Marcus Brody "once got lost in his own museum".
* Indiana Jones and the Last Crusade, Indy sets off a boat to float down the river. When the Nazis pile into a boat to pursue, he escapes on a motorcycle.
* Indiana Jones and the Last Crusade, Indy's face gets squashed against the lens of a periscope. The German watching the fight seems rather amused.
* Indiana Jones and the Last Crusade: In the LucasArts adventure game based on the movie, you instead use a convenient polearm held by a set of armor.
* Indiana Jones and the Last Crusade is about Indy patching his relationship with his estranged father, Henry Sr.. Shortly after this film, Spielberg rebuilt his own relationship with his father, in part thanks to the influence of his wife Capshaw.
* Indiana Jones and the Last Crusade is required for the plot to work, but still nonsensical otherwise.
* Indiana Jones and the Last Crusade is with the bad guys, there's still some teamwork between her and both Indy and his father.
* Indiana Jones and the Last Crusade, it's possible to pick up the Holy Grail before Elsa Schneider can grab it and then return it to the immortal knight, allowing Elsa to live.
* Indiana Jones and the Last Crusade. One may argue that Donovan is the true villain here but both he and Elsa manipulated the Joneses and Elsa was the last one standing out of the two.
* Indiana Jones and the Last Crusade remains alive (but frail) by drinking from the Holy Grail.
* Indiana Jones and the Last Crusade Schneider, an attractive young blonde woman. To their credit, however, they recover quickly.
* Indiana Jones and the Last Crusade shot. And then another one. In the old adventure game derived from that movie, you could get the Grail back by having Indy use his whip to catch it.
* Indiana Jones and the Last Crusade so he can obtain immortality. In the end, greed blinds him from reason and he gets tricked into drinking from a fake grail, which causes him to age rapidly to death. In a perfect example of greed, Elsa Schneider then attempts to take the true grail outside the temple, despite warnings not to cross the seal. In the ensuing chaos, she drops the grail into a chasm and nearly falls in herself, but Indy catches her. The grail ends up on a small ledge and Elsa, consumed by her greed, reaches for it. Her hand comes up just short, which only fuels her desire to keep trying, despite the fact she’s slipping from Indy’s hold. Overcome by her lust for the cup, she stretches too far and Indy loses his grip on her slippery gloved hand. Indy by contrast is able to let go of the grail and thus escapes with his life, though even he was reluctant to give up such a historic find.
* Indiana Jones and the Last Crusade starts off with an extended sequence featuring Indiana as a teenage Boy Scout. It ends when he loses the Cross of Coronado, and there's a cut to the adult Indiana on a ship trying to recover the Cross.
* Indiana Jones and the Last Crusade than just a nifty prize. Donovan and Elsa, again with the hubris... don't.
* Indiana Jones and the Last Crusade that takes place in, on and around a tank.
* Indiana Jones and the Last Crusade. The characters would lament it and the game would display the normal victory credit and score screens.
* Indiana Jones and the Last Crusade, the invisible bridge (a trick of perspective) that connects the inner chambers of Alexandretta with the Grail's Tomb is devised as the ultimate test of the seeker's faith.
* Indiana Jones and the Last Crusade, the knight guarding the Holy Grail explains

that, "The true Grail will give you life, and the false Grail will take life from you." When Donovan drinks from the wrong Grail, he ages rapidly until he dies, his body decomposes and turns to dust. Notable for the fact that Donovan grows a considerable amount of hair during the ageing process, and may well have died of starvation for all we know.
* Indiana Jones and the Last Crusade, the knight who guards the Holy Grail warns that "As the true grail will bring you life, the false grail will take it from you." Donovan dramatically illustrates this and dies when he drinks from the wrong Grail.
* Indiana Jones and the Last Crusade: The line as scripted and as shown in the novelizations was "I am Jesse Owens", but for reasons unknown the line was dubbed over before release.
* Indiana Jones and the Last Crusade then reveals that when Indy was a kid, he wasn't afraid of snakes until a rather traumatic incident in a circus train when he fell into a pen holding about a thousand snakes.
* Indiana Jones and the Last Crusade, there's a scene where Indy is trying to break into a secret passage in a library, causing loud thumps to echo through the library — coincidentally in time with the librarian stamping a pile of books. At one point, the librarian stops and looks at the stamp with a puzzled expression.
* Indiana Jones and the Last Crusade. The scene is a flashback to Indy's youth in the 1910s.
* Indiana Jones and the Last Crusade, they added a scene in which young Indy uses a whip for the first time and accidentally slashes himself across the chin with it to explain Indy's scar.
* Indiana Jones and the Last Crusade, this happens to bullets if they're fired inside a tank.
* Indiana Jones and the Last Crusade. Though Phoenix declined to reprise the role for TV, and was replaced by Sean Patrick Flanery in the series itself.
* Indiana Jones and the Last Crusade to an earlier scene in the film. Originally, while teaching at college, Indy was going to smash a fake Ming vase which a fellow professor thought was the real McCoy. Just as when Henry does it, the evidence of the fraud is the internal cross-section. Together, the scenes illustrate that, despite their rocky relationship, Indy and his father aren't so different after all. The scene in question was deleted in the final edit, but the professor (named "Mulbray") is still listed in the end credits.
* Indiana Jones and the Last Crusade too, apparently), but she's single-mindedly obsessed with getting her hands on the Holy Grail to the point of working with Nazis.
* Indiana Jones and the Last Crusade to prevent it from being ordered back to Germany. The zeppelin turns around anyway when the crew discovers the sabotage.
* Indiana Jones and the Last Crusade tries to convince Indy how she really doesn't believe in Nazi ideals, but he doesn't buy it.
* Indiana Jones and the Last Crusade. Unfortunately, he's holding it upside down, which is how Vogel sees right through this.
* Indiana Jones and the Last Crusade, until 2008. Said sequel took place in 1957, so the gap between both the release dates and settings was nineteen years.
* Indiana Jones and the Last Crusade was an accomplished equestrian and so knew how to nearly-fall without much of a risk involved.
* Indiana Jones and the Last Crusade when Indy and his dad are in a car being chased by a German fighter plane. They drive into a tunnel and the plane follows them, knocking its wings off on the tunnel's entrance. The plane is now in flames but still following them, with Indy's dad telling him to drive faster. The plane just goes past them with the pilot looking with astonishment at his plane on fire, and it explodes after it leaves the tunnel.
* Indiana Jones and the Last Crusade, when Indy and his dad are in a plane being attacked by Nazi fighters:
* Indiana Jones and the Last Crusade: When we're introduced to Dr. Elsa Schneider, she's wearing feminine outfits of the time. But once it's revealed she's allied with the Nazis, she starts wearing more masculine clothing, wearing a military

style riding outfit, complete with black tall boots and black leather gloves, in the final act. This outfit proves to be fashion over function, since she clumsily trips over her boots twice during the grail temple's earthquake and the leather glove slips from Indy's hold when she tries reaching for the grail.
* Indiana Jones and the Last Crusade: When young Indy, a teenaged Eagle Scout, is fighting a grave robber on top of a circus train car, a rhinoceros starts poking its horn through the roof. As the thug pins Indy down, the horn comes up between their legs, this distraction allows Indy enough time to push off the thug and escape.
* Indiana Jones and the Last Crusade. (Where do you think Indy got it from?)
* Indiana Jones and the Last Crusade, where the villains ransack Jones' father's home in search for the Grail diary. Fortunately it was mailed to Indy beforehand.
* Indiana Jones and the Last Crusade. While in Berlin to retrieve the Grail diary, Indy gets tangled up in a mob of Nazis who are members of Hitler's fan club.
* Indiana Jones and the Last Crusade: While watching the German convoy, escorted by a tank, Henry expresses some concern, to which Indy assures him they're well out of range. Then the tank fires a shell that destroys a car some distance behind them.
* Indiana Jones and the Last Crusade, with the chalice just within arm’s reach. In her greed, she pulls herself from Indiana’s hold to grasp it. Needing just a little more to get it, she stretches too far and the glove pulls off her hand, which sends her falling to her death. Indiana also goes for it but he gives up after his father talks some sense into him.
* Indiana Jones and the Last Crusade wrote an article praising the quality of this feelie. The Steam version fortunately included it in a PDF file
* Indiana Jones and the Peril at Delphi: A young Indiana Jones touches the Omphalos stone and has visions of his adult life from the first three movies.
* Indiana Jones and the script, where it is explained that the ball would seal Dr. Jones in by blocking the entrance and he knows it. Indy has a very good reason to outrun the boulder.
* Indiana Jones and the Staff of Kings takes place on a mountain in the midst of a snowstorm, where Indiana can freeze to death if the player doesn't keep him warm.
* Indiana Jones and the Temple of Doom above a crocodile-filled ravine.
* Indiana Jones and the Temple of Doom, after the mine-cart chase scene, Indy and his companions wind up on a narrow ledge that runs past the shaft's opening. Water cascading from the mine causes parts of the cliff wall to cave in or be penetrated by broken wooden beams, forcing the three further along the ledge to avoid the debris.
* Indiana Jones and the Temple of Doom. Again, his body ends up horribly mangled.
* Indiana Jones and the Temple of Doom, although whether he's escorting Willie, Shortround, or both changes moment to moment.
* Indiana Jones and the Temple of Doom and depicting the goddess Kali as evil when she is depicted as a goddess of change and empowerment in Indian mythology. When the government denied the filmmakers permission to use India as a filming location, they used Sri Lanka instead for the scenes that took place in India.
* Indiana Jones and the Temple of Doom as you can clearly see the dummies in the raft as it flips over several times in the air.
* Indiana Jones and the Temple of Doom continued work on the film by using Vic to perform the actions filmed from behind and then later filmed a few token close ups of Harrison to keep the illusion. The resemblance was so great, Ford's son would approach and talk to who he thought was his father before discovering it was Armstrong.
* Indiana Jones and the Temple of Doom did he bother trying to grab them as they fall when he was now in actual danger himself?)
* Indiana Jones and the Temple of Doom even had to be taught how to scream.
* Indiana Jones and the Temple of Doom even tried to shoot it in India, but he couldn't get permission for this reason; he shot most of it in Sri Lanka.
* Indiana Jones and the Temple of Doom, Ford injured his back and was out of commission for a few weeks, so Armstrong filmed in place of Ford for several scenes during that time that didn't show his face. Close-ups of Ford were added later to

make it more convincing.
* Indiana Jones and the Temple of Doom has Indy force-fed human blood in a ritual.
* Indiana Jones and the Temple of Doom have been saddled with taxonomic names containing vampire references, so Indy might well have been misled by this — or he was just trying to screw with Willy. Just listen to his voice when he says that line.
* Indiana Jones and the Temple of Doom. Indiana frees scores of children who were enslaved and forced to dig to find the Sankara stones.
* Indiana Jones and the Temple of Doom, Indy and co. are treated with "chilled monkey brains" as they are visiting the Pankot palace.
* Indiana Jones and the Temple of Doom, Indy fought a Thuggee guard on a conveyor belt that led to a rock crusher. Things were further complicated by the brainwashed prince stabbing a voodoo doll of Indy just as he gained the advantage in the fight. Indy of course escapes, the guard... doesn't.
* Indiana Jones and the Temple of Doom Indy goes after the Sankara Stones because he believes they will bring him "Fortune and Glory".
* Indiana Jones and the Temple of Doom, Indy identifies the large winged creatures flying overhead as "giant vampire bats". Vampire bats are indigenous to South America, not India; given their size and the fact they're flying in broad daylight, the animals in question are almost certainly harmless fruit-eaters. Possibly Indy was just yanking Willie's chain, since giant vampire bats were real creatures, but they've been extinct for tens of millions of years.
* Indiana Jones and the Temple of Doom. Indy is in the middle of a rope bridge, surrounded on both sides by Thugees. Mola Ram forces Willie and Short Round to go out onto the bridge with him. Indy quickly wraps his leg around a rope railing and yells something in Chinese to Shorty, who quickly wraps his arm likewise and tells Willie:
* Indiana Jones and the Temple of Doom Indy is made into a zombie-slave, though later recovers.
* Indiana Jones and the Temple of Doom is a prequel it's really a call forward.
* Indiana Jones and the Temple of Doom is much more explodey than a full tank of fuel, but the explosion somehow leaves the snow completely unmelted.
* Indiana Jones and the Temple of Doom. It's an authentic show tune of the period, from a Cole Porter musical of the same name, and, by the way, normally sung in English.
* Indiana Jones and the Temple of Doom kicks off with Indy battling Lao Che.
* Indiana Jones and the Temple of Doom Mola Ram is killed that a company of British-led Indian troops arrive to capture the remaining Thugee. Though they do arrive in time to prevent the main trio from possibly being shot full of arrows by the Thugee. Semi-lampshaded by Willie's exasperated line "Well it's about time!" when they arrive.
* Indiana Jones and the Temple of Doom moment where he punches a slaver so hard he slides along the floor a good distance.
* Indiana Jones and the Temple of Doom movie poster, but not in the actual film credits.
* Indiana Jones and the Temple of Doom. Only this time it isn't there ... he'd lost it a few scenes before.
* Indiana Jones and the Temple of Doom poisons Indy while wearing a suit with a white bowtie, even.
* Indiana Jones and the Temple of Doom, running out of time results in Mola Ram dropping in and tearing out Indy's heart.
* Indiana Jones and the Temple of Doom scene of he and Willie both debating to themselves about whether to resolve their sexual tension. We see a mural of a shadowy figure painted in the background whenever it cuts to Indy in closeup, but don't pay it any mind until the "figure" in the painting quietly sneaks up from behind and tries to garrote him.
* Indiana Jones and the Temple of Doom's dog, and Short Round the one of the co-writers.
* Indiana Jones and the Temple of Doom's hand as the body is incinerated below.

* Indiana Jones and the Temple of Doom: Shiva sent you! Indiana attempts to convince them that it really was a string of wild coincidences that brought him there, alive, despite many, many things that could have killed him if they had shifted by a hair's breadth. Oddly enough, they continue to find the divine intervention plausible. (Later events are clearly supernatural; it's only Indiana's presence that is ambiguous.)
* Indiana Jones and the Temple of Doom, Short Round gives Indy's sanity a ringing endorsement:
* Indiana Jones and the Temple of Doom: The car is their means of escape.
* Indiana Jones and the Temple of Doom, then his hand comes back into view as he snatches the hat and pulls it through just before the door slams shut.
* Indiana Jones and the Temple of Doom, this happens to Indiana and his sidekick Short Round when they try to resist their abductors.
* Indiana Jones and the Temple of Doom Thuggee cult. In truth, the Thugs were more like highway bandits, who strangled travelers with scarves in their sleep to rob them. While a cult did develop that gave religious motivations to their actions, it was not very widespread. Far from an evil cult goddess, Kali is the Goddess of eternal energy, the Punisher of Evil, and is very popular in mainstream Hinduism.
* Indiana Jones and the Temple of Doom wear these colors to match their volcanic hideout.
* Indiana Jones and the Temple of Doom, we meet one of Indy's closest allies Wu Han. He gets killed off shortly by one of Lao Che's thugs.
* Indiana Jones and the Temple of Doom, when Willie Scott thinks the Maharaja of Pancot Palace has been showering her with gifts, and then:
* Indiana Jones and the Temple of Doom, where Indiana Jones himself cuts the bridge when trapped in the middle by bad guys on both sides.
* Indiana Jones and the Temple of Doom (which of course wouldn't work as an actual floor show).
* Indiana Jones and the Temple of Doom. While Indy is hanging onto the cut bridge and being shot at by the Kali cultists on the other side of the canyon, British Army troops show up on his side and open fire on them, saving him. Then more British troops show up on the cultists' side of the canyon and capture them.
* Indiana Jones and the Temple of Doom while in their raft moments before landing in the river.
* Indiana Jones and the Temple of Doom, who he'd marry several years afterwards. He would say that meeting her was the best part of making this movie.
* Indiana Jones and the Temple of Doom. Why the builders decided to have the trap set off by a protruding block in the wall rather than, say, a hidden floor switch is a question for the ages. Maybe it was only supposed to prevent idiots from reaching the aforementioned Temple. Technically, there was a floor switch, which sealed them in when Short Round stepped on it. Frustrated, Indy tells him to stand against the wall, out of the way...
* Indiana Jones and the Temple of Doom, Willie Scott dresses up beautifully for the dinner at Pankot Palace in hopes to impress the wealthy Maharajah. She's chagrined when he's revealed to be a kid around the same age as Short Round.
* Indiana Jones and the Temple of Doom, Willie Scott has to save Indy and Short Round from a room with spikes by pulling a lever inside one of two small holes. Indy tells her, "Go to the right hole!", and she puts her hand in the hole to Indy's right, but to her left. Indy's hand comes out and grabs hers while he says, "The other one, the other right. YOUR OTHER RIGHT!"
* Indiana Jones and the Temple of Doom, Willie thinks it's the elephant's trunk and aggressively brushes it off.
* Indiana Jones briefly faces off against Chinese mobster Lao Che and his cronies in
* Indiana Jones. Carrion Crown however is the king of this trope; it takes on Horror Movie tropes, but each chapter is based around a different subgenre; haunted house, Frankenstein story, lycanthropes, Lovecraftian horror, vampire story, and apocalyptic horror.
* Indiana Jones combines digitized clips from the four movies with hand-drawn

animated sequences.
* Indiana Jones entry above, a bullet fired inside a tank will act like this. Obviously, the bullet will slow down quickly due to energy loss on the rebounds and passing through softer objects. It's still a very bad thing.
* Indiana Jones Epic Stunt Spectacular!, performances of the stunt show were cancelled due to respect.
* Indiana Jonesfeatures one scene where Indy (disguised as a German soldier) is trying to escape a Nazi rally with a book, and literally bumps into Hitler himself. Hitler sees the book, takes it from Indy, opens it... then signs it and hands it back to him, apparently assuming the only reason a person might be carrying a book around in his presence would be because they wanted his autograph.
* Indiana Jones films are extremely over-the-top (e.g. obtained by beating piles of leather coats with baseball bats) - so much so that the sounds are basically iconic to the series.
* Indiana Jones find dozens of tarantulas crawling on them, but calmly brush them off. Tarantulas, of course, do not build webs.
* Indiana Jones first but can't attain it, allowing Jones to figure it out behind their backs; or with Jones arriving first with the villains chasing close behind, and then waiting at the dungeon entrance to steal the prize.
* Indiana Jones from the 80s, the copyright symbol appears next to the word "Nazi" on some of the cardboard tokens used, sparking a rumor that TSR tried to copyright "Nazi". The copyright was actually referring to the artwork used.
* Indiana Jones, generally by following Indy to it, only to be killed by their own greed or recklessness. Any remaining plot points will then be resolved, and the film will end on an upbeat note.
* Indiana Jones hardly has any onscreen gun violence or death, and the few corpses shown on-screen only have a small strand of blood on the back.
* Indiana Jones has his canyon-swinging trick with his whip. And even more oddly, it unties itself when he tugs on it afterwards, but not when he's putting all his weight on it by swinging across.
* Indiana Jones he believes it enough to get the hell out of there and or not look at the item that would have killed him.
* Indiana Jones'. He is pretty good at cars, horses, boats, and motorcycles, however.
* Indiana Jones, holding onto Indiana with one hand and reaching for the holy grail with the other. Indy can't persuade her to give up the prize and she falls to her death when her hand slips from its glove.
* Indiana Jones, if the number of swooning females that attend his lectures indicates.
* Indiana Jones (in a moment when he was lost so how the picture was taken is a bit of a mystery).
* Indiana Jones - in both "Dry Dock" and more obviously "Montana Howery and the Mantle of N00b"
* Indiana Jones - Indy dismisses the crystal skulls as belonging to "Saucermen from Mars" when he is interrogated by Irina in the tent.
* Indiana Jones is notoriously betrayed at least once in almost every movie. The amount of people who haven't betrayed him on his adventures are in the single digits.
* Indiana Jones kid, John Rhys-Davies, and a few Oxford professors and federal agents, just to recap...
* Indiana Jones — Action adventure films. 4 films since 1981, with a 5th in development. Inspired a prequel TV series.
* Indiana Jones — when he was in Egypt, Indy met a tall, scary man who sounded practically demonic to him. T.E. Lawrence showed up, told Indy all the man was doing was asking what he was studying, and acted as translator. He then explained to Indy that the first thing you should do when entering a new country is learn the language, which breaks down any barriers you may have.
* Indiana Jones, most of which involve a step in the neighborhood of "run like hell."

* Indiana Jones movie, Butters says that he thought the film was okay.
* Indiana Jones movies avert this trope. All the women in Indy's life are spitfires. Yes, they still fall in love with him, but they don't go from frump to bombshell in the process.
* Indiana Jones movie series is also a professor of archeology when he is not fighting Nazis, Thuggees, or communists.
* Indiana Jones movies. In two movies, the Nazis plan to acquire powerful relics to aid their conquest of the world. The plans ultimately fall apart either because the artifacts cannot be controlled or obtained.
* Indiana Jones movies, in which the villains (Nazi leaders) finally take the treasures they're looking for and end up dead, usually being converted into dust.
* Indiana Jones movies themselves are one big homage to the classic adventure films of the '30s and '40s.
* Indiana Jones, New Jersey Jones (no relation to Indy; he's a con artist capitalizing on the Jones name) uses this trope verbatim to get Indy and Bill Lawton to fight.
* Indiana Jones on behalf of Himmler), SS leader Heinrich Himmler with the support of some other Nazis formed the Ahnenerbe, a "scientific" research bureau that was meant to prove their own esoteric and crackpot ideas. The biggest expedition they mounted was one to Tibet in 1938.
* Indiana Jones parody. At one point in the sequence, the hero grabs the prize (a PS Underground disc) but the room starts to rumble, and the character merely says, "Oh no." The character looks up to see a giant boulder careening towards him, and he runs out of the room just in time.
* Indiana Jones. Practically Lampshaded with this exchange between Marion and Indy about them both being kidnapped
* Indiana Jones series has subtle examples arising from the fact that the second film takes place earlier than the first:
* Indiana Jones. Some first-time watchers will no doubt wish they'd heeded Indy's warning not to look.
* Indiana Jones (Stern) has a helpfully labeled one: the display cycles through various rewards, and shooting the ball when the one you want is displayed awards it.
* Indiana Jones) that overtly display powers of the supernatural, yet he remains an atheist or agnostic.
* Indiana Jones theme plays, Hal outruns a beach ball rolling after him, dives under the closing shutters, and reaches back for his car keys in the nick of time.
* Indiana Jones: The Pinball Adventure, locking a ball without hitting the three drop targets covering the hole awards 5 million points.
* Indiana Jones: The Pinball Adventure plays "The Raider's March" and other songs from the series.
* Indiana Jones: The Pinball Adventure replaces the metal parts on the game cabinet with (fake) wood and bamboo equivalents. It can be found in the gift shop near the "Indiana Jones and the Temple of the Forbidden Eye" thrill ride.
* Indiana Jones: The Pinball Adventure, the opening animation for multiball shows Indy escaping from a rolling boulder.
* Indiana Jones: The Pinball Adventure. The playfield itself has a silhouette of Indy crossing the bridge.
* Indiana Jones to find a number of artifacts (and circumvent the dangerous traps before them), typically with the life of someone else on the line.
* Indiana Jones to the area. And if loads and loads of sharks aren't scary enough, don't worry, a massive Great White will show up to teach them the job.
* Indiana Jones: Travel the globe. Pick up chick. Punch Nazis. Find priceless artifact. Reveal ancient secrets. Get hounded by college girls. Repeat.
* Indiana Jones trickery. Adam was able to consistently get his bullwhip to wrap handily around the practice "tree branch" (actually a pipe). Getting it off again was the difficult part.
* Indiana Jones used an inflatable liferaft when the plane he was on was about to crash into a mountain in

* Indiana Jones uses a bullwhip as one of his signature weapons and tools.
* Indiana Jones-wearing hero traveling the world, getting the girl, and killing Nazis.
* Indiana Jones, which showed Indy as a young lad working alongside his father.
* Indiana Jones, who has a viewpoint similar to Lone Star's from the Page Quote:
* Indiana Jones with the same orange-red color scheme and comics-style font.
* Indiana knocked out a Nazi officer at a book burning rally, leading to a too-close encounter with Der Führer himself.
* Indian-American actor Kal Penn playing an Arab of indeterminate origin.
* Indianapolis 500. A spill of methanol fuel caused a fire in the pit stall, one that reached Mears himself. No one realized that Mears was in danger until he suddenly jumped out of his car, running toward the pit wall. Thankfully the driver's fire suit did its job, the fire was promptly doused by the track's fire crew, and Mears and the pit crew escaped the incident without serious injury.
* Indianapolis 500 has a toy Indy racer on a circular platform; its only purpose is to spin when the cabinet shakes.
* Indianapolis 500) is 3X Playfield Values, which triples all points temporarily. This can apply to Victory Laps. Make of that what you will.
* Indianapolis 500, Mario Andretti suffered burns to his face, so his twin brother Aldo (himself a former racer, like several of their respective descendents, so perhaps this was an attempt at wish fulfilment) filled in for the official front row picture session. Allegedly some of the drivers were fooled.
* Indianapolis 500 uses orange, yellow, blue, and green to distinguish between the four main shots, assigning an opposing racer and a set of game modes to each color.
* Indianapolis 500 was Carlos Múñoz's first-ever and his first time in an IndyCar race (Indy Lights notwithstanding), yet he managed to finish second behind Tony Kanaan. Most people would have been thrilled with this result, but he was disappointed with himself for not winning.
* Indianapolis), namely because they would be the only ones to swarm shipwreck survivors, and they get away with it as the carnage happens out of sight, to people that don't care what shark it is. It was even they that mariners nicknamed "Sea dogs" because of their slow and cautious but curious pace when investigating something new.
* Indianapolis to the Japanese torpedos that sunk the ship and the US Navy ignoring the S.O.S. signal.
* Indian Army, at any rate), a German engine made by MTU and a computerised fire-control developed jointly by the Indians and the Israelis, it's shaping up to be quite a formidable machine.
* Indian Army uses a fast roping technique called “slithering”. Indian Navy Marine Commandos are also trained in this technique.
* Indian Burial Ground: A place where someone desecrated the graves of Native Americans by building something on it. Expect ghosts.
* Indian Burial Ground: Buildings that were constructed on Native American cemeteries tend to be cursed or haunted by the vengeful spirits of dead natives.
* Indian Burial Ground: Several, and not just restricted to Indians, or America.
* Indian Burial Ground: Supernatural activity is caused by an Indian burial ground underneath the location.
* Indian Burial Ground turned into a settler farm which saw three settler children killed by Indians and several Indians killed by settlers in retaliation, turned into an amusement park in the 1920s. After two children died, the park shut down in 1966 amid rumours of the land being cursed and haunted, with the rides and structures still standing in varying states of disrepair. It was briefly reopened in the 1980s, then abandoned again. Tours are available in the days leading up to Halloween.
* Indian cricketer Sachin Tendulkar. Not renowned for running ability but he'll smash the ball so hard he doesn't
* Indian legend has the kingdom of Dwarka, which is supposed to have sunk under the sea off Gujarat.
* Indian mythology also works this way. At the highest is the "Source" of the world

* In "Disorder in the Court", during Olive's trial, Oscar is called to the witness stand due to the fact that he was eating lunch with Olive in the time frame when the crime of stealing the museum was committed. Odd Todd submits a menu from Debbie's Pizzeria into evidence and asks Oscar to read what it says on the bottom. Oscar reads aloud what's written directly on the bottom, "Printed in China", then Odd Todd tells him to read what's placed higher. Oscar reads the text above: "Don't forget to tip your server." Eventually Odd Todd becomes fed up, and puts on a tight smile as he angrily snatches the menu out of Oscar's hands and points at what he actually wants him to read: "Pizza delivered to your table in one minute or less."
* In "Disorder in the Court", Olive and Danny T sing Soundcheck's latest song, "The Work of Heart", in order to drive the final nail in the coffin of the former not stealing the town museum. The song, which lasts exactly a minute, manages to be a driving factor in Oprah's verdict, and she soon announces Olive is innocent and free of all charges.

* In "Disturbed", the episode after the credits opens with a murdered mailman who was last seen alive outside of a home where a woman was killed. He waves at the repairman entering the house.
* Ind. It is a land of exotic spices, legendary treasures, fertile fields, great palaces, golden temples, beautiful art and deeply spiritual people. However the disparity between fabulously wealthy rulers and poor commoners rivals that of Bretonnia, people live in constant fear of their myriad deities and everyday life is dictated by almost impenetrable system of rituals and taboos which means that the outsiders are at constant risk of being executed for unwittingly committing a sacrilege, that is if they don't fall prey to numerous
* In "Divide and Conquer - Chaos and Hilarity", the heroes find themselves being attacked by Cedric and Daolon Wong, Valmont and Hak Foo, and the Monkey King all at once, who also start fighting each other.
* In "Divide and Conquer - Chaos and Hilarity", the heroes have to face off against three separate evil factions that are also opposed against each other. One consists of Cedric, Daolon Wong and the Dark Chi Enforcers, the other consists of Valmont and Hak Foo, and the last one is the Monkey King.
* In "Divide and Conquer", when Cinderblock puts Starfire in a bearhug, she knocks

him back by kicking him in the face. In "Aftershock Part 1", this scenario happens again, but this time, he blocks her kick.
* Individual armies have these too. For example, Cadians really hate Chaos as their planet is the first in line whenever a Black Crusade starts up, Crimson Fists and Valhallans had their homeworlds invaded by orks, Khornates hate Slaaneshi and vice versa... * "Individual" geth programs are said to be non-sapient, being too simple to function beyond their original purpose; this was an intentional limitation placed by the quarians to avoid creating an AI. However, when the programs are able to network together, they are able to create something greater than the sum of their parts and achieve a unique form of sapience.
* Individual humans may just be cattle and pawns to the supernaturals, but humans have numbers. All but the strongest of supernaturals can justifiably be afraid of a mob with torches and pitchforks; ever since humanity's numbers have been taking off since the Industrial Revolution, the advantage humans have had has only magnified. (As author Jim Butcher describes it, a wizard can kill a mortal with about the same effort you'd expend throwing a pebble across a room. Now throw a million pebbles.) Human numbers alone is reason enough for most power players to fear the potential of humanity as a whole.

* Individually, Unsullied are not particularly notable fighters and are physically weaker than most due to their castration. When fighting in formation, however, their phalanx tactics, lack of fear, immunity to pain and robotic loyalty make them the most feared soldiers in the world. Daenerys learns this the hard way when she assigns her Unsullied to town guard duty. Their heavy shields and long spears are far less valuable on their own and are poorly suited to street fighting, and dissidents are able to easily ambush and kill them. They're wasted off of the battlefield.

* Industrial cardboard shredders/bailers that are often kept in the back/receiving area of retail stores can do this. These devices have power switches that are designed to be shut off and then physically locked with a padlock, before someone jumps into one to remove a jam. They are designed to shred and compress cardboard into manageable cubes, which end up so heavy they have to be moved with a forklift. They put out in excess of 2000 PSI to accomplish this. * Industrial Metal, whose cover art is a man beating a war drum while a city is being bombed behind him.
* Industrial Revolution, in which manufacturing supplanted agriculture as the world's greatest source of wealth. Occurring mostly over the period from 1730 to 1920, this included the development and improvement of the steam engine, the origin of factories and mass production of identical and interchangeable parts, widepread use of fossil fuels, and the invention of the electric motor and electric generator (ushering in the age of electricity). Think of the differences between life in 1300 and 1500, and compare the differences between life in 1730 and 1930. It's no coincidence that this was also the point when people really got into speculating about what the future would be like - it was the first time when the impact of major changes could be seen within a person's lifespan.
* Industrial Revolution, though it was a gradual process — first spinning and weaving, and carding, then much of the sewing, etc. This trope still existed well into the 20th century for domestic textile work and still remains somewhat today.
* Industrial Society and its Consequences. There is even an anarchist philosophy called anarcho-primitivism that believes humanity should return to living as hunter-gatherers when civilization collapses (which some believe is inevitable).
* industrial, specifically O'Brien's line "imagine a boot stomping on a human face, for ever", and using a variation of the tune from "The Old Gray Mare".
* "Industrial strength" is a loosely-defined and unregulated term. Although the ANSI/ISO have tens of thousands of standards relating to industrial and commercial and domestic products, 1) there aren't different sets of regulations for "lame-ass regular people products" and "super-manly industrial products" and 2) if any product actually complies with (inter)national standards it will say which code i.e. ANSI Z.81 safety glasses or SAE 1020 carbon steel. * Indy Car and the Coca-Cola 600 for NASCAR the Sunday before Memorial Day, possible because the two are held at different times (afternoon vs. evening). That's 1,100 miles of driving in a single day, with barely any rest in the process. Only 9 attempts have been made, with only one of them (from Tony Stewart) managing to complete every single lap in both races. The latest attempt was from Kurt Busch in 2014, who completed the Indy 500 only to wreck after 406 miles of the Coke 600.
* Indy Car being let go by Penske, no less), he has never won a series championship.
* Indy Car driver Alex Zanardi lost both his legs in a crash in 2001, when he lost control of his car coming off pit road and was t-boned by Alex Tagliani at over 200 miles per hour. Prompt medical attention and high quality care ensured that, in the long term, that was all he lost.
* Indy Car driver Dario Franchitti was in a massive accident-his third one in ten years at high speed. The crash left him with spinal and ankle fractures and a concussion. He retired from motorsport altogether when he was told that if the next crash didn't kill him, it'd severely disable him physically and/or mentally.
* Indy Car full of it. And when offered an opportunity to drive Clark's Indy 500-winning car, he made sure he dressed in a replica of Clark's own overalls and period-appropriate gear.
* Indycar gets constant promotion and coverage no matter how well she's doing. Since there are 42 other drivers in a NASCAR race Danica gets far more coverage than any other driver with similar career stats. Somewhat lampshaded by the fact that GoDaddy.com sponsored both Patrick in NASCAR and James Hinchcliffe in Indycar; Hinchcliffe won several races with their name on his car, as opposed to Patrick who won nothing except the pole position at the Daytona 500, yet GoDaddy dropped Hinchcliffe and kept sponsoring Patrick.
* Indy Car his legs after he hit the outside wall, barely missing his femoral artery. However, he did make a full recovery.
* Indy Car Indy 500s (only two other drivers have accomplished that: Al Unser Sr. and Rick Mears, both badass drivers themselves), won 138 USAC races (the most of any driver), and in the 1964 Champ Car season, won 10 of the 14 races, a record that still holds to this day. He also managed to find success in NASCAR, including a win in the 1972 Daytona 500.
* Indy Car of support after that (and his team owner even paid the fine Power was given for the birds).
* Indy Car ovals; but generally it is considered too dangerous for open-cockpit, open-wheeled cars to race under these conditions. These fears were realised when Dan Wheldon was killed in a 15-car pileup after being launched into the air, over the wall and tragically cockpit-first into the catch fence.
* Indy Car Series feel Brian Barnhart's liberal and inconsistent application of an admittedly ill-defined rulebook have essentially reduced the series to an automotive form of Calvinball.
* IndyCar Series, racing fans, confused and frustrated by the split, turned in droves to stock car racing and NASCAR.
* Indycar. Usually this involves putting an older corporate logo on the car too. Seems to be particularly prevalent among drink manufacturers; Budweiser, Coke, Pepsi, Miller, Coors etc have all done it.

* In "Dying for Pie" Squidward buys an explosive pie that he believes SpongeBob ate, so he spends the episode trying to give him a good day before the pie explodes. In the end, it turns out SpongeBob didn't eat it after all, but when he trips and hurls it in Squidward's face, it destroys all of Bikini Bottom.
* In "Dying for Pie", Squidward had thought that SpongeBob had exploded from eating a pie bomb. But it turns out he had been saving it for them to share. And just as SpongeBob is about to offer the pie, he trips and the pie flies in Squidward's face, and the camera cuts away to a massive live action explosion (and Squidward's understated "ouch".)
* In "Dying for Pie", Squidward spends the day with SpongeBob, thinking he swallowed a bomb that will go off at sunset, and is outraged that he's still alive. As Squid mentions that he's supposed to explode, SpongeBob gets the wrong idea, leading to this.

* In earlier editions, a magic user used his own blood as an ingredient in creating a homunculus, possibly inspired by the Sinbad example, though more likely

inspired by real-world alchemists' practices, wherein it was believed human blood or human semen was needed to provide the homunculus a spark of live.
* In earlier editions, before wishes had set limits, there was a certain type of GM who basically used wishes to troll by waiting for players to ask for absurd things and then ruining them for doing so. The player wishes to be an immortal? The GM may make them a mountain, or maybe change the character's name to "Anne Immortal". The player wishes for vast wealth? They are teleported to a vein of gold beneath the earth with no means to survive the pressure or heat, or rewarded with a vast sum of acorns and transformed into a squirrel. The list goes on and on. However, this is against the terms of the spell as written even in 1
* In earlier editions of the game, only player characters are able to freely choose their alignment; monsters (that is, any non-human or demihuman creature) are born with their specific alignment and can never change. This is due to the influence of the Outer Planes (which are arranged precisely according to the alignment axis) and the gods of the campaign. A goblin, for example, is born evil, and no amount of counseling will ever change it (though magic might). The fact all creatures (including PCs) have invisible "alignment auras" that can be "read" was proof of this. The reason for this is so that good-aligned characters
* In earlier editions of the game, this trope was played relatively straight in comparison, in which the game had Collectivist/Individualist rather than Authoritarian/Egalitarian, where Collectivism played this trope relatively straight with capacity of having political commissars and a literal "Ministry of Benevolence", further enforcing a sense of general totalitarianism. The lack of restrictions on other ethics requirements to prevent you from choosing Xenophobe in addition to Collectivist made it easy to achieve this before they changed the axis to Authoritarian/Egalitarian.
* In earlier editions, psionics did not interact with magic. The system was a completely bolted-on addition which barely fit the rest of the game and could be horribly broken when a wizard or paladin, no matter how powerful, was just as vulnerable to a 2nd level psionic character as a peasant would be. Additionally, the rules for psychic powers required ability score checks against variables and had their own, separate, entirely different mechanic for psychic combat. Defenses against psionics for non-psionicists barely existed. Gaming groups often would rather forget psionicists existed than deal with the headaches you get from averting this trope.
* In earlier editions, some fairy folk are friendly and good-natured towards humans (brownies, sprites, and kilmoulis), some will only harass humans who trespass in their territory, or enjoy

* In earlier versions of the cosmology, Arda was literally shaped like a boat, solid earth cupped to hold the "inner seas" with the continents and islands of the world rising up from its floor. The world floated upon the "outer seas" ("Vaiya", which was in turn split between a shadowy "water" that no mortal ship could float upon and a tenuous "air", both so cold as to freeze the inner seas where they meet), which were in turn vaguely separated by the boundary between the universe (Eä) and the sea-like "void" leading to the Timeless Halls where Eru Ilúvatar resides. Even stranger yet, the sky was a literal pennant-like sail, attached to Arda by the mast-like peaks of two inconceivably tall mountains. The sun and moon dipped into the seas of the vaiya in order to go
* In earlier versions of the game, Free players (or 'Greenies', as free players' names were always in green, as opposed to subscribing players' yellow) could play forever but were unable to purchase ships, shops or anything beyond the most basic clothing and weaponry, which is not as much of a handicap as it sounds — weapons in the game merely altered the drop patterns in the swordfighting puzzle, cheaper weapons are easier to defend against because their 'attacks' dropped blocks in patterns that were easier to clear. Free players could still get at least one upgrade to assuage this — though they were obviously barred from the more expensive weapons with their impenetrable drop patterns. Still, many high-end players would use the starting sword most Greenies were confined to in the name of

* In Edition 3.0 and later, a character with enough levels in the Monk class becomes effectively immune to toxins, which means that they are effectively immune to any intoxicating substances like alcohol or recreational drugs.
* In Edition 3.5, the Nonlethal Substitution metamagic feat can turn elemental damage into non-lethal damage. When applied to Cold spells, this trope is the result.
* In Edition 3.5, the Nonlethal Substitution metamagic feat can turn elemental damage into non-lethal damage. When applied to electricity and lightning spells, this trope is the result: the subject can't be killed by them, but roughed up enough to fall unconscious.
* In Edition 3.5, there is a feat called "Open Minded" who grants 5 additional skill points. Feats are normally gained upon leveling, so this can be just considered part of learning new things. However, the Chameleon
* In editions where flight maneuverability is mentioned, it's noted that the

largest dragons become far less agile as they grow bigger. In 3.5, for instance, Small or Tiny dragons have Average maneuverability, Medium, Large, and Huge dragons have Poor maneuverability, and Gargantuan or Colossal dragons have Clumsy maneuverability — basically, the largest dragons will bank like cruise liners in flight, and are completely unable to pull off things like hovering or flying backward. And while they do get faster, it's nowhere near proportionate to their size; a dragon the size of a sperm whale travels only twice as fast as one the size of a border collie. Of course, the fact that said dragon is able to get off the ground at all is violating this trope pretty hard. One sourcebook explains that dragons get off the ground through a mix of ridiculously strong wing muscles, surprisingly lightweight bodies, and the fact that dragons are

* "I Need A Doctor" may have become Dr. Dre's biggest hit since the 1990s, but the song is generally more associated with Eminem.
* "I need a drink". He started the segment with a Bud Light Lime, before switching to a glass of Jack Daniels almost immediately after hearing about the first news report, then switched the short glass for a tall glass after hearing about Iraq. Finally he started drinking rubbing alcohol straight from the bottle, after hearing about truly depressing news from the states. He concludes the segment by saying:
* I Need a Freaking Drink: When characters feel down, downing a shot of whisky or a glass of wine helps. A lot.
* I Need A Hero, the post-apocalyptic superhero organization Yggdrasil use the former Area 51 as their headquarters, where they have constructed a sprawling underground complex designed to contain supervillains and study superpowers, in addition to continuing the real-life aerospace engineering that took place there.
* I Need No Ladders: Where a character decides to screw taking the stairs, because everything's better with epic jumps.
* I Need to Go Iron My Dog: A character excuses himself for some random reason.
* I Need to Go Iron My Dog: A character makes an excuse to leave that is weird and obviously fake.
* I need to make some copies" will get you what you want over half the time. However, this only works if you are reasonable. Asking to make 30 copies will be little more effective with politeness than without compared to asking to make 5 copies.
* I Need You Stronger lets the heroes continue on their quest, despite being more than capable of wiping them out, because they're not strong enough to suit his purposes yet.
* In "Eel Effects," a head chef passes out after one too many drinks, and while he is sleeping, his students slip an eel into his pants, causing said animal to fatally eat its way through the chef's rectum and inside his body.
* In "Eeney, Meeney, Miney... Magic!", Hank is hanging around being mildly annoying while Brock does his morning workout. He becomes entranced by the word "SCUBA", repeating it over and over and realizing that it's really a weirdly funny word. To his own surprise, Brock is forced to admit he's right.

* In "Employee of the Month", an interesting variation of this occurs when Beast Boy imprisons a villain (made out of alien tofu) in the fridge. At the end of the episode, Cyborg accidentally eats him because he was covered in steak sauce.
* In "Employee of the Month", Nikki says that she would rather pull a watermelon out of her nose than be employee of the month at the Khaki Barn.
* In "Employee of the Month", SpongeBob and Squidward use several variations of this to sabotage each other's efforts of making it to the Krusty Krab early and winning the Employee of the Month award.
* In Encyclopedia Brown and similar riddles there are puzzles about coins being a forgery because the name of the ruler is King Bob the First or similar. Obviously, no monarch referred to himself as The First, right? Except that they did—either to show that they're first among equals, or because they had a son named after them, or because they would indeed be the first monarch with that name, as was, for instance
* In "Endgame", former President Clark had turned Earth's orbital defense platforms on Earth itself. Sheridan's ship is the only ship within range of one that is about to fire and destroy half the eastern coast of the United States. With weapons out they have to ram it in order to destroy it taking themselves with it. Another Earth ship which had been able to get itself going after being earlier sabotaged by Sheridan's forces arrives and blows the defense platform up.

* In "Enemy at the Gate", a larger-than-normal Wraith hive ship blows up in low Earth orbit. In fact, the nuclear blast appears to vaporize the ship. There is an incredibly bright flash, and then nothing. No consequences for Earth either. Then there's a giant Ancient city-ship crash-landing in the San Francisco Bay.
* In Enemy Hands. His extreme clumsiness is legendary, although he gets better by the end of the novel. During one incident, he manages to trip over his own feet during a staff meeting, knocks a cap off another crewmember's head while falling, which hits a pitcher of water standing on the conference table, which falls and breaks open, soaking the captain's pants in water. Honor then asks him to help out with setting up a format dinner, shuddering at the thought of letting him anywhere near a table with food.
* In Enemy Hands, the heavy cruiser that Honor is on (as flag officer) jumps into a system to discover that the Havenites have already taken it and destroyed the local forces. Honor orders her ship to distract the attention of the enemy away from the point the convoy she was escorting would have jumped out of hyperspace, to give it the chance to jump back out. This done and the ship badly damaged, she orders the ship's captain to surrender the ship to the Peeps.
* In "Enemy Yours", after Dr. Woe deflects the Martian Commander's beam from his psionic scrambler back at him, he says "Grandma, I don't want to go swimming in my underpants, the neighbor girl will see me!" before passing out.
* In engineering, this is sometimes known as the "bus factor," i.e. how many people can be hit by a bus without the team losing critical skills and/or stop functioning altogether. The higher the bus factor, the better. A low bus factor is a sign of a team that can suddenly become nonfunctional if the wrong workers take a sick day or a plain holiday.

* In "Entrée", Dr. Frederick Chilton is accused of having accidentally done this to one of his psychiatric patients, former surgeon Dr. Abel Gideon who was institutionalized after killing his relatives. Chilton planted the idea in Gideon's head that he is actually the Chesapeake Ripper, a serial killer whose murders stopped around the time Gideon was locked up. It's so effective that even when Gideon discovers he's been gaslit, he still isn't entirely sure he's not the Ripper. When Alana Bloom calls Chilton out on this it's implied that he realized what was going on but decided to play along to keep the renown from being the psychiatrist to someone as famous as The Ripper.

* In Episode 1911, Snuffy leaves his giant trash can near Oscar's regular-sized one, and when Oscar sees the giant trash can, he wants to move into it. When Telly comes to see Oscar, Oscar decides to stand on Telly so he can climb up to the giant trash can. Unfortunately, this plan doesn't work because the top of the giant trash can is just out of Oscar's reach, and Oscar is too heavy for Telly to carry.

* In episode 19 Daisuke and Satoshi are cast as the princess and prince of a school play respectively and it's said that they have to perform a love scene. The girls hearing this are shown to blush and get really excited.
* In Episode 19, Hasegawa is relieving himself off of a cliff in a flashback when a woman notices and blushes.
* In Episode 1, a Cross police officer hits a Nought youth with his cudgel for no real reason aside from racist animus, putting him into a coma.
* In Episode 1, Natsuhi Ushiromiya banishes the two remaining servants, the family doctor, and her niece Maria because she suspects them of being murderers and wants to protect her daughter Jessica. This does not end well. She also fights the Golden Witch Beatrice in a duel, although you might call that a subversion: the desire to protect daughter and gun not equal to ability to defeat 1000-year-old sadistic witch. The trope name itself is referenced during the proceedings.
* In Episode 1 of Season 2, when Zim goes to confront Tak and Tenn, and also Team Save Earth when they show up, everyone is surprised when they realize
* In Episode 1, the player does not have a weapon for a portion of the game. There is a room you fall into with a gate, with a lock you must shoot off with a gun. This is to ensure the player finds a weapon in that room before continuing. However, if the player, for some reason, wastes every round of ammunition in that room without shooting off the lock, the lock will simply fall off and the gate will open, allowing the player to progress anyway.
* In Episode 1, the scene when Kaoru first meets Sentaro is blatantly ripped-off from some shoujo manga, complete with the pink background and the line "So, you have come to take me". It is explained later in the manga that
* In "Episode 1: Threading", after Zoya forces the airlock door open and is hurled outside like baby bunnies after mating season, you can cheerfully suggest that she should do it again. Her response is... not very nice.

Captain Komamura uses his bankai to slow down the restrictive current so the other captains can continue on their mission. He is swallowed up by the restrictive current and his fate is unknown at the end of the episode.
* In episode 32, a dog bites Grumble's butt. The dog stops once its owner calls for it, and Grumble gets a bandage on his behind afterwards.
* In episode 336, when Ichigo and Kisuke Urahara are trapped by many enemy reigei, Urahara tells Ichigo that he'll handle the opponents and that Ichigo should go on.
* In episode 337, when Urahara and Kon are faced by two reigei, he says he'll take on the reigei and for Kon to go on and complete the mission.
* In episode 33, King Cold decides to call 'Space Triple-A' so they can be towed home. (To explain, their minions are dead, and Cold insists that driving is for the help.)
* In Episode 33, when Future Trunks is in the present, Bulma starts hitting on him, unaware that he's her
* In episode 34: "Housebreak Hotel", a pet hotel promised a luxury stay. When Jon left, Garfield discovered that the sleeping accommodations were stacked cages in rooms, and the food was worse than raisins.
* In Episode 34, Kaeloo informs Mr. Cat that he has a zit on his face. The audience is then treated to a close-up of the zit on Mr. Cat's face.
* In Episode 35, France seems uninterested in the ancient Olympics until Greece explains men competed in the nude. Cue to France insisting the Olympic tradition should be revived, complete with him stripping down to nothing but a
* In episode 35, sometime between 8 and 10 AM, Miu draws a fire button on Chika's forehead while she's sleeping. Nobue doesn't say anything, and the two prompt Matsuri not to reveal it when she comes over. Nobody at the used manga shop they go to that afternoon tells her, either. Later, at 7:30 PM, a minimum of nine-and-a-half hours later, Chika goes to the bathroom and finally sees the button and the kanji for "fire" in the mirror.
* In episode 35, we see a photo from Emo's childhood of her crying because she wet the bed.
* In episode 36, Ichigo fights Kenpachi Zaraki so Ganju and Hanataro can continue on to rescue Rukia.
* In Episode 36 Vegeta calls his "Big Bang Attack", which is mocked by Tien and Piccolo in the next episode. Piccolo and Nail then spend half the episode bouncing ideas for names off one another.
* In Episode 37, Piccolo is mentally looking for help while in the grasp of Android 20/Dr. Gero. He finds Tien singing "Cat Loves Food" in his head.
* In Episode 3, Ange wets her flight suit while facing a dragon that is about to kill her.

* In Episode 3, Mr. and Mrs. Dead both died in 1906, and the missing poster at the beginning says "last seen June 19th.".
* In episode 3 of season 1, "The Asset", genius billionaire Ian Quinn, who is revealed as morally corrupt in the same episode and later becomes even more villainous, warns Skye against SHIELD, as he is trying to recruit her to work for him. He tells her that she fits the "profile" of people SHIELD usually recruits:

"You're a criminal. You have a warrant somewhere. Specialized skill set. No family. I'm sorry, I didn't meant to hit the nerve, but that's what these people do. SHIELD. They prey on loneliness and fear and desperation, and then they offer home to those who have no one else to turn to." One can't deny the truth in his words, especially after after we get to see Ward's backstory later in the season. Coulson also seems to partially fits the profile as he lost his father early and has no living family.
* In Episode 3 of Season 2, the group meets Reggie, a man who was in this situation before and had his arm cut off quickly enough so that the infection didn't spread.
* In episode 3, Shizuka, unable to fully concentrate on driving, does this when the rest of the group are discussing their next strategy. This also happens in the Manga.
* In episode 3, the ending text, normally "See you Space Cowboy," is replaced with "Easy Come, Easy Go."
* In episode 3, the microwave monster defeats Happy S. while he's in his mecha. Happy S. and Sweet S. then mention how dangerous the monster really is, to which Smart S. replies "I don't believe it! ...look at this, he totally messed up my hair!"
* In episode 3, the Red team send their rookie Pvt. Donut to go fetch some elbow grease and some headlight fluid from "the store". He returns with the Blue flag, thereby starting the plot proper. Made even funnier by the fact that he instantly caught on that they were sending him on a Snipe Hunt with the elbow grease. He is completely fooled by headlight fluid, though.
* In Episode 3, there's a list of the things the Oracle of Agnim perceived a cat to be. Once again, they're all ridiculous.
* In Episode 3, this is Eva-Beatrice's reaction to Beatrice deciding to deny the existence of all witches, after which she panics but is held down by Ronove until Beato's denial burns her away.
* In episode 3, we have poor Krillin attempting to break some bad news to Chi-Chi which leads to this trope.

* In episode 42, Big M. accidentally eats an orange he laced with diarrhea powder and desperately has to go to the bathroom. The only problem? There's a
* In Episode 43, Kaito Releases Yuma's monsters to summon his Photon Kaiser. This is iffy enough because the rules don't seem to specify whether the two are sharing fields or not (the previous episode implies this is not the case, as Kaito's Photon Pressure World Field Spell damages everyone who doesn't control a Photon monster, and Yuma is damaged by it). What happens next is a blatant example, however. To clarify, Photon Pressure World's effect is that when a Photon monster is summoned, everyone who doesn't control a Photon monster takes damage equal to the summoned monster's Level x 100. Kaito summons Photon Kaiser, and for some reason (most likely that Yuma would lose otherwise), Photon Pressure World doesn't activate. With no good reason. And the card text is written in such a way that the effect is compulsory. At best, it might be argued that Kaito summoned Photon Kaiser to Yuma's field (which it plainly wasn't, and in any case has no basis to begin with). Doing so would damage III and IV, but not Kaito because he had Galaxy-Eyes Photon Dragon out.
* In Episode 452, Luffy is on a hijacked Marine ship sailing to Marine Headquarters to rescue Ace from execution, and is talking to a member of the Marines. He assures them that he's going to rescue Ace, and they should "wash your

potatoes and wait." Most of those on the ship fall down as a result (for those unaware, the phrase "wash your

* In episode 53 the normally straight Jiraiya tells Naruto after seeing him in

just his boxers (japanese version) "You're quite sexy when you're naked." and (english version) "You know, you have quite a tight sexy little body."
* In episode 53: "Wonderful World", the titular amusement park is discovered to have fallen into disrepair... much to the eventual ire of the founder...
* In Episode 56, Noah Kaiba traps the cast in their memories of the first episode. Once the characters realize what's happening and start speaking original dialog,
* In episode 5, after returning a woman's purse after she dropped it, the faggot then starts coming on to her. When she rejects him, he accuses her of being a "friend-zoning slut" and starts protesting in the (largely empty) cafeteria. The woman reports him to a policeman, who hauls him off for sexual harassment.
* In episode 5, Jiro is forced to pretend to be Usami's boyfriend during the school festival, or she'll leak a photo she took of him and Subaru dressed up as a regular girl out. Naturally, this occurs just after he promised to take Subaru,
* In Episode 5, Kirito and Asuna (before they become a couple) fall asleep next to each other. Kirito wakes up before Asuna and realizes that with no one around, he can do whatever he wants to her.
* In episode 5 of Naisho, Pop does this on top of a desk while with Hana-chan's mind when suffering from a
* In Episode 5, on the Vigilante path, Alfred of all people qualifies for this trope, welcoming Bruce with a joke about a man with shaky hands when Bruce comes to after having fallen several stories down a building and being impaled on a piece of debris, having been lifted off and carried to the Batmobile by Catwoman/Agent Avesta (whoever helps Batman depends on the path taken) right before losing consciousness. It is during this part of the story that Alfred is slightly more upbeat and funny than usual, but it's not hard to tell that it's a mere coping mechanism for being visibly fed up with the anxiety he gets from Bruce's stubborn crusade as Batman.
* In Episode 5, Randall's high school yearbook photo has his head placed over the famous photo of General Nguyen. For reasons that eluded the writers, adding a fictional character to a cartoon version of a copyrighted photo

* In Episode Four, "Amid the Ruins", no matter what choice you make, Sarah will unfortunately suffer this fate. When she separates from the group and Clementine and Jane tries to find her, they find her with Luke trapped inside a trailer as walkers try to enter. After getting inside, Clementine tries to get Sarah to leave with them but she still hasn't recovered from her panic attack. If Clementine chooses to leave her in the trailer, the walkers will break in as Sarah cries out for Clementine and reaches out to her moments before being devoured. If Clementine chooses to save Sarah, later on in the game, the observation deck they're staying on crumbles when the group is moving a cannon and Sarah falls and is trapped under the rubble while Walkers are heading towards them. Regardless of your choice, Sarah cannot be saved at this point and she gets devoured.
* In Episode Four, "Around Every Corner", when Ben is grabbed by a zombified Crawford Oberson who had been hung from the bell and Lee saves him from it,
* In episode four of season 2, Trish's new boyfriend Griffin Sinclair offers to use his pull as a newscaster at ZCN to get Trish a job there. She politely declines, saying, "I love you for offering, but going to them as Griffin Sinclair's girlfriend won't get me taken seriously," and she would rather get the job by her own merits than her connections.
* In episode four, part two, Omega and Xero are helped by Omicron Squad, Omega's old crew from the military. They go up against a horde of zombies that have to be frozen and smashed to be defeated, simply because they would rather die alongside their former comrade than anything else. These soldiers even blow up a building being held back by Omega, so he'll be covered and protected when Kari
* In episode "Franz Hopper", instead of possessing one specter tries to clog Jérémie's airways by entering his mouth and nose.
* In episode "Homer Loves Flanders" Bart tricks Homer into buying what he thinks are tickets to a highly-anticipated football game, only to find that he had actually bought a wig store coupon. He wildly careens from elated, to furious, to contemplative, to giddy, before finally settling on possibly aroused. This takes place over the course of about ten seconds. In the
* In Episode III, Anakin is able to land an unfamiliar ship (well, half of a ship), that - as the novelization points out - wasn't even made to be flown by humans.
* In Episode II, we see the death of Jedi High Councillor Coleman Trebor at the hands of Jango Fett. By Episode III, his seat has been taken by Coleman Kcaj. The characters are named after Industrial Lights & Magic employee Robert Coleman and his son Jack respectively.
* In episode "Ill Suited", Kim and Ron are eating at Bueno Nacho when Professor Dementor attacks. Notable because Dementor says the following line: "
* In episode "Itchy and Scratchy: The Movie", Homer tries explaining to Bart why

his punishment is for his own good.
* In Episode IV, it's mentioned that after the Senate has been dissolved "regional governors" will have direct control, implying that the Galactic Empire is an empire in the actual sense (semi-autonomous client states ruled by a "metropole", a mother city) rather than a vast, micro-managed bureaucracy. Even then, they hope to use "the fear of this battle station" to keep the local systems in line.
* In Episode I, we get a scene of Viceroy Gunray on a "mechno-throne", a cool chair that walks around on four legs - very, very slowly... (And
* In episode "Make Room for Lisa", through a freak series of events, the sensory deprivation tank where Homer is floating is found by Flanders, who mistakes it for a coffin and buries it. Fortunately, it is right on top of a water pipe, and Homer's struggle causes it to fall through, being sucked into the sea and washing ashore where a vacationing Chief Wiggum finds it, mistaking it for litter, and sends it back to the New Age store.

* In episode one, Ruby deals with the first of many mooks by kicking him out a window of the store they were trying to rob.
* In episode "Phases," Xander thought Larry was confessing to being a werewolf, when in fact he was just coming out of the closet.
* In episode "Romeo and Smurfette", when Papa Smurf has switched bodies with Gargamel (long story), and the Smurfs have caught not-Gargamel, he reveals that he's really Papa Smurf. Cue one Smurf: "Yes, and I'm Smurfette." This scene comes from the comic book story
* In Episodes 42 and 64 Vax and Keyleth respectively call at the other's door at night saying they don't want to spend the night alone, and are let in. That's all we ever see. It's certainly implied they had sex, but we may never know for sure. And as of Episode 65
* In episodes aired in 1973 and 1974, a character named Bad Barney came to the street to bully Big Bird around. In his first appearance, he spray-painted his initials ("B.B.") on several buildings and windows and threatens to pin the blame on Big Bird if he opens his mouth. The adults almost immediately catch on and help the Bird stand up to Barney before he is given his walking papers. In the second skit, Barney returns, looking for a patsy to do his chores, his homework, etc., and threatens to blame him for a theft from vegetable vendor Willy's cart. Big Bird follows through with the theft but then admits later what he had done when Barney continues to accellerate his threats; when Big Bird rats him out, Barney flees ... right into a cop, who takes him away. The latter skit was remade in 1985, with

Telly as Barney's mark.

* In episode "Shapes", despite normally suffering from a horrible transformation into a beast, the tracks clearly change.
* In episode "Shiver Me Dodgers", incognito on a pirate spaceship, Dodgers slips on some banana peels on a staircase while trying to be "inconspicuous". He then angrily rants about how someone can be stupid enough to leaves banana peels on stair steps — to find out that the culprit is an enormous gorilla crewmate.
* In episode six of season 2, Trish and Jessica try to enter a private country club to talk to Dr. Karl Malus's donor Justis Ambrose. But because Trish is not a member there, the maitre'd refuses to let them through despite recognizing Trish. Ultimately, Jessica has to sneak in by hopping over a wall while Trish just launches a tirade at the maitre'd by calling him a sexist, which culminates in her eventually throwing up due to going through the withdrawal of being off Simpson's inhaler.
* In episodes such as "Slumbering with the Enemy" and "See Me, Feel Me Gnomey."
* In episodes that aired before the movie, an important distinction was sometimes made between sentient and nonsentient robots. Several episodes involve the characters encountering armies of identical, literally faceless robots (as opposed to the individualized sentient Transformers) usually described as "drones" or some such, which were mindless and could be blasted to bits with moral impunity. The episode "Sea Change" even went so far as to establish that Transformers have souls like human beings, while the Mecha-Mooks they were fighting in that particular episode did not. The Vehicon drones of
* In episode "The Hurricane!", a tree falls on Cleveland and he temporarily thinks he's Walter Cronkite.
* In episode "The Mile High Job", Nate and Sophie pretended to be a couple while boarding an airplane, and then got into an argument over their past history while working on their cover story.
* In episode, "The Night of the Cadre", West and Gordon defeat the fake Union soldiers at Vasquez Rocks with a knockout gas Gordon devised.
* In episode "The Plateau", a man puts a pen on a mailbox. Another man eating nearby leans over to examine the pen as it falls a few moments later. A bike messenger swerves to avoid him, and crashes into a fruit stand. Meanwhile, a woman walks out of a florist's shop next to the incident. A hobo tries to grab some of the fallen fruit and gets in an argument with the vendor, which distracts a bus driver coming down the street. He does not see the woman as she steps out into the street and collides with her, killing her instantly. The man who left the pen in the first place actually
* In episode "The Way We Was", Homer tells the kids the story of how he and Marge met in high school.
* In episode thirteen, Magnus has two flashbacks, both showing his corruption by Tzeentch.
* In Episode Three, after an exchange of prisoners goes horribly awry between Michonne's group and Norma's, a horde of walkers arrives, drawn by the gunfire and Norma's flare. Norma, enraged by the death of her brother, orders her gang to kill Michonne's group, breaking into the compound, closely followed by the walker horde. After engaging in brutal close combat exchange with Norma that results in Michonne cutting off Norma's arm, Norma finds herself surrounded and grabbed by several walkers. Michonne then has the option of either

* In Episode Three, "Long Road Ahead", while Lee and Kenny are searching for supplies in Macon, they see a young woman fleeing outside a building with her screams attracting the walkers which one of them bites her, Lee has the choice to shoot her to spare her from the walkers or let the walkers devour her and use her as a distraction.
* In episode three, Starlee finds a blog called Sated Epicure and refers to the blogger only as "Sated."
* In Episode Two, "Starved For Help", Travis or David will suffer this fate depending on who you save. If Lee chooses to save David, who's leg is caught in a bear trap, Travis will be distracted and he'll be devoured by several walkers. If Lee doesn't save David in time, Travis will try to take Mark's hunting rifle but will get accidentally shot, forcing the others to leave David behind to be devoured by the walkers.

* In "Equestria Games", Spike unintentionally chooses to sing the Cloudsdale anthem (he was expecting the Ponyville one to play), and given that he doesn't know any of the words, he sings his own poorly made rendition, inserting references to the Wonderbolts, Cloudsdale, nice trees, and wishing the song was over. Not one person in the audience is enthused...except Pinkie Pie, who smiles and bobs her head, and once he's finished, she belts out, "NAILED IT!!!"
* In Erma Bombeck's "Just Wait Till You Have Children Of Your Own," a mom slips her husband a chocolate laxative square, passing it off as ordinary chocolate candy at first. Her tween son thinks that's an awesome practical joke and wants to try his hand at playing it on someone.
* Inertial Dampening in this 'verse, despite enormous changes in acceleration (something like 5000 g's is common) and direction. Since ships pulled by a singularity as, effectively, perpetually falling into it (provided the ship continuously "extinguishes" it and reforms it farther ahead), both the ship and the people aboard are experiencing the same rate of acceleration, so no inertial compensation is required. Additionally, turning is achieved by flipping the

singularity to the side and simply traveling along the curved space-time in a straight line (from the ship's point-of-view).
* Inertial Dampening (or at least any acceleration/deceleration that can be expressed as ".C"), needed to keep the crew from being rendered a fine paste in high-speed maneuvering or entering/exiting FTL travel.

* In Esmer's case, his warring natures apparently mean that whenever he helps someone he is compelled to balance this out by screwing them over somehow, and whenever he screws someone over he is compelled to balance this out by helping them somehow. Linden takes advantage of this at one point, when Esmer is hanging around to prevent her and her party from escaping from deadly peril (his presence blocks the magic that would let her teleport out). Linden realizes that, since he is actively screwing her over by blocking her escape, she can force him to in turn help her by answering her questions.

* In Estonia, where military service of at least 8 months is mandatory and is 11 months for NCO, military police, drivers, recon, snipers and most specialists, this happens as a rule. For the 11 months, the first 3 months is so called "green meat" time, but after that, soldiers are divided into NCOs, drivers, and those in some kind of specialist field. In the following 3 months, those in the NCO course receive a crash course in everything, while those in a specialist field receive standard infantry training before devoting the next 5 months to the specialist field, and because they have no NCOs leading them, some more promising privates are promoted to corporals and put in charge of squads. By the time NCOs finish their crash course and are put in charge of specialist's squads, those privates and

corporals have so much more actual experience in fighting in squads that it's hard for NCOs to earn respect from privates who view NCOs as totally incompetent newbies... which they actually are without the experience necessary. But over time, the NCOs gain enough experience and become competent enough to actually earn the respect of troops they are in charge of, boosted by the fact that they have more knowledge of operating on the field than promoted corporals who had to learn everything on the go during the infantry training.

* In fact, during Shakespeare's time, it seemed perfectly common to be cruel to the actors like that, not telling them when they were going to be slapped, etc. Then there is one scene where a character tries to get a word in but can't manage to interrupt someone. Since the actors weren't given the full script, only their own lines and the key lines before them so they would know when it was their turn, the previous actor would say a phrase similar to the key line three times, each time causing a false alarm, making the actor after him think it's his turn to speak, only to be cut off by the first character's continued talking. This very convincingly created the illusion of the second character trying in vain to get a word in.

* In fact, it gets a lampshading/explanation in Book 1... there's debate over whether someone being turned is murder, as the victim is still around, but the personality changes are severe.
* In fact, it goes all the way back to the original pilot "The Cage". Shortly after Number One and Yeoman Colt are beamed down to Talos IV minus the men in the landing party, the Talosian Keeper describes in clinical detail how the two secretly feel about Captain Pike.
* In fact, it has happened so often that when for the first time it doesn't happen to them but instead, another group of wandering demon-slayers, they're actually taken by surprise.
* In fact, it includes all four of the sub-categories listed in the trope description, and probably makes up a few more.
* In fact, it is relatively safe to assume that anything made by a Spark is terrifyingly dangerous because it is
* In fact it's actually implied in some parts that Mechanical life is the standard in the universe. Organics like humans are relatively rare and unusual, although other organic aliens do appear as well.
* In fact, it's become a tradition at the modern Globe Theatre for every play performed there, whether it's tragic or comic, to conclude with a big song and dance and send everyone home happy.
* In fact, it seems the more powerful someone is, the more likely they are to do immoral and/or pointless things for kicks. Crocodile constantly sent sandstorms to Yuba to keep hindering the efforts of an optimistic old man searching for water. He even admits that there's no point in doing so as it has no connection to his

* In fact, it's the Game Master's job to ensure that the adventure is a riveting, enjoyable tale, so he or she is expected to alter the plot to provide challenge for the heroes, since a story where the hero is completely unchallenged is a very boring one.
* In fact, it's the same cartoon that Deep Thought is watching within the movie.
* In fact it succeeded so well that one executive was concerned their viewers wouldn't be able to keep up with the sheer number of jokes the show told, and it was cancelled after only one short 6 episode season as a result.
* In fact, it's widely believed that the reason Dustin went to WWF after he was

fired from WCW (for blading in the infamously bad "King of the Road" match, which he must have known was against company policy) instead of letting Dusty get him rehired again was because he wanted a chance to make a career for himself out of his father's shadow and away from accusations of nepotism. It drove a rift between the two of them for years, but they made up eventually (helped by the fact that Goldust became such an iconic character).
* In fact, it took less time than feared since Ryan Donovan, the shooter, was convicted in 2011, the same year as the crime, to life by a civilian court, the option of a military trial being also available.
* In fact, it turns out that the zealots are responsible for the virus, so as to more easily find the Second Coming.
* In fact, it was because of his marriage to Inko and Midoriya being born that caused All For One to change his plans so he could stay with them and/or keep them safe.
* In fact, it was explicitly stated that his heat vision is activated when he's turned on. The episode was quite fanservicey.
* In fact, it was Orgrim's own sense of honor that doomed the Horde more than Gul'dan's betrayal. Not wanting Gul'dan to escape unpunished, he sent a huge chunk of his own forces to hunt him down. Not only did it force him to lift his siege of Lordaeron, but the forces sent after Gul'dan suffered heavy losses killing the traitor clans and were then further obliterated on the way back by a surprise attack at sea by Admiral Proudmoore, leaving only a few thousand warriors. Had Orgrim chosen to continue the siege instead of seeking revenge, he would have razed Lordaeron, likely winning the war.
* In fact, it wouldn't be until Franklin Roosevelt served four terms as president (he died in office during his fourth) that the government felt it was necessary to add a "two-term limit" stipulation for the president to the constitution.
* In fact, Jack retires several times, on and off screen. (He was retired before the original movie started.)
* In fact, Jay Garrick is so cool that he's the guy Nightwing (the original Robin) wants to grow up to be.
* In fact Jean-Marie Le Pen (full) real name is Jean Louis Marie Le Pen, making this a straight example. Jean-Marie is a nickname he started to use on the advice of his (now ex) wife in order to sound more Catholic, a traditional target for what passes for the far right parties in France.
* In fact, just 'if Otacon likes you'. Look at what Snake went through in
* In fact, killing one of the women in 3D results in more enemies spawning. They're serious about getting those women.
* In fact managed to single-handedly disable three battleships and damage two cruisers in the 1940 raid on Taranto.
* In fact, many 'badasses' on the show (Spetsnaz, Zande, Jesse James, Medellín Cartel members, Navy SEALs) run away from their foes because they always seem to run out of ammo and need to run away long enough to switch their weapons or ambush their enemy. (If the enemy also runs out of gun ammo, it normally leads to a knife fight.)
* In fact, many deliveries are not even pitched to hit the stumps in the modern game- the batsman gets out when he plays the ball badly, and if he leaves the ball he'll be safe. Compare to baseball, where a pitcher can and does intentionally deliver some balls outside of the strike zone.
* In fact, many of Shakespeare's plays use this, including most of the comedies. In
* In fact, many of the wizards, warlocks and sorcerers encountered throughout the series count - hero or villain - though some are a bit closer to the street than others.
* In fact, many players prefer to save the more valuable dyes (black and white especially, but also blue, red, and silver) as sources of ready cash in the in-game economy. White dye generally goes for about half the price of black dye, and blue, red, and silver dye are, while still much more expensive than the other colors (orange, green, brown, yellow, purple, and gray), cheap by comparison.

* In fact, most modern comic writers fall into this category. Warren Ellis, Grant Morrison, and Alan Moore (just to name a few) often have morally ambigious protagonists.
* In fact, most of the colorful villains in this series use this technique to stay under the radar.
* In fact most of the early chapters of Lives of Genius, the events from Boy Meets World are referred to but mostly not shown; Cory, Topanga, and Shawn are hardly shown-Cory only in the Graduation Day scenes, Topanga has one scene at the Science Fair and Shawn has two scenes-at Graduation Day and at a restaurant in which he encounters the engaged Stuart and Jennifer. The gang are also seen briefly through a window after Riley is born and Minkus is contemplating his life after his grandfather’s death and wife’s pregnancy. This is intentional so the readers can focus on what Stuart Minkus was going through during this time. It’s not until their children become friends that Cory and Topanga and eventually Shawn become regular characters as they have reappeared in Stuart Minkus’ life.
* In fact most of the POV seems to be that of women recalling their ordeal. Although most of the males on the show seemed like they were in denial.
* In fact, most of the Shichibukai were relatively unfazed. As some of the strongest pirates in existence, they need to be able to keep a clear head... though most likely due to Luffy's influence, Jimbei proves in the Fish-Man Island Arc that he's
* In fact, most of the US' food, particularly chocolate has this reputation. British people were horrified when Hershey effectively took over Cadburys, viewed as the apex of British milk chocolate. Damage has so far been limited, although there was widespread revulsion to one British chocolate icon, the Creme Egg, being "revised" to an American production standard.
* In fact, most races and cultures show patterns in their naming, often subtle ones. It is possible in many cases to identify a character's species or culture by name alone.
* In fact, most times Redcloak gets a significant portion of dia/monologue with the heroes, he spends time pointing out these kinds of things.

* In fact, nearly any protagonist of a tower-defense game could be considered an Engineer of sorts.
* In fact nearly everyone on your team is an Ace Pilot either by insane skill (ATX, Aggressors, Axel, Irm and Ring), developed Telekinesis abilities (Ryusei, Aya, Kusuha and company) or by being the only pilots capable of operating unique and extremely powerful machines (Masaki, Lune, Kouta, Folka etc). Really the reason the OG group is so unbeatable is because they have nearly every Ace in the EFA in

one group.
* In fact, NKVD troops are the direct ancestors of the current Internal Troops, as when NKVD was split into KGB and MVD in the postwar restructuring and post-Stalin power struggle, they went to the cops. The security half of the organization managed to keep the border police, though.
* In fact, Nobunaga did not need any rescue at all, since he's one of the starting characters for the Sengoku story mode. However, you get to rescue BOTH Sun Jian and his son Sun Quan in one of Wu's battles.

* In fact, one notices that Spike is initially excited at Twilight getting the two tickets until Twilight begins thinking on who to invite. It's heavily implied that the second ticket was for Spike and Twilight's lack of consideration was why Spike feigned disinterest.
* In fact, one of the benefits in joining the Combine forces is to be able to breed (or at least something close to sex) makes sense since the Combine want to use the human race as its new army. Overwatch's official term for this reward is "Non-mechanical reproductive simulation".
* In fact, one of the comics states flat out that Alan Extra is everyone who isn't a named character. Store Clerk? Alan. Tech Support? Alan. Guy in panel 1 who looks different from guy in panel 4? Both are Alan.
* In fact, one of the dialogue options when meeting them is "Doesn't that guy behind you say anything?", to which the other two reply "Nope," and "Not a word."
* In fact, one of the Steam Achievements (or Xbox achievements, whichever system you're on) is to hit a Hunter with a melee attack just before it lands on you. It literally stops the Hunter dead in its tracks, and if it's a player in Versus, they usually have no idea what just happened and are easily killed. The achievement is appropriately called Dead Stop.

* In fact, Sephiroth's been made to be a Triumphant Example of this Trope. You will rarely hear him raise his voice or shout (even when he is being struck by a weapon), he never loses his composure, and he will usually have either two looks: an amused smirk or a just a simple frown. Oh, and don't ever expect to see him bleed.
* In fact, she had been murdered some time earlier up the coast, and an accomplice had taken her place to confuse the time of death and provide the killer with an alibi.
* In fact, Sherlock's apartment is a similar situation. Mrs. Hudson's husband was accused of murder. He assured the conviction.
* In fact, since everybody on the show is so much like this, having Kochanski from another universe turn out not to be is an obvious double standard used for laughs.
* In fact, some paleontologists theorize that this is how dinosaurs evolved flight in the first place. The theory is that feathers evolved as insulation, then got used by flapping to aid the dinosaurs in running up steep slopes. As feathers evolved to be better at this, they became possible to use for gliding. Then the dinos combined the two uses, and the rest is (pre)history.
* In fact, something like 90% of Terran infantry are convicts that have been brainwashed into obedience, because the extremely high mortality rate prevents many recruits. One assumes the people in the armored vehicles are more willing to see action. And at least some of criminals are some of the worst scum in the galaxy. One female soldier remarks that she would lure men back to her house with the promise of sex, then lock them in her basement and torture them for days before skinning them alive. And these are the Marines. The reapers mentioned above are the criminals that are so violent that they can resist the process, and are sent to a remote ice-planet for an even more intense (and lethal) brainwashing curriculum. Some in the Marines include such "scum" as non-violent political dissidents and protesters, and, at least during the Confederacy, kidnapped Fringe Worlders.
* In fact, spells in general are considered to be this, but a few schools in particular take most of the blame: Divination (whose wide variety of information-gathering spells makes running any sort of mystery or puzzle extremely difficult), Conjuration (a big one, as teleportation invalidates most needs for traveling, and the ability to summon aid bogs down combat, when the summoner isn't just calling up

* In fact, that weak point is one of the big reasons ships don't have armor these days. Radars and other electronic sensors cannot be effectively armored, and if a hit is going to disable them with or without armor, then better to dispense with weight and volume-intensive armor for better speed and more active defenses.
* In fact, the abridged Noah arc is subtitled as 'The Cancelled Series' because the show has been cancelled from within by an organisation claiming to be 4KidsEntertainment, and the protagonists are fighting to bring it back.
* In fact, the actual list of what constitutes a foul has been kept secret for years for fear of "giving the players ideas."
* In fact, the aforementioned last real cavalry regiment in Soviet and then the Russian army - the 11th Cavalry Regiment - was really kept almost entirely for the filmmaking purposes. It is even unofficially called "Mosfilm regiment" after the country's largest film studio is is usually subordinated to. (Today it is the Cavalry Squadron of the Presidential Regiment, reporting as part of the Federal Protective Service.)
* In fact, the afternoon after the 9/11 attacks, parents were warned
* In fact, the Banned/Restricted list exists solely because of this. Changes to the list not only focus on banning overpowered cards, but also reflecting/changing

the metagame. Key example is Jinzo, which used to be limited to 1 per deck due to its decent power, ease of summoning, and effect that negates all traps. Eventually, stronger monsters and effects came out making Jinzo less and less powerful, which is reflected as Jinzo was eventually limited to 2, and is now currently unlimited (you can use 3).
* In fact, the Blendtec spins so absurdly fast even on the lowest settings that it's ideal for blender drinks and frappes (which is why so many coffee shops use BlendTecs), but anything thicker will form an air bubble almost instantly. Luckily, they do make a special jar now for handling extremely thick subtances.

* In fact, the fast rapping is so common that it's notable when it doesn't happen: Eliza is the only non-minor character (i.e., excepting Maria and Peggy, who only appear for a song each) who never raps. As Phillipa Soo (who played her in the original Broadway cast) put it, this ties into the theme of how she was the only character who had what Hamilton (who 'writes like he's running out of time') never could get: time.
* In fact, the fear of something like the above happening in real life is why P.A.M. was cancelled in real life.
* In fact, the few stories narrated by Holmes himself, with Watson absent, are those that Watson would have solved first as a doctor.
* In fact, the few times the trope is averted in mythology are when the name is a corruption of a previous meaningful name. Zeus is just nonsense, but put it together with Pater, meaning "father", and it goes back to the previous deity Dyeus Pater, "sky father." The Romans would later corrupt Zeus Pater into Jupiter.
* In fact, the first game mentions that any time a high-profile criminal is captured, they're given a choice: execution or Tournament?
* In fact, the first Nox that SG-1 meets would have been killed if the humans had not fought to protect them. The Nox don't really acknowledge this, and still believe that fighting is unnecessary. But not all of them are

* In fact, the first three rises of his bounty involved crises with the women of the crew. He first gained his bounty after defeating Arlong and liberating Nami from his control. Then, his defeat of Crocodile, an act that ultimately saved Vivi's country, would have his first rise. The next rise happened after he saved Robin from Enies Lobby, an event where he would also defeat several thousand mooks, and include the destruction of the entire island itself thanks to the inept chief of CP9 accidentally ordering a Buster Call, and the entire crew declaring war on the World Government (which basically amounts to the entire world). This would result in a staggering two hundred million beri increase.
* In fact, the first time this is really averted for a main character in
* In fact, the first USAAF aircraft to fight on the Western Front after America's

entry into the war were British Spitfires from the Eagle Squadrons which were repainted to have American insignia on them. They transitioned to American-made airframes as the American war effort got going.
* In fact, the game has various amusing responses to you doing... suggestive things with naughty-sounding items. Putting gel on the (chicken) cock/(church) member/(donkey) ass will cause Alex to awkwardly cut short his typical description of "you rub an amount of gel on the [object]", and trying to get the bartender to paddle any one of these objects into their homonyms will cause her to smirk and refuse to do so.
* In fact, the Gospels depict Satan as the spiritual force truly at work BEHIND apostate Israel and Rome of the first century (the Pharisees, the Sanhedrin, the Sadducees et al, and Pilate, representative of Caesar in Judea); flowing from Jesus' understanding of his own vocation—bound up inextricably with the very the purpose and meaning of his death on the cross—so Jesus squarely identifies the
* In fact, the Hiigarans were so bad that the Bentusi had to interfere in order to stop them from wiping out the Taiidani. The reason the Taiidani kicked out the Hiigarans from the homeworld in the first place was because the Hiigarans have turned the Taiidan homeworld into an unlivable hellhole with orbital bombardment. Furthermore, had the Hiigarans peacefully given up their hyperdrive core instead of attacking the Bentusi, they still would've had a fleet to defend against the vengeful Taiidani.

* In fact, the Nazis organized an entire series of air raids that targeted cities that were strategically unimportant but contained famous architecture (the Baedeker Blitz; apparently, the Luftwaffe high command chose the targets from the Baedeker's Tourist Guide to Great Britain, and all of them were ranked three stars or higher). Fortunately, most of the targets like Canterbury Cathedral, Exeter Cathedral, and York Minster escaped mostly unscathed.
* In fact, the old man is powerful enough to be the final boss in one possible ending (in the other endings, he is revived at the peak of his power by his grandson Genichiro's sacrifice, and this version of Isshin is by far the most difficult boss in the game).
* In fact, the only Oprah-promoted talker who didn't succeed was Iyanla, who ran afoul of the inverse of this trope, losing all credibility and ratings after a row with Oprah, after she rode a bump to her own talker. The women made up on the eve of Oprah's final show.
* In fact, the only reason the Aleran villagers survived the second book was because the Queen didn't expect self-sacrifice from humans.
* In fact, the only thing stopping the Zeorymer from owning everything within a 100-mile-radius in two seconds is its pilot being a total wuss until his evil side takes over. So how powerful exactly 'is' this monstrosity? Powerful enough to allow it to single-handedly beat the

* In fact, the survival lengths of the various contractors may be lampshading this. As a comparison, November 11th has relatively weak powers. Many contractors have one-hit kills, he only has ice powers.
* In fact the SW EU plays this straight, subverts it, and averts it, in various places. There's the Holonet, which is instantaneous and built on a network of large, planet-based repeaters. However, it's subject to network failure and communications taps. Direct subspace communication between ships is also possible, but can be much slower and harder to get a signal depending on how distant you are from the other party. Smaller ships like your average shuttles and starfighters, however, usually don't have any kind of FTL radio, since it's too expensive. A "small" transmitter designed for a spy is described as costing more than a high-end fighter craft, so equipping small ships is only done by the wealthy, the well connected, or for military reasons. It's also called out multiple times that this does NOT work for sensors: detection is speed-of-light only.

* In fact, they toyed with the trope in four straight games, but only one really fits the trope. In their second game, they did score a late winner, but had equalised with over 30 minutes left (and in any case the game couldn't go into overtime). Their third game fits the trope perfectly; they came from behind to beat the Czechs with two late goals, thus avoiding a penalty shoot-out. In the third game, Croatia went ahead very late in extra time, only for Turkey to equalise and win on penalties (so they *did* need overtime). Then in the fourth game they managed the late equaliser, only to *lose* (to Germany) in the last minute before overtime!

Endless lines of crazed berserker Sith with light sabers tended to end armies very quickly. Plus this type of Sith, while weaker than the smarter/calmer Sith, tended to be less backstabby as long as you had a common enemy to point them at. Indeed the smarter Sith were only destroyed because Darth Bane (now obsessed with the
* In fact, this deserves explanation. The player rolls from 1-100, and can get results for up to 75. (Though, each result can get a few choices, so let's be generous and say 25 choices). Why up to 75? Because go beyond that, you move to the Perils table...which has ANOTHER 1-100 roll, of more like 35 choices. Total of about sixty choices. The worst? Instant death. Second worst? Instant Daemonhost.

* In fact, this tactic resulted in the "Disgrace of Gijon" at the 1982 World Cup, when, after getting a result that assured both teams would progress to the next round (as the only other team that could have advanced at that point had already played), Austria and West Germany basically just kicked the ball around for 80 minutes. FIFA closed this hole in the metagame by mandating that all final matches in group play in the World Cup and qualifying be played at the same time; most leagues and tournaments around the world mandate likewise for their final days.
* In fact, this trope is partially what led to Schumacher being hired to direct the Batman movies in the first place. In 1989,
* In fact this trope was deliberately invoked in-universe. Age after age, the forces of evil would attempt to conquer the world, get most of the way there, determine that victory was inevitable, then start to turn on each other as each petty evil overlord tried to come out on top of the others when the dust settled, which gave the heroes the chance to regroup and turn things around. Takhisis was sick and tired of this, so she discarded the majority of her forces, all the hordes of monsters and minor tyrants, in order to found a knightly order who would follow a strict code of conduct and honor. They were much less powerful overall than her previous armies, but their unity and integrity made them much more dangerous than the less discriminate monsters of the past.
* In fact, this trope was very explicitly averted by Mel and Sue immediately after the
* In fact, this trope would partially apply to a majority of people in some countries. For example, studies show that, in France, people who have been reported to have a higher IQ than average (above one standard deviation from the average, meaning approximately superior to 115) are also globally low achievers at school. They have lower ratios of success at the "Baccalauréat" (High School graduating exam), and a higher proportion of them drop school before actually taking the "Baccalauréat". This might or might not be true in other countries as well. This is frequently believed to at least partly stem from the rather rigid and conformity-oriented French education system and the lack of formation of teachers relatively to this matter (although significant changes have been made thanks to governmental initiatives).

Generally Agents only make creations for large scale battles where they can benefit from meat shields. Not having any creations also means a bigger essence pool, so it becomes much easier to use essence-gobbling spells like Augmentation, Essence Blade, or Aura of Flames.

* In fairness, there is a very good reason for human domination, and it's based around a completely different species. The dominant species for thousands of years have been the Goa'uld, a race of mind-controlling megalomaniacal parasites. The first species they possessed en masse were the Unas. A far larger, more intimidating and all-around more powerful species blessed with both huge endurance and natural self-healing (which the Goa-uld's own supplemented perfectly). Humans are in comparison weak, frail and pathetic, but they also have superior senses of taste and touch, and aren't as ugly. The Goa'uld, being gluttonous hedonists focused on power, food and sex, decided to make humans their slave race for few other reasons than these. They seeded humans across the stars en masse for use as slaves and worshippers, and killed off any other species (or any humans that got too advanced) to protect their own seats in the galaxy. When inevitably their empire fell, the humans were already everywhere. Less a case of humans special, more a case of humans getting vaguely lucky the Goa'uld invested so much in them before finally being kicked out of power.

* inFAMOUS 2, Cole's actions will led to every Conduit's as well as his own demise. The people of New Marais will honour and remember Cole as a hero for his deeds.
* inFAMOUS 2 doesn't think very highly of Cole at first, he does indirectly compare him to Jesus Christ when admitting that his men admire him greatly.
* inFAMOUS 2 features a cutscene where Cole returns to his and Zeke's hideout and, rather than discuss absorbing the Blast Core he found earlier, shut off their cell phones and simply watch TV while drinking beers. Cole doesn't actually get around to absorbing the Blast Core until later that night, after Zeke passes out.
* Infamous 2 gives us Cole and Zeke in a total Bromance moment. Cole is about to absorb the penultimate Blast Core, but he and Zeke decide to just relax for once and watch TV and drink beer, ignoring their phones/radios. Fade to several hours later and the two are leaning on each other.
* Infamous 2 is this for quite some time... until Cole and Kuo photograph him using his conduit powers and creating the swamp monsters that have been plaguing New Marais.
* inFAMOUS 2, it usually takes a lot of firepower to take down a helicopter. However, in a cutscene Cole is able to nearly destroy a helicopter with a single shock grenade.

* In "Famous Last Words", Castle must unravel the meaning of the lyrics for victim's final hit single to solve the murder. Only then can he and Beckett confront the killer and clear the name of the innocent suspect. Except...the key physical evidence was texts sent on the innocent suspect's phone, which were far more explicit about what actually happened than the song, and which the police were already going through. This evidence on its own identified and proved who the killer was, so the business with the song was only important because Castle and Beckett

* Infamously played straight in "The Apple", where Kirk and McCoy try to destroy the machine that keeps the native civilization of the paradise planet alive, in order to show them the value of love and freedom. Spock points out to them that Starfleet officers are not permitted to interfere in the politics of primitive alien civilizations, that they have no way to predict the consequences of such a drastic interference in the evolution of a species they just discovered earlier that day, and that the natives lead long, happy lives under the existing system, even if a human in the same situation might be less content. Kirk retorts that he owes it to the natives to give them the freedom to choose how to live and think for themselves — even though, so far as is shown, the natives' service to the machine is entirely voluntary. The episode doesn't show us the aftermath of Kirk's decision, but when Spock attempts to discuss them in the final scene using an admittedly bizarre argument, Kirk and McCoy just

* In Fantasy Flight's Descent boardgame the players battle their way through dungeons filled with Demons, Beast Men, Giant Spiders, and Chaos Beasts. Water is an uncrossable barrier (like a chasm). When players asked why there was no swim skill, the designer (in the FAQ) responded that there is but it's useless. All water underground is infested with Blood Squid, capable of killing any living thing instantly. This is also why there are no aquatic monsters.....
* In fantasy/sci-fi stories, this can also involve superpowers if they're passed down genetically. If one child inherited mom's psychic abilities while the other kids are muggles, she'll spend a considerable amount of time with that one to teach them how to use their powers...at the cost of neglecting her other children.
* Infanticide has a long history. Back before birth control - i.e., before the

twentieth century - people dealt with unwanted children in one of two ways: abortion, which was common virtually worldwide, and getting rid of the baby after it was born. In Europe and its offshoots, this took the form of giving your baby to an orphanage or a guild, or simply to leave them someplace that someone might pick them up. Whether the child lived or died - and at least nine out of ten babies abandoned in this way
* infantile terms, pyrotechnic display. Whether these two Pakleds are representative of their entire species is never really addressed, however.
* Infantry are probably the most extreme example. As guns became stronger and more accurate troops went from fully armored (if they could afford it) to virtually unarmored, until even officers were wearing nothing more than a basic jacket and trousers, because it was all useless. Then, in World War I, indirect-fire artillery made shrapnel at least as big a concern as small-arms fire for infantry, so metal helmets and (in some circumstances) light breastplates were adopted to protect against these new threats. Over time, developments like kevlar, ceramic plates, and ballistic shields have also gradually turned the tide against small-arms fire, but modern sci-fi seems convinced full body armor is poised for
* Infantry could no longer hold objective inside transports. Vehicles were more vulnerable. This caused a shift towards combined arms and infantry lists.
* Infantry Fighting Vehicle. However, serving as a transport made it bigger and less maneuverable than a pure attack helicopter. Though in terms of pure straight-line speed it's still the fastest attack helicopter to ever go beyond the prototype stage.
* Infantry Fighting Vehicles (IFV)Can carry infantry, but also provide direct fire support. It may also allow infantry to fight from inside the unit. Can be armed with an autocannon (or sci-fi equivalent) as well as anti-armor rockets. However, IFV are not meant to take on Tanks alone.
* infantry soldiers armed with anti-personnel rifles can't lock onto him because he's exothermic.
* Infantry squads have an enormous viewing range, which is not obscured by forests, but are quite vulnerable in the open. Anti-air units and particularly tanks, on the other hand, have extremely long firing ranges but limited viewing range, so skillful players hide their infantry quietly in the woods close to the enemy position, while the tanks bombard it from safe distance, covered by hidden AA.

* In Fate RPG, conservation of detail is made into a game mechanic. If something is deemed important to an NPC, group, player character, or even a situation or event, it can be given an Aspect - a short description ranging from a single word to a simple sentence. A major mechanic of the game is to either Invoke or Compel them - that is, spend the game's meta-currency (Fate points) to bring the Aspect into play, either giving a roll a bonus/penalty or changing the narrative of the game in the moment. Since the Aspect can be anything as long as it's meaningful in-game and interesting, the fact that your hero has, say, a Fabulous Mustache (and you decide to make it the character's Aspect for whatever reason) can very well be more important than his backstory or his gear. The latter is further reinforced by

the fact that the game mechanics explicitly state that if you have a skill, you also have all the tools needed to use it (so if you're skilled at Shooting, you implicitly have *some* sort of a bow or gun or something else appropriate to your game - without needing to go into any detail as to the specifics, if your gaming group doesn't think it's important).

It certainly doesn't turn into anything (given that Lennox eventually kills her and eats her soul).
* Infernal threatens to not only execute the Muslim terrorists who'd killed his brother, but to cut off their private parts and feed them to pigs. In this case, this trope's purpose isn't evidence-disposal but defilement.
* Infernity Dwarf is, other than the fact that he's a Dark Monster, pretty much a dwarf. (The burning axe was added for the card game version later.)
* Inferno adds the Kapaku faction, who seek to convert Auriga into a volcanic wasteland like their home planet. It turns out though that said home planet was also the victim of a different version of this, with invaders having converted their preferred scorching landscapes on it into verdant forested lands.
* Inferno" concerns a plot to drill through the Earth's crust, inspired by the Kola Superdeep Borehole, a project to do the same thing that began in 1970.
* Inferno Cop consists of cut out models moving across photo backgrounds with voices dubbed in. Also, things explode in live-action.
* Inferno Cop. They even have a symbol they brandish their people with.
* Inferno Cop uses it to its fullest parodic potential. The characters are cut-out models who don't change — they even get reused as different characters.
* Inferno; Dante is scolded by Virgil when he weeps at the pitiful appearance of the soothsayers in Malebolge. He learns his lesson and bluntly ignores the damned who plead with him in the Ninth Circle of Hell.
* Inferno) Hell and in need to some togas to escape. Finally getting to the administrative center of Hell, he puts in a requisition for the garments and is handed a two foot tall stack of forms to complete and a single pencil. When he points out that a single pencil will never last to complete all the forms, he is told to improvise and his attention is directed to another guy nearby who is working on his own stack of forms. His pencil has been worn down to a nub and he is using a ripped out fingernail and his own blood to complete the forms.
* Inferno himself often personally used to return others' Nazi salutes.
* Inferno in comics history. Especially given how often Madelyne raised her arms, it is widely assumed that only telekinesis was keeping her inside that costume!
* Inferno in hell, rather than God or Satan sending them there. Arch-sinners Cassius, Brutus and Judas are forever getting chewed up in Satan's mouth.
* Inferno in which the Doctor is conspicuously absent, this had the potential to get extremely confusing, and the scene was ditched. It's still viewable on the DVD.
* Inferno keeps track of transgressions, with Hell being divided into subsections for specific crimes.
* Inferno Match — granted, he was clothed there, but it still takes balls).
* Inferno — it's not an evil act, but you are looking at the heart of all sin in this or any reality, and it's nearly impossible for it not to erode your moral standards.
* InfernoMOO, this is a possible character type to play. You will be sufficient in most things that you do, but players who specialize will dominate you in those areas.
* Inferno port. While the 59th Street driving section is still unlikely to be beat at first try, the improved controls, Sarah's giving you directions as well as there being checkpoints along the way actually render the whole sequence somewhat fun if still challenging.
* Inferno Quest features Incarnations, which are formed from a balance of Celestial

and Infernal energies. The Lord of Greed, Greed, is an incomplete version, and the Personification of the Circle of Greed itself.
* Inferno, received some outcry from some Filipinos. This also led to some curious people buying the novel and only to find out that the description has nothing to do with the plot. Somehow, the controversy also serves as an eye-opener to the Manila city government to improve the city's state.
* Inferno: Satan is imprisoned in ice. When it melts, it's gonna get bad.
* Inferno series, Moose is introduced as an elite bounty hunter, claiming to be the best. More generally, there seem to be lots of bounty hunters running around the world of Inferno. This makes sense in that the Order pays handsomely for getting the people marked for death in the Ritual, enough for Moose to become rich despite his youth. However, bounty hunters also appear to do more general mercenary work for anyone who can afford to pay them. A rare fantasy example.
* Inferno. Something that goes unnoticed by the headphone-wearing janitor.
* Inferno suggesting sardonically that God "could take lessons in morality from Vlad the Impaler" and that "He could have made a better universe by throwing dice".
* "Inferno". Thankfully the Doctor was able to stop it before the cataclysm came to pass in his world.
* "Inferno", the detached TARDIS console drops the Doctor into a rubbish tip at the story's conclusion.
* "Inferno", the organisation being an SS-like doppelganger of UNIT in a parallel world. They even use English translations of SS ranks.
* "Inferno": The Primords. If they even touch you — hell, if you touch that green stuff for even a fraction of a second — it's only a matter of time before you become a mindless Primord.
* "Inferno", the TARDIS console transports the Doctor to a parallel universe where Britain is governed by Fascists.
* Inferno, the villains open a portal to the hellish dimension of Limbo which causes Manhattan to transform into a demonic version of itself. The overall goal was to spread it to the entire world.
* Inferno. This consists of the Doctor tied to a chair with a light in his face, being shouted at a lot. It works as well as you'd expect, but it's obvious the Brigade Leader isn't very smart.
* Inferno thoroughly corrupt and evil, and even caused someone to get sent to Hell by claiming he controls who goes to Heaven. It's made very clear he will eventually go to Hell (specifically, the area in the eighth circle for Simonists.)
* Inferno, unable to decide where to go as locusts and bees torture them. Dante specifically points out Pontius Pilate, who could have saved Jesus but chickened out.
* Inferno was dubbed in Czech twice. The first dub was made in 1995. The second dub was made in 2003.
* Inferno. While in the First Circle the damned can still communicate and organize themselves despite their boredom and sorrow, by the last circles men are stealing each other's bodies, spending eternity screaming in each other's faces, and eating each other at the very bottom of Hell.
* Inferno. While this was a X-books crossover, numerous other titles were involved in the "fighting the evil forces of Hell" bit.
* Inferno, who Spidey thought was the one responsible for all the weird things happening. Of course, Mysterio had nothing to do with them, as Spidey figured out after an air vent attacked him after he threw the villain in jail.
* Inferno, yet this only adds to their torment by serving as a perpetual reminder of their sins.
* Infernum, actually said on his twitter that there were formerly plans for a second edition using the D&D 4th edition system, but now says it isn't going to happen.
* Infernum, attaining new positions in the hierarchy of a House requires increasingly-complicated mechanics to simulate the politicking involved in taking control of an empty dominion. This trend abruptly reverses itself when you reach the level of Head of House, which has only one requirement: "Last Demon Standing."

* Infernum at worst), and Imps. There are also two Houses (essentially countries, in political terms) devoted to this trope; Astyanath are Cenobite-style worshippers of pain, while Riethii are more traditional hedonists.
* Infernum: Both demons and the spawn (Hell's equivalent of animals) have this.
* Infernum Christian Crusaders called the Knights of the Sepulchre, an order dedicated to the reclaimation of the tomb where Jesus Christ resided for three days after being crucified, who deliberately invoked a Hellgout to swallow their fortress so they could lead a crusade against Hell. The vast majority of the deeds they accomplished have either been erased from history, or attributed to other orders. A rare few examples of their symbol, a charging crusader on horseback, are occasionally found on crumbling ruins in either the Holy Land or south France.
* Infernum demons. It has heavy roots in Christian beliefs, mainly Dante's Inferno, but is twisted and changed into its own unique setting. For a start, the demons are the result of vile crossbreeding experiments conducted between rebellious angels and "spawn" (prototypes of earthly lifeforms) in an effort to breed warrior-slaves... only for the demons to decide they didn't like the idea of being cannon fodder and promptly devour every last one of their "fathers" that didn't run for their life clean out of reality. Many demons at least profess not to believe in Heaven, and almost none believe that it's anything like the humans think it is (the Fallen Angels can't comment, having forgotten everything down to the reason why they Fell in the first place). There's also vague hints of even stranger forces in the multiverse; Benandanti are humans "touched" by nature spirits, whose souls travel to Hell in the guise of werewolves to steal souls to restore the vitality of nature, while Brokenlanders are the ghostly remnants of Quilipoth, another universe so ancient there's nothing left but a single ringworld orbiting the last dying cinder of a star.
* Infernum has Obsidian Sharks, Spawn (a sort of proto-lifeform) that look like sharks made from living volcanic rock which swims through the seas and rivers of flame, magma and molten metal that flow just about everywhere in Hell. And, as Spawn, kill one, and more will promptly tear their way out of its carcass and attack you.
* Infernum) is stated as wanting desperately to solve that little riddle.
* Infernum, this is one way to look at the "Chain of Living Armor", which increases the natural armor of the demon greatly. It's more an aversion of the trope, however, as one branch lets the character absorb it back into their flesh to move more easily/disguise they have it, and a player can flavor it any way from armor fused to their flesh to a demonic exo-skeleton to transmutation into living stone to a preternaturally tough, inflexible skin.
* Infernum uses Hell as its setting and as the default adventuring locale. This is because you're encouraged to play as a demon instead of a human.
* inferred by fans. So things were set right, but they ended up going wrong in a different way.
* Inferred Holocaust Earth broke loose again) to escape their own extinction.
* Inferred Holocaust - Something bad will logically happen, but we never see it happen.
* Inferred Holocaust: Technically, the aftermath of an event should have gotten a good lot of people killed, or ruined an area forever...But it's glossed over in the story.
* Inferred Holocaust: The work glosses over the fact that certain actions and events in the story have most likely resulted in countless deaths.
* Inferred Holocaust: The work glosses over the fact that certain events have the most likely outcome of many people dying.
* Inferred Survival: A character's death is deliberately left ambiguous so that the writers can later establish that the character somehow survived.
* In "Ferris Wheels & Funky Breath", Team Austin shoots a music video for Starr Records where Austin is forced to kiss Jimmy's daughter Kira who has bad breath. In the end, Dez makes them kiss through giant hamster balls.
* Infertility: Far more common on TV shows of all kinds than in real life.
* Infestation, everyone in the area passes out after a bright flash and strange

noise. Upon waking, the main character finds himself, and everyone else in sight, wrapped up by the invading creatures.
* Infestation, the Elder God... thing from another dimension is a skull face made of human bodies.
* Infestation to fight against the Sentient. Unsurprisingly, they lost control.
* Infested Planet is a game where alien bugs are so numerous they flow like water.
* Infested Terrans. They're designed to run up to you and explode for roughly the same damage as a nuke. It's awesome.
* infested terrans, to a monstrous alien queen stalking through a spaceship and slowly consuming the crew.
* Infested: The player character, thanks to the lack of a talk button and no things that would want to talk to him anyway. He can mumble to himself, though.
* infested with the ghosts of former faculty and alumni, most of whom have seized control of the rampaging familiars in the aftermath of the disaster of Solomon Island, and are now using them to sabotage the school's magical defenses from within - including activating the school's war golem.
* infested. You are then given the choice of who to fight alongside, and both basically fall into this trope
* Infested: You're the only member of 5-A who survives the infestation.
* In feudal Japan, during the Edo period, there were the "hatamotos", literally "those who gather around the flag" or more loosely "bannermen", who were a hand-picked force of elite samurai under the direct command of the shogun and who had privileges almost in par with those of a Daimyo.
* In feudal societies, the upper classes had more access to military training and equipment, as well as better diets, so you could expect that the lord could wipe the floor with his peasants.
* In fiction, chess players always shout "check" when they deliver it; among professionals, doing this would be considered rather rude.
* In fiction, the Mirandizing officer is likely to stop when a jaded
* In fiction, the officer might be tempted to interrupt the reading of rights to suggest an obnoxious suspect
* In "Field Day", the kids are part of a baseball team and Schemer is their coach, hence they are known as the Schemer Team since Schemer paid for the uniforms. Schemer sends Schemee to spy on the opposing team, the Snarleyville Slashers. In the end, the Schemer Team actually loses to the Slashers, but Mr. Conductor teaches them a lesson in good sportsmanship, so they are determined to do better next time.
* Infielder Clint Barmes broke his collarbone during his rookie year with the Colorado Rockies carrying a package of deer meat (it was a gift from teammate Todd Helton) up the stairs to his apartment. In order to avoid embarrassing Helton, Bames claimed he fell while "carrying groceries".
* In "Field of Fire", it's mentioned that Starfleet had experimented with chemical-propelled firearms for use in environments that render phasers useless. However, they eventually just put out a new, more resilient model of phaser. The villain of the episode is using a specially modified version
* In fifteenth-century France, there was a young woman who helped turn the tide of the Hundred Years War and free France from English rule. Her name was Jeanne Darc. However, somewhere along the line, people got the idea that her name was Jeanne d'Arc, translated as Joan of Arc, despite the fact that there has never been such a place as Arc in France. And only someone of noble lineage, which she was most definitely
* In fifth edition Lycanthropes are immune to damage from non magical, non silvered weapons, so a low level party could be taken out by a single wererat if they didn't have access to magic or magic weapons.
* In Fifth Edition, the Battlemaster fighter is a capable battlefield controller who can disarm, knockdown, or intimidate enemies through swordplay. Any class can buy into a fraction of those skills with a feat. Other frontrunners in sword skills are the Kensei, a monk path that specializes in using martial weapons, and the College of Swords Bard, a
* In "Fifty-Fifty", a woman in El Paso develops the ability to heal people after

taking a promicin injection. She uses it to cure her father's Alzheimer's.
* In "Fifty-Fifty", Boyd's ability is powerful enough to work on Isabelle as he fools her into thinking that he is Jordan Collier.
* In "Fifty-Fifty", when it becomes apparent that there is no other way to stop her, Richard uses his telekinesis to inject Isabelle with the substance that Tom was given by the woman from the future who posed as Sarah Rutledge in "Gone, Part II".
* In "Fight Fighters", Dipper uses a secret code (that might or might not reference the Konami code) to bring Rumble McSkirmish to life to beat Robbie up for him. This being an anomaly of the town, things go
* In "Fighting Fire With Fire", Thea Queen brushes off her plans to blackmail a council member to swing the vote in her brother's favor as "politics". Oliver Queen is not amused.
* In "Fighting Irish", Liam Neeson sets up a cutaway gag showing a soldier dying. Peter then remarks that they usually have a joke when they do one of those.
* In "Fight or Flight" the crew find a starship whose murdered crew are being siphoned for their 'triglobulin' — apparently used for medicines, vaccines, and even aphrodisiacs. Unfortunately triglobulin is very similar to human lymphatic fluid…
* In figure skating, male skaters are allowed to wear tight-fitting pants (for aerodynamic reasons), as long as they don't resemble leggings. This is circumvented by making everything else tight and the cuffs flare out a little.
* In "Filet of Soul", spirits from the dead hold Dee Dee hostage unless the dead goldfish is flushed down the toilet.
* In Filipino Martial Arts, a whip in the hands of a skilled user can be incredibly dangerous. Especially when used to
* In film history, cinema being an international language occasionally leads to film-makers working in different national cinemas:
* In films, Batman traditionally wore a padded Bat-suit, but appeared slim as Bruce Wayne.
* infiltrate through a series of tubes to hack into a huge door blocking the team's progress.
* Infiltrating the Airship., and a guard who is slowly (and awkwardly) beginning to train his gun on Henry.
* Infiltrating the Airship, a retired criminal, or once again remain a selfish criminal, with a partner or not.
* Infiltrating the Airship, which remasters the previous five games into one title, which file seen can be affected by which ending you played through most recently.
* Infiltration Skywarp and Blitzwing, Starscream tests the formula and sends an empowered Thundercracker, Astrotrain, Runabout and Runamuck against Megatron. Megatron calmly tells them to stand down, or he will kill all of them. The four immediately lower their weapons. The threat was not hollow, as even the empowered Starscream can't stand up to Megatron.
* Infiltrator - A scientist's experiment conveys him to another lab where his body is fused with a mechanism that can't be easily extracted, as its co-creator is holding the device's plans for ransom. Aired on CBS Summer Playhouse.
* Infiltrator, every time you launch the protagonist's helicopter you have to go through the correct power-up sequence, turning on the battery, then the avionics, then starting the engine and waiting for it to reach full revs.
* In "Final Appeal", a nuclear war, known as the War of 2059 or the New Holocaust, killed 80% of the world's population (6.8 million people).
* In "Final Appeal", the War of 2059 took place over the course of several days in June of that year. Due to the widespread use of nuclear weapons, 80% of the Earth's population were killed.
* In Final Dreadnought 2, Milla will occasionally pop in and give Lilac or Carol a bubble shield to prevent them from suffocating after Brevon shuts down the oxygen supply. When playing as Milla herself, Brevon won't even shut the oxygen down. As of the later updates, there have also been bubbles as seen in underwater areas.
* In "Final Exam", Seth Todtman has his 50 megaton cold fusion device rigged up so

that it will detonate if his heart stops.
* In Final Jeopardy, the player in the lead would always wager just enough to beat second place by one dollar if both of them got it right and second place wagered everything. For example, if second place had $7,000 and first place had $12,000, you can always bet on the leader wagering $2,001.
* In "Finders Keepers", Peter actively uses cutaways to his advantage, getting himself and Lois into the locked Drunken Clam by saying "this is worse than the time we were in the Clam right now", and then again to send himself to a strip club to get away from Lois.
* Infinite. All the cliches are here: almost no emotional scenes and no development of the main character, a ton of cool cars, a hot blonde girl who kicks ass but doesn't actually have much of a character, a maniacal bad guy in a nice suit, explosions, lots of guns, and ridiculous stunts.
* Infinite Ammo), but upgrades are hugely expensive...and if you try to sell it, its monetary value drops to 0.
* Infinite Ammo. Not many factions have dreadnoughts, though not have such powerful defenses either.
* Infinite Apostles and Twelve War Girls(無限使徒和十二個戰爭女孩)
* Infinite Apostles and Twelve War Girls to kick around, even as they're getting their asses kicked, and won't hesitate to unleash lethal force in public for any slight, real or imagined.
* Infinite Canvas characters hanging unto each other, the top one clinging to the edge of a cliff.
* Infinite Coffee and Protection Detail assassin James Barnes takes an interest in styling his long hair, courtesy of Pepper, Natasha, and Maria, forming a little group they call the Hair Club. At one point, he buys a pretty glass French press and threatens to kill the thug who jumps him and makes him drop it, if the thug broke it. He also starts going into battle with his bangs pinned back with a sparkly butterfly-shaped hair clip, and develops a taste for chardonnay.
* Infinite Coffee and Protection Detail Cap crashed the Valkyrie while wearing his superhero uniform and yet woke up in the SHIELD recovery room wearing khakis and a t-shirt, the SHIELD agents would have had to change his clothes while he was still comatose. In the story, not only did this happen, but someone made a video of the process of wrestling a recently defrosted super soldier into his new clothes and posted it online. Everyone but Steve finds this pretty amusing.
* Infinite Coffee and Protection Detail loves knives. Their ease of concealment may have something to do with this, since he's trying to blend in with the civilian population but he isn't about to go unarmed.
* Infinite Coffee and Protection Detail, the former Winter Soldier develops an abiding fondness for white chocolate mochas before he's even reclaimed his own name.
* Infinite Crisis, after having pleaded with Max to cease his actions and doing everything in her power to subdue Superman without killing him, ultimately kills Max who himself admitted this was the only way to stop his plan. Due to footage of the incident being edited in such a way to make her look like the bad guy, Wonder Woman is shunned by the public for several years and even Superman and Batman, both of whom knew the entire context of the situation, turn on her.
* Infinite Crisis. Afterwards, all three Supermen lose their powers and the fight for the fate of the universe is settled in a normal, human-level brawl.
* Infinite Crisis, Alexander Luthor Jr. loses an index finger when the heroes fire energy at his hands through the portal he created.
* Infinite Crisis" and starts to reach out of the page (not really, thankfully, but the art suggested it). Significantly, the universe where his ally Superboy came from — namely Earth-Prime — at one point supposedly was the "real world". The one outside your window.
* Infinite Crisis, as those who saved the single remaining universe decide that they saved the wrong Earth. Infinite Crisis is all about trying to stop these

former heroes from re-writing the world in their mold. They nearly succeed.
* Infinite Crisis, but gets a power boost mid-story that makes him Alexander's equal.
* Infinite Crisis ends with a climatic brawl in Metropolis between all the villains and all the heroes.
* Infinite Crisis. Even the biggest fans of her costume design noted that it would be an infinitely more sensible explanation to simply say that Power Girl, as many women who are not interdimensional refugees do, enjoys wearing an outfit that accentuates her chest.
* Infinite Crisis future son back to Earth if he was ever ostracized for that.
* Infinite Crisis has a few voice actors voice alternate versions of the characters:
* Infinite Crisis him. And to think, he used to be a sweet little kid that read Superman comic books, dreaming that he could be like him....
* Infinite Crisis) in order to attract the attention of the new hero and get the story. The writers explained that they included that scene because they wanted to make it clear that even without his powers he is still Superman, and his willingness to take extreme personal risks did not go away just because he can no longer take a bullet.
* Infinite Crisis introduces an Atomic Wonder Woman from a ravaged world all but destroyed by nuclear warfare. Her weapon is a chainsaw tied to a long metal pole.
* Infinite Crisis is about to be pulled into the Speed Force. He is able to hold on just long enough to pay one last visit to his wife Linda and their twin babies to say good-bye. Linda refuses to let this be the end, saying that wherever Wally's going, his family is coming with him. The entire West family enters the Speed Force.
* Infinite Crisis is an elflike being with Rapunzel Hair that starts off blonde and slowly fades to red. Not red-hair red, bright primary red, to create the effect of regular Supergirl's cape.
* Infinite Crisis issue #23 she wakes up, finds herself in a Kryptonian city and believes her dream is finally over... until she runs into her friends Legionnaires and remembers they knocked her out and took her to Kandor. The shock makes her snap out of her delusion.
* Infinite Crisis. Lex, watching it all, tells him one last thing: "Now who's stupid?"
* Infinite Crisis: Many believe Superboy Prime was specifically written to mock fanboys.
* Infinite Crisis mini-series, Ragdoll reveals that he's been spending his paychecks on a monkey house and a collection of little monkey outfits. Deadshot tells him not to tell them those things.
* Infinite Crisis Mogo, who can move itself across space to catch them.
* Infinite Crisis, naturally it's been ignored just as everything else from that series was. Earth-33 is now the superhero-less "real world", formerly called Earth-Prime.
* Infinite Crisis reverts some of Birthright's changes to include some of the Byrne era Kryptonian aesthetics so that you have the crystal spires and the togas at the same time.
* Infinite Crisis's city, Bludhaven, destroyed as revenge against the hero. However, this really didn't become an impetus for Nightwing's later adventures.
* Infinite Crisis society of superheroes living in the city of Monument Point.
* Infinite Crisis subverts this when Batman tries to use his Kryptonite ring on Superman of Earth-Two, which has no effect on him because it isn't from his universe's Krypton.
* Infinite Crisis, Superboy-Prime got a nice closeup of the solar core of Rao-Krypton's own sun- courtesy of Kal-El and Golden Age Superman (although they mainly did this with the goal of using the red sunlight to drain Superboy-Prime's own powers rather than expecting the sun itself to kill him).
* Infinite Crisis Superboy-Prime punched him back to life. Later stories seem to have quietly dropped the Superboy part.

* Infinite Crisis, Superboy-Prime was really pissed off at how dark the DC universe had gotten, and decided to take his anger out on the wall. The wall just happened to be the walls of reality itself and this altered continuity in the DCU.
* Infinite Crisis Superman rips the S from the costume worn by Superboy-Prime to indicate he is not worthy to wear it.
* Infinite Crisis, the couple, and by proxy their two races, elope in the current, Daxamite race.
* Infinite Crisis, the Green Lantern Corps erect a 7-mile thick wall to hold back Superboy Prime. It fails.
* Infinite Crisis throwing down and shattering her sword, helping him get a hold of himself. As Alex had at this point shattered reality itself, caused the deaths of numerous heroes including longtime friends and allies, and generally had caused devastation not seen since the Anti-Monitor himself, it still makes sense for Batman's utter despair at the situation to finally make him almost cross the line.
* Infinite Crisis trilogy, Robin inherited the vampire curse from his mother, Talia, but when he saw what being turned did to his father, he became determined to fight against it.
* Infinite Crisis was accidentally sent to the 31st Century and joined the Legion. She was so confused that she believed for a while all of it was just a dream.
* Infinite Crisis (where it takes over the world and turns everyone into hideous cyborgs).
* Infinite Crisis, whom he only asked to join to see how he'd respond).
* Infinite damage loops tend to end when the thing they're damaging runs out of whatever it is that damage depletes (life for players, loyalty for planeswalkers, or toughness for creatures), or when someone renders the damage irrelevant.
* Infinite Dendrogram: Shu Starling is always in a full-body suit to hide his identity, due to his virtual reality character being the exact same as his real-life self. His favourite suit seems to be a bear, but he also has a variety of others.
* Infinite Dendrogram there are a series of mechanical steeds known as Prism Steeds, created by an ancient civilization. While there are replicas in the modern age, the original series are both rare and valuable enough that a player could be murdered over it.
* "Infinite" doesn't automatically imply "all-encompassing". Just like in math you can have infinite sets of numbers that don't actually include
* Infinite gets a moment of this after his first boss battle. After defeating Sonic, Infinite arrogantly deems him Not Worth Killing
* Infinite Improbability Drive becomes one of these while it's active.
* Infinite Jest after the adoption of a calendar system that names each year after a corporate sponsor. Most of the book's plot takes place during the Year of the Depends Adult Undergarment. It's that kind of book.
* Infinite Jest and practically all the main plot points are unresolved at the end. On the other hand, we see one of the main characters after the main events in the first chapter, so...
* Infinite Jest) causing her to wear a veil and join the Union of the Hideously and Improbably Deformed.
* Infinite Jest, Joelle Van Dyne is genuinely gorgeous until an accident leaves her face "hideously and improbably deformed." Her body, however, remains pristine.
* Infinite Jest relative to the early-to-mid 1990s and is surmised by most to take place in 2010 give or take a year or two (although one theory puts it 2015), but since numbered years have been abolished to make way for years named after the corporate sponsor who pays for the naming rights, nobody can tell for sure.
* Infinite Jest, the older brother in the family starts out playing tennis, and is really good at it, but in college, he tries out for the football team, only to find that he isn't big enough. As he is leaving the try-out, he punts a football, and the coach realizes he is a really good kicker.
* Infinite Jest, the students at the Enfield Tennis Academy play Eschaton, a game of nuclear geopolitics, which has become something of an Academy tradition. One of the tennis courts is intricately painted with a map of the Earth and all its

nations for this purpose. True to the trope, all that is made explicitly clear is that nuclear strikes are represented by serving tennis balls onto the map; the rest of the rules are stated to be so complex that they can only be understood through total memorization.
* Infinite Jest well, the aftermath makes the Boston PD pathologist faint.
* Infinite Jest which describes how widespread videophone use made people increasingly concerned about their physical appearance, leading to most people wearing elaborate masks whenever they used the phone (and, later, just switching back to normal phones).
* Infinite loops that perpetuate themselves without any input from players (such as three
* infinitely loyal to their master. Jessie's thuggish Seviper for example stuck by her side for three regions worth of Team Rocket pummellings, it looked elated when it finally managed to win a contest ribbon for its overjoyed master.
* infinite number games. Fortunately they're much easier to kill than the average movie zombie.
* Infinite Realms, a pigeon mooned Team Phantom (Sam, Danny, and Tucker) while perched on top of a frozen Vlad. Team Phantom's response sells it.
* Infinite Ryvius. After the adults die, it takes all of two episodes for the children to start turning on one another. The vicious infighting continues even in the middle of battles.
* Infinite Ryvius), a nebula-like cloud engulfing the bottom half of the ecliptic plane. Ships that go too far — "deep", you might say — inside are crushed by the radiation and gravity anomalies, unless they're built to withstand the "dive". In other words, submarines in space.
* Infinite Ryvius crowd of kids before zooming back in on Kouji and most of the other regular characters.
* Infinite Ryvius has a two-volume manga which presents an abbreviated view of the story from Aoi's perspective.
* Infinite Ryvius has Leviathans in the deepest depths of its "Sea of Gedult".
* Infinite Ryvius is about teenagers who are trapped on a ship drifting due to inertia.
* Infinite Ryvius, the Blue Impulse uses gravity manipulation to destroy Saturn's (inhabited) moon Hyperion.
* Infinite Ryvius, the crew stage a party to lighten morale, one of the designated event planners inserts a call-in voting contest as to the prettiest girl aboard.
* Infinite Ryvius, the Ryvius lights up with Tron Lines when first activated.
* Infinite Ryvius to protect her from now on. It... doesn't end well. Either way, that means he fits this trope TWICE OVER. Poor guy.
* infinite sea of stars with a single floating "room" where time works... wrong. Meanwhile, the White Lodge is a massive fortress in the middle of a purple ocean that stretches beyond the eye can see.
* Infinite Space allows the player to mount hangars on ships to launch fighters. However, only ships with a built-in catapult can use fighters.
* Infinite Space?" and Franny remarks that at least one good thing came from being imprisoned for as long as she was.
* Infinite Space, and once you get to the later stages of the game, even one volley from your fleet is way more powerful, if much less awesome.
* Infinite Space are usually happy to absorb most conquered civilizations into their own without excessive tyranny, but Taranis sees no worth whatsoever in people who forgot how to defend themselves.
* Infinite Space. Bastian even notes this is the reason why he is a better captain than his rival since Yuri forms a bond with his crews rather than simply treating them as the power to run his ship. In terms of gameplay, choosing the "benevolent" options will usually give pretty nice stat bonuses.
* Infinite Space by Cico to Kira, where he just grabs her by the shoulders and yells his intentions and about wanting a lot of babies. She ends up slapping him.
* Infinite Space, considering how heavily anime-influenced this game is. Many of the "old" characters (including your crew members) are just as competent as the

"young" ones, if not more.
* Infinite Space contain mineral-rich asteroids that can be mined for relatively small amounts of money (equivalent to one to four random encounters).
* Infinite Space; dedicated carriers are limited to certain navies with highly-advanced technology and a fleet doctrine that supports fighter use. In addition, a few nations have more exotic ships, like giant flying guns or dedicated sensor and communications vessels.
* Infinite Space does this when viewing ship information. It's also the victory screen after battles and the "Press Start" screen when the game starts up.
* Infinite Space Elgava dispatches five thousand ships to impress the approaching Lugovalians, but fail because the other fleet had over a hundred thousand ships. Later in the game, Libertas holds a fleet review as part of maneuvering to consolidate control over the Galactic Federation.
* Infinite Space Gavriil Minas takes a broken HELP Android (The In Game Encyclopedia) and makes in to one of these. She has 5,000 kelvin Degree cutting claws, her eyes shoot laser beams and she has the best combat stat in the entire game.
* Infinite Space has a space navy for every nation you encounter: Elgava, Nova Nacio, Regeinland, Lugovalos, and more.
* Infinite Space has mint-green eyes and hair. In the artbook, the Schneizer brothers' eyes have the same color as their hair (Bastian has dark brown and Dietrich has silver), but in the game, their eye colors are closer to gold.
* Infinite Space has several classes of battleship that have catapults and so can be equipped with fighters. Some cruisers have them as well, but equipping them with fighters is usually less efficient as they have less space to spare.
* Infinite Space has the Holy Nation of Adis, which forbids people from traveling to space.
* Infinite Space, Katida Lanco sneaks onboard the player's ship after being rescued. Unfortunately, she suffers from a medical condition that makes long-term space travel almost impossible.
* Infinite Space, missiles, quantum torpedoes and the rail cannon, linear cannon and mass drivers of Escondido all bypass the deflector module, which blocks lasers and plasma.
* Infinite Space more or less works in this way, as seen with the throne succession. Apparently, this mindset even works on its citizens, given how strong they are.
* Infinite Space occasionally makes other characters (usually his sister) worried that something is bothering him when he starts to drink a lot.
* Infinite Space. On the minor characters' side, there's Melania, and possibly Soneto and Mariana have a crush on him as well.
* Infinite Space, orbital elevators are the usual method for space travelers to travel between orbital spaceports and planetary surfaces.
* Infinite Space owned by Zenitorians allows one to transfer his/her consciousness to a spare body, as shown by Rubriko.
* Infinite Space provide instantaneous travel between sectors of space, even between galaxies.
* Infinite Space refers to space as the "Sea of Stars" and ships generally follow the principles outlined in the intro. However, they do adopt wall formations instead of lines.
* Infinite Space refuses to abandon his ship when the player character encounters him as part of a Lugovalian fleet in the second half of the game. A number of other characters die when their ships go down, but he's the only one to go deliberately.
* Infinite Space requires the player to board a few ships for story purposes, and it's also an option in most fights. It's played out as a giant melee of all surviving crew from all ships still on the field.
* Infinite Space, saying he got the recipe from a fragment of a very old book. The drink is steaming hot and bitter. Gen admits the recipe might be missing a step when Yuri asks about this.
* Infinite Space seems to have a natural air of leadership that draws people to

him... or have him do dirty work for them.
* Infinite Space shows large-scale space battles in several cutscenes, such as the Elgavan fleet being wiped out by Lugovalos, the Federation fleet failing to stop a Lugovalan fleet at a Void Gate, and the Nova Nacion-Kalymnos conflict. Yuri's participation in large conflicts typically plays out as leading a small strike force pursuing a key objective with the larger battle in the background.
* Infinite Space, Skantzoura in the SMC and Lari and Belgirate in the LMC are planets or asteroids used as large prisons, specializing in dangerous or political prisoners.
* Infinite Space - Space travel is restricted to "starlanes", which are apparently a naturally occurring phenomenon.
* Infinite Space, the word "Grus" is a context-sensitive swear. It can mean anything from "Shit" to "hell".
* Infinite Space was going to be a 2011 browser-based game by Keen Games and Gameforge.
* Infinite Space where the pirates only responded to Ian's saying that he's a guy with "... even better."
* Infinite Space, you'll find a few recruitables with ace piloting skills, and you'll notice how they can turn the tide of a battle when used right. Most notable of these come in Act 2 (Namely Mihhaelo Luka and Volo Naturo), since in Act 1, only Gadina has the skill while Johano Sceptro and Brava Soneto only have some close stats.
* Infinite Space, your level and money will be carried over to your next run, but you have to hunt down the blueprints again. Also, some blueprints are only available if you have finished the game once.
* Infinite Space, you wind up in some sort of negative space where it's unhealthy to stay. You are presented with three options, and in two of the options you slowly drift around, with the situation getting worse and worse. You think you will get rescued or catch a lucky break, but instead your party poofs into nothingness.
* Infinite Stratos are fighting off against an unknown I.S. machine. The rest of the series then depict events leading up to that scene.
* Infinite Stratos are noticeably more fluid than everything else, leading to gorgeous fight scenes.
* Infinite Stratos caused by the author's health problems. As of 2016, the franchise hasn't released any new content.
* Infinite Stratos. Cecilia and Rin follow Charlotte and Ichika on a date. When Laura finds the peepers and is told what's going on, she shrugs and tries to just join the date, but Cecilia and Rin stop her.
* Infinite Stratos girls), and once again in the second half of the OVA (she confesses, but its muted out by some fireworks that go off at the same time, so he doesn't hear it, and is distracted by them). This, however, is a result of Infinite Stratos being an ongoing light novel, which the anime only showed a portion of. The second anime series was similarly inconclusive.
* Infinite Stratos going on. Fortunately, they're quickly proven wrong.
* Infinite Stratos has the Shinonono sisters, Tabane and Houki. The older is very silly, while the younger is very serious.
* Infinite Stratos Her dialogue also indicates she's done this before. She's the only one of the main characters who has been in the military.
* Infinite Stratos, he still needs help from more experienced fighters.
* Infinite Stratos in order to get his mind off thinking about her naked body. It eventually works, but a few moments later they get caught...by his older sister and homeroom teacher.
* Infinite Stratos is about to do something, only for him to declare that, that's it. Cue everyone in the class face-faulting.
* Infinite Stratos is very bad when it comes to theoretics, much to his, his sister's, and his haremettes' annoyance.
* Infinite Stratos It heightens the nerve processing to the brain, giving much faster reactions, to make her a better pilot.
* Infinite Stratos manages to avoid this. The 2D and 3D art (latter used for all IS

sequences) are quite consistent, with only a few noticeable spots due to the unyielding rigidity of the 3D meshes.
* Infinite Stratos: Maya Yamada, the assistant homeroom teacher, goes up against two students in Ace Customs, using a training IS... and effortlessly curbstomps them.
* Infinite Stratos qualifies squarely for the trope, as it is based on a technically obsolete, 2nd-generation frame (everyone else's suits are 3rd-generation, Houki's suit is the first 4th-generation); she has added several modifications (such as being able to dual-wield guns and being able to store and summon more weapons) and had it repainted orange (in contrast to the green on the frame which it was based on), which comes as a great surprise to her opponents (much like her true gender initially being a secret).
* Infinite Stratos spin-off manga, one of Laura's German subordinates has enthusiastically studied Japanese culture by way of games, anime, and manga, and regularly gives her advice on fitting in in Japan and pursuing Ichika.
* Infinite Stratos. The next morning he wakes up to find her naked in his bed. However, after he gets used to the idea of Laura not wanting to murder him, he treats her much the same as his other love interests.
* Infinite Stratos, this happens when Lingyin runs away from Cecilia, causing her to run face first into Chifuyu's breasts.
* Infinite Stratos: To the Other End of the World, in Anaton's case, it's literal because the boy is his son by adoption. Still, because of their not-so-small age difference, Kerlongsj being twenty-two and Anaton being twelve, they're more like this. It would feel a bit awkward for the two to act like they're supposed to. Kerlongsj will scold Anaton when he messes up, but he isn't as strict with him as Chifuyu is with Ichika, but won't tease him like Tatenashi.
* Infinite Stratos where Ichika ends up with his entire harem trying to feed him at once. The solution was to have everybody feed each other.
* Infinite Stratos will probably never get a third anime season thanks to the second season's declining ratings and the light novel releases being delayed because of Izuru Yumizuru's health problems.
* Infinite Stratos with Houki. While she doesn't go out of her way to terrorize Ichika, he admits sometimes she can be really scary. Over time, Houki admits her time apart from him didn't do her personality any favors; as she believed she used kendo as a way to remember him, but upon beating her opponent so hard to the point of making them cry, she admitted she was only indulging in senseless violence.
* Infinite Supplies - Somebody has a whole lot of things that are logically hard to obtain and we don't know how they obtained them.
* Infinite: The flat plane of the world goes on forever; there are no edges or boundaries. Overlap is possible with the soft edges kind if a central portion of the world is surrounded by an infinite featureless plane.
* Infinite Tsukoyumi before the moon gives off a blinding flash that puts everyone around the world to a genjutsu sleep.
* Infinite Undiscovery. Also played straight with enemy bears and their daunting HP totals.
* Infinite Undiscovery as Capell, who is mistaken for the hero of the land, Sigmund. It forms a major part of the plot.
* Infinite Undiscovery. It's amusing in that Aya is casually dragging and berating Capell at the time for his irresponsibility and Capell — in a suit of armor, mind you — doesn't offer any resistance beyond stubbornly crossing his arms.
* Infinite Undiscovery was (rightly) criticized for its obnoxious opening hour. It starts with the player running up a long series of cut and pasted stairs, being chased by an invincible boss, proceeds into a ridiculously long and mostly pitch-black forest full of enemies, all with only two characters and about as many health items. After the forest, the player gets a proper party... controlled by the AI, with the only player-controlled character being unable to attack, being required to carry another character to a nearby town. Fortunately, it picks up immediately afterwards.
* Infinite Worlds default setting has the two factions of Centrum and the Infinity

Patrol who oppose each other at every turn and vie for control and influence on low-tech worlds, all while trying not to be detected by the natives of that timeline and expose their own existence.
* Infinite Worlds lest he gets assassinated and a far more skilled leader takes his place and wins the war for Germany.
* Infinite Worlds notes that neither Infinity nor Centrum quite view people from other worldlines as real people. Among other things, it notes that some filmmakers have taken to filming real battles on other worldlines with thousands of people dying to use as footage in their historical epics.
* Infinite Worlds, the above world is called Camelot-2. (Camelot-1 is the Traditional version, and Camelot-3 is the Cinematic one.) Camelot-2 was briefly considered by Homeline scholars to be evidence that Artorius was the real Arthur of their own history, until further exploration turned up so many timelines with a "historical Arthur" to fit basically any theory, that they retired the "Camelot" designation altogether.
* Infinite Worlds third faction that intrudes unpredictably in the Homeline VS Centrum conflict.
* Infini, the bio-agent responsible for the death of a mining crew, one search and rescue team, and almost a second, is so bizarre that the scientists sent to that planet first thought it was a sort of ore that could be used for fuel. When it thawed, it demonstrated the ability to mimic tissues and organs down to the cellular level.
* Infinitode 2 lets you finish decrypting common chests instantly or gain resources by watching an ad.
* Infinitode: Air towers are designed to kill Air and Jet enemies only. They excel at it with their overall high stats, though.
* Infinitor's actions are driven by his OblivAeon-inflicted madness, rather than his own will, making him one of the few genuinely sympathetic antagonists - especially since Infinitor is
* Infinitum: An Afrofuturist Tale tells the story of an ancient African king who was cursed with immortality for kidnapping a witch's son to raise as his heir, focusing on his deeds and struggles across the millennia, and how his state of being continues to evolve as time goes on.
* Infinity -1 Sword but often takes significantly less effort to get, especially if it's a weapon you earn as part of the plot rather than a long or difficult sidequest.
* Infinity +1 Sword, Frostmourne, to defeat the undead menace. When he gets the sword, it murders his friend, steals his soul and whispers in his head, driving him mad and leading him to the Dark Side, eventually causing him to slay not only his family, his mentors, but overrun the land of his birth completely, which was what he was trying to prevent, and finally, become the master of the Scourge himself.
* Infinity +1 Sword in any other game, this one is so hard that even both of them together won't make it a cakewalk.
* Infinity +1 Sword is a Dragon Ruler! You can net both Sword and Spear in one go.
* Infinity +1 Sword like it for your team. The latter is a randomly-generated crawl that lets you power up your characters so they get better bonuses from those weapons and armor you spent hours improving. It's entirely possible for players to stop their storyline playthrough because they end up very invested in Item diving.
* Infinity +1 Sword stronger in the stat department, but he's also weak to the Divinestone when he wasn't before, making it possible for a Divine Dragon to two-shot him (though they likely won't survive the process).
* Infinity +1 Sword, the Yoshitsuna, has the appearance of a laser blade.
* Infinity, along with more exotic options like the Adhesive Launcher, which glues the robot to the floor.
* Infinity, although it's more that she doesn't understand emotions rather than lacking them.
* Infinity and humanity as a whole, telling them to go away until cannon fodder is required. The Kree Supreme Intelligence then points out that Spartax only has a 34 percent win ratio in confrontations with the Kree... and the human ratio is

considerably higher. Suddenly, everyone decides it's a damn good idea to listen to Cap's advice.
* Infinity Animations counterparts. Thanks to their work, there are now paper dolls reflecting the many race, gender, and equipment combinations available, allowing for a truly customizable character appearance. IA also serves as a central clearinghouse for mod-created creatures, ensuring that there are no duplicate creature creations in the database and designating unique file assignments so there are no overlapping file names, allowing a player to download any number of IA-approved mods without having to worry about deconfliction issues.
* Infinity are to be expected. But Thor doesn't switch to violence until the enemy makes it clear there would be no negotiation, and they'll destroy Earth anyway.
* Infinity back up memory for recovery if the host dies. The Combined Army even has a gun, the sepsitor, that implants viruses into the cube to take control of the host.
* Infinity Beach, genetic engineering is common. The main character, Kimberly, is a clone of her older sister Emily.
* Infinity before becoming an officer (whether or not this is true in canon is unknown).
* Infinity Blade and Mach 10 space-jets. Partly justified by the advanced armor technology in all Titans that makes what should be fatal shots a mere trifle while swords and magic put the hurt on them. Doesn't stop Isa from cheap-shooting them with her crossbow, though.
* Infinity Blade features the deathless, whose defining characteristic is this ability.
* Infinity Blade immortal kings. The first three are really no problem, but the third is a Level 300 (the level cap in the game is 100 for players) robot mech with a man inside it. But you do get a sweet cinematic if you can best this insane challenge.
* Infinity Blade: In the second game, this happens to a guard who is ostensibly guarding a seal. He curses Siris for intruding and threatens to kill him before the guard is crushed by a stone demon, the true boss of the area.
* Infinity Blade is interspersed with scenes of the Worker of Secrets forging the eponymous blade as he muses on the events that have led up to the present.
* Infinity Blade — the Holy Band gives you a level 10 spell (other spells currently max out at 8) which does irresistible damage and heals you for the same amount. Getting it, however, requires you to possess the Infinity Blade, defeat 4 powerful bosses (two in a row without any rest), and use two treasure maps to locate hidden items; obtaining the ring proves you don't need it to succeed.
* Infinity Blade son (who somehow has the same level and equipment of his father when he died) vows to avenge him and fights his way up the tower. Rinse and repeat.
* Infinity Blade suffers the worst fate: when he is brought back, he is a grotesque monster that isn't even sentient any more.
* Infinity Blade (who for some reason retains the same level and equipment as his father) and so the game continues as you go through several generations until you manage to kill the God King.
* Infinity Blade, you'll get hints that this is a story behind all this. The second game has even more of a plot and explains some more. The third game concludes the story and explains almost everything.
* Infinity, but Thor doesn't switch to violence until the enemy made it clear that there would be no peace negotiation and they would destroy Earth anyway.
* Infinity can react to enemy movement with a withering hail of fire, meaning that you need an urban environment or some other region with tons of obstructions and cover, lest the first turn see half your squad converted into a fine red mist by enemy snipers.
* Infinity Circuit God of the Dead Ynnead, has been irrevocably tainted by the Great Enemy.
* Infinity Countdown's soul was removed from Pymtron's body by the Soul Stone. And then his soul ended up getting devoured by a beast within the Soul Stone.
* Infinity Crisis54'' individual franchises from different genres ranging from

superhero to comedy and horror. The story and its subsequent spinoffs focus on multiple teams of heroes working to reverse Thanos' Snap.
* Infinity Crisis as Merlin complains over Brainy assuming his magic is just an advanced science.
* Infinity Crisis Black Adam basically uses this to get the League to release him even after he has attacked Metropolis and fought with Superman and the Shazam family; just prior to this fight, he killed the current ruler of his former home of Khandaq and was appointed the new ruler in an abrupt election.
* Infinity Crisis, Darcy Lewis states "Shoot, now I'm gay" when she first sees Wonder Woman, and later implies that she has engaged in at least one threesome.
* Infinity Crisis features two different negative versions of this as Steel/John Henry Irons has arrived on Earth-38 and is automatically preparing to treat Superman as a threat because of what he did on Irons' Earth of origin, and the displaced Avengers are upset by the discovery that the 'local' Peter Parker was paralysed in the battle against Doomsday.
* Infinity Crisis' final scene shows Thanos joining Zod and Darkseid in an alliance to escape the Phantom Zone and seek their mutual revenge.
* Infinity Crisis has Chloe Decker. After half the world's population vanished into dust and reappared, she's much more inclined to believe Lucifer's claims to demonhood.
* Infinity Crisis: Hearing of the mass disappearances, Mick says he needs a beer and Nate remarks that for once, he's speaking for all of them.
* Infinity Crisis, Hela gives the heroes a new fighter when she has Thanos recreate Mjolnir for her; unaware of Mjolnir's new worthiness enchantment, Hela can't use the hammer herself, but drops it in a manner that allows Jane Foster to pick up the hammer and use it herself as a new hero (later adopting 'Thunderstrike' as a code name).
* Infinity Crisis. It's worth noting that they're all aware that any one member of the group would happily stab the others in the back to come out on top themselves, so they keep meetings short and in small numbers to limit the chances of that happening.
* Infinity Crisis, Jane Foster is captured by the villains as a hostage (justifiable as half of Thanos’s new allies were Thor’s enemies, so they naturally targeted Thor’s ex for maximum impact).
* Infinity Crisis, Lex Luthor actually claims that he's not like Hitler because he doesn't consider it 'genocide' to kill aliens as he says "Genocide only counts if it's people who deserve to live".
* Infinity Crisis, Malekith makes it clear he doesn't want to join with the Skull but is willing to do it to get revenge on Thor. Meanwhile, Thanos couldn't care less what the Skull does with Earth as long as the heroes are finally eliminated.
* Infinity Crisis, Rita Repulsa subverts this. After stealing the Rangers' coins, Zedd is about to leave only for Rita to point out "how many times have we done this?" She knows full well that if they leave the Rangers alive, "they go on some quest, find new powers, come back stronger than ever and kick our rear ends!" Zedd agrees and is about to kill the Rangers when Doctor Strange teleports them away.
* Infinity Crisis, Sara has issues with Black Siren while Thor is confronted by the returned Hela and the ‘ghost’ of Loki, and Thea muses that she thought she had a screwed-up family.
* Infinity Crisis, Snart nearly chokes on his drink when he learns that his Earth-2 counterpart was the Commissioner of the Central City Police Department.
* Infinity Crisis: The final chapter has a series of them: Secretary Ross recruits Helmut Zemo into a "Project Thunderbolts"; Miles Morales is a powered resident of Black Lightning's home town; Sin has landed on the Justice League Earth and been recruited by Amanda Waller; Lena Luthor is in reality Morgan Le Fey; and trapped in the Phantom Zone, Thanos has joined in an alliance with Zod and Darkseid.
* Infinity Crisis, the Mandarin mounts Trevor Slattery's head on a wall in punishment for impersonating him.
* Infinity Crisis, the Rangers and the Avengers are tricked into thinking that Rita took the coins to the Moon Palace when in fact they were left with the Mandarin and

Zedd to be used to 'wake up' Fin Fang Foom.
* Infinity Crisis) to inform Matt that the heroesaren't responsible for the people Shredder and Fisk have killed because they chose not to kill their foes.
* Infinity Crisis, when a Hand ninja reports failure, Gorgon turns him to stone to send a message to the rest.
* Infinity Crisis, when Miles Morales/Spider-Man becomes the only hero in Freeland whose powers don't focus on using and manipulating electrical energy in some manner.
* Infinity Crisis: When Ray, Scott and Hope shrink down and enter the Soul Gem, they are met by Doctor Strange, who notes that he expected someone to get there a day earlier.
* Infinity Crisis, when Tony states how Bruce has been kidnapped Pietro asks who they should be sending condolence cards to.
* Infinity Crisis, Zari decides that she doesn't want to ask any more questions about Mick having found a 'kindred spirit' who left him in a good mood.
* Infinity, Earth is now something of a player on the intergalactic stage - or, at least, the Avengers are, being described by one young girls as 'heroes, gods', with an official Avengers presence being established in space.
* Infinity expert hackers that put the former two too shame with both their skills and bratty attitudes.
* Infinity faction, ALEPH, who attempt to bring order to the human factions.
* Infinity Game, as he apparently carries boxes of the stuff around with him.
* Infinity Game, as he's just as cripplingly lonely as she is, but she never has the courage to tell him.
* Infinity Game creates a sword out of magic that is at least twenty feet tall. She weilds it one-handed.
* Infinity Game is the only one who survived the previous game when the DM eradicated the entire world.
* Infinity gives this in spades. Most factions have either a Buddhist, Catholic/Christian, or Islamic militant sect, and Pan-Oceania goes so far as to have a special sectorial force focused on Knightly Orders resurrected by the Catholic Church.
* Infinity, he gets mad at someone for stealing another hero's identity, something he himself has done.
* Infinity, Inc. deserters from the Confederate Army (it is made clear that they were already deserters before they got lost in time).
* Infinity, Inc.: Dr. Love is a mad obstetrician who created the supervillain team Helix by experimenting on the unborn children of pregnant women under his care.
* Infinity, Inc., Peter Milligan, featured team member Fury, who involuntarily switches between genders.
* Infinity, Inc.. They faded into obscurity soon after. Though the JSA itself was eventually reintroduced.
* Infinity, it has nothing to do with her age. Neither of her younger siblings displays this characteristic.
* Infinity Labs), it's suggested that interfictional portals could let web-cartoonists be ambassadors to their own universes. This is quickly realized to be a very bad idea.
* Infinity Legion Heroes Unite, the assembly of godly beings freeze time so they can give the heroes an Info Dump on the Darkentors without alerting G3.
* "Infinity loop" is pretty much the arc phrase of the whole Infinity series.
* Infinity Minus One Spear, some players continue to use it even after obtaining the Metal King Spear.
* Infinity Moment/Hollow Fragment. It's actually done quite well and creates a separate timeline of events that is exclusive to the games.
* Infinity. Not only is religion still around in the future, but it might be more important to humanity than it is now. Of course, the religions of Earth have greatly reformed.
* Infinity nuns), Riot Grrrls (radical feminist punks), and Tunguska Cheerkillers (cybernetically-enhanced cheerleaders turned spec ops). More broadly, there are

enough female models that you can make an all-female list for just about any faction if you so desire.
* Infinity obsessed with wiping out tech so that mankind can return to a "better" time.
* Infinity Plus One Equipment tends to come in the form of accessories like Anne's Cross, a Karin-specific item in Covenant that makes her immune to all status ailments, recovers a small amount of health every turn, and gives a moderate attribute boost.
* Infinity Plus One Gun, but its fully-charged blast is squarely in Wave Motion territory.
* Infinity Sarah Palmer; Lasky is something of a gentleman, while Palmer is sarcastic and sharp-tempered.
* Infinity Science Fiction cover), the title is written over and over and over.
* Infinity's Prism didn't manage to cross Borg space at the end of season 3, and instead ends up building a new Federation analogue in the delta quadrant. The holographic Doctor becomes a distributed AI with one node sent back to the Vidiians to cure the Phage. That node's updates via subspace take a day (each way, I think) to make the trip to the Doctor's central processing core located near Borg space.
* Infinity Stones/Gems and their build-up to Avengers: Infinity War will be lost on anyone who hasn't seen the key films where five of the six have respectively appeared so far.
* Infinity Stones should only be wielded by someone capable of handling the massive bodily strain of all that cosmic power. Therefore, only inhumanly strong heavyweights like the Hulk or Thanos should attempt to use them.
* Infinity: The Quest for Earth has the StarFold Confederacy, who are essentially a breakaway faction of industrialists and super-capitalists who don't care about the aesthetics of their ships.
* Infinity: The Quest for Earth they exist to provide safe areas called "cores".
* Infinity, they would be the rare non-dysfunctional married Marvel couple.
* Infinity: This is often a useful investment. Since you can fire up to your Burst value with each attack Order, high rates of fire mean more efficient use of Orders to attack, making troops with Spitfires and heavy machine guns very scary.
* Infinity Train ability to the point where it makes him uncomfortable and he tries to fight back. It takes MT and Jesse getting him to sneeze Perry out to put a stop to it.
* Infinity Train after being greenlit, with the pilot's main character Tulip only having the role during the first season.
* Infinity Train, after raiding a musical cart, many of the young Apex kids offer items they took from the cart to their leaders Grace and Simon. Grace, who knows the children by name, acts like she has a special relationship with all of them, promising to cherish each item they bought her and store them in her special collection, while telling the child to keep it a secret from the other children that she's doing that. This is an act to make the children loyal to her, as once they leave, she discards the items without a care.
* Infinity Train also confirmed that the fifth season, which had already been written by the time of cancellation, would have explored the former's backstory in-depth, as well as explain many lingering questions about the true Conductor and the nature of the train and the Wasteland.
* Infinity Train, and (strangely enough) wasn't created as a parody of the James Cameron film.
* Infinity Train and the rising tides was caused by a broken pipe which was caused by the Steward.
* Infinity Train: Blossoming Trail: After a huge argument and Chloe leaving the Cerise Lab then subsequently being taken into the Infinty Train, Goh realizes that it's all his fault for ignoring her and never caring once about her feelings. He ends up heavily blaming himself for her disappearance.
* Infinity Train: Blossoming Trail: After Chloe says she's going to fight Ash Ketchum, Champion of Alola, Goh goes to the Cerise Lab kitchen to drop off curry ingredients to Mr. Mime. He then states how excited he is to see Chloe fighting off

the Alola League Champion...before he pauses and realizes what this means.
* Infinity Train: Blossoming Trail: After one too many snide remarks about his contributions to his daughter running away, Professor Cerise hits his limit.
* Infinity Train: Blossoming Trail: An Apex child who fell in the lake within the Fog Car couldn't swim, so he cried out for Grace, Simon and then for his mother to save him before he drowned.
* Infinity Train: Blossoming Trail (and also its prequel and sequel) are this. The most prominent one is Lexi, one of Chloe's denizen partners, who is actually a flying talking book who usually has a humanoid appearance by separating his papers.
* Infinity Train: Blossoming Trail, and is only driving the wedge between them deeper this way.
* Infinity Train: Blossoming Trail and work on herself to go back home.
* Infinity Train: Blossoming Trail as a 'princess' despite her disliking that term.
* Infinity Train: Blossoming Trail, Ash discovers that his Pokémon have been betting on which of his travelling companions he'd get together with. Oshawott admits he lost three Sitrus berries because he bet that Ash would date anyone but Trip.
* Infinity Train: Blossoming Trail as his own and notes to his mom that Goh and Chloe are no longer friends because Goh never comes to visit. Talia honestly praises him for being the wisest member of the Cerise family.
* Infinity Train: Blossoming Trail, Atticus, King of Corginia is this between himself, Chloe Cerise and Lexi. Justified since Chloe herself is only ten and Lexi is — at least emotionally — the equivalent of a teenager. He makes sure to comfort the two when both are in need of support with their problems.
* Infinity Train: Blossoming Trail centers around Gladion. The two contrast sharply in several ways:
* Infinity Train: Blossoming Trail characters in this story, just roll with it) want to devise a ritual that will slaughter the Apex for all the misery they enacted on the Train under their "Passengers are the only things that exist on the train" mentality.
* Infinity Train: Blossoming Trail: Chloe, Atticus and Lexi engage in one in their room at the Hotel Crayola.
* Infinity Train: Blossoming Trail: Chloe Cerise feels like she's this since everyone in her family loves Pokémon while she...doesn't. However, this makes her angry at herself as she feels so isolated from everyone else.
* Infinity Train: Blossoming Trail, Chloe Cerise has traveled throughout the train with her long red hair flowing free — because the scrunchie that kept her braid together got blown off when the train arrived to pick her up — which ends up getting her trouble when the Organ Man grabs it and is about to chop her head off. However, Chloe has a paper bracelet Lexi gifted her, and he uses his paper powers to fold it into a knife to cut it. Not only does it save her life, but this is also coming off the heels after a horrific series of events in regards to the Unown back in Vermillion City and the realization that Chloe herself needs to change. The next car Chloe enters has her hair styled into side-swept waves and even dyed with blue streaks, signaling that she's ready to make the effort to change and go home.
* Infinity Train: Blossoming Trail: Chloe Cerise is granted a cloak from Olmec — The Cloak of Marchosias and Wepwawet — with one half of its powers granting her the ability to cast fire. She can breathe Flamethrower, hurl fireballs or sets her donut holer on fire. She can even expands flames from other sources.
* Infinity Train: Blossoming Trail: Chloe Cerise's braid falls apart when a gust of wind from the Infinity Train blows away her scrunchie before taking her inside. Even after Chloe learns how to tie her hair into a braid, she decides to keep it as it is to establish herself as a girl different than the one back home.
* Infinity Train: Blossoming Trail, Chloe gets into this after spending three days unable to write a story, with her echoing Hiro Hamada below.
* Infinity Train: Blossoming Trail, Chloe sees the Sorbet Shark Puppies in the Plush Penguin Car and finds them adorable.
* Infinity Train: Blossoming Trail despite her lacking interest. Add in the fact

that he only pays attention to her when Pokémon are involved, and you have one of the biggest factors that drove her away from home and onto the Infinity Train.
* Infinity Train: Blossoming Trail for fighting opponents with a pipe, the cape makes her more of a badass because it gives her nifty abilities like casting fire, turning into a wolf, flight and an extra arm with it serpent tail.
* Infinity Train: Blossoming Trail Goh has essentially forgotten her in favor of Ash, and she feels isolated due to many factors (insecurities of her likes, the fact that everyone pushes her to a job involving Pokémon and being ignored by practically everyone) that she really wants friends. She tearfully tells Lexi that she wants to have friends because she's had no one to confide her problems to.
* Infinity Train: Blossoming Trail Goh is the deuteragonist as he must come to terms on how, despite stating he's "friends" with Chloe, he's never cared or actually interacted with her due to his obsession with Mew and new budding friendship with Ash.
* Infinity Train: Blossoming Trail has a more dramatic version. Chloe chews out both her father and Goh for being so obsessed with Pokémon that they failed to notice that she actually existed and then she also adds Ash into it because, while his crimes aren't as severe, his presence just made Goh spend more time with him and leaving her behind.
* Infinity Train: Blossoming Trail has Chloe, Lexi and Atticus share a laugh as they celebrate the Penguin Potluck and enjoy some delicious ice cream bagels.
* Infinity Train: Blossoming Trail has Chloe somehow able to get text messages from Goh, while she's on the titular Train. She later learns that it's because One-One installed a wi-fi system and other apps for passengers to use while on their journey. In the Intermission she uses this to send her farewells to her father and former friend, telling them to not reply to her so she can move on with her past.
* Infinity Train: Blossoming Trail: Hope you have an encyclopedic knowledge of obscure myths and demons!
* Infinity Train: Blossoming Trail, Hop wakes up in a car that's a forest covered in fog. Turns out this Fog Car is Silent Hill but on the Infinity Train. Joy.
* Infinity Train: Blossoming Trail in her world before she gets onto the Infinity Train where she quickly proves that with a bit of confidence and a steel pipe, that she can tackle any and all foes. By the time Act 2 starts, she's quite the determined warrior who is off to topple the Apex.
* Infinity Train: Blossoming Trail: In the usual anime, Ash Ketchum is known to have many romantic scenes with his female companions (even though he's oblivious to it all) but the story has him willing to "get together" with Trip after the latter confessed his feelings for him.
* Infinity Train: Blossoming Trail in this light. One reviewer has Lexi motivate Chloe by telling her she's amazing as she is, and Chloe helps tame Lexi's anger over the Apex and focus on their journey across the train.
* Infinity Train: Blossoming Trail is a ten-year-old girl who finds herself thrown into the Infinity Train, teams up with a corgi king and a living book, to bring down a dangerous cult called The Apex.
* Infinity Train: Blossoming Trail is dedicated to the author's grandmother, who passed on before the chapter was published, with the author explaining the main characters having dim sum for brunch was one of the author's fondest memories and regrets not being able to see her in person — as the grandmother lived in California and the author in Myanmar — within the past three years.
* Infinity Train: Blossoming Trail is known as the Library of Flying Books Car. It boasts paper people, flying books and numerous books from different universes. Chloe spends a week and a half there, tending the sentient books, reading stories, writing some of her own and even celebrating her Unbirthday there.
* Infinity Train: Blossoming Trail) is smitten with her both for her kindness.
* Infinity Train: Blossoming Trail is this for Chloe Cerise, who decides to find who she truly is after being thrown into the eponymous Train itself, away from everyone who pushes her into a life filled with Pokémon.
* Infinity Train: Blossoming Trail land on the Infinity Train days before Chloe

Cerise ran away from home.
* Infinity Train: Blossoming Trail looking like a demon coated in blood and threatening to massacre her entire class if they do this again.
* Infinity Train: Blossoming Trail loves softball, stating that she loves the thrill of being up at bat. It's revealed that she practice since she was eight with her father and she translates her skill into her donut holer, Cheshire.
* Infinity Train: Blossoming Trail) — to the Lobster Quadrille, with both singing its lyrics and waltzing in glee at being together. There are hints of it being romantic even though the two have known each other for at most a few hours.
* Infinity Train: Blossoming Trail — without thinking of the implications. Is he aware of how dark of an idea that is or does he just find the idea as a way to involve Goh in the illustrations?
* Infinity Train: Blossoming Trail of food is brought about with a variety of food being described in each chapter.
* Infinity Train: Blossoming Trail: One of the cars Chloe, Atticus and Lexi enters is the Plush Penguin Car where cuddly penguins serve ice cream and hold penguin potlucks. Well, all except Nico, who has an obsession with bagels.
* Infinity Train: Blossoming Trail (or donut holer) that she uses to beat the hell out her opponents.
* Infinity Train: Blossoming Trail, Parker reveals that his sister Chloe is one of these because of how she makes amazing horror stories and all sorts of spooky shows. It's through her that Parker is more confident with his interests.
* Infinity Train: Blossoming Trail spoils many of the twists of the Nihilego arc (namely that it's Faba's fault for the entire mess) and that it starts on the night before Professor Kukui and Burnet's wedding. And on the Infinity Train side of things, the events of Book 1 and 2 are spoiled, alongside Book 3 since it takes place at the same time.
* Infinity Train: Blossoming Trail that all he cares about is if she's involved with Pokémon, not her in general.
* Infinity Train: Blossoming Trail that changes the story, and everyone involved, for better or worse.
* Infinity Train: Blossoming Trail that comes when we learn how Chloe was bullied and ostracized because she wasn't into Pokémon and was saddled with many useless adult figures in her life (with only her mother and English teacher doing anything they can to keep her afloat) and how everyone, friends and family alike, realize that they know little to nothing about the girl with her maroon hair in a braid and must figure out how to deal with the ramifications of her disappearing onto a magical therapy train.
* Infinity Train: Blossoming Trail that karma will catch up to them. As the fanfic takes place right when Book 3 is starting, he's right.
* Infinity Train: Blossoming Trail that renders her into a mindless maniac, losing the ability to think with logic and reason with the intention of getting ready to shoot lead, even if it doesn't get her what she wants. Couple that with an incredibly shallow motivation (wanting a Shiny Mew and nabbing Goh's tracker) and her arrest being only mentioned, she's a pretty weak send off villain for this story.
* Infinity Train: Blossoming Trail that she at least writes such content for stress relief, but never told him because they didn't think the warning signs hidden within said works were all that important.
* Infinity Train: Blossoming Trail that showcases the name of the train car that is the focus.
* Infinity Train: Blossoming Trail. the Cage of Flauros ritual Walter wishes to enact on the Apex needs seven components. Walter even discusses this trope to his prisoner.
* Infinity Train: Blossoming Trail, the fact that his targets have already had their lives ruined and also revealing that he and Chloe were also as much at fault than everyone else who caused her to be a near-suicidal wreck.
* Infinity Train: Blossoming Trail the one trying to crush her sons' dreams.
* Infinity Train: Blossoming Trail thing comes close to critically injuring Alex

Shepherd/The Bogeyman.
* Infinity Train: Blossoming Trail, this is a recurring theme about how people would want to bury their past instead of making peace with it or to torture someone.
* Infinity Train: Blossoming Trail to their ranks because they have the same agenda to trap the Apex to prevent them from causing more harm and rename themselves the "Red Lotus Quarto".
* Infinity Train: Blossoming Trail, Trip brings up this trope in regards to making sure Goh never finds out about the Infinity Train, noting that due to how Goh can be very obsessed with things (Pokémon, Mew and Ash) that if he becomes obsessed with this knowledge, he'll try to enter the train and thus there will be two children stuck on the train.
* Infinity Train: Blossoming Trail trope because 10-year-old kids in the Pokémon world essentially leave home so why shouldn't she?
* Infinity Train: Blossoming Trail (unless you're the Apex). Lexi pledges his loyalty to Chloe for unearthing him from the earth, taking a teapot of hot water and forgiving him. However, due to their natures, there is no romance between the two.
* Infinity Train: Blossoming Trail, usually depicted as a ghastly white knight. The chapter after she dressed up Lexi as said Specter, he forms his papers to create a lance and even transforms into a skeletal horse. One of Eligos' symbols was a lance, and he was said to ride into battle on a skeletal horse. Other demons from the Ars Goetia are represnted looking exactly like their depictions and there are references to even more obscure myths and legends like the Atlantis of the Sands, the Island of Ys and the Sunken Cathedral and even a denizen that's a rabbit with a unicorn horn.
* Infinity Train: Blossoming Trail wears a pretty black dress, has a black crown decorated with garnets and long red hair. She's also a sadistic manifestation of a child's worst impulses.
* Infinity Train: Blossoming Trail What did he do to deserve all of this? He searches for Chloe for days on end, growing sick with worry, only to be told to his face she wants nothing to do with him when they eventually do talk. Yes, the story goes out of its way to punish him solely because he was worried about Chloe and didn't know that she didn't like him. The punishments eventually get so ridiculous that the question of whether Goh brought this upon himself or not becomes a moot point.
* Infinity Train: Blossoming Trail, while Chloe is on the Infinity Train, her family decides to start a movement called #CallingChloe to convince others to show their support for the Vermillion City girl.
* Infinity Train: Blossoming Trail: While popular on A03 , the fic has garnered negative viewpoints on the site Spacebattles due to the treatment of Ash, as the Pokémon forum goers on the site see him as being needlessly belittled and mistreated by the fic's narrative. Fortunately, the author takes the criticisms to heart and in Act 2, Ash and Chloe start rebuilding their friendship.
* Infinity Train: Blossoming Trail: While Yeardley Lobelia is a misogynist bully in the story, it would be extreme to call him evil. Rather he an unpleasant bully taking out his issue on someone else. His little sister still cares about him deeply, calling Ash to ask if her brother is a bad guy after he locks himself in his room to cry. However, his sister appears to be in the dark about his bad behavior. After the trial, where his little sister learns of his treatment of Chloe, she becomes scared that he'll start harming her because she's a girl and refuses to hold his hand. However, when Yeardley was taken hostage with Class 5-E, his little sister shows that she still very most loves him, and he regains her trust when Yeardley sacrifices himself to save her from Ms. Turner.
* Infinity Train: Blossoming Trail, Zeno showcases numerous scenarios to Goh as part of some "nightmare therapy" as to how Goh's actions affected him and also show what happened if Goh provdied empathy all while eating stuff like potato chips, chocolates, curry, and popcorn.
* Infinity Train: Blossomverse: A few things to look out for when reading the

stories:
* Infinity Train: Blossomverse over time, with questions raised as to how much 'punishment' is valid for everyone's assorted sins. The author even wants readers to get into debates about this regarding Grace Monroe's karma in Voyage Of Wisteria.
* Infinity Train: Boiling Point deals with on the Infinity Train: They enter the Train to work our their issues, but one of said issues leaves them unable to change, which is necessary to work out the issues in the first place...
* Infinity Train: Boiling Point into the mix, and you know this trope's in play.
* Infinity Train: Boiling Point: Luz and Amity become girlfriends in the span of the first two chapters.
* Infinity Train: Boiling Point: Luz and Amity have one of these during the rewrite of Chapter 6.
* Infinity Train: Boiling Point takes place after "Wing It Like Witches" so it doesn't bother to keep Amity's crush on Luz a secret. And like the fic below, it doesn't keep the Apex's existence a secret.
* Infinity Train: Boiling Point, the reveal of this action causes some tension between the duo when it's revealed.
* Infinity Train: Boiling Point: "The Spelling Bee Car" starts with Zenith Fantasy (a small group of reformed ex-Apex members) going to a cantina, where Alex brings up the trope when he sees they have to take a number... only for the number they grab to be the very next order.
* Infinity Train: Book 3 ends with Grace reorganizing the Apex so that everyone will be able to uncover the reasons why they're here and return home.
* Infinity Train, change the studio logo gag multiple times during its run.
* Infinity Train: Cherry Bloodlines bold sling bikini at the beach, she has a nightmare of herself wearing it at school, while Yeardley leers at her.
* Infinity Train clone of Alrick, and Amelia doesn't seem to like her, it's pretty easy to connect the dots.
* Infinity Train completely plays this trope straight after he goes insane and snaps harder than ever before when he thinks he's killed his best friend and possible crush, Grace by kicking her off of the train into the wheels.
* Infinity Train concerning recurring supporting characters and the setting itself)
* Infinity Train: Court of Cyclamen. Bede comments that this is actually so common that Pokémon Professors are working on ways to further differentiate genders between Pokémon whose forms lean more towards one or the other.
* Infinity Train fans started themselves "passengers" within days of the pilot's premiere, with the show's staff quickly acknowledging it as well.
* Infinity Train format, with the leads of each season never reappearing after the conclusion of their character arc, with one of the supporting characters taking their place. While some events carry more weight if you are aware of what happened in prior seasons, and there are a few important recurring characters, each season serves as self-contained character studies focusing on different themes that can be enjoyed on their own. Each season is also movie-length on top of that, clocking in at just under two hours.
* Infinity Train, Grace ends up confronted by her past and comes to terms with the consequences of her actions along with Simon's eventual betrayal and death. In the end, she resigns from the Apex and begins helping her former followers find a way off the train.
* Infinity Train happening in the background of Ryan and Min-gi's adventure.
* Infinity Train has a whole train car full of these beings in the episode "The Crystal Car". These include crystal hippos, crystal birds, and a helpful crystal gentleman named Greige.
* Infinity Train has the soul-sucking cockroach-dog hybrids known as Ghoms.
* Infinity Train has this occur to one of its protagonists. The fifth episode of Book 3 reveals that Hazel, a young girl with a seemingly malfunctioning number and no memories of her parents, learns that she's actually a denizen native to the train. A few episodes later, she discovers that she's an imperfect clone of Alrick (Amelia's deceased lover).

* Infinity Train have to constantly run for your life, and you have people who have happily spent years on the train over figuring out a way back.
* Infinity Train in Book 1, but come Book 2, they're the primary recurring threat relentlessly hunting Mirror Tulip as she attempts to escape the train. Though Mace is the more senior and commanding of the pair, Sieve is shown to be more adept at manipulation and proves to be just as ruthless when pushed enough.
* Infinity Train: In the "The Tech Support Car" short, there's this incredible line:
* Infinity Train is built around this. Each season focuses on a new passenger of the eponymous train, who can only leave when they've resolved a notable personality flaw.
* Infinity Train, it seems like a shadow monster is raising the tides in Corginia, but the monster is actually just a spider's shadow and the tides are a result of a broken water pipe. Downplayed in the show proper, where the shadow is still a spider, but the tides are caused by the orbs that keep the worlds in the train cars together being removed.
* Infinity Train: Knight of the Orange Lily; after everything that The Fog Car gave everyone, up to and including, torture, pain, and very very hard looks at themselves, Gladion is depressed that he's not old enough to drink (he's 14).
* Infinity Train: Knight of the Orange Lily (albeit the latter is justified as the author has been shown to have a fondness for Specter).
* Infinity Train: Knight of the Orange Lily and hints to some of the events to that story.
* Infinity Train: Knight of the Orange Lily because of how he sacrificed everything for his sister when it's revealed that he withheld critical information about her trauma and all the blame was thus plased on Lusamine's shoulders for not being aware of this — and wanted to have him face the consequences of his narrow-minded thinking.
* Infinity Train: Knight of the Orange Lily deconstructs the basic concept of this with Gladion wanting to become stronger to fight off Nihilego. It's not glamorous at all, what with the training and fighting and sleeping alone in hotel rooms all the time. The fairy-tale that introduces the story even notes that quests rarely ever mention the boring or exhausting parts of them. This doesn't stop Gladion from going on his own knightly quest across the Infinity Train to end the Apex and by the 400 Rabbits Car arc, it becomes a quest to collect the memory tapes of the Apex and trap them within their own pasts in the hopes of them realizing their mistakes and getting their numbers to drop.
* Infinity Train: Knight of the Orange Lily / denizen currently fused with him, Easter, can even the playing field. Once the attack hits, they deliver a huge smirk before they scream, "I LIVE!!!" at the top of their lungs.
* Infinity Train: Knight of the Orange Lily element of the work, as he finds himself pulled onto the Train instead.
* Infinity Train: Knight of the Orange Lily, he isn't successful (although he does stop a serious plan of theirs).
* Infinity Train: Knight of the Orange Lily in being a chivalrous character. Unfortunately, the story deconstructs a lot of things that goes wrong with this, ranging from the training and nights Gladion slept in hotels, the fact that Gladion keeps seeing Lillie as a helpless princess stuck in a tower, or the fact that most of the problems could've been avoided if he told his mother about what happened with Lillie, Nihilego and Type: Null so much sooner.
* Infinity Train: Knight of the Orange Lily Margaret crushing a pearl to mix with the grape juice is based on a myth that Cleopatra did the same thing (albeit with a pearl earring) to Marc Anthony in a bet that she could devour the most expensive dish ever.
* Infinity Train: Knight of the Orange Lily Rabbit Tribe attire that includes a pair of white framed sunglasses.
* Infinity Train: Knight of the Orange Lily, talks to their host via a reflection in a pool of water, their face is covered in glowing blue lines. When they switch out in the battle against Death Eye, these same blue lines are all over

their/Specter's arms.
* Infinity Train: Knight of the Orange Lily, the prologue weaves a tale about Gladion and Lillie before it changes gears about what it thinks about quests.
* Infinity Train: Knight of the Orange Lily: Tokio is forced to confront grey versions of the Apex kids — who assaulted him years ago and culminating in a murder of a rabbit and his guilt for replacing them (long story) — and decides to tell them off in this matter.
* Infinity Train on a return flight to the United States from China. Partway through the flight, he awoke to a darkened plane cabin while the plane was over the Pacific Ocean, and was only able to see the faces of other passengers illuminated by TV screens. His immediate thought was “If I had no idea what this was, this would be pretty terrifying.” Early drafts even had the season one protagonist awake up in a similar situation, albeit on the titular train.
* Infinity Train plays this for drama and displays this in these characters.
* Infinity Train: Rather than an official announcement after the show's third book premiered on HBO Max, the show's creator announced on Twitter that the animation staff had all been released and were working on different projects, with the hope that they'd be back together if HBO decided to renew it. However, a couple of months later HBO released an official trailer for Book Four... Which apparently had already been completed, and will be the final book of the show. The trailer shows no indication of this.
* Infinity Train takes place in the mid-1980s, based on the bumper sticker on Ryan's van denoting him and Min-Gi as being the "Class of 1985" and the latter noting at one point that the former had been gone on his road trip for almost a year.
* Infinity Train teen and adult following. The deal-breaker that ultimately led to its cancellation was the showrunners wanting the fifth season to feature an adult protagonist as opposed to the kid or teenage protagonists of the prior seasons.
* Infinity Train that doesn't present this as embarrassing or odd (in fact a lot of the edits on here seem to do so). The only part that can be considered funny is that Jesse has to wear the dress over his regular clothes.
* Infinity Train that prevented them from trying to explore the train. This was still the intended plot when the pilot was written, of which "The Corgi Car" is a reworked version.
* Infinity Train The number that denotes her progress has ascended so high that it's unlikely she'll ever be able to leave alive.
* Infinity Train, Tulip has ditzy robot sidekick named One-One, a ball-robot with two personalities: Glad-One, the eternal optimist; and Sad-One, the eternal pessimist. The two can split down the middle to function independently.
* Infinity Train: Tulip Olsen likes to eat raw onions the way other people eat apples. When her best friend points this out, she retorts that she has a "sophisticated palate".
* Infinity Train: Voyage of Wisteria: Delia Ketchum admitted to Talia Cerise that she is afraid Ash and Chloe will forgive her for her role in Goh's departure, despite refusing to give Chloe any kind of forgiveness. She acknowledged the hypocrisy in her being forgiven. At the same time, she refuses to do the same. Delia even refuses to use the parent's card to justify her hypocrisy by pointing out she did that before, and she afraid that her son Ash will start second-guessing everything she says and does.
* Infinity Train: Voyage of Wisteria, Hazel finds Goh's Sobble to be this and hugs them...while accidentally causing them to unlease a cry that makes her and everyone else around her.
* Infinity Train: Voyage of Wisteria is also ten, but he has to navigate the train after his friend ended the cult.
* Infinity Train: Voyage of Wisteria — is so recent that no one notices.
* Infinity Train: Voyage of Wisteria. Sara Diktaylis's foster parents made her watch the news about Mrs. Turner attempting to kill her former classmates before Chloe, the girl she bullied, stopped her. Seeing this and her former classmates' interviews does not help Sara's mental state and guilt, especially since the girl

who became the hero is the same girl she despised and bullied. She has a breakdown and starts screaming until her foster mother comforts her. When Sara asked why her foster mother took her in, she reveals that she was just like Sara. It's implied that she and her husband forced Sara to watch the news, so she understands the harm she caused and hopes to help her grow into a better person.
* Infinity Train: Voyage of Wisteria The author has stated that she actually welcomes debates from people over this, particularly where it started going from "ignorance" to "blind arrogance".
* Infinity Train was initially promoted as a miniseries, but ended up being more of an anthology.
* Infinity Train, when Simon starts looking through his and Grace's stuff, he mentions that Grace has "Arctic Cowboy" brand deodorant "for summer sports perspiration."
* Infinity Train, while traversing through the train cars, Tulip encounters the corgis of Corginia that can speak English. There are also the turtles of the "Incomplete Car" as well as a certain recurring cat.
* Infinity Train), with later ones managing to trend as well. While neither CN or HBO has yet to respond, the fandom pushes on, only expanding its reach once HBO Max expanded globally, as overseas fans could once again watch the show legally.
* Infinity Verse: It's revealed in Chapter 6, the Manny Rivera/El Tigre has resumed dating his former rival Zoe Aves/Black Cuervo.
* Infinity War in which he gets them (since he slots them into the Gauntlet in a certain pattern that one can figure out from trailers).
* Infinity Wars (2018)) death, Dr. Strange feels the best reaction to seeing what it was they just saw is have a drink.
* Infinity Wars (2018), Gamora uses the Time Stone to freeze the Avengers while she grabs the remaining Stones from them. Thanos' ghost takes a moment to snark at Captain America on how he's frozen in time again.
* Infinity Wars has the Fleeting Footman, who retreats whenever he would go into combat with an enemy.
* Infinity War story moot, where they tried to protect the Power Stone, given just a brief mention as "Thanos attacked Xandar" last week.
* Infinity Wars: while he helps fighting, Soldier Supreme (Captain America & Doctor Strange mashup) objects he doesn't want his life to be undone, even if it means two "more real" heroes will live instead. Adam Warlock promises to try keeping this universe existing while restoring the real one, and the so-called "Warp World" continued to exist within the Soul Stone. Marvel returned to the concept of the Warp World a year later in the "Secret Warps" storyline, which officially treats the reality as its own thing.
* Infinity War The only way he even stays vertical is by focusing on hunting down Thanos and making him pay.
* Infinity War. This draws upon the character's portrayal in the comics, as yet unexplored on screen.
* Infinity was a notoriously bad gift giver (physics textbooks for kids, toys for adults, etc...), but people treasured her gifts all the same because "Auntie Tsuku might not understand people very well, but she always tried her best."
* Infinity, was augmented with reverse-engineered Covenant and Forerunner tech (with the help of Huragok recovered from Trevelyan); and can outgun almost anything produced by post-Covenant shipyards.
* Infinity Watch and had many members who would later join the Guardians of the Galaxy.
* Infinity Watch. This hilariously causes the normally calm and charismatic Starfox to snap and angrily kick the overgrown couch potato through the portal provided by Warlock, much to Drax's surprise. From then on, Drax begins living at the Infinity Watch's base.
* Infinity Welcomes Careful Drivers also plays it straight. When a disgusted Lister has the ship's emergency backup milk supply (consisting of dog milk) dumped into space, it instantly freezes into a dog-milk asteroid.
* Infinity Welcomes Careful Drivers, gave the original crew size of 11,169.

* Infinity Welcomes Careful Drivers have a couch, but it never really gets used.
* Infinity Welcomes Careful Drivers mentions that humanity somehow proved they were alone in the universe around 2,000 years after Lister was frozen.
* Infinity Welcomes Careful Drivers references a "hip-hop-a-billy" song (presumably a mix of hip-hop and rockabilly) which had been "red hot on the charts for two weeks, five years previously".
* Infinity Welcomes Careful Drivers, the Red Dwarf does this around a planet in order to turn back towards Earth without spending 3 million years decelerating.
* Infinity Welcomes Careful Drivers, the ship was originally used for extremely long periods of deep space exploration before being converted into a mining craft — the reason why it carries a stasis chamber to begin with. Also, "vacuum storage" is mentioned, indicating that the possessions of the crew were kept in stasis as well.
* Infinity, where drones (called 'Remotes') take a variety of shapes from small humanoid robots to larger flying devices.
* Infinity, you can do this yourself with various parts you can customize your plane with, and occasional paint jobs from random drops. There are likewise special planes, frequently modeled after those flown by notable characters from previous games or noteworthy paint schemes from the real world, which usually have higher base performance than the standard version alongside the unique paint scheme and more space for custom parts to make it even better.
* "Infinity": you can (with some minor list restrictions) pick any models from a faction you like "because they look cool" and be able to win with them. One faction is made up of the most bad ass French to ever exist, Russians, British and US Special Forces, Scotsmen in Kilts waving broadswords and assault rifles AND werewolves. That is one single faction.

So actually, you do pay one whole euro for your 99 cent purchase. But if you buy let's say four of those things, the number ending with six is rounded down. Still, the most you can save by this is five cents, so... Nicely trying to deceive the customers here. * In Finland universal draft for men is still going strong and until relatively recently was very difficult to dodge. Back when it was extremely hard to get out there was more sympathy for dodgers than today, and from those days there comes this amusing little anecdote / urban legend: When a man came to the army, he kept pretending to ride an invisible scooter everywhere, making motor sounds with his mouth and holding his arms extended in front of him. No matter how many disciplinary measures were taken on him, and even after a couple of beatings from his fellow privates he just kept going relentlessly. Finally his superiors had enough of his antics and had a psychiatrist declare him unfit for military service. At the gates of the garrison, he suddenly stopped, mimed taking a key from his imaginary scooter and handed it to one of the MPs saying: "I hereby relinquish the army vehicle to your care, sir", and walked away normally, whistling happily as he went.

* In First Edition, losing HP was explained as a combination of fatigue and actual

damage. Removing fatigue from a night's rest makes perfect sense. Damage ... not so much, but it was implied that it took approximately the same amount of actual damage to kill a 1 HP commoner and a 90 HP high-level fighter. The fighter just had more experience avoiding that damage ... until he was too worn out to do so anymore. And in First Edition, you didn't automatically heal to full from a night's rest anyway; some of the HP loss apparently represented minor sprains and bruises that took longer to heal.

* In Flight: AND HOW! Lets break it down. In Flight is a crossover between Sekerei and Fate/Stay Night. You see where this is going? Shirou has Rin and Saber who he has been going steady with for 2 years now back in London. Akitsu joins and quickly develops radical levels of devotion to him. Then Musubi, Then Matsu, then Tsukiumi. On top of this if the author continues as he has been there will be Kazehana still to come. On top of THIS it is possible that Yukari is also interested. Added up to the fact that none of them have any idea as to his status as a Mage or the nature of Saber and Rin, regarding them as a old pair of exes that he broke up with. In

* Info Dump: Infodumping (that is, information + dumping) is a type of Exposition that is particularly sesquipedalian. Although it can be done in a way that is unintrusive or entertaining, most infodumps are obvious, intrusive, patronizing, and sometimes downright boring. Specifically, if the premise of your story is laughably ridiculous, an infodump will call attention to the fact. This infodump, for instance. The word 'infodump' is often used as a pejorative.
* Info Dump in the beginning is apparently narrated by the Bentusi, as is the Final cutscene.
* Infodump: Sometimes, the audience will need to know something critical before it happens and, while usually a lot better to try and work it into the story gradually and over its course before it becomes relevant, there are some situations where it's just not possible without bloating and/or slowing the pace of the main plot to a crawl.

* In folk tradition, salt is often used to repel evil. It was said a circle of salt could protect one from witches, that salt over your doorstep would ward off ghosts and evil spirit. Salt was often seen as a symbol of purity, especially in its uses: Salt is a conservation agent after all, and salt-cured meats don't spoil. Salt as a purifier appears in Shinto (Where it is used as a ritual purifier and small mounds of salt can be used to repel evil spirits) and Christianity (where it is used before mass and to consecrate a church).

* In football, heavy defense tactics (known by fans as "Parking the (team) bus") are meant to frustrate the opponent team by preventing it from scoring in any way possible. This goads the opponents into attacking your goal more desperately, while you wait for a "lucky break" for a surprise attack on their weakened defenses. At this point, the heavy-defenders then usually go into an even heavier defensive to protect this advantage in score, making it even less likely to see more goals later in the game. The result, for everyone but the diehard fans of the defensive team, is that the majority of the game is itself extremely frustrating and usually promises a very small final score (1-0 and such). The period culminated in the 2002 World Cup, where the German team made extremely effective use of this technique for the majority of the tournament, winning the first three elimination rounds at exactly 1-0 each. However, this was subverted when they lost the final to the Brazilians, against whom defensive tactics don't usually work.

* In "Forever Filly", Rarity tries to bond with Sweetie Belle by doing the sisterly things they used to do when they were younger, while the B-plot involves Zipporwhill trying to reconnect with his dog by getting him to play with his old puppy toys; in both cases, the older one learns that their younger charge has outgrown such childish things, but they finally manage to bond through different activities. Arguably, the former situation is one that many an adult can relate to, while the latter presents it in a way that a child in the target audience can understand.

His craftiness and ruthlessness has also allowed him to use underhanded tactics to great effect. Grievous managed (on Dooku's orders) to orchestrate and successfully act out a terrorist attack on Coruscant via blowing up the Senate District's power generator, causing a massive power failure all over the planet. This stops the peace negotiations and ensures the continuation of the Clone Wars.

* In-Game Banking Services: The player can deposit their cash into a bank account.
* in-game books tells the story of a Dunmeri noble named Andas, of whom it was prophesied that "his blood shall never be spilled", and that he cannot be killed by magic, illness, or poison. Indeed, the prophecy seems to come true, leading people to call Andas "The Hope Of The Redoran," in accordance with the wording of the prophecy. When he grows up, he lords this over his friends and peers as a sign of his superiority in combat, and it gives him the arrogance to challenge his cousin Athyn to a duel for an important political position. It ends with Athyn beating Andas to death with a quarterstaff after Athyn's combat instructor gave him the idea. (Up until then, Athyn had been despairing.)

* In-game example, whenever you have Delma in your party. So, you're in a fight, maybe you're in trouble, one of your characters is in critical condition, you'd really need a healing item... Then you remember that you put one in Delma's inventory. Come on, try and guess where she pulls it from. Exactly.
* in-game, except that most of them are just rehashes with more health and faster speed.
* In-game fluff describes Zerg buildings to be literal organs and Zerg "bases" as whole a literal organism. So creep is somewhat closer to a fluid circulation system - it's required to keep the organs saturated. Infested Terran buildings are somewhat justified in that Zerg cannot manipulate tools, so they need the entire thing hardwired into their command network of telepathic overlords to make any use of it.

* In-game, many of the antagonists you end up fighting are also mercenaries. Lucas' red-shirt wearing goons in the first game are all mercenaries he's hired to wrest control of the fallow trees, and Deidrianna's troops in the third are an even mixture of fanatically loyal soldiers, conscripts, and mercenaries. As the game progresses, Deidrianna begins to rely more and more on professional mercenaries to make up for the fact that many of her people are rebelling and her poorly-trained and poorly-armed conscripts have been regularly slaughtered by your own mercs.

* In "Game Over," a skateboard tester (Tony Hawk) is found beaten to death. The team zero in on his wife who snaps she was irate to find flowers to another woman delivered to their home and beat him with his own board. It turns out the flowers had been ordered by his boss for his girlfriend and sent to her address by mistake. Luckily for the woman, it turns out the blows weren't fatal and someone else actually finished her husband off.

* In gameplay, a Heavy who runs afoul of a Pyro will shout a more generalized (but still very specific) instance of this trope:
* In gameplay, if you have both on the table and one of them is killed, the other
* In gameplay, running away from a wild Pokemon is determined primarily by the difference in speed between the combatants. Fast wild Pokemon will simply not let you escape from battle. Some of them even use a move (Mean Look) or an inherent Ability (Magnet Pull, Arena Trap) to lock you into the battle until either your 'Mon has fainted, or they have been knocked out or caught.
* In gameplay terms, the light machine gun and medical capabilities make the medic the most team-oriented player. Conversely... a group of four medics is commonly used to troll people with a nigh invincible cluster of machine guns that simply revive each other in turn. A tank or Carl Gustav recoiless rifles are generally some of the easiest solutions.
* In gameplay, this is implied to be the fate of Guardian Fireteams who get wiped during the Vault of Glass raid. This can happen in a number of different circumstances throughout the raid, whether it's being afflicted with the "Mark of Negation" by Fanatics and Oracles, followed by dying to the Templar's "Ritual of Negation" unless you cleanse yourself of the debuff; getting wiped by the Gorgons (special Vex Harpies found exclusively in this raid) and their "Gorgon's Gaze," where your party has ten seconds to kill them before they kill you (and they've got a

Their formation is Apple Jack and Pinkie Pie on the bottom (Earth ponies, presumed heaviest and AJ definitely strongest), Twilight Sparkle and Rarity (unicorns) in the middle, and Fluttershy and Rainbow Dash (Pegasus, presumed lightest) on top. They attempt to do this while practicing their cheer but instantly fall due to their train coming to a screeching halt. When they perform it for real in front of who they think is the chairman, however, they had to do it without Rarity since she was busy fixing up Princess Cadence in the Salon.
* In games that have voices, a number of common phrases include, but may not be limited to:
* In games where the standard 'game over' sequence is getting killed by something, any situation in which you can lose without actually dying may result in a non-standard game over. Conversely, getting outright killed in a game whose scenarios rarely involve life-threatening situations may trigger a non-standard Game Over.
* In games which use a classification system for planes, this is the purpose of Multiroles: they tend to have both anti-air and anti-ground weapons, have moderate scores in all stats allowing them to both dogfight and ground pound decently, and in
* In games with high-speed stages, if you get killed in one you'll always be taken back to just before your ship accelerates, and there will always be at least two enemies that drop powerups so that you can get the two Speed Ups needed to get through the stage. If there is a checkpoint in the middle of the high-speed zone, you'll always restart slow so that you can pick yourself back up. In
* In-game, the Adeptus Mechanicus army list has the Contagium Mechanica Relic, which is one of these carried by interface nanytes and used like a gun by the Magos commanding it. It inflicts a painful but survivable hit on an enemy vehicle, which next turn will itself hit each vehicle nearby, friend or foe, which themselves become infected and spread the virus. If fired early in a standard six-turn game,

it can easily devastate most of an enemy mechanized army...
* In-game, the concept of the Customizable HQ is this for the characters; prior to 4th edition all special characters required your opponent's explicit permission to use and you were encouraged to use the generic HQ to build someone to represent you on the battlefield. 7th Edition is trying to return to this trend by giving a lot more customization to the generic HQs and restricting some of the utility of named characters. Emphasis on
* In game, the explanation for the Guardian Forces is a bit different. They need room inside a person's head to be able to work with them. The neurons they take over happen to be the neurons that keep your memories. Probably more benign than if they'd take your visual cortex or primary motor cortex.
* In game theory, a Nash Equilibrium is a state in which all players know each others' strategies and have nothing to gain by changing their own strategy. A true Nash equilibrium is very rare in the world of tabletop and video gaming, though players often
* In game, the Swarmlord follows this in that is swords force an enemy to re-roll successful invulnerable saves and inflict instant death, though the Swarmlord is so expansive it's probably only worth using in an Apocalypse game.
* In game this is justified by having the base of Ezio's blade (inherited from his father) modified so it's raised further from the wrist, compared to the original design in Altaïr's day. This was actually Altaïr's idea — the first "Codex" page that's decrypted is his design for this blade, which another page implies that it's because hiding in plain sight ("social" stealth) is difficult with a missing ring finger — but Leonardo da Vinci would implicitly take credit for it. It doesn't stop him, however, from taking a moment to freak Ezio out by pinning his hand and raising a meat cleaver before saying "Just kidding."

* In general, a good performer is not necessarily one who never trips up, but one who's quick enough in thinking on their feet to pull this trope so well you don't even notice.
* In general, aircraft are extremely susceptible to being brought down by a singular cause, whether intentional or accidental. A propeller strike on a single-engined plane for instance, can effectively render a plane uncontrollable. In air-to-air combat, a direct hit by a single missile will generally suffice to bring down any aircraft.

* In general a lot of the government/infrastructure jobs in the Earth Kingdom are held by benders, as they literally control the ground on which you stand. The Omashu mail system and the Ba Sing Se trains are controlled by benders, and they keep everything running smoothly. Of course, there is the "bully forces his way to the top because he's stronger" situation in the village from "Zuko Alone", as the leader of the thugs/soldiers appears to be the only earthbender in town.
* In general, altogether more effort in the Star Wars verse is put into disguising a warship as something else, rather than hiding it. Warships, especially pocket carriers disguised as freighters are quite common. Fiddling with IFF projectors and specific gravity (to fool
* In general, a major difference between commercials where a lot of bad or aggravating things happen to the "main character" is that most often if bad things happen to women, it should be an excuse for them to do something nice for themselves (relax with a food product, take a vacation, go to a store she'd enjoy), but if it's a man, there's something wrong in his life that he needs to fix. Not necessarily his own fault, but his suffering is the sign of a greater onus (he's driving the wrong car, he needs to make smarter decisions, he needs to watch his health). Women get to make themselves feel better for things beyond their control, men need to fix their lives.
* In general, ammo-using weapons are liked by some players because they allow ships to maintain a high rate of fire for longer since they don't draw on the ship's energy reserves (when they run out, ROF for energy weapons drops to about half, depending on the ship and weapon). On the flip side, other players prefer energy weapons because you don't have to stock ammunition, which in fleet-scale applications involves constructing an entire supply chain including factories; no
* In general, an episode will usually focus either on the character who gets Akumatized (especially if it's a member of the class or a previously-established character), or on their friends or family members. The same goes for when a character gets to
* In general, angels are sterile, unchanging and sexless beings. They do not change or beget and view things like fertility, mutability, and gender as mortal failings. (In theory.
* In general, anime is somewhat notorious for this, as it is (or was) seen in Japan as an acceptable way of keeping budget down, especially in the pre-digital-rendering era. While less ubiquitous now, a lot of classic shows that had otherwise

tight budgets tend to use stock footage quite a lot — as outlined below.
* In general, a number of types of these cities exist. Some walk around on large legs — these are favored when earthquakes are an issue — while others are platforms on top of large, moving mats of nanotechnology. Some people instead inhabit very large, humanoid or animal-shaped robots, built to house anything from villas to cities in their insides or on their backs; these are explicitly treated as flashy, ludicrous indulgences made to satisfy someone's artistic whim rather than serve a practical purpose. Most of these settlements, regardless of type, are also provided with advanced AI and are often fully sapient.
* In general, any alternate universe based on a video game will include an encounter with every boss (or every boss with a name), in order. If it was a series, it will tend to cover these games in series. This happens no matter how far diverged the fic's universe is from the game's universe.
* In general, any army that has a significant amount of charging put into its summon tends to be this. Notable examples from
* In general, any battle with a legendary Pokémon (such as Mewtwo or any cover legendary) can become this if you decide to just lob a
* In general, any card game that has a specific rule against cheating is really saying this trope. To catch someone cheating, you must accurately describe their cheating action, or be penalized yourself for a false accusation.

* In general, any leaf, stem, or root with a strong taste tastes that way to dissuade consumption. For example, very few animals will touch mint. The main reason that humans can stomach mint or most spices is because we usually eat at most one spoonful with our entire meal, as opposed to trying to eat half a kilogram of it all at once. A dash of chili pepper in your dinner is tasty. A whole bowl full of raw habanero is just plain masochistic.

* In general, a race that can move its stat bonuses around. This allows them to be useful in multiple classes, possibly all of them, and not just those of a certain category, like martial, support, or spellcaster. For 5e, such flexible races include Changelings, Custom Lineage, most Half-Elf variants, Humans (especially Variant Human), Simic Hybrid, Feral Tiefling variant, Warforged, and a number of Unearthed Arcana races that have been put out since the release of Tasha's, which has the Custom Origins feature, which allows the player to move the character's stat bonuses around, with the Dungeon Master's permission of course.
* In general, Arachne and Athena's characterization changes depending on the storyteller. In one version Arachne is not only proud of her skill but openly insults the gods, and quite frankly is asking for it. In another she simply caught the eye of Athena by being a talented weaver. Similarly, in some versions Athena is a graceful goddess who gives Arachne every chance to prove herself, while in others

she's petty and vindictive.
* In general, arachnoid monsters would fall under the category of "Temnoceran".
* In general, a real Drill Sgt. as noted by Ermey would instantly judge Pyle unfit and force him out of training, as doing otherwise would lead to mental breakdowns and accidents that would negatively impact the rest of the training platoon.

* In general, beehives take the form of round fans of hexagonal cells hanging from a stem, which look like wasp nests far more than anything bees make — wild beehives consist of parallel sheets of honeycomb hanging down from a support structure.
* In general, before women were allowed to achieve higher education, most women taught themselves however they could, which was usually attached to their husband, reading the books in his library, and often working with him as an unofficial assistant or apprentice. Maria Winkelmann is one example.
* In general, better items are given to those at the back of the pack. First-place characters mostly receive red/green shells and bananas, whereas 8th place characters mostly receive Stars, Boos, and the dreaded Blue Shells. However, this usually applies to human players much more strongly in order to help them catch up. A human in 8th place will likely receive a game-breaking item each time, but a CPU player probably will not.
* In general, Cain always attempts to look out for wounded men, since this provides the dual advantage of looking like a good commander to his men and a good excuse to keep his head down in the middle of a firefight.
* In general, Canadians are animated in an even cruder style than the rest of the charcters.
* In general canon, the Football Team's friendship easily the most loyal, closest, and happiest.
* In general, cats are portrayed less positively than dogs throughout the franchise. This is allegedly because creator Hirohiko Araki dislikes them, due to a bad experience with one as a child.
* In general, Christian Rock bands that tour with secular bands that include anything remotely resembling strong language in their lyrics (not just profanity, but lyrics that are "too dark"), drink alcohol (even offstage) or endorse "liberal" (read: not unambiguously right-wing) viewpoints will be accused of betraying the scene/faith by
* in general classified document; there's a much shorter list of people allowed access to each document's "compartment". For instance, there might be a compartment for all documents relating to the shiny new jet fighter that the Air Force is developing, and then subcompartments for each component. This often goes along with the notion of "need to know", i.e. secrets should only be revealed to people who have an acceptable reason for needing to know about it (the engineer designing the jet fighter's radio probably doesn't need to know about its engines, and vice versa). There's also the sub-classification called NOFORN, which means that anyone who the security rules would classify as a foreigner (such as non-US citizens and US citizens in the employ of a non-US based company) is not permitted to see this information no matter what their clearance level is.

* In general, expect either the victims of fairy-tale curses, or a random guardian spirit, to know the precise details of the loophole with no explanation given.
* In general, for every good creepypasta there are at least 10 written by people who have no idea what they are doing. You can often recognize them before even reading them. They tend to be of the "haunted video game" variety and usually involve lots of "hyper-realistic blood".
* In general, for the purposes of any story event, the game assumes you've summoned whatever Servants are convenient. For instance, the Agartha arc involves the premise that Astolfo, d'Eon, Fergus, Heracles, and Drake have all been summoned by you at some point and their disappearance is significant, even though it's very likely to get to that point in the story with pretty much every character on that list except maybe Fergus absent from your Chaldea.

* In general, it’s not a reliable rule; all of the main villains are very attractive, as are a decent number of minor villains. But it should probably be noted that aside from DIO, the characters said to be the most attractive by characters in-universe are the good guys.
* In general, it is made quite clear that magic is more than just a wand and an incantation; you have to be a wizard to use magic.
* In general, it's been proven that we're pretty easy to fool in this regard. A newer type of prosthetic limb channels physical feedback from the prosthetic to the stump. It doesn't take long for your mind to associate that stimulation with your prosthetic to the point that it feels like your actual limb. Also, VR can make you think a virtual image or a displaced image of something else is your real body. Our brains are built ready for cybernetic upgrades.
* In general, it's difficult and inadvisable to use the ground route to the enemy faction's territory; their heavily guarded. Using flying mounts is the de facto way but stations friendly to your faction are far less common in such areas. (Or nonexistent in the heavily populated areas.)
* In general, it's missing the point to complain about biological inaccuracy in
* In general, it's not possible to transport through a ship's deflector shields. Usually this is used as a way to add drama — with the ship having to drop its shields briefly in the middle of battle in order to beam back an away team — but it also means transporter-enabled boarding parties aren't a major part of battle tactics.
* In general, it's not so much that humans are the most enduring per se in terms of muscle fatigue, but that, thanks to sweating, we have the best heat endurance. We can also warm or cool ourselves fairly quickly by switching up the amount and type of clothes we put on our mostly hairless bodies; animals obviously can't simply take off their fur when they feel like it. That's why African wild dogs normally hunt at night, when it's cooler. Panting isn't nearly as effective as sweating for keeping body temp down (whole body surface area evaporation vs just the mouth) and so most species will suffer heatstroke and "cook" until their organs fail if forced to keep going in heat. The disparity is greater in hot environments, of course, but anywhere if the pace is high enough body temp becomes an issue. The downside, though, is that it uses a lot of water.

* In general, no matter what level you are, any Pokémon you catch will always respect and obey you since you proved yourself by capturing it. Pokémon you receive in a trade will very likely disobey your orders in battle unless you have certain badges. In a lore building sense, traded Pokémon would be wary of you and don't trust you since they were basically given away to a stranger. The badges are proof that you are a strong Trainer, thus the traded Pokémon will respect you. From a gameplay perspective, traded Pokémon disobeying players is a way to prevent them from cheesing the game early on by stomping everything with a high level Pokémon until they get the appropriate badges for their level.

* In general, once the Foundation has analyzed something to the point where it's completely understood, they arrange for what they've learned to be released to the general public, since at that point it's no longer considered to be paranormal/anomalous.

* In general, overusage of chakra has this effect. As chakra is essentially life-force, using too much can dip the user's reserves below the minimum that their body needs to function correctly, causing heavy exhaustion and even internal damage; Tsunade is actually rendered comatose after expending nearly all her chakra to shield the village's populace from Pain's city-flattening gravity attack. Kakashi explicitly states (at least in the English dub) that if you use up absolutely

* In general, people who either engage in egregious misbehavior or have a long history of idiotic, destructive, predatory, or generally unacceptable behavior that they have repeatedly been spoken to about to no avail can expect to receive bans from any well-run con (sometimes revocable if they can present a good case to the board and come back on a probationary basis, almost always irrevocable in the event of extreme or heinous misconduct, or after multiple failed attempts to clean up their act). Failing to abate or attempt to abate bad behavior is bad for business on multiple levels - failing to ban patrons who damage or steal property, leave gigantic messes, walk around intoxicated in public, or get into violent altercations with others will piss off hotels (who do talk, and if word gets out that you don't control your patrons, you may find yourself banned from an entire geographical area), while failing to ban known creeps or predators invites bad PR through fandom circles and can scare off vendors and guests. Cons that fail to take a hardline stance on bad behavior usually find themselves experiencing a slippery slope that leads to some sort of major incident, and occurrences like Rainfurrest 2015 (mentioned above) are almost always rooted in overly permissive policies that allow persistent bad actors to continue to attend.
* In general, Phase 3 is seen as having fixed many of the problems that most of the films in Phases 1 and 2 had, namely their forgettable villains and
* In general, pick pretty much any B horror film where the plot involves a bunch of people breaking into a haunted building for a night of drunken debauchery, only to be menaced by some flavor of monster. Odds are good that actually gaining entry into the place will be trivial, even if, in theory, it should be secure.

* in general, probably because a cat's meow is at about the same frequency of a human baby's cry. In general, communication between cats relies mostly on body language, but seeing as we humans (from cats' point of view) fail at body language, cats resort to vocal means of grabbing our attention, hence the meowing they don't even use between each other.
* In general, rare Pokemon will have a lopsided male/female ratio — hence the population having the potential to dwindle with time. The fact that they still exist at all is accounted for in some cases (like Relicanth) by natural longevity and others (like the starters) are implied to be looked after by humans since they're essentially hovering on the edge of extinction. Presumably some other cases just breed like rabbits. Other rare species like Lapras are noted in-game to have been poached extensively by humans.

* In general, Soviet Cold War weapons had coded locks (Permissive Action Link), requiring authorisation from the top commanders to be armed. During the Cuban missile crisis however, there were missile carriers capable of independent launch of armed missiles.
* In general, stoicism is a very good idea if you're a human in the 40K-verse. Not only will it help you get through the horrors of day-to-day life in the Imperium, it is also the only way to not feed the Chaos Gods.
* In general, Summon Spirits, like Efreet, Gnome, Undine, and Sylph have almost never looked the same from game to game, though they hold on to certain themes (Efreet is a demonic burning beast, Sylph is a fairy, etc.). Gnome notably changed from a legion of lumps of dirt (
* In general, superhero comics and other superhero-related media will often show their own fictional, yet still iconic, monuments being damaged instead of real ones.
* In general, supernatural forces of good take a hands-off approach, letting humans do anything but intervening to counter supernatural forces of evil in order to preserve free will. Mortals working for good are not subject to any such restrictions.

* In general, the film seems to interpret anything where the gods would be involved as a metaphor or exaggeration. This isn't too far from how some historians view it, with a common reading being that any kind of major feat or unlikely event would be credited to the gods - for instance, a passage going something like "Athena blocked a spear thrown at Achilles" could be read as "the spear thrown at Achilles miraculously missed him."
* In general, the forces of Chaos are locked in the four-sided variety of this trope. There are four Chaos gods, and a given Chaos warrior is aligned with one of

them and opposed to the other three. The key is getting the four sides to stop fighting long enough to actually accomplish something. But hey, at least they get an army of Demi-Gods by feeding thousands of raw recruits to their chosen champions.
* In general, the Foundation has encountered enough anomalies like SCP-055 to have a term for them: "antimemes," ideas that discourage or prevent people from spreading them.
* In general, the game will skip certain cutscenes you've seen before. For instance, you can skip Mettaton's opera scene if you've seen it at least once (Mettaton will note that you look bored and ask if you want to skip ahead). If you die while facing some bosses, the game will let you skip the first part of the boss battle in favor of going straight to the meat of the fight when you retry. This applies across all future playthroughs, too, so you don't have to see the cutscene if you already know what's coming.

* In general, the Hand of the King was supposed to serve this role for his King. Various Hands had varying degrees of success.
* In general, the introduction of DVD kicked off the release of movies to home video in widescreen. While there were a few widescreen VHS tapes released in the 90's, they were usually considered a specialty item that was often very difficult to find in stores (and even harder to find rental). There were also many widescreen laserdiscs (as they were the serious film collector's format), but it wasn't until the DVD format came out that widescreen home video started to grow in popularity, and even then it took the introduction of widescreen televisions to finally begin to kill off pan-&-scan. (However, it is still common to find stores selling the "fullscreen" version of a film, especially if it was intended for children, an open matte version of a film, or in extreme cases with older films, the fullscreen version is the only one that still even exists, the widescreen version likely being
* In general, the many cool fighters from the Tournament of Power got fans who like to imagine backstories for many of them.
* In general, the more evolved units of each type (artillery, gunners, spearmen, light infantry, heavy infantry, light cavalry and in some games heavy cavalry + archers) are this to their basic versions. For instance, the Armored Sergeants in
* In general, the more powerful a spell is, the longer its activation incantation is. Powerful combat spells can take many lines of Ancient Greek or Latin to invoke, and the most powerful magics can actually require dozens of minutes of chanting. Negi takes advantage of this in one fight: he and his opponent both start incanting at the same time, but Negi's spell is slightly less powerful, with a shorter incantation, and therefore activates first, punching through his opponent's before it can fully manifest.
* In general, the Myrmidon and the Swordmaster classes are portrayed as unparalleled fighters known for their speed and grace. In addition to wielding all types of swords, several games grant them either extra critical hit rate and/or damage output to complement their status. Since the inclusion of skills, the Swordmaster class is associated with the

* In general, there are a lot of monsters that either can't be destroyed by card effects, or can't be targeted, are unaffected by them, or can negate effects that would harm them. This is so prevalent that the most common form of removal now are monsters that tribute the opponent's monster - since the tribute is a cost, negating it won't save them, they don't target, and they don't destroy.

* In general, the theme of Chaos is that many think they can control it or they will not fall to its addiction. Many are horribly wrong. Freedom fighters pray to them to grant their boon, not knowing that they invite mutation and possession into their bodies. Psykers are tempted with control and normality but instead are commandeered by daemons. Even entire chapters of Space Marines (most notably the traitor legions and, more recently, the Astral Claws) thought they were doing what was right in defying the Imperium and protecting innocents, only to be branded as heretics and hunted down, ironically forcing them to turn to Chaos to survive. Few are the number who can use the powers of Chaos without losing themselves, and fewer still are the ones who don't eventually succumb to the temptation.
* In general the Trials books are a lot better at acknowledging that other books

in the series outside of the Classical Mythology ones exist after the last series did not acknowledge them at all outside of easily avoidable short stories.
* In general, the two most plausible endpoints tend to be seen as the end of the Pilaf saga, and the end of the Saiyan saga, both of which have had Toriyama claiming that he had an ending planned (in the case of the Saiyans, he even suggested "
* In general, the wealth in a character's background isn't permitted to grant unbalancing resources, especially in the beginning — and in a less well-balanced charge, what the game rules give the GM can take away. It's easier to justify this, and the choice of adventuring career, by defining a mage character as a peasant-born poor apprentice.
* In general, the whole point of the series is that all those ghosts and monsters stories have been told about are real...and like any real thing, they can die if you know how to do it. As quoted in the foreword...
* In general, they merge the roles of every eastern and central European power bloc that faced off with the west, whether they be the Central Powers, Axis, or the Warsaw Pact. The fourth game explicitly refers to them as "fascists" however, and in a rare conversation with enemy soldiers, its men have reactionary views on women. It doesn't stop the Soviet influence they possess, however even if the Soviet Army in the second World War made more frequent use of female troops than any other.
* In general, the Younger Races' hyperspace technology is directly or indirectly derived from study of the ancient jumpgates left around by the Vorlon, depending on wherever the various races found a Vorlon jumpgate in their system, received it by someone else who already had the technology, or, in at least one case, based it on a jumpgate built by a Younger Race (the Dilgar, who had an Abbai-built gate in their system).

* In general, this can happen in games when an enemy or other character which is ugly, disgusting, etc., gets too close to the in-game camera, such as zombies getting right in your face in a game with first-person perspectives.
* In general, this happens to the Van der Linde gang over the course of the game. Four members are dead/dying as a result of the Blackwater heist and subsequent escape before the start of the game. By the end of the game,
* In general, this is a common feature of many boycott campaigns. If a pressure group sees a business or service as engaged in behavior (mistreatment of employees or animals, environmental destruction, support for controversial political, religious, or social causes) that goes against their values, oftentimes they will point to an alternative company that provides a similar service without the parts that they find objectionable, and recommend that people buy from them or use their service instead.

* In general, this trope is a large part of the play's structure and story, and as such comes up on a fairly regular basis throughout the show.
* In general this trope is also defined by cultural dissonance. In some parts of the world criticizing your own country is so common that it's hardly frowned upon (for instance, the United Kingdom). In others (like the U.S.A.) it can still cause a stir, despite the U.S.A. having the right to freedom of speech protected by the constitution.
* In general, this trope is invoked by the (Literature) girl, and recognized by this name by the boy (Hidenori).
* In general, this trope is very popular in romance and shipping fics.
