* is about Aizawa's decision to expel the class that got into U.A. after Mirio's class and before Midoriya's, as well as the fallout of that decision. Nezu, unable to reverse the expulsions but unwilling to deal with such a situation again, makes a deal with Aizawa, allowing him to expel one person per year- the lowest ranking person on the Quirk test- and requiring Aizawa to get Nezu's approval before expelling anyone else. As mentioned above, canon worked out differently, with Aizawa getting the ability to perform temporary expulsions as a condition for becoming a teacher at U.A.
* is about an alien—who has a prehensile dick with Naughty Suction Cup Tentacles at the base—getting involved with a human.
* is about an American writer who gets embedded in a British hooligan group.
* is about a woman awaiting the return of her samurai husband from the battlefield. Gackt sings the lyrics from the woman's perspective while playing the role of the husband in the video.
* is about a world in which homosexuality is the norm and a heterosexual teen is bullied by her peers.
* is about a world where people have a chip in their eyes that provides augmented reality.
* is about Jacob and the Man in Black recruiting the Losties for a final conflict, and finding out the true purpose of the Island.
* is about the arrival of the "Freighter Folk", who are supposedly offering rescue, while flash-forwards
* is about the staff of a small town fandom convention, and much of the comic takes place at both their con and others.
* is about to be cured of his homosexuality, there is talk of him getting back together with Kel. There is no mention of this in earlier chapters.
* is about to blow up. Cue Prison Island exploding, to which Alfred responds with repeat shouts of "OH MY GOD, I DIDN'T KNOW!" as the rest of the cast laughs.
* is about two African children befriending a very old woman, an outcast who is accused of being a witch.
* is a boys' manga), and it's especially jarring to see a female character next to a male one with fully visible teeth, a tongue and a uvula.
* is absolutely gigantic" than strictly clandestine, however sigil-free and unidentifiable he and troops may officially be.
* is a bully who gives a speech about how repulsed he is by the thought of people being gay. His actor James Stephen Walsh is bisexual.
* is a chicken-drumstick-shaped imaginary friend (Kids stuck in diet camps can get rather single-minded, it seems).
* is a Chilean animated film for adults, covering 12 hours in the life of Carlos Meléndez, an unemployed man who seeks work and respect, surviving multiple adventures and humiliations. The film premiered in 2003, at a time when Chile was

going through a serious economic crisis and therefore there were many unemployed people in the real world, which for many hit too close to home, in addition to the consciously ugly and even grotesque aesthetic alienated the public that was not used to animated films that were not for the whole family.
* is acknowledged that women also like hard rock bands or artists, they will typically prefer the ballads over the rockers.
* is a comedy set in a world plagued by zombie outbreaks. Zombies are very Romero-like in their actions and their desire to consume flesh — although the human population treats the zombies more as an annoyance than a threat.
* is a comic about a woman turned into a (fully aware) statue for a week for spying purposes and must keep herself sane.
* is a county (administratively speaking). Similarly, within the state of Maryland, the city of Baltimore is a wholly separate entity from the Baltimore County which surrounds it.
* is a creator diety known as Azatoth who is responsible for creating our universe, but he's not sentient in the traditional sense, and exists as a formless mass of chaos outside physical reality. He's refered to as the "Blind Idiot God".
* is a crime, but there is no butler. Or there is neither. Or the crime is stopped before the butler can commit it (which would be worth nothing, in contrast to the other examples).
* is a crucial clue to the innocence of two of the three suspects. The message was left in Braille on a Go board, complete with situations impossible in normal play. One of the suspects could read Braille, and the other was a Go expert; both would have recognized that something was amiss. Consequently, the one suspect who could do neither is the culprit.
* is acting disrespectful. This is just when they are on guard duty. The rest of the time they can do anything that anyone else in the Army can.
* is actually a tribute to his thought to be dead brother Sabo (whose Jolly Roger was a crossed out S).
* is actually mistake them for human. Unless from a (hopefully safe) distance.
* is actually one of the most basic and useful maneuvers in Air Combat, as it allows you to force the enemy to overshoot without giving them the speed advantage. As a faster plane can use its speed to escape to a higher altitude (and the reverse also holds true), you don't want to go any slower than you have to. Thus, the barrel roll is one of the simplest examples of an "energy conserving" maneuver, meaning that you force the enemy to either give up some speed or some altitude to stay in the fight, while you keep yours.
* is actually Satan, but it is unclear if she was always Satan, or if Satan corrupted her.
* is actually Turbo, a character from an older game who's an arcade cautionary tale about why not
* is a currency system, but it runs on emeralds, not gold. Emeralds are still very rare and hard to obtain through mining, although easy to trade with Villagers. Gold can only be traded for emeralds with a few Villagers, and the exchange is pretty poor considering gold's rarity (especially when you can trade wheat or gravel for the same amount).
* Is a demon limited to just one body at a time, or can it possess more than one?
* is a detailed origin explaining how all that knowledge ended up there. Actually, there are two:
* is a dieselpunk game, complete with airships, anti-gravity dogfights, and diesel-powered mechs.
* is a documentary about a former neo-Nazi with violent and racist tattoos all over his body, most notably on his face and neck; the documentary has him and his wife talking about their histories in the White Power movement between segments of him having them removed (which wound up taking about a year and a half).
* is a "Doofus Jerry", who captures Jerry Prime and Doofus Rick and becomes the Big Bad of one storyline.
* is a dream claims to have had, anyway, during a seductive speech he makes to Helen.

* is Adrien, and to decide to step up the flirting, as payback for all the times Chat has flirted with her during battles. In subsequent chapters, Adrien's reaction has been a mix of confused, embarrassed, and flattered.
* is affected by the laws of physics, as he has to be careful not to push too hard or his brain might start coming out of his ears.
* is a flash quiz game, where the player picks the most gentle option of something shocking. Usually deflecting blame onto something else.
*) is a furry. Notable for being one of the longest running (and by longest, we mean it updates maybe twice a year) crossover series on the net.
* is a gag-per-day comic that uses heavily manipulated photographs as the art.
* is a game in which the very objective is for the player to get all of their titular crew members killed by attempting (and failing) away team missions.
* is a giant doctor at Sacred Heart, who punctuates these scenes by complaining about J.D. borrowing his coat without permission.
* is a good way to gauge what the current "big thing" in anime is at that time. Observing it can help a cosplayer pick something that won't get lost in the flood but is still recognizable so as to get enough attention to get photographed, or to go with the flow but find some way to make it pop (usually by making it better in overall quality and likeness and doing one's best to be in character). This tends to spill over into any cosplay events that a Con will hold; to continue with the Otakon example - the current popular Anime choice for cosplay will often get the lion's share of skits and performances during its Masquerade event. Naturally, this is starting to change - but the effect is still strong enough to be noticeable.
* is a grid of numbers from 1 to 100. The exact question is randomly chosen, one of which is simply "LOL". The answer is, of course, 69.
* is a gun, and he carries his favored weapon in his right, he's basically dual wielding at all times, even if he doesn't usually use both at once.
* is a guy in the Japanese versions. Saharah, the camel who sells wallpaper and carpets, is as well, though she only wears a vest and her only feminine feature is long eyelashes, so she doesn't count as this.
* is a heavy blaster cannon that was originally mounted on a speeder (before he ripped it off).
* is a High Lord, and the Lord Commander Solar, who is the Militant Commander's highest-ranking officer and usually also on the Senate of the High Lords. There is also, so long as a Primarch or their successor present to take the role, the Lord Commander of the Imperium, who is usually Primarch Roboute Guilliman, though this rank was disbanded after the coup called The Beheading. Guilliman reinstated it later, and holds it in the 'present time' of the 40K timeline.
* is a hilarious superhero-based Photo Comic acted out by author Martin Skarzynski and his pals.
* is a Human League song now, even if the original hit version wasn't.
* Isaiah 9:6: "And he shall be called Wonderful Counsellor, Mighty God, Everlasting Father, Prince of Peace..." (Although the Book of Isaiah never mentions Jesus by name, most Christians interpret its prophecy of a Messiah to be about Jesus.)
* Isaiah Mustafa, the Old Spice Man, whose commercials were specifically meant to be as crazy and appealing as possible.
* Isaiah Whitlock Jr. auditioned for the role of Lester Freamon before being cast as Clay Davis.
* is a kernel of truth to this story, development on Raggedy Ann had already been finished by the time Marcella died (in fact, Gruelle had filed his patent for the dolls months before), she was never intended as any kind of warning about vaccines, and there's no proof that Marcella's fatal infection after her inoculation was anything but a tragic coincidence (at most, the vaccination led to the infection, something that was unfortunately a legitimate risk in those days).
* is a kind of chess with 3 players playing against each other. However, an alliance is automatically formed if two players gang up on the third.
* is a light tank (namely, PT-76 amphibious tank) with somewhat reduced armament and other non-essential stuff thrown out to free enough space for a squad of

infantry.
* is all about the interactions between a Chinese and a Dutch in the 17th century.
* is all about this trope. It explores the evolution of the portrayal of Native American people in Hollywood movies.
* is all grown up. So, we add to the list "General Attea, Princess, Scion and Teen Supreme of the deathless Incursion Empire, Highest Commander of the celebrated Calaveras Legion..." and so on.
* is almost exactly the same way. When they have to get inside the Caspar core, its entire inside is covered with post-its, with almost no space left free. At least one reads "Ikari! YOU JERK!"
* Is also a valid tactic against lower-ranking commanders (warlords and the Chief Warlord) since they give a bonus to all units lead by them, in the case of the Chief Warlord they also give an additional bonus to all units of the side and yet another to all units in the same hex.
* is a major part of their language. We can get by without it, but they can't.
* Is-a-Man has Annie Singing Bear taking revenge on four Mexicans who raped a member of her tribe. She kills three of them and the fourth, who shows cowardice rather than fighting her honourably, she castrates.
* is a martial art: if you speed up the movements, Tai Chi practitioners are dangerous combatants.
* is a master chef being forced to slum it by cooking in the ridiculously unpleasant city of Krapton on the even more unpleasant planet Dizmol thanks to trouble with the local mafia family. But he makes the most of it by serving top-tier seafood with an unfailingly cheerful, upbeat attitude, and his delicious cooking and positive outlook on life endear him to Lapis the moment she meets him.
* is ambitious, though. It's just that these ambitions are directed toward elevating the McKinley High Glee Club as high as possible, rather than making money.
* is a medical doctor and continued to worked as such after becoming a pop star.
* is a medical student who thinks Darryl might be ODing on heroin. (He's not.) Still doesn't make sense; if Tim's far enough in his studies, he should know it won't work. If he's not that far, then he shouldn't be trying.
* is a modern suporter of Watkins who claims to have found evidence for the proposition that the ancients built long straight roads, arguing that the Romans were simply improving on tracks and roads already created by peoples they conquered, especially in Britain.
* is a modest ARG about a cult, its insane leader, and the people he victimizes. Better than it sounds, and currently enjoying a new life. The game has since moved into the real world, with a contact phone number listed and a package being forwarded.
* is a more fleshed-out version of the concept, set in a universe consciously modeled after Flash Gordon and 1950s-era Young Adult science fiction stories.
* is a more valuable treasure than any fish and snagging it helps with the litter problem since you're recycling the bottle.
* Isamu does this to at least one other pilot in the opening sequence of
* I Samuel 15:18-23: King Saul is chastised by Samuel because he had spared only one Amalekite, King Agag (whom Saul viewed as a strategically valuable hostage), as well as the sheep and cattle which were valuable. God had commanded Saul to kill them all. For this, God officially rejected Saul as king of Israel, to be replaced with David.
* I Samuel 2:27-36, Eli is chastised by a prophet of God for not taking strong measures against his sons Hophni and Phinehas for abusing their positions as priests before God — the most that Eli did was warn them, and that was it — and for that, not only did Eli lose both his sons in one day, but also his family line was cursed.
* I Samuel 25 records the story of Naval, whose name means "villain".
* I Samuel when meeting Samuel for the first time. Saul is looking for a prophet of God and goes to a town where one is reputably staying. Thinking that he is just a citizen of the town, Saul approached Samuel and asks where the prophet is. Samuel

informs Saul that he is the one for whom Saul's searching.
* is an actual piece of merch made for the film. And it records up to 60 seconds of audio!
* Isana Konoe is implied to be 1/8 tengu. Honoka might be as well, but she hasn't shown the ability to manifest wings.
* is an albino alien mobster who regularly terrorizes and bullies the citizens of Krapton, and a boorish thug towards everyone outside his immediate family. The narrative draws a lot of attention to his blood-red eyes, and his youngest sister Su mentions to Lapis that his parents were hoping to exploit the genetic quirks afforded to him as an albino to make him scarier to the people he extorts.
* is an all-animated vlog channel made by Combo Estudio. While the videos themselves are Portugese, there are subtitles in English and Spanish for most videos.
* is an awesome way to teach children to thrash in water, develop a phobia, hate water/swimming/you or drown, though. Then again, there are those people who think it worked well enough for them.
* is and quick to educate the ignorant on Why Not To Annoy Deities 101. He has utterly terrified the above Custodes just by cracking bad jokes about strippers at them, leaving them traumatized even when he was going to let them pass anyways, and effortlessly evicted an entire Chaos Warband from his library after toying with them for a few minutes.
* is an eccentric who knows a lot of FX tricks.) It's really more annoying than creepy.
* Isane Kotetsu is prone to waking up and yelling something about fish.
* is an entire planet made out of a fish bowl with one single resident named Wallace that takes up a large chunk of it.
* is an evil witch's apprentice and lover, and a demon worshiper, and she has nice cleavage.
* is an example of other guys wanting Sasuke and Sasuke in turn wanting Naruto.
* is an extraordinarily brilliant wizard, who only uses his genius and talents to make his life easier.
* is angry about Rin walking away from the exhibit and Hisao questions whether the commitment is worthwhile, Nomiya asks Hisao if he has anything comparable to Rin's passion for Art. Hisao, who may or may not have left the club by this point, based on player decisions, silently concedes that the answer is no.
* is angry at Moliere because he stole a whole scene from one of Cyrano’s plays.
* is a Nigerian slang term referring to an idiot who's easily led by a conman. Donald Trump, who popularized the phrase and its acronym, has long been accused of being a conman by his opponents, and the journalist who discovered the Nigerian meaning of MAGA did not let it go unnoticed.
* is an inherently evil act, though careful users can avoid falling to Evil themselves through their choice of lifestyle and victims.
* is an Ionian accent, or whether Rimmer sounds different in the alternate continuity of the novels, is never quite made clear.
* is an obscure 90s film where the child protagonist ends up on his own and must battle three silly villains all with the help of a… remote control! Or, being more specific, with a variety of remote-controlled toys that the kid (who has an obsession of collecting them that his parents are fed up with) had to hide within the model home that the villains have taken refuge in (and thus he is trapped on).
* is another non-linear one, a comic presented as a series of profiles for people, places and things, with links beneath explaining their connection.
* is another story in which Akane slides from tsundere to jerkass, and Ranma abandons his old life and identity to live as a woman.
* is a novel in 52 chapters, beginning with only words that start with 'a', and then 'a' and 'b', up to chapter 26, where all the alphabet can be used. From chapter 27 to 52, the letters words can start with recede back to 'a'.
* is an overall nature spirit or "hive mind" is up to discussion, metaphysics, and theology, and different people from all walks of life will have different beliefs

regarding this, to the point where the Earth is a deity or otherwise a host to an "Earth spirit", to where the Earth isn't alive (other than life forms on it) and that no supernatural side of things exist.
* Isao Kobayashi and Kyoko Kimura were not above working together as a tag team. Especially not if it provided an opportunity
* Isao Machii holds world records for a number of iaido stunts, including "most martial arts sword cuts to one mat (suegiri)," "fastest 1,000 martial arts sword cuts," "most sword cuts to straw mats in three minutes," and "fastest tennis ball (708 km/h) cut by sword." He can also cut airsoft BBs out of the air.

* Isao Takahata. In Diana's case the tails are braided and worn in rings on each side of her head.
* is a painting by Jan Matejko that depicts a royal jester who is distraught at the news of the Russians invading the city of Smolensk while the nobles behind him continue their party.
* is a partial example; the backgrounds are photographs, but the characters themselves are hand-drawn.
* is a persona passed down from one wizard to the next. He was the last Mr. Black during the war on Grindewald and believes Harry must become the next Mr. Black to defeat Voldemort.
* is a photographer, although there's a moment in one episode that briefly features him and she seems to go from ecstatic to dejected.
* is a play about two filmmakers who win a contest to make a fan film at the Disney Studios.
* Is Appa the last air bison? Heck, did Aang and Katara become the Adam and Eve for a new race of Air Nomads?
* is a princess and the Prince Consort must have good genes and a good history for the sake of the realm.
* Isard's Revenge, Prince-Admiral Krennel decided to deliver the survivors of a small New Republic force to a neutral world if they swore not to fight him, because he was working on his PR.
* Isard's Revenge, the New Republic moves to liberate the Ciutric Hegemony from the control of Prince-Admiral Delak Krennel, using Krennel's murder sprees — his killing of Imperial Grand Vizier Sate Pestage and over a hundred members of his family in order to usurp control of Ciutric and its associated worlds, and later other purges committed to keep himself in power — as justification for targeting him.
* is a reasonable height of 175cm (5'9") but is a full meter shorter than even the children of the alien family that "adopts" him. Despite this, being kicked by the father feels like a young teen punched him on the arm and he can send said father flying with a shove. Later, he even breaks through a metal door on a space ship using a tub to batter it off it's hinges. Once things heat up, the human protagonist can basically ignore anything that isn't an anti-tank gun and can leap several meters at a time due to the lower gravity.
* is a relatively new invention. It often comes with an immunity to anything not made of silver. Most werewolves that don't have the silver weakness can be killed by any type of weapon, including silver. There is even at least one myth were a werewolf can be forced to return to their human form simply by scolding them.
* is a remix comic using the Pokémon Special manga. This one tends to edit the art to a degree as well.
* is a role-playing book based on a warehouse run by Secret Masters. Steve Jackson Games also calls its online store "Warehouse 23".
* is arranged to marry Optimus by the Senate in an attempt to keep tabs on him. It fails when Ratchet finds himself genuinely falling in love with his new mate.
* is arrives back to the Solar System, pursued by Duras, Archer is surprised to see system defense ships quickly react to the invader. They might not be equipped with Warp 5 drives, but you can do with Warp 3 when you don't have to leave the system.
* is as bad as we're told, but the visit goes off well thanks to someone who wasn't

in on the plan.
* is a series of webisodes by Seinfeld and George Costanza impersonators that takes this to exaggerated extremes.
* is a set up intended to make everyone vote Kyoko Kirigiri as the culprit, set up by the Mastermind themselves since she is potentially the biggest wrench in their plan. And it likely would've worked if the Mastermind had killed Makoto to frame Kyoko as was initially planned, instead of them being forced to improvise after Kyoko intervenes in the scheme.
* is a short film that is somewhere between a documentary and a mockumentary, and is built on this whole idea.
* is a show about enormous men that break everything they can WITH THEIR BARE HANDS!
* is a side to Zapp that doesn't disgust her, his normal personality is so repellent that she just doesn't care.
* is a slice-of-life about Bernie and Z, and their life as multiple (and Z being a trans woman.)
* is a slightly atypical post-Civil War "Team Iron Man" fic- in the backstory, when the team was just beginning to hash out the Accords, Bucky was there, apparently deprogrammed and with his triggers removed, until Natasha argued with Steve a little too harshly, which tripped some protective instinct and resulted in Bucky killing her (!) and rightfully getting convicted of murder and going to prison for it. But Steve doesn't seem to harbor much grief over Nat's death, and seemingly disagrees with Bucky's prison sentence. There were some comments when this was first revealed expressing that this seems out-of-character for Steve, to which the author replied that Steve has his reasons, but those reasons beyond the implied "Bucky's not with me" were never explored.
* is a space plane, but rather a high-altitude and high-speed reconnaissance plane. Air Force Chief of Staff General Curtis LeMay preferred the SR (Strategic Reconnaissance) designation and wanted the RS-71 to be named SR-71. Before the July speech, LeMay lobbied to modify Johnson's speech to read SR-71 instead of RS-71. The media transcript given to the press at the time still had the earlier RS-71 designation in places, creating the story that the president had misread the aircraft's designation.
* is a speciesist on top of that, but he's utterly dedicated to his job as a sector governor in general and upholding the law in particular and will take any measure he deems necessary even if he finds them personally unpleasant.
* is, as she is shown to be very skilled in fashion and often mystery-related topics as well.
* is associated with the lead, but the featured artist rapidly falls from popularity, taking memory of the song with them.
* is a step that makes a slight click sound when stepped on. It does nothing but anyone who hears it reflexively jumps away from it, right into an actual trap.
* is a subversion. The Wizard believes what he's saying, but it's only later that the audience finds that he has his own ideas about who qualifies as a "citizen of Oz"
* is a tank and not an APC, despite its rear door, which is there to allow the tank to be evacuated or resupplied under fire. The tank does have the potential to carry troops in an emergency but the ammunition magazine has to be emptied to make room for them.
* is a terrifying example of one of these. He doesn't care. He doesn't relent. He doesn't apologize. He just wants blood. He doesn't care who bleeds.
* is a time loop wherein several characters always start out as schoolyard best friends in a sleepy little rural Japanese town called Hinamizawa. Each cycle of the loop starts out sickeningly cutesy - playground hijinks, characters making nonsense noises ("nipaa") and other characters gushing over how adorable it is, and typical melodramatization of the mundane
* Isati of the divine Abyssinian pantheon is a feline equivalent. Much like the similarly ancient Golden Scepter and Mzazi, she can assume a "casual"-looking divine form when around mortals, but her true form is described as a huge (though

smaller than Mzazi, who's older than her) and ancient saber-toothed lioness whose mane burns in a shape that makes her head resemble the summer sun, while her tail and fur also burn constantly. However, as is the case with most ancient divines, she is a very benevolent, motherly, and even playful individual who loves both her divine and mortal children,
* is a traditional name for them, but has changed meaning, so the Phantasy Spelling is used to differentiate dragons from the mundane invertebrate type of worms.
* is a tribute to late 30's action/adventure stories with the cast on a remote South Pacific island.
* is a tribute to old Sci-Fi series with the cast exploring space in a retro-futuristic.
* is attacked. She has her gun where she can snag it with a towel that's at hand.
* is. At the end of the episode, the resolution is deliberately left unclear. It may be that the Asgard fixed the problem, but Daniel wonders if it's possible that a higher power did intervene.
* is attracted to Shinji in Yui's body. The only exceptions seem to be Gendo (who's furious that Yui didn't really come back) and Fuyutsuki (who still sees Shinji as Shinji).
* Isaura the Slave (2004): In the previous adaptation, Rubens de Falco played Leoncio Almeida and Norma Blum played Malvina. Both actors return to portray Commander Almeida and Gertrudes, respectively.
* iSaved Your Life wants Freddie for herself, and any previous acceptance of Carly/Freddie is replaced by her own feelings for Freddie.

* is a very successful student, prefect, and Head Boy, and what's shown of his duelling gives the impression he didn't neglect practical studies either.
* is a war game, well&#65533;). Here, Twilight also has to learn how to be a leader.
* is a webcomic illustrated with photographs of bootleg action figures of Marvel comics characters.
* is a webcomic with the 4 colors of printing (Cyan, Magenta, Yellow, and Key) personified. Naturally, all characters have their color hair and eyes.
* is a well-known fan video that uses skillful choreography and special effects to create a live-action lightsaber duel. After overwhelming fan response, Ryan and "Dorkman" proceeded to film a rematch, this time with a score composed (for free!) by film composers Gordy Haab and Kyle Newmaster. The fact that the lightsaber fights is better than the ones in the movies... they deserve it. Even better? They were helping with the movie fights, and this is the stuff that they were not allowed to do!
* I Saw Grayson Kissing Santa Claus for no other reason than screwing with their family. He's so dedicated to it that he even dresses up as a Santa with horns and a sack with a fake arm hanging out of it on Christmas Eve, and breaks into the manor just to keep up the ruse.
* I Saw Grayson Kissing Santa Claus: For not just causing the events of the story but also escalating them, Alfred forces Jason to spend Christmas with the family. For Jason, who did all that for the sake of trolling said family, it's the worst punishment he could ever receive.
* "I Saw Her Again" by The Mamas and the Papas. A song about someone who's stuck in a relationship with a girl who he doesn't love but keeps stringing along because "I'm lonely, too."
* I Saw Her Standing There, Mya warns Edric to stay away from Alayne Stone, because Littlefinger will have something to say about it. And it wouldn’t be nice.
*) is a whip-wielding magical girl who has to defend Crashtown from the forces of evil.
* I Saw Mommy Kissing Santa Claus, Cole and Dylan Sprouse alternated playing the

main kid in order to get the film finished quicker without breaking child labor laws.
* "I Saw Mommy Kissing Santa Claus" was sung in 1952 by Jimmy Boyd. It has been covered so many times that multiple versions have Covered Up the original, however it is most associated with

* I Saw the Devil features a government agent launching a prolonged campaign of vengeance against the serial killer who murdered his fiancee, continuously capturing and torturing him, before letting him go, only to catch up to him again and repeat the process.
* I Saw What You Did: Because of the persona Libby adopts when phones Steve, she assumes that Libby and Steve are having an affair. She attempts to drive Libby off as a potential rival.
* I Saw What You Did has a variant in that the prank turns deadly for the pranksters rather than their target. Two teenage girls make prank calls telling whoever answers "I saw what you did, and I know who you are". However, one of the men they call has just murdered his wife, and convinced they are trying to blackmail him, he comes hunting them.
* I Saw What You Did, Kit and her father are listening to a ballgame on the car radio when the broadcast is interrupted by a report about the body of a murdered woman being in the woods near to where they are.
* I Saw What You Did, Kit and her father are listening to a ballgame on the radio while driving home from Libby's when the game is interrupted by a report about the murdered woman found in the woods, including a vague description of the murderer.
* I Saw What You Did on Libby and is choking her to death from behind. Suddenly there is a gunshot, the rear window of the car shatters, and Steve slumps forward: dead. Appearing behind the car is the state trooper from earlier, who has returned after being summoned by Mr. Austin after Kit came clean to him about what was really going on.
* I Saw What You Did. She runs around when she is supposed to be resting, plays practical jokes on Libby's friend Kit, insists on tagging along when Libby and Kit go to spy on Steve, and then runs away after they get back to the house.
* I Saw What You Did, Steve stuffs his wife's body into a trunk that he hauls out to his car and drives into the woods to bury.
* I Saw What You Did take less than 24 hours, and are probably closer to 12. It starts in the mid-afternoon and ends in the early hours of the following morning. Kit's father picks her up at 11:30 pm, which means that the final denouement cannot occur any later than one or two hours after midnight.
* I Saw What You Did: When Libby is trying to start the car to escape the house, Steve rises up from the backseat and grabs her by the throat.
* I Saw Your Willy features an in-universe example: a photo of a boy's nether parts goes viral because everyone finds willies hilarious.
* I Saw Your Willy follows a boy named Alex who is reminded of the photo he shared online of his nether regions everywhere he goes. Everyone he runs into shouts, "I saw your willy!" and it appears on the news, then he gets texts related to it.
* I Saw Your Willy, to drive home the point that sharing the wrong thing online can be a disaster.
* "I say, open this door at once; we're British!", Sir Jeremy Hodge, "The Perils of Penelope", a brilliantly bad example.
* is a Zuko/Katara fic that revolves around Katara and her infant daughter being kicked out by an emotionally and physically abusive Aang. This leads Katara to run to Zuko for sanctuary.

anything bad. Marie painted on the walls and released snails into the house? Their parents force Wendy to help Marie clean up the mess.
* is barefoot most of the time. At one point she steals boots but loses them soon thereafter. Her curse of having self-igniting blood may help her survive barefoot in snow with no damage. As of the latest chapter, she has the boots back and looks to be keeping them on. According to the author, once Roza enters the big city she'll be wearing light pumps for good. [The fans are displeased.
* is based on a real person, W. H. Smith, who became First Lord of the Admiralty without having any actual experience with any sort of naval command or ship referred to him as "Pinafore Smith" in private.
* is based on BloodyBrandy's challenge and is by far the longest of the series. This one featuring Harry marrying Supergirl....and then every other iteration of her.
* is based on this trope, which is what makes him both such an exceptional spy and a pain in the ass.
* is because he boiled his father Oden alive before shooting him in the head, then caused the events that led to his mother Toki dying shortly after. Though unlike other examples, Momonosuke's desire for revenge is subverted since he's Just a Kid
* is, because it's hard to stand still on one. On the other hand, not only would the Seven Hour War have limited his choices for a replacement, but one that allows the user to run would be very useful for a rebel.
* is becoming a straight example.. Schierke grows a crush on him and her experiences with him change her misanthropic viewpoint that humanity is not worth saving. Even Serpico, who is initially a rival of Guts', slowly grows to admire him.
* is being built, she doesn't make the connection or understand why people are becoming more interested in dinosaurs. Though part of her problem comes from her insistence that dinosaurs are extinct and thus irrelevant.
* is being handled by the Church, though, and includes (in fact, is usually referred to as) testing the licensee's religious orthodoxy.
*) is being kept so secret that Minister of Magic Amelia Bones has the Unspeakable who did the research on "Evan" sent to Station Zebra in Antarctica to investigate Yeti rumors until further notice.
* is better in print, due to Pete's habit of including extra stories made exclusively for the books (most don't even appear on the website!) that often feature characters who are fan-favourites but can't be in the main comic.

* is careful what he wishes for, very carefully wording his wishes so that his Fae Lord enemy has no loopholes to wiggle through.
* is casting, when the author creates banners or pictures for the cast, and generally uses "teen" models or actresses in their early-mid 20s.
* is caught in an earthquake and threatened by a dam spillover ("Moving Mountain")
* is chock-full of this, as the title probably should have clued you in on.
* is chosen as Lum's opponent in the tag game, and during the game she tells Lum that she is never going to let go of her. While she meant that she would never let go of Lum until she could grab the Oni's horns, Lum believes that she is being proposed to, and being unaware of Ryuunosuke's real gender accepts the "proposal". She still wants to go with it even when Ryuunosuke reveals that she's female.
* is chosen to be Lum's opponent in the tag game. While she wins, she is angry at having been humiliated twice, and gives Lum the Kiss of Death—unfortunately for Shampoo, the Oni interpret it as the Kiss of Marriage, and declare Lum and Shampoo married.

When they have to investigate a temple, Shirou suggests Waver Velvet stay behind because if they die, the women Shirou saved will have no one to protect them. Earlier, Shirou forgave a former enemy who nearly killed both himself and his lover after said enemy begged him to save her lover.
* , is definitely this. It pays off for him in the end when he gets with Fluttershy.
* is deliberately kept ambiguous throughout the story. His first appearance has him casually scaring off Jessie and James before giving Ash a Sandile, then ominously stating Ash can "thank him once Sandile proves to be useful", and months later Giovanni asks Ash to mentor his son Silver. A meeting of Team Rocket administrators has Archer mention the group having backing from someone of influence but leaves out any names. So far, all that's definite is that Giovanni is immensely powerful and fearsome, whether he's evil is impossible to say.

* I Second That Emotion": After callously flushing Nibbler down the toilet, Bender gets an "empathy chip" installed so that he felt every emotion Leela was feeling. When the gang got in trouble and Bender was the only one able to help, Leela had to channel her greedy, selfish side to get him to be his former self.
* I Second That Emotion", Fry, Leela, and Bender venture into the sewers where the local mutants live in fear of a vicious monster they call El Chupanibre, which feeds on their domesticated crocodiles, much to their anger.
* "I Second That Emotion", in which Bender is given the emotion chip, so that he feels what Leela feels. At the end of the episode, after Bender saves Nibbler due to his feeling compassion for him, the Professor removes the chip and says, "The chip shorted out! That emotion you felt was your own... no, wait, I'm wrong. It was actually running at triple capacity." Bender responds, "And I still barely felt anything! Good night, losers!"
* I See Dead People: Characters with the ability to see or communicate to ghosts.

* I See London...", Gwen leaves Jamaica with a sunburned left hand. She doesn't know how she got it, but Cody does. While she was sleeping under a parasol, he had a picture of the two of them taken without her consent. As she seemed to be waking up, he made a run for it, knocking the parasol over just so that Gwen's left hand became directly exposed to sunlight for the remainder of her nap. Courtney helps Gwen with her injury by handing her a makeshift salve of green tea and bird guano. It's gross, but it heals.

* Isekai De Kojiin Wo Hiraitakedo Nazeka Darehitori Sudatou To Shiai Ken Needless to say, she believes she's his wife for the foreseeable rest of the story.
* Isekai De Kuro No Iyashi Te Tte Yobareteimasu lets the main character access many video game like screens, letting her see other people's levels and skills. She also has a radar to see friends and enemies around her.
* Isekai Konyoku, with the hero being summoned to another world in his own body and later discovering that his biological sister had been resurrected into this world in a new body, resulting, as he puts it, in her being his blood-related-yet-not-blood-related sister.
* Isekai Quartet: Ainz manages to get 100% on a test because he realizes that Pandora's Actor had made the correct answers to the test form a picture of own face on the scantron.
* Isekai Quartet are all immune, leaving him unable to do anything. Aqua attempts to cheat herself (among other mischief) and is caught standing when Ainz cancels the spell, leading to her being punished. Tanya and Subaru, who didn't exploit the Time Stop, manage to return to their seats in time and avoid punishment, while Ainz finds another way to pass the test.
* Isekai Quartet claims that Valentine's Day is "the one holiday foolish humans celebrate that [she] approve[s] of".
* Isekai Quartet: During the final round of the Field Day, Vanir and Pandora's Actor uses their magic to create countless of minions, which then form their own quartets to fight against Class 1 & 2.
* Isekai Quartet group finds a mysterious button, Aqua immediately wants to press it. Kazuma holds her back, pointing out it could do something dangerous. Megumin says she agrees with his logic but presses it anyway. Pressing it whisks the group away to the series' school setting.
* Isekai Quartet is more dramatic and horror-tinged. It further helps that the authors of the two series are friends in real life.
* Isekai Quartet spell, which is a 10th level spell. And while his Despair Aura can cause even Level 100 Floor Guardians to tremble in terror, it has no effect on her whatsoever. Needless to say, Ainz treads very carefully around her because he knows that she can very easily kill him despite being a total idiot.
* Isekai Quartet's second episode, Kazuma interrupts his companions' attempts at delivering their grandiose introductions by simply stating their names, then caps it off by telling everyone to "ignore that one (Darkness)".
* Isekai Tensei, Ore ga Otome ge de Kyuuseishu below the threshold where the romance route will kick in. So he takes part in game events intended to win over the characters, and sabotages them... but being a comedy, he often ends up raising their affection unexpectedly.
* is eligible for - the European-African-Middle Eastern Campaign Medal - is missing from his uniform. Note that this is actually an aversion: while the award was authorized in 1942, the actual medal design was not finalized - and thus none were issued - until after the war.
* Isembard Prince. Like the Divine Shadow, he is also immortal, though his origins are a complete mystery even to the Prince himself. All he knows is that he is evil, he likes to destroy good things and exists only to make others suffer forever.
* is endangered by dynamite picked up by an escaped lab chimp ("The Man from Mars")
* is entirely based on the idea of the Moai being built as beam weapons by powerful wizards.
* is entirely built around a D&D-esque world, complete with character sheets, NPCs, skill checks, and die rolls.
* I sent you a radio report, a boat, and a helicopter. What the hell else do you want from me?"
* is especially blatant when it comes to clearing away Buffy's other boyfriends in

order to leave room for her "one twoo wub", Spike. Angel is depicted as an arrogant idiot child with a god-complex, while Riley is turned into a sadistic monster whose attitude actually improves once he's turned into a vampire. And of course, Buffy's friends are all okay with her getting with Spike, even the vampire-hating Xander.
* is essentially a proto-version of the "Abridging" phenomenon, a cut-down parody dub with only the most tenuous connection to the original.
* Iseult and Aeduen fight two gangs of pirates who want to get to them and who recently turned on each other as well.
* Iseult: She stutters when she's nervous and wiggles her nose when she's thinking. Her mother tried to train her out of having any tics, but she didn't have much success. She also picked up a few of Aeduan's mannerisms (such as tapping her fingers on the pommel of her sword) after travelling with him for a while.
* is even stronger than either of his sons but also an even worse fighter. The Z Fighters hold their own, and even badly injure him until Goku and Trunks arrive, despite having a combined power level of only a tiny fraction of Cold's own. Piccolo infers that Cold likely never trained at all (Frieza himself admits to having only the bare basics of training) as he telegraphs all of his attacks "a mile in advance". If even a single attack lands, the one struck will most likely die but Cold struggles to land a blow on anyone the entire fight.
* is exactly the same as alludes to this bit from the St. Crispin's Day speech:
* is exactly what it says on the tin, a redneck who does sorcery to pay his lot fees.
* is expanded in the anime). In addition, several episodes during the two training filler arcs take inspiration from Suno, where Goku meets cute girls around his age who take an interest in him, only emphasizing this trope.
* is explained as always trying to fix her (frequent) mistakes while cooking by overcompensating. If she's supposed to add sugar to a dish but uses salt instead, Akane will simply add twice as much sugar rather than binning the whole thing and starting over.
* is explicitly dangerous. Its creators built the place as a huge maze of exploding hatches, trapdoors, dropaway floors, and hidden passages.
* ise zumi tattooed monks of the Dragon Clan and certain sects of the Brotherhood of Shinsei train specifically as warriors, particularly those in the Dragon Clan's Hitomi order or the Brotherhood's Order of Osano-Wo.
* is fairly accurate to how it's described in-story, even if it lacks the self-damage effect for some reason.
* is faster than hyperspace, just extremely disconcerting to the traveler.
* is fatally shot with a crossbow while he's using the privy. It doesn't help that there's a dead prostitute in his bedroom.
* is finally taken as a serious threat. When Danny tries to find Pandora to remedy the situation, this trope is utilized:
* is five and a half meters tall and built like All-Might. As a result, the boy is so heavy that his footsteps cause tremors and make Mineta bounce in the air. Thankfully, his strength is even more immense, such as throwing his "baseball" (which is the size of a medicine ball) 174 kilometers away.

* is, for "strong western style violence and moderate sensuality". In the UK, this so-called "strong violence" was only considered mild (so just worthy of a PG!), instead earning a 12 for "moderate sex and sexual threat" for the same Blu-ray release in 2011.
* is from centuries of warfare, jump knowledge is either sketchy or kept secret. It's said there are two type of Jump Scientists. One who can recite the theory backwards and forth but make little headway in it... And those who are completely insane but in-between their ramblings they make discoveries.
* is full of things like this. Instead of chasing cars all willy-nilly through the streets, it's possible, with proper preparation, to blow up enemy cars and win easily.
* is gay when he brings up military regulations preventing a relationship with someone named Sam. Later when Xander meets SG-1, he thinks "Sam" and "Danny" are short for "Samuel" and "Danielle" rather than Samantha and Daniel, leading to further misunderstandings.
* is gay with zero flaws, is one of the nicest and handsomest people in school, and is basically loved by everyone in town.
* is George Washington!") and Jimmy Durante. When "Jimmy" does a bit that the real Jimmy didn't do it means "The trance is fading!"
* is given his grandfather’s Webley Mk. VI to touch off the events of the story, while Hermione is assigned a Royal Irish Constabulary by her grandfather, since the regiment that Harry was putting together was being supplied with old surplus equipment.
* is given the code name Rat after becoming a member of the Vale Secret Service.
*) is given the name Roly Poly Vore Girl by the Heroes Association after she eats a monster made of pollution and balloons to hilarious proportions.
* is Greek Fire, but without any original document it's impossible to say which one it is.
* -ish. After he starts getting targeted by Oswald's gang, Stephen deliberately distances himself from his best friend Gray so that Gray won't get involved and hurt. Gray stays by his side regardless, leading Stephen to take more drastic measures to protect him.
* : is half this and half the other trope. The titular tribe was cursed by their totem spirits with "removal from the cycle of life" until the domestics (a faction of "civilized" furries) are no more. The usual angst about outliving one's loved ones is partially averted because anyone who marries into the tribe is cursed as well and their children inherit it, but if they fall in battle their souls are devoured by the wolf spirit.
* I Shall Return: Character must leave others behind to escape, but promises to come back for them.
* I Shall Return: The hero has to leave people who helped them in peril, but promises they will return to help them out soon.
* I Shall Seal The Heavens has the Mountain and Sea Realm, a collection of nine massive mountains floating in space, each of them surrounded by a floating ocean and four static planets. There are also a sun and a moon orbiting around the nine mountains.
* I Shall Wear Midnight, as in seeing into the front and out the back of his head.
* I Shall Wear Midnight is a curious variant of this. Instead of empty sockets or smooth skin where his eyes should be, he has holes straight through his head, through which can be seen whatever is behind him. As, on the Discworld, the eyes are literally windows to the soul, this is a very bad thing indeed.
* I Shall Wear Midnight, Keepsake Hall used to be afflicted with this trope at the instigation of a former Duke's ghost. In more recent times, he's given up on such gory methods of haunting, and settles for pulling the chain on the lavatory toilet instead.
* I Shall Wear Midnight of the hate and mistrust people have for witches and other outsiders.
* I Shall Wear Midnight of this. He's the ghost of a witch hunter whose hatred for witches is so great, wherever he goes people become more suspicious and angry with

witches.
* I Shall Wear Midnight picks up almost any language unbelievably fast.
* I Shall Wear Midnight successfully capture and condemn at least one genuine witch in his lifelong career. She pulled him into the fire to die with her. Too bad that wasn't the end of the matter...
* I Shall Wear Midnight, then speculates that it may be due to this trope.
* I Shall Wear Midnight, Tiffany finds herself having to give The Talk to Letitia, who doesn't believe her.
* I Shall Wear Midnight, written on behalf of the Cunning Man, is so full of his hatred of witches that a copy of it allows a curse ineptly attempted against a witch to work simply by being in its proximity, and later almost allows said creature to manifest into the world through its pages before it's pressed shut very decisively.
* Ishamael favorite; he always had generals with actual military experience (most notably Demandred, Sammael, and Be'lal) to lead the Shadow's forces in the field.
* Is Hans the Black Sheep of his family, or are the rest of the princes from the Southern Isles
* Is happening very rapidly in ladies figure skating the last few years. Where before a top level skater could be a strong contender for years, skaters tend to dominate only for a season or two now. Not because their skills are necessarily recessing, but because there is a tech revolution with multiple female skaters now learning a variety of quadruple jumps.
* is have more advanced tech back on their own worlds, but while on hunts they don't use anything beyond what we've seen because it's not considered "sporting" to use against humans or other lower-tech species.
* Ishbosheth, David, and Solomon. Saul and Solomon might have not been that common, but when was the last time you know a guy named Ishbosheth?
* Ishbosheth's name means 'from the mouth of shame'. A very early translator had changed it from Ishbaal ('from the mouth of God') due to concern about Baal worship.
* "Is he alive" that plays the fiddle and hides in a mine in the woods.
* is Heaven, and that getting killed there merely means having to go back to "life" in their former world. Given that the Feegle are ex-Faerie who did considerable dimension hopping, there may be an element of truth to this.

* is hiding something (a secret with 5 Psyche-locks, which typically are given to plot-critical secrets), but he's not the one who killed Jack Shipley. Instead, what Crab is hiding is that he and Jack Shipley didn't actually put the first orca down like they said they would, but instead moved her somewhere else. That and Crab keeps tabs on the marine life using the TORPEDO system, the problem being that the system is illegal.
* Ishigami, after admitting that he's in love with his upperclassman Tsubame, decides to change his attitude and social outlook because he doesn't feel he's worthy enough as a man to approach her. His grades improve a lot, he becomes more active with social groups he wouldn't dream of approaching before, and he makes efforts to look like a cool, reliable guy,
* Ishigami and Katou, being similar, both employ the idealism-driven attraction, and the fanatical devotion some of Katou's subordinates have for him shows it works.
* Ishigami is taller than both of his primary love interests, although Miko is tipping into
* Ishigami was in danger of getting held back early in the series due to a complete lack of desire to apply himself during exams. Kaguya ends up helping him pass a crucial exam due to owing him a favor and later convinces him to actually take school seriously by telling him that getting good grades could help him attract his crush Tsubame.
* is highly disturbed to realize Unohana is getting off as Suì-Fēng describes how she was defeated.
* is highly magical, with average Sentinels having roughly the same magical presence as a young dragon on his home world. As a result, magic has largely evolved to specialize in overwhelming power with little finesse. Harry notes that a warlock's shadowbolt is little more than a mass of shadow magic sloppily thrown at the enemy.
* Ishiguro also supports the campaign for robots to receive legal citizenship, because he thinks the profit from having them as customers will exceed their value as products.
* Ishikawa also notes this is not the first time a former student of his used his techniques for evil. He previously taught the heir of another clan who would use his skills to assassinate his lord. He failed but not before killing many of his own people.

* Ishmael and his mother Hagar are treated badly by Sarah because Ishmael is Abraham's bastard son, despite his conception having been Sarah's idea in the first place, and because Hagar rubbed her pregnancy in Sarah's face. Because their presence caused tension in the community, they are forced to leave. Fortunately, they are not forsaken by everyone, and God helps them both survive in the wilderness.
* Ishmael and the Return of the Dugongs, Razza is complaining about Ignatius, only to realize that Mr Guthrie is in the room.
* Ishmael Herman Brudenell told his secret wife, Nora, and her sister that whenever it was better to let the marriage be known, they could tell it. Nevertheless, Nora kept her tongue when his mother confronted her and pled the promise. Her sister berated her for it.
* Is Hobbes a real person, or (as most people around Calvin think) just a stuffed animal subjected to Calvin's vivid imagination? Careful attention reveals that instead of both being possible,
* is.) Hobbes' play is illegal in another way: first, he plays "xygomorphic", Calvin uses the I to play "in", then Hobbes uses the N to play "nucleoplasm". This results in Hobbes spelling "cu", which isn't a word and therefore invalidates "nucleoplasm" by default. Considering he makes up his own Chance cards for Monopoly, they could be using house rules. That or Calvin, being six years old, doesn't understand the rules entirely.

* I Shot Jesse James and his attempt to prospect for silver in Creede, Colorado.
* I Shot Jesse James, as only the broad strokes of the tale are certifiably true (like Jesse James's death and Robert Ford's moving to Creede, Colorado).
* I Shot Jesse James Cynthy Waters that Ford starts to see him as an enemy.
* I Shot Jesse James: Early in the film, Jesse James is taking a bath with his friend Robert Ford standing nearby. Ford stares at Jesse's naked back, holding a gun and considering turning on Jesse. Jesse then says:
* I Shot Jesse James, even though he is legitimately trying to contribute to society.
* I Shot Jesse James features a brief scene where a mountain lion tries to attack Robert Ford and his partner Soapy. Bob shoots it before it can get to them, though.
* I Shot Jesse James Frank James is acquitted of charges in Colorado, and the jail immediately let him go, even though they acknowledge he's wanted in other states like Kansas and Missouri. In reality, the Colorado authorities would’ve alerted the other states (telegrams were widespread by 1892, so there wouldn’t be a long delay) and kept Frank locked up until one of the states contacted them about extradition via the U.S. Marshals.
* I Shot Jesse James hand. However, not only does this drive Cynthy away from him, it also leads to his eventual downfall.
* I Shot Jesse James has one, though Jesse's is the highest at $3,000.
* I Shot Jesse James. However, Kelley gets the drop on him and kills Bob first.
* I Shot Jesse James in the back to get the reward and a pardon. Granted, he was extremely conflicted about it and felt guilty for several years afterwards.
* I Shot Jesse James, Robert Ford learns that his girlfriend Cynthy doesn't want to be with him anymore. The main reason is that she's scared of Bob, as well as embarrassed of his reputation as Jesse James's killer.
* I Shot Jesse James that can't escape his reputation and the guilt of killing Jesse.
* I Shot Jesse James the real Robert Ford actually did, so it makes sense to include it within the film.
* I Shot Jesse James to get her hand, he's definitely not playing around.
* I Shot Jesse James, who he still considers his friend up to his last breath.

* Ishtar from the same game's second generation. She's kind-hearted enough to be the best friend of Teeny/Linda, despite Ishtar's mother abusing them, she seriously questions the Child Hunts promoted by her country and tries to minimize the damage as best as she can, but she's too duty-bound with the honor of her family and country (and being in love with pre-possession Julius), in which Seliph's army has caused many casualties on, that she cannot be recruited and made her last stand in the name of those she's bound to, dying in the process.
* Ishtar Gate, where the British took the sculptures off the Parthenon, but left the building. Greece still wants them back.
* Ishtar had its trailer released in August 1986 with plans to open the film around Thanksgiving 1986. However, extensive re-editing pushed the film back to May 1987.
* Ishtar spent a lot of time arguing with Elaine May, getting to the point where they went for days without speaking to each other. Eventually they compromised by shooting every scene twice, one her way and one his. During postproduction, May and Beatty fought frequently in the editing room, and May often left it to Beatty to direct the actors during looping sessions. The joke was (and some people say it was not a joke) that Bert Fields, their mutual agent, was the one with the real final cut on the film.

* Ishval is perhaps the counterpart of the Western Asian countries, but their persecution by Amestris is heavily based on the plight of the Ainu people in Japan.
* Isiah's Pistons. Like the Broad Street Bullies that terrorized the NHL in the 1970s, the "Bad Boys," which also included Bill Laimbeer, Dennis Rodman, and Joe Dumars and coached by "Dream Team" coach Chuck Daly, were beloved in Detroit and despised by traditional basketball fans by winning two consecutive championships through violence, intimidation, and lack of sportsmanship (when the Pistons lost to the Bulls in the 1991 playoffs, the Pistons players refused to shake hands after the game).
* Isiah Thomas is another example: great player who led the Pistons to two championships, horrible coach and general manager.
* Isiah Thomas, well-known as the star of the Detroit Pistons during the "Bad Boys" era of the late 1980s-early 1990s (and before that known as the star of Indiana's 1981 NCAA champions), is more well-known now for being snubbed by the Dream Team before the 1992 Summer Olympics, possibly due to his rivalry with

* Isidor Fink after hearing signs of a struggle. When they arrived they found Fink dead of three gunshot wounds. However, the door was bolted shut, the windows were nailed down and the only fingerprints in the room belonged to Fink himself. The only way anyone would have gotten in was via a small window above the door but only a child could go through the opening. Someone firing through the window was also out of the question since Fink's wounds indicated he was shot at close range and that it was impossible for him to have shot himself (and the murder weapon wasn't found in the room). Motive was also unclear since even though it was a high crime area and Fink was extremely paranoid about getting robbed (hence all the extra security), none of his valuables were taken. No culprit was ever found and NYPD Police Commissioner Edward P. Mulrooney called the case an "insoluble mystery".
* Isidro, being a child, is a fragile speedster by default. * is in Micah's camp in the epilogue, and why he decides to shoot him and spare John. When John asks why he's there, he simply replies "Same as you, I suppose." This could suggest he also came with the intent to kill Micah, but this could suggest he's there for the money from the Blackwater ferry heist. He and Micah are both pointing his gun at John in a Mexican standoff, and will actually shoot John if the player makes him shoot Micah. He walks away from the site after shooting Micah, not explaining his reasoning.
* is in prison and accidentally gets high on meth while trying to infiltrate a criminal gang. Jake tries to act normal in front of them and he has an inner monologue where he tells himself to stay cool, but it turns out he's talking out loud, and the gang heard him repeatedly telling himself to be cool. On the bright side, his behavior convinces the gang that he really isn't a cop, since they can tell he's extremely high and reason that no cop would have done that.

* ISIRTA's general atmosphere. Sometimes, lines would be dropped because the audience saw the pun coming and groaned before the punchline. Occasionally, the audience would groan at a pun, and then applaud it, because it was a good pun. A typical example of the dialogue predicting the groan would go like this:
* Isis (also known as Ishtar) is the Mulhorandi goddess of weather, rivers, agriculture, love, marriage and good magic.
* ISIS as a whole had this sort of relationship with the more competent ODIN, as well as the KGB. They could never quite be

* Is It Legal?: In the episode “Whodunnit”, Stella discovers several photocopies of someone’s butt in her office and tries to find out who did the deed. It’s eventually revealed to be the photocopying engineer (he has black-outs apparently). A couple of other characters get in on the act too, with Alison photocopying her breasts at the end of the episode and Bob photo-copying his butt as well later on (only for his crush, Sarah, to show up and see the act).
* Is It Legal?: The second half of "Office Party" has the firm wake up to find that their office has become a mess after the events of their office party and figure out what they were doing whilst drunk. Turned out that they spent a significant amount of time naked in the shopping center.
* Is it Northwemko or Norsewemko? The official card's name is Divine Grace - Northwemko, but people can't agree on what it "should" be.
* Is it possible to blow someone's head apart by launching a teddy bear at them? Probably not. When you get the Rock-it Launcher and manage to do just that, will you care about the previous question? No.
* Is it right for a murderer to get off scot-free, in order to protect the life of a completely innocent bystander? This wouldn't be too hard to answer on its own, as most justice systems have an answer built in: protect the innocent, no matter what.
* is it Shizuo Heiwajima standing in the rain by the jail after being set up for a crime, feeling and looking completely alone. Off screen, we hear a voice calling his name. * "Is it true that you politicians always answer a question with another question?" "Who told you that?"
* Is It Wrong to Try to Pick Up Girls in a Dungeon? A brief one occurs in episode 12 when Hestia releases her goddess form. Both Bell's companions, and the hostile adventurers they were fighting, stop fighting when they see her transform. The hostile group then runs away, not wanting to provoke Hestia.
* Is It Wrong to Try to Pick Up Girls in a Dungeon? adventurers are assigned a level based on their abilities. They can level up by defeating powerful monsters and upgrading their stats with their respective Gods. There is no confirmed level cap, but most of the adventurers seen in the series fall into the level 1-4 range. Level 5 adventurers are considered exceptionally strong and serve as commanders within their familia, and Level 6 adventurers are the strongest individuals around and normally serve as executive officers/captains within a familia. There are only 2 confirmed Level 7 adventurers, and only one of them is named.

* Is It Wrong to Try to Pick Up Girls in a Dungeon?, at Reveria's suggestion, saying anyone would feel honored to get this from her, when Bell wakes up he freaks out due to his crush and inferiority complex directed at her and runs off, surprising Riveria and Aiz. It's played for laughs.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?, Bell is going about his business when he sees an unknown woman (Liliruca) being attacked by a sword-wielding stranger. He immediately rushes in to protect her, and when the attacker asks why he got involved in someone else's dispute, he replies "because she's a girl". Even Liliruca is taken aback by this, and asks him "Will you save any woman just because she's a woman?"
* Is It Wrong to Try to Pick Up Girls in a Dungeon? has a wind spell with which she can fly briefly in order to attack flying or very large enemies.
* Is It Wrong to Try to Pick Up Girls in a Dungeon? has Eina Tulle. She is a half-elf, and has a human father and an elven mother.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?: Here, the gods don't have parents or siblings. They have always existed and cannot have children with each other or with mortals.
* Is It Wrong to Try to Pick Up Girls in a Dungeon? is a magical version; she's already acclaimed as one of the five greatest Item makers alive, making her a combination Inventor/artisan.
* Is It Wrong to Try to Pick Up Girls in a Dungeon? is egotistical would be like saying a minotaur running loose in the dungeon is a minor threat. Being one of the strongest close quarters fighters of the Loki Familia, he makes it a habit of looking down those he deems as weak, which includes the main character.
* Is It Wrong to Try to Pick Up Girls in a Dungeon? later on in the story makes this seem less like an act of delusions and more like an intentional attempt at getting people to laugh.

* Is It Wrong to Try to Pick Up Girls in a Dungeon?, Lili disguises herself as Bell and tries to pull away Hestia, who instantly sees through Lili's transformation magic before dropping this line:
* Is It Wrong to Try to Pick Up Girls in a Dungeon?, magic was practiced by races like the elves more than a thousand years before the gods descended to the Lower World. It's still practiced in the present day by the elves and certain magic schools like the ones in Altena, but even the strongest of these spells tends to be vastly inferior in destructive power to magic granted by falna or a grimoire.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?. Orario seems to use them as an energy source.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?, others repeatedly point out that one of Argonaut's only strengths is to make others want to help him with his grandiose speeches and unerring optimism. Even the most cynical, nihilistic people find themselves swayed by his silver tongue, kindness, and ability to cling to hope at a time that had none. He needs it too, as without allies, he would have never accomplished a fraction of what he did.
* Is It Wrong to Try to Pick Up Girls in a Dungeon? punish Hermes, who was intentionally peeping and dragged the oblivious Bell along with him.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?, the city of Orario is protected by walls that tower over the thriving buildings inside. This is both to protect the city from invaders like Rakia, but also to protect the rest of the world should monsters escape from the Dungeon beneath Babel.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?, the fall kills her mortal body and sends her back to Heaven.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?. The first time he visits Orario's casinos, he repeatedly wins at roulette even while betting on a single number, quickly multiplying his initial earnings by more than 10,000 times.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?: The grave for Ryu's old party is ringed with their weapons.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?, there is the main protagonist Bell who works as an adventurer as part of the Hestia Familia. Thing is, Hestia Familia isn't unique, and in fact are rookies, and there are plenty of adventurers besides Bell, each up to their own adventure of varying interest and excitement. Loki Familia in particular has their own spin-off series.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?. This was also what the author originally wanted to call the series before the editor suggested otherwise.
* Is It Wrong to Try to Pick Up Girls in a Dungeon?: Two female examples:
* Is It Wrong to Try to Pick Up Girls in a Dungeon? watching him fight.
* Is It Wrong to Try to Pick Up Girls in a Dungeon? ways and dreams of becoming a hero to earn her affection.

* "Iskolar ng Bayan" (The Town Scholar) by Yano, about stuck-up rich kids in the band members' alma mater, but with a quick, off-the-cuff, non-glorifying drug reference, which he didn't like.
* Iskra under Tsarist rule in the Russian Empire. These news papers were the voice of the workers resistance.
* Iskriget (The Ice War) (2011) by Swedish SF author Anders Blixt is an "antarctic" spy adventure taking place in an alternate 1940, in which German and Czech republicans rebel against the heavy-handed rule of the Habsburg emperor. It includes, among other genre attributes, diesel-electric Miyazaki-style cloudships and ice juggernauts.
* Iskriget (The Ice War), in which neither Catholic Linda nor Wesleyan (i.e. Methodist) Johnny convert — they just have a Catholic wedding. Considering that in this alternate history the Wesleyans appear to be openly disliked by a lot of authoritarian governments for their stance on social justice, it was probably the most practical solution.
* Iskriget (The Ice War), is a trained mechanic with a solid professional reputation in her home town. She "saves the day" with her skills at several occasions during the story. She usually wears workmen's clothes and has a male haircut, both for purely practical reasons.
* Iskr, the King in Yellow, united hordes of refugees fleeing the Zhu to overthrow the settled Hali and found the kingdom of Carcosa.
* Isla Aukate modified themselves to look human in preparation for an infiltration-type invasion, their natural forms are more reptilian/amphibian. Unfortunately they crashed on an island populated by mythical creatures, so they kind of stand out.
* Isla Fischer. Their scenes were cut and have yet to be released to the public, although the filmmakers state that they may include them in a special edition DVD.
* Islam allows men to have up to four wives, provided he can afford to care for all of them, and actually takes care of them all equally. (
* Islam almost forbids any form of (adult) male and female contact outside of the family.
* Islam already believes in non-human sentient life in the form of spirits and

ifrits and other dimensions. Life on other planets isn't too far a stretch. In fact most religions seem to be pretty okay with the concept, even traditional ones like Orthodox and Catholic Christianity and Hinduism. Its kinda hard to lose your faith because you see photographic proof of how small and helpless you are in the face of the immensity of the universe when you spend most of your life believing in your smallness and helplessness in the face of God.
* Islam favors cats over dogs, yet both are regarded as living beings worthy of human compassion. However, there is a specific caution about dogs: black dogs are said to be a kind of demon.
* Islam, from the Turkish word for "corridor". The Turkish names for the days of the week are equally weird for the same reason).
* Islam has it that God ordered angels to bow to Adam, and Satan refused because clay is inferior to fire. That's right, according to this story, disagreeing with this trope makes you irredeemably evil and deserving of Hell.
* Islam has many early Muslims freeing their slaves and sometimes even buying other peoples' slaves for the purposes of freeing them (the Prophet and his friend/successor Abu Bakr were particularly noted for this, being successful merchants). It is also forbidden for Muslim to enslave Muslim (though some ignored this), so it wasn't terribly uncommon for Muslims to free their slaves by allowing them to convert.
* Islam holds him in the highest esteem out of three faiths, referring to him as an archangel. Transcribed as "Azrāʾīl" in Arabic, he is one of the four angels alongside Isrāfīl (taking the place of Raphael) and Michael and Gabriel. He collects the departed souls from the bodies and is told by God when their time is. Additionally, according to Islamic lore, forty days before the death of a person approaches, God drops a leaf from a tree below the heavenly throne, on which Azrael reads the name of the person he must take with him.
* Islamic/Arabian poetry has the Miraj (or Al-mi'raj, or numerous other variations on the two), a one-horned, carnivorous yellow hare capable of killing and eating much larger prey, including humans. Also features in
* Islamic doctrine also includes the idea of predestination (essentially synonymous with Fate of Destiny). Interpretations obviously differ, but as generally taught to non-scholars it ties into the concept of Omniscience as possessed by God. God knows everything, so he knows what's going to happen. The popular interpretation is that humankind's actions dictate the map of the future, and not the other way around. God just saw how it would all pan out from the Beginning. So... the future's like the weather, with the assumption that God is the best weatherman ever. If we could see the future, then theoretically it's more of a guide, with the assumption that God saw it all coming anyway.
* Islamic Dress) in mind, and a small but significant minority of Muslims regard these items as being religiously-mandated. As a result, various EU institutions and many commentators — particularly American ones — have criticized the ban as an infringement on religious freedom.
* Islamic eschatology also believes in a future world war between Muslims and its enemies.
* Islamic folklore has Zulfiqar, Ali's sword. It was found by Muhammad in the Mecca temple of Ishtar, and described as a long scimitar with a curious forked end. According to the legend, the archangel Gabriel constantly chained the true power of Zulfiqar since it was so sharp that at full force it could create
* Islamic lore, except Ishmael (or Ismail in Arabic) is the one sacrificed instead (and like the example above, gets substituted with a lamb/goat/ram). Unlike the Christians, Islam celebrates this day as Eid Al-Adha, or "Feast of the Sacrifice", where livestock—usually a lamb or sheep but also possibly a goat, a cow, or a camel—is usually slaughtered. Although the traditional thing to do is to slaughter it yourself, most Muslims have neither livestock nor the expertise to slaughter and butcher an animal for meat, so generally most families pay a butcher the cost of buying, slaughtering, and butchering an animal, with instructions to send one cut to the family for its feast and give the rest to a responsible Islamic organization in the area for distribution to the poor; in some places, the butcher

may also be permitted to take a small cut himself in compensation for his services.
* Islamic Sharia rulings have oscillated back and forth on certain issues. Caffeine, upon discovery, was declared haram (forbidden). Nobody listened. It was then called halal (permitted). Smoking was never declared haram. These same people will absolutely condemn alcohol, which was never explicitly declared haram in the Quran. And of course, there are still many Muslims who do drink, not that they'd ever admit it, at least to the Imam.
* Islamic State as first prizes for a Koran memorization contest for Ramadan.
* Islamic State becoming the prime opposition group to the Syrian government.
* Islamic State of Donbass and Lugant of them are radical Islamists related with the jihadist movements.
* Islamic State of Iraq and Levant all by itself and quite successful.
* Islam, or Detailed Statement of Faith, in Sunni Islam, which states: "I believe in God [1] and His Angels [2], His Books [3] and His Messengers [4], in the Day of Judgment [5], that all things good or ill are the will/fate of God [6], and in resurrection after death [7].
* Is lampshaded in one episode where a nameless human (Nicknamed Mr. Necktie) visits from out of town. And is bewildered that animals can walk and talk and tries to study them. (Despite it's been shown that Funny Animals are everywhere in that universe)
* Islam says, "Do you expect to enter Paradise without being tested like those before you?"
* Islam say to defend or justify themselves is already known and they're quickly shuffled off to their respective places in the afterlife.
* Islam that can take on a human form, but they differ in many ways. They're free to question the motives behind God's decisions, as they did when he announced his intention to create Adam, but are unable or unwilling to disobey God in any fashion because they lack free will. Some traditions regarding the Battle of Badr, where the Muslims defeated an army 3 times their number, tell that Angels actually fought alongside the Muslims in battle.
* Islam, the scorpion is perceived both as a symbol of both evil and protection from evil.
* Islam wholly rejects the idea of an original sin, though most people will fall into temptation in life. Yet Allah forgives. In fact "Most Merciful" is one of the many Islamic names of God.
* Island, also making him one of the few contestants to not leave depressed.
* Island as well. Similarly, Leshawna, although usually annoyed by Harold's inability to take a hint, does actually care a lot about him and is genuinely touched on occasion by his attempts to impress her (with a few episodes implying she does have some mutual feelings for Harold).
* Island at War a British Channel Islander and a German airman fall secretly in love for little other reason than to evoke this trope. To make matters angstier, he might have dropped the bomb that killed her father.
* Island at War, British forces withdraw from an indefensible fictional Channel Island at the approach of the German invasion, without bothering to officially surrender, leaving the civilian population to attack and Nazi occupation. This proves unpopular with the public in England, and the government sends intelligence agents to scout the possibility of retaking the island. The de facto mayor is forced to argue against the liberation of his island, pointing out that it would be a hopeless waste of British lives and end in a harsher German occupation, and counsels the spies (one of whom is his own son) to give themselves up as POWs.
* "Island" by Eddy Raven uses sailing metaphors for this, with him lamenting the fact that he let her go ("Now what kind of sailor ould let such a dream get lost? / Tonight we'd be sailing out under the southern Cross"). He ends with the phrase "I might sail forever and never find that island again".
* Island City a 1994 made-for-TV movie, had the few remaining regular humans living in a small enclave surrounded by animalistic mutants. The mutants were called 'recessives' because the trait was inherited that way. One of the characters was — get this — HALF RECESSIVE, with all the increased strength and

toughness but without the bestial aggression and reduced intelligence. Also, the inhabitants of the city wore colored crystals making their genetic status clear, to prevent the wrong kind of couple forming and producing the wrong kind of offspring. That would be fine, except there were THREE colors (should only be 2, carrier or not) and people were forbidden from mating with anyone whose crystal was a DIFFERENT color (should be, 2 carriers may not mate).
* Island City is a 1994 TV movie about a post-apocalyptic society in which an immortality serum has turned a huge percentage of the world's population into mutated brutes. The remains of human civilization live in isolated city-states like the titular Island City.
* Island, Courtney briefly teams with Duncan but after she manages to retrieve the money and Duncan is injured, she instantly abandons him without missing a beat.
* is landed here, and Shockwave knew that all along. To say nothing of the fact that 'bots from both factions decide to travel to Earth for no readily established reason.
* Island Gigantism example of this trope), the Madagascar Elephant Bird (a flightless bird twice the size of an ostrich), and the Giant Tortoise of the Galápagos.
* Island, Gwen forms a platonic friendship with Geoff. In the show's pre-production stages, they were love interests.
* Island, having her hands on the money for all of three seconds before losing it and ending up with nothing.
* Island he found himself among, constantly trying to find cracks in their perfection.
* Island in the Sea of Time, an academically-trained character shocks the others by informing them that within fifty or a hundred years, no-one will believe that the island really came back through time, no matter how well records are preserved: everyone will be scrambling to figure out theories that "prove" 20th century Nantucket developed by itself in the Bronze Age.
* Island in the Sea of Time and its sequels, the Republic of Nantucket's military allows both men and women to serve in combat roles. It also allows gays and lesbians to serve openly.
* Island in the Sea of Time because they object to Alston's plans to intervene in the war between the Iraiina and the Fiernan.
* Island in the Sea of Time books, Swindapa loves kids, even going so far as to adopt a pair of orphans at the end of the first book and expressing a desire to adopt some more in the second book. This has caused some tensions with her partner Marian, who's older and not entirely keen on having a litter of kids underfoot.
* Island in the Sea of Time contend with language difficulties, uptime diseases, and so forth; the Nantucketers manage to wipe out huge numbers of Native Americans before they even realize what's going on, because the first party sent to the mainland contains someone with a sniffle. Their language difficulties are moderately eased by the fact that the languages of Europe are, at that point, much closer to still being "Proto-Indo-European"...
* Island in the Sea of Time Dr. Alice Hong counts. She's apparently literally incapable of orgasm unless she is inflicting, or receiving, pain. Not a run of the mill BDSM fetishist, Hong enjoys vivisection sans anesthetic, ritual human sacrifice via various gruesome tortures and so forth.
* Island in the Sea of Time, Ian Arnstein, a visitor from the West Coast, serves as this, helping to introduce the reader to Nantucket.
* Island in the Sea of Time is mentioned as having made this policy for Nantucket's seaborne forces. A few years 'before the mast' is required before anyone is even considered for officer's training.
* Island in the Sea of Time, Marian Alston is mortified when her Fiernan lover Swindapa glowingly tells her family in considerable detail just how good Alston is in bed.
* Island in the Sea of Time, Pamela Lisketter and her followers make the incredibly short-sighted decision to aid Walker in betraying Nantucket, in part because they don't want the fledgling republic to enter the war between the Fiernan Bohulugi and

the Iraiina. Not only do their decisions actually end up ensuring that Nantucket goes to war (because Walker immediately goes off and begins arming the Iraiina), but they themselves are mostly wiped out when their subsequent attempt to make an alliance with the People of the Jaguar God goes horribly, horribly wrong...
* Island in the Sea of Time right away, or else it's like being blind.
* Island in the Sea of Time since neither of their countries allows gay marriage.
* Island in the Sea of Time, Swindapa falls for Marian Alston after the latter liberates her from slavery and teaches her how to fight. Luckily for her, Alston is a closeted lesbian, though it does take them a while to admit their feelings for each other.
* Island in the Sea of Time, Swindapa leaves Alba (what we would call England) behind, it having been taken over by the Iraiina, and heads to Nantucket, where she becomes Marian Alston's assistant (and later, her lover.) She's later able to return to her people, but she's changed quite a bit by that point.
* Island in the Sea of Time: The Bronze Age characters refer to the time-displaced Americans as "the Eagle People". The Beautiful is represented by the Republic, the Boorish by Walker's slave-based empire.
* Island in the Sea of Time, Walker encourages the moronic Pamela Lisketter and her followers in their supremely idiotic plan to steal a ship and travel to Mexico to educate the pre-Columbian civilizations, and even suggests that they kidnap Martha Cofflin and keep her as a hostage, because he knows that they'll all probably get killed and their ill-conceived venture will serve as a distraction to keep Marian Alston and the rest of the Coast Guard off of his ass while he sets up shop across the Atlantic.
* Island" in "You Regatta Be Kidding Me!", which gets him sent to jail instead of juvenile hall.
* Island of Fire Atlantis when they land on a barren rock in the middle of the Atlantic ocean and proceed to make it their new home, filling it with temple-like housing and coexisting with sentient dragons as equals.
* Island of Ghosts, this is most of Ariantes's motivation, although most of his time is spent keeping them from picking fights and falling into debt.
* Island of Happiness of each other, they'll each have their own special response to the Blue Feather.
* Island of Lost Souls (1932) introduced a puma-woman (with minimal feline traits) to the story.
* Island of Lost Souls. In a departure from the source material, Moreau succeeds in making an almost entirely human Panther Woman, Lota. Moreau's motivations are also changed; not content to merely make humans out of animals, Moreau now wants to see if his creations can breed with humans.
* Island of Lost Souls. In all films is a crazy scientist trying to turn animals into humans.
* Island of Misfit Everything: A haven for the misfits, rejects and forlorn.
* Island of Mystery: An island with any one of a number of unusual things on it.
* Island of Terror had such a log, explaining how anti-cancer research resulted in the creation of the bone-eating Silicates.
* Island of Terror had the bone-eating Silicates. They used their tentacles to inject a bone-dissolving enzyme into a victim, then suck the liquefied skeleton out, leaving behind misshapen, boneless bodies.
* Island of Terror, our first glimpse of the Silicates are their tentacles. We don't see a full Silicate until after it's already appeared as a grasping tentacle from offscreen twice.
* Island of the Aunts one of the titular aunts can't swim, and is afraid of water. She also lives on a tiny island. Somewhere in the middle of the book, another character points out the irony of this, and tries to teach her how to swim.
* Island of the Aunts there's some torture when the villains capture the mermaids, such as holding a blowdryer to the fishtail of one of the mermaids, to make them talk.
* Island of the Fishmen: Amanda's father, Professor Ernest Marvin, has been experimenting on the native humans of the island in order to create a race of

amphibious humanoid creatures that will replace humanity as the Earth's dominant species once humans go extinct.
* Island of the Undead has the Master of Fire, who was originally the foremost of 4 elementalists dabbling with other magic on a remote island. These wizards botch it and the Master of Fire becomes possessed by the unholy spirit, the Dire Specter. This unnatural mix of wizard and specter would go on to create mutants and fusions of elementals and the undead.
* Island of the Undead have a small, dragon-like creature that gives you valuable information if you befriend it. But before the creature can reveal too much, a Stone Wight will show up from out of nowhere and crush it before attacking you. If you don't have the creature, you'll never encounter the Stone Wight even once.
* Island RP was the first game to use the concept of the "closed world" RP game or "jamjar." Nowadays, "Jamjars" or even "spooky jamjars" are quite the norm.
* Islands got their song title "Jogging Gorgeous Summer" from a post-it note Nick Thorburn's girlfriend had left him one morning (presumably meaning that the weather was beautiful, so she went jogging). The lyrics don't really have anything to do with summer or jogging, but it's a love song with a tropical, "summery" feel, so the title sort of fits.
* Islands in the Net, as it does predict many plausible consequences of information technology.
* Islands in the Net), there's no shortage of 'real' food, but one major character eats only synthetic so as to avoid the toxins that real plants put in their tissues to discourage animals from, y'know, eating them.
* Islands in the Net: The Soviet Union is portrayed as lasting into the 2020s.
* Islands in the Sky is about a teenager who wins a trip to the Inner Station, a manned satellite in low-earth orbit used for repairing and refueling spacecraft. Clarke was famous for predicting the use of artificial satellites for telecommunication (though his were manned).
* Island, the understanding-enchancing drug, called the moksha-medicine is used for rites of passage and interpersonal bonding, in a carefully prepared setting. The protagonist tries it, as well, in the last chapters, and it makes everything he's learned in the island fall into place.
* Island, though nowhere near to the extent of Lindsay. In the words of Gwen: "Geoff doesn't seem like the scholarly type."
* Island Three. The page illustration is a representation of the "Stanford Torus", another design inspired by both O'Neill's work and the classic "wheel-and-hub" space stations.
* Island Thunder, where the Ghosts are tasked with safeguarding democratic elections on Cuba after the death of Fidel Castro in 2006. Castro did concede power to his brother Raul Castro in the wake of ill health that year and eventually passed in 2016.
* Island Under Siege leading an army of super villains and killing the Marvel heroes.
* Island Wars has two small islands wage war on each other in order to... blow up each other's palm trees. In the sequel, the invasion mode has an invading force try to destroy the island's palm trees.
* Island Wars is to defend said trees with your cannon. In the VS mode, one player uses a plane to attack their opponent's palm trees.
* Island Xtreme Stunts felt out-of-place in the LEGO Island setting, while others don't mind it at all.
* Isla Presidencial: All Latin-American presidents stranded on an island.
* Isla Presidencial is an animated series about the presidents of Latin America and Spain.
* Isla Presidencial parody with the presidents of Latin America and Spain uses Bamboo Technology a lot.
* Isla: She-Wolf Of The SS (literally "Speed!", meaning "Have speed with it!"); in our terms, she basically said "Hurry". Grese died as a truly unrepentant Nazi.

* Isla Yura got really excited when Oz tore Humpty Dumpty to shreds using B-Rabbit's power and threatened to kill Yura.
* Isla Yura, the ugliest person to ever exist in the manga, fanboying disgustingly over Jack. Oz, the person carrying Jack’s soul, cannot be anymore annoyed to have Yura stalking him over and over in the second ceremony of coming age.
* Isle of Dogs) a "son of a bitch" when the latter wants to leave his post as Atari's guard dog to lead his pack in peace.
* Isle of Dogs Chief insults Spots by calling him a "son of a bitch", then jokingly calls Nutmeg a "bitch". He also says that cats have more balls than dogs. In addition, there are 2 uses of "damn it".
* Isle of Dogs, did. Thanks to positive word of mouth and a relative lack of competition, it managed to gross $64 million on an estimated $30 million budget.
* Isle of Dogs for comedic effect, with dog heads and legs appearing out of the fight cloud at regular intervals.
* Isle of Dogs is dubbed by Rie Ishizuka, despite Ono being able to speak Japanese herself (Ono and Nishiro were presumably too busy to redub themselves into Japanese).
* Isle of Dogs, Tracy and Atari don't meet for most of the movie, but as Tracy uncovers Atari's efforts to find Spots, she finds it difficult to organize her thoughts about him.
* Isle of Dogs: While the five main dogs talk about their woes, King explains of how he used to star in twenty-two consecutive Doggy Chop dog food commercials. He follows it up by lamenting, "Look at me now; I can't even land an audition!"
* Isle of Giant Horrors: Being trapped on an island inhabited by giant monsters.
* Isle of Rangoon episode "As The Wheels Turn", Starchibald makes a Communist joke, only for Sunny Jim to tell him he owes money to the Communist joke jar.
* Isle of the Ape go through a 10 foot wide tunnel, the giant ape can't follow them and they'll be safe.
* Isle of the Ape levels of unfair, easily wiping out even expert groups.)
* Isle of the Ape module. To prevent the players from simply teleporting past or otherwise subverting its dangers, several dozen spells are disabled or have their effects severely curtailed.
* Isle of the Dead ensues, as does paranoia, fear, and murder as the situation deteriorates.
* Isle of the Dead is raging on the island and the survivors aren't letting bodies sit around. Mrs. St. Aubyn comes completely unhinged in her coffin and, after she escapes, starts murdering people.
* is like this. Because the story is told from his perspective, you get a very vivid idea of what his job does to him.

* is noted as being the "epitome of Grecian beauty" from the waist up and as a centaur, she's a little over 2 meters tall.
* is noted several times by Velma to not make any sense despite appearing to simply be a large two story house from the outside. The ceiling of the first floor is three stories up, doors right next to each other lead to the middle of different rooms, and Velma first reaches the room she's staying in by walking in a straight line for several minutes.
* is not happy. Pit then pipes in and states, while they're at it, that he doesn't mind being called "sir".
* is nothing compared to the many, much stronger monsters you will face plays it straight with the Redhelm Arzuros, whose tough hide and tremendous strength tears down any hunter who expects an easy fight.
* is noticeable is male tortoiseshell cats: the tortoiseshell pattern is sex-linked (the gene controlling what type of melanin is produced is on the X chromosome, and in females one of the genes is turned off randomly in each cell early in development, so a cat with one Orange gene and one not-Orange (black) gene will have a mix of orange and black hair). In male cats, there's only one X chromosome, so normally either every cell has the gene for orange pigment or the gene for black pigment (patterns are produced by other genes, which can reduce or turn off the production of pigmentation in some cells). However, some male cats are chimerae with some Orange cells and some not-Orange (black) cells, so they can have both orange and black fur in different places depending on which particular cells happen to be there. (There are also other ways this can happen; the genetics of fur color in cats is complicated.)
* is not only alive, but also had another child — Apollo — with another man before she married Zak Gramarye.
* is not only one cool SoB, but he's also clever enough to keep up with masterminds like Diplomatic Incident and Prophet.
* is not sacrificed in the Fade, then Varric mentions that their love interest will meet up with them, implying that this trope is still in play.

* isn't always able to fully back up what he says, but it does result in some of the series' best lines.

* isn't an idiot and will react rationally to the information you reveal as you play. When playing against an actual idiot, they can be useless and counterproductive (for example, there's no point in trying to bluff someone who never folds), but if you know your opponent is an idiot, you can use an anti-beginner strategy to take their chips rather quickly.
* isn't a raving basket case when a would-be tomb robber unchains him.
* isn't as bad as the semi-sarcastic self-description she delivers...but goes along with it anyway because it's useful.
* isn't a warmonger, her father isn't dead, her sister never went insane, and she was never exiled or hurt. Thus, in order to escape it, Rarity would have to give up that.
* isn't beautiful, SpongeBob lets out a sad, little "I'm not?" and gets tearful.
* isn't bluffing. One of the few times the opposing commander refused that offer, the Charisian commander not only followed through, but let Siddarmarkian soldiers, whose nation and people had been damaged horrifically because of the Church's machinations, to lead the charge.
* isn't brainwashed directly, she still gets hit with this. Discord reunites her with her friends after
* isn't brilliant, but could get decent grades if she simply did the work.
* isn't delegated to a female student. When a male med student does dare volunteer to undertake such a task, he's usually complimented by his classmates for having nerves of steel.
* isn't entirely sure if he's dead or alive, either., has ended, and whatever happens afterwards, if anything, isn't for us to know.
* isn't even a real word. However, a lot of people still say it (when they mean "turret"), especially in the gaming community.
* isn't even in your game can affect it. It's still theoretically possible to start a game, play Platinum Angel at some point before that game ends, and lose the game without Platinum Angel having left play... but the text makes it as difficult to arrange as possible.
* isn't exactly in play. Harry once made the comparison that regular humans are the nuclear option of the supernatural world; when two scary guys duke it out where the public can see them, even if one is on their side, regular people would burn the both of them at the stake to be able to sleep at night.
* isn't for Sonic than a real threat for the large part, similarly providing a good chunk of the show's laughs.
* isn't fowl-mouthed. In the pet shop, the owner presents with him a parrot that when you pull the left leg, he says the Lord's Prayer, and when the right is pulled, he says the Hail Mary. The priest asks "what if you pull both?" and the parrot: "Fuck, then I'll fucking fall!"
* isn't heavily implies that if she survived, she will spend the rest of her life in seclusion hopelessly reliving her old memories with the greybox.
* isn't in Asia. Granted, it's not unusual even amongst geographers to consider it a separate region like how some might say Egypt is in a place called 'the Middle East' rather than Africa, but some go as far as to think it's separated from the mainland.
* isn't in Samosa's friends' story and isn't even real in-universe because it turns out to be the result of Samosa writing the episode. The scene ends with the show's theme song playing as if nothing weird just happened.
* isn't inverts this: He has no specific weak spots, but before you can harm him you have to first blast away his armour (so in essence you attack his strong points).
* isn't is still around, but its large number of still-extant national governments is something of a historical oddity, and a cautionary tale.

* Isn't It Ironic?: People use a song that they think is fitting without paying close attention to the actual lyrics.
* Isn't It Ironic? The title refers to ironic juxtapositions of events.

* Isn't It Ironic?: The work uses a song the creators assumed to be appropriate, but paying close attention to the lyrics will reveal that this song actually doesn't fit the scene it is being played in.
* isn't mentioned is if it's a genre piece, like one of the many Western-themed teen death songs.
* isn't met one another. For context, the New Day were wearing unicorn horns on their heads.
* isn't obvious unless you actually read the bestiary entry. Those bestiary entries also seem to think that carnivorous horses with tentacles are perfectly normal. Or chibi-style rabbits with feathery ears (some of them even have four ears) and a fluffy ball-like tail which is about the size of their body. While the Panthers do appear like big cats with dark fur, they're Coeurl-class enemies and so have a couple of tentacles growing out of their backs.
* isn't outlawed in current-day China. However, it is against the law for a member of the Chinese Communist Party (CCP) to follow a religion, presumably meaning you can't have a government job if you're religious. Moreover, some sects (like the Falun Gong, independent Christians, and Tibetan Buddhists loyal to the Dalai Lama) are banned/persecuted. Religion generally was suppressed in the early period under Mao, especially during the Cultural Revolution.
* isn't out to get promoted and replace her and is happy with his job, which was one of the reasons she was initially hostile toward him. This is finally solidified when he helps her get treatment for her alcoholism rather than using it to get rid of her.
* isn't purely episodic and has an overall arc, bears much more heavily down on the serious end of the scale, but still has some light scenes.
* isn't raises some... interesting questions about Castle's orientation.
* isn't really his creator's wife but rather an android based on the wife, which the creator made after the wife died. Notably, this was specifically this trope on the part of Data's creator; his "mother" truly believed herself to be human.
* isn't real, until the Piraka entered an area that brought worst fears to life... (Thankfully, Irnakk only existed briefly before vanishing.)
* isn't the punchline to the joke, like so many camp gay characters on this and other comedy shows. The punchline is that Stefon is so wrapped up in his bizarre New York underground club world (and most likely burned out from excessive drug use and lack of sleep — he does talk about being awake for three days and, in the Bruno Mars episode, his day starts at 7 o'clock at night...right after he wakes up from wherever he crashed and goes home to his trash can next to the Radio Shack on 23rd and 7th) that he has no idea what's considered "normal" or "family-friendly" (as seen with both his recurring appearances as the Weekend Update city correspondent and in his first sketch, where Stefon is the estranged brother of a Disney screenwriter who pitches a family-friendly sports drama).
* "Isn't this like being the best football (soccer) team in Greenland?"

* is number of possible ways that matter can assemble. Hypothetically, if you travel in an arbitrary direction, for an arbitrarily long period of time, you will eventually exhaust every possible 'unique' configuration of matter, and effectively enter a 'duplicate' universe that is identical to your universe of origin. This is the first entry of both classifications of Universes and considered the most likely to exist.
* Isobe Isobee Monogatari was given a permanent spot as the last manga in the magazine.
* Isobel had possessed Lana in season four, and brought back her fellow witches who possessed Lois and Chloe.
* Isobelle Carmody, Rushton and Elspeth love each other, but neither of them admit it until Rushton has an emotional breakdown and tells her that he thinks that she

doesn't love him because he can't use his psychic powers, when she was actually ignoring him because she thought he was carrying on with Freya.
* ISO, but he's actually genuinely sweet and honorable and won't go an inch further than he's been permitted to.

* is of use. It is eventually played straight when Hawk's trainer learns how very superior Takamura is through having learned the proper technique and how much of a backbone Brian Hawk lacks because of his lack of proper training.
* Isokist, who accidentally opened the first gateway to the Great Old Ones' home dimension and paid the ultimate price for their curiosity.
* isolated and teased, with an interest in death that others find off-putting. He jumps to her defense a number of times, and after she's eventually accepted by her peers and made troop leader, she invents a badge just to award to Rudyard as a show of her appreciation. At the end of the episode, Calliope also gets on with Rudyard's twin sister Antigone.
* Isolation and safety protocols are more talked about in the abstract then abided by. Isolation facilities should be larger and more secure given Arctic Biosystems extensive work with pathogens. In "Vector" Dr. Bryce is correct that he and Sulemani should be separated from the sicker Haven, since late stage infectees are super strong and violent. In "274" Daniel is likewise correct when he thinks now-symptomatic Sulemani and Bryce should stay isolated from the asymptomatic in quarantine, and Alan's failure to account for this violence results in Bryce and Sulemani's deaths.
* isolation created by such experiments, but as no-one had actually gone up into space at the time the results were not encouraging. However, the Trope does not apply to the relatively short missions that the astronauts and cosmonauts undertook in the 1960's (the longest was about 15 days). The problem begins when longer duration missions start.
* is old enough that he uses the Earth's age as a unit of time, such as thinking he hadn't been a hero in "about four Earths worth of time".
* Isolder on the other hand is captured by Teneniel and thus made her slave by her people's custom. The two of them fall in love, she sets him free, and they marry.
* Isolde, the mysterious lord of the Carnival, due to the curse placed on her when she was drawn into the Demiplane of Dread.
* Isometric Projection: A form of graphical projection that fakes a third dimension when only 2D graphics are available.
* Isometric Projection: A graphical projection that squishes the vertical axes, thus forcing perpendicular angles to look wider and more three-dimensional.
* Isometric, where a villain facing defeat proclaims himself inventor of the electric whip when the hero corners him, only for the hero to point out that he had merely pulled electric cables out of the wall.

Despite Sans' best efforts to fight back, he has never been able to truly stop Flowey, knowing that all his hard work will inevitably be reset. That's why he's so lazy. Oh, and everything above about Flowey (save the suicides, hopefully) applies to you, the player.

* is one of the few remaning members of a clan that launched a failed coup, leaving him and the other two suriviors as pariahs in the village. Very little attention is drawn to this difference in social status while they're dating or after they get married.

* is: people continue to live in the eponymous city in spite of the constant super-crime because of the sense of community fostered by having to work together to rebuild after battles. And because having a lot of superheroes around is cool.
* Is Phione a Legendary/Mythical Pokémon or not? Not even official sources can make up their minds on this one. A general rule is that Legendary and Mythical Pokémon are unable to be bred, even with Ditto. However, Manaphy (which was unambiguously classified as a legendary, but now classed as a Mythical, as detailed below) is an exception (as part of its in-game lore has it hatching from a unique egg). The result of breeding a Manaphy is Phione. It has only so-so stats (which are terrible compared to Manaphy's), learns none of the moves that make Manaphy unique, and doesn't evolve into Manaphy. Basically, it is a gimped version of Manaphy. This would be fine, but it is only obtained by breeding Manaphy or other Phione (it doesn't appear in any regional Pokédex either) and it is still

restricted from places like the battle tower/frontier/subway, a distinction which only box legendaries (Pokémon that would appear on the cover of the games) and Mythical Pokémon get. The side games treat it as a bonus character, while the anime treats it as any regular (if rare) Pokémon.
* is pissed at her. While she does forgive Sagwa when she learns, she still overreacted and makes sure Sagwa knows the importance of keeping a promise.
* I Spit on Your Grave and its first sequel take things further, with its protagonists sometimes torturing their enemies before killing them.
* I Spit on Your Grave: In the third film, Ron at first denies ever having raped his stepdaughter Cassie after Jennifer kidnaps him. She notes he'd yet to hear Cassie's name from her, revealing his guilt.
* I Spit on Your Grave inverts this, in it's about a woman who, having been raped and abused by hillbillies, returns to brutally torture and butcher them in revenge.
* I Spit on Your Grave is a movie from the "rape / revenge" genre, where most or all of the rape and revenge take place during the day, depending on which version you watch.
* I Spit on Your Grave is the epitome of this. New York writer Jennifer Hills is brutally raped by three men and takes revenge on all of them...in particularly brutal manners.
* I Spit on Your Grave: Jennifer and Katie in the first two films (original or remake). You can't blame them for wanting to get revenge that much. However, in the third film, Jennifer gets a lot less sympathetic as she starts going after people who she doesn't know have really raped or murdered anyone.
* I Spit on Your Grave Jennifer kills the leader of the men who raped her by seducing him into taking a hot bath with her, then slicing his nuts off causing him to bleed out.
* I Spit on Your Grave kills himself and falsely confesses to the murders when Jennifer's accused of them, so she'll be let go.
* I Spit on Your Grave mode, has one of her attackers tied to a tree and then proceeds to shove fish guts in his mouth.
* I Spit on Your Grave series. 2 films, an unofficial sequel and a remake trilogy since 1978.
* I Spit on Your Grave series, Jennifer goes vigilante on the tormentors of the women of the rape survivor support group she attends.
* I Spit on Your Grave: Stanley, who enjoys the rape the most and is the only one without redeeming qualities. The others even call him a sex maniac.
* I Spit on Your Grave: The third film has Oscar tell Jennifer his daughter's rapist was released because the physical evidence against him went missing.
* is portrayed as a monster towards his siblings while simultaneously not wanting to deny that the Japanese did very bad things to the Koreans and Chinese. Japan is technically not much less of a monster in it, but he does love his brothers. Possibly because they're just as bad.
* is possible in-game, it's done with Reflect, not Dragonblade, and requires Genji to deflect the arrow that Dragonstrike launches instead of the dragons themselves. In-universe, this is hand-waved as the Shimada clan's ability to "control the dragons" (whatever that means). For that matter, Hanzo is able to withstand the entire Dragonstrike, barely even moved by the attack. In-game, this would instantly kill any 200-health hero like him standing dead center in it. Additionally, the cutscene shows Hanzo using Scatter Arrow, an ability he can no longer use ever since it was replaced with Storm Arrow.
* is possible to get a wizard to use magic in armor, but with a drastic restriction in which spells they can then use as they have to then specialize in just one type of magic and only in specific spells. Look up the Battle Wizard build, which allows for casting in medium armor without penalties, but with a drastic reduction in versatility and number of spells they can both learn and use.

* I Spy as he sings the theme song. The show's title appears when the balloon pops.
* I Spy features a mini-game involving the balloon popper from the book the game is based on. There are three different tracks the ball can go down, but you need to find the correct pieces and put them in the correct places in order for the balloon to pop. Track One simply has you find the train or grocery cart hidden in the same screen, while Tracks Two and Three require you to find pieces from the riddle sections of the game.
* I Spy he knows more about desert survival, helping them to stay alive.
* I Spy: He's a white tennis pro! He's the tennis pro's black trainer! (That was terribly significant in 1965!) They Fight Crime!
* I Spy — Stale Beer Served In a Martini Glass. The "Stale Beer" element comes from the grittiness of espionage work coupled with the main characters often discussing and wrestling with their consciences regarding the moral ambiguity and the ethics of their profession. The "Served In a Martini Glass" element is that the assignments occur in glamorous international and domestic locations: Tokyo, Italy, Spain, Las Vegas, Palm Springs, etc.
* I Spy, Robinson and Scott are sent to deal with an oriental businessman who wishes to retire in his homeland, but the IRS is blocking his request for an exit visa until he pays his overdue taxes.
* I Spy's character is a boxing champion known for one-hit KOs. Not exactly a "kill", but it would definitely end your career if you went down from one punch.
* I Spy, "The Name of the Game". Kelly and Scott are the quarry in a deadly game of hide-and-seek. The hunter: a general obsessed with the idea that he's been betrayed.
* I Spy, where American Heavyweight champion boxer Kelly Robinson decides to take on "European Champion" Cedric Mills, who's generically Eastern European.
* I Spy which actually filmed the real locations an episode was set in: Hong Kong, Rome, Greece, Mexico, etc (although studio work was also done in Hollywood).
* is questionable, the fact is that Pantuflo is always depicted as having trouble at the time of helping Zipi and Zape with their homework.
* Israel also has a significant presence in the Israeli criminal underworld. You'll hear them speaking Hebrew or Russian as opposed to Yiddish in this country. Sometimes, Israeli/Palestinian Arabs will also be seen as members of various criminal gangs and syndicates.
* Israel behavior. The large majority of Beitar's fanbase are descendants of Sephardi and Mizrahi Jews who were expelled from North Africa and Arab countries after 1948, who had historically been economically and socially disadvantaged in Israel; that may explain their extreme hatred of Muslims (reflected in some of their more charming chants as "Death to all Arabs" and "Mohammed is a fag"). Both sides also drag the media into it, claiming they overlook the other side's hooliganism for political reasons.
* Israel built the West Bank Barrier between itself and the West Bank (and a separate one around the Gaza Strip). The wall has been very controversial, but it has demonstrably reduced terrorist attacks within Israel since its construction.

* Israel defeated five enemy nations threatening to destroy it and doubled its size in the process - what to do with the area and the people living in it.
* Israel essentially pulled this in the Six-Day War with their air force. They leveraged superior equipment and training in a preemptive strike to disrupt enemy air power, then held air superiority for all ensuing combat operations.
* Israel for the Romans' battering ram to reach it. Unfortunately, the occupants of the fortress lacked the manpower and weaponry to fend off the Roman forces when they finally reached the top.

* Israel has a chronic problem with a shortage of organs, as for whatever reason Israelis have a surprisingly low rate of organ donation (8% of Israelis are registered donors, while in most Western countries the level's closer to 35%). It's not entirely clear why. Unfortunately, people who don't like Israel or Jewish people have played this up when given the chance, and still more unfortunately, a small number of Jewish people have given them ammunition by engaging in organ trafficking (which is to say, taking
* Israel has last-minute "get out the vote" Scare Campaigns as an institution, where they're called Gevald Campaigns. One of the most infamous is 2015's "Arabs are voting in droves" video courtesy of
* Israel has the Golani Brigade (Army paratroopers), Shatyelet 13 (Navy commandos), and the Air Force in general.
* Israeli actor Yigal Naor has played Jews (obviously), Persians, Romanians, and Arabs. He's particularly popular for his ability to speak Iraqi Arabic, which he learned from his Iraqi-born parents and which is distinct from Standard Arabic.
* Israeli Air Force, the long range attack on Iraq's nuclear reactor. A force of heavily laden F-16's and F-15's traveled across Jordan and Saudi Arabia at altitudes as low as 30 meters before popping up to completely destroy the reactor complex. Ground defenses were taken completely by surprise and not a single Israeli aircraft was damaged.

* Israeli children's book that's all about this: the kid's embarrassing, stay-at-home dad has his time to shine when the kindergarten has a moms' baking contest and his apparently bland cake explodes into fantastic sugared roses. Awww.
* Israeli comedian Adir Miller once said that he finds humbling experiences funny. He gave an example of a man who stopped at a red light next to him and gestured at him to lower his window; when Miller complied, expecting a friendly compliment, the man said, "You’ve never made me laugh!"
* Israeli comedian Shalom Asayag once joked that he broke a world record in lowest grade possible, "earning" a -10 on a test. He got a zero for showing up but deciding not to take it, then lost an extra 10 points because his school required that students bring a notebook documenting every test they take, and he forgot to bring it.
* Israeli comic artist Uri Fink created a superhero team of a Jew, a Christian and a Muslim, appropriately named
* Israeli Defense Forces require you to put in time as an enlisted man first. Enlistees with leadership potential become squad leaders first, and only the best of those are permitted to attend officer school (Kurs K'tzinim). That's for line officers, anyway; engineering and medical officers are trained at civilian universities in something similar to an American ROTC program.

* Israel in both its modern and classical incarnations has always had Judaism as a central aspect, both in the country's identity and its international policies. Having the idea of theocracy kicking around is inevitable when you bill yourself as "the Kingdom of God", but while classical Israel (and Judah) played this trope dead straight the modern one subverts, double subverts, or plays with it. It's always claimed to be the Jewish State or "Hebrew State", Judaism defines itself as both a nation and a religion, and during the classical period it was ruled as a monarchical theocracy based on an alliance between religious judges and the royal family. Today there are several religious political parties (some of which even have the primaries decided by a council of Rabbis) and various other snippets, like personal law (marriage, inheritance, divorce) is handled by religious courts relating to a person's background (Jewish, Muslim or Christian). However, most modern Zionists were nationalists and emphasized the ethnic aspect, the government is run as a democratic parliamentary republic that has supremacy over religious law and can freely elect non-Jewish members. Including those from Muslim, Arab, and Christian parties, as well as normal parties whose platforms are decidedly not Old Testament.

* Israel like the men, though they are more likely than men to get an exemption, and have to serve a minimum of two years instead of the men's three. They are placed in combat units only if they volunteer to do so, though it should be noted that most combat units are male-exclusive due to potential problems with a unit's social dynamic (for example, tests have shown that male combatants tend to lose their better judgment when a female comrade is injured much more readily then if a male comrade is wounded). Female pilots are still allowed and are relatively

common.
* Israel loves Iran, Iran loves Israel, because this campaign was practically asking for sarcastic and cynic replies, but then Israeli and Iranian citizens decide to make it really serious and call for peace between the two countries.
* Israel!—well enough to produce a good translation of at least one classic of modern Arabic literature into Hebrew, spoke English better than anyone Henry Kissinger had ever seen and is reported to have had an impressive command of Hebrew, as well.
* Israel, one of only nine countries in the world that can conscript female soldiers and one of only two who does so regularly, along with Norway to a lesser extent since 2014. Several infantry and special forces units employ female soldiers and operators within the country and the first Muslim Arab to serve in the military (and to serve in actual combat) was a woman serving the CSAR force known as Unit 669.
* Israel's nuclear strategy has relied on this: even though they've never officially admitted to having nuclear weapons or that Israel would use them if the existence of the nation was threatened, other countries know Israel has them and in what event they would use them. Israel knows they know about Israeli nuclear strategy, and they know Israel knows they know. The end effect is that all involved can conduct diplomacy and military strategy on the basis of everyone knowing about the nuclear weapons without anyone admitting they exist.
* Israel's Project Samson plan can be set to work similarly, meaning that once the nuclear devices are armed even if the entire government is killed at once they will still go off. That being said, the government could decide not to use it, depending on the nature of the threat.
* Israel's TROPHY system which protects tanks and other armored vehicles from incoming anti-tank missiles.

* Issei: The Gaming Gear: When Issei calls the Purifiers that want to kidnap Asia "suspicious old men in cosplay", three of them seem to be more affronted about the suspicious, old and cosplay parts than the other accusations.
* is sent back in time along with Tony and turns against Thanos. She tries to hint at her plan to Gamora while fleeing but does a poor job, causing Gamora to think she's still loyal to Thanos. Similarly, Nebula thinks Gamora understands the plan, causing problems such as Nebula stealing the Power Stone and Gamora chasing her down, thinking she's taking it to Thanos.
* is sent in the suicide mission of conquering Iserlohn with an understrength fleet.
* is set in 1928 California, just before talking motion pictures became popular.
* is set in 2028, so the teen protagonists would have been born in the early 2010s, still in the future when the story was started. It predicts that around this time, there would be a widespread trend for Japanese parents to give their children Western names (extending to roughly half the teen characters in the story). We're now past the deadline and this hasn't happened.
* , is set in a future where Marinette and Adrien have been dating since high school and are engaged to be married. However, both have become convinced the other is cheating on them, due to frequent suspicious disappearances and flimsy excuses, but neither of them can say anything to the other without risking their own secret,

forcing them to confide in their respective best friends and their partners. When Nino and Alya get tired of their complaining, they force them to confront each other about it, leading to a heated argument where both become angry at the other's accusations. It gets to the point where Adrien decides to clear himself by admitting to being Chat Noir... but his wording — "I'm fucking Chat Noir, okay? That's why I have to leave." — predictably has the exact opposite effect, getting Marinette, Alya, and Nino furious at him until he transforms to show them the truth.
* is set in a world in which the majority of the bots are females (as well as humans involved in the American political scene).
* is seven feet tall and an absolute bombshell according to both Izuku and Midnight.
* Is She Really Going Out With Him? casual clothing (including muscle-shirts), it tends to be pretty clear why he and his girlfriend are on that show.
* Isshin Ashina, the patriarch of the Ashina clan, was known as the "Sword Saint" in his youth. While his age has long since caught up with him, his swordsmanship is arguably even more refined than during his prime; despite being terminally ill, he's still capable of easily slaughtering entire ninja squadrons in his guise as the "Tengu of Ashina", an alter-ego he also uses to secretly mentor Wolf in swordsmanship.
* Isshin became an exile from Soul Society twenty years before Chapter 1 as a result of a series of events that lead to him losing his shinigami power.
* is. Shit goes down the toilet when he experiments, and since that's almost everything we see him do...
* is shown frantically trying to build a second device to counteract the first one, but the SWAT Kats find a means of defeating Hard Drive without resorting to weapons before he finishes it.
* is shown to have been sabotaging her fellow cadets in order to improve her chances of making field agent. Rather than have her neuralyzed and sent back to the Air Force, the higher ups take Xander's suggestion of giving her an assignment she'll hate. She ends up as the liaison to the alien race in charge of the porn industry with the offer that if she lasts five years without incident, she'll be made second in command of the Intelligence Division (which is three or four steps away from her dream job of becoming a Branch Director).
* is shown to work both ways when Ranma's interest in Kirche causes Louise to start lusting after her as well. When Ranma is nearly killed by Wardes, Louise reacts on instinct the next time she sees Wardes and blasts him off the airship they're on.
* is simply because it's illegal that is, which leads the viewer to think that there would be no problem if it was legal.
* is sleeping with his mother, thinks their secret is out because everybody (who he angers for unrelated reasons) keeps calling him "motherfucker".
* is so adorable and purely good that Tony finds himself wanting to wrap him in cotton and protect the kid from any and all harm. After their first meeting, Tony resolves to protect Peter's innocence and idealism when he learns Peter is a superhero because he feels obligated to help others simply because he can.
* is so adorable that hardened hitponies and mafia dons fold like a house of cards in front of her. In the final scene, she gains her cutie mark (a kitten licking an ice cream cone) that signifies her special talent is being unbearably cute.

* Issola, Vlad considers how to get friends out of ceramic wrist bindings. He rejects the break-the-hand approach primarily because he doesn't have the oil he'd need to slide the hands out afterward.
* is sold in Spain as "Colgate", because Spaniards would say "Cuélgate"

(KWEL-gah-teh) instead. Some of them still snicker. In fact, there are a couple of jokes regarding Colgate whose punchlines are about one of the speakers being Argentinian.
* is sometimes canon in that if you were to talk to one of the Toads as Luigi, said Toad praises him and wonders if he should call him and Mario "Luigi Brothers" from now on.
* , is so powerful that curiously tugging on the magic attempting to summon him causes the entire building said summoners are in the jerk, and is old enough that he uses the Earth's age as a unit of measure (at one point he notes he hasn't been a hero in about "four Earth's worth of time").
* is so skilled at games that she kicks ass by avoiding attacks and using clever methods to dispatch the enemy. She yells out attacks she invented because Ride Players don't actually.
* is specified in the books, although until her gender becomes publicly known, Vimes thinks of it as a kilt.
* is split between those Losties left behind on the Island, who start jumping to different points in the Island's history
* is stalked by a presumably dangerous tiger ("Lassie and the Tiger")
* is starting to doubt his best friend's innocence regarding the rape and murder of a fellow friend. But he's of the "kept silent" variety who continued to destroy evidence with the rest of the group.
* is still alive and presumably sends him money and set up the apartment, but he's underage and living completely alone. Mostly to stop the Spirit of the Ring from putting other people in comas, of course, which just makes it worse.
* is still standing though, and the White House is later shown to be repaired. Half of the Capitol's dome has been destroyed as well, but it too is still standing.
* is strongly hinted to have had his fingers cut off later. This and other tortures make him accept being framed for murder.

* Issue #13 features an entire town full of people who talk like this because they've been terrified into being as ludicrously wholesome as possible by an alien-possessed priest.
* Issue #13 is a single-issue story between two long arcs, and contains no superhero action.
* Issue #13 was released on March 21, 2018; March 21 is Kate's unofficial birthday.

* Issue #15 game "Nightmare House". A character can decide to separate their psyche from their body and explore the House on the Astral Plane. If they do so, however, they risk becoming Lost or having the House successfully attack their Psyche. If either occurs, the House can possess their body and use it as a weapon.
* Issue #17 adventure "Tir Nan Og". The title island has two beaches, one of which has pools of dangerous quicksand. Anyone who falls into one of the pools will sink under the surface in 1-4 minutes and drown 2-8 minutes later. It is impossible to escape the quicksand without help.
* Issue #1 adapts different moments across the Lee-Romita era in a single story. Its main subplot is Flash going to Vietnam (which happened in ASM #47), while also dealing with Peter's first meeting with Norman Osborn (which happened in ASM #39-40).
* Issue #201 article "The City of Lofty Pillars", Al-Qadim campaign setting. For each year that a person spends inside the city of Iram, ten years pass outside in the land of Zakhara, the Land of Fate. When the person leaves Iram they

* Issue #206 article "Dragon's Bestiary". The Faerie Fiddler can play a tune that distorts time. For each hour a person spends dancing to the music, one year passes in the outside world.
* Issue 208 "Planet of the Dead". The planet Devil's Island's population is made up of criminals. It's monitored by a law enforcement battle station in orbit but the prisoners are mostly left to their own devices.
* Issue 208 "Planet of the Dead". The planet Vegas Prime is entirely covered in all manner of vice dens.
* Issue 20 features "Adventure Me", a story shown from the first-person perspective of a friend of Finn and Jake hanging out with them, whose identity is not revealed until the very end of the story (for the record,
* Issue #210 article "Too Evil to Die". A hit by a keres' whip or a hit by a dark lord can age the target by 10-40 years if they fail a saving throw.
* Issue 210 had a dedication to comic artist Jeremy Dale, who worked on comics that were included with the figures of the 25th anniversary relaunch of the
* Issue 215 is dedicated to the memory of Herb Trimpe, who was an artist for the original
* Issue 221 "Beastworld". Tannadize 4 is very similar to Devil's Island above: the prisoners are left unsupervised but are watched by an orbital police post on one of the world's three moons.
* Issue 22 of Justice Soiety of America gives us a further glimpse of the future,
* Issue #234 gives a truly stupid example: A corrupt tycoon's hired guns shoot at Superman using 50 millimeter shells. Then one of them uses a shotgun. Later they try to punch him, and their boss headbutts' Superman's stomach.
* Issue 23 gives us Orion Pax (Optimus Prime before he had the Matrix), a tough no-nonsense police captain who, when his subordinates are murdered by senate goons trying to free Whirl (a bullying officer under Prime who himself was jailed for beating on a wrongfully-incarcerated pre-evil Megatron), ends up having to use the corpse of his lieutenant Springarm in motorcycle mode to dispatch of the two goons... one of them by

* Issue #24 adventure "The Lair of Maldred the Mighty". A metal trunk has Mort (a Glyph of Warding that causes destruction) laid on it. Anyone who touches the trunk without saying the glyph's name will set it off. Anyone affected by the glyph is turned to dust.
* Issue #24, in which Alfred and Damian go through the Wayne family photo archive while Batman does charitable work.
* Issue #25 adventure "A Rose for Talakara". The evil wizard Talakara used wishes from a Ring of Wishes to prevent anyone else from entering her castle by means of
* Issue #26 adventure "The Great Paladin Hunt". In order to escape a tribe of

gnolls, several paladins must cross a swamp. One of the hazards of the swamp is quicksand, which will drag the victim under the surface in a few minutes. The victim has no chance to escape without outside help.
* Issue #26 article "Treasure Chest". The Dagger of the Dunedain kills any undead it hits and turns it into dust.
* Issue 26 was dedicated to Jeph Loeb's son Sam, who died of cancer around the time of publishing. It featured a short story about about a young friend to Superboy that is also dying of cancer and was also named Sam.
* Issue 281's cover showed another redesigned character, this time Dulcy the Dragon from
* Issue #28 article "Fiend Factory". When a birch spirit grabs a target's heart, over a period of 1-4 minutes the target will age 10% of its initial age per minute. For example, if a creature 20 years old were affected for 3 minutes, it would age two years per minute for a total of six years.
* Issue #28 gives us Raghor and his beast-soldiers, an offshoot of Project Abomination created by fusing Evronian DNA with that of the Beasts of Rangar to give them superior strength, speed and resistance to damage. During their test ride they're surveilled by a dozen times their numbers of regular Evronians, whose leader Zortag decided to put brainwashing devices in their helmets after they went on an unauthorized mission. The beast soldiers being just that good, they actually managed to overpower their guards before Zortag could activate the devices and then went to try and kill a temporarily
* Issue 28 "Last Man on Earth". The Wheel was the fifth planet of Alpha Centauri. It was a planet-city ruled by a dictatorial
* Issue #29 adventure "Nymph's Reward". In the Spider's Lair room in Vexia's treehouse, anyone stepping on the fifth step of the stairs will cause the steps to flatten down, and anyone on the stairs may slide down into the nest of spiders at the bottom.
* Issue 29 "The Moonstealers". The planet Joaphat is covered entirely by a gigantic city with no areas of countryside.
* Issue 2 has a Daily Bugle, with the fight between Wolverine, Sabretooth and Spider-Man in the cover, titled "Spider-Man: Menace?". In another sector, as a secondary and less interesting piece of news, "Sentinels take N.Y.".
* Issue #2 (May, 1956) is a theme issue for stories set in the wilderness, introducing three would-be protagonists. The first is Eagle Feather, a
* Issue #30 adventure "Thiondar's Legacy". The Stone of Gul is a divine artifact of incredible power. One of its abilities is to stop its owner from aging. If the owner should ever be separated from the Stone by more than one mile for more than one day, the owner will become their true age, which may make them either very old or even dead from old age.
* Issue #36 adventure "The Sea of Sorrow". There is a ghost ship that haunts the Pirtel system. If anyone comes within 50 feet of the ghost ship, they must make a saving throw against spells or age ten years.
* Issue #36 article "The Druid's Grove". In the Grove, any creature caught in quicksand will be sucked under at a rate of 1 foot of the victim's height every six seconds.
* Issue #37 article "Bloodsuckers". One of the proposed alternate rules is that instead of draining two
* Issue #3 (July, 1956) features Doug the "sardine", a trainee frogman (term for combat divers) who has to prove to his fellows that his short stature is not a liability to the team. Again, not a winning concept for an ongoing series.
* Issue #3 starts with a quick summary of the previous two issues in a 50's style sepia-tone and slightly simpler-draw ponies, ala the educational film from "Hurricane Fluttershy".
* Issue #3, which featured Mr. Freeze kidnapping a choir of orphans because he thought they were being exploited for being made to sing Christmas carols.
* Issue #411's original cover art featured Alfred mistaking crime scene tape for the finish line of a foot race. This cover art was deemed in poor taste after 9/11, so art director Sam Viviano hastily prepared a new cover: a stock image of Alfred

with an American flag in place of his missing tooth.
* Issue #41 adventure "Deadly Treasure". After the wizard Zathis creates his tomb, he uses a
* Issue #41 adventure "Old Man Katan and the Mushroom Band". One of the hazards of the Glitchegumee Swamp is quicksand. Anyone who falls in must make a Wisdom check or sink below the surface and drown within five minutes. If the person is moderately (or more) encumbered, they will sink under in three minutes.
* Issue #42 adventure "Legacy of the Liosalfar". Each hour spent in the Faerie Realm equals 24 hours passing in the mortal world.
* Issue #42 adventure "The Lady of the Mists". When the "immortality" (actually delayed aging) potion wears off, the recuipient quickly ages to their true age, causing death from old age.
* Issue #42 article "Demons, Devils and Spirits". The hamaculi is a horse-like demon. Any creature hit by its right front hoof will immediately age 3-30 years, with no saving throw.
* Issue #42 ends with one between Ivy and Harley after they escaped the Joker's Daughter.
* Issue 4 of Vision's 2015 series briefly shows Vision talking with his wife while he is fighting Giganto with the adult members of the All-New All-Differant Avengers. At the same time, the teen members are underground searching for Mole Monster in issues 3 and 4 of Nova's 2015 series.
* Issue #4 was released on June 21, 2017, which happened to be the 11th anniversary of Kate Kane's first appearance.
* Issue 50 features a story where a cursed book (part of a trap laid by the Lich) pulls Finn into his memories and his past lives (including Shoko and Davey Johnson).
* Issue 52 "The Mask of Fear". Milo's World had a moon called the Alpha Moon Death colony, which was used to exile political prisoners who harvested radioactive ore under horrendous working conditions.
* Issue #53 adventure "Steelheart". One random encounter in the realm of Vaasa is quicksand. If someone falls into the quicksand and isn't rescued, they will be sucked under the surface in a couple of minutes and drown.
* Issue #55 adventure "Spiderbite". One possible random encounter is quicksand. Anyone who falls in will sink deeper at a rate of two feet per minute unless they are thrown a rope.
* Issue 57 "Galactic Lawman". The planet Mynos has a penal colony made up of prisoners from the planet Tara. The criminals are forced to perform hard labor and are brutally treated by the guards.
* Issue #59 article "Fiend Factory: The Great Hunt". One of the two most powerful reavers is Barbatos, High Reaver and Master of Hounds. When he uses his Mass Domination psionic ability on a living creature, that creature will age 2 years each ten minutes that it remains under his domination.
* Issue 59 "Starseeker Squad". The planet Bessel has an Earth city/colony that covers the entire planet.
* Issue #5 adventure "The Rotting Willow". One of the dangers of the swamp near the village of Rotting Willow is quicksand pools. If a
* Issue #5 article "Witchcraft Supplement for Dungeons and Dragons". The Secret Order witch spell Wither will cause any living plant or creature within a 50 foot radius of the spell's impact point to rapidly age and die.
* Issue #5 in the main canon that instead shows that changelings are born with these holes, that they live and age normally, and that the holes and generally emaciated appearance is the result of them constantly being hungry instead.
* Issue #5 (November, 1956) is another theme issue, featuring "manhunters" (people who take part in an organized search for a wanted man or fugitive). The protagonists are Detective Harry Fowler,
* Issue #60 adventure "Nemesis". The final battle against the marilith Kaliva takes place in the Shrine of Shaktari. The Shrine is protected by powerful magic that prevents entry by any kind of magical teleportation, such as
* Issue 61 "Escape from Devil's Moon". The planet Catraz (AKA Devil's Moon) has a

human penal colony with harsh working conditions. Catraz has no atmosphere and the colony is next to a nuclear waste dump.
* Issue #61 has two adventures with this feature. In "Wildspawn", the monsters known as syllix secrete a thick gelatinous slime that turns into solid pink crystal after twelve hours. When it does, it is impossible to pass through the crystal using spells such as Teleport and Dimension Door. In "Dreadful Vestiges", the area around Holk House is protected by magical wards that prevent any kind of extradimensional movement spells, such as Teleport, Dimension Door, Phase Door and Blink.
* Issue #64 adventure "Bzallin's Blacksphere". For each hour spent inside a magical Coffin of Timelessness, one day passes in the outside world.
* Issue #64 adventure "Short People". Two halfling thieves try to trick the
* Issue 64 "The Exterminator". Vanderdecken is a vast, ancient city-planet. Although this mysterious world is millions of years old, everything on it is in perfect operating condition.
* Issue #69 adventure "Plague from the Past". The bite of a ghost spider causes the victim to age 2-12 years. A series of bites in combat could cause the target to suffer death from old age.
* Issue #72 adventure "Mistress on the Mere". While in the swamp known as the Mere of Dead Men,
* Issue #72 adventure "The Necklace of Brisingamen". One of the mummies the

* Isuca gives us Tamako aka Tama. She becomes the True Name Slave of the series protagonist, and happily obeys his every command. She's also a strong demon whose true form is that of a giant two-tailed cat.
* Isuca has all the main characters go through this. Shinchiro is all but abandoned at the family apartment, when both his stage magician parents go globe-trotting "for training" over an extended period of time. What's worse is that in the process, they also force him, a full-time high school student, to go get a job as well because they cut off his funds while leaving him responsible for the daily and monthly expenses involved in living at that apartment. Isuca's parents "go missing" seven years prior to the start of the story, (making them legally dead), and she has to live in a mansion, alone, taking on the dangerous job of "demon slaying," again, alone, because the rest of the family, save for her maternal grandmother, wants her dead or gone. Her cousin, Suseri, is forced to undergo a training regiment that would be considered felonious child abuse just about anywhere else because of her mother's inferiority complex towards Isuca's mother, up to the point that (in the manga, at least) she would put her own daughter's life in peril, without hesitation, for even the slightest chance to steal away Isuca's chances to

take the title of Clan Head so that Suseri will become a Puppet King. Granted, Social Services probably aren't equipped to deal with the supernatural, but all the mundane stuff that these characters go through should raise some eyebrows.

* I Surrender, Suckers (it's complicated), the Maximals pretend to surrender themselves to the Decepticon, in exchange for allowing one of their (exaggeratedly) injured comrades to use the repair bay inside their commandeered base. Starscream buys it, and locks the Maximal and their leader Optimus in the brig as leverage while ordering the rest to attack the Predacons. Turns out, though, that's exactly what the Maximals wanted, as it puts the two "prisoners" in a perfect position to retake the base.

* is very much this. In an attempt to stay faithful to Chrétien de Troyes's text (and to be as literary and unrealistic as possible), it's very distanced: all the effects are intentionally obvious, all the sets are made of monochrome painted cardboard and aren't to scale (to emulate medieval illustrations), the background is plain blue, etc. To be more up to the trope, Rohmer modernized the text of Chrétien de Troyes in a way that it is technically modern French, but with the original syntax and metric (octosyllabic versification) and often with an archaic (but correct) vocabulary.

* It (2017), the titular entity no longer has the original story reasons for assuming the form of Pennywise the Dancing Clown. In the book, this was because IT could not change forms on a whim and IT's guises followed the rules of the form it took; for example, a werewolf form would be vulnerable to silver bullets, but scary clowns have no rules, so it's an ideal avatar. In the film, though, IT can shapeshift at will and IT's weakness is simply that its victims' imaginations can overrule IT's plans, so there's no real reason for IT to default to Pennywise other than the fact that it's such an iconic character.
* It (2017) very quickly became a close knit group of friends, especially the actors who played the Losers. There is plenty of behind-the-scenes video that show them hanging out together and having fun. There have also been many instances where the cast have posted their support for each other's projects outside of the film series. They write that they are "best friends", and encourage their followers to watch/support their work. * Itachi's death was questioned, despite Madara implicitly stating that his body is lying around somewhere by saying Sasuke could have taken his eyes. Made even worse during the winter break of 2009/2010, when he made a "reappearance" which readers could tell was just genjutsu from a mile away. And then completely finished off when
* Itachi's Story, Itachi, while massacring his clan, uses Tsukuyomi to give his girlfriend Izumi a vision of marrying him, having children and growing old together, thereby resulting in her having a relatively peaceful death compared to the rest of the Uchihas.
* Itachi Uchiha is the Black Sheep of the Uchiha clan, being the only one in his family who does not believe that being an Uchiha makes one superior, and eventually massacres all but one member of the clan.
* Itachi Uchiha killed everyone in his clan except for Sasuke. A bit of a twist, since
* Itachi Uchiha. Sasuke looked up to him before he massacred his clan, but after

realizing he was forced into it, avenging what happened to him becomes his motive for revenge. This is not a good thing, as the
* Itachi Uchiha uses both Intimidation and Illusion, since he generally starts any fight off by using illusions to take out his opponents, then uses as much force as necessary to end the fight without killing anyone.
* Itachi. What's that, Danzou? You need me to kill my entire clan to prevent a war? No problem! Okay, it's not that simple, but you get the point.

* It actually has a rather good attack of its own, but most people overlook it. The thing can create an Ion Storm around it, giving it an immediate-area attack field. The storm also buffs up any other Scrin aircraft around it. The Mammoth stands no chance.
* It actually implied that Starfleet can produce ~40 ships in less than a year. In-universe, Starfleet decided to
* It actually is a small world... when comparing urban centers to rural. The reason humans tend to run into each other — even across the Earth from where they met — is they tend to hang around cities and other places where humans live. If the entire human race of several billion people were put into a megacity at the same population density as New York City, it would be the size of the state of Texas. Seems big, but compared to the amount of available land on the earth is pretty tiny - .0046% of the total land area of the Earth. Still, if you landed at the central space port of that city, the droids you were looking for would most likely not be within any kind of walking distance, let alone on the route you have randomly chosen.
* It actually makes sense for them to keep throwing rocket launchers, tanks, helicopters, etc. at you when you're fighting the bigger things on the infected side. They know damn well that they can't hurt that monster, and that you'll do less damage than it will, so they have an interest in making sure you win even if they'd prefer to see you dead under other circumstances.
* It actually makes sense since the GN fields are condensed particles held by a field. A similar weapon like a beam saber which functions under similar principles would be unable to penetrate since the field holding the saber together would be disrupted and the particles would just disperse. This would result in the need for a humongous amount of particles to rupture the field, much less damage the unit it's protecting (which the O-raiser did by freaking creating a giant beam saber on the Empress). GN blades, on the other hand, were solid weapons; as a result, after meeting the GN Field head on, it could simply push its way through the field to hit the unit. Although it was thrown in on episode 25 and read as a Deus Ex Machina, it wasn't justified due to the GN Arms having PIERCED the Alvatore's GN field before said revelation.
* It actually seems like this trope applies to elves in general: they all need
* It actually seems to vary. Some Taken are essentially zombies, but when Doroga describes the process, he only refers to death of the mind, rather than of the body. Since Takers can control corpses, presumably the Vord just don't look after their Taken's health, leading them to die naturally of thirst or starvation anyway.
* It actually varies in the Japanese series. Sometimes there are long dramatic transformation sequences, and others the transforming happens instantly. As with
* It actually went both ways, humans hate the Helghast and want them dead, and it didn't even begin with a speciesist conflict. It began with the Helghan Corporation objecting to the UCN's unfair treatment of the corporations they sent to colonize planets for resources, and the ISA was sent to drive them out of Vekta, forcing them to settle on the only other world they had, Helghan.

* It actually works in his favor. Considering that literally everyone he's fought has pulled new and unheard-of secret techniques out of their ass when he fights them, trying to plan ahead would be a pointless exercise. * It affect it only works because the attack damages the system necessary for Aiwass to manifest in the physical world, and lack of said system will erase Aiwass from existence. Even then it simply wills itself back to existence. It states that even if it dies, it will manifest again in 1000 or 10000 years, since it is not of this world to begin with.
* It. After the Losers' Club gets together and they compare stories of having encountered the monster, Bill questions his dad about Derry's sewer system and goes to the library to read up on what kind of creature they might be dealing with. Mike brings his father's "Derry album" down to the Barrens so they can research the town's history (and after the events of 1958, he interviews several older Derry residents about what they saw during key tragic events). They excavate and build their underground clubhouse and turn it into a "smoke-hole," hoping they'll have a vision so they can personally see something that will help them defeat It. And so on.
* It after watching a bunch of werewolf and vampire movies. Ben sacrifices one of his late father's vintage silver dollars to make a pair of mean slingshot pellets, and years later upon returning to face It again he regrets giving the rest of the old coins away because the new Susan B. * "It ain't got nothing to do with luck. Fortune delivered you into my hands."
* It Ain't Half Hot Mum) allowed the whole cast to showcase their talents, notably Don Estelle's singing. The trope is subverted in one episode where an outside recruit is brought in and proceeds to demonstrate his many impressive talents - singing, playing the piano, tap dance, ventriloquism and more. In the end, the men conspire to get rid of him because he risks replacing Lofty, who will then have to be posted "up the jungle".
* It Ain't Half Hot Mum" An episode in which Williams's will was read revealed that he too was only hard on the squad for their own good, and he thought they were all "grand lads, especially little Lofty".
* It Ain't Half Hot Mum as they burst in and out of the various doors to the same room, all miraculously managing to just miss each other.

* It Ain't Half Hot Mum, Michael Bates, who played bearer Rangi Ram, died of cancer in 1978 between Series 5 and 6. The character was written out of the remaining three series.
* It Ain't Half Hot Mum officers argue that the men (being tough members of the lower classes) should miss out, while the men naturally think this trope should apply.
* It Ain't Half Hot Mum: Rangi dismisses the other Indians as 'ignorant natives' and uses phrases like 'we British' when talking to the crew. Michael Bates based this aspect of the character on similar encounters he'd had with social-climbing Indians in British India.
* It Ain't Half Hot Mum where Sergeant Major Williams wants to marry a local

Chinese girl, only for Chinese mafiosi to try to kill him because the girl had previously been engaged to one of them. Sergeant Major eventually ends his relationship with her. In another episode, two of the men fall for Mrs Waddilove-Evans's Burmese maid.

* Italian and British ships had to run through the enemy blockade, with British convoys from Britain bound to Malta and Egypt facing the Italian blockade and Italian convoys and isolated ships bound to Libya dealing with the Mediterranean Fleet.
* Italian- and German-Americans were interned as well, although in much smaller numbers. However, they were free to leave the camps as long as they proved their loyalty to the U.S. and were able to get a job or go to school outside the defense zones, and many joined the military to prove their loyalty.
* Italian army due combat experience. This ended up being more useful than anticipated after the debacle at Caporetto, as the new troops sent to the front lines to replace the losses were already trained and skilled, if inexperienced.

* Italian Spiderman has to be seen to be (dis)believed. SUSPENSO! It was so well-received that it was expanded into a series, presented as parts of a recently recovered copy of the full movie.
* Italian Spiderman is a spoof of the many foreign-made knockoffs of American superhero properties that came out in the '60s and '70s.
* Italian Spiderman parodies this trope, with the "Il Gallo" (a fictional label, mind you) cigarettes often smoked by the main character — he even blatantly exhibits them during one episode.
* Italian Spiderman when our hero (who's already chainsmoking his way through the entire film anyway) takes time out to do nothing except really enjoy a fictional Il Gallo brand cigarette and reflect on how good it is for a while.

* Italian tropers will witness an example of this every year. The famous comedians Cristian DeSica and Massimo Boldi's "Christmas holidays" series is probably one of the grossest examples of this trope, featuring mainly naked women, explicit sex, bad words, farts and belches, and it counts dozens of movies (considered "family movies". God knows why). Lately, the duo split. With the result that each one of them makes a movie like this every Christmas, doubling the rate of production. This could be applied to 3/4 of Italian television actually. Vulgarity is so widespread on the mainstream channels that even certain shows or cartoons that aren't

particularly vulgar where they were produced (most notably the Simpsons) have numerous sexual innuendos and foul words.

* It all depends on how close they were to death. Those who suffered brain damage tend to mistake people for others, suffer memory loss, and in general act like hollow imitations of the original person. * It also acts somewhat like a flame at times, for instance, when wind blows, it will flow in the wind like a flickering flame, and if you pay attention small parts will fly off and disappear like small bits of flame.
* It also affects hand preference; if you are in a country that drives on the left, in a right-hand-drive car, requiring left hands to shift gears and you're a right-handed?
* It also allowed for the replacement of a VP that died or resigned, when there was none before; the sitting president simply went without.
* It also apparently doesn't translate written language. The same episode hinged on only Rygel being able to read a book written in an archaic language from his own world, which he had studied as a child but hadn't used in decades. John also has to teach Aeryn how to read English even after she learns to speak it.

* It also appears that he can speak Japanese in "Summer Belongs to You".
* It also appears that the Guardians are always all-female; the previous team, CHYKN, was also all-girls, and it is implied that that is tradition.
* It also appears to cause some substantial changes to the characters of the users. Habitual users of Chaos magic become chaotic themselves: power-hungry, backstabbing, untrustworthy, unstable, and conflict-prone. Order users can become passive, hidebound, rules-obsessed, and excessively conservative, even reactionary.
* It also appears to work flawlessly, but can only be used for erasing short periods of time (up to a few weeks). For longer periods, they switch to a chemical agent which is supposed to do the same job. It doesn't work quite as well, leaving behind pieces of memories.
* It also applied to the army. The Legions had fought and destroyed a number of hostile races over the centuries, but because of all those victories, it was entirely possible that you could go through a tour of duty in the Legions without fighting a single major engagement if you weren't serving on the Shieldwall because the other regions no longer bordered any enemies. This costs them dearly in the initial battles against the Vord.
* It also applies to old Phyrexia; the process of Phyresis in The Thran is very akin to transhumanism, since Yawgmoth not only cures the afflicted of their phthisis, but also transforms them into war machines and then explains that they are the future heroes of the Thran (heh).
* It also backfires on him, since, by denying magic, he banishes himself back to "our" world.
* It also bears noting that the infinite super fireball can actually be carried into a new game if you open the gate, get the powerup, save, and instantly start a new game, allowing you to use your infinite super fireball to make the game significantly easier... and much more fun. This was made an official feature in

* It also brought "Minnie the Moocher" by Cab Calloway back into the public consciousness.
* It also calls back to an earlier comment Arthur had made about the Masquerade: that the real secret has never been the
* It also came to Europe from Persia—a Muslim country. (Check Mate is from Sha-Mat, Persian for "the king is dead.")
* It also caused prices of the original Walkman to skyrocket on sites like eBay selling for hundreds if not thousands of dollars.
* It also claims that the disease was the result of cells turning into viruses. While viruses do infect cells and use them to reproduce, they don't cause cells to transform into copies of them.
* It also comes up outside of names for Nightmares. For instance, there's the High School — which is literally high, being housed in the Mad City's tallest buildings — and is a finishing school — in that anyone who ends up there is pretty well finished, either turning into one of the aforementioned Ladies In Hating, or just disappearing. Meanwhile, Mother When has a yardstick which she uses to cut students down to size when they don't measure up.
* It also comes up when the Justice League discovers that one of their own members,
* It also contains a mild inversion: the human mecha all have faces and the first

Anti-Spiral units seen, part of the Extemination System, are abstract machines with no organic looking features. They're quickly dubbed Mugan or "Faceless". They still look like
* It also contains the popular misconception that shows up a few times below that
* It also converses the previous game's use of this. Ask Archangel how he put together a team to take on the underworld of Omega and he'll reply he followed Shepard's example; he started doing something about the criminals and people got inspired and joined up.
* It also covers most of the planet, with the world inhabited by humans being only islands in the middle of Lake Mobius within the Dark Continent.
* It also creates adverse withdrawal symptoms if one gets addicted. Jason's went static, and he became more aggressive and desperate. It also gave him a boner from hell when he overdosed on it, and had to have the blood painfully removed from his penis.
* It also deconstructs some of the cartoon formulas (such as typical clichés, and cartoon anatomy),
* It also demonstrates the skill of the British tankers, in that, despite Jeremy being in a car with a lot of "viewing ports" and essentially 360 degree vision, they still managed to hide from him. You heard that right: a 63 ton MBT managed to jump a man in a vehicle designed to have high visibility.
* It also depends if he is scoped in or not. Almost all of his voice responses have two recorded versions, the loud boisterous version he uses when not scoped in, and the quieter menacing version he uses when he is.
* It also didn't help that the League of Non-Aligned Worlds, consisting of dozens of races, only had one vote on the council, which is what eventually led to the League's dissolution.
* It also didn't help that Tony Clifton (Kaufman's abusive lounge singer character) managed to continue touring after Andy's death. It would probably be more of a puzzler if not for the fact that the entire point of the Clifton character was to present a fictional person as if they were real, and to convince people that it WASN'T simply Andy Kaufman by occasionally having someone else play the role and confront Kaufman on stage, because then there wouldn't be an easy explanation for how a fictional character could survive the death of their actor.
* It also didn't hurt that when the show started in the 1960s, most episodes only ran once with little to no way to view it again.
* It also did this to an extremely obscure, unreleased demo song called "You and Me" by Penny and the Quarters.
* It also does a fine job of tearing down buildings, doing a minimum of 7 damage and up to 12 damage against any kind of building. A single chainsaw-equipped unit can reduce a hardened bunker 30 meters across to so much rubble in as little as 90 seconds and can cut bridge supports inside 30 seconds, enough such that even the toughest bridge would be unable to support heavy units trying to cross it.
* It also doesn't have any form of optical stealth, so even at maximum concealment it's 100% detectable if the enemy so much as looks out their window. This is a non-issue in practice, however, since the vast distances of space mean that combat virtually never happens in visual range.
* It also doesn't help opinions when a lead designer goes on record with,
* It also doesn't help that for them to continue to survive in the world of Runescape, one of them must be sacrificed in a ritual every 500 years, meaning that even if no one manages to kill any of them, they'll still go extinct. It's just a matter of time.
* It also doesn't help that Jiro's friend, after seeing his fearful reaction from being touched by a female student,
* It also doesn't help the issue that we as the reader know the future, but characters in canon do not.
* It also doesn't hurt his physical abilities are some of the most well balanced around. There are stronger, but they usually have nowhere near his speed and agility and those who are more agile and faster are nowhere near as strong.
* It also doesn't hurt that the sonic screwdriver can open any lock (except a

deadlock seal), and disable pretty much any other security device, or that the TARDIS isn't exactly inhibited by walls. In fact, the sonic screwdriver was so convenient for getting the Doctor out of danger that the showrunners wrote it out entirely for the Fifth, Sixth and Seventh Doctors' tenures.
* It also existed in other forms depending on the market. There was a custom version for NY stations called WWF NY, though SSN would still air on another NY station. Markets not airing the show on Saturday night got Shotgun or Shotgun Challenge. Canada got Canadian Superstars. Eventually, they were replaced with Jakked and Metal, which had the same matches in different order with different commentary and recaps intended for different aged audiences.
* It also extends to speech, everyone hears him speak in their native language. This makes one person realize that Morpheus is who he claims to be when he realizes that he's hearing him speak in English even though his father-in-law (who doesn't know English) is conversing with Morpheus in Greek at the same time.

* It also features a montage of two of the characters earning badges they are blatantly making up as they go, including the Wig Spotters Badge, the Stealing A Pair Of
* It also features a subversion: In "Down the Rabbit Hole", the team discovers that a
* It also features the Xerbians in the role of the good aliens. Sadly the Xerbians are the survivors of a previous Evronian invasion and have little military power left (their help is more
* It also gave us the train conductor sarcastically asking "Got any more bright ideas?" When Spidey's first attempt to stop the runaway train fails. Because imminent death is no reason to stop being a smartass.
* It also gets parodied twice, both times involving Joey. One episode has him flip out over meeting a guy whose
* It also gets referenced in the episode "Behind the Laughter" when it's called a comedy classic, and then deconstructed when we see
* It also goes deeper than the skin. Surgeon-Marshal Lacey isn't picking his nurses on the basis of their looks, but on their skeletal structure—he has a theory that the skeleton tells all, and that a more "perfect" skeleton indicates greater human potential. In a way it's a twist on phrenology, but it's justified in-universe (unknown to him) because of
* It also got pulled quite a bit when he was a tied to a chair hostage in a Game Heroes kidnapping promo. Considering they had a gun at his head and he was already scared out of his mind, it's safe to say they were just doing it for the dominance factor.
* It also had a case where the “good faith” clause would have applied. It was when the Gravedigger was having her hearing to see if she could be tried.
* It also had a mission that essentially switched the game from third person Hack & Slash to Arcade Shooter - it consists of nothing but manning a heavy gun turret and keeping the firing button pressed for about ten consecutive minutes in order to shoot down an Exospector and the armies of critters it shits out in regular intervals.
* It also had a sequel, with Godzilla romance a female kaiju with a giant can of Diet Dr. Pepper.
* It also had a unicorn with 4x the hit points of the dragon. This wasn't even in the game proper; it was intended as a GM's "pet", but the mechanics allowed players in certain circumstances to attempt to summon any NPC in the game. Players who thought the dragon wasn't enough of a challenge would have a go at the unicorn. If superbly equipped, it
* It also had one of the most advanced air-conditioners of its day to keep the crew from cooking in the cockpit and special paint for better cooling.
* It also had side effects in Canada, as several television providers

(particularly Bell) source their U.S. east coast network feeds from Boston (some providers alternatively use Buffalo, Detroit, and/or Rochester instead)—but rights to 75% of U.S. network shows are also held by Canadian networks, and they will typically play along with U.S. preemptions to ensure they can get the valuable "simsubs" that keep them afloat.
* It also had Trobriand's and Scaladar Automatons, which were sometimes made in the shape of giant scorpions.
* It also had two Danish dubs, the first from 1953 and the second from 1998.
* It also had two Dutch dubs; once in 1995 for VHS and again in 2005 for DVD.
* It also had two Dutch dubs, the first from 1949 and the second from 1995.
* It also had two Finnish dubs; one in 1967 and the second in 1992. There was also a "Read and Listen" storybook cassette dubbing released in 1984.
* It also had two Finnish dubs, the first from 1966, and the second from 1984.
* It also had two Finnish dubs; the first was done in 1971 and the second in 1994.
* It also had two Italian dubs; the first in 1948 and the second in 1968. Gianfranco Bellini participated in both dubs, as adult Bambi in the original and Flower in the second.
* It also happened in a season six episode with Ted and Zoey. It starts out normal and sweet, but an hour later it's evolved into a genuine argument to show how
* It also happened in some Polynesian islands during the 19th century. The natives readily adopted British guns and shipping technology and used it to unify Hawaii or conquer (and genocide) the Chatham Islands from New Zealand, for example. Other times, Western interference resulted in civil wars and ended with the carving up and colonization of the archipelago, such as in Samoa.
* It also happened once with Blair anchoring the ship, after the disastrous brunch in
* It also happened to Tsunade herself. Back in her genin days, she was called flat-chested by Jiraiya. The difference between her child and adult physiques was lampshaded in an omake of the anime.
* It also happens frequently when families with more than one child go on vacation, for the same reason.
* It also happens frequently when someone is questioning a suspect in the interrogation room, and someone else is talking to the interrogator from behind the one-way glass. When this happens, the interrogator will usually respond to the person on the headphones, and the suspect will think they were talking to them.
* It also happens in a more traditional sense. Nodoka confesses to him and explains to the other girls that she likes his maturity and determination. Cue numerous other girls beginning to be attracted to him for the same reasons. Up to and including
* It also happens in "Catch That Train!" when Czar Tyrone's train ends up in a tunnel while Uniqua and Pablo go off after it. We hear a cat screeching, along with a chicken clucking, a telephone ringing, and a weird talking device.
* It also happens in "Foul Play in Funland" after the Funland Robot destroys the gang's
* It also happens in "Grumpy Old Men," when scouts Cindy and Libby attempt to help the elderly Jimmy across the street, as he yells "I'm being old-napped!"
* It also happens in "Justice", again with Rimmer, who kept attempting to object to Kryten's statements despite Kryten being his defense attorney. Though it's a bit more understandable this time around, as Kryten's defense consisted of "Rimmer is too stupid and incompetent to have been responsible for the crime he's been accused of."
* It also happens in Luigi's Engine Room, when Bowser activates his "Make As Many Coins As You Want Mecha" to create a coin for the player (at the cost of 20 coins).
* It also happens in the episode "Don't Touch That Dial" when Mighty ends up in the Ring-a-Ding show and the gang chases him, which is a parody of Scooby-Doo.
* it also happens in the season 4 episode Death Takes a Holiday; when the little boy asks Dean to hit him as hard as he can, in order to teach the boys how to
* It also happens offscreen in one episode in which he ends up in jail for trying to get Quagmire's job back; he says at the end of the episode that he was

* It also happens that Hado #88, Hiryugekizokushintenraiho is a form of this.
* it also happens to Holtack himself. His platoon sergeant "advises"
* It also happens to Jack Donaghy, when he doesn't realize that a remote mike is broadcasting him while he gives himself an extremely embarrassing pep talk.
* It also happens to Joan of Arc and Jeanne the Witch (who later becomes C.C.) in
* It also happens to South Italy (Romano) in an old strip when he tries to charge at Germany. He trips on the peel, but winds up with a skinned arm and forehead from landing on his face.
* It also happens to the other guys. Raj wakes up in the morning next to the blonde who took him home drunk the previous night. She is middle-aged and possibly eighty pounds overweight. After another drunken night, he wakes up in bed with Penny.
* It also happens when Roy is complaining about a girl he dated who was a jerk, and then admits he still slept with her before breaking up.
* It also happens within the team, as well. The second episode had Casey and Sarah accusing each other of being rogue with Chuck caught in the middle. The penultimate episode of season two starts with Chuck and Sarah gone rogue to save his father, with Casey in pursuit. A season 3 episode has
* It also happens with the arch-chancellor and Granny Weatherwax on a broomstick in
* It also has a crew of five which makes it a fine way to transport between missions except for the sixth member of the squad who tends to get run over a lot.
* It also has a lot of real video game characters in it. Some, like Fix It Felix Jr. and Sugar Rush were made for the film.
* It also has an exaggerated and quite literal example with the Richter quintuplets (all
* It also has an example in the Ghost of Christmas Future: while he still looks like
* It also has a number of larger, thicker tentacles that it can use to grab anyone closing in melee. It then violently shakes them and vomits poisonous bile all over them.
* It also has a pretty widespread example in Bowser himself as a playable character; since he can't jump, half his adventuring has you try and figure out ways round very small ledges that Mario and Luigi themselves can simply jump right over.
* It also has a very open view on masturbation and treats it as normal behaviour. Several strips revolve around the female characters buying or using vibrators.
* It also has "Carrionettes", which are malevolent self-aware marionette puppets that can use magical needles to trade bodies with living people. Their true purpose in existence is to swap bodies with some poor sucker, so they can enjoy being flesh and blood, and thusly they only associate with other monsters in return for the prospect of being given a victim to take for their own. The most dangerous of these is Maligno, the darklord of Odiere.
* It also has four Brazilian Portuguese dubs: the first from 1949, the second by Herbert Richers from the 1980s, the third by S&C Produções Artísticas from 1993, and the fourth by Double Sound in 1999. Interestingly, all that remains of the 1949 dub are the songs (which appeared in Richers' version). The 1993 dub was made to the Ludwig Von Drake "Mickey and the Beanstalk" segment only.
* It also has four Japanese versions. The first dub was made for the 1996 VHS release which was also carried over to the first DVD release. The second dub was made for broadcast in 1998 on Fuji TV. In 2000, third dub was aired on TV Asahi. Finally, the dub fourth dub included on the DVD re-release and Blu-Ray release. In all four dubs,
* It also has four Latin Spanish dubs: three in Mexico, and another in Venezuela.
* It also has Ifurita, one of the cutest forgotten super weapons in this trope. Compact, devastating and wound up by key.
* It also has Lynn Wersching and AL-05 appear earlier as they investigate Wily's home.

* It also has regular sharks, the megalodon (giant prehistoric shark) and weresharks as well as Sekolah, the sahuagin deity in the form of a giant shark. The Sahuagin themselves are sometimes depicted as basically
* It also has several noticeable parallels to the British Empire during its height. Just like Atlas on Remnant, Great Britain was at the heart of the industrial revolution on Earth, and one of the reasons for Britain's dominance was because of the sheer amount of goods Britain churned out (which is paralleled in Atlas' economic dominance). The notoriously massive and powerful British navy is comparable to Atlas having a massive and highly advanced fleet of airships ready to unleash
* It also has some basis in real life too. During the American Civil War during the first few battles, civilians on both sides were so excited about the action that they would have picnics on the hillside and watch the fighting.
* It also has the effect of making the words sound childish, accenting the
* It also has the limitation of being unable to bring people back from the dead. How the heroes know this is never revealed.
* It also has the power of illusion to make the hallway to Carol-Ann's room seem five times longer than it really is.
* It also has the rare distinction of being a canon version of an Omake-everything that happens in the Another Day chapter takes place in a parallel universe from the main game, and reading the Secret Reports will clue you in that
* It also has Thermal Vision, which highlights heat signatures (non-combatants aren't highlighted).
* It also has the spell 'Extract Water Elemental' which is basically
* It also has the unfortunate side effect of stopping his heart for the duration, which is why he cannot and does not use his Geass back-to-back. In the end, it's what actually killed
* It also has the Vent Glitch used by speedrunners. Switching to first person view while in a specific position in a specific vent causes Snake to go out of bounds. Guiding him then to certain spot causes a cutscene to be triggered that advances the story to the part where
* It also has this when Vanellope shows off her kart, the "Lickety-Split", which is notably less impressive than the other racers'.
* It also has three French dubs; the original from 1938, another from 1962, and the current from 2001. The reason why Snow White was fully redubbed in 2001 was because Lucie Dolène (who voiced Snow White in the 1962 French dub) sued Disney over the copyright of her voice and won, instead of her part being redubbed (like with the French dubs of The Jungle Book and Beauty and the Beast), Snow White was redubbed.
* It also has three Latin Spanish dubs; two for Mexico (1989 and 1997) and one for Venezuela (1994). The first Mexican dub was made at the Grabaciones y Doblajes studio, with big-name voice actors (i.e. Arturo Mercado as Charlie, Francisco Colmenero as Carface, and Diana Santos as Anne-Marie); this dub is available on all DVD releases in both Latin America and Spain. The other two dubs have occasionally aired on TV, but are impossible to find anywhere else.
* It also has two Brazilian Portuguese dubs: the first by Mastersound for DVD, and the other for SBT.
* It also has two Thai dubs. One dub made by Sound Factory in 1996 and the other by
* It also has two Thai dubs: the first from the 1990s and the second from 2003.
* It also has Vimes show himself to be aware with regards to the Stealth Hi/Bye used by the History Monks — not that it helps. He sees a monk, and then a cart begins to pass in front of him. He drops to the ground, watching the monk's feet. As it's partway past him, his feet are still there. As it's halfway past him, his feet are still there. As it's mostly past him, his feet are still there. When it's completely past him, he's gone.
* It also has what might be the dirtiest joke ever in a Disney cartoon, and says something about Mrs. Goofy's day. The doorbell rings and it's the milkman and when Goofy answers the door the milkman leans in with his eyes closed and plants a big

kiss on Goofy's mouth. After the milkman leaves, unaware of whom he kissed, Goofy looks to the audience and says, "Gee, what a friendly cuss!"
* It also helped that "Don't Have A Cow" and "Eat My Shorts" were the names of racehorses. And that Don't Have A Cow won that day's race, beating out Cowabunga and Yabba-Dabba-Doo.
* It also helps if you can find an episode about a product that interests you, a food you particularly like, or a workshop of master artisans really selling their trade.
* It also helps that everyone knew perfectly well that God had better things to do than manifest physically at a wrestling event and that it was basically a glorified handicap match against Shawn.
* It also helps that he'd since taken enough damage to reveal his robotic endoskeleton.
* It also helps that he's the character providing most of the game's
* It also helps that he was directly and blatantly based off of Alexander the Great: he didn't run out of worlds to conquer, he wanted to push into the outer fringes of the galaxy, past the range of the Astronomican (where his Navigators couldn't guide his ships). His officers outright refused to continue. Subsequent books make it clearer that he was actually assassinated before it could get that far, which had a huge downside: if he had brought his troops back along the way he came, he might have been able to prevent a war breaking out, but because he died so suddenly, his supporters turned on each other.
* It also helps that it is relatively easy to train someone to use a spear effectively, as opposed to weapons like swords.
* It also helps that Lucian's title during the beta testing was "The Gun Templar".
* It also helps that REX was in itself already a knock-off of Metal Gear Mk. 1 and Metal Gear D from the first two MSX
* It also helps that the heroes have seen the vision of the future where
* It also helps that the theme itself is an upbeat version of the Emperor's Theme, symbolizing that a moment of great celebration is also the first step the galaxy took on the road to empire (with Palpatine getting elected Chancellor).
* It also highlights that the poor guys are really clueless in real tactics and, as Anders later admits, are just getting their ideas from movies. So, literally
* It also implies that there is trade, as in the epilogue, a huge corporation makes a "Dimensional Elevator".
* It also included Kimimaro about to kill one of the persons mentioned, only to be interrupted because it was time for that person to take medicine.
* It also includes a track recorded at a live screening of the film, featuring audience participation callbacks. However, it was made for/taken from the 1995 laserdisc, and thus has some
* It also includes commands about formation; "kick it out x" or "reel it in x" based on real-life commands for formation spacing distance.
* It also includes the fact that Newton's laws of motion still apply, and not pulling energy from elsewhere will drain you quickly. The main character, Garion, tries to lift a large rock when he first learns of his power. He succeeds, but
* It also includes the "Fleshwarper", a prestige class which allows one to
* It also includes vegetables like carrots, which hang from the bush like tomatoes.
* It also initially struggled when it first aired in the US under Fox Kids, who tried to market it exclusively to young boys but kept a lot of the romance elements beyond the canceled first episode, which might have contributed to it being much better received in other English-speaking countries (particularly Canada) and being quickly pulled from syndication.
* It also introduces Spike, Ace's monkey sidekick who gets more screentime in the animated series.
* It also is a plot point for the Water 7 arc. The reason the blueprints for Pluton exist in the first place was because the original planners designed it as not an offensive measure, but a
* It also is probably no coincidence that the Black Mesa Research Facility is

located in New Mexico, putting it in the general region of the real world
* It also is the source of an extremely unusual example. The creator of
* It also is ultimately subordinate to Kowloon, a stationary city-state in the middle of the ocean.
* It also is used to keep a coherent rank structure when a military unit is temporarily but significantly expanded, with the breveted soldiers being returned to their official rank after the enlarged unit is reduced to its original size. For example, George Armstrong Custer is often remembered as General Custer despite dying as a Lt Colonel, because he was breveted to Major General during the Civil War, was returned to his permanent rank of Captain after the war ended, and then started working his way back up the ranks again.
* It also lambasts the serious end of this trope with the Roary, a small silver award given for the most gratuitous use of the word "fuck"
* It also leads to an embarrassing incident of Dax accusing an innocent man of the murders because he'd accessed the plans and replicated one. He collected exotic weapons as a hobby.
* It also leads to dilemmas, such as a job that requires 4 years' experience in a particular software package, and the job applicant applying actively
* It also leads to some rather bizarre court cases since there are some legal issues where the gate clones are not always considered separate individuals. In one case, a person had two death penalties against him for Manual Operation under the Influence (essentially getting a DUI on a starship, which both needs a manual operator to be installed and
* It also led to a profoundly satisfying moment or two when Malekith unwisely provokes Tony with a changeling crack or two (Tony had recently discovered that he was adopted), and gloats about
* It also makes a brief appearance after you break out of the testing chambers. GLaDOS will attempt to get you back into the chambers by opening up a chamber with a heart on the wall. If you are stupid enough to go into the chamber, she will flood it with neurotoxin, killing you instantly. This leads to some
* It also manages to avert the "Earth-is-the-center-of-the-universe" cliche, both by all the characters (save the engineer born on Earth) amused at the idea of liberating it because it's become so pitiful. Even to Humans like Beka, "the homeworld" is Tarn-Vedra, not Earth,
* It also means producers can use Windows Bitmap files on a slow device or connection to induce slow-loading images when the plot requires one.
* It also mean you don't get any Challenger-like failures between parallel components, because there aren't any, (unless you're using booster rockets).
* It also mentions "Economics 2.0", the foundation of the society of the post-scarcity transhuman intelligences formed by modified uploaded humans and AI. It apparently isn't possible to understand nor engage in Economics 2.0 without your conscious mind being altered to the point where you are quite clearly no longer human, which also handily avoids the need for the author to explain what such godlike beings might trade in, or why. It's somewhat implied that the superintelligences are trading in lesser intelligences for control of creativity and novelty, but the characters observe from indirect contact with the remnants of other post-Singularity societies that they end up autocannibalizing as the superintelligences use (and use up) one another in their ever-more-complex economic interactions.
* It also mirrors Ren's situation with Kyoko to an amusing degree—not the fake romance, but the need to maintain the reinvented identity and therefore to stay apart from the girl he likes. Hell, she's even similar, with the Cinderella angle.
* It also must be pointed out that contrary to massively popular belief the above quote was not a boast but lament. If there was any mockery intended then it was not toward Jesus or Christianity but toward the people he was complaining about, who were letting their fandom get
* It also needs to be remembered that an appeal is not a rehearing of the original case. Appellate courts will almost always defer to the original court's finding of

fact, unless it is patently wrong. What an appeal does is review whether the lower court erred in its application of law to the case, or whether proper procedures were followed or whether the action was constitutional, or within powers and so on. Grounds of appeal are thus usually quite narrow (exceptions exist in some countries where the same cases actually
* It also noted that modest young ladies attending jousts would often come prepared with several spare veils to pass out as favors without having to risk their modesty (or catching a cold).
* It also occurred in a later series of strips which involved Sally Brown expressing her concern that Santa could, "have a coronary in some kid's living room," and visiting a department store to tell the Santa there to watch out for his cholesterol and try to, "check for a crease in his ear lobes."
* It also occurs as a side effect of "Borrowing" (inhabiting the mind of another creature). Borrowers tend to return to their body with some animalistic behaviors and urges that gradually wear off. When Grannie Weatherwax does bees, she "bzzzts" for a while after returning to her body.
* It also often applies within planets or even single cities. It's especially used in the
* It also plays a role in the 2009 season finale "The Drowned and the Saved", and many others.
* It also plays during the sequence in "Squid's Day Off" where we see Squidward going insane and blocking off his door to his house to prevent him from going back to the Krusty Krab to check up on SpongeBob.
* It also plays with the idea that dwarves are always craftsmen by including a clan of dwarf
* It also plays with this trope with some things, such as freem, which are explained as the amount of pay a "Poliflorian Hypernetter earns about two thousand Freem during one Efrickalian work-week."
* It also plays with this trope with the spell Shadow Conjuration. It summons quasi-illusory monsters that are as powerful as the real thing if you believe they're real, and one-fifth damage if you don't. Like all things D&D,
* It also proposed a solar-cell sphere around the orbit of Mercury, held up by the solar-sail effect and leaving a gap around the ecliptic for the planets and the aforementioned cloud.
* It also provides an "assist" during battles, which shows which brother(s) will be targeted by a certain attack, though you can turn this off if you want (and it's not available in the rematches).
* It also provides an example of this trope taken a step further, with Aliens
* It also pulls the "first call is fake" variant in both versions, as the first victim tells her tale of the tape, and then receives a call from her mother just to unnerve the audience. Unfortunately, it also
* It also qualifies as "forever" because it raged on and off for about 160 years until
* It also received a Swedish redub in 1989, with Olof Thunberg reprising his role as Trusty.
* It also received three Czech dubs; the first in 1993, the second in 2002, and the third in 2008.
* It also received three German dubs; the original in 1938, one in 1966 and the current one in 1994. The second dub tries to be more "child-friendly", while the third dub actually caused controversy.
* It also received three Latin Spanish dubs. There's the original dub by CINSA, the second dub by SISSA, and the third dub by Sonomex. Most releases contain the first dub, while the second dub was released on Netflix. TV airings randomly switch between the two redubs.
* It also received three Persian dubs. One in 1976, a second in 1981, and the third made around 2010. George Petrossi voiced the title role in the latter two dubs.
* It also received two-and-a-half Italian dubs; starting with the original dub for the film in 1952, which was released to VHS twice in the 1980s and again in 1997.

Then, there's the 1992 dub for the stand-alone version of "Mickey and the Beanstalk" with Ludwig Van Drake. Finally, there's the 2003 DVD dub, which is entirely the same as the 1952 dub, but for the "Beanstalk" segment, re-uses the voices from the 1992 dub of the stand-alone version. The only elements from the 1952 dub that are kept for this segment are a few scenes that have Edgar Bergen's narration overlapping, such as "My, What a Happy Day" (although the Harp's one speaking line and second song, "My Favorite Dream" are still used from the re-dub) and a few lines from Willie (notably his dialogue in the entire ending scene where he lifts Bergen's roof, searching for Mickey).
* It also received two dubs in Hungary. The production of the first version was fueled by a dose of ignorance on the dubbing directors' part. As the show's dub was very popular, the movie became quite disliked for not keeping the series cast (except Stan, Cartman, and one apiece of Mr. Garrison, Jimbo, and Ned's recurring voices), though it wasn't half bad. This is why the second dub got produced, a full decade later, for using the then-current voices from the series. This counts as a
* It also received two Dutch dubs, with the current being done in 1996.
* It also received two European French dubs; the first in 1990 and the second in 1998. Ariel, Carlotta, and Ursula's French voice actresses reprised their roles in the 1998 dub, but the majority of the main cast were played by different people. Also, the redub retains the 1989 version of "Poor Unfortunate Souls". Like the German version, the 1998 re-dub was highly criticized by French fans and specialized press. Because of this, it only remained on the 1998 VHS and 2000 DVD, while the original 1990 dub has been retained since the 2006 DVD, after multiple petitions.
* It also received two Finnish dubs; the first in 1969 and the current in 2005.
* It also received two Hindi dubs; the first one was made produced by Main Frame Software Communications for Disney Channel India and the other for another channel and home video by Sound & Vision India.
* It also received two Hungarian dubs. One released in theaters in 1989 and the second on DVD.
* It also received two Hungarian dubs; the first was done in 1962 and the second was done in 2001.
* It also received two Japanese dubs; once in 1962 and again in 1981.
* It also received two Norwegian dubs, one from 1983 and again in 1994. Unn Vibeke Hol voiced Snow White in both dubs.
* It also received two Swedish dubs: the first from 1982, and a TV-exclusive dub in 1996. Only the original dub is available on home video releases.
* It also recived two Hungarian dubs, the original from 1962 and the second (and current) from 1999.
* It also reduces the level of available EVE you have...unless you have the appropriate gene tonic, in which case it
* It also repeats minorly with Amanda (Slippy's Girlfriend) and Lucy, Peppy's daughter.
* It also rounded out Sheridan's "set." Like the Minbari, his three wives were Anna (worker), Elizabeth (warrior) and Delenn (religious).
* It also says something about the nature of Culture society when Hegemonising Swarms / Space Locusts are a common "villain" in Culture children's stories.
* It also seems that no matter where you are, a transporter is a transporter. Bad guys from races who've never seen a Federation ship before seem to be able to beam anywhere from seconds of looking at the transporter console if they can manage to reach it.
* It also seems that what is considered magic by, say, Hobbits, isn't always thought of as such by, say, Elves, which makes explanations difficult and/or unnecessary. This is because, as Galadriel points out, the word for "magic" used by the hobbits covers what to the elves are two distinct concepts, both elvish "art" and "sorcery" which is the term for the works of Sauron and the Ringwraiths. Of course, even in Sindarin the term for "sorcery" is just the prefix for "dark" or "black" (mor-) thrown on the word for art, lore, or knowledge (
* It also seems to apply to normal sized ones. In the prologue, we see Carl

selling balloons at the zoo. He lets go of his cart for a moment, and needs to grab ahold of it before it floats away.
* It also seems to be what version of the virus, Fawkes and the DC mutants were made with an early version. The Master's army was the "newest" resulting is most being at least human level mentally. The Enclave's mutants updated the Master's but due to their racist views they designed it to make them dumb.
* It also seems to imply that using the Fountain of Hui without the Eagle Scope results in pain as well as the huge head and random fact-spouting, given that Omi's immediate action after saying the length of the world's largest toenail is to grip his head and complain "Ow..."
* It also serves as a breather movie before the third, which came out 6 years later, focusing on Lightning's sudden downfall and fear of an imminent retirement from racing forever.
* It also serves as the default way for a winner to be declared, as there are card effects that can outright declare a player the winner, as well as card effects that can declare that a player loses.
* It also serves to hide the identity of the wearer. After all, if you encounter a power armor soldier half your size, you'd immediately think of all the races you know that size (hint: 1). A generic human size means the identity isn't easy to guess.
* It also should be noted that any association with Chaos tend to corrupt a person. More often than not it reaches
* It also showed how they mimicked the voices as well, with a thin strip of circuitry placed at the base of the neck (which somehow affected sounds made mostly in the
* It also shows that looking the part doesn't make a person this trope. Bad spies are fairly easy to tell apart (and kill) from real teammates since they often don't act like the class they are playing as. Good spies, however, are often impossible to tell apart from your allies until the knife is in your back.
* It also shows them more or less raising human girls to be sex slaves, with nightly orgies in their all-girls schools. This can come off as
* It also shows up at all sorts of other conventions, often with thematic house rules.
* It also shows when Zuko participated in the fight against the Red Lotus with Tonraq, Desna, and Eska. While he lasted a good while longer than the latter two, who are exceptionally talented young waterbenders, he was floored by one solid hit from Ghazan (and fighting at night in arctic tundra, a place where he's at his weakest, likely did not help).
* It also snows in the epilogue OVA, one of the most romantic sections of the whole series.
* It also sounds like the French word "oui" (yes). Which lead to some jokes among French gamers.
* It also sounds like the Turkish word for arid, which is quite fitting.
* It also sparked off something of a "dreadnought fever" among the British public, something proponents of naval expansion took gleeful advantage with the slogan "We want eight and we won't wait!" The result, as Winston Churchill wryly noted, was "The Admiralty had demanded six ships; the economists offered four; and we finally compromised on eight."
* It also subverts in a different way, with Gundam Exia's GN Blade, an enormous metal blade that was designed to penetrate GN Fields, something that normal beam sabers couldn't do.
* It also subverts it a bit; when Animal Man finally gets face to face with "
* It also takes a considerable amount of time. The 30 light-year jump is pretty much instantaneous, but to get to a jump point can take days if not longer from a planet, and once you get there the JumpShip needs to recharge which, depending on the facilities at a jump point and the star it's now orbiting, can take anywhere between days and
* It also takes Cornelius Fudge's refusal to believe Voldemort was back in the original series to the logical extreme. He denies it even as

* It also tracks achievements separately on its own servers for all players with an online account (including those who didn't buy the Steam version). Notably, most achievements have multiple versions for the different difficulty levels (excluding the easiest modes for which no achievements are awarded), and the
* It also translates to "Quick! More boiling oil!" in yet another language. Considering one of the characters is an insane emperor, this has
* It also turned up in older episodes, along with massive bouquets of flowers, for Samantha Bee's interviews, to parody Barbara Walters.
* It also turns out that the Masked Man is a brainwashed, reconstructed Claus, who was found by the Pigmask army after his failed attempt to get revenge on the Mecha-Drago, then used by the Big Bad
* It also turns out the that the final door in the game requires two keys, and they have to be turned at the same time for the door to open.
* It also turns out the waves emanating from the amulet are extremely dangerous to anyone other than Agatha, as the loutish soldier who stole it soon finds out. The amulet ends up killing him by slowly destroying his brain. His fellow soldier, actually his younger brother, realizes the amulet is the source of his brother's demise when it is accidentally broken open, revealing the mechanism within. The young soldier uses the address engraved on the back of the locket to track Agatha down, looking for vengeance. Normally, the amulet would dampen Agatha's genius ability when brought in close proximity to her, but the young soldier broke it by throwing it against a wall in rage. The now brilliant, clear-headed and more confident Agatha easily out-smarts and overpowers her would-be attacker and turns the tables on him, tying him up and reclaiming her beloved keepsake.
* It also varies on the usual formulas since the banks are actually owned by the Mob, and used in their money laundering.
* It also was dubbed into Swedish three times: first in 1946, again in 1972 by Doreen Denning, and the third time in 1996 by Monica Forsberg. Interestingly, the 1946 dubbing was made in the USA with Swedish-Americans. Also, the first DVD release with the 1996 re-dub incorrectly lists the 1946 voice credits at the end.
* It also wasn't always deserted; rumrunners used it as a secret cache before the British navy cracked down on them.
* It also wasn't the first fighting series, but was the first one to become incredibly popular and is one of the former "manga of the records" thanks to its over 100 millions copies sold. One of the main reasons for its success, is that, unlike previous fighting mangas that simply showed a fighter punching the opponent in the same panel, Fist of the North Star's battle corehography had the directions of the attacks following the reading order, making it much easier to understand and much more appealing. Since then, every popular battle shonen followed the same rule, in particular Dragon Ball, whose editor studied Fist of the North Star to understand its success, that would end up perfectioning battle direction in comicbook form and take Fist of the North Star's popularity.
* It also was one of the favourite textbooks for Wilhelm II and Tirpitz's expansion of the German navy and thus was a major influence on the British-German naval armament race that helped bring about
* It also works the other way: fans often play the part of a straightforward
* It also works the other way; well-intentioned female teachers, guidance counselors, relatives will tell a girl who is interested in a STEM field that she's "brave" for choosing such a path (implying she's signing up for a harsh life) and relating the narrative over and over again that STEM fields are a gauntlet of sexual harassment and abuse where the girl, despite her interest and aptitude, will never truly fit in or succeed. And then those same well-intentioned female teachers, guidance counselors, and relatives wring their hands over why the girls choose anything other than a STEM career.
* Italy and Germany, he comes back and wants to be on Germany's side this time…

* Italy (Entente, 1915) wanted large chunks of Austro-Hungarian territory that the latter was not willing to give her.
* Italy first abolished the death penalty in 1889, but after the assassination of king Umberto I many invoked reinstating it just to execute the killer. It was not, and the killer received a life sentence, and died a year later (officially of suicide, but murder is suspected).
* Italy got Südtirol, which used to be a part of Austria, to be added to their territory after
* Italy had an early version of Open Sesame in the '70s and package dubs in the aughts.
* Italy (had they tried with the coup, the rest of the military was already mobilized to suppress them).
* Italy. He then just sits there blankly, while Germany screams at him to throw the grenade before they both get blown up. The one time Italy manages to plant a grenade correctly he stands there cheering... as a Russian tank comes up behind him. Romano later does the same thing, suggesting that this trope runs in the family, which in the dub Germany immediately lampshades. America is more of the 'lovable/obnoxious oaf' kind.
* "Italy in Technicolor," a duet for Lippo and Mrs. Maurrant which Kurt Weill composed as a rhumba for some reason. It was cut when the second act needed to be shortened.
* Italy is famous for "changing sides" in both world wars. In the first, they stayed neutral until 1915 because technically their alliance with Germany and Austria had been
* Italy is split between North (Fascist-leaning rogue state) and South (member in good standing of the PCRA) Italy;
* Italy is the only volcanically active region in Europe. Since its history is long, erupting volcanoes are very well-documented.
* Italy knew Mumfie first through the puppet series Here Comes Mumfie – they were the only country to get it outside of the United Kingdom.
* Italy. One of their posters played on the religious sentiment of voters by proclaiming that "In the secrecy of the polling booth, God sees you — Stalin doesn't!". The DC ultimately won the election by 48,5% of the vote to the Front's 31%, but even with the fanatical scare campaign atmosphere, the Front still managed to increase their number of seats in Parliament.
* Italy politically opposed — far-right for Hellas, far-left for Livorno).
* Italy's case is particularly notable, because the lack of some gains (namely Istria, Dalmatia and some of Germany's African colonies) was caused by both the incompetence of the Italian delegation
* Italy's conquest of Libya in 1912. The actual invasion and defeat of the Ottoman forces was relatively easy, given the difference in firepower between the Italian invaders and the Ottoman Army, supported by the local tribes. Then corruption and incompetence among the bureaucracy prevented the defeat of a revolt in southern Fezzan when it was still small, the attempt at defeating it in open field ended in
* Italy's defeat at Gasr Bu Hadi in 1915 saw the Italians expelled from most of Libya and reduced to a few coastal cities, as now not only the rebels knew they could defeat the Italians in a pitched battle but, due the Italian commander's arrogance, had managed to capture thousands of rifles dozens of machine guns, and even some artillery, all with plentiful ammunition. On the long run it backfired on the entire Libyan population, as when they counterattacked the Italians first shattered the main rebel forces and then defeated the guerilla by
* Italy's national football team was thought to have reached its all-time nadir when they failed to qualify for the 2018 World Cup group stage at the expense of Sweden. As a result of such a devastating and outright unpredicted outcome, then-coach Giampiero Ventura was sacked and then-Italian FA president Carlo Tavecchio

was forced to resign. In came Roberto Mancini as the national team's new coach in 2018 amidst perplexity in the general populace; such questions were however quelled in due time, as the Azzurri not only utterly
* Italy's own Luigi Cadorna. As a manager was superb, as shown by him successfully triplicating Italy's army
* Italy, though no less cutthroat. The Calabrian version is called the Ndrangheta, considered more rural, crude, and unsophisticated, but also the most terrifyingly efficient mob in the country, and, arguably, the continent.
* Italy to Germany, sometimes with no impetus at all (he's insecure like that), but most notably after Germany and Russia sign their non-aggression pact and Italy is afraid he's being replaced.

* it appears her sister Ema is being accused of murder; she throws herself on the witness stand in a desperate panic. At the very end, when everything is settled she finally smiles.
* It appears in American folklore too. There's an Appalachian story about a ghost in the woods that looks like a small child and asks you to carry it on your back to safety. But as you carry it, it'll start getting heavier and heavier with each step. And if you look back over your shoulder to see what's going on... well, apparently nobody's lived to say what exactly they saw.

* It appears to have subverted this trope in later episodes. The last several episodes have covered multiple chapters in one episode, sometimes up to three, resulting in a much faster-paced show. It might have something to do with the fact that these episodes were made after the manga was announced to end, meaning they don't have to worry about padding as much.

* It applies to Phoenix's childhood, where he is accused of stealing lunch money from his fellow classmate, Miles Edgeworth. All the children point their fingers at Phoenix as the thief and even the teacher is convinced that Phoenix is guilty, despite no direct evidence. Only Edgeworth and Larry Butz stand up for Phoenix and convince the whole class that he is not the guilty party.
* It arguably gets more cozy right on the day of Jesus' second coming, at least for the believers. Conveniently, the world's economic system crashes with the destruction of New Babylon on the same day that Jesus comes. Everyone on Carpathia's side who isn't in Carpathia's Unity Army, and who isn't so determined to go forward with destroying the Christians and Jews in Petra and Jerusalem, is in a world-wide panic.
* IT, as Ben Hanscom notices when IT first appears to him on a frozen river with the sun directly behind it. Why IT casts no shadow is probably because it has no true physical form to cast a shadow from.
* . It asks him nicely if he wants to turn into a plushie too. He refuses; it violently and painfully kills him and then rebirths him as a plushie. Now they'll be together forever - and it's treated as a good thing.
* Itassis, similarly has has some appealing features but in contrast is vile inside. Necrolai isn't so pretty, but she too reforms and reverts to a human form.
* I Taste Delicious: A character states he tastes good after being covered in food.
* It at the end was meant to be the most terrifying of the forms that humanity can "safely" comprehend. Beyond that, madness ensues.
* it automatically explodes. Similarly, if the Warp power is used on an enemy protected by a Biotic Barrier and destroys said Barrier, the Barrier itself explodes.
* It averts this trope by mentioning that the name Argon is the result of eight centuries' worth of language drift from "R. Gunne."
* Itazura Na Kiss... and because Chris herself seems to have a thing for weird-looking dudes.
* Itazura Na Kiss casually mentions that's because of an urban legend about couples falling apart after having a date in that lake. It hilariously backfires since Kotoko starts panicking and they both fall into the water.
* Itazura Na Kiss continues at full steam after they get married. Some fans will just tell you to skip the first season, because that's where it gets better.
* Itazura Na Kiss: Naoki carries out Kotoko like this a lot when she's sick or injured, for example as she faints in the street and Naoki has to take her to the hospital.
* Itazura Na Kiss N°1 in Japan but never bothers to actually and doesn't understand why anyone is so anxious about going to university to continue studying.

His mother explains, since there's nothing he can't accomplish, he lacks dreams and ambitions.
* Itazura Na Kiss. She finds guys like Naoki ugly and guys like Kinnosuke sexy. It is implied that she got her tastes from her mother.
* Itazura Na Kiss, where Nakoi has plenty of baby photos of himself dressed in girl's clothing, as the mother wanted a daughter and didn't want to purchase new boy's clothing. This photo was used as blackmail by Kotoko in order to get tutoring.
* It backfires catastrophically — the aliens wanted slave soldiers
* It backfires massively with Tommy. Oliver can't help but keep on seeing Tommy as the good man he became before his death, the man that Oliver mourned for almost a decade.
* It backfires, though; the prisoners are instead impressed by O-Chul's resolve in not faltering in his duty even at the expense of his principles.
* It backfires when Jon threatens to send Garfield to bed without dinner because he won't eat. Garfield happily jumps into bed because the food doesn't taste good.
* It basically comes with the job of being a Let's Play creator, but even though
* It bears mentioning that this trait of Shaggy's became much more prominent after his voice actor successfully bargained with the studio to make Shaggy officially a vegetarian. It's also been one of the factors invoked by fans as evidence that Shaggy is a covert stoner, as cravings for both excessive food and weird combinations of flavors are a common (pop culture) side-effect of smoking marijuana.
* It became a common circus act after its first use in the 1950's. The act is performed by stripping a car of its interior and removing the seats to maximize the space inside, then loading the clowns inside.

* It becomes fairly clear after the early events of Stargate Universe that the suits are actually of Ancient design, as they're present on Destiny. The adaptive size is likely an overengineered means to prevent having to customise each suit to the individual wearer - it probably wasn't intended to work for a being as differently-sized as an Asgard, but the Ancients did tend to overdo things if they were going to do them at all.

* It came back later that same episode when Red got an idea and the porch light behind him turned on. Played with when he turns around and tells Eric to turn the light off.
* it came back to bite her, all because Crowley felt like making a point. Ladies, avoid Sam Winchester at all costs.
* It came back with a vengeance in 2017, when he won the Universal Championship. Many despised him once again because he rarely defended the title, along with the fact that his run surpassed CM Punk's record for longest world champion reign in modern WWE history.
* It came down to one bit of fielding. After seven weeks, could he get back for two? Could the throw come in? It did. Could Buttler get it back to the stumps on time?" The sheer drama of this final, as well as the stakes involved, have quickly made this match a candidate for the best match ever in the history of the One Day International format.
* it came for his daughter and her husband to die, he didn't forgo his job, and escorted them into what comes next, for he cannot give more time to people. The only choice he gave them was to spend their moments before dying in his time-less realm allowing them to live for as long as they desire.

* It Came from Beneath the Sea. Unfortunately, it is not content to stay down there.
* It Came from Beverly Hills: Takes place in Beverly Hills, California.
* It Came from Outer Space (1953) : A subversion where the aliens appear to be

carrying out a classic Infiltration-style attack, but are only trying to quietly repair their spacecraft which crashed due to a malfunction.
* It Came from Outer Space (1953) has the alien spacecraft (with sparks flying off it) crash landing in the Arizona desert.
* It Came from Outer Space (1953). The aliens can copy human form; naturally this only serves to freak out those humans they're trying to reassure about their peaceful intentions.
* It Came from Outer Space (1953). The aliens can copy humans and their memories, but give themselves away through their awkward speech patterns and ability to stare into the sun without blinking.
* It Came from Outer Space (1953) with the sheriff who wants to go in with a posse and the amateur astronomer who's willing to trust that the aliens are telling the truth. It does however subvert this trope in that both aliens and humans are paranoid about the others intentions, yet in reality both are reasonable — the humans just want their friends (who are being held hostage by the aliens) returned unharmed, while the aliens just want to repair their spaceship so they can leave Earth.
* It Came from Outer Space, altruistic aliens that accidentally crashed on Earth entrust a local science-fiction writer with holding off local scrutiny while they temporarily hold a number of local townspeople hostage and imitate their bodies to be able to move about freely in town so they can get their ship fixed. They all talk in straight-faced monotone and walk rather awkwardly.
* It Came from Outer Space: Astronomer John Putnam is the Scientist to the sheriff's Military Man (though the latter isn't literal) and the main conflict is over whether the alien can be reasoned with or must be killed.
* It Came from Outer Space, he enters a chamber and is shocked to find the aliens assembling what appears to be a classic giant Death Ray, but actually turns out a device for powering their ship.
* It Came from Outer Space talk this way, severely flipping out the real humans who don't believe their repeated claims that they don't mean any harm.
* It Came from Outer Space, the aliens just want to repair their ship and go home. They only abduct and replace people because they are terrified of being discovered.
* It Came from Outer Space themes of suspicion, paranoia, and mutually-assured destruction in the dealings between the humans and the aliens.
* It Came from Outer Space where the hideous one-eyed aliens are not launching a covert invasion of Earth; they only want to quietly repair their spaceship and leave without conflict.
* It Came From The Desert, humanity falls under attack from giant ants.
* It Came From The Desert suggests this is what created the giant mutant ants.
* It Came From The Desert: The Amiga version comes on four disks, while the DOS version comes on four 3.5'' disks or eight 5.25'' disks.
* It Came from the Fridge: Food that's been left in the fridge becomes disgusting and hideous.
* It Came from the Internet. In one subplot, they genuinely want to help you, while in another they just want to use you for their evil purposes. In one more subplot, it turns out that the monster that infected you is not actually evil, and the virus can be cured with just a hot bath.
* It Came From The Late, Late, Late Show to call in stunt doubles who then take damage in their stead as one way to avoid being 'written out', although the doubles' ability to soak up abuse is limited in turn.
* It Came from the Late, Late Show II, adventure "Bjorn on the Bayou, or Escape from Alkatrazz XII". Alkatrazz XII is a prison planet that is mostly covered with swamps and forest. One of the alien monsters that can be encountered there is a giant spider.
* It Came from the Late, Late Show II adventure "Bjorn on the Bayou, or Escape from Alkatrazz XII". Alkatrazz XII is a prison planet with a population of 10,000, which is mostly made up of the prisoners and their robot guards. Warden Skrank is sadistic and corrupt, and his bodyguard Jorj is strong but stupid.
* It Came from the Late, Late Show II, adventure "Mummy Dearest". In Dr.

Morbachev's laboratory, there are test tubes the size of people along a wall. They hold three or four of the innocent people kidnapped by Dr. Morbachev, kept in computer-controlled suspended animation.
* It Came from the Late, Late Show II Warden Skrank instead of killing him, he will get away using an escape pod while being taken back to Space patrol Headquarters on their ship for trial.
* "It Came From the Nightosphere" is littered with this, like Abadeer singing a little jingle as he stomps on ants to
* It Came from the Sky: Donald and Alice's son Andy displays several recognizable symptoms of autism throughout the story, but is late in the film confusingly revealed to instead have developed his "emotional disorder" after nearly drowning as a preschooler.
* It can also be approached from the other end: the protagonists start digging into someone's background, discover that it looks suspiciously fabricated and dig deeper under the assumption that they're a bad egg, and find themselves on the wrong end of a "back off" lecture from a US Marshal.
* It can also be argued that the necessity of guns dropped due to the difference in how battles are fought in the setting; in the Naruto universe, combat tends to be more focused on the utilization of Ninjutsu, prioritizing speed and stealth rather than firepower and direct confrontation. Guns, while still as effective as you can expect against people, are notoriously loud and therefore very much
* It can also be considered a literal example of 'eat, drink and be merry for tomorrow you may die' given the number of civilian casualties and the fact that most older teenagers boys and young men were either conscripted or pressed into paramilitary defense force.
* It can also be deliberately invoked if an outside party trying to invoke

* It can also be heard while riding on an elevator in an earlier level, sounding like it's comming over the radio or the PA. Again, with no explanation.
* It can also be used to kill all Grox on a planet by raising the T-score to at least 1. Colonized planets can only sustain a number of settlements equal to the T-score. T-0 planets can be claimed by placing a colony, but they will not be able to produce any spice until the atmospheric conditions are improved and then a basic ecology is introduced, establishing a T-score of at least T-1.
* It can also cause tension when the workplace tries to impose bans on "natural" hair and "ethnic"-style accessories. One employee,
* It can also combine with its support mecha to a far more powerful ultimate form!... that stands seven or eight feet tall.
* It can also get into entirely weird aversions, depending on the technology-of-the-moment (
* It can also happen easily if the players roll for their character stats, in fact this is one of the main arguments for the point buy system: every character has 8 in every stat at the start, distribute 27 points around up to a cap of 15 (though racial bonuses and the like can go through the cap) and there's your character. Every character will have different arrangements but will be on level pegging if you tally them up.
* It can also happen if you keep Viconia, Jaheira, and Aerie in the party at the same time and don't break off the romance with any of them.
* It can also happen in the cathedral level; if Paul's or Peter's sanity level drops very low, one of the pictures in the side room near the cathedral's entrance will turn into a picture of a zombie.
* It can also happen taking away a title change without the win. In one
* It can also happen with the choice of actor, too - some characters tend to make a character sound different. Or in the case of a certain character. Brunhilde. They normally had

* It can be argued that Rolo is like this in regards to Lelouch, who even flat out tells him at one point that he's simply using him.
* It can be argued that this trope is probably more helpful in terms of self promotion/publicity rather than product selling. Hoping to take advantage of the trope
* It can be assumed that the pre-Armageddon American society was something like this in the
* It can become complicated as many nations, now independent, were under the rule of the Russian Empire or the Soviet Union. If "Russian" identifies a subject of the Russian Empire, then a lot of people who were not "ethnic" Russians were still Russians. Russians themselves don't help with this much since their idea of what an "ethnic" Russian is quite flexible.
* It can be done in later games, as well, by playing the Song of Healing in
* It can be hard to tell what breed a dog is. Malamutes and Siberian Huskies in particular are confused because of their similar appearance. The main difference is that Malamutes are bigger and built stronger. They may also be assumed to be wolfdogs (or less commonly, pure wolves) because of looking wolf-like, and the tendency for wolfdogs to be part Husky or Malamute. This is even ignoring more obscure husky-types like the Greenland Dog and Canadian Eskimo Dog, which also share similarities.
* It can be negated by drawing a circle on the CD with permanent marker.
* It can be played almost entirely straight if you make the player character a mage specced for healing.
* It can be quite disconcerting to look around yourself in a public place and think how everyone else is also seeing themselves as "the person looking around themselves at a bunch of strangers"
* It can be quite easy to guess who will die (though not necessarily who will be a victim and who will be a culprit) in the next chapter of the game based on who gets into a Rebuttal Showdown with the main character during a class trial. In the second and third games, the first Rebuttal Showdown opponent becomes the victim in Chapter 2. In Cases 2 and 4 of the second game, and 2, 3 and 4 of the third game, the culprit is one of the Rebuttal Showdown opponents.

* It can happen within a species too — if a baby is orphaned or otherwise separated from a parent, an adult will sometimes insert themselves as a surrogate parent. Nursing mother cats, for instance, will sometimes nurse orphaned or abandoned kittens, sometimes even going out of their way to "pick up" the kittens and take them to join her own kittens.
* It can help people understand a concept more than if they were just told about it. By asking them questions, they can theorize and you can find out what they already know and what they need to be taught. * It Cannot Be Stormed, released in 1932, makes an early and unusual example. The peasant movement in the novel does not have its own political agenda, protesting against unjust taxes and economic exploitation instead of thinking to overthrow the government, although they seek support among the political opposition, including the National Socialists and Communist Party. Besides peaceful methods of resistance, like protests, some members of the movement plant bombs in public buildings, but even then they make sure that the explosives are harmless to people. One of their demonstrations turns violent only after a policeman attacks one of the peasants carrying the movement's flag.
* It can often happen, when the children grow up to have worldviews that are incompatibly different from those of their parents.
* It can often seem a bit like this in professional team sports, when a particular "role" is "recast". In particular, the identities of the fourth line (a.k.a. the goon line) of one's favourite ice hockey team seem to change about as frequently as Diana Ross's outfit. Sometimes it happens with more well-known players - eg. if a soccer/football team replace their tall, hulking, head-the-ball centre forward with another player who does the exact same thing, leaving the fans to wonder what exactly was the point of the exchange.

* It can probably best be summed up that Invading the US has all the problems of invading Russia and/or China (Huge size, large population), with the additional difficulty of supporting said invasion across 3000 (Atlantic) to 6000 (Pacific) miles of ocean. No nation on Earth has anywhere near the seaborne transport capacity to bring a sufficiently large army across an ocean to invade the United States, even ignoring the fact that they'd need to keep those ships from being sunk by the US Navy and Air Force.

* It Can't Happen Here ends rather suddenly with America engulfed in a civil war following a disastrous right-wing populist presidency and multiple coups.
* It Can't Happen Here, many of the Minute Men (M.M.s) are bullies at best and sadists at worse, perpetrating atrocities against dissenters and minorities.

* It Can't Happen Here plans to assassinate Judge Effingham Swan to avenge her dead husband by chasing him down midair and throwing a grenade into his plane. She misses, so instead deliberately collides with him.
* It Can't Happen Here, publicizing the abuses of America's new fascist government and writing very frank opinion columns about the direction the country is going in. Not surprisingly, he ends up paying a price for this.
* It Can't Happen Here, the totalitarian government never completely stamps out people's longing for freedom and dignity. Revolts erupt across America as people take back areas from Haik's forces. Doremus, in particular, exemplifies this trope, continuing the struggle after having lost loved ones, endured torture and incarceration, and lived in lonely exile.
* It Can't Happen Here. The Windrip regime invades Mexico as a means of spreading its empire and encouraging patriotism among the masses. Played with in that the regime falsely claims Mexico attacked America as justification for the war.
* It Can't Happen Here, widespread revolts erupt after Haik assumes power, and America is quickly divided into areas that dissidents control and areas that Haik's government controls.
* It Can't Happen Here, Windrip places Trowbridge under house arrest after winning the presidential election and turning America into a fascist state. Trowbridge escapes to Canada, where he leads a resistance movement to oust the Windrip regime from power.

* It: Chapter One, getting unwanted attention and an undeserved reputation as a slut.
* It: Chapter Two, aside from the flashbacks and the epilogue, takes place over the course of 3-5 days, with the death of Adrian Mellon directly causing Mike Hanlon to call the rest of the Loser's Club (in a change from the book, where Mellon's death happens at least 8 months before the adults half of the story), they come to Derry, eat dinner at a Chinese resteraunt, and by the end of the night they are convinced to stay and fight. The rest of the plot, from the scene where they go to the Barrens up until they exit the sewer after the final battle, takes place over the

course of approximately 24 hours.

* It: Chapter Two, so much that a scene transitions to the past with Grazer's image fading in over Ransone's.
* It: Chapter Two that focuses on the now adult members of the Loser's Club begins with Mike Hanlon making calls to his childhood friends and ends about 3-1/2 days later, not counting the epilogue.
* It: Chapter Two: The reveal that Stanley died by cutting himself could be an example of this. We see someone lying in a bathtub at the start of the film, and while the audience probably wouldn’t recognise him because he was grown up, we then see all the other characters are alive and well. Then there’s the scene where the fortune cookie messages spell “Looks like Stanley couldn’t cut it.” After that the reveal over the phone isn’t that surprising.
* Itchy & Scratchy features this trope with each character pulling out bigger and bigger handguns at each other. In the end the guns are the size of the Earth.
* Itchy & Scratchy involving Itchy decapitating Scratchy with a straight razor although the idea gets scrapped as too cliché.
* Itchy & Scratchy I've ever seen." As he doesn't even know the title, it's pretty clear his experience with the series is bordering on nil (he did watch an episode in "Home Sweet Homediddly-Dum-Doodily", but he hated the show and probably forgot about it altogether).

* Itchy & Scratchy legal team if they have a copy of the film that forms the basis for his client's copyright claim, since the only copy his client had was destroyed by accident. This is played as Hutz being his usual desperately incompetent self and asking his opponent to help him out, but he's more right than he seems. The rules of civil discovery do indeed allow one side to request evidence from the opposition if they think they have it, and ignoring these requests can result in fines and sanctions. Hutz's only problem is that he's requesting it in the middle of the trial rather than in the pre-trial phase, which is when evidence is usually gathered; other than that, he would have been entirely within his rights to ask that Roger Meyers go poking around in his studio archives for a copy of the missing film.
* Itchy & Scratchy movie 15 times and Nelson brags that he saw it 17 times. Bart (who has been grounded from seeing the movie after failing to watch Maggie) tries to joke that the two must have been sick of seeing it and ends up getting chased by Nelson and Milhouse, because they know he would make that joke if he hadn't seen the movie himself.

* Itchy & Scratchy: The Movie, which was long enough to extend through a drawbridge (with a man who falls off, yelling, "I regret nothing!") and all the way to the Simpsons' house.

* Itchy and Scratchy cartoon. Itchy ties Scratchy to a log and sets it on a conveyor belt to a buzzsaw, but the conveyor belt is ridiculously slow. Frustrated with how long it's taking, Itchy simply gets an ax and butchers Scratchy himself.
* Itchy and Scratchy cartoons are shown in quick succession, all parodying films at least a year old. Krusty then hangs a huge lampshade on it, asking why they're parodying movies that old, and saying that the animation took too long to make to get it out sooner.
* Itchy And Scratchy episode "How to Buy Action Figure Man," which explains to children how to get their parents to buy them an Action Figure Man toy.
* Itchy and Scratchy, Hitler is — again — thrown in at the last moment, crushing Scratchy with his tank. This causes Maggie to imitate Hitler's salute, to which Lisa quickly corrects her.
* "Itchy and Scratchy Land", Bart and Lisa plead with Homer and Marge to take them to Itchy and Scratchy Land, the most violent theme park on Earth, but Marge is initially set on the family vacationing at the Highway 9 Bird Sanctuary, where they've just installed a new bird feeder that she's interested to see.
* Itchy and Scratchy Land", Homer Simpson told a bunch of rampaging robots "Nobody ruins my vacation except me! And maybe the boy!"
* "Itchy and Scratchy Land". This is one of the few stories where the Goofy suit guy gets revenge — Homer is locked up because "I kicked a giant mouse in the butt!", and Bart torments another Itchy-suit by kicking him in the balls and shooting smoke bombs into the mouth. Later, when the robots start rampaging through the park, the guy in the mouse costume makes sure that the Simpsons are kicked off the last escape helicopter.
* Itchy and Scratchy Land when Homer starts acting less reckless, she finds the house so unbearably boring that she joins a demolition derby out of desperation for some excitement.

* It Could Happen Here are like this, discussing how your character manages to get by during the war.
* It Could Happen Here fame discusses the possibility of this with the recent (as of 2019) political divide in the United States. The hypothetical scenario consists of the United States being wrecked by a massive financial crash, spurring the creation of far-left insurgents in urban areas, and far-right insurgents in rural areas, and the federal government struggling to effectively clamp down on both, becoming increasingly opressive as it grows more and more desperate in fighting the rebels. Evans discusses possibility of the war, with information gleaned from actual modern day civil war events like in Syria.
* It Could Happen Here: In the narration, the former United States is wrecked by the consequences of climate change (and the states that remain in the power vacuum are unable to deal with it as effectively as the federal government would have.) Wildfire season is said to be 6 months out of the year, the coastal areas are flooded by rising tides, and the South and Midwest are left uninhabitable by constant mudslides and tornadoes.
* It Could Happen Here Second American Civil War might look like and what weapons and tactics might and might not be used in such a civil war.
* It Could Happen Here: The Second American Civil War makes these by the bucketful.
* It Could Happen Here: The show mentions Alex Jones and goes into his conspiracist rants at length, explaining that people like him (especially since he has a massive following) are dangerous rather than just harmless cranks, since he's pushed for violence against people (liberals or the LGBT), he claims are really vicious criminals. Rhetoric like this, Evans believes, could push extremists to act on his words.

* It Could Happen Here: The United States in the podcast's hypothetical scenario details the US becoming this, leading it being pushed into civil war.
* It Could Happen Here, the US is swept into squabbling broken states, some doing better than others, but all collectively worse off than they were before the war.

When his lottery ticket wins, he receives millions of dollars. When he gives her half the winnings, his wife gets annoyed, eventually causing them to get divorced. Over the course of the movie, the cop and the waitress eventually fall in love and get married.
* It Could Happen to You, an attempt to emulate a sensationalist tabloid headline.
* It Could Happen to You. Sort-of parodied in that the man's offense is donating money to charity that she would rather he spent on her.
* It Could Happen to You, there was never anything between the officer and waitress beyond friendship, both remained happily married to other people after the incident, and the officer's wife had no problem with splitting the money. That said, the writers didn't use the real names of anyone involved, and a disclaimer at the end of the film states what really happened.
* It Could Have Been Worse, Mouse is on his way home when he suffers a case of accidents, such as falling in a hole, getting wet in a river, and other things. * It Could've Been Great and that the Earth would have been destroyed whether it was through gem production or the Cluster emerging. Steven tries deflating the tension by starting up a reprise of the earlier song "Peace and Love on the Planet Earth", but Garnet gives Peridot a stern warning anyway.
* "It Could've Been Great", the heroes discover a hologram that reveals that this would've been the Earth's fate had the gem colony been finished: Earth's crust is segmented into pieces and/or suspended high above the exposed core and apparently drained of its mantle. It's plenty obvious in-universe that no native life on Earth would've survived this.
* It counts for Ashley and Kaidan as well if your character romanced them in the first game. This is a less cheerful example, as they seem to move on with their lives and are more than a little confused when their dead lover comes back, additionaly now as a part of a terrorist organization. In the third game you may decide to continue with the romance or that it is time for you to move on as well and terminate the relationship completely.

* It didn't help that the American press was actively encouraging war with Spain by citing (false) Spanish atrocities. Why?
* It didn't help that the B-29 (a long-range strategic bomber) could do the job the
* It didn't help that the Heat seemed on the cusp of seizing victory for the series in both Game 2 (which would have severely crippled Dallas' morale) and Game 4, only for Lebron to get a little presumptuous by celebrating with Wade next to the Dallas bench in Game 2, leading to the miracle comeback that was led by Dallas superstar Dirk Nowitzki. From there, the Finals were a hard-fought battle to the finish.

* It didn't seem to hurt the unicorn at all. (Either that or Rosella handing the unicorn over to Lolotte hurt it much, much worse...)
* It didn't stop Hanna's parents naming him that. He doesn't know why they named him Hanna.
* It didn't turn out so awkward after all. The friend understood why Mike's friend went to Canada, told Archie that he didn't like the war, and would've like to have Christmas dinner with the guy. Archie was the one who felt and looked foolish.
* It didn't work, since even with training, they had no real experience whatsoever, and Brook ended up fighting the kidnappers by himself.
* It did save the day in one episode where Twilight went nuts from stress and managed to drag the whole town down with her using magic. Given that the first thing Celestia saw her do was lose control of her powers and nearly destroy the capital, surveillance is probably warranted.
* It does actually vary by Chapter to Chapter on whether they're the protectors of humanity or the executioners of the Emperor's enemies. Some of the nicer Chapters including the Ultramarines (who run a
* It does also make for a rather bleak fate for him after the war finally ends, as Rotor is left unable to adjust to a mundane lifestyle and his relationship with his girlfriend quickly spirals downhill (the fact that she has PTSD from the same war certainly doesn't help). It would hardly be a surprise if he was
* It does at least subvert 'the tell' giveaway - Le Chiffre was faking his throughout the entire game, tricking Bond into thinking his hand is much weaker than it really is. But Bond being faked out by the tell turns out to be irrelevant—because tell or no tell, any poker player would bet everything they had on a kings/aces full house.

* It does deserve to be pointed out here that when Daniel asked Oma Desala who the other people in the space-diner were, and if they were Ancients, she replied that "some of them" were, but not all. From this, it's relatively simple to note that the Ancients were only
* It does fandom nods a lot, usually in the form of side stories, which usually answer any question from "why did Shizuo dye his hair?"
* It does have at least some sulfur in it, from the taste of it. However, let's

pass on the claims for curing bloating. Like all salts, high doses cause water retention (pretty much bloating). And any sulfur it might have will probably upset the stomach and give you gas.
* It does have softer side sci-fi in it, with FTL travel and communication, magical artificial gravity devices and inertia storage. However, the author tries to compensate every one of these with actual reasoning and their impact in science, and all of these are with high limitations in use.(e.g. inertia storage only store a certain amount of inertia and that's it, you will need to release it or face horrible g-forces if you continue your high-g motions.) Spaceships uses tons of propellant to even go slightly faster, and propellant is costly. Solar sails go for dozen of kilometres in diameter, accelerates really slow, but also act as really good antenna for radar.

The F-16 has been exported to 25 nations, the F/A-18 to 7, the Typhoon to 3, the Gripen to 4, the MiG-29M to 2, and the MiG-29K to 1. The Rafale, as of October 2011, has yet to secure a single export contract. Then in 2015 Dassault suddenly received a flurry of orders from Egypt, India, and Qatar, with Kuwait, the UAE and Canada considering orders of their own.

* It doesn't help that companies frequently require employees to remember passwords to several different systems and set up expiration periods, forcing people to create new passwords every X number of days. An average person is more likely to use the same exact password for all those systems, only changing a digit or two when creating a new one. Additionally, despite companies forbidding people from writing those passwords down, people do, since it's a hassle to call tech support every time they forget a password. It's amazing what you can find taped under people's desks.
* It doesn't help that Dagomon was originally planned to have more involvement, but this was scrapped due to meddling from Bandai and disputes among the writing staff.
* It doesn't help that Gotham's psychiatrists tend to get outed as villains themselves (Scarecrow, Hugo Strange, Dr. Hurt, Harley Quinn, the various Doctors Arkham) or are shown to be grossly incompetent or negligent. When a steady stream of new inmates ensures new test subjects or funding from bribes, it's easy to see why they'd play fast and loose with the legal definition of insanity.
* It doesn't help that he plays him like a completely inept Fighter instead of an actual Bard. He doesn't use magic, inspire his teammates, acts like a fighter despite carrying only a dagger and being unarmored, and has to be continually reminded that he has Bardic Lore that can help give the party information. This comes from all previous characters made by Leo being Fighters and he wanted to go for something new.
* It doesn't help that in the movie, Frodo and Sam don't take the pass of Cirith Ungol at all (it's moved to the next movie), so a character explicitly refers to "the union of the two towers" of Sauron and Saruman instead (Orthanc and Barad-dûr).

* It doesn't help that the game encourages this. Each class has a character card, which provides a bonus to all characters in the world, and they get stronger the higher level the corresponding character is. Up to 3 can be placed in a deck (with bonuses if all the characters are of the same "class type" (3 warriors or 3 hero classes)) and there are three decks, meaning that a minimum of 9 characters need to be created in order to fully exploit the character card system. Also, certain classes have link skills, which are skills that can be shared with another character on the account. A single character may receive up to 12 different link skills and they also get more powerful if the character the skill comes levels up. A veteran player probably has one of most of the new classes all at least at level 70 just to get the link skill on their main character (assuming they don't use one of those characters as a main).

* It doesn't help that the typical Genius won't even allow a Muggle to lay hands on one of their inventions or examine how it works. From the perspective of the normal person, this is the height of arrogance and condescension. From the Genius' perspective, it's justified paranoia and common sense, because their creations will almost always break (or worse) if touched by a normal human.

* Items that have an effect that can be activated will also have a cooldown time associated with this effect. Selling the item while its effect is on cooldown and then buying it again immediately will return you the item back at the start of its cooldown period again. A similar trick ensures that the Keystone rune Unsealed Spellbook can't be used to do away with summoner spell cooldowns if you use the rune twice in quick succession — replacing a spell on cooldown for a new one will cause the new spell to still be on the same cooldown time as the old one was. Additionally, if you are waiting to respawn and buy Redemption, the only item that can be activated while dead, it will start on a cooldown equal to your respawn timer.
* Items which exist over multiple time periods obey causality, relative to themselves. If you take an item from the past, it will be absent from all subsequent time periods, but you can also acquire two versions of that item by taking it from the future first, effectively creating a

* It ends with Arthas regaining his sanity, standing trial, and getting executed. Kael incinerates his body, leaving behind his crown and his sword. After paths divide, the screen fades to black and THE END appears. The scene shifts to the sword and the crown, and a random civilian called 'a man' picks them up saying 'I wonder who left this here?' The screen fades to black again and the sign '...OR IS IT?" appears.

* It Etait Une Fois... Space: The military personnel of Cassiopeia carries armbands styled as Nazi ones except that have instead of a swastika a "W", that represents that constellation. In addition to this, General Pest is said to have been chosen as leader because of how the masses follow him, echoing Hitler.
* It even extends to the comic, which has featured among the expanded rogues gallery a Gorilla Grodd expy and aliens resembling the tentacles.
* It even fulfills this trope at Stage 4, after you fight off the midboss
* It even gets supported by the side materials: Nanoha mentions her new Raising Heart Exelion jury-rigged with a cartridge system is a total maintenance nightmare.
* It even goes beyond fear for the Daleks. The Dalek Prime Minister comments that perhaps the Daleks have failed to kill the Doctor for so long because they practically admire him for his single-minded hatred of them.
* It even has a meter on the screen constantly to measure exactly how hammy everyone is being at that particular moment. Turns out the meter can go
* It even has some cross-series examples: the Anti-Replicator Guns and Asgard Plasma Beams both feature heavily in

* It even plays up the "3-years=Citizenship" angle, as a maxed out character can be imported into the single player story as a War Asset.
* It even seems to be part of his character that he can't stop himself from missing the point. Just before that scene he has a full dream about how to properly handle the situation from completely listening to Juliet's feelings to acknowledging and apologizing for his mistakes...Once he wakes up however and is immediately faced with the same situation he proceeds to do everything in the opposite way leading to the quote above which completely torpedoes the situation.
* It even shows in anime fillers. Twin villains Canpachino and Brindo have the ability to
* It even subverts the usual convention of having Ancient Greeks as a united front against foreign intrusions, which was actually a characteristic of the Ancient Romans. In the series, it's explained that most Greek demigods don't get to live for quite long after their graduation from Camp Half-Blood, as their solitary nature makes them easy prey for monsters (reflecting the individual city-states of Greece that cooperated mostly under a
* It even traces back to their parents and grandparents! We never hear a word about Kanna's first husband, and Hakoda's wife Kya...

* It fits in terms of gameplay, too, though it's only usable in one level. While wielding it, Arthas gets a boost to his damage dealt and his basic attack becomes Chaos-type, which means it tears buildings apart just as easily as regular units. When combined with Divine Shield (which, as you've maxed his level out by now, makes him invulnerable for 30 seconds), it lets Arthas actually destroy Scourge bases on his own.
* it folds out into a lockpick, which comes in handy when the Prince's intentions are even less-honorable than anyone in the Circus suspected.
* It Follows do take place in the dark, a big part of the movie's horror stems from the fact that the monster keeps pursuing its victims no matter the time of day, and can only be seen by those who have already contracted the curse. Some of the most terrifying shots in the film show the monster in one of its various human shapes making its way towards a victim in broad daylight, while everyone else looks on as if nothing is happening.
* It Follows effectively turns this trope into a metaphor for an STD. Having sex with someone carrying the curse passes it on, causing a malicious spirit (taking the form of a random bystander, and only visible to anyone cursed) to relentlessly stroll towards you, killing you if it catches up and moving back to stalking whoever passed it on. The only solution is to keep moving, or pass it on and hope for the best.
* It Follows features a somewhat realistic scene in which the main character is drugged with a (presumably) chloroform rag. She struggles for an extended period of time and her attacker still has to wrestle with her until she passes out.
* It Follows: Hugh warns Jay that "It" is "slow, but not dumb". While "It" seems to just mindlessly chase victims, in the climax, the heroes try to trick "It" into following Jay into a swimming pool so they can electrocute "It". "It" notices the trap and instead starts throwing things at them.
* It Follows. It also homages the invincible killer like Michael Myers who hates

sex, although It is literally supernatural and passed along via sex.
* It Follows It is a nameless, backstory-less entity that follows Its victims at a walking pace. It never goes faster than walking, but It also never stops until It catches up. Once It catches up, It kills them. You can throw It off by having sex and passing the curse on to someone else, but once the person you passed It onto dies, It's back to you. The film ends with two people in the chain of victims walking slowly down the street, while someone else walks about forty meters behind them, at about the same speed. Since It can shapeshift, it's unclear if the person we see is It, or just a random passerby. Cue credits!
* It Follows nude or partially nude men and women (notably, the first time "it" is shown to the audience, it is in the form of a fully-naked middle-aged woman). This only serves to make it even more unsettling.
* It Follows principle. Teens are being stalked by an invisible, seemingly invincible killer only visible to them and eventually mercilessly kills them. The movie adds two major changes: it's a curse of unknown origin passed through sexual intercourse and it only targets teenagers who've been exposed to the curse.
* It Follows so having sex with the wrong person literally and directly makes you the Follower's next victim. It takes this trope straight into deconstruction territory.
* It Follows that can stop it or even slow it down, as it seems to be indestructible and will just move right past any walls or anything else in its way. And if it catches you, it kills you.
* It Follows, the closest definition of the trope that you can get. Once it targets you, it never gives up. It will always hunt you and will always find you. It cannot be killed or trapped. The only way to stave it off, is to have sex with someone else, but when It targets and kills them, it comes right back after you... That said, it's definitely a supernatural monster so it's justified.
* It Follows. The titular "it" stalks its victims at a leisurely pace, and never moves faster than that. You can run away from it, but it never stops coming after you.
* It Follows was inspired by a recurring nightmare the director had as a child about being constantly followed by some unknown entity. The passed-on-through-sex bit was added later as he fleshed out the story idea.
* it forces some pitiable cannibals The experience makes them better people.

* It generally has this during the course of a season, with women often shown just lying around in bikinis looking pretty (but often bonding in the process) while the men of the tribe are often shown chopping wood or helping out around camp. There are of course exceptions to this too.
* It generally requires well trained troops to pull this off, the details vary with the terrain, but it generally involves some sections breaking off and others laying down suppressive fire. Militia and less professional armies generally break and run if overwhelmed, but with proper organization and planning, they merely disperse, re-group, and get back into the fight under more favorable conditions. These tactics are particularly important for guerrilla forces, which can expect to face overwhelming odds on a regular basis if the fight stays in one spot for too long and they don't pull out before their stronger enemy rallies additional forces.
* It gets a bit looser in the second series with Graham's "Mr. Bushido" attire and the Innovator's colour coded helmets. Celestial Being also get a uniform but each member has a different colour scheme and some further customise their outfits (Ian, Lasse, Mileina, Linda).

* It gets around this one by having the Doctor being able to mentally translate for his companions, who rarely think anything odd about the fact they understood them. One of the Doctor's earlier companions did ask him once, but they were interrupted before he could answer and it was never brought up again. In the revival of the show that began in 2005, the translation is mentioned on more than one occasion to be performed by the Doctor's vehicle, the TARDIS, which is telepathically linked to the Doctor to the point that when he is unconscious, the translation fails. This became a plot point in
* It gets bad whenever Marvel has the heavier cosmic characters go at it. In one story simply waking the ruling Celestial destroyed two galaxies. Even planet eater Galactus
* It gets better: Arab-British Evelyn Carnahan (she states her mother was Egyptian) is played by Jewish-English actress

* It gets better. The Combaticons are able to salvage the operation to steal the energon, managing to secure (read: prevent the loss of) half the load of energon. But to do this they had to ignore Starscream's order to retreat. How does Starscream react to this miracle his side desperately needs? He arrests the Combaticons for treason. Of course then Megatron returns...
* It gets better. The Correspondence's nasty effects are caused by writing them improperly, IE bad grammar. When used correctly it is a
* It gets better. Uryuoms don't consider themselves actual aliens—as one of the pair who hired Tedd said, he's a natural-born American! Hence the above argument—the other characters knew she wasn't
* It gets better (well, worse): The Inquisition is divided into several orders, with the chief ones being the Ordo Xenos (deals with aliens), Ordo Hereticus (deals with heretics), and the Ordo Malleus (deals with daemons). Each faction tends to look down on the others as getting in the way of dealing with the major threat or not doing enough against it, of using unsanctioned weapons, of being at greater risk of corruption by the enemy...
* It gets better. While they were waiting in their bomb-shelter, Joachim von Ribbentrop assured Molotov that Germany's war with The Commonwealth was going splendidly and that their enemies' military power had been destroyed. Molotov is reputed to have replied "
* It gets better with the Komeijis. If you take an image of either of them and invert the colours, their clothes (and hair... mostly) will take on the colours of the other sister!
* It gets bonus points for the name being a reference to one of the bigger mysteries in American history -
* it gets burnt to a crisp when she is curb-stomped and roasted alive by Ryan.
* It gets caught in helicopter blades, forcing helicopter to swerve 32 degrees.
* It gets crazier once you get to the streaming. The online simulcast was announced and was hacked on the very first night, canceling the event and leaving FUNimation and Toei talking for months, leaving fans wondering if they'd ever get caught up to Japan (or keep getting DVDs at all). Then finally, months later, the simulcast came back and is still going strong.
* It gets deconstructed. Kurumu and Mizore know they don't have a chance, but they still love him... and it becomes really complicated:
* It gets downright meta with the Decepticon Shortround, who somehow actually collects

* It Gets Easier: Doing bad things like killing gets easier the more you do them.
* It gets even better. The two police officers who returned the boy to Dahmer were fired after Dahmer was finally caught... and then reinstated, with back pay, after appealing their termination. They went on to be named Officers of the Year by the police union.
* It gets even better. Upon first landing at the island, Johnny falls right into the water due to being weighed down by so much luggage, and then, as the crew are climbing a huge number of steps, he falls and drops some of it, prompting Liu to ask "Do you need help with those?"
* It gets even better when, according to supplementary information, Demora Sulu becomes a captain, just like her father. And for bonus points, her
* It gets even better when you realize that the producers of the show fully expected the contestants to be just as involved as the host and other actors were. Whenever the Chronoskimmer was attacked, Kevin (the host) would go absolutely nuts, running around and screaming that they were in "big trouble" as alarms flashed and the camera shook like crazy. Half of the time, you'd see one or two of the kids on the show
* It gets even crazier. The titular Gundam has X-shaped thrusters (though they're actually practical), a beam cutlass and daggers instead of the standard saber, a beam gun shaped like a flintlock pistol, a targeting lens shaped like an eye patch and an extra antenna on its head modeled after a feather. Apparently just sporting the Jolly Roger insignia on its forehead wasn't enough for Hajime Katoki.
* It gets even funnier during the end credits where the Rams are exhausted and
* It gets even more surreal than that. Imagine a guy reciting that poem in a Celtic accent so thick you could break lumber across it. Then having have him conclude that recitation with "boom shakalaka!" when the guy unleashes his guns.
* It gets even weirder, because while technically those things are all part of a wedding (though you don't even need sex, just a certain amount of time alone), even if you have some of this and not all of it, there's enough of a doubt/question that you might be married that you may actually need a divorce. And since anyone above bar/bat mitzvah can theoretically get married, stories abound of prank middle-school weddings or ultra-realistic theater weddings in which, even if they didn't do the deed, major rabbinic headaches occur.
* It gets even weirder in a later mission. Sly and Bentley are trying to convince Carmelita to dress in a belly dancer outfit to distract a different group of guards. Throughout the cutscene, you can hear Murray earnestly trying to convince them that he can do the job instead, insisting that he can fit in the outfit. He is ignored.
* It gets even weirder when Strong Sad, who doesn't seem to wear any pants (or anything for that matter), is rather concerned about buying his favorite underwear back from an online auction in "Bug and Mouth Disease".
* It gets even worse at the fall formal when he first beholds her in her ballgown:
* It gets even worse, but his followers are so fanatically loyal to him (such that they've been compared to the Helghast) that they don't see it; though for what it's worth, it seems Ezelcant's agenda is only known to a select few.
* It gets even worse in the Marineford Arc. After Luffy freed Ace, the Marines proceed to shoot Luffy

* It gets even worse with one of the newer commercials, where the King actually
* It gets even worse with the above example. Two logistics ships can transfer 324 GJ of energy every few seconds to each other while only using 108 GJ each to do it. This results in each ship gaining 216 GJ of energy every 5 seconds that literally comes from nowhere.
* It gets extra horror points for the fact that it was the site of forced labor by Korean prisoners during

* It gets freakier. Severing the corpus collusum (part of the brain that connects its two hemispheres) which formerly was done to prevent epileptic seizures, can lead to alien hand syndrome. Each hand, like the eye, is controlled from the opposite hemisphere. So when they are separate, the left "rational" hemisphere is not in control of the left hand, but rather the right "emotional" hemisphere is. This had led to the right hemisphere and left hand essentially becoming mentally ill. One case had a man whose left hand would unbutton his shirt once the right hand had buttoned it up. An episode of
* it gets harder and harder to pull him out of his Titan, until the third time they yank him out and his entire face comes off his head, leaving eyes and barely-fleshed skull underneath. Hange wisely decided to move on after this.
* It gets interesting, especially when beer is spilled on both of their shirts and they're both half-naked...
* It gets lampshaded/parodied like crazy later on, with the methods of killing Phelous
* It gets more complicated after other authors began working on the series and trying to untangle the
* It gets more interesting on the law front, as the Ecclesiarchy has its own courts which are wholly independent of civil law; the
* It gets more serious, however, when Ax is in a dangerous situation and gives up his human morph for fear of not being able to defend himself.
* It gets pretty bad when the idea of a human having magical powers is treated as ridiculous while having similarly-themed energy-based superpowers inherited from the alien grandparent isn't. Later on learn that the human-appearing magic users Hex and Charmcaster come from another dimension. Humans
* It gets pretty strange when the happy-go-lucky characters (especially Shawn) have to investigate what are increasingly horrifyingly violent murders. The characters themselves have even pointed out the weird contrast on occasion.
* It gets rather ridiculous when two characters start repeatedly shooting each other in the face with shotguns, repeatedly, at point-blank, only resulting in some soot covering their faces. You'd think they'd try something else after the second shot...
* It gets really absurd when you start doing this with tiny rocks from slings or darts.
* It gets revealed that the man who attacked her was just nicknamed the Devil.
* It gets sadder when Brittany turns her down for Artie. I could never be truly mad at Brittany, but…
* It gets somewhat ludicrous at the end of R2, when Lelouch throws around intricate (and poetic) formation names to his army in preparation for his battle with Schneizel, though the strategies do serve to reinforce the

* It gets to the point where Lulu starts explaining things before he even asks, leading him to comment that she's gotten so used to him asking questions that he barely needs to ask anymore.
* It gets weirder in the case of Cremia and Romani. Cremia and Romani are parallel universe expies of Malon from
* It gets weirder when you realize you might be wrong about your death, and it could be a clone, copy, or other shenanigans. This might become important should you die some other way, as the other time-traveling player characters now are separated from the real timeline by knowing a false one. They probably will be very interested in staging your "predicted" death in order to avoid this condition. Continuum is
* It Gets Worse about it, to the point that the mere flicker of lights is enough to make her change course just before she decides something.

* It Gets Worse, a Rube Goldberg-esque chain of events causes supervillain Lung to be tarred, feathered, lifted off the ground by a giant balloon, blown up, and then dropped into a sinkhole full of wet cement when he attacks a chicken festival that a parahuman with the power of causing unlikely events that chain together to comically neutralize any threat to her or anyone she likes is attending.
* It Gets Worse, Coil despairingly wonders what would have happened to him if he hadn't taken the warning from Taylor's power in the form of nine anvils falling in a circle around him. The news reveals the art exhibition they came from also had some antique pianos. One of those pianos later takes out Jack Slash when he tries to take Taylor hostage.
* It gets worse.? Fortunately, Kurt and co. are a perseverant and crafty bunch.
* It gets worse from there. Mana's reputation as not just a schemer, but also an arrogant, sadistic and jealous primadonna who can't stand anyone more popular or talented than him, has stuck. He now gets blamed by a significant number of people every time someone he works with leaves or a band on his label splits up. Admittedly, Moi Dix Mois'
* It Gets Worse. If the Empire had just let things be and accepted that their plan had failed, nothing would have happened. They decided to act as, well, the Empire. And the whole chain was set in motion, even before Taylor was kidnapped.
* It gets worse if you do anything other than beating Nightmare Moon. Following her defeat, the game has a mini-quest to prepare for Princess Cadance and Shining Armor's wedding, it involves buying the bride and groom for 650 Gems EACH. And the Hearts & Hooves update features a Valentine themed quest chain, which ends with buying Lovestruck (a pink Twilight Sparkle recolor) for 600 Gems. Cadance and Shining have since come down in price (90 gems for Cadance and 195 for Shining), but that's still a lot of gems, and it also doesn't help that certain shops or items that are required for quests can only be purchased with gems.
* It gets worse. If you ever lose one of your trained and effective soldiers (and it
* It gets worse in the second game, with the end result being everyone forced to ragequit from
* It gets worse (morally speaking). Not only did the U.S. accidentally get itself horribly infected, when the military officers in charge of the base where the accident happened decide that there's no putting the cat back in the bag, they order operatives in Europe and Asia to purposefully release the plague over there, under the "if we go down we're taking you all with us" theory. They note that the operatives think the containers they're supposed to open contain radioactive particles for use in testing the ability of satellites to track them, or something.
* It Gets Worse: Taylor's super luck powers prompt her to tie her shoe right in time to avoid a throwing star from Cricket, who gets hit by a bus before she can try again.
* It Gets Worse, thanks to Taylor's power, though only half of them are actually lethal.
* It gets worse when she discovers that she has a hard time telling the difference between what she hears and
* It gets worse when thick accents are involved. For example, the native Newfoundland Canadian accent pronounces both "iPod" and "iPad" almost interchangeably.
* "'It Girl'": Eugene, after Helga (currently famous as a supermodel) shoves him.
* It gives finishing strikes to Negi, Kotaro, and Setsuna on a fairly regular basis. Jack Rakan also lampshades it, stepping into
* It gives us Crackerjack's "...so the woman says 'You idiot — This is a duck, not a pig!' And the bartender says "I was talking to the duck!'"
* it gives you the dubious distinction of being the only homicide that took place in New York City during 9/11:
* It goes a bit further; Gibbs is back in Tortuga, while Barbossa and his surviving crew are back in possession of the Black Pearl after leaving Jack behind again.
* It goes a bit further than that. The actual Ancient language is supposed to be

similar to Latin in universe. Odds are it is a matter of certain parts of the universe lore pre-dating the point in the series where the Ancients began to be fleshed out in more detail rather than intentional.
* It goes backward in time as well: later chapters show the history of the real Heero Yuy, including his
* It goes badly, but due to crazy hijinks, he winds up adopting a baby by the end of the episode and thus has a life outside of work anyway.
* It goes beyond just Earth. sleeping at the center of it all. He's completely unaware of reality and will be equally oblivious of its destruction when he finally wakes up.
* It goes beyond that; Scarlatti is outright offended that they thought interfering would be necessary.
* It goes both ways. Lois is down right vicious to anyone who wrongs her children and is stupid enough to let her find out about it.
* It goes both ways. Throughout the season, Zoey fought as hard as possible to prevent the destruction of the Arcadian Building. After she finally manages to convince Ted to agree to help her, he ends up betraying her at the last second and ensuring the building's destruction. One has to wonder why would Zoey want to get back with Ted after what he did.
* It goes both ways with Spike, weirdly enough; he's a well-known Slayer killer, having tracked down and killed two others before meeting Buffy. After several failed efforts to make her the third notch on his belt, extenuating circumstances lead to him sticking around long enough to
* It goes deeper than that. The games were meant to launch with the cartoon, but the cartoon ended up getting stuck in
* It goes even further with Microcephalopoids, aliens so small that they use Mobile-Suit
* It goes for buildings, too, as when Alice comes to her parents' manor, a usually refined and gorgeous place, only to discover it's the messy clutter it's truly been.
* It goes further than that. In addition to being immune to the Force (though that varied heavily
* It goes the other way when the WBC tries to press charges when local civilians take steps to block the protests, such as using their own vehicles to take up parking spaces, leaving the protesters nowhere to park or forming a human buffer between the protestors and the funeral. While it is illegal for the state or town to infringe on their right to peaceful protest the citizens also have that right and invoke it to keep the WBC away from their grieving friends and coworkers.
* It got a bit morbid in one ad, with virus-ridden PCs being led away on a cabinet (re: morgue slab).
* It got even more repetitive when TheCW4Kids showed off new shows and seasons in their "Friday Fall Preview", hosted by Sonic the Hedgehog. Every ad break was either a "Sketch-Air" ad or a "Twinkle Toes", with the only exception being
* It got more complicated with the Ninth Crusade (1271-1272). Abaqa Khan, the monarch of the Ilkhanate, allied with the Crusaders against the Mamluks. He was a Buddhist. On the other hand, the Northern Crusades (or Baltic Crusades) featured various Catholic factions at war with the last remaining Pagan tribes of Northern Europe. Said Catholic factions rivaled each other and did not hesitate to go into open war. For example the long conflict between Poland and the Teutonic Order. Add a number of Orthodox states, mainly Novgorod, getting involved and you have even more complexity than the Middle Eastern Crusades.
* It got really bad with the UK airings of "Merry Christmas Mordecai" and "Sad Sax". The UK gets the episodes a few months after they first air, but since Cartoon Network UK will only air Christmas episodes around Christmas, when they got to that point in the season, they skipped over MCM and went right to Sad Sax, despite the fact that Sad Sax is a direct sequel to MCM, likely confusing some viewers.
* It got really interesting at the White House Correspondents' Association Dinner, where the fake Colbert "
* It got so much worse for him after he ended the streak on April 6, 2014.

Wrestlers and fans alike have been treating him worse than ever due to his attitude of only being in the company for
* It gotten to the point where they slip it into Real Estate adverts. An ad for a real estate development in Taichung, Taiwan, mentions its brand new Design for Oxygenated Living — i.e. you can open the windows and let fresh air in.
* It got to the point where being unkillable becomes one of his signature traits; in Jason X, scientists have Jason's mostly-dead body and are trying to reverse-engineer his indestructibility. It... goes poorly.
* It got worse near the end when roaming bands of fanatical SS troops would dole out executions for "cowardice" for anyone, military or civilian, who expressed even a desire to surrender.
* It grants major strength, but at the cost of mobility, making the form useless, not to mention that it is very inefficient at energy consumption and quickly wears out the user.
* Ithaca in real life was thought to be a small island kingdom with a few shepherds and a small city (there are about a dozen places claiming to be Ithaca, all pretty similar). You really can see the crafty genius of the Trojan war getting bored from that.
* Ithacus, with the propellant being made from seawater by the carrier's nuclear reactor.
* It had an episode with the question "What rhymes with purple?". Alan Davies blurted out random -urple words and ended up getting both right at some point in his rant. The correct answers were, by the way, hirple and curple. Hirple meaning to hobble along on one leg, and curple being the part of a saddle that goes along the horse's stomach (more commonly known as the crupper).
* It had at least one tentacle and presumably was descendant or the one that escaped from the pyramid. Part Q'qr, maybe. Presumed dead, drowned in the buried town.
* It had been previously been established that particularly powerful benders are capable of bending with very subtle movements (facial twitches were enough in the original series). The only person capable of such Bloodbending wore a mask, so it's entirely possible he was making motion that the observers couldn't notice.
* It had been stated that both Sol Badguy and Justice are also in this category due to the Information Seeds, Adam and Eve, which are merged into their Gear Cores. These Seeds keep their very beings affixed to the structure of the universe itself, which renders them indestructible and immortal.
* It had previously been repurposed with the same altered lyrics by either Kmart or Target for store-brand children's summer clothing and poolwear. At least they had the "decency" to hack it to bits in order to remove any references to drugs or relationships.
* It had quite a few of the "humans are bugs" variety. One involved an alien lab tech getting scolded by his mentor for putting "two incompatible species in the Earth Terrarium", panning to a tiny human in a terrarium getting mauled by a tiny bear. Another one has one giant alien reminding the other to poke holes in the jar.
* It had the added practical application allowing a Sergeant to keep a Trooper out of arm's reach. An angry Trooper can't attack a Drill Sergeant (and get punished for it) if the Sergeant
* It had two installments of the erotic story of an incubus who is thoroughly benign, happily married to a human woman, and went public as an intellectual author to present an alternative view of Hell and its occupants. As such, sex with him is completely harmless and, as such, he is continually pestered by the neighboring women in his suburb. Even though he often gives in and indulges them, his wife has no problem with it, considering he never neglects her desires either.
* It hangs a lampshade on it when Fry tries to use the Earth's most powerful radio telescope to find Bender somewhere in the universe. After spending a few days searching, Leela notes that even if he spends his whole life looking for Bender, he'll have searched less than a ten-thousandth of the universe. As he gives up, he spins the viewfinder aimlessly and says "I wish I had Bender back!" - which just happens to reach the ears of a God-like being that is conversing with Bender, and

promptly sends him back to Earth. Leela's comment on this is priceless:
* It happened after the sons of men had multiplied in those days, that daughters were born to them, elegant and beautiful. And when the angels, the sons of heaven, beheld them, they became enamored of them, saying to each other, "Come, let us select for ourselves wives from the progeny of men, and let us beget children". —
* It happened again a few videos later, with another woman coming in and searching for "Climate change is not real." Google responds with a massive pile of letters and the retort "Climate change
* It happened again between Seasons 3 and 4 regarding the purpose of the ORB. This, however, was eventually answered in Season 4's "The Revenge Society" -
* It happened again during the Blood War arc, specifically the start of the Vandenreich's second invasion of Soul Society. Complaints seem to be similar to those against the battle in Fake Karakura Town, namely that it's a seemingly endless series of fights against bad guys who usually only get a minimum of characterization before getting offed. However, the last leg of the arc ended up inverting this; due to the manga author's swiftly failing health, the manga was so abruptly wrapped up that the last stretch was heavily compressed and extremely rushed, with many new, game-changing plot points being brought up without ever really being fully touched upon.
* It happened again during their segment on coal. After receiving a Cease & Desist letter from Murray Energy — a series first — they focused far more on the company and their CEO, Bob Murray, than they initially intended to. Taken a step further in a later episode. Bob Murray sued them for slander over the episode, and the lawsuit was eventually dismissed.
* It happened again. Even though you instantly lose if you don't have the item you need, a glitch in a newly implemented item gave a player a chance to act, upon which they made use of a different newly implemented item to reset her stats to manageable levels. This would serve as a testament to the ongoing creativity of players, except that it apparently managed to happen entirely by accident this time.
* It happened again in a game in 2014 between the Seattle Seahawks and the St. Louis Rams. On a punt by the Seahawks, primary return man Tavon Austin drifted to his left, frantically moving around as if he had trouble locating the punt against the background of the stadium's domed ceiling. The Rams players moved to block for him, and the Seahawks moved to follow. Unnoticed by nearly everyone was wideout Stedman Bailey, who caught the punt on the
* It happened again in another cartoon episode when Dennis gets accidentally caught up in a hot-air balloon race. A flock of birds burst one of the hot-air balloons.
* It happened again in China, where a drunken bus driver named Dong chewed the face of a woman named Du.
* It happened again in early 2017, allowing fans to choose who will become a Prime in the future IDW comics and get a figure in the third subline of the
* It happened again in May of 2014: UFC Bantamweight Champion Renan Barao had not lost a professional fight since his very first one in 2005 and had been either Interim or Undisputed Bantamweight Champion since July of 2012. Then came unheralded underdog TJ Dillashaw, who proceeded to not only defeat Barao but thoroughly dominate him through the first four rounds before
* It happened again the fight after that, with Antonio "bigfoot" Silva dominating him and beating him by TKO.
* It happened again to Huebel several years later when he got his biggest break to date as a member of the comedy troupe
* It happened again when she translated "When Will My Life Begin?" from
* It happened again with Grandpa in "Fear of Flying": when the family returns home after Marge's panic attack on the plane, Bart mentions "You know, I have this feeling that we forgot something...". Cut to Grandpa still on the plane screaming
* It Happened Here (1966). Used to show the protagonist falling under the sway of the fascist Immediate Action Organisation. At the beginning of the montage the IAO

nurses flinch when firing a Webley revolver; by the end all of them are coldly blazing away at their targets.
* It Happened Here film about a Britain that was conquered and occupied by the Germans in 1940, includes newsreels showing friendly comradeship between British and German soldiers.
* It Happened Here film about a Nazi-occupied Britain, cast British fascists as local collaborators. Unfortunately, this backfired and led to one of the scenes involved being cut by UK censors, for having actual fascists expounding their ideology.
* It Happened Here is a grimly low-key film set in a Nazi-occupied Britain. The US, the USSR, and a British colonial goverment-in-exile are still in the war, there's an active British resistance movement, and the ending strongly implies that the Third Reich is headed for defeat.
* It Happened Here), there is a newsreel showing a revisionist history of British/German relations. Chillingly, it is narrated by a well-known voice-over reader of the war years.
* It Happened Here, where the protagonist regards the Resistance as worse than the German occupiers.
* It Happened in Athens of 1896. The underdog Greeks are the heroes and their overwhelming opponent is the highly successful American team. The Americans are portrayed as a little cocky, but are ultimately sympathetic and sportsmanlike. (Might have something to do with the fact that the film was an American production, of course.)
* It happened in the backstory for General Zod's henchman, Non. He was once a brilliant scientist and friend of Superman's father, Jor-El. However, when he tried to help Jor-El to warn the people of Krypton about their impending destruction, the ruling council had him lobotomized to silence him, leaving him a mindless brute.
* It happened in the first season. It was a head-to-head, Kelly Monaco against John O'Hurley, which Kelly won. Criticisms over who really deserved it and how much of a role Kelly's fanbase played prompted ABC to do a
* it happened on a rock in the middle of a lake. So they built their new city, Tenochtitlan, on the lake. (When the Spanish showed up 200 years later, they recognized the value of the city but didn't care for all the water. They drained the lake bit by bit, creating Mexico City.)
* It Happened One Christmas starring Marlo Thomas. Played completely straight.
* It Happened One Night at a passing car as an alternative to sticking out her thumb. It works.
* "It Happened One Night" deals with the entire camp observing black-out conditions due to shelling from what they think is the enemy but is actually the US artillery; during this time, Hawkeye deals with a spastic shell-shocked soldier in Post-Op, Klinger trains a new corpsman pulling guard duty, Frank literally tears Margaret's tent apart to look for his love notes she kept, B.J. worries about his patient whose had an excessive amount of blood IVs, and Potter and Radar work to try to get the shelling stopped.
* It Happened One Night: Early on, Ellie sleeps on Peter's shoulder during a bus trip. Later, he says to her: "Remember me? I'm the fellow you slept on last night."
* It Happened One Night Ellie and King Westley have eloped before the movie starts. When Ellie is reunited with her father, she decides to have a large, public ceremony.
* It Happened One Night. One of the classic romantic comedies, despite the fact that the two leads mostly discuss things like hitchhiking techniques, and what does or does not constitute a piggy-back ride.
* It Happened One Night, Peter and Ellie fool the detectives who are sent by Ellie's father with acting like a low-class married couple.
* It Happened One Night, playing a spoiled runaway heiress, meet on a bus. They argue over who should get the last seat, and Claudette Colbert ends up falling asleep on his shoulder overnight.
* It Happened One Night, the hero makes a drunk call to his editor who decides to fire him while on the phone and then hangs up in disgust. The hero, surrounded by

other drunkards, pretends the conversation is going on and that his editor is begging him to stay on the job which then earns him the applause of his friends.
* It Happened One Night." This is probably where anything similar comes from.
* It Happened One Night," when her father begins to catch on to how he really feels:
* It Happened One Night with and married him to stick it to her overprotective father. Once she spends her time with Peter and finds out what falling in love is actually like, she realizes there's no way she ever loved the first guy.
* It happened several times in one episode of former Brazilian comedy show
* It happened several times, not only to Kouji (which is not surprising) but also to Sayaka. One example of it was original manga's episode 8 when they saw each other naked
* It happened to be a design flaw — when during the investigation the next capsule in the series (which was discussed as a possible lifeboat for Komarov at one time) was tested closer then before, they couldn't force it to release its 'chute
* It happened to Estela and Dragonetz individually concerning the same person:
* It happened to Stabler's mentor. The suspected rapist had served his sentence and was released, so when similar rapes start happening, the immediate assumption is that the rapist is up to his old tricks. However, Stabler expresses skepticism that their suspect, a mentally disabled man, was capable of a crime of that complexity. His mentor is initially dismissive, but when he learns that the suspect has an alibi for the most recent crime, he realizes that Stabler was right; the suspect in question had been innocent all along. They then find that while the innocent man was in prison, the killer had committed similar crimes in other states, counting on the different jurisdictions to keep the police from putting it together.

* It happens a lot among sport fans: matches between teams that share a bitter rivalry with one another will see their respective fans fully indulge in this most of the time.
* It happens a second time with the Garleans. An ambassador of a less warmongering faction of the empire comes to negotiate a trade of war prisoners between them and Doma as a show of peace. While the ambassador, Asahi, does hold up his end of the bargain, he also uses the opportunity to
* It happens between countries too (having sports teams face-off is so much easier than war!), as America's West Point and Canada's Royal Military College have hockey games when their regular-season schedules allow them to.
* It happens briefly to the Tenth Doctor at the end of the episode, The Unicorn and the Wasp" where in his search for an Agatha Christie book, he finds a Cyberman's breastplate and the orb that the Carrionites were sealed in before managing to find the book.
* It Happens Every Spring of not-kosher movement in a pitch will cause the opposing team to demand the umpire check the ball and/or the pitcher's glove.)
* It happens for real several times later on, though most of it's really spoilery.

* It happens in "Red Riding Hoodwinked" when Big Bad Wolf and Sylvester are chasing Red Riding Hood and Tweety. Sylvester accidentally opens a door into Wolf right as he's about to catch Red.
* It happens in scripted sequences too, to remind you that yes, there is a battle raging. For example, three Alien Grunts get dropped off by a Xen Flyer only to be immediately bombed by an F-16.
* It happens in "Sweet Foot Rides" when the quads go to the hotel room to get their father's prototype shoes back from the man they thought stole them. Instead, they go immediately to the bed and jump up and down on it, taking so long that the man comes back.
* It happens later on in the Cell Saga, too. The most notable occasion comes with Tien using his Tri-Beam attack to keep Semi-Perfect Cell at bay so that Android 18 could escape; though the Tri-Beam doesn't actually harm Cell, he's pinned down by it and can't move until Tien stops the attack. Made all the more astonishing because Cell's previous form had been shown effortlessly taking down a Kami-fused Piccolo and Android 17, and the Semi-Perfect form made quick work out of Android 16.
* It happens rather frequently with Oggie, as he tends to let run his mouth. Being

* It happens to an entire house. The animators figured out that in reality it would take somewhere on the order of millions of balloons to lift the house. In the film, they use ten or twenty thousand, but the ones they use are twice as big as the main character.
* It happens to a rich woman's pomeranian, who had the misfortune of being behind the tailpipe of the
* It happens to Brynjolf as well, as their adventures take them to disturbing revelations
* It happens to Eleanor again in "Michael's Gambit" when she describes Tahani as a "hot, rich fraud with legs that go on for days" and has to pause her monologue to say, "Side note: I might be legit into Tahani."
* It happens to him again in the second series episode "Time". A light bulb in the ceiling decided to leave to get away from Neil's BO (Vyvyan was holding him over his head to use as a weapon while fighting with Rick), and Mike, Vyvyan, and Rick are preparing to jump off a ladder and onto one end of a seesaw to propel Neil toward the ceiling to put in a new light bulb. As they count down to the jump, there is a loud squelch. Mike tells Neil not to worry, as that shouldn't affect his overall weight in their calculations.
* It happens to Jason himself when he bets Marcus fifty cents that he can write a longer essay. His thousand page essay easily trumps Marcus' 500-page one, but while Marcus gets an A on the essay, Jason, for all his work, gets a D, and fifty cents. (And he doesn't learn a thing afterwards.)
* It happens to Mashiro on a few occasions while she's going incognito, such as when she meets up with the similarly disguised Prince Takumi, or with Mimi
* It happens to Pikachu in the beginning of the Advance Generation and DP arcs, as well. In Hoenn, Pikachu got strapped to a giant magnet which made its powers go out of control, and after it all he was reset. Sinnoh, however, didn't really have an explanation beyond him being exhausted. Kalos and Alola didn't even bother to explain his weakening at all.
* It happens to Raj again around midway through Season 9, when he starts dating two girls at the same time. In one episode, he and Howard are sitting at Howard's place, and Raj is bragging about how good his life is, which Howard finds clearly obnoxious.
* It happens to Richie too. The poor boy never did have any luck with his women.
* It happens to Tennyo in her origin story. She wakes up and finds herself a prisoner, and finds she now has energy powers. When mutant assassins come after her (to send a message to her superhero parents), she finds out (in the nick of time, natch) that she can create an energy sword, and that she can fly.

* It happens to the leads during the Halloween episode in a closet in an attic. It's
* It happens to the orcs, too. Merry and Pippin are able to escape when Saruman's orcs fight Sauron's orcs over who gets the captives; then the Riders of Rohan wipe out the remaining orcs. Similarly, the Minas Morgul orcs fight the Barad-dûr orcs over Frodo, and all but one are killed, whereupon Sam, coming to the rescue, kills the last one.

* It has at least two large factions.; each side must have a noticeable number of supporters. In addition, the fanbase must be large enough to support the factions. An obscure work is less likely to have a broken base than a very famous one or a broad subject.
* It has a ton of things mostly justifiable by the symbolism involved. One example that stands out is the Rumbar Pirates' last song together: the entire crew getting up and singing while all suffering fatal arrow wounds then dying one by one is patently absurd, but it works because it drives home the sense of loss that the scene calls for.
* It has a truly painful scenes during the Drum Island arc where Luffy has to carry both Nami and Sanji up a ridged but almost perfectly vertical cliff and when he loses his grip he starts sliding down and he has to dig his finger into to get it back which grate across a lot of the rocks and get incredibly bloody.

* It has been hinted that the Eldar are slowly bringing about the birth of a new god which may be able to destroy Chaos (although it has been suggested that the birth of this god would require the death of every last Eldar). As for humanity, every positive emotion which could lead to the creation of a benevolent Warp entity is focused squarely on the Emperor, whose dying physical body is hooked up to an enormous life support machine. It's implied that if the Emperor were ever allowed to die, he would ascend to true godhood and be able to fight Chaos directly. Unfortunately, the loss of the Emperor from the physical world would be an unsustainable disaster for the Imperium: his psychic strength controls the Astronomican, a massive navigational beacon made of psychic energy, without which Warp travel would be practically impossible.

* It has been noted that, based on puncture marks found on moa pelvises, the Haast's Eagle was probably a fairly specialized hunter of the same. Moa were big, feathered bipeds. The earliest Maori colonists were most likely wearing feather cloaks same as they do now. This might have caused... issues. In the end, human overhunting of its food supply drove the eagle into extinction.

* It has been prophesied that Xena's child would cause the doom of the Greek gods. They decide to kill the child, their attacks on her and Xena leading to their doom. The gods have immortality and the ability to teleport. For all her abilities, Xena had neither of these. They would have been just fine if they'd stayed away. Ares explicitly noted this trope in "Amphipolis Under Siege" when appealing to Athena to just let it go. He even offered to simply take Xena and the baby to another realm far away from the Olympians. Athena refused to listen. Ultimately, Ares and Aphrodite (who refused to go after Xena and her baby) are the only gods shown surviving the experience.

In terms of history, the news-magazine also stated, "In 1998, the University of Wisconsin surveyed more than a thousand societies. Of these just 186 were monogamous. Some 453 had occasional polygyny and in 588 more it was quite common. Just four featured polyandry. Some anthropologists believe that polygamy has been the norm through human history. In 2003, New Scientist magazine suggested that, until 10,000 years ago, most children had been sired by comparatively few men. Variations in DNA, it said, showed that the distribution of X chromosomes suggested that a few men seem to have had greater input into the gene pool than the rest. By contrast most women seemed to get to pass on their genes. Humans, like their primate forefathers, it said, were at least "mildly polygynous"."

It is known the Germans developed one form of crescent-shaped flying wing design to a high degree of air-worthiness, and what stopped it from going into Luftwaffe service in 1945 was simply that Germany collapsed too quickly. The Horten IX flying wing design was built and tested at Gottingen in West Germany — a city captured by the Americans in April 1945. In appearance a crescent shape with a rudimentary tailfin, this radical design may have been the craft seen by Kenneth Arnold over Washington. At a time when very few people had seen even the first conventional jet aircraft, this radical new configuration of jet fighter would have seemed completely alien to the observer. And the USAF would only have been too glad for people to jump to exactly the wrong conclusion — that this was extraterrestrial...

* It has to be a full song, released either as a single or otherwise widely available to radio stations. The song has to continue to receive airplay on the very general radio stations (i.e. an FM oldies station would count, but not a Satellite Radio station specifically dedicated to movie themes from the 1960s). Most FM stations count in this regard, since their entirely free mood means that they have to try to appeal to as wide a group as they can.
* It has to be an action show, so even if a show has a dynamic opening, like
* it has to be reforged periodically, and the most important step is tempering it with the life's blood.
* It has to be said that the Bovington tank museum in Britain appears to be more sympathetic to the needs of film and TV than most. While, understandably, it will not loan its only Tiger -
* It has to have been created alongside a movie (TV show/video game/whatever). One way you can tell if it counts is if the music video heavily advertises the tie-in. It can't just have been tacked on by the studio to try to get more publicity for it (see Seal's "Kiss From a Rose" for a blatant example of that). With this rule, it does count if the music was released well in advance but was specifically intended as an intrinsic part of the movie (/TV show/video game/whatever).
* It has two Russian cosmonauts somehow end up in the 3rd century AD during the final years of the Roman Empire. One of them gets captured by the barbarians encroaching on Rome, while the other one joins up with the Roman legions. Naturally, they change their names from Gennady Cherepanov and Aleksey Korshunov to Gennadius Paulus and Alaseia the Heavenly Warrior. Somehow, Alaseia/Aleksey ends up the chieftain of the barbarian tribes, while Gennadius/Gennady becomes the Primus Pilus (senior centurion) of the Roman legions. The author's goal appears to be not to change history but to describe the fall of Rome through the eyes of our contemporaries, one of which is determined to keep the Empire from falling (having already lived through
* It. Heavily horror based, but still has some comedic elements thanks to the wisecracking protagonists and the (creepily comedic) presence of Pennywise.
* I, the Jury into the dispenser of brutal justice we all know and love.
* I, The Jury, the hero detective Mike Hammer has just shot the villain: "The roar of the .45 shook the room. Charlotte staggered back a step. Her eyes were a symphony of incredulity, an unbelieving witness to truth. Slowly, she looked down at the ugly swelling in her naked belly where the bullet went in. "How could you?" she gasped. I had only a moment before talking to a corpse, but I got it in. "It was easy," I said.

* It helped that Caravaggio (with the help of his influential friends) was able to pass most of his murders as duels, which were somewhat accepted, although in at least half of the cases these were outright assaults instead of genuine mano-a-manos.

* I think I left my hat in the car. I should go...be with my hat...in the car.
* I Think I Love My Wife, Chris Rock's character has one of these when he takes Viagra. Which results in his having to be drained in the back of an ambulance with a very large needle.
* I Think I Love You, but not nearly as desperately. Petra thinks it's because Molly is happier with her life and doesn't need to escape into celebrity fantasies, like Petra did.
* I Think I Love You fan magazine. To his annoyance, he finds himself unable to get the songs out of his head, singing them to himself even when he's off work. He thinks that long after he's forgotten all of Tennyson and Keats, he'll still be

* I Think Our Son Is Gay coworker Toono to the story and, unfortunately, sometimes treats him like a spectacle behind his back.
* I Think Our Son Is Gay Daigo, at which point Akiyoshi accuses him of missing the point. Tomoko, the mother, has to remind Akiyoshi that Hiroki's math fell off a cliff after going to high school.
* I Think Our Son Is Gay: Flackbacks to Hiroki's first and fifth grades show that he had unsubtle crushes on his male classmates at the time. Looking back to them, his mother muses that she could have worked out the truth much earlier if she'd been more open-minded.
* I Think Our Son Is Gay. None of these attempts at correction fool Tomoko.
* I Think Our Son Is Gay. The last two pages returns to the present day, and it seems Hiroki has gotten over it—he looks at the towel since it looks really old, and should be replaced.
* I Think Our Son Is Gay. They like these qualities in each other: Hiroki appreciates Yuuri matter-of-factly talking about things he struggles to, and Yuuri admires Hiroki's emotional openness.
* I Think Our Son Is Gay. This scene is also the earliest instance when Hiroki identified his feelings to some boys as romantic.
* I Think Our Son Is Gay when he first entered the tenth grade because nobody volunteered and he happends to be the first student by alphabetical order. Daigo Shiraishi took up the position by volunteering himself, since he doesn't like people being pushed to do something.

* I Think You Should Leave With Tim Robinson, Brian finishes off his spirited defense of his hat choices by slamming his hand on the table, but accidentally hits his water bottle and spills it all over his laptop.
* Ithkar. Consequently, stories often revolve around trying to deal with a conflict without using magic (or at least, without being caught using magic).
* Ithkuil is an (in)famous artificial language first published in 2004 designed to "express deeper levels of human cognition overtly and clearly, particularly in regard to human categorization, yet briefly". In order to achieve this, its initial incarnation featured a phonological system of 65 consonants, 17 vowels and a god-awfully complex grammar designed to pack as much information, meaning and tone as possible in as little space as possible while removing any ambiguity as to what any given statement means or how it relates to anything else. Even its own designer wasn't a fluent speaker of the language. To quote a troper's thoughts on the original:
* I Thought Everyone Could Do That: A character has a special talent that they think everyone else is capable of doing.
* I Thought Everyone Could Do That of the above: You fail to realize everyone else's ineptitude compared to you.
* I Thought It Was Forbidden: Dangerous or unethical acts are justified for a cause.
* I thought it was to save the US economy from the collapse of the gasoline-based automotive industry.
* Itica. Humanoid cat people who live a wandering lifestyle althouh other races rarely see them due to their preference to stay out of people's businesses. They have sharp senses.
* It includes a minor figure named Mered, whose name means "rebel". Jewish tradition identifies him with Caleb because when ten of the twelve spies rebelled against Moses, he (along with Joshua) remained faithful and "rebelled" against them.
* . It includes two drummers, a piper and an American flag in the background.

* Itineraire d'un enfant gâté: Not only does the daughter want someone like her dad and ends up having a son from a man her father's age, then marrying a guy trained by her dad to act like him, but it's implied that it's also the case of the son.
* Itinerant monks like Miroku and shrine maidens and priestesses like Kikyo and Kaede also perform a good number of exorcisms, which may range from waving ofuda at an incorporeal spirit to beating monsters with a ceremonial staff.
* It initially appeared that this sort of redemption was what Athena and the other gods had in mind for Kratos from
* It initially appears to be a gender inversion of this trope when Ser Loras Tyrell gives Sansa Stark a red rose before his joust, but it turns out to be
* IT: In the first 1984/1985 segment of the narrative, the cops interrogating the young men that assaulted Adrian Mellon, a gay man, throwing off a bridge and into the Derry canal to his death (at the hands of Pennywise), would love nothing more than to see the local gay bar close its doors for good. However, they react with anger and disgust at the brutal way in which Mellon was beaten and they look forward to throwing the book at the three punks who did it.
* It: In the scene where Ben is reading a book about Derry's history in the library, an old woman (possibly Pennywise's avatar) can be seen turning towards him and smiling in the background.
* It introduced a new combat engine, Renbu (which means "Endless Dance"), which
* It introduces Captain America with a lingering shot of Chris Evans' ass as he pummels a punching bag (and throws in a few more ass — or full-body — shots later on when he's dressed in his tight, colorful suit whose pattern

immediately draws the eye to his shoulder-to-waist ratio);
* It introduces the egotistical Captain Hammer with a scene-stealing hero song atop a moving van, complete with
* it involved a prank with a chocolate bar and a pool) he runs across her toes, prompting mass panic in the girls, macho bravado from the boys, and annoyance from Jake and Cassie, who very quickly catch on when the mice seem to understand English.

* It involves both Root and Shaw serving Samaritan instead of The Machine, leaving room for them to become a couple again.
* It involves torturing an outsider to death with the clear intent to cause as much suffering as possible for the Hellish Abyss to be temporarily placated.
* It is absolutely no secret that Joe, the head of security for the Genovian Royal Family, is in love with Clarisse Renaldi —
* It is a common occurrence during the show's many other bar brawls, too.
* It is a common refrain that while Social Services do exist, they are not adequate to the task and many cases are handled too slowly or get lost in the bureaucracy. This can arise from insufficient funding, poor management and oversight, or the simple fact that even without those obstacles the work is grueling, difficult, often thankless, and not a high prestige occupation, so there are simply not enough social workers to go around.
* It is a common staple of sports themed manga/anime (usually set in high school) to have a team that has dominated the national circuit and is always touted as the team to beat for the protagonist team. Examples are:
* It is actually possible to shoot off the heads off Hunters, Chimeras, and Cerberus, especially when using the Samurai Edge...although it doesn't serve any tactical purpose.
* It is actually possible to win the game without firing a shot. If the
* It is a fairly common result of "parejas suicidas" match ups, where the losing pair must then fight each other for the right to keep their
* It is a frequent situation in superhero comics, usually with a superhero having to choose between a fellow superhero and a non-powered civilian.
* It is again used by the CP9 as they act friendly, become well-loved members of Water 7, befriend many members of Dock 1, including Paulie, but when they reveal themselves, they also reveal that they never had any attachment to the city or to the people inside it. Paulie can't believe it at first, and asks his traitorous good friend Rob Lucci:
* It is a general rule of rebellions in general that the rebels will be fighting rebels against it. This applies even in normal democratic factionalism dressed up in the language of rebellion; someone who ends up not supporting a given special interest can be called a
* It is a gospel part of Wrestling Physics that any high-flying move will be more powerful if done while spinning. Initially, this was just spinning in the direction of motion (ex: 450 splash), but then people started spinning backwards (
* It is alchemy. When he was absent, Professor Chronos/Crowler took over and blew himself up as well.
* It is alleged that Tsar Nicholas of Russia was once agonizing over signing a particularly controversial order, when an aide de camp approached him and tried to comfort him with the words "Majesty, we know how difficult it must be for you to decide...", not realizing that the one thing the Tsar hated above all else was the idea that others perceived him as a
* It is also a cold fact that life is not always fair. You could be the most diligent Crewmember in the game and still wind up being framed by an Imposter and voted out and you can only watch as the Imposter wins the match because no one trusted you despite your hard work.
* It is also added to if you remember that the first night they had a full performance was the night after the writer-director and creator Jonathan Larson had died from a heart problem. At this point, the cast was basically a family and on

the DVD extras, they all say that that night the song was all about him, and everyone was crying.
* It is also a shout-out to every show that ever said blackmail was interchangeable with extortion - and by this page, you can see there are quite a number of them.
* It is also a surefire means of identifying if someone is romantically interested in someone else, for obvious reasons.
* It is also based on the pilot episode of the show where Aang fought Zuko on the construction of a statue.
* It is also canonically established that a year (a full revolution of the Disc) is 800 days and has eight seasons. This is never respected after being established, so a linked system of "short years" of 400 days and 4 systems was retconned in. If you're going forward along the turtle's left side in summer in an odd short year, you'll be going backwards on the right side in an even summer. To keep things simple, each short year has 13 months.
* It is also clear Jon Snow inherited most of his looks from his mother Lyanna, especially his dark hair, eyes, and striking looks, which certainly made it easier for Lyanna's brother Ned (Jon's uncle) to
* It is also confirmed by the creator that Helia was supposed to be a girl, hence why he has a female name. It's likely he was supposed to be the new 6th Winx fairy (as well as Flora's best friend), but his gender was changed so he could become a love interest.
* It is also done several chapters later with Negi's unconscious body at a sleepover. Boy's a deep sleeper.
* It is also explicitly mentioned at some point that the text of the Rings books have been *intentionally* rendered as Modern English, even though the different ages and regions would have had different dialects and (to an extent) vocabulary.
* It is also extremely inaccurate compared to bullets just as regular paint balls are due to the fact that the paint projectile is too small to take advantage of the rifling effect.
* It is also fairly common in multiplayer worlds to decrease the travel time of minecart public transit lines by using mystic portals to relocate them to
* It is also hinted at that all previous Sourcerors had escaped into similar dimensions.
* It is also hinted at that Ted's grandmother died and they decided not to tell him.

* It is also implied that they themselves are being forced to curse you
* It is also implied to be a good thing because he finally decided it is better to manipulate others than to be suppressed and got hit by a
* It is also important to note that Dark Angels and their successors are killing Inquisitors investigating their chapter without second thought and at least at one occasion they destroyed Black Templar vessel that came into contact with Fallen. Their Unforgiven backstory also indicates that Dark Angels Chapter Master effectively holds legion's worth of military power at his hands.
* It is also inverted with 'Storming the Castle' at the end of the season, when the Kamen Riders storm Xaviax's mechanical fortress. (though the only thing they really destroy is the shield generator and Xaviax)
* It is also known for an incident in which Buckley had a fan animation taken down, made a response that outright insulted the creator, and threatened to sue them, despite previously saying he was okay with fan works. This move was widely

criticized, especially after the ill-regarded
* It is also lampshaded and subverted in the "Old Secrets" storyline where Quentyn's chief tormentor, Rahan, drunkenly whines how Quentyn is able to get away with anything
* It is also massively schizophrenic — "High Programmers" have the ability to directly influence or edit parts of the Computer's program, usually to further their own personal or secret society agendas. It is not uncommon for the Computer to have several directly contradictory and competing objectives at once, or assign missions that it doesn't even understand itself.
* It is also mentioned in passing that the Winter Session special topics course "Powers Integration
* It is also mentioned that a prerequisite for being a bodyguard to the Fowl family, among combat experience, is "
* It is also mentioned that the first wave of fighters sent against a ship with laser weapons is guaranteed to be hit once they get within a reasonable range where those lasers would have perfect accuracy. They only begin to miss once the weapon itself heats up too much.
* It is also mentioned that the official giving the speech that ends with him starting the "Victory or death!" chant had to be almost out of his head on tranquilizers to go up and make use of such violent rhetoric, and even then he was only barely able to hold it together. Mind you, he was the

* It is also not recommended to read a mortal's mind without permission, unless you want to
* It is also outright stated that a good part of the strength of the Masquerade is simply that people
* It is also possible Michonne used this tactic by wandering around the Dead States of America with her zombified boyfriend and friend roped to her. In the comic it is unclear if the two zombified sidekicks were able to retain a memory of Michonne so they would not attack her since their jaws were removed to prevent them from feeding.
* It is also possible that the Minovsky Particles themselves, which are usually broadcast by ships before and during battles, could possibly be used as a medium to transmit sound.
* It is also possible that the pod stopped trying to contact the base once Kirk left, since there would presumably be no point in calling rescue teams to an empty escape pod.
* It is also possible, though less difficult, to defeat the system defenses in Lucca's Dimensional Vortex solo. Ayla's confusion as she tries to figure it out is particularly amusing.
* It is also possible to accidentally tear your soul by obsessing over your guilt for a death for which you believe yourself responsible. If not reintegrated by self-forgiveness, the soul fragment may bond to an item which you spend a lot of time around, or one which is in some way connected to the death for which you feel guilt. Accidental Horcruxes can be healed (even after death) by forgiving yourself for the death that created the tear, and laying aside your guilt over it.
* It is also possible to count The second in a series of shorts that would become a series known as Main Street Sketches.
* It is also possible to fail escaping altogether. In Guilio's route, if you decide to put the escape off for another day he'll be transferred to another prison

and everybody else is either transferred away or killed, meaning
* It is also possible to further disguise a trap through dropping an item on top of it, which will also act as a lure, especially if it's something
* It is also possible to get this with some SCP. For example, if SCP-049 touches you, it triggers a cutscene where you stumble towards a MTF operative, who proceeds to
* It is also possible to go past most of the Undercity plot by simply bribing the guards at the entrance (exit) and most other dungeons can be severely shortened through use of the transformation-teleport bug.
* It is also possible to JUST make it with a well aimed thermal detonator to get a head start.
* It is also possible to use a Beak Bust-related glitch to get onto the platform to the Plateau in the Wooded Hollow; presumably because of this, there is an invisible wall near the door to the Plateau. However, it is still possible to bypass the wall by glitching onto the area near the broken staircase.
* It is also possible Winnifred was a nicer person once and grew more and more bitter as her pursuit of magic failed.
* It is also present in Germany, but is compensated for with civil servants being forbidden from unionizing and having to accept whatever the government feels like paying them.
* It is also quite common for a set of circumstances to influence more than one person, so you can get a sudden glut of 'x' movies without any of them being rip offs or originals.
* It is also referred to as "the trollplanet" by the human cast a couple of times.
* It is also revealed earlier in the manga that the government was behind the destruction of any new technology and the murder of its inventors, for the reason of preventing anyone from discovering that
* It is also revealed in the infamous "One Coarse Meal" episode that Mr. Krabs pays his employees in counterfeit money, known as "
* It is also revealed that the Heads in meet the Soldier are the Soldier's companion cubes.
* It is also revealed that the United Nations does not have a death penalty, although some of its member states do. The United Earth Forces does have a Supermax type underground prison in Russia.
* It is also said Harry spotted a few raucous dwarves in the Leaky Cauldron tavern, so they probably have the drinking down as well.
* It is also said that Newton calculated Earth's orbit, explaining mathematically why it was elliptic, and then forgot all about it. He only thought of it again when astrophysicist Edmund Halley (the guy with the comet) asked him for help with the same problem.
* It is also showed to be a really long walk. They had a walking montage and everything!
* It is also somewhat indirectly in effect with the idea of Ship-Replacement Programs ('SRP'; ship insurance paid for by alliance leaders rather than the game) which many large alliances have. In some cases, alliances offer SRP of greater value than the ships being lost, which when combined with the game's default insurance mechanics means that a linemember pilot in a large enough alliance may be able to earn money simply by flying ships into battle and boldly dying for nothing.
* It is also so noticeable in Wrath of Khan because it is, by a long shot, Shatner's most restrained performance with this being the one time he goes rather over the top. (Seriously, watch a bunch of Shatner's other stuff, especially in recent years when he has become essentially a parody of himself, and then watch Wrath of Khan, the subtlety he shows is both brilliant and quite shocking giving Shatner's normal acting style.)
* It is also stated that the logistical cost of building and maintaining such fleets is enormous: The Empire has several gigantic fleets and artificial worlds/fortresses that would make
* It is also statistically bound to happen with Carambars. For those not in the know, it's a caramel candy with jokes inside the paper. But the paper is cut by a

machine that doesn't know where jokes end. So you often get jokes missing a punchline, and orphaned punchlines.
* it is also the nation with the most civil strife), but each of the member states and worlds in the League is a feudal society. Their ruler has the title "Captain-General", and his family has the right of first refusal of that tile. The Captain-General was initially just the highest military rank, until the League Parliament voted to give the Captain-General special powers "for the duration of the conflict." Naturally, the conflict has not been deemed to be ended, even after 300 years.
* It is also the only known way to kill the monster Zannafar, a creature the aforementioned gods fear because Zannafar does not exist where they can harm it, and its purely physical body has impenetrable armor. No one's ever been able to duplicate it over the millennium since it was last seen, and they'd love to. Likewise, the gods would rather see it forgotten forever than replicated. The thing that makes Goru Nova so special?
* It is also worth note that most hospitals DO have a "code red." It is used in case of fire. (other common codes are blue, in case of cardiac arrest; ADAM, in case of missing persons; triage, in case of a large amount of incoming emergency patients; and some sort of bomb threat code.)
* It is also worth noting that ALL of the violence utilizes some form of
* It is also worth noting, that in Japan, the game received a B-rating (12+), which is the equivalent of the T-rating back in North America. The
* It is also worth noting that Roswell is where Robert H. Goddard, a founding father of modern rocketry developed and tested rockets in the 1930s. A local high school is named in his honor. Given
* It is also worth noting that Sparta's inward-looking culture caused it to miss several opportunities that rivals seized. Sparta's hyper-religious and xenophobic attitudes worked great for maintaining their social order and scaring off potential invaders, but more than once neighboring states went to Sparta for help, only to get a lame excuse about needing to stay home for a religious festival, or else just being ignored. Athens, on the other hand, had a somewhat flexible social order and was filled with ambitious politicians who jumped at a chance to look like a hero. This contrast was later taken
* It is also worth noting that the few humans who fight alongside the Saiyans (Tien, Krillin, Yamcha, Master Roshi and even Chiaotzu) are some of the strongest fighters in the universe, magnitudes more powerful than the old Saiyans or Frieza's Elite but unfortunately the series
* It is also worth noting that there are about 38 countries involved either directly (Air strikes, boots on the ground, military advisers...) or indirectly (financing and/or arming one or more of the many sides) turning this conflict into the biggest proxy war since the Cold War days.
* It is also worth noting that there are major differences between Corvettes, Frigates and Destroyers. The frigate is pretty much exactly as described at the top of the page, while the Destroyer is large and powerful enough to qualify as a Capital Ship in the classifications used here. The Corvette falls under the Small Craft category, a well armed Shuttle is probably the closest match. Thus we're talking ships that can cut a swathe of destruction against most fighters and also, in reasonable numbers at least, threaten larger vessels. Unless said vessels have weapons that can track and hit Small craft, in which case the Corvette force is going to have casualties, possibly lots.
* It is also worth noting that under wiser European commanders who learned from Mongol routs and figured out Mongol weaknesses such as a need for open space to manoeuvre and, on a logistic level, vast grasslands for their horses (and the Military Orders, such as the Templars, Hospitallers, and Teutons, who promoted on merit - mostly - and trained with rigorous discipline), European armies started coming out on top -
* It is amazing how they were able to build a fully functional cyborg in
* It is amazing the number of valedictorians that say sex instead of success in graduation speeches. It always gets a big cheer from their peers however.

* It is amusing sometimes to see the content warning next to a ranking to see how they justify it. For instance,
* It is an even more glaring issue with the ships, which seem to factor one direction of the 3rd dimension (directly above), where an attack in the opposite direction (directly underneath) would be nearly unstoppable... much like a naval ship.
* It is an interesting question whether it was worth it. It resulted in great underuse and underdevelopment of magic
* It is an old saw that the M-16, for all its precision, is not remotely as reliable as the less-accurate Russian AK-47 (as aficionados will point out, a properly-maintained M-16 works very well, and a AK-47 — not a knock-off — with good-quality ammunition will shoot quite accurately; however, this remains the common perception). Most of the focus in the discussion was the Vietnam war, where most of the problems with the M-16 were because of several issues: First, it was put into production way too early (as such they were using a prototype,) they said the gun was self-cleaning (which it wasn't) and therefore didn't distribute
* It is a plot point that this depends on how much vampire blood they have. A dhampyr with a lot of vampire blood has more powerful magic but has to keep to the night (but not as much as a vampire) while a dhampyr with little vampire blood has little power in comparison but can walk in the sun with little to no discomfort.
* It is a possibility that the Navy might take over space faring expeditions because they already function on a tradition of being out at sea for long stretches of time living off of the resources on the ship, whereas the Air Force eventually has to get their air crafts back on the ground to refuel. Though in the event of any such Space version of the regular Military Forces there might be room for Joint Military Task Forces or even have the Air Force adopt Naval Traditions to avoid having authority stripped from them in Outer Space.
* It is arguable that in the episode "Big Gay Al's Big Gay Boat Ride", with what is intended as a sympathetic portrayal of Stan's homosexual dog Sparky actually portrays him as a rapist who forces himself on straight boy dogs. They even whimper and cry as they run away.
* It is arguable that Ragna isn't one to talk, though. Especially not considering the fact that his

* It is a well-known fact that stage-plays aimed at Black audiences were considered amateur fluff at best.
* It is bad but celebrated in his own case with Panamanian wrestler VENENO, who briefly made "
* It is basically the same game strategy-wise (the majority of the units structures are the same ones) but on a new engine and all the perks of modern RTS features, shortcuts, hotkeys, options, etc. So that does explain how it could be both "changed" and the "the same" - it depends on if you are looking at the tactics and units, or at the system used to enact them.
* It is basically true. The numbers have a small error-margin to account for certain personal differences, but otherwise the article is essentially accurate. AND to add insult to injury, fictional characters can count too. So if you spend your time reading a lot of books (or media of choice) and really getting to know

the characters, you're cutting back the number of real people you can meaningfully get to know.
* It is believed by many that several leaks about upcoming UK government spending cuts were made on purpose since all these leaks happened in the form of a government minister (usually Danny Alexander) walking out of Downing Street with a bundle of files with the relevant portion on top, uncovered, and surrounded by long lens cameras. To quote
* It is believed that following 9/11, an entire scene was cut from the first film where Spidey strings a huge web in between the World Trade towers. There was a trailer composed of this scene (which was, obviously, pulled after the attacks), but whether this scene was from the movie or created specifically for the trailer is less certain.
* It is believed that the introduction of Christianity to Germany/Scandinavia led to a re-write of many of the myths of
* It is believed that this would happen to all Ring-Bearers after the One Ring is destroyed, but it is never really proven, as apart from the Nazgûl all the Ring-Bearers still living when the One Ring is destroyed are either immortal or haven't held their Ring long enough for it to make a noticeable difference to their apparent age (With Hobbits becoming legal adults at 33, jumping to 52 would not be a significant age gap. The Nazgûl jumping from various ages to 3,000 would explain why they all disappeared with their master).
* it is better not to ask her to. People approach her anyway, and she goes to some considerable effort to give them just exactly what they asked for in precisely the way they didn't want it.
* It Is Beyond Saving: A character giving up on improving a place or group because they think it's not possible.
* It Is Beyond Saving: A character or group of characters wants a society destroyed and/or abandoned under the impression that it is beyond saving.
* It Is Beyond Saving: This society is corrupt beyond redemption! We must destroy it and start over!
* It Is Beyond Saving: Those who disagree will likely consider it more along the lines of this. Again, whether it belongs here or "there ain't no justice" is up for interpretation.
* It Is Beyond Saving. (Though whether it belongs here or in Not So Bad is up for interpretation.)
* It Is Beyond Saving: When the current society is too corrupt to be worth it, destroy it.
* It is called the Circus until sometime between the end of Smiley's People and the start of The Russia House, when the main part of the Service, as it then becomes known, moves to an unpleasant office building on the south bank of the Thames, which is stated more clearly in The Secret Pilgrim. This is explained as being partly because of a desire to get rid of everything which reminds them of
* It is canon from their first appearance that the Daleks are heavily mutated versions of an originally humanoid race, although their actual backstory is very inconsistent (nuclear radiation causing mutations in
* it is claimed that he has repeatedly been cloned, although no one else gets that explanation.
* It is clear that Count Rosenschiöld only wishes to marry the female protagonist Beatrice, who happens to be like forty years younger than him because he wants a teenage virgin. And it also turns out that he's a serial abuser of women and a cruel rapist.
* It is common for albums to feature hidden "bonus tracks" after the last listed song with several minutes of silence in between. Some of these can start out
* It is common for fans to give names to the Freelancers whose real names are unknown. Most commonly, York is given the name James, Maine is given the name Theodore, and Carolina is given the name Carol.
* It is common for foreign language learners to hear their teachers advise them to practice the language they are studying by listening, reading, or watching media in the said language. This is to be familiar with the common use of the language, word

pronunciation, and vocabulary words.
* It is common for some pro wrestlers to become this once they retire, especially if they never made it big.
* It is common for TV to be the most widespread form of mass marketed entertainment even in places that have never heard of English before, and because TV shows are usually directed with the lowest common denominator (and cost) in mind, subtitled, English language shows become the chief means by which the people learn English while getting entertainment.
* It is common for women who marry into the British royal family to be colloquially referred to with princess preceding their given name, particularly
* It is common in some older areas of Britain to see walls with pieces of broken glass embedded in the cement tops, a common and surprisingly effective variant of this trope. Pretty too, because one can use a mix of clear, blue, and green glass to make the wall top. Illegal now, though you may keep the glass in place if it was already there when you bought the property, provided warning signs are displayed.
* It is common in wrestling to see special no-DQ matches where the goal is to do something other than pin your opponent (e.g. to escape from a cage or unhook a belt/contract). These objectives can often be rendered trivial by handcuffing your opponent to an immovable part of the scenery so that they cannot interfere. Since it is apparently extremely easy to render a wrestler completely senseless for a few seconds, but almost impossible to knock them out for the thirty seconds or so it takes to complete the objective, this seems like a very practical and effective tactic. Whilst it does occasionally happen, you would think that wrestlers would just do this at every opportunity.
* It is commonly speculated that Area 51 has a vast underground system where all the top secret research and technology development is made. From the surface there have been signs of hangars and Air Force bases but nothing truly out of the ordinary, this had led people to believe that there must be something underground they are hiding if the surface appears to be normal.
* It is confirmed in the biography written by Walter Isaacson that Jobs had over a hundred of those shirts (
* It is customary in Chinese history books to give the name of the corresponding modern county when mentioning the site of an ancient city or battle. Many students have wryly observed that, considering that there are 2862 counties in the modern PRC, it's not all that helpful.
* It is definitely, positively and (hopefully) legally, not the game. Sure, it's called NotGTAV, but those letters stand for Great Traffic Adventure and the V is silent. Like the one in "lawsuit" (which, you'll notice, is also invisible)."
* It is definitely the case that clown names, faces and routines are passed down through families (in all other circumstances it is a very bad thing to use another clown's make-up design). Dr Whiteface has been head of the Fools Guild for 300 years.
* "It" Is Dehumanizing: Calling a person "it" to show that you do not consider them human.
* "It" Is Dehumanizing sort to walk free. Foreign mages even get the special term "bas-saarebas" which translates out to "foreign, dangerous thing", and are often responded to with extreme suspicion if not outright hostility.
* "It" Is Dehumanizing: You are a pathetic, worthless thing that deserves to be treated like dirt!
* It is difficult to overstate how much this trope made Julius Caesar's career as a general. He was known to have lax but fair discipline in the camp, he would overpay his soldiers and would even give them part of his own personal wealth if they couldn't be paid from the senate or hadn't captured any booty. He would also engage in their hardships with them and never ate, drank, or slept while his soldiers were in danger. The amount of trust and fanatical devotion he got as a result was phenomenal and it was what enabled him to (get a map) march them from France to Rome, then to Spain (in record time) to fight a bloody war and back to Italy, then engage in a dangerous winter Mediterranean crossing to the modern Balkans while running a

* It is established that in the service's earlier days as "NIS", agents underwent a similar "red test" scenario, carrying out assassinations as a rite of passage. Jenny Shepherd failed her initial assigned kill, though she goes on to commit numerous kills (both hot- and cold-blooded) before the one kill she did not complete years earlier
* It is even implied during a vision from the draenei prophet Velen that
* It is even more prominent with Donna. It only took one adventure with the Doctor, maybe for about an hour, for her to get hooked. While she declines to become his companion, she soon regrets it and goes looking for him to see if the offer still stands.
* It is even possible to botch the train hijacking mission early in the game and result in the two trains colliding, although you are given the choice of not taking the Game Over by retrying the mission. However, you lose the opportunity to raise your SeeD rank, and if you fail enough times, your SeeD rank will actually drop.
* It is eventually mentioned that the tractor beams used by some of the more advanced ships are actually part of the same artificial gravity system that provides gravity and propels the ships (it propels the ship by making it "fall" in the desired direction of travel).
* It is eventually revealed Rainbow Dash and Soarin have been in a relationship ever since Rainbow's time at the Wonderbolts Academy. After Springer learns about their relationship, they say they kept it a secret because they didn't want everyone to think Rainbow was getting favors from the Wonderbolts. They come clean about their relationship to everyone after some encouragement from Springer.
* It is eventually revealed that at least two of the three Endbringers possess bizarre internal structures. The Endbringers are composed of multiple crystal layers, none of which have anything resembling cells, which get progressively denser until they violate the rules of how atoms work. At the very center of this is a core of simple organs.

* It is, however, justified in this case for two reasons. First, it's an accurate description of what the condition is, in that it's a mental disorder that appears after the sufferer suffers intense trauma and/or stress, and therefore can also appear outside of war, which is why another previous term, "combat fatigue" is also not used anymore.
* It is, however, possible for a mortal to create a lesser Laser Blade, as demonstrated by Pocota.
* It is however revealed very early that the alien villains have been downgrading human intelligence for a while in preparation for their invasion, which would have inhibited developments.
* It is however stated outright that passing the test is the sole criterion upon which the students will be judged.
* It is however to note that the combat performance out of a strict tank versus tank environment has been very good so far. The Canadian army uses Leopard 2 a few years in Afghanistan and they are very pleased with it. At one time a Leopard 2
* It is, however, used once to "prove" that an Asgard shown by a CEO attempting to reveal the secret was a hologram. The reporter interviewing Sam tells her she doesn't believe it, as she has seen the alien with her own eyes. The alien is, in fact, a mindless clone (as opposed to the clones with minds that all the Asgard are).
* It is, however, worth noting that Doumeki did seem to have a soft spot for her at least, and it's likely that he chose to marry her because he wanted to leave behind descendants to
* It is 'illegal' in professional wrestling to use articles of clothing for extra leverage, so naturally you will see someone trying to keep their pinned opponent folded over by yanking on their tights about once a month.

* It is initially averted between a then-teenage Electra and Nemo, when she decides to keep her feelings for him a secret after accidentally overhearing that he viewed her as a surrogate daughter to replace his own children who he believed had both been killed (ironically she was on her way to confess her love to him at that time). They later get together anyway: she finally manages to reveal her true feelings (and how!) after Nemo is reunited with his real daughter
* It is interesting to note, that despite being old and outdated by the times of World War II, those giant tanks weren't actually completely incapable. The most numerous German anti-tank gun in early war years, the 3.7 cm Pak 36, could penetrate their frontal armor only from relatively short distance. On the other hand, their giant size, low speed and transportation problems made them nearly completely unsuitable for highly-mobile World War II armored warfare. But whenever it appeared, its HE blast could actually rip gunbarrels.
* It is interesting to note, that the main designer of P-1000 - engineer Edward Grotte - in early 1930s tried to persuade Soviet Government to build quite similar 1000-ton tank with 12-inch cannons. This may be the reason, why USSR decided to terminate the contract with Edward Grotte...
* It is interesting to note that the reasons they gave for their opposition to the printing press was its efficiency — it could produce almost perfect copies of any given work... And everyone knows that since perfection isn't human, it must be the devil who's making it possible. (Which of course is theologically silly even if you accept the
* It is interesting to note that the transhuman intelligences bear the rest of humanity no ill-will, or even any passing interest: "normal" intelligences simply cannot provide any threat or anything of interest and are more or less entirely beneath their notice. One interesting ability one weakly godlike intelligence gains is the ability to create a perfect software model of a human intelligence and run it though a "Turing oracle" to exhaustively calculate every possible response the human might have in a situation. It would be literally impossible to out-think such a being without upgrading your own intelligence,

* It is narrowly averted in "Sorry, Right Number," whereby a hard-nosed company executive is about to complete a deal for a lucrative contract when a telephone operator cuts in, asking Mike to pay 10 cents to continue the call (on a payphone installed at his home). The executive is about to fire Mike when Mike miraculously explains the payphone situation (he was using it to teach the kids responsibility, manners, and money management ... and none of the other phones were available).
* It is nearly impossible to fire some people from their day jobs because they are prominent members of unions. If the company does fire them, then they can expect the union to pull out all the stops, much more so than firing a normal union member. That said, if the employee's union decides that someone else could do their job in the union better, they are no longer protected.

* It is notable that in real life it is generally preferred to have several women serving together in a unit as opposed to a single woman for morale purposes. This is commonly done in fighter squadrons where there will be three or four women in a squadron or none at all.
* It is not an exaggeration to say that, should you have the money, you could live entirely off of Eva merch.
* It is not as much as being a correct response, but the sheer cost of a possible mistake. Missing s single Chaos worshiper or a Genestealer hybrid can cause entire planets or even star systems to be overrun. When the safety of billions depend on your decision, you are not allowed to take any chances.

* It is noted in the Pokedex that Rayquaza has lived in the ozone layer for several hundred million years because it gets its energy from water particles and sunlight in the ozone layer, meaning that it doesn't ever need to go down on solid ground to survive. It is for this reason that its existence went into legend as it hardly ever left the sky. For perspective the reign of the dinosaurs was approximately 200 hundred million years on this Earth, Rayquaza is at the very least slightly over 3 times older than the existence of the dinosaurs.

* It is offhandedly mentioned in the pilot that Niles is five years younger than his wife Maris. He mentions this fact again in a later episode when asked about the prospect of having kids with her. After his divorce, Niles had a brief fling with a twenty-something barista at Cafe Nervosa, while Niles would have been in his mid-forties at least by that point.
* It is often believed that Sir Isaac Newton developed his theory on gravity when an apple fell on his head.
* It is often considered good etiquette to, during an outing (e.g., a golf outing) with the boss, to let the boss win a round or two, even if his partners are clearly better than he is. As such, they may be asked to throw a round or two to stay in the good graces of their boss.
* It is often necessary to move carefully in space, thus slower. Explained in many Science Fiction novels as 'You may be weightless, but you still have mass'. While it may feel and even look like you're floating serenely through space like a feather, in reality you just launched yourself at an aluminum bulkhead, head first, at several miles per hour.
* It is often pointed out that the Goa'uld aren't all that different. They are just as 'unready' for certain Ancient technologies and this seems to be one of the things that causes the large amount of infighting that allowed human and Jaffa to overthrow them. Despite the Goa'uld having stolen the capacity for interstellar flight thousands of years ago, the Ancients and Asgard are still sufficiently far beyond them. Both of those races had reached intergalactic flight technology (with at least the Ancients even having traveled to galaxies outside their original local cluster long before their technological peak) before the Goa'uld even got off their original planet.
* It is often said that the intellectual/academic speciality most likely to kill themselves is that of the astronomer and cosmologist. Perhaps this is what gave Douglas Adams the idea of the Total Perspective Vortex: astronomers are contractually bound to stare into it night after night and contemplate infinity in a direct and un-theoretical way, thus getting a very clear picture of how small and insignificant the human race is, in the grand scheme of things.

* it is posited that while math may be great for first contact we may run into some stumbling blocks trying to understand language without any further context to assist a translation. The book cites how for years the Mayan number system was decoded and understood, however scholars were stumped for many years after by the written language. If we had that much trouble with a human language, things may be even harder working out an alien language, even if we can agree on math.

* It is possible for anyone to do a less extreme version of this using
* It is possible for a woman who has released two eggs simultaneously to have them each fertilized by a different man. The two fertilized eggs, instead of producing fraternal twins, may then merge to form a chimera, an individual that is a mixture of two different cell lines. Some tissues and organs would thus contain DNA from one father, while others would contain DNA from the second father. All tissues and organs would contain the mother's DNA, although almost always not the same subset of her DNA. Thus this individual would have three biological parents. Chimeras made in the lab may have multiple "mothers" as well as "fathers".

* It is possible for the player to overcome the jackassery of the genie, though: wish for it to get lost (which makes him disappear, much to his horror), or wish for Jeanne to be free (which counts as a good deed, but player loses the strongest companion in game), or, with high Speech skill, to ask
* It is possible that if we mess things up on the Earth to a sufficient degree, either through war, ecological turmoil or due to circumstances beyond our control, we (or at least the best/brightest/worthiest/wealthiest) would likely have to do this sometime in the future. Though we may avert this if the cause was our own incompetence as our current situation (eg. no Earth 2) may well force us to adapt and develop our civilization in a way that is sustainable and not detrimental to the biosphere. And note the "to a sufficient degree" part: since
* It is possible that Sargon of Akkad about 900 years earlier also fit the trope, but we don't know how old he was when his reign began and he started forging an

empire.
* It is possible that the high-energy lifestyle and constant peppiness could be a result of him being aware of how dangerous his powers actually are to himself and the people around him, but it's less about masking angst and more about thoroughly enjoying every moment he gets.
* It is possible that this is how Hobbits came to be, since they share traits with humans (mortality, ingenuity), elves (love of nature, pointy ears) and dwarves (living underground, small stature). It is also mentioned in a few places that different hobbit populations share traits with whichever of the other races they are closest to. This is mostly speculation, however, since Tolkien never said anything definitive on the subject.
* It is possible to Avert this trope if you acquire the Gray Cowl of Nocturnal. As long as you don the Cowl before doing anything illegal, you can fight the law as long as you wish. When you want to stop, simply remove the Cowl and yield. Due to the Cowl's magic, the guards will think you are innocent and will accept your yield without giving you a single fine.
* It is possible to become the leader of two Guilds or Factions which hate each other. For example, take the Mages Guild and House Telvanni. One quest for the Mages Guild requires you to root out a Telvanni spy within Guild leadership. You can be the Archmagister of House Telvanni, root out the spy who now technically works for you, and be rewarded by the Mages Guild for your good work. Another example, you may be the Mages Guild Archmage, but a House Telvanni quest will have you get the Mages Guild's monopoly on magical training dropped.

* It is rather rare for most of the previous generations of Nigerians to speak only one language. Prior to the 1990s and beyond, the average Nigerian (post-Biafran war) was educated in English, French, and German in their British-based schools (Portuguese sometimes got thrown in) and they would learn their tribal tongue from their parents. Some Nigerians would learn one of the big three (four if you include Arabic) native tongues of the nation. So you could have a situation in which a middle- to upper-class Nigerian would speak English, French, German, Portuguese, Igbo, Hausa, Yoruba, and Arabic because the state demanded it of them.

* It is said that when working out the seating arrangements for royal weddings, funerals, baptisms, etc., the British Royal Family have arranged things so that people who are out of favour, or viewed as liabilities and embarrassments, are routinely allocated the restricted-view seats. At the marriage of Prince Charles to Lady Diana Spencer, for instance, it was reluctantly accepted that Diana's flamboyant step-grandmother could not be excluded, despite her being eccentric to the point of actual insanity. Dame Barbara Cartland (for it was she, the eccentric neon-pink clad author of romantic fiction) was allocated a seat a long way away from the action and obscured by an inconvenient mediaeval cathedral pillar. This also kept her away from the television screens.

* It is sometimes referred to as "Avoidance Strategy", and is a common way for a person who has self-esteem issues and/or high expectancies concerning his or her work, to preserve his/her self-esteem by voluntarily (but often unconsciously) failing at a task. The idea can be summed up as: "If I try hard but fail, I must face my failure and I will suffer. Though if I don't even try, there is no proof

that I cannot succeed, only that I didn't try to." Again, this is often an unconscious process, which doesn't mean that the person is "bad" lazy or lacks any force of will. If anything, the problem is simply self-confidence.

* It is still considered tradition by the Royal Family of the United Kingdom to have children wear short trousers until age 8 when they're finally allowed to wear longer ones. This includes even during the cold of Winter. Despite most of the family, even Charles, thinking it unnecessary and even strange. However, the Queen and some other believe it's a distinction of their place in society as aristocracy, with long trousers on young boys being seen as unacceptably middle-class.

* It is the biggest of the four worlds by far, having far more surface area than even the pre-sundering Earth. It's also the most sparsely populated, as there has simply not been enough time in the setting's relatively brief history for the its population to grow enough to inhabit more than a tiny part of its surface. This is also why Zifnab gets an elf inventor to start shooting rockets day and night to attract Haplo’s attention when he enters the world — it’s all but stated that without some visual cue to head for, Haplo could have spent a lifetime flying over Pryan without ever coming across civilization.
* It is the case that old-fashioned clocks, with hands moving around a numbered face, are sold in stores in a way that capitalizes on a quirk in human psychology. If the hands are set approximately to ten and two, they evoke a happy smiling face and it has been demonstrated that people are more likely to buy clocks if they see, at least subliminally, a smiling face. This is known in marketing as the "ten-o-eight" phenomenon. Observational comedian Dave Gorman wondered if this is still the case today when so many clocks and watches are digital. What he discovered was that in sales photos and displays, clocks/watches with a digital face are 95% of the time set to... 10:08.
* It is the Doctor in human form making the decision but because he can't really remember his Time Lord self, the scene feels more like a normal human being willing to cease to exist in return for the Doctor coming back. Even the Doctor himself,

* It is very common for comics based on an external license to change publishers, with the new publishers often reprinting the material commissioned from a previous publisher.
* It is very common in clubs and industries where membership/employment practices have changed. A club may decide to change membership requirements such that some of its long-standing members may no longer qualify, but they can be grandfathered in. For example, a fraternity may decide to only accept pledges who possess a certain GPA, but may retain members who were allowed in earlier. Likewise, a club whose membership is growing too quickly may decide to raise membership fees to raise revenue for the larger traffic and to reduce its applicants, but retain existing members at the cost they signed up for. Imagine a popular golf club which was growing too quickly, so members could not guarantee a tee time and the conditions on the course were wanting for a lack of maintenance. Likewise, a company offering a service in high demand may decide to raise prices, but may be legally required or find it prudent to grandfather existing clients in at their original rates, especially if they count on old clients to refer their new ones. This can also be used to keep key personnel during a transition. For example, a company providing emergency medical services may decide to hire only full paramedics in the future, but may grandfather in veteran EMT-Intermediates and Basics while they acquire the EMT-P credential. And as recently as the 1970s one of the most common paths to a career in journalism would be to leave High School and get a job in the office of a local newspaper, working your way up the chain and eventually being 'scouted' by bigger newspapers/tv stations etc. Today most tv stations and newspapers wouldn't consider hiring someone who hadn't graduated from a school of journalism, but many literal grandmothers and grandfathers remain on the payroll. However, what the oldies lack in formal schooling, they make up with experience.
* It is very common in Latin America and Spain to represent one of the Three Wise Men as African. Legend has it that is because they were from each continent (one is generally represented as blonde or redhead, thus Europe, the other as Middle Eastern, thus Asia). In reality, Three Wise Men are generally thought to be Persians.
* It is very easy for the audience to forget (or simply not care) that in order for the one team to lose the game on the 'last play', the other team had to be good enough to get the game to a state where this matters. i.e. all that happened in the game up to that point actually matters a lot more than the 'last play'
* It is very much implied that Marieneford is going to be a playground scuffle when compared to the war that is about to engulf the world in the battle for the titular One Piece. Said battle has already been dubbed "the throne wars", and while it's still a ways off, various chapters have shown the movement of nearly all factions into place while the Straw Hats are shaking things up in the isolationist, Edo Japan-inspired island nation of Wano.
* It is very subtle, but in "Cor-Ai", when Teal'c and Jack are arguing over whether or not he should defend himself while being tried for the many horrible things he did for the Goa'uld, you can see Teal'c's jaw trembling with suppressed anger at himself.

Her Master Spark is smaller than Yuuka's, her Non-Directional Laser requires more power to cast, and her Orreries Sun cannot be thrown. She makes up for this by developing new spells which use the copied one as a base, often turning them up (Final Spark/Final Master Spark/Blazing Star, Starlight Typhoon and Orreries Solar System respectively).
* It is worth noting that no one, Tony included, knew that he would get better or why.
* It is worth noting that Tellus Secundus, the planet where the story begins, has an unusually high population of near-immortal "Howards" and in consequence has instigated population controls. The planet's chief executive mentions to Lazarus Long that he'll grant an exception to any woman Lazarus feels like having a child with. Lazarus himself is a special case as, being over two thousand years old and born at the start of the Howard experiment, he can claim over 80 percent of the galactic population and over 99 percent of Howards as his descendants to some degree or another.

It sprouts in response to the apparently pheromone laden smoke of a female lactating fire. For the sake of health it needs to be amputated by bone saw if unused or else it will become infected.

* It may also be the case with Talkie Toaster who was designed to make toast and hold light conversation. 3 million years later it has gained a form of sentience yet it is still tied to its base programming so everything it says always ends up involving toasting regardless of what he was intending to say. (The books are clearer that Talkie was built with sentience, this apparently being easy enough in the setting that it's included in $£19.99 items from companies called Crapola Inc.)

* It may be observed that three of the four love interests will demand fidelity from the PC. (Zevran is cool with you jumping into bed with whomever you like, so long as the other characters aren't getting too attached.)
* It may be one of the first films to use this. The protagonist would at times slip out of the perception of those around her, losing all sound as well. Other times, near the titular Carnival, the games and rides would come alive, as would ghoulish dancers who beckoned her...
* It may be possible that this referred more to the fact that at the start of the Revolution, the colonists were desperately short of gunpowder. At one point, there were literally only a few dozen barrels left for the entire army, which would have been just enough for one pitched battle without artillery. The situation did improve later on when France became heavily involved in the war and started sending over regular supplies of the stuff.

* It may be that mentioning the semi-genericised Lemsip is acceptable, but that showing Lemsip-brand Lemsip was undue prominence. In some countries, there's a rule against showing a product and mentioning its name at the same time. So there's no problem if they're mentioning Lemsip, they just have to obscure it.

* It may be unusual for a summer activity like drum corps to have Christmas-themed shows, but the Cavaliers (1991's "Cavalier Anthems Advent Collection") and the Cadets (2012's "12.25") pulled off such shows.
* It may be worth noting that many of the pirates operate under an agreement with a local polity. In Silesia, it is not uncommon to turn over a batch of recently captured pirates to the local government, and then six months later the same pirates have a new ship and are back in action. The local government is basically taking a bribe to ignore the piracy, or has funded the pirates to plunder shipping from richer nations (I.E. Manticorian shipping would carry better goods that the government can buy through normal means) and will turn a blind eye to rape and murder to gain such benefits. However, the pirates that turned over also get put on Manticore's list. If they get caught a second time...
* It may be worth noting that the Obligation loss is a risk, not a guarantee. One
* It may come as a surprise, but European musical polyphony is a relatively recent invention, dating back only to the middle ages. It was, of course, immediately viewed by some as fundamentally immoral (because it made it impossible to understand the lyrics), and on those grounds, Pope John XXII banned polyphonic music in 1322 — by some accounts simply from liturgical use, by other accounts entirely. Later, after it stopped being new, another pope overturned the ban.

* It may have to do with how much mining of the vessel's mind they do. Zachariah and Lucifer are both completely willing to rip through whoever-that-is and Nick, while Cas appears to have put Jimmy to sleep for pretty much the whole time he was wearing him. * It may just be a function of dub Yolei being a teenager, but there's a big difference between how miserable and whiny she sounds in the original Japanese show when she's emotional and how scarily angry she sounds in many of the same situations in the dub.
* It may just be a talking animation that translates poorly, but Quina appears to sniff the air quite often.

* It may never have been revealed to the characters, but Cutter once got it on with Kahvi during a pre-battle orgy, and Kahvi takes up with him while Cutter's family is lost in time, though it doesn't really work out. Much later, readers learned that Kahvi is the daughter of former Wolfriders chief Two-Spear. Cutter is a direct descendant of Two-Spear's half-sister, Huntress Skyfire, making Kahvi his cousin four times removed. Which, especially considering the small gene pool of the Wolfriders, isn't spectacularly close. And with Recognition preventing conception for any but good genetic combinations, the elves may not
* It may not be a technical issue - after all, their ships managed to sneak through cloud layers and other water vapor undetected. It's just that the Yautja probably don't see the need for flawless personal cloaking devices, for the same reason they don't just blast everything with plasma from hiding.
* It may not be the conventional way to do it, but "Profiler, Profiled" saw Morgan being sent to jail on a tip by the episode's UnSub, forcing the team to investigate in order to secure his release.
* It may not be the first example, but when he was a regular on SNL he did a bit where he got made up (pretty well, actually) in "whiteface" and went "undercover". * It mentions a piece of modern art consisting of a pile of rags called "Don't Ask Me About Mondays". This art was intentional, but when Lord Vetinari viewed it, he displayed his opinions on modern art by having the artist nailed to a post by her ear. This installation (titled "Freedom") was an even bigger hit, and it's said she's planning on having herself nailed to several other things.

* It might not have been so much Earth and the sun as it was some other world and the sun. Science does tend to provide very specific requirements for life to exist on a particular world, so theoretically it's not impossible that these units of measurement originated from a planet in a relatively similar position to its own sun as Earth is to its own. Also from a practicality standpoint, especially once various species started getting together and space travel became a regular part of this civilization, it makes sense to find a very specific means of measuring time since you can't use the position of the sun like you would on Earth, so an approximation of the average time a planet takes to complete a circle around its sun seems like a reasonable way of measuring a year.
* It might not have even been Yahweh's creation, considering that the comic gives us two new fully-fledged Creators. Some interpret this as the Creation where Yahweh originally came from.
* It might seem like a stretch, given that one is a strange, often horrifying look at a world of constant betrayal, strange magic and a world constantly teetering on the brink of annihilation, while the other is about John Constantine, but I stand by it."
* "I.T" mostly focused on Numbuh 362's struggles with her job as Surpeme Leader, with Numbuh 1 being the only member of Sector V that plays a huge role in the

* It mostly takes place in the Northern Galaxy but the Southern is visited in
* it moves slow, can't fly, and has no ranged attacks, meaning anything that does and has a decent damage output can poke it to death without harm. It has a pathetic will save that any wizard that should be encountering him can beat (barring natural 20) and no immunities to the effects that target will (even the ones that people avoid using because every other high level monster beside Big T is immune to them). You can have your very own pet Tarrasque for a day/level (that can easily be renewed before it expires with no effort, just command it to lower its SR and fail the will save) via Dominate Monster. One noticeably laughable design choice is that over half its feats are some of the worst feats in the game (which was something of a recurring theme for monster feat choices- they often tended to be ones that were extremely weak and made no thematic sense). It doesn't help that ever since it was created, gamers have had unofficial "easiest/silliest ways to defeat the Tarrasque" contests. One particularly noticeable one involves a goat with a jar of green slime tied around its neck. The Tarrasque eats the goat and the slime then destroys it from the inside.
* It must be also noted that how much force Cap's shield can protect him also is very much
* It must be born in mind that, while views such as the above have been defended based on Darwinism, so has virtually every idea. Just five years after Darwin published
* It must be noted that Celestial Being actively tried to avoid civilian casualties, such as Lockon shooting to disable enemy suits when possible, or Setsuna taking off their limbs but not gutting them or cutting them in half. Celestial Being attacked only areas of active combat and repeatedly tried to prevent situations that would increase civilian casualties, such as stopping a terrorist attack on a nuclear waste dump. Trinity, by contrast, repeatedly attacked civilians targets (including simple factories) and expressed neither remorse, guilt, or sadness for it, and then in a childish fit attacked a WEDDING. That's why the Trinities are portrayed as much farther down the slope.
* It must be noted that the Revolutionaries gave equal rights to all minority religions (Protestants, Jews) and supported the Constitutional Clergy and mainly targeted pre-Revolutionary Catholics. During the Terror, they released a policy of Dechristianization, which led to vandalism (albeit considerably exaggerated) of many churches and cemeteries. The cemeteries had graffiti proclaiming "Death is an eternal sleep", priests and nuns were guillotined, and monasteries were vandalized. The Notre Dame Cathdral saw its altar attacked and replaced with a "Statue of Liberty" (the Roman Goddess Liberty
* It must be overwhelming, being proposed to and learning you live in
* It must be played for visceral, gross-out horror. A spic-and-span futuristic Soylent Green factory where bodies disappear into a machine at one end and squares of finished product come out the other wouldn't qualify.
* It must be pointed out that this method of transportation can be extremely dangerous, much more so than in the days before air travel. Cargo holds for planes, although generally pressurized,
* It must be said the Wanda was simply using magic to manipulate Jillian into being her unwitting servant.
* It must flip 360 degrees (that's what "flip" means). And this flip must be in the air and not in your hand."
* It must give away HUGE plot points about the resolution of the main premise of the work, so it should be both an ending trope AND a plot twist trope at the same time (death trope optional), so minor plot points/story arcs don't count.
* It must immediately tell you the outcome of the work and/or change the tone or even genre of the work and you will never be able to see the work in the same light again after you have read the spoiler. To test this, imagine the trope page and check if all listed examples are spoilers by default. If not, don't add it.
* It must run in the family, as his six-year-old son Sam Brody doesn't make strong expressions over anything, even Godzilla or his mom appearing after San Francisco.

* It nearly happened to Andrew Jackson during his duel with Charles Dickinson. Dickinson shot first and dealt Jackson a wound that nearly killed him. Dickinson's seconds claim Jackson's first shot misfired, so the duel should have ended. Contrary to dueling rules, Jackson re-cocked and fired, killing Dickinson. Had Jackson died, it would be a Last Breath Bullet.
* It nearly happens a separate time in the episode that reveals this. Two agents have cornered the supposed UnSub in a storage room. He throws his gun to them and is about to come out, but then Gideon, in another building, puts all the pieces to the puzzle together, and realizes that the cornered guy is strapped with bombs. He tells the agents to get out, and they do so, right before the bombs strapped to the guy detonate and he becomes paint on the walls.

* It now contains the horribly-mutilated corpses of his wife and several friends, for starters.
* It now fits better with the presence of the headquarters of the Infinite Consortium, essentially a multi-planar organization, and several other planeswalkers living there incognito.
* It now looks like North America has at lest two more countries one of which pushed the Dominion out of Mexico for a time and their rivals on their other border, plus there's another mystery faction with radio that may side with the Grik.
* It obeys the law with its roughly-12-to-14-foot giants, who have a body shape that is compared to bears; disproportionately large feet on the ends of short, thick legs, and wider hips than chests, bringing their centre of gravity right down.
* It occurs again in the episode "Acorn Nuts and Diapey Butts". During a montage where Chuckie's father, Chaz Finster, is shown dating a variety of quirky women, one of the ladies blows up a giant bubble — but it bursts on Chaz rather than her.
* It, of course, does not help that there's plenty of places on the Internet that practically

* It once calls out attack pattern Sigma, instead of Alpha. Justified in that the formation really looks like the Greek letter sigma and it actually does work as a mid-battle ambush.
* It once features a spirited debate between Black Mage and Red Mage on
* It once had an episode based on the case of Angela Carder, a pregnant woman terminally ill with cancer forced to undergo premature cesarean section by court order. In

* it only becomes available near the very end of the main quest line, and only if you side with the Institute or the Railroad.
* It only ever gets more creative when you get into the real military, where they're allowed to humiliate you on a grand scale in front of dozens if not hundreds of your peers. Picture things on the level of fraternity hazing, only it's not hazing because it's punishment rather than a membership requirement. Take for example, "The Dying Cockroach," in which the soldier being punished was forced to lie on their back while kicking and flailing their arms and yelling "I'm a dying cockroach!" until the punisher saw fit to let it end.
* It only gets a brief mention in "'Til Death Do Us Part," but the unsub's mother left her florist business to only one of her daughters, despite both of them running it. It might have something to do with Dana obsessing over her sister's boyfriend and deluding herself into believing he was actaully in love with Dana the whole time.
* It only gets better once Gil pulls Vole out of the timestop and he ages hundreds of years in a few minutes - since Jaegers are immortal, this means him getting twice as tall, twice as broad, teeth as long as your hand, spikes growing out of his shoulders...
* It only gets crazier from there. Long story short, Guts' life is painful and miserable, but if his luck keeps up there will always be a silver lining.
* It only gets worse from here. While Kurt Angle and Karen Angle divorced, it was later revealed in 2009 that Jeff Jarrett started dating Karen Angle, causing real-life animosity towards Jarrett. Fortunately, the board of directors put Jarrett on leave. jarrett later on moved to
* It only got worse when they found out about Rita anyway. They end up kidnapping her, knocking her out and abandoning her on a bench by the road when they think they accidentally killed her.
* It Only Works Once: A method of killing a creature that worked one time won't be successful the next time it is attempted on the creature.
* It Only Works Once, because there was only enough power/ammo to fire it the one time, or because the heroes sabotage it or its control system before the villains can shoot again.
* It Only Works Once: Your previously successful technique fails when used again.
* It Only Works Once: Your technique against an opponent worked, but becomes useless when you try it again.

* It paid off in a way), they were one of only two Canadian teams to miss the

playoffs (the other, the Winnipeg Jets, were one position away from qualifying). By 2018, the implosion was complete, ended up second-worst in the Western Conference (this time, spared the bottom spot, just barely, by the Arizona Coyotes) and 26th overall, and with the Sedin twins retiring at the end of the season it now seems likely that they'll stay there for the foreseeable future, with only a mild improvement in 2019. Though 2020 had the Canucks resurging in the extended playoffs, winning two rounds before bowing to Vegas in 7. Only for in 2021, the Canucks to end last in a division that had the six Canadian teams they outlasted the previous year!
* It parodies this with Andy being a member of the group MAGG (Mothers Against Gory Games) and only allowing Peter to play MAGG-approved games, which include
* It pays off better in Season 3 when Bolin meets Opal, Lin Beifong's niece, who's just as adorkable and kind hearted as he is.
* it picks your destination point at random. At least the Last Relic takes three seconds to activate, so it's not instant, but it's a whole lot faster than a hearthstone/Astral Recall exit. Also, the destination is selected at random from a large list but you'll always end up at one of the locations. The benefit is that all possible destinations are safe.
* . It pissed off the "Dear Leader" enough that he vowed to destroy any speakers set up along the border.
* It places "To Be Continued" cards at the cliffhanger endings of the first parts of all of its two-part episodes. Humorously, though, when the episodes are originally broadcasted, the two parts are aired back-to-back, and as such the plot is continued only a few seconds afterwards.
* It pokes fun at the professor this way every other episode. It doesn't help that he's senile.
* It pokes fun at this trope in the episode "Tall Tales", with Dean exaggerating Sam's empathy in a recollection.
* It portrays France's rather loose attitudes towards sex and sexuality in general, even extending to minors, and the film criticizes them. There is a subversion in that the girls are openly booed by the crowd during the penultimate dance contest, including several Afro-French audiences who do not take kindly to it at all.
* It presents the mild-mannered Mirajane, who is not only the most feminine member of Fairy Tail but adorable and capable of cooking.
* It pretty much is a running gag, the gag being how ridiculous it is to force people to conform to this trope (and the extra miles the show goes to make it blatantly obvious).
* It pretty much means "see here" but in other languages than French, is often used with a bit of dramatic flair.
* It prevents Loki from mind-controlling him and turning him against his allies, which would have derailed everything just as much as the Hulk's potential rampage.
* It probably didn't help matters much that in real life, John Hodgman is actually a very friendly, charismatic man.
* It probably didn't help Socrates that (at least as portrayed by Plato) he rarely paid more than lip service to his own favored method of discourse. After an initial series of exchanges that show how hopelessly confused his opponent is regarding the matter at interest, the core questions from Socrates invariably go like: "And wouldn't you agree that such and such, and also that this and that, so because of fee fie foe it must be true that blah de blah?" The opponent is then reduced to meekly agreeing. Figure it out yourself, indeed.

* It probably runs in the Pickles family, because Angelica would also occasionally get punished even when she did nothing to deserve it. In "Chuckie's in Love" she writes an article exposing the school cook's disgusting food and has him instead make normal food, but when the cook screws up by attempting to cook the normal food blindfolded and gives all the kids food poisoning, everyone acts like it was Angelica's fault.
* It probably would not has a song about this: "The Tower", loosely based on the University of Texas massacre in 1966 (see "Real Life" below) with the lyrics coming from the killer's point of view.
* It proves impractical for immortality since Universal Health-care is non-existent and even something as trivial (compared to the creation of a huge alien-human hybrid) as regrowing a couple of nerves is prohibitively expensive for the average person.

A few minutes later, Jade calmly leaves the room with newfound information. It's almost guaranteed that he was torturing/interrogating Dist but...
* It really doesn't help that, seeing as Rapture has, socially speaking, long since fallen apart at the seams, and is starting to do so literally as well, the jukeboxes aren't in working order any longer, so not only are you killing splicers to "How Much Is That Doggy In The Window?" you're actually killing them to "How Much Is That Doggy In Th- Doggy In Th- Doggy In Th-".
* It really doesn't help that Spike was previously shown to survive a similar scenario (specifically he was shot, skewered, and jumped off of a four-story building), albeit barely, so fans of his survival have at least some ammunition.

* It's a bit of a subversion, since Sardo has no idea how to actually do magic or how the stuff in his shop works. He's just the middleman. His shop being mobile is probably something in the store beyond his control.
* It's a bit older than that, though to be honest some POG's actually go deeper than Infantry — like ELINT, who often operate behind enemy lines, with short range antennaes on the back of a humvee.
* It's a bit subverted with the Jedi being a big part of the franchise and part of

* . It's about a filly named Oleander and her little sister, Everfree, who lived by the forest. One day, a trickster named Coyote gave Oleander a map that he said would help her get her cutie mark, but said she had to leave Everfree with him. Oleander followed the map and discovered her namesake flower, but when she got back home, she still hadn't gotten her cutie mark. And while she was gone, Everfree had disappeared. Their mother refused to let Oleander come home until she found her sister. Now she roams the Forest eternally, searching and calling for Everfree.
* It's about the evil Igthorn (who wears blue) trying to shut down an illegal brewery hidden in the forest. Igthorn's mooks are shown as dumb and ineffectual. The liquor Gummi Bears drink makes them crazily jump around. And they are friends to children, seeming like anarchistic, anti-government and pro-alcohol/drugs propaganda.
* It's About Time, a '60s sitcom where astronauts travel to prehistoric times. In the final season, the astronauts return to the present with a caveman family.
* It's About Time episode "Androcles and Clon", the astronauts are attacked by a man-eating plant in the jungle. The plant attacks them with its vines and tries to pull them into a thicket. Mac and Hector are able to free themselves with a little difficulty.
* It's About Time resulted in the astronauts returning to their own time—with the cave family in tow.
* It's About Time, Shad and Gronk give a sacrifice to the garbage disposal calling it the "god of Garbage"! At the end of the episode, after Mac and Hector enroll them in night school to catch up on a million years of civilization, Gronk mentions they're going to be taught about Edison, god of the Electric light.
* It's About Time. Shad tended to suffer from more slapstick misfortune once she returned with the astronauts to the present, especially in the episode "To Sign or Not to Sign" where she joins a gym.
* It's About Time", Tartarus became subject to fanfics about one (if not all) of the monsters imprisoned there breaking free. In this episode, our villain does just that.
* It's About Time with her quill while she's trying to stand still for the next several days in the hopes that she won't cause the disaster her future self tried to warn her about. After he tickles her nose, she sneezes, with the result that her horn lights up and her telekinesis activates and slams him into a wall. Spike in turn accidentally blows fire in her direction, giving her a mane-cut that resembles Future Twilight.
* It's a Boy Girl Thing, voices stay with the bodies, but the thoughts of the characters are given as voiceovers in the possessors' voice.
* It's a Boy Girl Thing, Woody (Nell's personality in Woody's body, actually) comes downstairs after studying with Nell (Woody in disguise). * It's a common feature of Abzan settlements on Tarkir, too. In the present, the walls are the main defences; in the distant past of Fate Reforged, they mount ballistae on top to deal with marauding dragons; and in the alternate present created by Sarkhan's meddling, they've been taken over by the Dromoka dragon brood and the ballista platforms have been turned into landing pads.
* It's a common insult to claim someone is so unpopular that they couldn't get elected dogcatcher, which is virtually never an elected position, save for Duxbury, Vermont, home to the only

* It's a common joke among IT professionals that printers are possessed or haunted. Printers are one of the few things left in the office with moving parts, not to mention the consumable ink or toner. This makes them prone to misbehave more often than other equipment. The problem is exacerbated by inkjet all-in-ones being super shoddy and devouring ink like it's going out of style.
* It's a common joke nowadays to have a setup with two people talking. One discusses his ultimate weapon: a knife taped to a stick, which he calls a "knifestick".
* It's a common lesson, in art class, that the more lines you add while drawing a face, the more aged your subject will look. Also, the more angular the subject in the picture is, the older they will look. Therefore, most young characters should be drawn with no lines and a rounded face. Some artists don't apply these rules.
* It's a common point among scholars that Othello and Hamlet's flaws are exact opposites of each other; Othello is impulsive to a fault, while Hamlet spends too long thinking things through to the point where he gets nothing done. If Othello was in Hamlet's place, he'd kill Claudius in a second, and the play would be over, and if Hamlet was in Othello's place, he'd take great care to make sure Desdemona really was unfaithful, and would probably discover Iago's deception.
* It's a common practice for companies — usually ones who can't even hope to pony up the cash to land an ad slot — to submit a racy/morally offensive/questionable ad to the
* It's a common practice for WWE talent scouts to invoke this trope when hiring people from non-wrestling backgrounds. They get offered significantly higher salaries than those who come in from the indies — presumably, so the extra money will make them willing to give wrestling a go.
* It's a common practice in Chemistry classes to teach the class the importance of specificity in directions by having students write directions for some mundane task, and for the teacher to attempt to do it while following the directions specifically and with absolutely no additions. For example, if the task is making one peanut butter and jelly sandwich, simply saying "put jelly on bread" will make the teacher place the jar of jelly on top of the bag of bread.
* It's a common practice in the acting and modelling industries for some agencies to offer "open days", which are basically turning up to pay a fee to be on the agency's books for a year - and these are often frequented by stage parents eager to get their children into show business.
* It's a common radio station prank to play "I Got You Babe" twice in a row in the morning on February 2 - it's the song Bill Murray always wakes up to every morning in
* It's a common side effect of any physical career, like being a stevedore, or working down t'mill. While, on the one hand, it's true that you gotta use it or lose it, it's also true that the more you use it, the more it breaks down. It's why the age for social security hasn't ever been raised in the US (you still apply at fifty); people are living longer, but they're still breaking down at the same rate.
* It's a common theme on the internet, often related to "And that's when the fight started." The images, playing on the stereotype that husbands play dumb to get out of helping around the house, show the results when a wife asks her husband to:

* It's actually a good idea to be one if the time can be spared. Studies show that physical ability and mental ability are symbiotic to some extent (like exercise being a good stress relief), and so it's better to be both rather than one or the other. It's to the point where some high end tech companies (like Google) have built in gyms for just such a reason.
* It's actually an inversion more than anything. Mages were useful for utility early on but by the later game, you get access to ridiculously powerful physical abilities like X-fight/RapidFire (which attacks 8 times with dual wield), making mages near useless as all needed buffs can be gained through equipment. Even in the superboss fights, it becomes more of a damage race, rendering the need to heal or use magic useless.
* It's actually a parasite brought out by the Spell of Obtainment trying to completely take her over.
* It's actually a plot point of the series that once the Nazis shed their occultism and shifted their 'ethics are for quitters' mindset to metallurgy and physics, they suddenly became a much bigger threat. There's only a couple of supernatural artifacts to go around, after all, but if you can give ordinary Wehrmacht troopers alloy armor and sci-fi cannons, well...

* It's actually quite understandable that toys would be made for Batman and Superman movies, given that the characters appear in a variety of children's media like cartoons and video games. However, some comic characters don't have that excuse. For instance, Toy Biz released a line of figures for the first
* It's actually rather funny, as in real life, Annie's husband pretty much fell in love with her when she beat him at sharpshooting, then went on to give up
* It's actually relatively consistent that "time" keeps flowing for the Legends even while they're running around time. Whenever they go to the "present" it's always the current time according to other shows, even the couple times they've taken a break they're returned to whatever the current date is in Flash and Arrow rather than the night Rip first recruited them in 2016, with them being away for all the months that have passed since that date. This is probably to keep things in sync with the rest of the
* It's actually somewhat bad in one sense. 'Print is all but dead' it says, when describing why language skill ratings for reading and writing are half that for talking—say, your English skill of 4 for talking in it drops to 2 for writing and reading it. But it still seems a lot of the data of the world is in the form of text ... which differs from print mainly due to all the electrons involved in the display. Plus, this is supposed to apply to specialized dialects, and one cited is legal-speak. So they're suggesting the field of LAW has cut down on writing?

* It's a Dangerous Business, Going Out Your Door) and the canon poison joke (a flowering weed that causes a random, sadistically humorous transformation in whoever touches it).
* It's a Dangerous Business, Going Out Your Door: In ancient times, the deer were the world's dominant race, but all but destroyed themselves in a great war. While pockets survive, such as the denizens of the Shimmerwood, they can no longer rise to their former glory, nor do they wish to.
* It's a Dangerous Business, Going Out Your Door: Shield Maiden: elite warrior of Gildedale, bodyguard to the heir to its throne, and mother of a young filly.
* It's a Dangerous Business, Going Out Your Door: The end of the old world was ushered in by the great war between the deer; as Lady Falalauria eventually reveals, they are responsible for magic being required to keep the world running in most areas outside bastions like the Everfree Forest.
* It's a Dangerous Business, Going Out Your Door: The Pronghorn Network actively seek to subvert this trope, primarily by practicing good manners so as not to upset the people they're delivering news to.
* It's a Dangerous Business, Going Out Your Door, when Rarity, Rainbow, and Applejack are camping in the mountains, sleeping together for warmth, Rainbow unconsciously makes a move on Rarity.

* It's a joke among musicologists that once the composer is listed as "Stradella" or "Pergolesi", there is already cause for suspicion. Many 19th-century editors included pieces in their anthologies from other anthologies, which had named the source as Anonymous, and disliking such an attribution, they picked some known Baroque composer, most often Pergolesi or Stradella. Moreover, two famous arias, "Pieta, Signore" (attributed to Stradella) and "Se tu m'ami" (attributed to Pergolesi) are actually 19th-century compositions in what they perceived to be antique style, by the music critic Fetis and the anthologist Parisotti. In other cases, utter disregard for the actual source results in erroneous attributions, such as "Quella fiamma che m'accende" (probably by Conti, attributed to B. Marcello).

* It's a leading cause of people giving up on their family history. Some people approach their family history just curious about their family name or recent generations only to find that the farther you go back the number of people and family names increase exponentially. It eventually gets better, due to people marrying (distant, or sometimes not-so-distant) relations. Most geneticists estimate that for any given person, the number of distinct ancestors alive at any one time reaches a maximum sometime around 1200 AD. This is called "pedigree collapse" and it

* It's a little more complicated. There were actually two "Gulf of Tonkin" incidents, separated by around 48 hours. The first incident took in disputed waters, claimed by North Vietnam as its territorial waters but by the US as international waters, conveniently not too far from an area where a South Vietnamese covert operation against the North was taking place. (North Vietnam claimed that US warships were supporting it, while US has denied it.) During this incident, which was very real, North Vietnamese patrol boats took the worst of it, while US warships suffered nothing more than a few dents. The second incident took place in the middle of night, roughly 40 hours later, in undisputed international waters. Sailors onboard US warships (which were involved in the first incident) thought that they were under attack by North Vietnamese and spent most of the night shooting at something...or nothing. Military intelligence officials who received the report thought the whole thing was a mistake by confused sailors and no actual attack took place—which has been confirmed by every investigation thereafter by military, government, academics, etc. But Johnson administration decided to ignore the intelligence report and assert that the second attack was real to justify escalating conflict.

* It's Alive the vigilante mob hunting his newborn baby, which is a mutated, murderous monster. Subverted when Frank finally confronts the sobbing infant... and his paternal instincts kick in.
* It's Alive! with Brad productions where something has to be smoked or otherwise cooked outdoors, since they're not about to set up a smoker in the World Trade Center and most of the rest of the BA crew live in New York City), and now all the time what with all of the videos being produced from home amid the 2020 pandemic.
* It's a Living follows the five waitresses at a posh California restaurant, and their senior supervisor, Nancy Beebe. When the girls whine that Nancy's cracking the whip too hard, a contest is held to see who can generate the most tips that evening. Nancy wins handily, even bringing water to an exhausted Dot. The girls are better at dishing gossip and drama than serving entrees.
* It's a Living ran for two seasons on ABC from 1980-1982. After a three year hiatus, it was brought back in syndication, where it ran for four seasons.
* It's a Living woman (ironically one of Nancy's ex's). The main characters all express revulsion at the concept. While in the 21st century, individual opinions might or or might not have changed, a transgender person would no longer be the subject of ridicule on prime time television.

* It's All About Me, and will stop at nothing to get back at anyone who dares harm them. He'll even dismiss people to keep them out of harm's way if they are injured or otherwise not up to the task of fighting. It takes right up until the final battle and some egging on for him to finally admit that his 'greed' was really only a desire for friends.
* It's All About Me: A person's only concern is what they want to do and what will make things pleasant for themselves.
* It's All About Me. Apparently, Kovalev concluded exactly the opposite of what Keenan intended and thought that he was being rewarded for good play, and at any

rate, he did score a goal in that super-long shift.
* It's All About Mee just because it consists of things other than himself.
* It's All About Me: Entitled characters always care about themselves.
* It's All About Me: It sure is! And anyone who thinks I should care about others can piss off!
* It's All About Me: Me, my greatness, and my interests are more valuable than you!
* It's All About the Benjamins (Life After Death's first single) was used in Biggie's verse.
* Its All About The Mind parents have no problem with them being in a three-way relationship with another girl... but are less than thrilled by the fact that Hermione isn't an Indian like them.
* It's all beauty and grace at the Miss Universe pageant, but unfortunately for Miss Amazonas (Venezuela) 2015, they do things a little differently down south. After Carol Toledo was crowned, Sheislane Hayalla yanked her crown off, threw it on the floor, and stomped away while screaming something in Portuguese as another contestant clapped(!).
* It's All Been Done ended with the main character and his wacky group of talking toys about to have an adventure when he realizes the entire thing was an attempt to avoid dealing with his wife's death.
* It's all but explicitly stated, however, that this was supposed to be karma.
* It's all but stated Glenn was Lord Rodrigue's favourite child and Felix confirms he was never able to beat his brother when they would spar together, though
* It's all but stated that a nuclear war happened in the not too distant past of
* "It's All Coming Back to Me Now" straddles the line between this and
* It's alleged that the Dacia Sandero (a central European light SUV-type) was actually canceled for the UK market because
* It's alleged that the infamous North Hollywood shoot-out was supposed to be this, hitting a truck delivering cash to a bank branch in a strip mall, but the truck was held up in traffic and the robbers got impatient.
* It's all fictional anyway. In real life, no matter how much they might be complaining, people are at least complaining about things that are actually happening, and that do have an effect, however minor, in their lives. But a fictional character's problems
* It's All Gone Pete Tong, but the expression in the title is never explained.
* It's All in the Details" are ended after only a few dozen loops when Castiel senses Dean's contract completing and resetting itself, prompting him to step in and encourage Loki to end the loop early with the threat that he will start using Loki's true name so that his older brother can hear it.
* It's All in the Details, Naomi and Zachariah abduct Alastair just as he's attacking Dean, believing that Alastair has become the last Seal following Lilith's death. However, when they attempt a ritual intended to complete Alastair's transformation into the Seal, it instead causes him to explode as the true last Seal was initially Anna but has recently become Abaddon after she arrived in the future.
* It's All My Fault: A character believes that he is responsible for something he didn't do.
* It's All My Fault: A character realizes the error in their ways and thus starts to grow up and take responsibility for their actions.
* It's All My Fault: Believing that it's your fault despite it isn't vs. blaming others when it really is your fault.
* It's All My Fault: It's sad that this person blames themselves for other people's problems.
* It's all one way. In real life, if you're having a good moan with someone, the person you're with can be reasonably confident that they'll have a turn to get some moaning in when you stop speaking (of course, depending on who you are, this chance may be quite slim, but it is nonetheless there). With a fictional character, while they can complain to their heart's content at you, psychologically you will never get a chance to moan back to them.
* "It's All Over Now" - originally by the Bobby Womack & the Valentinos.

* "It's All Over Now", originally by the Valentinos, and previously Covered Up by the Rolling Stones
* It's all over this trope, with all the actors incorporating huge aspects of themselves into their characters. Monica was originally designed as rather cold and cynical, but
* It's all Translation Convention. Even the Imperial forces aren't speaking English, they're speaking Low Gothic. The Latin bits are High Gothic, which are said to be effectively the same relationship to us as Latin/English today. That being, some similarities between Gothic and English, but not much you could really catch at first glance.
* It's almost a requirement that, if you're a Middle Eastern wrestler (or just brown enough to get the gimmick), you have to use the Camel Clutch in your repertoire. Ironically, the move was actually a Gory Guerrero creation, and not an invention of the Original Sheik. It's also strongly associated with Guerrero's
* It's almost expected that any badass character is going to flick away a cigarette butt at some point in a show of his disdain for the world in general.
* It's almost inverted on the part of the Heroes. While no major hero we meet is outright
* It's almost the whole plot of the episode "Cry Ed", when Jimmy manages to hurt his foot with a
* It's a longstanding tradition for business conferences to take place in resorts or otherwise scenic locations.
* It's a Long Story) and he is discussing the terms of his surrender to the United States of America with Mayor West. After his other comically small demands (surrendering if he will be allowed to keep his neighbor's pool, for one) are denied, he hurriedly asks West to hand over the ballpoint pen he's holding just so he won't walk away empty-handed. Mayor West points out that it's a dime-a-hundred pen and he's got a lot more in reserve, but when Peter says that he wants it anyway, West refuses to give it.
* It's a Long Story), their parents punish them by making them spend the rest of the day dressed as the sibling they're pretending to be at that very moment, which put a snag in their plans for the day. Lincoln (dressed as baby Lily) thinks he got off easy since all he's doing to do is watch TV with Clyde... only to find that he invited their entire class to join them.
* It's a lot less common for a person to give references on a daily basis to popular culture from what's roughly a three decade period several centuries in the past. "You sing like an early Florence Foster Jenkins." In music, this is because the phonograph was invented in 1877, and popular music recordings really only became commercially viable after

* It's already been bad for years with the word "Koopa" sounding like "kupa" (poop), made even worse with "Koopa Troopa" sounding like "dead man's poop".
* It's alright that biology isn't Paru Itagaki's forte, but as illustrated in
* It's also a BDSM term, so expect to get awkward looks if you answer "What are you doing?" with "Just messing around with my GIMP."
* It's also a bit similar to the manner of speaking in Slaver's Bay where Unsullied soldiers and other slaves, for example Missandei, refer to themselves in third person and with "this one" while they use the correct second and third person for anyone else.
* It's also a civilian militia activated on short notice under Gallia's Universal Conscription laws. The enlisted armed forces are much better about it, wearing uniform and addressing each other according to rank.
* It's also a cliché that straight girls involved in theatre or music in high school will inevitably crush on at least one closeted gay guy.
* It's also a common occurrence for people to be stripped naked and duct-taped to the high school's flagpole.
* It's also a common response from people realizing they're a different sexuality or gender from what they initially assumed.

* It's also a common trope for any canonical female love interest that's "in the way" of an author's favorite male/male slash pairing to be dismissed as one of these.
* It's also a common trope for the show in general. The tagline is "Trust No 1" for a reason. It's very hard to keep track of who is friend and who is foe, especially since that changes from week to week.
* It's also a common trope in Fan Fiction especially regarding an affirmation that the author(s) deny any desire to infringe upong copyright and asserting the rights of the creator(s) of the original work(s) despite Copyright not working that way. When authors are controversial (either in the fandom or in general) there are also often prefaces along the lines of "I hate the author and in no way endorse their views on x". Sometimes the prefaces also serve the purpose of Trigger Warnings or "Don't read if you don't like trope x, character y etc."
* It's also a convenient way for Gaunt to get command of the regiment again. Wilder is out of the picture, and most of the Belladon soldiers are dead.
* It's also a gameplay mechanic: If you hit your opponent hard enough, you can send them flying into the wall, ground, or ceiling of the stage, causing extra damage. Cloud is especially good at this due to his combat style being centered around it; almost every HP attack he has is guaranteed wall-rush. The purest example is in Firion's punch follow-up, which (especially in the sequel) has a
* It's also a great deal more mixed in France with the Vichy Occupation and surrender still invoked
* It's also a handy habit when texting or writing notes on a cell phone, as adding the second space after the end of a sentence will cause the text function to automatically insert a period.
* It's also almost unknown, to all but the most hardcore orchestral music buffs, that the words of Carl Orff's
* It's also a major part of the roles of the Exalted in the First Age. Lunars were meant to be the consorts and companions of Solars, and Solar-Lunar marriages were the norm.
* It's also an exception to the "nearly mindless" rule-a cleric (usually an evil one, but not always) can opt to become a "mummy lord" which,
* It's also an in-universe elephant in the room - according to the same question, Bella apparently did have periods in the earlier books but was too embarrassed to ask about a vampire's reaction to it, while Edward was fully aware but too much of a gentleman to bring up the subject.
* It's also Annabeth's fatal flaw as revealed by the sirens in book two. However, once she knows this, she works hard not to let her pride get the best of her. She makes some mistakes, but overall is successful. She even uses her knowledge of how a prideful mind works in her climactic battle with
* It's also a parody of some similar randomness from Nirvana's Nevermind album, "Endless, Nameless".
* It's also apparently extremely difficult to navigate in underspace. The
* It's also, apparently. That's no moon, it's a 1980s pop-cultural icon!
* It's also applied to Lon'qu/either Cherche or Olivia, Tharja/either Stahl or Kellam (gender-flipped), Gerome/either Noire or Lucina, and Cordelia/either Libra, Stahl or Frederick (
* It's also a question of sheer scale; there are far more planets in the Imperium than there are Inquisitors, it's often easier and cheaper to depopulate and resettle an area than to face whatever might be getting established there, and the local authorities usually don't have the clearance to know that the things the Inquisition fights are even possible. The Imperium prides itself on counting the lives of planets, not men, and frankly they can't even keep track of that since they're conquered and lost so frequently.
* It's also a recurring contrast between leads Clarke and Bellamy. Despite the above, Clarke is a more logical decision-maker than Bellamy, who tends to run more emotional. It's lampshaded, as they're referred to as the head and the heart respectively.
* It's also a recurring trend in the Philippines to use existing pop songs for

their theme music, even going so far as to name the shows after said songs.
* It's also a sign that the character in question is possessed by the Elder God Chthon.
* It's also a standard of Jeremy Hotz's routine. He uses odd posture and his right hand to stifle his laughter at his own jokes. It works because his routine is filled to the brim with
* It's also a subversion, as the main owl in the story is connected to
* , it's also a surprisingly accurate picture of the sorts of supply chain and sourcing challenges faced by manufacturing businesses.
* It's also a tradition amongst the devout, both amongst classical Christians and Muslims, to go on a
* It's also averted in the backstory, where Lords Ahn Hyeon and Cho Hak-ju have to slaughter the entire population of the village of Sumang and individually reanimate the bodies to create their undead army. Furthermore, none of the invading Japanese are shown reanimating and the survivors are defeated by a badly under-strength Korean force, suggesting that the infection wasn't transmissible.
* It's also averted where Master D mentions the word "damn", and since this is followed by a gory animation of you shooting him in the face, it gives the impression that the creators of this scene don't care about censors.
* It's also a very spirited attempt at proving the old adage "You can't make an anti-war movie" wrong. If you don't show the actual battle, you can't make it accidentally seem glorious, which is a fairly clever way of getting around the problem.
* It's also a visual cue that Neo is reaching his potential when he breaks Smith's shades. Smith takes them off and says, "I'm going to enjoy watching you die, Mr. Anderson."
* It's also because she was taken, taught and brainwashed as a child to the point of being fairly broken psychologically — she's almost a sort of

* It's also believed Earth was seeded by an the Third Imperium, after the 5th planet was destroyed in an attack against the Second Imperium, causing the Asteroid that killed the Dinosaurs.
* It's also brought up during a game of "I Never", when Celestia says that "I have never intentionally blown up a star." Apple Bloom drinks while grumbling about how "You loop as Carter onetime..."
* It's also claimed that Rimmer once angrily attempted to force-feed Lister a fridge. As in, an actual fridge, not the contents thereof.
* It's also come under accusation of this following the introduction of the "Squeal of Fortune" which among other things, allows players to every day spin a roulette wheel for expensive items or experience. More specifically, spins can also be bought using real money. Among other things,
* It's also common for Gentiles to convert when marrying a Jew, although this can be problematic because conversion is, by traditional Jewish law, only valid if sincere. That is, if the person is only undergoing the conversion to get married and does not believe in the Torah or has no intention of even trying to live by it, then the conversion is not supposed to be performed and would not be valid even if performed. In modern times, that has meant that the Orthodox do not regard Reform or Conservative conversions as valid, since a person undergoing such a conversion ceremony (especially if it's a Reform ceremony) by definition is not undertaking to live according to the Torah, at least by Orthodox lights.
* It's also common for Maxim and Dimo to slap Oggie around whenever he's saying something stupid, but since they're

* It's also common to try to shoot those ejecting from their Titans. Of course, the ejectee is usually shooting back.
* It's also dangerous for the submarine. A celebrated incident of U-boats trying to save men they had sunk was (literally) scuttled by Allied air raids that caught them on the surface.
* It's also debatable, and changes from edition to edition, as to whether Nagash resurrects "naturally" or whether he actually needs his jars to do so. During the End Times series it was revealed that Nagash's earlier resurrections had been mere shadows of the original in thought and power.
* It's also deconstructed, as the events slowly eat up his sanity until there's nothing but an utterly rage-filled maniac left who constantly rants about his

* It's also done part way through the manga, where after Kouta tells Nozomu he loves Chizuru, she leaves… then immediately comes back and declares herself his lover. Chizuru's reaction is basically "Gah, whatever, I'm still number one." However, while Kouta's opinion is not asked initially (like the anime) he later declares he loves them both and is going to be
* It's also done to a stormtrooper by the rebels on Endor; Han walks up to the guard, taps him on the shoulder, and runs around the corner. The guard follows, into a pack of rebels.
* It's also due to the (actually very) rare case where the dose can be low enough to not prevent conception, but still low enough to prevent implantation, technically causing the pill to act as a very early abortifacient (that possibility required a legal redefinition of the term "contraception" to include such cases).
* It's also easy to take away the message, 'It's ok for people from different cliques and walks of life to get along, as long as no-one else knows, and the popular members of the gang will most likely ignore everyone else again the next day, as though nothing happened.'
* It's also established that, due to Spiral Power, a Gunman's controls are set to how the pilot thinks it should be controlled. It's possible for someone with no prior training to get into a Gunman, move some joysticks, and get it working solely because that's what they want it to do.
* It's also eventually revealed, thanks to Kiley's attempts to analyze her problem, that DiDi has real problems with the distinction between sex and love. She apparently thinks of the lust she inspires in all the men she dates as love, but doesn't expect it to be a lasting emotion; she regards sex as the pinnacle of emotional intimacy, and yet she needs deeper intimacy to achieve orgasm. When Kiley talks about romantic feelings (actually in the abstract), and then gives her the first-ever orgasm which she's been desperately seeking,
* It's also explained that most intelligent life in the universe followed
* It's also fairly clear that Blake is very close with her father Ghira, who is quite proud of the young woman she's grown into.
* It's also fairly secure. Jem'Hadar learn foreign languages ridiculously quickly and never use their own language in the presence of aliens, so there's no risk of an intruder arming the self-destruct.
* It's also fair to compare the Helghast to the Arab Nationalist movement which itself is accused of invoking "Commu-Nazi" methodologies. The
* It's also fun to listen in on conversations between radio hams. Lurking on repeater networks like the WIN System is encouraged because that's how a lot of scanner and SDR listeners get interested in getting a ham license.
* It's also generally considered that the use of military school or "boot camps" as a punishment is likely to make things worse, as more often than not a disobedient teen leaves not only with a major resentment towards their parents and

adults in general, but often with the skills and knowledge to be a significantly better criminal.
* It's also getting harder and harder by the month to tell what gender Miyavi really is (male).
* It's also good to know that the majority of the comic is the main couple together with very little romantic problems, most of the stress comes from other weird things happening and other characters getting together.
* It's also hard to get the right range of what is acceptable in different situations in a foreign language.
* It's also heavily implied that Peter Abody and Shannon Grimton also get together after the events of the war.
* It's also heavily implied that, while the fairies may look like beautiful
* It's also her brother Pavi's MO. He seems to have done it to himself at some point, as underneath his masks his face is skinned muscle, but the masks themselves are the faces of women he's murdered. He even buys the face that fell off his sister in the above mentioned scene at the end of the movie, to wear "with pride".
* It's also hinted, especially via Tyranid fluff, that while Earth may be the most important world in the galaxy,
* It's also hinted he didn't count on the rabidly anti-Horde ambassador. The Ambassador's interest in the Horde's desire for revenge, the easily located spy with an itinerary for the General's journey, and the speed with which a replacement is found are too convenient. This Cycle was planned.
* It's also hinted that Quagmire engages in necrophilia; this is shown in such situations as when Death killed Joan (a maid Quagmire was briefly married to though she turned out to be a
* It's also home to an opposite problem; more heroes than citizens. It's kind of funny to see an entire park full of brightly-costumed vigilantes watch the only civilian for five blocks walk by, waiting patiently for the inevitable mugging to happen.
* It's also how Dirk figures out the "riddle" of the history professor somehow hiding a surprise in an ancient artifact for a girl. All his colleagues assume he faked the whole thing somehow because he does this sort of thing all the time, but it keeps bugging Dirk because of how unspeakably improbable the whole event is. He asks a random kid on the street (in order to help himself think), and the kid points out the obvious answer: The professor is a time traveler. He went back in time, had the artifact commissioned with the surprise inside, and dug it up centuries later.
* It's also how his apprentice Vanitas first appeared in the video, joining Xehanort halfway through. Mix that with his dark outfit and feature-concealing helmet, and they serve as a good warning sign for how bad the situation is for Aqua, Terra and Ven.
* It's also how Parker recruited Archie for the big con in "The Last Dam Job" — by stealing not only Archie's wallet, but also his daughter's wallet and his granddaughter's lollipop.
* It's also how Rincewind ends up getting made Egregious Professor of Cruel and Unusual Geography in
* It's also how Tobias gets around his promise to Ax that he won't tell the others that Ax is
* It's also implied Alazlam Durai is getting this information from the "Durai Reports", written by his ancestor Olan Durai (who hangs around at the periphery of the plot through much of the game, only actually appearing in battle once)
* It's also implied (and stated in the manga) that the hot dog he gave the little girl was
* It's also implied in some sources that their technology is borrowed, meaning they don't really understand how it works.
* It's also implied in the Dark Brotherhood questline. You don't ever speak to the Night Mother, you "embrace" her.
* It's also implied in the episode (and confirmed in the novelisation) that Clive has evidence of the majority of the Doctors, and not just the Ninth, but believes

it to be a case of the title "the Doctor" is passed
* Its also implied that she learnt some of this from the Bahro, who are likewise capable of breaking all manner of the things that the D'ni claimed were impossible. This is best exemplified in that they are shown to be capable of writing a word, say "rain", which
* It's also implied that something else strange happened to the planet, which by the time we see it is experiencing gravitational and rotational anomalies, but this is possibly separate from what killed Thanos' people.
* It's also implied that the Fog was created, or at least modified, by
* It's also implied that the Futurekind are an offshoot of humanity, a devolved subspecies.
* It's also implied that the other Gems' control over their powers isn't entirely conscious and somewhat instinctive, matching the deliberately more animalistic nature
* It's also implied that the princesses do this as well, as when they fight Nyarlathotep
* It's also implied that the Skimming platforms all go through the same space, it's just that they're so far apart that they never interact.
* It's also implied that while human is a recurring body plan, it's not the
* It's also important to note that certain Digital entities can actually violate the multiverse's rules. For example, as revealed by
* It's also important to note the series is set in the 10th millenium, and that people have legends of ships that fly through the stars.
* It's also indicated that adopted siblings Rhea and Diane are also this, and despite sniping at each other their concern for each other is genuine.
* It's also inevitable if use of superhuman powers or "superhuman vigilantism" is outright banned, or if the hero's activities have been otherwise outlawed.
* It's also interesting that Molly was dating a guy who superficially
* It's also interesting to note that the space pirates in this series were the pioneers of warp speed travel and it was their creation of grappler ships that changed the nature of space warfare.
* It's also kind of a meta-example: Anthony Burgess' wife was sexually assaulted in
* It's also lampshaded. Characters in the story find Star Wars ridiculous for having 20-something Luke as the
* It's also later revealed in the fic that the same thing happened to
* It's also later revealed that Korra's uncle was a member of the anti-authoritarian Red Lotus group who wanted to kidnap her as a child to brainwash her into their anarchist ways (kind of odd for a guy went out of his way to frame Korra's father out of his right to rule the Northern Water Tribe), but even they didn't plan on him fusing with the spirit of Chaos.
* It's also likely that Fëanor's widow Nerdanel still lives in Valinor, too. She's older than Finarfin and his wife, but still younger than Indis and Olwë.
* It's also likely that undead show up in campaigns so often because they're one of the best fleshed out types of monters in most editions of D&D. There is a laundry list of types, ranging from weak things like zombies and skeletons all the way up to Vampires and Liches. They all theme well together, allowing the DM to mix and match with basically any types of undead to appear together and can work as either hordes or individual enemies, and have a wide range of interesting powers and abilities.
* It's also literal - all the other maids are fairies. The most intelligent fairy appears to be
* It's also made clear, both in this duology and other books he appears in, that he teaches most of his students, if not quite "fancy court" fighting, a style suitable for dueling. This is for entirely pragmatic reasons: he has a limited time to teach his students (who have a wide variety of life experiences and aptitudes for combat) to survive a fight, and
* Its also made clear that the actions of the first game only would have changed the timeline to make him far, far stronger.

* It's also mentioned in one of the chapter cliffhanger lines, "Will the tragic cycle ever stop?!", during the
* It's also mentioned in the lyrics of "Orgy for One" (which is about nobody showing up to Danny's orgy so he ends up having a glorified "self-love" session instead).
* It's also mentioned in "The Mark of Gideon", where a planet's failure to deal with this led to ridiculously extreme overcrowding (though no problems with health or resources, apparently). The episode first aired in 1969. Kirk advocated birth control for them and offered to provide contraceptive devices (his stance was very controversial at the time, but seems
* It's also mentioned that about 90% of the fouls can be prevented from ever happening by just not letting anyone use their wands while on the field. Since a total ban would infringe one of the Wizarding World's most basic human rights, the rule is limited to stating that wands can't be used to attack other players, the crowd, or the balls in play; it's still perfectly legal to use them if an outside danger or interference comes up, like the time Harry used a Patronus to drive away what he thought were some dementors coming after him.
* It's also mentioned that certain jump points, especially those near
* It's also mentioned, that Donna does it too, but she "makes an evening of it" with music and candles. Hyde wonders whether Jackie masturbates also but he reasons that she doesn't because "she won't even go to a self-serve gas station."
* It's also mentioned that dreadnoughts are at their best as long-range artillery pieces: their projectiles have higher velocities than those of any other ship type, and range in space is limited solely by the opponent's ability to dodge. Which is why the best tactic against them is to close in to "knife range", thus avoiding their main gun, as the dreadnought, like other ships,
* It's also mentioned that, in the future, Africa and Europe have switched positions on the world stage, with Europe seen as a primitive backwater where male genital mutilation is still widely practiced.
* It's also mentioned that most of the protagonists' Gunmen were upgraded by Makken and Leyte during the
* It's also mentioned that psychic power tends to directly correlate to mental instability. The highest grades of Psyker (everything above Beta) have an almost 100% likelihood to be too insane to exist as a functional human being. Pretty scary, considering that grade of psyker can do things like rip buildings in half.
* It's also mentioned that Rico is breveted to Sergeant a week before he leaves for OCS, but that this is less of a promotion and more that Lt. Jelal is giving him shiny new stripes to show off for a week as a "going away"-present.
* It's also mentioned that the areas surrounding the American-settled capital world (in contrast to the other Chinese one) match this trope
* It's also mentioned that Thor once challenged Jesus to a fight, though the latter (unsurprisingly) never showed up. (
* It's also mentioned throughout all the stories that numerous other small groups of survivors (civilian and military) all also fled the Colonies' system to rebuild elsewhere.
* It's also more common to hear about Plato than Platon and Aristotle than Aristoteles.
* It's also more likely to send a Zombie Horde at the Survivors at any given moment the slower they're progressing through the level. This can be
* It's also necessary for avians. Birds that "imprint" on humans as infants
* It's also necessary to the plot; oftentimes those kidnapped by demons wind up in the Dark Capital, and people harassed by demons usually require the problem to be traced back to the location's Dark Capital counterpart. As a Devil Summoner and a private investigator, that usually means it's Raidou's job (and thus, the player's) to do it.
* It's also never addressed how Starscream got to Earth, since Megatron kicked him out of the Deceptions by that point. Here, while he was still a member of the Cons due to an

* It's also noted once that the mess tent serves powdered egg substitute for breakfast. At one point when they're provided real eggs from a local farmer, it becomes a very big deal.
* It's also noted on the info screens for several planets note that what makes them unsuitable for humans make them perfect for volus/hanar/elcor etc.
* It's also noted that a government agency needing both a continued budget and a distinct lack of oversight takes a severe risk when assassinating its parent government's citizens, and doing so is usually the most expensive option in terms of both monetary and political capital.
* It's also noted that there is nothing stopping a vampire from turning an
* It's also not hard to tell who is disposable in any given episode of
* It's also not one to shy away from fights to the death, killing off several major villains and over a hundred monsters of the week; however, if you like redemptions, Seasons 2 and 4 are full of them.
* It's also not quite the same. One of the few times we get an exact measurement, Crichton mentions "180 microts" as the amount of time that his brain can go without oxygen and still be revived. The real-world answer in human terms is about 4 minutes, making a "microt" roughly 1.3 seconds.
* It's also not unheard of for a lesser star in WWE to play a different role on a live event to what they are on TV. For example someone might work a live event as a heel when they're a face on TV - which is sometimes an indicator that they might be heading for the turn on TV. For example in 2011
* It's also no wonder that Nords in general are skeptical of magic: there's maybe a few dozen legitimate mages in all of Skyrim, yet seemingly hundreds of murderous necromancers.
* It's also occasionally referenced that an AM citizen/Wizard, upon encountering a sign not to perform an action will immediately perform the action just to see what all the fuss is about. Which is why the sign on the stick holding the
* It's also occasionally subverted, particularly with Headcrab Zombie "corpses" that get up and attack you the moment you approach them. Valve really wanted to get as much mileage out of this trope as they could.
* It's also often said that the serpent had legs before God curses it for tricking Adam and Eve, but the text only states that afterwards he was cursed to crawl on his belly.
* It's also one of the favourite party tricks of the Seers of the Throne in
* It's also parodied in the episode "Two Girls For Every Boy" in which Finch is able to get a ton of errands taken care of and get numerous men to assist him upon explaining that he needs to get these things done in order to get to watch
* It's also played as a bit of a wink to the audience in one episode when Jack Crawford is having a meal at Lecter's and innocently asks what the meat is. Mads Mikkelson draws out the pause before saying it's just pork. Not to mention the lion in the room metaphor, and the little in-jokes Hannibal likes to make.
* It's also played for laughs both times the Ghostbusters drive through the carwash and their uniforms shrink and even fall apart as a result.
* It's also played straight in the early quest "Ghost Town Gunfight" where you form a impromptu militia of Goodsprings townsfolk to fight Joe Cobb and his small group of Powdergangers. The best thing you can do is get Trudy to round up the townsfolk, get dynamite from Easy Pete, armour from Chet, and meds from Doc Mitchell. This allows the town to beat the gang. If you take the opposing quest they'll still put up a spirited fight, but the chips fall against them this time.
* It's also played straight in the same book. Harry never once suspects the correct person of being the Half-Blood Prince and has to be told who it is.
* It's also played straight multiple times with Tagon demonstrating that when the chips are down he really does care about the people under his command.
* It's also played straight with Ted and Barney during a "conversation" about whether to close the bar they're watching. Ted seems to think they've come to an agreement and will close the bar, but then Barney announces "Good news, everyone! We're keeping the bar open all night!"

* It's also played straight with The Wall, a man-made border which separates the Seven Kingdoms with the uncharted northern lands. It's
* It's also played with in the case of the most prominent character who happens to be a Korbat,
* It's also played with to heartwarming effect near the ends of some characters' stories. Most notably, halfway into his final chapter Alfyn will use inquire on himself to recall the memory of Graham Crossford preparing the tincture that saved his life; you have to inquire Graham to get the information. And in one of the most heartwarming scenes in the game, at the end of Ophilia's story, you have to use Guide on Lianna to lead her to the spot where she helped first break Ophilia out of her shell fifteen years prior.
* It's also possible for a Darkside player character to start a relationship like this with an equally-evil companion. Perhaps the most poignant of these options is the Male Sith Warrior, who can
* It's also possible for mages to do this intentionally by drawing on all of their life force, and all the available energy around them, to fuel one
* It's also possible for Mike to pit Conrad Marburg and Alan Parker against each other in the finale by either revealing to Marburg that Parker was responsible for him going rogue years ago or, if Madison Saint James, AKA Parker's daughter is killed, telling Parker that Marburg was the one who did the deed. Either way, it ends with Parker dead and Michael getting a chance to even the score with Marburg.
* It's also possible for purely accidental cases to happen if a screw, nut or other piece of metal becomes detached from the machinery in the factory; foodstuffs are supposed to pass through a metal detector after being packaged to prevent this sort of thing, but they're not perfectly reliable and corners sometimes get cut.
* It's also possible for Roger Wilco to throw himself out of the airlock by "accident".
* It's also possible that Alternate!Peter never met Claire and therefore can't heal, or that he got the scar before meeting her.
* It's also possible that the old Coalition cloaking method is simply obsolete with more modern sensors capable of seeing right through it.
* It's also possible that this is due to rights concerns with DC, as both companies have used the Captain Marvel name, but copyright law dictates that there can only be one comic called
* It's also possible that this is the case for the women used as cattle for mother's milk, as Joe has been a slaver-polygamist for a long time. Basically, if you're a relatively healthy (as in, not terminally ill or horribly mutated) woman living on the Fury Road, there's a solid chance you've been raped by Immortan Joe at some point.
* It's also possible, though tricky, to attack from above. One possible method is to dismount high above an opponent who's idle in the air, fire off a shot that stuns them, hopefully dropping them from the sky, and then activating a gadget to slow your fall.
* It's also possible to buy an Intellect program for the players' ship. Though the program alone costs a Megacredit and a computer capable of running it isn't cheap either.
* It's also possible to complete the game with 2 weapons and 3 HP, but this involves picking up an upgrade that merges two of the three weapons and in some ways makes a "true"
* It's also possible to "customize" a pitch in order to favour a club's general playstyle. Spain's FC Barcelona, for example, tends to water the grass of the Camp Nou before matches in order to make the ball travel faster on the ground, allowing for faster passing.
* It's also possible to cut the rope bridge yourself. Here's a hint: don't cut the rope bridge yourself, or wait until you're off the bridge and shoot the ropes. Makes a good ambush tactic because when the bridge falls or wobbles it'll send the enemies on it flying to their deaths.
* It's also possible to deterraform a planet, lowering the T-score, reducing its habitability and extincting its indigenous lifeforms. Doing this on a foreign

planet is considered an act of war (while improving a foreign planet's T-score can earn you their gratitude). It is, however, one of the simplest strategies for wiping out or conquering the home-world of a hostile race before your ship has top-tier weaponry available. Home-worlds are almost always T-3s with extra settlements (as many as 10 fully defended sites with fleets of defending ships). Using terraformer tools to lower the T-Score even a single level will wipe out almost all the settlements, leaving the place far more vulnerable to conquest or extermination and recolonization.

* It's also possible to have some of your party members leave prematurely in
* It's also possible to headshot infantry units for greater damage at the cost of lower accuracy versus hitting center mass. While both of these apply toward both ally and enemy forces, enemies will never intentionally target the head (while they'll constantly attempt to exploit the tank radiator for all it's worth).
* It's also possible to level-drain two of the three until they become weak enough to enslave with Charm Monster —
* It's also possible to make a floating base (and one Uprising map features nothing
* It's also possible to max out your skill in Science or Medicine while still having very low Intelligence, so you can end up with a master computer programmer or a doctor skilled enough to cure any disease... who is dumb as a rock and can only have a conversation in
* It's also possible to pull off other couples like this depending on how the player pairs up the royal sisters. If Hinoka, Sakura, Camilla, or Elise marry any of the men who have daughters, the player can then hook these second-gen girls up with Shiro or Kiragi (for Hinoka and Sakura), or Siegbert or Forrest (for Camilla and Elise). For example, a Caeldori mothered by Hinoka is still perfectly capable of marrying her cousin Shiro.
* It's also possible to summon 1st Circle demons (the weakest) using mortal thaumaturgy, but not to compel them. The summoner needs to negotiate with them.
* It's also possible to summon a Servant who's a fictional character, if the story is famous enough and there's a historical figure who the character was loosely based on who can fill the role. In this case the historical figure will gain the traits and memories of the fictional character that he or she lacked in their actual life. In some cases this will result in a
* It's also present in the drama CD, made before the anime, in which the climax involves Kyousuke and Riki standing on the beach in the water, Riki crying because he's so happy to see Kyousuke back, and Kyousuke telling him he's proud of all he's done and how he's taken care of the Little Busters in his absence.
* It's also pretty common for good friends who have opposite gender children to refer to them as a future husband and wife, although they're usually joking.
* It's also probably Clark's most commonly used power. Clark and Impulse have the obligatory
* It's also prudent to play the main 'Lord' type characters this way throughout the franchise as they typically gain access to the most powerful weapons and skills which are extremely useful, if not absolutely necessary, against the final few bosses.
* It's also quite common for fans to declare allegiance to Hogwarts houses, referring to themselves by the name of the House whose values they believe that they embody most. Many fans are much more likely to call themselves
* Its also quite common for more angels than Gabriel to be added to talk to the Shepherds, so more roles with a few lines are created, which do not overtake the story. Also, occasionally the
* It's also quite effective at killing enemy dropships when piloting a dropship yourself. Being that the ships are unarmed and with very weakly armored engines, the best course of action is to position your ship so one of its engines is exhausting on top of one of the engines of the enemy dropship, and hit the throttle.
* It's also quite likely that, knowing them, they will make a second season but completely ignore the cliffhanger.

* It's also quite remarkable how much plot-relevant information can be found in
* It's also rare to find a regular mercenary who doesn't have at least
* It's also recently been implied that Chiri'nide's adopted mother Shimi'lande is much more of a puppet ruler than was previously indicated, and it falls under this trope because the Kyorl'solenurn are fanatical in their hatred for the Vloz'ress, another clan that has a puppet ruler.
* It's also revealed in Chapter 5 that the rest of Ghidorah can regenerate
* It's also revealed in the Shadowbringers expansion that all of the weird and wonderful creatures kicking around the worlds are a direct result of a race of ancients messing around with creation magic.
* It's also revealed later in the series that Ross in high school made a pass at the librarian (who was in her
* It's also revealed that Ghidorah will always come back from death eventually so long as
* It's also revealed that he (and a pair of time-travelling underwear)
* It's also revealed that not all zombies are mindless creatures. The runaway prototype is capable of speech and exerts some sort of control over the others.
* It's also revealed that the humans of Kromagg Prime used a weapon on their Kromagg enemies that kills any Kromagg female attempting to give birth. The goal is to eventually drive the Kromaggs to extinction, as this prevents positive population growth. The Kromaggs are trying to compensate by
* It's also revealed that the Protheans themselves had their own Precursor race to learn from, called the Inusannon. And so on, and so forth. Each cycle leaves something behind for the next one to find. The ultimate artifact appears to be the
* It's also revealed that the war that the ancient humans started with the Forerunners was merely an attempt by the humans to contain
* It's also said that after Sauron's defeat, his human allies such as the Haradrim and the Easterlings continued fighting against Gondor for at least a while, although it's less out of loyalty to their old boss and more out of fear and hatred of Gondor, over the actions of their Numenorean ancestors, who ruthlessly colonized them as described in
* It's also said to be a problem for many of the players of the old game. They're used to struggling to get a lump of wood wrapped in leather to move at all, not a ball that can cross the entire length of the pitch in one kick.
* It's also shown earlier that Mirror!Ahuizotl/Bravery Blue pulls the same trick as prime Daring Do. Except while her disguise is more complete and she's a pony, Ahuizotl is still an...well, Ahuizotl.
* It's also shown in several instances ("The Power Within," "Ariel," "Supertroopers") that the S5 implants only crank the Rangers'
* It's also shown many times that benders are capable of enhancing existing expressions of their element: Aang uses fans (or his own breath in one instance) to create wind which he massively amplifies, and when sitting near a campfire Zuko expresses his anger by making the fire flare several meters into the air.
* It's also shown (mostly in the official manga) that being right about their personal philosophy and having something to flaunt are two different things.
* It's also shown that the war that ended with the Romulan off-shoot leaving Vulcan was nuclear in nature. Which was 2000 years ago. Not much has changed since then for the Vulcans or the Romulans, except for the warp drive. Which is strange, given that Vulcans place a lot of emphasis on science and discovery, while their Romulan cousins are as ambitious as ever. Although it is possible that they bombed themselves back to their Stone Ages.
* It's also shown that when a ship jumps, anything not solidly fixed down will be drawn to the point where it was. When Galactica jumps in New Caprica's atmosphere at the start of Season 3 it causes a massive upward wind surge with accompanying sonic boom, and when the Pegasus jumps from the burning Scorpia shipyards in
* It's also significantly averted,since the cops do find a lot of evidence for the prosecution. Phoenix (or Apollo) is the only one actually looking for evidence that can be used by the defense.
* It's also something of a subversion: although the dress itself is quite feminine

and appealing, her walk and run animations are the same as when she's wearing the in-universe equivalent of fatigues and combat boots, causing a fair bit of visual dissonance and ruining the effect somewhat.
* It's also somewhat common in the early movies and filler for a seemingly ordinary mission to end up becoming a lot more dangerous than the ninjas hired thought, just like the Land of Waves mission started out as a C-rank escort mission, but became equivalent to an A-ranked one by the time Zabuza arrived. The aforementioned Land of Vegetables arc is one such example.
* It's also stated in several chapters that London has its own spirit, a result of just how old and magical the city is. This spirit often chooses a vessel to act as its Voice to communicate with its inhabitants when needed. And when the Voice goes into hiding, people in the know realize that this means
* It's also stated that any symbol of faith can repel a vampire — Harry himself uses his pentacle since that's a symbol of his faith in magic.
* It's also stated that Earth isn't that much different from Beowulf in that respect. However, since humans have a tendency to adopt the
* It's also stated that the nukes are specifically designed to go off as soon as the timer is activated in order to prevent anyone from disarming the device after the soldier planting it leaves or decides to have a change of heart. Naturally, the soldiers told to deliver the devices don't know this.
* It's also strange that foreign dignitaries would agree to the presence of psychics, unless they don't believe in their powers.
* It's also subverted by most units in the game, since the two-weapon system allows some units a choice between anti-air and anti-ground, for example, the Chopper-VX, which is normally an anti-ground chopper but can be switched to an anti-air walker at will. Similarly, the Sea-Wing/Sky-Wing is a submarine that can only fire on air units while in water, and can only fire on ground targets while flying.
* It's also subverted in a later episode. Himeno trips into Hayate again...
* It's also subverted in a later episode, when Timmy blithely accepts a challenge from a Yugopotamian, expecting more chocolate-eating and suchlike.
* It's also suggested that accusations of this have shaped Ritsuko Akagi's view of the world since her mother Naoko worked at NERV's predecessor GEHIRN and it's implied she had something to do with Ritsuko gaining a position. To combat this Ritsuko has tried to be as little like her mother as possible, including dyeing her hair, but her breakdown at the end of the series comes about largely because she realizes she failed at this as well
* It's also suggested that Jack O'Neill and his sister, Mrs. Danvers (mother of Carol Danvers) are nothing alike - he's the
* It's also suggested that one of the main reasons Mr. Cat is relatively nicer to Kaeloo than anyone else and spares her from some of the more vicious things he does is that she shows him a lot of kindness.
* It's also the attack Mecha Birdo pulls out after you destroy its antenna.
* It's also the episode right after Melody's birth. Admit it, you went back to this moment when River's identity was revealed.
* It's also the fact that he was jealous of his creator when it came to Jordan, saw that the Isos
* It's also the most likely reason why WWE squandered valuable time and money making the
* It's also the only justification for some of the tactics depicted. Even if the hero knows nothing of his own world's history, common sense should tell him that having lightly armed cavalry charge armour and machine guns is suicide but it's such cool, heroic suicide that he does it anyway.
* It's also the only power punished by "immediate termination", and coming from
* It's also the only TV role of Luxton Handspiker, the voice of Rex. Like Hiromi Okuyama, he mostly does short films.
* It's also theorized that eukaryotic cells in general (cells with nuclei and other complex internal structures) are a product of a symbiotic relationship in the first place (that is, they already were before accepting mitochondria into the

relationship).
* It's also the preferred course of action for most villains who try to kill the Major. People try to crush her head or put a large caliber bullet through it at least five times.
* It's also the problem with using too many Sidereal prayer strip Charms, since the majority of them cost a health level to activate and Sidereals are the squishiest kind of Exalt, with the weakest Ox-Body known to man.
* It's also the reason he continues doing big-budget Hollywood movies, despite not really getting the "American humor" and accusations by the Chinese community that he's "selling out" by playing the funny Chinese man. The massive salary enables him to fund his Asian movies as well as continue his charitable work. He has said he prefers the indie Hong Kong dramas that he works on, such as
* It's also the reason infidelity was so tolerated among men. You had to marry the princess to pump out the required legitimate heirs. What you did outside of business hours wasn't your wife's concern.
* It's also the reason that scapegoating in general exists — far easier to take it out on an easy target than to actually try to deal with whatever has hurt you.
* It's also the reason that the Al Bhed are ostracised from society; they've always made heavy use of machina, and are the only ones to speak out against the idea of the
* It's also the very reason he wants to have her confess to him: if he confesses and she ends up rejecting him, he feels that he'll never end up closing the already wide gap between them. His self-esteem was already shot because of his mother abandoning him thus he feels that no one can love him for who he truly is.
* It's also thought that the fossils left behind by these creatures may have inspired the legends of dragons and such in the first place. Mammoth skulls found in Europe and the Mediterranean during the Iron Age are thought to have given rise to legends of the cyclops (the large nasal opening for the trunk in the skull was presumably confused for a giant eye socket). It's also thought the the griffon myth may have been tied to the discovery of
* It's also true with Yugi's Dark/Black Magician, who becomes the Dark/Black Robed Sage after also having a thousand years to study the arts of magic.
* It's also unclear if she really is working against the Taelons or was just saying that to test Boone.
* It's also unclear if the billy-bumbler is an actual Mix-and-Match Critter, as opposed to a fictional animal that happens to share a few traits with those
* It's also unclear who the "you" addressed in the lyrics "I know you know that I'm not telling the truth/I know you know you just don't have any proof" is. Lassiter? Vick? Jules? Henry? The audience?
* It's also unlikely you'll get a lot of steam off freshly served food, unless it's very hot, moist food in a quite cold room. The steam you see on TV? Probably a soggy microwaved tampon.
* It's also used against Bender in an episode where he's entered a tap-dancing competition and his opponent busts up one of his kneecaps.
* It's also used a punchline when Devon witnesses Chuck's precision shooting in "Chuck vs. Operation Awesome". He asks if Chuck's skill comes from his training as a spy. The response? "No, Duck Hunt."
* It's also used - in slightly less dramatic fashion - to alert the player to a crisp packet on the floor, letting them know that Norton Mapes is still alive.
* It's also used more humorously, as Evangeline will attempt to "turn Negi to the dark side'' whenever the opportunity presents itself. It hasn't worked yet.
* It's also used the other way once Cell has been killed; Yamcha wishes for everyone
* It's also useful to try making your opponent fail to use this trope by deliberately baiting out more of their cards with cards that you can afford to use.
* It's also very common for commentators to do this when a player from either team scores. One highly memorable example is Martin Tyler's scream of "AGUEROOOOOOO!!!" as Sergio Aguero scored the

* It's also very common for giants to receive various subtypes specialized for and themed around very specific environments and phenomena — besides the original, "basic" types (hill, stone, frost, fire, taiga, cloud, storm and rune giants), successive
* It's also what happened to Vanitas, sort of. He was actually the dark half of Ven personified by Master Xehanort. At the end, he attacks Ven to forge the X-Blade (you need two hearts of pure light and pure darkness, respectively, to do that). Ven defeats him in the preliminary battle, but Vanitas overpowers him with the
* It's also why Japanese wrestling has always revolved around a few homegrown stars ("aces") and the invaders (
* It's also why the various tools and mechanisms of magick are necessary for new mages. They can't accidentally affect reality because, at lower levels of
* It's also why Wendy won't tell Steven and Connie what happened between her and Bill in Chapter Ten, for fear that it may traumatize them.
* It's also widely speculated that Doctor Claw himself is little more than a mechanical arm attached to a chair with a voicebox to shout out the orders of Claw's 'pet cat', who is the true criminal mastermind. According to this theory, the final scene of the opening sequence is what would really happen if Gadget ever found his way to Claw's lair...
* It's also worth mentioning that Red Court vamps can only become full vampires by killing a human and drinking their lifeblood. So
* It's also worth mentioning that several people get killed because they refuse to wear seat belts because of the "explosion hazard".
* It's also worth mentioning that there's an averted version of the trope. You can literally make Duke pee by going into a restroom and walking up to a urinal.
* It's also worth noting Amin's zombies seemingly do not actually need to consume human flesh — Barack Obama Sr. speculates that Amin
* It's also worth noting, San gets this by becoming part of Monster X. When San was part of Ghidorah, that body fared very ill in waters
* It's also worth noting that a lot of criticism of rap/hip-hop has racial undertones to it, in the case of conservative commentators.
* It's also worth noting that canonically, Giant Space Hamsters do exist in the Forgotten Realms Settings at that point.
* It's also worth noting that Cyborgs are actually more mentally stable than normal Harrowed, as their manitou are chained up in the basement next to the boiler, not running around the bedroom with a knife. What makes cyborgs crazy is their asshole onboard
* It's also worth noting that if actually practiced, you're able to get over the Dilemma pretty quickly. Intentionally invoke it enough and you're able to use both parts of your brain.
* It's also worth noting that in fact he may have realized that the most important thing to do from Japan's perspective was to destroy the U.S. Aircraft Carriers, which they were unable to do as they were at sea and all they had really accomplished was to destroy some battleships that the Americans learned not to heavily rely on anyway.
* It's also worth noting that in the Elizabeth Taylor/Richard Burton film, there's a scene (not included in the original play) where Kate is lying awake after Petruchio's first abusive tirade, initially looking fearful...until a look of recognition comes into her eyes, and she laughs to herself. This implies that she
* It's also worth noting that in the Mass Effect-verse humanity does not have an "Army", since all military operations depend on the fleet getting troops to where they're needed and securing orbit, and humanity doesn't, unlike the Turians, maintain huge garrisons for planetary defense. The Systems Alliance military focuses on maneuver instead, and gets troops onto the battlefield by
* It's also worth noting that Omni-blades are not laser blades or hardlight, but the suspended 'blade' is invisible on it's own. The Omni-tool creates a holographic sheathe to provide visual context for the user and allies.
* It's also worth noting that one of the premier terror organisations in the galaxy is a human ultranationalist organisation—Cerberus. So potent they

feature on the second and third games and in the third are almost as serious a threat to the galaxy as the Reapers themselves. Not bad for space pyjaks, eh?
* It's also worth noting that Order's campaigns are all compatible with one another (i.e. all of them could - and likely did - happen together). Meanwhile the forces of Chaos, Destruction, and Death all have mutually exclusive victory conditions,
* It's also worth noting that oWoD mummies aren't bandage-wrapped zombies. Rather, the embalming process is part of the Spell of Life, which can fully resurrect the recently dead.
* It's also worth noting that the ARC did not exist in the original timeline. It was an unnamed tiny branch of the Home Office with no headquarters. After Nick and Helen find themselves in the new timeline (which is never restored to the original, and
* It's also worth noting that the majority of the Covenant's soldiers are Grunts, Jackals, and Drones, who are generally little better than
* It's also worth noting that Van Kleiss's design and powers make him seem somewhat vampiric (vampires are often framed as sexual predators). At one point, Van Kleiss sticks his hand through Rex's chest, and sucks nanites out of Rex as Rex screams in pain. The whole scene gives off some seriously rapey vibes.
* It's also worth pointing out that Bugenhagen himself operates quite an advanced observatory and planetarium.
* (it's always a girl), but it's not hers and the girl doesn't have AIDS. Basic emotional manipulation.
* It's always been a point of confusion and grumbling- in the US, at least- that school buses don't contain seat belts (specifically, the big yellow ones, other types of buses do.) People find it especially strange since buses are very large, rather top heavy, and almost always filled with small children, you'd think that'd be one place where seatbelts would be.
* It's always been in Stage 0a in the West due to a complete lack of exposure to the show, though it's slowly inching towards stage 1 or possibly 2 due to fans spreading the word about the show and getting people interested.
* It's Always Spooky Month: Monster begins wearing a trench coat and hat while out during the day to avoid suspicion. Skid remarks that it makes him look like the Candy Dealer from "Unwanted Guest".
* It's Always Spooky Month: Monster regularly eats humans, and him doing so is repeatedly either mentioned or outright shown. He is also an expert chef with human meat, making delicious food one would never tell was made with human remains.
* It's Always Spooky Month: The squirrel from the beginning of chapter 6 later returns near the end of the chapter, which ends up making the rival team lose the basketball game.
* It's Always Spooky Month: When Skid says Kevin isn't with them, Monster says Kevin is an adult and he'll be fine on his own. The narration then cuts to six hours later, where Kevin has gotten hopelessly lost in Zardy's cornmaze.
* It's Always Sunny at Funerals: Funeral takes place during incongruously pleasant weather.
* It's Always Sunny at Funerals: The weather is inappropriately good for a funeral.
* It's Always Sunny in Philadelphia (2005-present) - Its 15th season made it the longest-running scripted comedy of all time.
* It's Always Sunny in Philadelphia accuse their elementary school gym teacher of molesting them, forcing Charlie to get involved in the charade.
* It's Always Sunny in Philadelphia, and Dee being... Dee, as soon as she takes off her disguise, she breaks her foot while trying to kick a football.
* It's Always Sunny in Philadelphia, and to a lesser extent Mac. When Glenn Howerton was asked about his character being named Dennis, he remarked on how it seemed like a good idea, and has proven so far to have been a good decision. Also, Artemis is played by Artemis Pebdani.
* It's Always Sunny in Philadelphia approached the show's creators and asked if they could possibly write an episode.
* It's Always Sunny in Philadelphia are shot like a pretentious art film, with

black and white photography, a maudlin soundtrack, and the cast speaking in Swedish.
* It's Always Sunny in Philadelphia. Artemis keeps complaining that the idea is lazy and suggesting that they do something new instead.
* It's Always Sunny in Philadelphia, Artemis mentions that she's slept with a lot of paraplegic guys because she "likes the power".
* It's Always Sunny in Philadelphia as his avatar and gives nonsensical answers for his profile (favorite food: "milksteak," hobby: "magnets," likes: "little green ghouls"), he somehow manages to get a date with a lawyer. At the restaurant, he eats an entire block of cheese before the date, sweats profusely through his shirt, is bleeding all over his face due to hornet stings, attempts to lie that he's a philanthropist but mispronounces it as "full-on rapist," and then grabs his date's breasts when instructed to "make a move." Needless to say, the date doesn't go well.
* It's Always Sunny in Philadelphia, a show known for its willingness to use the word "shit", has an episode in its fourth season called "Who Pooped the Bed?", where "shit" is scarcely used. Lampshaded, even.
* It's Always Sunny in Philadelphia. At the end of his rope, Charlie drops one of these to end the pointless bickering.
* It's Always Sunny in Philadelphia at the end of the episode, when Charlie complains about having to do this to avoid being sued by Major League Baseball.
* It's Always Sunny in Philadelphia: Averted when Mac and Charlie attempt to fake their deaths to avoid Charlie's father. They decide to stage a car crash and destroy the car so that the Police will think their bodies were incinerated in the explosion. When the crash leaves the car mostly intact, they try shooting the gas tank and using a grenade. Neither idea works.
* It's Always Sunny in Philadelphia), Bill Ponderosa (Dee helped ruin his marriage, and with Frank as his AA sponsor he's become a drug-fueled suicidal maniac), Mac's dad Luther (whose murder case was horribly mismanaged by Mac and Charlie), the Waitress (is driven insane by Charlie's stalking and Dennis' sociopathic manipulation, and also gets fired from her job, causing her to sink further and further into poverty), and the Lawyer (despite outsmarting the Gang on multiple occasions to his own benefit, they've ruined at least one of his marriages and indirectly caused his eye to be pecked out in court).
* It's Always Sunny in Philadelphia, but it's revealed that he actually just ran around high school proclaiming himself to be a "legend" while the cool kids laughed at him behind his back. He admits that his emotions are so buried that he virtually has none. However, he is extremely insecure, bordering on mania whenever his ego is besmirched in even the smallest degree. In one episode he's officially diagnosed with Borderline Personality Disorder and proceeds to disregard it entirely.
* It's Always Sunny in Philadelphia by Charlie at the end of the episode, when he complains about having to call him the "Phrenetic" instead of "Phanatic" to avoid getting sued by Major League Baseball.
* It's Always Sunny in Philadelphia, by Dennis and Dee's mother. She was horribly emotionally abusive to Dee while insisting that Dennis could do no wrong. This clearly didn't work out very well for either of them. At least Frank is more or less equally bad as a parent to both of them.
* It's Always Sunny in Philadelphia, Charlie defends a Juggalo (wearing full clown paint) from bullies.
* It's Always Sunny in Philadelphia, Charlie gets third-party-volunteered so often that the things he's volunteered for are called "Charlie Work" by the other characters. They call it that to the character's face and he still does it. Charlie reveals in a later episode that he actually doesn't mind the work itself, he just hates being told what to do.
* It's Always Sunny in Philadelphia: Charlie has bizarre eating habits. He eats cat food as a sedative. An early episode has him making a Grilled Charlie, which is a toasted sandwich with chocolate, peanut butter, butter, and cheese. He says his favorite food is "milk steak," which his friends have never heard of, but might be a steak boiled in milk. He requests "raw jellybeans" at a restaurant. In a movie

theater, he eats spaghetti out of a ziplock bag. One episode implies that wolf hair and newspaper might be found in his stool.
* It's Always Sunny in Philadelphia: Charlie's bedtime routine involves eating cat food, drinking beer and huffing glue to help him sleep through the incessant yowling of the cats outside his apartment at night.
* It's Always Sunny in Philadelphia, Charlie sings a song entitled "Nightman", which is heavily laced with Freudian sexuality. He has no idea why this song is so disturbing to his friends.
* It's Always Sunny in Philadelphia. Charlie then spends the episode dealing with the discovery that the girl he's obsessed with is engaged. In the final scene, he takes a wedding gift to her fiancée. On discovering that he only proposed as part of a cruel prank on the girl, Charlie tells him to keep the gift anyway. As he walks away, we see that the box is the one with the hornet's nest in it.
* It's Always Sunny in Philadelphia, Charlie will always be completely confused by the current plan the gang has devised off-screen, forcing someone to explain it to him as if for the twelfth time.
* It's Always Sunny in Philadelphia Charlie writes a musical called "The Night Man Cometh" with the sole purpose of proposing to the waitress at the end. It doesn't work out.
* It's Always Sunny in Philadelphia comes from seeing the gang's plans fall flat, notably in "The Gang Wrestles for the Troops"
* It's Always Sunny in Philadelphia could be the only dealer. Even in the current day, he still gives up secrets at a moment's notice if he thinks he can get anything out of it. He thinks this makes him look like a clever wildcard, but it actually makes him look untrustworthy and annoying.
* It's Always Sunny in Philadelphia decide to make a viral video to advertise the bar. Charlie doesn't think it's complete without beaning her directly in the face with a ball.
* It's Always Sunny in Philadelphia: Dennis becomes so frustrated with his new neighbor that he strips naked, grabs a rake and beats the man to death. Then Mac asks him what he's doing- turns out he's standing in the middle of the yard, fuming to himself.
* It's Always Sunny in Philadelphia. Dennis believed himself to have been this in high school, thinking he was the most important person in the school and everyone else was his "Minions". Although Dennis has the arrogant, idiotic bully aspects of this trope down perfectly, he later learns that he was not even at all popular in high school and everyone thought he was a smug jerk with a high opinion of himself (which he absolutely is). Unsurprisingly, Dennis does not take this revelation well.
* It's Always Sunny in Philadelphia episode "Sweet Dee Has a Heart Attack", Mac and Charlie seek employment at a corporate office. They're content to share a single paycheck (minimum wage) because they're only there for health insurance.
* It's Always Sunny in Philadelphia episode, "The Gang Broke Dee". The gang try to insult Dee. But instead of insulting them back, she preemptively insults herself by trying to guess their insults and interrupting them continuously until they stop. They try to explain to her it's less fun that way and she should stop doing that.
* It's Always Sunny in Philadelphia episode "The Gang Cracks the Libery Bell" is told in the setting of 1776, with all the characters being their normally horrible, wrong selves (with Cricket as an English colonel), occasionally making attempts to speak in the vernacular of the day, badly. At multiple points, the characters note that "it's 1776" to justify crime, and the last scene of the story makes it perfectly clear they're all just making it up.
* It's Always Sunny in Philadelphia episode, "The Gang Dines Out", Mac forces Dennis to say something nice to him. This is the best Dennis could come up with:
* It's Always Sunny in Philadelphia episode "The Gang Gives Frank an Intervention" with Dee and Denis's cousin nicknamed "Gail The Snail"
* It's Always Sunny in Philadelphia episode "The Gang Wrestles For The Troops." Dennis, Mac and Charlie plan a match with grizzled wrestling veteran Da Maniac, but back out when they realize he actually plans on hurting them (with weapons) instead

of staging the fight. When Maniac gets arrested they sub in Rickety Cricket as the heel, and still seem to be planning to stage the fight before he starts legitimately kicking the shit out of them.
* It's Always Sunny in Philadelphia. Eventually he learns that "Froggy" was actually an imaginary friend he came up with to help cope with the experience.
* It's Always Sunny in Philadelphia fandom, mostly because of mutual Charlie Day presences.
* It's Always Sunny in Philadelphia features Heinz Kiessling's "Temptation Sensation".
* It's Always Sunny in Philadelphia for Charlie to have cut the brakes of the car they're all in.
* It's Always Sunny in Philadelphia Frank) and the most willing to take charge, which leads to him pulling the group down incredibly dumb paths.
* It's Always Sunny in Philadelphia, Frank appears and joins as the fifth member of "The Gang", which had previously consisted only of Dennis, Dee, Charlie and Mac. Frank has become a staple of the show.
* It's Always Sunny in Philadelphia Frank Reynolds names his club after his girlfriend Shadynasty (pronounced Shuh-Dynasty). A patron looks at the sign and wonders what "Shady Nasty" is.
* It's Always Sunny in Philadelphia, Frank Reynolds tries multiple times to commit suicide by hanging himself in the middle of the bar, while the rest of the Gang barely reacts to it and Dee just comments on how his neck is too thick for the rope to break it. Another episode involves Mac trying to perform a bridge-jumping stunt and everyone else naturally misinterpreting it.
* It's Always Sunny in Philadelphia Frank's character had goes off. Despite the head being missing and blood shooting from his neck, Charlie's character suggests they check his pulse to see if he's still alive.
* It's Always Sunny in Philadelphia given primarily to Charlie's rather tenuous grasp on literacy. Perhaps the most prominent example is the speech he writes for Dennis when the latter is running for city comptroller, which Dennis only reads out of frustration to prove his point.
* It's Always Sunny in Philadelphia: Given that the smarter members of the Gang also tend to be the bigger jerks, this is natural when characters pair up (though the "smart" and "nice" parts tend to be quite relative). For instance, if Mac and Charlie team up, Charlie tends to be the basically well-meaning one who is also barely functional, while Mac is smarter than Charlie but also more malicious and greedy. If Mac and Dennis team up, meanwhile, Mac tends to come across as stupid-but-has-a-moral-center, while Dennis is considerably cleverer but also a complete psychopath.
* It's Always Sunny in Philadelphia had a double montage of Dee and Charlie both training for their fights and taking copious amounts of steroids.
* It's Always Sunny in Philadelphia" has a British colonel's head explode when the 18th-century version of Frank accidentally fires a musket at his head from three feet away.
* It's Always Sunny in Philadelphia has a huge amount of female fans, most of whom like to ship Mac and Dennis together.
* It's Always Sunny in Philadelphia has an entire episode of this, appropriately titled "Dennis and Dee's Mom is Dead".
* It's Always Sunny in Philadelphia has an episode titled, "Mac Bangs Dennis' Mom." Guess what happens.
* It's Always Sunny in Philadelphia has "an extensive history of felonious behavior" and multiple bench warrants for "sexual misconduct". As a teenager, he was accused of statutory rape and in college, he would "take the tip of [his] penis and stick it in a guy's mouth for, like, just a second...while he was sleeping." Even his friends refer to his actions as rape on multiple occasions.
* It's Always Sunny in Philadelphia, has been caught masturbating several times.
* It's Always Sunny in Philadelphia has Charlie, especially when Mac and Dennis attempt to train him to box by breaking things (chairs, bottles) over his head.
* It's Always Sunny in Philadelphia has Mac storming into Paddy's announcing that

he'd just been interviewed by the local news station as an eye-witness to a traffic accident and "went off" on an epic tirade. He's enraged to find out that his rant was cut down to a fleeting sound-bite.
* It's Always Sunny in Philadelphia has the entire gang show up to contest some parking tickets by telling an episode-long explanation for why they got the tickets. During the proceedings, Charlie makes another stab at acting like a lawyer and treats it like an important trial. In the end, their supposed defense has them admitting to a number of much worse crimes than the ticket they're fighting, so they simply pay the fine.
* It's Always Sunny in Philadelphia. He actually does land on the mattress. He just bounces off and lands on the street a couple of feet below, still managing to hurt himself.
* It's Always Sunny in Philadelphia). He fits the trope pretty well besides that, he's certainly not as flashy as the personas of the rest of the guys and he ends up winning the entire bout by throwing a metal trash can at his opponent (the edge of which knicks the other wrestler's jugular and he passes out from blood loss).
* It's Always Sunny in Philadelphia. He meets a guy named Jan with a vaguely German/Dutch accent who is only ever described, by himself or others, as "European".
* It's Always Sunny in Philadelphia His; black suede with red inner lining, red soles, and a white foxing stripe, which are occasionally shown off when he puts his feet up. Somewhat subverted as they appear to be Charlie's only shoes, appearing in every episode and really show it, with the sole textures wearing down, and large holes creeping up in the worn out heels as time goes on.
* It's Always Sunny in Philadelphia. His instructions to Dee: "continue being useless."
* It's Always Sunny in Philadelphia hurt'' after the gang got in a car accident. The camera then pans over to an unnamed character who was with the group at the time lying in a full body cast in a hospital bed calling them jerks.
* It's Always Sunny in Philadelphia: In "CharDee MacDennis: The Game of Games", the gang explains that they always have to nail the playing board down to the bar counter because at some point Mac will get angry that he's losing and try to flip the board over. Mac admits that it's "for the best." Sure enough, toward the end of the game, Mac goes into a rage and tries to flip the board over.
* It's Always Sunny in Philadelphia, in the episode "Sweet Dee Has A Heart Attack." Dee is extremely casual about the matter, and the guys don't notice that anything is wrong until she collapses.
* It's Always Sunny in Philadelphia in the episode "The Gang Tries Desperately to Win an Award". The main characters want to revitalize their bar to win an award (the allegory being that the "bar" is their TV show, competing against other shows for critical praise). They discuss getting some minorities in, but stress that they can't have more than three, because then it would turn into a "black bar".
* It's Always Sunny in Philadelphia: In "The High School Reunion: Part 1", in order to fit in with the popular crowd, Dee helps Tim Murphy give Charlie, Frank, and Mac hanging wedgies. In part 2, "The Gang's Revenge", they get back at Dee by giving her a massive thong wedgie.
* It's Always Sunny in Philadelphia into something funny and palatable.
* It's Always Sunny in Philadelphia introduces an employee ranking system:
* It's Always Sunny in Philadelphia is just as liable to have her leg broken by homeless people, or her face smashed in by a metal folding chair as the rest of the guys, and has been poisoned the most out of them all. Frank intentionally threw a match into a building full of kerosene while Dee was inside, setting her on fire for a fake news story.
* It's Always Sunny in Philadelphia is made of this trope, which the main characters being malignant narcissists who have to interact with normal people.
* It's Always Sunny in Philadelphia is this, relative to the rest of the group. He frequently proves himself to be the only member of the group who can function in certain social situations, though he is hardly a social person.
* It's Always Sunny in Philadelphia is to have the gang talking to each other about

how poorly they expect a meeting with someone to go, then reveal that they are talking about it in the middle of the meeting, and the other person has heard everything.
* It's Always Sunny in Philadelphia" ("It Never Rains in Philadelphia").
* It's Always Sunny in Philadelphia just helps further add to the panicked hurriedness of it all.
* It's Always Sunny in Philadelphia leads to Frank and Dee (father and daughter mind you) almost getting married just to keep up the lie that they were in a relationship in order to scam some money.
* It's Always Sunny in Philadelphia. Mac admits that it's for the best and will forget that board is nailed down later in the game. True enough, he does try to flip the board, but is unable to do so.
* It's Always Sunny in Philadelphia: Mac and Charlie believe that “Psycho Pete,” the former leader of their “Freight Train gang”, killed and ate his parents for dinner and was institutionalized. This turns out to be something they made up entirely. He was actually there for extreme social anxiety, which he still suffers from.
* It's Always Sunny in Philadelphia, Mac and Charlie have been friends since childhood.
* It's Always Sunny in Philadelphia, Mac and Charlie try to fake their deaths by blowing up a car. First they run it into a wall, but it doesn't explode. Then they go to a pawn shop and buy a gun and a grenade. They toss the grenade into the car expecting a mammoth explosion, but it releases little more than a puff of smoke. Thoroughly disappointed, Mac does some poppers and tries shooting the gas tank, but even that does nothing. They ultimately give up, reasoning that the damage is enough to convince everyone that they were vaporized.
* It's Always Sunny in Philadelphia, Mac and Dee continually name states like "West Dakota", much to Frank's amusement.
* It's Always Sunny in Philadelphia: Mac, Dee, and Dennis play hot potato with the smart ball, taking turns being the reasonable one in different episodes.
* It's Always Sunny in Philadelphia, Mac eats Dee's contract certifying that she owns all proceeds from sales of Paddy's Pub merchandise, allowing him and the other members of the Gang to make money from Paddy's Pub products. At the end of the episode, after the Gang gets tricked by the Lawyer into signing a restraining order, Mac eats the order, but the Lawyer is wise to his tricks and has made hundreds of copies of the document.
* It's Always Sunny in Philadelphia Mac gets a chance to hit a possible goal shot at a Flyers game. We see him hit the ice, get to center rink, hit a goal that rips the net, the announcers hailing it as the best shot they've ever seen and the crowd chanting his name. The chanting turns out to be Charlie calling Mac's name as Mac (who's never skated in his life) took one step on the ice, fell and knocked himself unconscious to massive laughter.
* Its Always Sunnyin Philadelphia Mac has a cousin who's gay but straight gay in "Mac Day"
* It's Always Sunny in Philadelphia. Mac is in a hurry to get to a movie, sees a motorbike parked at the side of the road, quickly pulls on a helmet, gets on and revs it... only to realize that he has no clue how to drive a motorcycle and abandoning it in the middle of the road.
* It's Always Sunny in Philadelphia: Mac keeps calling everyone a jabroni.
* It's Always Sunny in Philadelphia makes home porn videos. Without the women's knowledge. And they all focus on him.
* It's Always Sunny in Philadelphia moves out to Philadelphia to film every season.
* It's Always Sunny in Philadelphia not only has a Yiddish last name, but also speaks completely unaccented American English. While there are a few natural-born Israelis who can do this (usually American-educated or born to American parents), the obviously non-Israeli actor hardly portrayed a typical person from Israel.
* It's Always Sunny in Philadelphia: Parodies the longcoat on several occasions.
* It's Always Sunny in Philadelphia: Part of Frank's backstory is that he got sent upstate to a "nitwit school" after getting scrambled by questions from a

psychologist. He eventually gets out with a certificate declaring him not having "donkey brains".
* It's Always Sunny in Philadelphia picks up fish & chips for the gang, but is blocked from going back into Paddy's because a suicide jumper is on their roof. He's continuously seen noshing on the food as he schemes to get past the emergency workers and the news crew, until he finally makes it back in with an empty bag:
* It's Always Sunny in Philadelphia saying that it would be cool to adopt the lifestyle of a hobo "travelling from town to town solving mysteries" but that it would be impractical.
* It's Always Sunny in Philadelphia shows Frank (Danny Devito) in a restaurant openly leering at a waitress played by Danny Devito and Rhea Perlman's real-life daughter.
* It's Always Sunny in Philadelphia signed on, and the show quickly became one of FX's biggest shows.
* It's Always Sunny in Philadelphia's second season opener "Charlie Gets Crippled". Frank tells Dennis and Dee that their mother is dead, only to say that they are just getting a divorce. When asked why he would say this, he replies "That's a business tactic. You drop the bomb, then you soften the blow. You never tried this?"
* It's Always Sunny in Philadelphia stomping around and making audible noise.
* It's Always Sunny in Philadelphia-style game show, Frank gives the answer "Pigs" to the question "Animals that We Eat but Doesn't Eat Us". Despite being accepted as a correct answer, he later asks to undo his answers upon remembering that he has seen "many pigs eat many men".
* It's Always Sunny in Philadelphia: Sunny subverts this Trobe by having every member of the gang think that they're the leader and insist so on multiple occasions. When they aren't arguing over who concocted a plan or who's 'the brains' Dennis is usually considered the charismatic leader.
* It's Always Sunny in Philadelphia" that they use as their typical hangout to plan out whatever idiotic schemes they're pulling for the episode and has often been the scene of various horrifying carnage and chaos.
* It's Always Sunny in Philadelphia: The entire main cast (and a number of the recurring cast) fall into this to varying degrees, as the premise of the show being that they’re all self-deluded, idiotic degenerates.
* It's Always Sunny in Philadelphia: The Gang are a loathsome and despicable bunch, but their crazy antics are always hilarious to watch.
* It's Always Sunny in Philadelphia: "The Gang Cracks the Liberty Bell"
* It's Always Sunny in Philadelphia, The Gang has a board game they created called CharDee MacDennis; cheating is punishable if caught, but still highly encouraged.
* It's Always Sunny in Philadelphia the gang is concerned that the patronage of Paddy's by African-Americans is less than nil. To solve this problem, they ask Sweet Dee's friend (who is black) to recommend the bar to his "friends." The man turns out to be gay and turns the bar into the hottest gay bar in Phily. Charlie is happy because of the increased business, and Dennis is happy for all the attention and tips he now receives. On the other hand, Dee is unhappy because she no longer gets tips, and Mac is unhappy because there are no girls to hit on.
* It's Always Sunny in Philadelphia. The gang is putting on a musical Charlie wrote and he casts Mac in the lead role. Dennis and Mac end up switching parts forcing Dennis and his sister Dee to play romantic partners. They end up cutting their romantic kiss down to a firm hug because of it.
* It's Always Sunny in Philadelphia, the gang tries to film a fake a news story in which they rescue kittens. One of their attempts has them try to construct a conveyor belt that leads to Charlie chopping enthusiastically with a butcher knife. After trying it out with a stuffed animal, the gang realizes that it's too obvious that they're the ones imperiling the kittens in the first place.
* It's Always Sunny in Philadelphia (the main ensemble cast includes a gay male character, subject matter includes coming out story)
* It's Always Sunny in Philadelphia", the McPoyles make the gang put on their signature bathrobes and briefs (in Dee's case it's an oversized Garfield t-shirt)

because "it's far too obvious who the hostages are in this situation".
* It's Always Sunny in Philadelphia the ones doing the hunting, they intend only to humiliate their quarry by doing something involving testicles (they spend the episode arguing over just what).
* It's Always Sunny in Philadelphia: The psychotically narcissistic Dennis has been known to wear one, as well as makeup. It backfires when a woman he's trying to seduce notices and assumes he's gay.
* It's Always Sunny in Philadelphia They promptly fire him and suffer no ill effects for doing so.
* It's Always Sunny in Philadelphia they want to his corpse when he's dead. At the time, he's mike'd and backstage at a children's beauty pageant that he's hosting.
* It's Always Sunny in Philadelphia. Things somehow get even weirder the second time he shows up.
* It's Always Sunny in Philadelphia to fulfill this fantasy of his and live up to his claims.
* It's Always Sunny in Philadelphia trope, only for Kaitlin Olson to grow bored with the character and campaign for more comedic scenes. Starting somewhere in the first season, Dee has become just as depraved as the rest of the gang.
* It's Always Sunny in Philadelphia, turning the show into a big hit with both audiences and critics.
* It's Always Sunny in Philadelphia uses this when Frank tries to make people think he's a veteran.
* It's Always Sunny in Philadelphia. Usually, it's about 1/3 of a mildly okay joke before she chokes out on stage fright. In "The Gang Broke Dee", it notably improves after she suffers a bout of depression and channels it into her work, but then she gets (engineered) encouragement, the fame immediately goes to her head, and the entire routine devolves into her making stupid noises with her mouth and talking about her vagina.
* It's Always Sunny in Philadelphia was reportedly shot for $200, but Charlie Day has said they he has no idea where the number came from as there was no actual working budget at all.
* It's Always Sunny in Philadelphia wears a faceless spandex bodysuit.
* It's Always Sunny in Philadelphia were improvised on the spot. In later seasons he was paired more often with Dee because she was more able to roll with it without breaking on camera.
* It's Always Sunny in Philadelphia, when Charlie and Mac decide to fake their own deaths and wander the streets, one of the first things we see Charlie do is attempt to assemble a bindle stick and lament its limited carrying capacity.
* It's Always Sunny in Philadelphia when Charlie is given a pill by some scientists to enhance his intellect and is soon shown speaking Chinese. It turns out the "pill" was just a placebo and the real experiment was to see what happens when a dimwit thinks he's become a genius. When Charlie protests he knows Chinese, the Asian scientist reveals that Charlie has been simply speaking pure gibberish the entire time and he was playing along.
* It's Always Sunny in Philadelphia: When Dennis confronts Mac over having sex with his date, Mac lies about it, for maybe two seconds.
* It's Always Sunny in Philadelphia. Whenever the gang presents something they've filmed, it will ultimately end in a series of snippets they recorded in previous episodes. It begins with a callback to "Frank Sets Sweet Dee On Fire" in the episode "Paddy's Pub: Home Of The Original Kitten Mittens". Later episodes even include brief cuts of Charlie and Mac's Fight Milk Ad, Mac's Project Badass stunts, Dee's Irish Leprechaun impression, and Dennis's Election ad.
* It's Always Sunny in Philadelphia when initially developed. The final title was developed as another working title, but they couldn't think of a better one so they just left it.
* It's Always Sunny in Philadelphia when Mac and Charlie try to fake their own deaths by creating a goodbye video and then trying to blow up the car they said they were in. They try speeding into a brick wall, shooting the gas tank of the car and even using a grenade to blow up the car, but nothing works.

* It's Always Sunny in Philadelphia when Mac and Charlie want to fake their deaths. They leave a few of Charlie's teeth in a car. This is not how it works.
* It's Always Sunny in Philadelphia when someone says something stupid to him and it seems like he's about to criticize them, but instead he goes right along with it.
* It's Always Sunny in Philadelphia: When the gang cracks the Liberty Bell. "Don't worry, dude, we're gonna tar and feather the shit out of her later, bro." "Nayeth."
* It's Always Sunny in Philadelphia when the gang is trying to figure out who keeps pooping in Charlie and Frank's bed. At the end of the episode, Artemis gives a long summation showing that each member of the gang is guilty. Frank then denies the story and admits that he did it all, because "poop is funny." He even pooped on the floor while Artemis was making her summation.
* It's Always Sunny in Philadelphia where Charlie and Dee believe they've accidentally eaten human meat and start experiencing "the hunger".
* It's Always Sunny in Philadelphia who kills rats for a living, get higher ratings than him.
* It's Always Sunny in Philadelphia with Dennis. On the audio commentary, the gang notes how adding a banana to a scene is instant comedy.
* It's Always Sunny in Philadelphia within the group, it usually gets glossed over or played for laughs. In one episode, Dee's recently bought car was stolen by a young hitchhiker, but this one was partially on her because she picked him up and let him drive the car at ease so she could play a drinking game with Mac and Frank.
* It's Always Sunny in Philadelphia: With very rare exceptions, just about anything any of the main cast tries doing is going to end up failing miserably. The prominent of these is Charlie's crush on the unnamed Waitress; no matter what he does she's never going to fall for him.
* "It's a Mad, Mad, Mad, Mad, Marge": After Homer faints into the Ark Ice Cream Bowl, Becky, noticing he's not breathing, gives Homer CPR to try to revive him only to have Marge think that she's a usurper the minute she arrived.
* It's a Mad, Mad, Mad, Mad World: Dingy Bell (Mickey Rooney) does this three times to Benjy Benjamin (Buddy Hackett).
* It's a Mad, Mad, Mad, Mad World, Dingy Bell (played by Mickey Rooney) wore these for the first 15 minutes of the movie. As the movie went on, he completely ditched them.
* It's a Mad, Mad, Mad, Mad World: During the climactic fire-ladder scene, Phil Silvers' character gets thrown though a window and into an actual Murphy bed.
* It's a Mad, Mad, Mad, Mad World for their mid-century flash, but especially Dick Shawn's '62 Dodge - as he furiously drives it while blubbering for his mama, he gets it airborne over a road dip.
* It's a Mad, Mad, Mad, Mad World has a banana peel joke in the final scene. Ethel Merman is the victim.
* It's a Mad, Mad, Mad, Mad World has cameos from most of the comic actors of the time.
* It's a Mad, Mad, Mad, Mad World in 1963 when it was considered proper for women and girls in First World societies to wear foundation garments, no matter their weight or build.
* It's a Mad, Mad, Mad, Mad World in that the cops are waiting for these people to lead them to the stolen money.) The main reason any of their charges would be dismissed: the judge is about to throw the book at Captain Culpeper, who has lost his pension, his wife is divorcing him, his mother-in-law is suing him for damages, and his daughter is filing to have her name changed.
* It's a Mad, Mad, Mad, Mad World is a snowballing cascade of mob chases, as more and more of Hollywood's top actors join in the fun.
* It's a Mad, Mad, Mad, Mad World is even caused by someone throwing a banana peel for her to fall!).
* It's a Mad, Mad, Mad, Mad World it happens before the start of the movie - a police detective reports that ex-con robber Smiler Grogan gave them the slip that way earlier in the morning while they were tailing him.
* It's a Mad, Mad, Mad, Mad World — Melville, trapped with his wife in a

hardware store basement, lights a long fuse on a small charge of dynamite on a door. The fuse goes out halfway, but ignites a crate of fireworks. Wondering why it hasn't gone off, Melville breaks cover at just the wrong time.
* It's a Mad, Mad, Mad, Mad World - police captain Culpepper learns his fleeing lead in an old robbery case was talking to a group of motorists before he died, and that he must have told them where he hid a fortune. He bets his chief that they'll turn south toward where he believes the loot is (and quickly collects). Further on, other guys in the squad room are wagering on which of these motorists will get there first, refusing to interfere with or assist any of them in the interest of fairness.
* It's a Mad, Mad, Mad, Mad World release clocks in at just over 3 hours and 17 minutes, a realistic length of time it would take to travel the 125 miles from Palm Springs to the Portuguese Bend (especially considering all the constant delays each character ends up having to deal with).
* It's a Mad, Mad, Mad, Mad World. Russell and Hawthorne fight each other after crashing the car that they were riding together in, but when Russell attempts to kick Hawthorne after knocking him to the ground, he hits his foot against a rock, causing him to hop in pain while holding his foot.
* It's a Mad, Mad, Mad, Mad World slips and injures herself, they can still muster up the humor to laugh at her.
* It's a Mad, Mad, Mad, Mad World: "Sure, but if we find the money, we still have to report the taxes. Otherwise its like stealing from the government!... Everybody has to pay taxes. Even businessmen, who lie and cheat and steal every day, even they have to pay taxes!"
* It's a Mad, Mad, Mad, Mad World tells of a group of motorists who learn of a hidden treasure and try to get to it before the others. Transportation includes cars, planes, and even bicycles.
* It's a Mad, Mad, Mad, Mad World that it was actually disappointing they didn't convene under a giant "W" to find the hidden diamond.
* It's a Mad, Mad, Mad, Mad World. The film depicts a group of strangers who hear the dying words of a man who tells them about a large amount of money buried under a giant "W". These strangers then race to the giant W to be the first to find the money and claim it for themselves. The people use cars, trucks, airplanes, and even bicycles to reach their goal.
* It's a Mad, Mad, Mad, Mad World, this is one of the many methods by which the Crumps attempt to escape from the hardware-store basement in which they have been accidentally locked.
* It's a Mad, Mad, Mad, Mad World too, though apparently it's a longer period (it even gets dark) and features one flashback.
* It's a Mad, Mad, Mad, Mad World uses this to demolish a gas station.
* It's a Mad, Mad, Mad, Mad World was one Long Delay after another. For example, Phil Silvers' character takes a shortcut on a dirt road at the advice of a local kid, only to find that the road goes through a river. He attempts to drive through anyway and loses his car.
* It's a Mad, Mad, Mad, Mad World when everyone is searching for the loot of the Cat Burglar.
* It's a Mad, Mad, Mad, Mad World when Jimmy Durante's character dies, his leg spasms - and kicks a bucket.
* It's a Mad, Mad, Mad, Mad World, with Mrs. Marcus threatening to leave the others with nothing; Otto Meyer trying to get an extra share after Lennie Pike tells him where it's located ;and Captain Culpeper, who plans to retire with Chief Aloysius telling him that the city is dead set against pension increases. Sadly, Culpeper was unaware that Chief Aloysius had blackmailed the mayor into tripling his pension, leading to Capt. Culpeper's arrest and forfeiture of his pension when he tries to take the loot for himself and the money falls into the crowd below.
* It's a major point in the older games that the Brotherhood didn't know about Super Mutants or the Enclave until very recently. Yet both of them have a presence in Appalachia. The Enclave were at least somewhat hidden (though it seems pretty weird that the Brotherhood wouldn't investigate their bunker), but the Mutants are

much more common and were explicitly in conflict with the Appalachian Brotherhood. So either the satellite communications that proved the basis of their entire religion and allegiance went down before even a single Super Mutant was done growing, or they did encounter them but never phoned back and went "Hey, Maxson, we just fought some muscular green people made by FEV. Wild, huh?"

When she goes on holiday with her best friend/sister, Phoebe, she ends up feeling like a third wheel as Phoebe practically ignores her. Eventually, Rosie falls for Phoebe's cousin, Jason, and starts dating him, one of the few things she does for herself... whereupon Phoebe accuses her of being selfish and putting Jason first, resulting in Phoebe's ill-thought out decision to move back with her mother. Rosie spends much of the time afterwards feeling guilty about this turn of events.

* It's a Wonderful Life: Besides his big blunder toward the end of the film, an earlier scene shows him with reminder strings tied on several different fingers, indicating that he is generally prone to forgetfulness.
* It's a Wonderful Life, but the audience doesn't find out what the other strings are for.
* It's a Wonderful Life by about four decades), but it's unclear if it had any meaning at that point, since it's winter in Bedford Falls and everyone outside is wearing overcoats. Clarence's winter coat is also much more mundane than the stylized trenchcoats utilized by later works.
* It's a Wonderful Life: During World War II, Harry becomes a naval fighter pilot, becoming an ace, and shooting down two kamikaze that were aiming for a transport full of troops, for which he is awarded the Medal of Honor. As Christmas approaches, he's coming back to Bedford Falls and the town is getting ready to throw him a hero's welcome.
* It's a Wonderful Life: Follows the "good humans become angels when they die" pattern. However, said humans have to work their way up through the ranks. Rookie angels don't have wings and must earn them by helping people. When they do, a bell somewhere on Earth rings; the movie originated the whole "every time a bell rings, an angel gets his wings" concept. Earning their wings seems to grant angels additional powers, including the ability to see into the past and future with concentration. In the most dramatic demonstration of angelic power, we see angels can change the course of history (temporarily) to make a point. The appearance of angels varies: one angel we see on Earth appears perfectly human (the missing wings help), but an earlier scene depicted him and his superiors as celestial bodies, e.g. stars and galaxies. (Though it's possible this is just a visual metaphor.)
* It's a Wonderful Life: George Bailey had an after school job at one as a kid that was also a drugstore. One of the important points in his life was stopping his boss from prescribing the wrong medication.
* It's a Wonderful Life: George Bailey has to be strong-armed into dancing with his friend's "kid sister" Mary at the graduation party, and reluctantly agrees only as a favor to his friend. Then he sees what Mary looks like now, and isn't reluctant anymore.
* It's a Wonderful Life. His superior angels describe him as having the IQ of a rabbit, but the faith of a child.
* It's a Wonderful Life is an interesting example. The present day timeline has many references to the war and how it affected daily life. However the fact that it showed Pottersville as being a seedy and decrepit place compared to the wholesome Bedford Falls actually made it out of place for 1946, and likely led to the film not being a hit at the time. Remember that in addition to having just lived through WWII Americans had spent the previous decade living through the Great Depression as well. As a result a fun place like Pottersville was much more appealing to the average American than a poor sleepy place like Bedford Falls.
* It's a Wonderful Life magazine, and even they complained that it was ultimately superficial and sentimental. However, after it was accidentally released into the public domain in 1974, it became a Christmas standard, and a new generation came to see it as a classic. In this case, it was repeated airings on broadcast stations, not basic cable, that brought the film its new status, but the principle is the

same.
* It's a Wonderful Life: Mary Hatch Bailey in the Pottersville version of the world without George. The intent was to show how worse off she was, but still, it's Donna Reed in glasses.
* It's a Wonderful Life Pottersville has more excitement and a superior economic infrastructure. Bedford Falls only has a moderate manufacturing economy and no obvious places to find excitement. Once the factory closes down, Bedford Falls will suffer depression and unemployment. Pottersville has backup industries, such as the nightclubs, that can encourage outside investment.

* It's a Wonderful Life. When George shows off the headline about his brother Harry winning the Medal of Honor, Ernie plays a joke by pretending to only notice the weather forecast ("Gonna snow again.").
* It's a Wonderful Life where everyone is horrifically depressed and morally bankrupt.
* It's A Wonderful Life! (with captalism), is told by the fairy that that greedy Bill Gates works in a bowling ball factory somewhere so win some, lose some, right?
* It's a Wonderful Life working at the library, which the film depicts as an unbearable, unspeakably awful situation, which George takes even worse than his brother's death and other much more terrible changes (probably for the understated reason of his children not existing in any form, even in Pottersville). Compare her fate in the original short story "The Greatest Gift," where she ended up married to an abusive alcoholic — something viewers in any decade would find horrifyingly tragic.
* It's a Wonderful Life young George and friends use the chain to save his brother from drowning in a frozen pond/lake when he falls through some thin ice.

According to the lore, they are naturally long-lived on the order of a lifespan of a few hundred years, they were magically granted immortality ten thousand years ago, and it was revoked less than a decade ago. After less than a decade, some are starting to show signs of age beyond where they left off; for example, Tyrande Whisperwind (leader of the night elves) was a young adult at the time of being granted immortality. In the game right now, she's developed fairly noticeable crow's feet, even though if she were to continue aging normally from where she left off, that shouldn't happen for centuries. It's left vague whether this is age catching up to the elves or simply the effects of stress(which they are under a lot of), however.
* It's been suggested that Grigori Rasputin, the Russian monk who gained access to the court of the Russian Empire by supposedly being able to treat the Tsar's hemophiliac son, hypnotized the boy to "cure" him whenever he was injured. Rasputin's hypnotic powers were in fact recounted by others, even hardened men like some of the Tsar's ministers. Either Peter Stolypin or Sergius Witte who later recounted Rasputin's attempt to hypnotize him, which was very nearly successful.

"A pair of Hopalong boots and a pistol that shoots is the wish of Barney and Ben." Setting aside the fact that very few children have been named "Barney" since the 1960s (the name "Ben", while still relatively common, is not as popular as it was at the time), a pistol would not be an appropriate Christmas gift for little boys in this day and age. Also, how many people singing the song these days even know what "Hopalong boots"

* It's common for at least some football (soccer) players to remove their shirts after scoring and before leaving the field at the end of a match. In the former case, this is mostly just a demonstration of excitement, though it's sometimes a method of conveying a message through a slogan tee underneath of varying solemnity (Andres Iniesta, for instance, used it to pay tribute to a friend of his, who had tragically died of a sudden heart attack during a match), and it invariably attracts a yellow card (caution) from the referee. In the latter case, originally, this was done to honour the long-standing tradition of swapping shirts, particular after international or high-profile games. Although there's still an element of this, nowadays it's more of an excuse for physically fit, tired and overheated young men to

* It's common for some drivers to practice on NASCAR games to get an idea of the track more so for drivers who have never been on that track before in their career. Given that drivers get very limited practice time on the actual tracks prior to a race (and contrary to what most non-fans believe, NASCAR tracks are not all identical ovals), this is genuinely useful.
* It's common in a lot of pre-1970s stories dealing with space exploration that the expedition crews are often all male and predominantly if not entirely white and American.
* It's common in season previews to treat the last champion that retained its core players with "anything less than a repeat will be a disappointment for fans".
* It's commonly accepted (well, in America, at least) that if you, a male, go into a bathroom and it's empty, you take the urinal farthest from the door or the stall. If another person comes in while you're still using the urinal, they take the one farthest from you or at least take a urinal that leaves a urinal between you. Talking or touching is not accepted, even if you're drunk; you must stare directly ahead and keep quiet. The rule is so strong that lineups sometimes form for urinals even when some are free because the free ones are between two occupied ones, though some bathrooms have mini-walls between the urinals to counteract this.

* It's commonly thought that the expression "Luck of the Irish" refers to how lucky the Irish are. It's actually a joke among the Irish about how unlucky they are. Their country's had a very long history of violence and occupation, and then they faced huge amounts of discrimination as immigrants in America.

* It's commonly thought that the name of Maka's unseen mother is "Kami" because one translation group mistook part of the Japanese word for "wife" which her ex-husband Spirit used in reference to her, for her name. In actuality, her name is never given.
* It's common practice to design cards so powerful they are too dangerous to be used. They have to be locked up and kept out of the wrong hands to give the protagonist and company something to fight for.
* It's common to do this with passwords in order to include a letter or special character while keeping it easy-to-remember. It's advised not to do this, though, as most brute-force password-guessing algorithms are aware of the tendency and will go ahead and try swapping (for example) "@"s for "a"s and "1"s for "I"s when attempting to guess your password.
* It's common to hear arguments that something isn't racist/sexist/etc. because they heard a few select people of that race/sex/etc. say they didn't think it was. * It's difficult for the protagonist and anyone else from Chaldea to separate the alternate, singularity-summoned Servants from the ones they know from Chaldea or even previous singularities, as they are often identical except for the immediate circumstances of the singularity. The protagonist alone has to separate their feelings for Camelot's Mordred from London's, Agartha's Dahut from Chaldea's Drake, and Shimousa's corrupted Heroic Spirit Swordmasters Shuten and Raikou from Chaldea's counterparts, hesitating on how to treat these villainous incarnations and wondering if there's anything left of the person they knew. Shimousa, in particular, focuses on this trope, as before and after the pseudo-singularity Chaldea's Servants worry about the Master's health, and several of them apologize for their

* It's disputed how true this is, but many of the Polish pilots in the Battle of Britain. Prone to recklessness and spamming the radio with discussions in Polish on the parentage of their German opponents (who they, for obvious reasons, loathed), they were responsible for 12% of the Luftwaffe kills in that battle, despite being only 5% of the pilots. The RAF handbook was often ignored even by British pilots. For example, the rules stated that machine guns' should be zeroed (that is, the bullets would cross the path of the guns from the other wing) at 600m to allow newbie pilots to attack from a safe distance. But to be most effective, it needed to be at 200m, so many pilots from different nations changed them.
* It's disturbing how easy it is to falsify printed material, and how often people don't question it simply because they're ignorant of technology.
* It's disturbing to plenty of Christians as well, since the song was written by a member of an extremely heterodox sect that believed Jesus had his Second Coming in the form of the Union Army during the American Civil War. This seriously raises the octane level in the nightmare fuel when one considers that the song shows up in mainstream hymnals.

* It's downplayed in his first major League loss after he lost his top 16 match to Ritchie. He wasn't upset that Ritchie beat him so much as he was that he got eliminated after coming so far (Team Rocket kidnapping him and forcing him to fight under a handicap didn't help matters). His friends called him out on this attitude, noting he had mostly been scooting by on just pure luck alone, and his attempts to battle with his particularly stubborn and disobedient Charizard as a last-ditch effort showed how little time he took in trying to get the big lug back to helping him. Later Leagues show him as getting visibly crushed upon defeat, but he doesn't take the losses nearly as hard, and is respectful enough to congratulate those who defeated him.
* It's downplayed with Sgt. Kinchloe (played by Ivan Dixon), as he's more than the radio expert — he's second-in-command. He also has at least three episodes showcasing him, and his role was prominent enough that the practice of cutting out the black characters for the "Southern Version" (practiced up to the late 1960's) wasn't usually possible.

When it comes to the written form, it's people who are diligent about including the ʻokina in applicable words, given that the ʻokina is considered part of the Hawaiian alphabet, meaning that the state is properly spelled "Hawaiʻi". Verbally, they account for the glottal stop the ʻokina represents (similar to the way "tt" is pronounced in a Cockney pronunciation of the word "bottle"), and they pronounce Ws as Vs in Hawaiian words. * It seems Dr. Cox is the distributor of cool and unusual punishments; at one point he made Keith check the countertop's heartbeat for two hours. JD then relates the story of Dr. Cox making him give every air conditioning duct in the hospital a papsmear. Dr. Cox also once made all his interns stand in a corner for saying "let's rock and roll." JD says it a few moments later, with predictable results (despite him being an Attending at the time.)

* It seems like Sun's skill is less knowing what plants can do and more being able to figure out the name of a plant by looking at it — something that she could have picked up from books. It doesn't take a genius to know that eucalyptus is the active ingredient in Vicks
* It seems like The Doctor has one of these; he'll ride anything, including horses, cars (any time period), space-cruise liners and spaceships. It should be mentioned that he needed to take a test to learn how to fly the TARDIS, and he failed. This is all partly justified because in 900 years of life, you probably get the hang of these things.

* It's especially noticeable in the show, as Book Sansa is a fairly normal-sized twelve-year-old while Show Sansa is 179 cm. Of course, Show Tyrion (135 cm) is taller than Book Tyrion (a little under 1.2 m), but not enough to make up the difference.
* It's especially obvious when he blushes during his fight with Gon in episode 5 of the 2011 anime remake and compliments Gon on how strong he is and how he loves his facial expressions.
* It's especially prevalent in elections where an unpopular candidate has a chance of winning. For example, during the highly contentious 2020 US Presidential election, it became common on social media for people to write (paraphrased) "a vote for no candidate is a vote for

* It's especially weird in the anime-Train smashes Creed's, er, sword with his gun, and Creed lies there mumbling, "That's it… it's shocking…" with tears in his eyes. Train seems incredibly creeped out by this response.
* It's essentially an open secret that Joseph Gribble is the product of his mother Nancy having an affair with John Redcorn. The only people not aware are Joseph himself and his "father" Dale. The episode revealing this showed that Peggy Hill didn't know either, but Hank never told her because he figured it was so blatantly obvious he didn't have to say anything. Nobody tells them because it would destroy the Gribble family. Notably, later on in the series Dale comes to the conclusion that aliens impregnated Nancy...with his own sperm, in order to produce a race of super-warriors. Hank decides to let him believe this. In another episode Dale tells Hank that Bill's girlfriend's daughter shares DNA with his son...and just as Hank thinks he's figured out the truth, Dale concludes that the girl is
* It's established Indians were the first to use elephants in war, as Indian elephants were more controllable than their African counterparts. Many Indian kingdoms used alcohol and other intoxicants to get the elephants
* It's established in the movie that the government re-educates the prisoners while they are frozen. That's how Spartan learns to knit and how Phoenix learns to super-hack, and also to be programmed not to harm his new boss.
* It's established that all orc-human hybrids in this universe suffer this to some extant. They have a tendency to slip into a berserker rage if they lose control of their tempers (its all part of the Orc-God's plan to breed a super-warrior to conquer the world in his name).
* It's established that by Capt. Jack Harkness' time (the 51st century)

* It's even better than that: when Homer first goes to steal the car, he finds that Snake is already on the job. So Homer pulls Snake from the car, throws him to the ground, and steals the car himself.
* It's even better when Naruto returns from a deadly battle with Pain and the ENTIRE VILLAGE—the vast majority of whom have hated him his entire life for something he didn't do—cheers his return. He also earns a hug from his crush, who previously considered him an annoying friend. That particular moment is lessened because Naruto did not hug her back, which, in retrospect,
* It's even caused by eating brains! However, the actual symptoms of Kuru are only superficially "zombification". Spread by consuming the body of someone with the disease, Kuru causes the victim to slowly lose co-ordination and muscle control until they can't even sit upright without assistance, eventually killing them through malnutrition (they often lose the ability to swallow) and secondary infections. It also has an incubation period of around a decade, and is totally incurable.

* It's even lampshaded in an entry detailing how a Chinese Army unit was up against a horde of zombies, but put them down quickly and efficiently from long

range with their snipers, never realizing they were zombies. The Chinese snipers were trained to
* It's even lampshaded with the hat called Ze Goggles, where the "description" is simply "
* It's even made an appearance in Japanese porn, as an elaborate restaurant set with obsessively detailed uniforms for the young ladies involved to wear (or not wear, as the case may be).
* It's even mentioned as being part of the Kyoto Group (the main benefactor for all the Japanese rebellion factions) main motivation for funding so many groups. Lelouch forces them to pledge their complete allegiance to him, by which anything other than minor resistance factions have been rolled into the Black Knights.
* It's even mentioned in one of the RPG sourcebooks, the West End Games Rebel Alliance Sourcebook, if not mistaken, that fighting enemy ships that appear to be "upside down" or at other odd angles just isn't comfortable for most species, so

* It's even more noticeable with the Dothraki horde of a dozen... um "40,000" Dothraki, to the point that one has to assume the most important members of it ride some considerable distance away from the rest.
* It's even more pronounced in "Castle Mane-ia", which subjects nearly the entire cast to a string of Scooby-Doo-esque disasters. Naturally, Rarity, the girliest pony of the bunch,
* It's even observable with toys. Given the same material and proportions, a smaller doll or action figure will generally hold an awkward pose — one which puts frictional stress on the joints,
* It's even on her character sheet!) However, between Hayate, Maria and the SP's... she doesn't get many chances to display it because everyone knows not to leave her alone. If she is left alone, she gets lost in short order.
* It's even possible for this to happen if a shopper happens to be wearing a nametag (or even a novelty t-shirt with a humorous nametag printed on it), even when the clothes do not resemble the actual uniform in any way. Or just clothes that look like
* It's even possible to fudge the fruit the juice comes from. Many fruit juices be labeled things like "apricot nectar", "pear cocktail", "lemon drink", "blueberry punch", or "cherry blend". They consist of as little of the top-billed ingredient as legally possible (usually in the form of pulp), large amounts of filler juices (usually apple or white grape), lots of water, and sugar or other sweeteners. But sometimes
* It's even stranger when you consider that this impossibly advanced race is genetically
* It's even taken to its logical conclusion by Shadow-based fast-food restaurant The Prancing Pony. Their kid's meal comes with a choice of magical toy: A temporary tattoo (which gives the wearer a boost in a skill... but just a little one) or a wind-up familiar. The wind-up familiars are basically miniature clockwork golems, mass-produced for the franchise. Completely harmless, but darned useful...
* It's eventually expanded by, naturally, the Star Wars Expanded Universe. Naboo elects a new monarch every four years, the monarch is meant to represent the innocence of humanity and as such is often very young, which explains why Amidala was queen at age 14. Also, the monarch is usually given a new post when their time to reign is over, monarchs are allowed only two terms, with Padme Amidala becoming the galactic senator for her planet after her reign as Queen. Apparently, they tried to change this rule to permit Padmé more time in office, but she declined.
* It's eventually mostly subverted: this was the story the people in New Los Angeles were led
* It's eventually pretty clear that this is as much about Marshall as Lily in that Marshall has very straightforward feelings and values; if he got seduced it would

threaten their relationship forever, and Lily

* It's eventually revealed that a good chunk of the Freelancer Agents went rogue, either after finding out the higher ups tortured the Alpha A.I. into insanity or being screwed over by them.
* It's eventually revealed that Beast of Gevaudan required very specific methods to kill it, including a silver spear-tip.
* It's eventually revealed that Bloom was the original choice to be Sky's arranged bride, but after her presumed death during the Ancestral Witches' attack on Domino, Diaspro was selected instead, meaning Bloom is technically this trope. Bloom and Sky are also this within the pacing of the show, Sky is the first guy to show interest in Bloom when she meets the four sophomore Specialists.

* It's even worse if you consider the epilogue by Ben Johnson, which often is not included due to being a later addition. You see, there's a framing device in the play where a drunk is taken off of the street, dressed up like royalty, and shown the production of the play, all for the amusement of a nobleman. The epilogue shows that the drunk passes out, is put back in his own clothes, and left on the streets again. When he wakes up, he decides that it was all a dream and decides to use the tale of Kate and Petruchio as a lesson on how to deal with his own shrewish wife. Yeah...

* It's explained in the episode where Brannigan first appears that he defeated an army of killbots by discovering they had a built-in kill limit, so he threw "wave after wave" of his own men at them until they hit the limit and shut down. He later offers to put "wave after wave of men at your disposal," which prompts an unseen voice in his crew (who hear him saying this) to shout "You suck!"
* It's explained in the expanded universe that "Basic" is the human language, and because of demographics, the common interspecies language. However, some non-humans can understand basic but not speak it. Inverted in one of the Expanded Universe novels when Leia goes to Kashyyyk and has difficultly understanding the Wookiees, aside from one, a professional greeter who explains rather sheepishly that he has a speech impediment which makes it easier for "Basic Speakers" to understand. The Greek alphabet also appears in various instances in the EU. The appearance of Greek

letters in-universe was eventually explained as being called the Tionese alphabet (Tion being a planet that already existed in SW lore and was of some significance at some point in the galaxy's history).
* It's explained that because the Dominion views their soldiers as expendable, their energy shields are disproportionately focused on the sides of the ship that would face the enemy when they're
* It's explained that the three continents of Hyperion are more properly called Creighton, Allensen, and Lopez, after three mid-level bureaucrats in the Survey Service. Everybody just calls them Equus, Ursa, and Aquila after the animals they're shaped like instead. (A theme which is carried on in several locations on the planet, like the Bridle Range, Horse's Eye, Cat Key, Felix, etc.)

* It's fairly easy to trace when the show started to be truly run by people who were big fans when they were younger. Once they did, you began to see things like Homer having all the skin completely ripped off his torso, leaving his bones and organs visible, and shrugging it off and going about his business. Things like this made no sense for an episode of the show from early on... but it's

* It's frequently mentioned that Krillin forgets to use his Kienzan attack that slices through anything whenever it would be useful, only to have others (usually Gohan) point out instances where he could have used it better. In the
* It's frequently pointed out in later seasons of SG-1 and Atlantis that the IOA, when faced with a difficult decision, will deliberate until after the deadline so that someone else can make the decision and they can criticize it. While the operating principle behind the IOA is sound (civilian oversight of military operations), they are so incredibly ineffectual as to be criminally negligent.
* It's frequently suggested, half-jokingly, that the position of Defence Against the Dark Arts teacher must be cursed since no DADA professor ever lasts more than one school year. The reader isn't invited to take this very seriously — until Book 6 when Dumbledore reveals that it actually was cursed by Voldemort.

* It's Garry Shandling's Show, Garry failed the written portion of his driver's license renewal test. Upset with his brain for being so stupid, he hooks a camera up to his TV and points it into his head so he can see his brain. The screen reveals a fat guy (character actor Stuart Pankin) lying in a hammock, who berates Garry for not challenging him enough, and they make a deal with each other: Garry will stimulate his brain more, and the brain will work with him. While they have this conversation, other body parts come to visit the brain, including a short, bald man referred to as "Mr. P" (pancreas) and his larynx (Dave Coulier), with whom he argues.
* It's Garry Shandling's Show lives "inside" his house. As such, an Aside Glance from Garry often doesn't stop there, and leads to him giving snarky commentary straight to the audience mid-scene.

* It's generally accepted by psychologists that, when people recall episodic memories, they can experience them either in a field perspective (1st person) or in an observer perspective (3rd person). The latter is possible because memories are reconstructed upon retrieval rather than preserved exactly how they were experienced. Especially if they were preserved in photographs or video tapes, mostly the latter. When you reconstruct it upon retrieval through the tape, you remember it through the camera's perspective.
* It's generally accepted that Bong and his rival, Major Thomas Buchanan McGuire (38 confirmed kills), both shot down well over 40 aircraft, and that it's impossible to say who really had the higher score. McGuire died because he was so impatient to catch up with Bong that he took a significant risk during his last battle. About to be pulled from active service too (Bong had already returned to the States), he wanted to make the most of his final mission, so he didn't drop his external tanks before attacking a lone Japanese Nakajima Ki-43 Hayabusa fighter; this would enable him to continue on the flight and find more enemies to shoot down. Unfortunately, the Japanese pilot, Akira Sugimoto, was an ace himself with some 3,000 flight hours on Hayabusa, and McGuire, too low and encumbered by his drop tanks, crashed into the jungle.
* It's generally accepted these days to present Mycroft Holmes and the Diogenes Club as some sort of cover organization or outpost of the British secret service. This is largely an invention of later pastiches. Aside from a few hints that Mycroft's job in the British government is a bit more extensive than he likes to admit ("on certain occasions he

* It's generally advantageous to attack an enemy from behind when you can, since they can't parry attacks from behind or hit you with frontal cone abilities, and some enemies are completely immune to frontal attacks. Dragons and other similar creatures are the exception, since they can tail lash people who attack from behind, so the only solution is to attack from the side.

* It's hard to remember how young the children and teenagers are in this manga. Ichigo, Sado, Orihime and Uryuu start off as fifteen year olds, but are far more mature than their age wound indicate. Some of their classmates are the same, such as Tatsuki. Their Shinigami peers are the same: Renji, Rukia, Kira, Hinamori, Ganju, etc., are all teens but behave like adults.
* It's hard to say for certain that Kornada in is this, but at no point has he ever acknowledged or even appeared to consider how much harm his actions have caused. He simply wants more money, and he'll do whatever it takes to get that money, whether it's firing someone so he can retroactively blame them for sabotage if things go wrong, or leaving someone to drown rather than taking the time to save her, or destroying the minds of millions of robots as part of a plan to steal their funds. It's not that he's good, either — he's never done anything to help someone that hasn't benefited him — but the concept of good and evil seems above his capacity to comprehend. The only distinctions he makes are fair and unfair, and it's only unfair if someone else has something he doesn't.

* It's hard to tell how old Sable is. It's implied she's of similar age to the (apparently) middle aged Tom Nook, but she doesn't seem that old. There is a ten year age gap between her and Mabel. Sable is vaguely anywhere from her early thirties to somewhere in her forties.
* It's hard to tell how old Sooty, Sweep, and Soo are. They're all the same size, but Soo acts considerably more responsible than the other two, who behave like rambunctious children, but they could just be rambunctious, irresponsible adults. In one episode, Sweep's identical twin brother Swoop comes over to visit by himself, followed by his parents and two cousins (Swap and Swipe) who all seem to be the same size. In another episode, Soo pretends to be pregnant and Matthew is actually fooled, suggesting she is fully grown.

As they're getting ready to leave town, they explain that Malcolm will stay the weekend at Stevie's house, Reese will visit Ida, and Dewey will be babysat by Craig, and Reese asks why they can't stay together at the house. This is good, and bad, because if Chaos is destroyed, our universe and the Warp will not become one, but the Necrons will eat most life in the galaxy and keep the rest around to breed new snacks (and then eat them again. Repeat for all eternity). If Chaos wins, the Necrons are no longer a threat but the Chaos Gods' plans continue.

* It's hinted that Matt had a crush on Misa while he was spying on her. Even though he thought she was about fourteen or so, she was five years older than him.
* Its hinted that while the Earth King is kept from knowing to make him a puppet, that many of the rest of the citizens don't know either. Brainwashing and control of information keep knowledge down, and constant fear makes those who do know too afraid to talk.
* It's Hot Inside the Bear Suit. The actors playing Humphrey are never credited.
* It should also be mentioned that another Duardin faction, the Dispossessed, essentially continue the original Dwarfs faction normally but it is mentioned that they now live in Sigmar's cities after losing their Holds during the Age of Chaos, having just set off to reclaim them in the present Age of Sigmar.
* It should also be mentioned that Pratchett did say continents are found and lost on even the best-run worlds, so it's possible that the Disc itself changes enough to make maps of it a futile measure at best. The country of Chimeria is shown on the map, despite the
* It should also be mentioned that there are variations in the composition itself - most shows and films
* It should also be noted that Anguirus, Rodan, and King Seesar are three of the few monsters Godzilla
* It should also be noted that Back Alley Brawler is a hero and that the entire zone is supposed to be a non-combat area, even watched over by an, in universe, virtual god of the realm. Take that for what you will.
* It should also be noted that by the time Angel starts getting involved with Cordelia
* It should also be noted that feathered wings appear just as much in Gargoyles as bat wings do. In fact, Bat wings seem to be the exclusive feature of Scottish gargoyles, which is why the main cast has them. Gargoyles from England, Guatemala, and Japan show an even mix in wing type.
* It should also be noted that he gets this a lot from his English followers, but according to him, it is not as bad of a case with his Japanese followers:
* It should also be noted that how hard a characters "scales" isn't necessarily reliant on their damage output. Feared characters like Amumu and Sona, for example, are considered to "scale hard" in games simply because of their disruptive abilities (AOE stuns, binds, slows, buffs), which are extremely valuable in the lategame.

* It should also be noted that, in their war with the Wraith that lasted thousands of years, the Ancients with all of their superior technology never bothered to look for a way for Wraith and humans to coexist. Yet in a matter of mere years, a combined research group of Tau'ri and Wraith have developed an experimental retrovirus that allows a human to be fed upon by a Wraith without any permanent damage at all. Preliminary field tests have demonstrated that it works in at least some humans, with wider trials planned in the immediate future. Not only that, but some were able to genetically modify Wraith so they need not feed on humans at all. Had the Ancients been willing to even consider possibilities other than a war of extermination, billions of lives could well have been saved.
* It should also be noted that Machine Spirits seem to be real, particularly in more advanced machines; Land Raider tanks in particular have a reputation for continuing fighting long after their crew has been killed. Either the vehicles genuinely are possessed, quite possible in the demon and god filled setting, or the Techpriests are building AIs into their machines without realizing it, since many machines are made by creating exact copies of ancient designs that nobody really understands anymore.
* It should also be noted that many WH40K races are extremely keen on boarding actions and battleships can carry varying number of boarding pods to launch at enemies.
* It should also be noted that meteoric iron is almost always less pure than human-made steel, and this can make it brittle (see the
* It should also be noted that Mick Foley differs from many "garbage wrestlers" in that he's one of the best promo men in the business. Foley also demonstrates a more diverse moveset than most of the others on this list. In fact, one of his early signature moves was the "Cactus Jack Crack Smash" which was a run from the apron into a senton splash to a standing opponent.
* It should also be noted that most elves we see in the series are in the elven equivalent to their twenties, which are noted as being abnormally sociopathic in their dealings with everyone.
* It should also be noted that one of the chefs can apparently kill a man
* It should also be noted that she was still taking bumps and being put through tables well into her 70s.
* It should also be noted that Star Fleet is explicitly supposed to be a military organization, at least in several parts of the Star Trek timeline (most notably the Original Series and Deep Space Nine).
* It should also be noted that the Blue-Haired Lawyer, unlike some of the examples below, seems truly amoral (not immoral) at times. He brought his usual competency to bear while representing Bart when Bart pursued legal emancipation from his family due to financial and other grievances against Homer, no matter his actual feelings about the situation: when Bart declared that he wanted to legally separate from his family in his office, his
* It should also be noted that the case of the June theory is rather unique as far as examples of this trope go, as it's well known for being a rather complicated case of an
* It should also be noted that the conflict between the old-style policing of Gene Hunt and the modern/futuristic policing of Sam Tyler is the central dramatic conflict in the show, but even then, there are external forces in the 1970s for the police to rein in such brutality, as evidenced in the series finale.
* It should also be noted that the cornerstone of Pain's beliefs and plan is that he thinks
* It should also be noted that the "Ghost in the Machine" is an English phrase usually describing computers, and how seemingly simple coded instructions can lead to unexpected results, and the title (and theme) of
* It should also be noted that their new standard M.O. is more of a performance than an attack: They hit pre-determined cruise ships, put on a scripted show with crewmembers pretending to oppose them, and the "victims" are even compensated for their losses. It's basically a staged insurance scam where the company itself is also in on it.

* It should also be noted that their wands are, ahem, connected. Harry's even makes Voldemort's spurt out magic when they have a duel with them.
* It should also be noted that the original game is where the Sith Code originated, which writer David Gaider created by inverting the Jedi Code and taking inspiration from Hitler's book
* It should also be noted that the people they recruit can be of any social status or have any kind of occupation, too. For instance, one member of Amberley Vail's retinue used to be a fast food seller.
* It should also be noted that the tolerance for this trope overlaps somewhat with the general tolerance for physicality (while football/soccer is nominally non-contact, a certain degree of physical contact is inevitable) - in Britain, and to a lesser extent in Germany and Russia, players are harshly condemned for diving, exaggerating injuries, and other ploys, and a much greater lenience towards physical contact (there's a reason that the Defensive Midfield position is sometimes referred to as the 'Midfield Destroyer'). In Italy, Spain, Portugal, France, and Central and South America, there's a greater tolerance for it (the exaggeration part, at least, as well as berating the referee) and a correspondingly lesser tolerance for physical contact.
* It should also be noted that this isn't so much out of concern for the sleepers as it is to make sure that every mage careless enough to be identified by said sleeper/investigator can be discovered and killed. Since mages live mostly off the grid by necessity and mundanes very much do not, disposing of the masquerade-breakers is significantly more easy and effective than offing mortals, and leaves the investigator without any proof even if he somehow dodges the mind-wipe.
* It should also be noted that Timmy unwittingly did the same thing to Mr. Bickles during the episode and manages to evade such extreme repercussions by apologizing and effectively
* It should also be noted that truemates cannot share thoughts (without using magic, anyway) until their bond is complete, which can take some time. This rule conveniently allows for romantic tension between the truemated-but-not-fully-bonded-yet protagonists.
* It should also be noted that when John Hartigan committed suicide, he shot himself in the head even though he had already been shot in the back (Sin City heroes tend to walk away from other shots with ease).
* It should also be noted that while there are many reasons for objection, the objection itself should be short. For example, "Objection, relevance" or "objection, leading". Unlike tv, you do have to specify what you are objecting to AND you cannot turn it into your own speech.
* It should also be noted there are in fact Communists around, but they only exist because they decided that
* It should at this point be noted that he only met AoA!Jean once, briefly (though there was an instinctive connection), and it was quite some time before he realized what relation either Jean or Madelyne had to him. After that, he backed off, fast, from Maddy's advances. Maddy, on the other hand, didn't seem to have the slightest problem with it and acted as a textbook, if somewhat homicidal,
* It should be added that the rate at which the transformations take place can vary greatly, from Tennyo's near-instantaneous self-immolation/transformation, to the half-decade long gradual self-adjustment that Mega-Girl is going through. In between that is Crimson Comet (three days), Phase (about a week), Shadowdancer (two months of agonizing illness), Fey (six months of slow changes followed by a sudden, unpleasant burst of alterations after her first major use of her powers), Chaka (about a year, and requiring surgical intervention to correct her hips half-way through), and Beltane (a couple of years of self-modification). And that's not counting
* It should be also noted that the Administratum, is only Obstructive Bureaucrat because it covers such a large Empire, this is why fluff always shows that the lower-levels are so good at their jobs.
* It should be mentioned, however, that the story is ongoing and as of December 2017, it does still include other, more mysterious forms of magic or magical

artifacts, which may or may not see more detailed explanations given to them in the future. And given the author's apparent love of both
* It should be mentioned that "human" in the setting is a generic term for anyone sapient enough to be considered people, excluding the Carmpan. Most of the individual stories actually do focus on Earth-descended Homo Sapiens, so the trope applies nonetheless.
* It should be mentioned that while Gil's arm can handle hazardous materials and reach through solid objects
* It should be noted here that Andy and Tony first got into show business as part of a
* It should be noted, however, that Bellamy failed to imagine even radio, let alone television. The main entertainment in the year 2000 was sitting around in your living room listening to music piped in over telephone wires. While this may suggest the infrastructure of the internet, the absence of any wireless technology (e.g., radio) is striking. Also, the automatic retractable awnings over the sidewalks is highlighted as an impressive technology which was no doubt feasible when the book was written.
* It should be noted however that Hera usually did not actually fulfill the part of step-
* It should be noted, however, that it can't transport personnel while carrying a full armament. In fact, personnel transport is mostly seen as a distant secondary task to infantry support and strike missions.
* It should be noted, however, that nearly every Italian news show (at least those in the dinner timeslot) include a "sneak preview" of the following program, often treated in the same way as a normal coverage.
* It should be noted however, that thanks to Lend-Lease Act, the Soviet Red Army utilised a substantial number of British Matilda, Cromwell and Churchill tanks, as well as American Sherman tanks. Several American weapons also saw service with the Red Army thanks to Lend-Lease; the famous AK, in fact, had its bolt essentially copied from a leased M1 Garand.
* It should be noted, however, that the Amazon ideal of Beauty is based on strength, and as a Shichibukai with powerful Haki (as well as the very rare Conqueror's Haki), and a fundamentally instant-kill Devil Fruit ability (which her people believe comes from defeating a mythical beast), she more than fits that standard.
* It should be noted, however,that the manga explains/foreshadows things much better. After his first defeat (which was not in a duel) he is shown to still exist (although Yugi and friends think they have destroyed him,the reader remains under that illusion only very briefly), he never loses his ring, and he is not defeated again until the fights with Yugi and Malik in the battle city (in which, again, Yugi doesn't destroy him, but Malik does; he still survives thanks to the above-mentioned handwave (which acts more as a foreshadowing in the manga) to be the final arc's villain). His ring is also never destroyed.
* It should be noted, however, that the White Council's Laws of Magic are meant above all to restrict power, so that no wizard can become too powerful. It's explained that should they try to achieve power, they either have to do it the
* It should be noted, however, that this trope is partly the reason why Zach is not all that comfortable with his bionics. ("Rogue Arm")
* It should be noted however, that Tolkien's statements are not intended to imply that there is no greater meaning behind the works. It is simply that they are not
* It should be noted, however, that traditional religion still survives in the setting —
* It should be noted, however, that when someone dies on Riverworld, they are reincarnated elsewhere the next morning. This makes the reuse of their old bodies even creepier.
* It should be noted it worked on former minion Pandora who just betrayed them, giving Phoenix Ikki a key to go to Elysion.
* It should be noted that ABC and ESPN have used a rewritten version of Hank Williams Jr.'s "All My Rowdy Friends Are Comin' Over Tonight" to advertise Monday

Night Football, performed by Bocephus himself.
* It should be noted that act of choosing a champion is largely reserved for political bodies (example, a Grand Council.
* It should be noted that all of the daughters were wearing clothes that could be best described as revealing.
* It should be noted that Angel specifically picked his name to be ironic (his real name is Liam): he is the "vampire with the angelic face." His evil side, when it resurfaces, is referred to with the much more intimidating name of "Angelus".
* It should be noted that Angewomon digivolves from Tailmon, a cat Digimon. And if we consider the expanded canon, LadyDevimon can digivolve from the corrupted version, BlackTailmon, making this an almost-literal case.
* It should be noted that an Orokin record explicitly states that the Tenno's ability to link with the frames requires
* It should be noted that (at least from the third game onward) flying units aren't always better. Flying units won't receive HP and EN bonuses from the aforementioned regen tiles or gain valuable cover, and moving a unit in the air will drain a bit of the unit's energy, while moving along the ground will not. And to top it all off, it traditionally costs flying units 5 EN per turn to stay in the air, plus 1 EN per flown square.
* It should be noted that, at that point, the rugby team had all gone
* It should be noted that Australia is the strictest country in the Western World in terms of censorship. Unlike the US, UK or even NZ; Australia's law on censorship of all media is heavily regulated mostly on grounds of political and societal values that are appropriate in Australia.
* It should be noted that Bellatrix and McGonagall, the two main female characters who don't have children, do become successful in their chosen fields; Bellatrix is Voldemort's
* It should be noted that, besides Garon, there are plot reasons suggesting the characters weren't going all out.
* It should be noted that Brown's plan was poorly conceived, incredibly disastrous in execution, and was regarded that way by Frederick Douglass who noted that the plan was suicide, and by other black slaves who refused to join Brown's plan. In the course of the raid on Harper's Ferry, Brown and his contingent actually killed a freed black railroad worker. Most historians, such as James McPherson, believe that it's likely that
* It should be noted that Cap's shield is often described as playing merry havoc with the laws of physics. For example, it's not just indestructible (it can shrug off a direct hit from everything short of Thor with the power of Odin), but it also arrests most (if not all) of the momentum directed at it, too. One imagines that works in reverse when used as a weapon. But still, all it should take is one shot from most people listed here and Cap is down for the count. To put in perspective just
* It should be noted that colour trademarks are typically restricted only to competing organizations. They do
* It should be noted that condemned people aren't recruited in order to save them as much as to assure their loyalty by giving them a way out. Seeing that the alternative is taking a dirt nap, condemned individuals are also usually much more willing to be conscripted than most fellows, which results in better motivated recruits. The Gray Wardens are above all pragmatic, not merciful. And the Wardens also have a very important secret which they don't tell new recruits until it's too late for them to do anything about it, namely that when you join the Wardens
* It should be noted that, despite the fact that he's usually a good guy, he did have a reputation in his hometown as "Le diable blanc"— people saw him as a demon because of his red-on-black eyes.
* It should be noted that disbelief in the supernatural generally doesn't protect against it in King's works. For example, in
* It should be noted that due to Sam's skills with a lockpick, locking the door on her is pretty much useless.
* It should be noted that Dwight has performed especially outrageous actions

compared to his employees, with his actions ranging from causing a fire and a panic, to damaging private property in the form of vandalizing an expensive CPR dummy, to possessing and discharging a firearm in the workplace, to assaulting a fellow employee without due cause (Andy Bernard). Even though these incidents all got reported to the top echelons of Dunder-Mifflin, he still doesn't get fired. Even if he is one of the company's best salesmen, keeping him around simply should not be worth it to the company.

* It should be noted that Flagg has no problem accepting credit for deeds, items, and events that are not actually his design. At one point, when talking about his many names, he muses that he's been called Maerlyn (All-World's version of Merlin), but "who cares, because I was never
* It should be noted that for digital connections noise has to be pretty bad before it will have any effect on the quality of audio or video since it has to completely flip a bit, or since most protocols for that sort of thing have error correction, multiple bits close together in time. There's very little point to expensive digital cables since if there's a noise problem the effects will be VERY obvious, or non-existent, there really isn't a middle ground.
* It should be noted that for over a decade, Japan itself held onto the idea that anime should all be kid oriented: wacky comedy,
* It should be noted that Freedom Force also creates speciation by having different damage types. Man-O-War and Microwave both have ranged attacks, but Man-O-War's is an electrical one that has greater effect on electrically-vulnerable foes like robots, while Microwave's radiation beam is most effective on ordinary people. And some characters are resistant to fire or cold damage, etc. It is prohibitively expensive to create a character who is resistant to everything. And there are different types of ranged attack - projectile (what range? propelled straight like an arrow or thrown like a grenade? homing or not? how fast does it move?) and defence (needs to be activated and maintained like a forcefield or always on?). In practice all the supplied Freedom Force characters bring
* It should be noted that Furmanov wrote the book that made Chapaev famous in the first place.
* It should be noted that given the propensities of the Heterodyne Family "Fun-size" being mechanical horrors the size of a bear is only to be expected. Just imagine if they'd been made by the Wulfenbach clan...
* It should be noted that Gupta did cross paths with Bond at the start of the movie when Bond crashed an arms deal where Gupta was buying the encoder for Carver's schemes, however, he would've been too far away to see Bond in the shootout that ensued as Bond began taking out the terrorists and their various weapons.
* It should be noted, that in many cases spaceships in Gundam's are designed to takeoff (and sometimes, land) on planetary surface or water, and placing big turrets on the bottom - which also serves as heat shield during re-entry - is just not practical.
* It should be noted that in most of Europe (meaning France, Belgium, and Germany, for instance) Latin works avert this due to being taught in Latin classes, which are popular with students seeking higher forms of language education. With Greek works however it is
* It should be noted that in most versions she ate the pomegranate seeds willingly,
* It should be noted that in one of the later novels, the powers-that-be have determined that a Standard Sci-Fi Fleet is incapable of dealing with the threats to the far-reaching Confederacy and has been relegated to protecting the core worlds.

* It should be noted that in the classical ("Solomonic") Western Esoteric tradition from which many of these examples (directly or not) derive from, there generally wasn't an expectation that the ritual alone could cause the spell to work; rather, practitioners believed that the ritual would

* It should be noted, that it is NOT the German invention: it was designed in France by automobile engineer Adolph Kegresse (famous for inventing one of the first practical half-tracks), and captured by Germans in 1940.
* It should be noted that it was the fact the model was licensed to Bell and Boeing that led to the protests, not its existence in the first place. LEGO had released a
* It should be noted that Klink could play one song perfectly: The American National Anthem
* It should be noted that Leviathans are consistently described as "biomechanoid" rather than "organic" and they display very few of the common attributes of "organic technology" as we would think of it. Moya was unquestionably "alive," and sentient, but many of her systems were mechanical even if they were "grown," such as the beetle-like repair robots.
* It should be noted that Lucas had no idea Boba was so popular when
* It should be noted that Mages can cure vampirism... but it's not a good idea. The Paradox backlash from that would, in all likelihood, kill the Mage stone dead. As for lycanthropy, what's to cure? Werewolves are not sick, they've always been werewolves.
* It should be noted that Masaaki Hatsumi's version of ninjutsu is unverified as legitimately descended from whatever form was practiced in older times. Then again, so is everybody else's, since the ninja were careful to not leave detailed records
* It should be noted that Melusine's own (human) father broke a similar promise made to her mother Pressyne. Pressyne, however, was satisfied with a
* It should be noted that most of the above claims of Rasputin's death came from the autobiography of Felix Yusupov himself, so there's certainly a possibility that he's telling tall tales to make Rasputin look monstrous or himself more heroic.
* It should be noted that most of the examples in this section are based off of earlier parts of the series, when the rules for an actual physical card game had either not been created or were still in their infancy, as manga was first published in 1997 while the first set of trading cards weren't released until 1999. Basically, the games, cards, and interactions were treated more like
* It should be noted that most Russian science fiction writers tend to put the cap at the "cruiser" level, with heavy cruisers being the largest and most powerful ships in the 'verse. This likely stems from the fact that the Russian navy doesn't have any ships officially classified as "battlecruiser", "battleship", or "aircraft carrier" (although NATO classifications disagree).
* It should be noted that Mr. Whippy is a real company, that operates in the UK as well as Australia and New Zealand.
* It should be noted that, nevertheless, it still shows in most series, only not as blatantly as other examples in this page; the exact degree varies considerably.
* It should be noted that of these, only the British were even remotely attempting to conquer American territory:
* It should be noted that only a few Carrier classes are actually capable of pulling this off. The Independence Class for example are based on the Cleveland Class cruisers, and boast the latter ships top speed. However, the two preceding Carriers, Langley and Bouge, are based on a Coalier, and a Cargo ship respectively, and as a result, are painfully slow, and just unable to avoid incoming fire.
* It should be noted that other wizards are aware of the Periodic Table of the Elementals, but refuse to use them because of tradition.
* It should be noted that some of the patronages are dependant on the church (not

all churches recognize the same saints) and even within a single church, there is a lot of overlap and disagreement (most of the saints listed here have a bunch of other patronages). For instance, two of the saints on this page, Saint George and Saint Nicholas, are both the patrons of archers.
* It should be noted that some of these things can, and do backfire on the ones issuing the Fetch Orders. Quarter Masters
* It should be noted that Sugar wasn't aware that it was Tatababasco and mistook it for poison. She was in belief that it might kill him (in a painful way).
* It should be noted that the A.I. of Jor-El believes this, not the real Jor-El. Reason being is that he created the A.I. version of himself without any of his own flaws - which, in this case, meant emotions. Considering how he later warms up to humanity as a whole, displays emotion, and states that Clark's destiny is to be a hero, not a conqueror, suggests that this might have been manipulation on the A.I.'s part.
* It should be noted that the Alliance was originally a breakout faction of the Space German Empire and therefore younger than them by several hundred years. Which only serves to strengthen analogies to the American War of Independence against the British.
* It should be noted that the ancient Greeks (or at least some of their philosophers) didn't view "love" between a man and woman as a good thing. Partially because it was considered an animal's instinct and a distraction from more important things such as war and philosophy depending on the area, and partially because they believed women to be objects, and therefore loving them was inferior to their "people"-centered loves of agape and philia. This led the ancient Greeks (or, again, at least certain mythographers and poets) to see Aphrodite as a villainous figure.
* It should be noted that the author specifically mentions that the ranks in the
* It should be noted that the Bible isn't a single book written by one author, but a collection of scriptures written by multiple authors throughout several generations.
* It should be noted that the characters live in an environment of extreme scarcity, so this kind of attitude is reasonable, but in their case, it's still treated as excessive and humorous.
* It should be noted that The Clash's version of the song is featured in the game's karaoke mini-game, and is needed to complete a storyline mission.
* It should be noted that the concept of actually capturing monsters to fight with was first shown, in fact, with
* It should be noted that the Controller Archetype on the hero side can choose Empathy as a secondary powerset, and thus serve as the "literal" Medic of a team despite being
* It should be noted that the deal was that by getting the tax dodgers, the Avengers could file theirs without giving up their secret identities to the government (Tony Stark offered to pay the sum.) At the end of the story, the team gets back at the tax man the only way one can...
* It should be noted that the evil Trelane in the novel is not the same one from the show. The one from the show was just an immature child who gets better under Q's tutelage in the novel. The evil one is from an alternate universe who absorbs the normal universe's Trelane and takes his place.
* It should be noted, that the explosion as shown in movie is quite slow, and most fragments would probably not reach enough velocity to immediately drop on Endor. Instead, they would most likely form a slowly spreading orbital cloud, then ring around Endor.

* It should be noted that the Klingons virtually swapped characterization with the Romulans, who were depicted as honorable and noble warrior-officers. TNG and DS9 retooled them as a duplicitous, racist empire of fairly unsympathetic villains — hell, in the Decipher CCG adaptation, their main skill was literally

* It should be noted that the most commonly depicted symptom of soul-lessness, loss of emotion, is possible as emotional reactions are brought on through various chemicals, (neurotransmitters, adrenaline). Even something as simple as an antidepressant can make a person less emotional or even downright
* It should be noted that the national representation seems to be a more recent development (a flashback to what seems to be the original council explicitly shows the lone Air Nomad national not on the council) and at all times, seems to have a mix of benders and non-benders. Some fans have argued that the odd balancing of the representation (Earth and Fire have a vote a piece, Water has two votes, and Air has one vote that represents what amounts to just above a Nuclear Family in a city the size of New York City) should have provided some ample conflict
* It should be noted that the Nazca lines translate to something like "For a good time, call..."
* It should be noted that the only thing that changed about Randy was who he attacked. Otherwise he was still the same sadistic psychopath he's always been.
* It should be noted that the original Magnet song is used enough for yaoi purposes between any and all Vocaloids, as it's a love song originally written as a lesbian couple.
* It should be noted that the original version submitted by the credited author presented the heroes with an alternate history in which killing Hitler creates a worldwide Utopia; the point of the original version was to present the players with an opportunity to debate morality and present a hard choice about whether to restore the original history. Editorial meddling (and possibly concerns that such a module might be a campaign-ender) resulted in the published version, which greatly embarrassed the credited author. The less genre savvy readers included Holocaust survivors and the Anti-Defamation League, who had trouble with the premise that slaughtering 6,000,000+ Jews (and others) might make the world better.
* It should be noted that the overwhelming majority of the terrible fights involve multiple characters attempting to use complex choreography at once while remaining in position for the cameras. More aggressive camera cuts and reaction shots were also introduced to some of the fights.
* It should be noted that the Pemalites were designed by God, aka The Ellimist, to be that way. The Iskoort have architecture that's more like legos and they have spires because the ground is generally too marshy to build on. The Andalites had cities, but because they're basically herd animals, they hated them.
* It should be noted that the Puddle Jumpers also respond to telepathic commands — as long as you have the Ancient gene.
* It should be noted that there are two general classifications for the chocolates given to men on Valentine's. Homemade or premium-grade/expensive
* It should be noted that the reason such systems even exist is because of the speeds each of these aircraft are capable of. At super-sonic speeds, ejecting into such an on-rush of air can play havoc on a human body. Despite this fact however, the fastest conventional aircraft in the world, the SR-71, does not use a capsule ejection system. Instead, the crew wear what amounts to a
* It should be noted that there is a great deal of evidence suggesting that forming a Permanent Pactio requires the Magister to have sex with the Ministra. This could explain the tendency of Magisters to marry their Ministras. Also of note, when Asuna first talks to Negi about forming a permanent pactio, he freaks out.
* It should be noted that there was an all-celebrity week during the first part of the show's run, but it was Miss Americas vs. "All-American Sportsmen" and stayed true to the three-of-a-kind format.

* It should be noted that there were fans who accused the band of selling out when they signed to Warner Bros and released the ballad Under The Bridge way back in 1991, even though most of its parent album Blood Sugar Sex Magik was a continuation (and possibly even improvement) of their old sound. Had Internet forums been around back then, there would have been a lot of this sort of debate on it. Even more so in the Californication and By The Way periods which were full of introspective ballads(One Hot Minute escaped this trope largely because it was not a massive radio success). By The Way in particular is incredibly divisive for the band, something they readily acknowledged with the rockier single Fortune Faded (itself a rerecorded By The Way outtake) and the more funk-based album Stadium Arcadium. The band has sunk in popularity with their latest album I'm With You and its singles series, indicating that they might be becoming a cult band again.
* It should be noted that the safety measures mentioned at the top of the page that prevent this trope from occurring were instituted from both foresight and experience: early flamethrowers, first used on a large scale in the Battle of Verdun in
* It should be noted that the said brother and half-brother don't exist in the same continuity as the two sisters. There are different interpretations in the absence of actual canonicity, even by the current writers.
* It should be noted that these rappers also aren't rapping as themselves, but as characters who are psychopathic serial killers who do all kinds of horrible things, whose actions aren't supposed to be glorified or emulated.
* It should be noted that the series begins by exploring the possibility that the word "butler" is derived from the Fowl family's line of manservants, going as far back as the Norman conquest of England in 1066.
* It should be noted that the Tau Codex explicitly explains that their pulse weapons are
* It should be noted that the Turians are the only race to face a major Reaper offensive on their homeworld, and not be almost completely overwhelmed almost immediately, unlike the asari, batarians and humanity, though last ones (as well as the asari, as we see in the ending) managed to keep themselves in fight through guerilla tactics even on Earth (Thessia) itself.
* It should be noted that they did catch a Great White Shark that had human remains in its stomach.
* It should be noted that this chord is listed on the soundtrack as "Sharp Fear Short", among other similar clips heard within the game with titles like "Scared Confusion Short" and "Dark Piano Short".
* It should be noted that this includes invisible floating keyboards.
* It should be noted that this is what makes the games so compelling because the player feels exactly this way as well (and it's the player who calls the shots!)
* It should be noted that this particular joke has been used quite a few times in television and theater.
* It should be noted that this technology literally saved main character Miles'
* It should be noted that those Quranic verses are kind of vague. Marriage to unbelievers are strictly forbidden, but the lack of clarity regarding on what constitutes an unbeliever invites different opinions. Since Islam lacks a central authority, this ends up causing local interpretations to predominate. Liberal Muslims restrict the definition of "unbelievers" to just the ancient Arab pagans (who no longer exist), or sometimes pagans/animists generally; more conservative opinion generally considers anyone not a member of the Abrahamic religions (sometimes including Zoroastrianism) an unbeliever, although some are grudgingly willing to admit other non-Abrahamic monotheists are theoretically acceptable (usually while strenuously insisting that most or all forms of Hinduism and Buddhism are only pseudo-monotheistic and so don't qualify); and the radical fundamentalists often go so far as to say as everyone who does not hold to their strict interpretation of Islam is an unbeliever.
* It should be noted that Turians are one of the most common races on the Citadel, with a near majority of Citadel security being Turian. This particular problem is never seen elsewhere, and one would think that if it were a common cultural issue

there would be provisions for it.
* It should be noted that, unlike other examples, they have a very rich culture that does not focus 100% on war, and most likely after 100 years of war their culture has

* It should be noted that what is considered Democracy as we live it today (where everyone can vote, no discrimination to minorities, no slavery and exploitation of other people) is quite different from what many Enlightened and Romantic writers thought vis-a-vis democracy (Enlightenment thinkers were content with limited suffrage, while Voltaire would probably insist that a secular France remain anti-semitic) with the exception of Rousseau, Diderot, Condorcet and a few others.
* It should be noted that when bullets do work they are very effective. Even among elite pirates, there aren't many who have an ability, which lets them outright block bullets, causing many to dodge or deflect them and run for cover rather than tank them and risk severe injury. This would explain why Marines keep trying it even though to the viewer it seems silly.
* It should be noted that when push came to shove, Danko's men were completely prepared to believe that he'd cracked and shot his own men, rather than believing Danko's story of shapeshifting killers, despite knowing that such things are entirely possible. Apparently that's the sort of reputation you get amongst your co-workers when you enlist them to fake attacks on your own citizens by the enemy.
* It should be noted that while human arms are the weaker two limbs compared to our legs, a reasonably fit human is still fully capable of lifting their entire body using
* It should be noted that while magic is gone in the Seven Kingdoms, it never went away in Essos. Qarth has a whole order of warlocks, Asshai is a city of witchcraft, and the Doom that rules Valyria seems to be magical in nature.
* It should be noted that while the buildings might be empty, the streets may not be, and if
* It should be noted that while the others had to get crafty about it, Cobain was one of the highest leveled players in the game, and accomplished this through
* It should be noted that with the evolution of air wings, the US Navy can perform a creditable imitation of the above Soviet strategy with their carrier air wings. A Super Hornet can carry two antiship missiles alongside drop tanks and targeting/ECM pods, while the upcoming F-35C can also carry two such missiles in its weapons bays. Considering that carriers carry forty-eight such fighters as standard, also carry a few jammer aircraft, and add in upcoming antiship Tomahawks and VLS-launched antiship missiles, and any enemy surface forces are in for a very bad time.

and unchanging; people can leave and enter it over time, as you become more distant from some people (e.g. if they move away or die) and closer to others. The "Monkeysphere" should be taken less as an authoritative list of every person you will ever know than as a rough estimate of the number of social relationships you can juggle at any given time.
* It should be noted, though, that those flaws don't exist in the short story the TV episode was based on; the whole "going to see a play" part is padding added for the adaptation, and there is no servant at all.
* It should be noted with Steff that she views herself as being an ugly talentless clod who looks about as much like a real woman (she's trans) as Sailor Bubba does, while Mack and her friends all see her as impossibly graceful and artistically talented and it takes Mack and several other characters a long time to actually figure out that Steff isn't biologically female. This is explicitly stated to be caused by Steff being raised by elves, by whose standards she IS a clumsy talentless drag queen.
* It should be pointed out that $3000 was the standard rate for the musical guest on
* It should be pointed out that closed fists are usually illegal anyway but rarely enforced.
* It should be pointed out that, in at least the first two Home Alone films, some of the traps were made worse, or entirely created, by the bad guys as they bumbled around. In fact, in both movies, Kevin was caught and would have been killed if there wasn't an intervention by an adult. In the first, the bad guys even catch up to Kevin early, and would have killed him had Kevin not been lucky enough to be within arms reach of his brother's spider.
* It should be pointed out that in the manga versions, Harlock's passed on the mantle more than once, and there are huge hints in the original SPCH manga that Daiba might have ended that way if not for creative fatigue on the part of the author.
* It should be pointed out that Myers himself wore full Scottish formal attire for the presentation, complete with kilt.
* It should be pointed out that the conversion of the Cabin to an ejection system is not that insane of an idea. During the
* It should be pointed out: though each man is or will be a count, just heartbeats from the throne (or serving as Regent), they each marry their considerably-more-attractive wives for love. This is especially clear in Cordelia and Aral's case, since the reader learns his best and worst traits along with his future wife.
* It should be remembered that especially from World War II onward, organization in combat became more fluid so you rarely had a true leader/wingman pairing once the shooting started as happens in movies, as such "welded wing" pairings are significantly less tactically flexible (and more vulnerable). Rather, both the "leader" and "wingman" would fluidly switch off lead and cover roles as situation dictated. If the wingman had a better angle on the target or spotted a bandit he'd take over the lead to initiate the attack, and if the wingman was in danger the leader would take on the "covering" position, etc.
* It should be remembered that Government employees are, unlike most other jobs, enacting the law of the country; everything they do can have legal ramifications. Not following a law, no matter how absurd in a specific situation, can set a precedent that allows others, to whom the law should be a reasonable requirement, to complain they are not getting equal treatment. Civil servants are often given a range of options within which they can act, to allow them some judgement, but cannot legally act outside this clearly defined range.
* It should be said that while there is no mention of Space Jesus, there
* It should come as no surprise that Bob Costas, arguably the nerdiest of America's big-time network sportscasters, is a baseball guy through and through.
* It should come to no one's surprise that professional wrestling has always been a haven for asshole career athletes as well as those willing to rub their established athletic legacies in the face of everyone else. A mat wrestling example was "The Natural Guy"

* It should go without saying, but just about any fictional toy in the films became a real toy, too, including the cast of Woody's Roundup, in both kid and adult collector's form. The latter becomes especially hilarious given a certain antagonist of a collector in
* It should go without saying this works in real life. As non-aquatic animals, humans have a sensation when suddenly submerged or doused that makes them prepare to swim for their life to avoid drowning. This is why a cold shower (or a shower in general, or even just washing your face) works so well at waking people up.

* It should however be noticed that the Dune novels also establish that many modern religions survive into the time 25,000 years in the future in which the events of the novels happen, but in most cases they are mixed. For instance, you have faiths like Buddislam (Zensufis, Zenshiites, Zensunnis) and Mahayana Christianity. The aforementioned Fremen are Buddislamic, with belief in both a single god and reincarnation, since the religions merged. It's said a Second and Third Islamic movement preceded Buddislam that grew more mystical and unified the two faiths.
* It should, like, be noted that the voice actress who did Shirley's voice is one Gail Matthius, a cast member from the sixth season of
* It shouldn't be a surprise that the SS in the German-occupied portion of the United States also resort to torture tactics to force information out of their suspects. Obergruppenfuehrer John Smith actually orders one of his men to beat a captured member of the resistance to death, even though he's unconscious and can't answer any questions. This is a ruse to make people believe he died without talking, as ordinarily they would have stopped if he did.
* It should perhaps be considered that along with the copious amounts of very predictable redshirt deaths, a lot of main characters bite it.
* It should perhaps be noted that this example actually calls out the potentially broken message of the trope. Filmore chides the
* It should perhaps surprise nobody that Artie Bucco falls into this category. While his restaurant Vesuvio benefits from its Mafia connection (inasmuch as it's the restaurant of choice for the Jersey wiseguys), all indications are that the food is legitimately excellent. Artie's ideas for recipes all seem to be delicious based on their description.
* It should probably also be noted that he was sued by another writer named Trevor Ravenscroft, claiming he had stolen elements from his earlier novel Spear Of Destiny. Except Ravenscroft's novel was non-fiction.

* It's illegal to hit the back of the head, but what point is exactly the back of the head can vary depending on head types and the referee's discretion. The general rule is anything past the "headphone" area, but with people punching fast and people moving their head to avoid damage, the ref needs to make a judgment call on whether or not a blow went too far or whether it was an unavoidable accident, etc.

* It's implied he had already fallen that far long before they met him- the plan was already in place and he had apparently been attacking travelers indiscriminate to their threat-level for a while now. Not to mention his "enforcers" thought nothing of Jet ordering them to kill Sokka. It's not entirely clear whether he truly regretted his actions for being
* It's implied in another episode where Aunt Pearl show Jed a picture of a recent wedding. Jed observes the father of the bride has a shotgun. Pearl claims that he'd just been hunting and Jed replies "Appears he got what he was after.".
* It's implied in "Big Murderer on Campus" that James Gillies and Robert Perry are a couple, but they try to pass off as being best friends because homosexuality was a crime in late 19th-century Canada. Inspector Brackenreid believes that the two young men are unusually close, and he even asks Detective Murdoch if James and Robert are "Just good pals, or something more?"
* It's implied in one conversation that this is enforced among god-tiers. As described, Seraphina used to be obsessed with perfection, while Arlo's obsessive drive to maintain social hierarchy essentially kickstarts the plot. In both stances it is much for the worse of the both of them. Some characters briefly wonder if crippling god-tiers psychologically is not a way to keep them under control.
* It's implied in Season 3 that Tory may have a mental illness, and given her disproportionate response to minor slights, possessive nature, and dependence on the relationships with those she has, it seems that she has borderline personality disorder. Even Miguel lampshades the fact that she needs help, and Tory eventually states that everyone thinks that she's crazy, suggesting that others are aware of just how mentally ill she is.

* It's implied Mayuri is this way when he makes certain movements in a forward and back motion by his daughter's motionless corpse which revives her.
* It's implied Rue and Jules are headed this way, as Jules makes herself into Rue's

emotional crutch, taking far, far too much on herself, a weight only furthered by people saying how much she is responsible for Rue improving. Rue is pointed out to not have stopped being an addict, she just shifted her addiction from drugs to Jules, and another recovered addict tells her that, asking what Rue pretends to do once they inevitably separate after high school.
* It's implied several times that had Henry not spent so much time pushing Shawn to be a cop, "training" an eight-year-old in police techniques and such, Shawn might have decided to become one after all.
* It's implied she's really someone who won the war between psionicists stealing "souls" from others to increase their power. Apparently she got basically everyone's power, making her powerful enough to alter the whole "anima tapestry", the world's psionic-soul-thingy-system, as she wished.
* It's implied that Albia, the "undying Queen" of Britain may be an example of this, although the only British character to appear so far is Ardsley Wooster, who's on her side (so far as we know) and wouldn't say anything to support this idea. It's weird. Gilgamesh tried to send Agatha to England for safety, but he later said "to go against Albia's merest whim is literally unthinkable", which sounds like Other-level mass mind control. Once we actually meet Albia, she seems to be on the benevolent end of the monarch spectrum: Still insanely dangerous (and actual insanity can't be ruled out) but cheerful, polite and generous.

* It's implied that "execution" is being frozen alive by her Persona's (Ice) power, and if you ask Mitsuru about it the following week, she says that she does indeed remember the "execution" and asks if you would like another.
* It's implied that Godzilla and Kong both end up as unwitting pawns of Ghidorah and Apex, respectively. Ghidorah's skulls was activating the signals near civilization that made Godzilla look like he had gone rogue and began attacking cities for no reason. And Kong's ability to fight off the Hollow Earth Titans and find his ancestor's temple where they harnessed the energy of Hollow Earth plays right into their plans of activating Mechagodzilla with a power source that can let it run with no limit.

Naru's and Motoko's superhuman strength (and swordsmanship in Motoko's case) vanish along with Keitaro's immortality and Su's ability to create fantastical machines. On the less obvious side, Kitsune's no longer immune to hangovers or weight gain from excessive drinking while Mutsumi's fainting spells become less frequent.

* It's implied that Vash sees Meryl as sort of an inspiration for him in the next to last episode. Sort of like a new Rem? Make of that what you will. So odds are even if he doesn't exactly return it, he definitely wants and needs her in his life.
* It's implied that victims of the Dementor's Kiss suffer this once a Dementor consumes their souls. Such a soul presumably either remains permanently
* It's implied that when a person dies, they go to an unknown place where terrifying things happen to them. So when a person comes back as a vampire or ghost, they haven't had the best time.
* It's implied that, while he's naturally inclined that way anyway, retaining his idealism is also an intentional strategic choice on Coulson's part. Many of the entities he deals with are either terrified and confused by their new powers or savvy antagonists who have plans within plans to deal with swat teams and superspy tricks. The former find his cheerful "it's OK, your power is cool, think of all the good it could do" attitude comforting, and it puts the latter on the back foot. The simplistic morality involved also puts him in the good graces of the Norse gods, which is a matter of great concern to SHIELD.
* It's implied that Xykon is grooming Tsukiko to replace Redcloak since he's becoming increasingly unreliable.
* It's implied that Yuki knew Takatsuki was a trans boy, but she didn't realize Nitori was a trans girl. Neither of the two knew Yuki was a trans woman. The characters get a bit surprised at the reveals.
* It's implied the Saints "rob" banks as a publicity stunt, which they do by walking in, shooting the roof twice, and handing out autographs and photos while in Gat masks.
* It's implied the Supergirl Xenon hates so much was Linda Danvers, but a Linda far older and more powerful. That Xenon is deliberately unclear as to which Supergirl he's talking about frustrates Linda and Kara.
* It's implied this is how Sideshow Bob disguised as Krusty the Clown, to frame him for robbing the Kwik-E-Mart. But Bart uncovered his plan when he saw in the security camera footage that Homer accidentally stepped on "Krusty's" unusually large foot, whereas the real Krusty has little feet under his big shoes.
* It's implied this is the case with both Sarah and Artie's parents as well: Artie's incubus father Ted fell in love with Jane Price when he found out his pheromones were mostly ineffective on her, and Sarah's mom Angela, who's the same species as her, is

* it simply stops on the second-from-top step upon release, rolls off to the side and stops.
* It's important however to qualify this since critics and writers often use anti-authoritarian readings, formed retrospectively, as a way to promote authors and works to new audiences as well as lend it a weight by exaggerating the political "rebellion" over aesthetic virtues. Science-fiction and genre fiction were highly popular in the USSR and Communist ideologues and officials tended to deprecate the snootiness towards genre fiction and popular fiction put forth in Western Europe at the time.

* It's important to keep the limitations present on existing telescopes in mind. One of the reasons why Kepler has found so many "Neptunes" and "Super-Earths" is because they're easier to find than Earth-sized planets (never mind those even smaller than Earth in size). Alas, Earth-size or smaller planets are easier to find when they are close to their stars.

* It's important to note that ethnicity of any kind is by no means necessary to practice magic. Just that the form any given rituals may take are likely to be colored by the specific mage performing it, and how much stock they place in the tools they are using.
* It's important to note that German aces, especially Wittmann, had hilariously overinflated kill counts, as the Germans marked joint kills as full kills for all involved, marked probable kills as full kills, had a much lower barrier to recognize a kill (resulting in many German aces scoring more kills than there existed in the area according to Allied documents), and were typically assigned the kills for their entire unit in action.
* It's important to note that it isn't simply a matter of the movie having stock footage; the stock footage was being used to pad-out the running time, so this involved them using the SAME stock footage every five minutes or so.
* It's important to note that Rome eventually conquered Greece and most of the area they were settled in (such as the Levant and much of Italy) which resulted in Greeks becoming well assimilated into the Roman Empire. Greek, not Latin, was the lingua franca for much of the Empire and was the language of the educated classes in Rome proper (just like Latin would be in later eras).
* It's important to note that Sylvester is somewhat of a toned-down version of the most famous Looney Tunes canine —
* It's important to note that the above-mentioned "free-form" version of the
* It's important to note that the Marvel guys have given subtle nods that they know about the connotations of the name. Actions have been taken by some members, most often chiefly Iron Man, in certain storylines such as the three listed above, which were not only disagreed with by at least one fellow member on principle, but also would call into question for readers whether they were playing this trope straight. Also, Iron Man says once to Maria Hill when remarking on this group and referring to it by name that "at least that's what I self-deprecatingly call our little world-saving group," giving clear hint that only he uses the name. Put this in perspective. The only member of the "good guy Illuminati" that ever used the name was the snarky/humorous member of the team who's led questionable acts in the plots that developed after each of its meetings, and even he readily admits it's self-deprecating humor.
* It's important to note that, while this is mostly in the background and not heavily discussed, the main characters themselves are shown as being on different wavelengths when it comes to religion. Jack O'Neill is snarkily irreverent and cynical towards religion in pretty much all its forms. Cam Mitchell tends to be positive about it, mostly through anecdotes about his very religious grandmother, but it's unclear whether or how much he himself believes the same things. Samantha Carter, in the face of her possible death, expressed the hope that after all of her work convincing enslaved people that they were following false gods, "somewhere one of those gods" was real. Her father, Jacob/Sel'mak, is openly a believer. The series supports religious tolerance (and the additional aesop that pretending to be a god in order to exploit people is bad), but it's hard to find a strong stance for or against religion per se. The series doesn't even condemn paganism, as it's never clear whether the Goa'uld created/inspired the ancient religions or simply decided to impersonate its deities (most clues given point at the former, though).
* It's important to notice the fact that, of the few clear predictions that Heim theory DOES give (most of it is extremely obfuscated), like the mass of certain particles, most are wrong by several standard deviations. Make that planetoid a

large moon.
* It's important to remember though, that for a Warrior Prince, Christian IV wasn't much of a Warrior. He failed to reconquer Sweden in the Kalmar War, his intervention in the 30 Years War ended up seeing Jutland conquered and plundered and finally he lost the Torstenson War wich cemented Sweden as the dominant power in the north.

* It's interesting to note that his regeneration becomes more powerful (or at least faster) with every transformation. Fat Buu already fit this trope, but it was a fairly slow process. Super Buu was able to regenerate at incredible speed, though there was implied to be mental limits that Gotenks almost reached and during his battle with Vegito in the anime it seemed to start slowing down as he got his ass utterly wrecked to the point Vegito actually pointed out he hadn't regenerated from an injury yet and

* It's ironic that some fans disliked JMS introducing magic into Spidey's origin, overlooking this important part in the storyline where Spidey uses science to beat magic. As Spidey told Morlun, it did not matter whether or not the spider was a mystic spider fated to bite him: the radiation made all the difference. The conclusion to the Ezekial arc, "The Book of Ezekial", suggests that the basis of his powers is scientific, but he was "destined" to have them.

Additionally, the Imperium's brutal methods are at least arguably justified in-universe by the fact that they've seen the result of what happens when Chaos goes unchecked time and time again, and the harsh methods of the Inquisition has kept the Imperium together for ten thousand years. Finally, the Interex and their supposed success at combating Chaos is not only the exception to the rule, but also dubious considering the fact that they were closely allied with xenos that produced weapons dedicated to the powers of Chaos and how easily they were manipulated into a war they couldn't win by

* It's later revealed that the different works take place in the same shared multiverse, or some other form of shared continuity.
* It's later revealed that the Investigation Team cannot call upon their Personas while in the Metaverse or in a Palace, as they need to awaken their Spirit of Rebellion to do so.
* It's later revealed that the main cast never bothered to bury Yamcha after he was killed by an exploding Saibaman.
* It's later revealed that the Spirit possessing his bat is, in fact, a powerful Grudge and that he, himself, may be possessed by something even stronger. Meanwhile, Max struggles to use the Spec-Shot, a basic spectral technique.
* It's later revealed that they are related, though only by marriage (Nekane is his paternal cousin and Asuna is a maternal aunt an unspecified number of generations apart
* It's later revealed that Torygg deliberately kept his wife Elisif out of political matters because he wanted to "protect" her and didn't feel that she needed to do any work of her own as his queen. When Elisif is forced to become High Queen after Torygg is killed by Ulfric, she is completely unprepared for running a kingdom because she never learned how.
* It's later revealed that while the pair being opposite genders is necessary, the mental sync doesn't have to be mutual interest — mutual understanding is

enough. For instance, Ikuno (whose relationship with her partner is entirely professional) has to
* It's later stated that they purposefully make sure to follow either of those prophecies, because it limits the world to two predictable outcomes, one of which is desirable. Failure to keep up will cause the emergence of a
* It's later subverted when Patti shows up at the door - the letter was just telling them that she had been selected as his new tutor.
* It's left ambiguous as to what exactly the Joker hallucination that appears to Batman throughout is. Is Joker actually
* It's left very unclear whether the destiny-pushers were just mistaken about the prophecy, or what, but Dean manages to get out of his part and they manage to save the world, so if Zachariah actually knew what destiny was, they successfully screwed it. It took a
* It's less a recurring trait than another consequence of his general idiocy, but Perceval has some moments, like when Karadoc wonders if Perceval can keep secrets. Perceval argues that he's great at keeping secrets; for example, he never told anyone what Karadoc had confided in him:
* It's less incorrect if the person in question is referring to the main character of

* It's likely this happened to Dilandau also, in just one scene from episode 16.
* "It's like, people only do these things because they can get paid. And that's just really sad" in order to stay afloat.
* It's likewise been shown that Artie Ziff, whom Marge went to prom with in high school before dating Homer, has maintained an obsession with her many years later.
* "It's like you guys can't have a single conversation without using the word 'wang'." "Sure we
* It's long been believed that if you empty out a deposit of dirt or gravel underground, you'll always find an ore vein. While a typical player could go a long time without having this disproven, it's because both of those things are abundant enough and large enough that, by sheer probability, they're going to intersect most of the time. There's nothing in the code forcing them to generate adjacently.
* It's long been claimed in certain places that, during the Golden and Silver Ages of American comics, major companies banned the use of the word "flick" or the name "Clint", due to fears of what would happen if, due to the poor quality of the paper and printing methods, the "L" and the "I" in either word got blurred together and looked like a "U". There's no evidence of this happening (for a start,
* it's lost city, but it turns out that they were merely hallucinations caused by smoke coming out of a giant container in the city's heart. As for what is in the container, the game is ambiguous (whether it's truly a djinn or just some sort of ancient chemical weapon), but it is lost forever at the end of the game. For the fourth and final installment, there is...absolutely nothing. The lost pirate city you find was clearly destroyed centuries earlier, but it turns out the cause of it's destruction was plain and simple greed; the pirates who came together to create a pirate utopia eventually turned on each other.
* It's Love I'm After, Gracie has a habit of peeping through keyholes and telling everyone whatever she overhears.
* It's Love I'm After is to stop Marcia from being completely in love with Basil. He tries to push her away by being a horrible cad, but she only excuses his actions and thinks him even more irresistible.

* It's lumped together with all the other diseases and mental disorders
* It's Luna's job (and she creates the Tantabus to help her) to patrol the dreams of all ponies to protect them from nightmares and encourage good dreams. While helping a cop, the Tantabus realizes there's very little stopping them from just finding criminals through their dreams and giving the information to the police. Luna decides very firmly that this is a breach of privacy and outside their jurisdiction. Criminals actually using dream magic to commit crimes are another story, but there are like five of those per year.
* It's made clear from the outset that Yammy lacks the skill and intellect for even rudimentary Arrancar skills so he relies heavily on being so unnaturally strong his brute strength wins the fight for him. He's eventually defeated when Kenpachi, one of the strongest captains, and Byakuya, one of the most skilled captains, join forces to fight him.
* It's made clear in the games that Pokémon eat each other and that humans eat Pokémon. Pokémon on default are presented as sapient, with some even being able to
* It's made clear in the second season that people are becoming increasingly less connected with the spirit world then they were in
* It's made clear that Nicky isn't saying that because he has anything against gays, however:
* It's made clear that only a Necromancer can open the Book, and only an uncorrupted Charter Mage can close it. Since
* It's made even more notable in his second battle in Colosseum when he says "Never mind that" right after declaring the music, and the standard Cipher Admin battle theme plays instead of his own during the fight.
* It's made even worse when you take into account the fact that for every adventure that his Uncle Scrooge undertakes Donald is right there with him doing just as much heavylifting, if not more, and furthermore tends to have just as many of his own amazing adventures apart from his uncle. Then also note that for all the times he's called lazy it's noted time and again that Donald has had multiple jobs and is constantly shown to be looking for a new one. Admittedly, it is something of a flaw that he can't hold down a job, but the fact remains that he still always attempts to find another one. Not for himself, but for the three children at home that he's responsible for. This can't be seen as anything less than admirable (something the Raider, a
* It's made explicit with David's son, Solomon. All his famous wisdom didn't do him much good when he started thinking with his other head and taking wives from other kingdoms who swayed his heart away from God, thus setting his kingdom up to fall.
* It's made fairly clear in a number of episodes that the cape is part of a Colonial Warrior's dress uniform (look at the party on Carrolon).
* It's made far more explicit in the rejected original ending, which had the pilot not participate in the battle in a jet, but instead turn up with a huge bomb tied to his crop-duster biplane. In other words,
* It's made more clear in the book, but Kryten is basically in denial that they are dead so that he can continue to perform his programming and serve them, as he has no idea what to do once he can't do that anymore. In fact, he shuts himself off, disassembling his brain in the process when he's forced to realize they're dead in that version (Lister puts him back together.)
* It's made obvious at the start of the series that the only reason she was able to get away with all the crap she pulls is that she's just
* It's made perfectly clear that Tarakudo became King of the Oni by fighting his way to the top.
* It's made pretty clear that he isn't a virgin and that he has slept with Saki numerous times. He does partially fit the trope in terms of his personality though.
* It's Magic, Charlie Brown. Later on after Snoopy brings him back, Lucy tells him he can't prove that he kicked the football. Snoopy retaliates by suspending her in midair and leaves, happily skipping away with together with Charlie Brown.
* "It's" Man in no way resembles a ball, but produces the characteristic sounds

bouncing off trees.
* its many glaring mistakes, baffling choices of both parts and building process choices. The PC community came roaring back, with nearly every tech YouTuber and publication calling them out on it, finding even more errors that were pointed out the first time around, and reuploading the original video in droves. Each of The Verge's subsequent attempts at damage control has only dug them deeper in trouble, and all the while they haven't once apologized or addressed the fact that their original video was misleading.
* its many imitators fashion shows that are aimed as much at men as women, and their models (known as "Angels") are regular features of men's magazines.
* its mascot is a penguin surfing on a chip! Needless to say, it's a popular chippy brand in NZ.
* it's Max, although it's easy to make the mistake since he's the Forward and all the other team captains are Forwards.
* Its members were (mostly) not as old as you might think from watching
* Its memorable "Born in sin, come on in/Born in lust, turn to dust/Born in vice, say it twice..." doesn't really count, though — they're rhymes, but clearly not of the nursery variant.
* It's memorably subverted in a first season episode, when Beckett says they'll need to look someone up in the missing persons' database- a bunch of paper folders.
* it's mentioned by Prince Vasili Kuragin that Countess Rostova used to be beautiful, and he couldn't understand why she married Count Rostov, who was always stout and red-faced. Their marriage seems happy.
* It's mentioned frequently that consuming even small amounts of alcohol sends Minbari into homicidal rages. On the flip side, there's a Minbari ceremonial drink called Sha'neyat that's deadly poison to humans.
* It's mentioned, however, that humans are by far the least magical species. Even during the drought, when they were the only ones besides dragons who had any magic whatsoever, it was such an incredibly small amount as to be not even worth mentioning. Therefore, what little human sacrifice dragons were doing during the drought disappeared entirely afterwards.
* It's mentioned in game dialog that cloaking is perfectly possible, it just requires way too much power ("the power of 10 battleship cores"). Presumably the coalition came up with some way to cut that down, possibly the same way as the
* It's mentioned in season 6 that Joyce had a life Insurance policy. It was mostly eaten up by medical bills, but only 'mostly', thus explaining where the money comes from in Season 5.
* It's mentioned in the final book that Grindelwald flew off the handle and attacked Dumbledore's siblings in a fit of rage, ending their "friendship". This aspect of his personality is elaborated on more in the
* It's mentioned in the first chapter that Amanda Kirk goes on to marry a human and have a daughter of her own, making Ama's kid a
* It's mentioned in the passing in chapter 9 that Hikari was finally introducing Touji to her family. She probably would have done it sooner but
* It's mentioned in various parts of background lore that a number of unsanctioned Arcanists,
* It's mentioned occasionally that the early Klingons originally had gods, but
* It's mentioned outright that the amount of complexity in such a small package makes the Breakers extremely fragile, which is reflected by them breaking if Nero uses its Overcharge or takes damage while using it (it takes the blow for him). Also, while Nico is constantly developing new ones, the big hitters or more

* It's mentioned that Chief Lin Beifong once tried to have Pema arrested after winning over her old boyfriend Tenzin. Later,
* It's mentioned that due to the casualties suffered during the war against the Legion in
* It's mentioned that even King Verence knows about the still and maintains the secret, having long ago learned that the way to avoid the embarrassment of witches

refusing to pay taxes (or in this case, excise) is never to ask them.
* It's mentioned that Jiren likes to invoke this in his fights: encourage the enemy to use their strongest attack and then just tank the hit with his own absolute strength, thus demoralizing them. He's not an idiot though: Jiren is well aware of the limits of his power and if an attack is actually a threat to him, he'll treat it seriously.
* it's mentioned that Lucrezia Fisher made Gilderoy Lockhart get rained on for forty days and nights after he cheated on her.
* It's mentioned that members of the Race have a support group of sorts for those who have traveled the stars.
* It's mentioned that Ork camps can easily be sneaked up on by bands of Chaos Marines, since seeing intruders makes all Orks "WAAGGH ATTAK!" rather than "raise alarm." Gunfire doesn't attract much attention either, since random shots are the norm rather than the exception.
* It's mentioned that planetary gravity prevents entering/exiting the Warp, so ships need to emerge at the edges of the system and coast towards the planet. How often this actually applies, and the distances (
* It's mentioned that Quirks can occasionally evolve due to trauma or great need. Shigaraki had been subconsciously repressing the full potential of his Quirk (
* It's mentioned that Saki is extremely beautiful and would attract men by the dozens even
* It's mentioned that some people have tried to create land-based wormholes that tap into underspace. These actually work, in that
* It's mentioned that the Atlesian military has its own fictional counterpart to the
* It's mentioned that the Grey Wardens were originally exiled from Ferelden after a failed coup lead by Warden-Commander Sophia Dryden against King Arland when the other nobles begged her to depose him for being completely out of his mind. Avernus mentions having attended a feast where Arland nonchalantly presented the Teyrn of Highever's head on a platter, as a warning to the other rebellious nobles.
* It's mentioned that the ship having microgravity is why the populace are so fat and weak but WALL•E and EVE don't move any differently than they did on Earth.
* It's mentioned that they attempted to use Slipstreams for FTL radio, but that it didn't work very well, so they went back to couriers.
* It's mentioned that when Shirley tried to explain the facts of life to Keith, he ended up correcting her.
* It's Me or the Dog) but not this one. This is Pugsley, the bully. Treats the family home like a public loo. And he's a sex addict."
* It's Me or the Dog jump up and slobber all over people is an important step in proper dog behavior, since a lot of people are dog-phobic and a sufficiently-sized pooch can cause harm just by being "friendly".
* It's Me or the Dog often deals with large, rowdy breeds. According to Victoria, the dog does this because the owner's skittishness can be felt through the leash, leading to a vicious cycle of the dog going faster and the owner becoming more anxious. Especially pully dogs are dealt with by a full head harness.
* it's merely the very organised way in which he processes and views information within his own head, rather like Sherlock himself, and foreshadows the ending of the episode.

* It's mildly implied in-game, and later confirmed in her character bio, that Carmen is hot for Esau in
* It's more accurate to say that energy weapons are useless against small ships. Those ion beams and plasma launchers of bombers, are very effective against frigates and capital ships.
* It's more armor than a uniform, since the Vader design was based on
* It's more blatant on the current syndicated version, which also has families playing for points instead of cash. Its ratings have quadrupled since Steve Harvey became host, but the Fast Money prize of $20,000 remains unchanged since 2001. Fast

Money losses are
* It's more common for this to happen to pets than to children; it's advised not to let a small dog out unattended where there are hawks or eagles, since a fenced-in yard, as good as it is for preventing some forms of harm to your dog, won't actually stop a bird. Great horned owls have a particular taste for cats, and are potentially large enough to carry off a small kitten. Of course, they generally
* It's more curled than sticking straight up, but every incarnation of
* It's more insane than that. When she first saw a photo of one of the members (he bore a very close resemblance to her favorite character), she instantly declared she was going to marry him and transfered to the school. Keep in mind the school is in Japan and she lived in Paris.
* It's more likely he found a very nice, idyllic town as a young man, but simply felt like he didn't fit in, or that he deserved more challenge in his life so he left. Everyone being barefoot and that business about expecting his arrival might've been minor occurrences he blew out of the water or simply made up entirely. No Reveal was made about the town's secret because there wasn't one.
* It's more likely that Mason had thought the purple post-it meant that Rube had found out about him
* It's more obvious a subversion with Treize, since his ultimate goal is
* It's more of a joyride between two good friends, but Commodus and Livius playfully race each other in the opening scene of
* It's more of a locational version. It doesn't quite line up, but it's the closest we have.
* It's more of a love/extremely close female friend dies mid-season to spurn the protagonist to greater heights, though almost exclusively in early UC and
* It's more or less spelled out that he intended Nathan to become a leader of men, to unite people and guide a world horrified by the destruction (with Linderman as the power behind the throne). Sylar, DL, and Nikki, and Nathan himself, proved more unpredictable than Linderman thought.
* It's more prevalent in the earlier seasons, especially when used on Bender. For someone who's a robot, these are the only instances in which he actually... looks robotic.
* It's more successful than anyone expected, and becomes necessary for survival after
* It's more than common for mental health professionals to be suffering from mental illness themselves — due to either their experience with mental illness is what brought them toward its care or constant proximity to mentally ill people (especially sufferers of PTSD; having the heart strong enough to willfully work with such unfortunate population is a gift). Like all clinical professions, being mentally fit is vital to the proper care of the patients and such individuals should ensure that they stay in one piece. Affective dysregulation can be left unnoticed for an entire lifetime, but being trained to diagnose them can enable clinicians to make actions to prevent them from worsening.
* It's mostly averted though in that both Katara and Toph have been seen to run out of bendables, in one case leading to Katara doing some rapid exercise so she could sweat to make her own.
* It's mostly only colony worlds that retain numbered designations: Epsilon 3, Proxima 3, Deneb IV, Vega 7, Orion 4, Orion 7, or the disputed Centauri colony at Ragesh 3. The only exception is the name of Centauri Prime, but it's possible that this is a back-designation and there's a "New Centauri" somewhere in the Centauri Republic. Minbar is also known to humans as Chi Draconis VII.
* its mother film also shows that the series is set on a landmass that highly resembles Europe and that Corona is located where Germany would be.
* It's My Birthday Too Mouse flees the room after Harry is cleaning up after a fight with a slime golem.
* Its My Life had a game called "You're in Charge", in which you were in charge of many things, including babysitting a dog named Sailor. If Sailor whined, that meant she was about to pee on the floor unless you put newspaper down.
* It's My Life (Imomushi Narita): Played for laughs in one bonus chapter where

Kyuss and Noah try to claim ownership over Astra. The argument's quickly settled when both realise that they're aiming for different positions in Astra's life.
* Its My Life, when Sailor the dog whines, it means she needs to pee and will pee on the floor if you don't put newspaper under her.
* It's My Party and I'll Die If I Want To is set on Halloween, which is also the protagonist's birthday.
* It's My Party and I'll Die If I Want To: It's not made abundantly clear what happens to Sara, but she's dragged off by a ghost and blood splatters on the door she was near, so she's probably dead.
* "It's My Party" by Lesley Gore (at that time, a 16-year old New Jersey schoolgirl taking voice and piano lessons) was produced and recorded, vocals, orchestra, brass section and all, as a demo recording in a small four-track studio in New York City by a young Quincy Jones over the course of a day and not meant to be released commercially. That changed after
* It's My Party, without ever addressing the question of why she wanted Johnny back in the first place, after how he treated her.
* "It Snakes A Village". Played straight with Gene and Louise, who questions the sounds of the elderly at the retirement home. Subverted with Tina, who bluntly suggests they stop having loud sex.
* It's named after the "Duck season! Rabbit season!" argument in the short
* Its name was originally planned to be "Rustica", but someone pointed out that given Fiat's reputation for corrosion, a name containing the word "rust" shouldn't really be considered for any of the brand's products.
* It's near impossible to find a Lutece fan who doesn't ship them together. In fairness they're not really siblings, but
* it's necessary, because some juices in their pure form can be unpalatable to drink (like cranberry or lemon juice).
* It's never actually mentioned what happens if you try to fire a water-logged plasma cannon, although circumstantial evidence would seem to advise against it. Firing a plasma cannon underwater makes it explode, but for slightly different reasons.
* It's never actually said that Michael is the only descendant, the Lycan's are specifically looking for a descendant who is a "pure enough source of the bloodline", ie. he's just more closely related to a specific common ancestor than the other people they've tested so far. He's not even necessarily special in any way, there could be plenty of others as close or even more closely related, he just happened to be the first one they found who was suitable for the experiment.
* It's never been like that, it's never been like that, it's never been like that, it's never been like that, it's never been like that, it's never been like that, it's never been like that, it's never been like, I know!"

* It's never been stated how far Camille Leon can go while shapeshifting into males.
* It's never been stated what happened to the real Percival Graves in
* It's never elaborated on whether it's the person's literal heart or something more magical in nature, but one theme is
* It's never explained exactly why the Doctor has such a soft spot for humans in particular, but this may be due to the fact that his teenage granddaughter, Susan, was a fangirl of Earth and wanted to go to school with humans, and he picked up his first human companions, Ian Chesterton and Barbara Wright, Susan's teachers, while hidden on Earth so that Susan could attend school. Their influence changed the Doctor from a rather amoral, aloof jerk to a hero.
* It's never explicitly stated, but it's implied that Walter and Lyn's relationship is this in
* "It's never lupus": Except for the two later-season episodes when it is. He drops the phrase after the second one.
* It's never made clear if Robert Reynolds's agoraphobia is a symptom of the serum or something he already had. Regardless, he's developed much more severe mental problems from being the Sentry.

* It's never mentioned again used as a setup for an Incredibly Lame Pun on "moor" and "more".
* It's never particularly dwelt upon (the woman in question dies minutes after announcing the fact, and everyone has more imminent problems to worry about), but towards the end of Leoš Janáček’s
* It's never really explained why he would want to do this. The implication is that it was to make the Doomslayer as powerful as possible, except that the Doomslayer was originally just a really tough and skilled, but still merely human, Marine, and only gained supernatural powers after Samur blessed him with them, and even then he's not some kind of Physical God
* It's never really explained why there just happens to be a Kung Fu school in the middle of a 6th-century English town, in
* It's never really specified what form of locomotion Carbosilicate Amorphs of
* It's never resolved whether Miron and Laurin managed to escape the Snarl, although it's not likely.
* It's never said in the film if "Daikini" is one that Nelwyn's have for larger beings.
* It's never satisfactorily explained how the Federation reconciles its multiculturalism with its humanism. For a race so assured of their own superiority, the humans sure put up with a lot of barbarism.
* It's never seen but a blockade going on somewhere in Central America is constantly referred to in
* It's never shown on-screen but one of the TIPS mentions that in an offscreen arc Mion once did this. She was jealous of the attention Keiichi was getting from others and killed the "competition". This is the only reference to Mion ever killing someone.
* It's never specifically said, but this was no doubt the reaction of
* It's never touched upon in the adaptations but Raoul himself spends half the book being a Crazy Jealous Guy over Christine having been separated from her at youth. Raoul follows Christine around, listens at her door, goes inside her room, and has a

* It's nice to hope that Grodd's mutineers in "Alive" (Shade, Blockbuster, Copperhead, Fastball, Rampage, Goldface, etc.) might have survived. This is made somewhat plausible by Luthor giving the order to jettison them after they're frozen but before his ship is blown up. Additionally, the episode "Epilogue" implies Parasite, who is part of that group, is still alive forty years later).
* It's no coincidence that two of the most common "curses" which folklore alleges can be inflicted via supernatural means are "breath stealing" and impotency. Directed against someone with even a minor predisposition to allergies, asthma, or an active respiratory infection, the sheer anxiety of

* It's notable that only a small percentage of superheroes gained their powers deliberately; usually it was a
* It's notable that "secret" in real life does not necessarily mean "Earth-shattering revelations here". If you dug into the CIA's secret files and warehouses, most things you would see would only really make sense to other people who work in intelligence and not the common man, who would typically scratch his head at some things. For instance, you may find a report on the eating habits of a foreign leader — while it isn't a secret that everyone has different eating habits, the reason it's secret is that someone did work to find that info (probably undercover), and it's handy info to have should they ever want/need to covertly
* It's notable that the description of the "chicken" is identical to "Chicken Little", a being made of cloned chicken cells from the sci-fi novel
* It's notable that the people who defy this rule are generally the ones that the otherwise eternally quarrelsome Inner Sphere band together against—most recently Clan Smoke Jaguar after they razed the capital city of Turtle Bay from space and the Word of Blake after they freely began nuking and biohazard/chemical bombing pretty much everyone.
* It's notable that the US album was considered for release in the UK at the time, but it was felt the double EP was better value. However, demand for the US version was so high that it became a canon UK album when reissued in the 1970s, and many people forgot about the EP. Despite this, there are still fans who don't see it as a proper album.
* It's notable though that she's also like that around people she absolutely genuinely cares about such as Gilgamesh or her employer, in which case her affable personality is actually genuine and sincere friendship.

* It's not clear if she really thinks she's a little girl, feels compelled to act like a little girl, or is just taking on the persona of a little girl. If the latter is the case, then she seems to keep up the act 24/7, as she's never been seen out of character, even in private conversations with her brother.
* It's not clear if they look anywhere else besides Hungary. The novelization mentions that Michael's grandfather emigrated from Hungary to the US and Anglicized his name from Corvinus to Corvin. Michael only decided to go back to the Old Country after his wife died. It may have been sheer luck that the Lycans have found the right person.
* It's not clear in the Earthforce ranking system whether Major ranks higher or lower than Captain (there is evidence for both), and the same service appears to have Colonels, Captains, Generals, and Admirals. Some but not all of this is explained by the difference between Marines/Infantry and Fleet officers. It's also not clear what Mr. Garibaldi's rank is except in supplemental source material, where it's given as Chief Warrant Officer.
* It's not clear what exactly happened at Blackwater. From what information is gathered, it appeared the heist was going well before they got into a shootout with the Pinkertons and Dutch killing an innocent girl. Javier says it was chaos but tries to downplay Dutch killing the girl, though John disagrees saying Dutch and Micah were acting crazy. It's possible that Micah goaded Dutch to kill her. It's also possible that Dutch murdering the girl is what caused the Pinkertons to swarm the gang, but it's also likely the gang could have been set up from the start. Dutch's speech at the beginning of the game could be found written on a piece of paper, making it sound like he knew it was going to be a bloodbath but one wonders how he would have known that.

* It's noted a few times that Leif and his army do not have enough resources, and need to scavenge weapons to survive. This is an actual mechanic, involving capturing the enemy and taking their weapons. The same conversation also points out that many of the soldiers Leif's army is fighting are just conscripts fighting for their country,
* It's noted in book 1 that Sid occasionally wipes down with hydrogen peroxide to keep himself clean. In book 3, he applies this to the same function as Brain Bleach, asking for a skull bath because he's just gone through six months worth of posts from the "Devil's Divas" group (dedicated to their cyberbullying plans) and it made him feel dirty.
* It's noted in "The Bicentennial Man" that Andrew was the result of a production error. US Robots tightens their controls as a result to prevent it happening again since expressive robots who want to be human are bad for business.
* It's noted in the game and novel that animal life is held in higher regard than

humans — considering Crystal's reaction is nearly identical to walking in on a murder of a child.
* It's noted in the Wraith Squadron books (after one of the pilots essentially has a nervous breakdown in flight and nearly kills another pilot) that because of the war and the Rebellion/New Republic's need for pilots, it's possible to survive incidents that would absolutely get you canned in less troubled times. Since the Star Wars galaxy is pretty much in a permanent state of crisis, military mavericks thrive in it.

* It's noted that Gandhi's calm and peaceful leadership is the only thing keeping the Indian independence movement from breaking apart due to infighting between the Communist wing and the various religious/nationalist groups.
* It's noted that if he's romanced, this trope is also in play for Alistair; the PC is the first woman his own age that he's ever really known, due to his sheltered upbringing and the fact that she's the first female Grey Warden in Ferelden in a couple centuries.
* It's noted that in the East Blue, regarded as the weakest of the four Blues, the average bounty is 3 million; a bounty of 10 million or more would be noteworthy. In the first half of the Grand Line, one hundred million or higher is considered exceptional; in the second half, that same number is considered common or weak, and it's hard to surpass three hundred million. It's also noted that any bounty that goes to one billion or over is considered monstrous, even in the New World.
*), it's noted that people who get superpowers don't look any different, and the narrator muses that "We don't even know if you gain anything from working out when you have these abilities".

* It's not equal, though. Only the faction that completes the project before any other gets to have its people transcend as independent, thinking entities. All others will be absorbed into Planet's mind, all sharing in the group consciousness but unable to think for themselves.
* it's not even a secret. She is, instead, convinced that Ultra-Car — who is exactly what they sound like — is Amazi-Girl. The insane lack of sense this makes is lampshaded regularly.
* It's not even just the history, it happens within the books. The Shaggy Man meets Polychrome for the first time twice, merely because Baum forgot he had introduced them in the same book.
* It's not even limited to the Saiyan characters, either. Yamcha, for example, has hair so unruly that he probably breaks hairbrushes just trying to keep it in order,

* It's noteworthy that most monsters in the story are entirely sympathetic to the existence of Ilias Kruz, their aims of omnicide against all monster species (which would destroy humanity as well, but it's not their fault they aren't allowed to discover that), and even their brutal tactics as entirely fair given the natural advantages monsters possess. They revile the group for its
* It's not exactly 'contemporary', but there is a theory that the legends of ogres, trolls and such stem from encounters with small groups of cavemen that survived into historic times. However, thus far there's no evidence for this survival past their accepted extinction period.
* It's not exactly sure how to spell the string of gibberish that Burt Campbell spouted off whenever he was faced with his granddaughter Wendy. The letter "L" would definitely be used heavily, though.
* It's not explicitly stated, but in "Sweet Seymour Skinner's Baadassss Song", Skinner's commanding officer appears to be much too young to be a full colonel. Also, his proudest military action was securing a Kuwaiti department store.
* it's not for a good reason — the first-ever instance of a #16 seed doing so since the NCAA men's tournament expanded in 1985 (#1 seeds were 135-0 prior to this). Thus a great season became lost in the narrative of being the ignominious recipient of the biggest upset in the tournament's history, and one of the biggest upsets in all of sports.
* "IT'S NOT FOR WOMEN!!", what with all the Jeep-driving and explosions, but the intended comedic effect is lessened by the fact that the "joke" really has no context and makes no sense.
* It's not framed by explosions (unlike everything else in the show), but Kamina and Yoko's first
* "It's Not Funny Anymore", originally by Hüsker Dü, was covered by Lifetime on their "Hello Bastards" record. Since the song is prominently in the middle of the record, and fits in so well that it's a cover is usually completely unknown to anyone who hadn't heard the Hüsker Dü original, which is quite a few as it's one of their more obscurish tracks from a rather ignored era. (Not to mention that "Hello Bastards" is today considered a melodic punk classic while Hüsker Dü's "Metal Circus" was greatly eclipsed by their later works.)

* It's not hard to see why Ramsay and Myranda like each other; they're both repulsive sadists and merciless killers.
* It's not. Hayasaka took care of the original writer months ago and the current one was actually written by Kaguya herself as part of another one of her schemes to get Shirogane to confess.

* It's not just explosives: after the war, the allies simply dumped much of Germany's chemical weapons stockpile into the sea. Fishermen in the Baltic Sea still occasionally dredge up corroded, leaking shells full of still potent gas.
* It's not just for razor blades anymore: Oral-B toothbrush commercials are quite simply, ludicrously epic.
* It's not just Hawking. Anyone who speaks using an artificial voicebox has no choice but to use a monotone, as the mechanism doesn't allow for inflection and tone. Later, Hawking was offered improved software that could affect tone better and use a more appropriate accent; he turned it down because the synthesiser is recognised as being his voice.
* It's not just him: Evangelyne once attempts to lead the group away from one such problem, since they are on an urgent quest, but finds herself unable to leave them to their fates.
* It's not just invisibility, either. Hermes spots Apollo, despite his appearing in disguise, because Apollo apparently has a habit of re-using faces.
* It's not just Jack. Often someone(usually Chloe) will be fired from CTU, only to be brought back later in the day because (presumably) no one else there knows how to use a computer. In fact, operatives have broken the law and still been brought back because they're the only ones who can do whatever it is they do.

* It's not just the Chargers. Every professional sports franchise in San Diego suffers through this. In forty-plus years of playing, the city has claimed only one championship, the 1963 AFL Championship by the Chargers. The Padres are 0-2 in the World Series and all Basketball teams that come to this town (Rockets, Conquistadors, and Clippers) have had short lives. It's so bad in San Diego, that someone made

* It's not just the marathon. In Svalbard, you are required to carry a rifle while outside a settlement for self-defense against polar bears.
* It's not just the regular shows-an airing of the Nina Needs to Go! "Wedding" short bleeped out the last word in the sentence "Speak now, or forever hold your peace", and an early airing of the Big Block Sing Song short "Happy" bleeped out "sunshine" in the line "With all this sunshine, it's a beautiful scene".
* It's not just the trio. In the first movie, Mewtwo blows up Viridian City Gym, which Giovanni survives, while all the scientists who created him are killed when Mewtwo blows up their lab in a similar explosion. In
* It's not just the whackjobs confessing: it's well documented that police can get

false confessions out of people they honestly believe to be suspects by wearing them down in interrogations and/or scaring them. Despite all the times this happens, some juries, police and prosecutors
* It's not just Turians who have a problem. It's actually a major problem with humans in the galactic society: because they talk in a lot of slang, shorthand, and metaphors, other species are utterly perplexed by this manner of speech. For example, an asari socialite in the
* It's not just useful for padding, either: double-spacing at the ends of sentences helps to visually distinguish one sentence from the next. This makes proofreading their paragraphs slightly easier for the student, and assessment of the finished product's content and grammar
* It's not just whites who are into the fad; the "Mardi Gras Indians" are mostly black.
* It's not just with missing limbs, the Naruto characters in general seem to have an inhumanly high tolerance to getting thrown around like ragdolls. Even being pulled out of the air by the ankle and hulksmashed into the hard earth repeatedly did very little to stop Kakashi in episode 85.
* It's not just with those guys, either—Noah had an insane bit of laughter like this in his arc, after which he temporarily believed himself to be Seto. He snapped out of it pretty quickly, though.
* It's not killing, but turrets are implemented as ordinary NPCs that are prevented from moving with a stupidly high immobilization debuff. A sufficiently patient player can stack immobilization protection on one until it jumps off its pedestal and goes wandering around.
* It's not known exactly why, but Cosmo will have a breakdown hearing the words, "Super Toilet."
* It's not like anyone seriously fears the extreme case ("having silicon in your nervous system" makes you psychotic or robotic). However, modern science still has a long way to go before it can disprove the more moderate case, that extensive use of cybernetics in one's body can change one's outlook (which is very likely, since all other known processes that mess with the brain can result in personality changes).
* It's not like Bart did it for malice, though: ever since he woke up for April Fools, Homer had been tormenting the living hell out of the boy. He just didn't think his act of revenge would be such a
* It's not like Bart didn't know already however. Although he possibly doesn't remember due to his age at the time.
* It's not like other countries are being devastated for shock value, either. The show just happens to be set in Japan, which also suffered its fair share of destruction, albeit not as much as China.
* It's Not Like That, Darling thoughts... A tolerably good romantic comedy, as such things go.

Too relieved to be embarrassed, Selina starts to awkwardly laugh as well, mentioning: "For a second, you really frightened me" - just before Max turns on her in a rage and shoves her through the window, sending her falling several stories to what he is sure will be her death.
* It's not limited to armor either: Commissar Yarrick owns a pimped-up
* It's not limited to cities. There's also seven counties in the United States to share the same name as the state they are located in:
* It's not limited to the Imperials, either. The Word Bearers and Alpha Legion Chaos Space Marines are on less than speaking terms. Exchanging bolter fire is more likely. The Legions devoted to each Chaos god also have appropriate rivalries with those who serve the god who their god particularly hates. For example, Khornate World Eaters and Slaaneshi Emperor's Children do not like each other very much. Same goes for Tzeentch's Thousand Sons and Nurgle's Death Guard. Only rarely will

they co-operate in any capacity, and will fall back on killing each other once their alliance falls apart. Only Abaddon the Despoiler has much success with that.

* It's not quite clear if Ruphas' world is an entirely distinct one in its own right that influenced the protagonist and the game or if the background details of the game and taking things to their logical conclusions caused it to become more complex than the protagonist thinks it should be. Basically, what really happened with, say, Aries' recruitment? Did Ruphas Mafahl find a legendary but weak sheep monster and teach it to stand up for itself before adopting it or did a random Japanese teenager find a rare spawn monster that just sat around looking dopey until he started taming it, causing it to ineffectually attack him once before submitting?

She does identify as Catarina, have her memories and her father thinks she's similar to her mother, but she seems unfamiliar with some really basic things that Catarina ought to know. But then again Catarina was always as dumb as a box of rocks, now she's just dumb in a different way.
* It's not really clear whether the scene at the end of the second season of
* It's not really her fault that she leaked Bradford's true allegiance to the triplets since Bradford did not enact radio silence, and she was just doing her job trying to find him for extraction. Flying a helicopter with their organization's logo on the side clear and visible so that Scrooge himself can see? Absolutely. What's worse is that when Bradford expressed indignation at the screw-up, Heron sarcastically asked if he would've preferred she fly in an unmarked helicopter. Bradford, naturally, retorts with a big fat "YES!"
* It's not really that indicative, though, at least between Elite Master and Nemesis. The player is about equal to a signature in health (less for some classes, like lore-masters), but are pushed up to about the strength of an elite by their advanced human brains and their much larger array of moves. A normal enemy has about 50% of your hitpoints and a swarm has about 25%. Generally, each level is about twice as powerful as the last, up to Elite Master. The line between Elite Master and Nemesis is INCREDIBLY blurry. In the first part of the Great Barrows, a 6-man instance, you fight an Elite Master who's REALLY tough, and you'll probably be wiped out several times. In the 6-man version of the fourth skirmish, Thievery and Mischief, you fight three nemeses at once as a boss with relative ease.
* It's not really that the order couldn't be rescinded — but if Spandam did it, he would basically admit that he committed a VERY stupid and careless mistake. Protecting his reputation is more important to him than the fate of the island.
* It's not revealed until much later, but Alternate Milla asks about Jude and learns of his father's former job in Exodus. While Jude isn't told this directly, nor did we see Alternate Milla's dimension for very long, she admits to herself that she must have killed Jude when he was a baby in her dimension.

* It's not uncommon for newborn babies who undergo vaginal birth to come out with a so-called "cone head", which is caused by the baby's still-soft skull being forcibly pushed through the narrow birth canal (and, possibly, whatever tools are used to extract them from it). While extremely odd-looking, this condition is not harmful to the baby and will resolve over the course of a few days.
* It's not uncommon for roleplaying games to deliberately aim at this trope while avoiding the
* It's not uncommon for Sam or Dean (and probably all hunters) to swipe a car from time to time when they're in a pinch, although it's usually a case of just generally needing a form of travel than needing one immediately during a chase.
* It's not uncommon for scientists or nature documentary filmmakers to leave automatic cameras in the wilderness, only to return to collect the film and find the camera has been mauled by some curious animal. The recording, if recoverable, often looks like this. As an example,

* It's not uncommon in most games for an unevolved Pokémon found on an earlier route to have an evolved form that shows up in the wild on later routes.
* It's not uncommon to see posts on social networking sites with frightening subject matter, such as rape, abuse, murder, be prefaced with either CW ("content warning") or TW ("trigger warning").
* It's not uncommon to see someone open one of these in a large town or small city that really can't support it. Does your town have that one storefront that nobody ever seems to stay in for more than three years? This may be at play. Some shops may work fine in one place (like a chocolate shop in a city) but turn out to be far too narrowly focused when transplanted to a more sparsely populated area. If you can draw in customers from other towns, you may be able to stay afloat. And even if the area can support one such shop, if someone else inspired by your success tries to start up one of the same in a nearby town then there will likely be trouble for one or both of you. The same if you expand and find out the market isn't there for a second shop.

* It's observed in powerlifting that the lighter weight classes will lift more weight as a percentage of their actual body weight than heavier weight classes. While the 300+ lbs super heavyweights can squat 1000 lbs, 150 lbs and under weight lifters can approach squat weights nearly five times their own bodyweight. This is probably because the lighter lifters are generally much shorter, and their short bones cause the weights being lifted to act across a shorter lever arm, making it easier to lift.
* It's obvious from the first episode he's in that Garak has government connections, knowledge of terrorist operations and experience with covert activities, but he insists on denying that he's a spy. Even after Dr Bashir has met the person who recruited him into the Obsidian Order
* It's obvious Princess Celestia adores Luna after she gets reverted from being Nightmare Moon, and Part 1 of "The Return of Harmony" confirms they were good friends before that (sharing the Elements of Harmony). In the Season 4 premiere, a flashback shows them doing just that: sharing the Elements of Harmony, to defeat Discord together.
* It's obvious when Miguel bails from his family that he's going to look for his great-great-grandfather. Imelda catches him minutes later leaving the station with Héctor. When Imelda finally catches up with Miguel, Héctor is no longer with him, a sign that Miguel has the wrong idea of who her husband is. This also seems to go right over her head.

* , it's obvious why, even facing Discord, it took her a while to resort to that.
* It's occasionally touched upon that Leroy Jethro Gibbs isn't particularly fond of his first name, such as when he refers to himself as "L. Jethro Gibbs" when recording an interrogation. He's almost always "Gibbs" or "Boss". Those who he considers to be truly close may call him "Jethro". And only those who knew him as a child may address him as "Leroy" and most of those have passed away.
* Its occurrence in the Screwy Squirrel cartoon "Lonesome Lenny" was not only over-the-top (with additional chasers and chasees being added at random, including a cow, a lech chasing a screaming woman, and various clones of Screwy and Lenny), but self-referential, as the cow briefly stopped in the middle of the chase to

* It's pointed out several times that according to dwarf law and custom, Carrot actually is a dwarf. This tends to disturb other dwarfs meeting him for the first time, because they know something's not right but can't quite put their finger on specifically what it is, since their definition of "dwarf" doesn't actually say anything about height. In the dwarf creation myth, the original dwarf and original human were created identical, and only physically diverged thanks to adopting different lifestyles.

So, she along with Pony go out to find various people around the city ranging from the landlord, Mr. Pancks, the park-keeper, Mr. Underwood, and even city sewerage person, Dave. Eventually, they boil

down to Mr. Gravlax after eavesdropping on him showing affection for Ms. Ramiro, and finally after many stunts to call attention to her, he wins the date. However, near the end of the episode it turns out her friends actually wanted to go to the dance, despite being hesitant about going to in the first place, so Annie and her friends go chase after them to the harbor where Mr. Gravlax's boat, Dora is beginning to depart. Ultimately, in the end, Ms. Ramiro ends up calling on the dance again and attends it with Mr. Gravlax after Annie explains the misunderstanding to her.

* It's possible for this to happen when multiple monsters are in the same area. Example: Qurupeco
* It's possible for Veronica to decide to leave the Brotherhood and attempt to join the Followers of the Apocalypse once she's convinced that the Brotherhood are too set in their ways.
* It's possible for your player character to be both a Fascist and a Communist at the same time (or, if you like, a Fascist/Communist/liberal centrist/free-marketeer, as the game tracks all of your ideologies on their own). If you finish the game with equal points in both Fascism and Communism, Kim will remark on how you want both a worker-led utopia and an immigrant-banishing absolute monarchy, and he has no idea how you manage to reconcile these two views. This is, of course, done to emphasise how ideologically shallow your character is.
* It's possible for you to have Ashe kill his adoptive father Lonato in Chapter 3.
* It's possible he just learned about it sometime in between the two instances.

* It's possible, if incredibly rare in Tolkien's world for a human to give up their humanity and become an elf, the same way that few rare elves give up their immortality. The will of
* It's possible (if you know the solution to the final two puzzles) to skip just about everything in
* It's possible that Anna was made a musician rather than an athlete in
* It's possible that Dracula doesn't realise that humans are not bound by similar rules about invitations; Van Helsing talks at some length about how Dracula is ignorant about the full extent of his own abilities (something which never seems to make it into the films), so maybe Dracula thought Jonathan required an invitation just like he would.
* Its possible that Green overlooked Elijah and Elisha and others, on the other hand, most Christians would tell you that no, Elisha, Elijah, etc. did not raise anyone from the dead. They were ordinary men, and had no supernatural abilities or nature. Rather, it was God working through them that brought the dead back to life; they were merely His instruments. Thus, Jesus (being God) being the only man that can bring the dead back to life is quite correct.
* It's... possible... that in the far future the loss and replacement of limbs is relatively common. See the
* It's possible that it's only visible to the viewer because we're seeing the show's universe from Dan's perspective, and he can read it just fine.
* It's possible that Jacket has this reaction because the hobo he kills was the first relatively innocent person he murdered.
* It's possible that the Autobots, Optimus Prime in particular, like and protect humanity because they're so small and weak.
* It's possible that the character Lanky Kong, a friendly orangutan, from
* It's possible that the only reason Jonathan Taylor Thomas was hired for
* It's possible that the Walking Man is more powerful than even other gods, as The Punk God of the Straight Razor
* It's possible that they could have gotten some clever concealment. What they might have been able to do in the episode about an indoor resort/water park was hide the cameramen in a crowd and disguise them as customers filming their family vacation. (Ask anyone who works at a resort; people do this
* It's possible that to demonic senses, which include aura vision and some telepathy, anybody with the magical and mental attributes needed to summon and bind a succubus (and retain life and sanity) is beautiful by definition, one way or another.
* It's possible that Yuuno remains a Non-Action Guy because his one demonstrated offensive ability, forcing someone to teleport off the field against their will, offers so many
* It's possible that zombie tropes may be partially rooted in events during
* It's possible the aliens' attack on Earth gives humanity a reason to produce such a weapon.
* It's possible they were a useful workforce earlier during the "setting things up" phase and some combination of bad contracts, unanticipated level of reproduction, and passenger transport turning out less profitable than projected meant when they finally should have been paid off, left and retired, they (and their descendants) ended up stuck instead.
* It's possible, though difficult on a first playthrough, to reach the second barrier in Tartarus before Fuuka is recruited. If you do this, Mitsuru's dialogue will have her complaining about how she can't see very well that high up, and worrying that her Persona isn't good enough for the job.
* It's possible to argue that under the doctrine of original sin — the notion that "everyone is equally guilty of sin from the moment they're born" — being born is itself the sin: one is automatically damned for the crime of
* It's possible to arrange a political marriage during the Landsmeet when resolving the question of who will rule Ferelden. This can be established either between
* It's possible to "beat" Ridley on the Ceres Space Station at the beginning of

the game. If you deal enough damage without taking too much yourself, he'll briefly drop the capsule with the Infant Metroid, only to grab it again and fly off.
* It's possible to bring that many units onto the field, but you won't be able to command them all. It just requires shoe-horning several 4,800-strong groups into the same corner. It also winds up being
* It's possible to build one (or 10, if you have the economy to support them) yourself in
* It's possible to create the Sheriff Star through badge synthesis in
* It's possible to disarm each guard and beat them to a pulp with your fists (but not kill them). Bad. Ass.
* It's possible to do a few events out of order, such as getting Sylvando back before re-recruiting Rab. He will appear in the Angri-La cutscenes and will react to events, but will have no spoken dialogue. He does have some things to say if you talk/Party Talk with him.
* It's possible to do this to yourself (or, well, the kerbalnaut you're controlling) in
* It's possible to force yourself into the Whirling-in-Rags secret passages with a very lucky roll before having spoken to Klaasje. Kim will still refer to Klaasje as
* It's possible to get an iPod connector cable with an embedded EL strip (in blue, green or purple) which lights up and gives an animated representation of the charge flowing down the cable into the iPod. When the device is fully charged, the light goes out.
* It's possible to get two Infinity Plus One steel swords, which are still practical because oils with different effects can be applied to each and the player can switch between them. It's also possible to get Infinity Plus One silver swords, but only one can be kept and there's only one optimal oil for silver anyway.
* It's possible to grow a money tree by planting a bag of Bells with a golden shovel or in the hole dug in a spot where the ground is shining, which will grow crops of bags containing an amount of money equal to how much was buried.
* It's possible to knock out or possibly kill someone with coconuts (individually or in clusters, respectively) in the Bangkok levels of
* It's possible to leave Sector 4 without collecting the Diffusion Missiles by doing an incredibly difficult series of Shinesparks. Doing so will award Samus with a secret cutscene where the AI
* It's possible to navigate through a YouTube video by using JKL. J and L rewinds by 10 seconds and forwards by 10 seconds, respectively; K pauses the video. People who spend their time on the site would likely have learned to use it over Spacebar + Arrow Keys because in the olden days Spacebar would only work if you had the video selected - otherwise, it scrolls you down the page. The downside is that in other video players, JKL does nothing. VLC media player is worse because JKL actually does something, but instead of navigation it changes audio delay (meant for videos where the sound doesn't match the picture). A recent change to YouTube made it so that Spacebar always pauses the video now, but JKL navigation is still preferred by some people since it only requires one hand.
* It's possible to play Shepard this way in all the games, usually of the "love is a distraction" variety.
* It's possible to purchase weapons made out of silver, which do slightly less damage than normal (read: iron) weapons, but which bypass the damage resistance of Vampires, Were-animals, and some extraplanar creatures. Supplemental books provide an oil that can be used to coat a weapon and give it "silver" properties without making the weapon weaker, but it's hard to use while in combat (so you'll want to use it just before a fight starts, if you can). Third edition calls it "alchemical silver", claiming that it's actually silver alloyed with steel so that it has
* It's possible to "reset" a boss during an ill-fated fight without all the players dying, and sometimes without any player dying.
* It's possible to trip someone up in saying this or "putting words in their mouth" so to speak if they're not focusing on what you are saying:
* It's possible when playing as a Spy to kill the player you are disguised as. In fact, you even get an achievement for it!

* It's practically accepted tradition that no matter how you got there, once you make it to the WWE, you're going to spend
* It's practically understood that cheating is part of the game as long as you don't get caught. And sometimes, it's still not considered cheating even if you
* Its preceding war, the First Indochina War was also this, and it was just as hellish. In the war's most famous moment, the Battle of Điện Biên Phủ, the French entrenched themselves and the Viet Minh besieged them and launched
* its predecessor, most Sin Eaters seem to believe that, now that they've already died once, there's no reason they shouldn't enjoy themselves till Death gets them again.
* Its predecessor was the AC-47, modified from the WW2-era C-47 Skytrain transport and cargo plane.
* It's presented as "Rebelling by following orders" and as a protest of their treatment as 'stupid' tools: If you treat a golem as something that doesn't think for itself, then it will act as if it doesn't; and if you give an order to (for example) dig a row of beans, it's not their fault
* It's pretty clear Oda puts a lot of his wife Chiaki Inaba into Nami, which is probably helped by the fact
* It's pretty clear that none of the female characters have human-like breasts, given the rather thin clothing that most of them wear. The series being as popular as it is with the
* It's pretty clear through the course of the show that cooking is the way Monica shows her love for all her friends, making it a platonic version of the trope. She absolutely loves being "the perfect hostess". One of the flashbacks in the series reveals that an infatuated Monica was convinced to become a chef after she made some macaroni and cheese for Chandler and he told her that she should become one.
* It's pretty common on WTNV. Intern Maureen is played by Maureen Johnson, Kevin is played by Kevin R. Free, and Lauren Mallard is played by Lauren Sharp.
* It's pretty common place whenever Fuhrer Bradley fights for him to
* It's pretty common to overdub vocal and instrumental parts for live albums and concert films in a studio in post-production for much the same reasons as looping lines in movies. For example, a guitar part might be re-recorded to get rid of feedback.
* It's pretty easy to figure out that the Weeping Monk is actually Fey-kind long before
* It's pretty hard, if not impossible, to think of main character from
* It's pretty likely that the Doctor killed his parents at the end of the Last Great Time War, although we don't really know whether or not his parents were still alive when he wiped out the Time Lords.

* It's pretty much mandatory, really. It's the default setup, and for whatever reason one-handed melee weapons (and wands, for casting spells) can only be used in the right hand while one-handed guns can only be used in the left hand. In order to use
* It's pretty much stated that one of SBURB's constants is that at the start of the game Jack Noir is the second in command to the Black Queen... and
* It's pretty much stated that the Others don't abide by human rules of courtship and fidelity. Just before discovering Svetlana in Ignat's arms, Anton finds two Others sleeping after a night of passion, both of whom have human spouses. He notes that two field operatives sleeping together is no different from a female
* It's pretty obvious that Captain Hook is Flynning on purpose in his fight with Emma in season two. He is, after all, a pirate with over three hundred years experience, and it is only the second time Emma has ever tried to use a sword in a fight. Judging by his taunts and absurdly embellished movements, he never had any

intention of killing her — it's even arguable that
* It's probably a combination of both aspects, as one videogame generation soldier mentioned that while combat experience was very similar to Halo, he was also exceptionally unprepared for it (relatively speaking) because it was
* It's probably a different one that was in the Jan/Feb issue (No 77) of
* It's probably a good thing that the narrator for that particular book was out cold during the battle, so whatever he did happened off-screen. Though others that have witnessed it made references to what happened, without going into any detail.
* It's probably also worth mentioning Sasha James, Not-Sasha-James, Sasha Rackett from the sister
* It's probably best known for its 1992 version by Swing Out Sister, which was #21 in the UK; while it only got to #45 on the Hot 100 in the US, it was a #1 adult contemporary hit.
* It's probably down to Jennifer Morrison having chemistry with half the male guest stars on the show, but Emma and August certainly seemed as if something was about to go on. Most of August's early scenes consisted of him flirting shamelessly with her and yet nothing came of it. It almost seems as if the writers retconned into a platonic thing, as August was
* It's probably more accurate to call this a subversion, since Catelyn isn't interested in Petyr romantically and
* It's probably more deliberate in the sequels. For one, director J. Lee Thompson admitting to modeling the ape rebellion in

* It's Probably Nothing within five minutes of each other? He probably gets it from his dad, who lets wandering weirdos stay at Camelot far too often for someone who's as paranoid about magic as he is.
* It's probably not much of a stretch to say that Simon Furman is the white
* It's probably useful to remember, in this section, that the difficulties of filming in a realistically cramped set probably put a lower limit on the size of corridors and other spaces.
* It's probably worth noting that in the new series, at least, when an episode takes place on Earth, chances are good the
* It's probably worth noting that the Apple.com splash screen, when the second-gen aluminium iMac was released, had a frame from that movie on the iMac's screen.

* its provisions allowed the landowners to reduce the serfs' rights of them essentially into slaves.
* It sprung forth two adorable characters, Marshmallow and Midget Apple, who were both introduced as minuscule, supporting characters in their first videos (esp. Midget Apple who only got one line), but grew to become two of the most iconic, beloved characters of the series.
* It's pulled again at the end of the second game. The villain gets away with it for a while, too, and this time without the awkward positive/negative questions.
* It's purely an aesthetic effect, though, as shooting someone in the head with the Enforcer doesn't do any extra damage.
* It's purely based on the reader which book they would prefer. Although it is understood that while
* Its purpose is suitably grand and epic... and also ends up completely pointless to the story

* It's Quiet… Too Quiet: If a character does actually think it's too quiet, they're not going to say it. If this trope does get used, it'll usually be followed immediately by something that's not actually a threat making a loud noise.

* It's quite easy to obtain Miskatonic University attire. Go Cephalopods!
* It's quite easy to tell in the Classic series when a Dalek is going to get a severe thrashing, because it stops twitching its eyestalk, gun and plunger beforehand, due to there being no human inside for obvious safety reasons. This is especially noticeable in the scene where the TARDIS crew and the Thals storm the Dalek city at the end of
* It's quite hard to fault Agent Bennet's fears and animosity for the titular synthoid from
* It's quite likely the Iconians are being built up as the precursor race; the scant few times they are seen, they disable your ship completely to demonstrate their godlike power, and later they obliterate Borg cubes effortlessly. Demons of air and darkness, indeed.
* It's quite possible for Ayano to become this herself, if she increases her reputation enough and hides her tracks well, many can regard her as a wonderful person and not realize that under that is a murderous
* It's quite similar in Mongolia, where family names are replaced by patronymic names.
* It's quite telling how bizarre this creature was when for several decades, scientists couldn't even figure out its top from its bottom and its front from its back! When it was first reconstructed, it was depicted as walking on several spiny stilts while having waving tentacles on its back. However, upon examination of other related species, they realized their reconstruction was
* It's Raining Men are Deep Strikers, not all Deep Strikers rain down into the battlefield—some of them teleport or burrow instead.
* It's Raining Men" by The Weather Girls has the singers and a bunch of men parachuting in via umbrella.
* It's Raining Men — Paratroopers have nothing to do with that song.
* It's Raining Men plays. The song cuts when the troopers remove their helmets, revealing that they are all women.
* "It's Raining on Prom Night" shows up only as background music on the jukebox during the scene when Danny confronts Sandy at the Frosty Palace.
* It's rare for ghosts to be able to possess people, but a few angry spirits are shown to have this ability.
* It's rare to see someone win back-to-back Daytona 500s. After Sterling Marlin won the 1994 and 1995 races, it took until Denny Hamlin in 2020 for there to be a driver who defended their Daytona 500 win with a second Harley J. Earl Trophy.
* It's rather common to hear U.S. media say something along the lines of "X states and the District of Columbia", due to D.C.'s weird status in regards to statehood—officially it's not a state and so only gets one non-voting

delegate in the House of Representatives and nothing at all in the Senate, but unlike US territories such as Puerto Rico and American Samoa (who get similar arrangements in Congress) the District is granted three electoral votes in the Electoral College (and this required the 23rd Amendment to be passed in 1961).
* It's rather easy to do this yourself, just open up a word processor document and let your imagination take off.
* It's rather more complex than that. An element of the classic story was that Hyde got stronger as Jekyll got weaker (Hyde's drives give Jekyll strength, while Jekyll's morals only restrain Hyde). By the time of the first League book, Hyde is a superpowered ogre because Jekyll is reduced to a sickly, emaciated wreck.
* It's rather more tragic in Sakura's route, where the love at first sight is completely destroyed. The method?
* It's rather well summed up in the scene where the main party is escaping and the Scotsman standing a few feet from the guard, with an arrow pointed at his chest says something to the effect of "Stay quiet if you value your life." The guard picks up his sword and yells "Traitors!" running at him. Before promptly being shot in the chest.
* It's reached the point where other people are starting to recognize her tendency to beat nearly godlike beings, with
* its readers to submit "painfully bad" analogies. Notably torturous entries included:
* It's really creepy how many guests like to pretend they're murdering or raping people in the form of android "hosts". Some of the androids start malfunctioning and realize what's going on, with one saying he that has to warn his "daughter" about the things they do with her, then pledging revenge on their maker.
* It's really more of a case of "Real Movie, Fake Trailer" but there's
* It's really not a bad car, just considered outdated by the majority of racers in the series. Takumi's character model, the original Drift King Keiichi Tsuchiya, started out with this car, and still considers it his favorite. Heck,

* It's revealed at the beginning of the novel that Yamata's reason for starting a war with the United States was because he was orphaned during World War II when his family chose to commit suicide during the invasion of Saipan rather than be captured by the Marines.
* It's revealed Aunt May was this in her youth, nearly getting wooed away by a jewel thief before Ben Parker stepped in.
* It's revealed early in season one that Rumplestilskin made a deal to get King George his son, Prince James. When James dies unexpectedly, and the king needs James to prevent a war, Rumplestilskin reveals that the family he got James from had twins. The king quickly grabs the twin, David, and forces him to play the role of his son. Oh, and David's nickname via Snow White?

* It's revealed in season 2 that Lieutenant Maria LaGuerta had an affair with Sergeant Doakes when they used to be partners and a pair of detectives, sleeping together while on stings etc. They broke up but stayed close friends.
* It's revealed in the end that Tama-Senin knocked himself out because he accidentally caused a bowling ball to fall on him.
* It's revealed in the first chapter that All Might, the world's foremost hero, was grievously injured in battle with a then-unknown villain (
* It's revealed in the "Previously On" episode of Season 15 that Sarge built a robot army to intentionally attack their base so that
* It's revealed later on that Monkey got his nickname when a pair of monkeys in a superhero brothel decided to violate his ears while he was shadowing Butcher.
* It's revealed later that although Magellan wasn't about to give up his post at the time, he saw Hannyabal as the only one worthy to succeed him, which may explain why he more often than not does not react to his Freudian Slips.
* It's revealed that after a fight, the children of the Purple Man decided to "help" Matt by using a machine to broadcast their powers worldwide, telling everyone to forget Matt Murdock was Daredevil and DD was a hero. Matt himself didn't realize it until he went to visit girlfriend Kristen in costume and she was thrown, asking him if he wanted to leave a message with Matt. He went to Foggy to unmask, which caused Foggy to remember but Matt decided it was better Kristen and everyone else didn't.
* Its revealed that ancient elves prior to humanity's rise were like this trope:
* It's revealed that Captain Komamura, whose face was concealed up to that point, has the head of a wolf. Some characters are surprised by it, but literally no one questions why he looks like that. It's (much) later revealed Komamura comes from a werewolf clan that was cursed for their ignorance a long time ago; the curse traps them in an animalistic form, and the further into ignorance they descend, the more animalistic they become. Full descent results in a member of the clan becoming a proper wolf.
* it's revealed that Carol is secretly still working for P.O.I.N.T., and possibly never even left in the first place, and.
* it's revealed that casual annihilation of any intelligent race that is discovered is entirely routine; they don't care about the damage their weapons do to the fabric of reality; and the universe is effectively a war ruin as a result of billions of years of conflict and the damage wrought by those weapons. The grand unifying universal sociology theory is built upon this rule.
* it's revealed that Chrysalis was created from the Shadow of Existence of the original Cadenza, while Cadence was made from her Light. This makes them "twin sisters", as Chrysalis puts it, making her the Cain to Cadence's Abel.
* It's revealed that Claire has a rebellious past (including being driven home by the police in her underwear) despite reprimanding Hayley for similar behavior. Hayley calls her mother out on this, and it cuts to Claire telling the
* It's revealed that Ghidorah regarded the terrestrial Titans it once commanded as

"lowly beasts" who have no higher purposes than being lapdogs to Ghidorah's whims.
* it's revealed that his father is trying to earn clean money in order to pay for an extremely expensive surgery that will save his life. His father doesn't want to use the money they have now because "it was the gangster life that nearly killed him", and he doesn't want to use the "money that nearly killed him" for the operation to save his life.
* it's revealed that that entire mission was a test to see if Steven was ready to accompany the group on dangerous missions.
* it's revealed that the Asari as a whole were uplifted by the Protheans so that they would be the current cycle's best chance against the Reapers. Unfortunately,
* it's revealed that the father of the child really was her unnamed Farmer consort/husband. After multiple chapters of her interacting with Eren in secret and even seeing a quick flash of her giving birth during one of the Rumbling chapters, many a fan theorized that the child belonged to Eren and he had some kind of plan to utilize their royal blood. But in the end the baby was born after the climax and nothing happened.
* It's revealed that the Klingons got a jump-start on their technology in the 14th century, when an alien race known only as the Hur'q invaded Qo'noS. After kicking them out (to the point where there are no Hur'q to be found), the Klingons appropriate their technology and embark on a quest to conquer the galaxy.
* It's revealed that the 'lead role' must die for the 'play' to end. The girl pulls a Heroic Sacrifice
* it's revealed the contract alters Saito's thoughts so he'll stay with Louise through suppressing his feelings about home as well as "conditioning" him into servility causing him to act fearless along with other compulsive behavior even though he's scared out of his wits and/or wouldn't have done them normally. Once the Mind Rape
* It's revealed the geth don't have any hard feelings with the quarians, and perhaps feel sorry for the quarians killed during the war. The geth don't mine the quarian homeworld, but actually
* it's revealed their deaths were in vain. None of them had to do with Satoshi's disappearance, and if anything they all liked him.
* it's revealed there was no Titan apocalypse, human civilization is still running up and well. A hostile nation called Marley is sending Titans in attempts to exterminate the peoples inside the walls, which are "Eldians", a race of humans that can transform into Titans. The whole story turns into a war between Marley and the Eldians of Paradis in the "Marley" and "War for Paradis" arcs.

* It's said that in America, they drive on the right side of the road; in England, they drive on the left; and in Naples, they drive on the shady side of the road.
* It's said that nobody is buying floral powder from Tenuto anymore because of the cheapness of the mineral powder. Yet just about every store in the game that sells items to your party carries healing powers that are described as powders made from flowers from Tenuto. This sort of segregation is probably also the reason why, once your party has a massive amount of Gold, Allegretto and Beat don't hand a bunch of it over to the kids in the sewers so they don't have to live there anymore.
* It's said that people become good workers for exactly this reason. They're in the habit of figuring out easier ways to get things done. As the joke goes "there's an easier way to do this, and I'll find it if it takes me all day." This can backfire though, as touched by an

* it's said that this becomes more widespread during economic recessions, when the industry is less inclined to take chances. Of course, these tend to be unusually slim, poised Girls Next Door, with perfect complexions.
* It's said that this is more or less how the relationship between Emperor Franz Josef of Austria-Hungary and his wife Elisabeth of Wittelsbach aka Sissi evolved towards the end of the latter's life.
* It's said this is the fate of anyone who jumps from the edge of the city of Sigil in
* It's scarce in canon thus far, but there's a non-canon example at the start of the Grand Line saga with
* It's seen throughout all versions of the series when it's noted that certain characters own things much nicer than any cop should be able to afford.
* Its sequel even used the tagline "A Film Noir Love Story". Which is somewhat ironic, given that the protagonist is much less cynical jaded in the sequel than in the original.
* its sequel for the remainder of the fight, effectively forcing you to continuing the battle short-handed. Curiously, they're not worse off after end of the battle than dead members.
* its sequel once all three main game factions have been subdued. Both the LMB and Black Tusk serve as the primary endgame enemies in their respective games.
* Its sequel series played with this trope through various characters:

* It's shaping up to have at least some elements of this in A New Day of the
* It's Short, So It Sucks!: A video game is considered bad due to not taking too long to finish playing.
* It's should be noted that all the doctors in the book are mysterious and scary figures and we never see their faces.
* It's shown in the last episode that each of the sisters will have three children each, who will be trained to follow in the footsteps of the previous generation.
* It's shown that his first relationship with a student was mutually consensual but seriously unhealthy, and he was the one to quit it since the girl was an even bigger creep than he, and he was seriously afraid for his safety. He really should have learned his lesson that time, considering Anri's big secret.
* It's shown that Sam and Bobby both drink a lot after Dean's death by hellhound at the end of season 3. Bobby, at least, has been hinted to be avoiding alcohol

now, but with the whole Apocalypse, Sam using his powers, and Dean's memories of Hell, the boys have still been drinking in a not-so-healthy way.
* It's shown that the characters are still learning and developing their understanding of those rules: Metalbending was only discovered in the original series by Toph due to her
* It's shown that the ghosts you encounter in the game all died extremely bloody and gory deaths as children. For example all of them had their tounges cut out, one of them was decapitated, and one of their deaths was so morbid and graphic that the news article you originally read about the murders in omits it from the article.
* Its shown that vampires are actually capable to reproducing naturally with several being established to be born naturally such as David and Lena. They are even capable of breeding with lycans and producing hybrid children such as Selene (vampire/Immortal hybrid) and Michael (half-Lycan/half-vampire hybrid) giving birth to tri-blooded hybrid Eve.
* It's Showtime, starts out with chaotic fast notes, creating a feeling of overwhelming power. However, the more "magical" elements from "Dimentio, Charming Magician" slowly come in, and this trope comes into full effect later (0:47 in the linked video), as the song switches to a dark waltz-like reprise of "Dimentio, Charming Magician"'s main melody.
* It's similar, but I wouldn't call it exactly the same thing — it's not so much a minor element
* It's simultaneously averted and played straight (by Yue and Aang respectively) in the season one finale (which, coincidentally was aptly named "
* It's simultaneously the cause of and solution to every plot hole ever in Transformers - past, present, or future. It's best not to think about how that works. It's probably a case of "Break it I did. Fix it I shall".
* It's since been shown that all AI are the "seed" type, but most originate on quantum computers that can't be copied and have blocks (which can be removed) to prevent them from getting too smart.
* it's singer look look a complete idiot. The song in question is, of course... "Starships," which at that point was already two years old.
* its sister series. There were even cases of Khorne sending his daemons after servants who had offered him the skulls of noncombatants or other equally "unworthy" opponents. While this is no longer true of the vast majority of his servants, Khorne himself is still usually portrayed as honorable, and he refuses to allow his servants to use psychic abilities as they would be unfair. He is generally suspicious of Tzeentch, the god of sorcery and secrets, for the same reason.
* . It's Sithly in nature (even when it's necessary to kill, a Jedi shouldn't feel a desire to mutilate his enemy's body), hence Jedi almost never use it on sentients. Jedi Master Cin Drallig, however, expresses the opinion that when fighting a Sith Lord, no technique should be considered off limits to stop the threat they represent.
* It's Snowing Cocaine: Cocaine is shown in large (unrealistic) quantities.
* It's so bad that, upon needing to take one of the human companions back there for something, tough-as-nails
* it's so basic an ability to us that we amuse ourselves by skipping rocks, shooting paper balls at garbage cans, or tossing balls at milk bottles in order to win large stuffed animals. And yet that simple ability is something that absolutely no other animal on the entire planet, including our closest relatives, can do, or ever did before our own ancestors. Just one of the many unique benefits of opposable thumbs and arms designed to throw things.
* It's so common with long-running newspaper strips that there's a term for it: "zombie strips" (or "legacy strips" if you want a less derisive term). Indeed, it tends to be a bigger deal when popular strips
* It's so difficult to use, in fact, that only three people in the game use them: Squall, Seifer, and Laguna (who only uses it as an awkward sword). Seifer uses it because it matches his fantasy, and there's some in-universe speculation that Squall uses it

* It's so important to the setting that one console RPG version even had a pretty cool in-game metal concert with lyrics... On the SNES!
* It's something that's easy to forget because Quark and his family are the main Ferengi in the franchise. Seen throughout TNG (even in the
* It's something to do with fire hydrants and enigmatic blue liquids?
* It's somewhat important to note that Second Impact's name comes from it being an asteroid impact
* It's somewhat justified in the case of HAN-D (a robot handyman) and MUL-T (a repair robot), the former because a handyman may need to be very strong in order to lift or move any heavy objects and the latter because buzzsaws and nailguns are things that a mobile multitool would logically have and would be fairly easy to weaponize. No explanation as to why MUL-T has a stun grenade though.
* It's somewhat less common for Anna but she, too, usually can hold her own in a friendly
* It's somewhat of an invoked trope in-universe, as the Legion's usual naming convention is a deliberate imitation of their 20th-21st century inspirations:

* It's stated in the pilot that the time dilation effect was amplified by the usage of
* It's stated in the story that Materia can form naturally, and such Materia is said to be rarer than man-made ones (they take at least
* It's stated in-universe. The author created the characters with their personalities, and he lets those personalities run the show, allowing the story to develop on it's own without the author inserting any external events. This tendency is called into focus when the characters threaten to conduct scientific tests of how their universe works, forcing the author to come up with consistent rules for the laws of reality of the comic. The author strikes a deal with them to prevent them from forcing him to make up more things about the setting.
* It's stated on occasion that the gods won't interfere directly much, because doing so will inspire opposing gods to step in and add their own influence.
* It's stated that "absolute prediction = completion = death". The Guild Navigators can get away with it because their glimpses into the future are limited to allowing their FTL ships to avoid disaster, and are done on a journey-by-journey basis, but anything more than that is implied to be a lethal trap for the prognosticator.
* It's stated that, over the course of the conflict between Manticore and Haven, both sides have steadily increased the sizes of their ships without reclassifying them (classification here is more based on tactical and strategic role than tonnage): late war Light Attack Craft (similar in role to fighters or gunboats) are nearly as big as prewar destroyers, the better to carry a spinal graser worthy of a battlecruiser. This doesn't really come into play until later, when the Solarian League Navy realizes that Manticoran destroyers should by all rights be classified as cruisers in terms of size, mass, and firepower.
* It's stated that that's why The Lady likes him so much: Whenever someone realizes they have The Lady's favor, they immediately lose it because it's not fun for her anymore. Rincewind is the luckiest person alive, but since he's lucky in the sense that he's survived through some pretty awful stuff, he assumes he's unlucky because he keeps getting into the situations to begin with. Of course, he gets into the events in the first place because
* It's stated that they slowly release some of the alien technology using shell companies and finance their operations using the patents. A lot of it is confiscated tech, although some of it is given by friendly aliens (like those tall guys in the picture).
* It's stated that you have to "cross dimensions in exactly the right way", and that the monster that brought the protagonist there is "a perfectionist". Presumably, if you cross

* It's still a handy method for students to pad papers that are to be a certain number of pages long. Two spaces at the end of every sentence adds up.
* It's still an offense in the US military as well (and the "gentlemen" bit remains), usually tacked on to any other offense(s) an officer commits.
* It's still played straight on occasion however. Just often enough to remind us it's there.
* It's still possible to kill A'dal with a quest mob that becomes immune to everything at 50% health (you need a quest item to kill him). It just takes a very very very long time. In theory, it would also be possible to kite said mob to A'dal, then kite him away, effectively kiting A'dal itself (and every guard in the city). There is a rumor of this being done, but there are no videos to back it up.
* It's still seen as useful enough (especially in extraction, medevac and other SAR missions) that Russian AAF recently ordered a batch of a newly-built Mi-35 (an upgraded and mostly export versions of Hind)
* It's STILL the "Toronto Maple Leafs Show", not just on Hockey Night but on every Canadian-produced sports show/channel, because essentially all of Canada's media is

located in Toronto and they

* It's strongly implied that, after Madoka rewrites the Magical Girl System, the Magical Girls who deplete their energy join her in her other reality. (Sayaka included).
* It's strongly implied that Eric turned Pam for this purpose, though their relationship is strictly platonic by the time of the novels. The implications are... many, especially considering
* It's strongly implied that General Ironwood suffers from PTSD as a result of the incident that lost him most of the right side of his body, as he shifts his robotic shoulder subconsciously while talking to Team RWBY about how stress can make you see things that aren't there, "even after the battle has passed." And his mental state only gets worse after the events of Volume 3. Throughout Volumes 4 and then 7, he's shown to have become irritable, paranoid and prone to emotional outbursts, and at one point he's even shown experiencing a flashback to the attack on Beacon, all textbook indicators of PTSD.
* It's strongly implied that Goombella was going to confess at the end of her
* It's strongly implied that Petyr Baelish is doing this to Sansa Stark. He has her pass as his bastard daughter and has requested a kiss on the mouth from her when they were alone. It's also implied that Sansa is acting as a

* It's suggested in the manga that the Wolkenritter were holding back while fighting the heroes (possibly in order to not kill them), as each one has at least one ability they do not display until the final battle.
* it's suggested that Daz Bonez is now a pirate like Mister Crocodile because he joined him. Galdino (Mister 3) is pretty much confirmed as a pirate since he joined Buggy who is now one of the new Seven Warlords of the Sea. Bon Clay is still in Impel Down, but he's now the "queen" of Newkama, the 5.5th level.
* It's suggested that the town of Hagsgate, the last town before Haggard's castle, saw the Bull hunting the unicorns but said nothing for fear it would stop and they wouldn't be able to see unicorns again.
* It's suggested that this isn't a shortcoming of her programming or construction, but the effect the death of her "Father" had on her, which would be a
* It's suggested that this is part of why Homer has kept his job for so long. In the third episode of the series, he was promoted into the role of safety inspector, which has remained his default job ever since. As a result, Homer's job in most episodes is to just sit at a control panel and laze about, rather than doing active work in the plant itself. Considering Homer has caused dangerous meltdowns in

* It's supposed to be. The Chosen is sent on his/her journey to supposedly reawaken the sleeping Goddess; doing so will revive the land and banish the evil Desians. What it's really doing is controlling the distribution of the remaining mana and preventing anyone's technology from getting to the point of large-scale, advanced war. It's supposed to happen at a fairly regular rate, but thanks to the Renegades killing a Chosen before the journey was completed, Tethe'alla's technology was allowed to get far more advanced than it should have.
* It's surreal and dreamlike to see a monster or horrific sight in broad daylight. Remember all those childhood dreams and nightmares with a monster attacking you under a bright blue sky?

* It's suspected that Katana is this way too. (You don't think she carries those weapons around for decoration, do you?) Unfortunately, the comic lost its license before we could see her in action.
* its Tactical Rail is in a better place than on top of the priming action, AND it can take both barrel extensions and detachable stocks for specific situations.
* It's taken even further with Regina. She was a genuinely good person who loved a stable boy. Her first interaction with Snow White is actually
* It's taken to an extreme with regards to high-level monster farming. While bonds can be bought with real money and sold ingame for millions, allowing wealthy players to easily buy high-end gear, actually maximizing damage output requires auras, which can exclusively be obtained by using
* It's taken to pretty much the ultimate level in a Season 4 episode where one Red Shirt after another comes running out of a house during a huge gun battle, and each one is immediately mowed down. What makes it gold is that Sawyer screams at each one to go back in the house, and none of them listen.

* It's used twice in "Blue's Brothers". First, when Bloo impresses all of Mac's classmates at school, they go imagining their own versions of Bloo, but each with a different characteristic. Each kid ends up bringing their Bloo to Foster's, explaining various reasons for why they can't or don't want to keep them until the house is filled with hundreds of Bloo clones. Later, Mac has to pick out the real Bloo when all of them try to pass off as the original so they can go to the Ice Charades with Mac, forcing Mac to investigate each one by one until he finds the real Bloo. One of them even turns out to be Eduardo in disguise, who, being a closet Ice Charades fan, was hoping to get picked.

* It's Walky!. Danny meets with his ex, Sal, with whom there is still a mutual attraction. Danny, however, has moved on and is now in a stable relationship with Billie. He informs Sal that he intends to propose to Billie soon, and Sal congratulates him and asks to see the ring. Danny refuses, saying he knows how this goes; "I pull out the ring, and Billie comes walking around the corner..."
* It's Walky!, emphasis on both is heavily reduced, Robin moreso than Mike).
* It's Walky featured a scene where characters offer Joyce money to swear. The artist, David Willis, has said that this is autobiographical, as he had Joyce's mannerisms when he was young and his friends also offered him money to curse.
* It's Walky! follows this trope most of the time: first with Joyce and Sal, then Sal and Dina, and later with Joyce and Robin.
* It's Walky! had a truly spectacular epic finale, wrapping up everything, with every villain so far crashing into each other on SEMME's doorstep, including the long-foreshadowed martian invasion.
* It's Walky! has about a week of innocent innuendo used to mess with the mind of another character.
* It's Walky! has a lawyer of this nature who goes after the SEMME agency because he believes that they're reckless, irresponsible, immature, psychologically unstable, and hormonal time-bombs who cause an immense amount of destruction and death and, in some ways, do more harm than good. Although he's a slimy, unscrupulous jackass, it's kind of hard to argue with him.
* It's Walky!) has been going on for 15 years, but is especially bad because it has a rather detailed plot.
* It's Walky!, Head Alien uses a Martian warship to attack SEMME's home city, forcing them to reveal their secret to the world.
* It's Walky!: In a possible lampshade-hanging, Sal makes a point of jumping through windows and walls at every opportunity, even if there's a perfectly good door available. Backfires comedically one time when a villain installs Sal-proof glass in the penthouse windows.
* It's Walky intervened. The trope is played with somewhat as well. Joyce points out to Walky that despite having changed genders, they're still straight, leading to humorous moments between them and their team mates. It's later revealed that male-Joyce's "equipment" was bigger than Walky's regular package. Walky is not happy to know this, to say the least.
* It's Walky! is a rare dramatic example of the heroes being sued for their actions, as the entire SEMME team (though in the end, just Joyce) are dogged by the media.

* It's Walky! is so genki it qualifies as a superpower. She moves like a bolt of lightning, smells like Skittles, and has less impulse control than your average three-year-old. She once ate a bowl of Cadbury cream eggs; next thing she knew, she'd been elected to Congress and had no idea how.
* It's Walky!: Joe manages to build a couple for SEMME. They're all modeled after their drivers.
* It's Walky!, many of the die-hard message board fans were made into members of the army, and were, naturally, horribly killed.
* It's Walky! may just be a standing record for "Most Double Entendres in a a Single Strip"...

* It's Walky!, Sal is sent to prison. It would take no effort to bust out of there using her superhuman strength, but she stays on principle.
* It's Walky!) screwing the mother of the little girl she was babysitting.
* It's Walky!, set in small-town Canada, which was in the middle of a long hiatus.
* It's Walky!'s Jason Chesterfield: he has the name, the nationality, the accent (explicitly, despite the comic being written), the costume (bowtie and dinner jacket, at all times), the rich relatives, the lack of a job when we first meet him, and is certainly an embarrassment to his family... and yet is also a competent agent and one of the only main characters whose record contains no severe mental incidents. He's also from a parallel universe where England produces ninjas ("Britjas"). Some slack must be cut.
* It's Walky!, symbolizing her incapacity for introspection and subsequent lack of perspective. When she goes through a spurt of character development and learns to see things from other points of view, she goes back to having two eyes.

* It's Walky!, The Cheese claims to know which religion is the correct one, but refuses to tell anyone, claiming that if you don't figure it out for yourself, you won't understand the answer (and adds that even if he did tell anyone, chances are he wouldn't be taken seriously).
* It's Walky!. The rerun commentary notes that the odds really aren't on the villain's side here.
* It's Walky! The storyline is even called "The Talk", and has Sal and Jason (the figurative "parents") reluctant and Joyce disgusted. On the other hand, this is probably the first time "The Talk" has been given to a mind-wipe victim with a repression complex who was about the same age as said figurative parents. This is one is sort of hard to categorise.
* It's Walky!, this is done deliberately, to highlight how alien the CG-rendered Martian technology is compared to the hand-drawn rest of the world.

* It's worth noting however that the real-world prop for Mal's pistol is based on the five shot Taurus 38 revolver.
* It's worth noting, however, that this advanced technology we rely on so heavily is designed and created by our own hands, and we use that technology to better prepare for and avert disasters in which we might lose access to working advanced technology. Indeed, many people are quite capable of not only surviving without technology using basic survival skills, they're capable of slowly recreating the technology that improves their lives and well-being, starting society back up again. Key to this is our being willing and able to use technology wisely, so as to ensure our continued betterment.

* It's worth noting that a lot of the detail around Space Marines and their superhuman and quasi-human abilities has evolved, changed, and been tweaked (i.e. retconned) over the years. Back in the 1990s, a lot of the physical enhancements were similar but less played-up; Space Marines were supposed to be the best of the best of the best transformed into even better soldiers — not true 'superhumans' that are functionally immortal (only the Primarchs could lay claim to that originally). Their weapons have similarly mutated; the Boltgun fires self-propelled rounds (rounds, not grenades) that features an explosive element behind a dense core and a diamantine tip or adamantine penetrator, allowing it to both penetrate and explode within a target. It certainly isn't a full-auto missile launcher, evidenced by the Space Marines using a shoulder-carried heavy weapon called...a missile launcher.

* It's worth noting that if a man did return after the bill of divorce was delivered and she had already remarried, he could never marry her again, not even if her second husband died. That is the gravity of invoking
* It's worth noting that in addition to standard PMC jobs, the majority of the mercenary organizations in the setting also run large-scale criminal enterprises as well. As a result, a lot of the mercenary groups are also effectively heavily-armed, militarized versions of
* It's worth noting that in both cases, the "Transformers are Genderless" tends to not only ignore their using male words (pronouns, calling themselves brothers for example), but also that the actual character are visually coded male. With male
* It's worth noting that, in general, the most human aliens in the setting are those Necrons whose minds remain mostly intact after going into robot bodies; some of them are indistinguishable from semi-realistic comic book villains or
* It's worth noting that in many cases this is not just possible, but is actually a powerful in game strategy. In Europa Universalis virtually any major power can be hamstrung this way. Annexing all of their territory would take multiple wars and a lot of time, while breaking off various parts into smaller nations is faster, easier and will hurt them more in the long run.
* It's worth noting that in many respects, the two aren't that different. For one thing, the Dwarves and the Noldorin Elves in particular have a shared love of and skill in smithing and general craftsmanship, and a shared reverence for Aulë, the Vala who specializes in these things (who actually
* It's worth noting that Law's Devil Fruit is unique because medical knowledge is actually
* It's worth noting that Lisa Ramirez, one of the conspirators in the Michelle Renee hostage situation/bank robberies, said during her confession that she had been the one to "jokingly" suggest that they rob a bank.
* It's worth noting that Lovecraft himself was influenced by Lord Dunsany.
* It's worth noting that Marle never acquires a single tech mass heal power, severely cutting to her utility later in the game when almost all attacks are multitargeting. Really, all the good healing available without maxing stats in the game comes from dual techs. Frog/Marle Double Cure is ok, but Slurp Kiss from Frog/Ayla is actually about equal costing in power just a fraction of Double Cure, and Frog/Ayla is a better pair offensively. Once Aura Whirl starts to lose efficiency, Marle's utility is diminished.
* It's worth noting that most of the gods in the series are in fact expies of actual deities, although this isn't obvious to most — especially Western — audiences, as ZUN appears to have a preference for drawing inspiration from
* It's worth noting that Nick is actually fairly unique in this regard. It's all but stated that most Grimm tend to act as the occult
* It's worth noting that no one considers the 95th a particularly glamorous posting, the unit being a young unit mainly composed of conscripted poachers with jumped-up rankers for officers. The true glamorous elites are units like the Blues and Royals, the Scottish Grenadiers and the Royal American Rifles. Sharpe is at one point offered a transfer to the RAR, and it is clear that the offerer considers this a considerable step up, even without an accompanying promotion.
* It's worth noting that no-one fields Space Fighters. Anything smaller than an ROU
* It's worth noting that once Q gets his powers back, the very first thing he does

is use them to switch outfits. And that coming from a being who's worn
* It's worth noting that on the real life ship the computer tends to ignore anyone else attempting to speak to it, making Gwen's job slightly less useless.
* It's worth noting that Picard used the Locutus monotone while interrogating the liberated drone Hugh, who recognized Picard as Locutus.
* It's worth noting that power armor marked as Brotherhood armor, and thus disguises the player as a member of the faction in
* It's worth noting that Roger Ebert's description of the audience in the headline was the reaction to the film's end and the film as a whole, not that specific scene, though he does remark that it was this scene when "the mood of the audience began to change."
* It's worth noting that section 1 of the amendment merely clarifies what was generally understood before. The original Constitution stated, "In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President..." While it's not clear from this text alone whether the Vice-President actually becomes President, or merely that the Vice-President remains Vice-President while exercising the powers and duties normally held by the President, the common interpretation was that the Vice-President became President. The first time the matter actually came up,
* It's worth noting that tech companies have gotten smart about this and will fire someone on the spot for attempting this. There are strict guidelines about code syntax to make it easy to read, and breaking them is grounds for immediate termination, precisely because they don't want to lose six months of work upon replacing the only person who understands the program. If your coding sucks and you're new or they're desperate for help, they
* It's worth noting that the books are better-received, as many aspects that Asian-Americans disliked about the films are downplayed or even completely absent in the books.
* It's worth noting that the director of the above two, Todd Phillips, is
* It's worth noting that the episode where Takeru and Iori get their Jogress is when the team finally manages to do some serious damage to BlackWarGreymon.
* It's worth noting that the Goa'uld were driven away from Earth long before the time Jesus was supposed to have lived. However, the possibility that he was a human on the verge of
* Its worth noting that their have actually been reports and claims of giant anacondas going back to the colonial times, which is what the film is probably based on. These giant anacondas are classed as
* It's worth noting that the latter two were added in response to the Let's Players who managed to bring those situations up when they were first implemented without the special reaction.
* It's worth noting that the most successful bot, as of 2017 ("Eugene Goostman", with a 33% success rate in a single trial), did so by being presented to the judges as a Russian teenager, thus "explaining" the bot's uncooperative attitude and poor grasp of English.
* It's worth noting that there are thousands of people worshiping Thor now, in the real world, when they have no better evidence for his existence than do any other religious folk. Having the potential to have him autograph your silver Mjolnir pendant for you might make some difference, but it's clearly not necessary.
* It's worth noting that there's a great deal less reverence or seriousness than this description implies, however. Kafuka's optimism is later revealed to be the result a minor brain defect that gives her dangerously high levels of serotonin, and most of the time Nozomu turns out to have been attention-seeking or being dramatic for the sake of it instead of genuinely suicidal.
* It's worth noting that there's a twist to the formula here: Aang and Korra
* It's worth noting that the rest of his command staff thinks he's insane for sending a whole battle fleet to investigate on the basis of a missing chess move. He is, however,
* It's worth noting that the separatist movement in this case is technically no

longer the same subspecies as mainline humanity — the planet they were on is
* It's worth noting that the series took its name from an exhibit at the 1939 New York World Fair, those fairs being notorious real life examples of this trope.
* It's worth noting that this video has nearly the exact same style as the
* It's worth noting that this was done very specifically to undermine the growth of the scientific method, as part of an attempt to keep Safehold stuck in
* It's worth noting that unlike most fascist propaganda, which generally extolls the strength of its people, North Korean propaganda tends to sell how weak and helpless the North Korean people are - and thus how they need the Kim dynasty to protect them. Not that this makes the American wolves any less cool.
* It's worth noting that when adding a suffix beginning with a vowel to a root ending in "c", the usual action is to add a "k" after the "c". Thus, just as "picnic" becomes "picnicking", "magic" (when used as a verb) might become "magicking".
* It's worth noting that while gladiators are taught how to fight, they are not taught how to be part of an army. Gladiator rebellions would look more like a rampaging horde than real rampaging hordes. Individually, they were likely very good fighters, but they only rarely knew how to set up a good formation or enforce discipline in the ranks, let alone apply tactics on the scale of a battle or even have an actual chain of command. "Successful" gladiator rebellions were generally done with the intent of getting better conditions, and largely consisted of holding a rich man hostage until he agreed to grease the wheels to get them what they wanted.
* It's worth noting that while most Pirates do seem to treat the Code as "guidelines", part of their reverence to the actual Codex itself is shown to be more because you do
* It's worth noting that WWE took the name "Gangrel" and the whole idea of the Brood, his team with
* It's worth noting the Golden Collection DVD sets have the unedited versions of the cartoons.
* It's worth noting the Straw Hats had to wear badges to know who was who in the swapped bodies.
* It's worth noting, though, that Bill didn't get much help from his own father in this area.
* It's worth pointing out that that last note is also horrendously off-key. Cameron Diaz was unable to hit the note, much less sustain it, so they had to bring in a professional opera singer to do the singing part there. Y'know what they say:
* It's written into the film that Bonnie's scars vanishing, and her subsequent makeover to show off more skin and pay more attention to her appearance is a sign of her becoming "totally narcissistic" - also marking a
* "It's X o'clock, do you know where your children are?" was originally a PSA played on late night TV to warn parents of the dangers of teenage drinking. Now it's more likely to be a joke said in the middle of the day.
* Itsy Bitsy, a stray cat is one of the early victims of the spider, with the stereotypical yowl being used as the cat is jumped.
* Itsy Bitsy involves the summoning of a spider the size of a small dog (that gets bigger whenever it sheds its skin) into the home of a young mother and her children from a stolen vase.
* Itsy Bitsy Spider in theaters), Leslie — the little girl who befriends Itsy — was a sweet, introverted kid in the short and first season. Many episodes in Season 2 have her a head-slapping bitch.
* "It's Yer Money I'm After Baby" by The Wonder Stuff includes the adorable "Don't worry 'bout your heart/it's your bank I want to break"
* Its You A Breakup Story, where your goal is to either convey to Josh why you're breaking up (his disregard for your feelings) or to make peace with the fact that none of your excuses will be good enough for him and block his number in your phone.
* It's YOU. No seriously. You get to see some of your character's extra stats. For example, greatest fear? Your handler.

* It's Your First Kiss, Charlie Brown. He subsequently declared that the TV specials weren't canon and only the comic strip counted (not that that stopped him from continuing to help write the TV specials until his death in 2000).
* Its Your Move had committed various acts of mopery and dopery including plagiarizing songs, trashing hotel rooms around the country, and getting a girl pregnant.
* Its Your Move, Matt invented a fake band, the Dregs of Humanity, when Eli accidentally lost the money to hire a band for a school dance. The band actually consists of four skeletons from the biology department, but somehow they not only make it big, but are sued by several people, from a man who claims to be their original manager to a woman who claims one of them is the father of her baby.
* "It's Your Thing" is commonly used in commercials and movie trailers for playful expressions of individuality and acts of self-expression. The song itself is about how a woman can make love with whomever she chooses. "I can't tell you / Who to sock it to!" You can probably guess by now what the "thing" in question is.
* It takes a good minute for Ivy to explain to her parents that she has superpowers. They first take her confession to mean that she's an alcoholic, and then that she's doing drugs, only to finally realize what she means when she uses her power to reconstruct their TV remote.
* It takes a Handmaiden a year and a day to get the Water of Life from a well.
* It takes a hilarious turn when Castiel gets invited into a backroom with one of the girls. Moments later she runs out of the room shouting obscenities at him. Cas apparently read her mind, and casually told her it wasn't her fault
* It takes a lot of surgical skill and medical knowledge to extract a living organ and keep it in a condition where it can be transplanted successfully to another patient. You'll be hard pressed to find a Hippocratic Oath-bound surgeon willing to do this. Not to mention they're generally
* It takes an entire season, but Maze eventually reaches an understanding following her breakup with Amenadiel and the latter's subsequent relationship with her best friend, Linda Martin. She moves in with them and helps them raise their son.
* It takes a pretty nuanced view of what the KGB sleepers do, as well as showing the less-than-savory methods the FBI Counterintelligence people get up to.
* It takes a RPG, but on the hardest difficulty, Mr X can tank one shot requiring a second.
* It takes a shockingly long time for him to stop doing this, oblivious to the fact that people react poorly. It's unclear whether he stopped because he finally got the hint or because he began to be able to distinguish sex based on other cues.
* It Takes a Thief (1968). Al must protect Professor Moses, a nuclear scientist, and his documents, during a special flight with only eight passengers, to Melbourne, where an important conference will be held with five of the world's top scientists. However, when the in-flight film starts, "The Man" in the film, puts all five scientists on trial for murder, for their country's crimes against the Earth, finds them guilty, and sentences them all to die. As the film describes the crimes of each scientist, each scientist dies every hour, on the hour, one by one.
* It Takes a Thief (1968) by that point, and didn't want to give away the fact that he was still moonlighting on TOS.
* It Takes a Thief (1968) with Robert Wagner was probably the first television program to do this.
* It Takes a Thief (2005) features a store with a massive steel door, multiple locks and one smug store-owner who was sure they wouldn't be able to get in through it. He was right, they just smashed through the brick wall.
* It Takes a Thief (2005) — the big, mean-looking dog the family owns as a thief deterrent is much more likely to approach the thief in a friendly manner or run away whimpering.
* It Takes a Thief (2005). Naturally, with all the security features disabled, Jon effortlessly cleans the place out.
* It Takes a Thief (2005) on the return visit, where the patio had been redesigned to not allow the dog to be trapped outside, and the dog himself had received

professional training.
* It Takes a Thief (2005). Some of the homeowners who signed up for the show were either police officers or married to police officers. Matt always made a point of talking about what would have happened if a real burglar, instead of Jon, had walked off with police uniforms, badges, and firearms.
* It Takes a Village: Almost every dragon that isn't Spike speaks this way. The wyvern ambassador only uses contractions when he's nervous, and the Magician of Coal Crater uses more contractions because of his accent, but he still uses Spock Speak whenever he is too serious or wants to emphasize something.
* It takes a Warlock a year and a day to create one of the three powerful magical swords: the Volcanic Sword, the Severblade or the Vampire Sword.
* It takes a while before Skoodge gets Dib's name right, instead calling him things like "Dab", "Dob", and "Dub".
* It takes a while for her to show up again, but getting fatally injured ends up becoming a
* It takes forcing him to travel to the future so he can see the destruction his plans will bring to the world.
* It takes Fred's, though the process kills her body. Fred is now Back from the Dead
* It takes "Haunted Smurfs" (a semi-dark cartoon show episode) and turns it into "A Haunted Christmas", with the Smurf Village tragedy of losing the storehouse to a fire happening sometime prior to Christmas, which makes things pretty dismal for Smurfette since this would be her first Christmas with the Smurfs. Fortunately, as the story unfolds, things turn out for the better and the trope is ultimately averted... although in the
* It takes on a further meaning as it is used during the first phase of the expansion's final boss,
* . It takes place in an alternate 1948. Space in between them is referred to as "the Deseret Corridor" indicating it's run by the Mormons.
* It takes Sho Ritsu almost dying for the second time, this time of a heroin overdose, for him to confess. Even then Ritsu has to be the one to kiss him.
* It takes so long because traversible wormholes need a "transition zone" clear of all massive objects that is at least 654 AU in diameter (over eight times that of the entire solar system). Nanoscale wormholes used for data transmission don't need that much space, but are extremely inefficient. Your typical 1 kilometer asteroid has a mass of about ten to the power of 12, the most powerful archailects in the setting need 1.369 times ten to the power of 16 of mass to create a one meter in radius traversable wormhole. A nanoscale wormhole of one meter in radius needs a ludicrous sixty to the power of 28 in mass. Jupiter's mass is 10 to the power of 27.
* It takes something especially heinous to have the incident overshadow the fact that a rule was named after them, but Marty McSorley (he of the McSorley rule) managed it when he viciously slashed Donald Brashear from behind, clocking him in the head and knocking his helmet off, causing Brashear to have a seizure on the ice and a Grade III concussion. It resulted in charges for assault with a weapon for McSorley (which ended with a suspended sentence) and ended McSorley's career.
* It takes the implied rape of his wife to convince the protagonist of
* It takes the monarch butterfly several generations to travel to secluded areas of Mexico where they winter in a few specific groves of trees. It only takes one generation to return to the north, who follow the exact same path as their great great grandparents.
* It takes the Troia and Nightwing dynamic and cranks it to eleven. One of the alternate universe plotlines even implied that they may have been brother and sister in
* It Takes Three, there’s a chapter where Nick’s mother Amelia, tells the story of how she met Nick’s father Max and then Judy tells the story of how her parents, Stu and Bonnie met.
* It Takes Two (1995)) and lands on Steve Guttenberg's head. Kirsty Alley can't cover her laughing, and he flicks a tab of butter at her. She stands up, and

declares "FOOD FIGHT!"
* It Takes Two (1995): At the salvage yard after Alyssa (disguised as Amanda) is adopted by the Butkises.
* It Takes Two, a character samples escargot for the first time and comments that it tastes like a balloon. She had a point.
* It Takes Two: Diane believed rich guys like Roger would never marry people like her. They got together at the end.
* It Takes Two had badgered the guy into considerably moving up the wedding because she realized she had genuine competition.
* It Takes Two has the twins play Identical Strangers who meet and befriend each other and then get their respective single parents to hook up.
* It takes two of these to kill Karl Tanner. First, he is stabbed in the back by one of his victims then stabbed in the back of the head when he rounds on her.
* It takes years and help from the outside, but he manages to become the dog's handler, then gets the dog a girlfriend outside the prison walls. When he makes his escape, the dog disregards the scent of his old boss and chases down his poontang instead.
* It takes years of training to become a good longbowman, but only a few weeks to learn to how use a gun effectively. Also, longbows could not pierce heavy armor. Therefore, as guns became more effective (and more able to pierce heavy armor) there were fewer and fewer reasons to use longbows in war. Nevertheless, the English
* "It Takes You Away": Hanne, who is blind, quickly suspects that the Doctor didn't draw a map on the wall when Ryan, who stayed behind to look after her when the others went through a portal, fumbles through an answer to a question about where the house is most vulnerable, which is what the supposed map is for.
* "It Takes You Away" introduces the concept of an "antizone", a between-space created at points in time and space where reality is under terrible threat. The one the Doctor and companions enter is a dark maze filled with flesh-eating moths, populated by a mysterious alien who somehow managed to enter such a place. In this instance it exists as a buffer zone to what's called the Solitract, a sentient plane of existence so eldritch that the universe couldn't form until they were separated and remain separated on all levels.
* "It Takes You Away" is real, Graham asks her to tell him about the frog necklace he's wearing. She remembers it perfectly, making him that much more reluctant to believe she's a fake.
* "It Takes You Away": The mirror-portal doesn't show the reflections of anyone standing in front of it when it's active, which is how Graham discovers there's something odd about it. When Ryan comes up and sees it as well, he suggests that he and Graham would know if they were vampires.
* "It Takes You Away" the size of large rats, which eat any kind of meat they can get to.
* It Takes You Away wee.." at which point the Doctor threatens him to shut up!
* It targets only living things. Infrastructure and biospheres are left untouched.
* It Tastes Like Feet: A character complains about food they've eaten by claiming it tastes like something disgusting.
* It Tastes Like Feet: Depicts someone eating a literal foot, instead of comparing a food's unpalatability with something no sane person would have eaten/tasted.
* It Tastes Like Feet: Remarking that food you just ate tastes awful by claiming it tastes like something gross.
* It Tastes Like Feet: Someone eats or drinks something and complains that it tastes like something gross.
* It Tastes Like Feet: Someone says a food tastes like something gross.
* It tends to get considerably less stale as time goes on. Later works are a nice fresh
* It, the kids can hear the cries of Pennywise's victims through the pipes. Beverly specifically hears the voices of her dead classmates from the sink, telling her that she'll be next.
* IT, the Losers Club decide to trap It in Its werewolf form and slay It with a

silver bullet. As none of them know how to use a gun, they do the next best thing and make silver balls and use a slingshot. While they don't kill It, they definitely leave It badly wounded.
* It then totally blew the fourth wall into tiny smithereens in this page
* It! The Terror from Beyond Space (and not really that odd—it was one of Dan O'Bannon's favorite films).
* It! The Terror from Beyond Space is a 1958 sci-fi film set in the future year of 1978.
* It! The Terror from Beyond Space. It is mentioned repeatedly that the flight from Mars to Earth and vice versa takes about four months each way.
* IT, they're even played by the same actress. Beverly Marsh, the only girl of the Loser's Club and whose father was abusive as hell, would marry Tom Rogan, a man just as abusive as her father.
* Ittle Dew, being frozen by the Ice Wand causes no damage, the target thaws after a few seconds no worse for wear (if not shattered first by a melee attack). For the purposes of the Achievement for not hurting any of one type of enemy, freezing does not count as hurting them.
* Ittle Dew each have a boss that says a line or two in Swedish. One line in the first game, "Det är dags att förvirra översättarna!" translates to "It's time to confuse the translators!"
* Ittle Dew has the introductory dialog of Itan Carver's shop, in which there's a huge swordfish hanging from the ceiling:
* Ittle Dew hurl axes at you every two seconds. According to a sign, they might also use them as gardening tools.
* Ittle Dew: In one cutscene, Ittle is shown having her tongue stuck on the Ice Wand. It's just for show, though.
* Ittle Dew: The bosses can't be frozen, teleported, or launched by a portal block (an instant kill on anything else). While some normal enemies are immune to being frozen, none are immune to the other two.
* Ittle Dew, the titan de Graphiques is a golem with tiny wings who is afraid of heights, but can't stop flying.
* Itto and Shirou also have these, though it's more obvious in their chibi art. Itto is more suited to the usual interpretation of this trope, though, considering his
* IT to be vulnerable to silver. Also, believing that his inhaler was full of poison allowed a protagonist to harm It with the contents.
* IT to give her a "whuppin'" for her (perfectly normal) behaviour, saying "sorry about that, Bev". This has been so ingrained into her that when she finally (and violently) leaves him and talks to her friend about the fight they had, Beverly starts to say how it was her fault only for her friend to immediately call her out on it and demand that she stop blaming herself for her husband's abuse.
* it to instantly derail, because the GM's players are going to go after them every time.
* It took 36 hours for Nikki Reed (a natural brunette) to bleach her hair blonde to play Rosalie in
* It took a few years for Harusada to be fed enough poison to incapacitate her...and to make sure she didn't suspect anything, her taste tester O-shiga ate the poison too, covering up the symptoms with heavy makeup.
* It took a long time for Tennyo to get over her guilt about the Star Stalker's actions before it merged with her, despite the fact that most of it took place before the Earth even existed. In some ways, she never has fully come to grips with it, in fact.
* It took a lot of different new developments and at least one intervention by Eldritch Abominations
* It took a lot to finally convince Ted Bundy's mother that her son was a

* It took nineteen seasons for the Latin Spanish dub to get a Danza, with character of the day Emilio being voiced by Emilio Treviño.
* It took Nissan decades to realize that it would be a good idea to release the Skyline worldwide, but it was rebadged as an Infiniti and by that point, it didn't have its GT-R trim, which later on, Nissan decided to create a spiritual successor with the GT-R nameplate, being a complete sports car instead of a two-door coupe sports version of a sedan.
* It took one series to give Humongous Entertainment a profit, and it is the only one they still make. That series is
* It took some time but it got finally played straight with the Wolkenritter. In
* It took them awhile. Hannibal was a master of geo effects and used them in two earlier battles to defeat Roman armies. First at the Trebia, where he encouraged the Romans to charge through an ice cold river. Second at the Lake Trasimene, where he caught a Roman army in an ambush between the lake shore and the wooded hills where his light troops were hidden.
* It took two games to come into play really kicked into gear when he was saved on Virmire.
* It took years (real-time) for Piro and Kimiko to admit that they had feelings for one another, even if it was only about a week in comic time (or about seven weeks if you count Chapter 0).
* It tops this list of causes for bedroom brawls. And for good reason.
* It transpires that he's the 'hidden' Jager general, the one who sticks around in the background and manipulates events from an Almighty Janitor
* ITT Tech: "I was stuck in a dead-end job until I got my degree from ITT Tech. Now I'm a systems analyst for [X company that sounds important]."
* ITT Technical Institute heavily ran various ad campaigns during the 90's and 2000's, the most notable ones being the early "Jobs of Tomorrow" and the later ones featuring testimonials of graduates stuck in difficult positions in their lives and improving after graduating. They ran less and less frequently until ITT Tech finally shut down in 2016 after several lawsuits alleging fraud and the U.S. Department of Education intervening.
* it turned out that a woman's body was in one of the hotel's water tanks.
* it turned out that he was the one who stole Phoebe's camp journal, and left a bunch of fake clues from everyone, setting up the events of the arc.
* It turned out that Hyobu and Fujiko joined ESP unit as children willingly. Through looking at their alternatives and how much espers were hated these days, they didn't have much choice.
* It turned out that she still inspired other female players to turn pro – by making them determined to prove they didn't
* It turned out that transforming ships into sea-going zebras did not have the desired effect and in World War II this type of camouflage was not attempted again. However, the Royal Navy then did develop a special Western Approaches camouflage where ships were painted mostly white with a few light green and light blue areas. This was actually a pretty effective colour scheme for the North Atlantic.
* it turned out to be the wrong person entirely due to the killer being disguised.
* It turned out, to the surprise of absolutely nobody, that this was a bad idea; it's one thing to throw half-trained rookies into the trenches until it was time to bayonet-charge that machine gun emplacement for the hundredth time, but quite another to throw half-trained rookies into the cockpit of a difficult-to-operate and quite expensive piece of military hardware. Unfortunately it took them until the war was nearly over to work this out.
* it turns a lot of people off with 3,35 million dollars. Even so, there are a few cases that stand out.
* It turns into an outright cruel twist ending if you accept it as a true sequel to "Phobos Rising" instead of just another
* It turns into this for the godmodder later on, and everyone gets a slice of the action with the Glitch.

* It turns out all the strange Teachers that accosted the puppets were created by a large computer, and the series concludes with Red Guy attempting to shut it off.
* It turns out Annie was a character in a soap opera that the bird's former owner had been watching.
* It turns out another reason Midnight fell was because after she rejected Tartarus, her subjects, egged on by a Stalker with a Crush
* It turns out Archer was simply acting under orders of an even more evil and nebulous organisation called The Suits, which the protagonists know next-to-nothing about.
* It turns out Barnes was the split personality of Duncan's friend Michael Moore. Moore experienced those years as a nightmare.
* It turns out Bobby had hired the witness to sit in court and "look like [he] could have killed" the victim instead of the defendant. While not technically illegal, it certainly alienated the judge, and possibly the jury.
* It turns out Bumpties can steal Baby Mario if he's knocked off Yoshi's back next to one. The twist? This very, very rarely comes up in the game by default, so they programmed in behavior for an unlikely situation that's only likely through going out of your way to take damage and that's so obscure even
* it turns out Dan is Gossip Girl and has been stalking and berating her online for years.
* It turns out Eren has the power to invoke this when he used this odd scream to get a bunch of titans to gang up and tear apart the titan that killed his mother years ago.
* it turns out everyone in Dash's circle of friends automatically identified her as a lesbian, from her rainbow mane and tail, to the fact she moved to Ponyville (a haven for same-sex couples), to the fact she keeps incessantly hitting on and awkwardly invading the personal space of every female around her if she as much as touches a drop of booze.
* It turns out Fluttershy/Fluttercruel are this to a species of extradimensional alien invaders due to their only weakness being
* It turns out Garp did the exact same thing for his rival Gold Roger, by taking in his son
* It turns out Grey Worm's from the Summer Isles, though he's substantially lighter than the only other character we've met from the Summer Isles, Xaro Xhoan Daxos. His ancestry has yet to be revealed in the books; Martin has stated that he has no plans as of yet to go further into Grey Worm's race or personal history, but he might do so if the notion strikes him.
* It turns out he did have good reason for worrying about the legal cover. During the
* it turns out he never joined the Death Eaters at all and was always a good-hearted young man. At the same time, calling him sweet was a bit of an overstatement since he was also a notorious prankster and a bit of a showoff though not a bad person at all.
* it turns out her banning music and trying to forget her husband has made it so neither she nor their daughter would recognize his guitar and songs were used by Ernesto De La Cruz.
* It turns out her prosthetics really aren't as good as her eyes were, considering they were lost because she was targeted for having Silver Eyes.
* It turns out he's the bartender of the Hog's Head, allowing Harry and friends safe passage into the school.
* It turns out, however, that this is an act and that she knew Peter was Spider-Man for a while and she gets angry at him for his constant bailing out on his friends and general passive nature, since all he does in his civilian life is pass judgment on his friends or make them feel guilty for their lives. She tones down considerably after the death of Gwen Stacy, allowing Peter to lash out at her while she in turns hugs him out of his grief and regret, much like the end of Conway's famous story.
* It turns out in the end that Secretary Marsh's assassination was carried out by CIA Renegade Splinter Faction

* It turns out, in the end, that the werewolf and mage backstories aren't referring to the same event (the assumption of which caused the seeming incompatibility). The mage backstory
* It turns out it's not limited to Saiyans. Krillin does the same when he has sex with 18 at the end of episode 60.
* it turns out Jackie was the victorious one all along; Simon always loved her and married Linnet, who he saw as just a Clingy Jealous Girl.
* It turns out later that after a series of mishaps with their damaged-in-transit automated factories, the colonists went with a different type of AI
* It turns out later that this is not an actual marriage by Barsoomian tradition (those are, apparently, fairly lavish affairs similar to Earthly ones); it could be regarded as either a) a somewhat inept attempt at a proposal, or b) a statement that he considers her his slave. She gets mad and refuses to talk with him any further when his next statement seems to indicate that it's b, though in fact he's just clueless and has no idea of the implications.
* It turns out Littlefinger and Lysa Arryn, not the Lannisters, were behind Jon Arryn's murder, and together essentially caused the whole fucking plot. Including but certainly not limited to the deaths of millions in the War of the Five Kings, the near-extinction and exile of House Stark, the fall of House Tully, the ascent of the despicable Houses Frey and Bolton, the burning of Winterfell, Littlefinger's meteoric rise (which is definitely a bad thing), and Joffrey's final victory and then horrific death..
* It turns out marble is impervious to all forms of dragon fire and able to completely withstand physical dragon attacks. So far, only Catastrophic Quakens are strong enough to damage marble.
* it turns out Nightmare Paradox has fused with the Nightmares of her friends
* It turns out, of course, that he's more interested in the sticker booth.
* It turns out Orion and Artemis had this dynamic in life. While Artemis is a fairly short 165 cm (5'5"), Orion towers over her at 230 cm (7'6 1/2"). His arms are also many times thicker than hers,
* it turns out Pain is actually a series of bodies taken over and controlled by the piercings all over the various bodies bodies here.
* It turns out Portgas D. Ace took the last name of his mother Rouge
* It turns out Sabo himself is a noble and is the only child noble who looks attractive, especially when compared to the
* It turns out said little girl wanted to buy the soda so she could give it to Sylvia!
* It turns out, science and magic are actually quite effective against one another,
* It turns out she didn't; it was the kid next to her and it happened to look like her hand. She just let everyone believe she did so she'd be popular.
* It turns out she doesn't totally believe this since she had a soft spot for the children she raised while on Earth. One of the reasons she took a less forceful approach to conquering Earth was to avoid endangering them.
* It turns out she faked breaking her foot during the stunt, killed the victim, and then went back and broke her foot for real knowing that the police would look at her as the primary suspect and want an X-ray.
* It turns out she's actually jealous too, in spite of pretending otherwise, so maybe it's not coincidental.
* It turns out she's a daughter of the goddess of love, and John is notably crushed after the assignment ends and he has to leave her.
* It turns out she was covering for her mother, who recognized the cab driver as a war criminal and killed him for his crimes. The judicial system is sympathetic enough to grant the woman a reduced sentence, but just getting her arrested is enough for the daughter to break up with Monk.
* It turns out she was the illegitimate daughter of a clergyman and used as blackmail to keep his rich father in line. She kills the stepsister (who'd started blackmailing her Unfortunately, Barnaby arrives just in time.
* it turns out that Alan and Mr. Chow both own the same satchel, except Chow

insists that his is NOT a satchel, but indeed a purse.
* It turns out that a prophet has been writing a book series about Sam and Dean (with titles the same as those of the respective episodes). It was only popular with a cult following, and got cancelled after "No Rest for the Wicked" (the book), but Chuck keeps writing since he still gets the visions. In "The Real Ghostbusters" (about a third of the way through season five), Chuck says the book series is going to be revived.
* It turns out that a saboteur installed a device in his car that could remotely control the its hydraulics, then activated it as the car approached the wire.
* It turns out that 'Bormann' is, in fact, a dummy (it's blatantly obvious to a modern viewer as soon as he appears, watching at a much higher resolution than a 1960s viewer would be) being used along with a pre-recorded impersonation by the organiser so he will get himself endorsed as Bormann's successor. So, Rollin Hand then impersonates Bormann
* It turns out that Circe's three older "sisters" created her magically.
* It turns out that Clint Barton's mother had a case of this, being the daughter of Minerva McGonagall and Bucky Barnes, and winding up being raised by the parents of a certain Jonathan Kent.
* It turns out that Commander Tesjha Phohl, Eleya's XO in the present day, is from a family with a long history of service in the Andorian Imperial Guard.
* It turns out that each separate universe of Marvel has its own set of Infinity Gems/Stones that grants limitless power... but only in
* It turns out that God created the multiverse in the first place because
* It turns out that he is a serial killer and rapist, and he left to kill Veronica because she had figured out he was the culprit. He takes her clothes, too, so she can't follow him, resulting in Veronica finding Mac crying and wrapped in a bedsheet.
* It turns out that he's right and it works, but there's a moment there where it looks like he was wrong and he's just murdered a man in a particularly gruesome way.
* It turns out that he stumbled upon the plane being sabotaged, was killed, and stowed away in the plane's cargo hold. The added weight, which the pilot didn't know about, threw the plane off balance and caused the crash.
* It turns out that he wants to open a summer camp. Cue her stunned reaction when he proposes they have twenty kids. Not to mention the fact that Mr. Conklin tries to outbid him.
* It turns out that his attempts to prevent her death are what resulted in it happening in the first place. He then travels back in time to 1993 and kills his younger self just before he was about to meet Susan so that she will live. However, Susan was severely depressed at the time and Andrew was the one who helped her get her life back together. The episode ends with Susan taking an entire bottle of pills with alcohol. The clear implication is that she will not survive the night.
* It turns out that humans have adapted over time to a moderately polluted environment, and pure air and water are just as deadly as the Sea.
* It turns out that if you ask to cut in line for the photocopier and give the reason "
* It turns out that, in addition to some normal vampire weaknesses, Vrykolakas vampires turn to ash when exposed to too much stupidity. That only comes up after
* It turns out that it wasn't really a nun, just Rev. Lovejoy hypnotized by the villain
* It turns out that Krypton had sent a failed sleeper ship to prehistoric Earth in
* It turns out that nearly every member of Wooten Basset's extended family (except his benevolent Christian paternal grandparents) is this, as shown in "Basset Hounds". The episode follows Wooten (and Bernard) as they go to said grandparents' mansion in Alaska, as the grandparents are permanently moving to Africa for mission work and have gathered up the entire family to say good-bye, as well as having made a will. Bernard talks with several of the various family members there, and quickly finds out that the only reason most of them are there is to figure out how much Grandpa Basset is leaving them, even though a large number of them are already

pretty wealthy. They even claim to be either Christians and/or active in charities, hoping this will result in Grandpa giving them even more money. When they hear Grandpa's final message to them via video-tape, they even fast-forward all the way to the disbursement. Karma hits them all like a load of bricks when it turns out that Grandpa was fully aware of their money-hungry tendencies despite how filthy-rich they already are and has left them nothing as a result. The only ones who get anything are Wooten
* It turns out that nobodies quickly develop new hearts from whatever is around them, and CAN have emotions. This incredibly hopeful reveal is immediately quashed by Xemnas revealing the above plan.
* It turns out that Pluto's moon Charon isn't a moon — it's the mass effect relay for the solar system, allowing humanity to enter the galactic community.
* It turns out that Reznov apparently died during the escape in the second level, and all subsequent appearances - save for the flashback mission
* It turns out that stiff neck is the helpful distinguishing symptom. And by stiff neck they really mean it, not the poor approximation that a neck ache tends to be. The test is you attempt to put your chin on your chest. If you can't bend your neck enough to touch your chin to your chest, it's time to seek medical care immediately. Otherwise, it's almost certainly something else less serious.
* it turns out that Stumpy, Quack Quack and Mr. Cat made a bet to see who could make Kaeloo get mad enough to beat them up first. No matter who won, winning the bet would have made him get a severe beating. Mr. Cat ends up winning and as a result is beaten so much that he nearly loses consciousness.
* It turns out that Tak's ship has a copy of her mind on its computer. In one episode, Dib overrides it by copying his own mind into its place, which creates its own problems when the copy thinks that
* It turns out that the birth date seems to relate to their patron troll as well.
* It turns out that the Equestrian military has specific protocols in place for situations like this, including
* It turns out that the figure is not dangerous or insane, but was the actual
* It turns out that the need to use the restroom is not what kills them, it's a symptom. Some things like major heart attacks or pulmonary embolism cause sensations of urgently needing to defecate, hence they retreat to the toilet without realizing the real cause immediately. By then, it's too late.
* It turns out that the Nu are also this, as in the DS remake one can be fought in the prehistoric era and shows up for round two in the Dark Ages.
* It turns out that the other characters are better off without her., so she goes back to the life she has. And the angel gets demoted.
* it turns out that the perpetrator of the Galen murders was a mentally impaired man who didn't really understand what he was doing. When his father found out, he covered it up on the grounds that his son wasn't a bad person, and he made the killer send the victims' kids stuffed animals every year on the anniversary of the murders so that his son wouldn't forget that he's capable of terrible things and would be careful never to let it happen again.
* It turns out that there are some serious side effects to staying uploaded for too long, however.
* It turns out that there's a completely justified reason for this mechanism,
* It turns out that there's method in Rayek's madness. Rayek knows that Cutter's rage will only keep on festering if he doesn't let all of it out, so Rayek refuses to concede until Cutter is one blow away from killing him.
* It turns out that the villain's millennia-in-the-making plan is for
* it turns out that they really kidnapped Yuna to prevent her from completing her pilgrimage.
* It turns out that they tie for last place because they focused on their rivalry instead the race. Twilight, on the other hand, ends up in fifth place.
* It turns out that this, along with other odd behavior she exhibits in the episode, is actually a necessary part of helping the magical jam taste better. She knows it's absolutely ridiculous and makes her look senile, but just shrugs it off and does it anyway.

* It turns out that this is a reversal of the Kelpiens' natural life cycal, bred into them by their former food source, another sentient species called the Ba'ul. In fact, the Ba'ul used to live in
* It turns out that two characters acted the way they did because they were bound by magical contracts that would kill everyone in their respective countries if they disobeyed. The only way to render such a contract null and void is for the physical contract to be destroyed and one of the signers to be killed by a third party. In the endgame, the player gets to kill the man who forced the other characters to sign the contracts; however, it is entirely possible to have him killed by one of the signees which should render the contracts unavoidable, but if this happens, it plays out the same as if he was killed by anyone else.
* , it turns out that Vinyl Scratch is mute, but has a spell that lets her communicate via telepathy. She can only do it with one pony at a time, however.
* It turns out that was just a robot designed to look like Wesley's dad, but Wes didn't know that.
* It turns out that when Angol Mois first came to Earth she saw Asami beating up the "Sleazy 26" gang and decided to model herself after "Earth's Greatest Warrior," per instructions from her father.
* it turns out the "battle" was a test also has fun lampshading the obligatory "Ramming Speed" command:
* it turns out the blood of the first demon, Lilith, must be spilled to complete a ritual to release Lucifer from Hell.
* It turns out the dampening field is an artificial creation, under her control, and she refuses to turn it off, even when one of the villagers is dying from an infection that Sisko and O'Brien could easily cure if they could get to their shuttle and its medkits.
* It turns out the First Ones actually used their technology to weaponize the even older magic of Etheria. They also altered the She Ra line, containing their power within a sword so the First Ones could control them. Their tampering also weakened all.
* It turns out the killer did this to make it look like a suicide set up to look like a murder. In the same episode, Sanders mentions that the families of suicides will often hide the gun to avoid the stigma.
* it turns out the killer took the most blood-rich organs to make into a health elixir, convinced that that was the only thing preventing her from becoming sick.
* It turns out the killer was the young woman's literature professor, who had plagiarized a novel written by a friend of the young woman's family and used the resulting success to build his academic career. When the young woman found out about it, she threatened to expose him, which would have ruined his career. She wouldn't stop hounding the professor, and he eventually became so desperate that he killed her to try and keep her quiet.
* It turns out the murders were committed by a man who's installed several transmitters in her house to get her to blame herself. Jones himself listens to the sounds from the bedroom while fully conscious and claims he'd go for his bat.
* It turns out, there's a reason for his name that isn't just his skill in clean lobotomy.
* . It turns out these are actual coordinates where items for an ARG from starmen.net were buried.
* It turns out the Silver Monkey puzzle was more finicky than it seemed.
* It turns out the singer, the main character's little sister, was the one who killed the friend and also the wife, but got away with murder since the main character got caught.
* it turns out the "Top 10" rule served to make the Military Police into a recruiting ground for the Anti-Personnel Control Group — a secret unit of highly skilled fighters/assassins equipped with a specialized variant of the 3D maneuver gear and were officially formed as a counter to the Survey Corps.
* It turns out the tradition she was naming was mostly ignored by everyone, and it also turns out that young Ataru had lied about jumping on her shadow.
* It turns out the whole thing was staged by shady industrialist Varrick to anger

Raiko into entering the war.
* it turns out they're floating above the surface of a normal planet of indeterminate shape from which they separated, and eventually float back down at the end of the first (chronologically second) game.
* It turns out they're not this at all. Rather, they simply failed to recognize humans as intelligent life forms on their own. Given that the number of individuals in Formian society is very small, with Queens acting through hundreds or thousands of drones, they consider murder to be unthinkable. When they realized that each human they killed was an individual roughly on the level of a queen, they felt so guilty that they held no hostility towards humanity for wiping them out.
* It turns out they were being secretive because they were planning a Surprise Party
* It turns out, this was the reason for her murder: The real Odette had conspired to kill her grandfather for her inheritance with her financial manager. When he ranted on it to the lookalike, her shock made him realize she wasn't the real Odette and he killed her both to keep it quiet and his outrage that a "dirty stripper" took over the life of a woman he'd secretly lusted after.
* It turns out (though still in a rather suggestive position if anyone found them).
* It turns out to be 13, getting revenge for House switching regular coffee for decaf and making her think she was suffering from Huntington's
* It turns out to be a big conspiracy. The Bride didn't actually kill herself in public, faking her death and putting a look-alike in the morgue. After killing her abusive husband, she allowed a co-conspirator to shoot her to put a proper body in the morgue (she had TB anyway). All the other killings were committed by members of the conspiracy dressed up as the Bride, frequently by the men's wives themselves. It's heavily implied they deserved it..
* It turns out to be a clue to the basis of his power which, in Vollstandig, targets the eyes of his victims.
* It turns out to be a mage, shapeshifted into a dresser, to hold all the ladies' underwear.
* it turns out to be an ad for the Catholic Church's "Legs" music video.
* It turns out to be a pissed-off Deathclaw out for revenge against the mercenaries that were transporting her eggs.
* It turns out to be a subversion: Instead of a rousing fight and the destruction of the Borg, Lily openly compares Picard to
* It turns out to be Jack Noir, an antagonist who lived a universe away from the trolls, who managed to gain omnipotence through a fluke in Sburb's mechanics.
* It turns out to be the cleaning staff, who simply cleaned up the scene of the crime and removed the evidence whenever it was discovered. They would have gotten away with it if Monk didn't figure out at the last minute where they hid the body.
* It turns out to have been a betrothal gift to her grandmother, Kanna, from Pakku.
* It turns out Zoe wasn't killed after all but kept alive by nanomachines that rebuilt her without memories until Riff restores them by copying her memories the night prior to her 'death' by Oasis via time travel.
* It turns up often in Logic Chess segments. Chances are that if you see a witness mention something you haven't heard of before, or that they couldn't possibly have known, you need to jump on it.
* It twisted sense of humor. His jokes range from crude and sexual (and bear in mind, they're usually aimed at kids), to morbid, to mocking people's various afflictions, to describing what he did to past victims, or what he plans to do to you. This mostly carries over to the 1990 and 2017 adaptations.
* It twisted the history of and etymology of the English language so that it would rhyme.
* iTunes (later rebranded as Music, though the iTunes Store still operates)
* It upon its release (and it didn't help that the two productions shared an actor).
* It used a high-proof hydrogen peroxide as an oxidizer, which is not only so corrosive that it routinely ate the tanks in which it was held, and in one case

dissolved a pilot in seconds, but is also prone to spontaneous decomposition, a reaction that is both exothermic and activated by heat, resulting in a big "BOOM" and a cloud of very hot
* It used to be common for Marine captains to be addressed as "major" when aboard ship, as this prevented confusion in a crisis ("Where's the captain?" "Do you mean the ship's commander or the Marines' commander?")
* It used to be intergenerational, though, when she was a 7 year old child, while Simon was 40 years older.
* It used to be that if a Papal Conclave took too long to decide on a new
* It used to be that Leap Day was the day on which women could propose to men, instead of the other way around as was the informal custom of the time. Carol Ferris tried to take advantage of this in an issue of
* It used to be that the four comic characters who would actually stay dead were Barry Allen, Jason Todd,
* It used to be the other way around, with Ray getting most of the spotlight and Roast Beef as first runner-up.
* It used to be very rare for a human to be over 6' tall, over 200 lbs, or particularly strong. In first world countries, at least, decades of vastly improved nutrition and medical care compared to centuries prior have made it a lot less rare to grow taller than six feet and weigh over 200 lbs (whether that's largely muscle or just being fat varies by the individual). The six foot, two to three inch tall
* It uses the normal example straight many times, but also notably uses the Inverted example as well. Dutch Wagenbach and Steve Billings are investigating a serial child rapist, and Billings figures out that the child shelter manager who has been extremely helpful has been *too* helpful. Yup, turns out it was him.
* It uses the same basic Pseudo Sonic plot as the above-mentioned Archie Comics incidence, (not sure which came first) although since in this incarnation Sonic has no girlfriend for whom he might be inclined to pick flowers, he just randomly blunders into an entire valley full of "poison flowers" while saving a character from a completely different threat.
* It uses the tag-line "Ph34r teh Cut3 0n3s", often in reference to the main character, Piro's, inevitably cute-and-highly-competent game characters. The comic itself also contains at least one example: the enigmatic Tohya Miho, whose true powers and purpose have yet to be revealed — but who is
* It usually blows this away, especially hiring such energetic and expressive actors as
* It usually doesn't come up because Buffy herself only hunts the demons that murder and terrorize people and leaves more gregarious ones like Clem alone. In Season 3, she tells Faith to spare one who seems like more of a scumbag than a "deadly threat to humanity" (Faith ends up killing him later anyway because he's trying to sell Buffy copies of the evil mayor's Books of Ascension and Faith is
* It usually involves his seeing them as his own kids that he was unable to protect. In one of his more awesome moments, he's tasked with retrieving a little girl in Russia whose blood contains an experimental supervirus along with another Special Forces guy, slaughtering the Russians sent to prevent that from happening. After he escapes (in a nuclear missile), he boards the pickup submarine and refuses to let anyone approach her, resulting in the virus decaying until it's unusable. When Frank is greeted by a large army unit and the general behind the operation, the soldiers are rather iffy about shooting him. Then Nick Fury (who gave him the mission in the first place) stands next to Frank, and the soldiers give up.
* ITV about survivors from a nuclear attack hiding in the London Underground one of the actors, Gareth Jones, had a fatal heart attack when he was just about to make an entrance. The play continued with the other actors covering for his failure to appear, and they managed to improvise right up to the end, with some plot discussion with the director during a commercial break. The actors were not told that Jones had actually died until after the play had finished, but were told only that he was too ill to continue. Sadly, no recording of the play survives, so we can't be sure exactly how this was worked around.
* ITV. A furious Maurice is left walking around for the rest of the episode with

the word "TIT" branded on his head.
* It varies from game to game. Yeah, MP doesn't always get restored whereas you can attack or use some special abilities all day, but at the same time, mages often get the wonderful Be Dragon spell, which hits for quite a lot, and if you manage to get the right equipment, they can cast magic twice in one round and out-damage the warrior. Mages also have the benefit of being able to attack enemies in groups, whereas melees can only do that with whips or boomerangs. However, really, it depends on the game.
* It varies, however: Alexander the Great, Saladin and Napoleon (and a Martian conqueror) are preserved in jars until Dracula needs tactical advice, while Dystopians are people who committed evil in the name of empire (coincidentally or not, they're led by
* ITV, a subtle lesbian subtext in the original novel is made much more explicit.
* ITV, causing a significant retool, in order to justify the cost. The show performed incredibly badly and suffered nightmarish scheduling delays, resulting in Kemp's career as an actor effectively ending. He reinvented himself as an investigative journalist and has since regained significant critical acclaim.
* ITV channel but came back off and on throughout 2013. ITV has since got the rights back.
* ITV Elsie Tanner) was battling lung cancer and sadly it became her final performance as she would pass away weeks after filming of the play ended.
* ITV football commentator John Helm turned up to a routine TV engagement on the 11th May 1985, to report on a Third Division match between Bradford City and Lincoln City, a football game a long way away from the glamour of Manchester United or Chelsea. He was, in fact, practically the only journalist in the ground, so low was the sporting or news significance of the fixture. He and his camera team then recorded the horror of the stadium fire that erupted unexpectedly and was responsible for the deaths of fifty-six people and were the only news presence there for a long time.
* ITV had a variation where walking past a pole hid the main character long enough to allow him to transform into his dog form. Though this was probably due to technical restrictions on this mid-90s low-budget series.
* ITV inside a closet, presumably as a hostage. It later turns out she was actually one of the killers the entire time and tied herself up to try and divert suspicion.
* ITV In The Face: in the "Tyne Tees" episode, one of the speculative names for the station was the long and unwieldy "The Tyne And The Wear And Also The Tees Television".
* ITV. It then explodes into the numbers "3", "2", "1", before diving back down and landing in a dustbin, magically animating it into the show's mascot, Dusty Bin.
* ITV Play didn't survive the phone-in quiz scandal and "suspended" indefinitely in 2007.
* ITV show to showcase the best in British pro wrestling in 2018, under the WOS banner.
* ITV's insistence on showing episodes with the end credits from "Her Wacky Highness" edited on ("The Moral Of The Story: Elmer Fudd Is A Dolt").
* ITVS spots, to the point where this trio of ads got played as late as 2009 on some affiliates.
* ITV was a sociologist who consulted on difficult police cases and solved them without ever leaving his office.
* ITV, who kept getting stories about the town of Wigan or the politician Lord Wigg.
* It Walks By Night opens with the revelation that a dangerous psychopath, Alexandre Laurent, has escaped and intends to take revenge on Raoul de Saligny. Laurent is known to be skilled at impersonation, and to have visited a crooked plastic surgeon before heading for Paris. Any of the principal male characters could be him since they're all of similar height and build.
* "It walks the stairs, without a care, and shoots so high in the sky..." for Slinky. Parodied in
* it was a big hit in North America, and is considered a classic among English-

speaking fans.
* It was a bit subverted (not sure if that'd be the right word for this) when Wesley tells Angel to stop using the curse as an excuse not to go after a relationship opportunity with an interested woman (who Angel met because she was bitten by a werewolf). After all, as Wes puts it, "Most of us have to settle for
* It was a common formula for the villain to always get in one slapstick blow on Bugs to start the feud at the beginning of the short, at which point a riled up Bugs would prepare to do his worst:
* it was a common political tool throughout British history well into the 18th Century.
* It was a common practice in the French kids shows from the 90's to the mid-noughties to hire the voice actors of an animated series for reading new lines as their characters so that they'd be the anchormen. By using footages of the episodes, they'd eventually create tongue-in-cheek segments between the real cartoons, some of them being quite amusing. They did so with the
* It was a Confederate unit in blue running towards a Union artillery unit. The commander on the Union side was asked if they should open fire, but said no because the troops approaching were friendlies. He was wrong.
* It was a conscious attempt to garner heel heat, portraying her as a selfish model type character who didn't care about wrestling or want to learn, playing into fan perception of "bad" Divas. Unfortunately, doing this was the ultimate way to garner "go away" heat. Ideally, that "go away" heat would have just been directed at the Eva Marie character, which would have made it easy to turn into straight heel heat, but unfortunately her early matches showed her as someone who hadn't even properly learned how to take moves yet, which cemented her status as someone the fans just absolutely hated. She took a break from wrestling for a while, most likely to train, and tried to reconvert that X-Pac Heat into legit heel heat, showing off a very heelish entrance on NXT in August 2014, playing up the fact that this is a character much more strongly. Whether the fans will start booing the character rather than the performer remains to be seen.
* It was a creature that fed on the faith of other creatures, and hated its own existence. However, it was a being of instinct, and could not help pursuing its food source whenever one appeared. The Doctor allowed it to die by cutting off its food supply by destroying Amy's faith in him.
* It was actually a common policy for the show: the writers would write scenes, the executives would veto the scene, so the writers would
* it was actually Alan who took Helène away from him, as Joe immediately fell in love with her but was too timid to ask her out, and Alan took advantage of that to make a conquest of her, reeling back when she wanted an actual relationship. He also reveals that it was him who caused Todd's injuries, pushing him down a set of stairs out of frustration and anger at hurting Phoebe, who he was also originally in love with. Afterwards, he simply never had the courage to go up to Phoebe and start their friendship up again.
* It was actually all a front by Bosch, who really wanted an excuse to plunder some Vasudan ruins and revive an abandoned Terran project to communicate with the Shivans. He is successful in this endeavor, and survives the game... albeit in the custody of the Shivans, and who knows what they intend to do with him.
* It was actually a perfectly ordinary arrangement as an after-victory peace resolution in pre-industrial societies that the loser got to keep most of their territory, and pledged loyalty and/or tribute to the winner. It was difficult and expensive for a pre-industrial society to occupy, incorporate and administrate a foreign territory (that doesn't mean people didn't
* It was actually bigger than people think. During the summer of 1939, the Nazis staged attacks on ethnic Germans in Poland, claiming this was the work of Polish terrorists.
* It was actually four ships: one ship dedicated to carrying the weaponry, and three more automated, to act as its escorts. The armory-ship was found by the Rebels, and one of the escorts which got lost eventually helped the Rogues.
* It was actually not uncommon for players to throw games before the Black Sox

scandal, to supplement their low pay. The owners knew about this, but allowed it to happen to keep the players from organizing and forcing the owners to pay them more. What was unusual about the Black Sox was that no one had attempted to throw a Championship Series before, and which would involve throwing five games (it was a best-of-nine series at the time).
* It was actually one of the first things to go into the script, which had the working title of "Ford Cortina".
* It was actually Peter who killed those people and faked his death framing Sirius for it. Sirius was likely suffering from a mental breakdown from guilt about convincing James and Lily to make the real traitor Peter Pettigrew the Secret Keeper.
* It was actually rather pleasant, up until Chode and Gus brought in the concept of evil with them, which caused an immediate death spiral for all life everywhere. The reason why?
* It was actually Renarin, too scared to admit openly that he had bonded with a spren and was receiving visions of the future.
* It was actually staged to allow the killer to exaggerate his mystique.
* It Was a Dark and Silly Night outside her window. She goes out to investigate, and meets another girl, who gives her some marshmallows. As she searches, she becomes covered with so much snow that she begins to resemble a yeti herself, and is mistaken for one when she approaches a house, especially since the sticky marshmallows made it hard for her to talk.
* It Was a Dark and Stormy Night and a yearly contest will keep it alive forever.

* It was also an excuse to have a team made up of the Original Five X-Men from the comic books for an episode.
* It was also a problem for the Persians, whose overwhelming numbers would mean little if their emperor was killed or routed. Knowing this, Alexander the Great reversed certain defeat, first at Issus and then at Gaugamela, by personally

charging through the Immortals and getting Darius III to run, causing the Persians to panic and lose cohesion just when their numerical superiority was overwhelming Alexander's troops. It was actually a major strategic weakness for the entire history of the empire, since their generals tended to lead from the front and stood right in the center of the line.

* It was also dubbed in Slovak twice for airing. The first dub was made for TV Markiza. The second dub was made by Trigon Production for JOJ Group in 2021.
* It was also dubbed into Albanian twice: once in 2000 for TV (with the songs left in English) and again in 2005.
* It was also dubbed into Brazilian Portuguese three times. The first two dubs were made in the early 1990's: one by SC Produções for VHS and the other by Herbert Richers for TV. The third dub was made by Double Sound in 2000 for DVD.
* It was also dubbed into Brazilian Portuguese three times; the first was done in 1988 by VTI in Rio de Janeiro. Both redubs were commissioned in São Paulo, with the second dub from 1996 by Gota Mágica, and the third dub from 2009 by Studio Gábia. In the 1996 dub, Lampy, the Hanging Lamp, the Stereo, and the Hearse

* It was also dubbed into Brazilian Portuguese twice: the first from 1938, and again in 1965. The 1938 dub is long lost (only recordings of the songs are known to exist), while the 1965 dub is the official version currently being used.
* It was also dubbed into Brazilian Portuguese twice; the first was done in the 40s, and again in 1966.
* It was also dubbed into Czech three times: The first was done for its theatrical release in 1970, the second was made for TV Nova in 1994, and the current was done for home media in 2000.
* It was also dubbed into Czech twice: the original in 1970 and and the current in 2005. Hana Talpová voiced the Fairy Godmother in both dubs.
* It was also dubbed into Finnish twice, the first from 1969, and the second from 1992.
* It was also dubbed into Finnish twice; the original one from 1968 (by Reino Bäckman) and the new one from 1993 (by Pekka Lehtosaari). Interestingly, the dubbing directors for both dubs also voiced Baloo, while the original 1968 version has Bagheera voiced by a woman.
* It was also dubbed into French twice: 1989 and 2002 for its re-release.
* It was also dubbed into French twice, the first in 1972 for the original-theatrical cut and the second in 2003 for the Extended cut, both dubs have been available on DVD (with the French 2003 dub being sold on the first French DVD release in France and the Blu-Ray release (abet with the running-time of the original-theatrical cut version), while the French 1972 dub was released on DVD in the Benelux countries, the second French DVD release in France and the second British DVD release in the United Kingdom). Philippe Dumat and Jacques Dynam appeared in both dubs as differnet characters.
* It was also dubbed into French twice. While the redub was released to DVD at least once in Europe, US releases (including the Blu-Ray) contain the original dubbing, which has most of the songs left in English (with the exception of "I Want It Now" which is mostly spoken, save for some lyrics in the middle).
* It was also dubbed into French two (and a half) times; once in 1950 and again in 1993 (for the featurette versions) and 1998 (for the film version). In the original French dub, the "Mickey and the Beanstalk" segment was censored for unknown reasons. About 10 minutes were removed and the end was even fully cut, therefore making the movie somewhat confusing.
* It was also dubbed into German twice. Once in 1973 and again in 2004 for DVD. The re-dub, which has all the songs left in English, received highly negative reception from nostalgic fans.
* It was also dubbed into German twice; the original dub from 1952 was distributed by RKO, and the current dub from 1976 was directed by Heinrich Riethmüller.
* It was also dubbed into German twice; the original one from 1956 and the new one from 1968. Harry Wüstenhagen voiced Tramp in both dubs.
* It was also dubbed into German twice; the original was done in 1961 and the newer was done in 1980.

* It was also dubbed into Greek twice; there's the original from 1989/1990, and the DVD re-dub from 2002 which leaves all of the songs in English.
* It was also dubbed into Hebrew twice. The first dub was made to the first 15 episodes in 2012, while the second dub was made for the entire series in 2017.
* It was also dubbed into Hungarian twice: once in 1978 and again, ten years later, in 1988.
* It was also dubbed into Italian twice; first in 1981, and again in 1983 by Grupo Trenta, with most of the series cast. TV airings of the film used to randomly switch between the two dubs, but later airings and DVD releases use only the original dub from 1981 (except for Peewit's final line, which is kept from the second dub, since the audio track of the original dub was damaged in that point). Interestingly, both dubs have the songs left either partially or entirely in French, as well as the original instrumental music for the Smurfs' party sequence replaced by another song ("La festa della luna") sung to the tune of "Yankee Doodle".
* It was also dubbed into Japanese twice; once in 1957 and again in 1993.
* It was also dubbed into Japanese twice; the first in 1956 and the second in 1989.
* It was also dubbed into Japanese twice. The first was done in 1961 and again in 1992.
* It was also dubbed into Japanese twice; the original was done in 1964 and the current was done in 1984 for VHS and (later) DVD.
* It was also dubbed into Latin Spanish three times. The original dub was made during the show's original run (1976-1981) by CINSA and is currently extinct. The second dub was made for the two VHS volumes of "It's the Muppets" in 1993, and the third dub was made in Argentina during 1999-2001 by Palmera Record.
* It was also dubbed into Latin Spanish twice (1982 and 1997). Unlike the other examples, the Blu-Ray includes both dubs.
* It was also dubbed into Latin Spanish twice; the first time in the 1980s and again in 2011 by Candiani. Interestingly, both dubs use much of the same cast from
* It was also dubbed into Polish twice; the first was done in 1962 and the second in 1995.
* It was also dubbed into Swedish twice; the first in 1988 and the second in 1997. The reason why it received a Swedish redub for the first home video release in Sweden was due to fact that one of the dubbers threatened a lawsuit over royalties.
* It was also dubbed three times in Latin Spanish: twice in Mexico (1989 and 1997), and again in Argentina. The latter two dubs have the songs dubbed, except "The Girls of Rock & Roll" and "Diamond Dolls" in the Argentinian dub.
* It was also established that Klingon resilience makes for some extremely rough sex. Broken bones on the wedding night are kind of a badge of honor.
* It was also expected in Baroque opera and concerti that the soloist would ornament their part in the repeats, adding turns and trills all over the place. More akin to Harpo Does Something Virtuosic.

* It was also presumably easier to write the stories without having the city locked down due to a state of emergency after a major disaster in New York killing thousands. Of course, perhaps they didn't think that could happen...because the series aired entirely before 9/11.
* It was also received two Hungarian dubs; the first in 1989 and the second in 1991. Curiously, both dubs used nearly the same voice actors, except for a few minor characters.
* It was also re-dubbed in Swedish and French twice; both languages were originally dubbed in 1953, and again in 1992.
* It was also re-dubbed into Latin Spanish in 1997. The Latin dub was commissioned either because of a lawsuit from Peggy Lee (the English voice of Darling and the Siamese Cats), or from Roberto Espriú (the Latin voice of Tramp).
* It was also revealed that Scarlatti often challenges brash swordsmen who use their skills to bully others.
* It was also rumored for years that there was a way to open up the Pits of Inferno and fight
* It was also said that some teams are specialists of their own. SG-9 was the lawyers and diplomat team specializing in dealing with legal issues, like when SG-1 was put on a prison planet in S2-E3 Prisoners. SG-3 came back to the SGC and Hammond told them they did the right thing in coming back. Meanwhile several teams (SG-3, -5, -18, and -25) are mainly combat support.
* It was also stated that Riku really is a special case, Darkness always corrupts and recovering from it to the extent Riku did has only ever been done by him and him alone,
* It was also the catalyst for the creation of the AWA. In 1957, Édouard Carpentier defeated Lou Thesz for the NWA title in a two-out-of-three falls match. However, since one of those falls was won via DQ, there was a dispute among the NWA promoters over who should be the champion, with most promoters recognizing Thesz and other, renegade promoters recognizing Carpentier (and even sanctioning a title change between him and Verne Gagne, who was the one really pulling the strings at the time). After promoter Wally Karbo unsuccessfully lobbied for a title unification match between Gagne and the NWA champion, the two split off and formed the AWA.
* It was also the only release of the game on Windows computers for a long time, but the PC version did not get the Cops and Robbers mode or Big Surf Island. If you want to visit Big Surf on your gaming computer, you'll have to download a mod called the Vanity Pack, which adds in the map, the Island Challenges, and the cars from the DLC, along with a heap of extra content. However, there are no island Road Rules, no island single-player events, and the Big Surf paint shop is non-functional (the mod's developer attributes this to hard limits on drive-thrus in the game), not to mention that Cops and Robbers is still unavailable (though at least the mod brings in the police cars).
* It was also the plot of The Hork-Bajir Chronicles. An Andalite trains the Hork-Bajir to fight against the invading Yeerks. This was necessary because the Hork-Bajir were bark-eaters, and had never had conflict before. They, at first, couldn't even conceive of using their blades to deliberately harm another.
* It was also turned around one time, when Wolverine was surprised ("I didn't know.") to learn the Beast speaks Pashtun, and Hank replied....
* It was also used as a diversion once-Angel got into the Scourge by snapping Doyle's neck. But, it turns out Bracken demons can survive a neck snap, and Doyle stands up after Angel leaves and pulls his neck back into place.
* It was also used in promotional material for the American Boys Town in the

1980s, which is appropriate because it was inspired by a legend based around an illustration which was used by Boys Town by founder Father Edward Flanigan in the 1940s to promote what Boys Town was doing.
* It was also used repeatedly by Data in "11001001" when issuing an order to abandon ship.
* It was always preceded by a blaring guitar chord (the end of the closing theme), leading some to call the entire sequence the "Blang".
* It was a major issue in one episode, where Reid and Prentiss are sent into a cult compound to investigate allegations of pedophilia, posing as social workers (since the FBI isn't welcomed by cultists). Before they sent agents in, the FBI checked to make sure that no other law enforcement organizations were planning operations that could interfere, receiving negative answers from police at all levels. In fact the state AG had been planning a major raid by the state police and lied about it, since he didn't want the FBI co-opting his big operation (which was essentially a publicity stunt for a gubernatorial run next year), and went ahead with it while Reid and Prentiss were still inside, sending the cultists into a siege and endangering the agent's lives. When Hotch takes command of the situation he essentially bans the state authorities from the scene in retribution, relying solely on the county sheriffs.
* It was a major problem for the British at first, particularly leading to defeat in Burma and Malaya. But commanders like F. Spencer Chapman, Bill Slim and Ian Stewart deliberately trained their men to regard the jungle as neutral, which led to success later in the war. Stewart's 2nd Argyll and Sutherland Highlanders, who spent months on end training in the jungle before the war, were the only British unit in Malaya to consistently defeat the Japanese. Chapman spent more than three years behind the lines working with the Chinese, and came to believe so firmly that 'the Jungle is Neutral', that he made it
* It was a metric calendar (of sorts), with weeks made up of ten days rather than seven. Each month was three weeks long, and there were twelve months in total, leaving five or six extra holidays at the end of the year. The ten-day weeks were highly unpopular, as this eliminated quite a few weekends — the Concordat of 1801 restored the seven-day week and re-established Sunday as a weekly festival.

* It was at this point that reports arose that Secret had not been paying some of their players (and manager) the money they earned from the tournaments they participated in along with their merchandise sold under the Team Secret banner. Including this is the organization's manager and Puppey himself taking a paycut from the winnings earned. There were also reports of bullying within the team. Eventually a TwitLonger from Puppey was released, stating that all financial obligations were now met, and that the team's manager was then let go and hired a new manager.

* It was based on a book by the same name. There was also "Mr. Revere and I", by the same author, though that's less of a case of this, and more just an onlooker at many of the events, since it's narrated by Paul Revere's horse.
* It was basically this trope that led Barry Sanders to retire from the game, even though he was within one good season of passing Walter Payton, and barring injury, could've put the all-time rushing record out of even Emmitt Smith's reach. The Lions followed up two of their best seasons, 1991 (going 12-4 and getting their only playoff win since 1957 to date, over an up-and-coming Dallas squad) and 1995 (in which Herman Moore and Brett Perriman became the first teammates to finish 1-2 in total receptions) with 5-11 records the following year. Barry didn't walk away because of any issues with coach Bobby Ross, as was speculated at the time, but because the front office absolutely failed to make the necessary moves to improve the team (especially on defense), and the lack of a winning culture that drained him of his love for the game. Needless to say, it went

* It was because of that contract that the Ravens had to get rid of those other players in order to stay under the salary cap. Of course, that should still place blame mostly on management for offering the contract and not taking into account who they would have to get rid of in exchange and how it would affect the team.
* It was believed by some cannibalistic tribes that eating a dead person's brain allowed you to learn their life's experiences. This unfortunately meant you could also gain the exact same disease they probably died from.
* It was believed for a long time that African and Asian elephants couldn't interbreed. This was proved wrong in 1978 by the rather unexpected birth of an elephant named Motty at Chester Zoo in the UK. The mother (Sheba) was an Asian elephant, the father (Jumbolino) an African elephant and, though they had been observed mating with each other, no-one expected anything to come of it. Indeed, the possibility that Sheba might be pregnant was dismissed until a few days before the birth.

* It was explained to the original team that their individual costumes were symbols of graduation for Xavier's School. The new team were not students and so continued to wear the costumes they already wore. The New Mutants wore the school uniform and at one point decided to wear their graduation costumes on a mission, including a discussion of the symbolism of doing so. Kitty Pryde initially wore a school uniform but soon designed several (hideous) costumes. When she was temporarily removed from the X-Men and placed with the New Mutants she was required to wear the uniform again.
* It was explicitly used in some fansubs, where she called herself Kallen when referring to her English bloodline, and Karen to Japanese.
* It was fairly heavily implied that, unlike the rest of the show's villains (who were merely greedy for power or wealth), Blight was actually completely insane — she was certainly the only one pursuing pollution

* It was first recorded by Plato, and may be an allegory he dreamed up to serve his conception of a utopian society by providing it with an enemy. While the Atlantis in Plato's story is explicitly a fiction, the question is whether the idea was original or making use of an existing legend. Another possibility is that the legend of Atlantis grew out of stories about the civilization on Bronze-Age Crete, long before classical

* It Was Here, I Swear!: Someone finds something, goes to show somebody else, but by the time they come to see, it's gone.
* It Was Here, I Swear!: The protagonist tries to prove to someone else that this little shop (or other plot-relevant location) exists, only for the entire building to vanish without a trace.
* It was her fault, but it wasn't her son's murders. She was the killer.
* it was her fiance killing her, which is solved when she drives him mad with a secret). Once they are able to move on, a ghost sees a door appear and walks

through it. If a ghost is upset enough, they can become a poltergeist and move or break things mentally. Also, all ghosts can't eat or drink, can randomly teleport, and are stuck in whatever clothes they died in ("It's just as well I didn't die in a Star Trek uniform or a giant squirrel costume..."). Ghosts can also hide the living or undead by wrapping them in their clothes, referred to as "swaddling".
* It was his ex-wife's associate Wheeler that did it, and Hutch would have been convicted if it wasn't for Huggy Bear hiding in a coffin while recording Wheeler's confession."

* It was, however, the ideal (much like the knights of medieval Europe), and was even occasionally achieved, before the rise to dominance of Tokugawa. Case in point:
* It was implied by Barbossa that the cursed pirates don't feel anything positive, only negative. They are constantly feeling the suffering that comes with dying of starvation and thirst, but they keep going on.
* It was implied Leiter's wife was an ex of Bond and there were still feelings. Which means even Dalton's survival rate is < 100%, if you count pre-movie nookie.
* It was implied that Fontana was dirty, as he wore very nice clothes and flashed a big roll far too often for a simple detective. However, it was eventually revealed that Fontana was living off an inheritance, and not dirty at all, thus ultimately subverting the trope.
* It was implied that there were once natural dragons on Pern, and that the fire lizards are either descendants of them or have a common ancestor, so it makes sense they would keep an unnecessarily complex body structure despite their smaller size (see the human appendix and whale leg bones).
* It was implied that this would also happen to the 4,000 plus year old Nazgul upon the Ring's destruction, but this wasn't explicitly shown. In an indirect sort of way, this happened to the bearers of the elven Rings as well: the bearers are all immortal without the Rings, so we don't see them becoming older, but what happens to Elves as they age is that they tend to leave Middle-earth for Valinor... which is exactly what Elrond and Galadriel do a year later.

* It was later revealed that those who received the Gamma-mutations all have a certain mutant genetic code, with the stated conclusion that they all had a common ancestor.
* It was less a matter of him being surprised to see her with that big gun, and more a matter of her warning him that she'd use it on him if he told anyone she'd been there.
* It was less fun when you realized they were killing a lot more of your own minions than of the enemies.
* It was less that hitting it was difficult and more that the dams were so robust the bombs of the day couldn't damage them. You send enough planes and drop enough bombs, you'll definitely hit it, but at best you'll do trivial damage to the upper structure, maybe let out a little water, and generally do nothing that couldn't be easily repaired. The idea behind the dam busting bomb was that it was skipped into the side of the dam with backspin which caused it to sink to the base before exploding. This used the massive water pressure of the reservoir to magnify the blast and destroy the dam.

* It was long believed that the game only checked your dual-wield skill when your mainhand weapon swung. This led to the practice of always keeping the faster weapon in the main hand thinking that it would give the offhand weapon more opportunities to swing. In reality, the dual-wield chance is checked every time the weapon should be swinging, and both hands work independently of one another.

* It was mentioned a few times that Gellar Fields can only protect from small predators. The only thing that saves the ship from bigger fish is that they don't notice or don't care about puny humans. Occasionally they do take notice, and then a lifeless husk will join thousands ships that were lost in the warp.
* It was mentioned before the battle that the army had already won three major battles against the darkspawn, so the plan quite possibly would have worked. Considering that in the final battle the

* It Was My Best Birthday Ever, Charlie Brown, and the same animations of Linus are frequently repeated; it's rare to see one shot of Linus rollerblading only appear once in the special.
* It wasn’t all good news for the Democratic Party, though. For example, while Democrats lost most of their first-term congresspeople in traditionally Republican district, it looked like Ben McAdams of Utah would actually hold on against challenger Burgess Owens. Unfortunately for McAdams, the final ballots broke heavily in Owens’ favor and put him in the lead, and the final surge from Salt Lake County that would save McAdams never materialized as Owens broke even with him. Anthony Brindisi of New York had a ten-point deficit against his predecessor Claudia Tenney before the last ballots put Brindisi into a very narrow lead, but Tenney reclaimed her seat after a judge ordered a batch of heavily Republican ballots be counted. Christy Smith looked like she was about to oust California Republican Mike Garcia after only half a term, but the final batch of ballots pushed Garcia into the lead. And when it looked like Rita Hart was about to pull into the lead in her open Iowa race, the final surge never came and Mariannette Miller-Meeks narrowly held on.
* It wasn’t until 2014 that Kirby’s estate and Marvel mended legal fences. His four children were offered a settlement the last business day before the Supreme Court was set to hear the case. The exact monetary amount of the settlement has never
* It was never quite as poorly-equipped as some fictional examples, however; whilst most of its members were exempt from the draft by virtue of age or a minor disability, nearly all agricultural jobs -farm labourers, gamekeepers and such- were classified as essential war work, and a fair percentage of farm workers owned their own shotguns or small-game rifles. Once Lend-Lease equipment started arriving from the United States, the old First World War-era equipment hastily pressed into service for the regular forces was quickly handed down to them as well. American World War I-era weapons were also provided, which invariably went to the Home Guard because they used (for the British) non-standard ammunition.
* It was nonetheless chilling to watch Dolf grow from a naughty schoolboy into a fascist dictator. Also notable for the little details it threw in: Dolf was actually
* It was not a universal ideal. The Bunbu Ichi debate had strong adherents on either side. Some daimyo required their retainers to study poetry and calligraphy, while others imposed harsh punishment on any who practiced any but martial disciplines.
* It was not Clark who saved her but some guy hunting meteor freaks that shot her attacker dead before he could drown her. Clark would have been too late.

It was merely mentioned that it was wrong of him to simulate them, but no mention was made of the obvious potential there. To be fair, Barclay is socially awkward enough that he likely wouldn't have
* It was not the last time Linkara would verge into this territory -
* It wasn't a literal bleep, but some people found Mikuru's "I tried to contact but they said Classified Information, etc.," thing in "Endless Eight" similar to this. Especially when you consider what could be in there. Kyon even asks whether

it's meant to censor something obscene.
* It wasn't as severe as the first sundering, as most of the effects of this sundering were very minor in comparison (aside from opening portals to different parts of the Elemental Plane everywhere), but it counts. The larger plan was to make it much worse.
* It wasn't a torpedo that blew the Lusitania, that "just" shook up the coal dust in the bunkers. It was a sparking wire that actually set the whole lot off. Combined with fifteen thousand rounds of .303 ammunition, of course.

* It wasn't exactly a contest, but there was a Volvo commercial that featured the enormous Bearfoot monster truck smashing a row of cars flat, except of course for the stubbornly resistant Volvo wagon. It was revealed afterwards that they reinforced the Volvo in order to survive the multiple takes necessary when filming a commercial.
* it wasn't exactly forcecage by Rich Burlew in response to the abovementioned forum posters. Probably not, though, as he mainly avoids the forums simply to avoid doing things out of spite.
* It wasn't for the purpose of stealing anything, but the film capsules from early spy satellites were recovered this way. Because letting the film land in the ocean was considered too risky, the capsule would instead be snatched out of the air by an airplane or helicopter as it descended on a parachute.
* it wasn't him have been him, since he always takes credit for his work. Batman begrudgingly admits that he's right.
* It wasn't just Britain - several north European countries were targeted by pirate radio ships, as were Israel and even New Zealand. A couple of attempts were made off the USA, both rapidly silenced. Offshore piracy wasn't just in the 60s either - it began with Denmark's Radio Mercur in 1958, and didn't end until Radio Caroline made its last pirate broadcast in 1990 before going legit. Offshore broadcasting is now illegal just about everywhere, and countries have brought in even stiffer penalties for anyone who tries it. There are still one or two stations, however, that broadcast from ships

* It wasn't just suffragettes who were force fed in England at that time. It was common procedure to force-feed any prisoner or mental patient (usually the later) who was refusing to eat.
* It wasn't just taking the shortcut. The Donner Party was supposed to go with a larger group, but they were late, so to catch up, they tried to take a shortcut through the shortcut, which ended in disaster.
* It wasn't just Taylor. Many of the paratrooper officers on D-Day ended up in this sort of situation. Since their units were scattered during the jump, the paratroopers simply joined up with any friendly soldiers they encountered, leading to situations where officers found themselves either commanding smaller units than normal or as part of a small unit commanded by someone of even higher rank.
* It wasn't just the Tigers in "The Savage Time"; though the detail's not great, the soldiers Jon Stewart is with are carrying appropriate weapons (M1 Garand, Thompson SMG, M1918 BAR), and Savage's car in the movie is similarly under-detailed, but unmistakably a closed-top Mercedes-Benz 700k. The German soldiers carry MP40s at one point. The fire rate for weapons are off, certainly, and no one

* It wasn't looking good for "Strawberry Fields Forever" making it to record at first. They had recorded two versions, in a different key and tempo, but while promising neither was quite the sound they were hoping for. Then George Martin discovered by accident that if one take was slowed down, it wound up in the same key and tempo as the other one. They were able to mix between the two takes and create the song we know and love today.
* It wasn't love as revealed in the final episode, because Kraehe was the one who was really in love with him.
* "It Wasn't Me" by Shaggy is probably the best-known example of this trope in music. The evidence against the cheating character in the song includes marks the other woman left on his shoulder,
* It wasn't much better for Elliot Loudermilk, who was fired on the spot for questioning Frank, had his wife leave him because of it, got robbed of both his money and his booze (which he sold his blood to pay for), and ended up buying a shotgun to shoot Frank with in revenge.
* It wasn't nearly limited to plot recaps. Burnie (voice of Church and creator of the series) admits in the commentary that he always gave Church most, if not all, of the exposition necessary to move the plot forward since it was always a large number of lines and if necessary, he could always just redo them himself rather than call everybody back in again to do their voices for the ninth time to fill in another plot hole he just noticed. The entire rest of the cast (until Washington's appearance) was merely there for comic relief, while Church had the sole duty of carrying the entire plot around on his back. It's no wonder he was always so damn irritable.
* It wasn't one-sided, either — when the two finally meet up, Meryl tells Snake that she had been given psychotherapy to destroy her interest in men, and then not ten minutes later the boss from that one battle before she gets shot is telling Snake with his dying breath that he has "a large part" in her heart.
* it wasn't outlandish at all, it could still be a long and occasionally arduous process.
* It wasn't quite the very last sea battle of the war, but it was the final major battle.

* It wasn't so easy in the SNES and PSX versions, however. Actually, Final Fantasy Tactics originally had it
* It wasn't so much a case of trying to become like Rommel as it was a case of trying to predict his moves. Monty's decision not to pursue Rommel's forces came about because of how well he had studied the Desert Fox. He knew Rommel's strength was in running battles, and he was not about to play to that strength.
* It wasn't so much as torn down as large sections (such as the loops) were removed and replaced, the first hill made larger, etc. It wasn't really dangerous, it just wasn't the record holder it once was and was drawing less crowds. Also he wasn't the Grim Reaper, he was known as "The Phantom".
* It wasn't that she disappeared, it was that Arthur fell into another universe, as evidenced by how Earth wasn't even the same anymore and how there was no evidence of Fenchurch ever having existed at all.
* It wasn't the final cel-animated episode produced, though; "How I Spent My Strummer Vacation" from earlier in the season takes that honor.
* It wasn't the first time it happened to B.W. Stevenson either. Just as his version of "Shambala" started gaining momentum, Three Dog Night released theirs and had a Top 10 hit with it.
* It wasn't the first time they did this. For Super Bowl XLV, they rolled out an ad titled

* It wasn't the natural proteins, per se, they just caused some decay on its microchips. What really caused the development of sentience was that Batou was treating this particular Tachikoma as an individual, which combined with the decay

made it feel unique in spite of the synchronisations, while spreading the sensation to its compatriots. Later in the series it's mentioned that the Section 9 tried to introduce organic oil to the Fuchikomas but this didn't introduce the same kind of individualism, most likely because they were all still treated uniformly.
* It wasn't the very first, however, it's just the first season where it starts become an annual thing. A special franchise
* It wasn't uncommon from the late '70s through the late '90s for most of the major characters played by either Frank Oz or Jim Henson to be absent from the episodes' street stories, as Oz and Henson were typically busy with a variety of other projects. While they would return for weeks at a time to perform their characters for inserts, it was rare for them to appear in street stories. If their characters appeared, they typically either made silent background appearances or had pre-recorded dialogue. Although Steve Whitmire assumed the roles of Ernie and Kermit the Frog following Henson's passing, he was also quite busy with Muppet-related commitments and likewise usually only appeared in inserts (save for major street stories like Slimey's trip to the moon, which saw Kermit return as a reporter); Oz's work as a film director also kept him from appearing in more than just inserts, and the period between Henson's passing and Whitmire's taking over as Ernie also meant Bert was mostly relegated to the background.

* It Wasn't Your Fault, Leonardo is crying into Karai's chest as he blames himself for Karai's mutation.
* It was obvious before that as Starfleet was set up as science and exploration service, not a military branch. This has lead some fans to conclude that Starfleet Ships might not have the best weapons of any fleet, but the best sensors of any war ship. There is a lot of advantage to seeing an enemy ship before it can see you, to see nothing about using the superior elint game to cause the enemy to miss targets while at the same time find the one area on the ship that the enemy doesn't want to be hit, and striking it with a well placed phaser.
* It was obvious from the onset that Reyes was meant to be Doggett's love interest. Chris Carter said that Doggett was not meant to replace Mulder or be a love interest for Scully. So it seems Reyes, while mostly being brought on to replace Scully on

Today it's reckoned that the towns were simply abandoned as law and order, government services and the cash economy broke down, and entropy, aided by country dwellers cannibalising the buildings for stone and metal, did the rest.
* It was once common practice for monarchs to harbor pretenders to a rival throne. The most famous of these to English speakers were the Jacobites.
* It was once reported that the US was using 250,000 bullets to kill a single insurgent in Afghanistan. The most major problem with this is that they conveniently forgot to explain that this included all the bullets the military was

firing, even during training and weapons tests. Never mind mentioning that most bullets go toward suppressing fire or that most casualties in war are victims of bombs and artillery (which this statistic took the care to exclude). It was finally revealed that this number had used a lot of generous rounding to get to that number.
* It was once stated by one of the guys that dating sister could be tolerated, but mothers were strictly off-limits.
* It was once wildly believed and taught that dinosaur/extinct animal coloration would always be something fundamentally impossible to know, but it was discovered in 2008 that melanosomes, which are responsible for animal coloration, are sometimes capable of fossilizing - they've just been previously thought to be traces of bacteria or misidentified as traces of other things. Comparing the structure and amount of fossilized melanosomes to that of living animals allows one to infer the color of the extinct animal, and now there is a small handful of dinosaurs and extinct birds (including a long-beaked extinct penguin) with full

Also, the curse failed to break after Angel had sex with Darla, as this was an act of despair, not love.

* It was said later that if they had written the Apollo 13 situation up as a training simulation, it would have been rejected as unsolvable. That realization caused an official change of NASA training policy from "anything that's possible to solve" to "anything whatsoever".
* It was said that all kinds of inaccessible areas could be reached and something special awaited there. In particular, it was rumored that you could find a secret merchant if you went all the way out into the ocean in Seal Form as a druid, not far from Duskwood. Several incomplete areas could be accessed by exploits (such as the peak of Hyjal) but nothing was there other than some empty unfinished landscapes. This has died down since

* It was speculated after the 2015 train wreck in Valhalla, NY, USA, that the woman who inexplicably drove her SUV into the path of the oncoming train (leading to her death) did so because she had confused drive and reverse on the column-based shifter of her Mercedes, which she had gotten two months earlier.
* It was standard for Ancient Greek theatre that everything that actually happened was offstage and characters only appeared to talk about it — it doesn't seem to have been until quite recently that it occurred to dramatists that people might like to actually see this stuff happen.
* It was subverted in one episode, where a new species comes to the station and their language is so different, that the universal translator has to spend about half of the episode to figure it out — but then again, it manages to figure it out despite the fact that they repeat the same sentence a hundred times.

* It was the most profitable colony in the Caribbean of any colonial power, and it was a colony where the black slaves overwhelmingly outnumbered the "big whites" (comprising about 90% of the population - most of them were even born in Africa, not Haiti). The plantation owners used the "Black Codes" (issued by
* It was then also customary to assemble a kind of monument from captured weapons and armour on the battlefield or on a point of a nearby coast in the case of a naval battle. When the battle's outcome was in dispute, it could happen that both sides erected such a victory monument and then one side would try to destroy the other's victory monument, leading to another battle, as mentioned e. g. in Thucydides' history of the Peloponnesian War.

* It was those goddesses who allowed Utsuho to gain that power in the first place as part of their plan to gather faith by advancing the technology of Gensokyo.
* It was thought it was just a myth that Qui Shi Huang's tomb was filled with mercury rivers so small ships could sail for eternity, by killing anyone who tries to disturb it. When his tomb was finally found, it was discovered that the tomb is filled with extremely deadly levels of mercury, meaning the legends may be true,

and that Huang may get his wish. Even though the tomb hasn't been opened yet, ancient accounts of its construction mention it having bronze crossbows rigged to fire when disturbed. In the past several bronze crossbows from this time period have been found needing little to no maintenance to fire. Fear of these death traps is cited as the number two reason the Chinese government won't allow any expeditions to open the tomb.
* It was too bad he was referring to the time he murdered his best friend and stole their songs.
* it was unusually happy, with no recorded instances of Henry even being suspected of adultery (unlike many kings of the era). After a time he did allow his courtiers to look for a new wife for him, but his description of what he wanted was almost identical to Elizabeth and, of course, no one could be found who came close. He died six years later, in 1509, having never remarried nor taken a mistress.

* It: when Bill Denbrough is in college in the early 1970s, he takes a writing class with a left-leaning professor who only likes stories that make a political point. For this reason, he dislikes most of Bill's apolitical sci-fi and horror stories. The only story he gives a good grade to is one about an alien conflict that he interprets as having an anti-war message.

* It will have an open, fragile-looking frame, possibly with thin canvas wings and lots of machinery visible inside. Or its hull may be incredibly heavy-looking, totally un-aerodynamic, and studded with rivets.
* It will have lots of spinning cogs and gears and other shiny moving parts.
* It will however use it at other times, sometimes with hidden bonuses, such as the episode "Los Dos Mojos", where a hit flash from Bubbles is actually the words "Mojo" rapidly cycled.
* It will likely always be known as the Backfire in the west because of the strange nature of its actual name. The "M" at the end stands for modern and is absolutely critical because the Tu-22 without the M is a completely different (and crappy) aircraft, with its own reporting name "Blinder". The Soviets didn't want to shill out and award Tupolev with the money to design a new plane so they just gave him enough to modernize the Tu-22.
* It Will Never Catch On: Someone in the past thinks that something will never be popular. They're wrong.

* It Won't Turn Off: A device won't turn off no matter what a character does.
* It Won't Turn Off: A machine stays active even when the switch is flipped in the "off" position and/or power is severed.
* It worked better for another character named Set Harth, who learned the technique from the Sith, but then decided to ditch them. Who needs ambitions to one day rule the galaxy when you can live forever, huh? He successfully managed it for at least a few hundred years, after which his trace had gone cold.

* It worked. For added value, the Ottomans didn't have the "munition" used by these cannons anymore (they originally fired giant boulders) and just loaded them with debris, effectively creating makeshift grapeshot.
* It worked out pretty well for Miles, assuming he doesn't die, because he found out about the diamonds, dug up the graves, and took them.
* It worked. The resulting creatures went out of control and began consuming all the surrounding fauna, eventually leaving the half-dozen shapeshifters the only non-plant organisms on the planet. The same experiment on another world had slightly better results.
* It works, but Sasha and Connie miss the neck, so they don't quite finish off their targets. Fortunately, Mikasa and Annie finish them off.
* It works in reverse, too. There are some songs that are scored so harshly that missing even one note in chance time guarantees a rank of STANDARD. Frustrating if you're trying to unlock the extra models.
* It works. One of House's patients pulls an extreme one of these. "I can't go in public. I have to go home." Essentially he wanted to bring someone else's urine to be tested, not his own.
* It works out better in "Captain's Holiday" when Vash (hoping to avoid being

noticed by a Ferengi) throws herself into the arms of Captain Picard (who has just beamed down to the planet) and greets him like an old friend. Picard is rather annoyed as he has no idea who Vash is, but it marks the beginning of a beautiful friendship.
* It works out for him in the end. Frank (by now a reformed man) rehires him in a better position and enlists his help in performing a Hostile Show Takeover
* It works the other way around, too. And if anything, Scully is even
* It works the other way around, too, in which Scully will risk everything to save Mulder. She doesn't even let being pregnant get in the way of heading her own private investigation into his abduction, which involves driving cross-country and confronting alien replacements. In fact, it is Skinner who tries to convince her that Mulder wouldn't want her to do this if he had known her condition.
* It works the other way as well. As a beginning player, you haven't developed the muscle memory to know more than a few basic actions common to the genre. Because of this, you focus more on what button to press for the desired action until you gain more experience so that you don't focus anymore.
* It works the other way, too: Rose, River and Clara (and the TARDIS —
* It would also make sense if one considered tabletop rules, where for several editions standing one's ground wasn't worth it against the enemy's charge bonuses, especially with Orks' Furious Charge rule.

* It would take well over a decade before the subject of Britney's continuing conservatorship became a point of contention. Originally meant to be a legal means to protect her from her own self-destructive decisions involving drugs, squandered money, and scandal, it continued for years after Britney had gotten herself clean and back into a responsible, structured lifestyle. It wasn't until 2021 that details of the conservatorship began to come to light, with Britney's conservators, her father in particular, being shown to have invasive control over her, including being able to mandate that she be equipped with a birth control device, dictate her performance schedule and details, and mandate medications, all in the name of her health and well-being. Much fuss has been made of her father's own self-dealing from the arrangement, being allowed to pay himself a salary for his services out of his daughter's money and charging expenses to her for other seemingly unrelated items, including fees for public relations work meant to counteract the perception that he was profiting from his guardianship. The arrangement's slide from well-meaning control into arguable abuse and near-captivity became the subject of the documentary

* Ivanhoe (Burbank Animation), Front-de-Bouef gets this by falling into the flaming inferno that was Torquilstone.
* Ivanhoe culminates in trial-by-combat. Sir Wilfred of Ivanhoe fights on behalf of Rebecca, the daughter of Isaac of York, who has been accused of witchcraft solely on the basis of her being Jewish, as thanks for her helping him when he was wounded. Wilfred's victory is seen as a sign from God that Rebecca is innocent.
* Ivanhoe have been expecting an appearance from Robin Hood, who spends the first half of the book under an assumed name (back then, "Locksley" would not have been immediately recognizable as one of his aliases).
* Ivanhoe, he’s wounded and half-delirious, Rebecca and Rowena fear he’ll die, he’s carried into the Sherwood Forest to avoid capture… and arrives at Torquilstone bright and early on the next morning, perfectly healthy, to do serious badass fighting till the end of the film. Bois-Guilbert does mention that Ivanhoe’s shoulder was still bandaged when he appeared, but apart from that, nobody ever remembers these wounds.
* Ivanhoe; Ivanhoe uses a dagger in his left hand whenever he fights. Also, in the 1997 miniseries, Bois-Guilbert briefly dual wields an axe and sword during the trial by combat.
* Ivanhoe. Not to mention a mysterious black knight who turns out to be Richard the Lionhearted.
* Ivanhoe, published in 1819, which codified many of the tropes associated with Robin Hood (Robin of Locksley in the novel.)
* Ivanhoe: The King's Knight, as tradition dictates, features this between King Richard and Prince John.
* Ivanhoe: The King's Knight: Being old enough to be Ivanhoe and Rowena's daughter and three years younger than Wamba, Rebecca most certainly qualifies. "The Four Black Knights" shows the negative parts of this trope when Rebecca tagging along nearly costs Harold his life.
* Ivanhoe: The King's Knight, due to being the sole adult female character, a mother figure to Rebecca and less strict than Ivanhoe, who does have his moments.
* Ivanhoe: The King's Knight features Prince John with such as beard as well as the titular dowry hunter and regent loyalist in "The Bearded One."
* Ivanhoe: The King's Knight features redheads Richard and John with grey and black hair respectively, of course in Richard's case it may have just been a case of him having gone grey early and his hair having originally being red or, if John is any indication, black. Also, none of the main Saxon characters are fair-haired.
* Ivanhoe: The King's Knight has the titular character as this to Wamba and Rebecca.
* Ivanhoe: The King's Knight is viewed as such by Harold despite Wamba being a human being of the Saxon ancestry like Harold. Maybe it has to do with Wamba being a jester?

* Ivanhoe: The King's Knight: Prince John uses Front-de-Boeuf as one, to the latter's surprise, to prevent others from knowing he arranged his own kidnapping in "The Four Black Knights".
* Ivanhoe: The King's Knight: "The Legend of the White Stag" tells the story of Harold Godwin and his love for Blanche Fleur; she tragically died from an illness before they could marry. This was shortly followed by the death of Edward, Harold's father, who was crushed by a tree that was felled by a lightning strike. Harold's grief was so overwhelming that he couldn't remember who he was for a time.
* Ivanhoe, the narrator spends a lot of time repeatedly pointing out how much the ladies enjoy tournaments and matches between knights even more enthusiastically than many men, making this an in-universe example.
* Ivanhoe with a garbled reference to the Tribe of Benjamin. Rowena and Rebecca are both in love with Ivanhoe, who loves only Rowena, and the former is eventually rescued during the Battle of Torquilstone, which occurs the same day. Bois-Guilbert and Rebecca's plot continues for the rest of the novel following the former fleeing with the latter from Torquilstone to Templestowe and eventually Bois-Guilbert's plot spirals down from there.
* Ivan IV of Russia, popularly known as Ivan the Terrible, struck his son Ivan Ivanovich on the head with his scepter during a heated argument, accidentally killing him. This also had a nasty side-effect of ending the Rurik dynasty's 700+ years rule in Russia, since his second son and successor Feodor died childless and his last son Dimitri was killed soon after his father's death.

* Ivanova is promoted to full Commander at the start of season two when Captain Sheridan takes over. This is probably because Sinclair was never in command of a ship. The most he ever flew was a Starfury during the Battle of the Line. Sheridan actually had his own ship by the time he was re-assigned to B5.
* Ivanova's childhood rabbi visits the station, triggering a brief discussion of the difficulty of determining the kosher status of non-Earth food. The Rabbi's conclusion is that anything not mentioned in the Torah was probably OK, but he isn't certain. Or maybe he just wasn't too strict in his beliefs and wanted to try

the food.
* Ivanova shows up in one episode leading a gaggle of Drazi with her leg in a cast. Reference to the rather... rambunctious nature of Drazi politics? No, Claudia Christian was in an accident and broke her leg. However, it was left in because it fit in hilariously well with what was going on in the character's life at the time.

* Ivan Pavlov, known for his work on classical conditioning, was strict and disciplined in the lab, asking the same of his assistants. (He once chastised an assistant for arriving late to work during the Russian revolution. The man had been late because he had to avoid stray bullets and an angry mob.) Outside of work, Pavlov was dirt poor, as he often forgot to pick up his own paychecks and had a tendency to lose them. On a trip to New York, he carried all his money in a big visible wad, only to be mugged in the subway. His hosts had to gather contributions to make up for his lost funds. He also once gave his wife a pair of shoes as a gift as she was about to go for a trip. Once at her destination, she found she had only one of the two shoes, with a note from her husband saying he had kept the other one to remind himself of her until her return (he failed to realize she'd need both). * Ivan the Terrible is roughly 17 feet tall. While he's really strong, his body is so heavy that he can barely walk. He usually gets around by teleporting or riding his elephant.
* Ivan the Terrible (or Ivan of Russia, in the Japanese version) from
* Ivan the Terrible who somehow escaped death and went into hiding, was responsible for decades of chaos in Russia called the Time of Troubles, as there were multiple pretenders claiming to be him that sought to claim the throne when the Rurikid Dynasty died out. And some anti-Bolshevik Cossack leaders who disappeared after the end of the Russian Civil War, it turned out, really did just go into hiding as they came out after the Nazis invaded the Soviet Union. Their stories did not end well.
* Ivan Turbincă: The titular character befriends God and Saint Peter at the beginning of the story.
* Ivan Turgenev's play Fortune's Fool features the entry of wealthy neighbour Flegont Alexandrovitch Tropatchov bursting onto the scene and dominating the stage with a breathless monologue before asking the poor Kuzovkin if he's boring him.
* Ivan Vanko aka Whiplash has an interesting variation where despite Iron Man beating his ass, he shouts gleefully as the authorities drag "
* Ivan Vanko/Whiplash is succeeded by a female mercenary that gets dubbed Whiplash 2.0.

* Ivan Vasilievich Changes Profession: After a time-travel incident forces a Soviet apartment manager to impersonate Tsar Ivan the Terrible, he's forced to go through a diplomatic meeting with a Swedish delegation who speak German... and the only thing he can say to them is "Hitler kaput".
* Ivan Vasilievich Changes Profession (a.k.a. Ivan Vasilievich: Back to the Future) there's a guy selling electronic parts that way, coat and all. Which is totally justified. In USSR, electronic parts were not outlawed, but private trade was. And the only reason Shurik even buys from the guy is because it's lunchtime, and all the electronic stores in the neighborhood are closed.
* Ivan Vasilievich Changes Profession, runs into an elevator, and thinks he has been walled up as the doors close.
* Ivan Vasilievich Changes Profession speak Russian with slightly antiquated grammar and employ words no longer in wide usage, yet still are recognizable by the audience (mostly through the Russian Orthodox Church's use of Old Church Slavonic).
* Ivan Vasilievich Changes Profession, when Bunsha's wife goes crazy, she suddenly takes off her wig and we find out that she's not quite bald, but has a really short cut
* Ivan Vasilievich Changes Profession"! When she later quarrels with Yakin, her ultimate insult towards him is "And you are a mediocrity!"
* Ivan Vorpatril, although damn good-looking to begin with, looks even better in uniform because it flatters his athletic frame and makes him seem less boyish.
* Ivan Vorpatril does such a good impression of this he even fools his immediate family — until he thoroughly blows his cover in
* Ivan Yefremov books, him being a prominent scientist himself. Even late into the series chronology, when they finally invent the FTL travel, it remains a difficult, complicated and very involved affair.
* Ivan Yefremov take it as extremely distasteful and, believing that no spacefaring civilization might be hostile, meet the aliens with open hands, in one of the most touching description of contact ever written.
* Ivan Ziraldo made an album for a hypothetical Krampus opera called

* Ivarian Borenson so he got himself into the habit of laughing instead.
* IV (as herself), snarks about the particular subculture and their tendency to reject things that have gone mainstream. There are also news reports about them starting to flood the suburbs around Liberty City, indirectly causing taxi fare hikes (because, according to the drivers, they can't distinguish real beggars from well-to-do street-people-wannabes).
* IV: Black Flag pillaging, plundering and exploring without progressing the plot by a second.
* "I've been called a greasy thug, too. And it never stops hurting. So here's what we're gonna do, we're gonna grease ourselves up real good, and trash that place with a baseball bat!"
* "I've Been Everywhere" is now thought of exclusively as a Johnny Cash song, but it has a complex history. It was written by Australian songwriter Geoff Mack in 1959, using Australian place names. Then his publisher gave him an atlas and asked him to write a version with American names. Hank Snow recorded that version in 1962, and it became a country music standard. When Cash recorded it in 1996, his younger fans weren't familiar with the song.
* "I've Been Everywhere", written by Geoff Mack and performed by everyone from Asleep At the Wheel to
* I've Been Expecting You had put him on, by painting his lifestyle as being less glamorous than they were imagining:
* "I've been framed - it's <insert name of villain> who dunnit. Honest, guv. Cor blimey. Luv a duck."
* I've Been Killing Slimes for 300 Years and Maxed Out My Level a long and lazy life when she reincarnated, and then spends the next three hundred years gardening, hunting slimes, mixing medicines and reading. She refers to this time as an endless vacation of relaxation, exercise and tranquility. She is also on excellent terms

with the local and mortal villagers, who revere her as something like a guardian deity because the medicines she's provided have saved so many lives.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level and accepts Azusa as her mother.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level, and a few more expressing heavy denial, after hearing Falfa call her "mama" and clarify that she seriously means that Azusa is her and Shalsha's mother, since she has no memory of bearing children—or even having romantic relationships—for two whole lives, and it makes her feel really old. It takes a while after learning both this and the fact they were "born" from her constant slime killing to accept her status as a mother.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level and a massive central castle. Moreover, their entire country is enclosed in a vast wall. Then the two species forged a five hundred-year peace before the fighting reached those defenses, leaving it all a wasted effort.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level, and so on. There are also gods and other deities, such as the one who reincarnated the protagonist and made her immortal in the first place.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level (death by overwork), the very idea of working until you reach and surpass your physical limits, at the potential detriment to your health, causes her to experience traumatic flashbacks. As a result, not only does she refuse to ever go anywhere near her limits ever again, keeping herself within or at least near her average capabilities, but any time somebody she cares about contemplates overexerting themselves, she shoots the thought down and drills into them to only do what they can handle without exhausting their body.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level, demons and dragons have the capability to switch between their more monstrous (and oftentimes, much more massive) forms, and humanoid shapes with clothes included.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level: Flatorte ends up doing it against a herd of wild boars. Before that she also flashes her full naked body to some of Azusa's family members, and accidentally to some people at a river.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level has this, as she is frequently making mistakes such as mixing up poisonous and edible mushrooms and getting thrown in prison for accidentally knocking out the Demon King.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level in her favour. As all she wants to do is live a peaceful, carefree life, she often has this reaction to powerful creatures and beings challenging her, or requesting her assistance to face even stronger foes.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level is a competent businesswoman who owns a large energy-drink business, but she's an impulsive klutz at everything else.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level is this, power being measured in numerical values, "levels" and "stats." As the name implies, our protagonist Azusa is the highest possible in all respects.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level: It happens as Fruchttorte's clothes and underwear gets taken by boars and dropped into the river.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level, leviathans look like flying whales so massive that they can carry small towns on their backs, although most of the time they appear in their humanoid forms.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level meets a guild receptionist named Natalie during her first visit to Flatta village. Three hundred years later, she meets her descendant, also named Natalie, also working as the receptionist, and looking so alike Azusa thinks she's the same person.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level members were once her sworn enemies, until she soundly beat the crap out of them, or otherwise outsmarted them.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level: Played with when Azusa is coerced into unknowingly making the blue dragon Flatorte her slave. She

immediately tries to set Flatorte free, unfortunately Flatorte's pride as a dragon means she insists on adhering to the terms of her servitude and refusing, going so far as to threaten to kill herself should Azusa do it anyway. This is even though this situation was against Flatorte's will as well. The two compromise by having Azusa's one standing order to Flatorte be that she is to do as she pleases, allowing Flatorte her freedom while still keeping her bound to Azusa.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level suggests Azusa to be this to her, Azusa muses that Beelzebub would have been a better choice for that role than she is, something Pecora agrees with and is miffed that Beelzebub refuses to comply with the idea of acting domineering towards her king, forcing Pecora to look elsewhere.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level that Azusa kills every day for petty cash — dark-colored slimes are good; light-colored slimes are evil and fair game for slaughter. What exactly could account for the moral compass of a non-sapient blob is left unexplained.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level those skills. Her magic gets better with practice, but her physical combat is mostly just hit things hard. When she fights with Beelzebub in a tournament, Beelzebub is confused because Azusa has so many openings to attack, yet she is reluctant to actually attack her because she knows how badly it would end.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level. Through this skill, she is quite well-known in the nearby village as a herbalist, as her treatments are rather effective.
* I've Been Killing Slimes for 300 Years and Maxed Out My Level world. Among other beneficial perks, she is capable of understanding, reading, writing, and speaking the local language straight away.
* I've been waiting four years to get you again" Cullinan eventually replied "and it looks like you've been spending it eating". Warne laughed and said "not bad from you, Daryll. Not bad."
* I've Come Too Far: A character goes ahead in doing something reprehensible because they've resigned to how futile it has become to just call it quits.
* I've Come Too Far: When a character recognizes (or believes) that they have crossed the MEH and know that they don't have a chance of redemption anymore.
* "I've experiments to run/There is research to be done/On the people who are/
* "I've fallen, and I can't get up!" For all the serious nature of the product, the Life Alert call button, it was an unforgettable line.
* "I've Fallen and I Can't Get Up!"- used in an advert for Life Alert, a medical alarm company. It actually began with a similar product named LifeCall, and Life Alert started using that phrase after LifeCall went under.
* I've gone as far as I can go. Keep going! I will hold them off as long as I can."
* "I've got a joke, but it's really subtle, most people don't get it", While the more brave/honest listeners will usually still respond with "I got it, it just wasn't very funny", many will just assume they must have not got it.
* I've Got A Secret. At the time her casting caused a scandal, and Gene Siskel encouraged angry fans to send her hate mail over it. But over time Mrs Voorhees became her most famous role, and she embraced it.
* I've Got a Secret with a hole drilled through it, took the missing piece, and put it in the hole — he’s “plugging his book”.
* "I've Got Some Outside Help I Don't Need" by B.B. King references this, among many other kinds of infidelity the singer suspects his wife of.
* I've Got This Friend, with the obvious implication that the "friend" each singer is talking about is actually themselves, while the other suggests that their "friend" sounds perfect for them.
* I've Got Your Back, Pearl's dad mentions her being his favorite daughter. She replies that she's his only daughter.

* Ivelisse Vélez after she defeated Catrina in a match. Velez ended up interfering in a grave consequences match that resulted in Crane getting killed!
* Ivelisse Vélez apparently wanted to be this while she was in WWE. Apparently her mother had tried to prevent her from dyeing her hair, because of her natural blonde colour. After getting released from WWE she finally dyed her hair brown. In 2016 she went redhead.
* Ivelisse Vélez are hooded and masked when they come to the ring.
* Ivelisse Vélez at the start of their SHINE 22 match, but the referee finally decided to intervene when Eagles was disarmed by Velez, only to produce a knife in its place.
* Ivelisse Vélez even though Vélez won the last time they wrestled.
* Ivelisse Vélez in video clips where she was beat up by Melanie Cruise and Wesna Busic.
* Ivelisse Vélez. She was also the most sacrificial member and eventually kicked out for refusing to take a dive.
* Ivelisse Vélez. Starting from Florida, the two wound a path to Chile and back, alternating between posing in photo shoots and aggravating nagging injuries. Garrett has another in Chelsea Green, stemming from the fact Green is the biggest rival of Garrett's most famous student(Gabi Castrovinci).
* Ivelisse Vélez the unpopular exit of Velez and Holidead from SHINE's Nova Tournament.
* I've Lost My Mommy! about adults trying to get some sense out of a lost child in a supermarket who just keeps repeating the title line until his mother turns up and gives him a clip over the ear.
* "I've made a huge mistake", GOB's catchphrase (and motto, practically), is also used by Marta (when she realises she likes Michael, not GOB), Michael (when he realises that "hermano" is Spanish for "brother" and the one Marta likes is him), George (when he regrets his affair with Kitty in Mexico), Steve Holt (when he realises he

* Ives grabs Tim's arm and pulls him back a little so Ives is in front of him when they're confronted by bullies, but hesitates to let go of Tim's sleeve. Ives is terrified of the bullies in question, rightly so since they murder a fellow student within hours of the confrontation, and is worried Tim is going to get their attention and they'll start targeting his friend with their cruelty.
* I've soiled the good name of the Krusty Krab!! Soiled it! Soiled it! Soiled it! Soiled it! Soiled it!..."
* Ive Sound: A joint venture of various producers and performers, contributing opening and ending themes to many anime series. Best known for KOTOKO.
* I Vespri Siciliani. He says he'd sacrifice anything, even his honor, to liberate Sicily and indeed, his methods are often less than honorable.
* "I've tried to explain to her the effect near-relativistic speeds have on your eyes."
* IV fluids and vitamins also seem fairly popular. The most popular IV fluid is D5W—a solution of 5% dextrose (AKA glucose)—maybe with a small amount of added potassium (although solutions with that last in it must be run in a lot

slower, not least because it stings like hell going in the vein). Another popular choice is Ringer's Lactate (interchangeably known as Lactated Ringer's or Hartmann's Solution). This uses various electrolytes (sodium lactate, sodium chloride, potassium chloride, etc.) instead of dextrose. Each works differently; D5W is meant to replace lost nutrients whereas Ringer's Lactate helps with blood chemistry.
* IV, given that he was one of the few interesting characters in the game.
* Ivick Von Salza: The Little Lumberjack, whenever the yeti gets mad, his eyes turn red.
* IV is Krapea, a brand of Swedish pre-assembled furniture... Much like IKEA.
* I Vitelloni: Francesco, Fausto’s father, loses his patience with his son by the end of the film.
* Ivor Biggun's first compilation records of "Greatest Hits" was released as, among other titles, "The Wurst of Ivor Biggun".
* Ivori and Kobalt of Team FNKI are among the many killed by Ironwood's airship crashing into Beacon's courtyard. Their deaths happen offscreen and Ironwood only learns of their deaths after coming across their corpses while clearing out one of Beacon's hallways.
* Ivor The Engine. Subverted, in that the actual cause of the smoke was a dragon's egg in the crater.
* Ivory and had no problem showing off her body—she just happened to be presented as heroic as well.
* Ivory as while she called herself a lady, she was also very Badass. 95% of her outfits were purple and she even carried a purple scarf to the ring with her in her early career.
* Ivory Extraordinaire: Deadly safaris on an alternate Earth where elephants out-competed all other big herbivores, and carnivores have grown larger to keep up.
* Ivory image probably made the folks backstage more comfortable with it.
* Ivory in 2001. This is considered the moment Trish became a legitimate wrestler after spending her first year in the WWF as an eye-candy manager.
* Ivory Ivory compares wrestling to a dance and how the guys have all gotten around to each other a few times over their careers and how the women don't "dance very often with the same partners or the same opponents, and I guess that's why the hair-pulling happens."
* Ivory leaves Jack to scour the Earth for other surviving members of the Sisterhood.
* Ivory (Retired at 45, returned at 56 to compete at WWE's first Evolution PPV)
* Ivory She'd say, 'There's my little snot, my little brat'. So when I'm being Ivory with her big mouth, cutting someone up on the mic, I think of my grandma. I'm thinking, 'Yeah grandma, here's your little snot, doing it again.'"
* Ivory, the audience stood, applauded and chanted, "You're Still Here!"
* Ivory to fit the required for the 'WWE look' - than to find someone with the right look and try and teach them the ability.
* Ivory' wedding) and when Ivory went into the WWE Hall Of Fame in 2018, she chose Molly to give her induction speech.
* Ivory who were more than capable of putting a match together as well.
* Ivory would occur not long after she managed to get so much heel heat from an unexpected source.
* Ivo Shandor, the madman who designed Dana's apartment building, incorporated mystical geometries and arcane materials into the structure to make it a focusing device for ghostly energies.
* IV's mother (instead of finding a way around it), the commander would notify him that he sent his men to execute her. If Elwyn takes the red ship instead of the blue one, Shaera would commit suicide, believing that he died (granted, this is an unnecessary complication of the gameplay, since Harke will bribe the crew to switch the sails, and Elwyn arrives just in time to save the girl anyway, making the outcome pretty much the same).
* I Vs (specifically the H and J models) had blocky shapes, plus extra turret skirts and long guns with a large muzzle brake which made them look superficially

similar to a Tiger at a distance, and if a guy sees that through his telescope he’s going to think "TIGER!" and start frantically reacting instead of sitting there counting the number of road wheels on it to make sure.
* IV tricks Shark into peeking in his deck to get him disqualified, and leads Shark into a Magma field where his monsters are at a disadvantage.
* iVUE makes sunglasses with a tiny camera in the middle (it can record sound, too). One of the models has Wi-Fi connectivity, so it can be operated through a mobile device and stream the video feed to it.
* Ivy and Luna were incredibly close as children, until Luna became embroiled with Nadine's gang and drifted away from Ivy out of a fear of being seen as uncool. Both of them receiving powers has pushed them back together, and encouraged them to reconcile their old relationship.
* Ivy and Robin end up killing the mood themselves in their last scene together. In Ivy’s lair, Robin tries to get a sign of trust from Ivy, as proof that she is really
* Ivy has pigtails, which suits her personality as the second least mature member of the Dollhouse staff.
* Ivy is shocked to discover that she was actually quite popular with the boys back in middle school. The multiple Valentines she received were genuine, and not just an act of courtesy. While it's ambiguous whether it still applies to her in the present, there is at least one girl crushing on her that she's still oblivious to.
* Ivy League for Everyone: Fictional characters have a much easier time getting into prestigious schools than real people.
* Ivy League grads — Murray from Cornell, Parros from Princeton. Murray even runs his own business, UberTap, that produces a three-spout beer keg tap.
* Ivy League school is called just "Penn" and its top public institution goes by Penn State. UConn for the University of Connecticut also counts. The University of Washington (in Seattle, WA) and its cross-state rival, Washington State University, are always called "U-Dub" and "Wazoo" respectively.
* Ivy, Mint, and Rose jokes that Rose always has her mind on the garden.
* Ivypool, a StarClan spirit that got lost and found his way to the Dark Forest. She attacks him, but is stopped by the cat's brother. Even though she didn't actually wipe out his spirit, this still secures the Dark Forest's trust in her.
* Ivy's player happens to be narcoleptic, but it mostly causes her to frequently be late or asleep in front of her computer. She's a decent player provided she's awake.
* Ivy's power grants her random bursts of genius that allows her to create any invention from what materials she has on hand. This means that, at any given moment, it's possible for her to create a nuke, or anything else of an equally destructive power.
* Ivy the Terrible, a preschool-age tomboy who used to appear in the comic, had her hair in bunches, which generally followed her motion-lines to emphasize how active she was.
* Ivy Valentine getting turned into a frog by Black Orchid, then being squashed flat.
* Iwafune for Jungle - he cooks for the group, keeps them playing nice with each other, and is definitely like a father to Nagare, the Green King.
* IWA Japan, an offshoot of an offshoot from W*ING, which was from FMW's inspirations in WWC. The roster divided its time mainly by using what it already knew and copying the new things FMW brought, but did have the crazy idea to have matches in pools being heated to a boil, to see who could stay in the longest.
* IWA Japan itself went this route when its own founder Victor Quiñones basically admitted defeat to FMW and returned to working for them before returning to Puerto Rico to try the IWA brand again there. Rather than continue to fight for the garbage wrestling audience, IWA Japan tried to stay alive by incorporating more comedy into its shows (and to be fair, it did live for another decade or so).
* IWA Japan started out as a violent garbage fed but in the long run it proved unable to compete directly with FMW on that front and became a more comedy driven

product.
* I Wake Up Screaming, Frankie the promoter takes an interest in Vicki, plucks her from waiting tables, and makes her a famous model—but winds up falling in love with her sister Jill, much to Vicki's displeasure.
* I Wake Up Screaming starts after Vicki's murder. Her story is told via flashbacks from her sister and her boyfriend.
* "I Walked with a Zombie" by Wednesday 13 and "She was the Teenage Zombie" by Murder Dolls. A lot of their other stuff qualifies, too.
* IWA Mid-South No Blood, No Guts, No Glory match between Team IWA, Team NWA and Team Fannin.
* IWA Mid-South No Retreat...No Surrender want to find himself in, a Barroom Brawl against Necro Butcher. Necro won, of course.
* IWA Mid-South owner Ian Rotten helped train one for his promotion, Mickie Knuckles.
* IWA Mid-South was already more of an ECW ripoff than a promotion in the style of the old Mid-South territory, as the name would imply, and when CZW started gaining ground it eagerly competed with it for the illustrious honor of being the USA's most violent fed. Eventually the wrestlers working for IWA Mid-South bled so much the promotion was banned from the state of Kentucky. After that,
* Iwanako's letter has different words for each girl's story, as well as arriving at different times. In some routes, Hisao glosses over most of its contents, while in others, he reads the entire letter.
* I Wanna be the Boshy gives you an extra jump if you reload after saving in midair. This is actually needed to progress in some sections.
* I Wanna Be the Guy apparently eat them, though they have to be harvested with sticks from a distance and boiled three times to remove the poison.
* I Wanna Be the Guy does this twice in the Hall of Former The Guys. In Sinistar's room, opening the way forward requires playing a game of Break-Out, and in the room after it, you mount the Vic Viper for a brief shooting segment.
* I Wanna Be the Guy. Fortunately, the game still counts you as having beaten it.
* I Wanna Be the Guy. If a single pixel of your gun occupies the same place as a single pixel of a spike or apple... you explode. Across a quarter of the screen. With probably a dozen times the pixels that actually compose your avatar in the first place.
* I Wanna Be the Guy just before the final boss to get a hair-tearing frustration masterpiece.
* I Wanna Be the Guy laser beams coming out of nowhere to reduce you to splatter.
* I Wanna Be the Guy—automatically backs up your old saves and lets you undo a bad save just by pressing backspace.
* I Wanna Be the Guy — the new protagonist is named The Lad (ala Ladd Spencer) and is colored green, and has a grappling hook. The first two levels are based off the game as well.
* I Wanna Be the Guy pastiches and parodies 8-bit games in general, and some 16-bit ones too.
* I Wanna Be the Guy that plays just like he does in his original game. He can get spikes, the moon, and delicious fruit to help him out, but they all can kill him as well.
* "I Wanna Go Back To Dixie" does this as well. It's mostly an almost sweet, happy song about wanting to go back home...but it's after he includes the line "Ol' times there are not forgotten/Whuppin' slaves and selling cotton" that it gets dark.
* I Wanna Hold Your Hand, being a tribute to the Beatles' first day in America, has all manner of this.
* "I wanna wanna wanna wanna wanna wanna wanna wanna wanna wanna wanna Leave You Far Behind", by Lunatic Calm.
* "I Want", a 2019 advert for Smart Energy GB, features two giant teenagers running across a countryside and lying down, a giant kid running past an electric power system and serval giant butterflies flying around a city.

* I want a mocha with extra chocolate, whipped cream, and someone to hold my hand while I drink it!"
* I Want A Refund, and what follows is a Triple subversion of the "I'll do anything" trope- maybe even quadruple, or quintuple depending on your perspective.
* "I wanted to talk to the head of the tourist bureau." "Who told you I was head of the tourista bureau?" "Uh, the proprietor of the saloon told me." "I did not!"
* I Wanted Wings starts with Jeff getting a court martial hearing. The story of how he got there is told in one big flashback.
* I Want Grandkids, Daphne's father often told her this: "Saepe pater dixit 'Debes mihi, nata, nepotes.'"
* I Want My Beloved to Be Happy: Accepting the heartache of letting someone you love find happiness with another person.
* I Want My Beloved to Be Happy: A character lets their love interest leave them because they think they'll be happier apart from them.
* I Want My Beloved to Be Happy: A character wants the person they love to be happy, even at the risk of their own happiness.
* I Want My Beloved to Be Happy: A more positive outcome of unrequited love is when a character is willing to let the object of their affections go be with the one they really love.
* I Want My Beloved to Be Happy: Being willing to let your unrequited crush go be with the one they love.
* I Want My Beloved to Be Happy both revolve around a character having a strong, positive affinity for an entity for which or whom another character has the same positive affinity, but in an act of selflessness and altruism decides eventually to leave that second person consumate their happiness with that entity. In the former's case, we have a person having romantic feelings towards another, but since that love interest is likely attracted towards someone else then the person will wish happiness to that couple while moving on. In the latter's case, the person is very fond of a material object they have, but is willing to deliver it to someone else, probably a person they similarly hold dearly and want to make them happy by letting them keep this valued object. Though not without difficulty, it's possible to make both tropes overlap.
* I Want My Beloved to Be Happy: I love this person, but if he/she is happy with her/him, I'm happy!
* I Want My Beloved to Be Happy: I really love that girl/guy, but I just can't bring myself to ruin her/his relationship with her/his boyfriend/girlfriend. So for now, I'll keep her/him happy.
* I Want My Beloved to Be Happy moment when relating Kurakano's feelings for Haruhi.
* I Want My Beloved to Be Happy: Someone is attracted to a person, but is willing for the other person to be with someone else if it means that the person they love would be happier that way.
* I Want My Beloved to Be Happy: Someone realizes that a relationship wouldn't work out and stays away so that the other person can find happiness elsewhere.
* "I Want My Crayons" is about the Princess trying to figure out how her crayons disappeared. Being four years old, her investigation methods consist of simply searching and asking everyone she encounters if they stole them, then simply going, "OK, let me know if you find them" when they tell her no.
* I Want My Hat Back In this children's book, Rabbit steals Bear's hat. This ends very badly for Rabbit.
* I Want My Hat Back, the Bear, after a long and fruitless search for his hat is asked to describe it: "It's red and pointy and... I HAVE SEEN MY HAT!"
* I Want My Jet Pack: A work written in the past wrongly predicts a piece of technology being invented.
* I Want My Mommy!: Desperately longing for your mother when you're in an undesirable situation.
* I Want My Mommy!: Someone in trouble comically pleads for their mother to save them.
* I Want My Mommy!: When a character is stressed and scared, they want their mother

to comfort them.
* I Want My MTV cut from subsequent airings, though it was later re-edited to justify the violence and even shown uncut in later years.
* "I Want Out" by Helloween. After the solo, Michael Kiske sings "leave me alooooooooooooooooone" for about 20 seconds, overdubbed over the chorus. Immediately after the note is over, Kiske's overdubbed chorus voice sings "to leave my life and to be freeeeeeeeeeeeeeeeeeeee-ohhhhhhh" for the last 13 seconds or so.
* I Want Someone to Eat Cheese With: A bit of a twist on it as the point is that the guy does not get the girl.
* I Want Someone to Eat Cheese With has an ambiguous ending as to whether James winds up with his schoolteacher, Stella.
* I Want Someone to Eat Cheese With was written by, and stars, Jeff Garlin.
* "I Want" Song, about how Natalie feels she is always ignored, and wishes she could be free of her mother's expectations;
* "I Want" Song: Exposition of a character's motivation in the form of a song at the beginning of the story.
* "I Want" Song for Elphaba, eventually replaced by "The Wizard and I")
* "I Want" Song, "Great Big World", which would have fallen between the shot of Red's bike being carried across a river and her looking out over a valley.
* "I Want" Song "Satisfied", it was actually Angelica who Hamilton first approached, realising a woman with a wit and intellect that could match his. Angelica fell for him instantly, but quickly pawned him off to Elisa. The main reason is because she realised Eliza was also smitten and it would break her heart if Angelica didn't cede, but Angelica realised Hamilton was likely interested in her for her wealth and status, rather than just her intellect. Combined with the pressure to marry into a higher station as the eldest of the sisters, Angelica saw it as the right thing to do to in the moment, but as detailed in the song she still has feelings for him, and deeply regrets 'sizing him up so quickly.'
* "I Want" Song, to the point that the Emmy Awards now have a musical category.

* I Want To Eat Your Pancreas, the title itself translated as "I Want To Eat Your Pancreas" in English.
* I Want To Hold Aono Kun So Badly I Could Die starts as a romance manga that just so happens to have the MC's boyfriend as a ghost before diving headfirst into this a few chapters in.
* I Want Your Mother To Be With Me!: Asahi shows Haruka the proper way to experience snow: jumping face-first into it. His mom falls on her own face when he throws a snowball at her and she trips.
* I Want Your Mother To Be With Me!: Chapter 19 has Yuzuki, her son Asahi, Ryo, and his niece Haruka making chocolate together in the kitchen of Yuzuki's family's restaurant on Valentine's Day, and gifting the chocolates they've made to each other.
* I Want Your Mother To Be With Me! for both Yuzuki's son Asahi and his own niece Haruka.
* I Want Your Mother To Be With Me!: Haruka is an adorable preschooler who's almost always happy, and is often able to cheer everyone else up. It takes her some time to learn that she doesn't have to do everything herself, though.
* I Want Your Mother To Be With Me!: In Chapter 13, Yuzuki worries that her lack of athletic ability will make her a burden to Asahi in the preschool sports fest. She asks Ryo if the two of them can go somewhere alone, and the next page shows a shed, with suggestive dialogue coming from it.

* I Want Your Mother To Be With Me!: In Chapter 24, Ryo and Yuzuki almost kiss, only to be interrupted by his family coming back home.
* I Want Your Mother To Be With Me!: Inverted in Chapter 13, when Yuzuki closes her eyes when she's running the relay race, and keeps running until she crashes boob-first into Ryo, who's trying to stop her before she trips.
* I Want Your Mother To Be With Me! is primarily a romance story, but the female protagonist works in her family's Chinese restaurant, and the male protagonist often helps out or eats there.
* I Want Your Mother To Be With Me!. Though he's obviously still into Yuzuki, he's no longer thinking only of himself or acting with ulterior motives.
* I Want Your Mother To Be With Me!: When Ryo eats with Yuzuki and her son Asahi in Chapter 5, she wipes away a bit of rice on his cheek, and then realizes she was treating him like another kid.
* I Want Your Mother To Be With Me!: When she finds out he's been eating nothing but snacks, Yuzuki starts inviting Ryo to eat at her family's Chinese restaurant or her house, and sometimes even brings him food when he's studying for the accountant exam. She has no romantic intentions when she first does this, though by the later chapters it's pretty clear she's falling in love with him.
* I Want Your Mother To Be With Me!: Yuzuki's dad suffers sudden back pain in Chapter 20, and has to close the restaurant for a few days.
* "I Want You (She's So Heavy)" has a lengthy musical outro which abruptly cuts to dead silence in the middle of a riff.
* "I Want You (She's So Heavy)." It seems like the coda is going to go on forever and fade out, but instead it gets cut off abruptly mid-phrase.

* "I Was a Communist for the FBI" about an FBI agent(played by Dana Andrews) going undercover in a Communist party cell. Loosely based on a true story and was also a

film.
* I Was a Communist for the FBI is a 1951 film purpotedly based on the life of Matt Cvetic, an FBI agent posing as a member of the Communist Party. It hits at all the popular McCarthyist talking points: liberals are portrayed as Communist dupes, Black people are portrayed as being brainwashed by Communists to believe that they're being persecuted, and labor unions and academia are filled with Communists.

* I Was A Sword When I Reincarnated by a slaver caravan which wanted to present a "good face" to the general public.
* I Was A Sword When I Reincarnated has seven moons with an orbital pattern so complex, they are all "full" once every three months.
* I Was A Sword When I Reincarnated. The only real explanation most can think of is her having connections, but she's a 12-year-old orphaned ex-slave from a race that is often looked down on and enslaved by others, so it's plain to see she doesn't have any. As such, some of those who weren't there to see what she did assume she must have some sort of... arrangement with Klimt.
* I Was A Sword When I Reincarnated: This is how Fran and Teacher met. Fran was forced by slavery magic to fight a two-headed bear and needed a weapon, any weapon, damn the consequences, or she'd die and he's just happy that someone pulled him out of the ground after being stuck in it for a month.
* I Was a Teenage Christmas Tree of their group to pose as a Christmas tree for them to decorate.
* I Was A Teenage Cyclops, combines traditional teenage drama with Time Cube to great effect, twisting many typical high school problems in bizarre ways.
* I Was a Teenaged T-Rex. He couldn't tie her shell brassiere with his tiny arms, so the girl who'd become a Quetzalocoatlus did it instead. The first girl ended up with the boy who'd become an Ankylosaur.
* "I Was a Teenage Gary": SpongeBob and Squidward turn into snails and meow at the moon with Gary, with no explanation how they turned back to normal by the next episode.
* I Was A Teenage Popsicle. When she is defrosted ten years later, she finds that her parents are still frozen and she must live with her sister, who was younger than her but is now older than her.
* I Was a Teenage Werewolf is tricked by her devoted but prank-loving boyfriend into showing up at a party in costume.

* I Was a Teenage Werewolf, the following comment was made at a shot of a high school sign:
* "I was a very happy person. My wonderful girlfriend and I had been dating for over a year, and so we decided to get married. There was only one little thing bothering me... It was her beautiful younger sister. My prospective sister-in-law was twenty-two, wore very tight miniskirts, and generally was bra-less. She would regularly bend down when she was near me, and I always got more than a nice view. It had to be deliberate because she never did it when she was near anyone else. One day her "little" sister called and asked me to come over to check the wedding invitations. She was alone when I arrived, and she whispered to me that she had feelings and desires for me that she couldn't overcome. She told me that she wanted me just once before I got married and committed my life to her sister. Well, I was in total shock, and couldn't say a word. She said, "I'm going upstairs to my bedroom, and if you want one last wild fling, just come up and get me." I was stunned and frozen in shock as I watched her go up the stairs. I stood there for a moment, then turned and made a beeline straight to the front door. I opened the door, and headed straight towards my car. Lo and behold, my entire future family was standing outside, all clapping! With tears in his eyes, my father-in-law hugged me and said, "We are very happy that you have passed our little test. We couldn't ask for better man for our daughter. Welcome to the family!"

* I Was Kidnapped by Lesbian Pirates from Outer Space when captured by natives.
* I Was Kidnapped by Lesbian Pirates from Outer Space when the captain identifies a birthmark on their new guest. Responses included asking a naked lesbian how she managed to check another woman for birthmarks. She insists it's not important.
* I Was Kidnapped by Lesbian Pirates from Outer Space wherein it is revealed that lesbians are this. A long and complex story is told off-screen to explain how come the protagonist doesn't have the lesbian antennae, nobody tries to explain when it turns out that lesbians exist in all other species also.
* I Was Made to Love You" and the BuffyBot he built for Spike. April deconstructs the trope, in that her creator Warren abandoned the perfect woman he created because her constant subservience was too boring compared to the real girlfriend he was dating.
* I Was Made To Love You, Spike gets thrown out the window of a college house party by a robot looking for the man she is programmed to love. It's seen as funny in this case, since Spike is, at that point, a character that the audience loves to hate, and of course vampires generally can't be killed by glass unless they get a really bad cut around the neck region.
* I Was Made To Love You. The Scoobies make no secret about how they don't want him there, and Willow claims they're trying to find a way to "un-invite" him from the Magic Box, even though it's a public place, meaning Spike can enter and exist at his leisure. Xander, however, says they might as well let him in... so they can toss him right back out.
* I Was Made to Love You when her creator Warren tells Buffy something she "couldn't possibly know".
* I Was Montys Double: Has Jimmy do this when he is temporarily assigned to the motor pool where General Montgomery is serving in order to learn his mannerisms. Jimmy is used as a chauffeur, and has virtually no driving experience and puts the staff car straight into reverse and bashes into the car behind them.
* "I Was Not A Nazi Polka" by the Chad Mitchell Trio (written less than twenty years after World War II), where a group of Germans loudly proclaim that all Germans hated Hitler and that the amount of Nazis numbered "two or three at most." This was an actual attitude held by some Germans at the time.
* I wasn't aiming at you! they just threw is about to pull a 180 and hit you in the back of the head.
* I Was Quite a Fashion Victim: Period pieces for this decade certainly have a goldmine to choose from. Leisure suits and bell bottoms are the biggest targets.
* I Was Quite a Looker: A person was more attractive when they were younger.
* I Was Quite a Looker: Elderly characters who were once more attractive than they are currently vs. Elderly characters who retain their outer beauty well into their old age.
* I was really bored (uninterested) with what was written on the teacher's broad (wide) whiteboard, so I bored (dug) a hole in the floor board (wooden plank) to escape.
* "I was seventeen miles from Graybridge before I was caught by the school leopard."
* I was sowing the land in my backyard with a hoe when a pimp drove by with his ho on the passenger's seat.
* I Was There Too employs this trope by replacing the final bars of the theme song with music from the scores of famous movies.
* I Was Trapped in a Basement for Ten Years has a boy kidnapped by a very pale man who cuts the kid's throat with a sharpened fingernail every two weeks so he can drink his blood. He says that he's "better than a vampire" when told he can't possibly be one.
* "I was up against it and felt myself going to pot." (the narrator backs himself up against the word "IT" and his stomach takes on the shape of a pot)

* "I was wondering if I could possibly borrow a cup of Johnnie Walker Black Label." doorway, and the copy reading:
* I Was Young and Needed the Money: A character claims that they appeared in a pornographic film because they were that desperate for money at the time.
* I Was Young and Needed the Money: It's revealed that a character was in a pornographic film when they were younger because they were that desperate for money.
* Iwata becomes one for a time when he gets cancer and his brain is put in the Ropponmatsu 1 body as a stopgap measure to keep him not dead. He's quite pleased because he's always liked Ropponmatsu 1, seeing as she's a tall, well-built adult woman, but he gets into an argument with actual Ropponmatsu in body number 2, who's always gotten on his nerves. Iwata gets ready to throw down...and falls over as Ropponmatsu mocks him because she always found body 1 to be clunky and unreliable, and reveals that her personality was different (read: nonexistant) in this body because all her processing power was taken up staying upright.
* Iwata does a rather extreme version of this to hospitalized Watanabe in
* Iwazaru. And less annoying than Kess, who tells you how to defeat the next boss.
* IWC Reloaded in January of 2015, Dylan Bostic and Keith Haught fought to force feed each other hotdogs that Bostic had brought.
* I, Weapon deals with a universe that is essentially the aftermath of this with hundreds of variant human species who have adapted to the various planets of the universe, albeit in some cases with extensive genetic manipulation.
* I, Weapon have engineered away belly-buttons and bodily hair because neither is considered important in the colony. Pregnancies are handled via test tubes and body hair clogs the air filters.
* I, Weapon is about a breeding program to create the ultimate human weapon, crossbreeding human subspecies. And then he goes on a mission that is best described as "trippy".
* "I went down to Joe's Malt Shop where a bunch of the boys were hanging around." (the boys are literally hanging around above the entrance to the malt shop, including one in a noose)

* I Will Remember You", struck at the idea that Angel gave up basically everything he ever wanted just to save Buffy's life.

* I will send out my best troops instead of wasting time with progressively stronger ones as he gets closer and closer to my fortress.
* I Will Show You X!: You want mercy? I'll give you "mercy"! I'll give you lots of "mercy"!
* I will spare someone who saved my life sometime in the past. This is only reasonable as it encourages others to do so. However, the offer is good one time only. If they want me to spare them again, they'd better save my life again.
* I Will Spit on Your Graves). Vian denounced the adaptation while it was in production. He attended the premiere, but started complaining about the film a few minutes into the screening. Then he collapsed with a heart attack and died on the way to the hospital.
* I Will Survive fan comic, seems to take place over the course of less than an hour, with the revelation that Judy is pregnant with Nick's child and the resulting argument over whether to abort the child causing in their relationship to fall apart.
* I Will Survive like WildeHopps can fall apart. However, because he chose an unwanted pregnancy and Judy wanting to terminate it as the reason for their breakup, the comic drew hordes of pro-life and pro-choice commentators who cared little for the characters and focused obsessively on the potential abortion, even though the comic tried to avoid taking a side. As such he is prominently remembered as the guy who wrote the "Zootopia abortion comic" even though he has done a lot of other things besides it.

* Ixion Saga DT: Princess Ecarlate grows one in her "hyperactivity period".
* Ixion's son Peirithoos is just as bad, convincing Theseus to sneak down with him into Hades and kidnap Persephone to be his bride. Needless to say, Hades is not amused. When Heracles comes down to the Underworld on the last of his Twelve Labours, he's allowed to free Theseus from Hades's captivity. The Underworld shakes when he tries to free Peirithoos, which is Hades's way of letting our hero know that this is a
* Ixis Naugus #43. When he discovers that Naugus intends to brainwash the Council so he could have absolute power over them, Geoffrey balks at doing that, stating that while some lines need to be crossed to make change, Naugus is going too far. Naugus turns Geoffrey's words back on him, retorting that the skunk has no room to lecture on morality considering he's spent his entire life committing treachery by serving him in secret.
* Ixnay, being a pixie, has never been seen to be wearing shoes. Considering that the only other pixie shown in the comic thus far, Sassoon, also goes barefoot it can probably be safely assumed that the whole pixie race doesn't see the need for shoes since they're normally either flying or resting on elevated surfaces (tables, etc). In the recent strips, however, she is seen wearing hiking boots.

* Izanagi and his wife, Izanami, the creator deities of Japan according to Shintoism in
* Izanagi killed the latter out of grief. From Kagutsuchi's blood, several new deities were born, including martial arts god Takemikazuchi, warrior god Futsunushi, and mountain god Oyamatsumi.
* Izanami, a Japanese creation deity might count, because she died giving birth to the spirit of fire, and went to Yomi, a shadowy place underground, where she took on the appearance of a rotten corpse, and after being rejected by her former husband Izanagi, she vowed to take thousands of human souls with her to the grave in revenge.
* Izanami can turn her left leg into a similar blade, an ability that she passes onto Koku after he kills her.
* Izanami of Shinto fame, who was abandoned in Yomi (the underworld) by her husband. Followed by Izanami sending demons to kill him. Hell hath no fury like a woman scorned. When said woman owns hell, you are boned. To drive home the point... Izanami
* Izanami, the Big Bad. Fitting, as the game's central theme is about finding the truth.
* Izanami, the Goddess of Death does as well, wanting to create a "world of death".
* Izanami, when met in Tatsuya's Scenario in Kadath Mandala's Tower of Emotion. She

wears a magical mask that completely crushes her emotions, as though her burning rage has faded, her sorrow has not, and she waits until she can meet with Izanagi again to remove it.
* Izaro utilizes this in the last phase of his boss fight, creating a green light around him that will teleport the player into the path of one of the various traps scattered around the arena.
* Izaya is afraid of dogs and dead fish eyes. Later, in his spin-off, due to being traumatized from
* Izaya is quite fond of using a switchblade (hidden under his sleeve) as his main weapon of choice. He even uses it to shave a man half bald at one point!
* Izaya sets his whole game board on fire. Also, Walker sets the Blue Squares leader's van on fire with molotovs when he and the rest of the gang rescue Saki.
* Izaya states that it's not so much she's incapable of it but using Selective Obliviousness.
* Izaya (under a pseudonym) incites a number of Dollars members to take two of Chikage's girlfriends hostage in retaliation for recent attacks by his gang (which were, themselves, retaliation for attacks misattributed to the Dollars). When Shizuo catches wind of this, he goes apeshit in classic Shizuo fashion before leaving the gang for good.
* Izetta: The Last Witch became a couple, but there are some hints they were heading in that direction due to the very strong amount of affection they shared for each other.
* Izetta: The Last Witch counts as one protecting Archduchess Ortfine Frederika von Eylstadt. Every member seen on screen is female and are excellent marksmen, capable of shooting the rifles out of soldiers' hands. Also, their Captain is dedicated to her post, not allowing anyone she deems suspicious near the Archduchess, which initially includes the title character, Izetta.
* Izetta: The Last Witch developing Hexenium bombs, which use crystallized magical energy to unleash incredible destructive power. A single bomb delivered by magically-guided V2 rocket is supposedly able to destroy a city.
* Izetta: The Last Witch has the Principality of Eylstadt, which is based on the real-life Austria. True to this trope, they're mostly an agricultural society stuck in the late 18th century at most, and their armed forces lack sufficient amounts of modern weaponry. The Germanian Empire ends up wanting to annex them thanks to their strategic location, being directly north of their ally the Romulus Federation.
* Izetta: The Last Witch is the first antagonist introduced and seems to be the Kaiser's most competent and trustworthy underling, charged with coming up with a plan to defeat and (re)capture Izetta.
* IZJS/Zodiac Age power, is obtained with 1% chance from a chest that appears only %1 of time. Ugh...
* Iznogoud and spends most of his days sleeping, making him quite obese.
* Iznogoud: As "Scandal in Baghdad" opens, the scandalmonger who offers his services to Iznogoud demonstrates his abilities by sniffing out the fact that the guard on duty got his job through family connections. It quickly emerges that almost all of the palace guards are related to each other somehow, and all got their jobs that way!
* Iznogoud basis, in which adult Wa'at Alahf shows up with a scar he'd never had.
* Iznogoud book written after Tabary's death in 2011 made extensive use of the similarity, and Sarkozy also won the 1999 Iznogoud Award, which is presented to the person who made the year's most high-profile failure.
* Iznogoud but says he only has ten panels left of the current story. Sure enough, there are just ten panels left in "The Magic Calendar", and when Tabary tries to help Iznogoud by gluing pages back on the calendar (thereby trapping Iznogoud in the timestream), he is stunned to see his nearly-finished story turn into blank pages. He shrugs it off and starts over - drawing the title panel of a story called "The Magic Calendar"...
* Iznogoud, but the only thing that succeeds is seeing a riot break out in the markerplace. Unfortunately, since he's laughing at how stupid the rioters are, they hear him, and he's no longer invisible...

* Iznogoud designs and the crow's nest pirate observes that the ship they're about to attack 'has no Gauls on it'.
* Iznogoud: Everyone knows that Iznogoud wants to be Caliph instead of the Caliph... everyone, that is, except the Caliph.
* Iznogoud features an example of this. In "Iznogoud's Nightmarish Birthday", he opens a very small box and extracts a small piece of paper and proceeds to unfold it (it's so small that he needs a magnifying glass to start to unfold it). When completely unfolded, the paper is several metres large. Of course, the box had been given to him by the guild of mages...
* Iznogoud for a victim of his choice. No points for guessing ahead of time that it will backfire horribly on Iznogoud himself. Just to name a few examples:
* Iznogoud: Goscinny and especially Tabary made occasional cameo appearances in the series.
* Iznogoud: How long will it take for Iznogoud to understand that the problem in his quest for power is not Wa'at Alahf, but himself?
* Iznogoud: In 1995, fifty-two of the Goscinny-penned stories from 1962-77 were turned into 11-minute shorts for a TV cartoon series that ran for one season.
* Iznogoud: In "Good Sports in the Caliphate", Iznogoud and the Caliph both wind up on a sled, descending a slope at high speed towards a building.
* Iznogoud: In "Incognito", Iznogoud is said to be "cold and calculating". He mentally calculates that 5,763,257*312,418=1,800,545,225,426 .
* Iznogoud: In "Iznogoud and the Magic Computer", Iznogoud buys a magical computer from a character who tells him a genie lives inside it and answers every question.
* Iznogoud: In the animated episode "State Visit", the "enthusiastic crowd" assembled to acclaim the visiting sultan sound thoroughly bored as they say, "Hurray. Hurray. Long live Haroun el-Plassid. Hurray. Hurray. Long live Iznogoud." Similarly, the "ruthless crowd" watching the imprisoned Iznogoud on public display at the end of the episode are almost as listless as they say, "Boo. Boo. Get rid of Grand Vizier Iznogoud."
* Iznogoud: In "The Merchant of Forgetfulness", Iznogoud has spent most of the episode trying to get the Caliph to sniff any object he has sprayed with the amnesia-inducing perfume. In the end he decides to cut the middleman and spray the Caliph directly, only to make his attempt in a very drafty room...
* Iznogoud: In "The Send-away Bed", the Caliph, who doesn't usually drink coffee, is forced to share a cup of Turkish coffee with the new ambassador or face war between their countries, and ends up with a severe case of insomnia. This scuppers Iznogoud's plans to get him to lie down on the title piece of furniture (which will send him away to an alternate dimension), even after barraging the Caliph with lullabies and a very boring book.
* Iznogoud: In "The Tartar's Talisman", the title object makes the wearer's dreams come true, so naturally, Iznogoud has a naked dream while wearing it. And then, the irascible sultan Pullmankar enters.
* Iznogoud. It was quickly realised that Iznogoud was a much more interesting central character, and the comic's focus, and title, were transferred to him.
* Iznogoud: Iznogoud once bought a magic catalogue that allows him to obtain items from the future but cannot use it more than three times.
* Iznogoud: Iznogoud's attempt to convince a meteorologist into helping him.
* Iznogoud: Iznogoud's schemes to depose the Caliph are destined always to end in failure, usually with the vizier himself much worse off than before. It even gets lampshaded in the theme song for the animated adaptation.
* Iznogoud: Played for laughs with Wa'at, who outright says in "Iznogoud on Thin Ice" that while flying carpets and magicians are perfectly acceptable facts to him, a woman able to freeze people with her face is ridiculous.
* Iznogoud reveals that he actually once was an adorable, good-tempered, sweet kid who got along pretty well with Haround and Dilat.
* Iznogoud secret children whom he had imprisoned so that he didn't have to deal with them — and when Iznogoud is jailed for being a deadbeat dad, the family reunion is far from happy...
* Iznogoud: Several stories involve Iznogoud getting turned into a statue at the

end.
* Iznogoud: Several stories see Iznogoud's downfall resulting from his decision to ignore someone (usually the Caliph) who is trying to tell him something important while he tries to carry out his latest scheme to become Caliph instead of the Caliph.
* Iznogoud. Special mention to the palace guards. Iznogoud even lampshades this several times:
* Iznogoud: Such a common means of transportation that the Caliphate has an entire air force of 'em.
* Iznogoud: Tahbari al-Tardi is described as the best artist in the Caliphate. It's also stated he's the only artist in the Caliphate.
* Iznogoud tendencies towards Wa'at Alahf are entirely played for laughs.
* Iznogoud: The Caliph has Iznogoud — a man who tries to carry out an evil scheme to get rid of him on any day ending in "Y" — as his grand vizier and most trusted adviser. You do the math.
* Iznogoud: "The Lookalike" revolves around Iznogoud attempting to use Aristides Kingsizos, a merchant who looks just like the Caliph, to replace the potentate and announce his abdication in favour of the vizier, only for the lookalike and the genuine article to meet and befriend each other over a game of cards (or boules - more precisely, petanque - in the cartoon). At the end of the story, the merchant's partner comes looking for him, and he looks exactly like Iznogoud.
* Iznogoud: The story "Iznogoud Rockets to Stardom" starts with Iznogoud being a "strange satellite in orbit". Then the readers get to see how it happened.
* Iznogoud: The title character in "The Genie" lives in a pair of slippers, actually. And a pretty shoddy genie he is too.
* Iznogoud: The title character is the only one of the three primary characters to have a beard (Wa'at Alahf has a moustache and stubble, the Caliph is clean-shaven), and is by far the most evil of the three.
* Iznogoud: To quote Wa'at Alahf's mini-biography from the beginning of each book, "This fellow, despite his name, didn't laugh very often."
* Iznogoud tries to be this toward the Caliph. He is terrible at it, but the Caliph is so oblivious it still works anyway.
* Iznogoud), while the neighbouring sultan was called Streetcar instead of Pullmankar (Pullman cars being less familiar to younger viewers thanks to the decline of long-distance rail travel), and many of the one-shot characters had their names changed, generally from one play on words to another (the Midas touch-afflicted recluse was called Ghoudas Gho'ld in the comics and Karat in the cartoon).
* Iznogoud who schemes to murder and replace the Caliph who trusts him and considers him his best friend. And also aspires to become a tyrant and have people mutilated or impaled for the smallest of reasons.
* "iz-no-longer-a-Jäger" Vole, who tried to kill one of his old masters and changed teams later.
* Izo, commander of the 16th division of the Whitebeard Pirates is probably the best example of this trope, as he is maybe the only crossdresser who can't be spotted as one at first sight.
* iZombie. At the end of the episode, after eating another brain, she replaces all the stolen items.
* iZombie, but security seems very lax on who they give access to the police station.
* iZombie comes back from commercial with the scene represented as a comic book panel (with a humorous subtitle) before changing to live-action.
* iZombie, destroying the brain is just about the only way zombies can be killed.
* iZombie detective series. After being scratched at a boat-party-turned-zombie-outbreak, Liv becomes a pale, white-haired zombie, still fully capable, but now with a hunger for brains (which help keep her higher brain functions). She quits her promising medical career and gets a job as an assistant medical examiner. She finds out that, for a short time after eating a brain, she starts to get visions, memories of the deceased person, as well as some of their mannerisms and skills.

She uses the former to help a police detective track down the killer, claiming to be psychic. She's also capable of defending herself, usually by going into "full-on zombie mode" (the fast kind, not the shambling kind). Only one human knows about her condition, her boss ME, who helps her (by covering up her brain-eating) and tries to find a cure in his spare time.
* iZombie episode "Patriot Brains", Liv eats the brain of a US Army sniper, enabling her to carry out a revenge killing in an emotionless, methodical manner. She's not a killer at her core, however, and her real personality manages to override the brain and stop her.
* iZombie:Freezing is by far the most convenient way to imprison a zombie, since it won't kill them, they can't break out, and they don't need to be fed. You don't even need any special equipment, just a good old fashioned freezer.
* iZombie - Goal: Find a cure for zombiism. The working cures thus far have either been temporary or had nasty side effects.
* iZombie has a scene where Liv is lying in bed, giving instructions to someone off-camera while moaning passionately. Then she apparently forgets the safe word. Don’t worry, her boyfriend is just giving her a foot rub.
* iZombie has the titular zombie, a ghost, a group of vampires, and a were-terrier. And this is all in the first two issues.
* iZombie he's brilliant and charming but only really poses a threat due to being so obscenely wealthy, and who wants to kill all zombies as a side project. Adding to the symmetry is that they are jointly responsible for the existence of zombies in the first place: the zombie outbreak came from a combination of tainted drugs sold by Blaine and an experimental new energy drink developed by Vaughn's company.
* iZombie: In season 4 Isobel is brought to New Seattle to be cured of Freylich Syndrome, which a quick search online will reveal does not actually exist. The only symptom given so far is nosebleeds, and that the condition is eventually terminal. In the meantime, Isobel seems perfectly healthy.
* iZombie in this manner, albeit in self-defense. Naturally, he doesn't do that to his human victims, since this would damage the brain, which is his primary commodity.
* iZombie is dead by the time Liv starts feeding. But Liv was on her way to the morgue when she reanimated in the pilot (she sat up in a body bag on the beach).
* iZombie is Liv downing the brains of a mega-fan of everything from football to a TV series and soon exhibiting their passions to the extreme.
* iZombie is revealed to have been killed by a shipping drone (like the ones Amazon claims to be working on) with an attached 3D-printed gun. The killer is, at the time, sitting in a board meeting, giving him the perfect alibi, while using his tablet to operate the drone. Unfortunately for him, he forgot to wipe all traces of it from his computer.
* iZombie. It's got the titular zombie, a ghost, a group of vampires, and a were-terrier. And this is all in the first two issues.
* iZombie, Liv becomes obsessed by social media after eating the brain of an "online influencer" and spends the episode posting pictures online and tagging them (or even her spoken phrases) with ridiculous hashtags such as #BrainFood, #CoveringMyAss, and #bootyhadmelikewhat?
* iZombie: Liv breaks up with Major so he won't find out she's a zombie, and the show ultimately portrays this as an extremely selfish decision that ruins his life and puts him in danger.
* iZombie, Liv eats the brain of a Seahawks fan who hated zombies. Thus, she exhibits the personality of a bigot who makes anti-zombie remarks.
* iZombie Liv feels obligated to solve the murders of people whose brains she eats in the morgue.
* iZombie, Liv suddenly speaks fluent Romanian after a Romanian escort tries to get rid of Detective Babinaux by pretending not to know English. Naturally, after spouting a few phrases in the language, Liv realizes what she's doing and comments on that. This is a side effect of eating brains (the brain in question belonging to another Romanian escort).
* iZombie need to eat brains to keep themselves civilized. If a zombie doesn't eat

brain matter regularly, they will gradually lose their intelligence. If they don't eat any brains for an extended period, then they will permanently become a "Romero", a mindless, shambling monster needing to be put down. As a side effect of eating brains, the zombie temporarily gains the personality traits and skills of the deceased, as well as occasionally seeing some of the deceased's more recent memories in the form of visions. Liv, the protagonist, works at the medical examiner's office to keep herself supplied with "food". At the same time, no zombie likes the taste of brains, finding it "metallic", and Liv usually mixes it in with some normal food and adds a lot of hot sauce, usually microwaving it beforehand. Her boss finds out about this after opening up one of the autopsies she closed and finding the brain missing. Instead of freaking out, he covers up for her "appetites" and works on finding the cure for her condition.
* iZombie require brains to remain stable. The longer they go without brains, the more irritable and slow-witted they get, eventually going "full Romero" — at which point, not even the reintroduction of brains to their diet will bring them back to sapience.
* iZombie: Season 4 starts with Seattle under a military quarantine, with the city surrounded by walls and checkpoints to keep zombie infectees from leaving. This situation stays through the remainder of the series, until a cure is finally created in the series finale.
* iZombie's female lover after consuming his brain, and Lowell lost interest in Liv during a short period, as well as showing a slight interest in Ravi, after consuming the brain of a gay scientist.
* iZombie: She's a zombie (duh!) medical examiner who uses the visions she gets from eating brains of murder victims to feign psychic powers, he's a sassy black cop. They Fight Crime.
* iZombie shows that even after calling off the engagement, due to her zombiesm, Liv and Major still share a very close and involving friendship with one another.
* iZombie, since their condition is caused by an artificial virus (it's speculated that it's an experimental bioweapon) mixed into a supply of a new designer drug popular with the young crowd. The protagonist Liv still behaves like she's a normal living person with the exception that she has a hunger for human brains, which she satisfies by working at the medical examiner's office. Most of their taste receptors are dead, so the only thing they can taste are the brains (which they find a bit metallic) and extremely spicy food (hence Liv's liberal use of hot sauce). The "living" zombies look very pale and have white hair but don't exhibit any flesh decay. However, those who go without brains for a long time start to decay into the typical "shambling zombie". Unfortunately, if a zombie goes completely feral (usually after 5-6 months of not eating brains), then the condition is irreversible. Eating brains not only satisfies their craving and allows them to retain their higher brain functions but also temporarily grants the zombie some of the traits, skills, and memories of the deceased. Liv uses this ability to help a police detective investigate crimes, by passing off her "visions" (memory recalls triggered by certain cues) as psychic. When threatened, a zombie can temporarily go into a "full-on zombie mode" (or "rage out") and viciously fight off the attacker. A zombie's heartbeat is very slow (something like 10 beats per minute), which also meant that, if wounded, they don't bleed out. Their deadened nerves means they can undergo open heart surgery without anesthesia. The condition can be passed by fluid contact (including sex, but kissing appears to be okay) or a scratch.
* iZombie takes this a bit literally as Liv, a zombie, eats the brains of the "clients" while on break, usually combining them with other food such as pizza or ramen.
* iZombie. There are (so far) no other types of supernatural beings present in the comic book either. In the show, zombieism is spread by a virus through fluid contact, although the original cause appears to be a tainted drug (with the possible addition of a certain energy drink).
* iZombie. They were engaged until the boat party. After becoming a zombie, Liv breaks up with Major, much to everyone's shock (they were the perfect couple),

since she's (rightly) afraid of passing her "condition" on to him. They try to have an awkward friendship, but Liv finds out that, after 5 months, Major is moving on with another girl (worse, she sees them playing a zombie-killing game). When she finds out that Major is kicking out his roommate, she suspects that a girl he's sort-of seeing plans to move in. She sends her boss and friend Ravi to room with Major to try to prevent that, although Ravi reveals that Major correctly figured out her plan and went along with it, as this means that she's not over him. Then she meets Lowell, a British musician who is also a zombie. Lowell seems to like Liv, in large part because she's the only other zombie he knows and can speak freely to. After finding out that Liv is still not over Major, Lowell is content to just be friends until such time as she's ready to move on.
* iZombie: When Ravi is testing whether the zombie virus is sexually transmittable, he says the store clerk will look at you real weird when you buy every brand of condom they have.
* iZombie: While using rats to test out causes of the zombie virus, Ravi accidentally creates a zombie rat that devours the other test subjects. When discovered, Ravi is understandably terrified while Liv thinks it's adorable. It's a zombie thing.
* iZombie, zombies in general (as long as they're able to eat enough brains to sustain themselves) look like ordinary people with pale skin and hair. Most choose to disguise themselves with cosmetics. Liv doesn't, but once she gets over being a zombie, it hasn't really affected her dating life (beyond having to take extra precautions to prevent infecting human partners, although she mostly dates other zombies); one of her boyfriends tells her she pulls off the zombie look.

* , Izuku ends up in this role for an entire slum, including three different gangs, because he's tutoring all of them. In the first five chapters, Izuku breaks up a gang brawl twice by threatening to ban people from his classes. The second time, his students who were participating are forced to write a ten page essay overnight as punishment.
* Izuku explains that this is no coincidence, as when quirk users began popping up, the Mage's Association did some testing on compatibility and realized that it's impossible for someone to have both magic circuits and a quirk.
* Izuku himself is another example, since unlike All Might, his body is too weak to use One for All's full power without him breaking his limbs, so he often finds himself forced to use it sparingly, usually with a few fingers as opposed to his whole arm, until he becomes strong enough to master it properly. He too is repeatedly forced to exceed his limits to defeat powerful foes, resulting in him spending a lot of time in hospital beds recovering from self-inflicted injuries.
* , Izuku is an enhanced normal human named Captain Kamino (an expy of Captain America) that fights for the right of the newly emerged super-humans. After stopping a bombing on Metahumans by downing the plane carrying the bombs into the water, he is frozen solid for centuries, and wakes up and runs into a changed Kamino, where super-humans call their powers Quirks and are accepted by society, and himself treated as a Symbol of Hope.
* Izuku is chivalrous enough that Ashido initially thinks he's gay. He is a healthy heterosexual teenage boy, though, so when Todoroki freezes the arena and a certain part of Ashido's anatomy gets cold, Izuku is very insistent that she wear his jacket.

* Izuku is horrified by Peter's description of the superhero civil war and can't imagine heroes ever wielding the brutal authority that Reed Richards, Tony Stark, Hank Pym, and Maria Hill did.
* , Izuku is slightly above average height but Ibara is still a few inches taller than him (unless you count his horns) and Izuku is frequently distracted by her beauty, especially once they get over their initial rocky first meeting.
* Izuku Midoriya: due to obtaining his Quirk, One For All, later in life, he has no idea how to moderate its insane power at first. Because of this, he has to shatter the bones in whatever limb he uses it in. As a trade-off, the immense power it produces can demolish entire buildings, topple giant robots, and create massive gusts of wind. He leans away from this as his control improves, allowing him to restrict the damage to just one of his fingers and later spreading the power throughout his body evenly to give himself a much smaller boost to his strength and speed without hurting himself. But he still has to carefully moderate how he's using One For All, lest his concentration breaks and he accidentally uses its full power and hurts himself again.
* Izuku Midoriya had an unfortunate tendency to wreck his arms by using his Quirk, One for All. After being warned that he was going to permanently cripple himself if this kept up, he realized that using OFA at 100% power all the time was the problem and started developing a safer alternative.
* Izuku Midoriya is an invoked example. He considers Katsuki Bakugo his childhood friend, but throughout all the flashbacks he has with him, Izuku is constantly being humiliated by Bakugo and his cronies, which doesn't exactly paint them both as friends. Once Bakugo's Quirk started to develop during kindergarten, however, Bakugo's personality...

* Izuku Midoriya's, a contemporary of All Might's predecessor who also trained All Might himself. Both fulfill different needs, as while Midoriya derives his power and ideals from All Might, Gran Torino is better at teaching him how to use One For All without destroying himself.
* , Izuku never uses his Quirk because the head of the Hero Commission told him how dangerous it was for anyone to find out about it. Despite this, pretty much everyone from Bakugo to Present Mic knows about his "super secret" Quirk and comments about how amazing it is. Given that said Quirk is also the reason his mother was given a new house, a promotion, and a massive amount of money, it's a wonder they even bother pretending it's a secret.

* Izuna. Most notably on menu screens and such, but also any time the plot from the previous game becomes important the fourth wall comes down long to inform you that if you want to know what they're talking about you should go play the original game, which they refer to by name.
* Izuna, the amateur exorcist, also had a bit of this going when she first met the Sorcerer Kitsune
* Izuna, the first game has a long text introduction followed by a boring dungeon where you get few items and die in a couple of hits. The 2nd game is better for

this, but still has a lot of text at the start.
* Izuna Uchiha uses his dying breath to convince his brother, Madara, to refuse Hashirama Senju's offer of a truce in favor of continuing to avenge their fellow Uchiha. Sadly, he didn't seem to acknowledge that accepting the truce would both give him a chance to survive through Hashirama's powerful medical jutsu and prevent his clansmen from dying needlessly in more wars with the Senju clan. As a result, he dies of his wounds and Madara ends up becoming an even worse example of this trope, to the point of continuing the war even when other members of their clan wanted to give up.
* Izure Shinwa No Ragnarok, a human possessed by a god has their soul completely overwritten. Raika managed to avoid this fate due to the powers of his cross necklace, which keeps Balor from fully possessing him. He manages to force Brunhild to give Charlotte her personality back, but this only works because their possession was incomplete to begin with.
* Izure Shinwa No Ragnarok is that the gods possess human bodies to fight their wars in the real world. Worse yet, the personalities of the human hosts are completely overwritten.
* Izure Shinwa No Ragnarok, the church is one of the two most influential organizations in the world and the protagonist, Raika, works for them to investigate the other organization, though he has his own reasons for doing so. The militant part comes into play when Raika displays the combat techniques they taught him, which are enough to survive against humans possessed by gods.
* Izure Shinwa No Ragnarok, the organization, Eucharista, had to create a battlefield for the warring gods and provide them with suitable human hosts in order to limit their destruction to a tiny island.
* Izure Shinwa No Ragnarok, the warring gods put their previous war on hold when they realized they were razing the very lands that they were fighting over. Their current rules now limit them to an island for their battlefield.
* Izuru Kamukura, and this doesn’t stop him from dispassionately hanging out with her as a kinda-ally later and her from fawning over him.
* Izuru Kamukura is also this for Hajime Hinata. However, he’s only involved in evil because he’s not sure if good or evil will solve his boredom issues.
* Izuru Kira and Rangiku Matsumoto are seen drinking after Kira's captain and Rangiku's old friend, Gin Ichimaru, leaves Soul Society with the
* Izuru Kira has had the opportunity to use his ability to repeatedly double the weight of anything his sword hits (rendering it unable to be lifted) twice in canon. The first was against Matsumoto, whose own power could render his meaningless (causing their fight to be tailored to
* Izuru Kira takes the cake with his reintroduction to the series. Subverted in that his hole is reinforced.
* Izzie's Way Home, one of the main characters is a sea cucumber who constantly burps and farts.
* Izzyaro's who briefly studied the Dark Arts to become stronger after the death of his family — and Helga Hufflepuff — a compassionate healer whose life he saved.
* Izzy, Eva and Noah perform one in the season one finale while waiting for
* Izzy in a backpack, wears it, and then slides across using the straps.
* Izzy in the dub lampshades it: "I feel like I shouldn't be watching this..." In the original Japanese and the Latin-American dub, he instead said "Women are something to be very afraid of, when they're angry!"
* Izzy is explicitly stated to be crazy multiple times, but what exactly is wrong with her is anyone's guess: extreme hyperactivity, violent tendencies, mood swings, a tendency to make up stories that may or may not be true, often blurts out non-sequiturs, is almost always in good cheer even when she has no reason to be, can never tell when she's making people uncomfortable, and she has an IQ of 188 and
* Izzy is sometimes assumed to be a gecko or iguana, when in actuality, his species isn't defined beyond "lizard".
* Izzy seems to get along better with animals than people, befriending prairie dogs, camels, beavers, and a snake with ease (although the last one bit her).

* Izzy. So genki, that she's even enthusiastic about getting poison ivy wrapped around her face as part of a challenge.
* Izzy still gets sick from the cooking, which is no mean feat, considering an early episode established him as liking things such as mustard and jelly beans on eggs.
* J1407b (or any moons it may have) definitely qualifies. The planet is presumed to be a gas giant, and it has a ring system, similar to Saturn's... except 200 times larger! If you placed it where Saturn is, the rings would appear larger (from Earth) than the full Moon does. If placed where the Sun is, the rings would reach out to the orbit of Venus. Gaps in the rings indicate that it has moons, and if so the view from them would be utterly spectacular.
* Jōkō ("Retired Emperor") until his death, at which time he will become Emperor Heisei, after the era he reigned; and Hirohito is called Emperor Shōwa, after the era of his reign. Royal women who marry a commoner (which, post-1945, is everyone but their family) take her husband's surname, but they also lose their royal status, since the common men cannot marry into the imperial family.
* Jára Cimrman Theatre in Prague) specifically included either a part of a wheelchair-bound man or a part where the actor spends the whole play sitting in one spot and never moves from it. (Which also led to aversion — Kašpar often alternated his parts with another, able-bodied actor.)
* Jaal'darya: Guerrilla; they have no army, but are so secretive it would be difficult to plan an attack on them.
* Jaal has this opinion of his teammate Liam Costa's attempt at humour. He chuckles, and then adds "we [meaning the angara] have people who aren't funny, too."
* jab at an attacking shark's eyes. And while this method has a well documented success rate, sharks not only have protective eyelids, but surprisingly hard eyeballs.
* Jabba's hologram on Hypori flickers several times while Tyber Xann is talking to it.
* Jabba's Sail Barge explode after having its own blaster cannon fire on the deck. Presumably it hit either its own gas reserve (highly volative due powering an energy weapon) or the barge's fuel cells.
* Jabba Table Manners: A bad guy (or any unpleasant person) is a messy slob with very bad table manners.
* Jabba Table Manners: A villainous character has bad table manners to emphasize their badness.
* Jabba the Hutt, being 600 years old. He is an example, but not an extreme one. Hutts typically live ten times longer than humans.
* Jabba the Hutt came to power during the Republic's heyday. He survived the Clone Wars. He was positively
* Jabba the Hutt has a deep, booming voice. Understandable, as his larynx is presumably as over-sized as his neck.
* Jabba the Hutt occasionally uses "poodoo" in conversation, which is translated as "fodder" in the subtitles. Apparently the actual meaning has something to do with feces, but other writers have justified it as bantha fodder being utterly repulsive to anything that isn't a bantha.
* Jabba the Hutt's apparent sexual desire to chain scantily-clad human and
* Jabba the Hutt was quite fond of feeding people to a Rancor, including Twi'lek slave dancer Oola in a notorious
* Jabba the Hutt) will be accompanied by tuba. The tuba's sound will also be used to simulate a character farting.
* Jabberjaw and Loopy De Loop working at Magilla Gorilla's bowtie boutique, with Jabber working hard to get a promotion.
* Jabberjaw gets no respect because he's a shark. He equally gets no respect from Shelley, the band's tambourinist.
* Jabberwocky1996,, Mignogna jokingly suggesting Ed would shave his feet so he wouldn't be confused for a hobbit, and Clarke saying Scar would be fascinated with

Gollum. They then expressed a desire to see it as a fic, to which the fan promised he'd write it.
* Jabberwocky set in the Middle Ages, with many examples of this trope. Most memorable was the king and princess getting repeatedly splattered with blood while observing a jousting tournament from the royal box and calmly discussing the outcome with a royal adviser.
* Jabberwocky, the main character manages to destroy a knight-in-armour repair shop by moving a bowl of rivets.
* Jables's Adventure has a face. Its eyes follow you as you walk by. No explanation is given.
* Jables's Adventure, neither of the first two bosses are bad guys. Lumber Jacques mistakes you for a walking tree (and after you defeat him, he gives you a powerup to apologize). Then Rutherford Goldbeard thinks you're a cattle rustler (and/or a brain squid victim) and attacks you to defend his property.
* Jables's Adventure, the first boss is the lumberjack, Lumber Jacques, who attacks you with his mighty chainsaw.
* Jables's Adventure, you encounter a bear with a flamethrower, who's not only invincible but impossible to dodge (you have to find something fire-retardant to block him).
* Jabra before he can regroup and report back to Spandam, solving the Straw-Hats' problem of the foolproof backup plan to get Robin out of their reach.
* Jab Tak Hai Jaan has a shot which was filmed in London (a major part of the film's setting) showing the Olympic rings. The problem? The scene is in part of the narrative which is set in 2002, when the Olympics would not arrive in London until 2012 when the film was made. There are also several other anachronisms concerning certain models of cars and an advertisement for an Intel Ultrabook (not launched until 2011) during the 2002 part of the story.
* Jab We Met where the male and female end up at one of these. He knows what it is, she does not. The owner asks him for how many hours does he want the room? The guy tries to tell him "all night", but she protests saying "We only need it for a few hours!" And "Why pay for the whole night?" She is a very pretty, obviously upstanding girl, and the hotel owner beckons the guy closer and whispers "Wherever did you find her?"
* Jacanas (also known as lily trotters, or Jesus birds because they walk on lily pads and other vegetation floating on water with their ridiculously large feet) are a family of waterbirds in which females compete with each other for, and in some species, defend harems of smaller males. The males brood their eggs after they lay them and raise the chicks alone, and have special adaptions for parental care, like the ability to pick up chicks with their wings, something that the females can't do. Like lions, females will attempt infanticide on unrelated chicks, to free up the male to brood her chicks. The male may try to defend the chicks, usually unsuccessfully.
* J'accuse charges pretty much everyone from the President on down with the antisemitic Dreyfus affair.
* Jace and Clary begin a relationship, then discover that they are actually biological siblings and immediately end the relationship. Later on, it turns out that they are not siblings at all, as Clary's biological father kidnapped Jace as a baby and then told them they were siblings just to mess with them.
* Jace and Clary have special powers because, through the experiments that

* Jacek Dukaj, Baroque) on the real-world environment to make it look more interesting.

* Jacek Dukaj can communicate with each other freely. They don't really talk to each other; they just communicate directly via thoughts, and the controlling computer creates the sensation of hearing spoken words (along with the vague impression of hearing a specific language or accent).
* Jacek Dukaj include aliens spreading the Gospel on their own and leaving human Christians to wonder if they're just the space-age Jew-equivalent in God's plan, the Gospel spreading to the AI as a result of a mad millionaire trying to record a genuine divine revelation, alternate universes where the Christ never died, and so on.
* Jacek Dukaj. One character remarks that the moment the City was discovered, it pretty much rendered all science moot, except for archeology: there's no point in researching anything if you can already find the answer in the records of some highly advanced civilization.
* Jacek Dukaj (polish: "Lód"), the Tunguska Event caused dramatic changes in the laws of physics.
* Jacek Dukaj-style world and, among other things, involves an interstellar travel by what's pretty much a magically-propelled, magically airtight hull.
* Jace learned to harness his Mind Magic from a sphinx named Alhammeret, though he turned out to be an

* Jace once told Clary; "If there were such a thing as terminal literalism, you would have died at birth."
* Jachtseizoen can just look up the routes and timetables online, drive ahead, and catch you at the next station, and there is no way to escape while on a train. Even if this weren't immediately obvious, you would think that contestants would watch the previous seasons and realize that taking the train almost never works.
* Jack (1996), Phoebe and Jane direct this toward Jack when they see him talking to his teacher, Ms. Marquez, during recess. Marquez responds by taking them to discuss it with their own teacher.
* Jack-1 through 7 are mohawk-sporting Russian robots, with a new Jack built and sent to compete in almost ever game. Most of them have synthetic skin with obvious (sometimes glowing) seams, while Gun Jack and Protoype Jack (P. Jack) are even more visibly robotic, with squared-off metal plates and Colossus-style ridges respectively.
* Jack abruptly realizes his own feelings for Bitty when they part ways at Jack's graduation. With a bit of prompting
* Jack accompanies Tracy to a therapy session to discuss some issues with his family. The therapist asks Tracy to imagine his father in a chair and tells him to tell him how he feels. Tracy says it's too weird, so Jack
* Jack Adkisson and Walt Seiber made a name for themselves in the 1950s and '60s as
* Jack ages rapidly from a baby to having the appearance of a teenager. Well, he is a Nephilim.
* Jack Albertson, who voiced Amos Slade, lost his battle with colorectal cancer four months before the film's release.
* Jackal Kuwahara and both of the Ishida brothers (but especially Gin) in
* Jackalopes look like cute rabbits with antlers, but are carnivorous scavengers who use their ability to induce lethal bad luck to get humans killed in fatal accidents, so they can feed on their corpses.
* Jack also fell for Will in the distant past, when mentoring him out of the closet.
* Jack also played with it, "going rogue" as a result of the fact that the country wasn't exactly happy with him in the first place, but he still always had the country's best interests in mind and was merely playing the bad guys. Then again, when half the bad guys in the show are corrupt politicians, often going against the authorities
* Jack also sports two black bullet wound scars on his chest and a large branched scar on the inside of his left forearm.

* Jack; although he eventually settles down, this is repeatedly brought up as an obstacle to his relationships, and Kenneth once inadvertently makes him question his priorities by complimenting him on his large number of birthday presents from colleagues and the "big empty house" he has to keep them in. When he has a
* Jack & Bobby has one where Jack and his best friend are staring at the condom selection at the supermarket, trying to figure out what size to buy. Then his mom Grace winds up behind him in the checkout line. Of course, she compliments him on being responsible and tells the cashier to charge her for the condoms, which only compounds Jack's embarrassment.
* Jack & Bobby nomination at the 2004 Democratic National Convention. The show was filmed months before the actual convention, but in the final scene, Bobby mentions that Clinton lost the nomination (which really happened). It seems likely that the same scene was also shot with Bobby saying Clinton had won.
* Jack & Diane: Diane bumps into Jack while trying to awkwardly borrow a cell phone, and then her nose starts bleeding. Jack is smitten at once.
* Jack & Diane: Diane's condition is apparently meant to be lycanthropy, though it's far from clear in the film itself. Mostly she dreams of turning into a monster that bears only the merest resemblance to a wolf or any similar creature, it's not affected by moon cycles specifically (but apparently it coincides with Diane's period) and never even clear if she's transformed.
* Jack & Diane: Diane's sister and aunt only appear in a couple scenes, while neither gets developed. Jack's friends are more characterized than either of them.
* Jack & Diane: It turns out Diane's sister Karen was sexually abused by some boys who had drugged her at a party.
* Jack & Diane: Jack masturbates in bed at one point, then calls Diane (or so she thinks) and tries to get her into cyber sex. It turns out to be Diane's twin sister Karen on the line. Diane later does it the same way too.
* Jack & Diane: Jack, who's a mildly butch lesbian, is drawn to girly Diane. They fall for each other and date, although it's a very bumpy ride.
* Jack & Diane (lesbian main characters, lesbian supporting character; subject matter includes queer female romance)
* Jack & Sarah where Jack has to buy some sort of lactation-related product (either nipple pads or nipple shields) for his pregnant wife is similar in spirit.
* Jack), and as such she and the Doctor obviously have no interest in each other, instead of having a strictly platonic Professor-Student relationship.
* Jack and becomes suspicious and frustrated about the supernatural and Antimony, the main character.
* Jack and Chrissy are hiding in the bathroom, eavesdropping on Janet and her date, who, unbeknownst to them, are talking about some ferns Janet has in the apartment. They overhear Janet's friend remark, "Those are two beauties!" and
* Jack and Freddie the Finger have a relationship of this sort. It's a little softer and more gentle than the rest of the cast, as Jack and Freddy go back a long way, but both are fond of ribbing the other while often hanging out socially for drinks or poker.
* Jack and Gwen have an Almost Kiss in "Something Borrowed", but the
* Jack and his reluctant daughter are the only two to defend their home from an invasion of mutant ghosts.
* Jack and Jill by explaining that all the assumed pairings would happen in a decade but they're just children now. She has to add the obligatory old maid, however, in Molly.
* Jack and Jill directed by Jack Sadelstein was so terrible that in the preview that he doesn't want to be released.
* Jack and Jill, Jill's Craigslist date "Funbucket" clings to the bathroom ceiling when she comes looking for him in order to ditch her on their date.
* Jack and Jill painful back injury), but she discovers that the letter belongs to Frank and Jack's mother... and it says Jill might be this close to being permanently crippled.
* Jack and Maddie Fenton were able to invent and use (with varying degrees of success) devices that protected from ghosts or trapped them. The garage sale

episode featured a lot of mundane stuff the family owned getting contaminated with ectoplasm.
* Jack and Old Mac for the dancing hillbillies in the "Old MacDonald Had a Band".
* Jack and Rosario get married at the end of the first season so she can stay in the country. Jack even moves in with her to maintain the charade. They almost get busted when it turns out the INS agent assigned to their case is one of Jack's former flings, and thus knows Jack is very gay. They ultimately break up when Rosario falls in love with Karen's gardener.
* "Jack and the Baby" begins with Jack rescuing a captured infant before he is eaten by some ogres planning to have him as their dinner. On the journey to get the child back to his parents, Jack does everything he can to ensure the child's well-being, even milking various animals so that he can feed the baby and getting him to sleep by telling him the story of Momotaro.
* Jack and the Beanstalk (1974); being an adaptation of Jack and the Beanstalk and all, if you're familiar with the story, you expect this to happen.
* Jack and the Beanstalk (1974)") does have the basic plot of the original...and it also throws in Jack's dog as a faithful sidekick, a bunch of mice which happen to be transformed royalty, a hypnotized princess, a cloud kingdom at the top of the beanstalk, and the giant's mother is an evil witch who plans to marry her giant-son to the hypnotized princess, turn them into mice, and rule the cloud kingdom herself.
* Jack and the Beanstalk (1974), Tulip the giant has caught Jack and prepares to smash him with his fist, at the last second Jack's dog Crosby pulls him out of Tulip's hand and replaces him with a tack, as he brings his fist down on the tack, he slowly reacts to the pain and leaps up into the air and disappears into the sky.
* Jack and the Beanstalk (1974), when Jack enrages Tulip near the end and starts chasing him, he briefly morphs into a freight train complete with his feet morphing into the wheels and a smoke stack protruding from his head.
* Jack and the Beanstalk" is a classic tale featuring a giant as the main antagonist.
* Jack and the Beanstalk, Jack's mother sends him to bed without supper as punishment for trading the cow for nothing but beans. A case of a punishment that fits the crime, as they were already nearly starving in poverty and the cow was all they had left to sell for food money.
* Jack and the Beanstalk parody episode, Princess Toadstool reveals that she's allergic to garbanzo bean seeds when Mario shows them to her. Her sneeze blows them right out of his hand and into the yard, where they grow into the beanstalk.
* Jack and the Beanstalk: The Real Story: Time in the land at the top of the beanstalk passes at a rate of one day for every year on Earth, with the result that only a year has passed in the giants' country while almost four hundred have passed back on Earth.
* Jack and the Beanstalk" with a giant hoarding things like sugar, tires, and shoes (among other goods) which Popeye, being a participant in rationing, doesn't approve of and decides to take them to help the war effort.
* Jack and the Cuckoo-Clock Heart, Jack and Miss Acacia are about to kiss, when the manager barges in reminding them about work.
* Jack and the Cuckoo-Clock Heart, Jack has to recruit the help of Méliès to communicate his feelings for Miss Acacia in the form of a puppet show, since the words get caught in his throat when he tries to say it out loud.
* Jack and the Cuckoo-Clock Heart, Joe seems to be harboring a crush on Miss Acacia from even before the titular Jack showed up, but it doesn't end favorably for him.
* Jack and the Cuckoo-Clock Heart, Joe tells Miss Acacia about how he lost his right eye because of Jack's cuckoo clock heart, but makes it sound like Jack did it on purpose.
* "Jack and the Smackback" is a straightforward example, in which Jack is enslaved and imprisoned in an arena known as the Dome of Doom, where he battles against a series of other warriors.
* Jack and the Smackback, Torto, could curl into a sphere and roll at opponents.

* Jack and the Witch when Jack is surrounded by Queen Auriana's harpies, they attack him and he fights them off resulting in one of these.
* Jack and Will use the tactic with a canoe for about five seconds in
* Jack, a nephilim born to fallen archangel Lucifer and Kelly Kline, a human woman.
* Jack. Another element of the punishment is that the denizens of hell taste like sulfur.
* Jack answers he doesn't...and then proceeds to (very laconically) answer Ianto's concerns anyway.
* Jack, a post-captain who would normally be fairly low down the naval chain of command, abruptly finds himself in charge of all the British naval forces in the English Channel, as everyone above him in the chain of command is either dead, badly wounded, or hiding in Canada believing that Britain had already been conquered. He does well enough that he eventually receives orders from the provisional government giving him command of all the navy vessels in the Channel and any others that enter them, meaning that if a senior Admiral were to turn up, Jack would still outrank him.
* "Jackaroe" is another song about a girl who goes off to war to follow her love, this time in the Navy.
* Jack. A soldier in life who had been ordered to massacre women and children, the central character of a story arc spent the entire storyline narrating what it was like in hell, as well as repeatedly insisting to other characters that he wasn't responsible, that it was all fate and he couldn't be blamed for his own actions. At the end of the story arc the Devil finally has the damned soul collected from his misadventures and brought in for a personal interview — and to show off the lovely comic the Devil has been drawing. The very last few panels are of the fool asking, "but if this is just a comic, who's been reading...?" And then slowly, with horror suffused features, turning to look over his shoulder...
* Jackass. After the wall falls, though, he gets hit by a wrecking ball. Also attempted during the outtakes in the credits. Someone yelled "cut" at a bad moment, so Knoxville thought the scene was over and moved...
* Jackass. An interesting choice, considering that it's a recording that's as old as most of the show's audience.
* Jackass, Bam begs, "Please, God, don't let there be a Jackass Three!" There was.
* Jackass been him. Cue a large groan from the audience and a shot on Steve's clearly hurt face.
* Jackass big mistake. During the filming of "Jackass Number 2", Steve-O hid the tattoo with a bandana and when he got back from India, he covered the baby with a black blob. Then Bam Margera made the suggestion of turning the blob into an ostrich and he went with it. Bam drew the ostrich and Kat Von D tattooed it and Steve-O thought, "Problem solved!" In 2017, the tattoo ended up partially burnt off during a stunt involving rocket engine fuel, so he had the tattoo changed to that of the man and the ostrich riding a motorcycle.
* Jackass cast member Steve-O was once high on ketamine or something, and his drug-fueled antics caused him to have a war with his neighbor. At one point before being evicted, he once kicked his boot on his neighbor's door saying:
* Jackass, did well enough at the box office to have sequels. America's Dumbest/Funniest Home Videos is similar.
* Jackass film after being locked on a bus with a cobra. Then he managed to jump through the bars of the door trapping him in.
* Jackass Genie: A genie who deliberately misinterprets a wish out of cruelty or spite, or makes it so their master's wish is granted at a terrible price.
* Jackass Genie: A genie who deliberately misinterprets their master's wish or makes it so the wish is granted at a terrible price.
* Jackass Genie: The genie deliberately misinterprets their master's wish or makes it so that the wish is granted at a terrible price.
* Jackass has Ehren McGhehey dressed as a mouse crawling through a floor-full of mouse traps setting off almost every one of them. The crew throws several at him including one attached to his groin.

* Jackass is built around this: the guys are all getting hurt, but it's done with so much hilarity and gusto and even the victim ends up laughing their ass off at the end of it that you can't help but laugh along after wincing in pain.
* Jackass itself, particularly Bam and the CKY group in the early years (Phil Margera worked in a supermarket for many years).
* Jackass movie has one too, saying the stunts were done by professionals and "neither you nor your dumb little buddies should try these at home."
* Jackass movies when the guys are confronted with stunts that even they know are going to terrify the lights out of them.
* Jackass Number Two saw him close the door, Bam adamantly insists that he didn't do it.
* "Jackass" or simply "ass" used to only mean "donkey", but is now an insult, or a slang term for the posterior in American English.
* Jackass segment "Ass Kicked by Girl." He gives it the old college try, but still gets the stuffing knocked out of him by female kickboxer Naoko Kumagai.
* Jackass skit has Johnny Knoxville walking around with a fake penis in his pants acting completely unaware of it.
* Jackass-style stupid things, followed by a text that said. "People do stupid things. Paying too much for phone service shouldn't be one of them." They always had a this disclaimer at the bottom of the screen. Vonage is still around, but they have since replaced these with more...mature and reserved commercials.
* Jackass tendencies. Much of the time, one didn't even realize that there was anyone in the cast besides Johnny, Steve-O and him.
* Jackass: The Movie has Raab Himself jump off a tree while bungee cords are attached to it; giving himself a hanging wedgie.
* Jackass, they once went to a city called Mianus (before you ask, it's located in Connecticut). Of course they made lots of jokes with the name of the city, but the trope is played most straight at a point when Bam Margera is standing on top of a hill with a telescope:
* Jackass, Wee Man has himself painted to look like the hand-painted wall of the basement stairway at Ape and Phil's house. He scares a couple of people, until Ryan Dunn comes down and shocks him with a cattle prod.
* Jackass where Johnny Knoxville gets half of his face blown off with a shotgun, exposing his skull.
* Jackass, which involved the cast getting dispatched in various ways.
* Jackass while riding around on a skateboard. He skates past a stoner smoking a blunt. The smoker's reaction is a blank stare while exhaling.
* Jack Astor's Bar and Grill is a restaurant chain in Canada that has a donkey as its mascot. Of course, this led to them having a little bit of fun with the lit-up signs, by flashing the "tor" in Astor's on-and-off (which would make it say "Jack Ass Bar and Grill"). However, some of the locations have stopped doing this post-renovation.
* Jack Atlas as a part of using the Burning Soul ability. It's a miracle his cards don't catch on fire.
* Jack Atlas (Synchro users) all dress primarily in white, the Xyz users follow a very dark colour motif, or the two Ritual users wear something blue.
* Jack Aubrey himself is an even better example. He is a highly skilled sailor and capable personal combatant. He has also become so good at the mathematics and astronomy needed to navigate he has come to the attention of the Royal Society, he builds his own telescopes, and is an accomplished violinist. He is also dreadful at languages, dispenses wisdom like "they have made their cake, and must now lie in it" and firmly believes the sons of Noah were named Cain, Abel and Moses.
* Jack Barry The remaining $16,200 in cash and prizes was donated to the United Cerebral Palsy Association.
* Jack Bauer himself on the other hand generally averts this trope. Although he isn't above revenge and has no problem putting several bullets into the body of someone who's killed a close friend or loved one of his, if he needs to work with said person first in order to carry out some assignment or thwart some other terrorist plot, he will put aside urges to kill them for the moment until after the

mission's over. Some notable cases include him saving the life of Nina Meyers during Day 2 since he needed her to find the nuclear bomb and teaming up with Christopher Henderson to stop Vladimir Bierko's takeover of a sub armed with nuclear missiles during Day 5. This trait becomes especially important in the series finale
* Jack Bauer Interrogation Technique is much more professional-sounding than 'Violent physical abuse until they give you the information'.
* Jack Bauer Interrogation Technique of public outcry at the very least.
* Jack Bauer Interrogation Technique: Painfully torturing someone to force them to reveal information.
* Jack Bauer Interrogation Technique: The hero needs information, and fast—thus, they immediately decide to torture their captive.
* Jack Bauer Interrogation Technique: These kind of heroes use torture on people for information.
* Jack Bauer Interrogation Technique to extract information from the perp "By any means necessary" (a Malcolm X quote).
* Jack Bauer's reason for not telling anyone other than a select few people that he was alive following the events of the fourth season of
* Jack become Leslie's new "associate" for purely financial motives (until a gust of wind carries the tiny man off a balcony and he inherits his fortune)
* Jack becomes remorseful for how he treated Jouglat, stating that he shouldn't have cared more about his art and his ego than the fact that his brother was home.
* Jack Benny and Fred Allen began as one of these, starting when Allen made a crack at Benny's "skills" on the violin in a 1937 episode of his show. Benny responded in kind the following week and they were off to the races.
* Jack Benny and Fred Allen. The two would frequently appear on each others shows to harass one another and trade barbs, leading to a moment when Jack Benny, who had taken an assumed name to appear on Allen's new game show, finds out his "big prize" is to have his pants pressed — right then and there.
* Jack Benny-Fred Allen feud, any time either of the two appeared on the other's show, the hamminess reigned unrestrained.
* Jack Benny (in his fictional persona) was known for being extremely stingy with his money. After his death, one of the clauses in his will was to have a fresh rose delivered to his widow every day for as long as she lived.
* Jack Benny is kind of an unusual example of this, as while his persona is a perfect example of this trope, that persona wasn't explicitly Jewish and was more of a WASP if anything. Thus, his being a Jewish stereotype/being played by a Jewish actor is sort of
* Jack Benny-Mel Blanc "Sí, Sy, Sue" routine might fit here, with Blanc's character responding entirely in deadpan monosyllables that are, in context and timing, hilarious.
* Jack Benny's famous "Your money or your life!" routine, quoted above, is a bit of a parody of this.
* Jack Benny's persona was his inability to play the violin, much less realize it. In real life, Benny was an accomplished violinist, often performing with Isaac Stern.
* Jack Benny's screen (and radio) persona was also an example, what with the whole "vain, egotistical miser" bit.
* Jack Benny's show also brought us Mr. Kitzel, who started as a hot dog vendor but eventually took on all sorts of random jobs.
* Jack Benny used a violin bow with a razor blade instead of a string.
* Jack Birkett, openly gay British dancer and actor best known for his theatre roles.
* Jack Black And His Dog Silver, a paleontologist is tarred and feathered for believing in evolution.
* Jack Black calls his fans "Jables", which is also one of his nicknames.
* Jack Black, looks and emotes so much like Black that his mere existence serves as the first joke in his scenes.
* Jack Black). Roy is in the middle of introducing himself when it turns out Pat

isn't dead yet and kills him.
* Jack Black series when Kyle quits the band. Many, many holes, actually.
* Jack Blanchard and Misty Morgan, a Florida-based husband-and-wife duo, had back to back hits with "Tennessee Bird Walk" and "Humphrey the Camel" in 1970, both silly, monotone novelty songs about animals. There were a few more top 40 hits, including a cover of The Fortunes' 1965 hit "You've Got Your Troubles" later in 1970, but none are played today.
* Jack Blank against Mechas, since The Great Collaborator, the one who betrayed the Imagine Nation by opening it up to the Rüstov, was a Mecha named Silico. Jack and his new friend Jazen, also a Mecha, come to the conclusion that Smart had orchestrated the whole Great Collaborator thing and pinned it on Silico to gain emergency wartime powers and keep them secure. When they bring this up to Smart, he's downright disgusted that they believe that of him because he would never even think of siding with the Rustov, and he is quick to point out that they have absolutely no proof supporting their accusations. In short, Jack and Jazen were dead wrong.
* Jack Blank already finished with it, and they are presently attempting to invade the Earth.
* Jack Blank and the Imagine Nation" the orphanage that the titular character comes from is called "St. Barnaby's Home for the Hopeless, Abandoned, Forgotten, and Lost." In fact, at one point, the headmaster attempts to change the title from "Home" to "Ward" simply because "home" sounds too pleasant.
* Jack Blank book, Jazen Knight implies that the reason Jonas Smart exerts so much economic control over Machina's businesses is that he gives veiled threats that anyone who refuses would be accused of being a conspirator to the enemy Rüstov and subsequently treated as such.
* Jack Blank. He calls it being able to "talk to machines", which does give him telepathy with any programmed system, as well as being able to telekinetically influence anything with moving parts.
* Jack Blank tends to run a hand through his hair when nervous or stressed. He's stressed a lot in Book 3.
* Jack Blank. The first thing that appears when a host claims a body is the Rüstov eye: a dark ring around the right eye and a line going down the right cheek.
* Jack Blank. The length of the Calculan year isn't known, but 942 is still a lot of them.
* Jack Blank: What the Varagog villagers do to Jack after he crashes the medical evacuation vehicle in their borough.
* Jack Blank, when he ends up in trouble. They had hooked up offscreen between the end of the second book and the beginning of the third, but it never came up to mention it until the end.
* Jack*Bot in his arms, while simultaneously holding a handful of cards.
* Jack*Bot, showing off her legs on both the backglass and the playfield.
* Jackbox Party Pack 6, set to blow after a total of 20 seconds (active only during the answer time of main-game questions). If a player can carry it through the final round, there will be one last challenge to defuse it in the remaining time.
* Jack Brooks: Monster Slayer, Crowley's dog detects the evil early in the movie, but is unwilling to abandon his owner.
* Jack Brooks: Monster Slayer has a few very bloody scenes, but the film is played for laughs.
* Jack Brooks: Monster Slayer has the demon's heart, which starts beating in Crowley's hand.
* Jack Brooks: Monster Slayer. It comes in handy against the monsters.
* Jack Brooks: Monster Slayer, Jack takes a fang from the monster that killed his family and hangs it around his neck.
* Jack Brooks: Monster Slayer uses its tentacles to batter Jack around the room.
* Jack by Calvin at one point, taking him apart to make him fit in his backpack.
* Jack Campbell, a naval officer speaks with pride of the Marines to a ground forces general (Navy and Marines are also natural allies against the Army and

system aerospace services in bar fights). There are also system defense forces, which are a separate branch that also has a rivalry with the Navy. The only exceptions are "code monkeys" (computer techs) who happily cooperate across services and have their own code of conduct. Everyone else thinks they're weird.
* Jack Campbell, Captain Desjani leaves the bridge for a time. When she returns, she explains she was performing six weddings, probably breaking a lot of regulations in the process.
* Jack Campbell, Captain Desjani uses this when Geary says he doesn't want to talk.
* Jack Campbell, Geary mostly just puts the officers in charge of ships, but some get promoted as well.
* Jack Campbell, Geary sets up the fleet in a compact formation to provide the bear-cows with a nice, neat target.
* Jack Campbell, Iceni reflects that she doesn't have this, but she may have a somewhat more tarnished version.
* Jack Campbell of Desjani's death, and Desjani tells him that this would be his duty, that she doesn't want people to look at him and think she ruined him by dying, and that she herself would soldier on.
* Jack Campbell returns to just after the main series, with the two main characters discussing their ancestors and their roles in creating the Alliance.
* Jack Campbell series, Captain Bradomant and Colonel Rogero, on opposite sides of the war. Both intensely honorable and adamant against doing anything against their own sides.
* Jack can also do this with Oz. Which is especially worrying, as of late
* Jack Central's boytoy Plato was a slave most of his life, and his last two owners treated him fairly well but by that point he knew no other life. On his deathbed he asked God if any angels needed a slave and he ended up with Central.
* Jack Chalker and mathematically precise patterns, such that every high-ranking wizard also had to be a genius mathematician. One of the major subplots follows how much this system is screwed up by the introduction of technology smuggled from Earth; even a pocket calculator could turn a mediocre magician into a powerhouse, and more powerful computers can be programmed to work out new spells at high speeds. Also, in one plot where a powerful wizard came to "our world," he discovered that creating magic spells was analogous to computer programming, which allowed him to bring magic to our world.
* Jack Chalker because after his death the women immediately decided that the best way to protect, coddle, and serve their rare and precious male children was to keep them in guarded creches and raise them to be little more than gigalos and sperm donors.
* Jack Chalker. He didn't actually get pregnant, but the possibility was acknowledged.
* Jack Chalker he publishes it on the other hand... And this is just the tip of the timey-wimey iceberg.
* Jack Chalker; heroic tales require genuine sacrifice on a heroic scale.
* Jack Chalker he was forcibly recruited into is actually a second front in a future War of Earthly Aggression. Both sides claim to be fighting to protect the future of humanity.
* Jack Chalker is filled to the brim with semi-mythological mix-and-match critters, justified as the result of lazy alien species designers cribbing each other's work. Meanwhile, the mix-and-match critters from mythology are justified as legends and "racial memories" stemming from our own species' creation on the Well World.
* Jack Chalker, it's rumored that this is what happened to VR genius Matthew Brand.
* Jack Chalker. It's thousands of years later when the series begins and Master System has kept humanity under an iron fist since then, forcing most of the population to live in a "safe" low technology state. It doesn't claim to be a god, per se, but it might as well be to most people.
* Jack Chalker only seem to make her even more determined. Hell, Mavra's probably ar her most dangerous when she doesn't even have any hands.
* Jack Chalker series featured the Lamp of Lakash, whose genie was the last person to make the mistake of making more than one wish. The wish would be granted, but

the wisher would become an all-powerful genie bound to the Lamp, and the previous genie would revert to his original state. (Presumably the original genie was from the home dimension of the Djinn, to which the Lamp had a link.)
* Jack Chalker series features four planets which serve as penal colonies, each with a unique cutthroat society.
* Jack Chalker series has it that when the universe was manually rebooted, a world was chosen for each of the races to get seeded upon. Earth came up almost perfect for humanity, but had developed dinosaurs naturally. So the Guardian tweaked the axial tilt of the world slightly, thus killing most of them off to make room for the incoming colonists. Needless to say, time was moving at an extremely fast pace during this — only moments passed by during the process.
* Jack Chalker series literally has variation 2 written right into the physical laws of its universe. The one character who resists is desperately unhappy.
* Jack Chalker" series. People assume they can get three wishes, but in fact the lamp only grants two, and only the first is free; the second will replace the current genie with the wisher automatically (although the wish must still be fulfilled).
* Jack Chalker series. Since it's not possible for anyone else to be immortal (you have to be programmed into the computer that stabilizes the universe) he considers not being doomed to outlive descendants a mercy.
* Jack Chalker series, who never accepts being changed from a barbarian hero into a tree nymph.
* Jack Chalker several times. But then, he also admits to being a very talented compulsive liar.
* Jack Chalker when they wake up in their new forms and eventually leads to an epiphany that they now regard their new body as their natural form.
* Jack Chick assumes that this is what the Theory of Evolution teaches.
* Jack Chick is hardly the only one to denounce Tolkien as "Satanic"—see
* Jack Chick swore up and down that his stories were true, but whether he meant that so as to ensure his message would be taken to heart will never be answered.
* Jack Chick tracts. There are too many examples to list specific ones, but they tend to fall into a few distinct categories.
* Jack Chick was Satan's first step in getting the occult accepted by mainstream America. Really.
* Jack Churchill, and escaping both times. When he returned to Britain ready to go back to the battlefield, the war ended, and that pissed him off.
* Jack Churchill is reputed to be the last British soldier to have killed an enemy with a longbow. This was in 1944, after the Normandy Landings.
* Jack Cloudie suggests the lackey undo the stitches that hold shut the mouth of one such "tree" and ask it.
* Jack Coleman discussing the most embarrassing roles of his past (complete with a picture of his mulleted 80's haircut) on
* Jack comic, the hero of the story wakes up naked in bed in the house of his female partner. He asks if they had sex, and she teases him with a joking question about whether it really matters, to which he replies:
* Jack covered up Siri's escape to save his job, including later destroying that showed Helena is not her.
* Jack Crawford, Clarice's superior and the man leading the hunt for Gumb, has his office adorned with the same newspaper clippings, along with photos of the bodies that washed up on the riverbank.
* Jack cruelly abuses Claire verbally, among other things blaming Emily's
* Jack (David Hopkins) himself, but also Wrath — one of the seven embodiments of the classical deadly sins. Hell does not have a clear geography as it keeps changing to torment its inhabitants (Trying to climb a tiny hill might end up being harder than scaling Mount Everest) in response to them. Hell tends to be harder on the damned, the worse their sin is perceived to be.
* Jack (David Hopkins). In spite of his fearsome appearance (seven foot tall, green humanoid rabbit with glowing red eyes, who looks like he's been dead for about two weeks) and his anger issues, he still tries to be a nice guy, especially to

children and innocents. The comic is about his coming to terms with and seeking forgiveness for his deeds; perhaps ironically, while he regrets his deeds, he feels that what he has done was unforgivable — and without that, he cannot escape Hell. Unlike at least five of the seven sins, he was never pure evil, but he racked up the highest death count of any of them.
* Jack (David Hopkins) of Lust, was a serial rapist and murderer in life, and kind of in death too, though he can't take pleasure from the act anymore as part of his punishment.
* Jack (David Hopkins) when forces of the hereafter direct the living to their doom.
* Jackdaws saboteur team was originally planned to be all female, so that they could disguise themselves as cleaning women so as to infiltrate a critical German telephone exchange building in occupied France. The problem is that the team leader, Flick Clairet, had only a couple of days to recruit the team, and could not find a female telephone engineer in Britain who also spoke fluent French, so she ended up recruiting "Greta," a male transvestite instead.
* Jack Dee again, describing Nottingham: "Nottingham's twin towns include Ljubljana, the capital of Slovenia. During a goodwill visit in July 1991 the twinning panel became trapped in a small hotel, pinned down by small arms fire. The terrified Slovenians said they wished they'd never come here."
* Jack Dee has done a bit suggesting that most people with Chinese character tattoos have something that says either "bean fried rice" or "please select one of the tattoos below".
* Jack. Depending on which one is in control you either get a giant female reptile monster with a male face for a crotch, or vice versa.
* Jack DeSena will always be Sokka. That is, if you're too young to remember his time as
* Jack Dodson appeared in one Season 6 episode as an insurance agent before taking on the role of county clerk Howard Sprague the following season.
* Jack does quite a lot of firing. Jonathan's gotten fired three times in the first three seasons. Kenneth got fired for about a minute in "Blind Date". Jack spent all episode firing people in "Cutbacks". And in a case of
* Jack does this again a few seasons later after he downloads an alien database into his head. From previous experience, they know what to anticipate if they don't manage to get him somewhere that it can be removed from his brain before it's too late:
* Jack Donaghy coined the term "innoventually" during 24 straight hours of successful problem-solving (referred to, by him of course, as "Reaganing"). Of course, at the very last moment, his Reaganing (which would have been rewarded with a shower of lavish gifts) was rendered moot by his inability to solve Liz Lemon's intimacy problem... at least not until after the 24 hours had elapsed.
* Jack Done more comically during the escape from Grissom, where she offers to get all of them tattoos as a gesture of congratulations.
* Jack Douglass version of "Choose Your Own Adventure" in 2008. Since then, he's gone on to create a number of successful projects, including "Your Grammar Sucks" and "JackAsk", but nothing more has been heard about CYOA.
* Jack Dylan Grazer came out as bisexual in 2021 and uses he/they pronouns.
* Jack Dylan Grazer plays Fraser, who is gay or bi, and came out as bisexual in 2021, along with stating his pronouns as he/they.
* "Jacked" has a particularly clever variation: the FBI witnesses an apparent murder via hidden camera, but it turns out to be staged.
* Jack Elam, at first Elam hated only being offered comedies, but soon realized he was becoming more famous as a comedian than he ever had been as a heavy, and started intentionally seeking out comedic roles.
* Jackelian Series: Amelia finds an ancient weaponized horseless carriage in he Tomb of Deisela-Khan.
* Jackelian Series reprobates drug themselves into happy delirium by adding magnesium to the coke that fuels their boiler-hearts.
* Jackelian Series surgically removed to accommodate their over-sized pseudo-

offspring.
* Jack ends up killing the assassin (in self-defense) before he can get himself cleared. With a bulldozer.
* Jacker has a cybernetic implant resembling an eyepatch which covers his left eye.''
* 'Jackers' are mentioned in the Terran Trade Authority books by Stewart Cowley. In one story they start turning up with more sophisticated weaponry, and it turns out the jackers have discovered a
* Jack Evans, innovator of the 720 moonsault and leader of ROH's Generation Next and Vulture Squad, in a big bad way. Practically every single move he does involves at least one flip. The worst part, he's sloppy as hell and has landed on his head countless times, only surviving for how flexible he is.
* Jack, even committing suicide in order to follow him into hell and kill him again, though she really had no idea what she was getting into.
* Jack Flanders, a mechanical voice starts listing all of the types of Coca-Cola available, while Jack is desperately attempting to extract himself from the transaction. The list keeps going even as the narrator is talking over the top of it.
* Jack from Jack in the Box used "Swavory" to describe the taste of his new waffle breakfast sandwich (sweet and savory). His wife later spelled out
* Jack Frost (1997): In the sequel, Sam and Anne forget about Joe and Marla and accidentally leave them in the freezer.
* Jack Frost (1997), Jill takes a bath and basically gets raped to death by the evil killer snowman.
* Jack Frost (1998), Jack gives his son a harmonica shortly before he leaves for a gig and dies in a car accident, claiming it's magic. It turns out to be true, much to the surprise of both of them.
* Jack Frost (1998) really nice with good cinematography and winter colors.
* Jack Frost (1998) (The family movie). The titular main character is trapped in the body of a snowman in order to say goodbye to his family. They spend a good deal of the movie trying to keep him from melting and getting him to a nice cold mountaintop. Upon accomplishing this task, he drops "but now I must go" for seemingly no reason and disappears into the wind.
* Jack Frost 2: Revenge of the Mutant Killer Snowman, with tongue-tearing results.
* Jack Frost bearded elder who blows cold gusts of wind out his mouth like the latter.
* "Jack Frost Is Coming To Town" takes place on the first day of winter, but first aired on October 17, 1998, when it was still fall.
* Jack Frost movies. They're low-budget horror movies about a serial killer who gets his DNA fused with snow, which leads to him becoming a killer snowman. Naturally, the films don't take themsselves seriously.
* Jack Frost's sister, so some viewers accidentally assigned the name to the wrong character.
* Jack Frost the son is given a harmonica the dad claims is magical and will always get him to his son. After he dies he brings him back from the dead to be with his son.
* Jack gets another almost-kiss in "Fragments". He falls on Ianto, they laugh, roll around, and share an intense moment where their faces get really close... and then Ianto stands up and starts walking away.
* Jack Gilbert Graham was the first American ever arrested for blowing up a commercial airliner when he was accused of blowing up United Airlines Flight 629 in 1955. However, when prosecutors looked in the federal statutes, they discovered that no one had actually bothered to make it a crime to blow up an airplane. So they turned the case over to state prosecutors, who indicted, tried and convicted him on a single charge of first-degree murder (for his mother, who was one of the passengers and unwittingly carried the bomb aboard).
* Jack Gilford for Cracker Jack, and the jingle: Lip-smacking Whip-crackin Paddywhackin Knickaknackin Silabawhackin Scalawhackin Crackerjackin ... Cracker Jack!

* Jack Gleeson, sometimes even to the point of harassment. Gleeson's real-life personality couldn't more strongly contrast to Joffrey.
* Jack, God is a more-or-less constant presence behind the scenes, since the comic is essentially about the morality of the afterlife, and how to deal with it. When she finally showed up in the flesh, so to speak, she manifested as a sheep.
* Jack grew up in an experimental facility, and after escaping actively avoided making friends.
* Jack Hammond, an aversion, is rather incompetent. His motivation for joining the Navy is purely familial, and his admiration of Hornblower prompted him to serve on the
* Jack Hammond is eager and enthusiastic to serve in the Navy, however, he's not suited for it. He can't learn naval signals, he's squeamish and panicky. He freaks out when he witnesses a flogging and then when he gets sputtered with a little boy's blood. Even seaman Matthews who's kind and fatherly and who originally tried to help him loses his patience with him. When his Captain tries to convince him that he should choose a different and less violent career, he insists that it's his dream and that his family expects him to serve in the Navy.
* Jack Handey bounced back and forth between this and simple inane musings.
* Jack Harkaway, a popular Penny Dreadful hero, fell in love and eventually married his adopted sister. They had a kid together.
* Jack Harkness, being immortal and effectively indestructible, is headed for this at some point. Assuming the line about him becoming the Face of Boe wasn't just a joke, he has a good few billion years left before running
* Jack Harkness fits this trope in Series 1, temporarily changing the Doctor and Rose's
* Jack Harkness, he should have lots and lots of children and grandchildren running around if that was the case, not just one family. It makes more sense that the Time Agency routinely sterilised its agents (Would you let people like Jack or John run around in eras without reliable birth control and potentially father their own ancestors?) and that the daughter in season 3 was the result of a 1960s orgy. It's not like Jack is the jealous type who'd refuse to raise the kid as his.
* Jack Harkness might have bits of this trope as well. Normally, he would be dead but comes back anyway.
* Jack Harkness to get rid of him when he grabbed it, and the Doctor's Time Lord instincts make it difficult to even look at him without mentioning how "wrong" he is.
* Jack Harkness very gently kisses both Rose and the Doctor on the lips, before rushing off to what he believes will be his end.
* Jack has a habit of switching his head between a bunch of bodies after he goes to hell. And he keeps his bodies' original heads in a jar where they're constantly begging people to kill them.
* Jack has a romantic relationship with Lady Rose, and frequently goes out in public with her, which would be a
* Jack has a very cool sword. It was forged by the gods into a holy katana that is one of the very few things that can actually harm Aku.
* Jack has been tortured to death repeatedly by the Master for a year and is at one point gunned down by a squad of soldiers, but his clothes don't have a drop of blood on them.
* Jack has spent nearly the whole episode polymorphed into a rooster, before quickly collecting himself and politely requesting shrimp instead.
* Jack has the skill Transience, which deals heavy damage to enemies in front of him at the cost of nearly all his HP.
* Jack has this as the central premise. All the recurring characters are dead, and the comic takes place mostly in hell.
* Jack himself after he adopts the cruel, unforgiving Jack the Ripper persona does make some valid points about the ugliness of society and about people being morally weak and needing fear to control them and keep them in line, among the other nationalistic, xenophobic, homophobic and generally bigoted remarks of his.
* Jack himself aged to adulthood pretty much overnight after he was born, so even

when they're both their "correct" ages, it's still unusually marginal.
* Jack himself normally wears his trademark white gi, but in "Jack and the Gangsters" he joins forces with the titular gangsters and dons a very nice pinstripe suit. Naturally, he's still just as badass while wearing it.
* Jack Horner, who is every Jack in fairy tales (except Jack Sprat), exploited this by going to Hollywood and making a trilogy of movies about him. He's now effectively immortal, but
* Jack Huston — the movie about Beowulf-meets-alien-monsters — basically for this reason: because playing a Viking is "every boy's dream."
* Jackie and Craig are teenage witches who preserve their immortality through cannibalism and the avoidance of sunlight. They suffer realistic effects of scurvy as a result of this, in a book essentially geared towards preteens no less.
* Jackie and Craig: Chupacabra packs are among the first creatures encountered and form a central element of the book's overall atmosphere and storyline.
* Jackie and Hyde's relationship in later seasons was also completely secret from their friends. In private, they couldn't keep their hands off each other, but if anyone else was in the room they were insulting each other as usual.
* Jackie and Jaymee with the groom's widower father telling how he met and married the bride's tragic single mother, making them step-siblings.
* "Jackie Blue", by the Ozark Mountain Daredevils, sounds absolutely nothing like the rest of the album it appeared on (
* Jackie breaks up with Marco because she knows he's unhappy with life on Earth after spending so much time on Mewni, and implicitly because she knows he'd be happier with Star. Later, when Marco realizes that he has a crush on Star, he holds off on telling her because she had already moved on by that point to start dating Tom, a friend he cares too much about to hurt.
* Jackie Brown herself and Max also express romantic interest in each other (though nothing
* Jackie Brown in the parking lot on impulse and manages to stall his car when driving away.
* Jackie Brown, Ordell lurks in Jackie's apartment for one of these conversations.
* Jackie Brown, the title character reacts to ATF agents finding cocaine in a bag she was carrying with "What's that shit?" (although it's implied that she really hadn't been aware that she was carrying it).
* Jackie can do is thank the Lord for a sign that they shouldn’t be together because it was all about him.
* Jackie Chan admits that he did appear in a porno film to get by several years before he became famous.
* Jackie Chan Adventures, after Jade destroys Shendu with one of his own Talismans, Uncle reveals that when an evil is destroyed, a new evil can fill the void, possibly being even more dangerous. The next season deals with Shendu's siblings forcing his spirit (which survived his body's destruction, likely due to the Sheep Talisman or demons naturally become spirits once they die), to take advantage of this void (via an ancient artifact), by using it to release them from their otherworldy prison so they can reconquer the world.
* Jackie Chan Adventures a lot of the time, has a number of these moments throughout the series and tends to be the one who thinks of USING the magical objects they find (i.e. The Talismans) more often than not, not to mention all the ways she's found to follow Jackie.
* Jackie Chan Adventures and apparently deals with pain. Whoever has the power of both is this trope.
* Jackie Chan Adventures and appear next to him the minute he leaves. Later, when this is pointed out to him, Jackie states he feels like he should still say it.
* Jackie Chan Adventures and can grant him unlimited power alive rather than dead, but over time there's genuine concern added to it.
* Jackie Chan Adventures), and continuing even as he and and his father are dragged into their prison.
* Jackie Chan Adventures, and mankind's cities reduced to ruins and the humans cowering at a supreme-ruling Drago's feet.

* Jackie Chan Adventures, and Shendu's past with Lo Mei causes transitions in their relationship. Also, Valerie has to continuously deal with her father's violent death.
* Jackie Chan Adventures and the other seasons simply used the title music for the credits.
* Jackie Chan Adventures are compared to the Three Stooges in-universe by Jade who even calls them Larry, Moe and Curly in "Sheep In, Sheep Out".
* Jackie Chan Adventures, as, a couple episodes prior, Jackie offered this as a reason to defect while fighting him.
* Jackie Chan Adventures, attempts to exit the Demon Netherworld using Shendu's portal after Jade goes through it, disregarding the rule that only one person can use a portal when it opens. Sure enough, the portal closes and Hsi Wu slams into a floating rock formation that happens to be behind the location where the portal manifested.
* Jackie Chan Adventures: Averted in "Rumble In The Big House". Jackie has to go undercover in prison to stop a bad guy plot. He is given multiple phone calls within a time limit, but they don't do him much good. He tries calling Captain Black, but he's unavailable. Then he tries calling Uncle, but Uncle wasn't told about the undercover operation and yells at him for being in prison before hanging up. Then he runs out of time.
* Jackie Chan Adventures: Both Dai Gui and Hsi Wu respectively have a goatee-like appendange on their chin. Daolon Wong has a white goatee, as does Tarakudo has a real goatee to complement his classical samurai mask appearance.
* Jackie Chan Adventures, both involving Jade pitching the idea of a show based on her uncle's kung-fu hijinks. Jackie however doesn't want to be a Hollywood star (a contrast to the real Jackie Chan) and in the end things happen that stall any talk of a show.
* Jackie Chan Adventures but he is seen kicking ass as it is needed and will bring pain to those who bring trouble, including the main protagonist.
* Jackie Chan Adventures, but within Shendu, as he explains, it unifies the powers of the other 11 talismans and prevents this trope from happening.
* Jackie Chan Adventures canon, there's several magical fights between Uncle and Daolon Wong. Results vary depending on the fight.
* Jackie Chan Adventures, Captain Black had been attacked by Valmont wielding the Dragon talisman. The end of the episode featured the long beep, only to reveal that Captain Black had just took off the sensors and tried to get out of the hospital.
* Jackie Chan Adventures, Captain Black insists on trying to fight magic with science. Uncle insists this is impossible, and since he gets more screen time...
* Jackie Chan Adventures, combat or otherwise; in hindsight, the names really are just flowery similes describing the action in question.
* Jackie Chan Adventures could be considered Elite, as they nearly had super-strength and were almost impossible to beat without the strength talisman, or similar.
* Jackie Chan Adventures: Daolong Wong appears to be a very human sorceror. However, it's established he's very old, older than uncle. Furthermore, an episode involving the astral projection shows that inside him are some kind of screaming ghost-like entities.
* Jackie Chan Adventures: Daolong Wong once tried to steal Santa's chi.
* Jackie Chan Adventures) decides to make off with one last treasure, but he ends up falling on the conveyor belt of the post office's packaging sector, and he ends up wrapped in a package to Mexico.
* Jackie Chan Adventures demon counterpart — is heavily endowed, despite being a dragon. Then she reveals that it's padding, since as a reptile, she lays eggs and therefore doesn't need mammaries.
* Jackie Chan Adventures does this in the battle with Tso Lan, the Moon Demon. The good guys have the ingredients for the spell to banish the demon again, except one of them is inside Jackie's suit. Tso Lan gloats that Jackie can't remove his helmet without killing himself, to which Jackie replies "Let me air this out" and briefly unhooks his own air hose.

* Jackie Chan Adventures does this when he first meets Jade, recognizing her as the former Queen of the Shadowkhan.
* Jackie Chan Adventures, Drago, in "J2". Future Jade's arrival was even accompanied by Terminator-style music.
* Jackie Chan Adventures empire. When she's set free in season two, she heads straight for it only to find it in ruins due to the intervening centuries.
* Jackie Chan Adventures episode "Agent Tag", Jade stows away on the Agent Tag's mission and Jackie goes after her. He ends up getting caught in the episode by the villain Dr. Necrosis who's trying to make a Doomsday device. The only problem is Dr. Necrosis has never seen Agent Tag and assumes the captured Jackie is him.
* Jackie Chan Adventures episodes (especially during, but not limited to, the second season) that contain minor villains and monsters who do not appear outside of single (or a few) episodes.
* Jackie Chan Adventures episode "The Warrior Incarnate", the Dark Hand busts into Uncle's shop looking for a terracotta statue on loan there. However, the statue was previously broken and is now totally disappeared from the shop, as Jade hauled the pieces away without Jackie or Uncle's knowledge. In this case, both Jackie and Uncle are telling the truth yet don't know the full story, making their explanations sound inconsistent:
* Jackie Chan Adventures episode, "Viva Las Jackies", both Jade and Ratso ask this when traveling to Nevada in the quest for finding the Noble Tiger. To be fair, both were on a car with a very grumpy old man and a spell that made everything stinky.
* Jackie Chan Adventures-equipped Guardians, with perhaps the only reason they survived being Jade retaking control when she saw her reflection in a puddle.
* Jackie Chan Adventures features a dragon as the main antagonist (Shendu), features the dragon on one of the twelve talismans and said talisman appears on the main logo for the series. Did we mention that the main characters are Chinese in ancestry?
* Jackie Chan Adventures" features Jackie and El Toro fighting one of these while in Mexico and El Toro being scratched by it causing him to become one himself, until the curse is broken. However, the creature is mistakenly said to be from Aztec legend.
* Jackie Chan Adventures: Former cat burglar Viper ends up reforming after her first meeting with Jackie and Jade, becoming a security consultant. Her former skills come in handy, especially during Jackie's encounter with the superpowered thief Origami.
* Jackie Chan Adventures friend from school to help track down some art smugglers, he's swept up in a martial arts fantasy full of wizards and demons. Jackie gets the tables turned on him when he has to sub for Black's best agent, "Tag Stone".
* Jackie Chan Adventures from Jade). Later, he overpowers Jackie just as the Moon is nearly covered by his magic. At the same time, Uncle is chanting the banishing spell, but it won't work due to the symbol of He Xiangu (the lotus pod) being inside Jackie's spacesuit. Tso Lan says out loud that Jackie has to remove his helmet, prompting Jackie to get the pod out by unplugging his air hose for a moment.
* Jackie Chan Adventures gag of Jackie telling Jade to not get involved with his missions, only for Jade to get involved anyway and Jackie to say something along the lines of "I told you to stay put!" Jade asked him on one occasion if he gets tired of saying that and Jackie himself sometimes questions why he even bothers.
* Jackie Chan Adventures gets this in the Season One Finale. He becomes so convinced in fact that in later seasons he is often seen as mentally unstable by his superiors for constantly mentioning magic and demons.
* Jackie Chan Adventures grants the carrier the ability of super speed.
* Jackie Chan Adventures had a "historical flashback" episode starting by the Chan clan stopping in a ghost town.
* Jackie Chan Adventures had a variety of Shadowkhan that could eat shadows.
* Jackie Chan Adventures had its human antagonists, the Dark Hand, working to collect the talismans for Shendu, a Demon Sorceror who was turned into a statue 800 years prior, so as to restore his physical form. The heroes aren't even aware of

Shendu's existence or why Dark Hand are collecting the talismans until the last two episodes of the season (though they do come across Shendu when he temporarily leaves his body and possesses Jade's, they don't make the connection that the evil spirit and the talking statue are one and the same).
* Jackie Chan Adventures had one of Jade saying "Duh" and Uncle saying "One more thing!" it happened very fast, as both Jade an Uncle were watching, they got sick of it after a while. The same episode also had one for Jackie's "Bad day bad day bady day."
* Jackie Chan Adventures had power over playing cards, and always spoke in metaphors and puns related to them. "The deck is stacked in our favor! We have the upper hand!" "Dealer calls a new game!" "I thought he folded..."
* Jackie Chan Adventures had Shendu do this to end the first part of the two-part finale.
* Jackie Chan Adventures had the "Lost Urn of Wei Chun," a three-compartmented box, complete with ghost-trap sound effects homage, to trap the first Three Dark Warriors of Daolong Wong. But, when faced with the 2nd Three Dark Warriors, we get this exchange:
* Jackie Chan Adventures had this happened three times all involving the character of Jade. In each instant one could only travel in one direction through time, meaning they had to provide their own "return ticket."
* Jackie Chan Adventures had Uncle and Daolon Wong fire petrification spells at one another. They both hit at the same time, and so neither could do anything but move their eyes.
* Jackie Chan Adventures has a 50-foot tall Jade do this to the attacking Dark Hand thugs. However, since they're under the influence of Dao-Long Wong's magic they only disappear when smashed. Even Valmont is savvy enough to see their impending doom when the Dark Hand starts attacking the 50-foot tall girl.
* Jackie Chan Adventures has a non-romantic one in Tohru and Jade (who can climb Tohru).
* Jackie Chan Adventures has hinted that his reasoning will be explored later, it's hard not to see that she makes more than a little sense).
* Jackie Chan Adventures has Section 13, which is technically just a law enforcement / intelligence agency, but they now have to help Jackie Chan with fighting supernatural enemies. While they are not very familiar with magic, they are good at transportation, are very good against technology-based threats, and have been known to slow the bad guys down long enough for Jackie and co. to conjure up the spell needed to win. They are a very rare heroic example.
* Jackie Chan Adventures has spiky red hair. But seeing as he's a parody of an anime character, it's to be expected. Uncle also has a spiky hairstyle.
* Jackie Chan Adventures. He appologizes and says he is more used to pro wrestling rings.
* Jackie Chan Adventures. He eventually regained his body in the third season thanks to Dalong Wong.
* Jackie Chan Adventures, he fought against the Demon Sorcerers who imprisoned him to the Shadow Realm.
* Jackie Chan Adventures, her body is weakened, she grows claws, and her eyelids become transparent.
* Jackie Chan Adventures, he tries to contact her directly, but that doesn't work.
* Jackie Chan Adventures if left untreated. He has most of the usual weaknesses, but loses them when he has drained enough chi. Jackie gets frustrated when he learns how bizarre the methods of fighting this vampire are.
* Jackie Chan Adventures: If not for Jackie, Shendu would have probably killed the Dark Hand at the end of Season 1.
* Jackie Chan Adventures, in an attempt to defeat the bad guys, Jade orders the Monkey Talisman, "Turn this log into a death-ray!" The talisman turns the log into a manta, also known as a death-ray. (It turns out the Talisman's power is only to turn people/things into animals.)
* Jackie Chan Adventures instead of actual threats. The Dark Hand Enforcers never even use any guns in combat (Finn did own a pistol at one point, but he never gets

the chance to fire it).
* Jackie Chan Adventures, in that it's not the forces of darkness destroying the balance — Jackie constantly beating back evil has caused good to tip the scales so much that the governing powers of light and dark are forced to take drastic actions, engineering Jade's relapse as a Shadowkhan as part of a larger plan to renew the world's darkness.
* Jackie Chan Adventures: In "The Dog and Piggy Show", Jackie tells Jade that the crotchety old Uncle was a kickass martial artist when he was his age. Meanwhile, Uncle discovers that the Dog Talisman possesses the powers of immortality and rejuvenation, which he secretly uses to help Jackie fight the Dark Hand's newest enforcer, the freelancer Hak Foo.
* Jackie Chan Adventures: In "The Eighth Door", Tso Lan quips, "Age before beauty" towards Po Kong when the Demon Sorcerers are fighting over each other to escape through the Demon Portal. This can be read one of two ways: it can be read as indicating he deserves to get ahead of Po Kong because he's older than her specifically, or it can be read as him indicating he deserves to be the sole demon who escapes through the portal because he's the oldest of all the imprisoned demon siblings.
* Jackie Chan Adventures: In the first scene, Jackie is leading people through the castle of "Mad King Ludwig", said to hold dozens of deadly traps. He spots a hidden wire on the floor and cautions his group to stay back.
* Jackie Chan Adventures involved Jackie fighting the Dark Hand Enforcers in a playground.
* Jackie Chan Adventures is considered too young to fight against forces of evil, or anything for that matter, not that this actually stops her of course.
* Jackie Chan Adventures is controlling her body (which has happened only twice so far).
* Jackie Chan Adventures is killed off at the Season 1 finale, and is assumed dead. The act of "killing" him off allows him to become a spirit and he returns in the body of Valmont. The rest of the series sees him being resealed in the demon underworld, reborn, resealed in his original state, revived, and final sealed off for good in another dimension. He is never actually killed.
* Jackie Chan Adventures is the living embodiment of this trope, and it is awesome.
* Jackie Chan Adventures is "We must do reeesearch!" Of course, given that many of the threats the cast faces are ancient and tend to be documented in historic texts and legend, it's generally applicable to the situation.
* Jackie Chan Adventures. It is implied that should a Demon Sorcerer find and be bound to his/her Other, they will have unlimited power. It is not made clear as of yet what the effects will be on the partner. Also, if one is possessing a body of someone else while touching their Other, the effect of power-boost is distilled. If there is another soul in the body at the time, the chi of that soul prevents that of the two Others from connecting.
* Jackie Chan Adventures - Jackie and Jade while interrogating the mask of General Ikazuki. This is followed by Finn and Ikazuki when they need Tohru to provide them with a mask removal potion.
* Jackie Chan Adventures, Jackie and Tohru fall through the roof of the basement of Shendu's palace, temporarily disabling Jade and knocking Hak Foo out completely, BY ACCIDENT!
* Jackie Chan Adventures Jackie Chan. After one particularly close call, Jackie scolds the villains for their carelessness:
* Jackie Chan Adventures", Jackie's colleague Jumba, his associate Portia, and dentist Dr. Weber wish to use the Sutras to dry up the Ganges river to collect the valuable artifacts at the bottom and get rich.
* Jackie Chan Adventures Jackie's niece after all. She ends up high kicking a waiter's tray in a restaurant causing a chain of events to occur that allows for the Rooster Talisman to end up in the soup she ends up drinking.
* Jackie Chan Adventures Jackie would love nothing more than to go back to his life as a quiet and unassuming archaeologist rather than his current life as a secret agent who routinely defends the world from demons and what not.

* Jackie Chan Adventures, Jade becomes head of Section 13 who travels back in time to stop Drago.
* Jackie Chan Adventures: Jade Chan, who likes to tag along with her uncle Jackie Chan on adventures no matter how many times she gets scolded or grounded for it.
* Jackie Chan Adventures, Jade does this multiple times when using the astral projection of the sheep talisman.
* Jackie Chan Adventures, Jade either becomes an example of this trope or is in the danger of becoming one.
* Jackie Chan Adventures, Jade experiences two (the realm the Cackler resides in, and the TT world shadow realm).
* Jackie Chan Adventures, Jade has one in the second interlude — and this is the most normal thing about that dream!
* Jackie Chan Adventures, Jade has this attitude towards the Titan's one-liners.
* Jackie Chan Adventures, Jade is surprisingly tough and resourceful, and has gotten Jackie's butt out of trouble on numerous occasions (even if she sometimes puts it there). Her skills in espionage, as well as breaking and entering stay with her throughout her life, as we see in one episode, she grows up to become an agent of Section 13. Her cunning will often impress her superiors.
* Jackie Chan Adventures, Jade is unsure whether or not this means he wants to be her friend or kill her.
* Jackie Chan Adventures: Jade once got control of the Shadow Khan. It was...interesting, to say the least; they were perfectly loyal to her, but maintaining control of them turned Jade evil.
* Jackie Chan Adventures, Jade sometimes lapses into this, but is aware of it, being the savvy villain that she is, and tries to avoid it most of the time. Finn, Valmont, and some other characters also do this at multiple times throughout the story, and it usually doesn't turn out well for them.
* Jackie Chan Adventures, Jade tries to attract the Royal Guard's attention (being the nearest authority figure) to report the Magisters' attack, but fails.
* Jackie Chan Adventures, Jade usually gains a a variation of this in stories where she once again becomes a Shadowkhan (refer to the Western Animation entry below):
* Jackie Chan Adventures, Jade, while her royal title is self-proclaimed, is not shy about dishing it out on the battlefield along with her minions.
* Jackie Chan Adventures leaves her so shocked that she can't make herself do anything to prevent him from escaping from the Tibetian temple with the Pan'Ku Box.
* Jackie Chan Adventures. Luckily Jade is left unaffected since she manages to tear out the page that relates to her, leaving her unaltered.
* Jackie Chan Adventures make it clear that the draconic Demon Sorcerer kept concubines prior to his imprisonment. Conversations with Shendu's demon siblings in the Netherworld imply that they also had concubine harems when they were on Earth.
* Jackie Chan Adventures, many episodes start when Jade causes trouble when toying with magic. She even accidentally shrank Jackie!
* Jackie Chan Adventures. Many times, Jade would ride the much larger Tohru on his shoulder. She even gave him half of a yin yang necklace to show their bond. On a similar vein, Paco and El Toro Fuerte.
* Jackie Chan Adventures multiple times by that point and she feels that she needs to return the favor.
* Jackie Chan Adventures of that organization, until being demoted for a mistake.
* Jackie Chan Adventures of the Shadowkhan/Oni on them) so she can increase her own power and keep Jackie and the other heroes from capturing her.
* Jackie Chan Adventures: Olympian Journey: A scene in the first chapter has Jade infiltrating a building only to get captured by a henchman... at which point this is revealed to just be a simulation as part of her Section 13 training.
* Jackie Chan Adventures: Olympian Journey into serving as her minions.
* Jackie Chan Adventures: Olympian Journey is still extant, the others having been reduced to semi-sentient essences that seek out and merge with hosts.
* Jackie Chan Adventures on his palms whenever he starts chanting to absorb Chi.
* Jackie Chan Adventures on the wall and as a silhouette in flashback; he isn't seen in his true form at all until the end of the first story arc).

* Jackie Chan Adventures, openly identifies as being evil, as does practically every other villainous character.
* Jackie Chan Adventures: Parts of Tso Lan the Moon Demon's robes are purple, his gravity powers produce dark-purple energy, and in terms of innate elemental magic he's arguably the most powerful of the eight Demon Sorcerer siblings.
* Jackie Chan Adventures qualifies to be this as there are so many martial artists, demons, wizards, magical creatures and whatnot altogether.
* Jackie Chan Adventures - Rank's behavior (including his selling the Snake Talisman to a pawn shop) led to his being fired, and his poorly-treated cameraman Dino Stefanson is the show's new host, who deliberately left the footage in to show the audience what kind of man Rank really was.
* Jackie Chan Adventures, Ratso, and Finn rob a bank and allow themselves to get arrested so they can use the Panku Box to free him.
* Jackie Chan Adventures reminiscent of Fu Manchu in all but facial hair, but then virtually all of the heroes are Asian too.
* Jackie Chan Adventures, "Rumble in the Big House", both the Dark Hand and Jackie get themselves sent to prison. The former to release Xiao Fung, the Wind Demon, and the latter to try stop them.
* Jackie Chan Adventures, Section 13 has its agents fight magical creatures with high tech arsenal. These weapons prove to be not very effective, and as Uncle said it "Magic must defeat magic."
* Jackie Chan Adventures seems to be the only thing that keeps him alive through them.
* Jackie Chan Adventures set in. And yet, if they can be believed, each held reasonably stable jobs before turning to crime, and one was even studying theoretical physics.
* Jackie Chan Adventures, Shendu admonishes Drago for trying to take over his father's world while Drago complains about how Shendu was always off fighting wizards.
* Jackie Chan Adventures, Shendu did this to Valmont and the Enforcers after getting all of his talismans. Later in Season 2, he no longer needed Finn, Ratso, and Chow to carry the Pan'Ku box and sends them out (it is notable, though, that he lets them live at all, presumably because they actually did what they were supposed to do). Shendu tries to do this to Hak Foo, but Valmont wouldn't allow him. However, Shendu soon figured out he had invoked the trope too soon, as he still needed the box, even if just to delay his sibling's wrath.
* Jackie Chan Adventures: Shendu had to (re)build his body during the series.
* Jackie Chan Adventures Shendu, their eyes turn red whenever HE'S in control of their body.
* Jackie Chan Adventures. She's just not the type to sit still in school and do homework.
* Jackie Chan Adventures. She was afterwards recruited by Phobos, becoming cynical about trust and embittered at those she regards responsible for her parents' death, including Elyon.
* Jackie Chan Adventures shows her attending a Hanukkah party, implying that she's of Jewish and Israeli descent.
* Jackie Chan Adventures (somebody mentioning Black's injuries and/or Valmont).
* Jackie Chan Adventures, so naturally Jackie and company fight against Jade in the hope of saving her from darkness.
* Jackie Chan Adventures so she's forced to ally with the evil sorceress.
* Jackie Chan Adventures status they had in canon. Usually, it's explained that since their Mask didn't properly bond with Finn in that episode, their power and effectiveness was hindered, which isn't the case in these stories.
* Jackie Chan Adventures, stronger enemies appeared after the first season because the heroes destroyed (instead of "sealing away") the villain of the first season. This kept happening until that first villain was revived and consequently sealed.
* Jackie Chan Adventures that naturally made the bulls go around what they thought was some kind of immobile obstacle.
* Jackie Chan Adventures that occurs because of it is what kicks off the entire

plot.
* Jackie Chan Adventures that only appeared during the full moon and disappeared at dawn. If you don't make it out before then you go along with it and become bound as its guardian, forced to transform and attack any uninvited guests.
* Jackie Chan Adventures that season. Could be reached via a phonebooth elevator or "the stairs".
* Jackie Chan Adventures, the Book's guardian is left to the chamber this way.
* Jackie Chan Adventures, the Dark Hand have Jackie tied up and are trying to decide on what animal to turn him into using the Monkey Talisman. When they settle on turning him into an animal that they can eat, he tries to warn them that eating him will make them cannibals.
* Jackie Chan Adventures: The episode "Jade Times Jade" has Jade using one of Uncle's spells to create a clone of herself to stay behind while she accompanies Jackie to Japan to find The Dark Hand. The only problem is that the Jade clone accompanies the real Jade and keeps producing more clones due to Jade not applying a finishing spell. After The Dark Hand are defeated, the spell must be removed, but it will only work on the real Jade. Unable to tell which Jade is the real one (by now, there are hundreds of Jade clones), Jackie convinces the clones to identify the real Jade by saying that she will have no TV for a year.
* Jackie Chan Adventures: The episode "The Demon Behind" ends with Finn rushing to a restroom now that he's free. He wasn't unconscious, but he did have a sentient Japanese mask fused to his rear end that was controlling his body the whole episode.
* Jackie Chan Adventures. The episode "Through the Rabbit Hole" features Jade traveling back in time to Jackie's childhood in 1976. The real Jackie Chan (born in 1954) was twenty-two years old in 1976. Also, although Uncle's exact age was never mentioned onscreen, in "The Dog And Piggy Show", Jackie says that Uncle was born in the year of the dog, which would mean he was likely born in either 1922 or 1934.
* Jackie Chan Adventures. The first time a shrunken Jackie and Hak Foo have to scale the entire body of the giant Tohru. They both end up in his ear and out his nose. The second time shows features a normal sized Jackie and Valmont climbing the hoodie of Jade, who is gigantic in this scene.
* Jackie Chan Adventures: The main antagonist is a demon dragon/dragon demon named Shendu. His demonic siblings are the primary antagonists of the second season.
* Jackie Chan Adventures. The man gloats that she 'knows nothing' and Jackie cries out, "That's what I've been trying to tell you!"
* Jackie Chan Adventures: The Monkey King poses as the Grim Reaper in order to kill Jackie. While he proves himself to be extremely good at wielding a scythe, he's talked out of killing Jackie that way because "it wouldn't be very funny".
* Jackie Chan Adventures, the monks state that a great warrior will come forward to protect him until he is awakened. Jade and Uncle push Jackie forward.
* Jackie Chan Adventures, there are numerous villains with this as their goal, from the draconic Demon Sorceror of Fire, Shendu, and his siblings, to the Oni generals, to Shendu's son, Drago.
* Jackie Chan Adventures there are the Shadowkhan, demonic ninjas that travel through shadows, but have no will of their own, only acting when summoned. In season 4, it is revealed that there are 9 tribes of these shadowy warriors, with vastly different forms, each deadly in their own way, and each serving a different Oni general, and when the masks the generals are sealed in are all brought together, the generals would be able to summon enough of the warriors to make the world dark forever, and destroy ALL good magic. Luckily, the Chans stop it.
* Jackie Chan Adventures, there's the HIVE Academy like in canon, which Jade comments on being like Section 13, only with better aesthetic appeal.
* Jackie Chan Adventures, the rockets do harm neither to him or Valerie.
* Jackie Chan Adventures, the Rooster talisman becomes fused into Jade's body, giving her 'natural' telekinesis.
* Jackie Chan Adventures. The sheep talisman allows the user to astral project their spirit but this leaves their body limp and essentially comatose. Not only does this make it vulnerable to physical attack but is can also then be taken over

by another spirit.
* Jackie Chan Adventures the statues into living copy-versions of Lo Pei and said deity, complete with all the deity's powers intact.
* Jackie Chan Adventures. This happens whenever Uncle and Tohru's mom are in the same room.
* Jackie Chan Adventures. This is parodied when henchman Finn just happens to get all three of these talismans, after all twelve were randomly divided amongst the group.
* Jackie Chan Adventures (though for the sake of not altering the plot too much, he's made unable to go near the Chans or their home).
* Jackie Chan Adventures, though he doesn't seem to remember her. She's overwhelmed by outrage and grief so much that after Shendu scares the man away, she throws herself against his chest and weeps, not caring from who she's seeking comfort. Shendu takes her with him while whispering comforting words to her.
* Jackie Chan Adventures (though the flight part was caused by the rooster accompanying the pig), and also cue Billy Joe getting a big wet kiss.
* Jackie Chan Adventures. "Tiger prowls...through pudding? Turtle...fist! Sloth...kick!"
* Jackie Chan Adventures. To get around this, later episodes seldomly refer to the talismans as "The Talismans of Shendu", generally just calling them "the talismans".
* Jackie Chan Adventures. Tohru, in reference to this, becomes one briefly too.
* Jackie Chan Adventures, Tohru said Uncle's "Aieeya!" when something went wrong for him.
* Jackie Chan Adventures to not possess any hand-to-hand fighting skills and relies entirely on his magical powers. Subverted with Uncle who may not possess as much raw power as Wong, but remains a formidable combatant despite his age and frail appearance.
* Jackie Chan Adventures, to the point that even a pinch will turn him into a statue, while a drop of water will free him.
* Jackie Chan Adventures: Twelve-year-old Jade Chan is measured at exactly three feet tall in the episode "Little Valmont, Big Jade". Paco is only a little bit taller than Jade.
* Jackie Chan Adventures: Uncle and Tohru's mother. They insult each other, play mean-spirited pranks, compete with each other in everything from Mahjong, to tic-tac-toe, to shuffleboard, to arm wrestling. They even come close to blows several times, only to be stopped by Jackie or Tohru. However, they always put aside their differences and work together whenever bad guys threaten them and their family, and Uncle even bought her a Christmas present.
* Jackie Chan Adventures: Uncle reads from a scroll explaining why the Immortality Talisman is the Dog Talisman, dogs are man's best friend. Not only does the user gain eternal life, but all the strength and stamina of youth. When Uncle used it, he retained all his skill but regained his vigor. He could even eat cheese again because it wouldn't gum up his..."none of your business."
* Jackie Chan Adventures: Uncle thinks that Jade's laptop is a magic waffle iron and fails miserably when trying to sell his antiques online, destroying the laptop when he thinks it's been possessed by dark magic (due to his inabiliity to figure out how to use it.)
* Jackie Chan Adventures, Uncle, who is a real wizard and not technology-savvy, embraces the internet for the first time. After everything on the screen disappears, he concludes that the internet is evil and a creation of demons, and proceeds to literally "crash" Jade's laptop.
* Jackie Chan Adventures when he gets the first Oni Mask. Tohru, who has an immense fear of the Oni, freezes in terror before Jade tells him to snap out of it. Tohru later returns the favor when the mask is removed, and Chow flees with his tail between his legs.
* Jackie Chan Adventures when he later takes control of Valmont and Jackie.
* Jackie Chan Adventures. When Jackie is kidnapped and El Toro bravely comes to his rescue even though he no longer had the talisman, Paco respects him again.

* Jackie Chan Adventures, when Jade has to capture Tohru for Ikazuki, he stays under the shop's wards during the attack, preventing her or her forces from getting close enough to grab him, she has one of her ninjas attack Uncle, KNOWING Tohru will charge to his sensei's rescue and captures him. And keep in mind, she comes up with that plan ON THE SPOT!
* Jackie Chan Adventures: When Jade uses the Ox Talisman, she becomes very muscular, but only in her upper body.
* Jackie Chan Adventures when teamed with Jackie and/or one of Jackie's other allies, these are few and far between and he's typically not portrayed as the overwhelming powerhouse that he was as a villain in Season 1.
* Jackie Chan Adventures when the entire gang is locked up in Section 13. However, Jade pulls out a macguffin "card" that renders this trope meaningless.
* Jackie Chan Adventures where Chan is injected with a serum that will turn him to stone unless he exchanges the Talismans held in Section 13 for the antidote. While Chan is willing to suffer the consequences, Jade is not so thrilled about his decision.
* Jackie Chan Adventures, where the Monkey King makes a Hawaiian volcano erupt... with lava made out of gelatin.
* Jackie Chan Adventures. Where to begin? His siblings, Valmont, his siblings again, and Daolan Wong.
* Jackie Chan Adventures, which will wreck all of Earth's ecosystems, because he'll find the planet's landscape afterwards more to his liking. The show overall indicates this isn't in any way a necessity for him but is merely a matter of preference.
* Jackie Chan Adventures while trying to find minions. One of the applicants displays impressive swordsmanship, but when Finn is about to hire him, the man shrieks at the sight of a mouse and runs away.
* Jackie Chan Adventures who could come to life by switching places with a living being, which would then turn into a puppet in his stead while the Monkey King ran around causing trouble.
* Jackie Chan Adventures who isn't related to them but is still considered part of the family (and who has a mother you don't want to mess with). To top it off, they have equally badass ancestors dating as far back as the Old West.
* Jackie Chan Adventures, with anger making them both more powerful and harder to control doesn't help much).
* Jackie Chan Adventures with her coming back to San Francisco and arriving at the climax of the Noble Animals arc. As such, she has a season and a half of catching up to do.
* Jackie Chan Adventures with this weakness. Unfortunately, it's smart enough to destroy the bridge our heroes were about to use.
* Jackie Chan Adventures: Xiao Fung the Wind Demon can inhale or exhale hurricane-level winds through his mouth.
* Jackie Chan almost killed him when a piece of bone entered his brain when the tree limb he was hanging from broke. The list of Jackie Chan's injuries is extensive and painful.
* Jackie Chan also enjoys feeding him dirty English phrases and having him innocently repeat them later.
* Jackie Chan (Chaplin was born in 1889, two years after the movie is set), there was also Chon's sister getting attacked by Jack the Ripper, and tossing him into the Thames.
* Jackie Chan do the famed: "Double Hand Accidental Breast Grab" maneuver once per movie, or does it just seem like it?
* Jackie Chan during filming. It's easy to tell by looking at the outtakes during the closing credits, since the working title is written on the clapperboard.
* Jackie Chan. Early in the movie, Jackie distracts the thug with the gun by pulling the towel off a recently-showered Elsa, then kicks the guard unconscious. Later, when Jackie, Elsa, and Ada are in a similar situation, this time with Ada fresh out of the shower, Elsa de-towels Ada... and Jackie is just as distracted as the thug.

* Jackie Chan! (Fans outside of China got to hear him sing during the Closing Ceremony of the 2008 Olympics in Beijing.)
* Jackie Chan features a rare look at Jackie's typical happy go lucky character snapping and going to town on everyone that's done him wrong. This includes beating the crap out of people who can't fight worth a damn like a doctor and a lawyer, but they've all been such huge jerks through the whole film that it's easy to cheer him on every step of the way.
* Jackie Chan hardly ever scripts his fight scenes, preferring to turn up to the location and see what he can use. This makes his fight scenes famous for their interesting and engaging style — and also for being incredibly dangerous for Chan, who did his own stunts because when you improvise a fight scene, you can't take many more safety measures than "Try not to kill him."
* Jackie Chan has a tanker that has to be kept above a certain speed in order to stop it from exploding. Jackie Chan's character offers to take over from the driver, but changes his mind when the driver tries to explain the tanker's complex gear system.
* Jackie Chan has a truckload of boxes conveniently placed for the car to land after a double highway overpass ramp jump.
* Jackie Chan has said he learned some English from listening to American music. Country music, to be precise, since the words are generally sung more slowly and are easier to follow.
* Jackie Chan has served at times as the writer-producer-director-star-choreographer, though generally not all at once.
* Jackie Chan. He also uses this later on the water company executives who refuse to give their companies to him.
* Jackie Chan his own stunts and appears exclusively in films with high kicking action sequences.
* Jackie Chan includes this in the climactic fight scene. Widely considered one of the best fight sequences ever recorded.
* Jackie Chan is a notable exception. He started off his career as a stuntman, and having become a lead actor since then, he still does many of his own stunts instead of enlisting a stunt double (although this is less common due to his age and past injuries as of late). Jackie Chan had stopped doing all of his major stunts by the time North American audiences knew who he was, though his publicists have continued the illusion.
* Jackie Chan is a pretty rough place, if not actually criminal (in most cases).
* Jackie Chan, Jackie has a thug at gunpoint, only for an ally to knock the gun out of his hand when she opens the door.
* Jackie Chan. Jack is not really Meng Yi, and the princess who had been waiting for Meng Yi, floats away from him to die in the tomb.
* Jackie Chan movies, though outtakes show that being able to leap up a wall in three bounds does take just the right amount of momentum and angle, and failures range from hilarious to painful (or both).
* Jackie Chan movie, Who Am I?, during a street fight in Rotterdam, Jackie dons a pair of Dutch wooden clogs and literally ass-kicks some mooks.
* Jackie Chan. One is a formal, polite pianist and the other is a rough, street thief who knows how to fight. At one point, they accidentally switched places and another time, they did it on purpose to fool the enemy.
* Jackie Chan's Action Kung Fu, besides encountering goons, you'll encounter and beat the life out of a wide variety of enemies including, but not limited to tigers, crab under a rice bowl, river kappas, gameras, Surprise Fish, and so on. Animated Buddha statue too!
* Jackie Chan's Action Kung Fu can do "psycho wave" attacks for a limited number of times.
* Jackie Chan seemed to have made a habit of this. "I'msorryI'llbringitbacklater Thank YOU!" was practically a
* Jackie Chan's films is him playing a kung fu fighting cop. Jackie Chan's opponents tend to come from all walks of life, including accountants.
* Jackie Chan. Sometimes all three. Which makes sense, since the trio are trained

in the same martial arts academy.
* Jackie Chan speaks Cantonese, Mandarin, Shanghainese, Shangdong dialect, Japanese, Korean, English, and American Sign Language and also speaks some Thai, German, Spanish, Moroccan and Russian.
* Jackie Chan starred in a 1992 live-action version, which includes the famous
* Jackie Chan, the baddies are extreme sports enthusiasts and an action set piece takes place at a X-Games meeting.
* Jackie Chan, the Chinese man tied up in the "jail" is actually yelling "my butt really itches!" in Chinese.
* Jackie Chan, the race features a number of cars exploding for a variety of reasons, up to and including no reason at all. But the film's Crowning Moment of Explodium comes when Jackie's car launches off another car and flies right through the center of a wooden observation tower which, of course, explodes.
* Jackie Chan, there is a brief door scene where two goons pursuing Jackie Chan's character pop out of two different doors, see each other, scream in surprise, and slam the doors. The first thug then hesitantly opens his door. The other door pops open and out comes Jackie Chan with the second thug in a headlock.
* Jackie Chan there is a warrior who has extremely long white hair that she uses as a weapon.
* Jackie Chan unpopular in Taiwan (and even to an extent his own home town, Hong Kong), due to very pro-Mainland opinions. During some of his publicity tours, he has repeatedly praised Beijing's leadership, suggested that Taiwan be returned to mainland Chinese rule, and even accused democracy of leading to only protest and problems.
* Jackie Chan very often does his own characters in foreign language versions of his films, whether it's the Chinese dub of an American movie, or an English dub of a Chinese movie.
* Jackie Chan] was not a member of the Seven Little Fortunes. Yuen is his real surname, the Seven Little Fortunes just adopted it in honor of their teacher whose surname is Yuen.)
* Jackie Chan?) where a shopping cart plays a crucial role during a fight scene.
* Jackie Chan where he fends off an entire mob of enemies using anything and everything at his disposal, including very creative use of a folding stepladder.
* Jackie Chan where the Monkey King rolls a gigantic store donut at him, but he survives by the fact that the donut has a fake "bite" in it.
* Jackie Chan, which has a fight that goes through several different cars, including an open lumber car with tree trunks. Rollage Ensues.
* Jackie Chan, who had, for the longest time, insisted on performing all of his own acrobatic stunts in his movies.
* Jackie Chan, with his usual creative use of the environment in the fight choreography.
* Jackie Chan yelled to Fogg to stop trying to help, in the middle of a big fight with multiple opponents.
* Jackie deliberately allows an otherwise-innocent marine to be killed by defense systems in her family's Vaults, since him calling for help would lock everyone inside.
* Jackie Earle Hale, the latter earning him an Academy Award nomination.

* Jackie Gleason chose to show off his photographic memory while appearing on
* Jackie Gleason (who won six Emmys in his career) was upset that Gleason had never won the award, and locked up all of his statuettes whenever Gleason visited his house.
* Jackie has this reputation. In one episode she and her then-boyfriend, Fred, have an incident when they discuss how many people they've slept with. She estimates about three per year, which makes about sixty overall (though it's probably more—Fred just assumes she started around eighteen, while her reaction says otherwise). Fred has been with

* Jackie Kennedy had to deal at first with her husband cheating on her — this in particular may have caused her fertility problems later on, what with her having a stillborn girl and her last child Patrick dying of medical problems just two days after his birth. And then John died just three months after
* Jackie Lane both auditioned for Susan. They would both play Dodo and Polly respectively.
* Jackie-Lynn Thomas to Marco. In the first season, Jackie doesn't have much of a role besides being the girl Marco's crushing on. This is even lampshaded by Marco in the season two episode "Sleepover" when he admits he never truly to got know Jackie beyond the image of her he built up, but he would like to try. Jackie is slowly given a more fleshed-out personality in her following appearances, as she graduates to becoming Marco's girlfriend, but even with the expanded characterization, her primary role in the show is as Marco's love interest. She promptly disappears from the series as soon as she dumps him but returns in Season 4 where it's revealed that
* Jackie Mason: Jewish comedian. Is the voice of Krusty the Clown's rabbi father on
* Jackie plays First Lady Jacqueline Bouvier Kennedy, who was historically half-Irish and a practicing Catholic like her husband.
* Jackie Robinson became the first black player in modern Major League Baseball when he debuted for the Dodgers in 1947. The Yankees catcher Elston Howard was the first black American League MVP.
* Jackie Robinson is known for breaking Major League Baseball's color barrier in 1947 and being a landmark figure in the history of African-American Civil Rights. However, before that, he won four varsity letters at UCLA (in baseball, basketball, football, and track), played backfield on the school's football team, and won the 1940 NCAA Men's Outdoor Track and Field Championship in the long jump. Ironically, baseball was the sport he was weakest at in college, finishing with a .097 batting average (great hitters tend to be around or above the .300 mark). He also had a brief military career.
* Jackie Robinson Story: Someone tries to be the first of their race or sex in a field occupied solely by white males.
* Jackie Robinson, the first black player to play in the major leagues, in 1997, but allowed players who were already wearing that number to continue using it. Mariano Rivera of the New York Yankees, who retired after the 2013 season, was the last remaining active player to still wear that number.
* Jackie Robinson would be a Negro Leaguer well-known to white fans, and with a history of performance against white teams, such as Josh Gibson or Satchel Paige. Robinson was not well known at the time. But Branch Rickey knew he needed someone with the right mindset, and Robinson's exemplary performance as an officer in WWII (which included taking a stand against some racist actions) helped convince Rickey that Robinson was the right man for the job.
* Jackie Rose: Elizabeth's crew do this when one of them hears that she wants to drop out of piracy after paying off a debut to a criminal and thinks she won't give the men a cut of the profits.
* Jackie's Darkness execution moves probably qualify as well, ranging from "Wishbone" to "Throat Plunge" to tearing out a dude's spinal cord, while the poor mooks scream bloody murder.
* Jackie. She bursts into Jackie's bedroom demanding to know where he is. Jackie plays dumb but Pat realises Mick is hiding in the closet due to the smell of Daz Citrus Blast on his underwear.
* "Jackie's Strength", which is about a bride-to-be avoiding her wedding ceremony, then meeting her young self at the end.

* Jack Kirby being revealed to have gotten his technology from the Celestials in ancient times.
* Jack Kirby books were cancelled by DC. According to Mark Evanier, Kirby created pretty much the entire concept while waiting for his order at a Howard Johnson's.
* Jack Kirby (born Robert Kahn), was similarly a first-generation American of Ashkenazi Jewish descent.
* Jack Kirby clearly took place in a separate continuity at first, but later writers integrated the characters (most notably the Celestials) into the wider Marvel Universe.
* Jack Kirby created the Fantastic Four and several other characters in Marvel, so to them, Jack Kirby IS God. And since he did the same for several characters over at DC, so perhaps over there he is also God.
* Jack Kirby design Marvel had asked him to create in the event that the company lost ownership of the character.
* Jack Kirby in his DC days) and his incredibly forthright and moral personality, with his strident antifascism being a major theme of his stories.
* Jack Kirby is actually relatively handsome compared to Desaad or Dan Turpin, both of whom fell into the "kill it, kill it with fire" category.
* Jack Kirby, it inspired many future creators to push the classic tropes and iconography of the superhero genre in bold new directions, often in ways that challenged the fundamental underpinnings of the genre.
* Jack Kirby Kirby and Simon also co-created... the romance comics genre.
* Jack Kirby live on, as does Ditko's creations for Charlton under their current DC home.
* Jack Kirby made sure to revive this when he did his run on Eternals.
* Jack Kirby published the first two issues, with many of their top artists (Todd McFarlane, Erik Larsen, Jim Lee, Jerry Ordway, Jim Valentino and Keith Giffen, among others) inking Kirby's pages. The story arc was finished by Kirby collaborator Greg Theakston.
* Jack Kirby run, which saw the title character fight to save Earth from the Celestials.
* Jack Kirby's Galactic Bounty Hunters, where Tyr looks like a Mr. Olympia contestant but his fiancée is fat, smelly, and very ugly. They're aliens and from the way he acts, she seems to be attractive by the standards of his race.
* Jack Kirby, spending his final years dabbling in animation and creator-owned comics. In the 1980s, he met future star cartoonist James Romberger during a New York convention, and after being impressed by his work gave this advice:
* Jack Kirby stories. It didn't work, and the title was cancelled after just seven issues.
* Jack Kirby) that even remotely was inspired by his work. There is still some ongoing litigation however.

* Jack L. Chalker speak in rhyme. He keeps a guy called Porange Chilver around as insurance, in the case he accidentally ends a sentence with "orange" or "silver".
* Jack Lemmon, starred Matthau. After both actors passed away, they were even buried in the same graveyard, near each other.
* Jack Link's Beef Jerky's "Messin' with Sasquatch" series has a few guys
* Jack London definitely invokes the harsh conditions of sailing vessels, as told through the point of view of a gentleman, rescued from sea and force to work upon the ship.
* Jack London for the rest of the episode, and gives Murdoch back his badge when Murdoch's about to return to Toronto. Murdoch unwittingly returns the favor when he uses the phrase "the call of the wild", inspiring Jack to write the book of the same name.
* Jack London from taking over the world is the bombardment of Chinese cities with glass tubes containing "every virulent form of infectious death," which exterminates the Chinese population in six weeks.
* Jack London is famous for his adventure stories set in the 19th century American West.
* Jack London once gave a friend who had been out running a glass of kerosene instead of water, causing the friend to suffer burns in his throat. It was presumably by accident.
* Jack London's stories set in the Yukon, salmon is mentioned repeatedly as mainly fit to be sled dog food, while actual settlers and Gold Rush pioneers pay exorbitant prices in hard-dug gold for any non-locally manufactured food such as eggs. And the demand that the employer not feed them salmon more than two times a week was fairly standard for hired hands seeking employment in 18th century Russia.
* Jack London takes particular care to describe what happened to the dogs as they slowly became feral again: "A strange thing was what was taking place with all the domestic animals. Everywhere they were going wild and preying on one another. [...] Nor were the dogs long in adapting themselves to the changed conditions. There was a veritable plague of dogs. They devoured the corpses, barked and howled during the nights, and in the daytime slunk about in the distance. [...] The dog [...] always was a social animal, and this was true before ever he came to be domesticated by man. [...] Well, all the small dogs, and the weak types, were killed by their fellows. Also, the very large ones were not adapted for the wild life and bred out. As a result, the many different kinds of dogs disappeared, and there remained, running in packs, the medium-sized wolfish dogs that you know to-day."
* Jack London: White Fang barks only once in the entire novel, to alert the humans to his master's peril.
* Jack Marston hunts down and shoots Edgar Ross dead for the betrayal and murder of his father.
* Jack McCall was found not guilty of murdering Wild Bill Hickock, despite doing it in front of several witnesses. However, the court his trial took place in was set up by a town illegally settled on Indian territory, so it had no authority. This allowed him to be tried again in the Indian territory court, without violation of double jeopardy under the Fifth Amendment of the US Constitution. He was convicted by the jury and sentenced to death. His last words before hanging were in response to a question why he shot Hickock, a famous gunfighter who had out-drawn everyone who ever faced him, in the back: "I wasn't looking to commit suicide."
* Jack McCoy is an expert at coming up with creative "legal theories" usually involving a defendant's actions being legally reinterpreted to make them guilty of a legal statute that wasn't obvious before or coming up with a new theory of the defendant's motive to sidestep some
* Jack McCoy is probably the most prominent of them, with his methods letting him skirt into
* Jack McCoy set a witness up to be Perry Masoned by the defense counsel in the episode "Homesick."
* Jack McCoy's zealous prosecution of a drunk driver who killed three people

— the man's actions are reprehensible, certainly, and fully deserving of a harsh prison term, but McCoy tries to prosecute the crime as the
* Jack McDevitt, an ancient alien satellite that has already mysteriously destroyed one ship is being much more carefully investigated by a second when the ship begins to come apart. It turns out that the satellite uses grey goo to repair/replicate itself, and the ship is being eaten. Several people die, and one, the artist with a big crush on Hutch, is rescued just in the nick of time.
* Jack McDevitt, feature a mild version of this. Coastal areas are shrinking, deserts are growing, famines and foot riots are common. But it's not uniformly bleak: Canada and Siberia are becoming temperate, and are stepping up their food production. Nevertheless, much of the world is in a horrible state, and things look to be getting worse, and so far, only one potential new colony world has been found.
* Jack McDevitt has this. The AI computer running the city of Chicago is still up and running many, many years after a plague kills off much of humanity. Also the automated security system of a bank.
* Jack McDevitt: In the early novels, Hutch finds being an Academy pilot a serious obstacle to long-term relationships. It's not that she doesn't want a relationship, but things just don't ever seem to work out. She's even contemplated quitting, or moving to a desk job, but somehow, that never seems to happen.
* Jack McDevitt loves to do this, often interrupting the action to do so. In
* Jack McDevitt more advanced than any other species around. They left the monuments for which they're named on worlds all around the local part of the galaxy, including the one on Saturn's moon Iapetus, which was the first evidence we found that other starfaring races existed, but their civilization eventually collapsed, and they went extinct thousands of years ago.
* Jack McDevitt series) is about a last-minute xeno-archeological expedition to a doomed planet that is about to be hit by a large rogue moon. The team only has three weeks before the planet-shattering kaboom, so it's important that nothing goes wrong. Of course...
* Jack McDevitt series, personal deflector shields have basically replaced space suits. They use more energy than a passive suit, but are much less bulky and obtrusive.
* Jack McDevitt sometimes mentions development of anti-gravity and that this would be a logical development of that).
* Jack McDevitt was actually a messenger sent by an alien race to humankind.
* Jack met his wife, Sarah, when he operated on her following a near-fatal car accident. He promised her that she would be able to dance at her wedding, despite the prospect of paralysis; when her fiancé left her and she miraculously recovered, Jack married her. However, his devotion to his work ended up destroying their marriage.

* Jack Nicholson after he almost faints in front of her, weakened by the changes he's suffering. Is totally unintentional on his behalf, albeit maybe motivated by his new wolf instincts.
* Jack Nicholson is likely the all-time Hollywood exemplar. Kim Basinger once called him "the most highly-sexed individual I have ever met."

* Jack Nicholson, leading to Jack and Miloš speaking through the cinematographer and Jack not contributing anything to the film's DVD special features. The cinematographer in question, Bill Butler, was himself a replacement for Haskell Wexler who had quit the movie due to - you guessed it - "creative differences."
* Jack Nicholson's imitation of him than by the vocal nuances of Nicholson himself.
* Jack Nicholson, started to mock Batman's choice of words of explaining this fact, and dares to say "How childish can you get?!" when summing it up.
* Jack Nicholson was given only the note, "Jack is not working," from which he derived the scene where he throws a tennis ball around.
* Jack Nicholson was originally cast as Johnny May. He chose the smaller role of Gino because it paid more.
* Jacknife: De Niro plays a Vietnam vet who has come through reasonably well, although things could be better. However, a comrade of his that he runs into that begins the plot hasn't done so well.
* Jacknife is absent from "The Budding of the Warbuxx", "Stingstress" (that features his female counterpart) and "Last Pack".
* Jack Noir, destroys a universe from the outside shortly after that universe was created. At the "same time", the Scratch is initiated to reset said universe, while Jack's past self in the future of the same universe is trying to escape from its destruction. This universe then explodes at the "same time" as another universe, even though the second universe existed before.
* Jack Noir is implied to be this. He's compelled by general bloodlust, but he seems invariably drawn to fights that will challenge him most.
* Jack Noir. Specifically, they are considered to be in a kismesissitude, a sexual relationship based around hatred.
* Jack Noir, the Sovereign Slayer, but he does get his hands dirty occasionally, such as attacking Rose or stealing the MEOW code from Dave's room.
* Jack Noir was originally this, stating that he'd rather gut someone than do paperwork for them that he doesn't feel like doing. This is dropped when he later goes on to be the
* Jack of all people went through this in season seven as well. He winds up getting infected with a nerve agent which leaves him heavily sidelined and unable to join in on the action. He still appears in every episode, but doesn't really do much aside from getting sicker with each appearance. Probably the biggest acknowledgement of this are the show's recaps at the beginning of each episode, which for the first time in its history don't explicitly feature him.
* Jack-of-All-Stats: A character whose strengths and weaknesses are equal; s/he is adequate at everything and the best at nothing.
* Jack-of-All-Stats design that was even more powerful than the Gundam itself.
* Jack-of-All-Stats: they may lack the coolest, or strongest moves, but are fairly good at most attributes, and lack the glaring weaknesses of other character types.
* Jack-of-All-Stats with interchangeable weapons, although most of the time it won by pushing over robots into arena hazards. It was Season 6 champion and did very well in practically every other tournament it entered, but among fans it has a somewhat negative reputation for being uninteresting to watch. Hey, you gotta be a showman as well as a winner.
* Jack-of-All-Trades: A character with all the basic skills and is able to do a little bit of everything.
* Jack-of-All-Trades and a rictus grin during the experience, but all of this takes place while Jack and his English genius-girl partner are rescuing Benjamin Franklin. You know, the guy with the kite and the key in the rain?
* Jack-of-All-Trades it's used by Jack and the President's Niece to escape the French in Canada, and the young woman's dress balloons out like a parachute.
* Jack-of-All-Trades, Jack and Elaine have to pose as lovers when infiltrating Marquis de Sade's BDSM-themed island resort. They also have to adapt a dom/sub relationship.
* Jack-of-All-Trades, Jack is warned urgently by Croque, not to comment on Napoleon's height. The audience is led to believe that it will lead to this trope,

but Jack's tell-it-like-it-is nature turns it, and he comes right out and calls Napoleon shorty.
* Jack-of-All-Trades scene the masked hero tosses a coin to a flunky, saying it's for the broken window.
* Jack-of-All-Trades's niece, whom he'd been sent to rescue. However, he will never force himself on any woman nor will he stand idly by while a woman is being abused, usually donning his Daring Dragoon outfit. Additionally, while he's clearly attracted to Emilia, he will not ruin their relationship and partnership by taking advantage of her while she's under influence. A memorable scene involves him tricking an attractive undergarments seller to model for him, claiming that he's picking out an intimate gift for his wife for their anniversary. He does end up buying one of them at the end of the episode... as a wrapper for the real, much more romantic, gift.
* Jack-of-All-Trades the idol the whole time, which was the real reason she was panicking as the water level lowered.
* Jack-of-All-Trades, there was no Louisiana Purchase. Napoleon lost all the territory in a card game with the Daring Dragoon.
* Jack-of-All-Trades ursa with an ashen coat that mixes those of its parents. Also nicknamed "grolar bears", they've become more common as populations of both species decline and females are unable to find mates of their own species.
* Jack of All Trades used this trope quite extensively, to the point where nearly every sword fight (and there were a lot of them) was ended not with a stab wound, but with a punch to the face.
* Jack of Blades is one of three demon-like creatures from the Void and was old before the world was made.
* Jack Of Fables introduced us to Lady Luck during his stint in Vegas. She lost a good chunk of her powers due to a soured romance and regains some of it when she eats the brains of high-rollers.
* Jack of Fables. Jack has been consistently losing but manages to win the final hand of a high stakes poker game because of his power to summon all four jacks in a deck of cards at will.
* Jack of Fables knows that he is part of a comic book, to the point where he chastises Jack and Wicked John for interrupting his story "that shouldn't have taken more than two pages is now going to have to be continued into the next issue" and worries about losing readers because of their bickering.
* Jack of Fables makes a deal with the devil to the effect that when he dies he won't go to hell. He assumes that means he'll automatically go to heaven. He's wrong, and is doomed to spend eternity wandering as a headless corpse. He gets better -by making another deal with another devil. It doesn't end there. Related to a form of the old Jack O'Lantern story.

* Jack pretended to be Janet's husband twice, once to please her parents and another time to placate Chrissy's father. He also pretended to be Terri's husband to help her get a promotion and ward off the advances of her lecherous boss.
* Jack: Pride/Vanity is a minor antagonist. As a punishment for some undisclosed Pride-themed crimes she is disfigured beyond description (think of being literally turned inside out and left that way) and is obsessed with looking beautiful again. Her preferred method is to skin other Hell-denizens and clad herself in their hides.
* Jack pulls his coat in a similar manner in "Oggy's Night Out", revealing he has a bunch of combs. He uses one and combs his head fur with it.
* Jackrabbit Messiah of the heroes. Her reaction when another character points out she's been shot?
* Jackrabbit was trained in and given the use of super speed and is a formidable threat because of it. Take away that

* Jack Rakan certainly likes "collecting" panties, much to the consternation and mortification of Fate Averruncus'
* Jack Rakan defeats two female mages by stealing their panties, then flipping their skirts whenever they tried to attack or cast a spell. He later begins a repeat performance when he's taking on all of Fate's Minstra Magi at once and it works for a while before they start taking on different physical forms that render the fact they're
* Jack Rakan demonstrates this ability too. He can use high-level Shinmeiryuu techniques from simply having seen Eishun perform them.
* Jack Rakan has a scar on each arm. We find out in a flashback that he got these
* Jack Rakan is also effectively invincible. To the point where the only opponents who have ever given him trouble are Nagi (who's
* Jack Rakan is thought to be this by many people, and at first glance he doesn't appear to do anything more than just hit things really hard. However, he's
* Jack Reacher, already listed in the film section, about a former ex-military who the author describes as "an unstoppable force".
* Jack Reacher" and Reacher's superiors ordered him to stop investigating as they didn't wanted that to come to light. Reacher suspects that he has become a Spree Killer. However, it turns out he is being framed and specifically asked for Reacher to investigate because he knows Reacher will realize its not him.
* Jack Reacher, as being the biggest man in the book. This is consistent with Reacher's nearly-effortless thrashing of anyone dumb enough to ignore this trope, although some of his combat prowess does come from skill and experience.
* Jack Reacher. A witness has supposedly 'left town', but Reacher comments that you don't normally pack your shower curtain when you do.
* Jack Reacher can't afford her she gets even more offended, and Jack laments that an actual hooker would have gotten the joke.
* Jack Reacher demands that he chew off his fingers, as he has done. The guy can't bring himself to do it and is shot.
* Jack Reacher frequently features veterans engaging in criminal behavior. Reacher doesn't take kindly to this, and the novel usually ends with him beating the unholy hell out of them.
* Jack Reacher from Lee Child's books. After spending his life traveling the world with the army and living overseas for most of his life, he chooses to become a drifter to see America. He never intends to make connections or put down roots, each of his adventures takes place in a different location, and he never buys anything he can't throw away.
* Jack Reacher good and ready, he'll just cut his losses and hand everything to the FBI.

* Jack Reacher. He changes clothes a few times in the second film, but has just the one outfit in the first. Lampshaded by Helen Rodin:
* Jack Reacher in particular has several shots that seem designed to show that he, not a double, is the one driving.
* Jack Reacher in the novels is a burly 6'3, while Tom Cruise is a compact but toned 5'7, but he utterly nailed the role in
* Jack Reacher: Inverted when a former sniper is accused of going on a killing spree. He's badly beaten in prison and experiences amnesia about the last several days, not remembering the incident. The titular character has already determined that the sniper was set up, since no professional sniper would pick that parking garage and would, instead, shoot from a van on the nearby bridge. When the accused finally regains consciousness and freaks out because he believes himself guilty (he previously did go on a killing spree while in Afghanistan but got off because the men he killed turned out to be rapists). The DA shows him pictures of the area and asks him how he would have done it. He gives the same reply as Reacher, confirming to the DA that he didn't do it.
* Jack Reacher is described as being a sociopath who went out of his way to kill civilians in Afghanistan.
* Jack Reacher: Never Go Back is set on Halloween night. On a meta-level, the film was released ten days before the holiday.
* Jack Reacher: Never Go Back, Reacher takes down a group of thugs outside a diner in a small town as a gambit to take down the corrupt sheriff in the town by drawing him out to the crime scene.
* Jack Reacher often gets into situations where violence is the only option. Just as well: he's six foot five, built like a brick shithouse, well-armed, and has no sense of remorse, really.
* Jack Reacher). Reacher asks if Gunny can't shoot out the lights, but that would only expose his position before all the lights were knocked out.
* Jack Reacher, the character Lee Child's Reacher novels are based around. A freelancing drifter who solves murders, and various other mysteries, living off a payout received at the end of his military days, and money obtained from bad guys or in gratitude for solving cases.
* Jack Reacher: The Reacher brothers followed their Marine father from base to base.
* Jack Reacher, the titular hero takes out the bad guys guarding a building where he assumes a hostage is being kept, only to find out the building is empty and the hostage is in another building close by.
* Jack Reacher, with emphasis on the load part. Scenes of the killer using a reloading press to handload his ammunition are intercut with the sniper carrying out the murders that set forth the plot.
* Jack reading comments that have "defiantly" in place of "definitely"
* Jack realizes (if you tell her you're not just interested in sex) that she's got a boatload of issues and expects you to walk away.
* Jack Reese and Donna Moss. In season Four, Donna begins dating a military aide and guilts Josh into helping her get him. Josh is still in denial of his feelings for her but still undergoes an 'ew awkward' moment indicative of his deeper feelings for her. Regardless, Josh ultimately winds up alternating between sympathetic supporter and saboteur, depending on the situation. They break up when Jack is transferred and he uses Donna as cover to make spiteful comments about the White House.

* Jack rides up the elevator to the top of city hall to face the final boss in
* Jack Ross, a black jazz singer. When Jack comes to Downton, Carson is rather awkward around him and makes rather innocently insensitive comments, but the Crawley family is accepting and enjoys his singing at Lord Grantham's party in a manner that is unrealistically blasé. Only Edith and Rosamund voice any kind of realistic (for the period) concern about his presence, but both Robert and Violet are unfazed, in spite of Violet's established patrician ideals.

* Jack Ryan into place. He's promoted to flying the President around by the next book.
* Jack Ryan kilometers away, using satellite imagery and AWACS to guide them in the rest of the way. Since AA and SAMs don't have the same range, the enemy doesn't even have a chance to know the attack is coming, much less defend against it.
* Jack Ryan novels, several Soviet defectors are given new identities.
* Jack Ryan's comparison of Soviet and American missile submarines ("theirs" and "ours") in the novel likewise leaves much to be desired. Most Soviet missile submarines had the same configuration as their American counterparts, it's the Typhoons
* Jack Ryan series, Jack Ryan Jr. eventually joins the CIA like his father, while Sally goes to medical school like her mother (the same one, to top it off).
* Jack Ryan: Shadow Recruit. Given how proficient he is in a firefight, it's likely he was a Navy SEAL.
* Jack Ryan: Shadow Recruit, Jack Ryan joins the Marines not long after the 9/11 attacks. The movie is also about trying to prevent a terrorist attack on New York.
* Jack Ryan: Shadow Recruit, Ryan is an analyst who examines the stock market and other financial transactions for links to terrorism.
* Jack Ryan: Shadow Recruit: Takes place during the aftermath of the September 11, 2001 attacks.
* Jack Ryan, the title character begins his career with the CIA as an analyst looking for financial transactions that may be linked to terrorism, before his findings force him into the field.
* Jack Ryan to be the power behind the throne in Beijing, controlling government policy through his relations with the military, state security, and the puppet Premier.
* Jack Ryan which happens to be a multinational force of some of the baddest asses from the world's most deadly special forces units, albeit presented in a very realistic and very mortal fashion.
* Jack Ryan while disguised as a bum. Had he not accidentally walked onto the scene of a totally unrelated mugging and left behind a wine bottle with no fingerprints on it, the police might not have realized how he was operating.

* Jack's brother Gray has Jack buried alive sans coffin; bear in mind Jack can't die.
* Jack's comments about their relationship brushing off Kent as a physical thing, while Kent is still in love with him. That added to the rise in popularity of Kent/Tater made a lot of people interested in his side of the story, but since the plot takes place from Bitty's point of view, and he can't stand Kent, he doesn't really get any focus.

* Jack's Magic Beans takes place in the same universe as "Purple Reign", but this time, the Hate Plague has no detectable cause and doesn't appear to affect animals or people who take Prozac.
* Jack's method of getting down from a ship's yardarm: rope. Davy Jones' method: jump.
* Jack sometimes beats his daughter Claire or his wife when inebriated. When we first see Emily at the animal shelter, the left side of her jaw is bruised.
* Jackson and his group were probing Federal lines very late at night some days into the Battle of Chancellorsville. As they returned, a Confederate picket line encountered them and opened fire. They tried to call out that they were firing on their own men, but the picket officers claimed it was a Yankee lie.
* Jackson attracted a lot of this sort of thing: the election of 1828 saw the issuing of the
* Jackson, became its master with the same gesture sans glass between their palms, it appears that the glass is only a physical barrier and has no effect on the metaphysical aspect of the moment.
* Jackson Brice's supervillain name is changed from Montana to Cowboy for some reason.
* Jackson Browne had a cover design styled after a water bag, with the words "Saturate Before Using" on it. Fans began to refer to the album as if that was the title. When it was issued on CD, "Saturate Before Using" was printed on the label and the spine, making it the title.
* Jackson Browne; it's pretty blatant in the chorus. "Rosie, you wear my ring" and "I got to hand it to me" indeed...
* Jackson Browne might as well be the theme song to this trope, as the subject of the song is a woman so beautiful that "all the guys on the corner stand back and let her walk on by," too intimidated to make a move.
* Jackson Browne's song "Cocaine" has a line that goes "Son, it says here you're

27, but that's impossible. You look like you could be 45," due to the protagonist's cocaine use.

* Jackson Pollock did this to the dinner table in November of 1950. He was angry at Hans Namuth for ordering him around so much for the colour film they had been shooting and just finished, and also had his first drink of alcohol after two years of being sober (followed by several more). Drunk and angry, he eventually flipped the table much to the shock of the dinner guests. Bonus points for Thanksgiving dinner being on said table at the time he flipped it.
* Jackson's chart displacement in the UK is even worse. Despite being as huge there as he was in his home country, he had only three number ones there in the 1980s: "Billie Jean", "I Just Can't Stop Loving You", and "One Day In Your Life" - the latter by far his biggest seller of the decade, despite being a 1975 recording put out by Motown (whom he was no longer with) as a blatant attempt to cash in on the success of

* Jack's roommate Clay is revealed to be one of these. Like the myths, golems in the show are brought to life by creating a construct from clay, mud, or metal and inscribing אֱמֶת on the forehead, and rendered inert by erasing the full word. Metal is said to be a double-edged sword, as it would be difficult to engrave but even more so to erase.
* Jack Staff is Tom Tom the Robot Man, a towering, super-strong robot with the power of flight. It's a genuinely bizarre and unexpected moment when it's discovered that "he" is effectively a suit of powered armour being piloted by a disabled girl genius to fight crime.
* Jack Staff". This is a particularly lax example as the rightsholders seem to have no problem with the early issues in which he is explicitly identified as the Spider still being included unaltered in the TPB collections.
* Jack Staff with General Tubbs, an autistic boy who mobilized his toy army with his psychic powers; the control panel keyboard glove thing was just so he'd have something to do with his hands.

* Jack: The American Ghost: Cindy’s obsession with Jack, Jack’s obsession with Misha, and Aidan’s feelings for Go-Eun.
* Jack: The American Ghost despite not knowing who she was or what she looked like.
* Jack: The American Ghost Hoo boy, Cindy is one crazed fan for Jack. Every motivation she has revolves around him. She even summons his ghost at one point.
* Jack: The American Ghost: The main character, Go-Eun, doesn't feel things very strongly, and can keep a cool expression in even the most frightening situations (although even she has her limits). It's to the point some characters call her scarier than any haunted house. Although, she does begin to eventually express herself more and more as the series goes on.
* Jack: The American Ghost to bring him back to life so he can be with Misha. Possibly subverted, as Go-Eun notes it’s not love but obsession.
* Jack, the Arc Debs involve an alien race who plan on invading planets, and they have no known reason for doing this. They also ruthlessly kill the soldiers stationed there during the story. Probally one of the worse parts was when they gunned down an Injured Arthur Sullivan for several SECONDS straight. In other words, they're genocidal assholes.

* Jack the Giant Slayer: Roderick is dead, the princess is saved, the beanstalk has been chopped down, stranding the giants in their land... Shame on you if you expected the movie to end at this point.
* Jack the Giant Slayer Stanley Tucci is in non-stop ham mode as Roderick. For the giants, being hammy is almost a requirement.
* Jack the Giant Slayer: The castle portcullis consists of two metal gates that slide together — which means it takes longer to close, and is much easier to force open, than a normal portcullis.
* Jack the Giant Slayer the majority of the guardians who climb up the beanstalk to rescue Isabelle don't even make it up the beanstalk before facing their demise. All the others are killed by the giants quickly. Doesn't help that most of the Guardians are wearing red shirts.
* Jack the Giant Slayer: This happens to Elmont as the giants are preparing to eat him.
* Jack "The Hat" McVitie in the Peter Medak crime film "The Krays". Screaming in terror, then begging and blubbering, and none of it did him any good.
* Jack, the lead character of the arc "The Games We Play in Hell" uses a knife-hand (this being, as per the arc title, in hell) to silence her alarm.
* Jack The man agrees to keep quiet because he wants to save his wife. In a bit of karmic backlash, his wife is horrified when the man admits the truth and the stress kills her. The man has to endure Purgatory and at least one more life filled with hardship and pain before he can be reunited with her. In fact, this is why the doctor chose him to be his assistant. Someone who didn't have this kind of motivation would have reported him in a heartbeat.

* Jack the Ripper being English (as Old English was the language of his main enemies, Arthur's would have been either a variant of 5th/6th century Latin or Common Brittonic), is perfectly justified.
* Jack the Ripper, in the same sort of ritual that later created the Boogeyman.
* Jack the Ripper is commonly considered the Ur-Example of the modern serial killer; before that it was all people who were just bloodthirsty and had excuses for getting away with it like being at war, or being a person in a position of power who liked to watch people die.
* Jack the Ripper is to invoke this. Anyone who fights Assassin and survives the fight quickly forgets all details of their opponent, so they cannot describe Assassin to anyone else, or recognize Assassin should their paths cross again. This stems from the fact that the powers of Servants are derived from their legends, and a key part of Jack the Ripper's legend is the fact that Jack was never conclusively identified.

* Jack the Ripper later on when Abberline congratulates another sergeant on making a good cuppa.
* Jack the Ripper may have sent half a human kidney to the head of the Whitechapel Vigilance Committee, George Lusk. The letter sent with it alleged that the kidney had come from the body of Catherine Eddowes (the Ripper's fourth victim); the other half, the letter alleged, he had fried and eaten.
* Jack the Ripper Murders. No one ever knew who was the killer in each case.
* Jack the Ripper, "One frightened theatre-goer wrote to the police accusing Mansfield of the murders because he could not believe that any actor could make so convincing a stage transformation from a gentleman into a mad killer without being homicidal."
* Jack the Ripper performs the British variant at the end of his second verse.
* Jack the Ripper. So long as they exist, the Ripper can never be truly destroyed.
* Jack the Ripper, would find them sick and appalling. In his last line he also claims to be more terrifying than the 7/7 bombers.
* Jack, the titular grim reaper takes the souls of 5 people killed in an explosion, and leaves it to them to find out who planted the bomb. Given the way the story was resolved it seemed likely that Jack was doing it in order to give some of them (particularly an individual in the group who had already suffered loss as Jack took someone he loved in a previous arc) a chance at last-minute redemption and closure that if he just took them as is more would have gone to hell than actually did. Character development by that point had him doing what he could to help souls escape damnation and since he had already had 'monitors' following him around decided to put them to a positive use with their ability to create temporary zones like was done in that story.
* Jack the twin demonic personifications of Gluttony often share the same body with one in control of it and the other's face sticking out of the crotch, switching seemingly at random.
* Jack thinks the bullies are really scared of him after he defends the princess. But its the Elmont and the Royal Guardians they're scared of, and he realizes it.
* Jack Thompson is a self-appointed crusader against video games, and apparently blames them for every evil affecting American society except possibly global warming and the common cold. Before that he was involved in efforts to censor music, specifically rap. He has a history of rabid overreaction to his pet issue-of-the-moment, vitriol towards more rational persons on
* Jack Thompson Jack Thompson) in a bar giving the punchline "Now we can all get some sleep!" to uproarious laughter.
* Jack). Though only in the "6 to 9 hours of unconsciousness whilst occupying the same bed as..." sense.
* Jack up with Phlebotinum: Accidentally using what a person thinks is a drug they crave, only for it to go wrong.
* Jack, utterly perverts this in the form of his relationship with his grandmother. Her constant emotional and sexual abuse towards him as a child shaped him into becoming the sadistic rapist we met him as, so it's no surprise she ended up in Hell, too. She's now imprisoned in a wall of Drip's infernal lair, but that doesn't stop her from continuing the same abuse — all of it — right where she left off, nor does it make Drip any less cowed by her.
* Jack Vale Films has a prank involving using a fake spider to scare people with.
* Jack Vale Films has a recurring prank called "I'm Not Gay", where Jack acts as though random men are hitting on him and tells them he isn't gay.

* Jack Vance And then it turns out he in fact hated their family to the point of deliberately allowing her brother to be horribly injured and only claimed credit for the deed later.
* Jack Vance argue with elves, or rather the sprites of the Green Plane, and makes himself such a nuisance to them that they eventually give up and teach him Green magic, although they repeatedly warn him it's a terrible idea. They were right: it turns out that human beings are just too primitive to ever become competent in Green magic... oh, and once exposed to the indescribable beauty of the Green plane, no human will ever again be content with anything on Earth.
* Jack Vance (by combat) ends with a very angry Reith repeatedly smashing the alien's head against a sidewalk.
* Jack Vance deals quite a bit in the fairy world. One character is a human who was raised among fairies and is kicked out to return to humanity when he's an adolescent. Fairies tend to be whimsical, mercurial, and occasionally malicious, but they can be helpful as well under the right circumstances.
* Jack Vance features Myron Tany, a wannabe bold explorer who lucks out when his great-aunt, Dame Hester, receives a spaceship as part of a legal judgement and reluctantly agrees to let him use it. Unfortunately for Myron, Dame Hester insists on coming along.
* Jack Vance has an interesting variation: Vagabond Cugel is sent on a quest by a wizard to retrieve a magical artifact; and to make sure the reluctant Cugel returns, the wizard makes him swallow his Firx, an enchanted sea-urchin creature, which keeps stabbing Cugel in the stomach every time the sulky young man stalls or tries to get out of the situation.
* Jack Vance — the boy Dhrun is given a talisman to avert fear, which in fact means that whenever he feels afraid, he misinterprets the emotion as anger and is able to be brave. In a crisis, he often reflects on how fortunate it is that he can't feel fear, because he should be terrified at that moment. The talisman eventually gets broken and replaced with a regular stone, but it continues to work until he realizes the replacement.
* Jack Vance novels is described as being a very large lady but considers herself to have a "fashionable figure" nonetheless. It's unclear whether other people think so or not.
* Jack Vance novels mention the Spell of Forlorn Encystment, which keeps its victims alive indefinitely inside solid rock some sixty kilometers underground. A few victims are accidentally released and found to be in near-catatonic states.
* Jack Vance series, a mugger tries to waylay Howard Alan Treesong. The problem is, he's just waylaid the Lord of the Overmen - king of all criminals - who has licensed all criminal activity in the sector... and this mugger isn't one of them. Bad move.
* Jack Vance series, related in a variety of styles: rhapsodising second-hand accounts, world-weary first-hand witnessing, and didactical narrative.
* Jack Vance series, the earthman protagonist encounters transplanted humans living side-by-side with (and frequently dominated by) several species of sapient bona fide aliens on the titular planet.
* Jack Vance series, the planet Tschai is full of different peoples (some descended from transplanted humans, some not), tribes, lands, and regimes. They all have their own cultures and political structures, ranging from the nomadic Emblem Men to the repressive underground Pneum, as well as those exiled Pneum who have been cast out of the underground and live on the surface.
* Jack Vance's Gaean Reach stories used the Interworld Police Coordination Company. It started as a private firm to exchange information about criminals between planetary jurisdictions, but eventually grew to a level of authority where a senior IPCC representative felt himself justified in summarily executing several corrupt local cops.
* Jack Vance, ships are powered by large worm-like sea creatures bound to either side of the vessel. Bait is hung in front of the ship to make them move.

* Jack Vance. Since the stories are set in a globular star cluster, stars are visible during the day on every planet.
* Jack Vance's murder mysteries is driven by this: a daughter of a respectable family turns up pregnant, the town gossip sees her mother buying pregnancy-related supplies, and the mother resorts to faking her own pregnancy (as well as murder) to cover it up.
* Jack Vance's novelette "Rumfuddle" is about manipulating parallel histories for laughs; in one resulting timeline, all the top Nazis work at a kosher resort hotel. The protagonist and his wife turn out to be alternates of child-killers Gilles de Rais and Elisabeth Bathory.
* Jack Vance stories, the planets of the Allastor Cluster all have numerical designations as well as names, so Allastor 933 is also Marune, planet 2262 is also Trullion, 1716 is Wyst, etc.
* Jack Vance stories. They do their best to subvert the orders of the Arch-Magicians that control them.
* Jack Vance trilogy, the protagonist Aillas falls in love with the haughty viking-like maiden Tatzel while being a slave at her father's castle. He escapes, comes back as a warrior king, kidnaps her, and undergoes many adventures together with her, saving her life several times. Throughout he acts as the perfect gentleman, not taking advantage of his power over her. At one moment she actually offers him sexual favors in exchange for her liberty - but Aillas, wanting a love she is unwilling and unable to give him, declines the offer and sets her free anyway. Finally, when Aillas brings his army to assault the castle, Tatzel takes up a bow and arrow and dies among the last-ditch defenders. The victorious Aillas sadly refuses to look for "the body of the valiant maiden" among the scorched bodies in the ruins of the castle and goes on to find another and more rewarding love.
* Jack Vance, T'Sain and T'Sais are some kind of magically created human being.
* Jack Vance we learn the exact layout of Suldrun's garden, the names of the plants, how it looks at several times and day and times of year. For the grand plot it would suffice to simply confine Suldrun to her garden. Vance will build up a history, a religion, a race, a river or a plain, never necessarily needing it to advance the core story.
* Jack Vance without breaking a sweat. A few chapters later, a bystander comments that he's a "demon with a sword."

* Jack was about a boy that ages four times faster than normal, with him having the body of a 40-year-old with the mental age of 10.
* Jack was threatened by the Army buddy he got to help track down Siri with revealing how much he screwed up letting her escape, so he'd give more money.
* Jack Watling (Professor Travers in the Great Intelligence stories "
* Jack Webb (1957). A noteworthy example because he makes it a point to never physically assault or swear at his troops, despite being very tough and demanding. The film was produced in response to a scandal over a training mishap where several Marine recruits died and was shown to Marine Drill Instructors to serve as an example of how they should behave.
* Jack Webb production. When an exception shows up, it's usually the main characters who have to catch or stop him.
* Jack Webb usually had two or three shows on the air at once, and was often trying

to pitch more that were either new concepts or spinoffs/sister series of his previous shows.

* Jack, which slowly bends until it touches the treehouse, and then everything falls apart.
* Jack White features this prominently in the second half of the song.
* Jack White is also an upholsterer. And since this is Jack White we're talking about, he's hidden vinyl records in at least some of the furniture he's upholstered. (As of this writing none of them have ever been found.)
* Jack White's song "Danger! High Voltage!". Just to mess with people, the band would maintain in interviews that it was a contest-winning fan who just happened to sound a lot like Jack White.
* Jack, who recently lost his soul but regained his arkangel powers, displays his terrifying eyes as he emerges from the concrete dust from having blasted his way out of a warded box trap.
* Jack (who was retrieved from Davy Jones' Locker) is a variation since he is technically in limbo and didn't really cross over to the other side.
* Jack. Will actually said once, "Is there any part of the stereotype you
* Jack Williamson" (1931), the Earth of 2432 is well on its way to becoming one of these. Much of the world is covered by cities, often domed cities, with most of the remaining space being used for farms, parks, and resorts. Wild Nature is gone, which is one of the principal complaints of main characters Eric and Nada.
* Jack Williamson danger, and lobotomise those who are unhappy with this so they'll be happy again.
* Jack Williamson, featuring a witch species that evolved due to prehistoric environmental reasons. However, their abilities mainly deal with shape-changing, making them were-wolves, were-pythons, were-saber-toothed-tigers, and more. In very rare cases, a witch becomes powerful enough to transform into a vampire. (That's a lot of tropes blended together.)
* Jack Williamson have rocket ships that have to search for their targets using advanced thermal and photographic equipment. Of course that was because they were written in the 1940s, when radar was a military secret.
* Jack Williamson Naturally, those Three Directives make much of humanity worthless, as the robots remove all challenges, all duties, and indeed all purpose from human life. The novel details what happens when the creator of the robots attempts to destroy Central, to stop the human race from dying off from sheer boredom.
* Jack Williamson one of the characters plans to write a book warning the world about the Witch Breed but it—the book you're reading—is dismissed as pulp fantasy.
* Jack Williamson "serve"—they're perfectly happy to bring you your Jell-O in a nice safe container, to the nice safe room in the nice safe house in the nice safe city, where nothing bad can happen to you.)
* Jack, with little big-eyed mammal kids with antennae. Oddly enough, they've showed such cross-breeds earlier many times in the series, without the explanation given until well into the story.

* Jack Youngblood of the Los Angeles Rams actually played every single play on defense during Super Bowl XIV against the all-powerful Pittsburgh Steelers with a taped-up broken leg. Considering that it was the Rams' first title game appearance in years, it was probably justifiable, as there is was no way he was going to miss the most important game of his life. Not only that, he played in the Pro Bowl that year too.
* Jack Youngblood played the entire 1979 playoffs and Super Bowl, AND the meaningless Pro Bowl game with a broken fibula. Because of this, he was called “the John Wayne of football”.
* Jacob also has a mutual attraction with Madeleine, a kind White woman who manages the local post office. This is taboo and illegal given that he's mixed race.
* Jacob and Esau who prefers to stay indoors, but is extremely cunning, and was able to cheat his older brother of his birthright and blessing.

* Jacob Gade. Given that the royalties made him financially independent and allowed him to set up a handsome scholarship for young talented Danish musicians, he probably didn't mind much.
* Jacob gave himself to his relative Laban to work for him for seven years, his payment being marrying his daughter Rachel at the end of those years. To Jacob though, they only felt like a few days because of his love for her. Unfortunately,
* Jacob had thirteen children with four women, going by the names Reuben, Simeon, Levi, Judah, Naphtali, Gad, Asher, Issachar, Zebulun, Dinah... Dan, Joseph and Benjamin. (Reuben is a semi-common name, however, as is Simon, a form of Simeon.)
* Jacob Have I Loved. She grew up beautiful, popular, talented at singing and the piano, sweet, and perfect, while Sarah Louise became a hard-working tomboy who "never gave her parents a moment's worry." Sarah Louise's mission in the novel is to find a life outside her sister's shadow.
* Jacob Have I Loved, the narrator starts to fall in love with a coal miner, who is several years older than her, when she realizes that he's the kind of man who would "sing to the oysters," a quirk of her fisherman father.
* Jacob Hope Chapman video reviewer who came out as a trans man in 2016.
* Jacob is correct when he says that trying to sneak around with Benjy, a ten-foot
* Jacob is lucky enough to have imprinted on the half-vampire Renesmee, who likewise ages rapidly before abruptly stopping somewhere around age 16. While the future is never confirmed, it can be assumed that Jacob probably opted to keep his wolf form for as long as possible.

* Jacob isn't quite as blunt, but he's not interested in Shepard trying to play amateur shrink (even after the events of his loyalty mission). His romance path is one of the few that lets Shepard do the venting instead, and you can convince him to break off the relationship if you keep prodding him.
* Jacobites, became this after he is ousted in 1688, to the point of having two attempted rebellions to try and regain the throne; an abortive one in 1715, and an almost successful one in 1745.

* Jacob Marley's Christmas Carol Marley finds that seven years have passed on Earth while he's been in the afterlife for what feels like a few hours.
* Jacob Marley's Christmas Carol Marley is described as prune-faced and perpetually sour like he'd just bit into a lemon and didn't enjoy the taste.
* Jacob Marley's Christmas Carol most of what Marley tries to win Scrooge over is improvised on the spot.
* Jacob Marley's Christmas Carol person doing all of it. There's also very little costuming and sets to let the narration, lighting, and actors tell the story.
* Jacob Marley's Christmas Carol starts just after Marley dies, quoting the original story's description verbatim.
* Jacob Marley's Christmas Carol that Scrooge is given a second chance at life.
* Jacob Marley's Christmas Carol the Bogle drops increasingly obvious hints about Marley using his spirit powers to affect Scrooge, with varying terms, but he doesn't get it until the alcoholic version of "spirits" is used.
* Jacob Marley's Christmas Carol the Record Keeper pretends to rail into Marley and the Bogle before congratulating them on their success.
* Jacob Marley's Christmas Carol when the Ghost of Christmas Past appears.
* Jacob Marley's Christmas Carol, while watching his past and the Cratchits' happy present, Marley realizes how short, cruel, and meaningless his own life was.
* Jacob M. Keene, YouTuber and voice actor, was diagnosed with autism as a child.

* Jacob's become more and more like his friends as time's gone on. He's still rarely the instigator of the evil schemes, but he's proven more than happy to take part in the planning of the group's immoral activities. The newest member of the class, Ursula Xane is even more of a straight example than Max, having been raised in isolation by parents who have carefully controlled her knowledge of the outside world. She's so innocent that in one
* Jacob's Ladder: A street Santa robs an injured Jacob Singer of his wallet. Jacob vows revenge.
* Jacob's Ladder happens in what is supposed to be a hospital which isn't closed; the hero is dragged to the surgeons through dark and dirty rooms full of mad people, blood, and severed organs.
* Jacob's Ladder. In a deleted scene, Jacob finds out that Jezzie was actually himself, when he unmasks the shroud she's enveloped in.
* Jacob's Ladder into a sleeping homeless person, and being almost run over by a

* Jacob's Ladder is a master of "Uh, did I just see that?" moments. A nurse with a bone sticking out of her head, a creepy-looking sandwich in a fridge at a party, blood in a sink in a public toilet, etc.
* Jacob's Ladder, Jacob lies on a chiropractic bed. Every time the chiropractor, Louis, tells Jacob to lie on his side, he gets it wrong every time.
* Jacob's Ladder — During the hospital gurney scene, many organs are shown laying on the floor, some of which get run over by the gurney.
* Jacob's Ladder — the final card informs that BZ had been used on American troops during the Vietnam War.
* Jacob's Ladder, slams back and forth between terrifying weirdness and mundane drama with the abruptness of getting hit over the back of the head with a brick.
* Jacob's Ladder (the thing that looks like a rabbit-ear antenna with an electrical arc between the posts)
* Jacob's Ladder Trilogy, a massive sub-light starship sent to colonize another world. It carries both a living crew and frozen passengers in cold sleep.
* Jacob's Ladder Trilogy and unwilling to, even though she comes to reciprocate Rien's feelings to some degree. Rien keeps trying, anyway, and it's not making either of them very happy.
* Jacob's Ladder Trilogy, an engineered strain of influenza is used as a biological weapon. It is designed to be potent enough to afflict even Exalts, who have nanomachine-enhanced immune systems.
* Jacob's Ladder Trilogy belonged to a religious cult of Evilutionary Biologists who believed that humanity could only advance by facing constant adversity. They expected and indeed hoped for massive amounts of suffering and death among the crew in order to make the survivors stronger.
* Jacob's Ladder Trilogy call their destination planet "Grail", because it's the goal of their long quest and because Jacob Dust gave the ship medieval-Arthurian storybook stylings.
* Jacob's Ladder Trilogy colonists really developed it themselves after they left – or if their sentient A.I. did mot of the innovation work, applying the laws of evolution to its own tools to see how they could be improved. In any case, the eco-socialist society obviously still had or re-developed the spaceships they needed to colonize many new planets, but once there, they seem to have decided to live somewhat simply and with a standard of living much like developed countries have today, except that everything is powered by renewable energy and they try to affect the ecosystem of the colonized planet as little as possible, limiting each colony to the population size of a small city.
* Jacob's Ladder Trilogy. Due to the severe shortage of vital resources following the Breaking, the living crew are forced to begin shutting off life support for the popsicles in order to harvest needed materials from their corpses.
* Jacob's Ladder Trilogy, Exalts' minds are recorded by their symbiotic nanomachine colonies and can be downloaded into a new body if their original is destroyed. However, many characters claim that a lot of the original personality is lost with the original brain and that the resurectees are only pale shadows of who they once were.
* Jacob's Ladder Trilogy given "bodies" by means of forcefields, magic swords are products of nanotech and the "magic" of the various sorcerers, priests and necromancers are varying combinations of cyber and biotech.
* Jacob's Ladder Trilogy have been incorporated into living creatures. Gavin the Basilisk, for instance, was originally a welding torch.
* Jacob's Ladder Trilogy is a combination generation ship / sleeper ship, with both a living crew and stored human popsicles. During the journey, most of the human popsicles die and are recycled for raw materials. It was known when they launched that the cryonics technology was unreliable; the passengers were people desperate enough to risk it anyway.
* Jacob's Ladder Trilogy, it's stated that some inhabitants of the ship perform executions in this manner — but the victims are tied to tethers so their bodies can be reeled back in afterwards, because the ship's resources are so

precious that every corpse must be recycled.
* Jacob's Ladder Trilogy, Jacob Dust performs a tarot reading for Samael using a special deck with six suites. When Samael questions whether Dust believes in fortunetelling, Dust responds that he believes in stacking the deck.
* Jacob's Ladder Trilogy, Perceval took a vow of celibacy due to viewing romance as a distraction from her duty.
* Jacob's Ladder Trilogy. The latter comes to reciprocate on an emotional level, but makes the boundaries clear, which saddens Rien as she really, really, really loves Perceval.
* Jacob's Ladder Trilogy, the various AIs are named after angels. Samael, whose name means "Poison of God", holds the role of Angel of Life Support.
* Jacob's Ladder Trilogy. To prevent their enemies from coming back in this way, some people make a habit of consuming the colonies of those they kill.
* Jacob's Ladder Trilogy Tristen is this to Perceval in the second volume, calling himself First Mate and acting the part.
* Jacob's Ladder Trilogy was catastrophically damaged in an event called the Breaking. A disagreement over what to do afterwards escalated into the engineers mutinying against the command crew. This led to the permanent division of the ship into the warring kingdoms of Engine and Rule.
* Jacob's original name (meaning "supplanter") was appropriate enough, considering he exchanged a bowl of soup for his brother's birthright - which entitled him to inherit the family patriarchy and 2/3 of Father Isaac's possessions.
* Jacob Starr, but when the jacket was damaged in a gun battle he took the trenchcoat off of one of the people he killed.
* Jacob's Trouble: The Gathering Storm, where the author calculated how fast the NASA and ESA spacecraft would travel using JPL's 1980s vintage argon gas core engine technology and how long it would require to get to Mars (6 days). Each scene in the book has a date and time and pains were apparently taken to make it work. It's one of the most scientifically-accurate sci-fi books ever produced, perhaps explained by the author being both an engineer and a scientist.
* Jacob the Liar) both feature the same dark take on this trope. Jakob, a Jew trapped in a ghetto in Poland during World War II, is at SS headquarters when he hears a news report that the Russians are advancing. When his friend doesn't believe his story, he claims that he has a hidden radio and heard a news report. His friend believes this, which backfires, as the news of Jakob's illegal radio spreads all over the ghetto, and Jakob has to go to increasingly desperate measures to hide the truth as his friends and acquaintances pester him for news of the outside world.

* Jacob Two-Two has a squad of highly-trained "Library Ninja" specialized in recovering overdue books.
* Jacob Two-Two has difficulty getting through normal-sized doorways when he tries to enter a room.
* Jacob Two-Two: In "The Unlickable Cowlick", it's picture day at Jacob's school. Unfortunately for Jacob, he is suffering from a massive bad hair day due to getting hit by the infamous Cowlick, that apparently runs in his family and is known to resist any attempt to style it. This puts him at risk of being cut from the school photo for not looking proper enough; something that is considered a great shame among the students. Eventually, Renée is able to get rid of the cowlick just in time for picture day.
* Jacob Two-Two, Jacob and Renée hide behind a wall and their hands accidentally brush. They look at their hands, then yank them apart in disgust.
* Jacob Two-Two Meets the Hooded Fang does this, with the the judge of Jacob's trial resembling the grocery store clerk that jokingly asked the police to arrest Jacob for his tendency to say things twice, Jacob's lawyer being the friendly looking customer with a lollipop that was at the store during the incident, the guards at the child prison basically being the other two customers at the store

during the incident sporting features based on what they were holding at the time, and the members of Child Power basically being Jacob's older twin siblings.
* Jacob Two-Two where all the missing socks go. Here, they use socks as currency, and there's even a black market for them.
* Jacob wears a shirt for the whole movie!), which is ironic seeing how it was the only one directed by a woman.
* Jacob wishes he was this, because then maybe his white co-workers would leave him alone.
* Jaco, enough to fight a small army of Frieza's soldiers and come out on top, but he's still far from the big guys).
* Jaco Pastorius His first solo album contained an exhilarating and almost-unaccompanied rendition of the ferociously difficult Charlie Parker/Miles Davis bebop classic "Donna Lee", forever earning him jazz credibility. Volatile and erratic, but he was to the bass guitar in the 70s more or less what Charlie Christian was to the electric guitar in the 30s and Jimi Hendrix was to it in the 1960s. Suffered from bipolar disorder and had major substance abuse problems, and died tragically young in 1987 after being fatally beaten by a club bouncer in Florida. Still celebrated as a musician who had an incredible ability to communicate with audiences using, of all things, the bass guitar: he was a flamboyant showman as well as a superb musician, and audiences loved him.

* Jaco the Galactic Patrolman parents sent him to Earth to protect him from Frieza. They suspected that Frieza was up to something when he recalled all the Saiyans to their home planet and knew that they couldn't leave since the scouters would sense them. So, they sent their youngest child to safety since Raditz was already off-world with Vegeta. Unlike most examples, they just wanted Goku to live and him kicking the ass of their murderer years later was an added bonus.
* Jaco The Galactic Patrol Man saves East City from a rocket. Hardcore fans are likely to remember that East City would eventually be destroyed by Nappa. None of the citizens are revived in canon.
* Jaco the Galactic Patrolman shows Tights can get fiery as her sister when pushed hard enough.
* Jaco the Galactic Patrolman, the Galactic Patrol thinks this way about Earth, which is why they assigned their lowest member Jaco to help it, and remark that it wouldn't be a big deal if he failed.

* Jacqueline Wilson, Amber mistakenly thinks she got pregnant after a one-night stand, leading her to have a short relationship with her mother's ex-boyfriend Davey who wants to marry her and be a father for the baby (Amber's mother is resentful at this idea.) The relationship ends almost instantly when Amber discovers she was never pregnant.
* Jacqueline Wilson April recalls how she was once sent to a psychiatrist, where she is left to play with the toys. She starts to draw a dustbin but notices she is being watched and makes it into a vase of flowers instead. The reason she drew the dustbin was that there wasn't a toy one to put the baby doll in.
* Jacqueline Wilson-baby, insisting on making her wear her hair in plaits and choosing childish dresses for her (as an eleven-year-old in the 1990s) and choosing her friends for her. At the climax, Mandy's father even suggests that Mandy would be better able to stand up for herself if her mother didn't keep babying her. Additionally, Mandy gets bullied at school due to her mother's babying.
* Jacqueline Wilson, bestselling children's novelist who came out publicly as lesbian at the age of seventy-four, shortly before the publication of her first book with an unambiguous same-sex relationship.
* Jacqueline Wilson, both the character of Poppy and the actress who plays her, Lizzy Clark, have Asperger syndrome. Enforced as the BBC specifically searched for an actress with Asperger's to play Poppy.
* Jacqueline Wilson in this case, since the operation is for breast cancer, putting everyone in the family under extreme stress.
* Jacqueline Wilson involves this trope in the climax. Protagonist Tim gives this to the primary antagonist after digging him out of a caved-in sand cave the idiot had been digging. While it is reliable, it isn't pretty as the recipient vomiting is the sign that it's worked, and the clean part is half averted in that Tim wipes away as much sand as he can from the mouth before attempting CPR.
* Jacqueline Wilson is a young girl called Violet, who has an obvious crush on her favorite fantasy author. Trouble is, he's rather elusive, but Violet manages to find him in the end.
* Jacqueline Wilson specifically deals with this issue; the 10-year-old heroine is left alone to care for her younger siblings because her mother goes on holiday and the babysitter doesn't show up.
* Jacqueline Wilson towards her new boyfriend's children, and general lack of concern for Andy's best interests go a long-term way towards explaining why Andy didn't want to come home in the first place.
* Jacqueline Wilson when she admits that she still (at age fourteen) harbours dreams of them living together.
* Jacques and Josee also qualify as Jacques places a lot of concern about his hair and does not want oil to drip on it and Josee is obsessed with winning gold and throws tantrums when she places anywhere other than first. They are even willing to cheat in the race in order to maintain their huge narcissism.
* Jacques and Vivienne are another beta couple from "Överenskommelser", but with a more complicated relationship.
* Jacques Brel, "Carousel"), is a comedic number, almost completely devoid of any of the social commentary he is best known for. He once claimed in an interview that "La Valse" "should have never become such a success."
* Jacques Brel half of Belgium's population, the Walloons), Brel's family was Flemish and thus felt he had the right to criticize his own people.
* Jacques Brel) has a number of line about what the singer would do to keep their lover. Unlike other songs where this is considered completely romantic, this one is more about how the despair associated with losing love would make you do really desperate things. One example among many:
* Jacques Brel looks back at his childhood and how the illusions were destroyed by World War Two. "Rosa Rosa Rosa" is a more playful song about his school days as a young boy.
* Jacques Brel's song "Mon Père Disait" he sings how his father told him that London is just a piece of the town Bruges, Belgium that long ago floated away

over sea and then got attached to England.
* Jacques Brel was such a scathing attack on Flemish nationalists that the number was banned from airing on the radio.
* Jacques Cartier didn't understand the local languages of the Native peoples of what is now Canada as well as he liked his fellows to believe. He misunderstood the designator for what kind of place name he was given, and so gave the country the name Canada (and also led to a city to be named the phonetic variant Kanata). The actual meaning of the word is something like "The Village of the Small Huts".
* Jacques Cartier was an accomplished seaman, never losing a ship or a man on his voyages. As a result, he was very popular, and men were often eager to join his crew.
* Jacques Demers was an hockey coach in the World Hockey Association and the National Hockey League coaching the Quebec Nordiques from 1979-80, the St. Louis Blues from 1983-86, the Detroit Red Wings from 1986-90 (winning an unheard of two consecutive Jack Adams awards in 1987 and 1988) and the Montreal Canadiens from 1992-96 (winning the team's most recent Stanley Cup in 1993), and the Tampa Bay Lightning from 1997-99. Later, he served as a hockey commentator and a Canadian senator.
* Jacques Fath, despite imitating the styles of Dior and dying in 1954, his unique designs are more focused to the American market;
* Jacques has been lobotomizing faunus population to be used as slave labor after his takeover of Atlas. Unfortunately Velvet was one of them. Jacques even threatens Cardin with one if he failed to catch Ruby and Nora.
* Jacques is a much better person than he was in canon because Weiss's capture and Willow's death made him realize just how much he was throwing away for the sake of profit. He thus resolved to be a much better person to his remaining daughter.
* Jacques-Louis David's striking painting than the actual historical character. The work has in fact done a lot to transform a very radical politician into an innocent victim.
* Jacques Mesrine, whose criminal exploits involved going on a crime spree with his mistress Jeanne Schneider in Canada and America.
* Jacques Offenbach converted to Catholicism to marry his wife Hérminie d'Alcan, in 1844. Hérminie was from an old, conservative, devoutly Catholic family, and her husband being Catholic was non-negotiable for her. He gladly converted; they were happily married until his death in 1880.
* Jacques Offenbach started playing the violin at six and was a composer and had learned the cello by age nine. He quickly got too big for his home town and when he was 14 his father sent him to Paris to study cello. Offenbach was such a jokester and goofball he could never really focus on his studies, although he was widely recognized as a truly virtuoso cellist. He was booted out of the conservatory at 15 and the next year found a permanent appointment at the Opéra-Comique. This eventually led him to the career he wanted: writing the raunchy satirical comic operettas that made him famous.
* Jacques Portsman's design is based on his voice actor, Yuuki Furukawa.
* Jacques Portsman's true motives aren't revealed until the end of the first
* Jacques Rougeau), who later teamed with Carl "Pierre" Ouelette as The Quebecers, and even had a theme song that spoofed The Mountie's, played the Foreign Wrestling Heel for laughs.
* Jacques Schnee expects his children to follow his orders without question and to lead lives and careers that further his agenda. He has no interest in their personal desires, only in what they can do to further the business interests of the Schnee Dust Company. When his daughter, Weiss, disobeys him one too many times, he detains her until they reach an "agreement" about how her future will unfold. When Weiss realizes that Whitley has been waiting for Jacques to disinherit both daughters so that he will inherit everything, he reasons that the only way to handle Jacques is to follow the latter's expectations.
* Jacques Schnee, head of the Schnee Dust Corporation, is a ruthless businessman and who regularly abuses his family. Volume 7 has him running for a seat on Atlas' council to end the closed borders and Dust embargo that Ironwood has set up, which

are cutting into his profits. He mentions that if he wasn't counting on their votes, he'd lay off most of his employees to save money. When Dr. Watts offers to rig the computerized votes in Jacques' favor, Jacques
* Jacques Schnee negotiates a deal with Watts to give up his account log-in details in exchange for election rigging to win a seat on the council. In "As Above, So Below" later in the Volume, Ironwood points out to Jacques that is account gets upgraded to a full security clearance once he became a councilor, giving Watts full access to the Atlesian security systems. Thus, his plans to circumvent the military blockade harming the Schnee Dust Company amount to treason.
* Jacques Schnee of a home to pursue a career of an army officer and a Huntress respectively.
* Jacques Tati are a satire on the contrast between the traditional society and the technological innovations of the modern world.
* Jacques Tati includes a fellow who plays a recognizable tune by controlling the air that's venting out of a blow-up balloon.
* Jacques Tourneur. Still, most critics of this move agree it ultimately doesn't hurt the movie, and even those who think Tourneur was probably right agree that it is, at least, a really good monster suit.
* Jacques Villeneuve took the World Championship in only his second year in the sport in 1997, then proceeded to never win another race. He has found success in other forms of racing, though.

* Jade: A Chinese vampire-sorceress sired by Purgatori who controlled a powerful crime family for centuries, and then decided to spread her rule to the other Triad families, and then all of China.
* Jade also subverts the trope with her space powers. She can teleport herself and enemies, change the size of objects, and manipulate objects using telekinesis. It grants her plenty of use outside of battle, especially in the events of Cascade, where she carried all four planets and the Battlefield in her hands.
* Jade (and amber) wizards often chose not to wear shoes, as they are extremely in tune with nature (or beasts).
* Jade and Floyd Leech within the Japanese fandom. It doesn't help that both twins are somewhat wild and mischievous, or that Jade is known to spoil Floyd and indulge his childish behaviour due to wanting Floyd's happiness more than anything.
* Jade attempts to use a cult's spell against them by repeating the words they use to cast it and fails because she's not a member.
* Jade begins interacting with Jadesprite, prompting a very distracting (to him) mental image of the two making out.
* JadebornWithin the Jadeborn society, the Artisan Caste (the most elf-looking) are

typically prejudiced against the Worker and Warrior Castes, regarding the regulars as uncouth and brutish and the Enlightened ones as freaks and upstarts, while the other two Castes deride the Artisans as stuck-up, arrogant and a little bit crazy.

* Jadeclaw 1st edition adventure module "Loot the Burning House" featured a province of Zhongguo rediscovering steam power and examples of ancient steam engines powered by alchemically treated metal octagons instead of wood or coal.
* Jade Cocoon has the Tomokana line of divine beasts, which have swordfish-like snouts, stingray fins and spiked lower bodies that can swell up like a pufferfish. There's also a monster from the Ku family that looks like a dog but has boar's tusks, a unicorn-like horn, an armored shell and a lobster-like tail.
* Jade Cocoon, some Divine Beasts come in multiple elemental varieties. For example, Mau Divine Beasts come in Fire, Wind and Earth varieties, each with their own stats and attacks, but not Water because it is the opposite to the Mau family's main element, Fire.
* Jade Cocoon, starts out after Gaia's Vengeance took place. Humans are barely clinging to meager existence, but it's clear that total obliteration is only a matter of time. Then, it gets worse.
* Jade Cocoon tricks Kahu into eating Ginui powder at one point (Ginui being a race of newt-like monsters that live in the water forest). Kahu is disgusted when she tells him what he just ate.
* Jade-Colored Glasses becomes more aware of the world's cynicism and as a result becomes more experienced.
* Jade-Colored Glasses: Characters become wiser as they get older and as a result are more jaded to reality.
* Jade-Colored Glasses gets beaten into the ground and loses their idealistic outlook, ultimately transforming them into a cynic.
* Jaded Professional: A character who used to like their job, but now hates it.
* Jaded Professional: Someone has turned very cynical because of everything they've experienced during their career.
* Jaded Washout: A character who used to be bright and successful, but is now a cynical, washed-up loser.
* Jaded Washout had his career cut short because the villainous sportscaster character deliberately slid into home with his spikes up when they were playing each other years before.
* Jaded Washout: Used to be a successful person, but has become something of a failure.
* Jaded Washout, who would do literally any favour for anyone who mildly complimented her work.
* Jade Dynasty: Bi Yao tries to steal the Fire Stick from a sleeping Xiao Fan while a monkey and a dog are in the room. She pushes him out of the way, then he falls on top of her and knocks her down. The camera cuts to the monkey, whose mouth drops open and who makes a disbelieving sound.
* Jade Empire, a mythological race known for using sexuality to confuse and utterly screw with humans.
* Jade Empire, and possibly (alternately) Silk Fox to the player character. (Complicating matters a bit is that they're both bisexual.)
* Jade Empire, an early sidequest requires you to heal an injured fellow student so she can take part in a competition against you. The Open Palm choice is to get her a medicine that actually heals her, but if you prefer the Closed Fist, you can give her an ointment that only removes the pain, resulting in her starting the fight with much less health and ending up crippled for life. For extra adherence to the Closed Fist ideology (one of the few cases when it's actually used correctly), you can reveal to her what you did afterward, and tell her that relying on you made her weak - she should have dealt with her problem on her own.
* Jade Empire as a result of the Water Dragon being bound. When the game starts, twenty years worth of restless spirits have piled up, and the Empire's really starting to feel the effects.

* Jade Empire. At the climax of the game, the trap was used for its intended purpose.
* Jade Empire But if a master happens to fall into the golem machinery, or gets crushed by a falling clay golem shell, then they clearly deserved it for their carelessness.
* Jade Empire, but pre-rendered scenes are generally stuck at the resolution they were originally rendered at.
* Jade Empire But since your power and focus have grown so much, you no longer need it. It would be like using a flamethrower until you learned how shoot fire from your hands, yeah the flamethrower still works, but you don't really need it anymore do you?
* Jade Empire correctly assumes that the Spirit Monk has corrected the flaw in their technique, meaning he can't easily kill them anymore.
* Jade Empire features a pair of guard golems who can be disabled if you use the correct password. The password is "xiaohua", which, if spoken with the correct tones, simply means "joke" in Mandarin Chinese.
* Jade Empire (Fuyao, the girl who you rescue from slavers in Gao the Greater's pirate base) stand out.
* Jade Empire gets that she is actually in love with the protagonist after Silk Fox shows up and starts treating her like a rival for his affections.
* Jade Empire has a darker backstory than other examples, but makes up for it with some glib lines and pragmatic approach to events.
* Jade Empire has an example of this Trope. At one point, the player character can appear in an ersatz Beijing Opera production of a famous battle... as a female character. If the player is female, the director will comment on how unrealistic they look as a woman.
* Jade Empire has a sidequest involving a young girl whose liver is dying, and her father has come up with a way to replace an organ, but he needs a new or preserved liver. Your options are to convince him to use his own liver or to convince a ghost to atone for his sins by giving you his preserved liver.
* Jade Empire has Jade Master mode, essentially allowing you to import the character you finished the game with back to the start with all his stats, styles and techniques retained- but back at level 1 for experience purposes. Weirdly, the initial "training" fight appears to be set up to ignore stats- so a trainee at your character's school can quite happily deal over 1000 damage with a single attack...
* Jade Empire has one as well during the final boss fight. Your opponent gives you the chance to surrender and lay down your life for the greater good (in his eyes). If you do, he kills you and a scene plays showing a statue of your character in the armor of your enemy in a dystopic future, with the final boss laughing evilly.
* Jade Empire have only one name and a title, and the few that do not are usually related to another NPC. For example, Kia Min, a student in Chapter 1, is the niece of a merchant in the Lotus Assassin fortress.
* Jade Empire... he gets a lot of hype, and it's all freaking justified. The bastard is the second/third hardest fight in the game.
* Jade Empire in a Bioware game who you meet ordinarily is Dawn Star, who you grew up with.
* Jade Empire in addition to being a kunoichi-esque vigilante. Bear in mind that she tried to kill you during your first meeting.
* Jade Empire, in addition to more conventional martial arts, has Ki-powered styles that involve throwing fire from your hands, bringing down storms of hail, and causing localized earth tremors, among other things. Even one of the "conventional" Martial Styles lets you grow Wolverine-like claws out of your knuckles.
* Jade Empire is brilliant when it comes to making things fly and explode. In his own words, "The things he flies tend to survive! The things he explodes... not so much." Go to him for anything else, and he's pretty well useless.
* Jade Empire is decapitation. It doesn't show where the head goes, but it does show a fountain of blood, which makes you wonder just how much of the head is intact afterwards.
* Jade Empire is the player sending Gao packing when he tries to hit on her. Though

this might not count, as it is definitely not the first time the characters meet, and Dawn Star was infatuated with a male character long before the incident.
* Jade Empire, it's slowly revealed that Dawn Star is Master Li's daughter. When you confront him with this, his response is approximately, "So what?"
* Jade Empire, Kang the Mad wants to escape his employer Gao the Greater and suggests that you arrange for Gao to "fall down a flight of punches".
* Jade Empire, Master Li snaps a Lotus Assassin's neck by karate chopping it. It should be noted that his strength was sufficient to shatter a ship with a punch, so breaking someone's neck is really to be expected.
* Jade Empire named Kang. They really ought to shred themselves rather than actually flying.
* Jade Empire: one of the Black Whirlwind's exploits before joining your party was single-handedly storming an enemy fortress "piss-drunk, buck naked and screaming like a maniac" in his words. It's heavily implied (or outright stated) that this worked because the soldiers thought he was crazy. Checking his journal during the battle where you control him directly reveals he has a checklist upon waking, one of which is "do I have clothing?" And how to handle the inevitable fight if there is no clothing.
* Jade Empire Or, if you're in the right mood, convince her to kill her romantic rival, followed by accidentally killing the one who made the promise. And then she realizes what she's done, breaks down and attacks you, resulting in you killing her and her entire gang.
* Jade Empire pass on for story-related reasons, they eventually go mad and start attacking people). Several Type 1s are involved in quests, though. This is not dissimilar to actual Chinese and Japanese ghost stories.
* Jade Empire pretty much breathes this trope to live. If asked if he's seen an old man...
* Jade Empire seems to teach new fighting styles to the player character this way.
* Jade Empire show the player and his/her significant other kissing, but only Dawn Star's dialogue gives any indication that anything else happened afterwards.
* Jade Empire, Sky's pretty understanding about it, and just extends his vendetta to anyone dealing in slaves.
* Jade Empire's later original IPs, despite some heavy praise from reviews.
* Jade Empire the case, however, and adherents of the Way of the Open Palm can also act this way.
* Jade Empire. The Old Man might be an exception, though, since he's a quest giver with the name of "Old Man".
* Jade Empire, the question is, what's a man like him doing teaching a bunch of peasant kids out on the edge of the Empire?
* Jade Empire. There was no hope of winning: every ghost disrupted would eventually reform, and everyone killed by a ghost would eventually become one. And to make matters worse, the imbalance caused by the appearance of the ghosts is empowering demons.
* Jade Empire: The school and village where the player begins is burned to the ground and all but a handful of its inhabitants slaughtered. What news of this reaches other villages paints it as purely pirates attacking, when it's actually mooks of the Emperor working alongside the pirates.
* Jade Empire was once a competent and respected Drunken Master... until he got tricked into marrying a woman who disapproved of drinking and fighting, and could back up her words. If you have him accompany you, he won't fight enemies, but instead throws wine bottles that allow you to use Drunken Fighting style. On the other hand, he has enough courage to follow you into any sort of danger... as long as you're there to protect him.
* Jade Empire. With a slight twist- everyone apart from the cook is actually a mutant cannibal creature disguised by magic; they keep the human cook around to make things seem more "normal."
* Jade Empire: Wonderfully referenced when you ask Kang how he manages to remotely pilot the Marvelous Dragonfly from the ground.
* Jade Empire wonders if this reduces her father’s culpability, but realizes

he was still to blame. This is played straight in one quest in the Necropolis, in which the Open Palm solution is to convince the ghost of Mister Ren that his wife didn’t mean to poison him and feels terrible about it.
* Jade Empire, you can save two little orphan ghosts who died during a town's flood by getting their orphanage master to bury their bones.
* Jade Empire, your character is likely to be about as unlovable as they come.
* Jade Empire, you're "encouraged" to kill your boss' boss in the Lotus Assassin fortress, which in this case means "kill him and then stick his body in the golem press" (you can also drop a golem on your boss as well, doubling the trope).
* Jade engages in another one with Tohru during the fight in the Hall of Ice. And by this point, Jade's
* Jade feels that Tohru is hers, based on her jealousy that HE became Uncle's apprentice and not her.
* Jade for his willingness to destroy not only innocent lives but also drive his loyal right hand Zhan (whom she has come to genuinely love) to his possible death.
* Jade goes one better in "Christmas Elves", using her fast regeneration and a handful of parlor tricks to convince a whole Syndicate facility that they were under attack by an Undead army.
* Jade Golems, the signature mechanic for the Jade Lotus (Shamans, Rogues, and Druids) from Mean Streets of Gadgetzan. Every time you play a Jade card, you summon a Jade Golem. It starts as a 1/1, but makes each future Golem +1/+1 bigger. That sounds like a standard
* Jade Green, Charles lusts for his cousin Judith and is secretly planning on raping and killing her after she rejects her advances, much like the title character herself.
* Jade Green happens to be one of these for Judith. Though forty years old (as well as her cousin), he tries to get her to kiss him anyway, even though she is clearly in love with the miller's son Zeke. It is later revealed that he had also lusted for the title character as well in the past.

* Jade Harley is the most powerful God-Tier kid in the series. She has abilities derived from the Green Sun, the power source of the First Guardians, as well as God-Tier, and is capable of effortlessly shrinking planets down to small size.
* Jade Harley now when compared to the other protagonists' progress in Sburb. She was brought down to sub-normal.
* Jade Harley's is probably the most shocking; she is mentioned to have belonged to Eridan and John states that she was likely killed, but at the same time remains optimistic that she may have been found someone who could help her survive—this is coupled with a silhouette of Jade holding a gun and wearing a silver necklace with a Cancer symbol on it. She's with Karkat now.

* Jaeger. The 10 miles out line is referred to as the "miracle mile" and mostly they try to intercept the kaiju before it crosses the line. Fighting in the city is usually only a last resort because of the massive collateral damage, but considering the alternative it's unlikely that people will complain.
* Jae has confessed her crush on Ivy to her friend Jemimah. That said, her description of Ivy is so overblown that Jem wouldn't be able to put a name to the face even if she wanted to.
* Jaehee, Jumin's assistant, is almost as serious as he is (except when she's fangirling over Zen) and frequently sighs in exasperation at the other characters' zany antics. One of the game's funniest moments comes when she types up a serious and thoughtful response to a joking comment from Zen that's so long that Zen
* Jaehee Kang is by far the most reasonable member of the RFA, the charity organization you join at the start of the game. This trait is made apparent in the choices necessary to enter her route: she likes a main character who is optimistic and hard-working, but sensible and cautious. She claims that nothing special has ever happened to her (downplaying the fact that she's lost both of her parents so young) and is the only one in RFA who is rightly wary of you the beginning of the main routes, which makes sense because you're a total stranger entering a locked, private server, and suddenly living in their dead friend's apartment under extremely suspicious and mysterious circumstances. Whereas everyone else warms to you pretty quickly, you have to put in a little work to get her to begin trusting you.
* Jae is another one-time example during the final exams. Daigo has placed bombs throughout the school, which Jae knows about, and has caused her so much stress that she arrives in wrinkled clothes and with mussy hair.
* Jae is said to be smarter than the average Joe, but logical subjects like maths or engineering baffle her.
* Jaela Daran, The Speaker of the Flame, gains a staggering 15 levels while inside Flamekeep (she's normally level 3). The same thing applies to her
* Jael is Joram's brother and is also a serial rapist just like his brother. Jael forces women to sleep with him by threat of death and uses his own female soldiers as he demands a new woman every night with them brutalized after the act. Jael's lust extends to even his own niece who he plans to turn into his personal
* Jaenelle and the Briarwood girls also count, being kept in a secure facility, drugged, and used for sex on a regular basis.
* Jaenelle Angelline and Daemon Sadi, although Daemon pushes the boundaries of
* Jae's a lesbian, but heavily in the closet. She briefly dated her fellow gang member Devin so that people would stop asking about her lack of love life.
* Jafar also has a mild (and more realistic) variant of this trope at the same time as Genie playing it straight, providing humorous contrast.
* Jafar, disguised as an old man, screams out that word when he finally gets the lamp from the Cave of Wonders. In the climatic battle, he utters "Yes" two times when he turns from a giant cobra to an all-powerful genie, due to his third wish.
* Jafar gets his hands on the magic lamp, he goes all out big and loud, especially when he wishes to be "THE MOST POWERFUL SORCERER IN THE WORLD". And then, there's

him becoming a genie, courtesy of his third and final wish...
* Jafar, however, does give him a freebie regarding all the treasure to Abis Mal's heart's content in exchange for the third wish to set him free from the lamp (after Aladdin is believed to have died). Abis Mal was going to wish for Jafar's freedom, but stops himself and wonders whether Jafar's going to actually keep his word about the treasure, or if the treasure will disappear once being set free, apparently having become skeptical due to Jafar's tendency towards this trope.
* Jafar uses this after Iago suggests he marry Princess Jasmine. That reaction probably has more to do with the way in which he initially worded it, though:
* Jafar wears black with red trim, and has a black beard. His cobra form has a black upperside with stripes and the underside of his hood being red. His genie form is a muscular red devil with a black topknot and black beard.
* Jafar, when Abis Mal initially tries to demand his wishes from Jafar instead of wanting to cooperate with him, demonstrates this trope when Abis Mal asks for a legendary sunken treasure. Jafar promptly brings Abis Mal
* Jafar winds up distracted by Frollo's fishing line during a climactic battle in
* Jaffa helmets fold down into the collar, apparently having relatively thick armor.
* Jaffa in Finland after the domestic brand of Hartwall company. While most of their soda's bear the Jaffa branding, as a generic term it means orange flavor soda.
* Jaffa, the soldiers of the Goa'uld, additionally serve as incubators for Goa'uld larvae, which they carry in a pouch on their stomach. However, they cannot control the Jaffa soldiers directly.
* Jaffa. This is actually acknowledged in-show by SG-1, when O'Neill compares a modern FN P90, a "weapon of war" to a Jaffa staff, a "weapon of terror". Sure, a staff is big and imposing and scary, and when it hits, it causes nice damage and a flashy small explosion. It is also terribly unwieldly and, due to lack of sights, completely inaccurate. Bullets from a modern assault rifle can pierce through Jaffa metal armour and are accurate enough that a small elite team, such as SG-1, can regularly defeat hordes of Jaffa warriors tens of times bigger with ease. So yes, the Jaffa and their Goa'uld masters are heavily technologically gimped, something that Earth humans can exploit.
* Jaga dies of old age while guiding the ThunderCats' ship towards Third Earth, but he returns as a
* JAG: Admiral Chegwidden had this role for nine seasons, before retiring at the end of season 9. General Cresswell was the final season replacement.
* JAG) advocating that the U.S. (pre 9/11) should take gloves of with respect to terrorists to U.S. interests in the Middle East. However, the alleged super-patriot finances terrorism in the Middle East against U.S. interests (supposedly to create a self-fulfilling prophecy to serve his own business interests.)
* JAG: A first season episode had Meg go undercover as a female Marine recruit, to investigate the suspicious death of another female recruit.
* JAG: After getting Harm out of a minefield in Afghanistan (season 7, episode 23 "In Country"), Mac acknowledges that she only learned how to do it by watching movies.
* JAG: after her father has passed away, Mac tells her mother stoically that she never wants to see her again — because it was she, not her father, who once abandoned her.
* JAG, along with a few cases of individuals who really want to join the Navy or Marines but don't qualify (usually because they're too young).
* JAG also had a few other real-world figures making cameos like Jay Leno,
* JAG also had an episode entitled "Empty Quiver" where a nuclear missile disappeared during transfer to a submarine. Subverted when it was discovered that, through a series of minor missteps (including a short blackout due to transferring to ship's power), the missile was ejected into the harbor. JAG investigator Sturgis Turner notes that while it was an accident, it was very likely all of the sailors involved would never serve on any combat ship again.
* JAG. Although it's later revealed that Meg had no such video, the deputy sheriff

had in fact been more brutal than necessary at the gas station and backed off from arresting Harm as a precaution.
* JAG analyst who is perfectly comfortable with her son’s fake deaths and other cloak and dagger shenanigans.
* JAG. And he was a top-notch legal mind who once was considered for a seat on the federal bench.
* JAG and she accepted his marriage proposal. However, as she was being reassigned to San Diego, and he was reassigned to England, the show did end on a question mark, as they literally flipped a coin to determine whether Mac would resign from the Marines or Harm from the Navy so they could be together.
* Jagang has his elite core of soldiers that guard him and spearhead assaults with the rabble as extra weight. They are bigger, tougher, stupider, and better-armed than the normal troops.
* JAG: A non-science fiction example; several episodes in the later half of the 7th season depicts Afghanistan as one.
* JAG: An unusual example in "Pilot Error", in that it was the object of both parties' affection, Harm's friend and Annie's husband, rather than one of the competitors, who dies.
* JAG: Appears several times throughout the series, often on or close to military installations. Season one cliffhanger "Skeleton Crew" has a typical one.
* Jagaroth ship, and its pilot guided human evolution for millions of years so he could go back in time and fix it.
* JAG: A sign marking an entrance into the Free Fire Zone in "Desert Son" has been knocked down, which nearly gets Harm and Meg killed.
* JAG, as one exchange between Harm and Mac near the back at Heathrow Airport suggests that the British authorities will deal with the Dirty Cop.
* JAG: Basically the plot of the season ten episode "The Sixth Juror" when Petty Officer Jennifer Coates is brought in as juror and starts asking pertinent questions which no one had thought about.
* JAG became pregnant in season 8, her character Lt. Colonel Sarah "Mac" Mackenzie was in-universe temporarily assigned to the Navy-Marine Corps Judiciary, which to allow her to sit behind a big bench. (Navy-Marine Corps judges don't wear robes.) The show also exploited Bell's pregnancy by having Harm suddenly go through a bout of madness where he sees every woman in the JAG office as being pregnant, followed by the season finale, where she went undercover as the pregnant wife of her real-world husband.
* JAG began with a pilot movie, although the female lead was changed for the series.
* JAG, both Bud Roberts and Harriet Simms quite literally start out as this.
* JAG, Bud asks Harm if he believes in the possibility of extraterrestrial life: Harm sarcastically writes it off by stating he doesn't believe that flying saucers comes to Earth stealing cows and hillbillies.
* JAG, Bud irritates a Navy officer into revealing his homicidal views on incompetent members of the armed forces by making a large number of deliberate mistakes whilst cross-examining him.
* JAG, Bud Roberts is sent to an Anger Managment group in "Automatic for the People".
* JAG: Bud's brother Mikey ends up briefly dating the daughter of the series' last JAG, Maj. Gen. Gordon Cresswell. Upon finding out, Harm gives Mikey a horrified look and asks if the younger man lost his mind.
* JAG by accident gets to see a murder at Andrews Air Force Base while slipping away from his school class when on a tour. It turns out the bad guys are weapons smugglers who don't shy away from trying to kill witnesses.
* JAG, by charging Skates in the first place and impeding Harm’s request for documents, he didn’t act maliciously or with any hidden motives.
* JAG, Captain Boone, flies a night-time reconnaissance mission in an F-14 Tomcat twice on very low altitude over Bosnia. On the second run he’s hit by AA fire, but backseat rider Harm (who has night-blindness and hasn't flown a Tomcat in five years) manages to land it sound and safe on the carrier.

* JAG cast singing "Waltzing Matilda" as he left to return to Australia.
* JAG characters, Abby is advised by Major McBurney (who's prosecuting a murder case in which Harm is the accused) that she'll have to testify in court, and she mentions how nervous she gets having to testify "in front of all those military uniforms."
* JAG characters. In one scene, a nervous Abby is testifying on the witness stand and is asked about a piece of evidence":
* JAG characters were on screen (except for when they went to JAG HQ).
* JAG: David James Elliott directed three episodes; "Lifeline," "Take It Like A Man" and "There Goes The Neighborhood."
* Jagdgeschwader with yellow-nosed enemy aircraft in preference to lesser ones. There is an apocryphal story that some American pilots in the Pacific theater would paint their propellers a different color before every battle so Japanese pilots would think they were facing different fighter squadrons each time, creating the illusion that the Americans had massively superior numbers. Apocryphal because the Americans didn't need to create an illusion of what they actually had.
* Jagen also serve as the primary strategists for their respective armies.
* JAG ends with Harm crashing on a carrier landing. Turns out Harm was running a simulation of the doomed flight of the Defendant of the Week. It's implied that Harm has run the simulation several times, crashed every time, and gone down with the jet rather than eject every time.
* JAG episode "Boot", where the nasty sergeant, Staff Sergeant Carrington, is a woman (played by Julie Caitlin Brown) training female Marine recruits at Parris Island.
* JAG episode "Contemptuous Words" opens with a printing press spinning, however, the relevant content is read in the following scence.
* JAG episode "Dungaree Justice", a misdirected team spirit leads a group of sailors to avenge the rape of a female sailor on an innocent man.
* JAG episode "Fighting Words," a US Marine tries to say, "Stop or I will shoot," in Arabic during a classroom training session, but according to an Iraqi woman who's helping with the class, he actually said, "Stop or I will release the mice."
* JAG episode "Heroes", it's the judge that delivers the penultimate outburst after Harm had fired an MP-5 in the courtroom.
* JAG episode it appears in, "We the People", it seems to inexplicably stand for "Satellite News Network".
* JAG episode "Surface Warfare" environmental activists sabotage naval exercises off the shores of Florida.
* JAG equal to what they inflicted on Bud. The next day in court, they both look like they went 10 rounds with the heavyweight champ.
* JAG. Even when he did quit for good, he got reinstated by the Secretary of the Navy due to a lack of personnel.
* JAG, explains just about everything about his career, personality and motivations.
* Jagex's name originally stood for "Java Gaming Experts", though they have redefined it as "Just About the Game Experience".
* JAG fan convention in season 3, as Hugh Blackadder in "To Russia With Love", and later on in the ninth season, his star on the Hollywood Walk of Fame is directly shown.
* JAG far enough from the base before it goes off, while Meg and Pike try to figure out the code to disable it.
* JAG. For a staff corps office they take military protocol very seriously.
* JAG for many military installations, which have a history of being shut down and reopened and shut down again depending on the needs of the military. Some get turned into civilian airports or put to other uses if there is any demand for the real estate, but others simply gather dust.
* JAG: From "Brig Break", in addition to the handful of bad guys who actually are Marines, several others use uniforms to infiltrate the base.
* Jagganoth has a straight-up "invulnerable"-type immortality: According to Mottom (and

* Jagged Alliance 2 are much more of a problem than she is, especially as she doesn't join the fight until you actively shoot at her. And she succumbs with ridiculous ease to a single mustard gas grenade.
* Jagged Alliance 2 fanatic who uses blinged-out movie prop revolvers. He's good with them, but again, the AP costs.
* Jagged Alliance 2 get to confront her at the end of the game, she says, literally, two words in surprise, and then dies just like any other enemy. There is absolutely no satisfaction in a final boss fight.
* Jagged Alliance 2 has a number in the recruitment menu. A few examples.
* Jagged Alliance 2 has several locations with doors that are extremely difficult to pick the locks of and resilient enough to withstand a blast from even an anti-tank rocket. The walls these doors are placed in, however, are completely ordinary and can be blasted to rubble with an ordinary dynamite stick.
* Jagged Alliance 2 improve quickly, but still require a lot of investment before they are anywhere close to par.
* Jagged Alliance 2 lets you vault over fences and climb any house that has a flat roof. But you can't climb over crates, tables, and pretty much everything else that isn't either a fence or a flat-topped building.
* Jagged Alliance 2, one of the questions is "A certain, annoying, pathetic, furry, purple dinosaur should be: ". The answers to this question include "Held up as a loving role model for children's morals and values", "Hung from a tree", "Hung from a tree and shot", and "Hung from a tree, shot, gutted, and run over by a Buick".
* Jagged Alliance and it's sequel both had numerous areas littered with mines or booby-trapped boxes.
* Jagged Alliance) as the unfortunate victim was flung about 1,5 meters backwards. Also, grenades or mortar rounds could turn people into (briefly) living torches. Oddly enough, though, said grenades or mortar rounds didn't cause ludicrous gibs, instead, they're either reduced to ash (after flaming to a crisp) or die normally.
* Jagged Alliance: Attacks to the head may cause reduction in the wisdom attribute. Also, death.
* Jagged Alliance because there's an option to turn "Sci-Fi Elements" off when you start a new game.
* Jagged Alliance being paid for it, quite a few see it as doing a service for the people of Arulco once they get there. They still need to get paid, though.
* Jagged Alliance certainly qualifies. Over the course of the game, he sustains cumulative wounds from Deidrenna's abuse, culminating in getting shot in the head by her when the player enters the last city- this is, as always, played for laughs when Elliot gets back up and apologizes for not being able to even die properly.
* Jagged Alliance fan, who strode into battle in a cowboy hat and with two revolvers in his hands. It is revealed in "Jagged Alliance 2" that he hung up his guns to star in several acclaimed Japanese westerns, such as "Attack of the Clydesdales" and "Much Dust, Many Bullets".
* Jagged Alliance fatalist, while Shadow simply never talks above a whisper, always keeping as quiet as possible. Shadow also is the only character in the game that has a permanent camouflage, perfect for his profession.
* Jagged Alliance features one of these as a local explosives merchant and recruitable NPC.
* Jagged Alliance features special death animations for certain forms of killing an opponent. Killing an enemy with certain ammo (for example assault rifle ammo like 7.62 or 5.56), by firing at an unprotected head, will sometimes cause said head to explode. Also firing in rapid succession (burst) at an enemy's unprotected chest will sometimes cause the follow-up bullets to burst through his/her chest with the person dramatically flying backwards. Also using explosives like certain grenades or bombs will blow the bodies up with only blood remaining. Heavy explosives can also reduce enemies to ash. This is all commented by the player's characters as not very nice. Luckily the game has only pixel animation graphics.
* Jagged Alliance forced conscripts, at least one (the others may be, but they don't have names or faces) of her close bodyguards are foreign mercenaries. Of course, by the game's premise, all but a small handful of the party are foreign

mercs as well.
* Jagged Alliance game was set on an island, but also featured advancing from right to left (this time, from your base in the bottom-right to the enemy base in the top-left).
* Jagged Alliance getting shot at instead of knocking down old factories or doing practical effects for action movies.
* Jagged Alliance go through the doors, wasting AP and leaving your pointman vulnerable to enemy fire, or you could have your demolitions guy plant a couple of blocks of C4 on the wall, blast open a hole, and then storm in through the back, or even just open a hole to let your snipers with their armor-piercing anti-tank rifles start picking off the enemy.
* Jagged Alliance has an Alumni page on the AIM (Association of International Mercenaries) website, where among the retired, KIA and dishonorably discharged there are also those who suffered injury or had failing health.
* Jagged Alliance has this. All enemies, mercs and militia are basically the same 3 models (Big Male, Regular Male, and Female) with a different palette for each. Mercs have the most diversity, as each has a different clothing color combination, and of course there are all sorts of combinations for hair color and skin color for everyone in the game.
* Jagged Alliance has you hiring mercenaries from the Association of International Mercenaries (A.I.M.) to complete your missions. A.I.M. seems to work as more of a mercenary union/guild rather than a PMC, as members are hired on an individual basis and bring just themselves plus their starting equipment if you chose to pay for it, leaving you to provide any other equipment, further training and transportation within the area of operations.
* Jagged Alliance. In fact, if you're lucky, you can save your game just before such a moment and replay it over and over.
* Jagged Alliance is explicitly Romanian, but married the former king, who has the very Spanish-sounding name Enrico Chivaldori. The inhabitants all speak English, but their names and accents vary between American, Spanish, German and vaguely East European with no rhyme or reason whatsoever.
* Jagged Alliance is, perhaps mercifully, left to the player's own imagination.
* Jagged Alliance: It is mentioned in the bio for Mary Beth Wilkins in "2" that, after she rose to fame in mercenary circles due to her participation in the Metavira campaign depicted in the first game, she received a lot of attention from loony fans and stalkers, until one of them gunned her down in front of her home.
* Jagged Alliance: Leo Kelly's bio mentions that between jobs as a globe-trotting mercenary, the good colonel also works as a technical consultant for various film producers.
* Jagged Alliance. Nearly every medic also has a decent dexterity stat (as it is required to be a decent medic) that helps their accuracy slightly.
* Jagged Alliance regime he used to work for is somewhat vague given that his bio mentions an in-universe rumour that he was the second Kennedy gunman...
* Jagged Alliance series is fairly open ended and lets players choose their own method. Most go with the "get money, buy more guns, hire more mercenaries" approach, but some more masochistic players will make a drive for the final city with one team, or even with a single soldier. There was even one who attempted to finish the game by sneaking and only using a knife, which can be tricky later on against the hordes of machine-gun-wielding commandos and tanks.
* Jagged Alliance series is full of these, although there are far fewer psychos than mentally "stable" mercs. It is also notable that between the second and third installment in the series, when A.I.M. becomes a high-profile and almost respectable organization, most of the outright certifiable people on the roster are quietly dropped.
* Jagged Alliance series wounded soldiers leave a trail of blood, making it easier to track them.
* Jagged Alliance' Simmons". If the mercs ever have lines that refer to other mercs, the callsigns are almost exclusively used in favor of the given names.
* Jagged Alliance since it's only held on with duct tape), or combining a game

system, an x-ray tube, and a couple other things to make an x-ray scanner (reports of massive doses of x-ray radiation when in use are "unconfirmed").
* Jagged Alliance. That said, medics whose marksmanship are on par with the most expensive mercs are very few.
* Jagged Alliance The result doesn't even sound much like a Polish guy doing a bad impression of Ahnold.
* Jagged Alliance, with his only redeeming factor being an insanely low daily cost. Given that the game limits you to 8 mercenaries at a time, he only exists to be laughed at, or to send into an ambush to be killed.
* Jagged Alliance you could make a barrel extender out of a tube, glue and duct-tape (never mind it's not rifled and somehow the perfect caliber no matter what weapon you put it on). You could also make a rod-and-spring attachment, and build a fully functional X-Ray scanner out of a Lame Boy, a Fumble Pack, wires, chewing gum, and an X-ray lamp. Worked on AA batteries.
* Jagged Edge Concerned that the client that she's defending for murdering his wife is indeed guilty, his lawyer goes to the presiding judge and discussed the situation in hypotheticals so as to maintain his confidentiality, which he's still entitled to.
* Jagged Edge follows a high-profile defense lawyer trying to prove the innocence of Jack Forrester, a man accused of murdering his wife. While she manages to win the case, she learns in the finale that Jack was in fact guilty the whole time.
* "Jagged Little Pill" (the Ecstasy episode) was relatively realistic. Did she royally screw up her life? Yes. Did she go to jail and/or suffer a permanently debilitating injury? No. Did the parents see the mess left over from the
* JAG going through the same thing at the same time thought it was all great fun.
* JAG had Bud fill this role in an episode. With the twist that after it was over, Harm (who'd been the defense attorney for the case) told him that he thought the defendant really was guilty.
* JAG had Meg tell a story about how her Italian boyfriend got very confused by the "hook'em horns" sign being made by everyone at a University of Texas at Austin football game she took him to. (To many Europeans, the exact same gesture means "I'm screwing your wife.")
* JAG had several. The eponymous assassin Hemlock in ”Hemlock”, rouge DSD agent Clark Palmer in ”Imposter”, and Al-Qaeda associate Sadik Fahd in ”Persian Gulf”.
* JAG had "The Prisoner" in its first season in which Harm was held by the Chinese.
* JAG: Happens to Harm in the climax of "Déjà Vu" when he's attacked in his apartment.
* JAG: Harm’s girlfriend Navy psychologist LCDR Jordan Parker breaks up with him when he gets his night vision fixed and regains full flight status. She says she “fell in love with the lawyer, not a fighter pilot who goes to sea and leaves her for six months”.
* JAG: Harm had his vision impairment fixed and went back to flying Tomcats for a short while, before his new commanding officer convinced him that he was too old to be competitive as an aviator against all the younger pilots, despite his skill, and that he would do the most good as a judge advocate.
* JAG, Harmon Rabb's half brother Sergei Zhukov is played by Canadian Jade Carter. Evidently he won the part over several Russian actors.
* JAG: Harm owns a '70s Chevy Corvette. It gets stolen and stripped for parts, but he eventually builds a new one. Mac buys herself a more modern Corvette at one point. Something of a Kick the Dog moment, however, as this was in the same episode that Harm's Corvette was stolen and stripped.
* JAG: Harm's dad just so happened to look in his prime exactly like his son later does in his prime (save for the mustache).
* JAG: Harm's new neighbor, Meghan O'Hara, in "Washington Holiday" turned out to be a trained assassin, whose mission was to kill the Romanian king while in DC.
* JAG, Harm's new partner, is trying to figure out why Harm is being so awkward around her.
* Jaghatai Khan, Primarch of the White Scars, firmly believed in a version of

this, believing that peace would cause him and his brothers to grow fat and weak from not having any enemies to fight. It says something that he was totally unbothered by the fact that, after conquering his homeworld and uniting all the tribes of Chogoris, those same tribes went back to fighting each other after he left. It actually hinted that he
* Jaghatai was a loner who hardly ever associated with any of his brothers, so when the Heresy kicked off, he could trust nobody and nobody could trust him.
* JAG have audio commentaries and since they were recorded nine to ten years after the episodes were made, they can be characterized as remembrance style.
* JAG. Hey, all the main characters are military officers, so why not?
* JAG him to wake up. Just as the medical staff are pulling the CO away, the Private wakes up.
* JAG. His main saving graces are that he is not personally corrupt, is devoted to his country and is usually loyal to his friends at least at the end of the episode.
* Jagi also yells the phrase after realising that none of his attacks are working on Kenshiro during their final battle.
* Jagi is the less skilled of the Hokuto Brothers... And can still shatter a pillar with a fist, and may actually have more raw strength than Kenshiro. He only loses because Kenshiro's technique is much,
* JAG: In “Washington Holiday” Harm is assigned as naval escort to the daughter of the King of Romania while in DC. While Romania is a real country it has not restored its former monarchy in real-life.
* JAG: In "Act of Terror", a Marine guard is charged for murder after he shot a terrorist suspect during a prisoner transfer, on live TV. Harm, as defense counsel, begins to explore the option of an insanity defense, but he’s taken off the case by the defendant, who’s hired a different attorney.
* JAG: In "Cabin Pressure", Harm & Mac are sent out to a ship to investigate the death of a moonshiner.
* JAG in "Déjà Vu". Harm is blindsided due to his own emotional baggage.
* JAG: In "Dungaree Justice", a female sailor passed out in a bar and at closing time, the owner helped her out to her car. When she woke up, she discovered that she had been raped. Some of her shipmates decide to exact vengeance on the bar owner, who they assumed to be the perpetrator. However the bar owner is proven to be medically impotent. The real perpetrator turns out to be one of the shipmates who didn’t like having females serving in the navy.
* JAG: In "Dungaree Justice", the article 32 hearing of Mac’s dubious actions in "People v. Mac" takes place and it is discussed to what extent she had lied in the earlier episode.
* JAG: In "Embassy" the Sudanese Ambassador has stolen vials of Ebola from a U.S. lab, intending to use it for political purposes in Sudan.
* JAG: In "Father’s Day", Corporal Wetzl runs a tank over his CO’s tent, claiming to be distracted about the divorce from his drug-addicted wife and impending custody hearings on their infant son. Frustrated by the countless lies spun in court and in the media by his wife and her lawyer, he takes action of his own, commandeering a tank with his son inside. He blows up a TV van and gets into a stand-off. Eventually Harm and Mac manages to get him to surrender by bringing his grandmother on the spot.
* JAG; in German, Farsi and Russian; courtesy of in-house polyglot Mac.
* JAG: In "Heart & Soul" Mac says the number to her office phone is 555-0171.
* JAG: In "High Ground"; when a promise by his former CO not be deployed to Bosnia is reversed by the new Colonel; Gunnery Sergeant Ray Crockett shots the rear mirror of the Colonel’s car when moving at 1 000 yards distance, as a warning before he takes off to the hills.
* JAG in "People v. Rabb", and Article 31 rights by Leroy Gibbs in "Ice Queen".
* JAG: In "Pilot Error", Harm and Meg attend the funeral of Lt. Pendry, which is complete with military honors and fighters flying the missing man formation. It is meaningful to Harm because Pendry was his friend and the loss for the son of the deceased mirrors Harm’s own loss of his father at roughly the same age.

* JAG: In "Retrial," a sailor had unbeknownst to him hired a transgender prostitute. When finding out, the sailor changed his mind and the prostitute threatens him with a knife. The sailor defends himself and accidentally stabs the prostitute and runs away in fear and shame.
* JAG: In "Retrial", the wives of the bigamist prosecuted by Mac drew straws on who shouldn't divorce him.
* JAG: In "Sightings", this is one of two methods the UFO has of rendering people helpless.
* JAG: In "Standards of Conduct", one of these goes after Harm in a traffic accident scam. Actually Harm concedes that he doesn't know enough about civil law/tort to handle it himself.
* JAG: In "Straits of Malacca", Mac wears a special forces-style wetsuit when boarding a cargo ship.
* JAG": In the previous episode, CIA man Clayton Webb had been brutally tortured by terrorists in Uruguay, but he escapes with the help of Gunnery Sergeant Galindez. They make it to a rural hospital with limited supplies. Seeing a woman suffering in the final part of her pregnancy, Clayton chooses to forgo any pain medication so it can be used for this mother. The woman is thankful and successfully births her son, who she names after Clayton.
* JAG: In the season eight episode "Need To Know", the CIA Director and his attorney tries to block the Navy's attempt to declassify material relating to a secret joint Navy-CIA submarine mission in 1968 in which the sub sank near the Soviet coastlline.
* JAG: In the second season episode "Rendezvous", a murder case is solved by obtaining photos from a Russian spy satellite showing that the defendant's car was present at the scene of the murder.
* JAG: In the two-part episode "Dog Robber", a U.S. reconnaissance plane has to make an emergency landing in mainland China.
* JAG: In "Tiger, Tiger", Harm's cell phone starts ringing, despite being onboard a frigate out in the Mexican Gulf somewhere between the Florida Keys and Cuba, and he had tried to use before to no avail. Moments before it started ringing, Harm told the terrorists holding the ship's crew as hostage something to the effect that "It won't work out here." The caller is Mac, but she plays the role of an ignorant tourist. After the non sequitur call is over, Bud explains it away as an atmospheric distortion, which the terrorists buy for lack of a better explanation.
* JAG: In "Tribunal", Sturgis is assigned as co-defense counsel for the fictional Al-Qaida No 3 in the military tribunal held aboard a warship, and has an Army Special Forces captain on the stand to answer questions about unconventional warfare by US Forces and that of unlawful combatants. The implication of the final question being that there's not always a distinct difference between them.
* JAG: Invoked on at least 3 different occasions when an aviator did something which was clearly the wrong thing to do (e.g. accidentally killing Russian peacekeepers in Serbia, unilaterally destroying a U.S. reconnaissance aircraft captured by the Chinese, and intervening in civilian law enforcement in the U.S.), but got acquitted of all significant charges all thanks to having Harmon Rabb as his defense counsel. After the trial, however, the CO informs the aviator that he's permanently grounded and will undergo extensive medical evaluation. In any case Uncle Sam always wins.
* JAG: In "War Cries", the Shining Path operatives have a pair of pretty girls wave at the Peruvian soldiers standing guard outside the U.S. Embassy so an old lady can walk past them and leave a bomb.
* JAG: In "War Stories", Admiral Chegwidden bawls out a sailor who failed to salute him while passing. The "sailor" snaps at him sarcastically, because it turns out he was an actor in a movie being shot next to JAG HQ.
* Jagi, otherwise he would not have told Kenshiro that he was responsible for turning his best friend evil and screwing up his life.
* JAG is about a 10k charity run in which old rivalries resurface and wagers are made.
* JAG is a Navy SEAL who became a lawyer and got promoted up as high as a military

lawyer can get. However, that doesn't stop him from, once in a while, show what a true badass he really is.
* JAG is found in Iraq, married to a Bedouin sheikh. It turns out that she’s provided intelligence to Saddam’s regime through the years.
* JAG is now a part of that universe, after the Five-0 team referenced a phone call from the Phoenix Foundation.
* JAG? Issues with various aircraft? Homeless veterans? Racial bigotry? Gays in the service? You pick 'em, this show has 'em in spades.
* JAG it was. It all comes down to that he’s seeking legal representation for a fateful stabbing he had committed the same day on a Vietnamese immigrant, who actually turned out to have been the camp commander.
* JAG, it was retooled to include more legal drama and soap opera elements, partially to appeal more to female audiences.
* Jag Lever Pappa ("I live, daddy") by Siri Marie Seim Sønstelie describes the Utøya massacre, where on July 22, 2011 a gunman Andreas Breivik killed 69 people on the Norwegian island Utøya, most of them teenagers, and wounded many others. Siri Sønstelie, a survivor, recounts how Utøya seemed a paradise for her before the attack, a carefree place of peace and harmony with a special atmosphere where you had fun and could feel completely safe, and how the attacker turned it into hell.
* Jag Lever Pappa ("I live, daddy") by Siri Marie Seim Sønstelie whhich describes the Utøya massacre, where on July 22, 2011 a gunman Andreas Breivik killed 69 people on the Norwegian island Utøya, most of them teenagers, and wounded many others. Siri Sønstelie, a survivor, remembers that while most people caught in the shooting switched their phones off to avoid discovery, others continued to talk and / or send texts, even as they were shot at.
* JAG Lieutenant Catherine Graves is a fan of crime and mystery novels. Even though she is not a lawyer, being savvy of those genres turns out to be quite useful on several occasions.
* JAG, Lt. Bud Roberts lost his leg to a landmine in Afghanistan. Much of that season was devoted to his learning to use a prosthetic leg and regaining his strength so he could remain a JAG officer.
* JAG, Lt. Meg Austin for the rest of the 1st season, and Major/Lieutenant Colonel Sarah "Mac" MacKenzie for the rest of the series.
* JAG, Mac and Clayton Webb go undercover as husband and wife on a CIA mission in Paraguay in season 8/9.
* JAG. Mac, for her part, goes diving under the table when this happens. When she later claims that Marines never hide, Harm asks her what she was doing down there.
* JAG: Mac goes undercover in season 5 as a Chief Petty Officer trying infiltrate a Wicca group, including getting herself sky-clad.
* JAG (Mac) often got the chance to speak Farsi, a langauge in which she is proficient.
* JAG. Mac rushes to the airport to stop ex-fiancé Mic from returning to Australia. He sadly walks away without a word, barely even looking at her, having finally realized that she'll never love him the way she loves Harm.
* JAG: Mac was assigned to the judiciary in the latter half of season eight because of Catherine Bell's pregnancy.
* JAG: Mentioned in the 3rd season episode "Vanished". The villain orders one of his underlings to kill the hostage and bury them in the woods. The underling seems to interpret this literally by asking if they are to be buried alive. The villain replies by saying he’s not heartless and he can shoot them first.
* JAG mode after 9/11 (naturally, seeing as the show was always just one big propaganda project to drum up support for the military). The main characters routinely traveled into hotspots like Afghanistan, Iraq and others where real-life Judge Advocate General personnel would never set foot.
* JAG, no matter whether it is in a fistfight, in the cockpit, or in a courtroom.
* Jago, a cult leader gains reality warping powers. The effects are bad for people in the vicinity, as their fears and bad memories start taking on physical form. It goes better for him at first, but things end badly for him after he loses control

of his powers.
* Jago, Allison Conway is the girl that even the bullies are frightened of. When she meets an undead revenant still bearing the scars of his firey death, she doesn't run away screaming, she invites him to be her boyfriend.
* Jago as the government's official liaison to IΨT, the more organized and biddable NGO that was given the Club's duties after the government forced the Club to shut down.
* Jago, a town is afflicted with a force that causes people's fears and obsessions to come to life. Jeremy is afraid of an Evil Dwarf that he believes hides in his room and comes out after the light is switched off, and will try to suck his brain out of his skull if he doesn't hide under the covers. When it manifests, he actually doesn't have too much trouble defeating it, because it's actually a bit ridiculous when it appears in clearly visible physical form instead of as a vague possibility lurking in the dark — and also because by then he's had several experiences that were far more terrifying.
* JAG: Occasionally the writers would have Admiral Chegwidden taking care of business, such as acting as a defense attorney, which ought to have been handled by a subordinate.
* JAG: Occurs in several episodes. Not only with external parties (i.e. non-military) such as local police or FBI; but often the local commanding officer does not like the presence of JAG officers from Washington in his/her fiefdom.
* JAG of the contract which stated "subject upon availability and to the needs of the Navy".
* JAG (of the Iran-Contra scandal fame). Meg calls in a favor from "Uncle Ollie" once or twice when they need info they can't get through official channels.
* Jago. It's ultimately shown that much – although not all – of Jago's reality warping is all in the mind; his psychic power causes people to perceive reality as different, but the physical world is unchanged. At some points, individuals manage to temporarily see through the illusion to the more mundane reality beneath. However, when everybody present agrees that a thing is happening, and it's convincing enough that people die because they believe they've been killed, the distinction is largely moot, and Jago poses a genuine threat.
* Jago, Maurice Maskell's father routinely punished him with ten strokes of a leather riding whip. He takes pride in the fact that he's not the man his father was, and only gives his children the occasional smack.
* JAG, one famous real-world figure, Oliver North, appeared on the former series as himself.
* JAG, one of the first things she decides to do is to have a fire drill and to have Lieutenant Sims to review and update all internal administrative manuals.
* Jago, one of the cops who find what's left of Danny Keough has to go outside and vomit.
* Jago, one of the first signs that Anthony Jago's arrival in the village is warping reality is a small girl, whose grandfather says "Jesus H. Christ on a bicycle!" when he's upset, meeting Jesus Christ in the flesh... and riding a bicycle.
* Jago, people's personal demons come to life and start attacking them. The repellant Mike Toad encounters his in a pub, and flees into the restroom with the intention of escaping out of the window. The window turns out to have a security mesh on it that he can't break through, and he dies a humiliating death on the unclean restroom floor.
* Jago powers, so the protagonists have to stop him before his powers expand to the point where he can make the world end according to his beliefs.
* Jago, Susan works for a paranormal research organization called IΨT, pronounced like "Eyesight", but on typewriters or word processors where the psi symbol is unavailable it's rendered as IPSIT, which results in a scene where a character pronounces it "Ip-Sit".
* Jago to a collection of items related to the Yorkshire Ripper murders. However, she didn't have any effect on the investigation; the few things she was able to gather about the murderer turned out to be true when he was caught, but that

happened without her input because the police considered her impressions too vague to be useful.
* Jago, Wendy sees the burning figure of Badmouth Ben reflected in the eyes of the person she's talking to, but when she looks behind her there's nobody there.
* Jago who wants him to stick around. The manifestation of Danny Keough's terrors tries to get someone else to believe in her, but nobody else can because Danny's fears were so personal and idiosyncratic that nobody else can understand what she is, let alone believe that she exists.
* Jag Panzer due to sheer manliness. Even Patton might have trouble withstanding this assault.
* JAG planted floppy discs with corrupted software code from the eponymous weapons system with an innocent colleague, to steer attention away from his own planned escape.
* JAG, Rear Admiral A.J. Chegwidden, served as a Navy SEAL in the same war. Sturgis Turner's father, Chaplin Turner, also served in Vietnam.
* JAG: Rear Admiral AJ Chegwidden, the Judge Advocate General of the Navy (boss of the team) and a former Navy Seal.
* Jagreen Lern, the Theocrat of Pan Tang, is the final, ultimate enemy of Elric of Melniboné and a champion of Chaos.
* JAG regime) to act as legal counsel for the captured American Marine, so the Iraqis, including the villain, treat them as welcome guests at first.
* JAG Rene Peterson, in seasons five to seven, is very much a personification of this trope. An up-and-coming director of commercials and music videos, her neurotic personality traits are very much the antithesis of all the main characters.
* JAG: Roscoe Martin, the paraplegic Vietnam veteran in "King of the Fleas" and "The Martin Baker Fan Club", is the broken soldier type who while getting himself in trouble manages to manipulate people around him (including Harm).
* JAG; Royal Ulster Constabulary Inspector Vincent Hutchinson in "Trinity" who arranged the kidnapping of the infant child of an American naval officer and an IRA member, only to put the blame entirely on the IRA; and DC Detective Frank Coster in "The Stalker", who did not only stalk Mac, but killed her former boyfriend Dalton Lowne and kidnapped her.
* JAG: Sarah "Mac" Mackenzie has the rank of Major in seasons 2, 3 & 4.
* JAG: Several of the main characters are graduates of the U.S. Naval Academy in Annapolis, MD.
* JAG. She was born in London to a Scottish father and Iranian mother.
* JAG, so she hit him twice.) The next evening, she returns to the bar and runs into the same Marine officer, who politely apologizes for his behavior and invites her to share a drink with him. She declines.
* JAG: Strangely enough for a military-themed show, they never played this trope straight. Inverted at the end of "High Ground", when the hardened old master sniper is told by the colonel to pin his chevrons back on.
* JAG: Sudanese Ambassador Moshak in "Embassy" stole vials of Ebola from a U.S. military lab, and when Harm is about to get him, he throws a vial of Ebola at him. Fortunately Harm caught it.
* JAGS Wonderland and this trope. And Chessboard Seven can barely be called reality by any stretch.
* JAGS Wonderland sown into them on the manufacturing line so they won't screw up the dress code) was the first step.
* JAGS Wonderland. They understand poetry and literature because they exist outside the universe, where only information and narration matters. What they don't get is maths and physics, and they hate humans because they can understand both science and literature.
* JAG taking place on an aircraft carrier will feature this trope in some fashion.
* JAG that works for "the highest bidder", but develops a crush on Mac.
* JAG The Admiral cuts the tape off midway and tells Tiner to never speak of this again. Tiner wisely claimed nothing happened.
* JAG the exterior of the in-universe JAG Headquarters building in Falls Church, Virginia, is shown once or twice in most episodes.

* JAG: The first season episode "War Cries" gives us Ambassador Bartlett, a snarky career politician who discusses matters of state and embassy security while sipping scotch. As the episode continues, we see that she has quite a bit to drink about.
* JAG, the Macroplex executive accepts this and promises to have the newly discovered flaws corrected.
* JAG: the man who took Admiral Chegwidden hostage was sentenced to 8 years, then got time served for the time he spent in prison for treason (which he was innocent of, and broke out to prove).
* JAG The Marine charged with murder receives top civilian counsel provided by a right-wing businessman. But it turns out that the businessman has made money transfers to terrorist suspects in Saudi Arabia, and while he agrees to let the FBI apprehend the next receiver, that one is gunned down in a drive-by shooting. The episode ends with the businessman smiling.
* JAG then all the screens go blank around him, and we see he's in a simulator, with the instructor telling him "See, that's what would have happened if you'd tried to land it."
* JAG: The other method used by the UFO in "Sightings" to subdue and intimidate people.
* JAG: The trope is mentioned in "Wedding Bell Blues" by Bud’s father.
* JAG: The trope is seen in several episodes in the contemporary U.S. Navy sense.
* JAG: The Wicca religion is portrayed as such in "The Witches of Gulfport".
* JAG: This concept is invoked in an episode, in which a seaman walks off her ship, complaining that recruitment commercials and an overzealous recruiter depicted a far more glamorous Navy, where she could be an air traffic controller, but what she got was endless deck swabbing. She ends up being charged with desertion, and her defense counsel deconstructs this concept to get her off. He even gets the director of a recruitment commercial to admit that she ignored the mundane boring parts of actual Navy life and displayed only the fun and glamorous parts.
* JAG: This trope always is played with in some fashion every time Harmon Rabb meets Thomas Boone, the wingman of his MIA father.
* JAG this trope is somewhat subverted as the main characters actually have far fewer ribbons (in terms of quantity not quality) than Navy and Marine Corps personnel in real-life similar positions do have.
* JAG: This was the case with Harm and Mac for almost nine seasons until it was resolved in the very last episode, "Fair Winds and Following Seas"; due to the fact the they are both career-oriented military officers working at the same place. Plus multiple other vague excuses were made throughout the series.
* Jaguar cars. Unlike the cat, the ads always pronounce it "Jag-U-Ar".
* Jaguar Paw, fleeing from his captors, finds to his horror that the tree he climbed contains a mewing jaguar cub
* Jaguarwing hardpoints to which either AIM-9 Sidewinder or Matra R550 Magic heat-seeking short-range air-to-air missiles can be mounted.
* Jaguar XJ220. You were given the option of buying your way out of the contract. Try to sue and the court will find in Jaguars' favour. Really, they wouldn't, under the right conditions, have ever needed to deliver a single car. World economic problems added to this, and eventually only 275 cars out of a projected 350 were built, and not all of them sold.
* Jaguar Yokota left Yoshimoto Women's Pro Wrestling Jd' after coming to the conclusion the promotion wasn't going to grow any further and it was time to become a free lancer. As the promotion more or less existed for the sake of reviving Yokota's career, Hidenobu Ichimaru decided it was time for a change. That being starting the "athress" program in 2001 and turning the whole operation into JD Star in 2003, with the goal of getting pro wrestlers noticed by film or television companies who would make them actresses and eventually crossover pop stars.
* Jaguar Yokota's promotion, Yoshimoto Women's Pro Wrestling Jd', or JDStar, took this approach after three years of virtual aimlessness following Yokota's virtual abandonment of it, trying to bring a more
* Jaguar Yokota, touring as a singles wrestler and one half of Diana's tag team champions at 54.

* JAG: Used by the Colombian drug smugglers in 1st season episode "Sightings", and later used by Harm against them.
* JAG, usually as a defendant's backstory. Coates was the most prominent example.
* JAG. Usually it is Admiral Chegwidden who, following the opening title sequence, hands a new case or mission to either Harm, Mac or to them both.
* JAG usually kept itself grounded in something resembling reality... except for the episodes involving Mac's psychic powers and Bud's near-death experience. And then there was that one time a villainous plan involving a fake ghostly vision was foiled by the appearance of a real ghost.
* JAG veers into this some times, as they go to some lengths to win their cases, like firing a sub-machine gun in the courtroom.
* JAG. Was abolished in season 4 and many of its former agents went rogue.
* JAG was an active duty Marine from 1955 to 1959. Gunnery Sgt. Victor Galindez is an example of a recurring character on the show who exhibits this trope. Both in the office and after he requests a transfer back to combat duty post-9/11.
* JAG was Harm’s search for his long lost father, although it was latent in most episodes not directly addressing it.
* JAG was trying to kill her because she was on her trail, or that Private Johnson was trying to rough her up out of spite.
* JAG, when Bud and Gunny go to the ex-wife of an old sailor they're looking for to testify at a hearing, Gunny says to Bud that they should approach it as good cop and bad cop to obtain a positive result.
* JAG: Whenever Harmon Rabb flies in an F-14 Tomcat he has a RIO. Elizabeth "Skates" Hawkes usually filled the role, though there were one-offs (either a dead pilot's RIO or someone else involved in the case). In the pilot, Harm himself was the GIB and had to take over when the pilot (the ship's CAG) was injured.
* JAG when Gibbs alerts a destroyer's skipper of a potential biohazard threat.
* JAG, when Harmon Rabb seeks to be the guardian to Matilda "Mattie" Grace in season 9: because social services are very thorough.
* JAG, where a senior fighter pilot misjudged the height and distance to a ridge due to his failing eyesight. This caused his wingman to clip a telephone pole with his F-14 Tomcat, lose control and eject. The plane crashed into oncoming traffic, killing a mother and child.
* JAG where both Harm & Mac argue before the US Court of Appeals for the Armed Forces, and Chegwidden once prepared to argue before the U.S. Supreme Court. Played straight in the episode "Tribunal" where the fictional Number 3 in Al-Qaeda is sentenced to death by a military commission.
* JAG, where the head of that organization also reported to the Secretary of the Navy, who was a recurring character from season 3 and onwards.
* JAG while we see that he's attached quite a few post-it notes to the script.
* JAG, who served as a Marine in the 1950s, and who tends to make many of his major characters Navy or Marine vets.
* JAG with one of his bullies; the B-plot is the same, except it's between the cadets holding the mock trial.
* JAG would take all its material of military operations out of various war films.
* JAG. You can't get more of an aversion than that (apart from never becoming one at all).
* Jahad, King of the Tower by the Guardians and are not only immense in power but also described as having godlike status to the inhabitants of the Tower and being worshiped. Jahad, in his own words, sees things from a god-like perspective and is trying to bring fate itself under his control.
* Jaha makes it into the bunker at the end of Season 4, only to be killed off in his first appearance in the second episode of Season 5.
* Jai Courtney was said to have originally been chosen to portray Captain Boomerang. Both actors are in the movie, but their parts were flipped around. This makes sense as Boomerang is Australian, as is Courtney, while Deadshot became a larger role which is more fitting for a leading man like Smith.
* Jaiden Animations after the latter was accused of inappropriate behavior with underage fans.

* Jaiden Animations, as both content creators are subscribed to one another and follow each other on Twitter.
* Jaiden Animations: Though she defaults to male pronouns for him, Jaiden has confirmed that she doesn't really know if her pet bird Ari is male or female, noting that the only way to know for sure for his species is through a blood test (which costs about 25 dollars). Jaiden has noted that she doesn't really care what gender Ari is and loves them no matter what.
* Jailbait (2014): Anna kills her stepfather in self-defense when he's trying to rape her. The cops and jury don't believe it though, since her mother denies he'd done anything, so Anna is thus convicted of his involuntary manslaughter, getting four years in prison.
* Jailbait (2014): Despite numerous beatings and assaults, the worst injury Anna sustains is some bruising that disappears by the next nude scene and a small scar on her cheek.
* Jailbait (2014) (lesbian main character, lesbian supporting character; subject matter includes queer female romance)
* Jailbait Taboo: It is considered immoral to have sex with underage teenagers because individuals below the age of consent are not considered to be mentally mature enough to consent to sex with adults. The term "jailbait" refers to how pursuing minors for sex is illegal and likely to result in incarceration.
* Jailbait Taboo: Relationships between teenagers and adults being taboo.
* Jail Bake: Helping an inmate escape prison by giving them baked goods that have stuff they can use to escape hidden inside.
* Jail Bake: Helping someone escape jail by sending them baked goods that have materials they can use to escape prison hidden inside.
* Jail Bake: Hiding something that will help a prisoner escape, inside a cake.
* Jail Bake, you'll have to find a more creative method if you need a file smuggled in; modern prisons have metal detectors and anything visitors bring will be searched.
* Jailbreak. Abandoned in February 2007, it was unfinished until September 2011, when the ending was written.
* Jailbreak and all the other characters still trapped, stranded, or otherwise in conflict.
* Jailbreak is The Great Escape, with every single possible bad thing that could conceivably happen within 134 pages happening.
* Jailbreak puzzle, and ZAD and the Completely Sane Man were revealed to be the skeletons in one of the cells. Another Ace Dick comes across the forest where two of the jail's prisoners escaped to, as well as the tree stump where they died.
* Jailed One After Another: Multiple characters get arrested and imprisoned in close proximity.
* Jailhouse Blues is that Dr. Wily hired a lawyer and had criminal charges filed against Megaman for the destruction of his fortress oh so many times, which ends up landing Megaman in jail.
* Jailhouse Blues the character of Bean Man has puns so bad, or at least so undignified, that his creator forbids him from using them. He does anyway and earns himself a rather painful death in the process.
* Jailhouse Blues), Yo Momma Man reveals that he's programmed to reflexively respond to any insult with "Yo momma!"
* Jails are often treated this way; surely no one wants to live near convicted criminals. Even though, as
* jail time!" (At the end of the episode, Stan pays off the debt and makes peace with her - for the moment - by selling the car.)
* Jaiman: Land of Twilight, become her true age and die. If the amulet is destroyed, so will the Sisters.
* Jaiman: Land of Twilight from sacrificial victims. If the Priestess' amulet is removed she will suffer this trope, become her true age and die. If the amulet is destroyed, so will the Sisters.
* Jaime and Brienne, the handsome knight with a bad reputation and the ugly woman with a stubborn code of honour.

* Jaime and Tyrion are highly contrasted as well. Jaime is tall and handsome, Tyrion is a hideously deformed dwarf. Jaime thinks with his feelings and is a skilled swordsman, Tyrion is incredibly manipulative and fights with his wits. It was said that Jaime was the only one who gave a crap about his younger brother, in fact.
* Jaime detests being called "Kingslayer," particularly when it comes from men like Ned and Robert whom he views as hypocrites since they fought a rebellion against said king.
* Jaime gets a kick out of verbally taunting Catelyn, and doesn't seem to mind whether he gets beaten with a rock or bound in a dozen chains so long as he can piss Catelyn off. And when Catelyn decides to free Jaime and have Brienne escort him to King's Landing, he taunts Brienne non-stop through an endless stream of insults. It's amazing that Brienne hasn't strangled him yet. Probably because she swore to get him to King's Landing safely (for a given value of safe) but
* Jaime has two other squires as well due to his position as Lord Commander of the Kingsguard: Lewys Piper becomes his squire after most of the Riverlords submit to the Lannisters. Hoster Blackwood becomes a squire/hostage to Jamie after House Blackwood surrenders to the Lannisters.
* Jaime is a male version of this to Tyrion, especially because he is the only family member who respects Tyrion at all — he's even seen bringing Tyrion some extra prostitutes before the feast in the first episode!
* Jaime Lannister, also known as the best swordsman in Westeros loses his sword-hand, and so far has made little progress at learning to fight left-handed.
* Jaime Lannister and Brienne of Tarth, aesthetically at least. Jaime is said to be so handsome it
* Jaime Lannister and Brienne's relationship. Jaime is a handsome and
* Jaime Lannister and Ned Stark both display high skill at swordsmanship, and are able to match each other blow for blow. Also, Barristan is impressed by Ned's skill. Jaime is ironically one of the few remaining knights of the Kingsguard who actually
* Jaime Lannister becomes known as the "Black Lion" for the black cloak he wears to mourn his uncle Tygett after he's slain at the Battle of Tara.
* Jaime Lannister charges on horse towards Daenerys who is beside her biggest dragon. Drogon, of course, attacks Jaime with deadly dragonbreath... but he is saved by Bronn tackling him to safety out of nowhere. That safety being a lake where the characters stay under water long enough for the armies to pass. The second time unlimited underwater time saved characters.
* Jaime Lannister ends up being forced to undergo an extremely painful surgical procedure in order to prevent an infection from spreading. For extra creepiness, the doctor presiding over this treatment is Qyburn,
* Jaime Lannister has, according to him and to the best knowledge of the reader, only ever loved or had sex with
* Jaime Lannister has a reputation as the best warrior of the current age in Westeros. He's a
* Jaime Lannister has some shades of this in his relationship with Cersei. He's not blind to her faults or her evil actions, but he genuinely believes that she is acting for the greater good of their family and that she ultimately wants to build a better world. He
* Jaime Lannister. He saved King's Landing from being burnt to the ground by Aerys Targeryen, but everyone felt that breaking his oath to protect Aerys was more important (not that he helped it, since he never told anyone about the "being burnt to the ground" thing). Ever since, he's been dubbed the Kingslayer and is treated with mildly concealed contempt by everyone.
* Jaime Lannister himself is famed as possibly the best swordsman in Westeros in his prime. However, he may ultimately be a deconstruction of the idea,
* Jaime Lannister implicitly takes pride in his beautiful golden armor being without a single dent. He also pushed a child out of a tower.
* Jaime Lannister is forced to strip his armor off in front of the Iron Throne when removed from the Kingsguard.

* Jaime Lannister is probably the best example; his biggest evil act was the murder of King Aerys after swearing to protect him, but what most characters don't know (or conveniently forget) is that Aerys was a crazy son of a bitch, who, if he had lived just half an hour longer, would have ordered his capital city burned to the ground with
* Jaime Lannister killed King Aerys, thereby damning him as dishonorable scum in the eyes of the whole kingdom, in order to save the whole of King's Landing and his father from a wildfire trap that the Mad King had laid beneath the city.
* Jaime Lannister leaps into a bear pit to save Brienne of Tarth, who despised him up to this point. Suffice it to say that she most
* Jaime Lannister made a name for himself while still just a squire, winning his first tournament at 13 and being knighted at 15.
* Jaime Lannister mostly wears these, when he's not wearing his shiny Kingsguard armor.
* Jaime Lannister spends a large portion of the first three seasons as a prisoner.
* Jaime Lannister tells Catelyn Stark that he has only ever been with Cersei and no-one else, before using that little fact to point out her husband Ned did not show her any such loyalty when he fathered a bastard. Subverted ever so slightly in the episode "Kissed By Fire", where he checks out Brienne in the bath for a second when feverish. Also by the fact that Ned actually
* Jaime Lannister was this until his army was ambushed. Even then he killed a dozen Stark men before being captured.
* Jaime Lannister, who's renowned as the greatest swordsman in the kingdom and a member of
* Jaime names Bronn second in command of Lannister forces during the siege of Riverrun.
* Jaime often comes across as very arrogant and uncaring of others. However his father Tywin points out this is merely how he wants to be viewed.
* Jaime, on his way back to King's Landing, turns around and races to Harrenhal to rescue Brienne, to whom he'd grown close in their travels, from being killed in a bear pit. He's only risking his own safety, seeing that he could have continued on his journey to be with his sister again.
* Jaime reveals to be quite competent military wise, taking back Riverrun by threatening Edmund's son, convincing the Tarly to betray the Tyrells and, knowing Tyrion has a plan to take Casterly Rock, uses it to strand the Unsullied while he conquers the Reach with the force that was stationed at the Rock.
* Jaime's aunt Genna, who is huge in every way, and her husband Emmon Frey, a little wisp of a man.
* Jaime sees Eddard as one in regards to sword-fighting. He admits that he's heard of Eddard's reputation and wants to test his mettle. When he finally gets the chance to square off with Eddard, a guard screws it up by interfering.
* Jaime Sin The cardinal was noted for having a pretty good sense of humor, taking his unfortunate name by stride, and would invite guests to his home by "Welcoming them to the House of Sin".
* Jaime sometimes refers to Tyrion as "little brother," which is especially sweet because everyone else in Tyrion's immediate family treat him like garbage.
* Jaime speech about what will happen to the castle and its people if they don't surrender to the overwhelming numbers at their door.
* Jaime spends some time on the Summer Islands doing this in light of how his life has spiraled ever since
* Jaime, Tywin and Varys all observe that the Northerners have shades of this and Ned's one them.
* Jaimito's voice actor Older Cazarré died in 1992. He was replaced by Waldir Fiori in the
* Jaina Proudmoore, daughter of Lord Admiral Daelin Proudmoore (who also uses magic)
* Jaina Proudmoore is a rare non-evil example, justified by her father's attempted genocide. While she didn't strike the killing blow herself, the nation of Kul Tiras essentially disowned her for her involvement in Daelin's death.

* Jaina's father, Daelin Proudmoore, came to believe that the Orcs needed to be wiped out and was willing to start an impossible war to do so.
* Jaine, on learning that prince Jonus has stolen the Scepter of Mular.
* Jain Zahr, the Storm of Silence, the Phoenix Lord of the Howling Banshees. The founder of the Aspect and the single best swordsman of the Eldar race.
* J.A. Johnstone concealed her identity under two layers, first by writing under the name of her uncle William W. Johnstone for three years until admitting that he'd died, and then using a Moustache de Plume and carefully worded language on her website to conceal her gender.
* Jak 3: Wastelander after yet another argument between the two, right in front of Jak, the king of Spargus, and an audience (who all gasp in unison). It was censored by showing it off-screen.
* Jak 3: Wastelander a huge game, with two giant open-world environments and the Light Jak powers added.
* Jak 3: Wastelander. And it is outfitted with grenade launcher. Ram Rod, which is Damas' personal vehicle and it's essentially a bulldozer that can break through massive walls, is also a notable example.
* Jak 3: Wastelander", and the two look at the camera with befuddled expressions on their faces.
* Jak 3: Wastelander, as a Light-based power. It's also the only power that doesn't force you out of the mode when the gauge runs out — they'll wait until you land.
* Jak 3: Wastelander by Daxter who outright calls it a runt. Thankfully you'll upgrade to Sand Shark soon after.
* Jak 3: Wastelander, Daxter's reply is that Jak "beats" things all the time.
* Jak 3: Wastelander "fix" here means "ruin and make completely uninhabitable to current life".
* Jak 3: Wastelander had 8 dune buggies, 7 of which were equipped with weapons. These ranged from standard straight shooting machine guns to auto-targetting turret to grenade launchers.
* Jak 3: Wastelander has a great one when the precursors are finally revealed for the first time
* Jak 3: Wastelander has unlockable versions of cutscenes with commentary by the game's designers and animators, giving insightful little tidbits about the game's cutscenes and machinimia in general. One of the most amusing commentaries is for a cutscene that lasts a whole five seconds: "There's a really funny story behind this scene, but I really don't have the time to tell it!"
* Jak 3: Wastelander its path so that it crashes into a blocked gateway which must be opened.
* Jak 3: Wastelander, the Freedom League subvert this trope as they're the good guys, despite using the same armour as the old Krimzon Guard. This is likely because Haven City is in the middle of a war, so instead of re-designing everything they just painted all the KG stuff blue.
* Jak 3: Wastelander, the Krimzon bots have a gigantic floating war factory that can pump out several full sized tanks and UAVs whenever needed.
* Jak 3: Wastelander, there is an upgrade on one of the weapons that allows the bullets to bounce off of walls. When used outside it would usually only hit one or two walls and fly into the sky, but when used indoors and in small spaces it could cause HDBB effect (especially if you rapidly send out shot after shot, created a Multi-Hyper Destructive Bouncing Ball effect).
* Jak 3: Wastelander was a drone that hovered for a few seconds while spraying the area with gunfire.
* Jak 3: Wastelander, while in-game (bar cheats) you'll only ever glide down, no matter how hard you flap.
* Ja'Kaal, leader of the resistance group against the evil pharaoh in
* Jaka. Debuted in 2007 as Jonny Mangue, became Jaka in 2012. Best known for his work with Beyond, but also wrestled for CHIKARA and EVOLVE.
* Jak and Daxter, after a long and traumatic stint as a live experiment. Just before he speaks his first line, Daxter begs him: "Say something, just this once!"

Daxter makes occasional references to Jak's previous silence throughout the games ("Maybe he's mute, like you use to be").
* Jak and Daxter, after losing the hoverbike racing championship to Jak, Errol attempts to run him down. However, Jak jumps out of the way causing the enraged Krimzon Guard commander to crash in into several barrels of dark eco that Jak won, thus only hurting himself.
* Jak and Daxter: A legitimate worry for Daxter after becoming an ottsel, especially when a surly mechanic comments on how good he'd taste skinned and buttered.
* Jak and Daxter. A looming eco shortage is a frequent concern raised during the game, as without the shield wall the city stands no chance against the Metal Heads.
* Jak and Daxter are a dark eco corrupted faction of Precursors who mostly wiped out their own race far before the events of the series. The survivors fled into a subterranean station near the core of the planet to escape them.
* Jak and Daxter are called the Krimzon Guard, despite the fact that the elites are dressed in yellow armor. (To be fair, the normal Krimzon Guard do dress in red.)
* Jak and Daxter are, Jak himself included. They have incredibly long ears and odd hair colors but are never specified as anything other than probably human.
* Jak and Daxter do away with the "choose your destination" part, instead merely sending you to various locations as needed.
* Jak and Daxter features the Dark Makers. While they had no involvement in the previous games, their history is that they are creatures of darkness that were formally Precursors, the beings that created the universe, before prolonged exposure to Dark Eco consumed them, and they traveled planet-to-planet destroying all life before moving on to the next.
* Jak and Daxter fit into their respective roles quite nicely when on missions. Although, even when Daxter is the one making snide remarks about doing someone's dirty work, Jak's not above throwing some shade of his own.
* Jak and Daxter Future Dystopia, and while the gameplay still had elements of platforming, it became more of an action game.
* Jak and Daxter games, Torn often exhibits this trait, going from delivering information (relatively) calmly, then switching to an angry outburst as the tension gets to him, before quickly returning to normal.
* Jak and Daxter has a young boy-like voice in the Japanese dub provided by a woman instead of his more teenage voice provided by a male.
* Jak and Daxter, he cuts his hair short, so that he can survive in the desert.
* Jak and Daxter. He gets up and walks away unscathed... only to be flattened underneath a piece of debris.
* Jak and Daxter", is a pretty nice guy who's especially good with animals.
* Jak and Daxter: Jak does this to Daxter at least once in each of the original three games. Daxter then slaps Jak twice in the racing spin-off.
* Jak and Daxter, Jak, is constantly laying the smackdown on hordes of Krimzon Guards, Metal Heads, and pretty much anything that moves in a vaguely threatening way. And no matter what, they just keep coming.
* Jak and Daxter lets you imbue opponents you hit with the glowing red stuff, making them explode if you punch them out. (This is especially fun if there are lots of enemies in the area and you use the time-slow power.)
* Jak and Daxter, meanwhile, has the Leaper Lizard, which despite being a dinosaur/dragon-like creature is, well... A Flut Flut of a different colour in essence.
* Jak and Daxter. One of the main characters is an ottsel (otter-weasel), and there are yakows (yak-cow), crocadogs (crocodile-dog), monkaws (monkey-macaw) and hiphogs (hippo-hog) running around.
* Jak and Daxter, Osmo is to Daxter what Samos is to Jak, in a way: he compliments and praises Daxter for his excellent work.
* Jak and Daxter (Samos and Keira Hagai, though the canon-ness of this is contested) or most likely a joke (Ozmar Itchy Drawers the Third). The only ones who definitely have a last name are Gol and Maia Acheron.
* Jak and Daxter series, from the second game onward. The galaxy is controlled by evil megacorporations and our heroes are the plucky but still selfish resistance.

* Jak and Daxter series is rife with these, containing everything from races to skateboarding to stealth to rail-based shooters. These are often the more difficult sections due to how much they depart from the standard.
* Jak and Daxter series, most of which involve Daxter telling said person about their breath.
* Jak and Daxter series. Tess is one as well, only her specialty is weaponry, not vehicles.
* Jak and Daxter series was allegorical for the usage of child soldiers in African nations. A carefree youth is captured and mentally abused until his mind becomes violent enough to attack anyone a voice in command tells him to. Then someone hands him a gun for the first time in his life and he's a natural with it.
* Jak and Daxter: The Lost Frontier also gives us the Phantom Blade and the ACS Behemoth, large airships capable of carrying and deploying smaller fighter craft.
* Jak and Daxter: The Lost Frontier - Daxter: "Do a barrel roll, try a somersault, ANYTHING!!!~!!!"
* Jak and Daxter: The Lost Frontier, Daxter will go out and perform repairs, restoring some armor. This uses up a repair patch, of which you have a limited supply per mission. Additionally, your plane can still take damage while it's being repaired, potentially enough to destroy it.
* Jak and Daxter: The Lost Frontier gave one to Daxter as well, although the bunny-ears are not good for its badass credentials.
* Jak and Daxter: The Lost Frontier. While not as effective at completely clearing the airspace around you as the Judgement missile, the Swarmer Missile aircraft weapon also sends a barrage of missiles towards whatever happens to be in your way.
* Jak and Daxter: The Lost Frontier with chainsaws. A boss, the Uber-Bot 888, comes with circular saws about the size of Jak's torso.
* Jak and Daxter: The Precursor Legacy and try to pull up Jak. Of course, it doesn't really help much.
* Jak and Daxter: The Precursor Legacy enemies that eat you if you try to go out of bounds.
* Jak and Daxter: The Precursor Legacy has a poster map/game manual in one. The map is bordered with a long passage written in the in-game writing system; those who bother to translate it will find it's full of references to the first game and future storylines.
* Jak and Daxter: The Precursor Legacy Jak laughs at Daxter when the Yellow Sage refers to duo as "a boy and his muskrat". He quickly switches to an innocent whistle when Daxter looks up at him in accusation.
* Jak and Daxter: The Precursor Legacy lets you watch a cutscene where the gang unlocks a giant Precursor vault, but all we see are their awestruck reactions and the game cuts to the credits before we see what's behind it.
* Jak and Daxter: The Precursor Legacy. One was on purpose, the other, not so much.
* Jak and Daxter: The Precursor Legacy will sometimes pull this one with Daxter when the player acquires a Power Cell. He also tries to impress Keira with it, but of course to little effect.
* Jak and Daxter: The Precursor robots. You also get to encounter the occasional Dark Maker robot in the third game.
* Jak and Daxter: the unnamed planet has three celestial bodies: a sun, a moon, and a green, glowing planet that is out independent of day and night.
* Jak and Daxter, though it might just be because he finally has a girlfriend.
* Jak and Daxter to take his place. After, Jak comes back and tells Daxter that he's proud of him. Daxter's gives an excited "Really?".
* Jak and Daxter, whether they're friends ("tall, dark and gruesome"), rivals ("feather breath"), his girlfriend ("angel cheeks"), his biggest enemy ("metalo-maniac") or himself ("orange lightning"). The list goes on. Jinx frequently refers to Jak as "pretty boy", "Goldielocks", "blondie" or "Jakey-boy".
* Jak and Daxter will eat the player character if it succeeds in biting him at one point of health.
* Jak and Daxter works like this. Not only can it be applied to futuristic guns, but it can allow users to fire singularity blasts, slow time, conjure green

crystals, erect shields, or do any number of other things.
* Jakayrta/Zarrelion became Cornova's beta/co-writer after he left a deep review on the first chapter of
* Jak Dziala Jamniczek is an epitome of this. Or anything by Julian Antonisz for that matter, thanks to his unique animation technique.
* Jake 2.0, although, while he can remotely hack into a computer to display certain information, he still needs to read it normally.
* Jake 2.0, could manipulate events, hack computers, and even order hits from behind bars.
* Jake 2.0 episode "Dead Man Talking", Jake tries to outrun a fireball, but (despite his nanobot enhancements) fails and gets engulfed and badly burned. He spends the most of the rest of the episode in an intensive care bed unable to move or communicate normally.
* Jake 2.0 hackers) playing a prank on him (or rather, on the person they think is their leader).
* Jake 2.0, Jake has nanites that allow him to control computers with his brain. Interestingly, he doesn't get any feedback from this interface. So if he hacks a computer, he still needs to look at it in order to read the information.
* Jake 2.0, Sarah mentions that her military father went MIA when working on a "top-secret project".
* Jake actually said "Drama Bomb" while Finn, Jake and Ice King watched a secret tape of the Ice King's dramatic past.
* Jake also gets one. His cluelessness fractures his relationships with his friends and causes his boyfriend, Dirk, to break up with him. Just when it seems like he may be able to reconcile with them, his genetic granddaughter/alternate universe penpal, Jade, whom he's been looking forward to meeting, is
* Jake and Amir. Although Jake often denies that they're friends, at other times he doesn't and there are multiple episodes that feature them doing something together (be it with more people or just the two of them), so they at least have something resembling friendship going on. All reasons except for dating and necessity apply to Amir in some way.
* Jake and Amir, Amir tries this, only for the glass to shatter, sending shards into his butt. Amir continues with the prank anyway, in spite of the protests of a beleaguered Jake.
* Jake and Amir are established and developed later on. He talks a big game, and certainly seems to think a lot of himself, but is rarely successful with women.
* Jake and Amir episode "Facebook Redesign," which reveals that Amir has complained about every single Facebook redesign with the same claim that the layout was "perfect" before the change.
* Jake and Amir, Jake calls out Amir for giving one of these to his cousin, Micah.
* Jake and Amir, lies constantly, engages in stalking behavior, has incredibly poor hygiene, eats a limited diet that causes him to suffer from malnourishment, and struggles with basic spelling and math.
* Jake And Amir sketch, Amir insists (for no good reason) on playing out this trope during a staff meeting, immediately becomes insulting and abusive, and ends up threatening to murder one of the interns. Afterward, he insists that he was playing the good cop.
* Jake and Amy use one of these to get the drop on two people they need to arrest. As they're currently both attempting to deny their attraction, the switch from making out to arresting is a little over-emphasized:
* Jake and Don's relationship is secretive because Jake's parents are anti-gay and because Jake goes to a Catholic high school.
* Jake and Hawkins have exposed the Cheyenne government's conspiracy and treason, causing Texas to rejoin the United States under the legitimate government. It is then flat out said by Chavez and Jake that a Second American Civil War is about to begin. And sure enough, the six-issue comic sequel series starts with the war's beginning.
* Jake and Nog contacted the farmer to try and get money from him in exchange for the stembolts but the farmer could only pay them in land. Meanwhile, the land had

become prime because the Bajoran government wanted to build something on it but didn't know who owned it. Jake and Nog approached Quark (who had mentioned he wanted the land so he could sell it at an inflated price), saying that they had something to sell him and that was the end of the episode.
* Jake And The Dynamo and the unlucky teenage boy who gets more involved with one of the girls than he'd like to be.
* Jake And The Dynamo: Jake, just before graduating to high school, ends up going all the way back to fifth grade.
* Jake and the Fatman, in an effort to frame the victim and close both cases.
* Jake and the Fatman: In "Blues in the Night", a pair of twin jewel thieves proves to be a challenge for McCabe as he unknowingly provides an alibi for one sister while the other commits a murder.
* Jake and the Fatman: In "Danny Boy", McCabe's bottled-up feelings are unleashed when he's called to the state prison where his inmate son witnessed a murder.
* Jake and the Fatman: In ''Snowfall", the Secret Service gets help from Jake in catching a money counterfeiter, who trades his product for cocaine. It becomes personal for Jake when a friend is killed during a failed raid.
* Jake and the Fatman: In "You Turned the Tables on Me", a pretty young prosecutor steals the parking space Jake has been waiting for. Jake takes revenge by stealing the distributor cap from her car, forcing her to get a ride home with him.
* Jake and the Fatman: In "You Turned the Tables on Me", the prosecutor appointed to head the organized crime unit turns out to be literally and figuratively in bed with the biggest mobster in town.
* Jake and the Fatman", it's Christmastime, but McCabe isn't feeling so jolly as an ambitious assistant DA helps Jake find a murderous Santa Claus.
* Jake and the Fatman: Jake does this in "Rhapsody in Blue" when he stages a 'kidnapping' of a pair of suspects as part of plan to convince them he is a high ranking mob figure.
* Jake and the Fatman, J.L. "Fatman" McCabe is a prosecutor rather than a cop (although he is an ex-cop), but otherwise the relationship between the Fatman and Jake Styles fits this trope.
* Jake and the Fatman, J.L. McCabe is the L.A. District Attorney, extremely overweight, and very definitely the boss. When he talks, everyone listens.
* Jake And The Neverland Pirates assume that Jake and Izzy had a thing for each other, despite no real evidence?
* Jake and the Never Land Pirates. Despite this, some earlier episodes had the characters use items that wouldn't be invented for several more decades, including electric guitars, Telstar footballs, and skateboards.
* Jake and the Never Land Pirates ends its episodes with music videos by "The Never Land Pirate Band".
* Jake And The Neverland Pirates episode "Smee-erella" has Mr. Smee play the role of Cinderella when he's forced to stay behind and clean the Jolly Roger before the Pirate Parade. Pip the Pirate Genie serves as the fairy godmother, and Smee loses a gold boot while fleeing the Pirate Convention.
* Jake And The Neverland Pirates, have seen a major shift towards action, with high-stakes specials, serious villains and Jake (Captain Jake) engaging in swordplay using a magic sword.
* Jake and the Never Land Pirates. It features a revamped title sequence and look for Jake. Many of the show's signature songs have been changed or done away with entirely. There's less focus on conflicts with Hook and the gold dubloons are only even mentioned at the end of each of story, with a new Team Treasure Chest sequence. The songs in the closing credits have been dropped in favor of an entirely instrumental outro.

* Jake enjoys a meal with Nog (cooked by his dad), until he learns that the sauce is made from Ferengi tube grubs. Of course, he would be even more disgusted after learning that Ferengi mothers are expected to pre-chew the grubs before serving them to her children.
* Jake Featherstone is convinced that every problem with the Confederacy is caused by the blacks (he'd use a stronger word). Admittedly, he only attains the rank of Sergeant by the end of the First World War (though he ultimately becomes President of the Confederacy), probably because he's an Expy of Hitler.
* Jake feels this so much at the end of the series that he completely retreats into himself, blaming himself completely
* Jake gets in a fight with a visitor and the following exchange ensues.
* Jake has a very short attention span and often blurts things out without thinking, as well as a tendency to do things without thinking about consequences or the impact on others, both physical and emotional. (Though he can probably be excused by the fact that, anthropomorphic or not, he's still a dog.)
* Jake has been absent in season 5 episodes "Rattleballs", "The Red Throne" and the Lemonhope two-parter episode.
* Jake, her partner who has expressed romantic interest in her, gets strangled and killed by an
* Jake Hunter 's titular character is the spitting image of this trope. He left the police to become a private eye (while still having friends in Aspicio's police force, such as his best friend Scott Kingsley, Samantha Martin and Detective Luis) he lives on scotch and cigarettes, can take a beating as well as dish one out. He isn't good at comforting people or kids, but he has a soft spot yet full of regret at the same time.
* Jake Hunter, who is so dead-serious that his signature frown barely even moves much, even when showing compassion to his clients or innocent civilians. On the flipside, his perpetual calmness helps to solve every case.
* Jake Hunter, with no small amount of lampshading by several characters.
* Jake is an especially odd case where he both uses and averts this, constantly, often in the same sentence. This leads to some absolutely hilarious lines.
* Jake is similar to Jade due to their near identical upbringings, but Jake's tendency to ramble on about his own problems and remain oblivious to other's feelings is to the point that it resembles some sort of disorder and colossally annoys the people around him to an extent never seen with Jade.
* Jake is the father of Firestar and Scourge. He had them with two different she-cats: Nutmeg and Quince. Per
* Jake is the team's natural leader as he is brave, responsible, cool under pressure, and able to take charge during a crisis. His best friend is Marco who throughout the war always maintains a sense of humor, able to crack jokes and make sarcastic remarks in the midst of battle.
* Jake Ji is quite pretty, with soft eyes and ginger hair, and compliments it with his fashionable style.
* Jake, Josh, Shannon, and Matt all play fictionalized versions of themselves, aged down and as muggle-borns, in the

* Jake Lloyd film again. Most versions of the story even single it out as the reason why he hasn't appeared on the big screen (except for a 3D re-release of the same film) for a very long time since.
* Jake Logan. He's established as already being an experienced mercenary fighter pilot at the start of the game, creating a minor quandary as to how to frame the tutorial. The solution ended up being to have Logan evaluating a newly hired piloting instructor.
* Jake Marshall is one for Case 1-5. He approaches Bruce Goodman, asking him to re-open SL-9, but Goodman refuses. Marshall then steals Goodman's ID to retrieve the evidence himself, prompting Goodman to have to enter the evidence room with
* Jake Marshall's brother Neil killed by Damon Gant on his suit of armour's sword. was just mean.
* Jake mentions in passing that his friend Eunchan was suspended from school long before Eunchan shows up in the flesh.
* Jake once gripes to Cheyenne about having Kyra as babysitter because Kyra makes him watch "The Wiggles" with his niece. Kyra, standing right behind Jake, replies: "Keep complaining. I got Barney tapes here."
* Jake Owen — "Barefoot Blue Jean Night" and "The One That Got Away"
* Jake Owen topped the country charts in 2016 with "American Country Love Song". Its follow-up "If He Ain't Gonna Love You" bombed at #37, becoming his lowest charting song to date.
* Jake Paul - Actor and internet celebrity; younger brother of Logan Paul.
* Jake pretty much starts a feud with the FDNY over an arson case of a beloved pizzeria when he believes that the fire marshal is wrongly going after the owner for the fire.
* Jake Roberts. Andre had just interfered in Roberts' match against Rick Rude, prompting Roberts to bring his large python, Damien, into the ring. Andre immediately stared in terror and begged Roberts off, but Roberts advanced on Andre and eventually threw Damien on top of him. Andre immediately screamed in terror before eventually clutching his chest and selling a massive, painful heart attack that briefly caused him to lose consciousness. Moments after Roberts left the ring, medics revived Andre and helped him to the back. Of course, Andre made a "full recovery," and a story about the Eighth Wonder of the World's past extreme fear of snakes was conceived to sell this well-received feud with Roberts. Throughout their feud, Andre would suffer "chest pains" (or at least clutch his chest) on several occasions when Roberts came to the ring, sack or no sack.
* Jake Roberts Hall of Fame, lamenting that he was no longer able to do the job he loved while expounding on how the job had cost him so much.
* Jake Roberts: Though retired as a wrestler, began the decade in AEW as a manager.
* Jake Rockwell's Fireforce weapon system has a futuristic Gatling gun called a "plasma repulsar".
* Jakers! The Adventures of Piggley Winks: An episode has Ferny dressed as a baby and lying in a stroller in order for Piggley to get past a bully.
* Jakers! The Adventures of Piggley Winks of his boyhood in 1950s rural Ireland. Other than that, there's not much '50s.
* Jakers! The Adventures of Piggley Winks: The series is a frame story where the adult Piggley recalls events of his childhood in rural Ireland to his grandchildren.
* Jake series is a deconstruction of this role. He was unanimously chosen as leader based on these characteristics but the constant pressure and moral ambiguity of his role start to affect him as the story moves on.
* Jake's grave regularly. Unfortunately, said character is also blaming themselves for said death.
* Jake's idealized belief in Dirk, it makes complete sense for him to be quoting an old film.
* Jake Sisko and, later, Dukat temporarily develop glowing red eyes while possessed by the Pagh Wraiths in
* Jake's Journey, where an odd knight takes him on a quest to rescue a princess.

* Jake Speed that are fictional. (They use the proceeds from the novels to fund their adventures.) The hero even has a ghostwriter for a sidekick.
* Jake Spidermonkey shoots a rainbow out of his gluteus maximus in "Animal School Musical".
* Jake Strong, he was fairly well received at first. However, after losing his debut match, he started a massive win streak where he'd always snap his opponents' ankles with his ankle lock. As Strong continued to win matches and put more popular wrestlers on the shelf, his popularity continued to decline and his win streak became known by the fans as his "cutting a swathe of apathy." At the end of Season 4, where he won the Lucha Underground Championship, the fans chanted "bullshit."
* Jake, the bisexual furniture maker who dates both David and Stevie and suggests they become a throuple. Neither David nor Stevie have any real romantic feelings for the hunky Jake but they compete with each other for his attention. David later asks Stevie about her relationship with him:
* Jake the Dad DVD came with a Cyclops card from the in-universe game.

* Jake "The Snake" Roberts, haymaker/clothesline, short-arm clothesline, DDT.
* Jake "The Snake" Roberts's DDT. It was "invented" when he was setting up a different move, but tripped over his opponent's feet and fell backwards. The DDT has become a regular move for many wrestlers since Jake's time, despite the fact that it looks more devastating than most finishers.
* Jake "The Snake" Roberts shortly afterward. Flounder mentioned Hart's death, with Roberts' reaction showing this was the first time he had heard; Roberts abruptly said goodbye and hung up at that point.
* Jake "The Snake" Roberts was an evil version of the Wild Card. He could be a good guy for as long as he needed to.
* Jake "The Snake" Roberts was once a visitor to the Snake Pit, and never showed any fear of snakes.)
* Jake. This comes among other hints that Jake and Daria are particularly close.
* Jake was noticeably Flanderized as well — his leader angst goes from mild to extreme, until the last book, at which point he feels like
* Jake was raised in almost complete isolation on a deserted island by his grandmother and shows poor social skills that make him nearly oblivious to the feelings of others to the point where it comes off as this, especially his tendency to ramble on about his issues without regard for the feelings of the person he's talking to, which actually causes Jane to destroy her computer out of frustration after he

* Jake Zyrus, came out as a lesbian in 2013, then as a transgender man in 2017.
* Jak II can destroy it with a dark bomb, although it may still get a shot off. It won't respawn, but you can only move so far before you fall off the world.
* Jak II for hundreds of years, and is believed to be the only city left on the entire planet, making it humanity's last hope. Pity that the Baron's plan to defeat them would also destroy the entire universe.
* Jak II: Renegade. A far more sinister plot eventually reveals itself, and he ends up focusing more on saving the city.
* Jak II: Renegade also has him disarming missiles by just pulling wires and stuff out.
* Jak II: Renegade companion. When Daxter tries to do this himself, he fails miserably.
* Jak II: Renegade: Daxter inadvertently activates a handful of bombs, with Vin trying to keep him and Jak calm. Vin: "Don't move! (Beat) On second thought, move! Far away!"
* Jak II: Renegade, Daxter offers to "help" Tess behind the bar and ends up getting totally wasted within the span of about thirty seconds, leading to him singing drunkenly for a little bit while Jak and Krew discuss the next mission.

* Jak II: Renegade features an unlockable option to mirror the world and your controls to match. This doesn't translate to the Whack-a-mole minigame, where your d-pad and your buttons (which normally map directly to the 8 holes) are flipped.
* Jak II: Renegade has Mar's tomb, where the heir of Mar must face the Trials of Manhood to be awarded the Precursor Stone.
* Jak II: Renegade have a couple missions where Jak gets to pilot a Mini-Mecha.
* Jak II: Renegade. However, if you let a zoomer glide through the field and try to hop on it halfway through the game will blow you up and report "Trespasser neutralized."
* Jak II: Renegade improvised the whole spiel at around two words a second.
* Jak II: Renegade is defended by mobile AA tanks (or perhaps AA trains) that move on paths around the place trying to shoot your gunship.
* Jak II: Renegade isn't when they cudgel a terrified Jak into unconsciousness; it's when they proclaim "Surrender and die!"
* Jak II: Renegade Jak and Sig must run away from a massive Metal Head chasing them. In the sequence of Mar's Tomb, its Daxter's turn to run away, from a giant spider rolled up into a ball. The first part of this plays the trope completely straight. (Feel free to play the "Raiders March" during this sequence!)
* Jak II: Renegade powers by snapping the metal restraints around his wrists and ankles like daisy chains.
* Jak II: Renegade. The cutscene is fittingly titled "Sig's Strong Arm".
* Jak II: Renegade when Daxter asks Torn why they get all the crummy missions:
* Jak II: Renegade when the words "forced labour trade" are mentioned:
* Jak II: Renegade when they made the game and, for that matter, had been in development well before the controversies regarding the Iraq War began.
* Jak II: Renegade, which focuses on the three-way struggle between the Underground Resistance, Baron Praxis and the KG, and the Metal Heads.
* Jak II: Renegade, you can steal vehicles from civilians and run them over to your little heart's content. However, if you hit a Krimzon Guard or steal one of their vehicles, it causes a citywide alert that will send tons of them after you. Luckily, you can run or hide from them.

* J.A.K.Q. Dengekitai since before Big One appeared, the series was suffering in ratings, and his arrival did let the show run for some more episodes.
* J.A.K.Q. Dengekitai, there are Spade Ace, Dia Jack, Heart Queen and Clover King.
* J.A.K.Q. Dengekitai was, for a long time, the sole exception with Big One, who has a primarily white suit with accents of the other four heroes' colors and who manages to take over complete leadership from Red Ranger Spade Ace, which includes field leadership and all of the attention.

* Jakub Wędrowycz, cavemen, and an undead Vladimir Lenin. And that's still not all.
* Jakub Wędrowycz has this ability. He refers to it as a "frequency" to which one must tune himself, much like a radio.

* Jakub Wędrowycz. Probably one of the many reasons why, when he goes to confession (every few years), the priests usually react with panic or fainting.
* Jakub Wędrowyczstories feature a secluded village inhabited entirely by Neanderthals whose progeny has somehow survived until modern times. To the outside world, they seem just to be a bunch of very ugly humans who hate strangers and don't pay much attention at the church (assuming that there is currently a priest there after the previous one has died in mysterious circumstances). In reality, they're half-animalistic, still worship their pagan deities and indulge into cannibalism, eating their dead.

* Jalix 'Trap-Deezy' has shades of this, often exploding into tirades of excessive alliterative insults at people for even doing the most harmless of apparently "stupid things". Also having a fondness for cute things, littering his videos with

inane babble and odd images and making videos where he almost always appears as an intelligent yet morally divorced teenager with world-views beyond his years and an aversion to people, watching his serious videos is just plain awkward.
* Jaller (aka Jala) was first a no-nonsense military commander, speaking with strong words. He was fearless, tactical minded, but also passionate when it came to his intolerance of selfishness and foolishness. (He was also, by the way, a surfer and dancer, but these roles were swiped from canon early on, never brought up in the story.) Two years later in the

* Jamaican, Kenyan and Ethiopian track & field Runners and marathonists are among the best of the world. There is some indication that both cultural aspects (many people in Ethiopia regularly walk long distances in high altitudes) as well as genetic aspects play a role in this, but interestingly enough the countries that are good at long distance running are mostly in East Africa and the people who are good at sprinting are mostly of West African descent (either born and raised in West Africa or descendants of West African slaves).

* Jamaica, there are many stories of this nature, in relation to the deadly Kendal Train Crash which happened on September 1, 1957 when the train derailed, claiming 186 lives as a result. According to one such story, a taxi driver picked up two well-dressed women who specified a certain address to him, and on their arrival the two got out of the car and went into the house. The driver assumed they were getting money to pay their fare, but when they did not come back after several minutes, he honked his horn impatiently, grabbing the attention of an old man from inside the house. When the driver explained why he honked his horn and described the two women, the old man exclaimed, "Those were my two sisters; they died in the train crash." The driver immediately fainted.

* James and Dolley Madison invoke this trope. Dolley was known to be very tall and by no means a small woman, while her husband was the shortest President of the United States to date.
* James and Harrison believe that Mickey Mouse faked his death and was cryogenically frozen respectively, which is portrayed as extremely stupid as they believe so despite overwhelming contrary evidence. This satirizes people who believe that Tupac Shakur faked his drive-by-shooting death, and also satirizes people who believe that Walt Disney was cryogenically frozen.
* James and Lara Heathridge. James is dominant, physically strong, and is the one who does the actual hunting and killing. Lara is submissive, emotionally fragile and physically handicapped. Also, while they are both delusional, James believes he is on a mission to kill the brides of the devil, while Lara, by the end of the episode, is strongly implied to believe she herself is a bride.
* James and Lily. For the longest time, James has been hopelessly in love with Lily, and has pursued her
* James and Lily Potter also had both their wedding and the birth of their son during the last stages of the First Wizarding War. The last bit is especially important since Voldemort wouldn't fall (and the War wouldn't end) without Harry being born.

* James and the Giant Peach, after the giant peach has fallen into the ocean:
* James and the Giant Peach. And the shark blows up in both instances.
* James and the Giant Peach are basically this to young James when they take him in after his parents' deaths. They treat him like a servant and keep him locked away from the public after the peach turns into a tourist attraction.
* James and the Giant Peach, a starving Centipede first sees the Grasshopper as cheese and a bottle of wine, then the Earthworm as a hot dog, and finally a seagull as a roast chicken. He almost eats the last one.
* James and the Giant Peach as the flying peach gets caught in a storm before it can descend to New York.
* James and the Giant Peach at the end, Aunt Sponge and Spiker's red wigs come falling off, revealing their actual hair to be short, grey, and partially balding.
* James and the Giant Peach, a young woman called Daisy Entwistle has the skin of her nose taken off by the peach rolling past.
* James and the Giant Peach: Centipede is being stretched on a rack by the skeleton pirates, and in the middle of one turn of the wheel, his back cracks and he says, "Hey, that one felt pretty good!"
* James and the Giant Peach. Fortunately, the book lampshades this as being very strange behaviour for a rhino, and the film adaptation averts it by changing said rhino from an actual rhinoceros to a large rhinoceros-shaped demon made entirely out of thunderclouds.
* James and the Giant Peach has an underwater scene with our heroes trying to steal a compass, and for really no reason almost all the characters make puns here. Some excerpts:
* James and the Giant Peach has the boy crawling into the center of the peach through a hole that he ate, where the film detours from live-action into the stop-motion animated portions of the film.
* James and the Giant Peach, he apologized for not getting it, and actually asked people who would blindly agree with him not to comment.
* James and the Giant Peach, Miss Spider and the Old Green Grasshopper team up to give Aunts Spiker and Sponge this treatment.
* James and the Giant Peach, Mr. Grasshopper berates Mr. Centipede, who claims he

can navigate, for steering them way off their course.
* James and the Giant Peach, nicely adapted in the movie version with the "My Name is James" song. Though miserable in his circumstances, he maintains inner strength, and acts as the leader of all his giant bug friends during their emigration to America.
* James and the Giant Peach opens with the Critic in jail for making a bad Let's Play.
* James and the Giant Peach. She's huge, but she's also one of the nicest characters in the book and its film adaptation. She was also a regular-sized spider before she was turned giant (along with the other invertebrates in the book and the titular peach) by a bagful of magic crocodile tongues.
* James and the Giant Peach. The giant peach grows from a tree at the top of a very high hill. When the centipede bites through the stem, the peach, with the protagonists inside, makes an epic journey rolling down the hill, described over several pages, crushing everything in its path, eventually arriving at some tall cliffs, from which it makes a very long descent, landing in the sea. As for the characters inside, not only are they falling with the peach, but they are also spinning round, like the contents of a rattle being rattled by a mad giant who refuses to stop. When they wonder where they are at the end, the Earthworm ponders that they are probably at the bottom of a coal mine, having gone down a long way at the last moment. The peach makes a second epic fall out of the sky near the end of the book, when an aeroplane slices through all the strings holding it up.
* James and the Giant Peach, the heroes inside the peach get their light from the glow-worm. When the peach makes its epic descent by rolling down a steep hill with the characters inside, something goes wrong with the glow-worm's light, making things doubly chaotic. Later, the glow-worm cannot provide light because the cloudmen have "broken her bulb" with giant hailstones.
* James and the Giant Peach: The orphaned James Henry Trotter lives with his aunts, but the treatment he gets from them is pretty much equal to it.
* James and the Giant Peach: The peach gets caught up in a massive cloudburst, and rainwater comes pouring down upon them, bouncing and smashing and sloshing and slashing and swashing and swirling and surging and whirling and gurgling and gushing and rushing and rushing.
* James and the Giant Peach: The peach is attacked by sharks when floating on the sea, causing the frightened crew to escape by lifting the peach into the air with hundreds of seagulls. Later, they are surprised to discover that the sharks have hardly damaged the peach at all, which is explained in the narrative about sharks having a mouth awkwardly set back under their long nose.
* James and the Giant Peach: There is a moment of this when James first enters the stone of the peach through a small door. Once he is inside and is terrified by his first sight of the giant insects, he considers fleeing, but the door has vanished behind him; this is never explained.
* James and the Giant Peach, the rhinoceros which ate James's parents isn't really described as anything else other than just an animal (which makes it even more surreal in a way). In the live-action/animated film, it is a malevolent supernatural entity from beyond which manifests itself as a storm cloud shaped like a rhinoceros more closely related to the book's Cloud People.
* James and the Giant Peach was the spider in question and is thankful for James' help.
* James and the Giant Peach, which had the Centipede with a mustache and the Spider looking like someone's grandmother. If you are a 90's kid or younger, you probably remember Quentin Blake's illustrations of the book, where both the Centipede and the Spider appear to be in their twenties.
* James and the Giant Peach: While Aunts Spiker and Sponge are making money inviting hordes of visitors to see the giant peach, poor James is locked in his bedroom.
* James and the Giant Peach, with the next scene being inside the screaming Earthworm's mouth.
* James Arnold Taylor, he finally got to voice him in a major Lucasfilm production.

* James Arnold Taylor's excellent performance has made him the definitive voice actor for Obi-Wan.
* James, as well). They married in 1993, and now have two daughters. They understandably do not talk politics at home.
* James At 15. On James' first day at his new school, he's the only one who's not wearing a suit. The other kids explain that he's expected to wear one the next day, and he does — only to find out that it's only on opening day when everyone wears suits.
* James Axler series. Her outfit is continually described as "A pair of red high heels, and nothing else." Brigid Baptiste's clothing on the covers falls under this, as well.
* James Baldwin, prolific African-American author who was gay and wrote about queer issues often.

* James Berry, an executioner in Victorian England, eventually came to believe that he was damned due to all the people he killed, and came to speak out against the death penalty and became a born-again Christian.
* James B. Garfield became blind later in life and had a guide dog named Coral. This experience gave him the idea to write the children's book
* James Blish. A colony ship crashes on a planet virtually devoid of land, so they create (via genetic engineering) tiny aquatic humans to carry on their legacy after they've died.
* James Blish). Ansibles are common and cheap to use, if you can stand the loud and annoying beep that accompanies every one. Due to quantum effects, the title beep contain every message that ever was or will be sent, ever, and they can be heard if slowed way, way down and appropriately filtered. The government's primary purpose is to ensure that the events described in the beep come to pass at all costs, to prevent a paradox from prematurely ending the universe.
* James Blish has become permanent and has turned the US into an Orwellian police state. There is a political dynasty that always wins. The US has colonies on Jupiter's moons but one of the characters complains how SLOWLY space exploration is progressing. The only remaining religious group is Evangelicals. The fact that a powerful senator is from Alaska is considered a novelty.
* James Blish, Mayor Amalfi says it almost verbatim to Dee Hazleton when she's washing the Hevian women:
* James Blish series involves the Western democratic government model becoming ever more intolerant, eventually resembling the Soviet model very closely, and then the Soviets winning the war (and absorbing the West) because they were better at being Soviets.
* James Blish series, where a new law of physics shows that the larger an object is, the easier it is to move at hugely FTL speeds. At one point it is stated that a spacecraft is crossing the solar system at FTL speeds powered by a few ordinary batteries.
* James Blish) shows a viewpoint character the Crystal Spires and Togas future which would have come about had he not destroyed everything and then reveals that compared to such a soul-less living death, the Apocalypse would seem preferable.
* James Blish's novella "Surface Tension," the protagonists are genetically engineered humans the size of large protozoa (one hundredth of an inch), living in a puddle of water. In the introduction setting up the story, we hear one of the genetic engineers say that the people can be so small and still be intelligent because their cells are the size of viruses. When the story was written, we did not realize viruses are not cells.
* James Blish; their cells were the size of viruses, but we didn't know much about viruses, or a lot about cells for that matter, when the story was written.
* James Blish, the main female character, a secretary at a science lab, is described as plain and knows it. When a visiting spaceman dropping off some samples finds himself taken with her, she angrily accuses him of faking being nice in order to seduce her. He is shocked and equally angry at this accusation, and barks back:

* James Blish, the protagonist built an antigravity drive in his garage, so he built a homebrew spacecraft and got himself stranded on Mars (which was a less hostile environment than we later discovered). Eventually he was rescued by a ship with another antigravity drive. Since he'd already done it, the engineers who made the second drive knew it must have been possible.
* James Blunt is an aversion, as his 2006 smash “You’re Beautiful” was his only #1 in both his native United Kingdom and the United States, as well as his only song to reach the Top 40 in the latter. However, he had two more top 5 hits in the U.K.: “1973” and… “Goodbye My Lover”? Nope, that stalled at #9. It was actually “Bonfire Heart” from 2014, years after his prime.
* James Blunt's "You're Beautiful", in which a delusional drug addict insists that he has a deep romantic connection with a woman he's only seen once and has never spoken to.
* James Blunt's "You're Beautiful", the first verse ends with the line "...but I've got a plan." We never find out what this plan involves, or if anything happens as a result of it. He later goes on to say that he "[doesn't] know what to do". The music video suggests his plan is to commit suicide.
* James Bond 007: Everything or Nothing, Bond carried a variant of this, called a "rappel gun", which functioned like a GHP, but he had to walk up a wall in order to retract it (!).
* James Bond: 007 leaves every single Bond Girl to date, because he travels the world without a relationship.
* James Bond 007. The villains have huge egos and want to sate them by discussing their ideas with someone who's proven themselves intelligent enough to appreciate them.
* James Bond 007 was a time-based pinball game; the player starts off with 50 seconds, and can keep playing so long as he has time remaining, which he gets by making key shots. Unfortunately, novices couldn't build up enough time to enjoy the game, while experts found it easily exploitable for long games. The backlash was so bad that most operators tried to return the tables to Gottlieb as a result.
* James Bond 007 when individuals bought used machines for personal use and they didn't have to worry about paying per game, however.
* James Bond) actually saved their lives, as without a body to return to all the crewmembers in question would have simply ceased to be.
* James Bond admitted that Dr. No was inspired in part by Fu Manchu. Despite this, No's half-Chinese national origin has little to do with his actions.
* James Bond after an absence of forty-four years; it remains to be seen whether this was a one-off or whether their status as the usual villains will return.
* James Bond again. This is brought out most clearly in the last paragraph of the series, effectively describing how he can never settle down with one woman.
* James Bond aggressively flirted with both Severine and Bond. While Bond's tied to a chair and Silva is suggestively touching him, the following exchange happens.
* James Bond (alongside with her now criminal family), to the point of planning to actually marry him. The hows and whys relating to this revelation is swept aside by having her suddenly be insane.
* James Bond also drink (if not smoke) enough to dull his nose and taste buds...
* James Bond, among several other animal encounters. He uses a cigarette lighter to make it let go.
* James Bond, and asks "You were expecting someone else?" (The ad was for "Sterling", a short-lived attempt at importing the cars sold by the British brand Rover to the US; it didn't work out, chiefly because they were essentially luxurious versions of Honda models, and Honda had already launched their own luxury marque, Acura, by this point.)
* James Bond and relegated Barry Nelson's performance as Bond to total obscurity. The fact that the production was believed lost to time until a kinescope emerged in the 1980s didn't help much either.
* James Bond and runs away when he sees a mouse. Finn ends up hiring Chow and Ratso.

* James Bond, and that Kristatos is the real drug smuggler, having warned Bond that he may have to kill Columbo to knock out the competition. By the end of the movie, Kristatos has attempted to kill Bond (and clearly had non-fatherly designs on Bibi), while Colombo aided Bond in taking him down.
* James Bond, and that's because it appeals to pretty much every demographic you can think of.
* James Bond, and the people he was with at the time were able to keep him alive long enough for proper medical help to arrive.
* James Bond, and they always end up in possession of the field. Examples include:
* James Bond and TV on DVD, this was the most common type of binge-watching way back in the days of VHS.
* James Bond and weapons man Q to be as "mad", given his role involves designing and constructing lethal assassination weapons disguised as ordinary items.
* James Bondarceny), introduced in the episode, became the main villains for Darkwing Duck.
* James Bond are always shot in the chest by Bond, die instantly, and go down cleanly with nothing more than a mild grunt.
* James Bond) are introduced before they meet Bond. Natalya Simonova even has a considerable screentime in the first half of the film with her own subplot.
* James Bond are released in America, James Bond becomes "James Bonde" and "Moneypenny" becomes "Moniepeny."
* James Bond are the only ones where the henchwoman genuinely becomes a love interest.
* James Bond, as he's killed by assassins shortly after boinking a Chinese girl.
* James Bond as the part of the brain the bullet is in does not control physical sensation. Further, even if it did, try walking with all your limbs numb sometime. You might find it almost impossible to control what you cannot feel.
* James Bond as the site of Scaramanga's island lair. Since then, the island's become a popular tourist attraction to the point that it's commonly called "James Bond Island".
* James Bond as well. But a few villains stand out for being memorable:
* James Bond. As with many things, this started out kinda-plausible in the Sean Connery years, got more and more ridiculous with Roger Moore, then gradually got clawed back.
* James Bond at Pinewood Studios, the world's largest stage, is a silent stage, as its primary use is for big action scenes.
* James Bond before it handed back to China after decades of British rule.
* James Bond (before the latter's release date was pushed several months back due to the coronavirus pandemic).
* James Bond. Being Bond, he is witty enough to have a number of variations:
* James Bond being generally regarded as among the series' best instalments and credited with successfully revitalizing/reviving the series.
* James Bond. Blofeld claimed he would not carry out his plan if all his past crimes were pardoned and he is recognized as the current Count de Bleauchamp.
* James Bond, Bond creates the same effect by driving through a construction site, kicking up a cloud of smoke from a pile of concrete.
* James Bond, Bond discovers a lab where they are constructing satellites with deadly chemical agents. When he brings "M" and the police back there, everything is gone. The lab is replaced with a huge, opulent office. No explanation is ever given for how this happened. The lab was smaller than the office, so presumably one had been kit-assembled inside the other. Luckily Bond did have a vial of the nerve gas that the lab was working with.
* James Bond: Bond does it so often in fact that 00- license might as well be the license to cause severe property damage.
* James Bond, Bond is bloody, with a wild hair and entirely covered in sand. Nothing less glamourous.
* James Bond", Bond meets up with a Canadian contact to obtain information for an off-the-books mission. When Bond introduces himself as 'Mr. James', his contact eyes him suspiciously and then says that James can call him 'Colonel Johns'.

* James Bond, Bond momentarily imagines the corpse of a man he just killed confronting Bond with the permanence of his actions.
* James Bond, Bond uses a Bofors anti-aircraft gun to shoot down Jack Spang's helicopter.
* James Bond. Both titles were probably picked without the full movie to watch.
* James Bond), but Bond is still attached to the machine. This leads to this classic exchange:
* James Bond" But hey, by the time someone called him on it, she had gone from wanting to kill him to not wanting to leave, so he's cool.
* James Bond by John Gardner, Bond is abducted when mercenaries from Erewhon herd his car behind a truck, which then drops its back door, and Bond has no choice but to drive in.
* James Bond came out in 2015, not to mention subsequent books and video games (some with original plots).
* James Bond continually changes actors to keep Bond around a certain age range. As actors age out, they are replaced by younger actors.
* James Bond, Drax attempts to dispose of Bond by placing him beneath the exhausts of the eponymous rocket. It was one of the few scenes from the novel to make it into the movie.
* James Bond due to the removal of anything that would choke up the reaction (substances known as "nuclear poisons").
* James Bond easily qualifies. His partner, Artemus Gordon, gradually develops into one as well.
* James Bond employer gets shot by Bond at the end. It's even more true in the novel).
* James Bond equally hated both the character of Bond and the experience of playing him. He wanted to have him killed off not only so he wouldn't have to play him ever again, but so that he wouldn't have to see or hear about him ever again, either.
* James Bond, even if they have the same clearance as you (or higher).
* James Bond - evidently someone who Fleming thought fit the mold in real life.
* James Bond expresses sentiments like this (in spirit, at least, since his business makes the division between civilian and combatant even fuzzier) in
* James Bond-expy/parody agent Double 0-0 because both OWCA and the British Secret Service claim jurisdiction over stopping Doofenshmirtz while he is on British soil.
* James Bond fall out of a damaged ski lift and Bond lands on top. When the girl asks why he always lands on top, Bond replies, "Lower center of gravity?"
* James Bond, Felix Leiter compliments his suit and asks about his tailor.
* James Bond film! Bond always receives plenty of presents from Q. Some of the presents are made specifically for Bond's mission, but most really aren't. Coincidentally, and conveniently, every function of every item from Q just happens to be useful once (and only once) on Bond's mission.
* James Bond film has this as justification (due to either being part of the series or winning a free trip).
* James Bond films caused all sorts of demand for the toys and gadgets the suave spy has used over the years:
* James Bond films have recognition, it tends to happen with third installments that gain both critical acclaim and massive success:
* James Bond films have this happen fairly frequently (the earlier ones in particular).
* James Bond films. He's even the chief of an entire MI6 sector of Gadgeteer Geniuses.
* James Bond films, holds the rank of rear admiral in the Royal Navy as well as being the head of MI6.
* James Bond films in general are quite prone to this, but some take it to ridiculous new heights.
* James Bond films often have very strange opening credits. Most feature a design motif related to the preceding scene or with the plot of the movie, and many feature scantily clad (if not entirely nude, in silhouette) women dancing to the film's particular theme.

* James Bond films, often requiring 007 to rely more on his wit than his brawn.
* James Bond films of the 80's being the most realistic of the series)
* James Bond films quite often, since James has never really gotten over losing Vesper and Tracy, the two women in his life he really cared about, and he often finds himself in the company of women who see him as a means to an end and he's not above sleeping with them and/or exploiting their feelings.
* James Bond films rarely go here due to the necessity of keeping Bond a positive character. There have been exceptions:
* James Bond films, sometimes with gadgets and sometimes improvised but nearly always fast roping.
* James Bond films, the villains will inadvertently show that Bond is close to finding them simply by attacking him:
* James Bond flashbangs were a double-edged sword: if you didn't turn around, the screen would flood with white and obscure enemy fire.
* James Bond for films - are outfitted this way to some extent; most have at least the missiles and machine guns. In the Brosnan movies, Q will barely mention the weapons, focusing more on the car's less obvious functions, because at this point neither Bond nor the viewers are going to be particularly impressed by the car's ability to shoot missiles.
* James Bond for the "I've been expecting you" lines in many of the movies.
* James Bond franchise, though Bond often has the gist of the plan figured out already.
* James Bond friend, I.Q. The role of "M" was taken by the school headmaster, who would remonstrate with young James over the chaos his escapades inevitably caused, and Miss Moneypenny was replaced by a fellow student with a crush on James. And they still managed to keep the concept of a new girl every adventure going, in a G-rated way of course. Note that most of the films themselves are considered suitable for family viewing in the United Kingdom, so an animated version isn't that far-out an idea.
* James Bond from 1962 to 1989 were live-action, but a cartoony blood dripping special effect was applied after the shot is fired.
* James Bond from six years earlier. Of course, this was mainly a matter of circumstance: if Bond had been recast with a younger actor earlier, as nearly happened several times, then Comic-Book Time most likely would've come into effect earlier as well.
* James Bond gets this all the time, to the point where M has pre-emptively sent Bond to investigate some supposedly well-known industrialist/multimillionaire/what have you.
* James Bond goes after the eponymous organization when they have the plane carrying a man who was going to blackmail them on the information he had gathered explode spectacularly when it reaches its destination.
* James Bond), had quite the knack for sweet romantic gestures towards his Bond girls compared to the previous and later versions:
* James Bond had the villain attempting to use a chemical weapon which would kill all humans on earth (only humans; other animals will be fine), to be repopulated with humans from his space station. With him as their leader, of course.
* James Bond had to repeatedly exposit what a GPS is, because in 1997 that was still obscure military technology. Nowadays, virtually every new car and cell phone has access to GPS.
* James Bond has an elaborate sequence in which a lake in Cuba is drained to reveal that its entire basin is a satellite dish. Three structures that border the now-dry lake extend to towering heights to deploy the antenna array, with which the anarchists intend to transmit the "fire" command to an EMP satellite. Fortunately, Bond is on hand to screw up the device before the command is relayed.
* James Bond, has Bond outwitting a would-be assassin by hiding behind the door while the assassin attempts to kill him in his room. Bond has the assassin drop his gun on a rug and sit down while he interrogates the man. Bond would occasionally take a drink during the conversation, which the assassin used to slide his gun closer to him by dragging the rug. Eventually, the assassin regained his gun and

pointed it at Bond, saying that they are now at a standstill, to which Bond casually shrugs and simply shot the guy. It should be noted that the assassin had used all of his bullets earlier shooting the bed which he believed contained Bond. As Bond knew this fact, it was easier for him to react calmly to a gun pointed at him.
* James Bond" has Bond visiting the city. The entire tale is a description of the place from his point of view, and his plans for the evening after doing his assignment.
* James Bond has his parents dying in a mountaineering accident. He inherits their home, and joins the Royal Navy when he comes to the age.
* James Bond has naturally had to disarm bombs, typically nuclear, on more than one occasion.
* James Bond has the song "We Have All The Time In The World" by Louis Armstrong.
* James Bond have the holographic wall interfaces, or at least a very translucent touchscreen.
* James Bond held the rank of Commander in the Royal Navy before he joined MI6, as also noted in Film above.
* James Bond. He rarely finishes the movie with an unused gadget and never needs more than one copy of a given device.
* James Bond he's usually slept with them once, or at least kissed them, before that.
* James Bond, he ties him up and leaves him dangling from the ceiling, leaving him to die from the impact of the next locomotive on the tracks.
* James Bond. He used to be in the Gestapo, then after the war fled to the Caribbean and worked his way up through the ranks of a Cuban crime syndicate.
* James Bond his way through a vent hole(?) near the ceiling. Bond, not nearly as agile, opts to bash his way through the dry wall.
* James Bond, if you choose to push The Jackal off instead of shooting her to death, M calls asking what happened. Bond's response? "She's fallen for me."
* James Bond impersonates a diamond smuggler he has killed and smuggles the diamonds inside the corpse inside a coffin.
* James Bond in Berlin at the end of the war. SMERSH was officially closed down in March 1946.
* James Bond intelligent and challenging to the Doctor than her predecessor Liz Shaw.
* James Bond in the course of doing so... Or the only thing he acts under...
* James Bond introduces one Roland Marquis, a distinguished RAF member and Bond's rival since his studies in Eton. This is actually the first time that anyone from Bond's days of studying had been introduced.
* James Bond is a full-fledged communist villain seeking to be a hero of Soviet Union, but General Gogol contrasts this by investigating him in unwitting parallel to Bond's mission. The result of that was Gogol attempted to arrest Orlov before the East German border guards shot the renegade general dead and it's fairly obvious that if Gogol had learned Orlov's whole scheme, he would have raced to warn NATO.
* James Bond is a good indicator on how pervasive this trope was and still is.
* James Bond is an older corrupted German policeman Heinrich "Der Haken" Osten, who is rumoured to have been involved with the Nazis back in the forties.
* James Bond is definitely a 'hick' type, though not particularly corrupt.
* James Bond is one of the later examples, and naturally, Elliot Carver has her killed by his hitman Dr. Kaufman shortly thereafter.
* James Bond is one of these in spades. Movie Bond, however, is more of a cad.
* James Bond is one of the staples of the series, though theirs is more lighthearted than most examples.
* James Bond is particularly prone to this; perhaps he just seems a pleasant dinner companion.
* James Bond is poised on edge of cliff; Bond walks up and tosses the baddie's own calling card at the car. Expected results, but the car doesn't fall. Bond gives the car a kick for good measure.

* James Bond is possibly the most famous depiction of a spy and is copied endlessly. His villains have also had a big influence on fictional characters, with Ernst Stavro Blofeld being quite possibly the most commonly copied.
* James Bond is that he finds her easy to talk to and open up to, and they find they have a lot to talk about.
* James Bond is the one novel that's completely made up). Of course, Commander Fleming really was up to his neck in skullduggery of all sorts and it is possible that he did include one or two interesting snippets from his own adventures....
* James Bond it's an odds-on bet this trope would come up at least once. This slogan is also responsible for the SAS nicknaming their door-breaching shotguns "the Barclaycard".
* James Bond. It's easily concealed and fires darts tipped with either poison or explosives.
* James Bond, it's unlikely any jury would convict (and Bond's license to kill literally means that so long as he can justify any killing he does as necessary for completing his current mission, the British courts won't even try to prosecute him. The courts of whatever country he's working in should he be caught is another matter).
* James Bond Jr. came with a flip-up boxing glove under his lab coat. Flipping a switch on his back caused it to pop up.
* James Bond Jr. review, when JdG is trying to remind the audience of the cartoon, all he gets is the sound of wind... and a tumbleweed rolling by.
* James Bond Jr. series, but while trying to get his homework done on time too.
* James Bond Jr.: The Worm, who wears dark glasses as a measure against this. After getting them broken in "A Worm in the Apple", he gets hold of James' special dark-lensed camera glasses—But then James has IQ switch off the liquid crystals in them, turning them clear and blinding him.
* James Bond keeps a long-barreled Colt Single Action Army in his car whenever he needs more firepower during car chases. When John Gardner took over, he had Bond use a .44 Super Redhawk in place of the Colt.
* James Bond. Lampshaded when Bond proposes sleeping together as a "honeymoon":
* James Bond lasted only four months (getting behind schedule and over budget) to be completed by the already set October 1963 premiere.
* James Bond, many times involving a helicopter. There are numerous Bond films that break the formula, of course:
* James Bond may be around the world, there are two notable films that aren't well received outside of Britain.
* James Bond movie riffs on the innuendo in the trope name with the line "you might be a cunning linguist, but I'm a master debater!")
* James Bond movies, it isn't shaken quite as much, and some Stale Beer has found its way in, but there is still no doubt it is Martini.
* James Bond, Mr. Big's henchman Tee-Hee breaks James Bond's left little finger by slowly bending it back until the bone snaps. It gives Bond occasional trouble throughout the rest of the story.
* James Bond Mr. Scorpio describes how he will lure you into his power with "free dental care and a stock plan that helps you invest".
* James Bond novel Casino Royale for the show Climax! swaps the nationalities of James Bond and Felix Leiter, with "Jimmy" Bond being American, and Felix Leiter British. This leads to the bizarre instance of Bond, the quintessential British secret agent converting francs to GBP for Leiter, and telling him how much the amount would be in "your British pounds."
* James Bond novels, one of the modifications fitted to Bond's car is a high-intensity halogen flashbulb replacing the bulb that illuminates the number plate. This is used to blind pursuers.
* James Bond. Now, Octopussy confronts the man who was responsible for her father's death... and thanks Bond for allowing her father to take his own life rather than face the disgrace of a military trial.
* James Bond". Of course, these days it's a given and it's only added to the end of the credits.

* James Bond of having Sean's younger brother play an unnamed agent's younger brother is the plot. In the same film Lois "Miss Moneypenny" Maxwell plays "Miss Maxwell".
* James Bond of such poses on promotional material. On the DVD covers, they even added arms with pistols. Sometimes it's pretty obvious.
* James Bond of the Cold War and other conflicts for their own schemes who could fit into any political context imaginable.
* James Bond of the trope (America was still launching moon landings in real life when the movie was released), and in some circles, the scene is considered to be the primary popular inspiration for the conspiracy theory.
* James Bond of this; it requires an enormous amount of training not just to learn these skills but to maintain them as well.
* James Bond opens with the assassination of the United Kingdom's ambassador to the United Nations, carried out through sound piped through his translation earpiece.
* James Bond originally began with a UA logo similar to the 1975 logo, but with the "Entertainment from Transamerica Corporation" byline from 1968 fading underneath. Given the year this film came out (1981), and the situation UA was going through at the time, this could be interpreted as UA saying "Farewell" to Transamerica, after 14 years.
* James Bond (or only sought out shallow meaningless flings all the more) because he had his heart broken.
* James Bond parody episode, an evil genius used a giant radio telescope and a satellite array to amplify the weak magic of a stone artifact to create a laser-based doomsday weapon.
* James Bond parody episode "Tearjerker", has Francine as Sexpuneequa and Principal Lewis as Black Villain, a funky criminal who wants to melt the ice caps to turn his Detroit street into beach front property.
* James Bond plants a nuke in her circus. Not necessarily evil, but initially misguided.
* James Bond plays. As soon as the cameras reach the end of their track, Bond disconnects the cameras from the track and cuts the power to the monitors, at which point, his theme music goes out abruptly, mid-crescendo.
* James Bond plays this fairly straight as Austin treats Vanessa Kensington to a night on the town.
* James Bond: Q's new "fishing boat" isn't ready yet when Bond hijacks it.
* James Bond revolving around Gogol's attempts to obtain a lost device that would give the possessor access to Britain's nuclear submarine fleet. It's best summarized by KGB star agent Anya Amasova, who observes that she and Bond are "in the same business, but with rival companies."
* James Bond RPG included character sheets for some of his allies who were killed in the course of the movies where they showed up, presuming they survived instead to let them appear in later adventures.
* James Bond RPG refers to this character type as the "Privileged Henchman".
* James Bond saved him from that villain, left him alive but marked him with the Cyrillic letter Ш (the first letter of the word Шпион, meaning 'spy') carved on the back of his right hand, which ended up leaving a scar that the best efforts of plastic surgeons in the employ of MI-6 could not completely eradicate.
* James Bond's Bond was better than the other, even though in real life, the two actors were good friends.
* James Bond scene — never the SAS, but then again an army of modern ninjas looks more 'James Bondish'.
* James Bond section). James Bond uses a prosthetic when posing as him to a man who has hired Scaramanga, but never met him.
* James Bond seems to intentionally go for the Camp factor with what seems like a really bad photoshop. Absolutely nothing collapses and the only signs of destruction are little tongues of flame with thin tendrils of smoke at the forefront.
* James Bond series. 23 official feature-length films, three unofficial films, and

a short film of unclear canonicity that opened the 2012 London Olympics.
* James Bond series of juvenile novels have done an excellent job at explaining away some of the inconsistencies (such as making his first car a gift from a dying uncle he received while still a teenager).
* James Bond She asks Bond if she did wrong, and Sean Connery's acting plays the trope dead straight.
* James Bond shows a Post-Soviet Union villain attempting to resurrect it.
* James Bond, sleeping with Bond brings with it a 30.51% (18 out of 59) of dying before the end of the movie. Of course, the death rate varies from Bond to Bond:
* James Bond "Smash Adams", who was retooled into a fat and bumbling secret agent.
* James Bond sniper at the beginning of London scene uses a laser sight. Try as hard as you might, there is no way you’re going to find it on his rifle, probably because the actual effect was obtained through the use of laser pointer.
* James Bond, so even if networks have to split them up, they aren't just rerunning 3-4 films over and over.
* James Bond, some of the more improbable (and more awesome) fight/chase scenes... all the stuff Agent 007 does is governed by this trope.
* James Bond. Some skidding later, he's making good progress when another train is rushing right at him, so he wisely hops off whilst the Merc gets ploughed right through by the train.
* James Bond's sabre in half with a single blow. Curiously, they both pass up katanas in favor of broadswords for the final duel.
* James Bond's stomach unpainted to make sure she could breathe. In reality, death could result from heat exhaustion if the paint interfered with perspiration, or exposure to toxins if the paint were unsafe, but it would take a very long time.
* James Bond stand-in, who loses because Homer forgot to take the jokers and the "instructions to pinochle" cards out of the deck.
* James Bond", starts when it is revealed the Soviets are rewarding a known mole for her efforts, so MI6 can make more use of this trope.
* James Bond, suddenly inherits a quarter-million pounds from an Australian uncle he has never heard of. The following spending spree makes him seem suspicious in the eyes of his employers since coincidentally there have been a couple of Soviets (called "ambulance chasers") hiring double-agents lately. They decide to use that to make it look as if Bond was forced to resign over accusations of bribery and an "embittered" Bond would be easily recruited by that very organization to go undercover.
* James Bond sung by Matt Monro, who held the last note of that song considerably longer than Jones did.
* James Bond's version arguably providing the deepest and manliest voice of them all.
* James Bond's works. He is even credited on the cover as "Sebastian Faulks writing as Ian Fleming".
* James Bond. The DB5, however, is still undeniably about 470 times cooler. How many wankers do you see rolling past with an ill-fitted trumpet exhaust on an Aston Martin?
* James Bond, the duo hatch a scheme to generate funds by stealing jewelry from the Kremlin's state armoury and selling them on the black market, while replacing them with fakes. Using Octopussy's circus troupe as a cover, they then plan to smuggle a bomb into a US military base in West Germany and detonate it, hoping that NATO would be disbanded and that this would enable the Warsaw Pact to invade and conquer Western Europe without fear of retaliation. In turn, Kamal Khan, who is getting paid from the sale of the jewelry, hopes to kill Octopussy in the process and take over her organization afterwards.
* James Bond, the head of Japan's secret intelligence service, Tiger Tanaka, explains to Bond that Japanese criminals will stop and surrender when ordered to by the authorities, because of the Japanese culture.
* James Bond: the obituary of Commander James Bond, RNVR, states that a series of popular novels have been implicitly approved (or tolerated) by Her Majesty's Secret Service to obfuscate the truth of his missions, although they've hewed dangerously

close to "actual events" once or twice.
* James Bond, the player watches his character get garroted in the cutscene following a lengthy infiltration mission. Turns out it's a training scenario for the Dragon, and the player's character was an evil mook-in-a-mask rather than Bond. As this same scene (minus the infiltration) happens in the original movie, the player shouldn't be too surprised.
* James Bond, there's a greenhouse area that goes dark, and a henchman even says "KILL THE LIGHTS!!"
* James Bond, there's an intense sword duel scene between Gustav Graves and 007. Both Bond and Graves display mastery with a wide range of swords they grab from the walls of the complex, including rapiers, katana, and longswords. Likewise, Miranda Frost is a former gold medal (by default) Olympic fencer and uses a sword during a climactic fight.
* James Bond, there's a scare chord. The first time it just seems a little cheesy, but after that, the scene starts to be funny.
* James Bond the supermodel Heidi Klum), who wears a shiny silver catsuit.
* James Bond the tanker, he shuts off the spigot before the flames catch up. The car meanwhile bursts into flames and goes off a cliff.
* James Bond, the villain challenges him because of his reputation as the best secret agent.
* James Bond, the villain Le Chiffre is explicitly motivated by such behavior.
* James Bond?. They are rarely if ever referenced as such, though, so they tend to get lumped in with the other over-the-top murder attempts.
* James Bond, this line is cleverly done after May Day poisoned Achille Aubergine to death with the poisoned butterfly.
* James Bond this trope-almost nearly every automatic-wielding mook that gets killed in one of the books will having his gun continuing to fire until it's empty or falls out of his hands.
* James Bond through a form of torture that Stamper's mentor Dr. Kaufman perfected. Bond escapes before he can, obviously.
* James Bond to be thrust into action in her evening dress or bikini, most of them dress sensibly when appropriate.
* James Bond to justify this by stating that the knocker-outer is a fast-acting nerve toxin rather than a chemical.
* James Bond to listen to Homer's concerns about how moving has affected his family and receive his resignation. Scorpio accepts it, gives Homer a short talk about the importance of family, and politely tells him "on your way out, if you wanna kill somebody, it would help a lot."
* James Bond: Tracy DiVicenzo to Vesper Lynd. While there are a handful of other women he genuinely cares about, possibly to the point of love, Tracy's the only one he took to the altar. Sadly, her end was as tragic as Vesper's.
* James Bond travel to various countries around the world as part of his secret missions.
* James Bond usually departs on entirely international adventures and would not grow even a bit less British through any of it.
* James Bond video games, of course, have plenty of these, much like their cinematic inspirations.
* James Bond villain "Jaws" subverts the trope by using false teeth in a non-humorous manner. Sharp metal ones.
* James Bond villains will usually control at least one company to serve as their public face or front organization, many of which are large enough to qualify as Megacorps. In chronological order:
* James Bond. Virtually every fictional spies in history has its roots from the Bond character.
* James Bond walks in on Kara Milovy trying to tidy her room, which was thoroughly ransacked by the KGB.
* James Bond was backed by the French navy, who lent the crew a frigate and a helicopter for a scene in which the helicopter is stolen (the helicopter is a model in later scenes though).

* James Bond, was released to mark the series' fiftieth anniversary in 2012.
* James Bond was specifically created to completely eliminate the campiness and return to the franchise's more realistic roots. It succeeded for a while, before careening off again in another direction: melodrama.
* James Bond was that he needed a way to look after his brand new wife and baby whilst maintaining his luxurious and exotic jet-set party lifestyle, his holiday home in Jamaica (that was a money-sink for ten months of the year) and his many (eventually fatal) vices such as his seventy a day smoking habit and borderline alcoholic drink intake. It didn't help that Ann Fleming was just as keen to live the rich and glamorous life as her husband.
* James Bond. When he asks a stranger who's funeral it is, the stranger says "Yours," then stabs him right in the middle of the street. The procession casually walks over to the body and places it in the coffin, just before the part where the somber funeral music gives way to the much more upbeat jazz. It later happens again to an American agent.
* James Bond when he attempts to resuscitate Jinx proves that she's not just a notch on his bedpost.
* James Bond, when he couldn't disarm a nuclear device. This was back before the character transcended humanity as he did in later films.
* James Bond, when he sneaks into a Japanese castle. He peeks through a keyhole, and sees a guy at the far end of a hallway, fiddling with something beside a door, then leaving. Upon entering, he makes it halfway across the room before the floor falls out from under him. As he falls, he berates himself for not remembering the traditional traps of such castles. He nearly dies.
* James Bond. When Lucasarts learned of Lara and that she was a ripoff of Indiana, they furiously refused to let them do so.
* James Bond", when MI6 agents including M, Q and Bond hear Alec Trevalyan making his apparently final call to the daughter he only recently met, they're all struck by the emotion in the call, with M planning to ensure his agent's final wishes for his daughter are carried out.
* James Bond, where Bond enters a bar and his X-ray glasses make all the random women appear as if they are only wearing their lingerie.
* James Bond, where Bond is climbing the mountain and the doves come out of a hole).
* James Bond, where ends up dual wielding an SMG and his Walther P99 while running through Elliot Carver's base. It looks... a little silly.
* James Bond, where Roger Moore was literally old enough to be the father of the primary Bond Girl - he was actually older than her mother!
* James Bond where the head of the KGB always turns out to have a hot lingerie-clad mistress in his bed.
* James Bond, where the villain describes Karate as "a branch of judo".
* James Bond, which is basically a quick-draw contest. He puts the other "guy" (a cardboard target) in hospital, but is "killed".
* James Bond: While all of the actors who play Bond have fairly impressive jawlines, George Lazenby's chin is the most exaggerated.
* James Bond while Nana Visitor has too much fun with her bad Russian accent.
* James Bond. While they also licensed the rights to create their own stories with the character, they never used them and the license expired c. 1972.
* James Bond, who (according to a debunked legend) held the final note so long he passed out.
* James Bond (who partly grew up in France and first trained on stage there) dubbed herself in French, even affecting an Eastern European accent doing so.
* James Bond, with every film guaranteed to feature at least one elaborate car chase.
* James Bond with Pierce Brosnan are generally seen as tired and outlandish.
* James Bond (with plenty of printed material using the name) before it was changed - presumably because too many people were associating it with driver's licences, or simply didn't know what 'revoked' meant.
* James Bond with Tracy (Diana Rigg), set to Louis Armstrong singing "We Have All

the Time in the World."
* James Bond wrote several novels when residing in Jamaica. Several of them take place there.
* James Bowie's iconic knife was supposedly forged from a piece of meteorite iron.
* James Branch Cabell protagonist talks God out of writing a sequel to the Bible, knowing how critics would treat it.
* James Brown: Faking that he is too tired to go on anymore and seemingly walking off stage, while a band member puts a cloak over his back, only to suddenly leap back and grab the mike again.
* James Brown). One wonders why they didn't use Screamin' Jay Hawkins' "Constipation Blues".
* James Brown topping the chart; and many of his most influential and sampled songs, such as "Funky Drummer" and "Funky President", weren't Top 40 hits, let alone Top 10 on that chart. Brown had much better success on the R&B charts, with 17 number-one singles, and several more top 40 hits.
* James Brown were known for their interjecting grunts in the middle of songs.
* James Brownyard was the owner and the only disk jockey for WHYP, a small
* James Buchanan, 15th President of the United States, is to date the only bachelor President in the country's history, and as such had no children of his own. However, two of his sisters and their husbands died of consumption, each couple leaving children, and Uncle James became their guardian, making sure that they were well educated. He particularly doted on his nephew "Buck" Henry and niece Harriet Lane, referring to them as his "little family" and bringing them to live at his estate in Lancaster, Pennsylvania. When he was elected President, they both came to the White House with him; Buck was what today would be called the Chief of Staff, and Harriet was the White House hostess. The term 'first lady' had been used unofficially for previous Presidents' wives; First Lady became her official title and has been used ever since. Harriet in particular was devoted to her uncle, resisting offers of marriage until he was well into his retirement and naming one of her sons after him.
* James Buchanan anything more than simply romantic friends, it would have been kept a secret, given that at the time homosexuality was completely taboo, and sex between men illegal.
* James Buchanan distinguished himself as a US senator, an ambassador and Secretary of State, all jobs that require a high level of tact, caution, negotiating skills and consensus-building ability. This proved to be lousy preparation for being president of a nation on the brink of civil war over a question of morality.
* James Buchanan. No such luck, as he's still considered one of the worst American Presidents, 150 years after leaving office.
* James Burton, one of the series' few named heroes, also debuted in
* James Byron Huggins) — they will always contemptuously beat them.
* James Caan. One of the ingredients is gunpowder (along with cayenne pepper, hot mustard, ipecac, asafoetida, and croton oil).
* James Cagney, about song-and-dance man George M. Cohan, "The Man Who Owned Broadway".
* James Cameron after dreaming about a metal skeleton walking through a fire. From the director's nightmares to yours!
* James Cameron (although they are stated to be ex-Marines in the intro).
* James Cameron, and took actual trips in a submersible to the bottom of the Atlantic Ocean to film the wreck of the ship.
* James Cameron are. Recent tie-in novels have confirmed that they're an alien race.
* James Cameron: as Sarah Connor's date on the answering machine and twice as a manager of Tiki motel, who is heard (but not seen) speaking to Sarah and then again answers the phone when The Terminator calls.
* James Cameron at the start of the movie: he is the third-class passenger getting his beard checked. He makes other appearances throughout the film, up to and including the sinking. Also, when it shows "Jack's" hands sketching Rose, they are

actually Cameron's hands; you'll notice that they look too old to be Jack's.
* James Cameron, because Cameron called him a madman. The two are very different. One makes millions creating fictional stories, and the other is James Cameron."
* James Cameron being his only film to be nominated for major Oscars and actually win.
* James Cameron Bodysurfing in a Na'vi-human hybrid body) have ever been able to ride.
* James Cameron). Cameron is busy discussing behind-the-scenes work, while the actors are goofing off and having a great time with each other. It continues all the way over the end credits.
* James Cameron enjoyed their take on him in "Raising the Bar," though he denies making his crew members sing sea shanties about him. Interesting to note is that Cameron is portrayed in a fairly positive if not eccentric light as an adventurous man who, as the title of the episodes suggests, raises the bar with everything he does.
* James Cameron episodes, "Soldier" and "Demon with a Glass Hand". As part of the settlement, the credits of the movie now include the phrase "Acknowledgement to the works of Harlan Ellison."
* James Cameron franchise. He regretted selling them and made sure not to repeat this mistake with his subsequent films.
* James Cameron has promised that Quaritch is coming Back from the Dead.
* James Cameron has too many adult themes and is too obscure among kids to really deserve a Happy Meal line. They also have a reusable sticker book. Next thing we know, they're going to have coloring and activity books for the sequel. Oh wait, they already have those.
* James Cameron is also a deep-sea explorer. In 2012, he became the third person to reach the bottom of the Mariana Trench, the deepest part of the ocean, and the first to accomplish the trip solo.
* James Cameron is meant to be Rose's dream or if she's actually died and gone to Heaven.
* James Cameron is the guy who calls Sarah Connor to cancel their date.
* James Cameron present in the film and asked Cameron to tone down or eliminate them. Cameron responded by ramping them up.
* James Cameron ran over budget, gathered plenty of naysayers, and became the first film in history to make $1 billion worldwide.
* James Cameron's Avatar has custom voicework by Stephen Lang, who hams it as Colonel Quaritch.
* James Cameron silmultaneously. He wrote them on seperate typewriters.
* James Cameron. The story and moral wouldn't have worked if Jack survived, so one way or another, he had to go down with the ship.
* James Cameron, this is a possible interpretation as to what happened on Pandora. Eywa, the supreme being the Na'vi worship could be just an A.I. that, after said singularity an X number of years ago, absorbed and integrated everything into itself which could explain why the Na'vi are able to use their long ponytails like USB cables.
* James Cameron. Though there are live-action actors, Alita and other cyborgs were created using Mo-Cap CGI.
* James Cameron was finished. Unfortunately, because he kept waiting for the technology to catch up to his vision, people started to place it on lists of "movies that will never be made."
* James Cameron which raises the question of why Skynet didn't send anything else like weapons or supplies inside the sac, but it also contradicts every single other piece of Terminator media which comes later — which state that mimetic polyalloy is just good enough to simulate flesh.
* James Cameron, who was a late addition. He wasn't happy that his gear had a heart on it because he felt it looked too much like a bullseye.
* James Carville (getting hitched in 1993) and the proud parents of two daughters. They understandably do not talk politics at home. This odd mismatch ended with Matilin revoking her Republican affiliation and joining the Libertarian Party,

although it has nothing to do with Carville.
* James Carville is described as a class XI in one episode: "I can handle ugly, but he's like circus ugly."
* James Charles: Make-up artist and influencer. Known for his make-up tutorials, reviews and the (in)famous Dramaggedon scandal in 2018.
* James claims to be sexually experienced when Alyssa asks, but after he finds out she's a virgin, he confesses that he's one, too. Alyssa admits that she'd already figured it out — it was pretty obvious.
* James Clavell, an interesting sub-plot includes Japanese girls, thought by local standards of female beauty to be plain or even ugly, to be the ones visiting Europeans find to be the most sensationally attractive. A wily brothel-madam exploits this by buying the contracts of such girls cheaply, then marketing them at premium rates to European customers based on their discriminating tastes.
* James Clavell. In the late 90s, direct-to-video Anime would be handed that baton.
* James Clavell, the stranded English sailor, James Blackthorne, becomes "Anjin-san" precisely because of this; his name is impossible for Japanese to pronounce correctly.
* James Clerk Maxwell rewrote Robert Burns' "Comin' Through the Rye" with lyrics about physics and called it "Rigid Body Sings". He used to sing it, accompanying himself on the guitar. If it wasn't enough that he discovered that light was electromagnetic radiation entirely through the power of mathematics, it seems that he did this about 100 years before filk was invented.
* James Clerk Maxwell was a British 19th century physicist who laid down the foundation for Einsteinian Relativity and basic quantum mechanics by demonstrating that light is formed of electromagnetic waves, but few people have ever heard of him. Some scientists believe that if he hadn't died of cancer at age 48, he might have beaten Einstein to the theory of Special Relativity by around 4 decades. In fact, Maxwell's Four Equations are a solution to Einstein's Special Relativity's equations, so in effect Einstein proved Maxwell correct (as far as his equations went, but disproved him in terms of requiring an ether).
* James Coburn. 21 seconds into it, he says "You lost." 1 minute and 17 seconds later, at 1:38, he says "Call it." At 2:20, in response to Chris saying "Britt.", he says "Chris."
* James Coldwell of Manchester, New Hampshire, who attempted to rob a bank in 2007.
* James Corden stunt along with the film's other principals. Speaking of Corden...
* James Corden was only given one nomination for Best Score (with the song's original singer, George Salazar, being snubbed for Featured Actor) and composer Joe Iconis wasn't even aware there would be such an extensive parody, several fans were upset that the song was parodied without giving a proper boost to the show, since it's not very well known outside of the theater fandom. Corden, as well as others in the theater community, later gave formal credit on social media, linking to videos of Salazar's original performance.
* James Cromwell, the inventor of warp drive and the one to establish humanity's first contact with aliens, making him a major player in the Star Trek lore despite the limited appearances. He does reprise the role in certain episodes and stock footage.
* James Curtis Hepburn is used to enter Japanese text on the keyboard.
* James Darren's "Goodbye Cruel World" finds its narrator "off to join the circus" to "be a broken-hearted clown" after a breakup.
* James Dashner, author of the book, has a cameo in the end scene of
* James Dean's car, a Porsche 550 Spyder nicknamed "Little Bastard", is claimed to be haunted due to bad luck and accidents associated with the car after Dean's death.
* James Dean (the actor was also simultaneously working as a race car driver.)
* James Dean were sold for scrap and put in other cars, every single one of them had accidents that killed or maimed people.
* James 'Death Himself' Norrington fanfiction. Occasionally substituted with 'The Devil Himself' Norrington.

* James defies this trope in "Off the Unbeaten Path" where he participated in an "orienteering race". Basically, he competed fairly with his Mime Jr. despite Jessie urging him to cheat like she was doing. In the end, James wins the contest and Jessie gets "blasted off".
* James didn't get a larger role in "Look Who's Balking" as he was only shown at the beginning and end.
* James didn't get away from this either. In a challenge where the guys all bought German saloon cars, he bought a Mercedes with a "dog-leg" gearbox. Imagine a layout like a normal gearbox, but going from left to right, instead of the upper-left-hand corner being first gear, it's reverse.
* James Discovers Math, the logo has the titular character's finger come in from the top and pick at the "o", followed by him lifting it up and the letter falling back down and slicing in the process.
* James Doohan, lost his right middle finger to friendly fire during the invasion of Normandy.
* James Doohan's ashes were also launched into space, but returned to Earth much sooner.
* James Doohan's Montgomery Scott character has inspired so many to become engineers that he received an honorary degree in Engineering from one such school. Similarly, Dr. McCoy is said to have encouraged many fans to pursue careers in medicine. And many black women who went into STEM and space exploration fields because of Nichelle Nichols.
* James Doohan. So Doohan called her and invited her to a convention in Indianapolis. He then pulled a Scheherazade and told her that he expected to see her at the next convention, and the next, and the next, and it apparently worked. It worked so well that he had struck up a correspondence with her and acted as her mentor. After a while, he stopped receiving letters from her and was concerned that she had fallen to depression and suicide, and he hadn't kept hold of her address to reach out to her. Eight years later, he received another letter from her apologizing for the silence — she had returned to college and had gotten her Master's degree in Electronic Engineering.
* James Durbin's song "Screaming" has him calling out his parents for being "liars" because they said that his life would improve with time.
* James Eagan Holmes, who shot and killed 12 people and wounded 70 others at an Aurora, Colorado movie theater during a screening of
* James Earl Jones and does not mind that so many people immediately associate him with the franchise.
* James Earl Jones, has an almost laughably nasal voice and nonthreatening accent in comparison.
* James Earl Jones has an unavoidable case, as Jones' voice had changed with age and Vader sounds a bit deeper and speaks a bit more slowly.
* James Earl Jones: "To be completely honest, I didn't know Charlie Harper. But any man who, with his dying breath, would set aside $25,000 and a first-class air ticket so I could deliver his eulogy is aces in my book!"
* James Earl Jones while reading such inane and insipid speech is downright hilarious.
* James Earl Ray, the murderer of Martin Luther King Jr., intended to flee to apartheid-ruled Rhodesia, which besides treating blacks like Ray thought they should, also had the added attractive of not having an extradition treaty with the US. He made it to Canada, then to Britain, and then to Portugal, one of the few countries in the world with diplomatic relations with Rhodesia and, through its colony in Mozambique, also a long border with it. Unfortunately for Ray, the guy who forged his Canadian documents wrote his surname as "Sneyd" in his birth certificate, and "Sneya" in his passport, and the Portuguese sent him back to Britain. Upon arrival he was recognized as the now infamous Ray, arrested and extradited to stand trial in Tennessee.
* James Ellroy, but the ultimate point is that his sins pale in comparison to either of theirs.
* James Ellroy's Underworld USA trilogy are involved in the 1960 Kennedy campaign

and subsequently become prime movers and shakers involved in virtually every major American historical event of the next decade, including the Bay of Pigs invasion, both Kennedy assassinations, the killing of Martin Luther King, Jr., and the Vietnam War.
* James explicitly talks about the good feelings that good cooking brings.
* James Fenimore Cooper (1828), which are both set in the 18th century. Before becoming a writer Cooper had served in the merchant marine and the United States Navy, and his books not only inspired many young readers to go to sea, but also writers like Herman Melville and Joseph Conrad.
* James Fenimore Cooper is generally credited with either inventing or widely popularizing the name "Cora" in his novel
* James Fenimore Cooper lambasted him in a polemic essay, but never read one of Cooper's books, let alone checked if Twain's sweeping claims are factually correct or not.
* James Fenimore Cooper, where it entails actually wearing the enemy's bear skin (dressing up in a Huron medicine man's bear costume).
* James Figg, best known as one of the fathers of modern bare-knuckle boxing and the first English champion, was also a skilled swordsman who fought a number of duels in the bear gardens of London.
* James Foley, who was beheaded by ISIS while covering the Syria Civil War in 2014.
* James Franco, and he ultimately elects to stay in Oz permanently as its ruler.
* James Franco, complimenting the dais while claiming he was brutally roasting them. The audience laughed, but the comedians were nearly passing out.
* James Franco on a customer (played by Leslie Jones, whose reactions are priceless).
* James Franco to cover up his relationship with an anime body pillow.
* James Franco was roasted two years later, also adding to the meta-joke.
* James Franco would be one compared to most roasts, considering the verbal abuse/banter thrown around is very much self-aware, good-natured and done amongst real friends and non-strangers.
* James Franzen, especially in the works that may be connected by this theme.
* James Franzen - Online visual artist and animator, better known as RadioGosha or GoshaDole.
* James French, a convicted murderer scheduled to be executed via electric chair, suggested to a reporter interviewing him: "How's this for tomorrow's headline? 'French Fries!'"
* James Gandolfini, but they were cut after negative reactions at test screenings.
* James Gandolfini was chosen, Van Zandt as Silvio Dante (a character he pitched himself) and Rispoli as Jackie Aprile.
* James Garfield, admitting to the shooting but arguing that it was the doctors who really committed the murder. He was convicted anyway, because it was his shooting that prompted the doctors to do anything at all.
* James Garfield, that the dead President's doctors had actually killed Garfield. Famously declaring "The doctors killed Garfield; I just shot him," Guiteau was nevertheless convicted and executed.
* James Garner and Mariette Hartley did a number of commercials for Polaroid cameras. The way they played against each other, one would get the impression they were in fact a domestic couple, though this was never stated in the commercials. Mariette Hartley took to wearing these lettered sweatshirts that read "I am not James Garner's wife". Her baby has a shirt that read "I am not James Garner's child".
* James Garner. He goes through the whole film insisting that he's not a spy, just a fashion photographer. At the end everyone is finally convinced he's just a photographer, and then in the final scene, it's revealed he's really a spy.
* James Gillray, late 18th and early 19th century cartoonist who is still cruder and more vicious than any of his mainstream successors.
* James Gordon's fiancee, Barbara Kean, is reimagined as a bisexual woman who used to date Renee Montoya.

* James' Grass-type Pokemon glomp him upon being let out of their Poke Balls. One of them's
* James Gunn style and irreverent humor that successfully elevated an obscure Z-list comic property into mainstream popularity. Gunn became so beloved among the MCU fandom that fan outrage over his abrupt 2018 dismissal lead to Disney rehiring him and offering an apology.
* James Gunn, then not giving her a love interest at all, and then giving her a boyfriend in the sequel.
* James Gunn, this is hardly an unusual opinion). That said, he did apologize after hearing that Scrappy actually did have some fans who were upset by the movie exaggerating his negative traits at the expense of ignoring his positive traits.
* James Gunn to be hilarious. So much so that he finds having his movies spoofed by the HISHE team to be a higher honor than winning an Oscar.
* James Gunn was a big, if not the main, reason he wanted to make this movie. In fact when it was confirmed that the film was a hit, Gunn put a heartfelt thank you letter online and specifically thanks everyone for letting a raccoon make them a little more human.
* James Gunn was much more faithful to the original cartoon. It also served as an origin story for how the gang met, complete with Gunn's trademark offbeat humor. There are also deleted scenes showing Daphne encountering a possessed Velma, and Shaggy witnessing Daphne's soul getting extracted too that explain oddities in the finished film - after the former, Daphne just leaves a locker room looking panicked, and the latter has Shaggy inexplicably knowing to find Daphne's soul in the vat too.
* James had different reasons for killing Mary, from euthanasia to being exhausted from dealing with her illness so long to a little of both.
* James has a small non-speaking role as lesser known Batman villain, Victor Zsaz.
* James Herbert after getting burned by one in his past, and is understandably pretty skeptical (and deeply cynical, because this is James Herbert) about the supernatural. The events of the story force him to rethink his stance, to put it mildly.
* James Herbert and the general ecosphere, are anticipated to herald a re-emergence of a long-lost human ability.
* James Herbert. Around her gather light-draining spectral orbs, seemingly drawn by her psychic buoyancy to the brutal history of the castle, the depravity of several clients, and the monstrously evil career of her father.
* James Herbert like rats. At all. Not only do giant, smart, actively malevolent rats feature in an entire trilogy as the monsters, regular rats pop up as minor threats in many others, and frequently the protagonists react to them with revulsion.
* James Herbert spawned several sequels and plays on the oft-repeated assertion that in London you are never more than twenty feet away from a rat.
* James Herbert the human characters in the book are flawed, limited, rather depressingly seedy, and completely out of their depth.
* James Herbert, the protagonist is first introduced to the love interest of the novel (a barely pubescent Elf girl) by his spying on her masturbating against a tree.
* James Herriot book, the housekeeper has to be gone for a few days for a family problem. Siegfried "solves" the problem by assigning housework and cooking to Tristan, who cleans decently enough, but can only cook one dish and manages multiple disasters with that dish over a few days, driving his brother to the pub for a meal.
* James Herriot describes a case very similar to Dominic; a dog that got one leg paralysed and the other on the same side broken and refusing to heal. Still worked as a perfectly fine shepherd dog.
* James Herriot drew up and asked for directions to Whitby, which Herriot had to give while a large puddle was forming at his feet.
* James Herriot had a few brushes with this sort of thing: in one of the books, the narrator tells about some brothers and father who got slick talked into disability

insurance. However, the joke was on the insurance company as they "managed" to somehow get injured repeatedly at an amazing rate as soon as the policy was issued. They remarked how it was strange how the company dropped them as soon as the policy term ran out but that they got another company, albeit at a higher premium, to insure them.
* James Herriot, had at the time decided to refuse advertisements from newly qualified vets along the lines of "Will work for board and lodging", on the grounds that this was bad for the image of the profession. Herriot himself was lucky — he anticipated unemployment awaited him. Instead he met established vet Seigfreid Farnon.
* James Herriot tells in his books that he received a number of such compliments from farmers once he married.
* James Herriot, the RAF has a good dentist and a bad dentist. James is sent to the bad one who proceeds to extract one of James's teeth with a hammer and chisel.
* James Hetfield burned onstage in 1992, there were the third degrees burns on his left hand and arm.
* James Hetfield. In "Metallica Millionaire", he's shown as being too stupid to answer a game show question about what band he plays in, even though every one of the available answers is "Metallica" and the host outright tells him to pick anything.
* James Holmes, the perpetrator of the 2012 Aurora Colorado shootings, has apparently been called this by his defense attorney. Holmes had also dyed his hair orange and was referring to himself as "the Joker". Then again, he propped open an emergency exit before his rampage so that he could sneak into the theater past the front, and had placed a large number of complicated, connected traps in his apartment that police took several days to disable. In the end, he was found guilty by the jury, but spared the death sentence.
* James Hong falls under this trope every time he appears in any film or television series. While he is of Chinese descent, he was born and raised in Minnesota and his original accent made him sound like it. This was a problem early on in his career, as directors and producers in the 50s and 60s expected an Asian actor cast as an Asian character to sound like he was Asian. In order to get hired, then, Hong developed the accent he now uses when he performs — which the actor describes as "vaguely sort of almost a Chinese accent" — and nowadays just uses it all the time because it's easier to stay in character that way.
* James Horner was using at the time. Horner never made the pop charts again after this.
* James Hound episode title card, showing Dr. Ha-Ha's hideaway and some variety of bat, had this effect ("The Phantom Skyscraper," "Rain Drain," and "Bugged By a Bug" among them).
* James H. Schmitz falls into his arms—but never hesitates when a lady needs his help.
* James H. Schmitz — that the ratio is even worse: one invasion / two ordinary humans, who are merely somewhat better than the average.
* James H. Schmitz — the Vingarran Gate is too long-range to be useful on the planet surface, but it's ideal for them to transfer people to and from their spaceships hiding in the outer reaches of the solar system.
* James H. Schmitz short story "Novice". Telzey's Aunt Halet cloaked her malicious intent behind a pleasant façade.
* James H. Schmitz stories. A planetary tyrant who suffers from extreme space-fear is tricked into fleeing his planet with the help of antipsychotic drugs that keep the fear under control...until the dosage expires.
* James H. Schmitz stories uses a semi-voluntary version of this, similar to the above. The Service ostensibly exists in order to tag and control all telepaths, but is actually another arm of the Overgovernment. In order to maintain its semi-monopoly on telepathy and psionics, telepathic machines are installed in all spaceports, and if the device gets a response from a telepath, the telepath is tagged and implanted with a compulsion that strongly suggests the individual in question seek out the Service to learn about themselves. A few, such as Telzey, are

able to overcome the compulsion, and the Service will generally leave them alone (or actively work with them) if the telepath has demonstrated that they know the rules and will not muck things up.
* James H. Schmitz story "Sleep No More". Telzey is being pursued by a teleporting monster that homes in on its target's mind. She mentally projects an image of herself being inside a nearby mountain, and when the monster teleports to that location and merges with solid rock there's an explosion.
* James H. Schmitz story "The Machmen", the machmen claim this is the case, but the protagonist believes they are merely being brainwashed as well as enhanced.
* James H. Schmitz. Then again, the student body of Pehanron College seemingly isn't much older than Telzey is; her roommate Gonwil is 19, but she's in her last year, while Telzey still has several years to go. It's either a prep academy for nothing but Teen Geniuses, or the Hub's education system is a tad accelerated. Telzey is still the top student in her year, that's true.
* James Huling has done this, especially on the live feeds, to make sure he wins America's Favorite Houseguest for a second time. This tactic rubbed fans the wrong way and Victor Arroyo ended up winning America's Favorite Houseguest beating out James and his showmance partner Natalie for the title.
* James II of England took the throne in 1685, but he was universally loathed by Irish and English subjects alike, therefore earning him the nickname, "James the Be-Shitten."
* James interestingly enough is one of these, completely in spite of him technically being a bad guy. It probably helps that he's more of a

* James J. Dillon. On the other hand, popular authority figures kicking ass often does go over well with crowds, such as whenever Carlos or Stacy Colon return to the ring to put upstart WWC wrestlers in their place.
* James Joyce, an aged publican, with Anna Livia Plurabelle, the beautiful personification of the river Liffey.
* James Joyce and the role of the Catholic Church in Irish politics, between Stephen's father and his aunt.
* James Joyce. During one session, someone knocked on the door and Joyce said, "Come in," which the typist accidentally added to the text. Joyce told him to keep it.
* James Joyce in particular uses vico's version of eternal return as one of its basic structural principles.
* James Joyce, is a rather obvious Author Avatar—just look at book's title.
* James Joyce often wore one. He was troubled by eyesight problems for much of his life, and underwent numerous eye surgeries.
* James Joyce on actual Dubliners he had known. In particular, the character of Buck Mulligan is a scathing parody of Oliver St. John Gogarty.
* James Joyce, one character poses a riddle: What opera is like a railwayline?
* James Joyce to write his hero an appreciation. His multi-lingual ear for languages went into many of his books.
* James Joyce. Uniquely it's over her daughter playing the piano rather than singing or acting.
* James Joyce were highly critical of Irish society, especially the hold of the Catholic Church on society, its antisemitism and narrow nationalism.

* James Kid/Mary Read, who talks a lot more and whose ability with disguise is more important to the plot.
* James Kirk, who at Spock Prime's suggestion goads Spock into breaking in rage, causing Spock to relieve himself from command and Kirk to be put in charge.
* James K. Polk and one act of diplomacy with Britain that prevented a second war. He decided not to run for a second term, having accomplished everything he wanted to do in his first. He also died relatively young, at the age of 53, only 103 days after the end of his presidency.
* James K. Polk worked himself into an early grave due to the fact that he didn't like to delegate work to other people.
* James Kyson Lee originally auditioned for the role of Hiro Nakamura, but instead got the role of Hiro's sidekick Ando.
* James Lee was known to have had alcohol issues that may have been a form of self-medicating (he's struggled with depression over the years), and it's strongly suspected to have been the reason why he was fired. He has apparently gotten better, though.
* James Leo Herlihy, best known as the author of the original novel of
* James Leyland Kirby, aka 'V/Vm' is known for the incredibly distorted remixes of popular music that he records, one example including his album "Sick Love", which consists of disgusting, mutated recreations of love songs like Billy Joel's "Just the Way You Are", Berlin's "Take My Breath Away", etc.
* James Lileks - May 1997- "Don't contrude with my train of thought, I'm on to something here"
* James Luceno can always be relied upon to take threads from all over the Star Wars continuity and bring them together.
* James Madison actually tried to take command in the field as British troops approached Washington, D.C. during the War of 1812. At nearly the last minute, Madison realized that fighting a battle is slightly different from writing a Constitution, and so he left it in the hands of his Secretary of War, James Monroe, a combat veteran. The British routed the hastily-assembled American defenders anyway, but Monroe's efforts bore fruit and the British raiders were halted at Baltimore soon after. Madison learned his lesson, and re-established a professional standing army. Monroe was elected president in 1816, succeeding Madison.
* James Madison. Madison—and the rest of the garrison—eventually did flee, but not a moment before the situation became hopeless.
* James Marion Sims is hailed as the "Father of Gynecology," pioneering the field at a time when there was a societal taboo in the treatment of women's reproductive organs, and his research led to the creation of the vaginal speculum, and a number of treatments and surgeries that would help in recovery after childbirth, as well as other vaginal maladies. Being a physician he established his practice in Alabama in the Antebellum period, and he would often tests his hypotheses of the effectiveness of his treatments on slave women he owned, or had borrowed from other slave owners who wanted them back to work as soon as possible. By all accounts, he performed experimental surgigical procedures on helpless women without the use of anesthesia.
* James Marsters and acts the same way, casually commenting on how horny someone's poodle is making him.
* James Marsters as Brainiac, Brian Austin Green as Metallo, and so on.
* James Marsters" as his favourite episode. He explained that it was "such a brave move" for a show to do an episode like that.
* James Marsters because it made the character look cooler. They had to work his vampire makeup around it and ended up accentuating it whenever he puts on his gameface. Explained in a comic book limited series as being tagged with a magical weapon so even being a vampire wouldn't heal it up right.
* James Marsters canon when his character Spike gets cut in the same spot while fighting a Chinese Slayer during the Boxer Rebellion.
* James Marsters dyed his hair platinum to play Spike. He once mentioned the bleach would often blister his skin.
* James Marsters, having already soured on "heroic" vampires after being forced to

make Angel redeemable, resented having to do it again for Spike.
* James Marsters. He assumed makeup artists would want to cover it up, but instead they recognized it suited his badass character and enhanced its appearance.
* James Marsters only read the scripts for his own scenes, as he was a fan of the show and didn't want to have the rest of the episode spoiled for him.
* James Marsters, who plays Spike, has admitted that he would wear lifts in his shoes so that he would look about equal height to David Boreanaz.
* James Mason, Annette is possessed by Elizabeth, her home's previous resident, who may have been poisoned. Annette becomes very weak and ill. Elizabeth, through Annette, asks for Dr. Marsham, her fiancé. Annette's guardian asks the local constabulary to find Marsham, so when he shows up at the door late that night nobody is surprised. The next morning, Elizabeth is gone, Annette is fine, and the police report that Marsham was already en route to Annette's house when he died — an hour before he arrived.
* James May commented on the love that is felt all over the world for the traditional "blitish spoltcal".
* James May is given a Romanian phrasebook which has been purposefully mistranslated. When May inevitably gets lost, his attempts to ask directions only confuse the locals.
* James May is "the first person to go to the North Pole who didn't want to be there."
* James May often features this trope by its very premise. The aim is to revive interest or nostalgia for the classic toys James grew up with, by way of using them to accomplish something far beyond their original scope. By definition, it means doing things that the intended child market could not hope to achieve, and by extension, it's usually something that would be ridiculously dangerous for them to attempt. For example, one episode builds a working drawbridge in Liverpool out of nothing but Meccano pieces (punched metal beams and fasteners, similar to an American Erector Set). Playing with this toy ultimately takes a team of architects, a group of engineering students, construction equipment, and a safety harness for the ceremonial crossing.
* James May remarked in an interview with motoring YouTuber Jimmy Broadbent that he was aware of the "Bottom Gear" meme and had actually watched the video himself.
* James May's flight fails due to weather conditions, he instead - successfully - flies it from the English coast to the island of Lundy, which he renames Llundy to make it sound more Welsh.
* James May's Man Lab, and a way to cheat at playing the guitar. Charlie later woos fellow researcher Cassandra and asks her out to lunch.
* James May's Man Lab created the Swiss Army Bike, which is a normal, ridable bike that also has a squeegee for cleaning windows, a grindstone, a drill, a sprayer for creosote, and a blender.
* James May's Man Lab, Dodger the dog must be "traumatized" in order to make the Powder of Sympathy work properly. Rather than wound him, as was called for in times of old, they force him to listen to Susan Boyle sing "I Dreamed a Dream".
* James May's Man Lab: James harnesses the power of the UK version of the trope, complete with stripey shirt, to sneak around town and test out the experimental cat-cams. He actually wants to be obvious, so people don't mistake him for a real burglar and "beat him to death with pick-axe handles."
* James May's Man Lab piss in the fountain within about five minutes.)
* James May's Man Lab, where May builds a home theatre and then shoots a film to show as his premiere which consists of a woman's boiler going out, a plumber coming to fix it, and her towel falling off while he is trying to work.
* James May's Man Lab with Oz Clarke as the girl and James as the clown.
* James M. Cain to his original story — specifically the framing story element. He also thought it ended better.
* James McAvoy Blu-Ray/DVD makes it clear that the filmmakers' first choice for the role was McAvoy because he's a very talented thespian.
* James McAvoy called the movie a "love story" between Xavier and Magneto, even though when pressed for clarification, he admitted they were not gay. The film

certainly did concentrate heavily on the two's relationship, and the final scene, in which the two split and their surrogate children chose sides, played out like a couple's divorce.
* James McAvoy, "James appeals to both men and women [...]; he's one of the boys, but he also has great sensitivity. He's masculine without being macho." Not surprisingly, a lot of McAvoy's roles feature men with androgynous personalities.
* James McAvoy that much more tragic. (Note that the administration of the serum, especially when Charles does it by himself, is presented exactly in the same manner as heroin users.)

* James Otto's "Just Got Started Lovin' You", a two-week #1 and the biggest country hit of 2008, was followed by the #39 dud "For You", and his career never recovered.
* James Patterson series has portals to the alternate world of the Shadowland, which can only be accessed by certain beings known as "Curves." It is strongly implied that the New Order is trying to eliminate the Curve ability from its prisoners (at one point, when an evil hellhound is the only one of its kind to make it through, Celia suggests that it "must not have been fully brainwashed by the Straight and Narrows.") Said Straight and Narrows, when attempting to get through a portal, will invariably slam into the wall instead.

* James P. Blaylock, Willis Pule is knocked unconscious during a scuffle with zombies, then hauled away with the bodies left behind when they de-animate. Pule's skin had been stained pale green in an earlier incident, so whoever collected the bodies can't be wholly blamed for mistaking him for yet another corpse.
* James P. Hogan are an interesting take on this: their planet's vertebrates are

six-limbed, but the intelligent species, the Borijans, are descended from birdlike creatures. So they have six limbs, but two are arms, two are legs, and two are vestigial wings.
* James P. Hogan floating outside the space station in a spacesuit fires a particle beam rifle. Small thrusters on his jetpack fire to counter the weapon's recoil.
* James P. Hogan humanity was accidentally uplifted by aliens from Minerva (which was the fifth planet in the solar system before it was blown up).
* James P. Hogan is that not only do they have six limbs (two legs, two arms, and a pair of non-functioning but socially important wings), all of the higher (vertebrate-equivalent) life on Turle follows the same general six-limbed body plan.
* James P. Hogan. The prospective time traveler induces a grandfather paradox. The universe doesn't abhor it or disallow it or anything, but simply plays out the umpteen zillion iterations of the events in question. A leads to B leads to Not-A leads to Not-B leads to A leads to B... It should go on forever, but on each run-through, quantum randomness causes things to be very, very slightly different (an atom decays or not, a pair of colliding air particle zig instead of zag) totally regardless of anything the time traveler does. Normally they won't make any difference whatsoever, but after a few million or trillion iterations, the randomness happens to align in such a way that it breaks the paradox (i.e., kills his wife in a new way) and lets the timeline continue past it. What we the audience see is merely the "final cut" version of history, the one that didn't get stuck in an endless loop.
* James P. Hogan, the ship simply left while it still had enough crew left to function. The colonists demonstrate that they are much more savvy and strategic than the military gave them credit for. They co-opt all the ground force as they can. When final mutiny aboard the miltiary warship begins, the colonist wait for the most dangerous hard-liners to make their escape in a shuttle craft. They knew that the worst rats would have a plan to flee the ship when it sinks; the General Ripper, his most essential loyalists and those that could pay for the privilege to abandon their fellow expeditionists. Then they blow the shuttle craft out of the sky. This is what is known as a decapitation strike.

* James Potter and the Hall of Elders' Crossing Yeah, apparently the coolest Founding Father was also a wizard, and has a machine that has slowed his aging so much he's still alive.
* James Potter and to a lesser extent, Sirius Black as teenagers. Teachers recall that they were the best at practically anything they tried, in classes and out, and they became Animagi at the age of fifteen (even helping their not as talented friend in doing so). However, this arrogance got on some people's nerves (or at least Snape, who was another Insufferable Genius and Lily, mainly because of Snape and James' fighting). He grows out of it.
* James Potter thinks Jen keeping him as her father (after using a magical ritual to remove Lily as her mother) means she still wants to reconcile with her family. In reality, Jen hates her entire family, and only kept him because switching mothers resulted in a more plausible explanation of her parentage than switching fathers, and she couldn't change both.
* James Potter was this to Lily Evans in their first six years at Hogwarts. Although James was a talented Quidditch player and well-liked by most, Lily considered him an arrogant bully and treated him with contempt.

* James Rolfe and later became an actor as well as working with Paramount to develop a "movie about video games movies" with Crispin Glover.
* James Rolfe. Anything involving his family, especially his wife and two daughters? Under lock and key. While his wife has assisted on many of his AVGN videos, she herself has never appeared in person in them and is always referred to as "Mrs. Nerd" in credits of his works. He also has an unlisted phone number and address.
* James Rolfe, as well as some of his original films such as "Legend of The Blue Hole", "Red Zombie", and "The Deader The Better".
* James Rolfe... But the games that are fondly remembered are in no way indicative of the average production values back in those days, they were more like diamonds in a steaming heap of crap, and James made sure to remind us all of this fact by producing over 120 episodes dedicated to shitty games that suck ass.
* James Rolfe does this during his list of "Top 10 Reasons Blu-Ray Sucks" where he dunks on the format for a solid 14 minutes, but then puts on a big smirk and cuts to a two-minute long over-the-top commercial for the AVGN Blu Ray collection:
* James Rolfe in particular are full of cheesy, bright red blood effects.
* James Rolfe's Cinemassacre is a combination between a camera and a chainsaw.
* James Rolfe sometimes does this in his reviews. Examples include "the worst commercially-sold VHS tape to feature such high-profile monsters" and "the craziest, most absurd scene in a horror film to feature two actors who would go on to win Academy Awards."
* James Rolfe speculates that the titular Blue Hole, a mysterious pond in the New Jersey pine barrens where people frequently vanish, is actually a time portal, and diving into it will cause you to resurface in the past. Jason and Samantha jump into the pond in 2003 and resurface in 1971, though Jason later draws a diagram showing that believes diving deeper into the Blue Hole would take you ever further back.

* James Stewart; he's trying to catch a fugitive to get a $5000 reward so he can buy back the ranch that was stolen from him.
* James Stewart, the Black Knight of Lorn, a Polish knight who, contrary to this trope's meaning, was (and still is) actually considered one of the finest examples of chivalry conduct.
* James St. James, a Millikin University professor who turned out to have murdered his father, mother and sister back when he was 15, yet was allowed to keep his job and remained popular with his students even after this fact was revealed.
* James Storm: Briefly sojourned to NXT in 2015. Returned to TNA/Impact Wrestling in 2016. Left for good in 2018.
* James Swallow, Adept Pellis as the Dark Apostle breaks into his rooms.
* James Swallow, after Gallio, Vode, and all their men are murdered, Rafen thinks it's his fault for having sent the message; their blood was on his hands.
* James Swallow; all of them are tempted by it, every fight, though Rafen notices that this time, it struck with uncommon quickness, among veterans.
* James Swallow and perished miserably. Sachiel tries to rebuke them — it had been an honor to die for the Emperor — but Arkio agrees — what would they be, to see that and feel nothing?

* James Swallow because he could not win him over, he quite easily brought over Sachiel, through his pride.
* James Swallow, Blood Angels steal a tank and use it to mask their approach to the Word Bearers camp.
* James Swallow, Brother-Sergeant Rafen interrupts two Chapter Masters who are obviously about to quarrel with the comment that "with respect" this was not the place.
* James Swallow, Garro refuses to shoot on a Thunderbird without hailing it to find out why.
* James Swallow give him an order. Qruze points out that he could have broken Garro's neck with the blow, and didn't; he knew Garro's words had value and wanted the complete truth. He listens to the rest. At the end he accuses Garro of insanity; Garro counter-accuses him of blindness.
* James Swallow. He finds his vox, with its command codes, not yet disabled. Using it, Rafen sends a message to their headquarters, detailing all that has happened.
* James Swallow is complicated when Word Bearers Chaos Space Marines join in.
* James Swallow, Iskavan is told that his force has been sacrificed as bait to draw

the Blood Angels in—and is jeered at for not even being able to die when he ought.
* James Swallow Kaleb, which no one else would want to claim. Though tempted to throw it all out and so be free, that would be ignoble; he goes through it instead.
* James Swallow, Koris declares that Inquisitor Stele is pursuing his own glory and can not be trusted not to exploit the Chapter.
* James Swallow, Miriya rebukes her squad: they are elite troops and find prisoner escort beneath them, and she tells them that any duty to the Emperor is glorious.
* James Swallow. One, being interrogated, weeps about his beautiful daughter, and the prison warden says he has no daughter. On being asked what his daughter's name is, he dies.
* James Swallow; on the other hand, he breaks free of Stele's influence and receives a vision.
* James Swallow question of whether his capture was guided by the Emperor or the result of capricious fate. If the latter, he concludes, to hell with fate.
* James Swallow, Rafen calls from Arkio's forces that he will fight him. He walks out and takes off his helmet, and for the first time, Arkio shows shock.
* James Swallow, Rafen fights against Arkio's claims to authority against even their Chapter Master and Chapter.
* James Swallow, Rafen gets on the outside of a shuttle going to the spaceship to inflitrate it. He is the only loyal Blood Angel left, and the ship, which should have been a refuge, is enemy ground.
* James Swallow, Rafen is horrified to see Blood Angels shooting down civilians. When he appeals to Arkio on these grounds, Arkio is clearly shaken by the charge.
* James Swallow, Rafen reflects back on his own induction and the games there.
* James Swallow short story "The Returned", the Doom Eagles fear that Tarikus, even pure of taint in mind and body, might still have taint in his soul, which might be triggered by a phrase.
* James Swallow Sister Imogen dies during her squad's infiltration of the Necron crypt, her last words to Miriya were to complete the mission, essentially making her a squad leader (again). This is despite the former's distrust and dislike for the latter due to the events of the previous book. Similarly, Verity is told by the convent's canonness that she is now a Sister Militant, no longer a Hospitaller, as the convent is assaulted by a massive Necron force, and is given a master-crafted bolt pistol to start her off.
* James Swallow, the grief-stricken Rafen, seeing Sergeant Koris, his mentor, brought down by the Black Rage, is ordered to take Koris's place in command of the squad.
* James Swallow to get the word back to Terra, and they set out to do so.
* James Swallow, Verity cites the possibility of this as a reason to keep her near the scenes of danger.
* James Swallow, when Lethe asks a question, Dione draws in her breath; Miriya deduces that Dione does not let her squad speak without permission.
* James Swallow, when Rafen gets to the spaceship on the outside of a shuttle, he, despite his gear having its vacuum seals intact, suffers from the "incredible cold" and is stiff afterward.
* James Swallow, when the Blood Angels and Flesh Tearers meet, one of the Blood Angels suspects that — with the Flesh Tearers' unadorned power armor and the gold filigree, rubies, votive chains and other adornment on the Blood Angels' — the Flesh Tearers take them for peacocks.
* James Swallow. When they counter-attack and take down the enemy ship, the Word-Bearers' helots are driven mad by the psykers' deaths and fall on each other — blocking the Word-Bearers' way, so they slaughter them, too.
* James Swallow, when Verity is the sole survivor of a transport, she is told that the Emperor has plans for her.
* James Swallow will stand down and identify themselves. Then he realizes they have a primarch in their number. Who obeys his demands and gently asks permission to come aboard because they might be of assistance.
* James Taylor ends up amazed with the progress of humanity, seeing the graves of

both his wife and daughter makes him tell the doctors "don't leave nothing to work on" once he dies.
* James Taylor likes to throw in "baby" to pad out some empty space on a track, baby.

* James Thurber" ends with Walter Mitty leaning against a wall and imagining himself facing a firing squad, saying, "To hell with the handkerchief."
* James Thurber has a story called "The State of Bontana" in which characters, challenged to think of a state beginning with B (there isn't one), guess "Bontana", "Butah", and "Bassachusetts", among others. The payoff is when the next challenge is to name a bird, and one of them says "Beagle!"
* James Thurber, has the duck Eva, who eavesdrops on every conversation she hears but never gets anything quite right, tarred and UN-feathered after, having mistaken "shod" (having shoes put on one's feet) for "shot" (having a ranged projectile physically fired into one) and spread the (false!) word that the horse Charles has been killed, he turns up very much alive and wearing new horseshoes.
* James Thurber, however, the incident is so ridiculous that it snaps the team out of their slump and they go on to win the pennant.
* James Thurber, Prince Zorn disguises himself as a minstrel, but the wicked duke has a spy find his clothing, which shows he's a prince, and then insists that the prince wear it.
* James Thurber, Prince Zorn is sent for a thousand jewels, to be found within ninety-nine hours.
* James Thurber short story about this, called "The Curb in the Sky," where the trope has harrowing consequences.
* James Thurber, the Duke finds his castle haunted by the children he locked in the tower: that is, he hears their laughter, and children's balls come bouncing down the stairs. Cold as he is, he finds this more horrifying than the ordinary sort of ghosts.
* James Thurber, the Duke sets impossible tasks to the princes who want to marry his niece Saralinda.
* James Thurber, the title character uses this to drive away Hunder the giant.
* James Thurber used animals in the same way. He had a version of the mouse fable mentioned below - his moral is roughly the same as Potter's.
* James Thurber was legally (but not fully) blind as the result of a shooting accident, leading to his famous lumpy-looking art style.

* James White novels, about a deep-space interspecies hospital. There are codes for different kinds of species, and some parts of the hospital have atmospheres that aren't breathable by humans.
* James "Whitey" Bulger, President of the Massachusetts Senate and the University of Massachusetts (until authorities learned he was talking to his brother).
* James "Whitey" Bulger really hated being called his more famous moniker since it was given to him by the police because of his platinum blond hair, and always instructed those close to him to call him "Jim" or "Jimmy." Since being caught, convicted and put in prison, he apparently
* James Woods fired because he, a supporter of the Republican Party and a staunch defender of Giuliani, hated the script's percieved "liberal bias" and hired a conservative screenwriter to make the former New York mayor (and future Trump ally) more sympathetic.
* James Woods is brought back to life by scientists using space age tech after being stabbed in the back in a previous episode. As a Hollywood actor, he was entitled to top-notch medical care not available to others. Apparently he's
* James Woods so much that he'll take any opportunity to do so, regardless of any pay cut he has to take, and will do for the rest of his days.
* James Woods, whose animated likeness served as a murderous antagonist for the Griffin family, would often contemplate his revenge against the Griffin family before being distracted by a trail of Reeses Pieces ("Ooh, a piece of candy!" "Ooh, a piece of candy!" "Ooh, a piece of candy!" ...), before falling victim to a trap box, where he would be restrained until his ultimate arrest — or as the show made it out, to await examination by scientists.
* Jam had examples of this in addition to most other variants of the trope. In one sketch, a woman talks about her favorite method of foreplay, which is for her husband (who is sitting next to her grinning) to come home crying and tell her he was raped by "A gang of street poofs." In another, a couple realise their young son didn't come home from school, but think that he "decided to stay at school overnight" and don't do anything about it. Even when he's still missing weeks later and they learn that he was seen getting into someone's car, they decide he is probably "staying with a friend." The police eventually find their son's body and inform them that he was raped and murdered - which the parents think is "taking it a bit too far" and resolve to "have a word" with the neighbor suspected of the murder.
* Jamie also has a scene of this nature about Charlie that's much more disturbing than sexy because of his
* Jamie also repeatedly mentions how well it turned out that he never tells Helen about Him On His Rock, though there were situations where he nearly did.
* Jamie and Nick featured the alternate dimension version. Traveling to an alternate dimension is always a bad idea, even if your counterpart is already dead. If your counterpart is alive, the universe will eventually notice and erase both of you from existence. If your counterpart is dead, the universe gets confused and gradually rewrites your memories with the memories of your other self.
* Jamie and the Magic Torch, a young child named Jamie waits until he is tucked up in bed with the lights out, then uses his eponymous enchanted flashlight to open a wormhole in the floor. This grants him access to Cuckoo Land, a world full of nonsensical people and situations and where his companion, a dog named "Wordsworth", can talk.
* Jamie Bamber, but Larry Cedar provides Robin's singing voice. Maid Marian is voiced by Grey DeLisle, but sung by Kerry Norton Griffith (Bamber's wife, incidentally).

* Jamie Bamber has a posse of girl fans known in the community as "Bamber Bunnies", and yet people still misspell his name as "Barber".
* Jamie Bamber, Matt Devlin, was given a slightly different background—born in Ireland, but emigrated to London at young age.

* Jamie Fraser proves himself something of a master of this trope with Lord John. Isn't his fault that the man has a thing for older guys, amicable chess games and good Lord, that accent. (Unfortunately, when Jamie figures this out, his reaction is not a particularly happy one.)
* Jamie Gray Hyder has said she'd been with both men and women while choosing not to label herself.
* Jamie Gray Hyder has said she's been with both men and women, while choosing not to label herself.
* Jamie Gray Hyder, who's said she has been with both men and women (while also not using labels).
* Jamie in Season 6. She's still a student and says Dexter pays her very well. Dexter says she's perfect for Harrison. In season 7, Jamie tries to find a new girlfriend for her employer.
* Jamie is just a rookie cop but given his intelligence and he could be police commissioner himself one day. His family connections haven't helped much though - he's still a beat cop while his Academy classmates are making detective because Frank is adamant in not showing his sons any favoritism which unfortunately means while Jamie is deserving of one, he can't get it because Frank knows people will think it's because of nepotism. Finally averted as of Season 9, where he gets promoted to Sergeant — something which was long overdue.
* Jamie is well aware of this; in one episode, while Adam was in the middle of doing this (there's fifty feet or so between them, so he wouldn't necessarily hear exactly what Adam's talking about), he turned around and said "Is he doing his David Attenborough thing again?", causing Adam to bust up laughing.
* Jamie, it narrowly misses him, to his shock and relief, as it lodges sideways in a metal locker right next to him like a thrown dagger or shuriken.

* Jamie Macpherson actually was guilty, but he still had a pardon coming when — according to legend — the townspeople, seeing the messenger, decided to deliberately set the clock ahead by fifteen minutes so they could hang him anyway. Bit of a subversion, that.
* Jamie Madrox duplicate by Damian Tryp and Anthony Falcone. Cortex was sent back in time to kill the ancestors of the Summers Rebellion, a resistance group consisting of mutants in Falcone's future.
* Jamie McMurray first raced in the Sprint Cup Series in 2002, turned full time in 2003, and has a trophy collection many stock car drivers would envy: a Daytona 500, a Brickyard 400 and two wins at Charlotte are among his seven Cup Series wins, plus he has an all-star race victory in 2014. He has five top 15 points finishes but has never cracked the top 10...mostly because 2004 was the first year the Chase system was adopted, and he had never made the Chase until 2015. But in 2015, he still only finished 13th in points.
* Jamie mentions the movie industry being focused in Kansas, and one of the show's staff specified he meant what we call Kansas
* Jamie O'Neal got hit with this pretty hard. Her first album had back-to-back #1 hits with "There Is No Arizona" and "When I Think About Angels" (in fact, the former made her beat out

* Jam in a sketch where a couple realize their young son hasn't come home from school. They casually make a phone call to ask if anyone's seen him and, upon being told he was seen getting into someone's car, they decide he's "probably" gone to a friend's house and ignore it. Several weeks later, he still hasn't been found—and the parents continue to do nothing. Even when they're informed that their son's body was discovered, they can't be bothered to identify him (saying that if the police think it's him, "that's good enough for us") and then get annoyed that they're expected to bury him themselves. Their only reaction to being told that a friend has confessed to the murder is to sigh and resolve to "have a word" the next time they see him.
* Jam in the crowd and realizes he can spin the election to his favor and get Travis killed.
* Jamiroquai is a throwback to or, at least, is heavily influenced by 70's jazz, funk and soul with the use of classical instrumentation in their music.
* Jamiroquai's first few songs, indeed a significant chunk of their output, have been mistaken for Stevie Wonder's work by people not paying sufficient attention.
* Jamiroquai's Travelling Without Moving contains a double Breather Episode with "Didjerama" and "Didjital Vibrations". They are largely instrumental lounge tunes with didgeridoo in them.
* Jamiroquai's "Virtual Insanity" begins as if the song were playing on a record player. The only instrument playing at first was a piano before the transition added in the rest of the band.
* Jam is a strange TV example of this, being a surrealist sketch horror-comedy, that leans HEAVILY to the horror side. It is designed to make you feel horribly, horribly uncomfortable.
* Jam is set in Brisbane, Australia, which while it is still a large city in its own right is nowhere near as populated or well-known outside of Australia as say Sydney or Melbourne.
* Jam is shown trying spoonfeeding the target of her affections, Ky Kiske, in her third
* Jam Kuradoberi, who is told after fighting Slayer that given enough time, she'll end up surpassing him.
* Jam machine starts spawning 8-bit zombies that act like normal/conehead/buckethead zombies.
* Jammed Seatbelts: A character is in a car and needs to get out fast, but their seatbelts are jammed and won't let them escape.
* Jammes after being revealed as the real voice behind Jarrett's song "With My Baby Tonight". Yes, that was actually Brian "BG" James singing, and unlike a couple WCW examples mentioned below, he could carry a tune.
* jamming himself into its world-sundering laser cannon so it misfired. He shows up at the end of the game without a scratch.
* Jammin' in New York when talking about his favorite thing on TV—bad news. He proclaims that accidents, disasters, fires, and explosions are mother's milk to him—and to most other people, he asserts, even though they would never acknowledge the feeling and instead put on a front of mock horror.
* Jammin' the Blues (1944) — live-action blues jam session on film
* Jam sketch was two men in underwear shooting each other in the ass, but no one can think of one. And the rest of the sketches don't make a whole lot more sense.
* Jam two. One sketch features a couple arguing about what seems to have been an affair on the part of the husband. The wife is relieved when he reveals that he wasn't having an affair with the woman—he was raping her. Then there's the "sex for houses" sketch, wherein a couple trying to buy a house agree to have sex with the seller 12 times in exchange for lowering the price. But when a new offer causes the seller to add more sessions to the arrangement, the couple ultimately decides to let him use the husband's mentally challenged sister in their place.
* Jan Švankmajer means that not a drop of blood is actually shed.
* Jan Švankmajer's short film "Food" two customers wait in vain until a waiter comes to take their order. They start eating everything in sight, including their shoes.

* Jan Švankmajer the characters eat several unusual things: knives, flowers, clothes, tables, napkins, chairs, body parts...
* Jan Žižka. As is fitting for a man of his stature, he is the subject of the world's tallest equestrian statue in Prague.
* Jana Hunter's hair as a freak-folk artist has generally been longish and shaggy, often in her eyes. It's much shorter when she fronts
* Janai subverts this trope. Despite her magic, she is primarily a warrior, and quite a good one.
* Jan and Dean had a lot of songs about cool cars like the Shelby Cobra and the Pontiac GTO. They also had a song called "Schlock Rod", about a jalopy that's almost falling apart and questionably customized.
* Jana of the Jungle episode "Katuchi Danger", the Katuchi chief forced Jana and Montaro to fight a reptilian beast.
* Jana of the Jungle. Jana was raised in the Amazon jungle and was more fluent in English than most jungle princesses.
* Jana of the Jungle often communicates with the animals of the rain forest, and they obey her commands, especially when innocent people need to be rescued.
* Jana of the Jungle (with modifications, this is a kid's show, so no one gets so much as a nasty boo-boo).
* Jan Chappell was both unable and unwilling to return for season four. It was planned that she'd return for the first six episodes, then three, then finally just the first, in which she was hastily killed in an explosion without ever appearing onscreen.
* Jandek after he started his musical career. His name might be Sterling R. Smith, if he's the one signing the checks for Coorwood Industries, which releases nothing but his music.
* Jandek has exclusively made his music available via mail order or, in recent years, his online storefront and has never released it onto streaming services or digital storefronts.
* Jane also actually uses the term Black Sheep when talking about her particular branch of the Lane family to Daria when she and Trent have to attend a family reunion.
* Jane and Candice in series 7 had something of a rivalry between them, most notably when they both decided to make lime and coconut meringue pies for their signature bakes. Despite this they remain good friends and constantly cheer each other on. The "Where are the now" epilogue even revealed that they were going on a baking road trip together.
* Jane and Lisbon too, which causes Jane to often break the rules —nothing new— but this time to save her if she's in danger. It was kept after the series is rebooted and they start working for the FBI.
* Jane and the Dragon, because it is quite literally his job. As such, he can still be serious when he wants to.
* Jane and the Dragon: In one episode, Pepper makes some stew but it tastes like swamp water to everyone but the dragon (Pepper can't taste it herself because her tongue isn't working).
* Jane and the Dragon. It may just be that he doesn't 'get' human humour but his jokes generally leave humans scratching their heads.
* Jane and the Dragon, she claims that she has been recruited by one King Barrowclaw. Naturally, she was inspired when, under pressure to give the supposed king's name, she looked around and spotted first a wheelbarrow, and then Dragon's foot.
* Jane and the Dragon territory to judge from Jane and Jester's reaction.
* Jane and the Dragon were animated this way at Peter Jackson's Weta Digital in New Zealand.
* Jane, a nephilim with unknown parentage (though among some fans is believed that she was the daughter of one of the archangels or guardian angels).
* Jane a pizza delivery guy. On someone else's floor. It led to a pregnancy scare.
* Jane Austen added the word "bitch" (describing a female dog) to escape the G rating.

* Jane Austen, after receiving Captain Wentworth's love letter Anne Elliot, dodging another character trying to tie loose plot ends, promptly runs what seems like the entire length of 19th-century Bath to get to him immediately, only find his relatives, who inform her he's gone to meet with her, obliging her to run even faster all the way back home. Thankfully he's still there when she gets back. She must have been running really fast.
* Jane Austen and five other novels. The Austen cult has been criticised by some, who wonder whether it is healthy for modern independent women to wistfully dream of life in 1815, but then, Austen's books were mildly progressive for her time.
* Jane Austen, and her nature is very sweet, timid and affectionate. She's glad that so great a lady as Emma notices her and happily lets Emma lead and guide her.
* Jane Austen, at one point everything Laura says reminds the grief-stricken Sophia of her imprisoned husband, and staying silent only leaves her to her thoughts of him.
* Jane Austen, Augusta and Graham — perhaps because they both have some sense.
* Jane Austen, Edmund Bertram is nervous about his first encounter with Mary Crawford after her brother and his married sister were discovered having an affair. He's sure she'll be as ashamed and upset about it as he is. Oh, Mary's mad at them all right... for being stupid enough to get caught.
* Jane Austen. Emma herself drives the plot with her well-meaning though overbearing attempts to get her protégé Harriet properly married.
* Jane Austen. Her sister Elinor even comments on her sister's feelings on the subject, saying she's not sure how Marianne can disregard the notion of Second Love when their own father had two wives, and it was that second attachment which produced the both of them and their other sister. Elinor herself is also this for the man she eventually marries.
* Jane Austen in favor of marriage to a rich woman, she instead finds her happiness with the older Colonel Brandon - a quiet, serious, well-mannered man who is much less outspoken about his feelings.
* Jane Austen is a consistent provider of happy endings. Expect happy marriages for all (except the people you've grown to dislike), including financial security, and a brief epilogue providing details of the happy couple's happy lives.
* Jane Austen is outraged at accusations of theft — which she and Sophia have committed, and Sophia was caught doing.
* Jane Austen is scheduled to start shipping November 2011, with art again by Lee.
* Jane Austen is sort of a version of this trope; her relative lack of breeding and unsubtle attempts to set her daughters up with prospective husbands — and in the case of Mr. Bingley and Jane, to act as if they're already engaged after they've just met — prove mortifying to her two older daughters at least (the younger ones are equally embarrassing as their mother). The consequences of this are more serious than usual, since Jane's embarrassing family is one of the major reasons Mr. Darcy persuades Mr. Bingley not to marry her.
* Jane Austen. It describes Austen's interest in food, drawing upon both the novels and her letters. It has authentic recipes from late Georgian and Regency England, modernized for today's cooks.
* Jane Austen. It wasn't all carrot, though; that bribe was to pay off Wickham's many debts, so it's likely that if he had tried to refuse, he would have faced a magistrate.
* Jane Austen; Lizzie isn't much better as a musician, but she knows her talent level.
* Jane Austen loved her creations. We know about it from her letters to family and friends and from her nephew's memoir; he wrote that she had taken a kind of parental interest in them and kept thinking about them after she had finished her work.
* Jane Austen. Not quite as overt as other examples, since there was no intent and both parties had no idea they were in love until Emma had a presumed suitor, but still mildly squicky to modern readers.
* Jane Austen, of the heroine being torn between a dependable, caring man and a

libertinish cad. She will always choose the former, but Austen will keep you guessing as to who it is.
* Jane Austen really loved this trope. Of course, it was the law of the land in her day, unless you escaped to Scotland.
* Jane Austen's brothers were naval officers and she was thus well acquainted with the knowledge of life in the Navy. Two of her books contain elements of Wooden Ships and Iron Men.
* Jane Austen (sic), Edward dies just as he says he will tell what happened.
* Jane Austen [sic]. One scene revolves around two girls who are at home when a wounded soldier shows up at their door. They both freak out, but there's only room for one on their fainting couch, so they agree to take turns.
* Jane Austen Sir James Morton against her will. She gets caught on the road.
* Jane Austen) sits down next to the heroine, Fanny, making it clear he doesn't want to dance. Cue his mother coming over and asking him to play cards with her and his aunt. Tom, unfortunately, must decline because he was just about to dance with Fanny.
* Jane Austen's Mafia! a mob boss gets his index and middle finger cut off by getting them caught in a shotgun and they fire through the barrel like bullets, it's played in a cartoonish manner so there's no blood.
* Jane Austen's Mafia! ends with, as part of a series of murders to avenge the lead character's family, an eskimo assassin harpooning Barney (just because), before dancing to "We Are Family". The closing credits state a shrine was built in the assassin's honor, visited by millions of grateful parents for doing "the one deed to benefit all mankind."
* Jane Austen's Mafia!. One of the headlines is "A spinning paper appears over a cathedral"
* Jane Austen's Mafia! was not credited despite playing a fairly important part.
* Jane Austen's Mafia!, when Vincenzo Cortino gets a job promotion he happily rushes home to tell his family the good news, as he opens the door he accidentally squishes his son Tiny Anthony comically flattening him.
* Jane Austen's Mafia! when Vincenzo Cortino gets shot by a pair of assassins he moves around trying to get people to help him so he can have his gunshot wounds treated, but the crowd thinks he's dancing so they join in, then the assassins shoot him some more causing him to appear to be doing different dance styles including the Charleston, Swing, and the Macarena.
* Jane Austen's novels published under different names. None of the publishers accepted them or gave plagiarism as the reason for rejection. Makes you wonder if the only thing classics have going for them is the fact that they're considered classics.
* Jane Austen's novel. Their being still together is justified, because in those times, once you were married, there was no turning back.
* Jane Austen society was undergoing a similar transition at the time.
* Jane Austen spends some time shipping his future wife (and cousin) Fanny Price with Henry Crawford.
* Jane Austen's sister Cassandra was engaged to her father's former pupil Thomas Fowle. Fowle needed money to marry, so went to the Caribbean as a chaplain with a military expedition. Unfortunately, Fowle died there of yellow fever in 1797. Cassandra inherited 1000 pounds from him (a sum that gave her some financial independence), but she never married.
* Jane Austen's works, although Austen herself was known to enjoy staging private plays for family amusement.
* Jane Austen thanks to her sweet nature, but bookish Mary and second-to-youngest Kitty get the short end of the stick. (Kitty doesn't even get a character trait; she's just 'second-to-youngest'. That's favoritism for you.)
* Jane Austen that he's tried the same technique on at least two other girls.
* Jane Austen the final chapter recounts how the two marriages occurred, and the happy life of the couples thereafter.
* Jane Austen to keep costs down. The film was originally supposed to be a TV movie and didn't have much of a budget.

* Jane Austen was sneaky with this trope; the filmmakers there avoided the G rating by inserting some profanities into the background din of a ballroom scene.
* Jane Austen, where the too-sweet-for-their-own-good Jane and Mr. Bingley get married, as do the headstrong but ultimately noble Mr. Darcy and Elizabeth. On the other end of the spectrum, Mr. Wickham and Lydia, two of the most selfish and vile characters in the story, also end up together, but not for a happy reason. Generally in Austen's world, a person's moral character will greatly impact the quality of their marriage life.
* Jane Austen who believes she has no right to be happy. Unsurprisingly, whether justly or not, it's her least popular novel.
* Jane Austen who was always after money, or some ship him with Mary Bennet, who, as some fans believe, deserves more attention and a wealthy husband.
* Jane becomes this in Trickster Mode. Unlike most examples, however,
* Jane Bennet is universally loved and admired. She's adorable and nice to everybody, and genuine in her sweetness. Seriously, she's a sunbeam and a cinnamon roll. How is it possible to be that sweet all the time?
* Jane by Design's Jane is shaping up to be this. She has multiple potential love interests, a fantastic job that comes easily to her, and all problems she has are quickly resolved.
* Jane cheats on George with Mr. Spacely (to be fair, that was because of drugs but then she doesn't care), and she goes along with both of her kids' Oedipus complexes on her.
* Jane comes out with a beauty, when she compliments a co-worker she fancies on his fantastic penis. And goes on to say 'I used to have one of those'. During a later conversation, she goes into a full-blown
* Jane confesses to her neighbor Joan that she used to be a villain. When Joan expresses doubt, Jane assures her it's true; "Been there, done that, got the T-shirt!" And to prove it, she
* Jane decides to do the "wearing only a trenchcoat" thing with her new boyfriend... only to find he's holding a dinner party the night she tries it. She ends up spending the rest of the evening trying to get a dress without leaving the bathroom.
* Jane, Dirk, and to a lesser extent Roxy all fell for Jake just from chatting with him over pesterchum, plus Roxy for Dirk as well.
* Jane Doe in the Batman universe is an insane serial killer who has this as her MO — she kills people and wears their skins, honestly believing herself to be that person, until she is either found out or breaks out of the identity to find another victim.
* Jane drops her shower bucket when she discovers a prank grodying up the shower stall.
* Jane Espensen recorded commentary for some of the episodes she wrote for in
* Jane Eyre (2006) ends up with her family sitting outside of their house, being painted for a family portrait.
* Jane Eyre: After the failed wedding Jane flees only to return when she realizes that Rochester is really who she loves.
* Jane Eyre and finds her long-lost family of best cousins ever. At the end of the book, they're truly equal in everything.
* Jane Eyre. Arguably, she was better off there than in what passed for a mental health facility in those days.
* Jane Eyre: A Romani fortune teller visits the estate at one point, and Jane has her fortune told. The fortune teller winds up being Rochester in disguise.
* Jane Eyre aspect of the relationship because she is a governess and he is a rich gentleman.
* Jane Eyre begins as an orphan in the household of her aunt by marriage who reluctantly provides her with a home. She then goes to Lowood school where she doesn't exactly have to work for her keep but the conditions are terrible, although the education is good and she excels in her classes to prove herself. Following this she does earn her keep by becoming a teacher at the school. She then becomes a governess at Thornfield. Finally, at the end of the novel she conveniently receives

a huge inheritance from the uncle she never knew who wanted to adopt her all along before he died.
* Jane Eyre Blanche Ingram is supposed to be extremely beautiful, so her appearance is described in great detail. She's tall and majestic; she has a fine chest, sloping shoulders, and a long, graceful neck; her olive complexion is dark and clear. Her face has noble features and her eyes are large and black and called as brilliant as her jewels. She has gorgeous raven-black hair, thick, long, and shiny and worn in beautifully arranged hairdo. She dresses well, too, and is very elegant.
* Jane Eyre commits suicide by throwing herself off the roof of Thornfield Hall—falling to her death—after setting the place on fire.
* Jane Eyre. Easily gotten rid of when Rochester lets a rumor reach her saying (falsely) that he's broke.
* Jane Eyre. In fact, Rochester is trying to elicit this trope from Jane.
* Jane Eyre involves Mr Rochester helping Jane on with a dressing gown in just this way.
* Jane Eyre is all about how the title character transforms from angry, poor, unwanted little girl into an emotionally and financially secure woman who is the equal (and perhaps the better) of her love interest, Mr. Rochester.
* Jane Eyre is sentenced to wear gingham for twenty years and must read the ten most boring books ever written before she dies.
* Jane Eyre, Jane and Mr Rochester headbutt in a loving gesture in front of blooming trees.
* Jane Eyre. Jane and Rochester are described as plain and ugly in the book, respectively. These descriptions get carried over into film adaptations because their romance is about a personal connection rather than physical attraction.
* Jane Eyre: Jane delivers an epic one when she thinks she's to be separated from Rochester — but it's also calling him out on how he's been using her mercilessly, acting as if she has no feelings just because she is not a gentlewoman.
* Jane Eyre: Jane Eyre's older step-brother John Reed has been bullying Jane with impunity her whole life when the book begins.
* Jane Eyre. Jane gets locked in there for misbehaving; she's so terrified she passes out.
* Jane Eyre, Jane herself and Rochester are nothing special, even joking about each other's hideousness, while Blanche Ingram and Georgiana Reed are more conventionally attractive but horrible and snobby. Charlotte Bronte admitted this was her intent when she wrote the novel, in a rebuttal to her sister Emily, to prove that a heroine didn't have to be beautiful.
* Jane Eyre: Jane is a sensible governess who's great for sweet but shallow Adele and tries moulding her into a worthy person. She ends up falling for the head of the household.
* Jane Eyre. Jane is so desperate for love and affection that she tells Helen Burns she'd happily let herself be kicked in the chest by a horse if it meant Helen and the Headmistress would care for her. Helen then shushes Jane and tells her to put more faith in God than in human companions.
* Jane Eyre, Jane is treated only like another mouth to feed for her spiteful aunt (whose husband treated Jane more kindly before he died) and her cousins, especially John, take delight in bullying her, even in front of their mother who does nothing to stop them.
* Jane Eyre, Mr. Rochester has this to say: "...it is as if I had a string somewhere under my left ribs, tightly and inextricably knotted to a similar string situated in the corresponding quarter of your little frame. And if that boisterous Channel, and two hundred miles or so of land, come broad between us, I am afraid that cord of communion will be snapped; and then I've a nervous notion I should take to bleeding inwardly."
* Jane Eyre. Mr. Rochester is passionate and hot-tempered, whereas St. John Rivers is described as cold, passionless and marble-like.
* Jane Eyre. Not only is Jane and Rochester's newborn son one of the last images we

get, we also get Rochester miraculously regaining his sight in his one remaining eye so he can see the face of his child.
* Jane Eyre on her and then trying to induce her to unknowingly enter into a bigamous marriage with him. When his mad wife burns down his house, not only does he lose it but he also loses one hand and most of his eyesight trying to save her life. Jane returns to him.
* Jane Eyre plays with this idea but doesn't quite commit to it. Not only are Jane and Mr. Rochester incredibly attuned to each other's thoughts and feelings, but it is his voice "calling" on her for help from miles away that finally persuades her to return to him at the end of the novel. Even Jane thinks it might just be a coincidence; they do spend quite a bit of time thinking about each other. Alternatively, since she was praying for guidance about her love life at the time, perhaps it was divine intervention.
* Jane Eyre probably had inattentive type ADD. The list of personal flaws Helen confesses to Jane all match the diagnostic criteria: "I am... slatternly; I seldom put, and never keep, things in order; I am careless; I forget rules; I read when I should learn my lessons; I have no method; and sometimes I say... I cannot bear to be subjected to systematic arrangements." She goes on to describe how, although she does very well in classes that catch her interest, her thoughts "continually rove away" during uninteresting lessons.
* Jane Eyre, Rochester is "thanking" Jane for saving his life but Jane pulls away before their lips could meet.
* Jane Eyre, she refuses to sacrifice her morals and live with Mr. Rochester as his mistress if they can't get married.
* Jane Eyre. She's an intelligent woman with brown hair, who works as a teacher.
* Jane Eyre, shows the early life of a character thought of as villainous, but ultimately revealing them as well-intentioned and victimized by others.
* Jane Eyre's romance with Mr. Rochester begins with her rescuing him after he's injured himself in a fall from his horse.
* Jane Eyre was a UK production, but its UK cinema release was 6 months after most countries, and it was already on DVD and Blu-ray by the time the UK saw it.
* Jane Eyre: When Mr Rochester hears from Jane that Mr. Mason arrived at Thornfield, he says that it's a blow, and asks Jane to bring him a glass of wine. She does and he promptly swallows the contents.
* Jane Eyre, where Mrs. Fairfax is the most normal and wholesome person around creepy Thornfield Manor.
* Jane Eyre, which she already had when she and Jane first met. Her death just happens to coincide with a typhus epidemic at Lowood School which also kills many of the other girls. In the musical, she dies of typhus like her schoolmates.
* Jane Eyre, while technically an aunt, still qualifies as an evil stepmother. Not only does she play the part, she is Jane's aunt by marriage, and thus not a blood relative.
* Jane Fairfax is of the same age as Emma and comes from the same neighbourhood and a suitable family. Everybody expects that they should be friends, but Jane is almost too proper if you ask Emma. She's beautiful, intelligent, accomplished and gentle, and seems to be admired by everybody. Emma thinks she should be friendlier and livelier, and Mr. Knightley owns that Jane doesn't have an open temper.
* Jane Fonda is tried and executed for treason after she travels to North Vietnam and speaks in their favor, condemning the American war effort.
* Jane Fonda protested against America's involvement in the Vietnam War during the 1960s and 1970s and, in an even more controversial act, traveled to North Vietnam to meet the Vietcong. She continued to be attacked (even spat on by Vietnam veterans) for this into the 2000s
* Jane Fonda supported the Chilean "No" movement against Pinochet's dictatorship, as seen in
* Jane Foster comes to the Avengers compound to provide scientific insight
* Jane Foster proves worthy to hold Mjolnir and becomes a Goddess of Thunder.
* Jane Foster: that a universe without Death is doomed to develop into a horrific Cancerverse.

* Jane Gill. The defense attorney tried to introduce testimony that her parrot had started to repeat, "Richard, no, no, no!" when the defendant's name was Gary. It didn't work.
* Jane Goodall. Her studies of chimpanzees in the wild helped to better our understanding of our fellow Earthlings, and she is one of the greatest champions of the environmental movement and the crusade for world peace. As such, she's a heroine to social activists, conservationists, ethologists, and laypeople everywhere.
* Jane Goodall pretty amusing, a stark contrast to the Jane Goodall Institute, which tried to lawyer up on him.
* Jane Goodall's son Grub was born in Gombe and raised there until he was six. Sometimes, he would be placed in a large cage with his toys to keep him safe from the park's free-ranging chimps and baboons.
* Jane has also proven to be as talented as her brother in the singing department. When she first meets Tom Sloane, she proceeds to purposefully torture him with a horrible rendition of "Old McDonald Had a Farm".
* Jane has an item that converts whatever she wants into grist, at the price of a few boonbucks. However, since she has no idea what grist is supposed to be used for, she considers the item completely useless. Similarly, she already has a fortune in boondollars and a fetch modus which lists the alchemy components of items, but she has no idea that they'll have something of a use in the near future.
