* In the manga, Goku is actually questioned about his missing tail when he arrives for the second
* In the manga, Goku turns into a Super Saiyan on Namek in a single panel instead of a three-minute gruntfest, so Freeza obviously didn't have any time to respond.
* In the manga, Guts does not have his armor or his ginormous two-handed sword by the time the Eclipse goes down because of the battle with Wyald, where he had to discard the armor to lure him and broke his sword in Wyald's neck. In this version, Guts is actually wearing his armor when everything happens, but he seemingly leaves his sword in camp in his haste to go after Griffith. Not completely inconceivable, but given how Guts is normally so keen on keeping his sword with him at all times, it seems a bit odd that he wasn't wearing it, especially since he hadn't even bothered to take his armor off.
* In the manga, Hanzo and the 3rd Raikage both inexplicably have black sclera (but they still have irises and pupils), though, in the anime, Hanzo's eyes are normal.
* In the manga, he cheated. Though considering the kind of person Gozaburo was, he might have been just as impressed if Seto did cheat.
* In the manga he gets a lot closer to the 'evil' line, but is a lot less divorced, in terms of identity, from normal Yuuri, whose lifelong tendency to a really violent temper is underlined. But the manga is darker than the anime. And Yuuri accidentally stabbed Wolfram half to death a while back in the novels. Genre Woobiefication?
* In the manga Hiroko is only scared into swallowing one worm, but not actually force fed it. A straight example occurs later in the revenge when
* In the manga, his porn obsession eventually leads him to build a massive customized rig just for pornography, complete with cavernous hard-drive, several monitors, high-fidelity headphones and a leather massage chair.
* In the manga: Il Palazzo starts an electronics company and floods Fukuoka with cheap and effective products, earning him a lot of influence in Fukuoka. Il Palazzo doesn't progress from there though, and starts to feel like he has gotten sidetracked.
* In the manga, it's implied that Dung Beetle catches Anko like this at one point. She's none too happy about it.
* In the manga it's mentioned that Trisha died of an illness going around. In the
* In the manga it's worse, since he actually manages to approach her and she directly turns him down. Despite this, she wants to stay friends, and leans on him while pursuing her own romance;
* In the manga, Keime was captured by Disco's men solely for the purpose of

profit, forcing the Straw Hats and Hachi to attack the Human Auction House and save her. In
* In the manga, Keroro switched bodies with Natsumi and irritated her to the point where she attacked him in her own body.

* In the manga, Mikan's parents have the umbrella scene in the Special Abilities room. Cue everybody from Special Abilities and some not getting their names added to the umbrella, with Mikan (unknowingly) writing herself as the child of her actual parents.
* In the manga, Minako tops her by a few orders of magnitude. During
* In the manga, Mion comments on Keiichi being "perky" in the morning (with an arrow following her gaze to his crotch, if the innuendo was too subtle for you) during the first arc. She may just be teasing, though... However, Keiichi does make a comment on how it's her fault he'd be "perky".
* In the manga, Nabiki got her own story arc and wacky challenger in the
* In the manga of the Infinity Arc, both Dr. Tomoe and Kaolinite served that role until Mistress 9 was awakened.
* In the manga, one sneeze is enough to transform sweet, innocent and black-haired Lunch into her
* In the manga, one we get Wolfwood's best friend/nemesis Livio the Double Fang, who dual-wields paired guns that can shoot forward and backwards simultaneously.
* In the manga-only finale, cute demon girls Koto, Juri, and Ruka are being interviewed for a TV Show (at this point, human-demon relations are starting to thaw out), and they each go all gushy when the talk goes to boyfriends. A panel or two later, Touya, Jin, and Suzuka (the respective boyfriends) all sneeze on cue.
* In the manga-only finale, it seems Hiei found a way to please his "girlfriend" (
* In the manga, Ranma thinks this when he believes that Akane is dead.
* In the manga, Rin is a Japanese pine marten that attacks the Kai brothers when they're puppies, wounding them before Ben rescues them. But in the anime adaptation, Rin is a feral dog instead.
* In the manga, Rocky witnesses anti-government forces slaughter an entire Bedouin camp. When Shin and Mickey fly over the desert carnage afterwards, they're both horrified.
* In the manga, Ryōga, thinking of Akane, hugs a pole that has the notice "Do Not Hug Pole." Because he's so strong, he breaks the pole. And right above the former sign there is another, off-panel in the previous panel, which reads "Do Not Break Pole."
* In the manga, Ryū Kumon is introduced by soundly beating up an escaped bear that was attacking Nodoka (before Ranma could even intervene).
* In the manga, San, Ginei, and Haiji have a very similar relationship like the Three Dark Lords.
* In the manga, Saya and Diva had a sisterly friendship in The Zoo until Diva
* In the manga, Sesshoumaru and Inuyasha have flowing waist-length hair. In the anime, however, Sesshoumaru's hair is often drawn knee-length
* In the manga, Setsuna actually pulls out a paper fan (apparently from hammerspace) to dope-slap Chao, in response to Chao
* In the manga setting nothing has indicated Christianity has ever existed, though there's still local religious milieu with monotheistic beliefs. Alchemy may be related to the generally secular tone of Amestrian society. Fuehrer King Bradley is something of a militant atheist, which given his...family background...is understandable.
* In the manga, Sheena didn't exist, so this incident happened between Matsumoto and Sasaki/Prince Hope instead. Sasaki
* In the manga, she feels sorry for the teacher who is trying so hard to find her student registration.
* In the manga, she gets a couple of dreams about the event, but only when she got close to capturing all the cards.
* In the manga, Szayel Aporro got an arrow through the neck from Uryuu.

* In the manga, Tezuka's father Kuniharu is hinted to be a bit like this too. Quite a contrast with his kid and
* In the manga, the entire crew sans Luffy get demoted to heroes of other stories during the consecutive
* In the manga, the first game of Duel Monsters that Yugi played against Kaiba was played as a Shadow Game in which the monsters on the cards were brought to life in front of the players. Kaiba then set out to reproduce this effect through holograms as part of his plan to get revenge on Yugi, and the resulting technology was used for the rest of the franchise.
* In the manga, the "Hentai Horde", as fanon dubs it, actually comes back together and resumes its original purpose of ambushing Akane and trying to knock her out cold in order to claim the right to date her when Akane gives her status as Ranma's fiancée to her elder sister.
* In the manga, the Major has a tendency to applaud his enemies when they seem to be doing well (although knowing him, it could be that he is genuinely impressed).
* In the manga, the ninja find him painting the monument instead of escaping from doing so, and he gets caught by the Third Hokage, but escapes by using the Sexy Jutsu.
* In the manga, the Phantom Thieves come up with their codenames when they officially form their group at the hotel buffet. In the game, Morgana has the group come up with codenames during the third trip to the palace, just before Ann joins.
* In the manga, the punishment is revealed to be Mitsuru using her Persona's Ice Powers to freeze them up to their necks.
* In the manga, there exists a magical compact mirror that can suck in anyone who looks at their own reflection (and a fair bit of the accompanying landscape.) The victim is sealed up in a non-infinite mirror world, with no escape, unless someone outside pats the back of the compact and effectively slaps the victim out of it.
* In the manga, there's also a female manga club member (who, although seemingly unnamed, was a minor recurring character) and Haruyo, a girl who befriended Sumomo.
* In the manga there's no transformation sequence but they put on the Cloth the normal way (
* In the manga the Sailor Senshi themselves have shades of this. They may look like normal girls or women, but in their final forms they are just as powerful as the avatars of Chaos, and at least one (Sailor Venus) warps minds with her mere presence (people who may have some feelings for each other are suddenly drawn together when they befriend her), and not only is she
* In the manga, the same mistake is done with Annie's uniform having the Survey Corps symbol during the scenes where Eren and co. attempt to trap her.
* In the manga, they are an ongoing conflict between Sailor Senshi from all across the galaxy and the ultimate evil force, Chaos, which have ravaged countless planets. At some point, the Wars
* In the manga, they arrived together for the group's vacation to Okino Island,
* In the manga this happened in Mr. Kamikaze's backstory: he was originally a rising karateka but had to leave the sport and move to Paris when, during a match, his kick killed
* In the manga, this happens to a man who was arm-wrestling with Spike in one of the side-stories. If the man won, Allison MacDool (a woman who was traveling with Spike) would be his, but if he lost, Spike would win a bunch of money. When it looked like Spike was losing, Allison opened her shirt (behind Spike), which distracted everyone there, allowing Spike to win.
* In the manga, this is the fate of Yamamoto. Not convinced even this was enough, Yhwach then chops off Yamamoto's sword arm and then proceeds to nuke his corpse.
* In the manga, this relationship doesn't exist, and an incredible amount of
* In the manga, this was the main reason Sanji took up smoking at the age of nine. To be more cool and adult-like. Hilariously enough, his mentor, Zeff, warned him it would kill his tastebuds.
* In the manga, Tohru used magic to make the necessary paperwork for Kanna to go to school. The anime cut out this scene,
* In the manga version, Guts is perpetually enacting this trope, due to the brand

on his neck that attracts demons.
* In the manga version, Ichiko is aware of his harem, and utterly terrified to act on that, fearing that if he were to pick one, the others would kill them in a fit of jealous rage. Hence, he acts like an oblivious idiot around them.
* In the manga version Junji "Katari" Karita, is first shown appearing on TV and falsely claiming to be the pilot of Zearth and is shot dead by an assassin a few pages later.
* In the manga version of the bath scene, Rei was incredulous at the

* In the manga version, Scar's brother and the Rockbell family are wide-eyed idealists who believe in the basic good nature of man. The Rockbells leave their practice so they can heal the Ishvalans being massacred by the Amestris army, and Scar's brother wants to learn alchemy so that he can better understand the bonds of humanity. During an attack Scar's family is killed, and Scar's brother tries to shield Scar,
* In the manga version, when Touma's class is told there will be a new student, Touma tries to imagine who it will be. He inexplicably imagines Accelerator in a dress and freaks out.
* In the manga we have "Tom, Tom, the Piper's Son". But only the first verse. Over and over.
* In the manga, when drawing nude pictures of Justice, Tsuyuri drew a Justice and Hoshi yaoi scene... Much to Justice's distaste, considering he despises Hoshi.
* In the manga, when he notices that someone (the people who installed the cameras) entered his room from the state of his no less elaborate door safety mechanism, he infers that they didn't find the notebook because the fire trap didn't go off. His solution to the problem of the cameras is considerably less elaborate. "Hey Ryuk. Go find the cameras and I'll give you some apples."
* In the manga, when Moka saw the apparent murder of her mother Akasha by the hands of her eldest sister Akua, Moka's Shinso blood was unleashed.
* In the manga, when Ranma and Akane are cornered into a wall by a tiger, she grabs onto him. He has
* In the manga, when Tatewaki Kunō informs Nabiki Tendō of his intention to woo the "fiery-haired pigtailed girl" (
* In the manga, while Chibiusa/Sailor Chibimoon does become a source of a few humorous moments, she is a legitimate semi-powerful Guardian with an attack capable of destroying low-level enemies which can also be combined with Sailor Moon's or Tuxedo Mask's powers for more damage. In the first anime, especially the third season, she is turned into a borderline
* In the manga, while Usui does have genuine feelings for Himegami, he's mostly driven
* In the manga, you must destroy the Philosopher's stone that contains the actual Homunculus instead of destroying its body (according to later chapters, the body can apparently survive on its own and absorb a new philosopher stone if it isn't killed afterwards. It seems to lose its homunculus powers, though). In the anime, a Homunculus must be killed once per incomplete philosopher's stone within them (or forced to expel them otherwise, and then die again), but are frozen in place (allowing all the time in the world to actually do this) when confronted with a piece of their original human body.
* In the manga, Yusuke gets embarrassed by Botan's lame explanation to Keiko of what he's doing after school. Instead of saving the world from demons, he's doing some kind of afterschool program for juvenile delinquents.
* In the manga, Yusuke smokes, apparently as part of his juvenile delinquent persona.
* In the manhwa, "Ragnarok", Lord Irine is often a clam, respected, dignified, and powerful ruler, but as soon as he sees his daughter, Iris, he resorts to passionate hugging, baby talk, and constant spoiling of his daughter, at least when his wife is not looking.
* In "The Man In The Yellow Suit", the Reverse-Flash murders all of the cops in the room except for Joe West, apparently just so that he has someone to gloat to.

* In the Mankeen Revolt, a relatively recent historical memory, Lionar Mankeen attempted to liberate the Bonds by force. The attempt failed miserably and set back social progress a long way because the implementation was not well thought out; the Bonds were not only illiterate, but were unused to handling money and working for wages, and preparations had not been made to alleviate those problems.
* In the Mann vs. Machine game mode, one of the upgrades for the Sniper's weapons makes the head of the enemies explode if he scores a
* In "The Mansion Family", a host for an award ceremony tries to find Springfield's new oldest citizen at (the original candidate having died on stage upon receiving the award):
* In the Manticore/Solarian case, it's debatable which side is David, and which Goliath. The Solarians indisputably have the numerical advantage (roughly 110 to 1 in terms of ship counts), but Manticorian technology is so far ahead that the only way Manticore can lose a fight is to run out of ammo. In fact, the latter is one of the strategies employed by the Solarians, as some are willing to exchange entire fleets in order to get the Manticorans to expend valuable missiles, which they can't replenish at first after
* In "The Man Trap", the salt vampire could make itself appear to be a specific person to everyone looking at it. Because of his long experience with it, Professor Crater could always recognize it no matter what form it took.
* In the manual, Charnel describes the Fallen as "corrupted versions" of a race first crafted by James, presumably referring to the Earthflings, whose role (and body-structure) they share. But whereas Earthflings are creatures of earth and soil who spit rocks and can turn into boulders for protection, the Fallen are made of decomposing flesh and bone, spew carnivorous flies which can vampirically heal them, and can feign death to ambush victims.
* In the manual of every Legend Entertainment game there was a lawyer joke inserted into the licence agreement. These jokes were almost never repeated from game to game.
* In the manual states that the Soviet's NKVD adds 7 million troops to their strength of 14 million regulars. Compare this to the setting's Allies, whose military strength (regular and irregular forces), is about 5 million total at the game's beginning.
* In "The Man Who Came Back", Commander Straker's friend Collins turns out to have been brainwashed by the aliens into an assassin. His orders: kill Straker.
* In "The Man Who Could Not Die", Diana is unconscious and tied up in a garage with a running car in order to kill her with the fumes.
* In "The Man Who Grew Too Much", when Lunchlady Doris reveals to Lisa that the vegetables she uses are genetically modified to stay fresh, she tells her not to ask how old the Jell-O is. There are two trays of gelatin cut into letters to promote the final episode of

* In the March 24, 1989 strip, Booker blows on a dandelion seed head, causing the seeds to disperse and fly away. The flower next to it laughs at the seed head, only to be plucked by Orson immediately afterwards.
* In the marching band world, we have the bottom bass drum. The bass five/six/seven(!?) player is usually a big guy to better counter the weight of the drum, and also tall, so that when the drum is on, their long legs can get them further and their long arms can still get the right technique. In other words, big and slow, but got the loudest beats.

* In the Marine Corps novels by W.E.B. Griffin, the Marines have come to the conclusion that people of this type will never go away until they find something to complain about. So whenever they suspect that an Inspector is coming, they make sure there are no major problems, and then deliberately leave a handful of obvious minor problems for the Inspector to find so that he will find them, report the insignificant infractions, and then leave so they can get back to work.
* In the Marineford arc, a full scale war breaks out with the Whitebeard pirates, and Luffy and their allies on one side; and the full strength of the Marines on the other. When Ace questions why everyone has gone to these lengths, risking their lives simply for his, he gets the similar answers from both Whitebeard and Luffy: "Because you are our son/brother and we love you."
* In the Marineford arc, the Giant Squad on the Marines' side and Oars Jr. on the Pirates' definitely counts. Fleet Admiral Sengoku is also this when he reveals his Zoan Devil Fruit powers.

arguing with his wife over the whereabouts of his missing supersuit.
* In the Memphis-based/CWA/Jarrett territory, the B-show had the same name as the main show (Championship Wrestling), but focused on house show matches from a few weeks earlier. It usually aired in markets like Tupelo, MS and Jackson, TN that got the main show in from Memphis and needed their own show to promote the local house shows.
* In "The Menace of Mysterio", Mysterio attempted to pose as a hero against the "evil" Spider-Man, done so by committing robberies in a customized costume identical to Spidey's own. This was all revenge for the web-head bringing Quentin Beck to justice for using illegal materials as special effects.
* In "The Menace of the White Dwarf", Raven's ship has two of them. The device that controls the white dwarf's gravity is labeled "Gravity Control - On/Off". The lever that controls the speed of objects moved by the white dwarf is labeled "High Speed".
* In "The Menace of the White Dwarf" she was pursuing Raven in her invisible jet when he used the extreme gravity of the white dwarf fragment to render her unconscious. When she plummeted out of control, Superman caught her jet and saved her.

* In the mid-1970s, Mawnan, a village in Cornwall, was hit with a rash of sightings of a large, owl-like creature known as the Cornish Owlman. Some accounts describe it as threatening children and teenagers.
* In the mid-1970s, the NFL's tie-breaking rules were labyrinthine and often

counter-intuitive, which culminated in a situation at the end of the 1977 season where the Baltimore Colts were able to nearly guarantee the elimination of AFC East divisional rival New England Patriots (with the help of fellow division rivals, the Miami Dolphins) by

* In the mid-1980s, Chris Claremont went through a Day in the Limelight phase, writing whole issues focused on a single character with only cursory appearances, or none at all, by the rest of the team. Examples include: the "Lifedeath" duology, where a depowered Storm (she gets better) travels the world; "Whatever Happened to Nightcrawler?" where the titular teleporter romances a movie starlet and battles Arcade; and "Wounded Wolf", which features a dazed Wolverine teaming up with one of the Power Pack to fight cyborgs in a blizzard.
* In the mid-1990s, McDonald's lost a lawsuit against a South African businessman opening up hundreds of fake franchises of the chain because the real chain was not operating in South Africa during Apartheid, they had forfeited their own trademarks in South Africa and the businessman in question had effectively managed to acquire them post-abandonment. McDonald's, instead of filing another lawsuit or appealing to the court, chose to buy the businessman's fake operation and turn it into a real McDonald's franchise.
* In the mid-1990s, South Korea banned tobacco smoking in Korean dramas. The ban was later extended to all smoking on TV. If a character smokes in a movie shown on TV, the cigarette will be pixellated.
* In the mid-19th century, the prevailing theory of disease was miasma theory, which blamed disease on bad air and smells. It is from miasma theory that we get our word "malaria", meaning "bad air". Although the theory was wrong, its focus on sanitation improved the treatment of disease from what it had been like previously. For example, Florence Nightingale's work at improving sanitary conditions in hospitals was based on miasma theory. Then again, while miasma theory was wrong about bad smells being the cause of disease...the organisms that actually were responsible for disease were also responsible for the bad smells. So by coming up with traps and modern plumbing to keep sewer air out of houses, they were actually preventing disease, just
* In the mid-2000s BMW wanted to release a range of 3 crossovers being the middle ground between their wagons and the X SUVs. These vehicles were meant to be based on the 3-Series, 5-Series and 7-Series, respectively named V3, V5 and V7. The 7-Series-based vehicle never saw production, while the 3-series and 5-series-based ones morphed into the GT versions of these cars.
* In the mid-2000s, due to several crossovers between the two series, fans of Capcom's Mega Man Battle Network and Konami's Boktai have become quite friendly with the other.
* In the mid-2000s, NASA contracted various manufacturers for a new rocket engine for upcoming space programs which would go back to the old single-use systems rather than the somewhat reusable Space Shuttle. Some people wondered why NASA didn't dig up and use the plans for previous rocket engine designs such as the F-1 or the J-2. People speculated that either NASA lost the original plans or that the original plans were backed up in a data format that's unreadable by modern computers. It turned out neither were true. NASA did have the original plans and they could use them, the problem was that they weren't usable as-is. Today, with sophisticated computer modeling programs, we design and solve everything as much as possible before even building the first prototype. But back then? They had to build something that appeared good enough, test it, and tweak the engine before testing again until they got to the "good enough" state. The problem was those

* In the mid-2000s there was an ad for a medicine to cure social anxiety disorder. The lengthy and varied list of side effects seemed to consist entirely of symptoms which would make the hapless patient socially-unacceptable, including loss of bladder control, uncontrollable vomiting, bad breath, and most hilariously, "sexual side effects", which everyone naturally interpreted to mean impotence. So it was a drug that allowed you to go to parties and ensured you wouldn't be invited, which enabled you to talk to girls and prevented you from going beyond just talking. It was like an O. Henry story in convenient pill form.
* In the mid-2000s, Time Warner ran a series of black-and-white ads featuring the Hardways, a family dressed in 1950s attire and using corded dial phones, record players, and a mid-80s MS-DOS computer. By the final commercial, the Hardways have switched to Time Warner and are now wearing contemporary clothes and using modern equipment, in glorious color.
* In the mid-20th century, it was believed that tornadoes destroyed buildings by exploding them due to differences in air pressure. Survival instructions in the '50s and '60s advised people in the path of a tornado to open windows to equalize air pressure. It was later discovered that it was the winds themselves that damaged buildings and that opening windows wasted valuable time better spent seeking shelter.

* In the Middle Ages, rye bread was often contaminated with the ergot fungus. Eating this before going to sleep is similar to going to sleep after taking LSD
* In the Middle Ages, the Church invented Synagoga and Ecclesia. Synagoga was the anthropomorphic personification of Judaism (from the Church's point of view). She wore a blindfold and a broken crown, and held a broken staff and a pair of tablets. Ecclesia was the anthropomorphic personification of Christianity, and stood proudly with a shiny crown and staff.
* In the Middle Ages there was a debate over whether fairies can achieve salvation through Christ. One group believed that for every human who failed to achieve salvation, a place was available for a fairy to redeem itself.
* In the Middle Ages to early modern period, there was much debate over what, from a Catholic perspective, counted as lying. For instance, there was the story of a bishop of Alexandria fleeing persecution by the Romans, who didn't know his appearance. Coming upon him with his students, they asked where he had gone. The man told them back the way he had just come. Some defended this, since it was
* In the Middle Ages, trying pigs for murder was not unheard of, as livestock roamed freely and opportunistic swine sometimes killed and ate people, usually infants.

* In the mission "All That Glitters...", it turns out the ship that you first race in to check on with the help of The Doctor, claimed to have a bad but easily curable disease, was actually abandoned and was part of a plan by Gaul to try to get the Alpha Quadrant Alliance to side with him. The Doctor is quite pissed off at such a cowardly tactic.
* In the mission "Derailed," Trevor Philips derails a train being used by a high-end courier service so he can loot one of the freight cars.
* In the mission "Found Footage", Jesse finds a television showing Ahti mopping at the bottom of a chasm. This television is the result of the Bureau's attempt at researching Ahti, only for the VHS tape housing the footage they took to become an Altered Item in the process. The tape is impossible to remove from the TV and plays the footage on a loop even if the TV is unplugged. Anyone who watches the TV (except for Jesse) becomes hypnotized and is incapable of looking away or doing anything else.
* In the mission "The Defector" the entire civilian staff of the MACV compound is executed by the NVA for collaborating with American forces. Supplemental intel found in the level indicates that off-screen, hundreds of other civilians are similarly massacred for alleged "collaboration" after the NVA capture the city.

* In the "Moebius" two-parter, SG-1 goes back in time to Ancient Egypt in order to retrieve a ZPM and ends up altering the timeline, so that Ra takes the stargate with him during the revolt. They get stuck in the past after their Puddle Jumper is found by Ra's Jaffa. This creates an alternate timeline, during which the stargate is never found. Sam is a civilian, while Daniel teaches English as a Second Language. Thanks to a video-camera left by the original SG-1, the newly-formed Stargate Command finds the other gate in the Antarctic. Jack, Sam, Daniel, and Kawalsky use the same Puddle Jumper to travel to Chulak. They end up getting captured by Apophis, who decides to send an invasion fleet to Earth. With the video-camera, they manage to convince Teal'c to join them, but he ends up shooting Daniel, who was implanted with a Goa'uld. They jump back to Ancient Egypt, and find out that the original Jack, Sam, and Teal'c were killed during an attempted uprising. It
* In the Mogu'shan Vaults instance, the guide NPC, Lorewalker Cho, announces one section of the instance with "Ah, the ancient vaults of the Kings of Mogu'shan! Hmm... what might this button do?" * In the movie, Olaf kind of experiments with it near the end. On the DVD feature Interact Olaf, he demonstrates an evil laugh at one point.
* In the movie, Peeta felt immense guilt over tossing her the bread (as opposed to taking it to her) way back when Katniss and her family were starving, because he later felt like he was treating her like a starving dog (Katniss herself couldn't care less about that and is rather oblivious to his feelings regarding the matter.)
* In the movie, practically everything that has weapons is capable of this, as it is needed to destroyed the ELS fast enough. Even Sniper-types aren't excluded. Gundam Zabanya, the newest Sniper-Type Gundam, is coveres in small armor-plates, that turn out to be GN Missile Containers... And it is armed with 76 missiles, aside from its 10 (14 in the final mission) GN Rifle Bits and Holster Bits (that can also fire, by the way). What exactly happened to the Dynames-line being Snipers?
* In the movies, a competition between Gimli and Legolas starts at Helm's Deep and continues on to the Battle of Minas Tirith. The Extended editions add even more to it.
* In the movies, nothing worse than fainting happens, and both Doc and Biff seem able to avoid even that by averting their eyes from themselves, or maybe just by being prepared for it. It seems that young Biff in the '50s had no basis to suspect that the "crazy old codger" was himself. It's also entirely possible that the "destroy the universe by temporal paradox" hypothesis was just that — a hypothesis, and there never was any real danger at all.
* In the movie, Sully has never heard of the Warriors, and is somewhat open (if reluctant) to them passing through his territory. In the game, there's an earlier mission in which Sully starts telling everyone that he and the Orphans wrecked the Warriors, leading the Warriors to invade Orphans territory to wreck
* In the movie, the band which performs the movie's theme plays four drivers from the Mobile Assault Police and popular actor Kentarou Itou is cast as
* In the movie, the entire fight is choreographed by Zabulon to end up with Anton nearly killing Yegor by accident, resulting in the latter becoming a Dark Other.
* In the movie, there is also a magic gate that only true lovers could pass through and still remain together. Guess what happened.
* In the movie, there is a peculiar and extremely intelligent dog that follows Sophie around. The dog was extremely significant in the book, but all of its plot relevance was shuffled into a minor book character, and it was left in the movie as just a weird dog.
* In the movie, The Sacred Star of Milos, the eponymous Sanguine Star is a Philosopher's Stone created by sacrificing the blood (not the souls) of several dozen soldiers.
* In the movie version, most characters are cyborgs, but a mook must brace himself before firing hypervelocity armour-piercing bullets from a submachine gun. Said armour-piercing bullets
* In the movie version, the film has more to it, including being more about the HIV certain members are dying from and being dedicated to Angel,

* In the movie we discover that an actual mouse has been nesting inside the bomb. Once it leaves the bomb may be live again.
* In the moxibustion arc, Akane tries to cheer Ranma up. When he responds negatively to her encouragement by walking away, she says:
* In the much later episode "What a Drag", Eric Matthews decides that the only way for him and his best friend to avoid a local psycho and his gang, after almost getting them arrested, is to crossdress. They
* In the multi-month period between the end of the series and movie Sasagawa is the only one who knows that
* In the multiplayer portion of the third game, all players can heal their allies. However, the Infiltrator is considered the best, thanks to their
* In the Multiplayer, the Cerberus troops start off professional, but as you kill more and more of them they get decidedly less so. For instance, earlier on, they'll say "Taking casualties" in a calm, professional manner. As you slaughter more of them, they'll scream that same line in panicked terror.
* In the multiplayer, the Templars have something similar called Templar Vision.
* In the multiplayer, this is the preferred style of Cerberus Phantoms and N7 Shadows (Infiltrator) and Slayers (Vanguard).
* In "The Multiple Choice Cartoon", John punishes Garfield for catapulting Odie into the woods by forcing him to go retrieve Odie or else (as the audience chooses) either "A: No food for a day, B: No food for a week, or C: No food until the next time Haley's Comet cruises the galaxy". The audience chooses (like all the other answers) "C". Garfield doesn't remember his punishment too well, since while looking for Odie he wanted to give up and go back eating cheeseburgers with Pigeon Suit thinking Jon
* In "The Mural of the Story", Hayley ends up hated by the town after Stan blames her for his botched attempt to restore a mural, so Stan attempts to reconstruct her face in her sleep, with horrific results. Hayley later has a real plastic surgeon give her a new face as part of a plan to make Stan suffer.
* In the "Murder Case in the Area" arc, Kirito and Asuna eventually find the culprit behind Griselda's murder and learn their motive for the crime.
* In "The Murder Channel", a friend of Jessica's witnesses a murder on her television when a mislaid cable sends a video feed from the apartment downstairs to her set.
* In the murder mystery arc of the manga, not only was much of the misleading investigation orchestrated by Sebastian, but
* In "The Murdoch Identity", Murdoch, suffering from Identity Amnesia, gets shot in his arm. Anna Fulford helps him to find a sanctuary in her church, and she then treats his wound. They end up kissing, but the kiss brings out memories of certain Julia, so Anna is only his might-have-been love.
* In the Musical and the Extended Edition the Morning Report becomes its own song.
* In the musical episode, Tara's song has the added-syllables variant: "You make me come...-plete!" Come-plete with back-arching and
* In the musical version, the former Nazi Franz (who will be playing the part of Hitler) breaks his leg just prior to curtain, and is replaced by the
* In the music industry, if you're not in the public eye people assume you're not doing anything, or have "Fallen Off". Usually happens when an artist isn't properly promoted, or ignored by media outlets.
* In "The Music of the Spheres", the world is bombarded by alien broadcasts that anyone under the age of 21 or so believe to be the most beautiful music they've ever heard. When the broadcasts prove addictive and cause those who listen to them to mutate, the world governments declare martial law, until scientists succeed in decoding the message. The signals originated on a world whose sun had turned ultraviolet 40 years ago. The signal warned that Earth's sun was about to undergo a similar change, and that the broadcasts would genetically alter those who heard them into a new golden-skinned form that could survive under the new sun. Fortunately, it had a rare good ending with no twist involved:
* In the music video Chamillionaire's "Ridin'" he's standing on a blacktop in front of a flaming version of his logo.

* In the music video for "10 Seconds" Jazmine Sullivan ties her cheating boyfriend to a chair with a
* In the music video for Amy Grant's "Takes a Little Time," an instant camera reveals snapshots of the subjects' future. For example, a man who steals the camera and snaps himself is horrified to see a photo of himself
* In the music video for "Anna Molly" by Incubus we see a girl who is found in a forest presumed dead. However leading up to the end of the song we find the girl start to faintly respond... while a nearby doctor prepares to lobotomise her. Her fingers twitch and we even see a tear slip out of her unblinking eyes as the buzzsaw draws nearer. Fortunately she regains control of her arm and grabs the doctor, causing him to drop the saw on the floor.
* In the music video for Camila Cabello's song "Liar", her dress is visibly damaged in the house fire she accidentally causes when attempting to burn the unwanted fragments of paper she wakes up with.
* In the music video for Jennifer Lopez's song "Papi," J-Lo plays a woman who eats a magic cookie that she is told will bring her absent lover back. The next day, every man in town that sees her falls madly in love with her, causing a lot of chaos throughout.
* In the music video for "Poker Face", a game is played and everyone but
* In the music video for "Stuck" by Stacie Orrico, her cheating boyfriend is played by her real-life cousin, actor Trevor Wright. He plays her love interest again in the video for "I Could Be the One."
* In the music video for the song "A Little Less Sixteen Candles, A Little More Touch Me" by
* In the music video for The Sword's "Fire Lance of the Ancient Hyperzephyrians", the moon is cracked during a global nuclear war. This corresponds to the lyrics, "Within a shattered planet, beneath a broken moon."
* In the music video for Vanilla Ninja's song "Liar", a girl discovers that her motorcross-champion boyfriend has been cheating on her. So she runs over his bike. With a monster truck.
* In the music video, he drags a piano around with him to her house. While it seems strange at first, observe how the piano could stand for the suffering for not being loved by her anymore. He reaches her house, to see her kissing another man. Depressed, he leaves, standing in front of a railroad crossing, playing the piano.
* In the music video of Al's parody of The Greg Kihn Band's "Jeopardy" ("I Lost on Jeopardy"), Greg Kihn himself plays the driver of the car Al is thrown into at the end. He turns around and tips a wink to the camera.
* In the music video of "Calfornia Gurls" a gummy bear of all things gives
* In the music video of "Neighborhood Snyper", the rapper Eazy-E is shown etching his moniker on the shell of an AK-47 round.
* In "The Mustache", a muscled-up Gumball and Darwin's voices suddenly plummet while screaming at their normal high pitches.
* In the My Little Pony : Roleplaying is Magic RPG, this is a natural ability for Crystal Ponies. Since they've forgotten a lot about their life, the player may chose not to spend all of their available skill points, and the character may later explore and "rediscover" old skills. However, this must be done in a "narrative scene", not in a "cinematic" one.
* In the Mystara setting, "court ball" is a blood sport favored by several Aztec-based cultures. In the Hollow World, athletic Blacklore elves engage in dangerous aerial duels on hoverboards, attacking one another with flame-cutters, though it's not really a sport; they're just bored out of their minds.
* In "The Mysterious Billposter", in attempting to trap the Caliph in a magic poster advertising holidays on a tropical island, Iznogoud has got himself trapped in the poster as well, and he keeps sending the Caliph away on walks so that he can escape unnoticed. As each escape plan fails, the Caliph keeps returning to tell Iznogoud about the strange things he has seen, and the increasingly angry Iznogoud keeps dismissing him. Eventually, the Caliph takes the hint and leaves, surprised that Iznogoud doesn't want to hear that he's found another person in the poster world: the billposter who created the magic poster to begin with, and who is now

putting up a second poster of the Caliph's bedroom which he tries out on the Caliph. Sure enough, the Caliph re-appears in his own world, while Iznogoud is reduced to ordering Wa'at Alahf to shove him backward repeatedly in the hope that he'll fall out of the poster again.
* In "The Mysterious Mare Do Well", Rainbow Dash says there’s something wrong with the baby she just rescued: “She’s not cheering for everyone’s favorite hero, Rainbow Dash!” Afterwards, Dash gets distracted by the paparazzi and casually tosses the baby to her mother, who doesn’t look too pleased by such carelessness.
* In "The Mystery Knight", a hedge knight deliberately loses an easy tourney victory against a lord who's still hungover. He trained the lord when he was a boy, and plans to flatter his skill so he can enter his service again. Instead the lord doesn't even remember him, and refuses to employ such an apparently inept knight.
* In the mythology of the Hindu religion, Goddess Parvati created her son, Ganesh, using the saffron paste with which she had decorated her body.
* In the mythos, Greed is often seen as the biggest handicap that dwarves have as a race. They even have a god who embodies the concept called Abbathor, and while their other gods don't like him, they accept him as their own, as he sides with them against traditional enemies of the dwarves, like orcs. This gives dwarves a bad reputation at times, because their gods grudgingly accept the embodiment of Greed as one of their own.
* In the myth where Loki invades the gods' banqueting hall to insult them all, he and Odin both charge the other with having turned into a woman — a real woman, who had borne a child and nursed it.
* In the N64 game of the film, the Face Maker seems to even duplicate the enemy's clothing (if the original body doesn't
* In the N64 games, Dodongos can only be killed if Link attacks their tails or throws a bomb at them. They later return with this vulnerability in
* In "The Naked Time", the planet Psi-2000 is described as a frozen wasteland (i.e an Ice Planet).
* In "The Naked Time", they have to implode the anti-matter engines to prevent themselves from crashing into a planet that is itself imploding. The procedure has never been done before: Spock and Scotty have only minutes to prep the engines, and they only have one shot to get it right. Kirk insists, "We've got to take that 10,000 to 1 chance!" They do. It works.
* In the Namek saga, Captain Ginyu threw a boulder and then a few energy blasts at Goku while he was powering up, only for Goku's
* In, the Nameless Race cannot speak or think but are described as constantly marching to war. They have yet to do anything other than attack people, and are generally killed without mercy by the story's heroes.
* In the Name of the Father: Giuseppe rebuffs Joe's condolences over him and Gerry doing time for his crimes. It's not so much because he hates pity necessarily, but that it comes from an IRA member who has murdered numerous people. He says to save his pity for the people he's killed.
* In the Name of the Father Irish characters. All of them put on good accents too. It's averted with most Irish characters played by wholly Irish actors anyway.
* In the Name of the Father: Joe defends his actions to Giuseppe by saying that it was a military target he had bombed, a soldier's pub. Of course, a lot of other people went there besides soldiers. Giuseppe doesn't accept this idea for a minute in any case.
* In the Name of the Father: lived in a prison cell and asked the crew to abuse him.
* In the Name of the Father. They were all released about 15 years later, but none of the police officers were found guilty of any crimes and one of the Maguire Seven died in prison.
* In the Name of the Grandfather" had Moe traveling to Ireland in one.
* In the Name of the Grandfather": In the episode where the family visits Ireland:
* In the Name of the Gun. Jesus is fed up with God's inaction and comes back to Earth circa 1940. He proceeds to kill Nazis with the help of other celebrities,

like Ernest Hemingway.
* In the Name of the King 3: Last Mission) to a fantasy universe where everyone speaks Bulgarian-accented English.
* In the Name of the King encountered by the party early on, which, in the game, forces you through a haunted crypt, a dwarven mine, and a mountain range. In the film, Farmer ziplines over (or at least, halfway over because the rope was slack). He falls in the gorge and is picked up by the kings army instead. Admittedly, this saves hours from the films run time and eliminates several scenes that have no reason to be there if you're not farming loot and XP.
* In the Name of the King Gallean goes mad with power and gains abilities not normally available to the magi. During his magical duel with Merick, this is the only thing that allows him to surprise and defeat the more experienced magus.
* In the Name of the King had the editors cut out a scene after a duel between the real king's brother (who wanted to be king and shot his brother with an arrow in the middle of a battle) and the commander of the army. After the main character comes in and is proclaimed king, the commander grabs the brother and slits his throat. This leaves viewers questioning "What happened?" as in the theatrical cut the guy never appears again, seemingly vanishing into thin air.
* In the Name of the King. He has named himself the king of the beastly Krug (after magically uplifting them) and, thus, serves himself. It's implied that only a twisted mind like Gallian's could have accepted this enough to allow this to work.
* In the Name of the King spell, providing Farmer another distraction to move in for the kill.
* In the Name of the King tactics. As soon as Farmer slits Gallian's throat, the Krug stop and, after standing around in confusion, drop their weapons and wander off.
* In the Name of the Moon: A catchphrase said before kicking someone's butt.
* In the Name of the Moon: Beware my catch phrase, that's a sign that I mean business!
* In the Name of the Moon do this, down to formulaic repetition originally designed to allow extemporaneous reciters of epic poetry to keep to the meter.
* In the Name of the Moon, where Revy casually reloads her guns and lights a cigarette while on of the Neo-Nazis brags about how awesome his gun is.
* In the Name of the Tsar DLC, female soldiers (in reference to Russia's Woman's Battalion of Death) appeared as the Russian Scout class. Again, this one is somewhat justifiable given the history behind Russia's female soldiers, but they were treated as propaganda value and disbanded before the end of the war.
* In "The Name", when Gumball is told that his birth name is Zach, it results in Zach becoming his own person who tries to erase Gumball from their mind by
* In the Nancy Walker episode, Sam the Eagle gives an editorial about nudity, claiming that everyone is going around naked
* In the Nanobots episode, the bots coalesce into a Monobot. Since the girls were at Nano scale at that moment, it was trouncing them, but it was also big enough that the professor could simply stomp on it, ending the threat.
* In the Naruto fanfiction Nin Tech, Naruto is found by Sasuke in his room tinkering with a gadget...
* In the NASCAR Cup Series championship format (starting in 2014, then getting a tweak to add two new points-paying stages to each individual points race other than the Coca-Cola 600, which got three, along with "Playoff Points"
* In the National Basketball League, the "Doomsday Double" is when an eastern states team plays a double-header against the Adelaide 36ers and Perth Wildcats. It is exceedingly rare for a team to win both games.
* In the national championship game, the Wildcats faced off against Georgetown, who featured Patrick Ewing, David Wingate Jr. and Reggie Williams in their starting five. The Hoyas became heavy favorites after settling one final score with West 1-seed St. John's 77-59. Behind two late free throws and an intercepted pass in the closing seconds, Villanova upset Georgetown 66-64 and emerged with the program's first national title. They were the lowest seed ever to win an NCAA Tournament.
* In the National Championship, they faced powerhouse UConn, a program with (at

the time) 7 national championships, and a team that had beaten Louisville handily during the regular season. A win against this Goliath would secure their run as the greatest in tournament history. Unfortunately for the Cardinals, reality ensued, and they wound up on the losing end of the
* In the National Guard Depot, you can squeeze your way through a debris pile blocking a stairway to the third floor, then jump down to the Armory switch on the second floor, bypassing the Training Wing and Offices.
* In the navy, mainly before World War 2 are the Big Seven Battleships which survive the scrapping after the Washington Treaty happened. They were Nelson and Rodney in the
* In the Navy, sailors, especially chiefs, drink coffee that has been affectionately nicknamed bulkhead remover. As in, coffee that is so strong, it could eat through the solid steel walls of the ship.
* In the NBA, Shaquille O'Neal likes to do this — mostly to himself. He did come up with "The Big Fundamental" for Tim Duncan, "Sugar K. Leonard" for Kawhi Leonard and "The Flash" for Dwyane Wade, though.
* In the NBA Slam Dunk Contest, you can increase your score by executing full body rotations and/or windmill motions with your arms during the dunk. Of course, this won't earn you any extra points during an actual basketball game.
* In the NBA, the most infamous examples are Sam Bowie (picked before MICHAEL JORDAN), Darko Milicic, and Kwame Brown
* In the near end of this two-parter, Odd remarks that "Sissi is going to give them a lot of grief."
* In the "Necklace of Oros" arc, Graviton, an evil being from another universe, manipulates Jedda into taking the Necklace he once used to rule his universe from the treasure room in the Skull Cave, where it has lain since a rebel from Graviton's universe entrusted it to the first Phantom. Over the next few episodes, the Defenders fight to protect Jedda from Graviton. But Ming also wants the Necklace, as does Hadea, the Queen of the Netherworld, and Jedda eventually decides the Necklace's powers are too great.
* In "The Ned-liest Catch", Edna Krabappel and Ned Flanders are about to make out when we cut to scenes of cheese being made, with cream being squeezed out of syringes, curds syphoned through hoses, bars of cheese on a conveyor belt going into a tunnel...then it turns out they were just watching a
* In the negotiation scene in "Battle of the Bastards", Drogon can be seen in the background swooping down from the Great Pyramid about twenty seconds before he makes his big appearance.
* In the Neil Gaiman short story "Changes", all possible reactions to this are explored as a drug allows quick, easy sex-changes in a few hours. The few people in story who can always tell someone's birth gender, well, the one shown is the subject of severe violence when she denies entrance to certain clubs (this was her job).
* In "The Neptune Adventure" story of the episode "The Wettest Stories Ever Told", Krusty's lower half lands on top of his upper half, allowing him to "go out with a sight gag".
* In the NES 3rd party unlicensed Christian game King Of Kings: The Early Years, Mary, Joseph, and the Three Kings must have all had horrible senses of direction. For example, when Jesus runs off to the temple across town, his parents take a detour through the North Pole to get there, and while we're not sure where exactly the Three Kings came from, it's probably a safe bet their journey did not take them through the Amazon rainforest or the hollow earth.
* In the NES games, Link can collect the Magical Key, an imposing lion-faced key in gold that can open infinite doors.
* In the NES game, sometimes it's more satisfying to spend all three rounds walloping on Glass Joe, countering his every attack and letting him hang on by a thread rather than just catch him in his titular glass jaw and knock him out in one shot.
* In "The Nesting Place", Bell is explicitly warned against the woods near the house of Clarence and Rebecca.

* In the NES version and one of the US arcade versions of the Capcom shoot-'em-up
* In the 'net, conversations weren't completely full without mentioning bacon in every thread despite health food going mainstream this decade, to the point that
* In the Netflix dub, Asuka is Stephanie McKeon's only anime credit, and one of her very few voice acting credits. Most of her work is on stage (including Anna in the West End production of Disney's
* In the Netflix revival, Jonah has a habit of yanking off Tom's dome head whenever he goes too far with something.
* In the Netflix series, Buster rejoins the Army and becomes a drone pilot, due to his video game experience. And, much like in the
* In the Netherlands, after a show of the famous comedian Youp van't Hek in which he had a short skit about Buckler beer (non-alcoholic) not being manly, sales dropped so bad that shortly after, up till this day, you cannot buy Buckler beer in Holland. In other countries you still can.
* In the Netherlands, it's the salty food additive that comes in those brown bottles. Maggi sells a lot of other products as well, but when you say, "Pass the Maggi", people usually know that you mean the brown bottled stuff.
* In the Netherlands, it's traditional for parents and older siblings to serve rusk topped with
* In the Netherlands, most common swearwords come in one of two flavours: either sexual, as is common in other languages as well
* In the Netherlands some of the old steam pumps that were used to regulate the water level of the farmlands or polders are still kept functional in their capacity as monuments or museums. It happens from time to time that the water levels become dis-regulated enough that the modern system of electrical pumps simply does not have the capacity to deal with in, in which cases the old steam pumps can be brought back online to help.
* In the Netherlands, the film was originally dubbed into Dutch in 1938 and again in 1984. The 1984 version received a partial redub in 1992, with Snow White and the Dwarfs' voices left un-changed. There was also a soundtrack dubbing in 1973 for a storybook adaptation, resulting in a total of three and a half Dutch dubs.
* In the Netherlands, the national institute for meteorology performed a side job once, namely the prediction of traffic jams. They stopped doing this eventually because it caused this trope and made people angry. When people stayed at home because of the predicted traffic jam there would be no traffic jam at all, leading them to say the meteorology institute was wrong.
* In the Netherlands, there is a popular TV duo composed of Carlo Boszhard and Irene Moors. Irene was hosting the show Telekids while Carlo was only there in case they had to get a substitute, but she saw the potential in him. She would regularly fake illness so Carlo could fill in for her only to show up at the last moment, which meant they could host the show together. This went on for two years until the producers caved in and made him co-host. This partnership is still going strong almost twenty years later.
* In "The NetMobile Grand Prix" the main cast enters a friendly virtual race. While the chips they use in the beginning made some sense (Nitro chips and change of accessories) the chips gets increasingly random near the end, with at least one racer turning his car into a
* In The Net Of Dreams dancer ejects a poisoned ruby from her navel into his wine glass. She specifically uses this method so that even if the 'man' part of the protection applies to all humans, she did not use her hand to deliver the poison.
* In The Net Of Dreams various events result in Riplakish traveling alone with seven beautiful women. To be fair, only five of them are attracted to him at the time.
* In the new 2020 VR edition, because of the Oculus Quest 2's environment tracking, you are not only able to interact with the fictional 3D environment as if it were a real, existing world (helped by the rumble motors in the hand controls), but if one has the proper space in real life, one can simply walk (as in, physical steps) from one location to another, as if one were actually there.
* In the New 52, Superman certainly appreciates her strength and fighting skill.

Their first meeting during Darkseid's invasion has him reacting to her cutting a swathe through parademons with an impressed, "You're strong" and her responding with a confident smirk, "I know.". The exchange is loosely adapted in
* In "The New and Improved Carl Morrissey", Richard expected the landlord to refuse to rent an apartment to him and Lily because he is black. After they are allowed to rent it, he admits to Lily that he is still sometimes surprised by how much has changed since his time.
* In "The New Breed", a prominent scientist named Stephen Ledbetter invents Nanobots that he believes will cure anything. He shows them to his soon to be brother-in-law Andy Groenig and gives a lengthy speech about how
* In "The New Breed", the substantial modifications made to his body by the nanobots causes Dr. Andy Groenig severe and near constant pain.
* In the "New Caprica" arc, President Baltar is forced to cooperate with the Cylon occupation authorities to give their presence an umbrella of legitimacy. After the human rebels start engaging in terrorist attacks against the Cylons and
* In "The New Crystal Gems", Connie, Lapis, Peridot, and Pumpkin stand in for the Crystal Gems while they're out. When they run out to investigate potential trouble, they reenact the sequence from the show's first opening, with the Gems running while Steven/Connie rushes from the back of the line to the front.
* In the new edition, a continent as well as two countries have been brought over from a world where gods haven't existed for about 30,000 years, so anyone from there might have a justification.
* In the New Fishman Pirates, Hody Jones has Dosun, Zeo, Daruma and Ikaros Much as officers of the crew.
* In the new Foundation trilogy novel "Foundation's Fear", we have two simulations — Joan of Arc and Voltaire. These are recreated by computer programmers for a public debate. The simulations have a great deal of UST. When the debate starts, the simulations start having sex, causing an uproar. However, the two simulations deeper layers are based on the programmers' minds themselves (the simulations were damaged). This reveals the UST between the programmers and they start a romantic relationship.
* In the new Foundation trilogy, this saves Hari Seldon's life when an assassin puts a time-delayed fire-starting compound in his shirt. His wife is able to swap in another of his shirts and reveal the assassin.
* In "The New Frontier", Finn has managed to rescue Jake from dying in a situation that he was going to fatalistically embrace after what he thought was a psychic dream predicting his death. Finn jokes that since he wasn't present in the original dream he'll have to never leave Jake's side ever again, squashing himself against him creepily. Jake runs away laughing, and Finn chases him as the episode ends.
* In the "New Generation" era, Ultras often receive two Super Modes; one that they gain for the final story arcs in their series and another they use in a movie after the series ends.
* In the new opening: Lenny & Carl are changing the "days without an accident" one higher, then the quitting time horn goes off and Homer runs out, knocking them over in the process.
* In the new reality Jade finds herself in, she's Queen of a Shadowkhan Empire that's slowly conquering Japan one island at a time — they've already taken over Shikoku, and are in the middle of conquering Kyushu when the story starts.
* In the new series, Elfman gets a face full of Ichiya's "manhood". The poor guy resorts to beating his head on a rock just to get the awful image out.
* In the new series, however, KARR can transform from a robot into a car, while KITT can only transform into various cars. Also, it is revealed that the military always intended to go with KARR, once KITT's AI was "mature" enough. KITT was a temporary necessity.
* In the new series, most of the time, a new companion's first few episodes will take place over a few days before they are initially returned to their home time, with little-to-no off-screen adventures.
* In the new series, the Doctor also has a rule against using time travel to change events that he's personally involved in. It's implied that this would be

really, really bad for nonspecific reasons.
* In the new series, the Doctors' appearance is up for open criticism from the other characters, who often mock his dress sense and accent. This only really serves to draw attention to the times he showed up wearing sillier clothes and sillier accents in the Classic series without anyone mocking him for it — having a Northern or Scottish new-series Doctor is almost as (apparently) hilarious as their mildly unusual outfits, but no-one makes fun of the Fourth Doctor's ridiculous scarf and peculiar voice or the Third Doctor's lisp and questionable frilly clothing.
* In the new series, the following is said to companions, not that they ever listen:
* In the new series, the re-envisioned Cybermen are more straightforward
* In the new series, the Slitheen use actual dead people to form complete body suits in this fashion.
* In the new series, Woody had to take the worst seat because all others had already been sold before he had a chance to buy one. Then Dooley tried to steal it.
* In the newspaper comic strip "The Joker Vs the Sparrow", the Joker declares war on a mysterious crime boss named the Sparrow. While escaping from Batman, he's assisted by a beautiful blonde woman - who happens to be the Sparrow.
* In the news segment in the video for "Badaboom", the news ticker reads "A Storm To Come from dusk till Dawn Of The Brave", referencing two of the band's albums.
* In the new stage musicals, Tuxedo Mask is fond of this. There are no high jumps or heroic feats right beforehand, but Yuuga Yamato manages to look majestic swishing Tux's cape as he fights all over the stage before striking the landing pose.
* In the New Testament, in Jesus' answer to the Sadducees' question of whose wife a woman would be of the seven brothers that married her and left her childless when the resurrection takes place, He implies that all who are resurrected will be celibate and thus will not be able to or even would need to have children, for "they will neither marry nor be given in marriage, but will be like the angels in heaven."
* In the New Testament, Jesus has a very serious OoC moment known as "the cleansing of the temple". While some people may argue that Jesus
* In the New Testament, Peter cuts off the ear of a Roman soldier's servant with a sword when they try to take Jesus away. Jesus heals the guy.
* In the New Testament, the book of Acts doesn't really have an ending. The outcome of Paul's trial before Caesar, which he was still awaiting at the end of Acts, is disputed among scholars to this day.
* In the New Testament, when Judas Iscariot realizes that he's betrayed Jesus, he gives back the thirty pieces of silver and hangs himself. (The other account for his death averts this trope.)
* In the new timeline, the clans were destroyed and replaced by the five dragon broods. In the wake of that, the dragons became the plane's undisputed and tyrannical rulers, while Tarkir's many humanoid races were all relegated to being the subjects and soldiers of the warring dragon clans. The one exception to this are, again, the rakshasas, whose unpredictable nature and sorcerous power allows them to maintain a degree of power and independence that the other humanoid races can't.
* In the new timeline, when Yomiel isn't killed by the Temsik meteorite, Sissel (the fiancee, not the cat) waits ten years for him to get out of jail.
* In "The New World", having gone off the promicin inhibitor, T.J. has learned to focus her ability and uses it to induce Dennis Ryland's lawyer to stab him with a letter opener multiple times during a congressional hearing.
* In the New Years special, Red sets up a lit sign that says "TOAST YOURSELF AT NEW YEARS EVE". Then most of the lights burn out, leaving "YOU FAT ARSE".
* In the New Years' special, when Telly runs away screaming after Oscar scares him straight with lies on how bad New Years' is.
* In the New Zork chapter, Ringo meets John's “Beagle” counterpart, who has small, useless wings “only good for attractin' birds,” heh.

* In the next arc, she finds out that her mother Lucrezia was almost certainly the infamous menace known as the Other... shortly before getting a copy of said progenitor's persona
* In the next book, Abnett gives Magister Enok Innokenti (one of the evilest servants of Chaos) an even better one. His smile is so hideous that it causes physical pain and nausea in humans and
* In the next chapter, it's revealed Jeannette and her crew have been brevetted up at least one more rank; the EFGF has called up all its reserves and is recalling anyone who ever served, and desperately needs people with combat experience to fill officer and senior NCO posts. They're so desperate it's implied the only reason Ritchie Smith (who's been in the army for barely two and a half months despite his impressive record as a gunner) isn't commanding his own tank is that Jeannette talked someone out of giving him one; she thinks his quest for revenge would get him and any crew he commanded killed.
* In the next chapter, when said teacher gives an account of his previous whereabouts, his reminiscences are in
* In the next edition they added the Omni-Connection advantage. "Paradyne Technologies? What luck, an old buddy of mine from college is the VP of Marketing there!".

* In the next episode, "Dogs to a Gunfight", while Matt is recuperating from getting shot by the Punisher, Karen drops by to fill him in on the plea deal for Grotto and makes clear that she doesn't really buy Foggy's cover stories:
* In the next episode, Faye sees Punch picking up his mother at the spaceport, but she cannot figure out why he looks familiar (probably because he doesn't have the weird accent or costume). Note that
* In the next episode Oliver gives the trope again and Reiter responds thus:
* In the next episode, "Sleight Out of Hand," there was a magician who set himself on fire as a magic trick. While the magician was performing his trick, a guy several blocks away burned to death from being set on fire. Later, Mac demonstrated the cooling gel used by stunt performers for 'burns' aka setting themselves on fire, slathering it on a sleeve that covered his arm and inviting Danny to ignite it.
* In the next few years, it became even more complex. The jihadists fractured into two coalitions, one led by al-Qaeda franchises and the other by the Islamic State of Iraq and the Levant, which also operated in Iraq. Iran sent its army to fight directly alongside the Syrian government against all opposition groups, while Russia did the same with its air force. Meanwhile, a coalition led by the United States consisting of most of NATO dropped the bulk of their support to the FSA (while the Gulf states and Turkey continued it), and launched military operations against ISIL while throwing their weight in with the YPG. The YPG was a Kurdish militia that came to prominence in 2013 when it threw both the jihadists and the Syrian government out of the majority-Kurdish regions in the north, and spent most of its time fighting AQ and ISIL rather than the government. So it's effectively five sides. Assad, Iran, Russia, and Iranian-linked militias (e.g. Lebanese Hezbollah) on one; al-Qaeda and its allies on the other; NATO and the YPG on another and aimed primarily at ISIL; the now decentralized FSA on a fourth, and losing even more ground; and the
* In the next installment, one of the guards is voiced by John Carmack. "Welcome to the Dungeon, Marine" indeed.
* In the next novel, it's revealed the Phillip has linked a door in his home (located in 12th century England) to a door in Brit the Younger's home (located in Atlantis in the ancient times). This basically links the time passage in those two time periods, even though usually this trope is subverted. Also subverted when going to each time traveler's present. It's always a split second after they departed, no matter how long they spent in the past.
* In the next part, Yoshikage Kira's 'Killer Queen Bites The Dust' has the power to trap its victim in a

* In "The Next Phase" Ensign Ro, who is presumed dead after a transporter malfunction (but is just rendered invisible and intangible), worries that Picard will hold a Bajoran funeral, which includes a funeral chant that goes on for two hours.
* In "The Next Phase", Geordi and Ro fight a Romulan who's in phase with them, but out of phase with normal matter, thus all of them having intangibility. The Romulan attacks the pair, but is sent flying through the bulkhead and out into space, where we see him quickly drift out into space, motionless.
* In "The Next Phase", Geordi and Ro think they're dead, when they're actually a little out of sync with the rest of the universe.
* In the Next Room, or the Vibrator Play introduces the Chatanooga anal vibrator.
* In the next scene Alejandro fights Elena in a barn which he wins and then he cuts her shirt off, kisses her, then leaves!
* In the next season it happens again but this time it's Chuck's team.
* In the next season, Kaorinite is in the middle of speaking affectionately to Doctor Tomoe when she is killed by Mistress 9 with a lightning attack.
* In the next sketch, it transpires that the owner of the briefcase is cheating on his wife. He coolly dismisses her obvious distress, causing her to run out of the room crying... cue the lazer in the briefcase going off.
* In "The Next Step", Ruby uses "Big mistake!" as a badass one-liner before firing a flaming projectile at the Geist's tree arm, prompting a reaction of excitement from Jaune. However, Jaune says the same line in pure

* In the next story arc, Mr. Fear uses his designer pheromones to make everyone afraid of him, effectively making him king of prison.
* In the next strip, Charlie Brown sees Linus and asks, "Carrying everything on your back?" Linus responds with, "Just my bowling ball."
* In the next strip, everyone agrees that the higher up you are, the better lunch tastes. Osaka looks towards the top of the stairwell they came in through... and then realizes Chiyo-chan's grabbed her sleeve
* In the next-to-final chapter, Ash finally grabs Misty and kisses her after showing off he's no longer immature about romance. This is after five years of
* In the NFL, Eli Manning was treated this way by the sports media, compared to his older, record breaking,
* In the NFL, most overtime games end with a field goal or touchdown, but on three occasions, they have ended in a safety (a defensive play where the defense stops the offense inside their own end zone).
* In the NFL, no one fits the description better than Cam Newton. He backs up his scores with showy celebrations and gloats at opponents to try to stop him.
* In the NFL, teams that have already earned playoff spots going into the final week(s) of the regular season often sit their star players - the Indianapolis Colts are known for doing this, among others. In such cases, it's usually because winning another game doesn't earn them anything (i.e., they've already won their division or the top seed and can't finish any better) but actually trying could get their star players injured and totally screw up their playoff run. This can lead to cases where Team A could lose to Team B, who's trying to get in the playoffs... and face Team A, who's now rested and has seen up close how Team B plays - see 2004, Colts versus Broncos. In an effort to prevent meaningless Week 17 games, starting in 2010 the NFL's schedule has all division games in the final week, where teams would presumably be motivated by rivalry to play hard.
* In the NFL, the New England Patriots under head coach Bill Belichick and quarterback
* In the NFL, the Pittsburgh Steelers and Baltimore Ravens. The two teams are rivals in the AFC North, and they really cannot stand each other — their rivalry is said to be one of the most bitter in the NFL. However, both teams are also willing to admit that the other is generally a very tough team to beat and that Ravens/Steelers games are always hard fought. Some even say that the rivalry helps to keep both teams at the top of their game, and that's why both teams have been among the NFL's most consistently successful franchises since the mid 2000s.

And oddly, the longer the rivalry endures, the less bitter it gets — although the teams still can't stand each other, they both take great pride in how the Ravens/Steelers rivalry is considered hands down the best rivalry in the NFL, and the Cincinnati Bengals have, for various reasons, become the
* In the NHL the Nashville Predators and the Columbus Blue Jackets both see the Detroit Red Wings as a major rival. The Red Wings on the other hand are focused on the other Original 6 teams (particularly division rivals — Chicago when they were in the Central; Toronto and Boston now in the Atlantic), the Pittsburgh Penguins, and during the 90s and early 2000s the Colorado Avalanche.
* In the NHL there were many teams that qualify for this trope. Aside from the famed "original six" The early NHL had many notable teams such as the Senators who spent their last few seasons in St. Louis, several Montreal based teams that attempted to compete with the Canadians, The Quebec Bulldogs, The Hamilton Tigers, The Brooklyn/New York Americans(the last of the nonoriginal six teams to leave the league), and the Pittsburgh Pirates/Philadelphia Quakers. When the Original Six finally decided to allow new teams into the NHL (after some pressure during TV negotiations) St. Louis, Philadelphia, and Pittsburgh were among the first to join the league with new franchises, but none of them are continuations of the old teams. Quebec City and Hamilton are the last remaining old NHL cities with no NHL hockey yet but are often considered as expansion/relocation destinations. So, one day this trope may be averted for all the old NHL teams.
* In the "Nice Girls" series of vampire romances by Molly Harper, we get this played out pretty much verbatim once the lead character's newly undead status is discovered by her parents. Jane Jameson's mother actually asks if she has tried not being a vampire, and constantly brings her pot pies in the hopes that if she just tries to eat solid food... As the series progresses, Jane's mother joins the "Friends and Family of the Undead" self-help group and gets a "vampire pride" bumper sticker. I have no idea whether Ms. Harper was aiming for any form of allegory with this and the books play it all mainly for laughs, but the parallels are obvious.
* In "The Nice Guy", Wander's perpetual helpfulness and niceness impede a simple attempt to buy Sylvia a bottle of her favorite soft drink, to the point he ends up giving the last bottle of Thunder Blazz away to a little girl.
* In the Nightborne recruitment scenario Alleria, who is connected to the Void, triggers a void creatures outbreak which results in her banishment from Quel'Thalas. However, nobody would raise an eyebrow should the
* In the night elf campaign, the Skull of Gul'Dan (a powerful warlock) turns Illidan Stormrage into a mighty demon, and after using his new powers to defeat the Dreadlord Tichondrius (a major threat to the night elves), he's exiled by his brother for being tainted with evil. * In the nightmare episode "Over the Edge", Detective Montoya tells Nightwing he has the right to remain silent. Nightwing just quips, "Waived."
* In the "Nightmares" episode, Willow, in her forced-to-sing nightmare, backs off a stage where the booing patrons are throwing tomatoes.
* In "The Night of the Bleak Island", to get a diamond for the National Museum,

West travels to an eerie island supposedly haunted by a mad dog. While there he becomes reacquainted with an old friend, British detective Sir Nigel Scott.
* In "The Night of the Tottering Tontine", West and Gordon are assigned to protect Dr. Raven, who is developing a secret weapon and also a member of a tontine, an investment group whose bylaws state that the last surviving member of the group will receive the group's assets.
* In "The Night", the Moon examines the dreams of the main and minor characters of Elmore.
* In the nineteenth century, at a British dinner where many ambassadors were invited, the American one was the only one without a fancy ambassadorial uniform; he dressed like an ordinary gentleman. Another ambassador took him for a servant and asked him to call him a cab. The American retorted, "
* In the nineteenth century, Princeton and Harvard administrators created a blacklist among the nation's colleges to prevent habitual troublemakers from enrolling elsewhere. A fair number of colleges in the USA did abide by this blacklist.
* In the nineteenth century, the invention of the cheap synthetic purple dye mauveine changed this: suddenly everyone could buy purple clothes, sparking a brief fashion craze. Because of this, purple was used as a colour by some republican and feminist groups, because "what had once been only the province of royalty is now available to all the people, and the same should be true of political power".
* In the nineteeth century the United States was the go-to country for fast sailing ships. Clippers, while limited in cargo capacity, carved out a niche in transporting low bulk/high value goods like tea and opium or passengers, holding onto their crown as transporters until changing market conditions favoured bulk shipping, which in turn was served better by increasingly mature steamships.
* In the nineties Subaru ran spots of a know-it-all skater kid explaining how "This car is like punk rock." Which probably drove their business with actual punk rockers down by 75%.

* In "The Nobody", a pot falls off a shelf and is smashed on Gumball's head and he falls back on a chair when he tries to find a hidden room. He doesn't even flinch.
* In "The Nom," a computer programmer has created an addictive game that also hides a secret code that can make people mindlessly hunger for human flesh. (These are referred to as "nombies".) It doesn't quite work as intended; human minds have too good defences against that sort of thing — except after a really long exposure — but non-human animals become affected and start attacking humans.

* In the Norse Lostbelt, humanity is barely surviving. Due to lack of resources, people are exiled from villages when they turn 15 (25 if they managed to bear a child), where they will surely be killed by the giants roaming outside.
* In the North American dub, Asuka holds an entire telephone conversation in German in the background of one scene; there are allegedly several in-jokes in her dialogue for German speakers who ignore the foreground action to concentrate on her.
* In the northern part: 8 months of Summer, 4 months of Summer Rains.
* In the Northern Water Tribe, the benders don't necessarily run the city, but they are highly respected and appear to control infrastructure in ways similar to benders in the Earth Kingdom. As for the Southern Water Tribe, it's unclear how they viewed benders back in the day, as by the time the show starts there is only one left, who is a teenager and doesn't seem to be shown any special deference.
* In the North, meanwhile, segregation was carried out through means that were less blatant, yet arguably more insidious and harder to root out through government action. Most often, it was economic segregation, with black people being forced into ghettoes through discriminatory housing and real estate policies, and a thick glass ceiling preventing them from getting decent educations or careers. Affirmative action policies were created in

* In the novelization of one of the Star Trek movies, Captain Kirk stepped out of an Earthlike-gravity zone into a zone which recreated the much more powerful gravity of the planet Vulcan. There was then an amusing scene where Kirk was pushed a few inches or so into the air by this sudden change, and came back down, injuring himself in the process.
* In the novelization of the 3rd film, Mirage is killed; in the film, he survives.
* In the novelization of the movie, Optimus first tries to address Sam in Mandarin. The explanation given is that this is the language spoken on Earth by the most humans, completely leaving aside the fact that most international communication does in fact take place in English, to say nothing that the most cursory scan of the surrounding transmission waves would make it obvious that they were in an English-speaking locale.
* In the novelization, several pilots show up with WWII era aircraft to join the fight. Not expecting to survive, but because for every alien shooting at them, there's one that won't be shooting at the F/A-18s.

* In the novels, Fredo accuses his father of showing favoritism to Tom, his unofficial adopted son. While nothing comes of it, Vito does compare Sonny unfavorably to Tom in terms of responsibility to an extent that Sonny cannot help but feel a little resentful.
* In the novel "Shifting" by Bethany Wiggins, both Maggie Mae and Bridger can voluntarily turn into animals. Bridger can turn only into a golden eagle, and the eagle's love instinct remains. Maggie Mae can turn into virtually any warm-blooded, carnivorous animal because her mother was a shifter, but her father was a skin walker. Since one of Bridger's parents was a shifter and the other one was normal, if he tries to turn into anything besides a golden eagle, he will die. Their clothes don't change with them, so this causes many problems, especially for Maggie Mae.
* In the Novels, Lina was once confronted by Dynast Graushera's General, a very powerful Mazoku. Realizing she couldn't fight or escape, Lina decided to try mocking said Mazoku's name. The reasoning was that because Mazoku were masses of astral energy held together by their own self image, anything that undermined their self confidence would make them weaker. The strategy works.

* In the now long gone webcomic, Hockey Zombie, this trope was played with. Both God and Satan weren't jerks but a couple of aging fraternity members who loved to party, drink, and played DDR until they passed out. Also God only allows the people who followed the one true religion into heaven. However he got Satan to make Hell-2. Which is where all the non-damned go when they die. Pretty much it's like Earth but with no lasting consequences and a hellish atmosphere. The titular Hockey Zombie spent his time there in a demonic strip club until he drunk Satan under the table and let him back up... As a zombie.
* In the now non-canon stories, the superweapon before the Death Star was the Torpedo Sphere. This was a mobile space station with large batteries of proton torpedoes. The torpedoes were used in mass against worlds that had planetary shields, but when the shields were down the Sphere would then use its real hitter: large batteries of turbo-lasers that would bombard cities and defense installations.
* In "Then There Were Seven", Inspector Kobick returns, and this time he captures Barry's dog, Chipper. The next day the humans learn that Chipper is being exhibited at a local zoo as "The World's Smallest Dog". Barry runs off to save his dog and falls into Inspector Kobick's trap along with Fitzhugh and Valerie. Steve comes up with a plan to slip an animal tranquilizer to the guard, but the attempt is thwarted when Kobick is tipped off by Grotius, a dishonest handyman who is trying to extort a reward for the capture of the Earthlings.

* In "The O Games", during the ring toss competition, Dr. O witnesses Odd Todd faking injury to his leg. However, she believes that he's really injured and drops the ring she has in order to treat him, allowing him to pick it up and score in order to advance to the next round. Her reasoning for taking the loss in stride is because what she and Odd Todd did was not against the rules (since a contestant can pick up stray rings that another contestant drops).
* In the old 8-bit action-adventure game "The Valley", you could create one of these (of type 2) for yourself by finding the six stones of the Amulet Of Alarian. The drawback was that this was single-use only; if you got killed, you were resurrected but the Stones were scattered, so if you wanted to be immortal once more you had to find them

* In the old days when pro wrestling was a legit sport, the second well known foreign wrestling heel was Yusuf Ismail a.k.a. The Terrible Turk from Turkey. He came along with two other countrymen to challenge the wrestlers in Paris, France and was unbeatable, showing to be a brutal wrestler even against his own countrymen. After three years of domination in Paris, he moved to America, where he continued to dominate with losses only by disqualification and finally beat Evan 'Strangler' Lewis for the American Heavyweight Championship winning $5000 and turning that into gold bars to carry home. He died when the ship he was on sank. His legacy was carried on by others who would be called The Terrible Turk, but none got as much success as Yusuf did.

* In "The Omega Directive", the Borg are shown to revere the "Omega Molecule" as the embodiment of perfection. They acquired bits of knowledge about it from thirteen different species before attempting disastrous experimentation of their own which resulted in the destruction of 29 cubes and 600,000 drones. Seven-of-Nine manages to use knowledge acquired from a fourteenth species as well as Starfleet to devise a way to safely contain and break down Omega. It was implied she would not have been able to do this using just the knowledge she had from the Borg.
* In the Omega DLC, General Oleg Petrovsky, when it's clear he's been beaten, surrenders and orders his men to do the same. Whether or not he survives this depends on whether or not you can talk down Aria, or if you think his experimentation and creation of the Adjutants warrants putting a bullet in his head yourself.

* In the one flashback we finally see him, Rhaegar Targaryen is remarkably identical to his younger brother Viserys, give or take him being more muscular and having a more dignified air. In the books, Daenerys almost confuses Rhaegar with Viserys in the House of the Undying.
* In the One Player story mode, there's Fire and Ice. To take on Fire, you need to be playing on at least the hardest non-hidden difficulty, beat your opponent on the Fire Pit arena, do a destruction on them, and enter a robot-specific code. If playing on the very hardest difficulty, beat Fire and do the destruction and code again and you can fight Ice. These two are extremely hard to beat, but the devs reward you generously for doing so. Normally, the end of round bonuses on the hardest difficulty are 400,000 points. For Fire, they're 2 million points, and for Ice they're 20 million points. Good luck getting a perfect round against Ice. The only way to not take any damage from him is to not take any hits

* In "The One Where the Monkey Gets Away", Rachel is watching a nameless soap opera with Marcel the monkey and explaining the gist of the plot to him.
* In "The One with a Chick and a Duck", after Joey calls the chick "she", Chandler checks but says "Whatever it was went back in too quickly."
* In "The One With All The Thanksgivings", there's a flashback where a teenage Monica has a crush on Chandler and makes him som mac'n'cheese for Thanksgiving dinner. Afterward she asks if he liked it, and he somewhat sarcastically remarks, "Yeah, it was great. You should be a chef." Monica giggles and says, "Okay!"
* In "The One with Chandler's Work Laugh", Monica walks over to a group of people listening to a joke being told by Chandler's boss. The joke ends with "thirty dollars father, same as in town." Which is the ending of a joke involving a priest being propositioned by several prostitutes in town.
* In "The One with George Stephanopoulos" the girls start sharing secrets during their
* In "The One With The Butt", everyone says non-committal positive-ish things about Joey's terrible play, except Chandler, who says "Awful play man, woah!". He's too excited about the beautiful girl who just agreed to go out with him to care about lying.
* In "The One With The Butt," the friends struggle to give Joey's play faint praise before Chandler breaks the ice by bluntly declaring it "awful."
* In "The One with the Cake," Chandler uses the bathroom while Joey is trying to keep everyone from leaving the birthday party. When Phoebe realizes there is a window in the bathroom that he could escape from, she and Joey run into the bathroom and are disturbed when they see Chandler actually using the bathroom.
* In "The One With The Chicken Pox", a shore leave visit by Phoebe's submariner old flame gets the group discussing the appeal of a uniform.
* In "The One With The Dirty Girl," Rachel wants to try and complete a crossword puzzle without anyone's help, and struggles with the thing the entire episode. It drives her crazy, but in the end she finishes it (even if she has to rather obliquely ask Chandler the 1996 Best Musical Tony winner,
* In "The One with the Dollhouse", Ross informs Monica that one of their aunts died only to find Monica screaming with joy saying that the woman was a 'cruel cranky old bitch' and then eagerly asking Ross if she gets their aunt's dollhouse.
* In "The One With the Girl Who Hits Joey", Chandler goes overboard and proposes to Monica at the end, even though he isn't ready. They're in the same location and positions they are when the real proposal happens.

* In "The One with the Ick Factor", 26-year-old Monica dates a guy the others call Young Ethan. He's a senior in college. Monica originally tells him she's 22, but admits her real age when they sleep together. He has a little confession himself: he's a senior in high school. Monica freaks out and breaks up with him because it's icky.
* In "The One with the Ick Factor", Rachel sleeping on the couch, Ross with the blanket.
* In "The One With The Inappropriate Sister", the B-plot is that Ross is encouraging Joey to write his own play, and this has created friction between Ross and Chandler. So Joey writes a scene where the main characters are clearly Ross and Chandler discussing their differences and making up. And then makes them act it out.
* In "The One with the Jellyfish", Ross reacts to a letter Rachel sends him:

* In the opening cartoon, Roger slips on both a rolling pin and a bar of soap.
* In the opening cinematic for Dissidia 012, Tifa fights Sephiroth. She finally manages to counter with a roundhouse kick. Sephiroth merely grabs her foot and smiles.
* In the opening credits, the writers are described as "the real villains of the story" (contrasting with the first movie, which credits called them "the real heroes").
* In the opening cut scene a level one Kaim is shown taking on dozens of mooks at once without a thought, at level one. Of course this may be cutscene power to the normal, as when you later fight the mooks they are only slightly more powerful then they are shown in this particular cut scene. The really sad thing is that the enemy mooks are shown as more capable then your ally mooks. Kaim at level 1 is far weaker (even in a purely physical battle) then the white mage preteen girl with no combat

experience gotten at the beginning of disk 2. The enemy mooks are less then 1/10 the strength of Kaim even ignoring his immortality, and the allied mooks are weaker then then enemy mooks!? So in short the entire army could be beaten up by a little girl.

* In the opening of one comic, her inner monologue concerns the unpleasantness of hearing people's thoughts. One guy politely gives her directions while thinking, "Please walk up and down my naked chest in stiletto heels."
* In the opening of one episode, Dave enters Rosalita's and begins explaining his problem to the gang, none of whom speak. When he expresses confusion at this, they slide him notes that show they are in a five-way jinx (they also have a note that says 'yes really' when he asks, 'really?). After he says their names, they have a normal conversation, and then at the end, all six of them say the same thing—ending the scene in a six-way jinx.
* In the opening of Season 6 of Minnie's Bow Toons, Cuckoo Loca gets balloon blowback from a balloon she was inflating.
* In the opening of the series, dragons have been extinct for over a century, and magic has faded to such a degree that some people think that it doesn't exist. As the series progresses, however:
* In the opening of "The Snow Must Go On," there's one after Nelly and Luna announce that they're planning to have their nearly created "Snow Games" tomorrow.
* In the opening panels of one Sunday strip, Calvin is stomping around the house and yelling that he shouldn't have to go to bed now because he's not sleepy. Then he collapses on the floor and starts snoring.
* In the opening phases of the Battle of Stalingrad, a German armoured thrust almost encircled the city before it could be reinforced by the Soviets. If the Germans had succeeded, then the meat grinder which had ground the Nazi war machine into ruin probably would have not occurred. However, the 1077th Anti-Aircraft Regiment, comprised mostly of young female volunteers fresh out of high school, stood their ground and fought the Germans with their anti-aircraft guns. Without proper armour-piercing ammunition, they stood little chance of damaging proper tanks, but they certainly caused significant casualties amongst the supporting infantry and light vehicles such as trucks. The German commander specifically noted in his war diary that the Soviet troops fought until the last. Depending on which source you believe, they delayed the Germans for somewhere between 12 and 48 hours, giving the Soviets a chance to reinforce the defense of the city.
* In the opening scene aboard the SSV Normandy, we see a new NPC called "Ensign".

She dies.
* In the opening scene for "Treehouse of Horror" 2017, the characters are talking candies (except for Shauna Chalmers for some reason). Homer tells Abe that he’s “going to heaven”. Abe is then eaten by Shauna. Later, only Homer, Marge, Maggie, Bart, and Lisa are left. Their bowl is placed on a shelf next to a distraught chocolate bunny, who warns them that they’ll be forgotten and left to rot. The family then devours the chocolate bunny. Chocolate splatters like blood across the screen, revealing the episode’s title.
* In the opening scene of the episode "Bitter Harvest" from season three of
* In the opening sequence, Landa's French is very good and people who speak it will understand that he's got another motive when he asks the farmer if they can speak English because it's what he's more comfortable with. It's because he knows that the farmer is hiding a Jewish family under the floorboard and wants to speak without them understanding.
* In the opening sequence, the holograms of Jabba the Hutt and Urai Fen both flicker while Tyber Zann is talking to them.
* In the opening sequence, the old news reports playing in the background have what are clearly missiles going off. A nuclear exchange can therefore be inferred to have happened, which explains the "three-year [i.e. nuclear] winter" and why no one goes near major cities (likely destroyed and irradiated).
* In the opening sequence, the player can decide to flee the dragon attack either with a member of the Imperial Legion or with a Stormcloak. No matter which they go with, they will always find their escape route through the keep blocked by hostile members of the opposing faction.
* In the opening starting in the fourth season, Hayley sticks a peace sign on Stan's back, while Francine takes it off before he even notices.
* In the opening the Djinn turns a member of the Persian royal court into part of the brick wall as one of the "wonders" he promised to show the Emperor.
* In the opening title sequence, the title character is sent promptly into unconsciousness by
* In the opening to the adventure "In the Shadow of the Derricks", the locals are severely upset about the overabundance of "worthless" oil deposits in the area, since it makes farming difficult and water undrinkable. Until it's revealed how much it's really worth...
* In the opening to the chapter "Reunion at Dawn", it's heavily suggested by the characters that they don't see the whole thing as much of a challenge: just clearing out a few scattered bandits who have moved into the monastery. Claude says that he sees it as more exercise than a major commitment. Actually

* In the original airing of "Brian in Love" after Brian pees in the supermarket, Peter remarks "Geez, Brian, where do you think you are, K-Mart?". That didn't go over too well, so K-Mart was changed to Payless in all reruns and on the DVDs.
* In the original airing of the episode "Ike's Wee Wee", Mr. Mackey's "I don't need to take your right-wing authoritative bullshit!" was said unbleeped. It was caught immediately and bleeped on all subsequent reruns and even the Season 2 DVD release, only being restored in the HD remaster.
* In the original American dub, Milhouse is voiced by Pamela Hayden, who gives him a squeaky voice. In the Italian dub, he's voiced by a deep-voiced guy and sounds like an old man.
* In the original anime, after Queen Nehellenia returns and gets a far more sympathetic send-off than in the manga, she's sent back to her home planet as a little girl. She remembers what happened in her "past life", but everyone else around her has
* In the original, anything that resulted in a "normal" dead body would trigger a cut-scene of Larry's corpse being lowered into a laboratory, which then creates a new Larry to be raised to the opening scene for the soon-to-be-restarted game. (Interestingly enough, getting killed in an alley would result in one of the techs saying Larry screwed up again, but this never happened anywhere else.) More obscurely, if the player took too long to reach the end game, Larry sees the sun rising, and then shoots himself in the head in despair over

* In the original continuity, Lightning Lad lost his arm to the "Super-Moby Dick of Space".
* In the original cut of the movie Miles and Tarissa Dyson had a daughter as well as their son, Danny. The only scene where the daughter appeared was cut, and one of Tarissa's lines referring to her in a later scene was removed as well. Both of these edits were reinstated for the Director's Cut.
* In the original cut of the movie, Russell appears in the final battle in his crop-dusting biplane with a bomb strapped to the side. They changed it to a modern plane malfunctioning in flight so they could show the moment where he decided to make the
* In the original cut, the blonde girl that stares at Rose as she hangs from the railing on the back of the sinking ship, was Fabrizzio's love interest and a friend of Rose and Jack, but most scenes involving her were cut. The two women's silent last interaction has a different meaning if you know this.
* In the original: "Don't have a key? Create your own door." Generally only works where the plot requires it.
* In the original dub from DiC, Emilie-Claire Barlow replaced Katie Griffin as Raye/Sailor Mars midway through the
* In the original ending everything was to be taken at face value. The producers suggested a change because they suspected the Weimar censors wouldn't allow a movie that implied an authority figure could be evil.
* In the original English dub, Herbert has a soft, high-pitched voice. Both the European and Canadian French dubs gives him a deep, gravelly voice.
* In the original English version, young Manolo is voiced by Emil Bastien Bouffard, but Joe Matthews does his singing.
* In the original episode "Someday In The Rain", Yuki spends about a third of the episode on-screen, but neither
* In the original FFVII Jessie was a clumsy chick who bordered on being
* In the original film and its sequels, shades differentiate characters from extras within the Matrix. Virtually everyone that matters wears them. The technical reason they have them in
* In the original film, Cera was this. She frequently boasted about always knowing the right way to do things, only to go on to prove that she, in fact, did not. She ended up suffering quite a bit of
* In the original film, Darkman leaves Julie because he isn't Peyton anymore, he's Darkman now.
* In the original film, Lee Meredith, an American actress from New Jersey, plays the Swedish Ulla. In an interview, she said that her use of stilted, formal Swedish, and her fake, vaguely Scandinavian accent, made Norwegians assume she was rural/small town Swedish, while the Swedes thought she was Norwegian.
* In the original film, Timon is confused by the presence of Rafiki as Simba leaves to fight Scar; "Who's the monkey?!" Despite this, the prequel+midquel
* In the original french translation, Moneybags was named "Gros-sous" (Big-cash), in the remaster his french name become "Richard" for unknown reason.
* In the original game, a civilization could build stargates over a colony to provide instant travel between star systems.

* In the original game and its remake, Marth's father, King Cornelius of Altea, was killed during the invasion led by Medeus, when the army of Gra, who was supposedly allied with Altea, betrayed them and attacked them from the rear.
* In the original gamebook adaptation, it's heavily implied the whole saga is told from the point of view of Hans, who in
* In the original game, Cloud Strife has golden spikes that seem to shoot off in every direction. It is lampshaded often and has earned him the nickname of 'Spiky' from his allies. His hairstyle is less extreme in future installments of the Compilation.
* In the original game, during the final battle with Gruntilda Winkybunion, Grunty will sometimes say things such as "Another hit, I'm getting weak, I really need to take a leak!" and "Soon you'll lose, and when you've gone, I have to go and use the john!"
* In the original game, Hargon and his minions had absolutely no motivation for being opponents beyond "we're the villains"; here, the nature of their
* In the original game, if the light and door switches stop working, it means an animatronic managed to sneak its way into your office. Better hope you're at the very tail end of your shift.
* In the original game, if you drink enough you'll notice that the alcohol also super-zooms the player's vision... its possible to use it as substitute for binoculars or a scope as it doesn't restrict your vision as much, just don't get involved in a close fire-fight while doing it as it can take several seconds to pan across to something that would normally sit on the edge of your crosshair.
* In the original game, it was implied (and confirmed by other material) that Brad Vickers was
* In the original game, July 4 is the anniversary of the opening of the town's train station. This "holiday" is celebrated with fireworks, Redd giving out balloons and pinwheels, and Tortimer giving you a model bottle rocket.
* In the original game, one expansion added a long-term relationship meter to go with the usual short-term meter, with the icons then reflecting long-term changes over short-term ones.
* In the original game, opening the inventory screen didn't pause the action. Thus, if you tried to swap anything during a fight, you had to be really quick before hostiles could kill your characters. Furthermore, you couldn't refill your potions or arrows without opening the inventory, which was further frustrating. The sequel fixed this by pausing the game when the inventory was opened. The sequel also raised the number of ammo per stack from 20 shots to 80 shots, removing the need to open it as often. However, as a counterbalance, armor could no longer be changed during combat.
* In the original game (Orcs and Humans), the Acolyte, Warlock and Medivh all used the same recoloured sprite.
* In the original game, Roland and Mordecai both have goggles. Mordecai at least wears his over his eyes, while Roland's remain up on his forehead.
* In the original game, Stop is one of the seven spells. Very useful in most cases, where any enemy hit by this spell is frozen for a few seconds, allowing you to score some free hits. Once the spell effect ends, every hit lands at the same time. Almost every boss is immune, but it's quite effective against
* In the original game, the biggest and meanest ground vehicle was the Cabal Goliath, a heavy hovering tank with multiple cannons and grenade launchers, which often serves as mid-point boss in several strikes. According to the lore, the tank is an all-purpose vehicle that can engage ground vehicles, fortifications, infantry, and even orbiting spacecraft, and the Cabal, being as aggressive and tank-loving as they are, are all too willing to use the Goliaths in
* In the original game, the case "Rise From the Ashes" contains a sequence where, if Phoenix fails to provide the correct evidence to the judge, he penalizes him and threatens to throw a shoe at Phoenix. For the 3DS rerelease, the line was changed to include "boot to the head", referencing
* In the original game, the Global Liberation Army has the Terrorist and Bomb Truck units. The latter can upgrade with even more explosives and/or poison

warheads. They also have the aptly-named Demo Traps, which are cheaply constructed roadside bombs.
* In the original game, the Robot Masters were perilous occupation robots, but in
* In the original game, the Spanish, Gauls, Germans and Dacians can all train a unit called Naked Fanatics. They are
* In the original game timeline, Keith was bullied by his half brothers for his mother having been a prostitute. This continued when he was adopted into the Claes family, as his new older sister Catarina was jealous of him having taken away their father's undivided attention. Due to Catarina having thrown the game's plot
* In the original game Yggdrasil, this was averted. The strongest member of Ainz's guild was Touch Me, a Warrior. Touch Me was one of the top three players in the entire game, and
* In the original game, zyme just caused massive and long-lasting vision blurriness. In the fan-made mod
* In the original Generation 1 line, many characters had their designs tweaked to look more humanoid than the toys they were based on, which were originally piloted mecha. This often resulted in
* In the Original Generation canon, we have smaller versions of this. The SRX/ATX Teams, The Aggressors, and they smash themselves together into a mega Badass Crew/Coterie when they join forces.
* In the original Godzilla (1954) the streets of Japan explode every time he takes a step.
* In the original Halo Trilogy, both Sergeant Avery Johnson and Captain Miranda Keyes have this full stop
* In the original, he accidentally used all seven because he didn't realize asking for an ice cream cone had counted as a wish, particularly as that one had been accomplished by him and the Devil going down to the shop and buying one. Then the Devil just gave him his soul back, on the basis that he already had as many as he needed.
* In the original, he says something like "Even I can't make that sound cool" after losing his enthusiasm towards the end of the line.
* In the original Hot Pursuit, as well as High Stakes, cops refer to any add-on car as a "Sports Car", regardless of whatever the car actually is. This is a reuse of the chatter used when the player drives the fictional El Nino.
* In the original incarnation of the series, Seventh Doctor Sylvester McCoy's tenure was marked by the Lungbarrow Plot (aka the Cartmel Masterplan), a multi-season story arc designed to reset the continuity of the series and re-establish the mystery of the title character. This really was written in advance, and the payoff for the audience really was there... until

* In the original Japanese, Son Goku is voiced with the equivalent of a country hick accent. This is an essential part of his character for Japanese viewers (along with
* In the original Japanese, the Children who pilot the Evas were called "Children" in the singular (for example, Rei is the "First Children" rather than "First Child"); the English dub and subtitles corrected this… however, a commentary track on the
* In the original Japanese version, Hikari was only doing one thing as she plucked: saying "Hate...hate...hate..."
* In the original Japanese version, when Robin calls Chrom by name at the beginning despite never meeting him, Chrom confusedly asks Robin "How do you know my name?". This eventually stops making any sense whatsoever once it's revealed in-story a chapter or two later that Chrom is the prince of Ylisse, meaning there would be several hundred plausible reasons why the Avatar would know Chrom's name. The English localization fixes this by changing his line to "Ah, then you know who I am?", which is much more in line with what a famous figure would say upon being addressed by name by a stranger. (The change would have been necessary anyway, because Chrom had already been referred to by name in the localization.)

* In the original Korean movie, Cuthbert-equivalent's character's "quirky antics" tend to have harmful consequences, but the protagonist falls for her anyway and she does indeed teach him to live and love. However, she definitely has issues and motivations unrelated to her man, and it turns out that she's been
* In the original, Kyatto Ninden Teyandee - Yattaro and Sukashii fight each other over Omitsu.
* In the original London production, Cosette had an aria called "I Saw Him Once", and Gavroche's song "Little People" was much longer. Both songs were eventually cut, but can be heard on the London cast recording. Many other songs, such as "Fantine's Arrest" had additional lyrics and "Stars" was originally placed much earlier in the show. These extended versions can be found on the preview rcordings:
* In the original manga, Creed's only weakness is his brain, and Train would need to shoot him in the head (which would kill him, which Train refuses to do) in order to stop him. Otherwise, he's unbeatable. He takes Train's best shot, a stronger version of the attack that flattened

* In the original Mirage series (and most of the adaptations) this role is usually filled by Casey Jones who first met the Turtles after getting into a fight with Raphael when the latter stopped him from almost beating some street hoods to death.
* In the original "Mirror, Mirror" episode that introduced the concept of the Mirror Universe the Empire was nameless and was just called "The Empire". Which caused much speculation on the actual name in the
* In the original movie, Carol-Ann's closet turns into a squidgy, pink, mucous throat-esophagus sort of thing with a tentacle reaching out to grab her and pull her in.
* In the original movie, John McClane and Sergeant Al Powell have a conversation that jokingly derides desk jockey cops, up until Powell reveals why he's now a desk jockey instead of patrolling the streets: because he made the horrible mistake of
* In the original movie, Sil, a hybrid of alien and human, inverts this trope. In fact, the whole movie is about being created to spread her alien species on Earth and wiping out humanity, which is why she should be hunted down and killed. Sil was created in a
* In the original, none of the main characters appear in every episode. Of the four main cast members that are regularly featured in every season, Tori Spelling (Donna) appears in the most episodes; missing just two in season 1. Jennie Garth (Kelly) and Ian Ziering (Steve) miss three, while Brian Austin Green (David) is absent in four.
* In the original novel it ends more ambiguously, with the father, son and some extras having fled the grocery store to an uncertain fate.
* In the original novels, it eventually becomes clear that the tape is not, in a traditional sense, haunted. The tape causes physical changes to the viewer's body, eventually resulting in their death. The film adaptation differs from this.
* In the original novel they were more effective; the narrator witnesses one tripod being destroyed by an artillery barrage, before the Martians start deploying chemical weapons. A single ironclad took out two tripods in a kamikaze attack,

which doesn't seem like much until you realize there are at most thirty on the planet.
* In the original, Phantom could only be hurt by strikes to the face (high damage, but that's where he shoots fireballs from), and back (less damage, but less risk). Nightmare had a weakpoint that you had to expose by first solidifying it, then smashing the glowy circle.
* In the original Phyrexia the holiest symbol beside the phi was the Mask of
* In the original Police Quest, if you don't do a search on your police cruiser, it will be booby trapped and kill you. If you do, you'll find nothing wrong and the game continues normally. Wrap your head around that logic...

* In the original publishing, an illustration of the Jabberwock was intended to be the frontispiece, but was deemed too fearsome.
* In the original, Reno was characterised as something of an incompetent blowhard, with three flunkies with him there to laugh at his jokes, hypocritically telling them not to step on the flowers after walking right through them himself, and then, thinking he's killed Aerith, remarking that
* In the original run, the Unknown Soldier went up against a German soldier who disagreed with the ideals of Nazism, but still fought against the allies, not because he was loyal to the Nazis, but because he was loyal to Germany.
* (in the original Russian version, at least) who won the Second World War".
* In the original Saban dub of DBZ, several episodes from the Saiyan Saga were cut and had certain scenes spliced into earlier or later episodes. During the Namek Saga, the non-canon movie "The Tree of Might" was also made into a three-part episode, despite the obvious continuity problems.
* In the original script, Billy's mother was decapitated by the gremlins, with her head rolling down the stairs.
* In the original script, Cedric the Entertainer's character, Maurice, was the king of the lemurs and Julien was his advisor. Baron Cohen pointed out that an
* In the original script Kimble actually manages to check this. He doesn't look up, but he does freeze in place for a few seconds before continuing down the stairs. The lack of response tips Gerard off just the same, especially since others in the stairwell display this trope by looking up.
* In the original script, Mercutio said "A plague o' both your houses" immediately after being stabbed. In the 1996 Baz Luhrmann film, he only says it after
* In the original series, ‘’UFO Defense’’, alien plasma weaponry is the best conventional weaponry in the game (unconventional weaponry includes guided missiles and stun bombs), along with massive amounts of rounds with each magazine. In the sequel, ‘’Terror From the Deep’’, plasma weapons are unsuited for the oceanic depths, and you can instead develop Gauss weaponry, which works on a similar principle. In both cases, the plasma particle is fired and encased in a magnetic field that explodes on impact to release the energy. Gauss weaponry is less powerful and effective than straight plasma weaponry, but uses a stronger magnetic field to work underwater as well as on land.
* In the original series, apprentices had to travel to Highstones before they could become a warrior. Fans noticed that this never happened with the Moonpool later on, and in a later book, Leafpool mentioned, "We seem to have left that tradition behind when we moved to the lake...."
* In the original series, Arf, before going to help Nanoha, Yuuno and Chrono in the final battle, tells Fate, who is catatonic from a
* In the original series, a set of six episodes in which the Red Panda was a World War II secret agent, the Red Panda was often accompanied by Australian secret agent Baboon McSmoothie, Man of a Thousand Faces. With a special drug, he could change his face to anyone else's at will and even get the voice with concentration. Over the course of the series, he stops needing the drug for this power and it simply becomes a natural superpower for him. He makes an appearance in the main

* In the original series, Ghostfreak, as Zs'Skayr, gets resurrected by Dr. Viktor during part one of the season 3 finale after being killed due to being exposed to the sun after escaping the Omnitrix one season earlier. At the end of the next episode, he gets killed again by the sun, though Ben regains his DNA in the Omnitrix, much to his initial dismay.
* In the original series, Goku has a tendency to use his opponents' moves against them immediately after seeing said moves. This ends up being used against him at his first Tenkaichi tournament: Jackie Chun charges at him with a flying kick, Goku uses the same move,
* In the original series, in Season 2, there was at least one case when the log was played when Kirk was captive (with hands up etc.) so it was apparently recorded from memory.
* In the original series, it has long been implied that Chekov already spoke English in addition to his native Russian, but it's never confirmed one way or the other. It would explain why he speaks with an accent when translated languages usually don't.
* In the original series, it was opened questions among the cast to what Goku was. He was a strange boy with a tail who was exceptional strong to the point several characters questioned if he was human before eventually saying nothing more about it. It becomes a wonder why anyone was surprised when they learned that he was an alien. Then again, they are many strange things in this version of Earth.
* In the original series, Karolina's grappling with the discovery that she is an alien was a not-at-all subtle metaphor for her growing realization that she's a lesbian. The second series decided to stop beating around the bush and had her come out to her friends.
* In the original series, Ken Kaneki begins to hunt, kill and eat other ghouls in an effort to get the bottom of what happened to him and become "strong", though not at anyone else's command. Consuming ghoul flesh tastes terrible and causes severe mental deterioration along with the power boost, but formerly-human Kaneki would still rather do that than eat humans.
* In the original series, KITT generally seems more knowledgeable and sly with his remarks.
* In the original series Master Roshi did a form of this to Tien, trying to get him to turn away from his evil master. He was half successful. It takes Tien fighting Goku and having his master cheat for him before he broke ties with him.
* In the original series, Molly's parents at one point insist that she can't possibly be a mutant, because they had her tested for the X-gene and the tests came back negative, raising the possibility that she's something else.
* In the original series, once transformed there was no switching aliens or changing back until the

* In the original, the hare comes to eat the girl's cabbages three days in a row, extending an invitation to her each time she comes to shoo him, and only on the third day does she go with him. In this comic, this takes place in one scene — the hare comes, the girl tries to shoo him, he gives his invitation and repeats himself until she gives in.
* In the original, the player character Frank West is a journalist who ultimately has to save the survivors he intended to report upon. In several of the endings, he dies in the attempt, and even in the best ending, he is still infected.
* In the original, the "random" point value of the flying saucer is actually a completely predictable function of how many times the player has fired. It is worth 50 points if hit with one of the first 8 shots, 100 points if hit with shots 9 10 11 or 12, 150 points if hit with shots 13 or 14, and 300 points if hit with shot 15; then the cycle starts over. A savvy player can count his shots and get 300

points each time.
* In the original, though, they ultimately turn out to be more harmless eccentrics who like scaring people than real murderous spectres. In the end, they actually save the day by killing the Amoral Attorney
* In the original timeline, Colossus is portrayed by Canadian Daniel Cudmore.

* In the original trilogy, excepting the droids, there's Chewbacca, Han Solo's Wookiee co-pilot. He's one of the few alien characters who are even given a name in
* In the original trilogy, Leia can be seen as the deuteragonist, with her importance as the second Skywalker twin, and the other new hope for the Galaxy her birth represents at the end of the prequels, and the only one who can fulfill Luke's position should her brother fail. In the first (fourth?) film, she's also the only character with knowledge of and stake in the main plot from the very beginning, the one who kicks it into motion, and the only main character who interacts with the
* In the original trilogy, Luke Skywalker got a new green lightsaber in
* In the original trilogy, the Covenant are a collection of highly advanced alien species who look to be the main reason why humanity's about to go extinct... that is, until the Flood are released. After that, the Flood start assimilating both Covenant and humans into their ranks and you start to wish you just had the Covenant to face again.
* In the original trilogy, the Dark Side Force-user Darth Vader mostly acts as an officer, "motivating" the admirals of the Imperial Fleet and commanding starships to hunt down the Rebels. Occasionally, he also takes the field himself and acts as an elite soldier, such as when he pilots a TIE Advanced starfighter in the Battle of Yavin.
* In the original trilogy, the Empire universally adheres to the aforementioned "utilitarian war machine" aesthetic, while the Rebel Alliance ships are largely "flying tubes with guns" such as the
* In the original trilogy, their son Luke also refuses to give up on Anakin once he learns Anakin is his father. The only reason he surrendered himself in the third movie was to save his father from the Dark Side. This time it works since Anakin could not bear to see his son being tortured to death by Palpatine's Force Lightning.
* In the original trilogy, the nomadic culture of the Tusken Raiders is very distinct from the majority of the population of Tatooine. The majority of the population also belongs to at least two races (Humans and Jawas), while the population of the spaceport of Mos Eisley and Jabba the Hutt's lair is home to a number of representatives of other species, mostly from off-planet.
* In the original TV series, Kei and Yuri occasionally compare their

* In the original version and some others, the Legion's financier, R.J. Brande, had his corporate headquarters on Earth and believed by most to be a native.
* In the original version he also laments that he has an unreturned library book.
* In the original version, Menasor has a deep, growly voice like all the other combiners. While the original Italian dub followed suit, in the 2008 redub his new voice actor, Toni Orlandi, gives him a slow, high pitched voice that makes the giant robot sound like a drunken old man with some kind of mental issues (which is how he is depicted on his original toy description).
* In the original version of the story, Tikki-Tikki-Tembo died because his brother

kept running out of breath trying to say the absurdly long name and had to start all over again each time he tried to say it.
* In the original version, Tack never said anything until the end when he gets engaged to Princess Yum Yum — he says "I love you"
* In the original, Vimes tried it for a while, but Sybil objected when Jr started picking up... improper vocabulary, such as "Buggrit!"
* In the original visual novel and the 2006 anime, Bedivere only received one scene's worth of screen time — just enough to intrigue some people about him. Then along came the Camelot Singularity in
* In the original visual novel, it was claimed that the only Assassin-class Servants that could be summoned were members of the
* In the original what-if-machine episode, Bender asks, "What if I was a giant robot?" You guessed it — he would attempt to kill all humans,
* In the original worldwide vampire nation the vampire population density was relatively high, but humans remained a major group of second class citizens, who could be treated anywhere from decent subjects to mere cattle depending on their local vampire lord's personality.
* In the original, you are on a space station and are kept well away from the escape pods.
* In the original, Yugi never claimed to know Shougo (the character Gary Stu is based on) very well. They were just neighbors.
* In the origin episode, the villain (voiced by Ricardo Montalban in a spoof of his role as Khan in
* In "The Origin of Batman", Batman learns that the villain of the week is none other than Joe Chill, the two-bit hood who killed his parents outside the theater. Upon this realization, Batman becomes determined to collar Chill, asking Robin not to get involved, and even going as far as unmasking himself on the gamble that doing so will scare Chill into making a mistake.
* In "The Origin of Species", humans began to experiment with genetic engineering in or before the 23rd Century, giving them superhuman abilities (which included having wings) but rendering them sterile. As such, humanity eventually died out. The ship which brought Hope and six students to the future Earth is able to take genetic samples from them to create babies, altering their DNA sufficiently to prevent inbreeding.
* In "The Origin of The Sorceress": Teela-na, the future Sorceress, gets this line from a young town who had been watching the villain of the day and an alien race argue over things.
* In "The Origins", Nicole does this in response to her alarm clock going off, which turns out to be Gumball imitating it, alongside Richard's yelling.
* In the "Origins" two-parter, our heroes are taught only how to transform, untransform, and activate their special powers, on account of the situation being (very) urgent. They bumble through their first monster but by the end seem well acquainted with their respective powers.
* In the orignal series episode "Who Mourns For Adonais?" Apollo is shown with truly god-like abilities, but loses them when the ship's phasers blow up his temple.
* In theory, anyway. In practice, most of the players didn't want to take the chance that their opponent would know the answer after all. So if they Dared, it was because they didn't know the answer to begin with, and if the opponent Double Dared back, it went straight to the physical challenge.
* In theory at least, they also accompany the Tax Collector on his rounds.
* in theory for having corrupted nationalism from its radical origins.
* "In Theory" had Lieutenant Commander Data presenting a bunch of crystilia to Lieutenant Jenna D'Sora, when the two were "dating". Data's choice came from Commander William Riker's recommendation since crystilia had "worked for him before".
* "In Theory" is far from cynical, doesn't learn the answer. The breakup doesn't faze him either.
* In theory, Liberl's army and the bracer guild cooperate with each other.

Underneath the surface, however, there's a lot of disputes. Your two main characters, Joshua and Estelle, learn this firsthand when investigating the missing airline their father Cassius Bright was on and discover from the Bose Bracer Guild that the military is maintaining a public information blackout, and that includes the Bracer Guild. Furthermore, bracers are being prevented from entering the areas the army is investigating.
* In theory-mounted lesser version, which only kills everything within five miles or so.
* In theory the Holy Roman Empire was also supposed to be a Catholic superpower, at its greatest extent covering a significant portion of Europe. However, it was never particularly Holy or Roman, was more a collection of minor bickering states than an actual empire, and the Pope had no more direct power over it than any other Catholic country at the time.
* In theory this means that there should be demons for other strong emotions such as love, but this isn't really touched on during the book.
* In theory, what's supposed to keep double heat sinks in check is their increased bulk (two or three times the internal space of singles depending on model). What this means in practice is that at the absolute worst they take up a grand 50% more room
* In the other, another couple sings the praises of the house they've just bought. They do admit it has a rat problem. Cut to the band
* In the other, a pair of women talk about the couch one of them just bought. When that sequence ends, we see a pair of burglars in the same room talking about the same couch which they're about to steal. Their conversation is exactly the same as the women's.
* In the other, FDR is defeated in the 1936 elections and his opponents ally with the Silver Legion to try solidify their power via voter intimidation and other shady practices. Seeing this as a sort of "soft coup", FDR and the progressive wings of the Democratic and Republican parties, calling themselves the Constitutionalists, start a civil war, while Douglas MacArthur assumes command of the Loyalist forces. If the Loyalists are victorious, MacArthur can retain power or the Loyalists can establish a new Confederacy under the rule of William Dudley Pelley, Charles Lindburgh, or if the Kaiser has been restored in Germany, an architect named Adam Hilt, who is very definitely not an exiled

* In the other versions the player can choose to do this anyway (the outcome's the same either way).
* In the other war of 1812, the battle of Russians against Napoleon at Borodino falls under this trope. Neither side won the actual battle: Napoleon's goal was to destroy the Russian army while the Russians had defense of Moscow as their prime objective; neither side succeeded. The Russians lost far more men than the French and was forced to leave the field and opened the way for Napoleon to take Moscow, but since they had at least managed to hold their ground for awhile against a stronger force while also exhausting the Grande Armée so that they couldn't chase down and destroy them outright, it was demoralizing for the French, which contributed to the unraveling of military order after the city fell. The fact that Napoleon had not prepared for a long campaign meant that the onset of General Winter was a debilitating blow to the Grande Armée, who was forced to

retreat from Russia with such heavy losses that erstwhile allies Austria and Prussia turned on him.

* In the past many trains were not continuously power braked, being brakes on leading vehicles only, or just the locomotive. This could often lead to runaways on falling gradients if insufficient brake power was available to slow or stop the train or the train traveled at too high speed. Freight trains were often unbraked or partially braked until quite recently (as late as the 1970s in the UK). On long falling gradients is was often required for the train to stop to allow the crew to manually apply parking brakes on some wagons to prevent the train from running away

on the hill. Runaways could easily occur if this was forgotten.
* In the past, more extreme examples were fairly common. A penitent might be obliged to undertake an arduous task (usually involving hard labor) or take a pilgrimage. Self-flagellation (whipping yourself) occurred as well, along with milder things like wearing a hairshirt or sackcloth. They are more rare today, but some of the most traditional Catholics will engage in them. Fasting and abstinence are still common examples of penitence (by people who haven't taken of vows in to be celibate already in the latter case). Some people wear cilices, a modern version of the hairshirt, to do penance (Mother Teresa did for instance)
* in the past, people didn't have to be told not to try things at home, they were smart enough to know it wasn't safe.

* In the past quite some religions have been misused to give people a reason to dislike, hate or fear someone based on a few lines that can be easily misinterpreted in the scripture. A historical example is the anti-Semitism that was rampant for many centuries because some priests and popes used the fact that Jesus had been arrested on commission of some Jewish elders that didn't like the guy to justify violent measures against the Jewish population. All that while Jesus was Jewish by birth. Another example is that several medieval monks used the

* In "The Peanut Butter Kid", Stewie lands a part in a commercial. He soon lands more commercial parts and his parents let it go to their heads. They buy luxury goods they don't need and work Stewie to exhaustion. Peter even gives Stewie an energy drink that includes cocaine. Brian plays the voice of reason this time and tries to convince Peter and Lois that they are ruining Stewie's life, to no avail. He convinces Stewie that the life of a child actor is a thankless and brutal one that often leads to a bad end later in life, pointing out former child stars who either ended up in porn or died unpleasant deaths. In the end, Brian and Stewie convince Peter and Lois to stop being stage parents by having Stewie pretend to have a total meltdown during his next commercial shoot.

* In the Philippines, many inventions are thought to be made by Filipinos, and such claims are even mentioned in school textbooks. A common theme is an alleged invention's name being a derivative of the inventor's name. To explain why a certain invention is not widely credited to a Filipino in the rest of the world, the oft-cited reason is that the alleged Filipino inventor sold their invention to a foreign company due to poverty or lack of support from the Filipino government or local companies. These cases are usually meant to elicit support from the government for Filipino inventors so that they may properly benefit from their work and be credited. One famous example is that the fluorescent lamp was supposedly invented by a man named Agapito Flores, with "fluorescent" coming from his family name, "Flores", who sold the patent for the invention to a foreign company.

* In the Philippines, the Liberal Party got its start in the 1940s as a splinter-off faction of the Nacionalista Party (virtually the only party in power at the time, as the country/semi-US-colony was essentially a one-party state). Disgruntled party members, chief among them Manuel Roxas (who would go on to be President in 1946), left and started their own party to challenge the Nacionalistas at the polls. Not that it really mattered party-wise, because the two parties differed very little in ideological leaning, and party-switching or "turncoatism" was rife—a reality that still holds today under an ostensibly multiparty government. The Liberals in fact were the originators of the "start-your-own-party"

trend regardless of ideology or beliefs.

* In the pilot, a mummy falls out of their jet. Brock kicks its ass, kills it, and the urinates on it for good measure (you have to defile a mummy completely, or else it'll just get back up). Upon closer inspection, Rusty finds the mummy to be a fake. It's unknown who that guy really was, or why he dressed up as a mummy and climbed into the Venture jet.
* In the pilot, an apparently high-school-age couple is in the school at night; the girl is nervous about being out at night while the boy reassures her. Since it's clear from the title that this is a vampire show, the expectation is the boy will suddenly reveal himself as a vampire and bite the girl; instead the opposite happens, and the girl is the vampire.
* In the pilot Bender was also shown to be a good and moral robot, who only "went bad" after his programming got scrambled by electricity from a burst lightbulb. Later it's rather clear that he's always been his normal violent and klepto self from the remainder of the show, and that Mom seemingly programs all bending units in that manner - as seen in the episode
* In the pilot, Connor gives his father Logan Roy some sourdough starter, which Logan unimpressedly refers to as "goo" and "old bread."

* In the pilot episode, Caitlin (originally BFFs with resident mean girl, Tricia Holmes) was unaware that credit cards even had spending limits in the first place until her own card got declined while shopping at the Khaki Barn (where Nikki Wong ultimately gets a job). After calling her parents about it, they force Caitlin to get a part-time job not only to pay off the credit card that she maxed out, but to also teach her the "value of a dollar." Ultimately, Caitlin ends up getting a job at a lemonade stand in the Galleria Mall food court called The Big Squeeze, becoming the replacement for Jen Masterson (the first of the gang to befriend Caitlin), who had recently gotten a job at the Penalty Box. Though Caitlin eventually pays off the credit card debt to her parents, she ultimately chooses to go credit card-less permanently (or mostly permanent, because some of the later episodes offhandedly mention that Caitlin still uses a credit card, albeit not as frequently as before).

* In the pilot Jimmy (at this point Nucky's driver) is left out while Nucky meets with the crime bosses of Chicago and New York City. While waiting, he has a long conversation with another young driver from Chicago (though born in Brooklyn) during which they discover that they have a lot in common. With the meeting over, they say their names before parting ways, and this Chicago driver's is no other but
* In the pilot, Joey asks Phoebe if she would help with assembling furniture at Ross' new apartment, and Phoebe averts the trope:
* In the pilot, Lara's father is named Sul-Van rather than Lor-Van, which in turn makes Lara's maiden name Lara Sul-Van.
* In the pilot, Lois answers the door topless, not minding at all that she's showing everything... to Malcolm's
* In the pilot, mafia hitman Tony Gallo murders Sara's partner Danny Woo in cold blood in front of her, and she spends the rest of the episode trying to catch him while learning to use the Witchblade.
* In the pilot, Michael heads off a bad guy by hijacking a stranger's car and crashing it into the bad guy's, with no airbags and with the stranger still inside. He walks away afterward and leaves the stranger to deal with the damage and possibly serious injuries. Seriously, was there
* In the pilot, Michael marks areas on a drug dealer's wall with duct tape as targeting for where he'll a) shoot him in the leg with a gun and homemade suppressor, and b) crash through the wall.
* In the pilot movie, a HAWK missile is seen launching, to be identified by the heroes as a 'heat seeking missile' (the HAWK is a semi-active radar guided missile).
* In the pilot movie we see Soviet-made AA guns used by the Serbs against U.S. Navy F-14s, and they almost take the CAG out, if it were not for his resourceful passenger.
* In the pilot of the reboot, young MacGyver has just jumped off a helicopter into

a truck with a bomb in the back, complete with bright red LED countdown and a thing that goes "bleep" in time with it.
* In the pilot, Phil explains his technique of acting perfectly friendly to his daughter's boyfriends, except for giving them a cold, dead stare. He doesn't pull it off as well as he thinks.

* In the pilot, Snow White kissing her mortally wounded husband doesn't do a thing. In the third episode, Mary Margaret (the brainwashed Snow White) tries it to revive "John Doe" (said husband again), and while it brings him back, he immediately goes back to his estranged wife (who isn't her). Lastly, Sheriff Graham kisses Emma, and remembers
* In the pilot Spartacus and other Thracians are condemned to fight in the Arena after they are judged to be traitors. Since Gladiators are very skilled fighters, and the prisoners were not, none were expected to survive and this is seen as an entertaining form of execution.
* In the pilot, Star's parents decide to enroll her in Marco's school. The principal at first refuses, so her father opens a chest full of gold and jewels. He's much more accommodating after that.
* In the pilots, the endgame featured sound effects from the Nickelodeon game show
* In the pilot, the Federation's food and water supplies are laced with "emotional suppressants". The rebel approaching Blake insists he eat or drink nothing for three days to get them out of his system.
* In the pilot, the minor scandal over Selina using the word "retard" as a joke gets dubbed "Retardgate".
* In the pilot, the real Sheriff Lucas Hood gets shot through the hand, at the base of the fingers, which contributes to his death.
* In the pilot there're apparently only two ways to travel from the Enchanted Forest to the real world: the Dark Curse casted by the Evil Queen and the magic wardrobe made from a magical tree that allows Emma
* In the pilot, the trope is played for no laughs at all. White House staffers sit down with some advocates of Christian issues to offer an apology for some ill-advised remarks one of them made on a news program. When the Christians turn the good-faith olive branch into a negotiation over political concessions, things get a little heated. Since two of the staffers are Jewish, Toby Ziegler interprets a comment about Josh's "New York sense of humor" (considering he's not from New York) as anti-Semitic. The hostility only grows, descending into an argument over the order of the Commandments, until only the arrival of the President cuts through the bullshit. It's worth noting that it's unclear whether the woman actually had Toby and Josh's Jewishness on her mind (she claims to resent the implication), and it's also unclear whether Toby was genuinely offended or was seizing an opportunity to regain some control over the situation (either would be in character). It could be considered an
* In the pilot, the Venture boys meet a prostitute in her bedroom. She rattles off a list of services to them before they freak out and run for the hills.
* In the pilot they had a debate over which Hollywood movie had the most sweat in it. Candidates included
* In the pilot, this trope is discussed. Michael specifically picks a classic car without airbags so that after a collision when his opponent will be disabled and distracted by his airbag, Michael will be free to get out and tie him to his steering wheel.
* In the Pilot, two Cylon Raiders engage a full squadron of Vipers; after disabling the squadron, the two Raiders pulled an MMM, firing enough missiles to wipe out the 20 (24?) Viper squadron.
* In the pilot, we learn that Alexis is having an affair with AJ, but other

characters take some time to.
* In the pilot, when Allison is taking Jack to Global Dynamics for the first time, he asks, jokingly, if she's taking him to Area 51. She laughs and tells him that Area 51 people wish they had GD security.
* In the pilot, when Madoka mentions how she first saw Homura in a dream the previous night, Sayaka says that "the anime character in [her] is popping out."
* In "The Pineapple Incident", Ted woke up one night to find he'd hooked up with a woman, sprained his ankle, gotten his coat burned, had a phone number he didn't know written on his arm, and for some reason had a pineapple on his nightstand. Almost everything was explained through a series of
* In "The Pink Purloiner", SpongeBob cannot find his special jellyfishing net and continously accuses Patrick of stealing it. It turns out near the end Patrick didn't take the net at all; he just left it on the bus.
* In the "Piranha Brothers" sketch, Doug Piranha kept his underlings in fear by his use of sarcasm. "He knew all the tricks - dramatic irony, metaphor, bathos, puns, parody, litotes and... satire. Grown men would pull their own heads off rather than see Doug."
* In the "Piranha Brothers" sketch, Luigi Vercotti is being interviewed about Doug Piranha. When asked what Doug's methods of brutality were, Luigi's eyes grow wide with the horror as he recounts "He used...

* In "The Plaisham," a middle-aged woman tries to get rid of her husband by convincing a local lord to order him to accomplish
* In "The Plan," Gumball, Anais, and Darwin discover an apparent love letter from "Daniel Lennard" to Nicole reading "Your beauty and happiness is important to me," spend most of the rest of the episode drawing up an elaborate plan to stop "him," and find out only in the end that "he" is
* In "The Plan", many of the main characters appear only in stock footage. In one bizarre instance, they edited Laura Roslin out of a scene she previously appeared in and gave her line to Col. Tigh!
* In "The Plant From Bortron 7", Jet's Bortronian plant becomes enormous after it grows under the light of the Earth's Sun. It also becomes a monstrous Godzilla-like creature.
* In the play, Maria and the children sing "Do-Re-Mi" during her first day as the kids' governess. In the movie, Maria takes longer to earn the children's respect, so "Do-Re-Mi" doesn't begin until at least her second day as governess. The movie also has the song performed in a montage, indicating that the children took several weeks to learn how to sing, as opposed to the one day shown on stage.
* In the play, Maria and the children sing "The Lonely Goatherd" during the aforementioned thunderstorm. In the movie, they perform it as a puppet show for the Captain, the Baroness, and Uncle Max. The Captain and Liesl follow this up with "Edelweiss", which the play saved until the Kaltzberg Festival. (The movie also the Von Trapps sing "Edelweiss" at that festival, as a reprise.)
* In the play, Maria and the Mother Abbess sing "My Favorite Things", after Maria recalls that hearing the nuns at Nonnberg sing made her want to join them. In the movie, Maria sings it to the Von Trapp children during a thunderstorm, leading to a confrontation with the Captain when he catches everyone staying up past bedtime.
* In the play, Thomas Putnam is a greedy and conniving man who uses the accusations to increase his own fortune, while his wife Ann is succeptible to the claims because she has

* In the Popul Vuh, a Maya epic story, the evil gods of the underworld have a rabbit scribe. Depictions of the court of the underworld usually include it.
* In the pornography industry, it is not uncommon for siblings, cousins, and parents/offspring to work in the business together, and sometimes even appear in the same production. "Performing" together, if you get the meaning, is less common but not unheard of in mainstream productions, though there seems to be some leeway given to twins and confirmed cousins and sisters (brothers in gay works as well, although they tend not to directly interact sexually). There is at least one confirmed instance where a well-known porn actress and a well-known porn actor were accidentally scheduled to do a scene together, the director not being aware they were siblings — obviously, the scene was not shot once the performers pointed this fact out. (Note: please do not add any names here, as while some relationships have been confirmed, many are simply made up for the sake of the fantasy and the performers are not actually related.)
* In the possibly non-canon episode "Rapture's Delight" the Rapture is reported on TV by only one of them. He explains that his partner has been raptured by saying "Apparently God does love gays, but only if they're a top."

* In "The Power of the Press", Erin Reagan meets with the daughter of one of her old schoolmates. The girl, Hannah, says she was raped several weeks ago at a freshman orientation party by a star athlete, but did not report it because the dean of students said the school could act on the incident quicker than the police. As a result, the perpetrator walked free. Despite Erin's best efforts, she cannot find any evidence to bring the rapist to trial as the evidence from the original crime has been tainted. She is, however, able to find evidence to arrest the dean for deliberately ignoring evidence in a cover-up attempt.

* In the premiere, Gwen is cleverly (she thinks) infiltrating the Hub as a pizza delivery person, only to have the group unable to keep up the charade that she's fooling them and break out laughing.
* In the premiere, he gets sick of listening to his Village-supplied radio (which has an internal power supply and no off switch), throws it on the floor and literally kicks it to pieces, all while the saccharine Muzak refuses to go away.
* In the premiere of the third season, Rachel was embarrassed about being picked last, having flashbacks of dodgeball. This suggests, however, that she didn't really understand the elimination process, in which one-by-one Anne and Bobby each picked a chef they wanted for their team and foisted one they didn't want on the other team. Her being in this position, while not the best, certainly at least indicated that they felt she had some potential, compared to some of the others.

Otherwise, one of them would have foisted her off on their opponent a lot sooner.
* In the prequel, "A Deepness in the Sky", humans are this for giant spiders. You see, spider babies and children have two eyes on top of their heads, like humans do, but when they get older those eyes merge together and form a single sensory organ. The instinctual reaction to find us cute is so strong that even jaded military personnel finds it hard to resist human charm, despite the fact that humans have bombed spiders at that point in the story.

The USA in particular was nuked, blasting Washington, DC off the map. The new capital is in Omaha, and the US dollar is practically worthless.
* In the Presence of mine Enemies: Germany won the Second World War because of American neutrality and later invaded the US in the Third World War. All "undesiderables" were exterminated except for a few hiding under secret identities, like the main characters who are German Jews posing as "Aryans". By 2010, the Nazi empire dominates the world but is stagnating and collapses within a year in what is totally not a ripoff of the USSR's fall in 1991.
* In the Presence of Mine Enemies likewise nuke Washington DC during World War III, after the U.S. stayed neutral through World War II.
* In the Presence of Mine Enemies, Nazi Germany and Japan defeated the United States and Canada in World War III in the 1970s. Nuclear weapons were extensively used with Washington, D.C. and Philadelphia being completely destroyed. Before its defeat, however, the US inflicted significant damage on Germany. After the war, millions of Jewish-Americans and African-Americans were murdered in concentration camps, reducing the United States population by one third from its pre-war levels. In the 2010s, the US still had to pay war reparations to Germany on an annual basis.
* In the present age of digital broadcasts, 37 is still reserved for radio astronomy physical transmissions. However, stations' display channels (called "virtual" channels) could be anything from 0 to 999. So technically, 37 could be used as merely a display channel. Channel 1, for example, which was discontinued in the late 1940s, is used as the display channel for KAXT, a low-powered station in Santa Clara CA, which physically broadcasts on channel 22.

* In the previous edition of the Chaos codex, Lucius the Eternal used to lower his stats in-game if he fought an unworthy opponent, and raise his stats if he found a worthy one. He also takes a memento of people who defeat him and take pride in it by fusing their souls to his armor.
* In the previous episode, demons Trensiduf and Vakama are arguing over how much Cordelia is worth. Vakma points out that Cordelia is too skinny, "and ugly too." Cordelia (who's
* In the previous games, Maya, Ema, and Trucy can count as this as well. They all get to tag along and help out investigating crime scenes, are clever enough to make at least one helpful observation or contribution, become close friends with Phoenix or Apollo, and have some talent that really helps out (Maya's channeling, Ema's forensics techniques, and Trucy's magic tricks).
* In the previous generation, Peter Pettigrew was that kid who let his friends — namely James and Sirius — pick on him just so he could remain in their group, and Remus failed to intervene for the same reason. And it seems that for a long time before she finally broke it off, Snape and Lily had a relationship where she was always standing up for him to others and he was always letting her down.
* In "The Price of Admission", Bobby misspells Lori's name as "Lory".
* In "The Price of Admission," Lincoln throws himself one with pizza rather than tea and faces drawn on pillows to help himself stay awake after seeing a scary movie without permission and being freaked out about it.

* In "The Price of Peace", Emilia Nighthaven struggles to build a better life for those who chose to follow her. Standing in her way is Gavin Magnus, the immortal former ruler of Bracada who was so traumatized by the destruction of Enroth that he has hatched upon an insane scheme to ensure nothing like that ever happens again by erasing free will, and his loyal servant the legendary genie Solymr.
* In the pricing game portions of the show, in the games One Away, Money Game, Pocket Change, Stack the Deck, Cover Up, and Pathfinder, a contestant has to guess each digit in the price of a car from a set of possible choices. If one of the choices for the last digit is 0, 5, or 9, nearly every contestant will choose that ending. While this usually was correct in the Bob/Roger era, the Drew/Mike era often uses these endings as incorrect "trap" choices in hopes that the player will pick them and lose. Temptation is a subversion to this, where the car

* In "The Protection Payment," pigeons Vinny, Joey, and Bobby engage in a string of rear-end based puns when their friend Kelvin gets stuck in a dumpster with just his bottom showing.
* In the PS2 game, it could also turn into a bike. In all games, it had smokescreen, machineguns, oil slicks, and a rocket launcher. The series is essentially a Bond Car homage.
* In the PS3 remake the final team arena battle pits you against the party members you don't currently have with you. Not only do they have boss class hp and stats now, but they break the party size limit to attack you with ALL unused members making the match 4 against 5. The party seemingly puts more effort in friendly arena match than against the guys that want to destroy the world.
* In the PS3 version at least: some venues have large props that the rockers sometimes stand on. There's one venue with lots of green lanterns that does not seem to have such a prop, but the game seems to think it does, so rockers will sometimes stand several feet above the stage.
* In the PSP remake of Persona, one of the tracks (Battle ~ Tesso) uses, among other things, car horns and mewling cats for "instruments".
* In the PSP remake, this is altered so that any of the female SEES members (Aigis, Fuka, Yukari and Mitsuru) can have the strongest bond with him and share the final scene with him, not just Aigis. The female can have Aigis or any of the male members of SEES (Akihiko, Ken,
* In "The Psychic," three men kidnap a teenage girl in a blue van. They have no intention of giving her back even if they get the money, so they abandon her in another van in a junkyard.

* In "The PTA Disbands", when Marge became the substitute teacher for Bart during the teacher's strike, at dinner, she describes her day as "Exhausting. It took the kids 40 minutes to find Canada on the map." To which Homer responds by also invoking this trope, commenting about how small and tucked away Canada is.
* In "The PTA Disbands", when the school loses its teachers and takes on large numbers of grossly unqualified substitutes, Jasper makes everything the kids might do punishable by "a paddlin'". This is a spoof of the
* In "The Public Relations Course", while spending the night at the house at which the title course is being held, Frank sits on his hot water bottle, causing it to spring a leak. He leaves the room to take a phone call, leaving the hot water bottle on a chair next to the bed of Eddie, a coursemate who has taken Frank under his wing. When he comes back, he accidentally squirts water from the leak into a militant coursemate's face, and in revenge, the militant empties the bottle all over what he thinks is Frank's bed, ignoring Frank's protests as Eddie returns from the bathroom. As Frank sheepishly gets into his own bed and wishes Eddie good night, Eddie attacks the militant for soaking his bed.

* In the Qing dynasty, all men were required to shave their forehead and wear the rest of their hair in a braid down their back. As this braid was not allowed to be cut, on punishment of death, this resulted in some impressive hair lengths. Women, while not required to wear the braid, were expected to keep their hair long as a sign of propriety; rich women often would wear wigs made of hair sold by poor women to make their hairdos even more elaborate.

* In "The Queen of Eight Legs", Mumm-Ra turns into a tiny female fairy called Diamondfly.
* In "The Queen's Justice", Daenerys Targaryen nostalgically reminds Jon Snow, who refuses to bend the knee to her, that Westeros was better off when it was ruled by House Targaryen, with House Stark as its loyal vassal, for centuries. Except those centuries were filled with civil wars, rebellions, and mad kings (including Daenerys' own father). At least she has the courtesy to apologize for the crimes her father committed against House Stark, though she remains adamant that a

Targaryen must return to the Iron Throne.

* In the radio version of a 7Up ad, Brad Garret is used to show how 7Up can turn someone who is a curmudgeon on the outside (expressing Sarcastic Joy) to happy on the inside (where he's singing his own version of "Everyone Knows It's Windy").
* In the Rage of the Firelands expansion, the reward for unlocking all the merchants and questgivers on the Molten Front is a Flameward Hippogryph, which has orange feathers and is on fire.
* In the Rainbow Galaxy battle, the Gamilons had a battleship/carrier that had a runway deck that flipped over to reveal laser cannon turrets.

* In the "Ran Girl / Shinichi Boy" arc, showing how Ran and Shinichi met as preschoolers, Shinichi notes several acts of favoritism towards Ran by their teacher, one of which was his reserving the naptime spot closest to the door for her. Shinichi inadvertently embarrasses Ran when the teacher explains that he was doing that to avoid a repeat of a previous accident. That however, was not the real reason, as the putting her close to the door was intended to

* In the realm of the Dragon Kings, beneath the sea, a day is equal to a year in our world.
* In the Realm of the Senses (1976): Infamous French-Japanese film about the historical nymphomaniac murderess Sada Abe. Banned in many countries, including Japan. Yet it received positive reviews from many respected critics, including Roger Ebert, and was added to the Criterion Collection.
* In the Realms of the Unreal and used those. His original nature settings (especially his amazing skies and flowers) were fine, but he couldn't draw human figures as well as he wanted, and he couldn't afford proper art training. What little spending money he did have, he used for editing the photos to his needs, including having enlarged photocopies made at the local drugstore.
* In the Realms of the Unreal has a hysterical escapade where the little princesses of Abbiennia sneak into a meeting of evil Glandelinian higher-ups and release a bunch of mice. The men shriek and cower and get up on chairs and tables.
* In the real world, the XANAfied people and Polymorphic Specters also leave such an after-effect when moving fast.
* In the Rebel starfighter corps, the Y-Wing is seen as this, in contrast to the newer, faster, shinier X-Wing. X-Wings are generally held to be superior fighters and fighter-bombers (although they aren't quite the Y-Wings' match in the dedicated bomber role thanks to the latter's heavier maximum payload), but there are never enough of them to go around.
* In the reboot, Annie, Silver, and Naomi appear in every episode. Adrianna misses one episode, while Dixon doesn't show up in three. Liam appears in every episode from his introduction towards the end of the first season. Navid tends to miss between one and five episodes per season, while the teacher Ryan missed episodes

regularly for his three-season run on the show (appearing in just half of season 3). Ethan appeared in every episode in season 1, and then
* In the reboot canon, Luke Skywalker never married or had kids, whereas originally, Luke married Mara Jade and the two had a son named Ben Skywalker.
* In the rebooted Archie Sonic run, Dark Gaia energy functions like this. Though it only appears at night, the gas induces aggressive tendencies when inhaled, best demonstrated when Sally and Dr. Ellidy lash out at each other over NICOLE.

* In the Red was a BBC miniseries about politics and publicity. One of the protagonists is the speech-writer for the leader of a minor political party — he mainly got the job because he has a degree in English, and fancies the leader's daughter, but is too nerdy to do anything about it. By the end of the final episode the leader is facing a vote of no confidence, and the speech-writer cannot come up with anything better than a frank and forthright apology for only doing his best in difficult circumstances. Immediately upon finishing recording this into his dictaphone, the daughter comes into his hotel room, and takes her top off. Cut to next morning, and an anonymous secretary quietly picks up the dictaphone from the bedroom floor, trying not to wake the sleeping couple. That afternoon, the leader gives his speech in a triumphal manner. After the words as dictated by the speech-writer, he carries on: "I want you to take me. I do. Yes. Oh yes. Oh yes!" It got a standing ovation from the party.

* In the regular game, Dark Eldar skimmers fit the trope to a T. Especially fifth edition ones released in November 2011.
* In "There is Something in the Woods", Eric Lewis, a hiker climbing Mount Rainier with two other men, was the last in line to be tethered to a safety harness, as they were exploring the mountain during a harsh snowstorm. When his two companions made it through to safety, they were puzzled when Eric didn't appear, despite having caught glimpses of him only seconds prior. When they get to his last known location, all they find is a cut tether, with his footprints just disappearing not too far. Later searches find his backpack and a snow shovel, but as for the man himself, there was no trace.

* In the Remastered version, she displays this attitude to Weiss and Ruby after they manage to outrank her during the first test, getting first and second place, respectively, while she got third.
* In the rematch against Ba'gamnan, he will only attack Balthier if he's in the party due to his hatred towards him.
* In the "remix" version a scene later, Elle reclaims her confidence with a much

more upbeat "I Am" song, in which she finally figures out an identity encompassing both her legal talents and her "sorority girl" personality, as exemplified by her pink suit.
* In the Remnant fairy tale "the Story of the Seasons," four sisters are gifted with incredible magical powers when they kindly help a reclusive Old Wizard. The powers the wizard grants them are the powers of the elements, with each sister coming to represent the four seasons because of the power the fairytale implies was given to her. Spring is implied to be able to make plants grow at unnatural speed, Summer can produce fire, Fall can produce wind, and Winter can create ice. The real Maidens that the fairytale is based on actually aren't restricted in what elemental powers they can use, although their individual personalities may make them favour one over the others.
* In "The Remote", Nicole asks Anais to tell her what brand their TV remote was, but it turned out Anais told her the name of a garage door opener which she saw an ad for. This was part of the episode ending's

* In the residential housing market, many sale contracts are conditional on the buyer's current home being sold. This means a situation can arise where the sale of a home is dependent on the sale of another home, which is dependent on the sale of another home, etc. making for a very long chain of held-up contracts. When the last seller finds a buyer who is not tied to selling a current home, the entire chain of contracts goes through very quickly thereafter.
* In "There's No Disgrace Like Home", Eddie and Lou take a bloodhound named Bobo into Moe's; Bobo quickly starts to bark at Homer (seeing as he's the criminal they're looking for) but Eddie and Lou are too dumb to get the point, and take him out.
* In "There's No Disgrace Like Home", the family is supposed to solve their problems with electroshock therapy. At the beginning of the exercise, Bart accidentally-on-purpose shocks Lisa, claiming his finger slipped. Lisa shocks him back saying, "So did mine."

* In "The Resurrection Gambit" (issue 57 of the US version, issues 243-245 in the UK version), a damaged Megatron proclaims his identity in front of an empty (Cybertronian derelict) and the empty replies "Yep, an' I'm Lord Straxus.."
* In "The Resurrection of Papa Voudou" the villains tell Conrad that Adam can be saved... if he helps them evoke the powers of Chaos.
* In "The Resurrection of Papa Voudou", the zombified Papa Voudou cannot be harmed by bullets or melee attacks, so Vampirella kills him again with the fire on a brazier.

* In the Resurrection series of tales, Foundation agent Andrea Adams uses a unique combat suit made using anomalous technology. Despite being skin-tight the suit makes her immune to heavy machine gun fire (though the force of impact still sends her flying), lets her wield a 20mm
* In the retro point-and-click adventure "simon the sorcerer" on Simon's birthday a Dog arrived at his house carrying a Book adorned with unreadable symbols (It later turns out to have been calypso who was giving these to simon so he could rescue him). He shoved the book in the attic, thinking it worthless, and adopts the dog as a family pet. Later on the dog goes into the attic grabs the book and gives it to simon, who to his astonishment, can now read the book, but still thinks it's garbage and throws it over his shoulder. This triggers a portal to open to the magic kingdom where his adventure begins. Most of this occurs in the back-story (which is in the manual) and doesn't appear in the game

* In "The Ride In," a man dressed in a cigarette costume died because he'd been set on fire and, ironically, his outfit wasn't flame-retardant.
* In the Rider-Waite Tarot deck, the Fool (Card 0 of the Major Arcana) carries a bindle stick.
* In the rifle market, many manufacturers sell guns advertised to be as close to military-grade as possible while still being legal. Few mention that this isn't really a good thing unless you happen to be a collector. Military rifles have loads of features that are basically useless for civilians (bayonet lugs, for example - if they aren't illegal on their own where you live, actually attaching a bayonet to them very likely is) and often lack features civilians would find handy (cheek rests, adjustable stocks, higher and more consistent accuracy). This is because they are either making the guns from the same machines they use for military orders or building them from surplus parts, slapping in a semi-auto-only trigger group, then jacking up the price on the assumption that the buyer won't know better. Back in the day when stocks of military surplus rifles were high, it was common for them sell about half the price of civilian rifles of similar capabilities. Now it's common to find military style rifles that sell for twice as much as a "sporterized" version of the same platform. Keep in mind as well that these are weapons designed for use by the military - the military that wants to save as much money as possible when they're buying weapons to arm hundreds of thousands of soldiers. There's an important distinction to be made here: something built to military
* In the right conditions they can be surprisingly effective, to the point that the final phase of the Chadian-Libyan Conflict is named "
* In the right doses, the right drugs can induce a psychotic episode, which can lead to explosively violent outbursts. However, the victim is just as likely to pass out, have a heart attack, or go on a bad acid trip instead, so the effect can't be used reliably as a weapon.
* In the Ringo region of Wano, people are traditionally gifted a katana upon birth, and it's used to mark their graves when they die. Kawamatsu removed them from their graves and gathered them up to serve as an armory for the rebellion against Kaido. Prior to this, grave robbers had been constantly trying to steal the valuable swords.
* In "The Rings of Akhaten", the theme is "Ancient Egypt in Space", with a pyramid, an alien marketplace, and a hokey religion based around a Pyramid and a god known as "Grandfather". When the Doctor and companion Clara arrive, the people of Akhaten appear to be worshipping an alien mummy as this "Grandfather." Turns out
* In the Rio de Janeiro subway system there's an underground semi-made station between two active ones which is very visible as a gigantic cave for whoever goes through that route. * In the runup to the Six Days War, Nasser was either intentionally provoking Israel or blustering to look tough. First he called for an end to the UN mission acting as "buffer" between Egypt and Israel in the Sinai, then he started mobilizing troops, ostensibly in preparation for war - all while saying stuff like "We'll destroy Israel" on the radio - and ultimately, he closed the Straits of Tiran,
* In the rural parts of the Soviet Union (often without plumbing) would use the same sorts of books on communist theory as toilet paper. People in the cities also used these as emergency toilet paper when there were shortages, but you couldn't flush them down the toilet when done. Soldier often did the same with unneeded documents, sometimes of a classified nature. The CIA ran a reportedly very successful program that involved taking these documents out of the trash or latrine and cleaning the shit off of them.

* In the Russian tale "Seagull Princess", a prince discovers a lady's portrait in his best friend's room, falls in love with it, and immediately tries to kill his friend, believing it's his fiancee's portrait. Wrong: It's his sister's actually, and he'll introduce her to the prince at soon as possible.
* In the Russian version of the game, Shepard is referred to as "Captain". This has to do with the fact that Russian Navy equivalent of a "Commander" is a "Captain, 2nd Rank", the short form of which is just "Captain" (similar to the short form of "Lt. Commander" being "Commander").
* In the Russian war movie Август Восьмого (August Eighth), the Georgian soldiers all wear balaclavas with tinted goggles. Meanwhile the Russian soldiers all have unobstructed faces.
* In the S2 episode "Safe", however, they battle in an ongoing prank war like a couple of overgrown frat boys. House tricks Wilson into doing the dishes House had promised to do, locks him out of their apartment for hours, and puts Wilson's hand in warm water to make him pee himself. Wilson gets the last word by sawing halfway through House's cane, so that it dumps House on his ass in the middle of a crowded hallway - and even House
* In the S9 flashbacks, Agents Maine, York, and ultimately Tex give Grif a run for his money. It takes a whole Warthog full of balls to catch someone falling off a building in your car, about as much to ram a truck that your buddies are fighting on with said car, but what Tex can do on that motorcycle probably violates laws of physics.

* In the same episode, Saeko and Rei Miyamoto wake up embracing each other in the nude and passionately kissing, each having hallucinated that the other was Takashi. It's never explicitly stated whether they had sex either, but they also decide to pretend it didn't happen.
* In the same episode, Sam and Max find Flint Paper in Stinky's Diner ready to eat a plate of spaghetti. If Max uses his physic abilities, he predicts Flint will collapse onto the table dead with a hatchet in his head. The solution is to give him a miner's hat and get him to wear it while eating. The player's reasoning would most likely be that the hatchet hits the hat without harming Flint. What actually happens is that the light on the hat illuminates the peanuts in the tomato sauce and he gets up to complain, causing the hatchet to miss him.

* In the same episode, the Dalek-built Void Ship (that created the tear between realities) was designed to traverse the void, or the extradimensional space between

universes. When it was in void transit mode, it was visible, but otherwise didn't exist (scans reported it as having no mass or dimension), and was described as creepy to look at. When the void transit functionality was switched off (just prior to the Daleks emerging), it "became" a normal vehicle with normal mass/etc.

* In the same film, however, Goldfinger plays the trope straight in dealing with his gangster accomplices. While he is showing them his plan with an elaborate

miniature Fort Knox, one gangster demands to leave and take his gold with him. They load the gold in a car and Oddjob drives him away, ostensibly to the airport. Oddjob kills him as soon as the gangster notices they aren't heading to the airport. Instead of just dumping the body, however he takes the car, with the body in it, to an auto yard where it is cubed. He then returns to the farm where Goldfinger says they will have to extract the gold from the car. The kicker is that, after that gangster left, Goldfinger had the room sealed and all the other gangsters gassed to death anyway. So why not just excuse himself for a minute, leaving that one guy with the others and kill them all at once as he had already planned to do, instead of destroying a car for no reason (and even then, why not just take the gold out of the car
* In the same film, Spock argues that Kirk accepting promotion is illogical ("a waste of material") because he makes a better starship captain than an admiral. In most scenarios, choosing to do what one loves over accepting a higher rank is presented as the "emotional" response.

* In the same game, Mimics can disguise themselves as asteroids or even enemy ships. Though they made effective scouts, it was quickly discovered that these ships made very effective kamikaze attacks, since they could disguise themselves to get close enough to an enemy ship without raising suspicion. Especially since Mimics were usually crewed by those who have lost their entire family in the Kharakian Genocide and thus had nothing to lose. Cue the Quantum Explosives research option whose description states that while building a dedicated kamikaze ship is a regrettable thing, the command staff finds peace in the thought that their brothers and sisters took the maximum amount of enemies with them.

* In the same game, one of the potential NPCs who can join your party is Viconia, a member of the evil drow race forced to flee from her home in the Underdark and live in exile on the surface. Despite an otherwise perfect setup for a 'hatless' existence, she specifically states that she is still power-hungry and a murderer and spends most of her time trying to convince the PC to give in to their murderous nature in order to exploit their godly power. And yet, if you enter into a romance with her, at one point she reveals that the reason she was exiled in the first place is that she was verging on being a paragon of morality among her kin - that is, while she was perfectly happy to murder and kill in the name of her evil religion she didn't want to sacrifice children on the grounds that they were worthless as sacrifices, and only represented unquestioned subservience to her spider-goddess rather than a valuable offering. If you continue the quest to its completion, you find out that she loved her brother (love supposedly an emotion alien to the vicious drow culture) and will eventually renounce her evil ways for the love of the PC, dropping her firmly in this Trope.
* In the same game, our hidden-blade-equipped player characters from the period get into a fight. One receives a stab wound through his wrist and ends up being forced into fighting with just a sword. He's still formidable, but when both combatants are stunned by a nearby cannon blast and end up grappling with each

other, he is forced to use both hands to try and strangle his opponent and is thus vulnerable to a throat stab.
* In the same game, Scooter makes a pretty obvious, humorous euphemism for sex, and after a brief pause blatantly says, "That's sex."
* In the same game, Sora and Riku's friendship is severely jeopardized after Riku starts falling into darkness. It starts to get worse in the Monstro world and then in Neverland when Riku starts siding with Maleficent's council of villains. Their friendship bitterly ends when Sora reaches Hollow Bastion after Riku confiscates Sora's Keyblade. It is revealed that Riku was manipulated and eventually possessed by Ansem, Seeker of Darkness and after Ansem's defeat, Riku reverts back to normal. Sora and Riku fully reconcile in the sequel.

* In the same game, the "Dreamwalker" archetype for the Witch class takes its inspiration from hags in general and night hags (based on the "night mara" and similar nightmare-inducing she-demons), as well as being a specific archetype of the witch class for changelings (which, in Pathfinder, are the infantile form of hags).
* In the same game, The Institute's enemies, the Brotherhood of Steel has a couple figures who also fill this role: Quinlan (who tries to recreate old tech by retrieving documents from before the fall), and Neriah (who works on radiation therapy drugs with ingredients form the bodies of dead organics).
* In the same game, there's also the "Sonic Gun Slinger" mini-game, which takes place at a saloon, and has the same western leitmotif as the background music. Sonic and his friends, who are all dressed in cowboy hats, must shoot the gunslinger targets, whilst avoiding shooting the lady targets. There's also an Eggman target, which takes more than one hit to kill and can shoot back.
* In the same game, there's the Namazu, which are a beastmen race that are modeled after catfish . Their googly eyes, short and chubby stature, doofy personalities, and the squeaks they make when they waddle make the Namazu ridiculously cute. There's also merchandise made after them.

* In the same novel, Anton is nearly killed when a high-level earthquake spell is used against him. The kicker? He's driving in the middle of nowhere. No one should be able to know here he is. Then he realizes that the bad guys are tracking the GPS chip in his cell phone. Luckily, Geser foresaw this and gave him an enchanted SIM-card that throws off the GPS coordinates enough for any spell to miss by a few miles.
* In the same novel, Hermione blushed whenever she talked about Viktor, or whenever someone called out her out-of-character behaviour in favour of him.
* In the same novel Ser Uthor Underleaf suggests that he does this all the time. He's an incredible jouster, but never wins any tourneys because he bets on himself (with long odds) until he decides to lose (and then he bets on the other guy). If he actually won, he'd become more famous, and he'd never get those long odds again. This trope backfires on him as well when he finds himself up against a genuinely dangerous opponent in his last joust. Unaware that Ser Uthor was planning to lose, some other contestants decided to take him out of the running.
* In the same novel, the Ghosts were barred from using their flamers by the planetary government. This was partly because most of the city was built out of wood, but mostly because the use of flamers was reserved for their own elite forces.

* In the same series, there's also Chiharu who acts as Hayate's kind, caring mother-figure, and also insists that she's going to be Hayate's bride some day.
* In the same series, there's also Iok Kujan, a recurring antagonist throughout the second season who, time and again, gets away with general asinine behavior and

out-and-out war crimes mainly because his subordinates sacrifice themselves to save him and because he happens to be part of a high-ranking family within the organization Gjallarhorn, all of this despite being known to virtually everyone as a total incompetent. These actions include the awakening of the relic mobile armor Hashmal, which then rampages around Mars for a while before being destroyed and getting tons of innocent people killed, then orchestrates the death of Naze Turbine and his wife Amida Arca—who are both mentor figures and close friends of the main protagonists in Tekkaden—for using an illegal weapon to destroy Hashmal by using those same illegal weapons, which also leads to the murder of another friend and ally of Tekkaden. He finally gets his comeuppance in the last episode when, seeking glory like he always does, he moves in to kill Mikazuki and Akihiro while declaring his name so that everyone knows who he is when he does it. Akihiro happens to have been particularly affected by Iok's actions and gets a second wind which allows him to kill Iok in a particularly brutal way.

* In the same vein, advanced nuclear fission reactors (such as Gen IV reactors) may fall in this. Their benefits are great: they produce more energy with less fuel and produce less dangerous waste. Some designs eat the waste of the widely deployed Gen II reactors and some are essentially meltdown proof. But with events like Three Mile Island, Chernobyl, and Fukushima, it seems the prospects of nuclear energy have gone down the tubes in several countries.

* In the same vein as online ads, do an online search for Facebook's "People You May Know" feature and you'll find that the results are full of complaints, people asking how to get rid of it, accusations of how intrusive and creepy a feature it is, people lamenting it being full of nudity and/or scammy "looking to date you" bot accounts, and people making the salient point that they don't want or need a website's algorithm to tell them who they know and want to be friends with. It seems that Facebook is willing to fight to the absolute last man to force the feature on people, while people are so desperate to get rid of it that several dedicated browser add-ons exist for the explicit purpose of getting rid of it

(Facebook Purity being the most popular). Both Facebook and these add-ons are being tweaked and updated
* In the same vein as the Rhino, the Predator MTB (which is based off of the rhino chassis) is overshadowed by the insane durability of the Land Raider, the demolisher cannon of the Vindicator, the anti-air array of the Hunter and Stalkers, and the sheer dakka of the Thunderfire Cannon. However, if you need a job done, no other tank in the space marine arsenal can do it better or cheaper. Armed with either 3 sets of Lascannons, an autocannon and 2 heavy bolters, or a combination thereof, the Predator can bring a lot of firepower for a pittance of a cost, and with the 7th Edition Marine Codex allowing for vehicle squadrons you can bring up to
* In the same vein as the tank, but going back even further, ironclad warships brought the same defensive powers to naval warfare, with cannonballs simply bouncing off their armour plates. Since they were armed with those same weapons, the first few duels between these ships were all draws. For a brief time, when two ironclads fought, neither ship could hope to harm one another. There was, in fact, a short period around that time when the idea that due to the ineffectiveness of cannons,

* In the same vein, Cohen and the Silver Horde (a group of octogenarian barbarian heroes) carry notably notched and beat-up swords that are STILL sharp enough to cut a die in half in mid-air. At one point, Cohen internally reflects that a simple, plain non-magical sword in the hands of a truly brave man will cut through a magical sword like suet. He's reflecting on this fact while looking at

This was due to the fact that in the middle of a battle on a ship at sea, reloading wasn't an option, so you had to carry multiple guns if you wanted to have more than one shot, and have a backup for when you run out.
* In the same vein, Old Spice as of 2014 has been running "Old Spice made a man of my son" spots, in which older women tearfully and creepily stalk younger men while lamenting that their son's use of Old Spice has resulted in women being attracted to him. A few show the fathers as well, who seem more approving, if only in a "now maybe he'll
* In the same vein, people with mental illnesses often identify with Elsa's journey. Director Jennifer Lee has described "anxiety and depression" as major themes of the film, and while she didn't necessarily mean "clinical" anxiety and depression, the applicability is still there. People with disorders such as schizophrenia or bipolar disorder can also relate to her, as they deal with the

fear of having violent psychotic episodes and hurting loved ones as Elsa fears hurting Anna and others with her emotion-fueled ice powers.
* In the same vein, Ray's speech patterns can be a bit awkward, he can apparently repair a massively ruined car in less than 24 hours, his behavior is very childish and immature, he also fixates strongly on specific interests (the paranormal), and he frequently speaks with his hands while talking — though this one might just plain be an unspoken case of autism, as

* In the season 3 premiere, kills a vampire who he then realizes was Elisabeth, who, with her boyfriend James, were friends with Angelus and Darla for a time. James decides he has nothing left to live for other than revenge against Angel and undergoes an operation in which his heart is removed, guaranteeing he will die in 24 hours, but rendering him invulnerable until then.
* In the Season 3 premiere, Morgause and Cenred are discussing storming the castle, which Cenred points out is near suicidal, since Camelot is well equipped for a siege and he has only so many soldiers. They only go ahead because they have
* In the season 3 premiere, O'Neill uses this to try and convince SG-1's captors

that he was still implanted by Hathor's Goa'uld larva. Although in this case he knew it wouldn't work for very long, he just needed to buy time for
* In the Season 3 premiere the cast hosts a festival for the Crystal Ponies based on information found in a history book. The book lists the centerpiece of the festival the "Crystal Heart", so Twilight carves one... only to find out later that that Crystal Heart is a magical artifact that's kinda important: it can protect the Crystal Empire from being enslaved by an evil unicorn, who's currently knocking on the door. A good chunk of the premiere from that point on consists of the cast trying to keep everyone away from the fake heart while Twilight and Spike try to get ahold of the real deal.
* In the Season 3 premiere we see Stefan torturing a werewolf by chaining him to a wall over a dart board and throwing darts at him that have been dipped in wolfsbane.
* In the Season 3 premier, Rick telefrags an entire space station... within another space station.

* In the season 4 episode "Rarity Takes Manehattan", Rarity is basing a new fashion line on a new fabric she designed, but she lends some of the spare fabric to her old friend and fellow designer Suri Polomare, who uses it in her own fashion line, so Rarity will look like she's copying Suri instead of the other way around. Realizing that she needs a new style immediately, Rarity scavenges her hotel room for material (curtains, carpets, lampshades, couches). Since she's Rarity,
* In the Season 4 episode "The Chrysanthemum and the Sword", Sally asks her babysitter, Don's neighbor, if she and Don are "doing it", and says she knows that the man pees inside the women.
* In the season 4 episode "Threshold", during a flashback, it is shown that Teal'c subjected Apophis to one by allowing Valar, someone Apophis had ordered Teal'c to kill, to live and lying to Apophis about it.
* In the season 4 finale, "Bid Daddy Calling", Albert makes the fatal mistake of visiting a casino he had been banned from years ago. When an old friend inadvertently reveals this to the casino's new owner, mafia boss Johnny Maranzano, Albert is beaten up for disrespecting his father's ban against the grifter. Upon hearing of this, the crew rush to Vegas, with Danny intent in making Johnny suffer by hitting his prized gem — a fruit machine made in tribute to his late father, which holds a $5 million jackpot. Despite tough security measures, the crew learn that the weak point is a large fish tank which is housed in front of the safe holding the jackpot, allowing it to be seen on display. Danny learns that while the heist must be perfect, they must also outwit Johnny's mafia connections, as it will spell trouble for the crew if they are caught.
* In the season 4 finale, Jerry, wearing an invisbility belt, puppets a corpse to convince her friend that she's still alive. It works for a bit until Jerry slips and reveals himself.
* In the season 4 finale, Keamy criticizes Richard for shooting him in the back (which also wasn't effective because Keamy was heavily armored.) Richard hadn't had a choice, though, as Keamy was grappling with Sayid at the time.
* In the Season 4 Finale, Lord Tirek can directly steal a pony's magic entirely, in turn stripping them of their cutie mark and strength. He can even do this to

* In the Season 5 episode "Here Comes the Neighborhood" the town goes on a crusade against rich people, called "richers", all of whom happen to be black. It's subverted at the end when all the rich people have left and some Aesop was delivered, and Mr. Garrison says "Well, at least we got rid of all those damn ni-
* In the Season 5 episode "JSS", the Wolves attack Alexandria, forcing their way over and through the defensive walls before brutally killing everyone they can find. The survivors, with Morgan and Carol leading the charge, eventually manage to force them back, but not without massive casualties.
* In the season 5 episode "Rosebud," Burns and Smithers are discussing the preparations for Burns' upcoming birthday:
* In the Season 5 episode "The Warrior", K'tano (ostensibly the leader of an army of rebel Jaffa, formerly the first prime of the minor Goa'uld Imhotep who he killed), sends Teal'c on a suicide mission against the System Lord Yu. Yu captures Teal'c and spares him, allowing him to return to the rebel army and inform them that "K'tano" is not a Jaffa at all, but is in fact Imhotep himself, trying to build himself a power base with the free Jaffa. He was hoping Teal'c would get himself killed to prevent his eventual exposure as Imhotep.
* In the season 5 episode 'The Weight of the World' when the line between Ben and Glory starts to blur, Ben remembers all the people Glory killed as if it were him doing it. He stares at his hands and asks where the blood is, saying he can still feel it.
* In the Season 5 episode "Vault of Bones", Flame Princess rescues a captive Finn, after authoritatively commanding the dungeon's final boss to release him and do the splits. "
* In the Season 5 finale, although having ulterior motives of stopping Mane 6 from ever befriending one another, Starlight Glimmer does save past Fluttershy from the

bullies and preaches to Twilight how in her utopian society of equality (which Twilight helped destroy earlier) Fluttershy wouldn't have been bullied in the first place. Twilight, while admitting that's not exactly a bad thing to strive for, quickly turns the tables back by pointing out the aforementioned ulterior motive.
* In the Season 5 finale, Nick is kidnapped and buried alive. The character is supposedly in mortal danger, but George Eads was under contract so he not-so-shockingly pulled through.
* In the Season 5 finale, Red John is able to do a few things that should be impossible; he accesses a memory of Jane's that Jane had never shared, and he demonstrates that he knew who would be on Jane's final list of Red John suspects months before Jane actually created said list. How all of this was accomplished is never established, and the entire thing is
* In the season 5 finale "The Cutie Re-Mark", Starlight Glimmer has a
* In the Season 5 finale, this turns out to be Thawne's plot: Cicada's power-dampening dagger was being used to imprison him, so he tricks Barry and the others into destroying it in the past, thus freeing him in the future.
* In the season 5 finale where the bar the CSIs are sitting in is shot to bits. It's mainly a result of the villain shooting anywhere and everywhere with some kind of automatic weapon and Danny, who was sitting closest to the window anyway, having thrown himself over Lindsay to protect his wife, leaving his back exposed.
* In the Season 5 premiere, agents of Gran Colombia assassinate the President of Panama right after he meets with Sasha's team. This allows them to frame the US, turning the rest of Latin America against them and serving as a justification for Colombia to launch an airstrike to destroy the newly rebuilt American fleet.
* In the season 5 premiere, Cyril out of the blue reveals that he is a former

* In the season 6 finale, a sheriff's deputy at the courthouse turns out to be a loyal member of the 308s, a group of radical sovereign citizens, and helps Heather Strout smuggle a bomb into the building.
* In the Season 6 finale, Cersei has managed to eliminate all threats to her rule in King's Landing, and the suicide of her son means she now sits on the throne. However, her actions have alienated pretty much every ally the throne might have had. The Reach has sided with Dorne and Daenarys Targaryen in retribution for the deaths of most of their family line. House Bolton has been extinguished by the joint forces of surviving loyal Northern houses under Jon Snow and the Knights of the Vale, so the North is in rebellion once more. Walder Frey and his male descendants have been assassinated by Arya Stark, freeing the Riverlands from the Freys' control. Finally, the last Targaryen is coming to Westeros to reclaim her right for the Iron Throne. Cersei will be hard-pressed to retain her power in such a climate. However, as of the Season 7 finale,

* In the Season 8 episode "The Itchy & Scratchy & Poochie Show," the

introduction of the character
* In the season 8 finale, all of the magic goes away. It is very nearly banished to a dimension of nothingness. Considering how much Equestria relies on magic, the implications are disastrous. Worse yet implications arise when you realize that the only thing keeping the Crystal Empire from freezing is magic...
* In the season 8 finale, Blue Team helps Agent Washington escape imprisonment and offers him a place in their ranks, in spite of everything he put them through beforehand. This touches him so much, he solidifies his
* In the Season 8 mid-season finale, "How It's Got To Be", the Saviors assault the Kingdom and Alexandria, seizing control of the former and
* In the Season 9 comic, "Women of a Certain Age" two panels juxtaposed, each panel showing one of Giles' aunts, with opposing views of how they feel about Angel trying to resurrect Giles. One thinks he really will succeed and one of them thinks he shouldn't try because he wouldn't.
* In the Season 9 episode "Gnoman Holiday", Julius Geezer has his victims be thrown into the coliseum to deal with the Felions.
* In the Season 9 premiere of, a storm has taken out the bridge, stranding everyone in the mansion, there's no cell reception, and the landlines are dead.
* in the season 9 premiere, where Sam is dead and asks to not be able to be resurrected again. Death is so proud of them because even though they've messed up the natural order, they've stabilized it more often than not and they've reduced his workload by saving millions of people and even freeing Death himself from Lucifer's binding.
* In the Season 9 premier, the team and Bra'tac successfully use the ring transporters to send a bomb to an Ori mothership. After several seconds nothing happens, and they note the bomb should have gone off by now. No definite reason for why is ever given, but a subsequent episode (see below) suggests a Prior used his powers to stop it from detonating.

* In the season four episode "Ready or Not," Holmes and Watson look into a missing doctor named Vincent, whom they determine was a survivalist renting space in a doomsday bunker, run by a former Marine named Ronnie Wright. When they visit the bunker, Holmes determines that the bunker is an ill-prepared fraud, and finds a bloodstain belonging to Vincent. Ronnie Wright admits to disposing of the body, but claims he couldn't have killed him, because a bad rotator cuff prevents him from swinging a weapon overhead. He admits that he was injured while on his high school swim team, and that he was
* In the Season Four mid-season finale, Barry himself ends up framed. Clifford DeVoe, AKA "The Thinker"
* In the season one episode “Coming of Age”, Jake, a friend of Wesley Crusher’s, steals a shuttlecraft after he learns he got passed up for Starfleet Academy and couldn’t bear confronting his dad. His flight path sends him towards a planet and threatens to destroy the shuttle and kill him, but Picard is able to talk him through to save his life.
* In the season one episode "Flight Risk", Holmes and Watson investigate a plane crash. After determining that one of the victims was dead before even boarding the

plane, they look into a man who was seen in a photo arguing with the victim outside of the hanger, whom Watson notes has an insulin pump. When they speak to this man, they determine by the way he fumbles around with his pill bottle that he is not capable of beating a man to death.
* In the season one episode "One Way to Get Off", Holmes and Watson look into a series of deaths matching the MO of a convicted killer. They find a suspect, a
* In the season one episode "Operation Ruthless", Helga attempts to sabotage Arnold's chances of getting paired up with Ruth in the Tunnel of Love ride, she fails despite her efforts to get paired up with him and ends up with Brainy instead.
* In the Season One episode "Snow Fall", Emma inquires as to what Mary Margaret is doing out so late and Mary Margaret answers "I'm a teacher, not a nun. I was on a date." Mary Margaret was a nun in the original pilot script before being changed to a schoolteacher during production.
* In the season one episode "Tom's Rhinoplasty". When Mr. Garrison comes back to school, Wendy is relieved because she thinks that means the end of the class's substitute teacher Miss Ellen. Cue the happy fanfare music. Then Mr. Garrison announces he's quitting his job as a teacher. Cue fanfare music deflating like a tire.
* In the season one episode "Which Prue Is It Anyway?", Phoebe tries to color-coordinate a trio of Prues (Real Prue = black sweater, Clone 1 = pink sweater, Clone 2 = blue sweater).
* In the Season One finale, a troll kidnaps Sabrina in order to force her to be his bride, he locks her in a tower and its up to Harvey to save her. In true Rapunzel fashion Sabrina casts a spell to make her hair absurdly long and Harvey climbs her tresses in order to get into the tower.

* In the season seven episode "Time For A Wedding" Dean called the trope when trying to talk sense into a love-potioned Sam with the line:
* In the season seven finale, the UnSub sang "Ring Around the Rosey" in a creepy voice to a young child. A crayon was also used to acted out the song, with the spinning in circles and carefully laying down the crayon made it that much creepier, never mind that the child was
* In the season seven Thanksgiving episode the gang play a game where they try to list all 50 states from memory in one minute. Ross only manages to come up with 46 during his minute and bets that he can remember the other four before dinner or he doesn't get any of the meal. In the early hours of the next morning he shows up at Chandler and Monica's to hand over his list and tuck into the leftovers...which is when Chandler tells him he still only has 49 states. Ross decides he doesn't care anymore and keeps eating while Chandler goes back to bed.
* In the season six episode "And Maggie Makes Three", when Homer is telling the story of Maggie Bart takes over and Homer's head explodes after being told he was going to have another child.
* In the season six episode "Bart's Comet", the "Only Bridge Out of Town" is blown up, leaving the sign reading "BRIDGE OUT".
* In the Season Six episode "Nightwalkers", Carter, Teal'c and Jonas Quinn show up in a small Oregon town, all three wearing long, dark leather coats. Way to go, guys, could we look any MORE threatening and sinister?

* In the Season Ten episode "The Wizard of Evergreen Terrace," Homer tells Lisa and Bart to go upstairs and spank themselves. They grumble about Homer's laziness as they dutifully march upstairs.
* In the Season Three episode "Phone Home", Professor Martin Stein is revealed to have built a communicator capable of broadcasting through time so that he can keep tabs on his pregnant daughter, who is about to give birth to his first grandchild in 2017. There is a good deal of urgency about getting him to the hospital in time to be there for the birth, despite his living on a ship that travels through time.
* In the Season Twelve finale, the Winchesters trap Lucifer in an alternate universe, and this is treated as
* In the season twelve opener, Drew wakes up hungover in his basement after a
* In the season two episode "Acts of Sacrifice", the race known as the Lumati treat sex as casually as they do handshakes (as noted by Dr. Stephen Franklin).
* In the season two episode "Dead Clade Walking", Holmes and Watson investigate a death related to a fossil that would prove the theory that dinosaurs survived the K-T meteor impact. Holmes rounds up skeptics of this theory, asks them for DNA samples, and the match turns out to be a wheelchair-bound man named Andrew Donnelly. Gregson is skeptical how this is possible, and the man is further exonerated by his lawyer providing an airtight alibi. Turns out the real killer is the museum curator Holmes and Watson met earlier, who co-authored a book with Donnelly, and they both had used the tool that was the murder weapon.
* In the season two episode "The Many Mouths of Aaron Colville," Holmes and Watson look into a number of bite-related deaths, with teeth marks that match that of a killer who died in prison. After determining that this is because the killer's teeth were a model for the dentures, they investigate the dental assistant named Divac, a sex offender taking chemical castration. Watson determines his innocence by noting that a mirror was shattered at the crime scene and the blood was not the victim's. If this had happened to Divac, his bones - brittle from the treatment - would have shattered.
* In the season two episode "TOW The List", Ross decides to dump Julie for Rachel after (under Chandler's advice) making a list of the two women's positive/negative traits. He (actually Joey) announces to Rachel that he broke up with Julie, and they officially hook up. Only for Rachel to notice the list on Chandler's computer, read it and misinterpret it as a list of reasons why Ross doesn't want to be with her,
* In the season two premiere "Scary-oke", Dipper accidentally summons a swarm of magically-animated zombies with a spell he finds in the journal. These zombies are the Flesh-Eating type, gaunt cadavers in various states of decay who attack the living and can spread

* In the second arc, Jenny Sparks mentions how Earth cut down all connection with the alternate Universe, The Sliding Albion, after the First World War erupted there. Characters from Albion mention briefly that between that event and Albion's invasion on Earth, that world has seen
* In the second arc, Kanon is killed right as he's about to tell Jessica his real name.
* In the second arc, the IceWings and NightWings hate each other because the IceWings think Foeslayer, a NightWing, kidnapped their prince, and their child, Darkstalker, killed that prince. Meanwhile, Darkstalker hated the IceWings because the prince, his father, was abusive toward him and his sister. When he is reawakened after two thousand years, he creates a plague to infect almost every living IceWing in hopes of getting them all killed. This drives the IceWings to attack the NightWings , who know the plague is an attack on them. This leads the NightWings to hate them more due to the attack. In the end, the fight is only stopped when a spell is cast to allow the dragons on both sides to understand the other tribes' feelings and see them as equals, rather than a faceless enemy to be fought.
* In the second arc, the reason Aureolus missed Touma with his first two attacks or how Stiyl survived is not explained in the anime. In the novel, Stiyl explained that he was still alive after being flayed and used heat mirages to throw off Aureolus' aim; this caused the alchemist to doubt himself and made it impossible for him to fully control Ars Magna. Stiyl used the opportunity to restore his body.

* In the second book a seed man is bitten by a zombie and his seed is excised before the infection kills him, the excision killing him instantly. Later, after the group discovers that some zombies retain their sentience and memories of their old life they run into him, which results in there being two of him once they plant his seed.
* In the second book, it is revealed that Grey Court (Dracula style) vampires were originally created as this — or rather, as super soldiers — by the Atlantean Empire during their war with the Deviants, when they got desperate. Since they turned to a
* In the second book, it is revealed that some of the zombies are actually pretty intelligent, possibly because they are getting smarter. They know to stay out of the cold or wear parkas stolen from others, can handle weapons such as rifles and knives, and even have a way of communicating with each other. They can even lust after each other. They seem to be just as smart as normal people, but are unable to speak, and have a taste for human flesh.
* In the second book, Lucky challenges Snap to a fight so he can rise in the pack and take over as a hunter. Snap turns out to be stronger than she looks, but Lucky wins through taking advantage of this trope. He bites her ear so viciously that Snap has to call mercy for him to stop. Later in the fight, he gains the advantage by biting at her injured ear and pinning her down. Lucky wins because Snap's legs aren't long enough to reach his underbelly and push him off.

* In the second book, the memory of Tom Riddle makes a passing mention to “werewolf cubs”. When werewolves are actually introduced in the next book, their condition is analogous to a blood borne disease such as HIV and there are no cubs. The only major werewolf character has a child who didn’t inherit it. Although he later uses the term again in the seventh book in way a that’s clearly meant to be offensive and not factual so, in context, he might have meant in the same way in the second.

* In the second episode, after Baikinman defeated Anpanman with his cloud, three rabbit kids (Pyonkichi, Usao, and Usako) saw Anpanman on a tree and he needed a way to get back to Uncle Jam's bakery since his head got bumped. They decided to take apart their unicycles to created a tricycle for him to get there.
* In the second episode, Andre wants to find some black friends for his son due to fears that he's not "black enough." He drives up to a bus stop where some teenagers are and asks them if they like chips and soda. When they get suspicious, he says "Nothing weird. Just looking for some young black boys to bring back to my house". When a woman nearby starts calling the police, he realized
* In the second episode, Cartman gains a lot of weight, and his voice gets deeper (and thicker).
* In the second episode, "Getting Settled", Mr. Drysdale's secretary Miss Hathaway concludes they're the Clampett's servants (that is, their own servants). She even tries to fire them!
* In the second episode, Hoobler decides to run out in the middle of gunfire to raid a dead German soldier looking
* In the second episode, Jan Valentine tortured a Hellsing employee and forced the poor man to read an incredibly crude and violent rape threat to his boss Integra. At the very end of said threat comes the part where Jan sets the guy up to read about how Jan is about to kill him, after which Jan will shoot him. The unfortunate employee realizes what is about to happen at the last second and has a moment of panicked horror before Jan kills him.
* In the second episode, Julia and Tiberius are unhappily married. When Julia wants sex:
* In the second episode, Kes asked for soil samples to help her in setting up a hydroponics bay. Hydroponics is the means of growing plants
* In the second episode, Martin Stein introduces himself as "Professor Elon Musk". Naturally, he couldn't very well introduce himself as "Martin Stein", since he was talking to his younger self.
* In the second episode, MR. Carlson is looking for a cheap publicity stunt to help get the word out over WKRP's change in format from adult contemporary to rock & roll. When a group of senior citizens show up to protest the change, Andy notifies the local news media, telling Carlson that the protest going on is publicity - and it's free.
* In the second episode of "Imaginationland", the episode begins with Butters safe back home. But then he wakes up and realizes he's still in Imaginationland as it's invaded by imagination's most vile creatures. The mayor explains he peed his pants and fainted.
* In the second episode of Season 2, Queen and Roko (just Queen in the Manga version) become really fat and round from
* In the second episode of Season 5, Amy Farrah Fowler is playing the harp and singing "The Girl From Ipanema" when Sheldon pays her a visit.
* In the second episode of the series, "Beast Island," Glimmer, Bow, Madame Razz, and Battlecat manage to make it to Beast Island to save He-Man. They fully believe their infiltration has gone undetected, but a panning out of the shot reveals Grizzlor is watching them on a security camera.
* In the second episode of the series the trope is lampshaded. The crew get a job to do a delivery on the moon, and Fry asks to do the countdown for launch. Leela launches anyway and by the time Fry counts down from 10 to 8, they've already arrived on the moon. He then quickly counts down the rest while seeming disappointed.

* In the second episode of Urban Gothic, vampire Rex (played by Keith-Lee Castle) admits that he can't remember how he became a vampire.
* In the second episode several of the protagonists are pinned down by corporate soldiers while Six is being held hostage for their surrender. Figuring they going to get shot even if they do surrender, they decide to come up shooting on the count of three, only to find the soldiers have vanished and left Six behind still alive, as they've been ordered to withdraw.
* In the second episode, Shinji has just witnessed Unit-01 going berserk and kill an Angel... then he notices that the reflection of its exposed eye is looking directly at him. Needless to say, it freaks him out real good.
* In the second episode, the Fringe team were called in to investigate the case of a woman who got pregnant, reached full term, and gave birth in around fifteen minutes. The offspring died of old age in a half hour. The father was part of a government experiment and would also age very rapidly
* In the second episode the ponies come across a broken bridge. When Pinkie Pie wonders what to do next, Rainbow Dash shrugs and flies over to fix it.
* In the second episode, the protagonists wind up in Pottsfield, a town full of weird people who wear
* In the second episode, the Queen returns to her castle after the wedding of
* In the second episode/third chapter, Finny picks up a large stone statue and easily tosses it around in an attempt to crush a mouse. It’s played for comedy, as part of the servants goofy antics. Later on in both the anime and the manga, we learn that Finny has super-strength, and is a formidable opponent in battle.
* In the second episode, when Fry is still new to life in the future, and the crew is getting ready to take-off and make a trip to the moon.
* In the second episode, when they're planning on tracking a ghost, Carter asks about Henry's omni-remote's ability to scan electromagnetic frequencies, the remote that went haywire in the cemetery, where Henry had to pull the battery. Henry's response, "We're gonna need a bigger battery."
* In the second example, Jiro is knocked out with a sleeping drug given to him in a bottle of water by Subaru. He then wakes up at a beach hotel next to Kanade, who explains to him that she couldn't bear to be apart from him, her "fiancee", and didn't want to go overseas with her parents, so she fled there. He is extremely annoyed at first at his unwilling role in this charade, but he later learns the truth behind why they were there; while Kanade's parents really did go overseas, if she went with them, it would have meant Subaru, as her butler, would have to go as well. Which would also mean she would miss visiting her mother's grave on the anniversary of her death.
* In the second expansion, when you arrive in Northrend, you are allowed to jump the recruiting line on account of your past accomplishments, and in some places — such as in Winterfell Keep in Dragonblight — you can overhear NPCs discussing rumors that a 'great hero' from Outland (the setting of the previous expansion), or "the Scarab Lord" (a title you earn for completing the big raid of the initial game release) will arrive to reinforce them.
* In the second film, a female Secret Service agent shows her (valid) badge which is attached to her bra strap) by basically flashing the 2 main characters. Carter tells her to "show me your badge again".
* In the second film, Baldwin manages to save Cynthia from Yorga's clutches and Cynthia regains her memories of Yorga's brides attacking her family to which she personally deals the fatal blow that kills him. But father, mother and mute maid are dead, her sister Ellen and Mitzi, a girlfriend of one of their friends, are among the ranks of the undead
* In the second film, Beautiful Dreamer, Shinobu outright asks Lum this very question. Of course, she's being a
* In the second film, Biff KOs him when he visits the clock-tower hotel and casino. Later, he is briefly KOed by a door when his earlier self opens it; this is probably less disabling than not getting hit by the door would have been. And these are probably not all the examples.

* In the second film, Bill carries out a massacre at a news station and
* In the second film, his fingers expand to twice their original length whilst he explains the big bang to some girls at a club, who look suitably, err, impressed.
* In the second film, Jimmy, a younger triad gangster wants to escape the triads, start a life with his girlfriend and become a businessman in mainland China. However after a deal goes south, the Chinese police make him
* In the second film, Kirill lets Katie go after discovering she's murdered her rapists (he also kills the last one to stop him from killing her). This seems to stem largely from guilt, as he had unwittingly handed her back into their hands.
* In the second film, the female protagonist is saved from her grave by the first film's protagonist (who later dies for real due to health problems caused by the poisoning). Miraculously, she avoided getting embalmed because of a machine malfunction despite her husband's orders. She gets
* In the second film, the Great Pyramid was built to hide the Sun Harvester which a corrupt Prime had brought to Earth.
* In the second film, the Pigeon Lady is a homeless woman who lives above the New Your Philharmonic Orchestra's stage in the Lincoln Center. She's lonely because people seem to always forget about her, and Kevin vows to remember her. After making this connection, the Pigeon Lady saves Kevin after the Wet Bandits threaten him with a gun in Central Park. She douses the Wet Bandits in bird seed, causing them to be swarmed by a flock of pigeons, distracting them long enough for Kevin to slip away. The next morning, Kevin gives the Pigeon Lady a Christmas present, cementing the friendship.
* In the second film, the protagonist goes to investigate a noise and discovers a cat... who then beats her up with a broken bottle.
* In the second film this apparently was BJ's entire reason for spreading the virus. Although he also claims to have
* In the second game, Amanda Watts, the driver of Twister, wishes to be able to go at the speed of light. Calypso tunes her car so that it can do that, and she winds up
* In the second game, an over-amorous Turian makes the mistake of hitting on an Asari and a Female Shepard, before insulting them. Cue the sound of him being beaten to a pulp offscreen, then thrown clean across the room. Made even more amusing if Shepard's wearing the
* In the second game, Blaise Debeste, one of only two prosecutors in the series to actually
* In the second game, both genders get a set of scars that become more prominent the higher Shepard's
* In the second game, during a cut scene Cryto is lowering Natalya down into the volcano lair with his telekinesis while using his jet pack. He isn't able to do this in game until the 3rd game.
* In the second game, Franziska plants a tracking device on Gumshoe for the sole purpose of keeping an eye on him and to get the opportunity to whip him as soon as possible. This is initially shown as something on the long list of things that cements Gumshoe's
* In the second game, green dragons upgraded to red dragons, which upgraded to black dragons.
* In the second game, headbiting a human (or, far more rare, predator) caused the victim's head to completely shatter.
* In the second game, in the level "Pipe Dreams" in the Factory of a Better Tomorrow, there's a moment where you have to pull levers to move fingers on a hand to form the hand that rockers use. However, you can also choose to put up just the middle finger, which will cause a sign that reads "Denied" to cover the offending finger until you put up another finger or take the middle one down.
* In the second game in the series, Machias disguises himself in rebel-held territory by taking his glasses
* In the second game, it happens when you get a Bowser Item (Bowser Bomb, etc.) from the Item Minigames. And it's not just the music, either; it also happens to the words "Got item!" ("Got- iiiiiteeeeeem...??").

* In the second game, it pushes this beyond mere material horizon by having a Necromorph outbreak in a densely populated space station. While some evacuation ships are seen to take off and there are emergency prompts, there are also quite a disturbing number of on-screen human casualties.
* In the second game, Jacqui's cooking includes both powerful healing items and attack items, but none of them are exactly according to the recipe. For instance, her first is a rather tasty-looking sushi roll that is a useful healing item straight to endgame. The recipe was for cake.
* In the second game, Kaufman and the Cleaners working for Vladimir Lem have military level training.
* In the second game, killing an enemy with a Pulse Pistol or Pulse Rifle if you had the Bloody Mess trait would cause them to disintegrate into a pile of ash. This was actually fairly annoying as it meant that they did not have a corpse to interact with in order to loot and would instead drop their inventory onto the ground, requiring extra effort to loot it and also enabling enemies (or followers) to potentially loot items and use them against you.
* In the second game, Liara starts her own business on Illium, but for her the profits are mostly to fund her own investigations into the identity and location of the Shadow Broker, who tried to find the dead body of Shepard and sell it to the Collectors and kidnapped her partner when she gave the body to Cerberus first. Her real goal is to kill the Shadow Broker and rescue Feron.
* In the second game, Lord Aldia was obsessed with immortality, and spent the last years of his life researching it as a way to escape the Undead Curse, including an effort to re-create the Everlasting Dragons of old (which failed). In the
* In the second game most mechs will explode when destroyed. The YMIR mech in particular is notable for the fact that if destroyed with a headshot its death explosion is massively increased.
* In the second game, Mr. Slam's driver, Simon Whittlebone, wished to build the tallest building ever, and he got his wish. However, he then got worried that other people would break his record, and so kept building his tower higher. In the end, he accidentally fell to his death.
* In the second game, near the end of "Farewell, My Turnabout," the Judge does this to
* In the second game, plasma cannons have an enveloping effect, which means they deal damage to all four shield sections simultaneously. Also, the
* In the second game, question 69 asks "69-67=?" Suprisingly, the answer is not "LOL", but clicking 2 on the bomb.
* In the second game, quite a few of the villains are even more monstrous: the Collectors, for example, are
* In the second game, Revolver Ocelot is possessed by the ghost of his old boss, previous
* In the second game Sergeant Matt Baker, an NPC who was the player character in the first game, can be seen climbing over one of those low fences that he could not traverse when he was controlled by the player.
* In the second game's final case, your client, Matt Engarde, turns out to be not the killer, but
* In the second game Starkiller is killed by a dark-side clone of himself who was apparently invisible and observing the battle with Vader all along. Juno Eclipse, Kota and most of the rebel fleet are killed while Vader orders the dark apprentice to find and destroy the rest of the alliance. This also leads into a
* In the second game, submarines can be fired on by battleships, removing their greatest defensive strength.
* In the second game, successfully capturing an Antaran battleship and researching its equipment can also yield Death Ray tech.
* In the second game, the krogan homeworld of Tuchanka was apparently bombed into ruins during the Krogan Rebellions around 1000 AD. By AD 2185 it is apparently still in the grips of a nuclear winter complete with constant sandstorm, yet many of the ruins are still intact enough that you can find a recognisable radar dish, pyramidal skyscraper or even an unexploded bomb with the casing intact.

* In the second game, the last ending you'll get is actually positive and upbeat. But you literally have to
* In the second game the militia of Dantooine is an ad hoc force gathered to fight against local mercenaries and predators to keep the settlers safe.
* In the second game, the owner of an orphanage decides to resurrect his mother this way, only for her to become a boss for the players to defeat.
* In the second game, the player also wakes up on the medical/science deck with the ship overrun by The Many.
* In the second game, the player can research two types of Portal Networks. One simply sped up travel between colonies of the empire with the related tech, while the second made travel between your systems instantaneous.
* In the second game, the police respond to the number of hostages you have: if you have more, they delay longer in assaulting (after the first assault, which will start as soon as SWAT arrives on the scene). Conversely, if you kill a hostage, on purpose or accidentally, they will assault much faster to stop you from doing it again. If you have
* In the second game, there's a giant humanoid robot called Megahammer (according to Mario Wiki) with multiple Bullet Bill/rocket launchers fought as a boss, as well as a smaller version of Megaleg (Digga-Leg) to be defeated using the drill powerup.
* In the second game there's a mission in which you go undercover among NTF, and you are ordered to destroy a civilian transport. Regardless of if you comply or not, your cover is blown and the other pilots will turn hostile. Once you've eliminated them, reinforcements will arrive to get you out. If you destroyed the transport, the mission will be considered as a failure and you will be court-martialed.
* In the second game the Salvatore gang in New Reno is widely known and feared for its exclusive use of Enclave energy. Ingame NPCs claim that one thug with a simple laser pistol could wipe out an entire squad armed with regular weapons.
* In the second game, the Terran Admiral Bosch forms a Polaris-based militant group called the Neo-Terran Front. Their aims are to overthrow the current Terran government and break ties with the now-friendly Vasudans, motivated mainly by good old-fashioned racism (speciesism in this case). They are declared a rebel group and wiped out over the course of the game.
* In the second game, the village had to perform the Crimson Sacrifice Ritual, which involved taking sets of twins down to the Hellish Abyss, and having one of the twins kill his or her sibling.
* In the second game, the warchief-betrayal mechanic is fully in place in all the same ways, but there is now a layer above that. The fortress sieges, staffed by five Warchiefs in each region and ruled by an Overlord. During a normal process of the siege, they would show up at set points, their entourage in tow to give the player a fight… But of course it is possible to fill all warchief positions with spies, leaving only a mass of regular grunt orcs to oppose the siege and turning every checkpoint into reinforcements for Talion. Sadly, none of them sans one appointed personal bodyguard will venture into the central keep for the Overlord showdown.
* In the second generation eyecatches, Ataru is hit on the head (complete with a bump on the head) and hammered down by the series logo. The animation is the same for the intro and outro but the sound effects are different.
* In the second graphic novel, a groggy Skywise gets dragged off a cliff, wounding his arm in the process, but with his good arm he manages to snag a handhold. Cutter climbs down a rope to him; Skywise is rapidly succumbing to shock and pain, and Cutter finds that he can't climb with one hand while holding Skywise onto his back with the other. Takes an unusual ally to get them to safety again.
* In the second half of Season 5, the team are based over a rift to a "fear dimension" which occasionally sends forth
* In the second half of the 19th century the House of Welf got into a feud with the House of Hohenzollern after The Kingdom of Prussia (under the Hohenzollerns) annexed the Kingdom of Hannover and drove the Welfs in exile in Austria. This feud was resolved in the classical way in 1912, when the last surviving son of the head

of the Welfs met and fell in love with the only daughter of the head of the Hohenzollern family.
* In the second half of the game, all the routes besides Crimson Flower,
* In the second half of the prequel album, the viewpoint character is Joe, a brave and rebellious young man who sees what the city is becoming under Wily's superficially benevolent rule.
* In the second half of the Season 3 premiere, "Odd Beginnings: Part 2", as Orla's Headquarters begins to crumble, Opal kicks herself for dragging Oswald, Orla and Omar into her adventure to find and save the
* In the second half of the song, Elder McKinley also goes on a rant about how
* In the second installment, a slow, sad track plays after the first battle in the beginning once
* In the second installment, it is Vendrick, the old king of Lothric who contracted the Undead Curse and eventually succumbed to it after being betrayed by his wife.
* In the second installment, Tony the Talking Clock at first acts like a kind teacher who wants to show the puppets the importance of time. He drops the act quickly when Green Bird presses his
* In the second instance, the wife, after being told that her husband is a war criminal and likely murderer, she, in a state of shock, relates how her husband came home covered in blood (which she presumed was from the assault on him), then invoked spousal privilege and told the police they couldn't act on the information in that conversation. Brenda complies and tries to find probable cause to search for traces of blood,
* In the second intro, Aizawa is seen wearing a pair of aviator type sunglasses he never dons outside the opening.
* In the second-last book, Visser One kills the Auxiliary Animorphs and some of General Doubleday's troops by shooting the Pool ship's Dracon cannon from orbit.
* In the second movie, Ōtah becomes upset over his labor's armament (an anti-labor shotgun) in anticipation that he will face tanks. The mechanic replies that he should shoot with both eyes closed.
* In the second movie, a fake commercial break is inserted into the movie which at first looks perfectly real until it turns out the commercials (for dating hotlines and handy downloads) are parodies, too.
* In the second movie, Bam Magera gets a golden dildo launched into his anus by one of those carnival "test-your-strength" games. From the same movie, the
* In the second movie, Buzz plays a prank on Kevin during his Christmas pageant solo. When Kevin discovers this, he hits Buzz with so much force that
* In the second movie, Dr. Evil has Austin and Felicity Shagwell over a pit of molten lava. Austin concocts a crazy scheme to try and escape, but Felicity just flashes her boobs at the guard, and they escape. Notably, soon after this, Dr. Evil does order his guards to just shoot Austin, but Austin kills them all first.
* In the second movie, Earl and Grady are hired to take out a dangerous community of Graboids due to Earl's role in defeating them in the first movie and Grady's
* In the second movie, Eddie mistakes the water from the flood for his brother Crash's urine.
* In the second movie, he walks out into SPACE (aka where fire is impossible) with his crotch and arms ablaze.
* In the second movie, it was sandwiched between two 18-wheelers, improbably
* In the second movie, rumor spreads that Gus is cheating on his girlfriend with Lassiter's nurse. This causes his girlfriend to travel down from San Francisco to figure out the truth. Also to tell him that
* In the second movie, the two girls who survive the crash where the killer is driving both run to the end of the block. One then turns around to check and see if the killer was dead. The second girl insists that they don't go. "This is stupid! Stupid people go back! We're not stupid people, are we!?" The killer then appears behind her and stabs her while the girl who went to check gets away.
* In the second movie, the U.S. Army has upgraded their technology and help clear most of the Decepticon mooks in the battle back in Egypt, taking out Devastator and

have enough firepower to suppress even Megatron. However, they are still no match for The Fallen, whose telekinetic powers can wipe out even the best infantry units of the American military such as their missile defense systems, tanks and Air Force fighter jets. Jet Optimus has to take down the Fallen for the climax.
* In the second movie, this seems to be less overt and seems a little closer to the
* In the second movie, Trinity and Bambino wind up in a monastery where several criminals are hiding and pretending to be monks. When Bambino asks the true monks to raise their hands, everyone raises their hands. Trinity responds by saying, "Every monk who is a monk, hit a monk that ain't a monk."
* In the second Nikki Heat tie-in novel, when asked about who might have a motive to kill the victim (a rather vicious critic), the Castle expy suggests getting a copy of the Manhattan phone book and starting with A.
* In the second novel, Belisarius has had Prince Eon assume the role of ridiculously oversexed ladies man who has to have a harem of prostitutes/slaves in his presence to satisfy his urges. The Malwa they are traveling with thus never notice when there's an extra one that's appeared out of nowhere: the escaped Princess Shakuntala.
* In the second novel it's revealed that a few hundred years after Red Dwarf left the solar system, it became a case of
* In the second novel Kit pulls out an embedded fold-out oceanographic map when he needs to know how deep the ocean is at a particular location.
* In the second of Jack Williamson's stories of the Legion of Space, the heroes fight their way to the heart of the world-ship of The Cometeers, finally capturing the one device that can harm their otherwise indestructible bodies. They then promptly hand it to the one person who has frozen up every previous time he has confronted the main villain, and has good reason to believe he is psychologically incapable of lifting a finger against him.
* In the second of the hour-long family specials, "Second Chances", Schemer once again coaches the kids in a baseball team, this one being known as the Indian Valley Scooters, and once again, they play against the Snarleyville Slashers. Sledgebolt, the coach of the Slashers, tries to sabotage the Scooters' chances of winning by

* In the second part of the pilot, Goofy and Pete have an argument during a party. Goofy then tells Max they're leaving, only to remember that the party was at
* In the second part of the Season 2 finale, "Odds and Ends", Oona bakes a three-layer cake big enough to fit Oprah and Otis inside, so that she and Olympia can smuggle them into Precinct 13579's Headquarters. It ends up working, with no one suspecting them, and despite the interior being made of wood, it's perfectly edible.
* In the second part of "Who Shot Mr. Burns?", Smithers, who's been in a drunken stupor after being fired, awakens to find he has no recollection of what happened the previous night. Discovering what happened to Mr. Burns causes him to think he shot his former boss. Turns out he didn't, but he
* In the second part there are many plans involved: Cal wants revenge against Coulson for ruining his own revenge against Whitehall and for having kept him away from his daughter; the last leaders of HYDRA want to rebuild the organization; Ward tries to help his lover Agent 33 to regain her identity and find her closure (read:
* In the second phase of its boss fight, Tape will tape together parts of the battlefield so Mario cannot adjust the panels, losing bits of its health this way.

Like Rubber Band, it will restore its health if you don't burn the tape pieces with fire.
* In the second pilot for the US version, the Cat was played by Terry Farrell (who would go on to be Jadzia in
* In the second round, "Dots", the corners of the boxes were numbered and the contestants had to connect the lines to reveal the squares. The contestants would try to close in the same four boxes (e.g. 7-8, 8-13, 7-12 and 12-13 would reveal the one that was square 6 in the first round).
* In the second round, Loyola used another last-second shot to beat 3-seed Tennessee, and Nevada
* In the second RP, Dragonstorm guards disarm or incapacitate every defender in the control room except Clyco, who activates a
* In the second scene, Maria tries to avoid being in a picture to avoid thinking of her appearance, but her mother orders her to. Ironically, Maria's mother chastises her, not for lacking confidence, but for being too preoccupied with her appearance by not being preoccupied with her appearance. Faced with a family that will always see her as self-obsessed, Maria ends the scene on the verge of tears.
* In the second season, after Rip goes missing, Sara Lance steps up as captain (Levelheaded with a bit of Charismatic) and does a
* In the second season, after the timeskip, and especially after the endgame really gets going, you can see that the entire season has interconnecting melees. The main story arc is essentially the continuation of the first season with Celestial Being
* In the second season, Annie briefly flirts with dating Rich, a friendly doctor who, like Jeff, is in his thirties. Rich ultimately declines to date her because she's too young for him.
* In the second season, Azula's plan to capture Zuko and Iroh by acting like they were being brought back home honorably is ruined by a single soldier accidentally saying "prisoners" instead of "guests". She is rightly pissed.
* In the second season, Captain Pike angrily berates Admiral Cornwell for her underhanded tactics and her decision to keep him and
* In the second season, Captain Thomas Ridenhour is a downplayed case of this. He's not corrupt, but a
* In the second season, Codex is interested in a hot stuntman neighbor and dresses up (showing cleavage) to get his interest when Vork shows up out of the blue and asks "Why are you dressed like a harlot?" Then he invades her home and peruses her belongings before randomly turning to her and saying "Cover yourself, woman."
* In the second season, Deputy Chief Irvin Irving's son George is doing undercover work infiltrating a ring of corrupt cops who work for Carl Nash, an ex-cop who works private security for a gated community and is a person of interest in Bosch's investigation into the murder of a mob-affiliated producer who lived there. When George's wires are found by Nash, Nash promptly sends a masked gunman to execute him as he's doing some late night shopping at a mini mart. Irvin goes on the war path to find his son's murderers, recruiting Bosch for an off-the-books investigation to skirt around city politics. They interrogate George's partner in the crew, Eddie Arceneaux, and he gives up Nash as the one who ordered the hit. When Arceneaux informs Nash about how he's been compromised, Nash has two of the other cops in the crew, Maureen O'Grady and Nate Riley, murder Arceneaux in his house and stage his death to look like a suicide.
* In the second season, Dr. Karl Malus admits that his falling in love with Jessica's mentally unstable mom was much this way.

Drafa is compared by Dr. Franklin to earlier such plagues — Black Death, AIDS, Chalmers' Syndrome.
* In the second season episode "I know why the caged bird kills" Hank reveals that he and Dean were molested by a villain named Sergeant Hatred, and this is played for laughs. It comes up again a few episodes later in "Showdown at Cremation Creek Part One". Perhaps the biggest joke made out of this situation is that in Season Four Sergeant Hatred becomes the boys' bodyguard.
* In the second season episode "My Kingdom," JD is a victim of a hanging wedgie, courtesy of the surgeons.
* In the second season episode "Shibboleth", one of the plotlines is Charlie, President Bartlet's personal aide (and who at that point is dating Bartlet's youngest daughter Zoey), tracking down a carving knife for the President to use for a Thanksgiving turkey. When President Bartlet rejects all of the knives he brings, Charlie finally gets impatient and asks what the big deal is. President Bartlet explains it's a replacement for a knife he's giving away, and it turns out, he's giving that older knife - which was made for his family by Paul Revere - to Charlie.
* In the second-season episode "Thanks for the Memory", Lister wakes up after a drunken party with one foot in a cast and no idea how it happened. (It turns out that alcohol was not in fact the cause of his amnesia. This time.)
* In the second season episode "Vengeance", Carver is given the nickname "Pickle Toes" as the result of a prank, much to the delight of Lor.
* In the second season, feminine Emma gets involved with Nico, who's butch.
* In the second season finale, Aang had gone off to learn from a guru, Sokka went to meet the Water Tribe warriors, Toph went to meet her mother

* In the second season, Gustav Hoffer knew who killed him, but was so busy talking about something else that his minute ran out. Rollie Stingwell also gave them an actual name, but
* In the second season he gets much, much worse. When Mariah appears to have run out of money because Bushmaster bankrupted her, he immediately declares he will no longer be representing her or Shades... while both of them are in custody and being questioned by the police. This is known as "abandonment of a client," and is grounds for disbarment in New York State. He then goes to work for his former client's opponents in a legal (as well as illegal) dispute, also grounds for disbarment. Then when he realizes Bushmaster is more likely to kill him than pay him, he goes back to his old client and does what he not only should have done instead of leaving his old client in the lurch, but should have advised Mariah to do before the temporary cash flow issue came up in the first place (namely, report that Piranha Jones, the guy with power of attorney over Mariah's assets, had been

kidnapped; and freeze his ability to make money transfers, on the grounds that duress invalidates any and all such transactions).

* In the second series, Leafpaw is the only cat that knows about both prophecies: the one that the traveling cats recieved, and the fire-and-tiger sign.
* In the second series, many of the magic side characters introduced in the first series end up becoming this. For example, Stiyl and Kaori used to be recurring characters, but they now have few appearances and minimal impact on the plot.
* In the second series, she was, surprise surprise, alive. Although she also showed signs of superhuman healing, the main explanation was that she's a mirror-image twin
* In the second series, Tenchi was teleported into the spa prior to the dimension-hopping arc. Reactions from the bathing women was... mixed.
* In the second series, the three main protagonists are very different from Firestar: Brambleclaw, the closest comparison to Firestar, is bolder and more assertive, but he also doubts himself much more, fearing that he's destined to be like his evil father. Squirrelflight is feisty and disobedient just for the sake of it, unlike her much more serious father, despite their similar physical appearance. Leafpool is a medicine cat apprentice, rather than a warrior apprentice, following an entirely different path in life.
* In the second S-Force episode, Targon believes that enlisting Coop's help qualifies as the trope.
* In "The Second Stain", Holmes doesn't expose the woman who stole confidential government documents from her husband, once he's gotten the papers back.

* In the sequel to Berzerk, Frenzy, Otto could actually be killed by four laser shots (either from players or robots). Every time he died, however, he would return from the same spot he spawned one second later, moving slightly faster than before. Killing him was worth quite a few points, but his movement pattern (bouncing vertically like a ball viewed from the side, even though the game actually used a top down perspective) made scoring hits very difficult unless directly above or below him, and this was the most dangerous place to be while fighting him due to the horizontal screen and the bouncing movement making Otto able to cover vertical distances much more quickly. It didn't help that missing Otto with a laser blast could result in the player's death from his own beam, due to new laser-reflecting walls present in the sequel. Finally, Frenzy included some special rooms, including the nightmare inducing "Mama Otto" room, dominated by a giant (but thankfully motionless) Evil Otto. Until you set it off...
* In the sequel to that story, it's shown that even the regular Judges were injected with aggressors and deinhibitors from their training as cadets onwards to make them compliant thugs. It didn't work on the future Judge Death because he was already a psychopath.

* In the Series 3 episode "One Night Stand", a practical joke-loving co-worker of Martin's arranges for him to find a strange woman in his bedroom one morning on a business trip. Martin is horrified to discover his "indiscretion" and immediately confesses to Ann, who becomes cold toward him until Paul tricks the joker into admitting the truth in front of her.
* In the Series 4 episode "Jumping to Conclusions", Hilda sees Ann climbing over the fence into Paul's garden for a study session for her Open University course. She concludes that Paul and Ann are having an affair, and word works its way back to Martin.
* In the Series 5 two-parter 'The Hungry Earth'/'Cold Blood', a plan for the Silurians, the original reptilian inhabitants of the Earth, to re-emerge gets postponed for this reason. Considering that peace talks between them and the humans had broken down because of the murder of POWs and both sides claim equal right to ownership of the surface, this is probably one of the more justified examples. The Doctor also puts into motion a plan to

* In the series finale, both of these cases are explored; an enormous asteroid is on a crash course with earth, spelling doom for the entire human race if it wasn't stopped. Vlad, who at that point in the series had become mayor of Amity Park, sabotages many attempts to stop it. Then,
* In the series finale, Daenerys has Tyrion locked up to be executed after he betrayed her trust by releasing Jaime. When Jon begs her to forgive Tyrion, Daenerys simply says she can't.
* In the series finale, Don loses his gun during an arrest. Even though he couldn't have prevented the loss, he still feels that he would be responsible for any action committed with the lost gun.
* In the series finale, Don's service weapon is stolen and used by various people who know each other from online chat rooms venting about their problems with local criminals (a community watch member who's been unable to stop some drug dealers legitimately, a woman being stalked by her ex, etc.) As soon as one person uses the gun to kill a criminal (or decides not to use it after all), they pass it on to someone else.
* In the series finale episode, “The Ending of the End”, Applejack gets on Rarity’s shoulders so she could lasso Grogar’s Bell (with Spike and Fluttershy holding the lasso with her) while the rest of the Mane 6 distract the Legion of Doom. Unfortunately, they get caught.
* In the series finale, Fiona ("Shall we shoot them?") and Sam ("You know spies: bunch of bitchy little girls") quote their lines from the opening sequence. The final line of the show is Fiona suggesting "My name is Michael Westen. I used to be a spy" as a starting point when Michael tells his story to his nephew/adopted son Charlie.

* In "The Series Has Landed", we see a character in an arcade playing Skeeball. In the next area over, a character is playing Virtual Skeeball; they have on a headset and gloves in an otherwise empty area, and are moving like they're playing Skeeball. Next to them, Amy is playing Virtual Virtual Skeeball; she's sitting on a chair with a headset on, and comments "Wow, I could swear I was really playing Virtual Skeeball".
* In the series, his selfishness isn't as bad as it was in the movie, and it was out of his stupidity most of the time. However, by Kronk's New Groove, he finished his character development but was still as flamboyant as ever. His selfishness, however, seems to have been toned down to a much more reasonable amount. Overall it seemed his ego and flamboyance didn't go away, but he's not throwing beggars off his castle and demolishing villages for ego projects anymore.
* In the series itself, much is made of this trope when anyone is simply
* In the series, it was a downed power line in the second episode that snagged the gunner, nearly strangling him. Person realizes just in time and reverses the Humvee enough for the marine to free himself.

* In the series premiere, a bank robber tries to pull this on the detectives. With his accomplices dead or dying, he throws away his gun to show he is surrendering. He then pulls out a second revolver and tries to kill the coppers but they anticipate this and shoot him dead as soon as he stands up.
* In the series premiere, Lilly asks what the coldest case ever is and
* In the series premiere, Rick is faced with a room that's been barred shut. Fortunately, the helpful sign on the door, as seen on the trope image above, helped warn him from unsecuring it and letting out the zombies that were behind it. Well as pointed out the sign is confusing — it was the chained door and the guttural snarling that frightened him off.
* In the series proper, Goku also kills a minor minion in the Buu saga this way.
* In the series proper, Professor Frink is very much a homage to Jerry Lewis'
* In the series proper, Team Rocket tries to target badasses most of the time, and sometimes they succeed (for Act I, at least). Pikachu in particular, badass enough

to hold his own against nearly any opponent, frequently gets locked up in electricity-proof balls so the rest of the team has to save him. The instant he's not inhibited, he sends Team Rocket flying.
* In the series proper, the Fire Nation builds a giant armored drill to bore through the Walls. Fortunately for the Earth Kingdom, the Gaang arrives at the city right at that time and are able to disable it, but not before it goes all the way through the Outer Wall. The breach is quickly patched up and then repaired

* In "The Serpent's Pass", Aang tries to get his group free passage on the ferry to Ba Sing Se. The woman taking tickets doesn't find his Avatar costume any more believable than those in the nearby group of impersonators. For some reason, he never considers just airbending to prove who he is instead.
* In "The Serpent's Pass", Sokka and Suki also share an Almost Kiss-moment on a moonlit night, which is exactly why Sokka can't go through with it (his last girlfriend died and became the Moon Spirit). He makes up for by the end of the episode with two
* In the Service example above, posits that cybernetic enhancement is neither necessarily good nor evil: it reinforces existing traits. Mentally healthy people converted to cyborgs will withstand huge amounts of emotional trauma and stress without ill effect. People who are not mentally healthy...won't.
* In the Service has more than one comment on the bravery and discipline of the common New Belkan soldier. No matter how bad the situation around them goes, no matter how little chance there is they will survive the effort, they will carry out their orders. Some characters think them brave far beyond the point of stupidity. Others think they're the finest soldiers the universe has ever seen, with some of the worst training and leadership.
* In the Service in skin-to-skin contact are no longer individuals in a meaningful sense. They find this both frightening and unpleasant, and consequently inter-Wolkenritter romances don't work.
* In the Service in which she misjudges just how much of a funk he's currently in and essentially dares him to hit her. He does hit her, but immediately afterwards says it was undeserved and requests Signum hit him back to make it fair. She does.

* In the short story "The Man Outside" by Evelyn E. Smith, someone called Martin is destined to have a son who develops the interstellar drive, resulting in the exploitation of other planets and their native populations — so one of his descendants (Conrad) plots to travel back through time to kill him, preventing the birth of his son. Martin's other descendants get wind of this, and themselves travel back to protect Martin from Conrad, including anyone from Martin's time who might be an agent of Conrad. When Martin is old and on his deathbed, Conrad finally turns up — and confirms what Martin had worked out years earlier, that his plan all along was to deliberately allow his "death threat" to leak, panicking his brothers and sisters into acting as they did, and thereby achieving the same result without the assassination actually needing to be carried out.
* In the short story "The Mask of Medusa" by Nelson Bond, a killer takes refuge in a dilapidated wax museum, where he befriends the proprietor in hopes of being able to use him to escape the police. He comments on how lifelike the statues of the murderers are, although he is puzzled as to why none of them are in typical poses; instead just standing with a terrified look on their face. Too late he discovers that the proprietor is a fanatic who believes it is his divine duty to remove murderers from the earth, which he does by exposing them to the stare of the eponymous artifact.
* In the short story the movie is based on, it happens a little bit differently. There are three prophesies made in quick succession, some of which show the main character committing murder but others don't (or show him committing a different murder). The difference is because
* In the short story "The Photographer and the Sailor" by James Holding, an assassin (the Photographer) turns down a contract on a high profile victim. Dusty tries to negotiate an end to the feud and is forced to kill Dan Hickman in self-defense, causing him to go on the run. Later,
* In the short story "The Warrior", Harry saves a girl from being hit by a car. When her mother comes to see what happened, Harry spots a bruise on the girl and asks if he gave it to her when he pulled her out of the car's path. The girl says no, she was bruised when she fell off her bike. Harry then asks how that happened without her scraping her hands, making the mother's eyes go wide and she promptly marches the girl home. Later Harry learns that her father had been hitting her, and Harry's comment brought it to the mother's attention. Of course the girl could have

easily fallen off a bike without scraping her hands. While the mother may have known or suspected what was going on, there was no real reason her to think it was particularly suspicious.
* In the short story "The Warrior," the villain holds one of Michael Carpenter's daughters hostage with detcord (i.e. explosive dynamite-like cord) wrapped around her, with his hand on a dead-man's switch. If the villain dies OR Harry gets too close or uses too much magic (he is a
* In the short story "The Way of Cross and Dragon", a thousand years in the future humanity has spread to countless planets. However, at least a sixth of them are still Christian, the biggest church has brought back the Inquisition (although more as a PR mechanism than a torture campaign), and the protagonist Inquisitor discovers a group that has figured out that there's no God, but still sets up sham religions because most people can't handle the truth.

* In the show itself, J.P. Morgan causes a fight with some Australia troops by disrespecting the Australians (who weren't particularly respectful themselves) and claiming that the USA was saving them from having 'chopsticks up their ass'. Both sides actually had a point, as the Australians had stopped the Japanese cold in the hellish Kokoda Trail campaign in the Owen Stanley Mountains of New Guinea. Guadalcanal was a Japanese attempt to bypass the AIF in New Guinea and cut off Australia from the USA, with conditions every bit as nightmarish, and with the ground combat being an entirely American endeavor.
* In the show itself the only reason he was even allowed to accompany the Atlantis mission is because of luck, skill, and the support of more alternative thinking higher-ups Elizabeth Weir and General O'Neill. He impressed O'Neill by performing a
* In the show, Nanami thinks she's (literally) laid an egg and asks her brother how he feels about girls who lay eggs. "Do you know why we've been able to live together so happily? It's because you aren't the type of girl who lays eggs."
* In the show proper, the plot of "Bad Hair Day" is kicked off with Mikey blowing an enormous bubble gum bubble as the other kids cheer him on, only for the bubble to get popped by a kindergartner who couldn't resist touching the bubble, completely covering Mikey from head to toe in bubble gum gunk.
* In the show's final episode, we finally learn the importance of the Zodiac Wheel that appears at the beginning and end of every episode.
* In the show's final season, Martin gets together with Frasier and Niles' former babysitter Ronee Lawrence. Her exact age is unknown, but there is probably at least a fifteen year age gap between them.
* ; in the show's introduction, Johnny was credited as "The Man with the Action-Packed Expense Account".

* In "The Siege of AR-558", the minor character of Reece has a neck chain made from Ketracel-White tubes, taken from dead Jem'hadar. This is depicted as indicating a partial breakdown of Starfleet discipline as a result of
* In the Siege of Lucknow during the Sepoy Rebellion a number of English residents barricaded themselves in a school and held it against rebel soldiers until relief arrived.
* In the Siege of Mereen, the Wise Masters and their slaves show one when Drogon appears over their heads and lands at Daenerys side. Followed with one by the Sons of the Harpy when they see a Dothraki's army charge against them. It ends with one by the slaves from the ships when Drogon, Rhaegal and Viserion fly over said ships and began to incinerate one of them.
* In "The Siege", the runabouts are being used to evacuate Deep Space Nine, so Kira and Dax have to get working an abandoned Bajoran Resistance spacecraft from the Cardassian Occupation that's been sitting in a cave for over a year. The thrusters barely work, there's no emergency gear, no sensors, no impulse engines, and no leg room. Worse, the resistance engineers just cobbled such craft together out of whatever was at hand, so they're not very reliable even when they were new.

* In the sixth book, Ayla wonders if one of the reasons "children of mixed spirits" (people of mixed Neanderthal and Cro-Magnon heritage) came to be regarded as "abominations" is the increased risk of potentially fatal complications if the mother is a Cro-Magnon. The heads of such babies, in addition to being shaped differently, are often too big for a Cro-Magnon woman to deliver, which can lead to the mother's death.
* In the sixth book, Dumbledore straight up tells Harry he thinks Divination is a bunch of BS and that Professor Trelawney is a fraud. He only keeps it on the curriculum because parents want it taught and to keep her safe from Voldemort.
* In the sixth book, it's revealed that Voldemort basically had no love in his life when he grew up. His father was under the influence of a love potion when he was conceived and his mother died instead of using magic to save herself to care for him. As a result, it is explained that he has absolutely no understanding of love or friendship and loves absolutely no one. It's probably because of this that he fails to realize

* In the sixth season opener, "When Johnny Met Sharky", Johnny spends most of the episode in florida. Near the end, we learn that he failed to jump over a shark, and was eaten.
* In the sixth season premiere, after Castle proposes to Beckett, a very surprised Beckett kisses him. When Castle asks if that's a yes, she answers, "No, wait...", leading to some confusion over whether she was saying "Yes" or "No". Her initial "No" was because she wanted to tell Castle she was offered a job with a Federal task force in Washington DC. Ultimately her answer was a resounding "Yes".
* In the sixth season, when Dennis Abbott recruits Patrick Jane into the F.B.I., Jane provides a list of demands on a napkin that he wants met if he's going to work for them. When he gets back to the United States, Abbott reneges on the deal and instead tries to set his own terms, which include stuff such as Jane basically being on a sort of probation which could be retracted at any time if he doesn't toe the line while working with the F.B.I. Jane, of course, does not like this at all, so he escapes then tells Abbott that he has a list of names of members of the F.B.I. who are members of the Blake Association and he'll release it to the media unless his own demands are met and he's allowed to work for the F.B.I. free as a bird. It's a total bluff, but it works, as Abbott has no way of knowing that he's lying.
* In the sixth volume of the original manga, there is a one-shot villain who finds a cursed card game called Dragon Cards that seals the loser's soul in a jar. He steals the Millennium Puzzle from Yugi and forces him into a battle. Yugi loses, but manages to get his hands on the puzzle before losing his soul, and Dark Yugi is able to come out and win a rematch.

He tries holding it in, but he keeps getting reminded with messages such as a sign stating "Dump Next Left", a trailer passing them with the notice "Wide Load", a nearby furniture store advertising "All Stools Must Go!", another car with a bumper sticker about how its driver loves their Shih Tzu, and another sign advertising "Bob's House of Feces" (
* In "The Son Also Draws", Peter's bowels are acting up during a long road trip. Every billboard and sign remind him of it (examples include "Furniture Store: All stools must go!", "I Love My Shih-Tzu"; "Bob's House of Feces, Next Exit" [to which Peter responds "
* In "The Son Also Draws", when Peter — after Lois gambles away their car at a Native American casino — claims he has Native American blood, management has him go on a vision quest to prove it. Subverted, as Peter has a vision (or at least an insightful hallucination), even though his claim to Native American ancestry was a con and none of the actual Native Americans figured he would have one — and immediately start whining that
* In the song "Adolescence" by the Vocaloids Kagamine Rin and Len, a mention is made about how it seems Rin and Len's hands are tied together with a thread.
* In the song "An Attempt to Tip the Scale" by Bright Eyes, Conor Oberst, in the middle of a fake interview in the song, at one point says, "Can you make that sound stop please?" The interviewer says "Yes." And the music in the background of the interview stops.
* In the song "Better Than Neil", Nathan Fillion sings about all the ways in which he's better than Neil Patrick Harris. There's one segment of the song where every line ends in "ness," with lines such as:
* In the song "Black Birds", birds try to hurt a girl (make her unhappy forever or, depending on your interpretation, literally peck her eyes out).
* In the song "En attendant ses pas" ("While Waiting for His Steps"), by
* In the song "Fear Garden", Rin cuts off people's arms to use as flowers in her garden.
* In the song "Funky Cold Medina" by Tone Loc, the singer attempts to test the eponymous substance on his dog. If he'd paid proper attention to the results, he would have realized that it doesn't work exclusively on the opposite sex rather than having to figure that out
* In the song "Girl," the word "tit" gets repeatedly chanted in the background of the the middle eight.
* In the song "Hazard" by Richard Marx, a young woman goes missing and the narrator is blamed for the disappearance, but they never find the body. Averted in the

* In the song "Nuttin' for Christmas," the singer's character is a bratty half-pint singing about delighting in his wicked deeds.
* In the song "Paradise by the Dashboard Light", Phil Rizzuto's baseball play-by-play (which is also describing what's going on in the car between the two teens,) says

* In the song "Penelope", the protagonist goes to the train station every day to wait for her beloved. She gets old and finally the guy comes and thanks her for being so faithful and that his wait is over, she only looks at him and says "No you don't look like he use to look (of course not, he is old now) you aren't him! and goes on waiting. (Gee, if the guy was alive all this time... couldn't he write or something?) The song is also in Spanish, notice a pattern here?
* In the song Project "Ma", Queen Maria Moonlit prophetized the end of Levianta (her country) and the whole world by <The Dark Legacy, "Sin">. Levianta's answer was to create Project [Ma] to purify the sins. The first project's failure caused Eve Moonlit's mental instability and the second project created Hänsel and Gretel, the twins she would later kill for, unleashing the "Sin" onto the world.
* In the song "Rocky" (most famously recorded by Dickey Lee), the subject's wife expresses uncertainty on her ability to do certain things (fall in love, have a child, then die). "Rocky, I've never ____ before, don't know if I can do it..." In the final verse, now that she's dead, he swears that he sometimes he can hear her saying "Rocky, you know you've been alone before / You know that you can do it..."
* In the song "Signed Curtain" by Matching Mole (a post-Soft Machine project which includes Robert Wyatt), the lyrics consist of references to song structure:
* In the song "Sofa King" by Danger Doom on their debut album The Mouse and the Mask, there is a line referring to a "game of strip limbo."
* In the song "The Mayor of Candor Lied", the narrator is in love with the mayor's daughter, but the mayor won't hear of it. In the end we learn why:
* In the song "This Music will Last Forever", the return of the moon to the sky and the resumption of music after changing the battery on the player is described in a similar way to the scenes of the resurrection of people.
* In the song "Transformation", the lyrical hero believes he will be able to return to life after losing his heart, ears, hands, stomach and head. In his opinion, he even needs to get rid of his organs in order to live longer.
* In the song "Walking on the Water", a black raven flies over the cross, and this frightens the apostle Andrew.
* In the song "Wolverton Mountain", in the chorus the singer claims "the bears and the birds" tell the father of the girl he loves if a stranger comes on the mountain where the father and the daughter live.
* In the Sonic Adventure arc, in order to stop Chaos from absorbing the Chaos Emeralds, Knuckles hesitantly ejects them from the island, which without any power then crashes down into the sea.
* In the sonic screwdriver's original appearance in "Fury from the Deep", and later in "The War Games", it was used
* In "The Sontaran Stratagem," a mysterious company attracts the attention of both UNIT and the Doctor, who try all manner of subterfuge and broad investigation to figure out what's going on—without success. Then Donna strolls into the Personnel office and immediately exposes the fact that the employees aren't human. How? She simply looks through the paperwork and notices that the file that lists sick time is completely empty. The UNIT soldiers are stunned by the boring but effective tactic, which Donna chalks up her to own experience as a perpetual office worker: "Super temp!"

* In the Southern Vashnar mountains, there is a point where the traveller must decide between going south or southwest. Southwest is a safe path leading to the city of Cyrene. There is a small and easy to miss sign at the fork in the path, which reads "CAUTION: bears south". They're
* In the Southron Popular Republic timeline, the Confederate States win the American Civil War and successfully break away. But furthermore, after the CSA ends up on the losing side of the Great War, they suffer a Communist revolution, which results in Texas and the Indian Republic (OTL Indian Territories/Oklahoma) breaking away and declaring independence. And back in the US, a second civil war breaks out in the 1930s due to a public backlash against government corruption during the Great Depression; by the time it's done, California has declared its own independence.
* In the southwestern Ohio area, there's "4-4-4 4-4-4-4, call Blake Maislin!"
* In the Southwestern United States, nearly every town has a big letter for the town's initial on the mountain behind the city.
* In the Soviet and post-Soviet era, this town is well-known in Estonia for its prison.
* In the Soviet cartoon series "The Return of the Prodigal Parrot", the third short ends with the titular character trying to present himself as a tough guy who spent the summer doing farming work. The last thing he does is lighting a roll-up... cue coughing all over the ending titles.
* In the Soviet Union, certain books (especially by foreign authors that had nothing to do with socialism) could only be purchased if someone contributed enough to
* In the Soviet Union of old, a real classification existed, and is still retained in modern Russia: "Of Special Importance" (Osoboy vazhnosti)l which is more secret than Top Secret.
* In the Soviet Union, there was a saying, "Collectivization is a voluntary affair" (original full version: "collectivization is a voluntary affair, choose to opt in or get shot"), which was in essence used as a trope name back before anyone had ever heard of tropes. In fact, so many assignments that were
* In the "Spacecataz" sub-series, the two Plutonians, Oglethorpe and Emory, get into a fight with the Mooninites...all because the Mooninites flipped off Oglethorpe as the Plutonians' ship whizzed by.
* In the space maps in the sequel ramming does do damage and can actually be used effectively by players. Parked starfighters take more damage than flying ones for some reason, meaning that players can still do damage in enemy hangars. Ramming a bomber into a landing ship in your own hangar can also destroy it much faster than shoulder-launched rockets. Fighters can also collide in space, though it'd be difficult to pull this off in a way that doesn't get you both killed.
* in the space of about four hours, so that they can officially tie the knot before revised orders can arrive putting them in the same chain of command and making their relationship illegal.
* In "The Space Pirates", also in Season 6, Madelaine Issigri wears a pretty astonishing ensemble consisting of a quilted lurex bodysuit, a white gilet with a standup collar and an outrageous metallic hat that looks like a stylized beehive hairdo. See also the gold applique jumpsuits on the miners.
* In the "Space Recovery Team" series, set in the future, Magica is now living on an asteroid in outer space, from which she wastes no time jumping on her broom and chase the Beagle Boys' spaceship once she discovers they've brought the
* In the Spanish dub of Adventure Time, Lemongrab is implied to be this. At the end, he mutters "No one loves me. Everyone hates me" while riding away from the kingdom. There could be some truth to that.
* In "The Spanish Inquisition", the Inquisitors have an unusual idea of torture involving comfortable furniture, soft cushions, and breaks for beverages.
* In the Spanish language, Paquita la del Barrio seems to be the embodiment of this trope. "
* In the Spanish romance "Enamorado y la muerte" a young man wakes up to see Death

walk into his room. (He mistakes her for his beloved at first.) He begs her for one more day of life, but Death tells him he has only one hour to live. The young man flees to his mistress' house and convinces her to let him in through the window.
* In the Spanish-speaking world, said song has been redubbed as a coming-out song due to the mishearing main verses as "fiesta fiesta y pluma pluma gay'' (party, party and gay feathers). Check it
* In the Spanish version of the joke, it's Karl Marx himself who dies and is sent straight to Hell, where he promptly starts getting rank-and-file demons to make common cause with the damned. Satan tries to get rid of him by shipping him into Heaven, half-expecting the guys Above to reject him. When he goes up to Heaven to check after a few days, it's Peter who greets him and informs him that "there is no God."
* In the Spartan Race obstacle course, if you fail to complete an obstacle or choose not to attempt it, the race requires you to do thirty burpees (a push-up followed by a jump) before you're allowed to move on. However, you have the option to skip certain obstacles without penalty if failing the obstacle could be potentially dangerous, such as a rope climb or a net ladder, where your strength giving out partway up would mean a very long fall.
* In the Spatterjay series by Neal Asher, some of the mostly immortal villains are trapped in large jar prisons. These are normally filled with a non-breathable gas but for celebrations, they will be filled with oxygen and the villains will be given food.
* In the special "Mewtwo Returns", Giovanni did this once with a whiskey glass, and later again with a cellphone. The man must have incredible grip strength.

* In the special "Truth or Square", the intro is talked about when the special mentions that SpongeBob was not the original starring character for the show. The theme song is briefly shown in three different variants; one with Squidward, another with Patrick, and a third with Mr. Krabs. All three of them fail to make it through the song, hence why SpongeBob was chosen.
* In the specialty coffee world, admitting to liking Starbucks is the same as admitting to cannibalism. In Canada, saying you like Tim Hortons will get the same reaction, given the ubiquity of Tim Hortons in Canada.
* In the special "Where's Gary?", Gary returns after SpongeBob has had a breakdown over him, in time to find him crying.
* In the specific case of Sanae, it goes into Childhood Friend Romance Tsubasa's mom lampshades it in the original anime, when she says that up until Tsubasa joined the team, he had very few friends.

* In "The Spider Man (sic)" she led the Herculoids in rescuing Zandor and Dorno.
* In "The Spinach Roadster", Popeye was taking Olive Oyl for a ride. To discourage Popeye, Bluto rearranges a sign reading 'ROUTE D' to 'DETOUR', sending him up a rocky mountain road.
* In the spinoff focusing on Vulkan and Corvus Corax, the Attilans have only one astropath, and "she's an ass". They aren't trying to say she has an unpleasant personality — Astropath Starass is a donkey.
* In the spinoff manga, an older Jun absolutely adores her baby nephew Makuru. The sight of him turns Jun from terse and stoic to cheerful and playful in an instant, to the point that her speech becomes more babyish to match Makuru. She won't even allow Yokoi to scold him for misbehavior, and can't do so herself when the potential for the boy to become a
* In the spin-off series, now-Admiral Geary rescues a bunch of POWs from a Syndic world. All of these turn out to be high-ranking Alliance officers, one of whom

immediately demands to take command of the fleet, claiming seniority over Geary. Someone points out that both the Alliance government and fleet HQ has given Geary command over the First Fleet and tasked him with a critical mission. The rescued officers brush him off, claiming that no one cares what the politicians want. Some of them, though, point out that they've spent years (or decades) in captivity and have no idea on the current state of affairs. Naturally, Geary is having none of that and delegates the responsibility of dealing with them to someone else. Of course, Desjani once again reminds him that he should have kept his rank of Fleet Admiral instead of demanding to be demoted.
* In the 'Spin-Off Showcase' episode, Lisa refused to participate in a cheesy family variety show so she was recast by a pretty blonde cheerleader of a decidedly less intellectual bent.
* In the spin-off, Wolfram and Hart has a special hell dimension where they keep people who have really ticked them off. The victim is brutally tortured by a giant demon before having their heart torn out before growing a new one. And the worst part? During all of this, their mind is purposefully programmed to believe they have a perfect suburban life so they have no ability to deal with the torture each time it occurs.

* In the Spirit Crucible Elpys, there's a field permeating the place that interferes with ether particles, which the Blades rely on for their abilities. The various Blade characters are depicted as being exhausted and in pain while in the area. Accordingly, the player's Blades will be significantly weakened during battle while in the Crucible, unable to access anything beyond their basic Arts. However, Poppi is a unique artificial Blade, and is powered by an internal Ether Furnace, rather than relying on ether from the environment. As a result, she remains at full power and can still use her higher tier abilities. The same is true for the DLC Blade Poppibuster, which is likewise artificial.
* In the spirit of jest, in 1998, the eastern half of Annapolis, Maryland declared itself separate and thus, the Maritime Republic of Eastport was founded. It's all done in fun, to foster a friendly rivalry between the east and west half of a town, separated by Spa Creek and celebrated with an annual tug-of-war.

* In the stage version this is followed by a girl crossing the stage with a sign that reads 'Reefer gets you raped... And you won't care.'
* In "The Stake-Out", Estelle and Rachel fear Carl is cheating on Harriet with his female police partner, Vanessa. They come into the stakeout, and from what they see, they suspect that he was doing it. They realize they were wrong, and that it was a stakeout indeed.
* In the standalone story "The Custodians", the System Police maintain order in the Solar System, but have no jurisdiction over Earth itself, which is riven by

"miniwars".
* In the Standard format of 2012-2013, manafixing became very strong, with 3 colors being the default setup, and all 3 color pairs being equally well supported. The following season saw a deliberate de-emphasis on manafixing, to the point that the most powerful decks in the 2013-2014 season were a single color.
* In the standard version, the perps display a monstrous disregard for the victim's human rights — yet they apparently still care enough to keep them alive. (To potentially file a police report no less.)
* In the Starfleet tutorial you go from a junior ensign (a fresh Academy graduate in the revamped version) to captain of your own ship in one battle. Justified in that the entire senior crew is dead so you have seniority. You retain your command seeing as you managed to pull off a victory that more experienced officers couldn't have. You do

* In the storyline that led into the controversial Detroit-era Justice League, Aquaman disbanded the JLA and argued that it needed a roster that was fully committed to the team, not a bunch of part timers who had other, more important things in their lives to focus on. This is pretty much exactly why writer Gerry Conway disbanded the team in real life, as he wanted to get rid of all the characters who had their own books (Batman, Superman, Wonder Woman, Green Lantern, Flash,
* In the story "Nightfall", the planet Lagash has six suns. As such, its inhabitants only experience total natural darkness once every two thousand years, when the suns line up and are eclipsed by the planet's moon. A wacky religious cult claims that there are things called "stars" which can be seen only at this time; the more fringe scientists cautiously agree that there might be more suns in the universe than their own six — maybe a few dozen or so. Normal people think this is bunk. One scientist laments that universal gravity is such a difficult and complex concept. It would have been so much easier to come up with, if only they lived in a simpler solar system. Say one where there was only one sun — but of course that would be impossible. Any planet in such a system would be dark half the time, and life couldn't possibly evolve in so much darkness.
* In the story of Arachne, a girl who claimed to be a better weaver than Athena and ended up in a contest with the Goddess of Wisdom herself, which ends with Arachne dying and Athena turning her into a spider in order to acknowledge and preserve her exceptional skills. There are many different tellings of the story, but they tend to fall into one of two categories, both of which fit this trope:
* In "The Story of Lando Freeman", after Robert and his (allegedly) long-lost son Lando appear on
* In the story of the Argonauts, Aphrodite curses the women of Lemnos with a terrible odor for neglecting her worship. The odor drives their husbands away and into the arms of concubines. As revenge, the women invoke this trope.
* In the story of Vice City, it's said that Tommy Vercetti spent 15 years in prison for homicide, being released at the beginning of the game. However, even if you disconsider the potential rampages made by the player in the sandbox mode, several missions require Tommy to straight up murder people in broad daylight with no consequences at all.
* In the story "Paperino e l'incubo dello zione" Uncle Scrooge is seemingly visited by characters from his recurring nightmares, then Donald discovers it's all a plot by the Beagle Boys to rob Scrooge. Scrooge then promises that he'll reward Donald with

* In the story "Smurfette's Inner Beauty", when Empath, Brainy, and Duncan McSmurf follow Hogatha to a Wizard's Ball after her magical makeover:
* In the story's timeframe, Annika is the CEO of the B.O.R.G Megacorporation, whose headquarters is a cubical structure five kilometers to a side, which houses 100,000 staff members and their families in a self-sustaining city-building that contains everything needed for life — living quarters, schools, supermarkets, "babytoriums", "relaxeries", "love-a-trons" and the like. Most people never leave it outside of a yearly vacation leave.
* In "The Storyteller", brothers Billy and Tony Anton played Daniel and Nathaniel

Ellidge.
* in the Storyteller's room, so while the majority of the corresponding chapter has you playing as Phoenix during the court sequence, the end of the chapter has you investigating with Layton and Luke.

* In the story "The Adventure of Black Peter": The first suspect in Peter's murder is a man who broke into his house. He claims he was looking for information about his missing father. Holmes is quick to point out to the police that such a small guy could hardly have impaled a man with a harpoon.
* In the story "The Adventure of the Illustrious Client", Kitty Winter gets
* In the story "The Dalek Invasion of Earth", and its film adaptation
* In the story "The Itch For Money", the Beagle Boys seek to get rich by acquiring and selling expensive crocus bulbs, but one of their attempts (robbing a fancy restaurant) ends with them clawed by live lobsters. At the end of the story, the Boys end up in prison and become enraged when the guard serves them lobster.
* In the story "The Remnant of VIV", when Ritsuka tells them they are in the show
* In the story "The Shining Beacon", Mordred has this reaction when Yang Xiao Long has no idea whom she or King Arthur is.
* In the story "The Three Students", a university professor is certain that one of his three scholarship students went into his office and started copying down the exam text before being interrupted. Holmes quickly figures out that only someone of his own height or taller could have seen the papers on the desk from the window, which eliminates the shortest student as a suspect.
* In the story "Touch Tone", a woman is indulging in some phone sex late at night at work when the guy she thought was on the other end of the phone walks into the room.
* In the story, Tyler inserts one frame of pornography into the reels of family movies. In the movie itself, there are a few instances of Tyler Durden's image (and in one instance his penis) appearing for one frame.
* In the story "Virtual Smurfality", when Papa Smurf, Handy, and Miner are working on an all-night project together, Papa orders three glasses of cinnamon tree bark brew (the Smurf version of coffee) from Tapper's Tavern. Tapper fills out the order, telling Papa, "Why, this brew is smurfed so strong, it can even put smurf on your chest, I tell you!"
* In the story "Wisteria Lodge", the killer escapes but is later murdered in Madrid. A couple of other stories close with hints that this trope may have occurred.
* In the story "Zio Paperone e gli occhiali a effetti speciali" from the
* In "The Strange Case Of The Ghost Bus," DM invokes James Bond's "Shaken...not stirred."
* In "The Strange Secret of Bruce Wayne", Hugo Strange mentions that he interrogated Alfred offscreen about Bruce Wayne with one, and it took him a while to crack. Alfred apologizes to Bruce for not being able to resist, but Bruce doesn't blame him.
* In "The Stray", Wander encounters a sad little kitten named Li'l Bits, who proceeds to cheerfully exploit Wander's hospitality and helpfulness at every turn, like forcing Wander to repeatedly rescue her headless teddy bear from a ferocious monster. Sylvia grows suspicious, and rightly so when it turns out
* In the strip for September 11, 1994, Garfield can't seem to find anything good on TV, but then he sees Jon running from a runaway lawnmower. Garfield gets the popcorn and soda.
* In the strip from the day of the 1992 election, Jason is watching TV and every channel is about to say who the winner of the election is. Jason panics and keeps flipping until he finds a channel showing an episode of
* In the strip's take on the Cambridge Analytica scandal, instead of (allegedly) using Facebook data to manipulate voters, "Carnage Analytica" manipulates "Snoutbook" users to make them easier for predators to catch. The user really

* In the Style of... — When a whole album is produced so as to imitate another artist or genre.
* In the Style of... one of the aforementioned fast rappers, though it is unclear from his videos whether he manages the cadence on his own merits or speeds things up for those segments.
* In the sub-episode "Bully for Skippy", when Slappy has had enough of the bully picking on Skippy, and his school teacher AND an FCC advocate against cartoon violence forbid Skippy and Slappy from doing any violence (cartoon or self-defense), she builds a machine that performs the violence on the inside, technically censoring it. Slappy then puts the bully, the teacher, and the FCC advocate through it, teaching them a lesson, and changing the bully's ways.
* In the subplot, Lorenzo is in love with Jessica, and Launcelot is Jessica's friend, who acts as go-between delivering their love letters and helping them to carry out their elopement. All three characters aren't seen together until very late in the play when Jessica is married to Lorenzo; at this point, they've clearly become a case of this trope, with Lorenzo joking that he's jealous of Launcelot and the two proceeding to rank each other out.
* In the subsequent training, when Ichigo has restored his powers but finds himself running for dear life from Urahara. The spirit of his weapon (
* In the Subspace Emissary, Mario and Pit fight Link and Yoshi when one team finds the other standing over the dissolving fake trophy of either Zelda or Peach. Which team finds which depends on the player's actions. In both cases, the misunderstanding is eventually cleaned up and they join forces. This is one of several such misunderstandings that occur throughout the Subspace Emissary, most of which involving Meta Knight (i.e., Marth, Lucario, almost with Snake). There's almost one between Fox and Sheik, but it is
* In the subway behind the brick wall is an excellent example, after some hallways using Alien Geometry
* In the Sugar Rain series, characters ride 'horses'. This functions to emphasize that English is really a 'translation' when a rider settles in for the night he gives the 'horse' a feedbag of meat.
* In the "Summer Belongs To You" special, in which Phineas and Ferb travel around the entire world to have the longest possible day of summer, they end up stranded on an island. Phineas is so upset that he might fail that he starts snapping at everyone around him and his usual ability to think up insane solutions on the fly won't work. Isabella has to snap him out of it as he gets more and more desperate.

* In the SVU episode "Screwed", a judge throws out damning evidence against a defendant because said defendant made a comment to the effect that he had a lawyer representing him in an unrelated case. In reality, it's extremely unlikely that any judge would rule that the detectives could reasonably be expected to interpret an offhanded mention as him asking for a lawyer (and if a trial judge did, it could almost certainly be overturned on appeal).

* In the Temple of the Ancients, the party realises they can't get the Black Materia, which Sephiroth needs to summon Meteor, without killing one of the party members. Cait Sith, being 'a toy' controlled remotely by a Shinra spy, agrees to sacrifice himself to keep Sephiroth from getting it, but is sorrowful about his death, asking the party not to forget him. He's immediately replaced by the identical "Cait Sith no. 2", with all memories intact. Later, Aeris disappears and is killed in the City of the Ancients, and she is not replaced, leaving an empty spot in the party. At the end, it's revealed that her sacrifice allows the Planet to repeal Meteor, first by unleashing Aeris's Holy spell and then by unleashing the Lifestream.
* In the "Ten College Athletes" poem, it's mentioned that the athletes in question (three of whom are left as of the start of the senior year), aren't doing well in school, leading one to flunk out and stab his professor.

* In the Tenth Anniversary collection, he says that he found Calvin and Susie's relationship initially to be too forced, and in the second arc he just let the characters bounce off one another. He further notes that he very nearly wrote himself into a corner doing that.
* In the Tenth Anniversary Collection, Watterson would only state that Hobbes is a comment on the subjective nature of reality; Calvin sees him differently from everyone else.
* In the Tenth Doctor's era, the show again flirted with the implications of the Other, with characters noting that the Doctor was something strange, mythic, and terrifying even by Time Lord standards. The Tenth Doctor's era also introduced the aforementioned Meta-Crisis Doctor, who (due to retcons) ended up being numerically correct for the Valeyard's "between your twelfth and final incarnations" placement and was born of blood and battle and fury, and who would age and be unable to regenerate, all of which lead to some very common fanon regarding his fate. This was also the era where the running title gag of "Doctor Who?" started to gain more significance, with

* In the third and fourth series, the prophecy du jour (known to the readers, Firestar, and Jayfeather) is revealed at least three times. Once to Jayfeather's siblings, once to
* In the third arc, the history of Pantala has this theme as well. HiveWings tried conquering the LeafWings (who fought back and were almost completely wiped out, along with the trees they fought to protect) and the SilkWings (who surrendered and now live as a lower class society subservient to the HiveWings). The remaining LeafWings are pretty resentful, and revolutionary groups within them plan to burn down hives where the HiveWings and SilkWings live. Unfortunately, this would not only kill supporters of the war, but also innocent dragons who either couldn't, refused to, or were unable to participate in the war, as well as several blameless SilkWings, especially their dragonets, who can't fly away from fires since they aren't born with wings.
* In the Third Astral Era, the Allagan Empire was formed utilizing extremely powerful Magitek and magical power that came to dominate most of the world. To this day, most of the secrets of their magic and how it worked has been lost.
* In the third attempt, Dr Calvin puts the robots in the first situation again — but the unmodified robots think it's the second, and stay still; the lost robot had been recently trained to recognize the difference between certain radiation wavelengths while the unmodified robots hadn't.

* In the third book, Harry endures a visit from Uncle Vernon's sister Marge, who comes to visit while he's home for the summer. She gives Dudley expensive gifts like toy robots and video games but gives Harry... a box of dog biscuits. Just to

really rub in how much she hates Harry, she then glares at Harry, daring him to ask why he had gotten dog biscuits instead of an actual present. He's too smart to take the bait.
* In the third book of Bernard Cornwell's Saxon Chronicles, the main character Uhtred and his adopted brother Ragnar storm Dunholm, the fortress of a rival Danish lord named Kjartan, who killed Ragnar's father about six years prior. This is one instance of a Storming the Castle happening before the story's climax, as the actual climax involves Uhtred duelling another rival and coming to a truce with said rival's army and the army of the king he supports.
* In the third book of the trilogy, when we meet the Gallivespians, who are a fierce and vicious assassin-race who are born with poison spurs in their heels and ride about on dragonflies, because they're all about
* In the third book of this series, it turns out that Mallory Keen is also a demigod and inverts this trope. She is the daughter of a human man and a goddess.
* In the third book, Princess Eilonwy finds a slightly battered horn on the beach, which had once belonged to her family (of which she is the last surviving member). As she is about to spend a lengthy period of time being fostered in a foreign court, she gives the horn to Taran as a symbol of their mutual promise not to forget each other.
* In the third book, Sam gives Frodo the password "Elbereth" to lower a ladder in the Tower of Cirith Ungol, reasoning that "No orc would say that".
* In the third book, Vaness has two scrolls made that each reflect what is written on the other, serving as a rudimentary, two-person chat.
* In the third book when facing a Bogart — a shapeshifting creature that turns itself into a person's phobia — Ron naturally has his turn into a huge spider. The narration says "quite a few people screamed", showing he's far from the only arachnophobe in class.

* In the third chapter, Sci-Twi asks Sunset if she has her own human counterpart somewhere. Sunset explains to her and the others that after figuring out how to use a computer, she looked up her own name and discovered that her human self lived in another town and died in a car accident, and her own parents died of grief soon afterwards. It's the reason why Sunset decided to keep her name.
* In the third Danish film, Milo has declared war with the much more powerful Albanian mob. He returns home and quietly smokes a cigarette beside his empty pool, seemingly resigned to his fate. We don't find out what happens next.
* In the third dimension, he manages to be far more competent and sane. He gets the Third arrested but also keeps visiting him in prison in an attempt to help him rehabilitate and eventually rejoin society.
* In the third edition, characters can accesses earth nodes to gain powers. Also certain magical locations give temporary abilities when used right.
* In the Third Edition of the game: Geomancers, especially those that worship the aforementioned Ehlonna, are very likely to be this trope. Parts of their body take on the appearance of animals or plants, and they can gain the abilities of certain animals or plants. Depending on the player's choices, the character can be quite

cute and cuddly or else pretty and graceful. They can also throw nearly every spell in the book at you, and all their spells are always the strongest they can possibly be. While animals are generally not that useful in the game due to their low hit points and slow advancement, a human with animal abilities can be terrifying. This is widely considered to be one of the most game-breaking prestige classes, despite the fact that you have to gimp your character for five levels in order to qualify for it (multiclassing comes with hefty penalties). Mainly because Geomancer spells are typically too hard for level-appropriate monsters without character classes to dodge/resist AND they can have ridiculously high skill modifiers thanks to their animal attributes.
* In the third edition they can no longer pass over running water on their own, but can be carried over it in a container. Vampires made from water-dwelling beings (such as, say, a merman vampire) can ignore the restriction entirely.
* In the third entry, Gaz pranks Dib by tricking him into running out of the shower and straight out of the house,
* In the third episode, a Kavalryman takes Senator Keene hostage by threatening to blow himself up with a bomb rigged to his heartbeat, so it will explode if they shoot him. Laurie shoots him anyway, believing he was bluffing. However, it turns out he wasn't, and Angela has to quickly toss his body into the open grave so the blast is contained as people run for safety.
* In the third episode, a stray bullet catches Winters on the leg. Although it's in the middle of a serious scene, he gives a look that says "oh for crying out loud."
* In the third episode , he's goes on a date with another dog when he starts peeing himself out of nervousness causing the dog to leave.
* In the third episode Joey is rehearsing for a play where his character asks for a cigarette before being executed. He drops the lighter and coughs after a single puff. As Chandler used to smoke he decides to show Joey how to do it properly which leads to him falling
* In the third episode of the BFQ of Everything, Dara and Chelsea wrote down "Smells Like Teen Spirit" as a joke answer to a question about a deodorant-inspired song. They were right.
* In the third episode Scrooge is seen to do this in a psychological manner. When his Board wants to cut spending and suggests firing some of his employees, Scrooge goes on long impassioned speeches to defend them. This does next to nothing to sway their minds and when one of Gyro's inventions crashes through the wall Scrooge decides to skip the theatrics and essentially scare the Board into dropping the matter by confirming that the ones they want to fire are completely crazy and almost certain to come after them for revenge. That single declaration gets them to quickly decide it's in their best interest to keep Scrooge's workers hired and as far away from them as possible.
* In the third episode, "The Great Game", Holmes deduces that Molly's new boyfriend Jim is gay because of vague traces of make-up, subtle hints in his clothing, and slipping Sherlock his phone number.
* In the third film, she does the same thing to the rapist stepfather of one of the people in the rape survivor group she's in. Only instead of using a shotgun,
* In the third game, a mere loony can kill you with a single swing of his fist. And you are not allowed to shoot him (or you lose).
* In the third game, any headshot to Unitologist soldiers, even ones with weapons that would normally cause their heads to fall off will make it explode. This applies to explosive weapons, though it's unclear how instantly severing their body parts with one single explosion would cause their head to disappear other than a logical headshot with an explosive.
* In the third game, a romanced Tali and Male Shepard end up flirting heavily throughout the mission aboard the Geth dreadnought, though they do at least keep this to moments where they are not actively being shot at. Eventually it culminates in Shepard and Tali alluding to finding somewhere "
* In the third game (assuming certain prior conditions are met), Tali
* In the third game, assuming she survives the first, Ashley Williams will be

promoted to Lieutenant Commander.

* In the third game, Dahlia Hawthorne is similarly accompanied by a trio of butterflies most of the time.
* In the third game EDI riffs on the notion that Shepard might be considered Transhuman and the legal ramifications of this, causing Shepard to become highly concerned. EDI then emphatically states that Shepard is
* In the third game, Godot is introduced as yet another prosecutor of legendary skill who has never lost a case. When the judge asks him how many cases he's prosecuted, he answers with... zero.
* In the third game, Godot prosecutes a case where someone died from a poisoned cup of coffee. Later it's revealed that
* In the third game, Godot, the primary prosecutorial rival, is a coffee addict who drinks 17 cups per case. However, when he discusses the rather awful restaurant Tres Bien, he has this to say about the expensive coffee.
* In the third game, green dragons upgrade to gold dragons and red dragons upgrade to black ones. The black dragons are more powerful overall due to tradition, but the gold ones are faster. Many other units establish a color hierarchy as well: four out of seven basic units from the Inferno faction are coloured yellow or pink, but wind up red when upgraded.
* In the third game, in some cases your health will reset to full if you die and need to go back to a checkpoint, even if you were on the verge of death when you trigger it. Keep dying and you'll get additional painkillers and ammo, just in case shortages are the problem. Also, for most of the Achievements/Trophies where you have to kill a certain number of people during a scripted
* In the third game, it didn't matter what Rean and Class VII do in their attempt to prevent the Great Twilight. There is no way to
* In the third game, it's possible to start an entirely new romance with any of the first game's love interests. This includes a
* In the third game, Jack becomes one of these towards her biotic students at Grissom Academy (though when you get past the verbal abuse,
* In the third game, Max runs afoul of the UFE, who go beyond shooting back at favela gangbangers to beating down and executing unarmed civilians apparently just for the crime of being in the vicinity.
* In the third game Shepard is reinstated in the Alliance Military, but that doesn't mean that s/he does everything they tell him/her to or in the way they hoped s/he would. However, by the time there's no intergalactic politics to meddle in in the game and most of the organizations more or less admit that
* In the third game, Shepard travels through an ancient krogan temple complex with underground ruins, which despite being abandoned millennia ago, have survived remarkably well and only have a minimal amount of structural damage. A side-mission on Tuchanka involves a ground-to-space cannon that hasn't seen use since the Rebellions. Cerberus gets it up and running pretty quickly, which works out for you once you kill them.
* In the third game's second case, the emergency buzzer at the crime scene, which was pressed at the time of the murder, had no traces of prints on it. This is used by Phoenix to prove the victim didn't press it, but the real killer did, resulting in the trope name almost being mentioned.
* In the third game, the boss of Round 3 was a robot copy of Axel, only difference was his gloves were purple instead of red so that players who played in co-op wouldn't attack each other by mistake if one of them was playing as Axel.
* In the third game, the entire quarian fleet is under threat from a single geth dreadnought, the largest dreadnought ever built.
* In the third game, the female protagonist is a successful idol singer herself. Monkey Pink was not pleased.

* In the third game, the final confrontation with the Illusive Man involves an extended Motive Rant on his part. Shepard can

* In the third game, this becomes a possible Villainous Rematch: if you fail to destroy Bit and Byte with their weaknesses, they'll reappear together (or individually if you killed one but not both) at the end of the first final stage with upgrades to fight you again. The same happens if you fail to kill Vile in a Sidequest: he'll show up at the end of the second final stage with prototype ride armor and a few new moves.
* In the third Hetalia Fantasia CD Canada is captured and starts to get
* In the third installment, healing is mostly divided between the Princess/Prince class (who wields a number of HP and MP-restoring effects in addition to party buffs) and the Monk class (who has scads of instant heals and status-curing moves, in addition to some fairly impressive martial arts skills).
* In the third installment, it is the battle against the Soul of Cinder. At first the music is rather dramatic, but as it enters phase 2, it becomes a reprise of the music that played in the fight against Gwyn in the first game, as the boss is an amalgamation of every person who has linked the Fire to continue the Age of Fire, starting with Gwyn.
* In the third installment of the movie adaptation, which diverges horribly from the book series (it moves the series thirty years forward), Anne and Gilbert end up adopting Dominic, the son of a friend of Anne's who was killed helping her look for Gilbert, who was missing in action during WWI.
* In the third installment's single player, Kai Leng is full of these in gameplay, (
* In the third Lostbelt story, the bad guys summon a meteor to crush the village giving shelter to the heroes. Spartacus sacrifices himself by leaping up to shatter the meteor, which fatally wounds him.

* In the third movie, Dr. Evil tries to kill Austin's father Nigel Powers with the classic "cutting in half with a laser beam" schtick, but it moves so slow that Nigel has time for some
* In the third movie, Jack's argument for a combined attack hinges on the fact that pirates do not get along with each other at all. When the Pirate Lords suggest holing up in Shipwreck Cove and waiting out the EITC blockade, Jack points out that while they're united by a common enemy now, within a month they will have turned on each other and turned their "fortress" into a bloodbath of infighting. Nobody disagrees with him on this point.
* In the third movie, Rock Lee manages to knock himself in the head with nunchakus, despite being an otherwise competent fighter.
* In the third movie, the "cop-killer" bullets that have just become available on the streets are demonstrated by Riggs and Murtaugh on the range. They strap a
* In the third movie, the entire body came off, leaving the car little more than an oversized bare-framed go-kart, with Junior having to hold up the light bar over his head so it could still be identified as a police cruiser.
* In the third movie, the Sky Marshall (Commanding General/President) is singing at a concert. The song chorus goes "It's a good day to die!"
* In the third movie, we heard a cat screeching offscreen during the scene where the Chipmunks and the Chipettes were fighting over one mango on an island. What's that? Why's there a cat on an island?
* In the third novel, Peterson's henchman clubs Drummond and brings him, unconscious, to Peterson. When Peterson muses that Drummond needs to be killed, the henchman points out that they might as well do it there and then. Peterson, who by now has a highly personal grudge against Drummond, rejects the idea out of hand, in favour of waiting until Drummond has recovered consciousness so he will know defeat before his death. This gives Drummond time to escape, and inflict some nasty

injuries on the henchman too.

* In the "Thousand Year Blood War" arc, Yoruichi reveals that in addition to turning into a regular cat, she can turn into a catgirl. Her clothes disappear, she grows a black tail, and she gains cat ears and cat paws on her hands and feet, made of electricity. Her physical stats skyrocket, but her mind also reverts to a feral cat that cannot talk or understand speech, and she can be distracted by catnip.
* In the Threeboot continuity of the Legion of Super-Heroes, the enlarged Kandor is like this in that the entire place is essentially under self-imposed quarantine to preserve the last remnants of Kryptonian culture. No one's allowed to leave because if they found a world with a yellow sun, they'd become super and never come back; no one's allowed in because the entire rest of the universe knows this and doesn't exactly think that first part is a good idea.
* In "The Three Gables", Holmes forces Isadora Klein to make restitution to the woman whose house she had robbed, but doesn't turn her in to the police. In this one he even jokes about how often he ends up letting the criminal go ("I suppose I shall have to compound a felony as usual").
* In "The Three Gamblers", the corpse of a dead criminal seems to have climbed the stairs from the cellar where the body was left and scratched at the door. The solution:

* In "The Three Students", when Holmes and his friend confront the student who had copied half the answer key to a upcoming major exam, they find that he had just written a letter withdrawing from the examination in question, and that he was planning to leave the university to take up a job offer in Rhodesia. They decide to accept his repentance and wish him well in his new career.
* In the Thriller Bark arc, Gecko Moria steals Luffy's shadow, uses it to animate a giant zombie called Oars and sets it on the rest of the crew. One way to return the stolen shadows is to defeat Moria, and as the battle goes on it seems like that the only way to defeat Oars is to remove Luffy's shadow. At one point Moria appears in a special cockpit in Oars' chest, giving the crew this dilemma; They need to get to Moria to stop Oars, but in order to get to Moria, they need to beat Oars. Eventually, the crew gets around this by breaking Oars' spine so that that the zombie can't move, even with Luffy's shadow.
* In the Thriller Bark arc, Sanji says that in the past, he'd read a book about Devil Fruits, and decided that only the Clear-Clear Fruit's powers of
* In the Thriller Bark Arc, some of the Straw Hats' shadows, as well as their allies', were stolen by Gekko Moriah, and as a result will die should they get hit by direct sunlight. This means they have to kick Moriah and Oars' asses before the sun rises.

* In the tournament mode, there are various unranked challengers in each tournament. All of them are hard, and most require you to be playing on the hardest difficulty. If they're going to show up, they'll challenge you after doing a destruction on some other opponent. There's at least one occasion when one unranked challenger will challenge you after beating another unranked challenger, too.
* In the tournament scene, new decks sometimes "take up the mantle" from older decks that they share strategies (but not necessarily cards) with. Aggressive red decks will usually be named some variation of "Sligh" or "Red Deck Wins" after

older, popular decks; decks that put cards into their own graveyards might be called "Dredge" even if they feature no dredge cards; Green/Black mid-range decks typically inherit the name "The Rock," unless they also include red, in which case they take up the mantle of "Jund."

* In the Tower, Shinsu is everything. It's an unlimited power and is breathed instead of air, so those who are apt in controlling it prefer this to normal physical attacks. So when people who are extremely resistant to it appear, like Yuri and Viole, this trope just piles up. The first example is when an administrator tests people who want to go up the Tower for their ability to withstand Shinsu at all. He first uses it to push back everyone and then those who can pass through a wall of it may proceed — but the seemingly weak protagonist Bam is not even pushed back by the wave that was supposed to affect everyone.

* In "The Trial of a Time Lord" season, it's pretty much revealed the whole reason for the trial was to prevent the Doctor from finding out that the Time Lord High Council had moved (yes moved) the Earth and renamed it Ravalox because someone managed to steal data from the Matrix and bring it to Earth.
* In "The Trial of Audrey Parker", two criminals hijack Duke's boat and kidnap everybody by sailing it out to sea. One of the criminals had the power to read minds, but his mundane partner was clearly the brains of the operation.
* In "The Trial of Mr. Wolf", the Big Bad Wolf gives a heavily-biased account of the events of
* In the "Trial of the Monarch" episode, in a flashback, Dr. Girlfriend is handed her old superhero costume by her old boyfriend (Phantom Limb). She remarks that

there are now "hard chunks" in the fabric, which Limb claims are tears. Monarch naturally decries this, claiming that Limb was "just pounding his invisible meat" into it, at which point he's cut off by Dr. Venture, who doesn't want the boys hearing about that. But then Hank protests it's okay because he's seen Dean do it, at which point Brock quickly gets the boys to another topic. The judge didn't want to hear it either:

* In the Turkish folktale "Five Boiled Eggs", a poor young boy receives a free meal of five boiled eggs from an innkeeper. He grows up and becomes a wealthy merchant, and returns to the inn years later, asking how much he has to pay. The innkeeper charges him 10,000 akches, claiming that if he hadn't eaten the eggs, they would have hatched into hens, which would have laid more eggs that would have hatched into hens, and so on. When the merchant refuses to pay so much, the innkeeper takes him to court. But it's subverted, when Turkish folk hero Nasreddin Hodja offers to defend the merchant. On the day of the trial, Hodja deliberately shows up late and claims that he had the idea to plant and harvest the boiled corn from his breakfast instead of eating it. When the innkeeper scoffs at the idea of growing boiled corn, Hodja points out that he couldn't have hatched chickens from boiled eggs either. The innkeeper gets laughed out of court.
* In the Turnabout Kirby arc, Meta Knight references the incident and shows the judge the "scars" from it, although again the camera shows the back of him.
* In the TV adaptation of "Revenge of the Lawn Gnomes", Major McCall (Mr. McCall

* In "The Two Live Crew Job," Eliot tricks his hitter counterpart, Mikel, into getting close enough to him that he can handcuff her to him. Later she holds up the handcuffs shyly while sitting with him at a bar, the implication being that she wants to use them.
* In "The Two Mrs. Grissoms," Marlee Matlin played a professor at an institute for the deaf.
* In "The Two Mrs. Nahasapeemapetilons", Homer and Apu try to make Apu's mother believe he's already married, in an attempt to get out of an arranged marriage. It initially works until she shows up in Springfield to meet Apu's alleged wife, so Homer tries to talk Marge into pretending that she and Apu are happily married. That also appears to work until Apu's mother finds Homer and Marge in bed together and Apu admits the truth, leading to the arranged marriage to take place, after all (though, thankfully, Apu and his arranged wife, Manjula, turn out to be an excellent match). The entire ordeal gets lampshaded:
* In "The Two Mrs. Sheffields", Maxwell's mother visits him, but takes an immediate dislike for Fran, demanding that he fire her. So, Maxwell decides to get back at her by proposing to Fran. Eventually, Fran realizes that Maxwell's only going through this out of spite, so she starts playing along, soon making him feel guilty about this insincere proposal.
* In the two-part episode "Birthright", Worf discovers a Romulan prison camp where Klingons and Romulans have learned to live together in peace. * In the UK series, this is subverted when Neil notices that a janitor is staring at the film crew and glances camera-wards to see what he's staring at.
* In the UK, several high-profile celebrities have been dragged through the media for tax avoidance, basically using legal loopholes to pay less tax. The government have been madly trying to find something to pin on them, but have had to accept that it is all legal, while they try to plug the holes, instead they settled for decrying them as doing something "morally wrong". This becomes hilarious due to Parliament having recently been pulled up due to a scandal about the expenses they had been claiming.
* In the UK, she has four number ones as lead artist and five overall. Three of them - "I Kissed a Girl", "California Gurls" and "Roar" - are hugely iconic, but the other one was "Part of Me", which is not forgotten but is not as well known as some of her other songs such as "Teenage Dream" (#2 peak), "Hot N Cold" (#4), "Dark Horse" (also #4), "Last Friday Night (T.G.I.F) (#9) or her signature "Firework", which peaked at #3. The song she featured on, Calvin Harris' "Feels", is also mostly forgotten.

* In the UK, there was a poster campaign in many universities about this, and how you maybe need to watch out for your friends if they have "terrible hangovers" that get worse throughout the day and have extra symptoms; brushing it off as "just a hangover" (which is easy to do if you're a party-loving student) can easily lead to people dying.
* In the UK, there were CGI advertisements for Kellogg's Fruit Winders starring anthropomorphic fruits who made Fruit Winders by killing other anthropomorphic fruits.

* In the UK, the toilet tissue brand "Andrex" has been advertised by a Labrador Retriever puppy for decades. It is the UK's most popular dog breed. It doesn't hurt that Retrievers are a relatively docile and beginner-friendly dog breed.
* In the UK, they scored another Black Sheep Hit with the equally jokey "Lazy Sunday". The lukewarm reception of the band's more serious songs led Steve Marriott to leave the group in order to form Humble Pie.
* In the UK this has an odd occurrence, having produced so many successful drivers means that not one of them is overwhelmingly considered to be the greatest (Moss, Clark, Stewart, Hill, Mansell and Hamilton all being equally well regarded for example) but the commentary partnership of Murray Walker and James Hunt (or Martin Brundle) and the BBC's use of "The Chain" as the theme song for the coverage are so etched into the public mind that any other suggestions will always be compared to that.
* In the UK version, The Magic Mirror is absent. Instead, Lord Farquaad gets the information he needs from The Gingerbread Man. A couple of fairy tale characters were also left out and replaced with characters that would be more recognisable to the UK audience.
* In the UK we have a trilogy of amusing ads featuring scruffy dog, Harvey, who cleverly uses the power of advertising to manipulate his long-suffering owner. The third ad charts the romantic adventures of Harvey and his new girlfriend - one of which involves them dragging a large dino bone past a snoozing museum guard.
* In the UK, where there is no 1st Amendment, trolling is technically illegal under cybercrime laws, but only in certain circumstances. For instance, going on a messageboard and winding people up for one's own amusement is fine, but spamming facebook tribute pages for the recently deceased with hateful messages is illegal.
* In the Ultimate Comics, Richard and Mary actually survived the Hulk (although seriously injured). Peter was an infant at the time. * In "The Undertaking", Walter Steele is being held prisoner in a guarded building, but there's only one guard on the roof. As there's no building close enough from which Oliver Queen can shoot a zipline attached to an arrow (his usual trick) he jumps from an aircraft using a steerable parachute.

* In the Under the Hood fake-documentary feature that was released with the Tales of the Black Freighter, there's a snippet of an interview with the bartender of a bar that Rorschach frequents. He defends his customers and condemns Rorschach. Ironic, considering his patrons are criminals and Rorschach is the so-called hero. Also, within the Black Freighter mini-continuity, there is a pub where pirates congregate.
* In the "Under the Hood" storyline, the Red Hood, a resurrected second Robin (Jason Todd), goes on a revenge spree that culminates in him and his former mentor, Bruce Wayne, in an apartment with a bound Joker. Jason and Bruce debate about whether or not Bruce should have killed the Joker to prevent the death and terror he has caused, with Bruce making a slippery slope defense that if he started killing, he'd never stop. Jason breaks down and says that he's angry that Bruce didn't kill the Joker... to avenge Jason. It's meant to show that Jason's bluster does somewhat boil down to him thinking that Bruce didn't love him enough and that he doesn't understand Batman's philosophy. However...
* In "The Undignified Melodrama of the Bone of Contention," the governor's will is discovered next to an old book in a decrepit library. Lord Peter deduces, from the water stains on the book but not the will, that one of the heirs had hidden it there to keep the condition from being fulfilled.
* In the unfinished novel where Carter visits Jupiter and fights the skeleton-like natives, in spite of that world's greater size, the effective gravity there is even smaller due to centrifugal force or something.

* In the United Kingdom, the Independent Television Authority imposed a per-episode cap following the 1950s rigging scandals in the US. For at least two decades, this limit was fixed at £6,000 with no adjustment for inflation. Eventual successor the Independent Television Commission would eventually remove the cap in 1994.
* In the United Kingdom, the paired episodes "Shanghaied" and "Gary Takes A Bath" were banned for several years. "Shanghaied" was banned because of its frightening images (especially a disturbing, surreal sequence where SpongeBob and Patrick are sprayed by perfumes, and Squidward falling through the Fly of Despair) and "Gary Takes A Bath" was banned for three reasons: The inclusion of an inappropriate "don't drop the soap" gag (which refers to prison rape), a scene where SpongeBob deliberately straps a bomb onto himself (which brings suicide bombers to mind and came off as
* In the United Kingdom, tourism from Japan remained strong quite some way after the bubble burst, right up until the 2008 Great Recession commenced, and is still quite prominent nowadays. Other than London, popular locations for tours to visit include Stonehenge, Oxford, York and other notable towns and cities across the UK.
* In the United Kingdom version, it is very common for contestants to keep spinning and not buy a single vowel. On rare occasions, no vowels will be purchased for the entire game, nor will any be called in the Speed-Up. If it is any indication, host John Leslie would immediately tell a contestant that he/she must solve if only vowels remained in a puzzle.
* In the United States Air Force Basic Military Training program, the instructors aren't allowed to use profanity. So they develop a weird alternate vocabulary that lets them get the same ideas across without actually swearing. It's fairly common to hear an instructor screaming
* In the United States and Canada "hockey" means ice hockey, not field hockey, even though field hockey is the older sport and goes back to the middle ages.

Sometimes North Americans are surprised when Europeans and Asians refer to field hockey as just "hockey".

* In the United States, it's a common practice among middle and highschoolers to post misleading updates about fake parties about to happen or are currently happening in order to intentionally mislead police tracking said Facebook or Twitter posts in the opposite direction of a real party, or just in a random direction for laughs. It's come to be called "Pied Pipering", at least in southern states. It's also common (and highly illegal) to "weaponize" police by posting fake concerns of nonexistent suspicious activity on fake accounts to send police or other authority figures to spy on the houses of people the poster doesn't like, in the same vein as "SWATting".
* In the United States legislating from the bench is considered something to be avoided, due to the spirit of Checks and Balances. However many a judge will write in their judicial opinion that the applicable legislature should in fact make a law and/or regulation to prevent a case like this happening again.
* In the United States, many candidates for President cite their military service as part of their qualifications. The U.S. Constitution states that the President is Commander in Chief of the country's military, so theoretically military experience is important for tha part of the President's job. * In the United States, many fast food discounts are void in Alaska and Hawaii.
* In the United States, many slot machines will pay out $1199 where they would normally pay out $1200 in winnings. This is because a win of $1200 or more will require both the person and the casino they played at to report their winnings to the IRS, which is more than a little inconvenient and time-consuming for everyone due to the paperwork involved.
* In the United States, not only does Christmas music often start playing in mid to late October, but many stores will start putting away Halloween merchandise to make room for Christmas stock over a week before Halloween. Other stores, namely ones with a garden center or outdoor center can start selling decorations as early as September!
* In the United States, "SC" refers to the state of South Carolina. Within Northern California, it means the city of Santa Cruz...unless you're in the Silicon Valley area, in which case it refers to the city of Santa Clara.
* In the United States, the courts have ruled that the purpose of the tax laws are to collect taxes on income, *not* to punish other unlawful behavior. They have also ruled that reporting illegal income is not "self-incrimination", since you aren't being asked to confess to any specific crime.

* In the United States, the Supreme Court has ruled that gathering information by violating the Seal is a violation of the First Amendment and as such inadmissible in any court.
* In the United States, the two highest-profile pageants are Miss America and Miss USA, the difference between the two being that Miss America is a standalone pageant and one of the longest-running in the world, while Miss USA finds the American contestants for Miss Universe and Miss World
* In the United States, they had two Hot 100 entries, with the #30 "Firestarter" and "Smack".
* In the United States this is called "scope creep" particularly when it happens to public works projects (highways, dams, railroads etc.) and is often cited as one of the main reasons for the exorbitant construction costs in the US compared even to fellow high wage developed nations

* In the United States, tipping your waiter or waitress is common and shows the employee that you valued their services whereas not tipping them or tipping very low shows that you did not like the service. In Japan, adding a tip is considered to be very rude due how people view it as you assuming that they don't make enough money or need money out of pity. Mind you, in the US it's not uncommon for people in the industries where one usually tips to actually not make enough money, since quirks in the law mean that it's sometimes legal to pay below minimum wage with the expectation that tips will make up for it (but they're not mandatory and can be morally withheld in case of very poor service).
* In the United States, when a judgment has been reversed, a fresh action may be lodged within a year and a day regardless of the Statute of Limitations.
* In the United States, while the series is arranged identically to the Japanese one, it is divided between seasons rather than by game equivalent. The current arrangement is:
* In the Universal Century, aka the original Gundam continuity, actual laser weapons short of apocalyptic superweapons have been rendered obsolete by ablative anti-laser coating and Minovsky particle dispersion. It's also stated that beam weapons were found to be more efficient than their laser-based counterparts.
* In the Universal Century, stealth is usually done through the use of "dummies": rapidly-inflating balloons that have the same general shape as a mobile suit or a space cruiser (or an asteroid). It is difficult to tell them apart from the real thing from a distance, except that they don't move or shoot back. Another common method is to have a mobile suit shut down while clinging to an asteroid or piece of space debris (which there is plenty of thanks to the One Year War), then surprising the enemy by suddenly switching on and attacking.

* In "The Unquiet Grave" (sometimes entitled "Cold Blows the Wind Today Sweetheart"), the dead lover objects to mourning that lasts any longer.
* In "The Unsuspected", Steve is exposed to spores from a poisonous mushroom and he becomes violently paranoid. Thinking the others are trying to turn him over to the SID, he lures them away one by one from the ship and ties them up inside a vent.
* In the unused script, old Doc Brown travels to the sixties and has to avoid being seen by young Doc Brown. So he hides behind an empty mirror frame.
* In "The Uploads", Gumball remarks that he needs to wash out his brain after he sees Mr. Small exhale himself inside-out.
* In the upper layers of the atmosphere, air drag can cause a satellite to speed up. As an initially circular orbit decays, the change in gravitational potential overcompensates for the energy lost to friction—until the drag force grows large enough.
* In the Urban Arcana setting, it is possible to give sentience to an animal or plant, increasing his/her Intelligence, Wisdom or Charisma, and even giving him the ability to speak. Doing so is a complex incantation, and serve little purpose except for the more creative players/game masters.

* In the USA, AMBER Alerts are always sent out when certain criteria are met after a child goes missing or is known to have been abducted, and typically when said abduction is in a vehicle. Understandably, sometimes the person they were last seen with has a description like: "Last seen with a 'white' male, 5'9 to 5'11, wearing a beige jacket and blue jeans" - something that is understandably useless, given that that nearly 70% of the USA's (male) population is of pan-European descent and largely of that height (170-). Therefore, it generally boils down to the license plate of the suspected vehicle, which is also included in the AMBER Alert.
* In the U.S. Acres episode "Cornfinger", this is how Orson solves the mystery of who keeps taking the corn from the silo.
* In the U.S. Acres episode "Weatherman Wade", after Wade suffers a disastrous landing from the clouds, Orson rushes up to him asking if he's alright, to which the shaken duck replies "I'll take a survey and hand it back to you."
* In the USAF, the GIB in the early Wild Weasel aircraft such as the F-100F and EF-105F was known as the "Bear" (short for "trained bear").

* In the US Army, a piece of wisdom passed on to newly promoted Sergeants is to never ask for volunteers for a difficult or dangerous task. Not only is it an abdication of responsibility, but anyone dumb enough to do so is probably too stupid to carry it out properly. Pick the man you know is best suited for the job, and be sure to reward him later.
* In the US Army's SL-1 nuclear accident, one of the operators, Navy Electrician's Mate Richard Legg, was impaled on the ceiling by a shield plug when the control rod was pulled out too far.
* In the U.S. Army, this figure is known as a "Courtney Massengale", from the character in the novel
* In the US, AT&T wireless aired a commercial boasting about how extensive their service is. The announcer starts flipping through postcards of places they cover onto an 8-foot-wide map of the US on the floor. The commercial ends. You think that's the end, but three or four commercials later it cuts back to the man. He's still flipping the postcards, and the map is nearly covered.
* In the USA, the major promotions treat their talent as "free agents" and so can fire and hire them much easier than most other employers (though they often get away with working these "free agents" just as hard as any employee).
* In the USA, the show was originally licensed by 4Kids, but they dropped it before they did anything with it. The first season later aired on YTV in Canada with a dub produced by Toei themselves with Blue Water Studios. The dub also aired in the UK and Australia, but never in the US, who has only seen a subbed streaming of the first season.
* In the US, at least, most major sporting events begin with the playing of the national anthem.
* In the USA, you're usually hard out of luck if you show up to a vending machine with only bills larger than a $10 in your pocket, but you're especially unlikely to get your desired snack if you try to pay with a $2— despite many acceptor mechanisms having a switch to enable any bill, including the $2, most of the time the switch is turned off, since to most operators it's unlikely that such a customer would show up to the machine.
* In the US, do not do this as of 2002, or at least don't get caught. If you happen to be a
* In the U.S., due to the rash of school shootings most schools have a lockdown procedure that goes into effect if there's any report of a violent criminal or

* In the U.S., for tax purposes the Internal Revenue Service considers an investment to be "long term" if the investor owns it for at least a year and a day before selling it.
* In the US, further divided into “Splitty/Split Window”(1950-67 models with a two-piece windshield)and “Bay/Bay Window”(1968-79 models with a one-piece windshield and larger side windows).
* In the U.S., high school football season starts in August, when the kids go back to school. That's still the tail end of summer in the southern states, and the heat and humidity can be brutal. Add the equipment and physical exertion to the mix, and it seems like every year there are a few news stories about teenagers collapsing (sometimes even dying) on the practice field. Stay hydrated, folks.
* In the U.S. in general, Federal Law enforcement is ridiculously good at doing what they do, with most having a 90% conviction rate on all cases, but the best of the best at this level are the

* In the US Navy, ancient wisdom has it that there are three ways of doing anything: "The right way, the wrong way, and the Navy way." "The Navy way" is, in many ships and shore commands, written down and collected (usually in three-ring binders) in volumes called "turnover guides" which are handed over by one person (department head, division officer, etc.) to another when officers and senior enlisteds rotate to different jobs within the command.
* In the US Navy and Marine Corps, an FNAEB (Field Naval Aviator Evaluation Board, pronounced "fee nab") exists to decide whether to inflict this on designated naval aviators. Reasons for grounding a pilot can be just plain old inadequate performance, such as too many wave offs during carrier landings, not catching the middle 3-wire enough (implying too many overshoots and undershoots during carrier landings) unsafe flying, even medical conditions. Once the FNAEB grounds you, you lose your aviator designation for good. Till this day, no one grounded by an FNAEB has ever regained pilot status. Not every pilot brought before an FNAEB gets grounded, but a pilot who is "forgiven" is normally told "Don't let us see you here again."
* In the US Navy, if a ship is at sea for more than 90 days at one time, each member of the crew is served two beers (it is otherwise illegal to consume alcohol while a ship is underway).
* In the US Navy's Surface Warfare Officer (SWO) community, signing a contract to become a Department Head is often referred to as Drinking The Kool-Aid. Department Head is the next step up after the entry job, Division Officer, and officers face the choice to re-commit for DH or resign after 4-5 years of service. It's also seen as one of the most stressful jobs in the Navy, and by signing up you're committing yourself to at least four years of it; so the implication is that if you sign on and take the bonus, you've fully bought into the "SWO Propaganda".

* In the US, Phil Hendrie's syndicated radio show follows a very similar formula; both the guests and show staff members were fictional. It should be noted that
* In the US, Presidential candidates seem to love to embarrass themselves this way. Watch as
* In the U.S. series, this is Erin's reaction to Michael's pining for Holly Flax.
* In the US State of Maryland, a man was involved in a very bad traffic accident. The news did not report if the man had been drinking, but since the State Trooper wrote him a ticket for reckless driving - a driving offense punishable by a fairly serious fine and points on his license - drunk driving was probably involved. At some point, probably a while after the accident, one of the victims died. The driver went to see a lawyer. The lawyer essentially told him to run, not walk, to the courthouse and pay the ticket before someone realized what was going on and cancelled it. So he paid the ticket, which is the equivalent of pleading guilty. Shortly thereafter he was charged with manslaughter, (either vehicular or involuntary, it didn't say) and was convicted. On appeal, the Maryland Court of Appeals (the state's highest court) found his paying the ticket was a conviction for reckless driving, making his subsequent trial for manslaughter a violation of double jeopardy, and set aside his conviction.
* In the US, the Chia-Pet is usually seen as this, since they're ultimately useless and not that exciting, seeing as it's merely an animal-shaped pot you smear seed paste on and wait for it to grow. Getting one is usually code that the giver either forgot about getting you a gift or doesn't like you very much. They're frequently sold in drug stores, which are sometimes the only things open (sometimes by law) after all the good stores have closed for Christmas.

* In the US, there are several editions of an extremely successful board game called "Dirty Minds", which is nothing but double entendre. The slogan is "A dirty mind is a terrible thing to waste." In the game, players are given three clues towards an answer. The clues sound dirty, but the answer is innocent.
* In the US there are two stores dedicated to only Halloween merchandise that open for business around mid-August and then close after the first week of November. Those two stores are Halloween City and Spirit Halloween. They sell costumes, decorations, candy, and anything else for Halloween but they are the only example of a national chain specialized to
* In the US, there is an old saying, "A friend will help you move, a good friend will help you move bodies, and a brother will have the bodies moved before it occurs to him to ask why the hell you need bodies moved."
* In the U.S. there is considerable effort made toward warning parents how quickly the temperature in a parked car can reach lethal levels, especially in summer. This comes after a rash of incidents in which parents would leave their kids in the car while buying groceries or whatever, and come back to a hot car and a dead kid. A few such cases have even been prosecuted as intentional murder.
* In the US, the Reserve Officers Training Corps, established after the American Civil War, was originally formed as a variation on this trope. Public colleges which received a particular type of Federal funding, so-called Land-Grant Colleges, were required to offer military instruction as part of their regular curriculum, with the intent being to create a group of civilian professionals with at least some military background in case the US military needed to enact a wartime expansion. Despite the name, the ROTC in modern times is one of the most common commissioning sources for active-duty officers in the US military, being much easier to gain entry into than the
* In the US, the show carried a TV-Y rating for the original run from 1997 on (as all episodes prior premiered before the ratings were put into use), however when the show began airing on TeenNick as part of The '90s Are All That and The Splat,

the show was given a TV-G. This also happens to almost every show on the block such as Y-rated shows
* In the US, the U-3 Unemployment Rate is the "official" rate, and is defined as persons able to work and who want to work who have sought employment within the last 4 weeks. It does not include underemployment, disability, or people who aren't looking for work. While the technical definition of the U-3 rate are well-known to anyone with the right academic training, that hardly means much to the layperson. The problem is not with the metric, but with the way it gets interpreted. The U-3 is widely understood to be a proxy measure and an incomplete picture, but it's useful because it is relatively easy to measure. As long as it is consistent, it can serve as a barometer even with known flaws.
* In the US, they claim that being made with "hazelnuts, skim milk, and a hint of cocoa" mean it's a great snack for your kids, and that it can be put on healthy foods to make them taste better. Problem is, they leave out the large amount of sugar, and that you'd probably be better off using peanut butter on your whole-grain toast (see above for why that's not necessarily a great claim, either).
* In the US, they had a big hit with "Dirty Work", a country-influenced ballad which features effeminately voiced guest vocalist David Palmer on lead vocals. At the time, songwriter and usual singer Donald Fagen felt Palmer could help make the song a bigger hit, and had also hired him to sing vocals live, due to lack of confidence in singing and playing piano at the same time. After the album

The mayor of the town, fearing that Guts's transgression will cause the Baron to punish the townspeople as well, has Guts locked up so he can turn him over to the Baron. When the mayor drops in on Guts's torture to ask whether he has any idea how much danger he's put the town in, or what kind of fiend the Baron is, Guts replies that he already knows: the Baron is a monster who eats human flesh. He also knows that the mayor sends the Baron women and children as offerings, taunting him for not really caring about his people or the greater good, just about sacrificing others to save his own skin. This accusation hits the mark so perfectly that the old man seems to almost have a heart attack, drawing a smirk from Guts, though this provokes the mayor to have Guts tortured so severely that he can barely move afterward.
* In the very first episode, "Simpsons Roasting on an Open Fire", Marge ends up spending her holiday savings getting a tattoo Bart got removed, hoping that Homer's Christmas bonus can make up for it. * In the villages proper, the best warrior is its Kage, though there have been exceptions. Sunagakure no Sato, for example, regarded their Third Kazekage as the greatest shinobi Suna had ever produced, and his disappearance during the Third Great Shinobi War was a great mystery even to the present timeline. As it turned out, Sasori of the Red Sands, a rogue shinobi from Suna and one of the main villains as a member of the Akatsuki, was the one to kill him — making him the greatest shinobi in Suna's history. This has some fair justification, as it was outright stated that Sasori could have won the fight that killed him, but chose to die anyway.

* In the webcomic's world, incubi and succubi are essentially a race of shape shifting empaths who feed off emotions more than they do souls. Unfortunately for those individuals who mature to a point where this function becomes active without someone in the know to instruct them, these individuals may suffer from crushing migraines due to the influx of constant emotional downpour around them. Thankfully this can be for the most part filtered to allow only the desired emotional energies to flow through 'but' despite this the cubi in question will always be 'very' susceptible to the emotions around them such that whatever emotion they may be experiencing at any given time will be kicked into overdrive so that even the slightest bit of anger becomes blinding rage for those who lack restraint.
* In the webgame Antaris Realspace, after more or less reversing the tide of the entire war and taking out an enemy flagship with just a few ships, the ending says this: "Command has rewarded you by giving you a pay raise of 10 dinars. Those cheap Muthers!!!"

* In the western parts of the former United States, beyond the Coalition's reach, many people have adopted an idealized "Old West" lifestyle based on recovered entertainment media. But many of them use robotic steeds and carry advanced weapons as opposed to old-fashioned guns. Others, such as the Colorado Baronies, use magic and techno-wizardry as well. Native Americans are also divided between traditionalists who have gone back to living pre-colonization lifestyles and embracing the return of magic, and those who use modern technology.
* In the Western world, jelly was originally made from gelatin derived from cow hooves.
* In the Western world, wrestling has a stigma as a "fake" sport, meaning that fans of legit martial arts and combat sports like boxing or MMA, or even non-combat sports like football, look down on it and its fans. In Japan, this stigma does not exist, and the line between "real" MMA and "fake" wrestling is blurred. Shoot and worked matches often appear on the same card and are treated with equal respect, and some of the worked ones are executed in a manner which makes them hardly or even fully indistinguishable from shoots. Given that the Japanese MMA were created by pro wrestlers, and that consequently their companies did retain part of their
* In the West it was generally common practice to give a girl, either for going out or on Valentine's day, a box of chocolates and/or flowers. Sometimes, a greeting card was also included. In the cases where this is still practiced, the receivers of said box are usually women over the age of 40 or 50. (Or going out with a man who was taught how to treat a lady by his mom.)
* In the West, slurping food is generally rude, but in Japan, it's completely normal and expected. Similarly, the Chinese shovel food into their mouths by holding onto their bowls with their other hand and putting them right up to their mouth, because putting your head down over your food while you eat is seen as eating like a dog.
* in the west tends to be overlooked compared to other parts, western fans tend to respond to it with general praise as well (though its ending sees more mixed

reception). All three protagonists in these even-numbered parts (Joseph, Josuke, and Jolyne, respectively) also frequently butt heads among fans for the distinction of the series' best protagonist, with each one of them being praised for their in-depth and memorable characterization.

* In the winter of 1941-2 civilian winter-time deaths resulted primarily from German 'requisitioning' of clothing and shelter needed for their survival, as well as the need to clear the siege-lines at Leningrad of civilians. Similarly, all civilians were evicted from the Rzhev-Vyazma salient by the winter of 1942-3 to prevent them from passing on information about German defensive positions or aiding in Soviet attacks.
* In the winter of 1943-4 civilian winter-time deaths resulted primarily from the destruction of all structures capable of sheltering civilians in Staraya Russiya/Novgorod, eastern Belarus, and central-western Ukraine. This was done to burden the Soviets with ensuring their survival, facilitating German retreats. Successful implementations included the entire city of Novgorod, pre-war population 200,000. Do note that this process was incomplete in many areas, as the number of structures to be destroyed could be very large and the areas to be covered vast. Consequently, only structures near roads and rail lines were consistently treated in accordance with orders.

* In the Woods, is a murder-squad detective who is unofficially consulted as a profiler by the rest of the squad because she studied a bit of psychology in college. Despite her lack of training, her observations help pinpoint an important aspect of the killer's psychology.
* In the Woods. (It's also possible that this is just nasty local rumor, in part meant to justify the village's ongoing dislike of the family.) Cassie is also spooked by unseen things scuttling around in the fields at night.
* In the Woods. Main character homicide detective Robb and his partner Cassie have figured out who the killer is but don't have enough evidence to prove it. They set up a trap to get the killer to confess to Cassie. The trap works perfectly, Cassie plays her part brilliantly, even working the Irish equivalent of a Miranda Warning into the conversation, and they get a full confession of the entire plot on tape. Then the twist comes...the killer was the victim's teenage sister, and she's only 17, not 18 as the detectives had initially believed. This means everything she said outside the presence of her parents is inadmissible. She gets away with the murder, and the case destroys not only Robb and Cassie's careers, but their friendship as well. The book ends with Robb alone and miserable.

* In the world of keys, there's a division between hammer-weighted keyboards and "synth action" keyboards, which aren't weighted at all. Synth-action keyboards require less force to play a note, which makes them easier to play, especially when playing faster music. They are also more friendly to people with arthritis, and they can be more pressure-sensitive than a weighted piano. Higher-end keyboards use hammer actions not because they are better, but because of people who are used to acoustic pianos.

* In the world of railroading, the Pennsylvania Railroad T1 Duplex stands out as perhaps one of the most troubled steam locomotives ever made. Though pretty, the locomotive proved itself to be a hassle, infamous for its constant wheel slipping, a long line of issues right from the manufacturer, not one, but two railroads rejecting the engine for possible duplication on their lines, and having the distinction of not being saved amongst the railroad's many steam locomotives when they donated at least one example of each to what eventually became the Railroad Museum of Pennsylvania in Strasburg. An analysis by Classic Trains Magazine later determined that the engine was

For instance, a clunky interface may be organized better in an update, which is good for most people but bad for the old-school types that already memorized the clunky version. The latter group may complain of a "bug" that changed the interface. Anyone who has ever worked in computer tech support can tell you stories of people complaining of bugs or "bad hardware" that was simply caused by one option incorrectly set in a program. Sometimes the "bug" you experience is the computer doing

* In the years following the iP1's release, a handful of startups popped up claiming to make their own versions of this trope. One of these, Lode Star Works, says it's making what it calls a "personalized gun" with multiple possible options for securing it, such as a smartphone app, a RFID in a bracelet/ring like the iP1, and the classic fingerprint authentication seen in fiction. Another company, Biofire, purports to also be making a gun equipped with a fingerprint sensor for security. As none of these have yet to actually release anything, only time will tell as to how the good the actual product will be and whether they'll overcome the problems the iP1 suffers.
* In "The Years Lost in the Blood" Walter Dorian turns out having survived Diabolik's attempted assassination only to be captured by rogue soldiers preparing for a coop and, being a foreigner, detained as a spy for years until he managed to

* In this case, however, no one ever actually questions that what Jean-Claude does is technically illegal. Within the story, vampires were only recently granted legal rights by a Supreme Court decision, and had been accustomed for centuries to governing their own affairs by their own laws and customs, while human society treated them as outlaws, that is, totally outside the protection of the laws. They are, in effect, still operating as self-governing ongoing criminal conspiracies, but since the people whose rights under American law are being violated are generally themselves believers in this underground vampiric society, few even think to complain. To put it simply, one of the major themes of the novels is that the US government and the government of Missouri (the series is set in St. Louis) have enormous difficulty making their respective writs run in supernatural society.

* In this game, "being careful" means ensuring that your caster has a high enough Wisdom score to word the wishes properly, or by using "bad" effects to your advantage. Having the genie "summon an army" nets you 50 rabbits. Needless to say, a bunch of harmless, completely ordinary bunnies won't do any damage by themselves, but they make for a very nice distraction: enemies tend to attack the closest target, so if the rabbits are between you and the enemies, the enemies will waste turns attacking the rabbits while you pepper them with arrows and blast them with magic. Similarly, the horde of monsters summoned if you wish for experience is always a group of golems (though the exact number and type are based off your level), and there are several magic weapons in the game that are extremely powerful against golems, so if prepared you can get a lot of experience points for very little effort.

* In this novel by Alfred Bester, telefragging was used as an incarceration device. In the novel, every human has learned how to naturally self-teleport (called Jaunting), which made it rather difficult to detain prisoners. The method that governments used was to put the prisoners into jails which prevented them from having any knowledge of their present location (by being deep underground and in the dark, for instance). Knowing where you are, and where you're going are prerequisites for safely Jaunting. By preventing prisoners from knowing where they are, they could not Jaunt to where they'd like to be without a very large chance of

ending up somewhere else entirely... like inside a mountain. Occasionally a prisoner would go insane from the isolation and attempt a "Blue Jaunt" (as in "into the wild blue..."), which was just a fancy way to commit suicide.

* In this one it's Leonard, Sheldon, & Howard fighting alongside their respective wives Penny, Amy, and Bernadette. Raj accompanies his newly arranged fiancée Anu. And Stuart gets to participate along with his own lady friend & co-worker Denise. The plotlines are mostly just personal issues amongst the pairs interfering with the game.
* In this online short, the protagonist gets his time-travelling sandwich from a mysterious shop run by a decidedly shifty hunchback. Of course, the shop and hunchback do get visited again...kind of.
* In This Our Life, doesn't make much money with his law firm, but he's willing to help his clients whenever he can even if they don't have to money to pay him. He even rejects Uncle Fitzroy's offer to help with the legal side of his business (something that would bring him a lot of money) because he disagrees with Fitzroy's practices. He even gives Parry Clay, the Timberlake's African American helper, a job as a clerk because he wants to become a lawyer (this being the 1940s, it was a rare and very progressive gesture.)
* In This Our Life, Peter kills himself because Stanley admits to hating him after only a few weeks of marriage.
* In This Our Life, Stanley is spoiled mostly by her rich uncle Fitzroy, and she gets away with everything she wants. Not only is she completely selfish because of this, but she always complains that no one cares for her.

* In this particular case, William was taking advantage of an archaic rule himself. Thornton had already been tried and had been acquitted by a jury, normally a bar to further prosecution. William was taking advantage of a by-then nearly obsolete rule which allowed a private individual to bring a criminal case. Trial by combat wasn't generally available to criminal defendants, but it was still listed as a defense in this sort of private prosecution. Thornton's attorneys advised him to invoke the trial by combat rule to point out how irregular the second prosecution was in the first place (and of course to win, since Thornton totally outmatched William). Parliament got rid of the trial by combat following this whole debacle,

* In this series the trope's also well justified: Wolfe charges high fees (and occasionally is depending entirely upon the potential gratitude of non-clients for compensation), often seems to be doing nothing at all to earn them, and it's established in the setting that the local police and district attorney's office are very eager to take complete credit for anything he turns up and are at the same time looking for an excuse to bring him in for obstruction of justice. He has multiple reasons for wanting all interested parties in one place to report his activities to. (Not always truthfully.)
* In this series the winner is granted a single wish. Most of the wishes end up getting corrupted, such as a soldier who wishes for a young body but keeps his old head, or a couple of men who wish to be able to fly. Calypso tells them their wish is granted and they immediately jump off the building they are on, thinking they can fly, and proceed to smash themselves into the ground. Meanwhile, a rather surprised Calypso is still standing there, holding a couple of plane tickets.

* In Thunderbolt's case, he isn't owned by DC anymore. Pete Morisi, the creator of the character, eventually claimed full ownership over him. Morisi died in 2003, and his estate still owns the rights to the character. Thunderbolt still had a second lasting contribution to comics aside from Ozymandias, though: his quartered black and red costume influenced Bruce Timm’s design for Harley Quinn. (On a curiosity, Pete Morisi based the Thunderbolt's costume on the "symmetrically divided, red-and-blue costume" of a 1940s superhero: "Daredevil" by Lev Gleason Publications. Morisi had attempted to purchase the rights to the defunct character, but after one of the co-owners refused, he simply decided to create an expy with a similar costume.)

* In Time takes place at least one hundred years in the future. While cops ("Timekeepers") now dress like they're in the Matrix, and there were some unusual outfits worn by the rich women, but the lower class dresses like it's 2011. If anything, the elite and the local gangsters have become more retro with their fashions, probably indicating that fashion has stagnated among the immortal set.
* In Time, the Timekeepers, and most prominently the antagonist Raymond Leon, wear longcoats.
* In Time, this is played straight in the story while subverted by the setting. Within the story, characters die from the smallest mistakes, such as only keeping enough cash for the bus ride home (without knowing that the fee has been increased), or getting so absorbed in your duty that you don't take the time to refill your clock when you have the chance. On the political level, however, it is made clear that the system has been engineered for these kinds of mistakes to occur. The government is murdering their citizens on a genocidal level, while building in an element of randomization as an excuse to pretend that it's the victim's own fault.
* In "Time to Time", Lorelle Palmer has Gavin bring her to UC Berkeley on April 14, 1969 in order to prove that he is telling the truth about being a time traveler. She picked this date deliberately as it was the day that her father Tom died. She grew up believing that he was killed when the bomb that he planted in the ROTC campus headquarters detonated prematurely. However, it turns out that he had actually been attempting to deactivate the bomb when it went off. Lorelle does briefly change history and save her father but she ultimately decides to allow history to run its course after learning that the child of one of the twelve people who would have otherwise died in the explosion went on to discover a cure for AIDS. Although her father still dies, Lorelle succeeds in changing her mother Angie's life for the better. In the original timeline, Angie never recovered from Tom's death and spent most of her days in bed in Lorelle's native time of 1989. Lorelle asking her five-year-old self to tell her mother how much she loved a painting that she had made for her resulted in Angie gaining solace and comfort from pursuing art as a career.
* In "Time to Time", Satchko Watanabe, a member of the time travel agency Chrononics, ceased to exist after Lorelle Palmer altered history when she visited UC Berkeley on April 14, 1969. Lorelle caused her father Tom to miss his bus, which

prevented his friend James Williams from telling him about a meeting later that night. At this meeting, he learned of Richard's plans to plant a bomb in the ROTC campus headquarters in McClanahan Hall. As a result, Tom lived and the bomb went off the next day instead of that night. Twelve people died in the altered timeline. In the original timeline, one of them had a child who became a medical researcher and discovered the cure for AIDS, saving thousands of lives in the process. Satchko was never born as she was a descendant of one of the AIDS sufferers. The course of history is restored and Satchko returns when Lorelle decides to allow her father to die in his attempt to deactivate the bomb.

* Intimidate is most on-brand for the trope, and only creatures of the same color or artifact creatures (read: creatures who understand something of the creature with Intimidate or are an emotionless robot) can block them when they attack. Intimidate is actually a minor tweak to a much older mechanic, "Fear," which was the same ability but keyed specifically to black or artifact creatures—meaning only emotionless robots or other monsters could bear to face them.

* In TNG, we're introduced to Betazoids, humanlike aliens with telepathic powers, and we already had Vulcans. Not quite the same thing, until later it's revealed that the reason there are so many humanlike species in our galaxy is because they all came from the same genetic material. So humans don't have telepathic powers (usually) but it would make sense for the federation to keep an eye out just to be sure.

* into a late game powerhouse Unfortunately this was done at the expense of the support, leaving them weak and under performing at end-game without the money to buy any interesting tools. Numerous changes were made to increase the fun level of supports. The biggest changes were the adding of items that significantly increased money income for supports, while being worthless to non-supports, and limiting the number of wards a support could carry, while giving limited use free wards to everyone, to encourage spreading out the responsibility of warding to the entire team rather than making the support do it entirely.

* Into the Badlands: Baron Chau is a firm believer that the strong will rise to the top, no matter what.
* Into the Badlands is really just an excuse to have a Western Wuxia series.
* Into the Badlands on her. After they share a very brief moment on-screen together, they are never seen talking or even speaking of one another again.
* Into the Badlands who will either kill him or become the 1000th mark.
* into the bar, which falls to the floor and shatters, reflecting his screaming face on the way down.
* Into The Black describes a number of exotic cavern-dwelling critters, one of which - the ice rat - traverses glacial cavern floors by rolling around in snow until its thick fur is sheathed in ice, with gaps for its head, paws, and rudder-shaped tail. Encased by this form-fitted one-rat toboggan, it slides along incredibly fast, controlling its speed and direction with tail and dragging claws.
* Into the Black was planned, the GMs specified that psionics were not permitted under any circumstances. The only exceptions were Lily North and Flora, characters from the previous role-plays whose abilities are heavily tied into their appearance and backstories.
* Into the Blue Amanda is asked to cover up when some Coast Guard come across her sunbathing topless.
* Into the Blue (delete according to taste) wearing as little as humanly possible.
* Into the Blue. Not that they wear much clothes in the movie either...
* Into the Breach are flagged as Massive, the same characteristic that gives the player's mechs immunity to drowning. Considering how most maps have water on them, many boss fights could be instantly resolved by shoving them into the ocean on turn one otherwise. They still can't attack from in the water, and all other status (freezing, fire and ACID) work as normal. The fact that they aren't immune to freezing means squads with a way to freeze them will generally find boss battles much easier, although freezing weapons are fairly rare.
* Into the Breach, Bethany and Isaac Jones are twin siblings from different timelines, where the other twin died during childbirth in each of their timelines.
* Into the Breach. One hit is enough to destroy them. They aren't completely useless, as you can control them and use their cannons to damage and push units at close range.
* Into the Breach puts you in control of a team of three giant robots sent to protect the remnants of humanity against giant alien monsters known as the Vek across endless timelines.
* Into the Breach subverts this heavily. It's a roguelike where you play as a team of mech pilots hopping between timelines to save humanity. If you fail, then everyone in that timeline dies, and you jump to a new one. While this does allow you to lose a timeline and keep going, it also gives defeat much more meaning than just going back to the new game screen.
* Into the Breach, the A.C.I.D. is technically made of nanomachines, but it takes the form of green puddles or pools. Any entity walking into it (or shot by it) is covered in green liquid, and takes double damage from weapons, and negates any armor they might have. Interestingly, covering an enemy in A.C.I.D. alone doesn't make it take damage; they're just extra vulnerable to any other damage.
* "Into the Bunker" opens with Dipper and Wendy watching a cheesy zombie movie called
* Into the Dalek as Danny Pink is berating himself over what he should have said to Clara, she reveals her presence and that she heard a lot of what he was saying, and

* "Into the Dalek" a season later made it such a simple mechanical device that a human pilot could climb in and drive it around.
* Into the Dalek" because of his cold-hearted actions towards the other humans.
* Into the Dalek they... well, see the title. A Dalek's machinery has the equivalent of white blood cells: little seeker robot things that fly around and blast anything that causes damage, such as shrunken people.
* Into the Dark are clones. However, the latest Ashley only learns it near the end.
* Into The Dark: School Spirit teenager who tries to help her fellow students escape from a killer. After she takes the killer out, the trope is subverted: She reveals that she's had sex with her ex-boyfriend several times, has actively cheated on multiple occasions to boost her GPA, and really doesn't care about the other kids who died except as a means to make herself look good in the media.
* Into the Drowning Deep, along with the crew of the ship, Imagine entertainment sent along a team of dolphins, one of whom gets his own viewpoint chapter, and who the crew considers to be people. It's mentioned that things are legally contentious re: cetaceans, because scientists consider them people but governments haven't caught up. Theo says Imagine's contract with the dolphins covers their ass both ways: either the dolphins are animals and they don't need a contract, or the dolphins are people and they agreed to this.
* Into the Drowning Deep features killer mermaids which inhabit the darkest and deepest parts of the Marianas Trench. These mermaids kill and feast upon anything that enters this territory and are armed with sharp teeth and fangs. They also despise light hence their affinity for the darkness of the trench.
* Into the Drowning Deep have two extra joints on their fingers, plus claws. They look spindly but are strong enough to gouge metal.
* Into the Drowning Deep, possess claws sharp enough to dig into metal walls, allowing them to climb sheer surfaces.
* Into the Drowning Deep: Ray's career as a world-class MMA fighter was cut short by an injury that destroyed both his knees and his savings were exhausted by top-of-the-line reconstructive surgery. Fortunately for him, when he went looking for other work, he ended up speaking to Theo, who had been a sailor until he suffered a major spinal injury and was sympathetic to Ray's situation.
* Into the Drowning Deep, sirens can perfectly mimic any sound they hear, but they can only repeat it exactly and have no sense of the context of the sounds most of the time. As such, they can be found out when they do things like mimic the sound of a boat motor a mile under the surface or repeat the same whale song regardless of circumstance.
* Into the Drowning Deep, who had always expected them to be brought down together by one of their big game quarries.
* "Into the Fire" mentions this, as told from the perspective of a soldier in the Vietnam War. The lyrics to the second verse start with "Sarge is down, I'm in charge, VCs everywhere!"
* Into the Forest: A downplayed example. Eva is more emotional, while Nell is more rational.
* Into the Forest: After a fight, Eva staples a curtain over all the windows in her side of the house and refuses to interact with Nell.
* Into the Forest: The year is never mentioned, but the family's computer technology is a few years more advanced than the film's 2015 filming date.
* Into the Future are instead a more advanced version. When first created they are incapable of doing much of anything, but with the appropriate trait chips installed they can act as a maid.
* into the groin of a passing two-headed giant crotch!" and staggers away.
* Into The Hinterlands Allenson, saying that he probably thinks he's beneath his status to duel. Allenson retorts that duels are "a stupid way of settling disagreements"... and instead throws him bodily out the nearest window. It's only a bit later that another councillor reminds him they're on the third floor.
* Into The Hinterlands (Brasilian colonies seeking independence from Brasilia).
* Into The Hinterlands Rider raiding patterns into a formal flight squadron system,

adding a logistical and intelligence machine, and improvising new weapons and attack patterns to deal with harder targets like cargo trains.
* Into the Looking Glass and started to scream, "I'm reading this on my TelePrompTer, but it's not really happening!"
* Into the Looking Glass (and tastes delicious) once used, you look like an idiot for being so careful with it (but, then again, there's a similar prank detailed under the Real Life tab that involves giving a guy a glass of juice and telling him it's battery acid so everyone can see the horrified look on his face when the recipient drinks it in front of him).
* Into the Looking Glass) at the same time. However it is explicitly stated he only fires one at a time, reloading takes more time, and the character's skill at "two-gun mojo" is considered unique and extreme even among the other highly-skilled (and more experienced) soldiers.
* Into the Looking Glass" has the Dreen, Sentient members of other species can be taken over by them, made part Dreen and forced to control their lower castes for them. The 'sentient controllers' get to keep the use of their minds, eyes and voices, since the Dreen don't really care about any of that, since the controllers really have no choice about serving them.
* Into the Looking Glass, has the titular Looking Glasses (so named because they resemble a mirror) caused by the Florida Anomaly function as portals. The portal technology ends up being exploited and expanded when it's figured out how to make them work. Airplane travel is all but over in the first few years of them functioning with airports and train stations being an easy place to place a portal network.
* Into the Looking Glass humans make contact with an alien species called the Adar. One of the Adar describes their data net as "announcements of tcheer, and much announcements of herbal remedies to prevent loss of youngness." Tcheer is the age when the Adar reach sexual maturity so basically the cultural equivalent of "barely legal teens" pornography.
* Into the Looking Glass, Lt. Commander Weaver mentions, in a discussion of impromptu refilling of oxygen reserves for the titular spacecraft, that they have the finest jury-riggers in the star system that they're exploring. The Executive Officer points out that they're the only intelligent life in the system, which Weaver then says is his point.
* Into the Looking Glass operators have to wear when using their suits.
* Into the Looking Glass says that as near as she can tell it's an accurate translation and the Hexosehr simply don't have the more formal modes of address used in a human military.
* Into the Looking Glass situations without the advantage of things like phasers, tricorders, and transporters.
* Into the Looking Glass suits, the Wyverns, far beyond anything currently feasible with modern technology.
* Into the Looking Glass, there are several "intruder alert" announcements for the Marines aboard the titular spacecraft, but when the Demons attack the trope phrase is added, though for some the "not a drill" announcement doesn't sink in immediately.
* Into the Looking Glass, unsurprising since they are essentially the Zerg of Starcraft fame. Planets that they have completely denatured are even shown in setting.
* Into the Looking Glass, using only Earth technology, but later versions that also use Adar technology fit this trope.
* Into the Looking Glass with organic technology, including things such as 'Rhinotanks' a creature modified into a main battle tank role complete with the ability to shoot plasma bolts. Foes of these creatures go as far as creating tribble like spiders specifically attracted to their form of life (different types of sugar starches for different types of suns)
* Into the Midnight City are implied to engage in nefarious trickery, like stealing souls.
* Into the Midnight City has Wyatt Finch, a recently-turned vampire, be a member of

a trio of detectives.
* Into the Midnight City: Vampires in the story are noticed by, not only the fangs, pointed ears and markings on their cheeks, but the faded bite marks on their necks. One of the characters, Wyatt, a recently turned vampire, has them on the right side of his neck.
* Into The Mirror, Young-min gets trapped inside the mirror world but doesn't realize it because nothing is different...except for the fact that everything is backwards/mirrored.
* into the nests of related sandhill cranes and letting the sandhills raise them results in whooping cranes who are attracted to sandhills. The resulting hybrids are not viable, though.
* Into the Nexus after upgrading his father. At V3, Mrs. Zurkon joins them to complete the trio. Mrs. Zurkon even quotes the Trope directly:
* Into the Nexus, if you have a low jetpack fuel level (blinking red, beeping), staying on the ground for a few seconds will cause you to generate a little bit of fuel so you can get to a refueling station and get a full tank.
* Into the Night, Ed doesn't even have a plan, he just goes on an aimless drive after finding out that his wife is cheating on him. He ends up at LAX for no particular reason, where he has a Meet Cute with Diana the jewel thief. A madcap all-night adventure involving the CIA, the FBI, a pile of money, and the Iranian secret police ensues.
* Into the Nightosphere, where at one point Jake randomly belts out "Jouzu de Ganbate ne," which is loosely Japanese for "You try your best very well."
* Into the Night, there are two big fan service extra scenes, both illustrating the more "loose" world Ed is touching upon. The first is the "Take off your shirt" scene at the boat after the airport, and the second the woman who is pulling up her dress as she steps out of the bathroom stall while Ed is waiting in the men's room.
* Into the Night, unfolds over about 24 hours. (If the opening and closing stretches are factored in, the film roughly spans 72 hours at most.)
* Into the Nowhere has a wasteland planet which is, from the dialogue and description, clearly supposed to look like one of these, even having loose gravel everywhere. The Eleventh Doctor, who is used to much better looking planets by this point, is profoundly unimpressed: "Ugh! I hate this planet, it’s rubbish. Look at all these rocks! Rubbish!"
* Into the Out Of knives and spears so sharp they give you a paper-cut like cut just from touching the edges of the blades and can be thrown right through a wall. You can't even quite make out where the edge of one of them ends and the air begins, they're so sharp. As one of the characters describes them:
* Into the Outside transdimensional wildlife, and things that are harder to classify because they are composed of, and consume, bizarre things like color, heat or time.
* into the rear of the enemy's formations - no doubt, this emboldened many desperate allied infantrymen fighting on the frontlines all over history. This was because battle-worthy horses and the men atop them were simply a lot more rare and expensive to risk, and it was generally well-known a unit of cavalry would lose against a likely much-larger unit of infantry that holds onto its nerve because horses respond poorly to being guided into massed ranks.
* Into the Ring": Clyde Farnum, a guard who owes money to Fisk, is threatened by James Wesley into attempting to hang Karen Page in her jail cell. When the attempt fails due to Karen clawing out one of his eyes, Fisk has Farnum bailed out and then killed by a hitman who stages his death to look like a suicide.
* Into the Storm (2009)) and General Montgomery (as played by Patrick Malahide) having a one-scene showdown of pure Ham.
* Into the Storm (2009). For example, it is the gist of the Halifax VS Churchill debate. Halifax (pro-enlightenment) is proposing a pragmatic way out for the British Empire to remain, while Churchill (pro-romanticism) is priorizing honor and duty instead of survival.
* Into the Storm (2009) is an Irishman portraying the Englishman Churchill, the actor who portrays FDR is actually Canadian, the King of England is portrayed by

Iain Glein, a Scot, India-born Englishman Ismay is portrayed by a Welshman, and Clement Attlee is played by another Scot.
* Into the Storm (2009) shows Clemmie and Winston bicker a lot, but they have their sweet moments, too.
* Into the Storm (2009) (the Churchill biopic). Despite this, the movie actually subverts this: the Americans are shown as worthy allies, but the British (and to a lesser extent the Russians) are shown as just as responsible, if not more so, for the ultimate victory.

* Into the Wild audiobook where a line is accidentally read in Jayfeather's voice instead of Squirrelflight's. (It's supposed to be where Squirrelflight asks Jayfeather, "Did you say that?" and Jayfeather shakes his head silently, and Squirrelflight goes on in the same paragraph, "I didn't think so." The audiobook makes it sound like Jayfeather's responding and uncertain about whether he said it or not.)
* Into the Wild: A young house cat named Rusty decided to visit the forest neighbouring his home, only to get attacked by a Clan cat named Graypaw. However, after they crashed into each other, they stopped fighting and became fast friends.
* Into the Wild college graduate who abandons everything for attempting to live off the Alaskan wilderness. Christopher is slowly run through this trope as his supplies dwindle and it becomes evident that he was very unprepared for his adventure, ending up starving to death alone.
* Into the Wild from the outset. Instead of being trapped on a boat, he ends up trapped in a bus.
* Into the Wild Green Yonder may be this trope, as a very minor Fry/Leela subplot
* Into the Wild Green Yonder". Not surprisingly, their archenemies, the Encyclopods have the purpose of collecting the DNA of all creatures in the universe to ensure that extinction is never forever.
* Into The Wild Green Yonder, which was supposed to be the series finale. Now the show has been revived a second time, and the writers are actually acknowledging the hookup.
* Into the Wild Green Yonder, Zapp states that for him, making an arrest is like making love. "It may or may not hold up, and it's often challenged in court."
* Into the Wild is another film that doesn't seem to be aware that the early '90s were any different than the present. It includes what appears to be a digital camera (used by a main character) and a delivery truck labeled "ups.com".
* Into the Wild leans into this in its portrayal of Christopher McCandless, the young college graduate who abandoned all his possessions and attempted to live off the land in the Alaskan wilderness, only to starve to death.

* Into the Wild. That hasn't stopped some people from deciding that this sounds like a totally awesome idea.
* Into the Wild: The main theme of the story is the main character's escape from society and there are no antagonists.
* Into the Wild. This could be a subversion, though, as McCandless's swift death at the hand of mistress nature is a testament as to why Walking the Earth is usually a bad idea. Of course, most people doing this are travelling from town to town, not deliberately isolating themselves deep in the wilderness.
* Into the Wild, was traveling to Alaska, he briefly stayed with and befriended an old man (given the pseudonym "Ronald Franz" in the book). Franz became deeply attached to McCandless, and prayed for his safety when he left. He became an atheist after Chris's death, believing that any god who would let him die wasn't worth believing in.

* Into the Wild, when ShadowClan launches a surprise attack on the ThunderClan camp. Fortunately, ShadowClan is driven off.
* Into the Woods acknowledges this trope upon realizing a giant has entered the kingdom.
* Into the Woods: Act One concludes with a classic Happy Ending, but then there's Act Two...
* Into the Woods, a duet for the two Princes talking about wanting unreachable women, which is still hilarious but has a darker undertone due to the fact that they are now cheating on the wives they spent the first act trying to get.
* Into the Woods amount of each tale were caused by interactions with characters from the others Primarily the Baker and his wife trying to break the curse. Just to name a few, the items required to break the curse were a red cloak, a golden Slipper, a white cow, and yellow hair.
* Into the Woods. At the conclusion of the first act, all the subplots are resolved and every fairy tale character is literally singing Happy Ever After. After the intermission, of course, consequences of the first act unfold, and everything goes to hell.
* Into the Woods", Buffy discovers her boyfriend Riley Finn has been visiting vampire prostitutes. She burns down the building where the act took place, massacres the vampire-pimp's gang when they're foolish enough to attack her, and — after initially letting the vampire-prostitute go — throws a wooden spear into her back as she's running away.
* Into the Woods: Cinderella becomes one for Little Red Riding Hood and probably for Jack too.
* Into the Woods consistently embodies the cynical and badass qualities, warning Rapunzel, "the world is dark and wild." It never becomes entirely clear where the Witch's brokenness stems from, but she is persuasive enough in pointing out the failings of others to make us suspect that her ruthless and misanthropic ways came from somewhere.
* Into the Woods died, the Baker says "she didn't make it." Though they also zig-zag it.
* Into the Woods features a Narrator who addresses the audience and, at one point, is pulled into the story proper by other characters who don't like the way he's been telling the story.
* Into the Woods. For anyone who doesn't know these, the show will be massively confusing.
* Into the Woods gets damn hot. And usually gets a costume during the second act that shows this off plenty.
* Into the Woods has an amazing parody of this in the songs 'Agony' and the reprise by the two princes.
* Into the Woods has approximately 20 to 24 characters depending on the production that have at least a few lines or non-ensemble singing duties.
* Into the Woods has "Last Midnight," a song sung in the second act by the Witch. The whole first verse consists of simple questions delivered to the Baker, Jack,

Cinderella, and Little Red Riding Hood: "Told a little lie... stole a little gold... broke a little vow, did you?" Those questions force the heroes to admit that their shortsighted, self-centered wishes and "small" wrongdoings have had major consequences for everyone.
* Into the Woods her hair is tied back. Also inverted with Cinderella, who wears her hair down as a scullery maid, and up when she's in her ballgown.
* Into the Woods However, the executives refused, so original stage writer and film screenwriter James Lapine then rewrote the fate of Rapunzel and toned down darker aspects of her character, and a new song "She'll Be Back" was written for the Witch to sing after Rapunzel leaves with her Prince (it was later cut and was put on the Blu-ray release).
* Into the Woods: In the "Your Fault" number, the characters' arguments get increasingly confused as the song goes on:
* Into the Woods is all wishes and dreams coming true in the first act, but then Act Two begins and the giant shows up.
* Into the Woods is an interesting case of this. The entire recounting of the traditional fairy tales wraps up with the Act 1 Finale 'Ever After'. However, there's another HALF of the show left. This has led to many cases of people mistakenly leaving at the interval.
* Into the Woods is a subversion of sorts: her evil deeds happened in the backstory and during the story itself she does more to help the protagonists than hinder them. They blame her nevertheless.
* Into the Woods is described as being rather plump, and when she's at the Baker's she nearly cleans him out of his bread and sweets. She says it's for her grandmother, but she ends up eating all of the sweets along the way as well as half of a loaf of bread. When she gets eaten by the wolf later on, who just at Granny as well, the narrator laughs and comments that it was a full day of eating for both.
* Into the Woods) is paying them a visit, it's immediately followed by the bakery door being blown down, a big flash of lightning, and rats scurrying from under the Witch's dress. Not to mention subsequent appearances, where she teleports in just to yell at the Baker and his wife.
* Into the Woods is suffering under, and she promises to take the spell off the Baker if he helps her out.)
* Into the Woods, "I thought you were dead." "Not completely. Are we ever?" What he means by this is left ambiguous.
* Into the Woods, Jack's mother is splashed by Cinderella's step-mother's carriage running through a puddle as she bows.
* Into The Woods Junior version of the play for children's school and community theater productions that literally omits the entire second act.
* Into the Woods. Literally, he sings a song about how he just wants to stop everything.
* Into the Woods: Little Red Riding Hood, at least after her grandmother gives her a knife and a wolfskin coat.
* Into the Woods—"May those who follow their fate find happiness, may those who defy it be granted glory"—takes on a whole new meaning when looking at the two seasons of the show.
* Into the Woods: Milky White the cow, when not being played by a wooden cutout, is usually an unfortunate cast member in a comically bad-looking cow suit.
* Into the Woods: Most of Jack's interactions with his Mother are a cross between this and My Beloved Smother. Less so in the Movie.
* Into the Woods "No More'', in which the absent father helps his son to not repeat his mistakes.
* Into the Woods on the fact that their wishes and carelessness got them in the trouble they're in now.
* Into the Woods shows several military personnel in his house, intent on recruiting him for their covert demon-fighting unit.
* Into the Woods's step-family starves to death while lost in the woods.
* Into the Woods, such as the Baker, the Witch, and the Mysterious Old Man. This applies to just about everyone besides Cinderella, Jack, Florinda, Lucinda, and

Milky-White.
* Into the Woods, the Baker's Wife instantly becomes eight or nine months pregnant the moment the curse is broken.
* Into the Woods them, and their eyes begin to wander to new challenges. To a lesser extent, Cinderella is also guilty of this; being with her Prince was more a dream of escaping her wretched conditions than anything about him specifically. Perhaps best summed up in Cinderella and the Prince's final words to each other upon their relationship's inevitable collapse:
* Into the Woods, the narrator is a character of his own. He insists that he isn't part of the story, but still perishes at the hand of a character – after which the story becomes quite chaotic.
* Into the Woods, there is a gap of at least nine months between the first and second acts, during which the Baker couple conceive and give birth to a child. In the movie, the gap is reduced to only a few days, with a magical handwave to explain how they got an infant in that time.
* Into the Woods, the second act begins with contentedly singing "So Happy." Then things come literally crashing down.
* Into the Woods, the Witch, fed up with all the arguing about blame in the "Your Fault" song, interrupts it to sing "Last Midnight," then removes herself from the story, declaring that if everyone wants to assign blame, they can blame her, but she's leaving them to their own problems.
* Into the Woods. The witch had been transformed into an old crone body for a while, and after that curse is broken, she has a whole song in which she shows off her actual appearance, which is youthful and good looking.
* Into the Woods, the Wolf opens his coat to show a display of candy when he is trying to lure Little Red Riding Hood off the path.
* Into the Woods'. This is especially true of The Wolf. It's even lampshaded by Little Red Riding Hood's song later: "Nice is not the same as good!"
* Into the Woods uses this in relation to fairy tales; for example, Jack might be the hero, but he still killed someone's son. The point of the musical is to show that people are not good or evil, but just people.
* Into the Woods want a child, but are magically cursed with infertility. Act 1 revolves around the quest they must complete before the Witch will lift the curse. (They have a baby in Act 2.)
* Into the Woods, we don't know the full plan to kill the Giant until it's executed.
* Into the Woods, when the Baker's wife and the Prince have a romantic encounter in the woods, he tells her that "Right and wrong don't matter in the woods. Only feelings." After the deed goes down, she spends the rest of the song wrestling with her conscience before finally rationalizing it.
* Into the Woods, who keeps her (forcibly-adopted) daughter Rapunzel locked in a tower in the depths of the forest... to keep her safe and "shielded from the world".
* Into Thin Air both book and film versions. This is about a guided tour of Mount Everest gone terribly wrong. The book is nonfiction, the film was based on it.

* In tournaments the face will usually win one match and a heel the next to set up a confrontation between the two in the next bracket. There are some exceptions:
* In tournaments, the head judge has the power to make any ruling he wants, and his word will be final, even if he turns out to be wrong (i.e. even if the decision was actually against the official rules of the game, whatever the head judge of a tournament says goes, and that's that). The only recourse a player has if they don't like what the head judge ruled is to make a complaint afterwards. And while these types of incorrect rulings do happen, such a thing is quite rare.

* In traditional Australian Aboriginal belief systems there are "songlines", which are sort of equivalent to ley lines. The simplest way to describe them would be spiritually significant paths through the land between places like water holes, hunting grounds, or sacred places. These paths (sometimes hundreds of kilometres long) and the landmarks along them are memorised as long, complex, extremely sacred songs that tell the story of how they were formed by gods or totem ancestors, such as the Rainbow Serpent.
* In traditional Chinese folklore, many powerful people essentially had sleeves that could store everything. Being trapped in one was generally a sign that you were screwed.
* In traditional faiths based on the Orisha deities, there's a pleasant story about how Olofi, the Supreme Being, was suffering from burnout, presiding over the universe and its many problems, while continuing to create life. And the Orisha each tried to cure him, to no avail, until little Elegua, a child deity, started asking if he could help and got told to be quiet, "Go play, kid, this is a matter for grownups," etc. Finally allowed to try, Elegua provided restorative herbs he'd learned about from another deity, Ozain, and completely cured Olofi. Elegua was made chief messenger and the keeper of the keys to all dimensions and pathways, with the ability to travel unimpeded through time. The little one also gets to eat first in every ceremony.

She quickly gets wasted on the alcoholic punch being served. Steve tries to snatch her cup away when he notices her getting too intoxicated to walk, and in the struggle, she ends up spilling punch on her dress. When he takes her to the bathroom so she can try to dry off, she lashes out at Steve and implies that she doesn't love him. A heartbroken Steve storms out, and Jonathan has to take her home and put her to bed.
* In "Trick Or Treat", he offers a young woman £500 if she doesn't kill a kitten in a glass box. Not only is there a Big Red Button which will kill the

kitten, but he tries to regress her to a more childlike state where she will be more susceptible. And slapping the coffee table he's sitting next to, in a motion much like that of pressing the button, which is on a similar table. And clicking his pen rapidly. And making a clicking noise when he leaves the room.
* In "Tricks of the Trade", the trio gives Jessie's Wobbuffet a rather jaded induction to the team. Wobbuffet is the only Pokemon other than Meowth that accompanied Jessie and James over nearly every series and still does to this day. This gets even more heartwarming once you realize that Wobbuffet's original trainer Teru/
* In "Tricycle of Terror", Billy gets sent flying off his bike and has his face run into ground against the road. When he lifts his face up, only small shreds of skin are left, and his skull is visible - all in front of a group of children selling lemonade, too.
* Intrigued by Humanity: Other species find us to be interesting because of how different we are to them.
* Intrigues are all about it: Mikuru goes one week back in time and poses as her own long-lost twin sister.
* Intriguingly, of all the first-gen California roadsters produced, only
* Intriguingly, the Dark Side ending for its sequel is more plausibly canon than the Light, due to the third installment being canceled. The dark-side ending ties up the loose ends of the main characters' fates

* In Trinidad, the "Pink Panther" name is associated with the reigning Calypso Monarch. Good luck finding anybody who remembers the movies.
* In "Triple Threat", Spike has not only made a checklist of things to do to prepare for the arrival of Dragon Lord Ember, but a list of reasons he should be worried about the visit. Starlight Glimmer can't help but joke that Spike's been hanging around Twilight too long.
* In "Tripped!", the announcer mistakenly calls the Loud family the "Load" family.
* In Trip Theory's "Times Up(The Bomb Remix)", there's apparently a timestretched and backmasked(?) vocal sample in the transition to the third break.
* In "Tri-Stone Area", set in 27,000 B.C.E., Doofenshmirtz's ancestor only grunts and laughs, but when a platypus-like animal breaks through a hole in his cave, he makes primitive noises while pointing to the giant cave entrance, which is about two feet from where Perry broke in.
* intro As the disembodied hand is requesting him to play the specific piece of music on the organ, he briefly played the following familiar pieces of music:
* introduced as a terrible monstrosity whack will send you flying through the nearest wall, and a stomp of his creates minor earthquakes, among other mysterious feats. Most recently he joined Xykon, Redcloak, and a new character in clearing out a cave full of monsters. All the others came out visibly damaged — including Xykon! The Monster in the Darkness comes out still carrying his bucket of red paint. As in, he presumably did it all one handed.
* introduced he's gone dark, figuring he's going to scare some people, feel bad about it in short order, and undo the damage. Which is, of course, exactly what happens.
* Introduced in the comics several months before their TV debut (see the Western Animation entry below), the Cobra B.A.T.s (
* Introduced in the "Planet of the Symbiotes" crossover and further expanded upon in the "Planet Venom"

*) introduced Mr. Ballsmatron in episode 7, and other than a few cameos, it never played a role until the season finale, with an ultimate ball kick and its

destruction. Making it possibly the first appearance of a Chekhov's Ball-kicking robot.
* Introduced Species Calamity: A new species is introduced to an area and ends up damaging the local ecosystem.
* Introduced Species Calamity: Humans ill-advisedly introduce a new species, only for it to damage or destroy its ecosystem.
* introduced the freaky-cool ninja dude to his wife, in the fake-evil-Angel-to-fool-Faith episode.
* Introduces the Dragon Cult, whose remnants are encountered throughout dungeons as the undead Draugr and Dragon Priests. As the name implies, they were worshippers and servants of the dragons in ancient times.
* introduces time travel, allowing the entire Dharma initiative to be added, as well as the survivors from the second plane crash that brought the Oceanic six back to the island.
* introduces us to a future version of Christianity devoted to the brutal weekly execution of a criminal codenamed "the Ascetic," who dies for our sins.
* Introducing first, from some kind of place, weighing in at so many pounds, wrestler's name! That used to be the standard entrance for any wrestler but at some point, the WWF decided to stop giving the weight of women wrestlers. (
* Introducing new competitive divisions or revitalizing old ones can fall into this. When the whole promotion is fresh entire shows can consist of almost nothing but establishing whose who and what's what. When champions and angles are already running though, that leaves less time to explain rules new the audience(Most television titles, the small amounts of variation in
* Introducing normal people to tactical-ish flashlights with the on/off switch in the tailcap? Get ready to sigh
* Introducing yourself, and identifying as the particular class of person the group supports. (For example, "Hi, I'm Bob, and I'm an alcoholic"). A
* introduction ability. One section has her explain how to grab items from across crevices; it's possible to snag the key without approaching close enough to trigger the tutorial scene, which leads to Tia commenting on how Maxim already knew how her Hook Shot works. A later scene requires Tia to grab a box you passed by earlier in order to reach a higher ledge. If you threw the box away from its initial position, Tia will tell Maxim to look, the camera will zoom in on its original place... and Maxim will comment that nothing is there. The game even acknowledges whether it was Maxim or Tia who moved the box.
* Introduction by Hookup: Someone has sex or romance with a stranger and then meets said stranger.
* Introduction by Hookup: Two people hook up in a one-night stand. No biggie, right? No strings attached... until they meet again, sometime later, under new context.
* introduction have an organic eye visible at the end of their eyestalks. Apparently this is the eye of the internal creature, with its optic nerve extruded down a metal pipe.
* Introduction to Psychology ersatzes to illustrate the effects of classical conditioning.
* "Introduction to Statistics" includes a brief throwaway line apparently establishing that Pierce's father is dead. This is later contradicted by "Advanced Gay", where his father Cornelius Hawthorne appears and plays a major role in the story. "The Psychology of Letting Go" makes it especially obvious that his father wasn't initially supposed to be alive: the main plot revolves around the death of Pierce's mother, but there's never any indication that she left behind a grieving husband, and her recorded farewell message is only addressed to her son.
* "Introduction to Teaching"'s B-plot centers on Annie getting an A- on an assignment and trying to find out why. As it turns out, the teachers at Greendale use A-'es to piss off overachieving students and make them drop the class. This leads to Annie rallying the students to demand "Slightly higher grades! Slightly higher grades!"
* introduction video; a Terran warship from a different faction shows up overhead,

but promptly leaves again without doing anything for the besieged Terrans on the ground.
* Introductory chemistry textbooks will occasionally contain a sample dilution problem along the lines of "50 mL of 40% ethanol (by volume) is mixed with 0.25 kg of a 75% water (by weight), 25% particulate solution. Calculate the mass fraction of the ethanol." Which will be instinctively familiar to college students, as famous 40% ethanol solutions include most forms of liquor and most sugared soft drinks are about 2/3 water and 1/3 sugar and flavouring agents—so this problem is basically asking you, "How strong is that mixed drink you're making this evening?"
* Introductory instructors in technical fields must walk the fine line between an explanation that's simple enough for the students to understand and one that's technical enough for them to apply correctly (one method is to first say it in layman's terms and then
* introductory level has Wario outrunning a giant boulder after stealing a "Form Baton" (a Wii Remote set in stone) from a temple somewhere in Diamond City. Run out of lives, and the boulder crushes him.
* Introductory Opening Credits: Credits in a show's opening sequence that display the characters with their names beside them.
* Introductory Opening Credits: Opening credits with the characters and their names.
* introductory scene is essentially this — he walks into the building where Dean and Bobby are waiting and continues forward calmly even as they open fire on him, while light bulbs burst in his presence and the building shakes and rattles. When he finally reaches Dean, Dean immediately stabs him in the chest, and his response is to look at the knife with a sort of vague amusement before simply pulling it out.
* Introduire means literally "to insert." It also means to have anal sex with, in French slang.
* Intro Dump: Altogether too much information thrown at the reader at once in a big, ugly blob.
* Intro Dump: Main characters, and just about everything to know about them, are shown right at the very beginning of the work.
* In "Trogday '08", Strong Bad does a song about the "S is for Sucks" Dragon, complaining that "you Internet types
* In Troll mythology, Lord English is even known as the Angel of Double-Death for this very reason.
* Intro-Only Point of View: The opening of a story that is told from a characters point of view.

* In "Trump Guy", Peter broke the fourth wall to say the show was beginning to cut back on the gay jokes. However, in "Disney's The Reboot", Peter says that quote was taken out of context, which doesn't make sense.
* Intrusion 2 enemies as well as the player can ride in three kinds of mech suits, some with rifles and homing missile launchers, others with machine guns and giant knives, and ones with a harpoon arm allowing them to grab enemies or objects and throw them as weapons.
* Intrusion 2 The blaster is a laser rifle and the machine gun and double rifle may be some sort of plasma gun. Maku wields a large laser cannon, and MACE shoots lasers out of its eyes.
* Intrusion 2 The final boss MACE is a giant robot, complete with Eye Beams, giant missiles, and huge electrified fists that also shoot lasers.
* Intrusive Thoughts crows are mentioned to gather round the narrator's dead body.
* In "Trust Me", the kid, to fund his drug habit, sells drugs to an undercover cop with a briefcase full of money, resulting in the cop pulling out a pistol and a badge, which is less surprising than most examples of the trope because he gets down on his knees and says "
* In Truth Behind the Myth mode, giant tribes are one of several mythological creatures presented in a mundane manner. They're certainly bigger than normal troops, but look more like people with gigantism than something outright supernatural. The tooltip explains the mythology of giants might be because of the Greeks encountering populations of on-average taller people than themselves.
* In "Truth", Marinette and Luka come close to kissing on their movie date when Mr. Pigeon causes a moment killer.
* In truth, Miley (Cyrus, that is) only performed as both Hannah and herself between 2006 and early 2008. She
* In "Truth or Square", SpongeBob, Patrick, Squidward, and Mr. Krabs go to the Krusty Krab's surveillance room when trying to find a way out of the building's duct system. One of the video feeds they watch is showing them watching the video feed. Then it is revealed that
* In "Truth or Square" this happens as SpongeBob and Sandy's wedding is ruined but is
* In truth, this battle strategy wasn't as practical as it was convenient. With most fights in the series being chaotic brawls, anything could have happened to cause Danzo to lose track of the time he had for each eye, and he had to keep checking the eyes like a watch in the middle of his fight with one of the most dangerous ninjas in the series. Sasuke took advantage of this by casting a minor genjutsu to make him think he had more time than he actually did, thus he ended up taking a fatal blow in a
* In truth this happens to several different characters once they are separated from the War of Five Kings. Bran in particular has wandered around accomplishing nothing.
* In truth, this is the role of the Imperial Stormtrooper altogether in the Expanded Universe. They’re stripped of their identities, given a number and hidden behind a mask, and they’re treated as completely disposable. They are the designated cannon fodder of the Original Trilogy. And yet they’re actually

highly trained
* In trying to explain the joke behind one of his Vines, he ends up admitting that the more he explains it, the less funny it becomes. In that same video, he also lampshaded this again, adding a caption that called his explanation pointless.
* in trying to kill other humans, specifically the player character. Duh.
* In "Try the Pie", Paul Weir develops the ability to create fire from his hands after taking promicin.
* IntSec Agents with a higher clearance or even Ultraviolet-clearance High Programmers.
* "INT. SUB" also uses this structure for the majority of the episode. It focuses on Diane's therapist and her wife (a mediator for Todd and Princess Carolyn) discussing their new clients to each other, but changing their names due to client confidentiality rules. So, Bojack becomes "Bobo the Angsty Zebra" (with the title sequence changed to reflect this), Diane becomes "Princess Diana", Todd becomes "Emperor Finger-Face", and PC becomes "a Tangled Fog of Pulsating Yearning in the Shape of a Woman."
* In "T, the Terrestrial", Fry eats what he thinks is colored candy, but it turns out to be Omnicronian poop. ("Feces Pieces?") They apparently don't' taste so bad, as Fry keeps trying to eat them even after the reveal.
* In "T: The Terrestrial", Leela informs Bender that, contrary to his expectations, the Planet Express ship has no cloaking devices or any stealth technology that could get them past a blockade (save for a can of spray paint). The intended joke is that the Planet Express is ridiculously poorly equipped, but Leela is actually right:
* In T.U.F.F. Puppy this happens quite a bit like in the episode "Snapnapped" when Keswick pretended to turn evil to capture D.O.O.M. Doom started beating up Dudley and Kitty and when they stuck their heads out of the dust cloud to try and reason with him they got pulled back in.
* In "Tunnel of Glove", while watching a report on the disaster at Glove World, Patrick repeatedly says stuff is bad...only to say something that's food-related. The news reporter yells at Patrick after this happens twice.
* In "Turd Burglers", Linda Stotch truly deserved to vomit and defecate uncontrollably as punishment for her abuse, mistreatment, and attempted murder of her son Butters. For those wondering about her husband, he got hit with this earlier. See the Video Game folder.
* In "Turkey Jerky", a Thanksgiving-themed cartoon, the Warners are Native Americans who are trying to protect their pet turkey from Miles Standish who wants to shoot it.
* In Turkish, deep romantic love has a different verb ("aşık olmak") than shallow love of foodstuffs or a friend's love (sevmek). However, both can be used to describe romantic love.
* In Turkish there's actually a poem about this phenomenon, though gender-inverted. Attributed to the (semi-legendary) 17th-century folk poet Karacaoglan, it's called "A Girl Has Called Me Uncle, Oh Woe Is Me"
* In "Turnabout Academy," the culprit was supposedly on stage speaking while the murder was being carried out. After it's proven that he recorded his entire speech, his alibi falls apart.
* In "Turnabout Academy", this becomes a plot point late in the trial. The killer claims that the defendant actually did the murder and convinced her to help get her off, but Athena points out that the killer was the one responsible for submitting evidence to the police, thus resulting in the defendant's arrest.
* In "Turnabout Revolution", the culprit has a seemingly ironclad alibi of having performed a spirit summoning ritual in front of an audience at the time of the murder, until it's revealed that they had another person pretend to be them during that ritual.
* In "Turnabout Samurai", the killer says they were nowhere near the crime scene... but this is turned on its side when it's discovered that the real crime scene was exactly where the killer claimed to be.
* In "Turnabout Serenade", the murderer claims throughout the case that they have

a solid rock alibi because they were onstage when the crime occurred. It is later revealed that the murder happened
* In turn, all three of his sons served in the armed forces. Quentin Roosevelt II, Theodore Roosevelt IV and Cornelius V.S. Roosevelt III all served in World War II.
* In turn, A's father the 3rd Raikage was even more so. Cooler tempered than A, in possession of an impressive beard, he was an incredibly imposing ninja who could fight with entire armies.
* In "Turner Back Time", Timmy goes back in time to an ancestor of his to teach him the right decision to make him rich. Even though Timmy and his parents are rich and happy in the present, they have rendered the town a dump and Timmy loses Cosmo and Wanda since he is considered happy.
* In turn, Governor Ratcliffe, who is already convinced that the Powhatan tribe has a hidden cache of gold, becomes fed up when he learns that they've seized John Smith, and declares that he will lead his men in a dawn attack on them.
* In turn, he learns forgiveness from the Bishop of Digne after 19 years of prison having made Valjean bitter and hateful. The Bishop allows Valjean into his home and offers him dinner. When Valjean steals some things from him in the dead of night and later caught and brought back to the Bishop by the police, the Bishop states Valjean was given the items, as Valjean told the police, thanks the police for their diligence, and tells Valjean he is giving him rarer and more valuable items to help him on his journey, stating he is buying Valjean's soul from the darkness that has filled it.
* In turn Lori clashes with Sephtian. Due to being a fish-graph Atlantian, she sees the mentioned comment as racism. Sephtian being part-of the genetically inbred and slowly dying Manta-graph Atlantian sees the possibility of changing or reversing his graph as a positive thing as his group suffers from many genetic diseases and are incapable of reproducing with anyone outside their group.
* In turn, Minecraft is frequently accused of "ripping off" other games like

* In turn, this leads to a positive example of this trope, and probably the biggest in this franchise since the case with Rita. General Norquist, the base commander of NASADA, with only minor appearances between two episodes of this season and three of the next, has no reason to believe a kid who looks like he came from a war zone that the Power Rangers need their super-advanced space shuttle. And yet,
* In "Turtles On Trial", even though they had neither torches or pitchforks, an angry mob chased the Turtles off after the green quartet had caught a couple of jewel thieves.

* In "Tutor Sauce", Mr. Krabs is handed a bill for all of the damages to the Krusty Krab that SpongeBob incurred with his driving, which included rebuilding the entire restaurant after it was destroyed in an oil tanker explosion. When SpongeBob drives into the side of the building, the contractor takes the bill and adds onto the total amount.
* In "Tutor Sauce", Mr. Krabs tries to teach SpongeBob how to drive using a video game simulator. Like with SpongeBob's other boats, the
* in TV and movies, an animal actor's food is essentially their salary. Result: Once the animal's appetite is satiated, they're pretty much done for the day (not always the case for domesticated animal actors, but for wild animal actors, once they've eaten their fill they tend to prefer the strange bald creatures let them rest)

* In "Twisted", Voyager gets trapped in some kind of space anomaly. When asked to try to fly out of the anomaly, the helmsman states he can't, because the anomaly surrounds the ship "like a ring".
* In "Two Bad Neighbors", after Bart and Homer glue a rainbow wig onto George H. W. Bush's head before his speech to the Elk's club.
* In "Two Cars in Every Garage and Three Eyes on Every Fish" upon being told his plant needed $56 million in renovations to avoid being shut down Mr. Burns pulls out a liquor bottle and pounds shots for several hours, drunkenly stumbling to his car and sobbing.
* In "Two Cars In Every Garage, Three Eyes on Every Fish", Burns asks Smithers how much it would cost to bring the power plant up to code. Smithers calculates that it would be about 56 million dollars.
* In two cases, prisoners who maintained they're innocent refused to say that they were guilty in hopes of gaining parole. One time the parole board granted it anyway, which they noted was probably the first time that had happened (since it's required that a prisoner confess generally as part of taking responsibility). However, in the second case he was denied and had to wait until DNA exonerated him. This is a real thing, called the

* In two other episodes, it's mentioned that the CIA invented crack cocaine and the FBI invented AIDS.
* In two pieces of much happier backstory, "Birthmarks" told us that it, in a reversal of expectations, was actually House being a nice guy to Wilson (i.e bailing him out of jail because Wilson was having issues and getting divorced from his first wife) that started off their friendship and "Adverse Events" revealed that House was... a college cheerleader.
* In two player mode you can play in the arena and if you stand in the middle too long the beast eats your character.
* In two player mode you can play on Felucia and throw your opponent into the Sarlaac pit.
* In two similar Swiffer commercials, an old-fashioned string mop is spurned by its owner, and seeks female companionship from other inanimate objects. One ad shows it courting a pink (hence female) bowling ball, and the other, a rake with a leaf daintily stuck to its tines where this trope would normally place a flower.
* In "Two Steps Forward, Two Steps Back", when Yang is training with her father Tai, he gives her a harsh wake-up call about her over-reliance on her Semblance and her simple fighting style. When they have one last spar before dinner, she fights him to a standstill, leading him to say "Now you're using your-". He doesn't get an opportunity to finish before she trips him and catches him before he falls. He looks up at her and gives the warmest smile yet seen on the show.

* Inugami-san to Nekoyama-san. In Ushiwaka's introduction, she trips and falls on Nezu in an over-the-top manner, ending up on top of her.
* Inugami the dog youkai specifically invokes this by basing his dog form on trendy mascots in order to appeal to Kohina.
* Inugami, yet his hatred of humans remains until the very end of the series.
* In "Ugh", SpongeGar and Patar put their hands in their recently-discovered fire for a good 10 seconds before screaming in pain.
* In "Ugh," the show's prehistoric episode, there's a series of cuts between Spongebob, a stick, and some fire, all accompanied by the dramatic sound of a barbershop quartet. At one point, the camera cuts to the live-action footage of the quartet itself (complete with a woman wearing a mustache) for
* In "Ugly" House is horrified to realize that he has been so entranced by Dr. Terzi's beauty that he has overlooked serious deficiencies in her medical skills. He worries that he's doing the same thing with Thirteen, but when she correctly diagnoses the patient of the week, he says something like, "She's getting uglier by the minute."
* Inuit artist Simon Tookome is proficient with a dog whip, to the point that he used to whip cigarettes in half from almost 15 meters away... while the cigarette was in someone's mouth. He has also used his whip as a weapon to hunt caribou and,

on one occasion,
* Inuit Mythology has the Adlivun, said to lie under the sea and the earth, but only accessible through the Moon.
* Inuit Mythology talks about the vengeful ghosts of children that were left to die of exposure after having been named, which gave it a soul, and so return to their families to seek vengeance. They nurse from their mothers at night to build up strength (possibly sucking the life out of her), then use that strength to try to murder the members of their family who actually abandoned it in the wilderness. They only depart after killing all of their family, or if a shaman banishes them.
* Inuit Mythology (the indigenous people from Alaska, Canada and Greenland)
* Inui, who cruelly beats his brother, Saburou, nearly constantly claims the world is too cruel for his brother, spouting, "I'm the only one allowed to hurt him!" But it comes out creepy as opposed to heartwarming...
* Inukami! and starts drilling the ground with its drill bits not long after.
* Inukami episode 14, Keita gives a cucumber to a kappa, asking it to return the favor — right now, if possible.
* Inukami!. Its unknown if this is permanent or if they're just exhausted.
* Inukami!: Kaoru's specialty is wind magic. Though, oddly, he invokes the "White Mountain God" to do it.
* Inukami!, Keita obtained a "love" medicine that makes anyone he sees fall for him, but doesn't seem to work towards Yoko, his love interest.
* Inukami!: Some episodes have Youko hardly appear at all, like the one focusing on Tomohane searching for Keita.
* Inukami! who always ends up naked in public whenever he pisses off his familiar, Youko. Youko teleports him out of his clothes and into the most populated place nearby that the cops are already familiar with him and the local perverts who are always in jail think of him as one of their own.
* Inukami!, who likes undressing people and putting them in embarrassing cosplay.
* Inukami!, Youko regularly torches the parts of Keita's collection he doesn't keep hidden.
* Inukami! Youko's idiot hair pops up from time to time, usually when she's acting like a ditz.
* Inukashi (Dogkeeper), if you go with the theory that (s)he's a guy. The manga, anime, and light novels support varying interpretations of his/her gender, and it's never stated outright. Either way, (s)he's got really long hair from never cutting it and a thin build from malnutrition.
* In Ukyo's first story after being introduced to the cast, she tries to set up a blind date between Ryoga and Akane using a love letter written on an Okonomiyaki, which Akane naturally mistakes for a challenge from Ukyo. Of course, this isn't helped by the fact that
* In Ulduar, one mech stands out... obviously I'm talking about XT-002 Deconstructor! This is an ENORMOUS mecha, able to tear a warrior apart in a matter of seconds. It has the mentality and the voice of a little child and it considers you, the raiders, as his toys. When he kills someone, he says, "I guess it doesn't bend that way...". Funny, yet somewhat creepy at the same time. There are guilds raiding XT for the first time... seeing the towering mecha and preparing for an epic battle... and wiping because as soon as the boss was aggroed, everyone started rolling on the floor laughing over his voice. "New toys? For me? Oh, I promise I won't break them this time!"
* In Ulfric Stormcloak's backstory, he inflicted the entire city of Markarth with this: any Forsworn sympathisers, including women and children, were put to sword once he'd taken the city.
* In Ultima-Java's UJ-verse a lot of the unimportant background and world establishing information was described on the Wiki or through discussion on the UJ Forums. The site is discontinued.
* In "Ultimatum", the Ultimen have literally no valid reason whatsoever to fight the Justice League other than deciding that,
* Inu Monogatari is a 1901 Japanese book that insists native Japanese dog breeds are descended from dholes. This is inaccurate. The dogs are descended from wolves,

just like all domestic dogs.
* Inumuta also explains a lot of things going on in the story, such as some of Ryuko's powers like Senketsu Mubyoshi. Though unlike most examples, he needs data to explain what's going on, leading to some times where he can't explain the situation itself. Nonon lampshades this in "I'm Not Your Cute Woman".
* Inunaki Tunnel: After you get stuck in a phone booth, when you can finally leave, one of these appears on said booth and the door opens.
* Inunaki Tunnel find an axe at one point in the game that you can use to cut down a tree to get across a river.
* Inunaki Tunnel: Set on October 27th, 2005. Released on November 19th, 2019.
* In "Unanswered Prayers," he meets his high-school crush years later, after he's married, and realizes that he's glad he didn't end up with her.
* In "Una Salus Victus", Dylan Hunt seizes control of old Commonwealth orbital defense missiles from the Drago-Kazof pride and fires on his own position to force Fleet Marshal Cuchulain to back down and let him and Tyr go. They're in a bunker under a mountain, so they're safe for a half-dozen hits, but by the fifth missile it's clear the mountain won't last much longer.
* In "Undercover Olive", Odd Todd refers to Kooky Clown — who is really Olive in disguise — as "Kooks".
* In "Undercover Olive", when Olive has her Kooky Clown disguise exposed and the villains of the
* In "Under the Bed", the child snatching creatures can shapeshift. One changes into a teddy bear in order to lure Andrew Rosman to his doom.
* In "Under the Lake", after a breach in an underwater base, sealed doors shut Doctor and Clara on opposite sides of a corridor. They engage in this trope via facing windows as the corridor fills with water.
* In "Under the Lake," the Doctor asks Clara why he doesn't have an alarm clock on the TARDIS. She reminds him that he disassembled it and used the parts to build a clockwork squirrel.
* in under three hours, and does have other modifiers: Megaman starts off with the Jet Skates in his inventory, and all Zenny drops from enemies are doubled, which makes maxing out his special weapons a little easier.
* In Underverse 0.0, half of Sans' soul is taken by X-Event!Chara and they escape.
* In Underverse 0.2, despite being beaten back and losing control of Underfell! Sans, Cross still manages to escape with Underfell's Snowdin.
* In "Under Water", when Stef is dreading her upcoming surgery for breast cancer, she imagines herself peacefully swimming in a pool naked. After she confides in Lena and asks her to take her swimming, Lena brings her to sneak into an absent neighbor's backyard at night and they have a
* In "Undie Pressure", the Loud siblings are on a bet which means that Lori isn't allowed to talk to her boyfriend Bobby, Leni isn't allowed to use the word 'like', Luna isn't allowed to talk in a British accent, Luan isn't allowed to tell jokes, Lynn isn't allowed to turn things into sports, Lincoln isn't allowed to read comics in his underwear, Lucy isn't allowed to scare people, Lana isn't allowed to
* In "Unending", the Reset Button is an actual button that's pressed near the end of the episode, resetting time to before they got stuck in a time bubble. This undoes the decades spent by SG-1 on the ship and allows them to escape from the Ori. The only one unaffected is Teal'c (who as an alien, has an expanded lifespan anyway), since he had to retain his memories in order to prevent it from ever occurring.
* In "Unfair Science Fair", another flashback shows that Doofenshmirtz lost two consecutive science fairs to a baking soda volcano. The same happens when he competes against another baking soda volcano in a poetry competition.
* In "Unfair Science Fair", Candace was called "slow as molasses" by another girl competing for a job at Mr. Slushy Burger, but Candace could only manage to retort with "I think I'll call you... something slower than molasses, that's for sure!"
* In "Unfriendly Chat," Adam is on a video chat with a woman he has never met before when she is strangled.
* In "Unfriendly Skies," Grissom and his team investigate the death of a first

class passenger on a flight to Las Vegas. Their investigation is a race against time, because after 12 hours the F.B.I. will take over. To make matters worse, the other first class passengers are very reluctant to co-operate, leading the team to consider that they had some involvement in their fellow passenger's death.
* In "United State of Pop 2009 (Blame It on the Pop)", he takes the line "With a big smile on my face / And it never feels out of place" from "Gives You Hell" and incorporates it to the overall positive message of the mashup, but in the original song it's an expression of schadenfreude.
* In "United State of Pop 2019 (Run Away)", by removing the "we'd always" from "we'd always go into it blindly", Earworm transforms the melancholic lyric from "Lose You To Love me" to make it sound like it's encouraging you to do it, fitting with the "escape" theme of mashup.
* In "Universal Monsters", the Doctor arrives in a village where the people live in fear of the mad scientist in the castle and the monsters he creates.
* In-Universe; a Beast is a Beast and deserves to die. No matter the harm a Hero does to everyone else around them in the process.
* In-Universe abilities. She resorted to using an appearance extrapolated from her earlier looks, which is implied to be the reason for her clumsiness, due to different balance and all.
* In-Universe about a particularly obscure passage in one of his poems. Robert puzzles over it for a bit and then admits that he doesn't know what it means either.
* In-Universe, about seven generations of a Cardassian family who all live selfless lives of service to the State. Julian finds it dull as ditchwater, while Garak calls it "the finest Cardassian novel ever written" and the definitive example of the "repetitive epic" genre.
* In-Universe, a few hints scattered in-game and by developers on the official forum (before and after the game's release) indicate that Quill-Weave not finding magic in the Doom Stone might not necessarily be proof of her not having done research. Rather, the Doom Stones are implied to have a connection to prophecy and the Heroes of Events, to the point that they might only activate for such people - which the main character is, but Quill-Weave isn't.
* In-Universe. After Ginger encourages him, Fowler takes the wheel anyway, and does a pretty good job of it.
* In-Universe: After she turns against Pakistan's government, Saleem's sister is arrested and never seen again. However, Saleem has a dream about her escaping and hiding among a group of nuns, and desperately clings to this happier possibility. Her ultimate fate is left ambiguous.
* in-universe.) After the money is moved, Scrooge is comforted by the thought of his fortune safe...until he learns that the Beagle Boys know about the hiding place. Scrooge once again enlists his nephews for the fight, and Huey, Dewey and Louie sing, "Once more around on the merry-go-round..." as they head off into battle.
* In-Universe against older actresses, many a film will cast an older male actor whose character's age is deliberately vague, meanwhile his female love interest is played by an actress young enough to be his daughter, but the gap is never brought up within the film itself. This applies to both live-action and voice acting.
* In-Universe: A man starts imparting a seminar titled "How to raise your children", after he got kids of his own he renamed it as "Suggestions for raising your children", and when his kids became teens he canceled the seminar.
* In-Universe and a grin after writing this last part, Snoopy thinks "This twist in the plot will baffle my readers..."
* In-Universe, and apparently doing such a good job on it that he considers dropping out of college to persue an acting career. He's not happy when he finds out they cut his lines from the episode, and they mispelled his name on top of that.
* In-Universe and coarseness, and he repeatedly tears down what he feels are lifeless, bloodless stories from his students. When one of them protests that he hasn't spent enough time getting to know the narrator of her story, he delivers a

scathing takedown that works equally well for the writer as well as her narrator.
* In-Universe, and even a tail. She, on the other hand, is less than thrilled.
* In-Universe and it ends badly for Twilight Sparkle who ultimately accepts that some things just can't be explained.
* In-Universe, and Jett soon learns that the producers intend to have her replace him as the main character altogether. By the end of the episode, however, he's managed to both save his job and befriend the new girl, leading to her character becoming an equal partner to his and her actress joining the supporting cast.
* In-universe and play back over the stadium's sound system a recording from an interview featuring Mankind (in which he happened to speak the words) in order to have the words aired, and thereby "spoken" by his opponent. When Mankind points this chicanery out a few weeks later, the two did battle again in the now famous Super Bowl Halftime Empty Arena match, which ended with Mankind winning the title off the Rock by pinning him with a forklift.
* In-Universe and some fans start complaining, he lashes out. "Martin" says he revels in upsetting his fans, and proceeds to bash their hopes for his own joy.
* In-Universe... and sometimes, he gets into houses to kill people randomly.
* In-Universe, and the 12th Doctor subconsciously copied his appearance for the reasons mentioned above.
* in-universe, and the place (while shattered and renamed Outland) is still habitable, more-or-less.
* In-Universe, and they'll happily change the rules to make it more fun.
* In-Universe an identical twin brother, and the producers had decided that using then-state-of-the-art CGI technology would be cheaper than hiring another actor.
* In-Universe. April once uses Elizabeth's bra as a slingshot and shoots koosh balls at the dog. Elly is too busy laughing to scold April immediately.
* In-universe, Arthur reads a Bartledanian novel wherein the main character dies of thirst in the penultimate chapter because of a plumbing issue briefly mentioned in chapter two. The rest of the book talks about road mending until it ends at precisely one hundred thousand words, which is how long novels are on Bartledan.
* In-Universe as an outlaw, while Ford was treated as a traitorous snake.
* In-Universe as a sort of vaccination against the Spider-Virus. The power, however, was the ability to know which way is north and the uselessness of this is lampshaded, to which he responded that it was the easiest and quickest one to reproduce), but his own powers came from a standard-issue "freak accident."
* In-Universe, a set of toys with the letters CCCP are found in one novel. CCCP stands for "Союз
Советских
Социалистических
Республик", which in English is Soyuz Sovetskikh Sotsialisticheskikh Respublik — Union of Soviet Socialist Republics. It is a testament to how much humanity has lost in the WH40K universe that the discovery of the last earthly remnants of a thuggish dictatorship actually feels like a bittersweet triumph to the reader, and the reader still feels sadness that even this fragment of our own age will not be truly known to the characters that perceive it.
* In-Universe, aside from using unauthorized sound bites of theirs from interviews.
* In-Universe, as the Count attributes the general incompetence of French poisoners to the overuse of this trope in the theater:
* In-Universe), Asuka gets a good look at the muscle tone that Shinji is starting to get as a result of the training and is surprised at finding out that she's been literally mesmerized by it for a couple of minutes.
* in-universe, as when his driving instructor fumes that at this rate, it'll take Goku a hundred years to get his license, he freaks out:
* In-Universe, as Willow's disappearing pig trick goes awry when the piglet he'd made vanish runs out from beneath the table he was using to display it.
* In-Universe at the school Christmas show and is promptly (and literally) yanked from the stage.

* In-Universe attitude make him too "boring" and the two go at it and separate over it. They do make up and figure out a way to work with it and make Silver Skeeter less powerful.
* In-Universe author, the mysterious "S", routinely mocks the inquisition's ineptitude and misplaced confidence in their own thoroughly inaccurate misconceptions. She even mentions being unable to resist correcting the ignorantly self-assured leader of the Inquisition, Wyan of Viktal, on a few misconceptions about fey and arcana that were so blatant she could bring herself not to.
* In-Universe, Barsad, a sniper, poses as a Russian soldier when delivering Dr. Pavel and the three hooded "prisoners" to the CIA agent. He fools the CIA agent by saying the "prisoners" work for Bane, the "masked man", so that the agent and the army soldiers on the plane are unaware until it is too late that Bane is in fact one of the prisoners and will crash the plane....with no survivors.
* In-Universe, based on the Puff Daddy/Jennifer Lopez shooting incident, sees a rapper put on trial for a murder he knows his movie star girlfriend committed. Why did he keep quiet all through his trial? Because his CD sales were going into orbit.
* in-universe because it is such a major part of the show. When the reaction is obvious and on-camera, examples involving it can be considered objective, unlike those involving the viewers at home or other media. Therefore, it only counts as X-Pac Heat if the live audience is booing/insulting a wrestler in ways that they shouldn't.
* In-Universe been victorious in any of the numerous cycles of war, yet her warriors continue to fight relentlessly. This is partly helped by them not knowing that they're repeating it in the first place—when they find out in the 12th, two of them decide to frag their own allies in hopes of better odds next time—but it does pay off eventually after thirteen goes.
* In-universe, Bjorn is a living version of this trope for the Space Wolves and the Imperium as a whole. As one of the oldest living member of the Imperium (implied to be THE oldest) due to being a dreadnought and having walked alongside his Primarch Leman Russ and the Emperor when he was still of flesh and blood, Bjorn is revered by the Chapter for being the last link to the past they have and is often awaken on special days to recount the events of his youth. Unfortunately it's been roughly 10,000 years since he was entombed in a Dreadnought, his memory is heavily muddled and often gives a romanticized version of whatever story he was telling (although he still remembers that the Emperor emphatically did
* in-universe books, is a bard's tale about a man more agile and skilled in full plate than without, and ends on an allusion to how he was better able to satisfy his wife fresh from a tournament than he was before.
* In-Universe brain, and a paraplegic combat instructor who can still kick the asses of the candidate officers.
* In-universe, Brian once told on Adam West for watching cartoons because he was an adult in "Deep Throats", and conversely, "Customer of the Week" had Stewie say "Just 'cause it's an animation, people think it's not legit!".
* In-Universe, but in real life it's entirely impossible to become really good friends without having ever crossed paths in the past.
* In-Universe by her half-alien biology. Another side effect is her gestation was approximately 18 months.
* In-universe, Caliborn is determined to make "You can't escape the miles" into a "thing", but most of the other characters think it's stupid.
* In-universe, Calvin imagines himself as various alter egos, the most common ones being Spaceman Spiff, a heroic explorer, Stupendous Man, a superhero, and Tracer Bullet, a detective.
* In-Universe Camera - camera actually present in the "world" of the story
* In-Universe, Captain Duvat believes that the Emperor still lives and anything else is just Rebel propaganda, and repeating it is a punishable act of treason.
* In-Universe cartoon for this reason. Actually, the character couldn't be used because the rights were tied up.)
* In-Universe case occurs in "The Itchy and Scratchy and Poochie Show", when the

producer of Itchy & Scratchy insists that the writers make a new dog character.
* In-Universe case with Mickey Doyle. He's a Pole, with the real name Mieczyslaw Kuzik, posing as an Irishman.
* In-Universe case with Wilson Fisk and Vanessa Marianna. Fisk spends the season dealing with his criminal empire while also courting Vanessa, but in time, his focus on Vanessa gets to the point that Leland Owlsley and Madame Gao try to have her killed to get Fisk back on track.
* In-Universe Catharsis: Somehing in universe that feels cathartic to a certain character, depending on their situation.
* In-universe celebrities Diantha and Aria of the Kalos arc don low-key outfits in public. One of the openings has a scene where
* In-UniverseCertain historical archery techniques/types also involved actually doing this to a certain extent- a hunter for instance might use a low-draw bow because it was light enough for them to sit motionless at full draw for a few minutes waiting for a deer to wander into position. While the scrawny archer is the modern stereotype, military archers were historically known for their immense strength from training to draw and hold briefly to fire in volleys with the rest of the contingent, and archaeologists have found distorted skeletons of marksmen-type shooters who clearly trained to body builder extremes to be able to draw and aim at a specific target with stupidly heavy bows. It also depends on how much is the bow's draw weight in question, making it a case-by-case basis.
* In-Universe characters (particularly Rat) have insulted him and the comic itself.
* In-Universe children also didn't occur to them. At one point they ask her why she has a dot on her forehead and she questions whether they know anything about their "Brahmin heritage".
* In-Universe Christmas video, "The Star of Christmas." The protagonists are attempting to open a musical called "The Princess and the Plumber" on Christmas night in order to escape the fate of using their talents to sell dental wax. While some effort is made towards advertising it based on its merits as an actual play, Cavis Appethart repeatedly sells new actors and backers on it with the promise of using fancy, newly-invented electrical lights on the sets and costumes.
* In-Universe: Chrome's remote-controlled record player is used to simulate gunfire and confuse Stanley's troops. However, recording actual gunfire turns out to be unconvincing, so Senku instead smacks a plastic container to make a more convincing sound.
* In-Universe close to where a bomb landed, fail to realize that the government pamphlets they're working off of are hopelessly out of date and inaccurate, and completely miss the obvious symptoms of radiation poisoning that they're beginning to suffer.
* In-Universe coming into existence due to her Creator's despair and passion upon creating her before she committed suicide, being the very citing incident to spark off the show's events.
* In-Universe. Corky's husband wrote and published a children's book, only to get sued by a kindly old man who published the exact same story decades ago. The old writer isn't angry, citing the existence of this trope, but he wants his money right now, thank you.
* In-universe, Critic gets some from Douchey. First, he's just called a whore, but then he's called a "war whore", an insult for a woman who cheats while her husband is away fighting.
* In-universe, Davan based the villain of a play that he re-wrote off of his father, Fred, justifying it as needing the villain to be the most interesting person in the play.
* In-Universe. David's phone has a profanity filter that substitutes swear words in texts for random words. David likes how dumb it makes people sound when it replaces a swear with something like "didgeridoo".
* In-Universe dedicated to describing their wedding cake. Funnily enough, the conflict of the episode is resolved when Steven admits he felt the opposite, thinking the ending was really sweet and pointing out all the romantic beats that Connie had ignored in favor of focusing on the worldbuilding or social commentary.

* in-universe delete 80 chapters of their own story in order to defeat the Plot Hole.
* In-Universe depicting the Ephors as priests of the Oracle rather than senior magistrates).
* In-Universe devour said players, but you cannot comment on a play outside from there...
* In-Universe Diana Allers. Copeland will object to an opinion piece advocating abandoning Terra Nova, appalled that Allers would even think of writing something like that despite being on the Normandy, and Allers tells Copeland that if he doesn't like it, he doesn't have to download it. You can choose whom to support in this argument.
* In-universe documents from the timeline's future specifically refer to the royalist forces' treatment of the rebelling Iron Islands (which varies between
* In-Universe doesn't until Aladdin grabs and smashes his cobra staff, which he's been using to hypnotize the Sultan.
* In-Universe. Dougal's first suggestion for lyrics for a song called "My Lovely Horse" is "My lovely horse I want to hold you so tight/ I want to rub my fingers through your tail and love you all night." When Ted points out that the lyrics should be about being best friends with the horse, not about being in love with the horse, Dougal proposes "Take this lump of sugar, baby, you know you want it."
* In-universe, Doyle is fond of the saying "Courage is not the absence of fear, it is acting in spite of it", but misattributes it to William Shakespeare instead of Mark Twain. He's rather miffed when Epsilon and Carolina tell him that he has the source wrong.
* In-Universe: Drac, at least initially, thinks the idea of a cruise ship is inherently pointless, telling Mavis (and, later on, Murray and Frank) that it's just "...a hotel on the water!"
* In-universe drawn diagrams are often used in to explain concepts (such as
* In-universe, Dr. Serizawa believes nature sent Godzilla to restore balance to the world by hunting the Mutos.
* In-Universe: During a world tour arc, Miyu and Sal are back at home talking with their boss Masa on the phone, trying to convince him that he could use their help on his current mission... in an expy of Hawaii. While they're talking on the speakerphone, they're also packing beach gear.
* In-Universe either, but are rather pretext or have an ulterior motive; the players are making it up as they go along, without other characters' knowledge.
* In-Universe ending of one of the stories, leading him to reply, "Hey, if you don't like it, don't eat it."
* In-Universe episode; he's saying that Scott shouldn't play the game if he hates it so much. Scott retaliates by asking how would he know that he hates the game if he's never played it to begin with.
* In-Universe episode "Ripped Pants." SpongeBob rips his pants, and everyone laughs. At first, he's embarrassed and upset, but when he sees that Sandy thought it was funny, he starts doing it on purpose. It begins to annoy everyone in Bikini Bottom, especially when his stunt involves pretending to drown.
* In-Universe episode "The Ember Island Players", where the play version of the Gaang's adventures skips over some of the more boring parts. And then ends with an original ending for events that have yet to happen.
* In-universe (er) example: When Bender goes back in time to steal the Nobel Peace Prize, in his escape, it is revealed he is the cause of the first destruction of New York City, an event seen briefly through a window in the pilot episode.
* In-universe, even though the different races of Nirn may have different religions and forms of worship to varying gods or representations of similar gods, it's possible to experience the divine influence of all their religions, suggesting the coexistence of these gods and divine constructs.
* In-universe example: according to... Well, just about everyone at school in
* In-universe example: after the umpteenth time Daario attempts to seduce Dany, she decides it's time for him to put up or shut up and orders him to disrobe. Her open appreciation of his naked form (with her still clothed) is used to illustrate

the power dynamic between them; she takes him as a lover but on

* In-universe example: Chris and Meg were in Halloween costumes and didn't recognize each other. They ended up playing "Seven Minutes in Heaven". It's not clear what they did for 7 minutes in the closet, but when they discovered who they other was Chris cried "We did so much!".
* In-universe example: Dr. Milton Glass, a scientist who was present when
* In-universe example: From the police's point of view, the defendants are always Red Herrings, with something making them seem suspicious enough to arrest. Whether it be because they were found at the crime scene, were framed by the real killer, had confessed, or otherwise had "decisive" evidence implicating them.
* In-Universe example given that nobody else can understand their alien motivations/desires. Outsiders make even the Grogs look understandable (which they pretty much are not).
* In-Universe example, "Help!, My Son is a Nerd!" Kent Brockman is surprised to find out it isn't a comedy.
* In-universe example in an episode where Joey is playing a dying man and they can't get the child actor playing his son to cry. Joey is suffering from a hernia, so Chandler has him show it to the child - who bursts into tears immediately and they roll the cameras.
* In-Universe example: in "Brian Wallows and Peter's Swallows", Brian is forced to care for a cranky shut-in after a DUI arrest, later telling her to drop dead after taking so much abuse from her. After watching a documentary on TV about how she was a famous singer who quit the business after fans wanted to hear her more well-known radio jingles rather than the operas she really wanted to perform, Brian stops her suicide attempt after telling her how much he loved her operas, which kickstarts their new-found friendship.
* In-universe example: In the Halo series, when Master Chief takes over a Covenant ship, Cortana finds that she can get vastly better performance out of it just by tweaking the settings. The Covenant believed the ships were holy relics left to them by the Forerunners, you see, and any modification of them would be blasphemy of the highest order, so it stayed on the factory defaults.
* In-Universe example in which British actor Todd Rivers plays Hispanic doctor Lucien Sanchez. You can even see the eye makeup used to make him look Hispanic.
* In-universe example (that might count as an aversion or downplayed?):
* In-universe example: The Daily Bugle will make sure the world knows that
* In-universe example: When Vogon Jeltz asks Arthur and Ford what they thought of his poetry, they attempt to save their own necks by going into excruciatingly sycophantic analytical detail. At one point they comment that the poem serves to "counterpoint the surrealism of the underlying metaphor". Jeltz doesn't buy it, and sentences them to being tossed out the airlock, grumbling: "'...counterpoint the surrealism of the underlying metaphor.'...Death's too good for them." (For the record, Jeltz's authorial intent was, in his own words, "to throw my mean, callous, heartless exterior into sharp relief!")
* In-Universe example would be Shellos and Gastrodon, which are only cosmetically different on the West and East sides of the continent. The justification was divergent evolution (that is, allopatric speciation rather than metamorphosis) after being separated by Mt. Coronet.
* In-Universe Expy film they made, his goal is to have them rebuild Rome.
* In-Universe extraordinaire, so every time he uses his powers, it's as underwhelming as the special effects can make it. The show isn't entirely run on Coconut Effects — Excalibur always glows when held by someone with an exceptional destiny — but they are so sparingly used as to be forgivable.
* In-universe for DigDig It where you and your AI-controlled teammate match symbols to win a prize. You meet a hamster who wants to play but can't because the rules state only couples can play. He says the game can work just as fine with one player.

* In-Universe for someone who has woken up in a world populated by cannibalistic ghouls who want to harvest their body parts.
* In-Universe for the former, as Freddie believes Melanie is Sam in disguise.
* In-Universe, Friend refers to himself as Major Michael Collins, after the third member of the Apollo 11 space mission where Neil Armstrong and Buzz Aldrin became the first and second men on the moon; the idea, of course, being that the last two are more famous than Collins is.
* In-Universe further suspects the supposed reality he is living in when in the midst of a heated argument with his wife, she begins speaking in unnatural nonsequitur ad-speak, as characters on the show are obligated to do brief spiels accompanying product-placement.
* In-Universe Game Clock Game time flows constantly vs. game time flows only when the plot requires it.
* In-Universe Game Clock: Time passes, generally on a day/night cycle.
* In-universe gazing: How objects and characters are represented by the perceptions of the story's characters.
* In-Universe. Girls are allowed to enter the boys' dormitories, but try to do the opposite and you get magically rebuffed. Ron finds this out the hard way and immediately points out the double standard. Hermione admits it's an "old-fashioned rule".
* In-Universe got a less-than-stellar reception upon her release. Out of universe, she’s arguably the most popular character in the game.
* In-Universe had already screwed things up beyond recognition and they were specifically built to resist his corruption it worked out okay. The Ents also weren't in the original plan, but were made at the request of Aulë's wife Yavanna as guardians of the wild places.
* In-Universe had a man cleared but largely suspected of murdering his wife attempting to sue Jessica over one of her novels which just happened to have similarities to the case, including the husband being the prime suspect. After finally reading the book himself and finding out the husband wasn't the killer in the book either he agreed to drop the lawsuit, but was killed before he could.
* In-Universe, has gone from a respectable publication to a tabloid that's reviled by all of their peers — its sales have gone through the roof when they started venturing in the lurid tabloid business.
* In-Universe has received countless medals for his accomplishments and multiple Stars of Terra, but he doesn't keep a single one on him, instead his commanding officer holds onto them for him.
* In-Universe has Saint-Doctor Thomas Aquinas warning Dante against believing that he sees the world as God as perfectly as God, for his perception passes on truth "like an artist who knows his craft but has a hand that trembles." If he fails to recognize the faults of his opinions, Dante will fall into the ranks of idiot philosophers and heretics, since "affection for one’s own opinion binds, confines the mind."
* In-Universe, he changes his name to Jeff Morales, wondering why his parents called him Jefferson Davis in the first place and pointing out how tainted it is.
* In-Universe, her boyfriend Conner pauses between trying to talk her down to compliment the new slinky black dress.
* In-Universe her "What facet of your character am I actually addressing right now?"
* In-Universe he's so depressed, the romance starts to become very, very bad, and in the end, part of the point of his story (with Alexandria taking over the reins) is the hero giving up on the love interest.
* In-universe, Hitler himself apparently has no real belief in the occult or advanced technology (as in real life). Erskine tells
* In-universe, humanity can't seem to resist the lure of slave labor, no matter how much it corrupts and backfires.
* In-universe in an episode of the anime where, after several incredibly dumb attempts to steal Pokémon, the Team Rocket trio actually tries something that might work. James wonders why they didn't start out with this plan, and Jessie

replies that they needed to fill an episode.
* In-Universe, in a village populated by mermaids and mermen who generally go around topless, a pair of teenage boys are more enthralled by a magazine featuring a girl in a bikini. One of them explicitly says it's different when they're covered up.
* In-Universe, including a caption at the end that asks where is a statue of her.
* In-Universe indicate their age going from red to purple to blue and finally to green, but for gameplay purpose, every shadowling healers is blue because blue is the color of the shield powers which serves as healing spell.
* In-universe, Indy seems to have picked up the "making this up as I go" line almost word for word from a group of older gentlemen while on a special mission during WWI (
* In-Universe), in his quest to learn more about this enigmatic figure and the truth about the war itself.
* In-Universe. In later games it was censored, but by some reports Barenziah herself actually enjoyed the books and is friends with the author.
* In-universe in "Lisa the Beauty Queen." The school fair includes the tagline "The Happiest Place on Earth," which the blue-haired lawyer says is a Disneyland trademark and threatens to sue Skinner. However, Skinner then uses his Green Beret training to beat up the lawyer and his goons with frightening efficiency.
* In-Universe. In party banter, Cassandra admits to Varric that she gave up on reading one of his stories because he killed her favorite character, and was so upset that she threw the book across the room.
* In-Universe instances (often action series), where the hero will be hired or persuaded to protect an actor who does their own stunts. If the actor only claims to do their own stunts, the protagonist's job is to keep the truth from coming out.
* In-Universe. Interestingly, this was the case in the actual production as well, though Travers was unhappy with the result.
* In-Universe in that, while the other inmates of Arkham have committed deadlier crimes than White, they at least have the reasoning of actually being mad to fall back on; White, who is 100% sane, doesn't get that excuse.
* In-universe in "The Kiss Seen Around the World," in that Tom Tucker hopes to do to a story about teenager Neil Goldman threatening to jump off the roof of city hall, accomplishing it by adding "object falling" sound effects in post-production and humorous commentary to the narrative. Thwarted when Meg overhears this and tells him he is a vile, amoral man for even thinking about trying to encourage a suicide to create a story he hopes will amuse the audience, and when Meg's body breaks Neil's fall.
* In-Universe introduced the Bigfig, Croc was one of those who got that changed into one.
* In-Universe inversion in "8-Bit Goldbergs". In Adam's computer game based on his family, Erica is replaced by a man named Eric and her boyfriend Geoff Schwartz becomes Eric's girlfriend Geoffina.
* In-universe invocation in "The Door". Sansa Stark looks very little the worse for wear despite having been forcibly married to brutal sadist Ramsay Bolton and subjected to rape and torture every night. Because Ramsay was smart about it: there are still enough Stark loyalists left in the North who would rise up in revolt against the Boltons if one of them were seen abusing the daughter of Eddard Stark. So he made sure to never do anything to her face, or to any part of her that would show. What else he might have done to her
* In-Universe involves someone being shot by a friend for taking the last Hetap. The commercial closes with a narrator saying "Come on, you've killed for less."
* In-Universe", in which the Cutie Mark Crusaders' musical performance at a talent show is given a comedy award, which the CMC gracefully accept.

* In-Universe. Korean censors ordered newsreel clips (of 1979 protests at the beginning, and President Park's funeral at the end) deleted. The film as released shows a black screen with titles noting that the scene was deleted due to orders from the government. The black screen stays up until the newsreels were supposed to end, after which the film starts, and later the credits roll at the end.
* In-universe, later expanded on it, explaining that that whole thing was simply a hoax to cover up his even more painful death by torture.
* In-universe, Lawrence Block's hitman character Keller once retired and, feeling a bit bored, decided to take up a hobby and settled on stamp collecting. After a while, he gets back in touch with his former manager, who assumes he misses the work, but he eventually admits that stamp collecting is a pretty expensive hobby and he could use the money.
* In universe, magic works around and is flavored by the belief of the practitioner. As mages are fundamentally human, and the game takes place in an
* In-Universe Mairu has difficulty continuing it, so she puts in an order banning comics, but in response, people come forward with signatures begging for the return of the comic. In response, Mairu's best friend Himeko considers killing off Mister Shindou, to which Mairu responds by saying "Making him die is kinda..." but has him come back to life and live with his family.
* In-Universe makes Andy Millman rich, famous, and loved by his millions of fans, but the critics absolutely loathe it, and increasingly, so does Andy, who would rather have critical acclaim than popularity with audiences.
* In-universe materials indicate that most Qunari are like this when they aren't speaking their native tongue. Since they pride themselves on doing everything perfectly, the prospect of possibly committing a linguistic error mortifies them. In the second game, the Arishok has little to say but "begone" to anyone besides
* In-Universe! — as the game is meant to replicate those of the 80's and 90's. The movie itself as has a fuller plot.

* In-universe novels are dramatizations of the actual events they portray.
* In-Universe. Octavian asks his old friend Titus Pullo to accompany him on the invasion of Egypt, saying that it'll be just like one of their old adventures. Pullo gives a nervous smile because he remembers that the "old adventures" tended to include torturing and murdering people.
* In-Universe, Oda stated Shanks is closest to him personalty-wise: being laid back, but very passionate when the moment calls for it; if that weren't enough Oda actually dressed up as Shanks in Jump Festa. Though Oda also claims Luffy and Buggy have a lot elements of his personality.
* In-Universe of Bravoman, which the titular hero is angry about because Brave Man is stealing his popularity. The end of his first appearance has him getting beaten up by a pair of angry lawyers, which Bravoman happily takes as karmic payback. When Brave Man appears again, Bravoman asks if he should be in copyright infringement jail, to which Brave Man responds that he got out of that situation by declaring himself a parody.
* In-Universe. Of course, the characters are all in-universe speaking American English...
* In-Universe, one of the announcers said he wasn't an aficionado but that they might have been worth something. This led to the announcers arguing over whether comics qualify as literature or not.
* In-Universe'. One of the old songs sung by Mokuzu's father is popular with commercials.
* In-Universe on Jason himself being impulsive—which is not even close to what happened. While Jason was impulsive and did have a temper, he was lured into a trap by Sheila Haywood, who he found out was his biological mother.
* In-universe only, Rentarou tries to avoid that trope as much as possible. However Mozart tells Ren she already looks girly and fragile because she is so petite and baby-faced, and her jittery behavior doesn't help. Wagner interpreted the imposter's accusations as this trope because of that jittery behavior and

* In-Universe. Plankton relocates his restaurant to a beautiful underground cave and becomes a massive success, with long lines of people waiting to get in the door. The gorgeous scenery proves to be the main attraction, as the enthralled customers freely admit that the food is still terrible even as they're marveling at the sights.
* In-Universe play about a married couple's problems. When we see the play all the way through, the last scene is Joey's character going off in an alien spacecraft to find an alternative fuel source.
* In-Universe play (more accurately, they're shown hanging accused witches, not burning them). She saves herself using magic however.
* In-Universe, prompting Andy to bring out many old comics pages to show him that it's been declining in quality for a while. Roger's forced to admit that Captain Goofball has gotten stupid over the years, but weakly protests that it was hilarious when he was a kid, prompting Andy to coldly say that today's kids deserve to laugh their heads off.
* In-Universe, protagonist Sasahara brings up his experience producing a doujinshi in a job interview at an official manga production company. The interviewer asks him how he would feel about being put into a position where he might be called upon to quash such efforts by fans. Sasahara tries to weasel around the question with a bunch of hemming and hawing and non-committal doublespeak. He doesn't get the job.
* In-Universe: Rachel decides to actually put thought and effort into "Wacky Deli", at which point the show is swiftly canceled and Rachel is freed from her contract like she wanted.
* In-Universe reality show and begins taking radical actions to save whales and dolphins, but everybody sees it as just a retool of the show.
* In-Universe, Rebecca and Dimitri have this, despite Dimitri being gay.
* In-Universe refuses to come along. When he's told to adapt, Redcorn takes a song about suicide and rewrites it to be about hygene: "Wake up in the morning, wanna...wash myself, scrub my wrists, clean my brains out..." He's a big hit with kids and ends up becoming "the Native American Raffi".

* In-Universe. Sally, Tommy and Harry use Officer Don's radio scanner to listen to the private phone calls of a woman named Andrea and her cheating boyfriend, which they treat as though it were a show. This leads to them actually meeting Andrea and Harry dating her. Harry and Andrea have a nice, drama-free relationship, causing Sally and Tommy to complain that "the show has really gone downhill since Harry was introduced". They try to convince Harry to act like a jerk so that the "show" will be interesting again.
* In-Universe, SCDP account man Ken Cosgrove is shown to be writing adventure/science fiction/fantasy short stories on the side. By Season 6, he's published over 20 stories under a pseudonym (in addition to the one realistic literary story he had published under his own name in Season 1), and in Season 7, his wife is encouraging him to quit Corporate America and work on a novel. However, he's embarrased about the genre nature of his writing, and when one of his colleagues discovers his ouvre, he sheepishly dismisses it as silly noodling.
* In-Universe segment at the titular show with a clip from one of her pornos as vengeance for not getting nominated, the host outright states that the only reason she doesn't plan on banning Barbie for life is because of all the press the incident is getting.
* In-Universe series. Hildegunst von Mythenmetz has once written a novel of nine

hundred pages, where he intricately develops the many plot lines and characters, only to end the book completely out of the blue with his own recipe for sunny side eggs.
* In-Universe series where the heroine has only moved up one grade in 20 years of run. But during that "year" the technology moved forward from pagers to smartphones, though, which is the point of the gag.
* In-Universe, seven branches that should be pruned survived the Time Lock thanks to an outside interference, and they seek out to replace the main trunk as the true human history.
* In-Universe. She likes his poem more than Andy's because she believes Calvin was trying to aim for this.
* In-Universe". She only stops touching his arms when her increasingly jealous boyfriend Star-Lord asks her to stop.
* In-Universe, Shepard attracts Morinth by invoking the trope, saying, "If you've heard of it, it's already too mainstream."
* In-Universe, something that everyone can do- and in fact, several bosses also take advantage of it; for example, the second phase of the Ornstein & Smough fight, after you kill one, has the other absorb the dead one's soul to heal to full health and get a buff (Ornstein becomes giant, or Smough gains lightning attacks). Soul power increases with strength, which is why bosses give you much more power compared to normal mooks.
* In-Universe speculation as to who or what got her - with a sidenote of speculation of whether she was 'got' at all. It's implied that the First Class of X-Men and Alison (and Doctor Strange, naturally) know what happened, but that they're all keeping their mouths shut - though Strange hints that it's "wibbly-wobbly timey-wimey."
* In-universe, "Spotted Pate" is a folklore character who, while dim-witted, was
* In-Universe's short story "The Thing About Cassandra": the narrator is an artist whose show at a gallery is "interrupted" by a woman who walks in shouting about how offensive his paintings are. She then throws a bottle of ink on one before being hustled out. It later transpires that the gallery owners hired her to do this in the hope of ginning up some attention for the narrator.
* In-universe, Starfleet officers (engineers in particular) have this reputation. It's even lampshaded by a captured enemy who hopes for them to have "one of those famed Starfleet engineers who can turn rocks into replicators" so he can live the high life as a Federation POW, instead of starving on some empty rock or being butchered by his soon-to-be insane troops.
* In-Universe, start dating after Episode II. They continue dating in the original trilogy, but change characters to Leia and Han.
* In-Universe stirs up resentment and outright violence among the villagers.
* In-Universe story. Hewey, Dewey and Louie see a celebrity order carrots in a restaurant, and — since said celebrity hates carrots, as stated on every magazine — they deduce that he must be an impostor, and the original has been kidnapped. The story ends with them freeing the real celebrity, who invites them to dinner as a thank-you... and orders a dish of carrots. When Hewey, Dewey and Louie express their incredulity, he answers "Why, do you really believe everything magazines print out?"
* In-universe text excerpts from the timeline's future state that Stannis' son Lyonel will be known as "the Magnificent" during his reign.
* In-Universe thanks to taking the "craft distubing mental image" feat.
* In-Universe that a big part of the reason Tywin Lannister hates his dwarf son Tyrion is because Tyrion's mother and Tywin's wife Joanna — the only woman Tywin ever loved, the only person who made him something other than the ice-cold sociopathic bastard that he became — died giving birth to Tyrion. Tywin projects his resentment over this onto Tyrion. The fact that Tyrion was a dwarf (an embarrassment to Tywin) only makes things worse.
* In-Universe that even if they wouldn't necessarily hire any more Colons or Nobbs the ones they have aren't going anywhere.
* In-Universe that's apparently the worst sword in the game. After Johnny gets some

real life experience with a sword made of building blocks, he's able to weild the video game version quite effectively.
* In-Universe that she starves herself in her room for a whole week—and comes out losing most of her unseemly weight.
* In-Universe that the boys like. After watching an episode Randy notes that it's not horribly violent or vulgar, but Sharon objects that it's incredibly stupid, which could do just as much damage to a child's psyche. It's also brainwashing them to bomb Pearl Harbor, but that's a whole different can of worms.
* In-Universe that the lessons most likely would go on to include Space, Sports, Magnetism, Digging Holes, Canoe Buying, Files, Traffic, Gel, Smoking, and Music. This can be read as another criticism of childrens' media, focusing on topics that become more inane over time.
* In-Universe that turned the seas to blood combined with his knowledge of red algae that turn the water poisonous to sea life; or the one who caused a famine with the knowledge of the wind patterns that can cause droughts for years.
* In-universe, the Avengers have had action figures since the Battle of New York. In
* In-Universe the battles since the first book rather than just the fight for Dunbar's World.
* In-universe, the canonical example of the Mimic trait is Mimeo, who can copy the powers of multiple mutants at once at full strength simply by fighting them for a while and as an experienced career supervillain also generally has the skill to use the powers effectively once he has them (it helps that he's studied at Whateley himself back in the day when the school was still new). His one limit in this regard is that he can only
* In-Universe, the character's real name IS Roger Stevens. Steve must be lazy.
* In-universe, the common claim that all intelligent life originated on Earth is disputed, and there are several "alien" civilisations of human-looking people that may or may not be descended from colonists from Earth.
* In-Universe. The first season, of course, before that new guy ruined it.
* In-universe, the Gang of the Green Gorillas were stated to be among the first enemies the Crew as a whole had to face, back in the 1970s. Back in the present day, the Crew pretty firmly outclass the Gorillas who are more of a background comic relief than a threat. (Their bionically-augmented descendants the Detraxxi are perhaps another matter.)
* In-Universe. (The general public don't really seem to make much of a connection between the comedy character they laugh at in the stories and the Baron who rules the continent with an iron fist, although it's implied to be a bit of catharsis on their part.)
* In-Universe, "The Gloomies". However, he immediately takes a shine to Luther for knowing him in other roles he played, including the one he seems to have enjoyed the most in "The Spooky Squad".
* In-universe, the Godmodder perpetuated this. In the first game, he was attacking a small Minecraft server. At the start of the second, he traps every Minecraft player on a server. Now, an inter-universal team of bigger villains overshadows him, and they may not even be the biggest bad of the game.
* In-Universe," the Holidays are described as having a "hip-hop-punk-electronica vibe."
* In-universe, the Master Gundam is classified by the Gundam Fight Committee as a mid-season upgrade to the Kowloon (
* In-Universe. The movie opens with the death of a pilot named Joe, and immediately the pilots go around asking "Who's Joe?" and celebrate anyway though they mourn privately. Bonnie is horrified at their seeming callousness, but Geoff points out that theirs is a high-stress life and ostentatious mourning won't bring Joe back.
* In-Universe, the producer Walter and the director Lloyd are seen fretting as they await the arrival of the early editions of the papers. When the reviews are lukewarm at best, they philosophically accept that the fact that the play is probably going to fold. However, the police are later willing to accept that the bad reviews (and assumed failure of the play) is the reason why Monica commits

suicide.
* In-Universe, the readers are expected to side with her and balk at Kankri's hypocrisy.
* In-Universe there is Akatsuki, who employ members from almost every country
* In-Universe, there is nothing stopping them from being used by an actual knight errant.
* In-universe there was a comic issue where Baron Blade was tried for his crimes with the Freedom Five's lawyer as the prosecution. Predictably, he got off scot-free because, you know, he's in charge of his own country but not before some legal weirdness happens.
* In-universe, there was also a holo-film based on the adventure as seen in
* In-Universe. The salon employees, who roleplay as students at a prestigious all-girls school, keep their first names, and take on a similar-sounding surname. For example, Hime Shiraki, the main character, plays Hime Shirasagi while working in the salon.
* In-Universe, the senior commander of Com-Star forces comments (after routing the Clans at Tukkayid) that although each individual Clan warrior is better, and uses superior equipment, the Clans as a whole have spent centuries in what amounted to gladiatorial games with limited civilian fallout while the Inner Sphere factions spent
* In-universe these practices are passed down from mentor to student for hundreds if not thousands of years. This results in many rituals and spells taking on a thoroughly "ethnic feel".
* In-Universe The set ends up getting wrecked by the both of them. Oddly enough, the camera was recording everything, and the producers loved the footage that they saw. Even so, Betty, understandably, refused to let her kids do another commercial despite the director's plea.
* In-universe, the Starfleet Corps of Engineers were considered to be at the
* In-universe, the Targaryen habit of marrying their sisters is often viewed as having exacerbated the hereditary madness that crops up again and again in the family, producing a series of warped aristocrats including Maegor I the Cruel, Aegon IV the Unworthy, Aerion Brightflame, Aerys the Mad, and Viserys the Beggar King within the main family line, and equally, if not even more depraved characters like Daemon Blackfyre and Maelys the Monstrous in the
* In-Universe the theatrical version of her played by a huge muscleman.
* In-universe, the "usually evil" nature of some races is justified by their racial deities, such as Lolth for the Drow and Gruumsh for the Orcs, being evil. These gods also work very hard to make sure that their worshippers are just as bad as they are, and any that
* In-Universe; they made the decision to settle the Alik'r Desert, one of the most inhospitable environments on Tamriel, because according to Redguard philosophy, something that can be obtained without struggle is not worth obtaining in the first place.
* In-Universe. They often comment on how little the crew cared during the making of the film with the obvious mess-ups, poor editing, and apparently only doing everything in one take.
* In-universe, they're probably the subjects of urban legends or conspiracy theories, especially ones found online. Expect them to specifically target anyone who investigates these legends.
* In-Universe they see or hear about, including folk tales, myths, and holo-vids, becomes part of their recollection of "history", so any time someone has to look to them for historical information, they're usually left wondering just how much of what the Killiks tell them is really the truth.
* In-Universe. They start singing "Happy Birthday" on the webshow, only for Freddie to interrupt them and point out that it isn't public domain. They switch to "For He's a Jolly Good Fellow".
* In-Universe thing he likes about Suzuki is his visual design; he doesn't seem all that interested in him as a person, and finds his name snark-worthy.
* In-universe, this can probably be justified by the agencies from the first game

trying to cut corners on budgets, especially when they've got much more important computer projects to spend money on.
* In-universe, this city guard duty is one of the peacetime duties of the
* In-Universe, this is actually a problem that the ghost ponies have to deal with; they have adapted to live in the Ethereal Plane, but they have no innate magical ability to step between worlds and it's not safe for their foals to live or grow in the Ethereal. As such, they create magical items to allow them to walk between.
* In-universe, this is also currently happening with Abbadon the Despoiler's 14th Black Crusade. It's been in limbo for ages because Abbadon has his heart set on getting all the surviving Traitor Primarchs to participate. Considering how much they all hate each other, it's unlikely to happen any time soon.
* In-universe, this is justified by the rather taxing court system, which demands that every single claim the defense lays out
* In-universe, this is known as the "Cherenkov-Kirby Reaction". It was being studied by Dr. Universe as a clean source of power before he and his assistant Greta

The part where people were sympathetic to them was that they didn't even get to leave the country, or even go through the first leg of the race. One fan compared it to qualifying for the Olympics and being eliminated during the opening ceremony.
* In U.S. sports (most commonly baseball and football), it is a common custom to drench the coach or a key player of a team with whatever is in the cooler after a win, most commonly Gatorade (leading to the ritual being known as a "Gatorade shower").
* Inu × Boku SS (and fanservice of both). It's a shounen, but the romance is done in a shoujo-style, and has managed to attract multiple demographics with its combination of shoujo, shounen, and even seinen staples.

* Inuyasha: According to Naraku's final detachment Byakuya, even if his other "siblings" had survived, they would have perished if/when Naraku was destroyed anyway.

* Inuyasha. After having stolen the Shikon Jewel, which makes demons incredibly strong and allows them to reassemble their bodies when killed, it loses a foot while trying to flee from Kagome and Inuyasha. Even though Kagome is not a good archer by that point and the demon is already way out of reach, she ties the foot to a magic arrow and shoots in the general direction. With the foot trying to reattach itself to the body, the shot is an instant hit. Unfortunately, she blew up the Jewel in doing so, scattering pieces of it across Japan and kick-starting the plot.
* Inuyasha: A group of demon slayers venturing through Japan to reclaim every shard of a shattered jewel.
* Inuyasha: A high school girl falls into a well that transports her to Feudal-Era Japan, where she meets the titular Inuyasha and travels with him and a group of other allies to find the scattered shards of the Shikon Jewel before the demon Naraku can obtain them.
* Inuyasha also carries a wakizashi sword, a spring-loaded blade hidden in an arm guard, and a vast assortment of poisons.
* Inuyasha also has a lot of them. All female half-demons and very many female demons in human-like figure look very sweet, although we recognize that they are not human.
* Inuyasha, although on several occasions when there truly is no other choice, Miroku will go ahead and use it and deal with being poisoned. The Wind Tunnel also grows as he uses it, and can grow more quickly if his hand is damaged.
* Inuyasha among with male leads carrying their female love interests; Inuyasha carries Kagome and Miroku carries Sango. There are also a few cases where Kagome finds herself in the arms of Kouga in this manner. Even Rin gets carried like this, though her case isn't romantic at all.
* Inuyasha and has the supernaturally sensitive and accurate canine sense of smell to show for it, with the result that he's frequently shown noticing the scent of blood over considerable distances, and can recognize when the blood belongs to someone he knows personally.

* InuYasha and Myouga see what they think are the departing souls of Kagome and Shippo (actually alive and well, just surrounded by protective foxfire), and InuYasha blurts out more than he intended before he realizes that they're alive.
* Inuyasha and the couple lived happily ever after much to Nobunaga's saddened disappointment.
* Inuyasha, and there are two more youkai in his company. But later, the young human girl Rin comes along, and accompanies the three youkai until the end of the series.
* Inuyasha, and the translations were made when anime was still "localized" quite a bit more for American audiences, they had to find creative ways to convey the especially-rude or especially-respectful ways that some characters spoke to each other with...and in some cases work around the lack of a known name or gender for a character. Issues that this helped cause include:
* Inuyasha, and who are wandering around the country fighting exactly those youkai.
* Inuyasha, any female can expect her love interest to be at least this to her, and if an evil person falls in love with her he will be even taller.
* Inuyasha anything it cuts. The rot spreads and the only way to survive is to cut off the affected parts.
* Inuyasha are basically good. Some of them tend to play pranks on people (prefered on humans), but none of them are really malicious, or they've ever done anything bad to someone.
* Inuyasha, artificial, and voodoo (except she's too powerful to control and almost

immediately kills her creator).
* Inuyasha: As a potential love interest for Kagome, the title character is usually the Scoundrel in comparison to characters such as Hojo (although in Koga's first appearance, he sort of fills the Gentleman role).
* Inuyasha as Kagome is sitting on Inuyasha's chest demanding that he take his clothes off.
* Inuyasha assembles in this manner. It starts out with just Kagome, then she meets Inuyasha. Then they encounter Shippo, Miroku, and Sango after they embark on their quest to collect the jewel shards.
* Inuyasha. At hearing this, Kagome angrily insists they eat her instead. (Not 100% really this trope, since we never learn whether the potion works — but the kidnapping does lead to the demon losing his last few hairs — before he is killed.)
* Inuyasha Because her demon blood is so thin, she looks almost like a human. She has round ears, and her eyes and hair are ordinary human colors. Instead of fangs, she only has slightly enlarged canine teeth, and she also has small claws. Moroha is the only known quarter-demon, and although she is three quarters human, she is still superhumanly strong.
* Inuyasha because some take up space without adding much to his strength.
* Inuyasha becomes like this (he starts off able to regenerate, but with limits). At one point he's reduced to his head, one hand, and miscellaneous bits of flesh and has regenerated fully within a chapter.
* Inuyasha beheads a dozen of bandits. They also have rain of demon corpses.
* InuYasha between Inuyasha, Kikyo, and Kagome caused them in the past and how insensitive and stupid Inuyasha was back then... only to discover that Inuyasha and Kagome have arrived and overheard everything.
* Inuyasha, but turned into his protector due to taking a young orphan girl under his wing. This doesn't mean he really enjoys showing kindness to others, even Inuyasha.
* Inuyasha by a little toddler... Miroku is the one who ends up running away with the kid to a bathroom yelling "You know better than to pee there!" or "The toilet's over here!".
* Inuyasha by the fact that his bloodline is cursed and he wants to have a son as a backup plan in case he fails to stop Naraku, we say "partially" because that doesn't stop him from having a genuine perverted side.
* Inuyasha can't seem to decide between "Kilala" and "Kirara". Actors in the dub say "Kilala".
* Inuyasha characters, which gives some bystanders the right to point flaws in them).
* Inuyasha come looking for her, forcing her to go back so her family isn't put in danger. (After this, however, she manages to go back and forth at will without very much further strangeness following her home.)
* Inuyasha delivers a rather impressive one to his brother, Sesshomaru; after the latter spends two or three episodes going off on how humans and half-demons are worthless, he not only gets his arm cut off, but he is also mocked by Inuyasha on how a mere half-demon got to inherit the Tessaiga.
* Inuyasha doesn't always need Kagome to tell him to save people — he's saved everyone from two orphaned kids to his own romantic rival from whatever threat they were facing; in the first case the psychic demon he was fighting even commented on his heroic instinct. By the end of the series, he's more distressed when he fails to save
* Inuyasha does this regularly. One of the earlier examples has him calmly walking towards his gigantic wolf-like older brother muttering "yeah yeah, 'roar roar' to you too."
* Inuyasha drive him into the ground! (But at least he saved the ramen!)
* Inuyasha embedded in it. It latches onto people's faces to take over their bodies, which then quickly begin to rot.
* Inuyasha end, a new anime season was made and wrapped the story up appropriately.
* Inuyasha episode. Miroku's hat had broken and he was left in the rain. Kagome

gave Sango her spare umbrella and Sango shared the umbrella with Miroku.
* Inuyasha fan works feature Kagome and/or Sango going into heat. Humans don't go into heat, they have a menstrual cycle. Inuyasha and his brother, Sesshoumaru, are male dog-demons, so a number of fics have them going into heat because of their dog natures; male dogs do not go into heat. Similarly, some stories have a demon being able to smell that they or their mate is pregnant as soon as a few minutes after having sex.
* Inuyasha, Feudal Japan appears to be populated by a total of about twenty people, all of whom are at any given time within convenient brawling distance of one another.
* Inuyasha finds an excuse to give Kagome his fire-rat cloak every once in a while. The cloak is magically fire-proof and knife-proof, so the trope can be played straight even when Kagome is fully dressed. InuYasha gives Kagome his kimono repeatedly over the course of the show, but never because she was cold - the kimono functions as armor, so usually he gives it to her as protection, although he did give it to her once when her clothes had been stolen.
* Inuyasha focuses on Towa and Setsuna, the twin daughters of Sesshomaru, and Moroha who is the daughter of Inuyasha, as the three of them go on a journey together to discover their past and identities.
* Inuyasha for good, even after he began bleeding heavily from the eyes and mouth.
* Inuyasha, from the series of the same name, is half dog-demon. So he exhibits some traits of a dog, like loyalty and, uh, doggedness. He even antagonizes foxes. Shippo, the fox demon is small but clever and brave. The wolf demon Kouga is direct, competitive and likes running. Sesshoumaru, Inuyasha's pure-blooded brother, shares Inuyasha's dog-like traits of being possessive, territorial and aggressive, and gradually exhibits the stereotypes of a good dog as well including loyalty and being extremely good with children.
* Inu-Yasha gets struck by lightning in one of the movies, and is perfectly fine less than two minutes later.
* Inuyasha, giant spiders or spider-like beings are common, weak Youkai in feudal Japan. Sango and her family were tricked by Naraku (who's a spider-based demon himself) into fighting a giant, ogre-faced spider. In the final battle, Naraku's outer shell is a gargantuan black spider who acts as a final dungeon.
* Inuyasha. Given how much he is screaming, it's safe to assume the forced transformation is pretty damn painful.
* Inuyasha. Given that multiple chapters (or even a whole volume) can cover a single day, not to mention given the handful of times Inuyasha turned human, something that explicitly happens only once a month, it's a bit more believable that Kagome's adventures lasted around a little less than a year in-universe despite its 12-year run.
* Inuyasha goes into detail about how much suffering a demon's mating mark would cause their chosen mate if she were to ever be with another man.
* Inuyasha, going so far as to hide in a bush when confronting the owner of the monkey for her clothes back.
* Inuyasha got his torso and mounted it on a tank chassis, along with 50 or so rocket launchers.
* Inuyasha had a couple of one-hour TV specials that were carved up into two regular episodes for the DVDs (losing some footage in the process). Since the dub used the DVD version of the series, this was blamed on it at first.
* Inuyasha had this happen when all of her yōkai were killed and her jewel shard was taken back by Naraku. In the manga, she just began to look her true age (about the same age as Kikyo if Kikyo hadn't died); in the anime, she turned into dust.
* Inuyasha: Happens to Miroku (of course) and a young girl named Koharu, although we only see the second half of it.
* Inuyasha has a hidden retractable blade in her right sleeve that she uses as a last resort.
* Inuyasha has Inuyasha unwittingly marking Sesshoumaru as his mate with a bite mark. (Naraku then takes that bait and tries to replace it.)

* Inuyasha has Panther demons as antagonists to the group of heroes. What makes it funny is that the leader of their tribes butted heads with Inuyasha and Seshomaru's father, who is a dog demon. So it's literally cats vs dogs.
* Inuyasha has this relationship with both Kikyou and Kagome. He was technically engaged to marry Kikyou before her death. Due to magical interference, Inuyasha and Kikyou are seen kissing intimately early in the manga, and on one occasion when Kikyou is badly injured, Kagome notices that it looks like she and Inuyasha desperately want to hug each other (there are people around, so they don't). By the same token, Inuyasha and Kagome aren't physically intimate beyond occasional hand-holding or, on one occasion when Kagome thought Inuyasha had died, a tight embrace. It's led a lot of the fandom to believe Inuyasha and Kagome aren't an official couple until the end of the story, whereas in the manga, they're officially considered a couple by everyone (including themselves) shortly after Kouga's first arrival in the story.
* Inuyasha has tried to frame Inuyasha for his own crimes on three separate occasions: the murder of Kikyo, the destruction of Sango's hometown, and the slaughter of Koga's pack. After initially attacking Inuyasha in retribution, all three soon discover Naraku's involvement and promptly focus their efforts on him.
* Inuyasha have names ending with "kotsu" (骨), meaning "bone", which might signify that they are undead. The other kanji in each of their names also signifies something about each of them.
* Inuyasha, having a reptilian/toadish appearance with, in Manten's own words, "thinning hair". Manten inherited the mom's looks and Hiten looked like the Hot Dad, which gave Manten quite the inferiority complex.
* Inuyasha. He thinks this means there is no afterlife, and thus he can do whatever he feels like, which means killing people, since people don't get punished or rewarded for what they do.
* InuYasha himself also ends up one whenever he visits the modern era, though it's not as touched upon. One such incident had him amazed at the sight of a TV:
* Inuyasha himself needs to rely on friends sometimes for help. It's part of his learning curve that, for him, he does need to have friends he can trust. It's also part of Sesshoumaru's learning curve
* Inuyasha himself: On the night of a new moon, he becomes fully human and loses all of his demon powers.
* Inuyasha). However, they once saw the soul piper in the modern day, so there are exceptions. This is actually keeping in with Japanese mythology — youkai and lesser spirits are said to dislike electricity, and power lines create electromagnetic fields that repulse them.
* InuyashaIn a slightly comical aversion, the Thunder Brothers' father was visually indistinguishable from a human (like Hiten), but their mother was a squat, yellow-skinned humanoid with a large conical head (like Manten). For their species of youkai, this is apparently completely normal.
* Inuyasha in general loves these. After every multi-part epic battle against some Naraku-related/Jewel-shard-related uber-powerful demon you can bet there will be some goofy filler episode(s) before the action returns. And most of them are pretty hilarious, too.
* Inuyasha in his herb garden when there's an earthworm in plain sight and she'll fall to pieces.
* Inuyasha in one episode. Rather than dying from bloodloss and lack of air, she just gets mad and digs her way out for revenge. With a little help from a magical pain-killer, she then proceeds to hike for miles and then engage in heavy combat and nearly defeat Inuyasha.
* Inuyasha. In the Feudal Era, she hangs out with demons and regularly makes the finishing move with her magical arrows, but in her own era she's just an ordinary schoolgirl of little regard, and is occasionally regarded as strange for the bizarre excuses her grandfather invents for her absence from school.
* Inuyasha in the story. He is capable of moving so swiftly that he sometimes appears to teleport out of and into nothingness. He can even look like a streak of lightning moving through the sky (an effect the anime favors). He particularly

employs it to appear as if from out of thin air in front of other characters.
* Inuyasha: Inuyasha and Kagome are hinted to be married and are living happily with one another, however the probability that Inuyasha will age much slower than Kagome is never mentioned, meaning he'll most likely still be young looking when Kagome (and Sango and Miroku for that matter) are old. Also, it's never confirmed whether they can still use the well, meaning Kagome could possibly be separated from her family forever.
* Inuyasha. Inuyasha and Miroku rush to their aid... and see them naked. The girls smack them around for that and it ends with Miroku smiling and noting that "It was worth the pain."
* Inuyasha, Inuyasha found himself on the receiving end of Jakotsu's attentions who was quite determined to show Inuyasha the affection he always gives to his favourites... which involves death and possibly torture/rape.
* Inuyasha: Inuyasha isn't allowed to obtain Tessaiga without learning that he must protect humans if he wants to wield it. Thereafter, his ability to strengthen and master Tessaiga goes hand in hand with his increasing compassion.
* Inuyasha is a half-demon, who demons tease and humans fear. He originally plans to use the Shikon Jewel to become a full-fledged demon, but the priestess guarding the jewel tries to convince him to use it to become fully human instead. Circumstances conspire to prevent him from using it, though.
* Inuyasha is a serial butt groper, who is met mostly with giggles (with the notable exceptions of Kagome and Sango).
* Inuyasha is because Mukotsu is one of the walking dead, resurrected by a shikon shard, so only the removal of the shard from his body will actually kill him. Sesshoumaru achieves that on his second attack.
* Inuyasha is brought back in a clay body, but the body itself is soulless. Kagome's soul, being a reincarnation, was needed to complete the ritual, but it was interrupted so the only thing Kikyo was able to gain was the anger and hatred for Inuyasha. She then needs to feed on the souls of the dead in order to stay "alive."
* Inuyasha is fast enough to catch bandits riding on horses. Once in Kagome's time, he shows he can even catch a train.
* Inuyasha, is shown to be rather busty when she's naked. In fact, when Miroku first sees Kagome, he almost comments on her breasts but instead comments on how large the shikon jewel shard she's wearing is.
* Inuyasha is so fond of Ayame, however, that she reportedly considered incorporating the character into the manga anyway. She never did, though.
* Inuyasha is the equivalent age for a young kitsune and, despite being a crybaby at times, often takes delight in being more emotionally mature than Inuyasha himself.
* Inuyasha is the son of a human princess and a very powerful dog-youkai; Inuyasha struggles for a long time to earn his half-brother Sesshoumaru's respect and lived alone for most of his life until Kagome changes his life, giving him friends and a village of humans he can call home. He even more-or-less reconciles with his brother, although that also requires some extra effort from a little human girl
* InuYasha is usually written this way in English. The character's name is usually written as Inuyasha.
* Inuyasha it is common for small yokai (kitsune, tanuki, kawauso, etc.) to be able to pretend to be human. However, it is implied that they can only sustain this transformation for a short time.
* Inuyasha. It's eventually defeated by Sesshomaru using Meido Zangetsuha to suck him into the Netherworld.
* Inuyasha. It should be noticed that she later starts using a modern swimsuit when she bathes / swims in rivers and the like, only fully stripping if she's in hot springs / baths. (It'd be pretty unpractical to wear one in such hot water, anyway.)
* Inuyasha, it takes the rest of the cast an extra line or two of dialogue before they catch on.
* Inuyasha: Jaken and Rin are confronted by a villain in the middle of a rope bridge. In a subversion, the bridge breaks because Jaken's attempt to defend

himself and Rin relies on fire which burns the ropes and breaks the bridge causing all three of them to plunge into the gorge below.
* Inuyasha Jakotsu has a crush on Inuyasha. He mostly wants to torture and possibly rape Inuyasha to death.
* Inuyasha, Kaede and a group of village kids walk up on Kagome demanding Inuyasha undress (so she can treat his wound) while he protests. The mortified Kaede quickly tells the kids to avert their eyes.
* Inuyasha - Kagome has the most desired boy in school fall in love with her, but even when she goes on dates with him she finds herself thinking about InuYasha, a half-dog demon from the mythic past. She ultimately picks InuYasha.
* Inuyasha Kagome likes InuYasha (who is a dog hanyou, which is similar to a werewolf), and he used to love Kikyo (Kagome's past life), who becomes essentially an undead soul — energy eater, and Koga, a wolf youkai, is in love with Kagome.
* Inuyasha Kagome, often referring to the latter by the name of the woman he knew. Inu-Yasha also became greatly discomforted when Kagome dressed in traditional feudal Japan clothes as it made her further remind him of Kikyo, leading Inu-Yasha to tell her to put her own weird, modern clothes back on.
* Inuyasha, Kagome ultimately discovers Naraku behind the possessed priestess in this episode and shoots him.
* Inuyasha Kagome unwittingly uses the power of the magic Jewel of Four Souls which is inside her body to blast a demon which attacks her. Ultimately subverted, since the Jewel is released from her body almost immediately afterwards, meaning she no longer has that power. (Though this sequence of events does lead to her discovering and being trained in other latent powers.)
* InuYasha: Kagome was dragged into the whole mess with the Shikon Jewel and the Feudal Era on her fifteenth birthday.
* Inuyasha: Kikyo says this when her body is decaying while fighting Inuyasha.
* Inuyasha. Kikyou is one of the few characters who proved to be an actual threat to Naraku, making her one of his main targets. Unfortunately, Naraku eventually gets the upper hand and drives her into a corner and finally deals a fatal blow to the priestess. During her final moments, she visited her sister, Kaede, in spirit form, and apologizes for the suffering she has caused her and shares a final kiss with her former lover, Inuyasha. She then exclaims that she's finally become what she always wanted, an ordinary woman, and her soul leaves her fake body and embraces all present as if saying farewell.
* Inuyasha learned how to use the wind scar technique at any time, instead of using it only when he could sense the right moment. But from that point on, he encountered enemies who were able to defend against or reflect it, thus making it most useful for slaughtering mooks rather than villains like Naraku.
* Inuyasha: Like most other types of yōkai, kappa turn up occasionally:
* Inuyasha loves this gag, and it appears several more times in her works.
* Inuyasha lust for her which led him to trade himself to a pack of demons in order to obtain a demon-hybrid body capable of movement, becoming Naraku in the process.
* Inuyasha mainly fights by turning parts of himself into a mess of these to immobilize, crush, impale or outright devour his foes.
* Inuyasha makes this the core of its plot, centring on an island that youkai and their human lovers could raise their half-breed children in peace.
* Inuyasha manga ends with Sango and Miroku have twin girls, and then a baby boy!
* Inuyasha meets a female mantis-demon who has killed and eaten a young princess and disguises herself in a human being's skin. She makes Miroku an erotic offer first, but then she shows her true form. However, as an inversion of this trope, Miroku can kill that demon.
* Inuyasha minions Kagura, Kanna, Hakudoshi, and the Band of Seven all have their own legions of fans.
* Inuyasha most certainly fits this trope, as she was created to be emotionless so that she would be undetectable by any trace of Demonic Energy or Scent. In fact, the translation of her name quite literally means 'void'. By the end, it is subverted as she actually has emotion as her heart can feel.

* Inuyasha. Most intimate moments between Inuyasha/Kagome and Miroku/Sango involve the entire rest of the team watching from the bushes.
* Inuyasha movie, Inuyasha had his human half sealed, causing him to turn him to turn into a full demon and go completely insane.
* Inuyasha). Much like the above immediate example, anime "Brand X" brands are often created simply by switching or reversing a letter from their real-world counterparts ("Somy" and "Parasonic" have been known to pop up from time to time in various animes).
* Inuyasha, Mukotsu and Kyokotsu of the Band of Seven are briefly seen buried with their respective weapons.
* Inuyasha, Naraku does this to Sango and Miroku while they're inside his body, showing them visions of the death of Miroku's father, who was consumed by the Wind Tunnel curse. In a twist, this is not meant to hurt Miroku, who was there and is well aware he could suffer the same fate, but to show Sango the horror of it and drive her to prevent it at all costs.
* Inuyasha: Naraku not only has a distinctive demonic aura (that the titular Inu Yasha calls a "stink"), he also tends to leave behind trails of dead bodies everywhere he goes.
* Inuyasha, Naraku's Shouki is dark purple, and is most certainly poisonous.
* Inuyasha, no surprise he forgot what tact he'd learned from his mother.
* InuYasha occurred on her eleventh birthday. Her mother walked in on her father having an affair with one of the female servants, and in the ensuing argument, Arina's father attacked her mother and brutally beat her on the spot; when Arina witnessed this, she ran for her life.
* Inuyasha once destroys Kagome's ringing alarm clock so she doesn't wake up and find him in her bedroom.
* Inu Yasha once tried to get information from some kappa, but they turned out to be almost
* Inuyasha, only to realize he's fighting through the pain and trying to maneuver the bad guys back out.
* Inuyasha) or your true consciousness (what most would call a soul, but fits Mind better on this page.) Until the time it was explained, the word had been used interchangeably for either. (This makes Kikyo look like much less of a dick than she did when it seemed that she was condemning innocent young women to eternal oblivion to keep herself going.)
* Inuyasha over the course of the series, Inuyasha is finally able to reach closure regarding their relationship; while he still grieves for her, she doesn't haunt him the way she had up to that point. However, she continues to influence the plot with her final death, both by saving Kohaku's life and by leaving behind some of her purifying power in a shard of the broken Shikon Jewel, making it possible for the Jewel to be purified and defeated.
* Inuyasha, particularly given that Shippou provides visual aids. Visual aids he's so proud of that he later shows to the whole village, much to Kagome's embarrassment.
* Inuyasha: Played with Miroku. He hits on every pretty girl, asking them "will you bear my children?" (although that question has a double meaning, since his bloodline suffers from an ancestral curse that empowers him but will eventually kill him if he can't kill Naraku before that happens, and he wants to leave behind children to continue his legacy after he's gone), but he conspicuously refrains from posing that question to Sango when she joins the main character's team. (When she points out that he hasn't, he does halfheartedly try to ask but she irritably cuts him off). Eventually, Miroku does get around to asking Sango his notorious question, and when he does, he means it as a marriage proposal. But while he never asked that question to her specifically, that never stopped him from groping her every chance he had. Miroku's restraint only goes so far.
* Inuyasha plays on this occasionally; all humans fear youkai and hanyo, but not all youkai and hanyo want to hurt humans. This trope is even inverted with a villain who is convinced that all humans want to hurt demons.
* Inuyasha: Pretty much the same example as the above for InuYasha and Kagome. All

they ever do is fight, mostly leading to Kagome storming off after a massive sit. However, anytime they're separated for too long, all Kagome can think about is InuYasha, while InuYasha will be unbearable to be around until Kagome's back. And in any fight, they will put themselves in any kind of danger to save the other (which more than half the fight is of InuYasha taking all those moutain busters to keep everyone else safe).
* Inuyasha puts considerable effort into bringing Miroku and Sango together, effort that ultimately pays off. Still, things probably would have worked out sooner if she just sat Miroku down and explained to him that gropping a woman whenever you feel like isn't the best way to build a relationship.
* Inuyasha relies on sociopathy, with Miroku's lechery (including Sango's violent reactions), Shippo's pranks, Kagome's abuse of the "sit" command, and everyone's treatment of Myoga.
* Inuyasha revolves around Kagome's little brother Sota working up the courage for a confession.
* Inuyasha, Sango commits some major blunders as a result of her concern for Kohaku and Miroku. These result in nearly getting herself and them killed on a few occasions, as well as nearly murdering Rin.
* Inuyasha, Sango's fighting outfit include this under her body armor.
* Inuyasha, Sesshomaru has a lot of contempt for Inuyasha's late mother. It's never said whether she ever cruel to him(more than likely she wasn't), but he despised his father marrying a human, who he considers inferior, and blames her for his death, saying their love weakened him.
* Inuyasha, Sesshomaru is stated to have at the very least equaled, if not, surpassed his father.
* Inuyasha, She's since moved to San Francisco where she currently works as a social media PR.
* Inuyasha should have won an Oscar for the number of times he plotted his enemies (and allies) against each other. One particularly nasty example is when he told Sango that Inuyasha slaughtered everyone in her village, leading her to almost kill herself trying to get revenge. Another such instance is when Naraku lures both Koga and Inuyasha to his castle and sets them up to make Koga believe Inuyasha wiped out his clan, tricking them into a life-and-death battle; then sends in his subordinates to kill the survivor. Of course, in both cases, he had arranged the massacre himself.
* Inuyasha's Kanna, despite being ten years old (technically, less than a year old), can absorb and deflect most of the characters' attacks very easily. Not only that, here's an attack you definitely cannot block-her sucking out your soul.
* Inuyasha's Meidou Zangetsu and, even more explicitly, his Cutting Meidou do this all the time. In the latter's case, even to things that are outright immune to the former.
* Inu-Yasha's mother (5'2) and father (6'5). He visits his father's grave and enters his father's remains and has room in his chest to both move around and fight his brother. We see his mother in a flashback and she was a normal-sized human lady. Even in his human size, the father is noticeably taller than she is.
* Inuyasha, so before Sango leaves to fight him, she kisses an unconscious Miroku goodbye.
* Inuyasha, so be sure you meet the requirements for transport, 'cause if you don't make it across, it's gonna hurt.
* Inuyasha. So regardless of when fans ship him with Kikyo or Kagome, he gets shipped with two characters who are technically the same person. Later in the story, Kikyo is resurrected, negating this trope during that time.
* Inuyasha's rant about the trouble two warring brothers are causing derails when he spots everyone's disbelief. He defensively claims his problem with Sesshoumaru is nothing like this, causing Sango to wonder if Sesshoumaru's sneezing. The scene cuts to...
* Inuyasha stars Sesshomaru's half-demon daughters Towa and Setsuna, along with Inuyasha and Kagome's daughter Moroha.
* Inuyasha starts out with a heavily prosthetically amplified body and ends up as

torso attached to a Feudal style tank.
* Inuyasha stated that she chose Kikyou's name basing on the language of flowers, as the Chinese Bellflower's meaning is "unchanging love".
* Inuyasha still has unresolved feelings towards his undead former girlfriend Kikyo, also feeling guilty and believing he must die with her as atonement, and Kagome (who is Kikyo's reincarnation) leaves him after seeing the two talking but then she remembers the party needs her and returns. They come to an understanding of the feelings they have for each other but their relationship stays basically the same. Near the end of the series, after
* Inuyasha's title character has his Tessaiga. So cool that Sesshomaru's antagonism is partially out of jealousy over Inuyasha being able to wield it, but not him.
* Inuyasha's Usagi, her gifts are related to a jewel or crystal, she's the reincarnation of the powerful miko Kikyou, keeper of the Shikon Jewel, and her greatest strengths personality-wise are her kindness, love for others, and ability to make friends. This can bite her in the butt with such characters as Kouga the wolf prince who just doesn't take the hint, and Hojo, who like-wise can't take a hint.
* Inuyasha takes place inside Naraku when he transformed into a giant, floating spider.
* Inuyasha temporarily loses all of his demon-powers on nights with a new moon.
* Inuyasha than a proper villain, she is still forced to reluctantly serve Naraku out of self-preservation).
* Inuyasha that appearance, and by extension, the voice, presumably because he liked them.
* Inuyasha that come in there and a yōkai that looks like a hill when it's sleeping (which he tries to always be) and had an object that prevented him from being detected.
* Inuyasha: the basic concept is demonstrated in a flashback showing how Jaken came to be Sesshōmaru's servant. Long ago, he was the leader of a tribe of imps who came under threat by a demon who turned out to be the greatest opponent Jaken and his tribe had faced up to that point. Just as the demon was about to kill Jaken, Sesshōmaru happened to be walking by and, considering the demon to be in his way, effortlessly destroyed it with one blow. Seeing such a great and powerful demon so nonchalantly save his life put Jaken in awe and he abandoned his tribe to follow Sesshōmaru from then on.
* Inuyasha: The Bone Eaters' Well connects the two time periods in sync, so that time flows at the same rate on both sides.
* Inuyasha: The Demon Well is a temporal anomaly that connects the well to its past self 500 years later, with time passing between the two points consistent. No explanation is given for why the heroes can't change this, though it has to do with the supernatural wood the well comes from.
* Inuyasha, the eponymous hero was originally searching for the Sacred Jewel in order to get his wish to be a full demon granted.
* Inuyasha (the father of the main character and his half-brother Sesshomaru) is his gigantic skeleton (his fanged skull visible), albeit covered in equally-humongous armor, looming across the landscape where he supposedly "fell" in battle.
* InuYasha: The Final Act anime series covered the first 36 manga volumes in 167 episodes.)
* InuYasha: The Final Act in mid-2009, around the time the anime began airing in Japan. The English dub was completed by the end of 2010, according to the actors in it. However, it didn't see a home video release until the end of 2012, over three years after its initial announcement.
* Inuyasha: The Final Act shows a literal red string tied to Inuyasha and Kagome's fingers.
* Inuyasha, the Inuyasha - Kikyou - Kagome triangle is finally broken when Naraku engineers Kikyou's death for good, and she ends up perishing peacefully in Inuyasha's arms.
* Inuyasha; their actual true form are wolves but can transform into human form, probably similar to Sesshoumaru, but their true form is never shown. They also have

the power to control regular wolves.
* Inuyasha, the manga itself ran from 1996-2008; the anime came back and finished the story in 2009-2010. That's 14 years if you count the anime as part of its run as well)
* Inuyasha the minute they see them, and as soon as they're convinced the two aren't evil demons, they start fawning over them.
* Inuyasha the Movie: Fire on the Mystic Island during their fight, but can't bring himself to finish her off; the real Kikyo proceeds to show up and kill the clone herself before berating Inuyasha for letting himself be tricked by the fake.
* Inuyasha the Movie: Fire on the Mystic Island live together and have children together. Because the stay on this island is like a fountain of youth, the humans there do not age. At the time of the plot, however, the island was destroyed, and only six hanyou children survived, who also have not aged for at least fifty years. But because many hanyou are naturally very long-lived, it is unknown if that was the effect of the island.
* Inuyasha the Movie: Fire on the Mystic Island of Kikyo using a sample of her blood.
* Inuyasha the Movie: Fire on the Mystic Island, who lived together in peace and harmony, and had many half-demons as children. The island had existed for hundreds or even thousands of years until four particularly powerful and evil demons conquered them and killed almost all their inhabitants. But the six children can be rescued by Inuyasha and his friends, and then live in a secret place on the mainland.
* Inuyasha the Movie: Fire on the Mystic Island you can see the young half-demon Shion. He is very shy and reserved. He also shows that he is more peaceful and gentle. Another half-demon named Asagi even calls him to behave "like a man".
* Inuyasha the Movie: Swords of an Honorable Ruler and holding on with his teeth while Miroku saves everybody.
* Inuyasha the Movie: Swords of an Honorable Ruler has the power to raise the dead at will.
* Inuyasha the Movie: The Castle Beyond the Looking Glass Miroku secretly observes Kagome and Sango as they bathe in the hot springs. Sango is upset and throws a big rock at Miroku.
* Inuyasha there are two kinds of souls: one is your true self, and one is the power that animates the body. Seeing how nobody reacts to Kikyo as a soul-stealer, she is presumably surviving on this second kind.
* Inuyasha: The Secret of the Cursed Mask: Kururugi serves this role in the party, their fighting style entirely revolving around their Shikigami powers.
* Inuyasha: The Secret of the Cursed Mask, picking romance options with a specific character will help unlock new Co-op techniques you can perform with them.
* Inuyasha, the "sharp shot to the solar plexus" move was once used by Miroku to subdue a peasant girl whom he was trying to move to safety.
* InuYasha the Tetsusaiga is sharp enough to cut through the scar in the wind created when two demons' auras collide, allowing Inuyasha to use his signature Wind Scar technique.
* Inuyasha. The third episode is even titled "Down the Rabbit Hole and Back Again."
* Inuyasha, the title character accidentally damages the handlebar to Kagome's new bicycle. While she goes to school, he volunteers to fix it. Given his lack of knowledge on bicycles — or anything else from the modern era for that matter — things quickly get out of hand, and by the time Kagome gets home, the bike is in even worse shape.
* Inuyasha the titular character has his brother stick his arm straight through his chest. Kagome tries to patch him up the next day only to find that the wound has healed due to Inuyasha being half-demon. She still has to wrestle him to get his shirt off though.
* Inuyasha. The titular character is a half demon who attempted to steal the Shikon Jewel but is thwarted by Kikyo, a priestess. The two ended up falling in love. Sadly, it doesn't end well.
* Inuyasha: This pretty much exemplifies Inuyasha's entire approach to fighting. He

even learns Bakuryuuha totally without meaning to by reacting instinctively. His unconventional fighting style is commented on by other characters on more than one occasion.
* Inuyasha thus declared them an erogenous zone. Sometimes he even purrs when someone pets them. (Even though he's part DOG demon, not CAT.)
* Inuyasha to curse the family line in the first place. Miroku's flaws therefore run in the family.
* Inuyasha to finish out the rest of the series. Though it doesn't cover all the manga stories from where the original series left off, just the main conflict with Naraku.
* Inuyasha. Together, They Fight Demons (and occasionally collect jewel shards)!
* Inuyasha to Inuyasha, to the extent where he actually believes his father was grooming Inuyasha to kill him. The situation between the brothers is eventually resolved when it becomes clear that their father understood the vulnerabilities of being half-human and just how powerful Sesshoumaru would one day become. His real desire was for Sesshoumaru to become a source of support and guidance for Inuyasha.
* Inuyasha to Kagome, and even though the few dates they try out are disastrous, he doesn't give up. However, his name isn't in the title, so of course he's doomed to providing lots of unnecessary medicine while she runs off to save the world with Inuyasha. Fortunately, he doesn't seem to mind much.
* Inuyasha to play with it in various ways. The manga author seems to like to avoid this problem, because it actually always occurs when a demon and a human come together. The demonic parents of Inuyasha and Shiori were killed by evil demons when their children were born straight. What became of the demonic parents of Jinenji and Gyu-oh is unknown. At the time of the plot, they are simply gone.
* Inuyasha to reveal that it's actually Jaken who sneezes on Sesshoumaru's behalf and that he really dislikes this aspect of being Sesshoumaru's servant. Then the normal plotline continues.
* Inuyasha to stop Inuyasha's magic sword from slicing and dicing the bad guys. Much of Inuyasha revolves around thwarting such barriers. Sometimes he's able to break the barrier with one of Kagome's arrows. He later powers up his sword by cutting a barrier generating orb and absorbing its power (which turns his blade red when in use). This power up allows him to cut through magical barriers, and when THAT ends up being trumped, he later gains the ability to fling gigantic shards of diamond to pierce armor/barriers.
* Inuyasha uses a poison that turns the ground red in order to force Kageromaru to come out.
* Inuyasha, was commissioned in order to adapt the remaining chapters now that the manga itself had concluded.
* Inuyasha was exempt because it doesn't have opening credits, but the ending was still cut from the final episode due to time.)
* Inuyasha was something like this. In fact shortly after returning the bike to Kagome, he takes it from her yet again to chase after a demonic ink painter. Fridge Logic sets in when you realize that Miroku shouldn't even know what a bike is, much less been able to ride one.
* InuYasha was this for nearly every episode outside the last anime story arc. Once the manga got past the point of the anime ending, it changed up a little bit.
* Inuyasha wearing expansive clothes he's wrapped in chains and has an iron mask covering his face. As soon as he removes the chains and mask to have him fight the heroes at his top, Juromaru promptly beheads Naraku's golem, showing off why he was chained up.
* Inuyasha wears one because she lost her eye during an attack of demons when she was a little girl.
* Inuyasha, when he can't figure out if Sesshomaru was teasing him or actually testing whether the Tenseiga would cut/kill him, begins plucking flower petals. The last petal is "testing", which he attempts to interrogate Sesshomaru over when he returns.
* Inuyasha. When in protective shutdown (meaning she's active, but only at normal human levels), she's captured by a monster who boils maidens to render them down

for hair oil, and initially struggles. Then she thinks "Wait. Why am I fighting this guy? I'm heat resistant to 2000 Kelvins and I've been wanting a hot bath since I got here."
* Inuyasha: When Inu-Yasha visits Kagome's room, he finds that she is sleeping.
* Inuyasha, when Kagome goes down to the well to search for her cat. She hears noises coming from the well and is frightened when her cat brushes up against her leg. After realizing her error, she faces away from the well with the cat as the Centipede Woman shows up to drag her back in time. Her brother, of course, sees it all and tries to warn her. No luck.
* Inuyasha when Kikyou tells Inuyasha that the red string of fate, once cut, can't be restored.
* Inuyasha When the daimyo asks how he could have defeated the guards, Bankotsu nonchalantly points behind him, showing a roomful of soldiers embedded in the ceiling to the neck, dangling uselessly.
* Inuyasha, where he's torn apart by Inuyasha's Meido Zangetsuha, and finally wished out of existence completely by Kagome and the Shikon Jewel.
* Inuyasha, which covered the remaining volumes of the manga, which ended in 2008.
* Inuyasha while demons tend to feed on people, many of them have specific preferences, including a Mantis monster that'll feed on innards, Juromaru (one of Naraku's creations) who was fond of livers and a giant, skinned Salamander demoness who needs to eat the skins of male people or demons in order to regain her form. There's also the Zushi Rat, who leaves the flesh to his countless rat children and takes the bones for himself.
* Inuyasha, while not as popular in the 2010's, could be appealing whether you're into romance or epic battles, or just Ocean voice actors, being one of their longest animes that didn't get redubbed or recast early in.
* Inuyasha who can transform into a giant saber-tooth cat when needed.
* Inuyasha, whose bottom half is a massive centipede, but whose top half is a very naked human woman. Also, Naraku. However, Naraku is only shown undressed when the lower portion of his body is covered in demons, he usually wears a pelt or robe of some kind, particularly with his newer form.
* Inuyasha who were causing mayhem in the villages. During a gory attack orchestrated by Naraku, all of them except two were killed. The two survivors are Sango and her brother Kohaku.
* Inuyasha with a beautiful princess. If he can't have her, then maybe a picture will do... it doesn't end well.
* Inuyasha with a really long story). The difference in length between the two works? 557 Chapters.
* Inuyasha. Without her duty to the jewel and her desire to see Inuyasha one last time as she died, Kagome would never have been able to travel through time nor would she have inherited guardianship of the jewel that brings her and Inuyasha together.
* Inuyasha would set everything back to square one. It's generally accepted even by fans of the series that over two-thirds of the chapters could be removed from the story's middle section, and the overall narrative wouldn't be impacted at all.
* Inuyasha Zushinezumi carries around a zushi (a wooden container for buddhist scrolls) which spawns an endless horde of ravenous, one-eyes rats that devour everything in their path and multiplies if damaged. Hakudoshi unleashes them to wreak havoc in an entire valley in order to force Kikyo to come out.
* Inuyashiki During the final battle, both Inuyashiki and Shishigami knock each other out at one point, only for their safe modes to kick in and continue fighting each other.
* Inuyashiki: Implied in the manga, as in the last chapters Shishigami remembered something they said when he was being rebuilt. Averted in the anime, in which the aliens talk in Starfish Language.
* Inuyashiki into alien battle bots. It took both of them quite some time to even realize their bodies weren't their old bodies any more, nevermind figuring out they had beyond-human capabilities. Shishigami adapts and discovers his capabilities quicker, because of his youth and being a fan of superhero manga. Inuyashiki on his

end needs a lot of motivation and help to reach the same level because he didn't really want to become a hero in the first place.
* Inuyashiki that becomes a serial killer after being reconstructed by aliens as a cyborg along with Ichiro Inuyashiki, the protagonist, a middle aged man that uses his new cyborg form to become a superhero. Before Hiro, Inuyashiki also dealt with a gang of teenagers that spank homeless people with baseball bats for fun.
* In v3 many handlers suspected that the characters killed off in the inactive clearing were still around Faking The Dead and plotting against the terrorists. However, this was actually proven to be canonical. In v4, some handlers have speculated that the STAR escape group did not die in a fiery boat explosion as the terrorists claim, but for now, they're treated as dead by most people.
* In V4, Clio Gabriella knocks Garry Villette off a cliff and watches him plunge into the water below. She doesn't bother to check to see if he surfaces again and believes him to be dead. He isn't.
* In "Vacuum Friend", Robot turns down an invitation to Socks' pool party after imagining that he'll electrocute everyone if he jumps into the pool.
* Invaded States of America: The United States gets invaded by a foreign power.
* Invaded States of America: The USA is under foreign military occupation.
* invaded the pitch during an International Rules Football match between Ireland and Australia, getting seriously involved in the action for several minutes. Snarky commentators note that he was one of Ireland's best defenders.
* Invaderby Albert Fay Hill had humanity's astronomers spot the massive energy release as the invasion fleet slowed from near-lightspeed, so the world's governments funded the construction of a massive gamma-ray emitter. One carefully-aimed shot killed every living thing in the fleet, and the now-dead ships just drifted past Earth back into the void.
* Invader Franny, Franny dismisses everyone at Skool aside from Dib as being "bloody idiots".
* Invaders come and take over the United States, while a plumber from New York rises to fight back. No, it's not some
* Invaders From Earth anyway). The protagonist works at an advertising agency and is hired to come up with a campaign to sell the people of Earth on xenocide in order to get at Ganymede's resources.
* Invaders From Mars and his school nurse were played by Hunter Carson and his mother Karen Black.
* "Invaders from Mars" been invaded, by a force far superior to their own, making it a poor choice of breeding ground.
* Invaders From Mars shows Martians landing a large flying saucer and using it as their base on Earth.
* Invaders From Mars, the mint condition vintage penny that David's father gives him is later used to power one of the Martians' weapons, which run off of copper.
* Invaders From Mars, the police officer who was told that something strange was going on up at the sandpit (and mentioned he hadn't been up there since he'd been a boy) was played by the same actor who, in 1953, was the boy who'd seen something strange going on up at the sandpit.
* Invaders (Martian Menace, Tritons): Bad guys, but ones with a motivation beyond "being the bad guys". These factions want something humanity has — land, resources, people — and are here in force to take it.
* Invaders of Hark with a single decision you make early on in the plot.
* INVADERS of the ROKUJYOUMA!?: Ghosts? Aliens? Underground civilizations? Sure, why not? But a magical girl? Clearly she's a deluded cosplayer. This is partially because Yurika is inexperienced and botches her magical powers the first few times she tries to demonstrate them to the group. Koutarou admits that he does not want to believe her because he wanted a fellow normal person in the group. When she finally manages to demonstrate her powers, everyone thinks that she only acquired her powers recently and still will not believe that she always was a magical girl.
* INVADERS of the ROKUJYOUMA!?. In order from shortest to longest: Harumi and Clan(waist), Yurika(mid-thigh even up in pigtails), Theia (knee), and Kiriha (ankle).

* INVADERS of the ROKUJYOUMA!? is suddenly transported there, he initially doesn't realise that he's on an alien planet. Forthorthe does have fantasy creatures like dragons, though.
* INVADERS of the ROKUJYOUMA!? joining much later. At first it's just his room that they're interested in, but as time goes by, they genuinely fall in love with him. In addition, the head of the school knitting club has a crush on him.
* INVADERS of the ROKUJYOUMA!? of Rhinoceros Beetles, despite not even knowing what one looks like until later.
* INVADERS of the ROKUJYOUMA!?: There are seven common domains of magic named and colored for the standard rainbow. Magical Girl names indicate by color which area one has mastered. There is also White and Black, magic which are only very rarely encountered.
* INVADERS of the ROKUJYOUMA!?. This was necessary because the first volume introduces the main cast while the next five flesh them out, one character per volume, so adapting any less would leave some characters missing. This is especially noticeable with the first volume, which introduced the invaders on separate days, while the first episode introduces them all in one night.
* INVADERS of the ROKUJYOUMA!?, you have a ghost, a magical girl, a subterranean miko, an alien princess and her servant, with her rival and the magical girl's rival dark magical girl appearing later. This essentially combines supernatural, magic, and sci-fi altogether.
* Invader Togan has heavily modified himself with cybernetics to increase his natural psychic abilities.
* Invader Togan is the Irken in charge of the armory planet Oberox, whom the heroes have to fight in order to steal the weapons they need for their campaign against the Tallest (as they're not even aware of the Employer yet at this point).
* Invader Togan regularly kills his subordinates for interrupting him while he's taking a stroll.
* Invader Zim acidic to him and he can grow hypnotic pimples. And then there was that "molting" thing that happened during the Galactic Equinox, when he suddenly turned into a giant mass of pulsating pustules that erupted in a sea of green pus.
* Invader Zim addressed the most obvious problem of losing the show's amazing voice work. However, he noted this trope would be in effect, and the first issue actually went so far as to list the show's voice actors on the credits page.
* Invader Zim, a giant rampaging hamster crushed the news studio where they reported it, which they had actually been able to easily see him about to do, as they were recording his every action.
* Invader Zim a grotesquely obese sack of organs. In the end, this plan somehow works.
* Invader Zim, a little girl's scream is heard by The Tallest, who are on a spaceship on the other end of the galaxy.
* Invader Zim almost as often as they fight, and a fair number of episodes are about Dib dealing with other stuff while Zim makes only a cursory appearance.
* Invader Zim also lampshades a common problem with this trope: In "The Fry Cook What Came From All That Space", Zim recalls a flashback of being demoted to fry cook under fry lord Sizz-Lorr, and then escaping. After Zim escapes, it shows Sizz-Lorr alone, shouting at the top of his lungs:
* Invader Zim, altering the past with rubber piggies, and setting a giant hamster loose in the city to create havoc.
* Invader Zim, although he receives more contempt than outright hatred.
* Invader Zim: Although Zim was pretty mean to Keef for the most part, because he called them "friends" and pretended to enjoy his company (for appearance's sake) Keef became obsessed with Zim even after Zim made it clear he wanted nothing to do with him.
* Invader Zim, and all sorts of futuristic technologies... while NASA is still relying on Martian rovers, humanity is still completely unaware of any life in the universe, and only about 5% of the vehicles on Earth can fly. The rest are basically stylized cars.
* Invader Zim, and now that Gir is functioning properly for a prolonged period of

time, he can realize just how much of a bungling, arrogant, hopelessly incompetent fool Zim is. So he openly turns on Zim and nearly kills him before Zim manages to undo his efforts, making Gir too stupid and distractible to think about betraying Zim anymore.
* Invader Zim and people think he is crazy. The only other human to catch on is Dib's sister, who recognizes Zim as far too incompetent to have much chance of success and so doesn't give a damn.
* Invader Zim, and the creators have revealed their basic plans to fans.
* Invader Zim and the Tallests don't care if he conquers Earth or not.
* Invader Zim as well, and his insanity infects it, driving it crazy before making it blow up.
* Invader Zim attempting to conquer Earth. The show was short-lived due to its disturbing content, but it has a cult fanbase.
* Invader Zim, attempts a badass battle cry but winds up with an irritating, high-pitched "eeeeeeeeeeegh" sound.
* Invader Zim basis in reality if they're physiologically similar to real life arthropods.
* Invader Zim because "it makes him dance better". Somewhat justified since Sizz-Lor hates Zim and the job is supposed to be a punishment for Zim ruining the original Operation Impending Doom, but still.
* Invader Zim, but her voice is awfully shrill whenever she loses it. It doesn’t help that she's emotionally unstable, this is due to her being a very spoiled young girl.
* Invader Zim, but the vast majority of these are only known from scripts and DVD commentary.
* Invader Zim by having Zim replace the other students' organs with increasingly bizarre random objects.
* Invader Zim, called "Mopiness of Doom", has something like this. Dib decides to drop paranormal investigation and pursue "real science." Zim, finally being free of the one person that constantly ruins his plans, enjoys his newfound freedom for a while, but soon becomes unmotivated to continue coming up with new evil plans without someone trying to stop him. Meanwhile, Dib has a hard time concentrating on "real science" since he still loves para-science and eventually gives that up and goes back to hunting Zim. Zim is confronted by Dib again and is overjoyed that he's back. The episode concludes with the two happily slinging insults at each other.
* Invader Zim demonstrates, his CPU doesn't take up much space at all in there.
* Invader Zim, despite his grotesque appearance. However, despite being a tween, Gaz seems to be his biggest fan since she loves piggies, and it's hinted that she actually wants to see him in-person since she never got a chance when she was younger.
* Invader Zim, Dib talks to a hobo at a diner. The hobo then kidnaps one of the customers.
* Invader Zim, Dib uses his newly gained super powers to dodge Zim's defense lawn gnomes (which he could have easily done without powers) and talk to Zim at his house.
* Invader Zim difference between male and female Irken, as it's heavily implied they don't even reproduce sexually.
* Invader Zim discovers the planet Mars "looks unnatural, as if nature was not involved in its formation" and discovers it's a giant spaceship. He plans to roll it around on the surface of the Earth to squish the filthy Earthicans.
* Invader Zim disguised as the skyscraper headquarters of a hot dog company.
* Invader Zim doesn't need to eat, but he does anyway out of enjoyment of Earth food.
* Invader Zim done an excellent job with poking fun at Human Life; even the aspects of daily life in the far-future have devolved into a tortured mockery of itself in a most Juvenalian manner.
* Invader Zim due to its continued popularity in reruns, but never fully stuck because no agreement could be made on how to budget the project (the high financial cost of the show was a major reason for its original cancellation). The property

would eventually see a comic book continuation that started in 2015, followed by a television movie a few years later.
* Invader Zim due to the fact that these planets are quite large compared to the asteroids' distances from each other.
* Invader Zim: During the showdown with Tak in "Tak: The Hideous New Girl", Zim makes this witty remark when Tak loses control of her ship:
* Invader Zim, each chapter begins with an excerpt from a "factual" document, usually about the Irken species, providing vital information on things from their reproduction to time scales.
* Invader Zim earlier in the episode, only to find him being attacked by his brain-eating parasite. The Tallest stare at the screen, then Purple announces that he's going to be sick before rushing offscreen.
* Invader Zim eat naughty children (in fact, he's vegetarian); and he and Santa actually appear to be close friends.
* Invader Zim employs a procedure called "Organic Sweep" on already conquered planets which is basically amounts to this trope. The entire Irken Armada bombards the planet with all their artillery, eradicating all the organic life and structures that might have survived the previous conquering. This leaves the planet ready to be re-purposed as the Almighty Tallests see fit.
* Invader Zim employs a procedure dubbed "Organic Sweep" to terraform an already conquered planet. This consist of the entire Irken Armada bombarding the planet's surface with all their artillery, eradicating all the organic life and structures that might have survived the previous conquering.
* Invader Zim encountered "Chickenfoot". He's not a freak, he's just stupid.
* Invader Zim ends up turning Santa into a hideous mutant cyborg in "The Most Horrible X-Mas Ever."
* Invader Zim: Enter the Florpus art style compared to the original show, downplays a lot of the iconic imagery, and lacks several fan-favorite characters in favor of a smaller standalone story focusing on Zim and the Membrane family.
* Invader Zim: Enter the Florpus. It looks like a swirling black hole, sucking in everything nearby, except it also causes everything it sucks in to collide and merge with other realities until they're torn apart.
* Invader Zim: Enter the Florpus stream of soda into a service drone's face and keeps going until it pushes them off the platform they're on. And he didn't have a single sip of drink before or during the epic spit take; the soda just seems to come out of nowhere.
* Invader Zim: Enter the Florpus tendencies, it turns out that he's individually named each robot, and is horrified when they're destroyed.
* Invader Zim: Enter the Florpus: The Irken Armada only travels and conquers in a straight line because, according to the Almighty Tallest, turning is boring.
* Invader Zim: Enter the Florpus watches his army of robot minions getting destroyed.
* Invader Zim: Enter the Florpus when Zim teleports it into their flight path and finally be rid of him rather than accepting the gift he handed to them on a silver platter.
* Invader Zim: Enter the Florpus with Dib... by setting up special effects and a sprinkler system. When Dib awkwardly points all this out, Zim promptly throws all the machines off-screen and feeds the strobe lights to GIR.
* Invader Zim Episode 40, "The Girl Who Cried Gnome". Moofy gets her leg stuck in a dirt mound in front of Zim's house, almost immediately the press, multiple rescue teams, civilians, and helper robots arrive trying to set her free. The US President of the himself appears to make a speech regarding Moofy's ordeal 6 minutes in, and they consider using a sonic vibration device that could destroy the earth just to shoot her out the mound... and when Dib Membrane gets stuck in the same mound, everyone leaves.
* Invader Zim episode "Big Bad Rubber Piggy" has Zim try to use a time machine to erase Dib from existence. Because the time portal will only allow rubber piggies, Zim uses them to put past Dib in painful situations. Eventually, Dib becomes so physically malformed that Professor Membrane gives him an exoskeleton that grants

him the power of "Ten THOUSAND LITTLE BOYS!!" The result is a super-strong and weaponized Dib rampaging through Zim's base, and each piggy sent in from there just makes Dib stronger.
* Invader Zim episode "Dark Harvest," Dib tells Zim that he knows he's an alien because humans don't have a squeedlyspooch, and Zim doesn't have any normal human organs. Zim's solution is to stalk his classmates, steal their organs, and stuff them inside himself. This trope is played with, however, in that Zim doesn't so much eat the organs as teleport them out of his victims' bodies.
* Invader Zim episode "Dark Harvest", Zim replaces one of Dib's organs with a mooing can, with expected results.
* Invader Zim episode "Door to Door" (and its companion episode "FBI Warning of Doom") was originally scheduled to air on September 14, 2001, but was removed from the schedule following the 9/11 attacks. The episode included a scene where alien spaceships are destroying a city resembling New York with the Statue of Liberty sinking in the background. A new scene was made to replace this one and remove any New York imagery (although the new scene is arguably even more violent), and the episode finally premiered on March 29, 2002. However, the uncut version of the episode was broadcast by mistake instead of the new version. All reruns of the episode have featured the new scene instead, as do all home video and online releases.
* Invader Zim episode "Gaz, Taster of Pork" has one when Dib ponders how he will reverse the curse he put on Gaz.
* Invader Zim episode "Plague of Babies", the title aliens are creatures that resemble human newborns, but have all sorts of freaky powers - among them, the ability to merge together to form a giant baby warrior (with some weird screen...thing for a face.)
* Invader Zim episode "Planet Jackers," Zim has to stop a pair of aliens who want to use Earth to fuel their planet's dying sun.
* Invader Zim episode "Rise of the Zitboy", Zim develops a spot. Shortly after being told by Gir 'You've got a pimple!' an advert for 'Acne-Blast' comes on the TV.
* Invader Zim episode "Ten Minutes to Doom". Which is to say, when Dib gets "possessed" by Zim he still sounds like Dib. Just... more evil.
* Invader Zim episode "The Frycook What Came From All That Space", Sizz-Lorr's very appearance is lampshaded by Zim of all people. The handwave comes in with Sizz-Lorr's response.
* Invader Zim episode Voting of the Doomed has a characteristically direct example.
* Invader Zim episode "Walk of Doom" Zim and Gir startle a dog—and the traditional cat yowl sound is heard.
* Invader Zim Even in defeat, he never loses an opportunity to chew the scenery.
* Invader Zim. Everything he does is either For Science! or for destroying Santa Claus.
* Invader Zim. Everything is dark, full of sharp angles, dirty and neglected. The huge metropolis where the show takes place looks as uncaring and uncared for as the people that inhabit it. Some buildings look tall enough to look almost impossible. The characters, besides being darkly colored and being drawn with inhumanly sharp lines, are also disproportionate, with huge heads, triangle-shaped bodies, and noodle-like limbs.
* Invader Zim fans love pairing Zim and Dib, usually revolving around their shared status as universally despised outcasts among their species. Less common are Zim/Tak and Dib/Tak; while the pairings themselves are popular, most of time in fics Tak just switches to the side of whomever she's paired with.
* Invader Zim featured an ice cream truck that blared ominous-sounding propaganda from its speakers.
* Invader Zim features this happening to Gaz. In the middle of the night, she witnesses a mysterious creature kill Dib and then drag his body out of the house. She calls the police, but by the time they show up, the blood has all disappeared, as has Dib's room, and every picture of him in the house. The police then reassure her that she just had a nightmare and leave, leaving Gaz to start questioning her

sanity. Then the creature attacks her, only for her to suddenly wake up in her room, with a very much alive Dib also telling her she was having a nightmare...except not really, as it turns out he and Zim faked the whole thing to mess with Gaz as a cruel prank.
* Invader Zim first discovers Earth, he refers to the inhabitant as "Earthenoids;" he switches to "humans" after he's learned the word. In another episode, he also refers to the extinct inhabitants of Mars as "Marsoids."
* Invader Zim for no apparent reason. In fact, due to Zim's later attempts to kill him off with more time travel, to keep Dib from killing him, it just keeps on inexplicably giving the robot more weaponry.
* Invader Zim for not remembering Zim ruining Operation Impending Doom I. His response afterward:
* Invader Zim: Gaz does this near the beginning of "Bloaty's Pizza Hog".
* Invader Zim: Gaz is all badass. The fact that she's only around 10-12 and has already beaten the living crap out of her older brother at least three times for bothering her; coupled with the fact that she terrorized a guy for taking the last video game system in stock that was rightfully hers, making her qualify.
* Invader Zim gets her foot stuck in Zim's lawn. The media flocks to report on the horror that the poor little girl is going through.
* Invader Zim gets put in a fast-food restaurant thrice. Each of which portray fast food chains as horrible and disgusting to an absurd, terrifying degree:
* Invader Zim GIR cute, the writers created an episode called "GIR Goes Crazy and Stuff", where Zim actually fixes him — and he becomes suddenly destructive and hyper competent, determining the only way to conquer Earth is with Zim out of the picture...
* Invader Zim: GIR enjoys a lot of activities others wouldn't, like hiding inside a cooked turkey for hours.
* Invader Zim, Gir possesses Zim's house, transforms it into a quadrupedal mecha, and rampages across the city trying to get his favorite tacos. One of the casualties is a brand new car belonging to a man who just moments before was gushing to someone on the phone about how amazing his car was.
* Invader Zim had an air helmet that was a pink gooey bubble that turned invisible after forming around his head and pressurizing. It's also seen reappearing sporadically when damaged.
* Invader Zim had a pretty creepy cemetary (but with cool LED-screen tombstones).
* Invader Zim has a similar problem, but eventually averts this trope by bathing in paste.
* Invader Zim has a variation of this. Usually when something bad is about to happen, Gir is as cheery as always.
* Invader Zim has Chickenfoot, someone Dib thought was a Bigfoot-esque cryptid, but who turned out to be an idiot stuck in a Chicky Licky mascot suit with a broken zipper.
* Invader Zim has Dib go into a speech about how he'll have to do this in order to beat Zim. Subverted somewhat in that he never actually does any of what he's talking about.
* Invader Zim has Dib job-shadowing a paranormal investigator who takes him out to investigate some crop circles. Dib quickly points out that they're caused by a cow which is rolling back and forth across the field.
* Invader Zim has Dib. Only eleven years old but is one of the smartest humans in the show. With feats like hacking government and alien networks with ease, being able to spell while still just a baby... list goes on. He's also one of the few heroic characters on the show and his natural fascination with space is adorable.
* Invader Zim has frequent flashes of a somewhat overenthusiastic-looking Dib, complete with sound bite.
* Invader Zim has one too, though we only have one other Vort to compare him to.
* Invader Zim has only one soldier under his command — Zim himself — but his plans and general behavior are bang on target with this trope. Examples include:
* Invader Zim has The Room With A Moose. It's an entire dimension consisting

entirely of a room with a moose eating walnuts in it. There's also a dimension of pure dookie.
* Invader Zim has the tendency to demand information from people, then continue to repeatedly demand the information from them by interrupting their attempt to actually give it to him.
* Invader Zim has Zim and Dib with their unhealthy and near-sadomasochistic obsession with each other, despite Dib being 12 and Zim being older than any human alive.
* Invader Zim has Zim rigging a wheel with rockets in an attempt to launch the giant hamster Peepi into space. Peepi trashes the wheel in anger once it realizes what's happening.
* Invader Zim. He is juxtaposed to Dib, a preteen paranormal investigator trying to stop him.
* Invader Zim. Her body has a "snake-like" quality, and is animated as such that it seems she can "slither" around, and sticks out a forked tongue while hissing. Occasionally she even emerges out of other people's shadows and even sucks people into her own. It bears mention that most of the kids in her class are no more than ten years old.
* Invader Zim. He's also more than capable of using the gullibility and general idiocy of humans to his own advantage in certain cases.
* Invader Zim himself, and even including musician Kevin Manthei on a few bonus commentaries that feature him and Jhonen exclusively. Their commentaries are riotously funny and as crazy as you'd expect from some of the people they feature.
* Invader Zim. His efforts at fitting in are even more pathetic when you compare him to the more evil (and competent) Invader Tak, who manages to not only disguise herself properly as a normal human, but also installs herself as the heiress to a multi-million dollar weenie corporation within a short time of arriving on Earth.
* Invader Zim. His job is to conquer humanity, but around third of the time, his own incompetence screws him over (the other thirds being GIR's incompetence and Dib stopping Zim.) However, he's quite good at defending humanity.
* Invader Zim!" (His other options included a dimension of pure itching, and another of pure dookie.)
* Invader Zim. However the Irkens are really good at what they're doing, no matter how bad Zim is. We've seen them successfully take over several planets and they seem to run a galactic monopoly that can't be challenged by any other being in the Universe (to our knowledge).
* Invader Zim how to make his sometimes amazing inventions, if he remembers that he built them at all.
* Invader Zim in an alternate universe set in Puritan times, Gaz is accused of being a witch and performing evil magic against her neighbors. Although she is highly unpleasant and anti-social, her brother Dib knows she is not a witch and tries his best to defend her. Her only defense is to sneer that she's not a witch and call everyone idiots for believing in them. She eventually gets burned at the stake.
* Invader Zim include a semi-transparent image of GIR covered in blood for a single frame.
* Invader ZIM". In it, Gaz gains the powers of the Shadow Hog, making everything taste "like pig".
* Invader Zim. Initially, Dib appears to be terrified but soon realizes that a moose is not particularly frightening.
* Invader Zim instead of killing and maiming directly, but it's hard to ignore the maniacal glee with which he steals organs or reduces cities to rubble.
* Invader Zim interrupts her with screaming until a frustrated Tak simply leaves.
* Invader Zim inverts the trope with the Membrane siblings. Younger sister Gaz abuses her brother Dib both verbally and physically.
* Invader Zim invokes this when Zim gets his PAK taken and has 10 minutes to get it back, or else he dies.
* Invader Zim, Irken "smeets" are apparently all born this way, though the reasons and implications of this are never really explored. Zim apparently considers the

robotic arm that activated him his parent, though. ("I love you, cold, unfeeling robot arm!") According to the script for one of the cancelled episodes, an Irken's personality is stored in his PAK, the backpack-like contraptions they carry, which can be removed.
* Invader Zim is a prime example going so far as to make the Perpetual Energy Generator AKA P.E.G.
* Invader Zim is extremely hyperactive, eats just about anything (edible or not), often spouts out random nonsense, and wears a green dog suit. His behavior isn't normal for a robot of his make since unlike the other SIR Units his brain consists of pocket lint, a paperclip, a penny, and a marble.
* Invader Zim is once trapped in the fast food restaurant to which he was exiled prior to the first episode, and all exits are programmed to make him swell up and explode if he tries to leave. Every time he even thought about escaping, a small child would shout, "He's gonna 'splode, momma!"
* Invader Zim is on record as saying she's non-human, but her exact nature is never exactly qualified.
* Invader Zim is primarily a science fiction series, but Dib's studies of the paranormal sometimes bring in magical stuff as well. Prominent examples include the demonic Mortos der Soulstealer, or the curse inflicted on Gaz that makes everything she eats taste like pork.
* Invader Zim is the Swollen Eyeball Network, a group of genre-savvy conspiracy theorists who have foiled alien invasions. Naturally, Dib is a proud member, codenamed Agent Mothman.
* Invader Zim It's not only dubbed over in an instructional video; it's dubbed over in an actual conversation.
* Invader Zim. It's the kind of non-sequitur you'd expect from the show normally, but that particular gag was a reference to a scrapped B-plot from when the episode was intended to be an hour-long special.
* Invader Zim. It was not stated whether this was in their dimension or another.
* Invader Zim, leading Zim to believe that the long-dead Martians were a race of holographic instruction manuals.
* Invader Zim: Moofy, a one-shot character, is both a hilarious and downright scary example of this trope.
* Invader Zim, most by the titular character, but other characters are prone to it.
* Invader Zim most of what we learn about the Vorts imply this trope—most of the Irkens' advanced technology came from them, both before and after their planet was conquered.
* Invader Zim must think he is, since he goes into Exposition Mode when pretending to be Dib.
* Invader Zim nemesis, one where Zim and Dib's lives are the plot of a musical play, one where everyone in the world is blatantly nice, a universe that takes the form of a "depressing indie film", and one where Zim and Dib are sentient beans.
* Invader Zim once features a floating screen... thing bursting through a wall to deliver a message to Dib. When it was done, it turned around, moved aside, and proceeded to blast another hole to exit.
* Invader Zim once lands on an elevator which rushes him up to the living room of his base, along with the camera flying into his screaming mouth.
* Invader Zim: One customer in "The Sad, Sad tale of Chicken Foot" keeps demanding his coleslaw from the cashier in the restaurant despite said coleslaw being on his tray in front of him.
* Invader Zim: One of the ideas for episodes that were floated around before the series' cancellation involved Zim allying with a race of creatures that look like organic pants, which take control of anyone who wears them. This plot was eventually used years later in Issue 8 of the continuation comics.
* Invader Zim (Oni), and the third chronicles Professor Membrane's life-long vendetta against Santa Claus.
* Invader Zim (Oni)") before kicking Zim out by using the beans to push him through the door.
* Invader Zim (Oni) correctly anticipate his reactions, while others are way off.

* Invader Zim (Oni): Indirectly acknowledged in an exchange between Zim and GIR in Issue 10.
* Invader Zim (Oni) is mostly composed of standalone issues, with a few two-parters thrown in, but has also had a couple longer arcs:
* Invader Zim (Oni): Issue 28 is built around an experimental Irken device called the Time Accelerator (or the "Time Thingy" as it's nicknamed). It generates a field which causes time to move faster the closer you get to it. And when it ends up exploding near the end of the issue, it causes Zim to age into an elderly state.
* Invader Zim (Oni)) likewise not lasting more than one issue. However, there are a few multipart stories with their own prominent antagonists:
* Invader Zim (Oni) of which is being the most dangerous black market in the galaxy. Funnily enough, it's organized like a giant mall, full of various shops selling everything from ordinary products like scented candles and sweaters, to more dangerous stuff like bombs and laser guns.
* Invader Zim (Oni) parodies the complexity of time travel a few times:
* Invader Zim operates out of a massive network of chamber pods and tunnels buried beneath his house. Among other things, he has a hangar bay for his spaceship, several labs, and an observatory.
* Invader Zim parodies this. When Dib discovers that Zim is weak against water, naturally a water fight ensues. This escalates until Zim builds a giant, orbital water balloon launcher.
* Invader Zim, particularly because of Zim's megalomaniacal personality.
* Invader Zim, "Pilot Dib" has taken on this role, as both his design and personality are a bit creepier than Dib in the actual show.
* Invader Zim piloted by GIR that looks even more like an android than him.
* Invader Zim. Plus, his race has no real interest in conquering Earth; they just exiled him there and lied about it to Zim. However, some of Zim's plans did fail because of Dib's interference. Perhaps Dib simply needs to be calmer about it?
* Invader Zim, Professor Membrane has been depicted more positively, trying to do his work as fast he can to spend at least some moments with his children and even assuring Dib that he has always been proud of him despite their differences.
* Invader Zim: Professor membrane is disappointed with his son's incessant necromancy.
* Invader Zim prove to be just as stupid as almost everyone else in the show.
* Invader Zim pulled the seat tack prank on Dib. Dib believes that Zim's prank is pathetic, even for Zim, until he realizes that the tack contained mutagenic contamination that was slowly turning him into bologna.
* Invader ZIM: Referenced in an episode when Gaz tells Dib she thinks she saw one lurking around the mall's parking garage so she can get rid of him for the afternoon. Dib notes that there aren't any goats around for miles, but nonetheless, he spends the rest of the episode wandering around the garage in search of it.
* Invader Zim's Dib considers himself a paranormal investigator. Several other paranormal investigators appear throughout the series with varying degrees of sanity.
* Invader Zim sending an earlier applicant there because he looked taller. (That earlier applicant instead went to the planet that housed the universe's comfiest couch.) Zim himself is just about as small as this last applicant.
* Invader Zim, series creator Jhonen Vasquez secretly inserted images of GIR covered in blood in a few episodes, without Nickelodeon knowing.
* Invader Zim's favorite show. However, over the course of the series it has been shown to report on supernatural phenomena both fake (Chickenfoot) and real (spell drives).
* Invader Zim, she shoves and yells at a woman in a cemetery, who turns out to be a witch far more powerful than her. She ends up kidnapping Gaz, making her run through a gauntlet of humiliating booby traps, and wiping her memories to adopt her as her new child.
* Invader Zim: Smeets (baby Irkens) can walk and talk the minute they are "born", a fact that is often ignored by the fandom.
* Invader Zim. So much. EVERYONE is an idiot, except for Gaz and Dib (and even

then, Dib's neuroses can lead to him coming off as this at times). Professor Membrane is one of the most brilliant men on the planet, but still overlooks incredibly obvious signs of alien life. The Irken Empire wasn't even aware of the Earth's existence: they just wanted to get rid of Zim and sent him on what they thought was an impossible mission. The episode where Tak is introduced sums it up quite nicely; her home base turns out to be much too big because it's actually a giant pump, so she disguises it as a giant hot dog stand. Dib asks why she didn't think anyone would notice, and Tak explains that the good thing about humans is that if there's anything like food or technology covering it up, they don't notice it; they just see there's food in that building, not that it's 50 feet tall.
* Invader Zim, starts chasing Zim again... which cheers Zim up enough to try and kill him and take over the earth once more.
* Invader Zim, such as human masks that they hold to their faces with sticks.
* Invader Zim system based on her own personality), all of her tech is self-customized.
* Invader Zim: Tak's plan in the season one finale is to hollow out the Earth using the giant magma pump that is her base and fill the planet with snacks as an offering to The Tallest.
* Invader Zim territory, depending on the local humidity and/or piggy count.
* Invader Zim that resemble amoeba to a floating purple cone with a face.
* Invader Zim that this is the reason Prisoner 777 provides Zim with information — Zim has his children, and will "erase them" from existence if their father doesn't do what he says.
* Invader Zim that this is why Irken tech tends to not work too well.)
* Invader Zim. The aliens believe that by duct-taping a gopher to Zim's head, they are fusing him and possibly making him more powerful.
* Invader Zim. The delivery was intergalactic and still took place in a few seconds.
* Invader Zim the explosion the refinery is completely ruined, and everyone in Lustrum who hates the Windward Company (which is almost everyone not working there) spends the afternoon watching the fireball slooooowly wreck everything.
* Invader Zim, the food court planet; etc. They have so many they don't even really have a plan for new planets until they conquer them and wipe out the lifeforms present, then they just decide on a whim what kind of new planet might be handy or fun.
* Invader Zim, the Irkens are from Irk. Amusingly, Zim follows a version of the trope himself: before landing on Earth he referred to its inhabitants as "Earthenoids," and referred to the extinct Martians as "Marsoids."
* Invader ZIM, the latter group is somewhat justified in assuming that the obvious alien is just a green-skinned child without ears. Somewhat.
* Invader Zim. The original version of the pilot with all of Billy West's lines intact was previously made available as a bonus feature on the show's Volume 1 DVD release.
* Invader Zim: The planets Foodcourtia and Conventia have magenta skies. Hobo 13 has a yellow one, and others have a mostly transparent atmosphere. The stylization is truly apparent when Earth has a hideous red sky during the day, and the only time it looks normal is during a snowstorm.
* Invader Zim the planet valuable, hollowing it out and filling it with snacks the Almighty Tallests would like.
* Invader Zim the same size. Even by Irken standards, Zim isn't a child, though you could make the case he should be considered one mentally, and while it was Dib who actually kicked off their conflict it has become apparent that Zim's fixation goes beyond merely considering him a threat. Without that conflict, he loses all motivation.
* Invader Zim: The Skool Facility that Zim attends is just like the metropolis he also lives in, modern, technological, and fair on the exterior, but cruel, mean, evil, fascist and totalitarian from within.
* Invader Zim, the Tallest assign Zim to a "mystery planet" on the edge of known space. In truth, they didn't even know if there was a planet out there (they

pointed to a post-it note on the edge of their map that reads "Planet?"); they just wanted to get rid of him. Unfortunately for them, Zim stumbled upon Earth and continues to call them up with annoying reports about his "mission".
* Invader Zim. They elect their leaders based on height, consider turning an entire planet into a food court to be a good use of resources, and generally exhibit the tactical skills of a turnip... but it doesn't matter, because they have such absurd technological superiority over everything else as to be unstoppable.
* Invader Zim. This ultimately results in Dib's skeleton being crushed.
* Invader Zim to make, and they simply were losing too much money on it.
* Invader ZIM too stupid to use his power correctly. There ARE individual Irkens who are extremely competent at planetary conquest and using all that advanced weaponry. It's just a crapshoot whether they actually get in a position to do so considering that all honor and authority in their society is bestowed based on height before any other standard. Zim is actually rather good at using it himself, he's just completely incompetent at target selection. (He once carried out one of the most devastating planetary assaults EVER performed by any Irken...he just forgot to travel from his homeworld to the target planet BEFORE unleashing planet-wide devastation.)
* Invader Zim, to proceed with his latest plan. It works, and GIR takes over the Earth while Zim is having his existence evaluated.
* Invader Zim to scout a planet for weaknesses, send in an invasion force, looting the place for snacks, enslaving the survivors as a client race if they're useful or exterminating them if not, and converting the planet for a single purpose, such as a parking structure or a food court. They're weird like that. They also determine authority solely by height, with their leaders called "The Tallest." The only reason they're so successful is that everyone else in the universe is even stupider than they are.
* Invader Zim. To this day, he still does not recognize what he did wrong there.
* Invader Zim to use as food on deep-space missions. However McMeaties can't afford it so they make theirs out of napkins.
* Invader Zim, ultimately leaving her with only one wish for her own use.
* Invader Zim?? Ultra Peepi to a lesser extent. His unbearable cuteness sweeps away all the horror he fairly causes among people at first, which makes it a whole lot easier for him to destroy the city (even the military refuses to attack the cute giant hamster). But the point is that Ultra Peepi wasn't actually intended to be horrifying at all. He was supposed to be a genuine Nightmare Retardant, so that people wouldn't pay much attention to the havoc the hamster's creating, therefore letting themselves be gradually killed off.
* Invader Zim uses this in a few episodes; Zim's antennae are noticeably thicker than usual in them.
* Invader Zim, uses this when he arrives on earth. However, he only uses human-like eye coverings while he retains his green skin, which Dib Membrane is the only one who notices.
* Invader Zim were especially ugly. Bloaty comes to mind. There were also a lot of grotesque background characters who ranged from unpleasantly greasy to clearly disfigured.
* Invader Zim were unfinished at the time of its cancellation. Of these, seven were far enough along in production to have audio and storyboards included in the Zim's House Box Set DVD release (but not, ironically, in the so-called "Complete Invasion" Box Set).
* Invader Zim when a time-affected Dib is about to strike a similarly affected explosion.
* Invader Zim when Dib encounters Turkey Neck, who complains about those darn kids who are always after his "lucky neck meats".
* Invader Zim, when Gaz suffers from a curse that makes everything she eats taste like pig, her father “creates” a new version of Gaz for his wing called “Pig Girl”, who ends up being extremely popular to kids and adults alike, but acts the opposite to the former. Gaz is not impressed.
* Invader Zim when he used a robotic hand to rip out his former friend Keef's eyes

and replace them with robotic ones.
* Invader Zim when his normal self. His former speech pattern may be from the fact that his better-constructed counterparts, SIRs, talk this way, being part of a warrior race and all.
* Invader Zim. When she gives up in frustration, the noise wakes up Azie, who blurts out "The wine is in the mail!", much to Gaz's confusion.
* Invader Zim when The Tallest accidentally send Zim a Megadoomer X-3 Combat Stealth Mech. The giant mech was incredible, but it came without batteries and had to be plugged into an outlet at all times in order to function. As a result, it loses power mid-rampage when the extension cord gets yanked out of the socket. Afterwards, Zim has GIR plug it into a new outlet each time it powers down.
* Invader Zim when they learn that humans aren't ranked by height. They have trouble wrapping their minds of people taller than the average Irken but on average incredibly stupid. Dib is similarly gobsmacked when he realizes the Tallest are only leaders by virtue of being, well, the tallest.
* Invader Zim where the two kids playing it are strapped with shoulder-mounted rocket launchers filled with dodge balls.
* Invader Zim, where they make Invaders do ridiculous things to entertain them or else suffer a pummeling (pushing some buttons that lead to said Invaders getting beat up by their own technology). The entire principle of destroying a planet to build a parking garage or food court also says something about them.
* Invader Zim, which was a robot death machine that had to be plugged in for power due to a dead battery.
* Invader Zim who spends a good minute and a half shrieking "NOOOOOOOOOOO!! NOOO! OH NO! OH NO! NOOOOOOOOOOOOOO!" and breathing heavily.
* Invader Zim, with Dib being contacted by shoe aliens to help in his fight against Zim. He gains incredible mental and physical powers, which he then uses to prepare the Earth for an Irken invasion and defeat the Irken Armada. Turns out it was just Zim, having kidnapped him and hooked him up to an interrogation device, in order to determine if Dib threw a muffin at him earlier in the day. Zim then proceeds to gain his revenge by throwing a muffin at Dib. From a cannon.
* Invader Zim with several episodes unfinished, whether left as a voice recording, script or just a creator idea. Most fans consider them canonical.
* Invader Zim, with the Krazy Taco food chain and its mascot, a screaming man in a taco suit.
* Invader Zim work, as the military is too busy gushing to fight back... but "Ultra Peepi" won't follow Zim's commands.
* Invader Zim would often use a hawk screeching in the distance in place of crickets.
* Invader Zim. Zim commands the elevator to bring him down to the actual base, and GIR plays Muzak and demands that Zim dance to it before taking him anywhere.
* Invader Zim, Zim finally figures out what happened and forces the entire Irken Fleet to come to Earth which ultimately ends with the Tallest trapped and tormented in a hell dimension with no way to escape.
* Invader Zim. ZIM is a completely evil alien invader with plans to conquer Earth and exterminate humanity (even if he is ridiculously bad at it) and is no less callous and selfish when dealing with his own kind either, to the extent that his people sent him to invade Earth just to get him out of the way. Dib is trying to save the world but is also needlessly antagonistic and mostly seems to want to save the world just so he can get respect as a great hero. Dib also looks down on other people, but given how stupid average people in the series are, that may be justified.
* Invader Zim: Zim is a Smart Jerk while GIR is a Nice Moron. Zim wants to enslave humanity, and while not really a genius per se in the eyes of the viewer, he still has far better technology let alone keener common sense than the human characters on his show (minus Dib). GIR isn't evil or hellbent on enslaving humanity like Zim is, he just wants to watch TV and eat pizza all day.
* Invader Zim, Zim quickly discovered a way to waterproof himself once he discovered the weakness, which was to bathe himself in glue.

* invades the Wildling settlement of Hardhome, the zombies stop their advance at the shorelines and don't attempt to pursue the fleeing humans into the sea.
* invade the Batarian Homeworld. Humanity's response? "They went to the trouble of looking up what the largest fleet in the galaxy had been so they could surpass it by a time and a half."
* invade the school, and adrenaline as well, since he doesn't show any effects while killing the immediate threat. After all the enemies in his vicinity are neutralized, he pulls the darts out and shakes his head, indicating he was becoming at least a little woozy or disoriented. Removing the source of the sedative lets his healing eliminate the rest of it in his body.

* In "Valerie 23", the invalid Hank is confused as to why none of his colleagues tried hitting on the rather attractive girl he was just introduced to. He quickly finds out why when they take him to a side room where a group of scientists are working on the wiring inside the gynoid's exposed skull.
* In "Valerie: A True Memoir", author Harlan Ellison recounts how someone had a habit of spreading rumors about him, then returns the favor by remarking, "What a nasty thing to say, particularly from a man who lures six-year-old boys into the basements of churches and then defiles, kills and eats them, not necessarily in that order."
* In Valeriy Yantsev's short story "Nature Reserve Warden", it's revealed at the end that the planetary nature reserve, of which the protagonist is the warden, is Earth. Humanity has long ago spread throughout the stars. However, because of the humans' love for their cradle, they decided to turn the whole planet into one giant nature reserve. It's mentioned that, originally, the reserve's staff was big, and there was an entire university on another planet devoted to reserve maintenance. However, by the time the story is set, the large-scale automation introduced by the protagonist has reduced the staff to just one person. In fact, it's heavily implied that even he's not needed. The computers can run everything, from maintaining the environment to scheduling daily tours for interstellar visitors. This also costs him his wife and son, who choose to leave for a more populated planet, since only he is the only one whose life's meaning is to be in the reserve.

* invasion of Iraq the United States invaded a country and had to deal with hostile locals.
* Invasion of Kzarch, and a considerable part of the story is focused on what both groups are doing in them.
* Invasion of Kzarch, and the rebel forces have to beat a fast retreat with the enemy right behind them, they're forced to use a sacrificial force, made up mostly of wounded, to buy time for the main force to break away. The sacrifical force is slaughtered to a man, but they get the job done (Salutes).
* Invasion of Kzarch, as they only once fight in space, in a brief early skirmish.
* Invasion of Kzarch, both the marine battlesuits and the pirates' spaceships and gunboats mount shields.
* Invasion of Kzarch exist.), in just a few days. Justified, really; the planet's military isn't very good, and the pirates had near complete surprise, control of the air, and out-numbered the army substantially.
* Invasion of Kzarch include a camouflage function, which is to be used at all times in a battle zone.
* Invasion of Kzarch in the official chain of command, despite, C: Due to some sort of inter-military regulations, ranked around colonel.
* Invasion of Kzarch, performs this ritual twice, once in memory of his lost platoon seargent, and another one later for all the men he had lost.

* Invasion of Kzarch tries to use a deadman's switch and bombs to ensure his safety. The pirates simply toss him out of the gunboat and shoot him.
* Invasion of Kzarch... when from nowhere a large group of reinforcements appear, whose counter-attack ends the pirates' advance, and routs them.
* Invasion of Kzarch, which actually come in three versions: one optimized for scouting, one regular version, and one that's the equivalent of heavy infantry (Making them the heavy infantry version of heavy infantry!).

* invasion of privacy. This is largely due to the social protocols and culture of the two countries, who see eye-to-eye contact while talking extremely important. The technology would only become more widespread stateside with the COVID-19 pandemic and the scramble toward telework making such conferencing necessary.
* Invasion of the Air-Eaters: An alien race invades and uses Atmosphere Converters to change Earth's air to sulfur dioxide, which they can breathe but humans can't.
* Invasion of the Air Eaters, creatures form another planet try to convert the Earth's atmosphere to sulfur dioxide so they can colonize it.
* Invasion of the Baby Snatchers: When (non-human) beings kidnap infants.
* Invasion of the Bee Girls the titular monsters have compound black eyes.
* Invasion of the Body Snatchers (1956) (having nothing to do with the main plot):
* Invasion of the Body Snatchers (1956) is a famous example. Produced at the height of the 1950s anti-Communist paranoia, the movie has often been taken for an allegory for that, although nobody's clear about whether pod people represent Communists, or whether they represent McCarthyists who attack those who are different. The lead actor has stated on the DVD that the movie wasn't intended to be any kind of political commentary (since Senator McCarthy and his followers had already been discredited in the eyes of most Americans by the time filming began, it's unlikely that the allegory was anything but subconscious). Don Siegel, the film's director, was no liberal either.
* Invasion of the Body Snatchers (1956) is told this way. The hero is in a police station retelling the events that led to him screaming neurotically in the middle of the highway.
* Invasion of the Body Snatchers (1956), made at the height of the Red Scare, was praised by people on both sides of the issue who assumed the villainous pod people were meant to be analogous to either Communists or people being swept up by Senator McCarthy's witch hunts. Director Don Siegel was quick to say that he did not intend to portray any kind of message and just thought he was making a simple alien invasion film. Seeing as the film ends with the hero shouting into the camera "They're here already! You're next!", opinions are still divided. The McCarthy/HUAC furor had more or less died down by the time the movie was made, so the director was probably telling the truth.
* Invasion of the Body Snatchers (1956), Miles breaks into Becky's home and finds a nearly complete pod duplicate. He gets her out, but when he returns with the police, the pod is gone.
* Invasion of the Body Snatchers (1956) stated repeatedly that they were just making a movie and not going for any social/political commentary.
* Invasion of the Body Snatchers (1956). The last not-a-pod-person in a small town gets to the city going on about the invasion, trying to get people to act. He gets locked up right around the time that we hear about a truck with these great big pods that somebody found on the highway...
* Invasion of the Body Snatchers (1956), when no real humans were around to fool. Such as "I put the pod in the baby's crib. Soon there will be no more crying."
* Invasion of the Body Snatchers (1978) and disturbing, maybe it's the sounds or something...
* Invasion of the Body Snatchers (1978) famously ends this way, with the camera zooming on in a shrieking pod person's open mouth.
* Invasion of the Body Snatchers (1978) had the rather infamous messed-up duplication of a homeless man and his dog, resulting in a Great Dane with the homeless man's face.

* Invasion of the Body Snatchers (1978) has a clever twist on this. When Matthew returns with the police, he points them to a window garden where the duplicate was. In it are several flower pots forming a vaguely human shape.
* Invasion of the Body Snatchers (1978) has a tongue-in-cheek example in which the lead characters stay up for the remainder of the film after popping an entire handful of PCP caplets.
* Invasion of the Body Snatchers (1978), Matthew starts telling a joke to Elizabeth, but she cuts him off before the punchline. Director Philip Kaufman explained the joke on the commentary:
* Invasion of the Body Snatchers (1978): The Pod People are gelatinous aliens who invade occupied home worlds and parasitize them by depleting all physical resources while replacing/killing off its native life forms after they supposedly ruined their own world the same way. Their parasitic behavior backfires on and even harms them as well because they too quickly exhaust an entire planet of resources and so they move on to different planets.
* Invasion of the Body Snatchers, even though carrying around the smaller and less suspicious-looking flowers would make far more sense from the aliens' standpoint.
* Invasion of the Body Snatchers follows the same basic plot, but uses the aliens as a metaphor for different contemporary fears, illustrating how that basic plot can be reinvented and reinterpreted in different ways over the decades.
* Invasion of the Body Snatchers. Humans are kidnapped and replaced with alien lookalikes..
* Invasion of the Body Snatchers's character tells someone to "get some sleep" and only later do you find out he was a pod person at that point.
* Invasion of the Body Snatchers that are propelled interstellar distances by solar winds.
* Invasion of the Body Snatchers. The alien pod people (who have killed and replaced many humans) never show any emotions. When the protagonists need to mingle with them, they act emotionless as well in order to blend in.
* Invasion of the Bunny Snatchers" starts out as a pretty standard "Body Snatchers" parody — then goes way off the deep end, using weird cheap animation for the invaders. (Though that was the point. Bugs himself called them "Robot Retreads" while thinking up a way to get things back to normal.)
* Invasion of the Bunny Snatchers" the clones made by the aliens constantly repeat the character's catchphrases over and over, they also get stuck when talking in normal sentences, "I spwed sunshine and happiness whenever I can, I can, I can" and "Take some some o' these strange-looking wild cactus carrots! They're good for ya, for ya, for ya."
* Invasion of the Dinosaurs implied very heavily to be gay (such as gushing over how when he masters time travel he will collect Oscar Wilde and Noel Coward from history to keep to himself, and saying admiring things about the physique of the tied-up Doctor). His onscreen portrayal was not at all like this.
* "Invasion of the Dinosaurs", Operation: Golden Age plans to use a rudimentary time machine to return the Earth outside London to a pre-technological age, erasing most of the human race from history so that they can repopulate the planet with eugenically-selected "colonists".
* "Invasion of the hot Italians": Amy is dressed in her kiss-o-gram constable outfit. Obviously, her love Rory likes that.
* Invasion of the Idiot Dog Brain wherein somebody asks Jhonen what he thinks of the merchandising for the show and you start to hear an answer before the audio is cut for at least a minute before resuming. In one interview, Rikki Simons postulated that the reason for the censorship was just good old-fashioned hatred on Nickelodeon's part.
* Invasion of the Neptune Men episode lampshades this: "Apparently the kids have level five security clearance."
* Invasion of the Neptune Men interstitial sequences, the bots sing the "Song About Stock Footage."
* Invasion of the Neptune Men is another alien hero very similar to Prince of Space.

* Invasion of the Neptune Men which nearly drove Mike and the bots insane. Their spirits were lifted by a visit from Krankor.
* Invasion of the Saucer Men. Not far from the Point is the home of a frustrated old man, outraged by all the "smoochers" driving past his house.
* Invasion of the Saucer Men: The Saucer Men have sharp fingers that can inject alcohol into people, causing them to die from alcohol poisoning. If they are killed, their hands can detach and run amok on their own.
* Invasion! - originally, they were intended to be the actual USSR, but the writers were ordered to change the names to avoid antagonising the Soviet embassy.
* Invasion's character becomes their leader, while a small resistance group forms.
* Invasion shows the Statue of Liberty's head reshaped into a swastika as well.
* Invasion!: Some of the Durlans are decidedly less effective at impersonating humans than others. The death of whomever they're attempting to impersonate is also a hangup since they can't go back and pull information from them to help their disguise if the person is question is dead, though this doesn't stop many of them from killing their targets for simplicity's sake.
* Invasion Stripes made it much easier for German pilots to spot the planes on the ground.
* Invasion! that they are are infiltrating aliens. It was cancelled after one season, so the actual goals of the invaders are never made clear.
* Invasion The Abductors: Along with abducting people and turning them into mutants, the alien invaders are also attempting to steal landmarks. You prevent the theft of the Statue of Liberty in stage 2, the Hollywood letters in stage 3, and recover other famous landmarks already taken to the Mothership in stage 4.
* Invasion The Abductors are being kept in tubes throughout the Lab section of the alien mothership. Break the tubes to free them for bonus health and points.
* Invasion The Abductors is a light gun rail shooter that revolves around saving the Earth from an invasion.
* Invasion The Abductors: Though males and females alike are turned into mutants, the alien lab on board the mothership seems to exclusively be holding women in bikinis.

* Invasion U.S.A. (1952)" raid D.C. near the end to try to decapitate the United States' leadership; they're driven back, but not before killing the Senator character in the film.
* Invasion U.S.A. (1985): A couple taking a night swim right where the terrorists are about to come ashore get shot a minute or two after getting out of the water.
* Invasion U.S.A. (1985): A villainous example. Once surrounded by the National Guard, the terrorists fight to the last man rather than surrendering to them.
* Invasion U.S.A. (1985), gunned down while stupidly standing still in the middle of the huge climactic battle and firing from the hip on full-auto.
* Invasion U.S.A. (1985)). Of course, these militias may not have to worry about too much with Chuck Norris hunting the bad guys!

* Inverloch if she reveals her race in the human towns she lives in. She dreams of things like getting married and raising a family — ordinary, simple things, but it keeps her going.
* Inverloch, Lei'ella has been suffering from prejudice on all sides her whole life. She was exiled from the elven city because she was born with the "illness" of mortality and among humans, she's been rejected by everyone she reveals her elven features to. When she finally meets Kayn'dar, who was intended as a savior to restore mortal elves like her, he dismisses the suffering of her and the others like her. It drives her over the edge and she unwisely attacks him, nearly losing her life.
* Inverloch, Neirenn made a number of cryptic statements that implied some kind of clairvoyance. This was quickly dropped, and she acted like a normal (magic-wielding and mysteriously motivated) teenager from then on.

* Inverloch, the permanent bandage around Varden's right arm isn't for show. His arm broke when a guard almost hacked it off with a sword and it didn't heal properly, so Varden kept the bandage on for support and his arm hurts badly when he moves it the wrong way. When he does take the bandage off while washing, the scar is quite sizable.
* Inverloch when Acheron goes to talk to Aydensfell's Archmage and inadvertently takes they money they need to get rooms at an inn. Lei'ella reluctantly agrees to let Varden steal the fee and awkwardly tries flirting with the innkeep; Varden steps in pretending to be her exasperated husband.

* Inverted by Ambassador Mollari, who in one scene rants about the baffling lyrics to the 'hokey pokey' (the Minbari he's ranting to decide not to tell him they enjoyed his rendition), and in another disses country and western music. He also despises Reebo and Zooty, but eventually comes around. Of course, a lot of humans don't really get Reebo and Zooty, and Mollari freely admits that humans have produced a lot of great art, particularly music (he seems to really like music in general).
* Inverted by a stretch of land off the Gower Peninsula in Wales called the Worm's Head, which

* Inverted by Brador, the chief of the Mallorean Empire's Bureau of Internal Affairs. He is a Melcene, who, like the Tolnedrans, don't believe in anything supernatural. Along comes Book 3 of

* inverted by countries that use pay-as-you-go tax (taxes are withheld from your pay, at which point you claim back your deductions.) Just don't make too many furphies on your tax return...
* Inverted by Dalek Sec, who exhibits signs of Trans-Dalek Treachery after merging with a human.
* Inverted by Dumbledore in the first book; socks are usually a stock lame gift, but Dumbledore says everyone always gives him books and he'd like to get a pair of new socks sometime.
* Inverted by Gerald Ratner, the owner of the UK high street jewellery shop chain Ratners. At a speech for the Institute of Directors in 1991, he made disparaging remarks about the products sold in his stores, calling them "total crap" and saying a pair of earrings they sold was "cheaper than a prawn sandwich but probably wouldn't last as long". The value of the company dropped by £500m, and ended up having to rebrand completely within a couple of years. To this day executives damaging the reputation of their own companies are sometimes described as having a "Ratner moment" or "doing a Ratner".
* Inverted by Hidan, who is relatively immortal and is extremely whiny about the pain caused by deadly injuries. Interestingly enough, it's often not the
* Inverted by Jaya's "If You Leave Me Now", in which Stevie B, who later covered the song, provided backup vocals.
* Inverted by J. Golden Kimball, a prominent Mormon in the early 20th century. Once he was drinking coffee in a restaurant and someone recognized him, prompting the following exchange.
* Inverted by Jonathan Coulton himself, though, in his song 'flickr' which does the opposite- describing a series of images in the video clip.

* Inverted by Subcommander Kaol in the end-game: he is placed in charge of a joint alliance of the Federation, the Romulan Republic and the Klingon Empire on a critical mission to investigate the technologies of an ancient artefact (that also links to the Delta Quadrant) and neutralize a major and highly classified threat (Omega particles)
* Inverted by Sylvester Marcus, himself one of the newcomers: "Mama, this thing's like a convention!"
* Inverted by Takane D. Goodman who upon defeat is stripped due to her clothes being produced by magic. Takane tries to get revenge on Negi stripping her with magic by picking multiple fights with him, where every one ends with her once again naked. At one point, she uses her shadow magic to magically generate her clothes. Naturally, Negi KO'ed her, and the clothes disappeared as she loses consciousness. Then after that, she ends up fighting
* Inverted by Tarquin, who decides he wants to marry a woman from the Free City of Doom who is already married to a Pikeman on the city's south wall. When his soldiers invade, they take special care of her husband.
* Inverted by Ted who keeps many belongings from old ex-girlfriends, but Robin (whom he was dating throughout season 2) is uncomfortable with them and demands he gets rid of it all, which turns out to be almost everything he owns. On the other hand, Ted himself is uncomfortable when he finds out Robin got all her dogs from ex-boyfriends, and Robin decides to send them to a farm (literally). However, when they get back to Ted's apartment she sees that he has gotten back everything he threw out. This culminates in a huge argument that
* Inverted by the 2017-18 Philadelphia Eagles. After starting QB and likely NFL MVP Carson Wentz suffered a season-ending injury in Week 14, the team's chances of championship contention looked grim at best. Confidence decreased even further when the Eagles nearly lost to the New York Giants and the Oakland Raiders (two non-contending teams) and got shut out by the Dallas Cowboys (another non-contending team). This turn of events earned the '17 Eagles the infamous distinction of being the first #1 seed in NFL history not to be favored in their opening postseason game. The rest was history, as they not only won that game against the Atlanta Falcons, but also went on to defeat the Minnesota Vikings and the New England Patriots in route to their first-ever Super Bowl championship.
* Inverted by the Aztec goddess of fertility, Huixtocihuatl, who resides over salt and salt water.
* Inverted by The Church of the Subgenius' (PRABOB!) reference to The Bees That Power.
* Inverted by the chuuls, giant crustaceans with paralytic mouth-tentacles. They're actually allergic to brains and will instead peel the flesh and bone from around it and eat that. In an example of
* Inverted by the fresh-faced young Lieutenant Fick who is actually smart, well-liked and considered competent by those under his command.

* Inverted by the Israeli home design company Golf & co., which uses the slogan ‘Golf & co.: Try this at home’.
* Inverted by the Masai tribes of Africa. The Masai believe themselves to be related to lions, so men wear their hair long and wild to look like a lion's mane while the women wear their hair clipped short.

* Inverted by the Naked Eyes version: a Top 10 hit in the US, Canada, Australia and New Zealand, but barely noticed in Britain.
* Inverted by the "Northern Playwright" sketch, in which the prodigal son the Yorkshire coal miner comes back to his old homestead in London to visit his father the theater playwright — the whole scene is written like the aftermath of this sort of setup gone wrong, only with the actual jobs reversed.
* inverted by the Scythians, a nomadic civilization whose women were warriors. Greek accounts would have it that before they could get married, Scythian women had to defeat three men in combat. (However, not full inversion as they married others of their tribe rather than the defeated men, who were often dead.)
* Inverted by the song "Fields of Verdun" which compares the opening artillery barrage of the battle to a drum roll.
* Inverted by the Viet Cong; they launch the Tet offensive during the Vietnamese New Year to surprise the Americans, who had assumed the party would halt the warring.
* Inverted by Thorgrim Grudgebearer, who has the ability to grant his entire army Hatred (re-roll misses in the first turn of melee) when he dies.
* Inverted by Toke, who refuses to convert for love. His "wife" Mirah is Muslim and spent a long time as a prisoner or slave among Christians, and she hates Christians passionately. Toke outright says that as much as he would do for his good friends Orm and Father Willibald, converting is simply not in the cards.
* Inverted calculating how much someone may make, and the person (like the bathroom attendant) admitting it's not much, but it's a living.
* Inverted can appear (even overriding use of a Repel or Cleanse Tag).
* Inverted. Chuck meets a series of job interviewers, all of whom are hilariously unsuitable. It turns out that the CIA is sabotaging his interviewers so that Chuck will return to work with them.
* Inverted collection of vignetes covering Ariel's birthday, setting it apart for the comics usual action heavy tone.
* Inverted come up with U-No-Poo: "The constipation sensation that's gripping the nation."
* Inverted comic: a guy who is wanted by the police for being fatally boring seduces a girl and ties her to a bed. While she is excited over the prospect of kinky sex, he proceeds to bore her to death with his stamp collection and vacation photos.
* Inverted completely with the "Trickster-Yokai" such as Shippo and Hachiemon. Each of them seems to be genuinely good. Shippo is even the most innocent character among the protagonists. However, they seem to have a (harmless) tendency to scare people, annoying them or playing pranks.
* Inverted could "remember" things that were going to happen to her descendants. This explains why her prophecies, though unfailingly accurate, tend to focus on things that affect her family, even if they don't really matter in the grand scheme of things. (She predicted a house collapsing in a small English town, but not the Kennedy assassination the same day.)
* Inverted crumbling to dust in a matter of seconds... Until Red Mage says that Haste doesn't actually stack in intensity, only duration, and the dragon goes back to savaging the party.
* Inverted: cultists trying to awaken Pandemonium monstrosity → decent people wanting their saintly leader back.
* Inverted deciding to become cyborgs—rather, this was a sign of how screwed up they are. Their teammate Wolf is similar, though he chose to be genetically engineered into a wolf-man instead.
* Inverted. Despite easily seeming more restrained than Shizuo, Izaya is highly impulsive and even admits he often makes problems since he can't stop himself from messing with others. He caused Akane incident out of sheer pettiness for not being involved with Hollywood, leading to
* Inverted, Disney CEO Bob Iger responded with "It's not our movie, but it's our character." Disney would later buy out Paramount's distribution rights to the film and the other MCU films Par released.

* Inverted: Doctor Eggman and his robot army invade the Little Planet in order to take it over. Eggman succeeds, covering the planet in a metallic shell, requiring Sonic to travel to the past.
* Inverted. Dr. Girlfriend tried to seduce Brock a couple of times. Brock thinks Dr. Girlfriend is a

* Inverted: DV-L is initially uneasy around Kit, so Sagan has to firmly tell him that Kit is a friend. Later on, when they meet Kit as the Phantom, Sagan expects DV-L to attack... but, of course, DV-L remembers that he's a friend and lets him go.
* Inverted early on with Monette, although it didn't last forever. (She eventually realized she's bisexual.)
* Inverted; either way, the short marriage was unhappy, and she either celebrated or even helped bring about his death when the city fell.
* Inverted episode "Holly Gets the Blues." Holly accidentally falls face-first into a tub of blue fabric dye just hours before she's supposed to go to a party, and though she manages to wash the dye off her face in time, she can't get it out of her hair. But then she learns that the party is a costume party, so she goes after all, dressed as a blue-haired clown.
* Inverted episode "The Magic Egg", where Clumsy gets a deeper voice when he is turned into a giant.
* Inverted episode, was released in theaters before the subsequent series itself debuted on Cartoon Network. However, all of the problems of the original form shine through. There are very obvious breaks between what would have been the stories of the separate episodes.
* Inverted episode "Where's The Pearls?" when Fran gets amnesia and thinks she's Maxwell's wife.
* Inverted") even after joining the Klingon Defense Forces. No one bats an eye at that, only confirming that he doesn't represent any House.
* Inverted even has Leo wonder how this stereotype developed, as Annabeth has made him associate blonde hair with intelligence and danger.
* Inverted. Even Zeus has vague memories of knowing her before but he's not sure until Prometheus assures him of them. Officially, Athena is a girl that Zeus took in from Cronus' castle after Metis' death. The only one who knows the truth behind Athena's existence is Prometheus, being the one who took her out of Zeus' head.
* inverted - every person on the island is a profiler, and the murderer seems to know his victims quite well, enabling some particularly karmic deaths for the flawed criminologists. This makes sense, since the trainees figure out quite early on that the killer has to be one of their own.
* Inverted example: in one episode, Kitty provides Eric with a bag of condoms, which is embarrassing. However, later Kitty and Red are planning to have sex and realize that they're out, so Red sneaks into Eric's room to take one. Eric walks in, Red is angry/embarrassed, and Eric freaks out because he incorrectly believes that Red saw his marijuana stash.
* Inverted example: Some of the engine oil ads sing the virtues of synthetic oils over the "natural" oils, since "natural" oils have things in them that cause wear in engine parts. Both varieties of engine oil are synthetic in some sense — engine oil has to be refined from crude oil, while synthetic oil is made from other

sources of lubricants. Interestingly, synthetic engine oil has been made from banana oil in the past (such as in South Africa during the Apartheid years), allowing for a fake "natural" claim here, too. One practical reason for choosing synthetic engine oil is that it maintains its viscosity in extreme temperatures far better than conventional oil, so it lasts much longer between oil changes.
* Inverted example, where the revelation in question was a surprise to everyone
* Inverted far earlier in the series, when Asuna gives her jacket to Negi during the library arc.
* Inverted Fate, Undyne still uses spears regularly, including several new types, despite the fact as the Royal Scientist she has created various weaponry to use against Frisk.
* Inverted for all western military powers, period. It's not because of the value of the metal, but because of heraldic reasons where the virtues represented by silver (truth, loyalty, purity) are generally valued higher than those represented by gold (obedience, glory, faith). For example military bodyguard regiments (like the Royal Life Guards of the United Kingdom or Livgardet in Sweden) almost always use silver buttons on their uniforms while other lesser elite regiments use gold buttons.
* Inverted for Amy Adams, though, who gets to show off her singing and dancing talent.
* Inverted for a period of time as well. Once humanity organizes a counterstrike against the demons and absolutely slaughters them, some of the demons begin to believe that humans have figured out how to use impossibly powerful magic and cannot be defeated.
* Inverted for catch wrestler Dr. Benjamin Roller, who used wrestling to fund his international medical education.
* Inverted for elephants: Their brains react in the same way a human brain reacts when it sees a cute puppy. In other words, elephants find humans adorable.
* Inverted for laughs in another episode, when Bud is so tired and overworked that he ends up nodding off in the middle of a case. Mack, who's the presiding judge, has to wake him up to ask him if he wants to object to something the prosecutor said.
* Inverted for Martin Sensmeier - who was cast because of his long hair. Not knowing that was the reason, he cut it short right before filming began. They rolled with it by giving Red Harvest a mohawk.
* Inverted for Perwyn Frey, he is notably one of the very very very few decent members of House Frey, and was sent away before the
* Inverted for small champions, such as Pip and Willo, who have to ride standing up and hovering respectively just so they can see where they're going.
* Inverted for stories taking place on Earth, which typically are set in the city of Old Chicago, which is the rebuilt city of Chicago,
* Inverted for the 2012 congressional elections with disabled veteran Tammy Duckworth running against famously handsome incumbent Joe Walsh in the Illinois 8th.
* Inverted for the most part in Polynesian mythologies; whales and dolphins are little more than basically sea cattle to be eaten, while sharks, seabirds and even some fish are totemic symbols and depicted as sapient.
* Inverted for the Night Elves, who fight much better at night than in the day, being able to turn invisible and slowly regenerating.
* Inverted for two relationships, with Gentile men and Jewish women: Don Draper had an affair with the Jewish department-store owner Rachel Menken in Season 1, and a few years later ultra-WASP Roger Sterling divorced his wife to marry his Jewish secretary Jane Siegel. These fit since both Don and Roger are very much un-Jewish in appearance and very much conventionally attractive (with the caveat that Roger is a

* Inverted, however, in the series finale. During the course of the episode, the Dominion bomb Cardassia, killing millions of innocents, to make a point to the rebels on the planet. To any viewer who has regularly seen the series, especially the final story arc, and is familiar to said stock footage of the Cardassian capital, it is a shock when, just after the final battle has been won, we get a view of the capital again, but in complete burning ruins.
* Inverted (humorously) in the episode about Homer becoming president of a secret club called the Stonecutters and
* Inverted idea as it reduces your forward velocity away from your pursuer. Only when they get within gun range and can start taking accurate shots at you does zigzagging begin to make sense. Clever pursuers would sometimes open fire out of range to spook their prey into zigzagging too early. Perversely, in the missile era it's almost a better idea to stay and fight, all else being equal, as all but the shortest-range missiles are much faster at any height than a combat aircraft trying to run away in a straight line.
* Inverted: If (A) leads to (B) when used straight, then inverting a trope is when (B) leads to (A), or (A) leads to (!B).
* Inverted if Hawke is a mage, who struggles to contain and maintain stability in the city of Kirkwall as tensions continue to rise between the resident Templars led by

* Inverted in a Bill Mauldin cartoon; an officer calls for a sergeant's daughter. The sergeant announces, "And if you don't have her back by midnight, there'll be a baseball bat waiting ... Sir."
* Inverted in a Bud Light ad that played during the Super Bowl one year. Guy's wife is trying to seduce him away from the TV. She finally tells him she's got cold Bud Light, and he goes tearing up the stairs ripping his clothes off, dives across the bed for the beer,
* Inverted in a case where an off-duty FBI agent was shot by two home invaders. Suffering from blood loss he tried to call the police, only for them to assume he was a drunk from his slurred speech. The duty sergeant has just ordered the officer taking the call to hang up when the 911 operator who originally transferred the call broke in on the line and convinced them the call was genuine.
* Inverted in a commercial for peanut butter Snickers, in which some man-eating sharks gush about how very tasty a guy who'd just eaten the focus snack had been.
* Inverted in a Dettol (cleaning product) advertisement. It claims to kill "99.9% of all bacteria", including, among others, the flu virus. Viruses are not bacteria.
* Inverted in a different ad: "The Japs are getting smart - they're putting Wheaties in the boobytraps." Most commentators are more concerned with how the commander's assistant is apparently trained to spout Wheaties adlines on command than how the Japanese are baiting traps with cereal.
* Inverted in a Euro 2008 qualifier against neighbours Sweden and threw the result in their rival's favour.
* inverted in a guest comic: "Sometimes, I chop their whole bodies off leaving just the heads."
* Inverted in "A Horse with No Name" with the line "The Ocean is a desert with its life underground".
* Inverted in a later episode; Tilly finds Gramma's old ventriloquist dummy which she chooses to use as her open mic act; the others enjoy the dummy except for Cricket, who is severely freaked out by it, but doesn't want to tell Tilly because he worries it could hurt her feelings.

* Inverted in an episode which has Homer's mother sent to prison on a "technicality" (having committed a petty crime on top of those she'd been convicted and pardoned of), and Homer exclaims "People should only get sent
* Inverted in an especially cruel way. For a very long time (almost 3 years), the last comic to feature the original Goblins group of Complains and company ended on a massive cliffhanger... and ever since then, the story focused roughly equally on Dies-Horribly and company and Minmax's group. Said comic was posted in January 2011. As of September 2014, the plot
* Inverted in an issue where Groo gets fed up being a failure as a hero and decides to become a villain instead, which backfires when his attempts at being a

bad guy accidentally end up saving the day.
* Inverted in an old joke: A man went into a job interview and his eye winked through the whole process. The interviewer said, "Look, you are well qualified, but I'm afraid that facial tic will throw off clients." The man replied - "Funny you mention that, because all I have to do is take aspirin and the winking goes away - watch" and the man began dumping out his pockets looking for aspirin. In most of his pockets, however, were condoms. Finally, once a pile of condom packages of every sort piled up on the desk the man found two aspirin, took them, and the wink totally stopped. "Well, that worked," the interviewer admitted, "but why do you have all the condoms? We don't want our clients to think you're a womanizer!" "It's quite simple, sir," the guy said, "have you ever walked into a drug store, winking like crazy, and asked for aspirin?"
* Inverted in another case. As Bridget's drink of choice is often chardonnay, sales of it decreased rapidly. One representative had this to say:
* Inverted in another dark elf example, from the old Role Aids third-party D&D supplement line: In
* Inverted in another episode. A case is in jeopardy after a rape victim dies of a staph infection, so Cabot adds on some additional charges that allow her to present more evidence. The defendant is acquitted of the additional charges, but the evidence that was introduced based on those charges allows him to be convicted of the original charge of rape.
* Inverted in another episode. Hawkeye is telling a joke to two women as they leave the officer's club and comes to the punchline right when a jet passes by overhead and blanks out what he was saying.

* Inverted in at least one real-life case. In 2012 in Australia a thief stole a woman's car, only to find that her baby was still in the child seat in the back.
* Inverted in a VERY funny twist. George tells Gracie that if she can prove that his car really WAS crushed by an elephant sitting on it — and not by her driving — he'd buy her a mink coat. They gather all the witnesses who say that, yes, there was a circus parade and the elephant got loose... When George asks the final witness: "Who are you?" the man says "I'm from Beverly Hills Furs. I was watching the show and I knew you would lose." He holds up the mink, and the gleeful Gracie takes it.
* Inverted in "AWESOME-O" where Cartman's robot disguise (consisting of a couple of cardboard boxes) manages to fool nearly everybody until he gives the game away by farting.
* Inverted in "Band Geeks": Patrick's head gets stuck through a trombone, essentially giving him a long brass neck and causing him to make trombone sounds with every step he takes.
* Inverted in book three, when John Crayford and his company are rescued from certain death by a pack of golden bears.
* Inverted in "Chariots of the Dogs", where the titular lagomorph (Max) ends up being the object of obsession of the fairly attractive Momma Bosco. Max doesn't like girls (for the same reasons a 10-year-old boy is disgusted by girls) and finds her advances on him to be gross. In the same game, a young version of Max tries to avoid going to the prom because there's a girl who has a crush on him who is apparently known for french kissing every boy she likes.
* Inverted in "Chatterbox Gary." SpongeBob orders a translation collar so he can understand what his pet is saying, and orders the fastest possible delivery option, "time warp." He is told that his package was delivered "last Thursday."
* Inverted in Chihiro's arc. When Keima needs to capture Chihiro, he helps her capture her crush (after all, she just needs to fall in love, it doesn't have to be with Keima), but she eventually skips the confession to be with Keima instead.
* Inverted in "Confession", when the beat cops who found a detective shot to death tried to make his suicide look like murder, knowing that his widow would get more money for this.
* Inverted in Day 8 where a suicide bomber blows up because of the failsafe.
* Inverted indicates the princesses were looking for manlier replacements in their husbands.
* Inverted, indirectly, by Ronnie Biggs of the so-called "Great Train Robbery"; he had one job to do, locating a train driver to move the mail train they were robbing. He managed to find one - one who
* Inverted in "Doctor Jekyll And Mister Mouse," where it's Jerry chasing an ultra-miniaturized Tom around the house.
* Inverted in episodes "Best Laid Plans" and "Unforgiven" which act as the opposite for
* Inverted in "Eye of the Needle", the Doctor gives Kes a series of medical texts to study, but warns her that they are very technical and "not written for the layman."
* Inverted in "Father In Crime". Both of the cases discussed during that episode involve religious fathers and entire families being murdered. But in the first case, a man used his religious beliefs as an excuse for killing his family. In the second case, a man decides to forgive the killers of his wife and son, even after finding out his other son planned the murders.
* Inverted, infecting anybody nearby. Thanks to this, the manual entry on them explicitly warns against headshots, and instead recommend using a sniper going for

well-placed shots to the chest.
* inverted in flashback clips. At the end of the advert, he handed the car back to the dealer and rejected it as "not really my style".
* Inverted in G1 in that some of the Autobots are known for their deep voices, particularly
* Inverted in "Gaz, Taster of Pork" in which a car crashes offscreen and an elephant trumpeting is heard instead.
* Inverted in George Strait's "Ocean Front Property," where he claims a number of negative feelings for his lover, then adds
* inverted in "Guess Who's Coming to Criticize Dinner", where Homer gets hired as the critic to the local paper because he is not very scathing nor critical of the food (unlike the original, who was retiring, hence how Homer got hired so easily.)
* Inverted in "Happy Birthday to All of Us." The Beast seems very disappointed when Hamilton cuts him a tiny slice of cake...until Hamilton reveals that the tiny slice is his, and all the rest of the cake is for the Beast.
* Inverted in hayleyghoover's Annoyances 11-15: the pilgrim figurines are available for 60 easy payments of 29.99, but only in Oregon (and you get a free spatula!)
* Inverted in hockey player Martin "Mighty Mite" St. Louis. He's 5'8'' and a full 80 pounds lighter than Chára. However, he's earned his nickname by showing he's not afraid to throw his body around and stand his ground against much larger players when warranted.
* Inverted in "hremail3184" when Strong Bad hits Homestar with a rake, a shovel, and a garden weasel, it's Homestar who shouts "Rake", "Shovel" and "Weasel" upon being hit.
* Inverted in Impel Down. Luffy is injured, frozen, and has been horrifically poisoned. His ally, Bon Clay, was injured protecting Luffy. Luffy
* Inverted in "I'm Spelling As Fast As I Can". Lisa gets second place in the Spellympics and is hailed as a winner in Springfield—after all, second place makes her "the biggest winner this town's ever produced". Heck, because she lost honorably instead of taking a bribe to take a dive, they fashion a sign that says: "2 good 2 be #1."
* Inverted in Innistard, where the End of the World as we know it was the return of the angel Avacyn, thereby putting the world closer to the way it was before we ever saw it.
* Inverted in Israel, where about half of the Jews follow the Sephardic rites (with the majority of them technically being Mizrahim). Israeli Hebrew pronunciation (which is a Sephardi pronunciation with Ashkenazi influences
* Inverted in Italy: It's "islands included", referring to Sicily and Sardinia. Sometimes the minor islands (Elba, Pantelleria, etc), however, will be excluded, or, more frequently, just have to pay a higher fee.
* Inverted in Japan: most grape-flavoured things there actually taste like grapes... Japanese varieties of them, who taste noticeably different than, for example, most European ones. Japanese candy also often comes in "muscat" flavors which completely averts this and tastes like familiar green grapes.
* Inverted in "Just Us Justice Ducks" when Darkwing is beating himself up over failing to prevent the Fearsome Five from taking over the city.
* Inverted in "Kiss Kiss, Bang Bangalore", when Patty and Selma kidnap Richard Dean Anderson due to their obsession with
* Inverted in many cases when Huey, Dewey and Louie are captured: They keep their lungs full of air in a false act of bravado while they're being bound, and then breathe out to loosen the ropes.
* Inverted in more ways than one when the gang go to a museum about life in the Twentieth Century. They describe the "automacar" as being constructed in factories manned by "primitive robots". By which they mean robots dressed like cavemen who say "Ooga-booga" as they hit cars with clubs. Apparently we used manual labor in the
* Inverted in most religions which claim there is a higher meaning in existence and because of that the life we have now is meaningless, disdainful and that to abandon

all desire is the best anyone can hope for.
* Inverted in "Murder through the Looking Glass", one of the few episodes to feature a hired killer. The murderer who hired the assassin is arrested but the assassin never faces legal justice (due to dying of natural causes).
* Inverted in "Nemesis", where Chakotay crashlands on a planet fighting a
* Inverted in "No Trace of Tracy", where the prime suspect claims to have been handcuffed to a radiator in a room in his house at the time a girl was abducted. The solution:
* Inverted in one article. One of the writers went undercover on a dating site, posing as a woman with model looks who spends "her" entire profile making racist jokes, displaying bad manners, admitting to breaking the law, gladly admitting she lies about being pregnant to get what she wants,
* Inverted in one cartoon where a man goes to the supermarket and looks at a list on his smartphone which reads, "cream, bread, cake, meatloaf, black-eyed peas," and then says to himself, "this isn't my grocery list, this is my music playlist."
* Inverted in one case for the Targaryens. King Aegon V married his wife out of love (no one objected since he was really far down the line of succession at the time), but he
* Inverted in one case, when Pentecost had to yell, then lower his voice to break up a squabble between the two PPDC scientists Dr. Gottlieb, and Dr. Geiszler on their conflicting theories about the Kaiju.
* Inverted in one episode—both sisters make plans to go out with a boy, who accidentally asked both out thinking that they were the same person. The three-person date was naturally a bit awkward.
* Inverted in one episode the teenage defendant has bipolar disorder but his grandfather refuses to let him plead insanity since he doesn't want the fact that he also has bipolar disorder coming to light. This leads to the unusual situation where the prosecution is pushing for a psychiatric evaluation and possible verdict of insanity rather than the defense.
* Inverted in one episode when Dexter ages himself into an old man with an aging machine by accident, and his family mistakes him with his grandpa. In a later episode, we actually get to see his grandfather.
* Inverted in one episode where Stargate Command hosts a gluttonous Goa'uld who is hoping to work with them against a common enemy. The Goa'uld is given from his perspective, an alien lunch. He becomes enamoued with the "Earth delicacy" known as "Chicken".
* Inverted in one episode where the already reluctant driver Clegg is terrified at the prospect of driving an
* Inverted in one episode with Sophia. Despite both of them being in their eighties, she decides to jump into bed with a man quite quickly.
* Inverted in one Irish folktale. A knight tricks a girl into running away with him. He takes her to a shore, reveals that he drowned seven girls, and plans to make her the eighth. She begs him, for modesty's sake, to not look as she disrobes. When he's not looking, she either pushes him in or takes his sword and kills him.
* Inverted in one My Little Pony fanart. Vinyl Scratch came home with a bunch of food for a party: Berry Punch, Lemon Drops, Bon Bons, etc. Octavia asked what all this was for. It turns out it wasn't a grocery list, but the guest list.
* Inverted in one sketch where a pair of Jehovah's Witnesses knocking on
* Inverted in one Smokey Bear commercial where the bear is seen performing rap to get his usual message of "Only You Can Prevent Forest Fires" across. Partway through, he stops, annoyed by it all, drops the rap clothes, puts on his ranger hat and "gives it to them straight".
* Inverted in one story. When Betty is framed for academic plagiarism, Archie investigates the evidence against her and points out the flaws in it that prove her innocence. He then offers actual physical evidence that proves that she was framed by a jealous rival.
* Inverted in one Yosemite Sam cartoons where Sam bounces atop a horse that is way too large for him and has to resort to jumping off it and beating it over the head in order to get it to stop as he's so tiny in comparison to it that hauling on the

reins makes no difference at all.
* Inverted in order to expose the rival Black Court vampires' secrets and vulnerabilities.
* Inverted in order to protect him and, if Kougoukan continues to use his powers responsibly, recruit him as his partner.
* Inverted in "Parenthood," when Mayor Carter Poole's illegitimate daughter Ariel joins a protest and is caught up in the ensuring dragnet. Ariel doesn't demand special treatment, but her parents politely suggest, separately, that Frank had better let the matter drop.
* Inverted in "Penelope" by Zak Waters. Now that the singer is eighteen he wants to date his old babysitter.
* Inverted in Perrier ads where the sun can melt any material into a thick, sluggish goop
* Inverted in "Pickles", where a customer places an order entirely in
* Inverted in "Psirens", a shape-shifting, brain-sucking alien monster gets on the ship and looks just like Lister. The crew try various tasks that only Lister should know but the Psiren can read Lister's mind and so mimics every action perfectly. They finally trick it by giving one Lister a guitar and telling him to play. Lister is normally the
* Inverted in quantum theory, since observing a quantum phenomenon actually changes the output of the quantum effect.
* Inverted in regard to closing Oblivion Gates. Essentially, the player goes around entering small hellish dimensions of Oblivion stealing
* Inverted in "Sacre Bleu" by Christoper Moore. Love (and magic) is used to stimulate and enhance creative talent.
* Inverted in Sanji's case. Whenever he gets separated from the others, he worries only about the ladies of the crew, and always wants to assist them first. And cares little to not about the other guys.
* inverted in season 3. He puts his hands on Sam's arms as if to correct her stance...then sweeps her off her feet, lays her on the mat, and they kiss...which is cut short when her dad walks in, forcing them to pull apart rather hastily.
* Inverted in Season 3 when Callum disguises himself as an elf when he and Rayla cross into Xadia. His disguise consists of a pair of sticks tied in his hair, pinching some of his fingers together to hide he has five instead of four, and spouting human stereotypes about elves in an exaggerated Australian accent.
* Inverted in season nine, where Lois gives this speech to Clark, about why it was logical that
* Inverted in several stories, with each succeeding item being worth less than the one traded away:
* Inverted in "Shada" where a man tells a police officer that a room has been stolen and so

* Inverted in some DirecTV ads, in which the multi-zillionaire spokesman has a pet giraffe less than 1.8 m tall.
* Inverted in "Sonic Rainboom", in which Rainbow Dash tries to teach Fluttershy the "elements of a good cheer". She's hoping that she'll cheer her on at the Young Flyers Competition, but since Fluttershy is a
* Inverted in "Spontaneous Combustion", with Cartman's voice getting higher after losing a lot of weight.
* Inverted: instead of repeating the same thing differently, it uses the same word twice to mean two different things. (That is, "Neutral" with respect to law and chaos and "Neutral" with respect to good and evil.)
* Inverted - instead of the face, an unfortunate bartender is stripped of everything but.
* Inverted in talamancan mythology, the mythical world is the real world, here in the material world we can only perceived the inverted reflections/projections of

everything that exists.
* Inverted in "Tea At The Treedome", Spongebob says Sandy wears air around her head, which Patrick interprets as "putting on airs" (i.e., acting pretentious).
* Inverted intentionally by his foe Shuma-Gorath, who invades dimensions in whatever form will terrify the inhabitants most. On Earth, he appears as a single glaring eyeball surrounded by tentacles.
* Inverted in that as soon as he says it, his own men shoot him in the back with an arrow volley.
* Inverted in that blood color in troll society determines the caste, thus
* Inverted in that it is the orcs that are being pursued, and they've caught the scent of their pursuers (Aragorn, Legolas, and Gimli) and are speeding up so they won't be caught.
* Inverted in that the Brigadier has a mustache, while his evil-universe counterpart is clean-shaven. He sports an
* Inverted in that the Gartner name was the one that he got famous with.
* Inverted, in that the Royal Censorate of Magic is itself run by mages, and they don't ban all magic. They only make studying all but a few avenues of magical study illegal to practice, and they also hunt down magi who are not officially registered as part of their system.
* Inverted in that Weems was a closet racist, and 90% of his casualties were African Americans that he sent into harm's way just so he could get them out of his outfit.
* Inverted in the 1999 US Open. Payne Stewart was playing the final holes in a duel with Phil Mickleson. Stewart needed a 15 foot putt on the last hole to win it. As he was reading the putt, the religious Stewart could hear church bells in the distance. He made the putt to cling to victory.
* Inverted in the backstory. In prehistory, humanity had an interstellar empire that was desperately trying to stop the Flood. Out of desperation, they then began aggressively sterilizing Flood-infested Forerunner worlds without bothering to send out a warning beforehand. Not surprisingly, the Forerunners got pissed (especially since the humans were also taking their worlds for themselves) and declared war on humanity. The humans lost to the Forerunners and were forcibly devolved, only for the Forerunners themselves to encounter the full might of the Flood and realize that they maybe could have used humanity's help.
* Inverted in the backstory: when the Dilgar invaded the League of Non-Aligned Worlds, only the Drazi could hold the line away from their own homeworld, and even they would have ultimately been overrun had Earth Alliance not intervened.
* Inverted: In the beginning of the game, Shepard and 21 crew members on the Normandy are killed, though most escaped.
* Inverted in "The Bully", where the titular bully spends the entire episode threatening to kick Spongebob's butt (in those exact words), but ends up punching him in the face instead.
* Inverted in the Cape Feare episode when Sideshow Bob is questioned by the parole board about the tattoo on his chest.
* Inverted in the case of double amputee and former Olympic sprinter Oscar Pistorius, who was put on trial for killing his girlfriend. He admitted to having shot her, claiming he thought she was a burglar, but from the angle the shots went through a door, they were fired by someone standing at full height. This was used to suggest that Pistorius couldn't have have fired the shot without putting his prosthetic legs on, and if he took the time to do that he couldn't have been as scared and impulsive as he claimed.
* Inverted in the case of ImpSec chief Illyan, who kept his own rank at captain — though by the time he retired he was being paid at the rate of a vice-admiral.
* Inverted in the case of Lisa and Kurando, where the former stands over the latter by at least half a head.
* Inverted in the case of most neutral monsters that sleep at night, making it easier to approach them. However, some turn invisible and remain awake, turning a
* Inverted in the case of the nuclear strike; the President needs to both be alive

and input his code of his own free will (meaning no coercion or drugs or the like) in order to activate it, and if he fails to willingly reconfirm every hour, if his vital signs don't line up right or if he gets killed, the launch sequence will be nullified (specifically, launch authority will shift to the Vice President, ending the nuclear threat because he's not among the bad guys' hostages). It sadly doesn't stop Dead Cell from preparing a purified hydrogen bomb once Ocelot assassinates the President, though.
* Inverted in the case of twins Dave and highly prolific referee Earl Hebner. Dave Hebner was the assigned official for an explosive 1988 rematch of the legendary
* Inverted in the classic joke: "Coffee, chocolate, men... some things are better rich."
* Inverted in the climax of same film. Tony Stark is about to make a
* Inverted in the episode "Amish Guy". Quagmire reads what is implied to be a list of women he has slept with, thinking it is his food journal.
* Inverted in the episode "Barting Over" with Tony Hawk. Tony says a long string of skateboarding terms, which Homer assumes he's making up.
* Inverted in the episode "Buried" where Pete solves the mental challenge, Myka the soul challenge, HG the physical challenge.
* Inverted in the episode "Cootie Gras", where our kindergartener heroines are terrified of a boy said to have cooties. Mojo Jojo uses this fact to keep the girls at bay until they get over it. Once they do, however, they leave him
* Inverted in the episode "Duet"; a Cardassian identified as Gul Darheel, commander of Gallitep, one of the most horrific interment camps during the Cardassian occupation of Bajor, ranted at length about how he was a loyal Cardassian soldier and it was his patriotic duty and privilege to exterminate Bajorans. Toward the end of the episode Kira discovered that the prisoner was not Gul Darheel, but a file clerk at Gallitep, who was completely horrified by what his people did to the Bajorans and assumed the late Darheel's identity to force his people to own up to what Cardassia did to Bajor.
* Inverted in the episode "Dying for Pie". Squidward does whatever SpongeBob wants for the day because
* Inverted in the episode "Extradition II: The Actual Extradition Part". Despereaux breaks out of prison to commit a crime, but by the time Shawn manages to report him to the authorities he's slipped back into his cell. The entire escape apparently went unnoticed.
* Inverted in the episode "Facets," where to get to know Dax's previous hosts better, Jadzia must temporarily take them
* Inverted in the episode, "Friends and Enemies," when Col. Potter found that an old friend, who was assigned to garrison duty in fuel logistics far behind the lines, took it upon himself to attend to a matter at the front when he could have easily sent a subordinate. Once there, the officer, obsessed with his
* Inverted in the episode "Mirror, Mirror", in which our heroes manage to bite their tongues and play evil in the brutal Terran Empire, while their alternates were unable to suppress instincts gained from a lifetime of
* Inverted in the episode "Soultaker", thanks to the fact that the riffed movie's female lead was also its writer.
* Inverted in the episode "The Algae's Always Greener": With Plankton in charge of the Krusty Krab, it's now
* Inverted in the episode "The Desert" when Sandbenders steal Appa. Aang blames Toph for saving him, Katara and Sokka instead of Appa.
* Inverted in the episode "The Last Roundup". Pinkie jumps off a moving stagecoach and yells "Rarity, catch me!"(They both fall out of the stagecoach Rarity is in.)
* Inverted in the episode "Who Watches the Watchers." A primitive alien tribe has come to believe that Picard is God (despite his protests), and to prove it one of them shoots him with a bow to prove that
* Inverted in the fact the two tallest of the six kaiju are female, Mothra and Destroyah. The latter of towers over the largest of the male transformed kaiju and while leaner, Mothra's Changeling Queen form is taller than the male kaiju.
* Inverted in the famous 1980 "Miracle On Ice," when the Soviet coach horribly

overreacts to a sloppy goal and benches his goalie, Vladislav Tretiak (one of the best goaltenders in hockey history) for the backup. The US takes the lead and ultimately wins.
* Inverted in the fancier sort of Boston bar, where there are TV screens in the men's room so that
* Inverted in the finale, when the war is officially over and everyone is being discharged. Klinger elects to stay in Korea to help his new wife find her missing family.
* Inverted in the final season, it's more a case of "All Our Base Are Belong to You" —
* Inverted in The Firm's novelty song "Star Trekkin", in which the crew asserts that they're only "boldly going forward" because they
* Inverted in the first and third films of the Eastrail 177 trilogy,
* Inverted in the first Backfire raid on the NATO carrier battle group. Soviet target training missiles launched by TU-16 Badgers decoy US Navy aircraft away from their carrier group, instead of aircraft leading away missiles.
* Inverted in the first episode, when Ned takes 10-year-old Bran to witness an execution. Jon pointedly tells Bran not to look away.
* Inverted in the first game when the Chenjesu contacted Earth for help in an impending interstellar war because of our industrial capacity as well as our ability to be another bunch of warm bodies; they were pleasantly surprised to find out we also had a gigantic stockpile of unused nuclear weapons in our "peace vaults", hence the name of the subtrope.
* Inverted in the first-season episode "Super" when Reese, injured and in a wheelchair, acts as Mission Control and Finch is in the field.
* Inverted in the fourth movie, where Dom and Brian try to find the identity of the one running the drug cartel by tracking their handler, but it turns out that the handler was the leader all along.
* Inverted in the genuinely touching episode "Bart Gets an F", where Bart jumps up and down and celebrates after getting a D- on a history test at the end. He had actually failed the exam, but his reaction to his failing grade showed he had actually TRIED to study this time and even retained some of the content so the teacher bumped him up a point or two for the effort as a reward.
* Inverted in "The God Complex". One of the alien characters mentions that their planetary anthem is entitled "Glory to (Insert Name Here)" - Music to
* Inverted in "The Harvest Of Kairos". A Federation transporter with a cargo of valuable
* Inverted in "The Hunter's Heart" when he tries to prove Agravaine is a traitor by saying he stole the plans to the siege tunnels. When Arthur checks, Agravaine has already duplicated them and put the original back.
* Inverted in "The IBM Computer", a comedy song to the tune of "Mary Ellen Carter". After hours of frustrated and increasingly-strained attempts to get an office's out-of-order computers working, one small voice finally suggests: "let's plug the damn thing in!"
* Inverted in the Ice Truck killer case. Lt. LaGuerta is interrogating Neil Perry (who has confessed to being the Ice Truck Killer), he tries to psych her out by discussing the reason she received her promotion (specifically the fact that she wasn't the hero cop the press portrayed her as).
* Inverted in "The Inconveniencing", where Grunkle Stan ends up becoming very invested in the highbrow, extremely dry costume drama
* Inverted in the infamous River City Relay: with no time on the clock, the New Orleans Saints, trailing by 7, scored an insane touchdown on a series of laterals, only for kicker John Carney to miss the extra point that would have tied the game and forced overtime.
* Inverted in the intro when bearded Jor-El faces off with clean-shaven Zod.
* Inverted in the Japanese version, however, where his voice starts out monstrous and gets slightly softer and more human-like with each transformation. As with Frieza, this means the voice changes match up with the physical changes. Considering

* Inverted in the Map episodes, where the Cutie Map sends the ponies best suited to fix the friendship problem wherever it is. Played with in that the way the plot is tailored is not always clear, as the map doesn't always send someone because their strengths are useful, but because their flaws are important (e.g.
* Inverted in the myth of Pygmalion and Galatea. Pygmalion carves a statue based on Aphrodite and falls in love with it; Aphrodite sympathizes with him and brings the statue to life so he can marry her.

* Inverted in the New France colony where people were given a reward to have many children.
* Inverted in "The One That Got Away", where Oprah's response to seeing the mark of Equal Evan for the first time in 30 years is a worried, breathy "It can't be."
* Inverted in the opening of "Betty Boop's Museum", where the cartoon proper begins with the camera exciting out of Koko the Clown's mouth as he calls for people to board the bus for the museum.
* Inverted in the original series episode "The Savage Curtain," where a battle between good and evil has "good" represented by Vulcan sage Surak, Captain Kirk, Mr. Spock, and
* Inverted in the peculiar slew of movies that came out in 1989 and that are basically
* Inverted in the previous mission, and now you have to fight off the forces sent to take it back.
* Inverted. In the race-flipped society, Thaddeus' wife shows obvious discomfort when her son brings home a white date.
* inverted in the same book, when Sybil accidentally discovers the location of a secret room in the embassy while measuring the floors for carpets:
* Inverted in the same episode when Percy mistakes a bearded Baldrick in a bridesmaid's dress for a fair maiden.
* Inverted in the Sardar Mountains, the lair of the Priest-Kings (the gods of Gor), it is the slaves who wear purple.
* Inverted: in the Season 4 episode "Wishful Thinking", when someone asks why people can't get what they want, Sam and Dean say it would create chaos.
* Inverted in the sense that an innocent party is exonerated by dishonest means. Rose and Dolly use a fake telegram from Discovery, California to "prove" Ballard's innocence and McCarty's guilt. A genuine telegram which indeed confirms this is later received.
* Inverted in the sequel as the Turtles' new home is a bright and cheery forgotten old subway station with elegant art deco styling and stained glass accessories.
* Inverted in the sequel, wherein Dr. Evil, back in The 60's, again demands $100bn, only to be met with derisive laughter, since such a vast sum simply didn't exist in that era.
* Inverted in the sequel, where the USSR begins to adopt quasi-capitalist reforms (albeit by maintaining authoritarian governance) under the rule of Nikolai Ryzhkov, becoming a more prosperous place and having better relations with the rest of the world. Meanwhile America under
* Inverted in "The Series Has Landed"- Fry is eager to visit the moon for the first time, only to end up visiting a large theme park with cheesy attractions. He hijacks a lunar rover to break out and see the "real" moon, which ends up almost killing him.
* Inverted in "The Slice Girls". An academic expects some 'financial remuneration' when consulted on the '
* Inverted in the story "The Man in the Passage". Three witnesses testify to seeing a man in the passage after a murder. Only the last, Father Brown, managed to see that it was his own reflection.
* Inverted in this joke: a village is home to three witches. One witch puts up a sign in front of her house reading "Here lives the most powerful witch in the world!" A second witch sees the sign and puts up her own, reading "Here lives the most powerful witch in the
* Inverted. In this method, the selves MUST meet in order for time travel to

happen.
* Inverted. In this setting, red eyes mark you as a Tereskan, an order of healer-mages who are one of the primary forces of good in the setting.
* Inverted in this tasteless joke: "What's the difference between a normal bachelor party and a bachelor party for a bulimic? At a bulimic's bachelor party,
* Inverted into his trash before he can flip, the heroes succeed in preventing his summoning to Earth, and Gloomweaver automatically loses.
* Inverted in "Tutoring Torvald" when Arnold has to help the titular tough guy student (who got held back three years) with a math test. It turns out he's better at understanding it when it involves his usual bullying antics, and they use them as scenarios to help him solve math problems. In the end, Torvald gets a C+, but he's thrilled to have it and thanks Arnold for all his help.
* Inverted in US military officer ranks. Silver is always higher rank than gold. For example, a major wears gold oak leaves, while a lieutenant colonel has silver oak leaves, supposedly because the "gold" is usually brass, and the ranks are sorted based on the value of the metal used rather than color. This is done in Venturing (part of the Boy Scouts of America) recognition. Silver is higher than Gold and only second to Ranger.
* Inverted invade/decide to hang out on Earth, eat all our food and refuse to leave. When there's an accident involving a Duck-person official, a fire hazard, and smell-o-vision, the entire world realizes that they're delicious. The few ducks that survive the ensuing massacre beat a hasty retreat and change their galactic phone number to 'unlisted'.
* Inverted (Inverted? Played with? Lampshaded? Definitely parodied.) in
* Inverted in "War is the H-Word," when Zapp finds himself attracted to "Lee Lemon." He is quite relieved when he finds out
* Inverted in "When Aliens Attack", with the Professor explaining, using perfectly sound science, how aliens could know about a show that hadn't aired in a thousand years:
* Inverted in which it is heroic Merlin who uses poison to try and kill Morgana, thus breaking a near-fatal spell over Camelot that she was inadvertently causing.
* Inverted, in which Steven's associated colour is pink, while his friend Connie's associated colour is blue.
* Inverted in "Wonderbolt Academy", when Spitfire takes off and folds her sunglasses to glare at Rainbow when she smells dissent.
* Inverted is defeated and his space station explodes, the boss comes back one last time for Sparkster while he's trapped in an escape pod with no means to defend himself. Once they both reach the planet's atmosphere, Sparkster survives re-entry just fine in his pod while the boss catches fire and burns into cinders.
* Inverted is prohibitively high to the point of impracticality but not completely impossible.
* Inverted is the friend (and she's currently dating Vinyl Scratch), but she never realizes this.
* Inverted it's in the middle of the summer. Justified since the people of Gravity Falls like Halloween so much that they celebrate it twice a year.
* Inverted, it's Western missionary Rev. Baines whose speech sounds broken in his attempts to speak Chinese.
* Inverted. It was an accident, but Pastor Dan is worried that it might be seen as manslaughter, if not coldblooded murder, so he tries to make it look like a suicide.
* Inverted. JD diagnoses a patient with Kuru, which is confined to Papua New Guinea and transmitted by cannibalism. He's mocked mercilessly by his attending and the patient himself, and the disease turns out to be mundane. Dr. Cox actually fully describes this trope in his rant, saying that the patient is probably just experiencing ordinary disease with unordinary symptoms. He's right. Even so, most patients on the show have something fairly obscure, if not actually rare.
* Inverted: Jiraiya once made a trap that consisted of a restaurant that was really a toad. A
* Inverted job for them if they insist on joining. The military wastes a lot of

money trying to train and support the low-quality recruits.
* Inverted Justified in that manual transmission is ubiquitous in the country, and automatic shift is not covered in driving school at all.
* Inverted. Kryptonians are nearly identical to humans under a red sun (such as that orbited by Krypton), but under a yellow sun (such as ours), they develop powers and abilities far beyond those of mortal men.
* Inverted later in the film. Bond orders "a martini", the waiter asks "
* Inverted later in the series, when Harry starts learning how to play
* Inverted later on in Season 1; when Patricia gets kidnapped, her friends become concerned because she hadn't called
* Inverted later on in the movie where he manually pulls out of lightspeed much later than is safe to get past Starkiller Base's shields, effectively pulling a Blind Landing.
* inverted". Later on, when Jon Stewart interviews Pattinson, he shows a clip of the crowds hanging around the studio to catch a glimpse of him.
* Inverted later when Shinpachi thinks Kagura's new alien giant dog is playing with her, Gin informs him that the dog's attacking her but she's just too powerful to notice.
* Inverted later, when Sir Hammerlock promises to pay you "a pretty penny" if you do a favor for him. He immediately clarifies that he's not talking about just giving you a literal penny, seemingly under the assumption that you're unfamiliar with the expression.
* inverted Leia's assertion that "Somehow, I've always known" just makes this worse.
* Inverted. Lo Wang is Japanese and obsessed with American music, comic books, films and TV.
* Inverted majorly: eyelashes aren't exclusive for female characters. Darwin the fish has feminine eyelashes and a rather girlish voice, although his VA is a boy. Contrast with other female characters like Tina (a relatively realistic T-rex), Masami (a cloud) [[note: This was lampshaded once by Gumball not being sure if she's really a girl]] Molly (a brontosaur), and Carmen (a cactus), who have very gender-neutral appearances. Several other male characters also have eyelashes (Richard the rabbit, Alan the balloon, the donut cop) while only about half the female ones do.
* Inverted: Mark Lily agrees to raise Callie's sister Lilith (who ages one year per day) so she will marry Dwayne Boneraper when she comes of age. He treats her like his own daughter, but before her wedding ceremony she reveals she plans to kill both Callie and Dwayne before marrying Mark.
* Inverted"; Max Grodénchik (Rom) was a semi-pro baseball player in high school, nearly going full-professional before getting into acting. He was actually incapable of playing as badly as Rom was supposed to be (Rom was supposed to be by far the worst player on the team), which is why he plays left-handed in the episode.
* Inverted—Darlene proposes to her boyfriend, David, and only tells him she's pregnant after he says yes.
* Inverted—he's freaking out internally, but to the villains he looks like that name doesn't mean anything to him.
* Inverted — if only just — in real life basements containing an "
* Inverted — when the Imperial Interdictor and her escort cruisers are destroyed, Admiral Brom Titus is the only confirmed survivor.
* inverted. Melee combat is the cheapest to use (requiring no equipment at first), while magic is extremely expensive. Once you've leveled up magic, however, it starts hitting harder and more consistently than melee. Past about level 50, however, melee takes over again as doing the most damage thanks to better weapons. The best magic spells (which allow freezing and leeching hitpoints) allow really good mages to still have the upper hand over warriors, but it takes a lot of skill. Of course, this is in PvP combat. When fighting NPCs, melee is the best 90% of the time due to the lower cost (cost is much less of a consideration in PvP as opposed to PvM) and faster speed, though magic does have its niches. Ranged combat falls

somewhere in the middle, able to dish out a large amount of power without costing quite as much as magic. Its progression is much more linear, however.
* Inverted more often in the anime, where it seems Kurumu's favorite means of greeting Tsukune is to glomp him and bury his face in her cleavage.
* Inverted. Motie mediators assigned to human emissaries go mad, or Crazy Eddie as they like to call it, trying to comprehend how they act. The closest they get is a sub-class of mediators who act as heavily Capitalist economists.
* Inverted. Mr Hoggett would like nothing more than a fair game, but his team happens to be full of compulsive cheaters. He apologizes for his team's actions, and when the game is done he decks Andy Shank, the worst of the bunch.
* Inverted much of the time in the case of male wrestlers, with the likes of
* Inverted "Nah. They're just barely getting by." This, with its metaphorical interpretation of "alive", turns out to be the truth.
* Inverted naked to increase their feelings of vulnerability and terror.
* Inverted never shows any attention to women other than his love interest Elizabeth, whom he gropes constantly. Later bonus material actually reveals he never actually behaved in a perverted manner before meeting Elizabeth.
* Inverted' noses the whole time, though it never seems like he's aware of the fact.
* Inverted of boarding school because his grades are poor (which was presumably also the reason he was sent to Kadic Academy in the first place).
* Inverted off her farm when she catches her talking to her older brother, Big Mac.
* Inverted of the assassination side of the plot, and in each story he foils an assassination attempt made by a different student, teacher, or character from outside the classroom.
* inverted of Traken, played by Anthony Ainley, who would portray him for the remainder of the original series' run. Ainley himself died in 2004, but the character has, to date, been played by four different actors since the series was revived.
* inverted omake, which is from the point of view of Guile, one of Ranma's pet giant spiders. Turns out, spiders see humans as gods, due to their civilization-creating abilities. Monsters are considered false gods, base creatures who can only destroy and ape humanity's form because they're jealous. Spider-monsters are "demigods". Even witches (who are a halfway point between humans and monsters, being biologically human but with magical abilities) are considered lesser creatures than humans.
* Inverted on a FOX reality/talent show where the contestants were "dared" to do something like recite a scene of a Shakespeare play with no errors or learn to play or sing a song in key by a certain timeframe. Naturally, they never
* inverted on it. And now, both are casting their hungry, jealous gaze towards other, more peaceful and harmonious worlds...
* Inverted only to be played straight in "Mr. Monk Goes to the Asylum", where
* Inverted on the episode "Marge Be Not Proud" with the Try-N-Save security chief Don Brodka (Lawrence Tierney) holding a conversation with what he — but not the audience — knew all along was a recording. Tierney didn't get it at all.
* Inverted onto the show, but she was politely asked to leave after making a man bleed.
* Inverted or averted with felids with normal facial structures, however. Feline cats look like they are smiling in their default expression and Pantherine cats have either smiley or neutral default expressions.
* Inverted originally became mortal and found out what it's like to have to worry about biology.
* Inverted; Originally, the first three games were rated T, but their HD remakes for the PS3 are all marked with an E10+, putting them in line with the rest of the series. The games were released before the E10+ rating was introduced, and the first one is actually the tamest one in the series.
* Inverted (or something), and they don't let anyone past them. Also, as one heads closer to the galactic core even at sub-lightspeed high technology begins to break down, computers can no longer function, and once inside the "Unthinking Depths"

you'd no longer be capable of sentient thought.
* inverted outnumber humans and are absolutely necessary for human survival (the planet is in the middle of being terraformed), it's basically the Apocalypse in a disk.
* Inverted, Panthro sourly rants about how difficult it was to climb out.
* Inverted/parodied with Adrastos the Non-Wizard, who was raised learning the art of magic, but prefers doing sleight-of-hand illusions, which he specifically refers to as "non-magic", because they require actual skill compared to just casting a spell.
* Inverted Pearl is a skilled driver when it comes to actual vehicles (even though she doesn't have the necessary paperwork to get a driver's license), and she tries to apply those skills to a video game. Unfortunately, the game is based around earning points by crashing into things.
* Inverted: people mysteriously losing hope → innocent newborn youkai trying to regain control of her emotions.
* Inverted: Pike is placed in a car with his hands cuffed behind his back, and then explains (and demonstrates) why that can be a bad idea: With his hands where they can't be seen, he is able to pick his cuffs without his guards noticing.
* Inverted (presumably) in certain signs warning of sharp curves that may cause a truck to overturn. For some reason, the arrow on these signs always appears to indicate that trucks may spontaneously right themselves.
* Inverted puts it, "Humans drink to forget, dwarves drink to remember". A dwarf under the influence of alcohol vividly remembers past deeds, to the point of nearly reliving them. In the company of other dwarves, they can reminisce about the time they fought a dragon, or any similar deed. Alone, however, they may linger on negative memories, and a dwarf who drinks alone is best avoided.
* Inverted. Randall Munroe gets a bit annoyed at Black Hat Guy asking, "What if we dropped it from higher up?"
* Inverted remains at large as only The Killer, The Murderer and the audience are aware that there was anyone else involved.
* Inverted reveals that the main Rick the audience has been following is from a different dimension than the Morty that the show is following.
* Inverted. Rimmer mistakes a light-switch for an artistic masterpiece.
* Inverted: Ryo doesn't have the patience for it (he admitted it the one time he tried to raise a girl to fall in love for him), but there are a few little girls waiting for their eighteenth birthday before trying and jumping him...
* Inverted. Sam meets his college roommate, who happens to run a conspiracy theorist website about the giant space robots the government is covering up. Sam, who has one of said robots in his garage, hilariously tries to convince the four guys who have spent months blogging about it that it was Photoshopped.
* Inverted saves the protagonist's life by scaring off his would-be attacker.
* Inverted series. They're reptilian-looking creatures with arms and a torso, but no legs. Played straight with the Vykkers, who have seven limbs: four legs and three arms.
* Inverted series when humans are considered inferior to whales and dolphins because we are unable to do things without using tools.
* Inverted, she quits drinking alcohol and instead switches to copious amounts of canned coffee.
* Inverted, she starts dropping in regularly for breakfast, and even gets him to start preparing lunch. This is one of the reason she warms up considerably to someone she though of as useless a few days prior.
* Inverted showed us that Flash Thompson's dad was a brilliant academic, who was totally unimpressed by his son's prowess on the football field. Flash bullied Peter because he saw him as the sort of son his father wanted.
* Inverted's imagination is to say something so ridiculously out-of-character that the protagonist realizes his imagination could never have come up with it.
* Inverted sinful, but David, rather than dying, gets trapped and frozen underwater — and winds up outlasting the human world, eventually awakening to find it long gone.

* Inverted somewhat by Enid, who has a slender upper body and massive thick legs; occasionally her legs are both drawn thicker than her waist.
* Inverted. So using the body of someone German automatically gives one a German accent.
* Inverted. Spidey's doing the punctuated, while the Lizard does the pounding.
* inverted, stating how "much better" the show is, before adding at the end that the movie was still "pretty fucking good, though."
* Inverted still refer to him as "Dwayne" consistently in a mocking fashion.
* Inverted than his love interest, which prompts a brief identity crisis.
* Inverted that invents and builds all technology and views the stuff as magical in nature. Meanwhile, the alien Tau went from stone tools and fire to an interstellar empire in just 6,000 years, surpassing the Imperium's technology in a number of respects.
* Inverted (that is, a teacher's parent marrying one of his students) in
* Inverted). The apparition then transforms into an avatar of evil and attacks.
* Inverted. The appearance of defibrillators is a sure sign that the patient is a goner.
* Inverted: the band 3OH!3, who replace the number "0" with an interjection.
* Inverted: the character Drizz'l is mocked for his goofy-sounding name, but they shut up when they find out his name means "endless scourge".
* Inverted. The chorus is itself a parody to this concept since these are the producers only requirements for a song. (Girls like boys and boys like girls/ And that's the way it should be/ Forever) The song inverts both: It's neither a love song to a specific person nor is it heterosexual themed, but instead addressing the pressure of gay (male) artists to remain closeted to be successful.
* Inverted. The company founder, Roger Anderson, has described the bots made by the company as being employed with what he calls "artificial stupidity." They are designed to seem vague, forgetful, scatterbrained, all in an attempt to waste as much caller time as possible. He has also quipped that "Never has so much money been spent to sound so stupid."
* Inverted the enemy and already knew her secret identity, making the whole thing rather sad.
* Inverted. The fact the gun was in the wrong hand is, as noted, what gets Edgeworth to realize a third party was involved in the killings.
* Inverted. The first four episodes were animated in CG. Starting with the fifth episode and through to the end of the series, it switched to traditional animation.
* Inverted the force, as an investigator for California Fire and Life.
* Inverted. The Gems give Steven a test of skill rigged so that it's actually impossible to fail (the idea was to boost Steven's confidence in himself). Steven is upset when he figures this out, because he feels like the Gems don't trust him enough to actually challenge him.
* inverted. The glasses "pull" has become such a signature for the character that when A&E began running reruns of the series, their promos had the announcer giving the name of the series and announcing its times...while all they showed on screen was the sunglasses sitting on a table.
* Inverted, the gods have trouble harming him until the solar god grabs the Sun and hurls it in his father's face. That works.
* Inverted the idea — she joins the debate team, but nobody treats her seriously because of this trope. Lisa is really upset while Bart doesn't care because he thinks this stereotype is exclusive to the women, claiming that blond men are more likely to be stereotyped as evil.
* inverted. The magician or mentalist will memorize facts about a person ahead of time, and later reveal these facts in what will appear to be a spontaneous outpouring. This trick is beloved of corporate magicians, who will be introduced to a large number of people at an event at one time.
* Inverted the minimum rather than customizing further to be a minor act of rebellion.
* (Inverted: the monster is female, crouching over a frightened human male. The caption strongly implies that she's going to rape him.)

* Inverted; the only way for the wildlings to enter the Seven Kingdoms is to scale a giant wall made of (implied to be magical) ice.
* Inverted. The others point out that Dylan isn't dead, but Paul implies otherwise.
* Inverted, the overall effect, visually, is of unimaginably tall skyscrapers that are floating off the ground.
* Inverted. The plot takes place during Billy's childhood, but ends with a brief flash forward of him as a professional ballet dance.
* Inverted the races are nonhumans. Earth exists, but we're still using Soyuz capsules.
* Inverted: there is a forum that tends to treat men the same way women are often treated on the real-world internet.
* Inverted. There was a slew of Soviet children's books and animation films about how fun and exciting it was to serve in the army.
* Inverted. The straight characters have a fair amount of relationship drama, and the sole gay couple (Wray and Sharon) have the most stable relationship on the show.
* Inverted: The trope (or its elements) are reversed and then used. Some tropes have more than one possible inversion.
* Inverted. The villains are more covered and wear white, while the heroes are
* Inverted this in "A Pharaoh to Remember", which introduces a planet bearing a remarkable resemblance to pharaonic Egypt, then explains that they copied everything—including culture and space travel—from the Ancient Egyptians. As well as how to mummify their dead "so as to scare off
* Inverted this trope, but Maximus with the help of other gladiators who were former soldiers and therefore had Legion training is able to turn things around.
* inverted this trope, by taking levels in Smartass. Complete with a 50-point IQ hike.
* Inverted. Thus, zero is the newest number as it was the only one that had to be invented.
* Inverted, to a Petalar, that single day is an incredibly rich, full and meaningful lifetime.
* Inverted to be hiding... on Alderaan. (Or better yet, accidentally shot by a passing clonetrooper. In slow-mo.)
* Inverted to cheat on him at a costume party and arranged to meet another guy in a darkened bedroom. She got the wrong bedroom and instead unknowingly had sex with Dante, who was there passed out.
* Inverted. To confuse the police, victims and any potential witnesses, the members of a bank heist crew call each other differing variants of "Steve": Stevie, Steve-Oh, etc. The amazing thing is how smoothly they work despite this.
* Inverted to hilarious effect in one of the OAV episodes for the series. Inori believes Eisen to have stolen his good luck charm toy made by his late mother. His attempts to assure Eisen that he is okay with this initially take the form of a general statement so as to not address the quirky issue directly: well, people from powerful rich families may sometimes feel... lonely... so it's all right, Inori doesn't mind. Naturally, Eisen
* Inverted: to keep the Thanksgiving turkey moist, the protagonist's sister cooks it overnight at only 140°F (60°C). Unlike the opposite, this can actually work (similar, if less extreme, methods have been endorsed by professional chefs, particularly those associated with the "molecular gastronomy" movement and others who emphasize a scientific approach to cooking), though it can interfere with some turkey-related traditions (like gravy for the side dishes).
* Inverted to marry each other as they are genuinely just close friends and are sick of being teased about being "married" at school.
* Inverted too. Commander, who has fought in wars and weilded guns before, is pretty bad at call of duty, being beaten by Jared and his internet girlfriend.
* Inverted to recut it to look like the Reno cops intentionally beat up and pushed the poor man into traffic.
* inverted to seek redemption, and went on a crusade in God's name to commit even more terrible deeds. "That which redeems consumes."

* Inverted to steal his only working prototype, as fusion energy would spell the end for the oil companies that sponsor the Elephant's career. After the heist is over, the Elephant says that the engine will be safeguarded and mass-produced by the oil companies "when it becomes profitable to do so."
* Inverted Trope and the teenaged boy claiming his name is just an unwitting imposter manipulated by Illyrio and Varys("The Mummer's Dragon").
* Inverted Trope are considered members of "mankind", and are "humans".
* Inverted Trope at times during War On Terror operations in Afghanistan. Special Operations Forces troops sometimes have as their assigned mission to blend in with, gain the confidence of, train, and fight beside native irregulars. To that end they wear native dress, let their hair grow (to an extent) and grow beards (to the Afghan tribesmen a beard denotes manhood). Occasionally a Pentagon commando general officer will take it upon himself to try and make them "...present a more military appearance..." by ordering said troops to shave, get haircuts, and wear "proper uniforms". Such an order is invariably ignored by the field troops if their chain of command passes it on and doesn't just bury the order somewhere in the piles of paperwork any modern army generates.
* Inverted Trope by Karen Lord: Conventional wisdom has it that only a woman can be a corporate nexus (the power brokers of Punartam's highly complex social economy), so one character who was born a boy but had a clear talent for it was raised female. From what she says, it's possible she's had surgery, but she doesn't appear to identify as female, exactly, so much as identify so strongly as a nexus that she'll be whatever gender makes that happen.
* Inverted Trope by the mishap that necessitated her robotic arm, leg and eye. Not surprising, given that the writer is an avowed transhumanist.
* Inverted Trope. Captain Archer suffers from a condition where he loses his long-term memories, and T'Pol is forced to nurse him and constantly remind him each day of his condition. Both Archer and the viewer are left unclear as to just how intimate this relationship has become over the years.
* Inverted Trope meant it was clear to the fans that Warrick was unlikely to survive his gunshot wound by the end of the season.
* Inverted Trope takes place 20 years after the first movie, meaning the stories it adapts actually take place in the same decade featured in the books.
* Inverted Trope: when word gets out that Fenton's mother is a vampire bat, people start making excuses not to come to Fenton and Lindesfarne's wedding. Kevin comments "We're gonna need a smaller church."
* Inverted Trope, where William finds it hard to believe there's a market for a magazine about cats.
* Inverted Trope with Sakura when she sincerely made her first love confession to Sasuke in a desperate attempt to prevent him from leaving the village. By the epilogue, they are married and have a daughter, Sarada Uchiha.
* Inverted Trope, with the prison outfits not covering up much more, while the antagonists cover about as much as regular clothing.
* Inverted Trope would stink to a human, but her fly brain thinks he smells pretty good.
* Inverted. "Trueborn" children, who are born via the natural breeding process, are a luxury afforded only to the upper class.
* Inverted. Unlike Pizzazz (who hates her name Phyllis) and Stormer (who reluctantly agrees to go by a stage name because "Mary" is deemed too soft sounding), Roxy
* Inverted uses a magical sex toy to change the world and put an end to rapes.
* Inverted usually—the planets don't seem to have names, instead being referred to as "the Andalite homeworld," "the Hork-Bajir homeworld," and so on. Interestingly, they still call the human homeworld "Earth." The only time this trope seems to be played straight is with the Leerans from the planet Leera. Apparently, if the planet's dominant species decided to give their planet a name, that's their planet's name; if they didn't, it's "the (dominant species) homeworld."
* Inverted vampires; they don't follow any vampiric folklore and only really

resemble the concept in the vaguest sense (monsters that used to be human and drink blood), but "vampire" is a good enough word to describe them and the team has better things to do than come up with stupid nicknames, so that's what they call them.
* Inverted verdict. Over the course of the episode, the jurors find additional information which does, in fact, point the finger at the defendants; eventually, there is only one holdout for not guilty, who only agrees to vote guilty because he's sure the defendants will get off on appeal.
* "Inverted" vs. "Exaggerated": For character tropes where the basic trope is "Alice is/does X", you might be tempted to list "every character
* Inverted. Well-groomed Afghan Hounds naturally have long hair on their heads, and long hair that tends to make them look like they're wearing fancy clothes. Despite all this, the Afghan Hound protagonist, What-a-Mess, is a male dog. However, this trope is played straight with the cat, Felicia. She has long eyelashes and a bow.
* Inverted when Abu grabs a sword and threatens the oncoming guardsmen. The guards panic for a moment, until their leader Razoul reminds them that they all have swords!
* Inverted when a killer is identified because he'd turned on the lights in his downtown office suite,
* Inverted, when a man accidentally turns himself into a baby, and his wife is left to raise him.
* Inverted when autistics are being sarcastic and someone without autism assumes they're being literal. It's not uncommon for adult autistics to overemphasize sarcasm to avoid misunderstandings, not unlike a child that has just started to learn the concept.
* Inverted, when Batman reprimands a group of copycat Batmen in loosely-fitting suits, one of whom asks how he's different from them.
* Inverted when Brutha sees an eagle and remembers Om, who ended up in his vicinity due to an eagle's failure to turn said god into lunch. The people who are traveling with him at the time mistake this for a general exclamation.
* Inverted when Calvin, halfway through a hamburger, excitedly asks whether the meat in them is made out of people from Hamburg — only to find himself too disgusted to eat the rest when he finds it's just cow.
* Inverted when Carrot becomes sure that Dorfl didn't kill Dr. Hopkins when he agrees to Carrot's statement that Dorfl beat him to death with an iron bar, when in fact he was killed with a loaf of
* Inverted when Cary is falsely accused of aiding and abetting Lemond Bishop's drug ring. It takes several episodes for the firm to come up with the money to bail him out, and his movements are restricted: he's nearly sent back to jail, and is fitted with a GPS tracker, after traveling less than a mile outside Cook County to go to a friend's birthday party.
* Inverted when Chief Wiggum designed a supposedly educational skit that involved dressing one of his men in a costume and calling him "Curtis E. Bear." He designed it with the same incompetence and violence that he exhibits in everything else he attempts, so the version that was performed involved beating up the cop in the bear suit while having lost any of the actual message of courtesy that was the occasion for the skit.
* Inverted when Claire gets really upset with her father Jay because he once tried to split her and Phil up. Jay then points out that when he and Gloria started dating, 'someone' called immigration in an attempt to get Gloria deported. Claire quickly shuts up.
* Inverted when CM Punk did this to Edge using the Money in the Bank contract. This time it was the face using the contract at the opportune moment. Punk later
* Inverted when dumb guy Mark puts down the word "oxygen". The others convince him that this is not a word but an abbreviation so that it will fit on those tanks. When he asks why they don't print it vertically they tell him it's illegal. He is convinced and puts down the word 'it" instead.
* Inverted when during Math's fight with Jabberwokky, he rips open her jacket and is immediately

* Inverted when Eddy removes Jimmy's outline in "One Plus One Equals Ed".
* Inverted whenever '90s Kid appears. Many people assume that's Nirvana's "Smells Like Teen Spirit" playing in the background, but Lovhaug actually uses the Weird Al parody "Smells Like Nirvana."
* Inverted when Florence's plan to infiltrate the Ecosystems Unlimited secondary servers is
* Inverted when Ganju is offended in everything BUT the ugly comment by Yumichika — even better is that it's
* Inverted when George is interviewing students for a scholarship in
* Inverted when he snaps and kills the used car salesman for insulting Rita. Cue scared "he's freaking crazy!" reaction.
* Inverted when Homer becomes a hippie and decides to freak out the establishment. While acting out of his mind while driving in his car, he passes Krusty the Clown, who is at that moment riding a unicycle pulled by his pet monkey...and calls
* Inverted when it comes to spirits who are summoned to the mortal world. According to multiple sources, including the in-game book "Ancestors and the Dunmer", spirits who are summoned to the mortal world feel it to be "cold, bitter, and full of pain."
* : Inverted when Johann lists off a number of wizard singers and ends with Beethoven.
* Inverted when KAOS abducts Smart, with his escaping being part of their plan. At one point Smart raises a finger to a KAOS guy who throws up his hands, as if Smart had a finger gun. Smart insists it's just a finger and shows the KAOS guy, who gives up and leaves. Alone in his cell, Smart mutters to himself "Come
* Inverted. When Lyra is shown some music CDs, she doesn't know what they are, as in Equestria they only have vinyl records. Audrey's father points out how unusual it is for a teenager.
* Inverted when Minmay territory is invaded by neighbouring (and envious) Duport. The recent advances in farming equipment and the burgeoning industrial revolution, combined with widespread dissemination of knowledge about the basics of using magic, mean that the populace are pretty favourably disposed toward their chancellor. When Duport's knights start walking into villages to declare that the people will now answer to someone else, quite a lot of the peasants rise up
* Inverted. When Mirielle asks what's happening in the school, Simon goes on a long, loud tirade essentially telling Mirielle to go find out herself because he's too damn freaked out to figure out what's going on. He then calmly takes a piece of bread from her, eats it, and politely tells her that it tastes nice.
* inverted, when Naofumi's inner circle is transported to yet another world, and Filo is enslaved in a conventional manner by a tavern owner. She's 'only' commanded to sing on cue and unable to escape the place, but she's utterly miserable and scared the whole time.
* Inverted: When Nina arrives at the house for the first time, the door opens to let her in without her touching it.
* Inverted when Odo is just interviewing a suspect and she immediately accuses him of giving her the bedroom eyes.
* Inverted when Rom orders corned beef hash and bacon for breakfast one morning, much to his brother's bafflement. Rom soon explains he's doing this to emulate Chief O'Brien. Later in the same episode, he ordered buttered pancakes with pineapple topping. Considering Ferengi cuisine is composed primarily of insects and other invertebrates, these were very strange breakfast orders. Rom gets a stomach ache both times.
* Inverted when Scrooge tells him to pick "Some kind of nonsense" as a password for the newly-built Gizmoduck armor, and that it be an obscure one that nobody uses. Gyro uses a thesaurus to literally find an obscure synonym for "nonsense" and selects the most antiquated and unusual one he can find, "blatherskite". This by all means
* Inverted. When Shepherd first sees Captain Gallardi fighting on Purgatory, she notes that he seems oddly over-cautious, never leaving cover for more than a fraction of a second. Then she remembers that Gallardi is used to fighting without

kinetic barriers, where even a single bullet could kill him.
* inverted, when she was 10 years old and living in the Dark Ages. Dialog in a later episode implies that this has happened to her before.
* Inverted when she was thrown toward it; it did not and she merely had to contend with a two-story drop.
* Inverted: when Simba arrives just in time to witness Scar fighting with his mother Sarabi, he steps in to protect her. A terrified Scar replies to that with "Mufasa? No. You're dead."
* Inverted when Spike turns up as a ghost in Season Five. Fred notes that, while most ghosts absorb heat, he's radiating it.
* Inverted when Stewie, the infant, also poses as a high school student to show Brian how easy being cool is. He succeeds, and even wins the heart of the hottie Peter dated, unfortunately, being an infant, he wasn't well endowed, so she dumped him, and he got her taken away on child molestation charges.
* Inverted when Superman and Myxzptlk had a role reversal and Myx had to get Superman to say his name backwards. "Namrepus" didn't work but "Le-Lak" did.
* Inverted when the boys bring in Kyle's cousin, Kyle as a ringer to make sure they lose and thus no longer have to play baseball.
* Inverted when the carousel breaks down due to a control failure. The music speeds up while the carousel spins rapidly, trapping the riders.
* Inverted when the citizens criticize Belle for teaching a little girl how to read. By that point in history, discrimination against female literacy was scarcely true; magazines for women and girls were quite common. Ironically, the original
* Inverted when The Courier arrives at The Great Khan camp. One of the guards abruptly tells The Courier he now has access to their special weapons as thanks for all the help he's given the tribe before. The Courier
* Inverted when the had of PR at NASA demands a photo of Mark, and then complains that his face is obscured by his helmet. The head of engineering says that they could get him to take it off for a pose, but then he would "like, die".
* Inverted when the original bus driver gets shot. Not only doesn't he die, but they have to get a new driver in the seat and keep her from going below 50 (and Keanu hasn't told 'em there's a bomb on the bus yet).
* Inverted when the team discovers "Popplers" a mysterious substance from an unknown planet which manages to fuel a global addiction and phenomenon among humans.
* Inverted when the team is investigating a series of brutal murders mimicking Native American rituals. Their first suspect is an Apache teacher/activist whom they take to the crime scene under the pretense of asking for his expert opinion. He then proceeds to analyse the grisly scene in a very detached and unemotional manner and comes to the conclusion that this wasn't done by Native Americans. Hotchner then claims his behavior proves he's innocent: a guilty person would have feigned shock and disgust, as the activist himself points out when Hotch tells him that he's not a suspect.
* Inverted when Tommy and Chuckie are horrified to find out that Aunt Miriam wears a wig (they think she's an alien). She, however, isn't bothered by them seeing her without it.
* Inverted when Xander was supposedly in the cards to come out as gay in Season 4. However the character Tara - who was introduced to take Willow's place as a
* inverted. When you are trying to save an impoverished old man from a cruel loan shark, you end up as prey in a hunt set up by the loan shark. However, the trope is soon inverted, as it's your character who ends up hunting down the hunters.
* Inverted, where aliens find humans to be politically incorruptible because they're already so corrupted.
* Inverted, where a mad baker attempts to create a giant soufflé to smother The City. To collapse the soufflé, the Tick must shoot himself out of a cannon at the speed of sound.
* Inverted, where artificial intelligences secretly use the Turing tests that are going on to find humans who can't tell machines and humans apart.
* Inverted, where at the end of one episode, a group of girl scouts beats Helga up

because earlier she mugged one of their own and stole her clothes so she could get into Arnold's house.
* Inverted where a witness tries to hide her possession of an important document by claiming "This is my top-secret list of groceries to buyyyyyyy!"
* Inverted, where Barney and Ted appear to be talking about his architectural sketch, but are actually discussing a nude picture of Princess Leia.
* Inverted, where Hal tells his captive "There is no Easter Bunny, there is no tooth fairy, and there is no Queen of England."
* Inverted, where he says, "This is getting on my nerves, now that I have them!"
* Inverted, where it is the villain (Vegeta) who wants a rematch with hero Goku. When the rematch occurs, it's postponed indefinitely due to Buu's revival.
* Inverted, where it shows that God and Satan are actually pretty nice guys. God's got a bit of a pragmatic streak to himself, but Satan shows he's pretty chill with his supposed arch-enemy and the feeling's mutual.
* Inverted, where Kanae was having a recurrent dream with parts... off. It was until after she kissed Kyon that she realized she was awake.
* Inverted, where Langdon's relationship with Vittoria is changed from an overtly romantic one to strictly business.
* Inverted, where Lilo and the girls in her Hula class were selling candy bars for their annual fundraiser. When Lilo is unable to sell her cookies to anyone, she meets a fast-talking experiment named "Slick" whose main function is the ability to sell anything to anyone. Although relentless in his function, Slick uses legitimate methods of persuasion and sweet-talking to lure customers into buying Lilo's products.
* Inverted, where out of the five emotions that control Riley, Fear and Anger are the only guys.
* Inverted, where Principal Pixiefrog gets kissed and turns into a miniature human.
* Inverted, where signal loss after entering into Jupiter's and Saturn's atmosphere respectively to never come back was something totally expected.
* Inverted where Stephanie is in Joey's new car and tries to turn on the radio, only she starts it and backs the car into the kitchen, thinking the "R" on the gear shift meant "radio".
* Inverted where Steve hears about slow cooking, and goes in completely the opposite direction - he reasons that if a joint of pork cooked on a low heat for six hours renders it juicy and falling-off-the-bone, how much more succulent will it be if cooked on the lowest possible heat for a lot, lot, longer... Steve leaves it on a very low heat for several days. When it comes to serving it, it's falling off the bone because it has gone rotten and all four boys end up with serious food poisoning.
* Inverted where the boy pictures being turned out onto the street over stealing the dessert.
* Inverted, where The Bride hacks her cold-blooded way through literally dozens of sword-wielding Yakuza foot-soldiers, then decides one of them, a young teenager, is too pathetic to kill. She puts him over her knee, spanks him with the flat of her sword, and tells him to go home to his mother. He flees.
* Inverted, where the dog very clearly wants to leave, but poor Navin is too overcome with emotion to let him go.
* Inverted where the good guys invent a virus that turns enemy Wraith into docile, submissive humans. Then there's the Hoffan retrovirus, which makes the host lethal to Wraith attempting to feed on him/her. Problem is, half of the hosts are killed off by the virus itself after a few hours.
* Inverted, where the hero of the first game has become his own legend.
* Inverted, where the hotel is the relatively safe place, and Hell is outside.
* Inverted, where the main characters are robots, and the team 'pet' is usually a human.
* Inverted, where the most dangerous common mobs spawn in broad daylight, but none spawn underground except in the Dungeons, and even those spawns are Dungeon features rather than random monsters.
* Inverted, where the native Martian races admit that without the Earthling John

Carter, they would never be able to unite against their enemies and defeat them so quickly.
* Inverted where the Russian Blue coughs up all sorts of previously swallowed stuff, including some fake evidence to plant.
* Inverted where the somewhat geeky girl tutoring the protagonists keeps leaving to throw up. They assume she has an eating disorder; it turns out she's pregnant.
* Inverted, where you would expect the dynamic duo to punch out their opponents, but instead they play an impromptu hockey game with a diamond.
* inverted, which has all of the playable characters from that game, but has the player playing as a nondescript and never-seen new challenger taking on the entire existing cast.
* Inverted which involves a gay bully planning to rape a main character, leading to this exchange:
* Inverted." (Which is wrong; the reason the Mars Climate Orbiter crashed was that NASA and JPL were using metric but Lockheed-Martin was using imperial, and didn't check the measurements.)
* Inverted, which made Dick even more frustrated. Nina replied "Does she need a reason? 'Cause I can give her reasons."
* Inverted while Cary Agos is working as an ADA. In response to an inconsistency in the blood evidence pointed out by Alicia, Cary brings in an expert witness who points out that lupus, which the defendant has, can cause one's blood type to change.
* Inverted. While spells can be very useful, the removal of spellcrafting and the addition of weapon forging as well as the design of the enchantment system means that properly augmented combat will leave spellcasting utterly in the dust in terms of raw power. Enchanting can lower the cost of spells to 0, but not raise their power, and leveling up your skill doesn't strengthen the spell, only alchemy and a few limited perks actually get you more power. Weapon attacks on the other hand are always free and get bonuses from smithing, gear enchantments, weapon enchantments, skills, perks,
* Inverted, while Star does seem to make Marco's life more interesting, the show is more about her growing as a character by toning down her chaotic overenthusiasm by being with the safety-minded, level-headed Marco.
* Inverted: while the ending credits state that the film was "inspired" by an Alfred Schnitzler's novella, it is in fact a rather faithful adaptation, down to the key pieces of dialogue.
* Inverted, who already hates Heather for several justified reasons and ends the episode chasing after her for revenge.
* Inverted, who frequently asks people who dislike his newer content (especially those who only subscribed his channel for his Pixar poops) to unsubscribe.
* Inverted who is the only one who looks and acts like an actual gremlin, in stark contrast to Bogus, as well as all of the other denizens of Bogusland.
* Inverted wholeheartedly by magician Tommy Cooper, who obsessively honed his performances so that it always looked like he was utterly screwing up his own tricks, before triumphantly arriving at the intended result
* Inverted who went through the very painful process of having his racist face tattoos removed.
* Inverted, will throw his opponent through the wall of the cage, giving that wrestler the victory. (This is generally done to keep the monster looking strong while his opponent gains the victory.)
* Inverted. Winter, at the age of sixteen, develops a crush on Jaune who in this continuity is about ten years older than her. She decides to wait at least until she is nineteen before making a move on him.
* Inverted with actors auditioning to sell an air-freshener. One man burbles enthusiastically about the product, a beautiful woman
* Inverted with a happy song that matches their feelings. When they reunite, the radio plays "
* Inverted with a Jack in the Box commercial for breakfast platters, in which Jack approves of a policeman, a firefighter, and a construction worker being the

hardworking people who would eat them. Cut to said figures baring all at a bachelorette party.
* Inverted with Amy's parents. They are a pink male hedgehog and blueish-grey female elephant.
* Inverted with Andrew Robinson (ironically, considering his family history): born onscreen in November 1991, reintroduced as a 16-year-old in late 2009. His retconned birthdate(s) in August 1993 would require him to be born about a year after Paul and Christina left the street for Hawaii, but just before Paul briefly returned and was
* Inverted with Angel's sire Darla; he definitely holds some animosity toward her, yet his devotion to her is disturbingly Oedipal.
* Inverted with a Nike ad during the 2012 London Olympics. Since they weren't an official sponsor, they couldn't explicitly mention the Olympics. They could, however, show athletes in all the
* Inverted with an interest in Shakespeare, while the Dark Dragon is rowdy, coarse, and lewd.
* Inverted with Arya and Sansa. While in the books, Sansa was usually the crueler one, in the series, Arya throws food on Sansa's gown she'd made herself in front of their house and her future in-laws for no good reason, calls her an idiot, mocks her interests of sewing and marrying a prince, and stuffs sheep crap in her bed when she's annoyed with her (which apparently was a lot).
* Inverted with a series of ads by financial investment company John Hancock, where there is only ambient sound and typing noises, with the intent being to draw attention by the
* Inverted with Ash's Muk, however. It's a very friendly Pokémon that loves giving hugs. His dependable Bulbasaur is never seen taking advantage of its type, and Brock's aloof yet effective Croagunk usually only uses its Poison Jab as a
* Inverted with a silly quote for female Draenei, a member of a race of interdimensional refugees: "This planet has a tremendous supply of sandstone. The inhabitants must be wealthy beyond their dreams!"
* Inverted with Axl: he was the prototype for the transforming next-generation Reploids, yet he himself is quite sane, if possessed of a slight
* Inverted with Belle, who began entirely as a love interest for Rumpelstiltskin. When she was made a series regular, she started having more agency in the plots.
* Inverted with Beren in one scene. He usually IS very protective; when the Sons of Fëanor attempt to kidnap Luthien, he tackles one of them (together with his horse!) and nearly chokes him to death. However, when
* Inverted with both Karin and Ino, who lose their one-sided crushes on Sasuke. Karin simply loses all romantic interest in him and instead ends up with Neji, while Ino hates him
* Inverted with Broccoli Guy, Rage Mage, and Masker Mind. Like the Gulper, these Bosses have no way of attacking, but they all come with enemies to attack you and get enhanced. Hoowever, the bosses actually gain an attack when you play as them.
* Inverted with Captain Anastasia Luccio of the Wardens, a formidable wizard who is fascinated by computers and has read extensively about them, despite being unable to use them due to how mortal magic interferes with technology.
* Inverted with Captain Marvel. Despite being an established member of the Justice League, he really wants to hang out with the members of Young Justice (because he's really just a kid, and thinks the teenage heroes are cool), making him something of a
* Inverted with Carrot Ironfoundersson's sword, which is the most unmagical sword there is. It has no power, it has no name, there is nothing written on it, there are no jewels on its hilt. It's just "a long piece of metal with very sharp edges." But it's still a Cool Sword, because, as Fred Colon observes, "Real kings had shiny swords, obviously. Except, except, except maybe your
* Inverted with Casey. She went home with Ryan and declared herself his little sister.
* Inverted with Cassidy Casablancas, who eventually gets fed up with people calling him "Beaver".

* Inverted with certain mainland military units that came to serve under the Seanchan after the Seanchan conquered them. The Seanchan added brightly colored patches to the garb of troublesome or undisciplined units, which they thought was this, but was actually a warning to anyone around them that they were unreliable and too stupid to be trusted.
* Inverted with Church in season 6. He unloads his entire magazine at someone less than three feet away... and misses every single shot.
* Inverted with Clio. In her first appearance, Clio is a straight-up
* Inverted with "Copacabana" by Barry Manilow. A gangster sexually harasses the showgirl the bartender's committed to. It gets the bartender killed, and the showgirl ends up as a broken alcoholic.
* Inverted with D'Argo Sun Crichton who has a human father and an alien (
* Inverted with Dawn's mom's Poffin recipe for her Glameow, the Meowth of Team Rocket likes it — and both are cat-based Pokemon.
* Inverted with Desirée Goyette, who performed many songs on the
* Inverted with Diego and Vanya, in the comics much like Luther and Allsion, there are romantic overtones to Diego and Vanya's relationship. In the show, they love each as adoptive brother and sister and show no romantic allusions.
* Inverted with Dog being reserved and occasionally hostile to Alistair, yet affectionate toward
* Inverted with dolphins, especially bottlenose dolphins, as they have about the smiliest default expressions in the animal kingdom.
* Inverted with Draal, Delenn's mentor, after he takes control of the Great Machine in "A Voice in the Wilderness". The Machine's life support functions age him
* Inverted with Dudley Dursley, who is a brat and a bully as a boy, but begins to grow out of this after he's attacked by Dementors in
* Inverted with Earth President Nixon's vice president, Spiro T. Agnew, who is
* Inverted with Edmond Hamilton's 1932 short story 'The Man Who Evolved', which is traditionally interpreted as having the soul-crushingly nihilistic ending of learning that the human race is doomed to devolve into primordial ooze, and there is nothing that anybody, not even a Sufficiently Advanced super-intelligence, can do to prevent it. However,
* Inverted with equipment manufacturers and their brand names. The vast majority are entirely fictional, but sprinkled among them are references to Apple, Ford, General Motors, Mauser, Nissan...
* Inverted with e-readers, whose adoption was, surprisingly, driven primarily by
* Inverted with Ferdinand Kerimov, an Azerbaijani prisoner to the FIB whose scenes are anything but
* Inverted with Fuzzy Lumpkins, who is about as dumb as they come, and as STRONG as they come.
* Inverted with Hagrid ("a giant of a man with beetle-black eyes"), perhaps the most benevolent person in the series.
* Inverted with Ignus, the most chaotic evil character you can have in your party. His high, cackling contrasts heavily with The Transcendent One during their dialog.
* Inverted with Iwata - After being diagnosed with terminal cancer, Iwata's sudden death lead to Shiouji building a robot with his brain inside... except that during the closing chapters it was revealed he had been cured in hospital and was piloting the unit remotely.
* Inverted with Jack Scully, who was introduced as a 19-year-old in 2001 who had been living and working in the UK away from his family for a few years. He was reintroduced late the following year under a new actor and aged down about two years so he could attend Erinsborough High.
* Inverted with Jezebel, whose beauty is meant to emphasize her arrogance and corruption.
* Inverted with Jim Croce's "Bad, Bad Leroy Brown." Leroy is used to having what he wants, sexual conquests included. He makes the mistake of trying to bed "the wife of a jealous man" and ends up having his ass kicked in full view of the neighborhood.

* Inverted with Jin and Fuuka. He started dating her because he didn't feel he was worthy of being with her sister, Misaki, the one he really loved. Fuuka realizes this and breaks up with him, telling him to man up and confess his feelings.
* Inverted with John Lumic, who created the alternate-universe Cybermen but only later became a Cyber-controller (against his will).
* Inverted with Jose Canseco and Mark McGwire, the Oakland A's "Bash Brothers". Canseco had a relatively decent career; McGwire broke the single-season home run record in 1998 that was held by Roger Maris. Nowadays, their impact on baseball can be measured for what they did after their playing days. Canseco's book
* Inverted with Juvia, who is quite eager to get intimate with Gray, but is
* Inverted with Krista and Marcus van Sciver, who turned her (after shooting her brother in the head) by injecting her with his blood and then throwing her off the roof (so she couldn't be turned back). While she hated him for a while, she hid it, as she was secretly working for Blade and needed to get Marcus's trust. And then all the hate goes out the window when she sleeps with him... several times.
* Inverted with Lalavava and Mandark. Even though Lalavava had one appearance, she proved herself to be dominating and demanding towards her older brother. It had reached a point where she threatened to beat him up if he didn't help her, which had Mandark begging her not to hurt him.
* Inverted with Lawrence Taylor, who had no problem with being called by his initials L.T., Lawrence or Lonnie by family and friends, but one way to piss him off was to call him “Larry” because he never really cared for the name and thought it was too feminine. The only person he allowed to call him Larry was Bob Hope.
* Inverted with Leliana and Cassandra who were the Left and Right Hand of the Divine, Thedas's religious leader. After forming the Inquisition they become
* Inverted with Martin Lloyd, who chooses to stay on Earth rather than leave with his fellow
* Inverted with Mercury, however, now the Solar System's smallest planet again, it is also the planet closest to the Sun.
* Inverted with mice and rats as pets, which are far more popular with women than men. This was even so in Victorian times, where some upper-class young ladies would keep them almost like
* Inverted with "Miraculous Merchandise Zone" with Phelous, which he notes is "the bootleg of Bootleg Zones", in that it mainly deals with genuine official merchandise. It even got its own purple backdrop from the second episode onward, to better distinguish itself from Bootleg Zone's orange background.
* Inverted with Mr. Shoebill from Episode 8. He does not talk or act anthropomorphosized, but he is still sentient as the Funny Animal characters and is the editor in chief of a local food magazine.
* Inverted with Mutya Orquia, real name Ruelleen Angel Olano, when she played the role of the titular mermaid in
* Inverted with Nanoha. She loses her tight little pigtails as she grows up, and is shown wearing her hair out, but her personality doesn't change at all, since she was already very mature. She's back to wearing it tied up in the third season, albit looser and in a single side ponytail.
* Inverted with Nereus. He often kept many details about whatever the Nektons faced in certain episodes secret from them, which would often cause them to distrust him.
* Inverted with Nodoka Hanamura. While she's good enough to become inter-middle champion in mahjong, she's actually better at the game when playing online, where she gains a reputation as being virtually unbeatable. She had to learn how to get into her "online mode" while playing the actual game.
* Inverted with Nurgle. Falling in with the worshipers of the God of Decay may look pretty atrocious, but in truth Father Nurgle's children are just as
* Inverted with Ollie, whose implied history of sexually servicing his psychopathic uncle Avagadro was apparently an
* Inverted with one where a man tells his wife he's going out for cigarettes. He finds the store closed, so he goes to the bar to use the machine, and when there decides to have a few drinks. He gets a little drunk, begins talking to a woman at

the bar, and before you know it they're in bed together. He wakes up and realizes he's in trouble, and quickly asks the woman for some talcum powder which he slaps onto his hands. When he gets home, his wife is waiting up and demands to know where he's been:
* Inverted with permafrost. Due to its involvement in climate change, it is not really permanent at all, and it contains a huge amount of carbon dioxide and methane (both greenhouse gases) frozen within it, assuming if the above was true.
* Inverted with Peter Pan and Wendy (due to the former getting a case of
* Inverted with Pokedexes. Rather than every trainer having one, only those who do well enough on specific tests get one due to each one having to be handmade by a Pokémon Professor. Because of this, trainers with Pokédexes are treated with a lot of respect.
* Inverted with Queen Amara. You are told in Case 3 that she was murdered 23 years ago in a fire — but it turns out that was just a staged incident only made to frame Dhurke and usurp Amara's throne. She's been alive all this time, disguised as Princess Rayfa's attendant Nayna.
* Inverted with Queen Eva, Snow's mother. She used to be a spoiled brat who spitefully tripped Cora. But by the time she married and had Snow, she became a much kinder person and quick to lecture Snow's own bratty behaviour.
* Inverted with Raine and Genis Sage, who had an elf mother and a human father.
* Inverted with rapper Everlast who had previously had a solo career before joining
* Inverted with Richter, whose powers as a vampire hunter would seem to prove very useful against Alucard when he's under the control of Shaft, but Richter is not particularly powerful or difficult as the
* Inverted with Rick, Evie, and Jonathan, who inadvertently carry off Beni's treasure at the end and wind up filthy rich in the sequels as a result (Jonathan squandered most of it in the interim), though Evie's inheritance from her late parents probably helped as well. Although one could argue that it was accidental and more of a case of serendipity/good karma.
* Inverted with Rogue, who can use her powers quite well, but doesn't know how to turn them off (it's been pretty much spelled out that she
* Inverted with Ryu and Chun-Li whom in the games have been presented as
* Inverted with Sarah. She starts out as anxious and depressed, but becomes a lot happier when she starts practicing witchcraft.
* Inverted with several scambaits, which feature a fake religion meant to
* Inverted with Shang Tsung: Much like he did in the first game, he was originally intended to have long flowing hair in
* Inverted with Shego, as Danny is the one who has a crush on her. She's flattered but clearly not interested in someone younger than even Kim Possible.
* Inverted with some mental illnesses and developmental disorders (i.e. depression for the former, autism for the latter). Some people with actual depression and actually autistic people might be afraid of "making it up" or "faking it for attention". While there
* Inverted with some of the actual relationships from the fairy tales.
* Inverted with SpongeBob and Patrick. When they visit Sandy's treedome, they have to wear fishbowl helmets filled with
* Inverted with the all-Cylon Thirteenth Tribe. The ancestors of the Final Five could reproduce, so they abandoned their resurrection technology.
* Inverted with the birth of the American ambassador's kid: because this is a truly Special Moment for him and his wife, he calls her while also having a conversation with his stockbroker. And gets one of the Secret Service guards to videotape the whole thing.
* Inverted with The Blank Theory's "Middle of Nowhere" video, with the camera zooming out of singer Nathan Leone's mouth after having a
* Inverted with the Blue Beetle, where when his eyes are red, he's friendly.
* Inverted with the clone games on early computers such as the commodore 64 and the ZX Spectrum. Whenever a game managed to be a total rip-off of a popular arcade title it was considered worth getting (and in certain cases those clone games would

even be considered as the best games you could buy for that computer, didn't matter how much of a blatant rip-off it was).
* Inverted with the decision of the Internationa Astronomical Union to give names voted by the public to some exoplanets and even their stars, that were before known by catalog numbers, such as
* Inverted with the demon in "The Puppet Show"; Buffy and the Scoobies are realizing that Giles is the target of a brain-eating demon, and become especially worried after remembering that he's very smart.
* Inverted with the Doodlebugs of WWII. Their engines droned and propelled them forward constantly until their timers ran out. When they
* Inverted with the Engineer's Gunslinger, a robotic arm that deploys mini-sentries "Sometimes you just need a little less gun"
* Inverted with the evil AI Sigma, however. He has a rather soft, cold, tenor, which is fitting, given that he's voiced by Elijah Wood.
* inverted with the Exiles and other characters from Prospit/Derse, who are often drawn with carapaces, claws, and other details that are left out of the more stylistic art of the main series.
* Inverted with the Flash in "Injustice for All", when Hawkgirl speculates that his speed is why he can't get a date. He agrees, but after the beat, he gets
* Inverted with the flat forehead Klingons. Because of low budget, Klingons only had a mostly ethnic makeup in the original series. In the movies and later series, which had better budgets and better makeup technology, they obviously had the ridged foreheads. In
* Inverted with the Ha-Ha brothers, who stopped being bullies when they redirected their aggression into football.
* Inverted with the head of Imperial Security through most of the series. It's not technically a military post — the Emperor points out once that while it has traditionally been held by a serving officer, there is no law that prevents him appointing a civilian — but it wields enormous power. When Simon Illyan takes the reigns, he is reluctant to promote himself above his predecessor, the legendary Captain Negri (who never bothered acquiring higher rank because he didn't need it to make people understand how important he was), and thus serves as a Captain for his entire career, while routinely tackling duties that are vital to the continued survival of Barrayar and commanding a force of thousands. He is drawing a Vice-Admiral's pay by the time of his retirement, though.
* Inverted with the joke weapons, like Mitsurugi's bokken, Taki's tobacco pipes, Seung Mina's broom, and Link's bug-catching net. They make weird sounds in place of the usual slashing or swooshing sound effects, e.g. the broom reminds the player of
* Inverted with the male characters. Good male champions can range from armored-like-a-tank Garen to
* Inverted with the Monarch's henchmen. #21 and #24 are recurring characters, while the two henchmen who receive names, Speedy and Scott Hall (Henchman #1), are killed in their first episode.
* Inverted with The Mother herself, where a virtual unknown was cast and all of the bigger names were revealed not to be her.
* Inverted with the N7 hoodie, a real-life outfit based on Shepard's armor, which is available for Shepard him/herself in the Collector's Edition of
* Inverted with the Nidoran family. Male members are pink and purple. Female members are blue. The shiny versions, however, play the trope straight (with the exception of Nidoqueen, whose shiny version is predominantly green).
* Inverted with the Nightmare Demon. It, and the aspects of it that the group fights, take the form of what each person fears the most, though we only see from the Inquisitor's perspective. The Inquisitor and
* Inverted with the Ninth Doctor, who often expressed his frustration with humans as "stupid apes".
* Inverted with the opening pages of Ryan North's final issue, which have Finn and Jake watching insects and challenging Marceline to write a song about them, which refers to the show's closing credits and the lyrics of its closing theme, "Island Song".

* Inverted with the "Ordinary Muslim Man" and "Successful Black Guy"
* Inverted with the Pack. When Coyote, a robot, offers various "upgrades" to the other members, Jackal and Hyena become
* Inverted with the plot-relevant Ceremonial Sword of Neverwinter and the Silver Sword of Gith, which are classified as "universal swords" to allow even characters that lack sword proficiency to wield them. The downside is that this typing also means that none of your weapon specialization feats (e.g. Weapon Focus) work on them.
* Inverted with the prostitute Shae, Tyrion's favourite, opportunistically shifting her affections to Tyrion's father Tywin Lannister after
* Inverted with the Reapers, who freely acknowledge that they have come to admire Shepard's
* Inverted with the recent fad of "chocolate diamonds". Artificial diamonds have been created for over half a century, but mostly for industrial purposes. It has only been more recently that artificial diamonds could be made to compare with natural diamonds, mainly because of color issues, and it's still a difficult process. Common industrial diamonds are generally a dark color, which isn't a problem. "Chocolate diamonds" are nothing more than bigger versions of the grit used to saw through concrete, but their origins are never mentioned in the ads.
* Inverted with the Replicators, who were immune to energy weapons, but fell apart if struck by so much as a single bullet center mass. Human-form replicators play it straight, though.
* inverted with the screwdriver: the taste is largely independent of the amount of vodka in it, so a bartender who doesn't want someone to get drunk can serve glasses of nearly pure orange juice, leading to a case of Unexpectedly Not Soused.
* Inverted with the show's version of Killer Frost, who became Firestorm's archenemy after Ronnie dumped her. By text.
* Inverted with the Space Marine's Land Raider: as the only vehicle capable of transporting Terminators, it can only fit one squad inside of
* Inverted with the Tai Chi man in the second game. Ryo watches the man go through the slow, careful motions of Tai Chi, then punch a thick tree hard enough to shake it. He realizes that Tai Chi is, in fact, a martial art, and asks the man to teach him to punch that hard. The old man tries to teach Ryo the fluid motions of Tai Chi (which, when sped up, are in fact deadly motions), and Ryo instead spends some time punching the tree really hard.
* Inverted with the trolls: they understand romantic love quite well (though they call it something a bit different). However, they have
* Inverted with the use of the song "Move This" in a Revlon commercial. The song first appeared in the commercial, than later became a popular hit for the band Technotronic.
* Inverted with Toni Basil's "Mickey". The song was originally recorded by British glam rockers Racey as "Kitty" and told from a guy's viewpoint. Basil, being a dance choreographer (and a former high school cheerleader), put her own unique cheerleader spin on the song. The rest is history.
* Inverted with Tracy Jordan after he earns respect from his peers for making a really artistic film but doesn't want it. He tries to act like a
* Inverted with Trade Minister Tagomi, who visits an alternate universe (from his perspective) where the Axis Powers lost World War II and his wife and son are both still alive and living in San Francisco. He spends considerable time there with them.
* Inverted with Trafalgar Law, who has the ability to detach other people's body parts and combine them with other people/objects.
* Inverted with trauma shock (albeit temporarily), where your mind's refusal to consciously accept that you've just been torn to bits keeps the pain at bay until you either pass out or cool down a bit.
* Inverted with Unitarianism, which generally believes God exists but Hell and the Devil do not.
* Inverted with Voltaire, who looks the part (being a massive red and black dragon with a somewhat demonic appearance),

* Inverted with Willow's next love interest Tara. She was defined more by her relationship with Willow - one episode even lampshading that the rest of the gang
* Inverted with Yanagi. He had confessed to Yuki and she wants no part in it, but everyone can't help but wonder what she
* Inverted with Yuma and Astral, who go so far as to fabricate entirely new cards on the spot to win some of their later duels and do nothing but prosper for it. Granted it's kind of a kill or be killed sort of thing, but still.
* Inverted with Yu, who is a ruthless tyrant like every System Lord, but he still plays things straight when negotiating with the Tau'ri despite their being "inferior" humans. And it was at least implied that he led the call for Anubis's original banishment in part because Anubis was
* Inverted with Zeref, who bluntly states that the only being who can kill him is the demon E.N.D., which refers to
* inverted writers wouldn't inflict on O'Brien)... until the charade comes to light.
* Inverted. Zim claims that the humans are actually speaking Irken rather than him speaking English, suggesting it's a result of
* invert in the middle of wartime, but they also weren't interested in ranking Bright up too far beyond his seniority (LTJG was already an accelerated wartime promotion). This situation gets downright weird when Lieutenant JG Sleggar Law is assigned to a flight position to replace lost crew; while fitting his rank, the position puts him below Ensign Yashima in the chain of command.
* inverts this trope: in accordance with the law of levirate marriage, he winds up marrying Tamar, the widow of his two older sons.
* In "Very Important Penfold" from the reboot, the main duo turn the lights out in order to
* Investigate This: Scarecrow, female private investigator Hannah remarks that she needs a "change of undies" after crashing into the titular Scarecrow.
* Investigating a death during a high-stakes poker game, the heroes of
* Investigating another casino’s plot to launch a terrorist attack.
* Investigating a young woman’s disappearance, as the main quest of the Far Harbor DLC.
* Investigating the death of a radio host who ranted on conspiracies, the team are trying to find clues in his apartment. Cameron surprises them by pulling the guy's microwave off the wall to reveal a hidden safe. He relates the guy had once ranted on microwaves being part of a government plot so owning one himself was odd.
* Investigating the disappearance of a cattle baron’s son inside an upscale casino.
* Investigating the murder of a lawyer in the middle of a lake (case 1-4) quickly reveals a connection to
* Investigation. Admittedly clever hiding places, since they're places that no one in their right mind would think to, or want to, investigate.
* Investigation Discovery a cable channel dedicated almost entirely to true crime programs, including several of the shows listed above as well as their own original series.
* Investigation Discovery (ID) are presented as cautionary tales about getting romantically involved with beautiful people.
* Investigation Discovery provides an example of this in a dramatization of the murder of Stanley Cumberbatch at the hands of his ex-wife, Millicent. After stabbing a sleeping Stanley multiple times with a knife, Millicent stares down at the corpse and blood soaked bed and says the following:
* Investigation Discovery show dealing with murder mysteries involving swamps.
* Investigation Held by Kolobki features Chief, who keeps his cool even as an orangutan attempts to use him as a basketball or he reads a case file of a rare striped elephant that loves fish oil.
* Investigation Held by Kolobki is somewhere in the middle - it's bright and sunny, but very detailed, diaplidated to an extent with things like broken statues and cracked stucco on buildings, and has wavy object/character outlines along with sort of a film grain effect over the scenes.

* Investigation of a Citizen Above Suspicion killing his girlfriend. He then goes to work—at police headquarters, where he's chief of homicide. Moments later he's called out to investigate the killing he just committed.
* Investigation of a Citizen Above Suspicion: The chief of homicide kills his girlfriend just to see if being a high-ranking policeman means he can get away with murder. He can.
* Investigation of a Citizen Above Suspicion: The day he kills Augusta Terzl is the inspector's last day in homicide, as he has been promoted to head of Political Intelligence — which is State Sec, a secret police charged with ferreting out subversives and communists. Phone tapping is rampant, torture is part of the job. The inspector gives a fascist speech to his minions in which he says that political opposition is the same thing as crime.
* Investigations 2, Blaise Debeste becomes this for his son Sebastian after it's revealed that he's the killer in Case 4 and that he never really cared for Sebastian in the first place.
* Investigations 2, Gumshoe goes to get a gun dusted for prints, only for him to arrive back around 10 seconds later with the results, much to Edgeworth's shock. This is likely a joke at how swift the forensic testing in the Ace Attorney world seems to be, compared to how long such things would normally take in real life.
* Investigations 2, in a climactic scene, Edgeworth and company take up the mission to expose the smuggling ring leader from the previous Yatagarasu.
* Investigations 2; in fact, the whole thing might call to mind Adrian Andrews, who was also a decoy villain.
* Investigations 2 into thinking he's the best and his name is Sebastian Debeste. Go figure.
* Investigations 2 is never revealed, even after he turns out to be one of the key characters in the overarching plot.
* Investigations 2, Nicole was mentored by Lotta Hart, and the two meet up towards the end of the game to investigate another "scoop" together.
* Investigations 2 on it, just in case you didn't think he was enough of an evil bastard already.
* Investigations 2 Though the real twist is just how far the culprit's villainy extends.
* Investigations 2 (yes, including even the murder Edgeworth acquitted them of, as they knowingly manipulated someone else into doing the dirty work for them). Even Edgeworth can barely bring himself to believe it when he finally puts the pieces together.
* Investigations. Cut to the present day, where he ends up investigating three crimes that are all in some way related to the group. None of them are directly related to each other. His presence for all three is pure coincidence. And this happens over a period of two days.
* Investigations, especially candy, and that "cigarette" of his is actually a lollipop. While investigating a crime that took place at a dessert-making contest, his eyes keep wandering towards the desserts and he is extremely invested in any information the chefs can tell him about dessert-making.
* Investigations has, in its final case, the victim being the president of Zheng Fa from the very first case. The reveal is that he's actually a body double who formed a conspiracy with the killers of cases 2 and 4 in which he assassinated the real president and took his place. However, unlike the first game, the Reveal of the game's actual Big Bad — the one who masterminded the death of the body double, the first case's killer, and the capture of the body double's co-conspirators — is just as huge as the preceding reveal. It's Souta Sarushiro/Simon Keyes, the seemingly harmless clown you helped out in the second case and the supposed best friend of the first case's killer. Up until you have to deduce he's the mastermind, he never comes under suspicion, and the game needs to give you huge hints to his identity.
* Investigations has Shi-Long Lang, an Interpol officer who is really damn good at his job despite having an odd fascination with acting like a wolf, to the point of howling when upset.

* Investigations, in which if you press Lang's statement that he was the first to find DeMasque II's body, Edgeworth will point out that Kay was suspected of killing Manny Coachen based on being the first to find the body. Lang responds that Kay was cleared of suspicion, then goes on to explain why Larry is the suspect.
* Investigations, Kay picks up a murder weapon in a dark room, although partially justified that she indicates she didn't know what it was, and couldn't see the body.
* Investigations leading the smuggling ring. Alba confesses to killing a man that infiltrated his embassy, but this means Alba will be tried in the courts of his home country. This forces to Edgeworth quickly investigate the possibility that another murder happened on neutral soil, and if Alba killed the other victim, Alba can be tried locally. Of course, Alba still needs his diplomatic immunity revoked first.
* Investigations Simon Keyes arrested for his connection to the other murders due to the fact Keyes didn't directly order the murders, only engineered events to make them happen. He does get Keyes eventually when it turns out Keyes personally killed the body double who had been masquerading as Zheng Fa's president for the past twelve years.
* Investigations, upon finding Gumshoe's name written in bloody lettering, Edgeworth doesn't seem to even take any notice, and almost immediately assumes the message to be fake. While this could be seen as the fact that he trusts Gumshoe would never kill, it could also be a reference to the series' reputation of fake dying messages.
* Investigations was full of these. At one point Edgeworth is battering Larry Butz with reasons why his act of dressing as Santa, in the middle of summer, was idiotic, throwing in a couple of "objections!". This leads to Larry lampshading the game's court style arguments that happen at crime scenes.
* Investigations when, upon Edgeworth's accusation that Shih-na is the killer based on her being the only one in the room, Lang states that "accusing someone based on being alone in a murder room is a stupid sick way of putting the guilt onto innocent people". Edgeworth, however, points out that Shih-na had used such a argument to put the blame of the murder onto Kay, to which Lang and Shi-na both unwillingly apologize for their rashness. Of course, Shih-na was trying to frame Kay.
* Investigations who's obsessed with being on time and is so obnoxious that he's bound to be your initial suspect.
* Investigation Team, who met each other at school but really banded together by being — or knowing — victims of murders and kidnappings.
* Investigators and the two women traded babies to save his life. She used her position as a doctor to steal flesh for him to eat, and created a fake record of him having severe food allergies to prevent anyone from learning about Ikuma being a Ghoul.
* Investigators Trace Cause Of Notre Dame Fire To Cathedral’s Outdated 12th-Century Electrical System.
* Investi-Gator: The Case of the Big Crime: Investi-Gator and Insti-Gator are brothers. Respectively, one is a detective who seeks to solve cases and help people, and the other is a criminal who steals things and manipulates his brother for his own gain.
* investigator, who also had magician training and an interest in debunking Geller. Randi also maintains that magicians are really necessary when debunking these charlatans since they are a lot better at catching deliberate fraud than other researchers and scientists.
* Investment funds. The high-return ones have quite the high risk of crashing and burning, while safer ones like saving deposit funds have low returns. Very low returns.
* Investor's Business Daily that pushed O'Neil's two pet interests: his personal investment method (called CANSLIM) and ultraconservative politics. It eventually became popular among readers who felt that the right-leaning WSJ wasn't conservative enough.

* Invicible, Geary orders Tulev to sweep the human wreckage from space — all the ships' parts, and above all, all the human bodies. Tulev quotes the trope name, though the motive here is to avoid letting the aliens discover anything about them.
* In "Victor. Echo. November.", in the course of a discussion about how not to get urine in your pants after using the toilet, Dean uses the word "dab" so many times it becomes both grating and hilarious, and Hank demands he stop saying it. But later, when Hank accidentally sets his crotch on fire, Dean "wails on his junk" to put it out. In agony, Hank asks him to "just dab".

* Invictus: Averted; the worst any player gets is a hamstring injury, and it heals up in time for the World Cup.
* Invictus: Far's mother was a time traveler who fell in love with his father, a gladiator in ancient Rome.
* Invictus". He didn't forget, but he didn't want black people to become similar when he changed the country. There's a reason he said this:
* Invictus: Mandela and New Zealand PM Bolger have a bet on the final match. Bolger first offers all his country's goats against all the diamonds of South Africa. Mandela chuckles and instead suggests the wager be a nice case of wine.
* Invictus: Saffron, the red panda who lives on the ship. Imogen adores him, Far is annoyed by him.
* Invictus's presidency and reconstruction of post-apartheid South Africa, as seen by the South African rugby team the Springboks as they aspire to win the World Cup.
* Invictus: There's a thriving black market of items stolen from the past. The main characters are time travelers stealing artifacts to sell on the market.

* In Vietnam, legendary Marine Corps sniper Carlos Hathcock was once hunting another sniper. Hathcock was sighting through his rifle scope, when he saw light glint off metal some distance away, and he fired at it. When he approached, it was learned that he had shot the other sniper—
* In "Vilgax Must Croak", Vilgax has Ben at his mercy, unconscious, in human form and defenseless, with everybody around unable to assist. He still decides to just escape his jail and leave Ben alive, even though it would have probably taken him a second at best to kill him.
* In "Villains in Need Are Villains Indeed", every time Odd Squad thinks that Benny the robot is destroyed for good, a villain will pipe up that he is indestructible and has emerged from whatever threat he is steered toward. The eventual solution is to have him go in a square between four different areas until

something kills him (since he runs on long-lasting battery power).
* In "Vincalis the Agitator" we briefly get a mention of mnemonimancy, memory-magic, which apparently involves summoning a mnemon that will kill you if you give an inaccurate recounting of your memories.
* In Vince's Story, when a chained Vince, Justin, and Danny need to escape the prison bus, Vince has to choose between Justin and Danny on who's ankle he needs to shoot because then the chain could slip out and they'll all be free. Depending on who you choose, the other will be left behind and get devoured by the walkers.
* Invincible (2021) as a civvie and he reserves his manners for his victims when he's about to operate on them.
* Invincible (2021) as he could feel his skull slowly collapsing around his brain and his eyes bursting out of his face as his futile attempt to escape resulted in his hands being shattered into a broken mess against Omni-Man's torso.
* Invincible (2021) case scenario of the characters learning this ahead of time probably would have been things going exactly as bad as they already did.
* Invincible (2021) happen at different times and characters can end up a part of arcs and stories they previously were not around for or cut from arcs they were a part of. There is also a bit more backstory, agency, and even competence given to smaller characters.
* Invincible (2021) is probably though of the list though. During the Flaxan invasion he takes several seconds of focused laser fire (when a single shot was enough to cut a regular human in half) without so much as a burn mark on his costume. Later a house he's in explodes, leaving no trace of the structre or other people inside. When the smoke clears, he's in the exact same spot and pose he was before the explosion.
* Invincible (2021), like Throwbolt or the head Flaxan being called Scar, are only mentioned in the trivia viewable on Amazon Prime.
* Invincible (2021) Omni-Man strikes Immortal with his hand in the throat, which causes his head to fly off.
* Invincible (2021), said host has a Slasher Smile whilst directing the Sequids to overwhelm the Martian race.
* Invincible (2021)'s house to question his wife with the temperature change being severe enough to brick her laptop.
* Invincible (2021) who only turned to crime in order to pay for his sick daughter's treatments, and did everything he could to avoid hurting innocents while following the orders of the local crime boss.
* Invincible (2021), yet didn't have any sort of contingency plan in place if Omni-Man went rogue.
* Invincible: after the latter meets MJ, Spider-Man expects him to bring up the trope, but Invincible points out that Spider-Man is attractive, funny, and a pretty nice guy so it makes sense that someone like MJ would be attracted to him.
* invincible and a number of other members who aren't quite invincible, but still incredibly badass.
* Invincible and his foe get dragged into the shadow dimension. He is warned that there are unseen, horrifying things lurking in there and they make their escape as soon as possible. (These things are likely why the enemy, formerly the sidekick of one of Invincible's father's friends, went insane.)
* Invincible are this. The whole Viltrumite race is basically what would happen if Spartans had Superman-like superpowers.
* Invincible, a Russian film set in World War Two. She is an expert tank mechanic who ends up driving a tank in combat, because of events.
* Invincible: At the end of the first season, The Mauler Twins use gas to set their garage hideout ablaze to head somewhere else to set up shop. They didn't get far as the Global Defense Agency managed to track them down, and with them being outnumbered they decide to accept arrest.
* Invincible Boogeymen: An unstoppable monster that you have no hope of ever fighting or defeating; you can only (try to) run far away and hide from them. And even doing that may not guarantee that they won't still be able to get you.
* Invincible Boogeymen: A villain or monster that cannot be killed, defeated, or

even fought; one may only hope to run far away and hide from them.
* Invincible by comparing Mark's mother to a pet whom he would long outlive.
* Invincible came uninvited to their house looking for Mark, and Eve tried to crush Anissa on the spot before Mark calmed her down.
* Invincible captures many of the world's superheroes but doesn't attempt to kill any of them, Atom Eve wonders why not; Invincible suggests that he's "old school".
* Invincible comic books, Dupli-Kate, whose power is exactly what her name suggests, has a habit of using it to engage in threesomes (or more) with her lovers. In one early issue, Atom Eve accidentally discovers her boyfriend fooling around with Kate and Kate and Kate.
* Invincible Darkwing operates in "Midnight City" which takes the dark look of Gotham to the extreme — due to a spell, it's always midnight in that particular city.
* Invincible, Desjani says that the bear-cows must have herd-leaders, not officers — officers would not have broken off from a disabled ship and left the men behind.
* invincible frequently resorted to attacking and or kidnapping her little sister, often resulting in Mt Fiji losing matches by forfeit or count out as she left the arena to go save her.
* Invincible has a variant in the Sequids. One or more Sequids attach to a host, which then comes under the control of the Sequid hive mind; however, the Sequids themselves have nothing other than the basic instinct to attach themselves to other creatures unless they have a host to boost their intelligence and unite the hive mind.
* Invincible has the Sequid arc (starring Invincible, the Immortal, Atom Eve, Robot, and Bulletproof) simultaneously occurring with the Lizard League arc (starring Rex Splode, Dupli Kate, and Shrinking Ray).
* Invincible Hero: A hero who is so super-competent that they seem to be outright unstoppable.
* Invincible Hero attack points and is only beaten by going beyond infinity—and when he loses he summons the soul-eating Leviathan anyway, needing an additional two episodes for the dust to finally settle.
* Invincible Hero). The jinx put on the Thunder by resentful Seattle fans is undeniably powerful!
* Invincible in comparison to the larger fleet carriers. Her primary armament is her fighter complement, but she's hardly lacking in other weapons and is very fast.
* Invincible Incompetent: A character who can't mess up in spite of being incompetent.
* Invincible: In the aftermath of the Conquest event, Eve reforms her body from scratch; Mark soon notes that her breasts look bigger. Eve remarks that when she rebuilt herself some "improvements" were unconsciously made. That said, her bosom doesn't look any different than usual - Eve was always quite busty since day one, the way Mark immediately notes how bigger she is now doesn't match the unnoticeable "change" in her actual design.
* Invincible, Invincible Presents: Atom Eve and Rex Splode, Astounding Wolf-Man, The Pact, Guarding the Globe, Brit, Capes, Tech-Jacket, Haunt, Superpatriot: America's Fighting Force, and Superpatriot: War On Terror. Pretty big for a fictional universe written by one guy.
* Invincible Iron Man has been in a coma and Riri has been aided by an AI of him. When Tony is missing, a huge search is on with various twists and dead ends. Talking it over, it suddenly hits Mary Jane and Riri that they've failed to see if the AI knows about what happened. After a long pause under their gazes, the Tony AI states "To be fair...no one directly asked me before now."
* Invincible is the most boring place in the world, at first. Second time it appears, it's actually interesting.
* Invincible later introduced a character called Bulletproof who used Invincible's initial name and costume. In-story, the costume was even developed for Invincible but rejected.
* Invincible long life spans). One Viltrumite, Omni-Man, proved to be Earth's most

powerful superhero and individual in general during his tenure as a superhero. But at one point there is an alien race with much shorter lifespans, and Allen the Alien is considered superpowered by his own race's standards.
* Invincible, Mark initially worked at a place like this before his superhero duties happily forced him to quit.
* Invincible, Mark's first girlfriend Amber was a Type A as she suspected he was a drug dealer due to his frequent disappearances. When he does finally tell her he's a superhero, she's initially fine with it until she realizes that she's not equipped to handle the knowledge that her boyfriend could die at any moment and wouldn't always be there, and they break up as a result.
* Invincible marries an insect-like alien, and there's a panel of him kissing her and Invincible looking disgusted. According to the sketchbook in the back, the artist made this as a joke and Robert Kirkman decided to keep it in the actual issue.
* Invincible Minor Minion, in a less obvious secret area, and this one spits out fireballs from the background.
* invincible of her weddings to Steve. The first one had his ex-wife, Becky, who was unjustly blamed for pushing her down a flight of stairs and miscarrying their twin boys, reveal that she fell down the stairs and had already miscarried the twins long beforehand, prompting a disgusted Steve to annul the marriage. The second had her learning that a misunderstanding lead to Leanne admitting to her that Steve was the father of Oliver. Having already given Steve a bloody nose in the aftermath, at the reception Tracy tells Oliver how rotten his parents are and brings up how every guy Leanne ends up with either leaving, dead or sleeping with her sister, this causes her to flip out and smush the cake in her face. As Steve cries for help breaking them up, Tim just joyfully records the mayhem.
* Invincible: Omni-Man does this to War Woman, twisting her neck around 180 degrees.
* Invincible only has purple skin to show his mixed heritage, and even that fades as they age to a color within the average human range.
* Invincible on the part of the author when fans pointed out how much The Immortal looked like Honest Abe.
* Invincible operating under the United States government that provides backup and medical care for the world's superheroes.
* Invincible; rumor says that the Space Rider has a weapon whose beams are still traveling through the cosmos and destroying everything in their path.
* Invincible Samantha visits Mark utterly distraught after catching her boyfriend Rex cheating on her with their teammate Dupli-Kate. Mark is comforting her when his mother enters his room and is greeted by the sight of a girl sprawled over her son's lap (both still in their tight superhero costumes too). She immediately marches them downstairs for a talk.
* Invincible serve as president. However, he seems to have a fairly average human memory, and so remembers very little of his distant past — he has only a faint recollection of being Lincoln, and a far-future version of him barely remembered anything about his present-day life.
* Invincible, Tahiri offers sex in exchange for intelligence to a fourteen-year-old Ben Skywalker.
* Invincible, the first time Invincible fights Allen the Alien is in space. To communicate, they talk telepathically.
* Invincible, the fleet no longer has capacity to bring back its dead. Geary arranges for the corpses to be launched into the sun — and those of their enemies as well, since they do not know their funeral customs.
* Invincible, the love of his family ultimately changes Omni-Man for the better, though he spends a long time in denial. Other Viltrumites start falling for this too when they become emotionally attached to the humans with whom they are siring a new generation of Viltrumite hybrids.
* Invincible.) The Pact guys don't exactly like it (the name, not the punch) either.
* Invincible, the title hero doesn't go through with his marriage to a fish-queen-

lady-thing. Instead of running, he pretends to be too scared to fight the monster to complete the ceremony.
* Invincible this trope, but she refuses to switch sides and he ultimately chooses his "duty" over his love for her.
* Invincible: This was the entire social foundation of the Viltrumite Empire, the race that Invincible's father Omni-Man came from. Decades before the comic takes place, the Viltrumites had embarked on a massive cleansing of their entire society for this purpose, based on the teachings of a philosopher, with the survivors rebuilding their society for the sole purpose of conquest of the entire universe. However, this has disastrous consequences when the Resistance releases bioweapon that decimates the Viltrumites, leaving only a few hundred survivors that tries to keep the death toll a secret to keep the Empire intact. On top of that, the philosophy considered social bonds a weakness, despite the psychological need for it still being present, making the Viltrumites mentally unbalanced.
* Invincible universe states that magic is believed to be technology so advanced to be capable of nearly anything. It describes spellcasting and other invocations as a security measures to prevent misuse of such a powerful resource. Rituals and calling on higher powers for desired effects are respectively described as encryption and authorization techniques.
* Invincibleverse from a frail-bodied race where everyone is equipped with a tech jacket at birth. As tech jackets are made with that race in mind, they're programmed to not let the wearer remove them. Zack only received his because its previous wearer was already dying, and so was able to make an emergency transfer to protect Zack from the explosion of its space ship. Fortunately, the tech jacket can retract into the form of a vest that fits under Zack's clothes, and it removes dirt and germs from his body for him, making it unnecessary to bathe. Also, he's been shown to be able to have sex while wearing it.
* Invincible Villain: A bad guy who seems to be damn near unstoppable, if not outright undefeatable.
* Invincible Villain, because it wouldn't be cosmic horror if it were possible to defeat the villain.
* Invincible Villain, from 2002-2005. Ditto for Jeff Jarrett from 2003-2006, so much that fans called him "Triple J" and chanted for him to "DROP THE TITLE!" whenever he appeared.
* Invincible Villains can cut through their barriers and deflect their attacks.
* Invincible Villain since if the killer was easy to kill and never got up again, they wouldn't be a threat and you wouldn't have a franchise.
* Invincible. When they come to a new planet, they cure all disease, end all intra-species war, and share their technology, bringing about an unprecedented utopia, at least until they've sucked the planet dry of all its resources. Then they use the races they've enslaved to help conquer other planets.
* Invincible. When Wolf-Man asks if Invincible will get in trouble for breaking government property and beating up superheroes, Invincible shrugs it off, saying that as long as he's strong enough to save the earth, he gets a pass. While he often blows off the rules for good reason, Invincible increasingly starts to believe that because he's the most powerful superhero on Earth, the rules don't apply to him all. This is treated as a decidedly negative trait, and eventually backfires badly.
* Invincible, which brought together characters of all of the current Image partners (Erik Larsen, Rob Liefeld, Todd McFarlane, Marc Silvestri, Robert Kirkman, and Jim Valentino), as well as Whilce Portacio and several other creators.
* Invincible, with a narrator explaining that they deserved a little bit of privacy.
* Invincible, with Mark's friend William who doesn't want to be called by any nickname, but only by his full name, and has problems getting this done as people think he's rude when he corrects their attempts to shorten it.

* In Vino Veritas, but not as much as fiction would have you believe. Still, ask a detective who has been around for long enough and odds are decent that they will remember at least one case that was cold or on its way to becoming cold that wound up being rejuvenated by a drunken slip of the tongue.
* In "V.I.Peeved", Hector embarrasses his granddaughter Carlota by wandering around the living room in his underwear while she's making a video.
* In Virginia, a gymnast misjudged a distance and rammed her foot into a metal strip so hard three toes stopped moving. She looked at it, debated on whether she could keep going, and went so far as to ask her friends what they thought. When told to go home, she sat down, waited to see if her toes would start working again, and was forced to go home by the instructor. She didn't even limp as she left. The toes never worked quite right ever again.
* In Virginia, a seldom noticed part of the law makes it trivially easy to get out of jury duty. § 8.01-339 of the Code of Virginia says "No person shall be eligible to serve on any jury when he, or any person for him, solicits or requests a jury commissioner to place his name in a jury box or in any way designate such person as a juror." So all it takes in the Commonwealth of Virginia to get removed from the jury pool is to write a letter to your county's Jury Commissioner
* In Virginia, Republican Virgil Goode (who at the time was known for criticizing a Muslim congressman for taking his oath of office on a Koran) aired a crudely racist ad aimed at Democrat Tom Perriello in which Perriello's face was retouched to darken his skin and give him a beard, making him look like a

* Invisibility Cloak. Hiding an object from view is apparently very possible using materials that bend light.
* Invisibility Cloak must decloak before it can fire its weapons. Any ship that can fire while cloaked is treated as a major game-changer and leaves the heroes scrambling to find any weakness to exploit.
* Invisibility Cloak: people can see the cloak when it is in use, so basically the users are walking around with a regular cloak over their heads.
* Invisibility Cloak: The Cap of Hades, which rendered all wearers invisible; later borrowed by Perseus.

* invisibility. Their inability to handle other wavelengths in the EM spectrum has been used as a plot point in the past, and they're generally useless against advanced sensors — in fact, the field's emissions can be detected in turn. That said, starship stealth in that universe still seems to be mostly a matter of shutting down any systems that generate 'noise' and hoping the ship itself doesn't get pinged by an active scan.
* "Invisibility: The Lazy Artist's Friend" features a rare aversion of the dope slap.
* Invisibility. This contradicts the Baratie arc, in which Sanji was shocked to hear that Luffy wouldn't be able to swim, meaning that he hadn't heard about the Devil Fruits' weakness (or possibly Devil Fruits in general).

* Invisible Apartment for people they'd rather be rid of. (One such person, though, actually got sent there on purpose, after getting a chip implanted which would allow enough consciousness to connect to a computer network. Since she's supposedly in a coma, nobody suspects her of being the mystery hacker.)
* Invisible Apartment, Sleepers are put in tanks which keep them alive, but in a coma. This is supposed to be done for medical purposes but is revealed to also be done to people who are inconvenient to the government.
* Invisible Apartment, the city is subject to extensive monitoring. The "invisible apartment" of the title is called that because it's one place which seems to off the registers.

* Invisible Avenger, the Shadow finds Tony's body stuffed into an upright piano in a back room of Tara's club.
* Invisible Backup Band: Whenever someone in-universe plays an instrument, there will be inexplicable background vocals or instruments.
* invisible barrier from your starting position that causes you to "collide with yourself" and blow up.
* Invisible Celebrity Guest - The characters meet a celebrity but we never see said celebrity.
* Invisible Children is being funded by hardcore Christian fundamentalist organizations. This revelation turned off a lot of atheist, agnostic, and liberal Internetgoers.
* Invisible Cities uncertain as to whether or not he can ever be not in the outskirts of that city.
* Invisible Games is a rather straightforward presentation of various fictional games that have supposedly been created over the course of the last century or so. The final entry, however, is an abrupt departure in style. Presented as a follow-up to a non-existent previous entry, the last entry is a surreal first-person tale filled with tantalizing hints about a mysterious sect of women who appear at the homes of the terminally ill. The artifacts they bear are in fact the components of a seemingly supernatural virtual reality machine in which the patients immerse themselves completely in the days prior to their death. The author eagerly anticipates death for the chance to experience the wonders of such a machine and considers dying without access to one to be a tragic fate akin to martyrdom. But the author laments that there is still work to be done and that a storm that has gone on for years is now raging outside. No other updates were ever made.
* Invisible Giant Space Hamster: Able to turn invisible for a short period of time each day. Unlike most AD&D monsters, it can attack without negating its invisibility.
* Invisible Girl Ea (Toumei Shoujo Ea) was shown during this timeslot, although it is a live action series (but based on a game).
* Invisible Holes: A character gets invisible holes in their stomach that when they drink, the liquid comes out of.
* Invisible Holes: Someone is stabbed with no apparent injuries, but when they take a drink, it pours out of holes in their body.
* Invisible, Inc.: All cover objects are treated equally in terms of concealment. Things like bookshelves, lockers, refrigerators and sofas make good cover, but agents can also use floor lamps, coffee tables, folding chairs, and even

transparent glass holding cells just as effectively.
* InvisibleInc becomes available if you beat the game once on Experienced difficulty; and the Contingency Plan DLC adds Olivia and Rush.
* Invisible, Inc., Central states that, if Incognita runs out of power (thus allowing the corporations to find and easily capture what remains of Invisible Inc.), that "we may as well just crash this thing into the ocean."
* Invisible, Inc.: During early testing, doors could be repeatedly closed in Guards' faces to stall them. In the final game Guards will destroy the door if this is attempted, knocking out any Agent on the other side.
* Invisible, Inc., guards are equipped with heart monitors which raise the alarm when the individual is killed.
* Invisible, Inc., in the identity of the Operator, is this; you direct your team through buildings and hack equipment with Incognita, Invisible's advanced computer system.
* Invisible, Inc., it is possible to disable security cameras by shooting them, but it's usually better to disable them by electronic means because bullets are hard to come by (Ventilation systems have sensors that can smell traces of gunpowder, and most weapons are gene-coded to their owner, so your agents can only use specially manufactured weapons).
* Invisible, Inc. pretending to be a human or a human pretending to be an uplifted cat? Even the devlopers aren't sure.
* Invisible, Inc., supposedly. Central remarks in his bio that he "plays the Absent-Minded Professor character well", but can still be relied upon when it really matters. His lines and interactions with the other agents suggest that while he may overplay it on purpose, it's not entirely an act.
* Invisible, Inc., the first heist has the team break into an executive's office and hack his workstation to get data needed to plan future heists. The game has several descriptions of the workstation that it rotates through, one of which notes that the executive is in the middle of a game of Solitaire.
* Invisible, Inc.: Unique to special K&O guards, they grant the highest armor in the game but can be hacked and deactivated.
* Invisible, Inc.: With the mentally-damaging augmentations, ruthless Mega Corps, and flawed, Film Noir style heroes, it couldn't be anything else.
* Invisible Invaders budget allows it to get, full of research equipment and with a large garage.
* Invisible Invaders, since the zombies aren't contagious and humankind quickly finds a way of dealing with them.
* Invisible Invaders: The aliens possess corpses and makes them attack the living.
* invisible is set on fire by Elisabeth Shue (having a latex mask doesn't help in that situation...).
* Invisible Jerkass: An invisible character who uses their invisibility to do dickish things.
* Invisible Jerkass is that morality is rooted completely in society, and with anonymity, all morality disappears.
* Invisible Jerkass: They're everywhere, and could come at you without you realizing it.
* Invisible Lt. Weitzen snaps shoots and kills five people at the shooting range.
* Invisible Main Character: A story where the main character temporarily becomes invisible.
* Invisible Man, Brother Tarp got the limp in his leg from dragging a chain for nineteen years, six months and two days until he escaped.
* Invisible Man describes himself as the class clown, as a side effect of been invisible (and thus often ignored).
* Invisible Man, in which characters do their very best not to bring up the subject of race relations.
* Invisible Man series subverted it. They knew it was possible to create more invisible humans (and they created invisible experimental rabbits) but since they could not yet make the subjects visible again...
* Invisible Man, the protagonist puts on a pair of dark sunglasses, and finds

himself being mistaken for Rinehart.
* Invisible Man, though rather than using gold and such, he wears "the costume of an Abyssinian chieftain." The narrator mocks him for it, but at least the spear comes in handy.
* Invisible Man (which she technically is), but in the sense of having herself more than a few issues relating to how she's been sexually stifled. She feels she will be liberated if she's raped by a black man, and when the main character gets her drunk enough to convince her that he did the deed (without actually having done it), he remarks that she was "raped by Santa Claus," as he was to her just as much of a fantasy gift-giver.
* Invisible Means Undodgeable: When a being is invisible, people will always bump into them by accident.
* Invisible Mom, Laura becomes invisible after drinking her son's cola, into which, unknown to her, he had dumped a portion of her husband's invisibility powder.
* Invisible Monsters gives a pretty good idea of why this is a bit of an upsetting thing.
* Invisible Monsters (i.e. "Now turn to page X"), the knowledge of how and when the book ends comes as a total surprise.
* Invisible Stanley, Stanley helps a shy couple get married by creeping up invisibly behind the man, imitating his voice, and proposing to his girlfriend.
* Invisible Streaker, wears a black ankle-length trenchcoat, a matching fedora, and pince-nez sunglasses. The conspicuous part comes in when he doesn't put on his greasepaint makeup, and thus the ensemble appears to be floating along all by itself.
* Invisible Streaker: You have invisibility, but the power does not affect your clothes, requiring you to strip naked to avoid being seen.
* Invisible Sun, but more often than not they must be earned by characters.
* Invisible Sun. Dexter intentionally hides his intellect from them, but at the same time they don't put much notice to him anyway:
* Invisible Sun: Due to any laws of reality in the Actuality being arbetrary at best, buildings in the city of Satyrine stretch in impossible directions and streets wrap around themselves like Mobius strips. Structures move, and avenues repeat. Places trail off into seeming nothingness. Until you really know your way around, getting lost in Satyrine is practically a given.
* Invisible Sun has players as magic-users called vislae who have discovered the Actuality, a dream-like dimension of magic and imagination. With its fantastical nature, the imagery can quickly go from semi-normal to nightmarish when spells are used, leaving characters covered in screaming mouths, having eyeballs for fingertips, or any other kind of twisted deformations that they can use to hurt others... or as an advantage for themselves. The horror comes especially when the story involves a horrific war of magic that happened in the past and caused many vislae to flee the Actuality in the first place.
* Invisible Sun has the Goetic Order, magic-users who can summon entities such as angels, demons, spirits, or other creatures from across many realms and universes. Thanks to the nature of Actuality, these are likely not going to be beautiful people with wings or imps with horns, or even conventional beasts like dragons or elementals, but extremely abstract creatures reflecting the dream-like and bizarre nature of the realm.
* Invisible Sun, it is a piece of land hung from hundred of wires, ropes, and chains beneath the structure of the city itself.
* Invisible Sun's Actuality, seasons may pass normally in one place, pass in a different order, or even be skipped altogether. This doesn't just hold for the different Suns; because of the bizarre way things work under the Invisible Sun, it can even scale down being different seasons between different districts within the same place. In Satyrine, the magic-centered district of Fartown is permanently locked into autumn, even while the seasons pass normally in the rest of the city.
* Invisible Sun's impressive (and expensive) Black Cube not only includes all the books, markers, and boards you need to play, but other hidden goodies for those who inspect their sets very carefully or have an eye for detail. Known ones include a

bonus spell, an address to a website with a purpose yet to be revealed, a code that needs to be decyphered, and hidden messages and information in the artwork and layout of the books.
* Invisible Sun with the Insidious Song, a disease in musical form that lives in the mind of a thinking being, its simple but catchy tune echoing over and over. It is impossible to get the song out of your head once it takes hold, barring some kind of curse removal magic. The Insidious Song is highly contagious and tries to get those in its grip to hum or sing enough of the tune so it also spreads to other minds.
* Invisible to Adults: A supernatural being that only children can see.
* Invisible to Adults: Babies are never fooled by the substitute for their mothers, however good the illusion is.
* Invisible to Normals: A being who can only be seen by unusual people.
* Invisible to Normals: Muggles literally cannot see some supernatural things.
* Invisible Wall, because sometimes developers just don't care. There's not even a flimsy justification for why you can't go that way. You just can't.
* Invisible Walls are never used, as environmental obstacles are favored in every situation.
* Invisible Walls, usually at the bounds of the map. The player can find even greater heights to jump from without fatality, or even sometimes without major injury, and still die when jumping off map-edge ledges, while the little posts with bleeping lights on them tell you that the dastardly EDF have erected an invisible wall in the middle of this empty field.
* Invisible Werewolf Dracula Meets Vampire Mummy Frankenstein by entering the body of a black cat.
* invisible when he defected from the cult and killed people to live in their homes while on the run.
* Invisible Woman: She's an invisible woman, though the name doesn't mention her forcefield powers. However, it was the full extent of her powers when first created and named — the forcefields came later.
* In "Visiting Old Friends", when Caboose gets in touch with his "angry side" in order to fight off the
* In "Visitor From Italy", the pizza chef in the restaurant where Lucy works was played by chef and restaurant owner Aldo Formica, who also taught Lucille Ball to twirl pizza dough so she could do it in the episode. Nineteen years later, he played a similar role in an episode of
* Invitation to Hell features the main character putting on an experimental thermal spacesuit (meant to withstand the atmosphere of Venus) that he has been developing to venture into bowels of Hell itself to rescue his family. The suit comes with a laser gun.
* Invitation To The Game: Near the end, the small tribe of main characters believes they're still in a virtual-reality world until they realize that they can see the Milky Way from outside it, and there's no moon.
* invited and stated while they're not his most favorite team, he doesn't hate the X-Men and acknowledged that there were plenty of bad storylines that have nothing to do with them and they actually had some great storylines and good characters in its roster.
* invites this, with all attacks having names like "White Raven Strike".
* inviting the reader to the study of "a subject that makes strong men and women tremble" — the law.
* In "Viva Ned Flanders", Homer and Ned wake up from a Vegas bender to discover they've married cocktail waitresses.
* invocation finds out for the first time just how powerful he's become... he knocks a bear out with a desperately flailing kick. For scale, bear in mind that Charby has the body of an 8-year-old boy.
* invocation of an advantage after she had decimated the Quincy cadets.
* Invocation of this trope also created an interesting situation for the production staff of the
* Invocations: The most spell-like system, Invocations are spell-like abilities

used by Warlocks and Dragonfire Adepts. They tend to pack less punch, but totally avert
* In "Voices in the Earth", the ghosts of the dead Earth possess Professor Donald Knowles and make him attack his ship's sensor web. Their hope is that he will be sent back to Central and that they will be able to accompany him. They are unable to travel through warp space themselves without being destroyed or driven insane.
* In "Voices in the Earth", the historian Professor Donald Knowles visits the
* Invoked #15, when Cassie talks the others into helping her shut down a fast food restaurant that uses live parrots as a gimmick.
* Invoked (2-4), due to an in-game crisis causing Phoenix to deliberately stall for time.
* Invoked" ability on him, reinforced with a class-action suit alleging that the ability is harmful to the targets:
* Invoked about her. When she wins, he thinks it means that he has to give up, but she tells him she still wants to date him but that she appreciated the respect of courting her as a warrior.
* Invoked a chance to try, reasoning that if she wouldn't be able to do it if she didn't truly want to die. She turns out to be right, but the other characters are still furious when they find out.
* Invoked, Action Man is a single agent, trained to "physical and mental perfection", who can operate in situations where a larger team can't.
* Invoked actually being really small and very close to Earth. Apparently this is a secret that only scientists know.
* Invoked, after a fashion. The Hero's Association isn't sure if Saitama is really strong or is just a fraud getting credit for the victories of others. They decide to promote him anyway; either he deserves the promotion, or he doesn't and will soon be killed by more powerful monsters. Of course, he
* Invoked, after an encounter with a bat trapped in the building, Jim starts faking symptoms of vampirism (getting burned on garlic bread, for instance) to fool with Dwight.
* Invoked after Khosheck, the cat found hovering in the men's bathroom, gave birth to a litter of kittens.
* Invoked; after Pinball intentionally sets fire to a fellow prisoner to create a distraction for the other more dangerous prisoners about to attempt to hijack the plane, in the middle of all the confusion Pinball humorously exclaims that this was an act of spontaneous combustion.
* Invoked after they stole something, the sisters occasionally con the cops into doing what they think are the better measures to safeguard an item... which instead leaves it wide open for stealing. Most of the time, though, they are showing off.
* Invoked again in "Vacation Goo", when Francine realises that she's in the
* Invoked against Miley by Rico as well, when he tells her "It's a good thing you're pretty". He even dismisses his '
* Invoked again when Critic and Hyper Fangirl have a tie in their Old Vs. New debate on Disney's classic animated
* Invoked almost verbatim by Cristina in the episode "Complications of the Heart", after a surgery wherein both she and the more experienced Dr. Altman forgot how to perform a very basic procedure and ended up needing the nurse to bail them out.
* invoked and aggressive as other examples it does however convey the unease at another brutal war against Germany.
* Invoked and a tagging gun to Leonard, but it turns out to be a prank and gives him another transporter.
* Invoked and averted again in another story where one of Richie's many uncles is highly eccentric and prints his own money, but averted when it turns out that Richie's dad has an arrangement with the people who deliver supplies to the uncle where Richie's dad will replace all of the uncle's "counterfeit" money with genuine currency.
* invoked, and by the time the next opportunity rolled around dragon civilization was too fragmented to repeat the attempt.
* Invoked, and deliberately leaves one lying out of sight when he clears up the

others.
* Invoked and discussed in the "Right to be Forgotten" segment, where the man who petitioned for it to occur in regards to his personal debts from 1998:
* Invoked, and his role in starting the company has long since been forgotten.
* Invoked and its "Vat of Acid Episode". The titular vat of (fake) acid — actually flat mountain dew — is used to fake Rick and Morty's deaths, and has a little compartment in it marked "in case of ladle". The compartment contains a laser gun, and the intended use is clearly to melt any inserted ladle or spoon in order to convince people that the contents of the vat are indeed acid. Rick pulls it off, but when Morty tries it, he ends up hitting the person holding the ladle instead.
* Invoked and justified regarding the details and circumstances regarding the Grimm. The truth about the Grimm and the origins of the Huntsmen Academies is part of an
* Invoked and made a mistake in his haste: the undead raised with their memories and personalities intact, and most tried to return to their normal lives.
* Invoked, and/or uses their knowledge of a trope as a reason for their own actions, hoping that the effect will come through.
* Invoked and parodied by the narration when Ruka is introduced. Without prior knowledge of the character, you
* Invoked and partly averted in a story where Richie's mischievous cousin Reggie Van Dough prints almost-perfect fake money to use to prank people with. The partial aversion comes about because Richie has an actor pose as a treasury agent to warn Reggie that he's actually breaking the law by pretending that the notes are real, even though he intended to give the people the same value in real money later.
* Invoked and subverted by Maeby, who wants Steve Holt to think Lindsay is her
* Invoked and subverted in a third episode. Bobby and Cindy complain to Emma that there is a mouse in the house. Emma tells them to make a pet out of it. Bobby and Cindy are shown petting it and clearly not afraid of it.
* Invoked and subverted in the anime when Happy attacks some Edolas soldiers with a bag of white "Poisonous Mist", which is actually harmless flour.
* invoked and suspend the player and/or coaches for additional matches due to unsportsmanlike conduct.
* invoked and the man uses his ability to defeat the general, leading to him being crowned king and then proceeds to use the power to solve all the kingdom's problems, playing the trope straight in the end. He also finds that he actually enjoys giving oral sex, preventing him from being ashamed by his reputation as "King Blowjob".
* Invoked anime; Pearl has to jump onto a box in order to see over the Defense Stand.
* invoked a non-disparagement clause sums up why this was a terrible idea:
* Invoked another time. Rachel, as a grizzly bear, is injured and passes out near a colony. Said ants were
* Invoked Anya attacks Bismarck, accusing him of being in on it, so that he'd be on the defensive and wouldn't question her.
* Invoked. Anyone thought lost or gone missing is assumed to have been "either anal probed to death or turned into a cyborg."
* Invoked (appropriate given his claim that his homeworld was 40 light-years from Earth).
* Invoked are a good way to get people to wonder why you're denying it.
* invoked are trans-humans called NEXTs with extraordinary powers which they use to save people and stop crimes, all of which are recorded by Hero TV for people's entertainment.
* Invoked as a homage to the film. Otherwise averted with their historically accurate vehicle range and army lists.
* Invoked as a plot point in the Chanukah episode; when the babies mishear "the meaning of Chanukah" as "the meanie of Chanukah," they decide to put him down for a nap. First, they try blankets and a pillow, then they try using a portable TV (which breaks). Finally, the "meanie", Shlomo, takes his nap as Boris tells the

Chanukah story.
* Invoked, as in, Mikan's face is on his crotch. Understandably, she is completely pissed off.
* Invoked, as it turns out — one of Marena's many resentments towards her.
* invoked, as narrated in "Name Hunt Station". Lo Po Bia Elaine was to become selected as a Princess of Jahad, but just before it, she fell in love with a boy at first sight. Unfortunately, he had been sent to test her to see whether she had it in her to become a celibate princess.
* Invoked as part of a scam played by Homer and Bart. Bart portrayed a blind kid with a cake for his deaf sister (really just a frosted throw pillow) and stood next to someone so they would knock it over. Then Homer stepped in and threatened the mark to pay them for the "cake".
* Invoked as part of Frenchie's back story. An American on holiday in France draws ire when he claims the US liberated France single-handedly, going so far as to call the French
* Invoked. As the then-existing crime of treason had special rules that made it difficult to prove and prosecute, and because treason law was believed not to apply to saboteurs, Parliament created the new crime of treachery, very similar to treason but without the special rules and definitely applicable to saboteurs. After WWII, the special rules for treason were abolished and the Treachery Act was repealed.
* invoked as the vile murderer Frank after a career of playing straight heroes.
* invoked, as Wedge Antilles wanted pilots who could double as commandos in a pinch. Therefore when re-forming Rogue Squadron in the eponymous book, if given the choice between two pilots of equal skill, he always picked the one with useful ground-based skills as well. Done the other way around in the Wraith Squadron books, where Wedge wanted commandos who could fly fighters as well.
* Invoked A timeless, immortal being who came into existence by "crawling out of a mountain somewhere", he exists only to prove his strength and destroy all who dare challenge him.
* invoked at the Battle of Lepanto, where both flagships fired a single cannon shot before the clash to reveal their position to their enemy; the two flagships then locked bows for a vicious seesaw fight as more and more galleys piled onto the melee in the center. Despite nearly being overrun during the battle, Don John led his men to storm the Ottoman flagship, where Ali Pasha was killed, his head raised on a pike, and the banner of the Holy League raised over his flagship, thus breaking the morale of the Ottoman center.
* Invoked: at the beginning of the episode, Babish will deliberately make a mess in some completely improbable way just to have an excuse to demonstrate the sponsor's cleaning ability.
* Invoked at the elitism of the corners of the internet that birthed it.
* invoked base, leaving both the trackers and the readers confused as to his true loyalties.
* Invoked. Bond visits a gunsmith, who has just completed a custom-made rifle for a client who is missing two fingers; if fired by anyone else, it would shoot an inch below the target. Bond then aims the rifle at the gunsmith and orders him to tell him what he knows about a different client, the assassin Scaramanga. The gunsmith is scared but won't give up the info. Bond fires — between the man's legs.
* Invoked Bonus points for the first twilight of the third game: six people are found dead in six separate closed rooms, each victim having the key to the next room near their corpse.
* Invoked book, where he uses a mother insult to lure some dockworkers out.
* Invoked both have disdain for the federal government, but when Tim wants to force the government to default in order to control spending, Pete is horrified.
* Invoked but subverted in "Mr. Spritz Goes to Washington"; Krusty's rival for congress shows an old sketch where he interprets insensitive stereotypes in a UN meeting (A strereotypical frenchman who stinks worse than his french cheese, a potheaded rastafarian from Jamaica and a San Francisco homosexual). Krusty tries to defend himself by saying that it was a different time...

* Invoked but subverted in the Lenses of Invincibility arc; Mousse buys tickets to a horror-themed waxworks exhibition, hoping that when he brings Shampoo here, she will cling to him in fright. Instead, she just finds them disgusting and beats Mousse up for bringing her to such a place.
* Invoked, but two different energy sources for these beams are introduced to provide limits.
* Invoked but ultimately subverted by Petyr "Littlefinger" Baelish. He meets with the Lords Declarant, lords of the Vale who want to remove him from his position of
* Invoked by a Canadian broadcaster promoting audio described programming for the vision impaired; the ad starts off blurry, looking like something, but then the scene is revealed to be something else, with the justification that without described video, someone vision impaired wouldn't know the scene was the other thing (i.e. sounding like a woman giving birth in a hospital, but actually a couple unsuccessfully trying to cram a sofa into an elevator)
* Invoked by accident during a game on , when Ryan claims to be of Dutch origin in a skit, then slips accidentally into an Irish accent. "We did a lot of moving around, my father was a military man..."
* Invoked by a disguised Oswald in "Follow the Leader" when attempting to throw Greta off of her suspicions that he, Omar and Orla are stalling.
* Invoked by Allah himself in one of the very few miracles stated to have happened around Muhammad is, when he was escaping the city of Mecca and the Qraysh who were out to kill him, that he and his friend Abu Bakr hid in a tiny cave. Their pursuers followed their track to the entrance of the cave, but in the meantime a spider had woven her web all over the entrance and a dove had set her nest there. They decided that clearly no-one had gotten in there, and resumed their search elsewhere.
* Invoked by Alton for a sabotage in "Camp Cutthroat" — the sabotaged chef is followed everywhere by a small localized rain storm (i.e. a Bob carrying a hose with a sprinkler attachment).
* Invoked by Amon when he stated this as a major part of his plan needing followers to accomplish what he was doing, therefore avoiding actions that would put him in a negative light until he had enough.
* Invoked by another female—Bridget after she's annoyed that her mother starts dating.
* Invoked by a Romulan defector who was considered a war criminal for leading the Norvok massacre. He tells Picard that on Romulus, it's called the Norvok campaign, and notes that

* Invoked by early 1990s ads for Listerine, with the tagline "It says what it does / It does what it says".
* Invoked by Eddy in "High-Heeled Ed", who says they need to get in touch with their "sensitive sides" in order to make products that appeal to Sarah, Jimmy, and Nazz.
* Invoked by Elizabeth — and Theo in the PSP re-release — who refuses to tell the player
* Invoked by Euphemia, who recommends to Lelouch that he finds a good-looking guard for himself. Euphemia herself has a romantic relationship with her personal guard, Knight of Five Albert Raleigh.
* : Invoked by Fu Dog. When he hears the Dragon Council is offering a knighting trial, he says "if I was drinking something right now, I would’ve sprayed it everywhere in astonishment!".
* Invoked by Gul Dukat in "Ties of Blood and Water." Sisko pours him a drink from

a bottle of
* Invoked by Hyde when Kelso hooks up with Eric's slutty sister Laurie.
* invoked by Irie. He's constantly cooing over Satoko and saying he wants to marry her, but behind his ditzy facade it's shown that he only sees her like a daughter.
* Invoked by Irina, who as the language teacher spends an entire lesson trying to get the students to avert this.
* Invoked by Jerry in "The Little Kicks". Jerry asks Kramer to pretend they're talking about something interesting, so Kramer says "So I killed the guy, and they're still looking for me."
* Invoked by Kaede when speaking with "Kunel Sanders", a mysterious, suspicious, and very powerful man who is interested in Negi but refuses to say why. In the end, it turns out that he is trustworthy, but he also admits people tend to not believe his smiles.
* Invoked by Kili when she takes a trip to the part of the spirit world
* Invoked by Kimberly at SHINE. In her effort to turn around her losing streak, she attempted to team up with every wrestler who defeated her. Leva Bates was the only one who accepted though.
* Invoked by Louisville basketball player Kevin Ware during the Louisville/Duke "Elite Eight" game on March 31, 2013. (The winner of this game would go on to the "Final Four" round of the NCAA championship.) After a freak accident left Ware laying on the court with six inches of his tibia sticking out of his lower leg, he kept telling his teammates "I'm fine.
* Invoked by Lt. Daniels when he is explaining to the commissioner why his team wants to arrest a drug dealer who is not likely to turn informant for them: they are
* Invoked by management when it comes to supermodel Natalie Nelson. She's Mexican-Italian and was given the stage name
* Invoked by many black rappers and a few R&B artists that were known to sport cornrows. It's usually a sign that their music is about to take a more mature, down-to-earth, and mainstream-friendly turn.
* Invoked by Meg when she possessed Sam and tried to convince Dean that his

* Invoked by Nakmor Kesh after finishing Drack's loyalty mission, assuming Ryder has William Spender arrested. She makes sure every airlock on the Nexus is working properly, just in case someone decides Spender should have an "accident". She has every reason to hate the guy, but no-one's getting airlocked on her watch. Though she's not above threatening to use the airlock on him herself, like she did the time he tried to reroute the power that's keeping all the stasis pods on the Nexus functional.
* Invoked by name by Austrian sailors after winning the Battle of Lissa, remarking that "Men of iron on wooden ships have defeated men of wood on iron ships" after doing exactly that (a division of Austrian wooden steam warships had caught by surprise the Italian ironclads. Various wooden vessels got disabled, two ironclads were sunk — despite Italian navy having numerical and technological advantage

* Invoked by Otto Hofmann, Chief of the SS Race and Settlement Main Office, who after introducing his title self-consciously adds "we deal with matters of race and settlement."
* Invoked by Reese's, with an advertisement mentioning déjà vu to represent the two cups in each package. The commercial is then played again.

* Invoked by serial killer George Marks as he's talking "hypothetically" about his crimes.
* Invoked by Spartacus' friend Varro. A Roman citizen who'd sold himself into slavery to cover his gambling debts, he hopes to win enough money fighting in the Arena to cover the remainder of his debts and earn his freedom to be reunited with his (still free) wife. This also does not go according to plan.
* Invoked by Stephen Colbert during the Wisconsin Teacher's Union Strike. Hi, Stephen!
* Invoked by Syaoran when a nosy healer interrupts his reunion with Kurogane. He decides to mess with both of them by undressing and giving Kurogane a passionate embrace to make the healer think she interrupted much worse.
* Invoked by Terrence on Pearl. She vehemently refuses as she's long moved on from Gavreel.
* Invoked by the Asgard Thor, who will occasionally "borrow" SG-1 to deal with an Asgard problem when they are totally stumped. Because as a highly advanced and logical race, he feels the Asgard lack the capacity for "stupid ideas" that end up being extremely effective, which SG-1 has a history of coming up with on the fly.
* Invoked by the assassin bug. They invade ant nests, and glue the empty carapaces of their victims to their own. Ants, due to their
* Invoked by the crown inheritance of the Assyrian Empire. As often the case in polygamist cultures, the heir of the throne did not follow the primogeniture but rather
* Invoked by the IPv6 Experiment. Now over, it was an attempt to get people to switch from version four of the internet protocol to version six, by enticing them with free porn only available to those with IPv6.
* Invoked by the little mermaid herself, who chooses to spare the prince at the cost of her own life.
* Invoked by the Nazis on Erwin Rommel. After they found out he was a co-conspirator in the July 20 plot to kill Hitler, they gave him a choice: Either he could face trial (which would be
* Invoked by the Night's Watch and the Kingsguard, who wear black and white respectively in place of heraldry to signify their rejection of any prior allegiance.
* Invoked by the recurring sketch "Delicious Dish", which features a boring, cooking-related radio show. In the most infamous instance, the "Schweddy Balls" sketch, the audience can see that the two radio hosts are actually eating Pete Schweddy's chocolate malt balls, but the unseen radio listeners would be getting all the unconscious innuendo.
* Invoked by the Space Wolves, whose assault troops (bikers and jetpack troops) actually are their youngest members, fresh from being selected from the wounded in Fenris' many tribal battles,
* Invoked by the US military after a massive earthquake and tsunami struck Japan on the 11th of March 2011. The aid mission that they launched on the 12th was called "Operation Tomodachi" (Japanese for friend).
* Invoked by Valchek at the end of Season 2, as the whole purpose of the case for him is to ruin his rival Frank Sobotka. While the rest of the suspects are taken in a carefully synchronized dawn raid, the ones tasked to take Sobotka are told to wait until he's at the union office, and once they've gone in they wait until a suitably sizeable press gang has assembled before Valchek personally walks him out to the car.
* Invoked by Vanity Smurf on Smurfette to keep her from sneezing when the feather in his cap tickles her nose in
* Invoked by Victoria in the episode "Drumroll Please," where she, during her first encounter with Ted at a wedding, insists they
* Invoked by Voldemort, who planned on splitting his own soul into seven pieces — six
* Invoked by Warrant Officer Thurl. Thurl is the oldest member of Tagon's Toughs, and the only reason paychecks go out and supplies come in when they're supposed to. He is very happy as an NCO and has threatened to resign the minute anyone offers

him a commission.
* Invoked came up with a bizarre, completely incomprehensible filing system for the express purpose of making herself irreplaceable.
* Invoked. Carrie responds by pulling out a set of dominoes for them to play with, stating they two can have lots of PG-rated fun.
* Invoked claims to hide his insecurities behind "muscles and tough-guy cologne", part of his overly masculine façade to hide the fact that he's gay.
* Invoked comes to an end partially because she believes this (although said character doesn't really fit this trope.)
* Invoked comic, based on a real conversation between the artist and writer. The image is no longer on the site, but Tycho showed a vertical banner meant to be hung in one of their convention halls. Gabe was positioned below Tycho, giving a thumbs up, but his hand happened to be placed exactly on top of his crotch, making it look like Gabe was giving Tycho an eager handjob.
* Invoked, complete with the book's name dropped and a quote from its pages.
* Invoked dates and then told fans that PWG was an excellent promotion.
* "Invoked/Defied in vain" (Invoked/Defied examples should end in success. If a character attempts to Invoke a trope but fails, this is a Subversion.)
* Invoked devoid of all life until the suspect was captured in Watertown later that night just ten miles away.
* invoked due to their charming nature. Their evolution, Liepard, isn't much better. They're both also Dark-type Pokémon.
* invoked early on. After Rias promised Issei the chance to grope her for completing a contract, she springs it on him so suddenly she counts to five before he can even touch her, leaving him incredibly disappointed. She compensates him by letting him feel them with his chest as she hugs him instead. Issei's goofy smile and transparently half-hearted objection show he's more than okay with doing it that way.
* Invoked Einstein-style in the space travel portions of Robert J. Sawyer's
* Invoked. Elan manages to find a treasure chest while walking around.
* Invoked, Elizabeth and her mother were both accused of witchcraft at different times, but the accusations were of course not actually true, nor were either of them or Elizabeth's daughters ever burnt to death.
* Invoked, Ellen. Because she wants to break away from Elliot's person, she deliberately acts outgoing and flirty, while Elliot himself is reticent and prudish.
* Invoked episode "Big Ball". Mung and Truffles and their teams are fighting when the horn sounds for "official tea-break time". Unfortunately, while Mung and his team are drinking tea, Truffles uses the opportunity to score a goal.
* Invoked episode "The Downer": Gumball can't find anyone in his house and tries to see if he can get their attention by knocking a lamp over, causing it to knock over the TV, which then knocks over a bookshelf, but a rubber ball and a vase fall off the shelf, the vase bounces off the ball and back on the shelf, straightening it and the TV and knocking the lamp against his head.
* Invoked episode "The Line". After Cary is arrested, Lemond Bishop tries to have one of his guys on the inside cut one of Cary's fingers off to remind him to keep his mouth shut. However, Cary had just helped the would-be finger-cutter with his own case, and so talks his boss down to giving Cary a gash on the palm of his hand. He tells Cary to say he tripped and fell against the bars, and Cary maintains that story to Alicia and Diane, though they don't believe him.
* invoked espouses it. In a different episode, Friday recommends that a teenage boy try the local library instead.
* Invoked (even the happiest of them all!) has some rammifications on either the main character, humanity or both. Though it's left up to the player to decide which path is the best and follow it.
* invoked example. She's a never-attainable ideal for Scarlett who knows her temperament and pride will never allow her to become like her mother. From how the family and especially her husband Gerald function (they don't, really) when she's gone it's quite clear she was the pillar of the household. Even some of the slaves

say they miss her dearly.
* Invoked, forging a note that claims he left to help solve a crisis in Namibia.
* Invoked for humor (and Deadpool) generally have no problems swearing elsewhere in the video.
* Invoked freedom fighter." Miriya abided by it but still played an important role in the finale (and returned to badass status during the Sentinels series).
* Invoked Further subverted by the fact that Dana, who the technicians had set up to become "The Virgin", was in fact screwing her professor in order to pass the class, while Jules, who had been picked as "The Whore", was the smarter and more wholesome of the two before she was drugged.
* Invoked. Given how many predictions he'd made about the video game industry that had come true despite people pooh-poohing them, he started referring to himself as the Cassandra of video games.
* invoked) goes to the movies on a date. Afterwards, she says seeing the movie helped resolve her problem. Her date remarks "I knew you only needed one good flick!"
* invoked, guarding the older Japanese stand-in, as a way of explaining why American forces are stationed in Japan through a Beautiful lens.
* Invoked has been harassing Charlie Collins, an ordinary guy who cut him off on the freeway two years prior, and eventually blackmails him into helping with the Joker's latest evil scheme. Finally, Collins gets fed up and threatens to blow them both up with a bomb, thus ruining the Joker's dream of a climactic showdown with Batman:
* invoked. He has tried to cover this up by... slightly darkening Starla's coat, which he feels "ruins the design".
* Invoked. He splashes water on his face making it look like he's sweating buckets.
* Invoked himself sent to their room without supper (though most of it was Mr. Herriman doing it to cover up his carrot addiction). So Frankie takes particular delight in dumping the entire bowl of "it" onto Bloo's plate since he's the only one left who hasn't "gotten in trouble". And then she brings him more during the credits to punish him for all the things he did to try getting in trouble, meaning he did get punished...by being fed something that constantly makes him puke.
* invoked. His long-time job partner Sophie goes to meet up with a stranger in his mansion, hoping that he will ask for her hand in marriage. Sid is furious and seeks out the stranger's address to gatecrash on the date, with the help of a client that he's had eyes on for months. The client storms into the house and pretends to be a vulgar ex-girlfriend that wants Sophie's date back, and jumps on the man just as Sophie marches into the room. Before they all know it, an angry wrestler (who's the ex-boyfriend of the client of Sid's affections) arrives at the front door after receiving a phone call from Sid about his "girlfriend" being kidnapped by the lunatic master of the house. Sophie storms out of the mansion in annoyance.
* Invoked. Humorously, up to the point of their announcement in the TCG, fansubbers of the show never caught that meaning, assuming it was "Exceed" because it was the closest-sounding actual word.
* Invoked, if averted, in the short story "Miss Patterson's Pageant" where the narrator actually wished he had been cast as a tree, because he thought he might have been able to do the part justice. Instead, he got cast as a shepherd, which didn't go so well.
* Invoked improperly after the Spike/Drusilla fight in "What's My Line, Part Two", which takes place in a burning church. Later, in "Surprise", the Scoobies suspect Dru may have survived, with Buffy saying, "We never found a body." Oddly, no one points out that vampires don't
* Invoked in “The Baseball Game” for the outfielders' names.
* Invoked in 2011 when Princesa Sugehit paraded around arenas in a shirt that had "bimbo" on it.
* Invoked in a commercial for Netflix. A hockey coach motivates his team by saying, "Do you remember that scene from that movie on Netflix? The team was down, and the coach, he gave that speech. Yeah yeah, you remember that scene? Remember what he said? Well that, gentlemen, is what I’m saying!" Judging by the

players' wild applause, this worked.
* invoked. In actuality, gut flora are the rule rather than the exception in the animal kingdom.
* Invoked in a grand display of helicopters and napalm bombing during
* Invoked in a later scene. While on the island, Marty serves a drink to Alex, but he spits it out when it turns out it's sea water; Marty tell him that he wasn't supposed to drink it, just spit it out. (it's just temporary until the plumbing comes in). At the end, everyone has a Spit Take-fest.
* Invoked in another joke. A very old man goes to the doctor for a check-up and proudly mentions that
* Invoked in a series of French billboards displaying an American cultural icon and its respective release dates on either side of the Atlantic (chewing gum, 1870/1918; sneakers, 1864/1935; electric guitar 1955/1964; cupcake 1952/2012; skateboard 1957/1965; jeans 1874/1945) before asking "Why should the Americans get everything before us?" Then revealing it's for a channel that shows
* Invoked in a thought experiment brought up about the abortion debate, where you are asked to be connected to a concert pianist or rocket scientist for nine months because they need your blood supply to live. Pregnancy itself is also an example for the developing fetus.
* Invoked in a very unique fashion towards the end of the first volume of
* Invoked in "Blood on the Scales". Gaeta and Zarek launch a mutiny and attempt to oust Adama from command. Roslin manages to escape
* Invoked in chapter 33 when the narration states that Yui should be there to give both
* Invoked in "Chef Goes Nanners" by Ned and Jimbo. In a desperate attempt to keep the city's racist flag unchanged, they disguise themselves as members of Ku Klux Klan and suggest voting to change it. When asked why, Jimbo explains that if the Klan votes to do something, the city, not wanting to side with racists, would vote for the exact opposite, and since the racists are in the minority, they're sure to lose. Thus, the flag would remain unchanged. The Klan agrees on this.
* Invoked in Cheris' guide on how to handle Jedao, which mentions that in case he's uncooperative, the vessel should swallow wraith glass, which will, quote, "give the general a body so that he can be tortured".
* invoked. In fact, it is the only customizable major character in the game to not have a Mii head.
* invoked in France. Mel Gibson persuaded local newspapers to print an article about how the film was "too hot for France!" despite the fact that French cinemas had been very interested in carrying the film since its announcement.
* Invoked in Friedrich Schiller's ballad "The Diver" (Der Taucher, 1797): A king who wishes to know the secrets of the deep sea throws a precious cup into a whirlpool from a sea cliff, challenging the knights of his retinue to retrieve it. The only volunteer, a young squire, manages to find the cup, but only narrowly avoids being sucked into a deep abyss. Gazing down into the deep sea—which he refers to as a "Hell-maw"—he sees many sea-creatures, which he describes as "dragons", "monsters", and "phantoms" (such as
* Invoked in "High Heeled Ed" after Sarah brutally attacks Eddy in her usual way:
* invoked in Jerry's Diary, where Tom laughs off the first incident described in the titular diary, but then becomes steamed as he reads about Jerry's other slights against him.
* Invoked in "Kick That Soccer Ball" by US Soccer Guy; an aversion of
* Invoked in "Liquid Plumr" commercials: two plumbers show up at the house (one with a pipe-snake, and another with a liquid unclogger), speaking in seductive voices... and they
* Invoked in "Live Free Or Twihard" where a group of vampires was shown to be taking advantage of the sudden romanticism of their species due to
* Invoked in "Make New Friends But Keep Discord", when Discord threatens to banish Tree Hugger to an alternate dimension. What we see of it consists of a cheaply-made sock puppet and a crayon drawing.
* Invoked in "Odd Squad in the Shadows", where Odin, challenging Omar the "Shadow

King", says that the loser of the shadow duel has to say "Hey, good job" to the winner, and mean it. When he ends up losing to the King, he makes good on his deal and congratulates him for his win.
* Invoked in "One Good Scare Ought to Do It!"; Phineas and Ferb's haunted house's animatronics are controlled by the latter playing an organ.
* Invoked in one sketch during the Dave Chapell hosted episode in 2016 where the bad sketch cuts early to a faux-news conference where the actors in the initial sketch are asked about their performance as if they were a Football team that just lost a big game.
* Invoked in order to get Radar into an officers' club. Hawkeye sticks one of BJ Hunicutt's set of Captain's bars onto Radar's hat. Radar protests that it won't work, since he's still wearing his own Corporal stripes on his shirt, so Hawkeye makes up a cover story that they're trialing a new rank of Corporal-Captain. Indeed, this combination elicits some strange looks from an officer sitting at the bar.
* Invoked. In order to get the vinegar needed for an invention, you must find a bottle of wine in the past and put it in a time capsule. Crack the capsule open in the future and you'll find it's turned to vinegar.
* Invoked in "Squid on Strike", where Squidward tells SpongeBob to stomp on his hat in defiance to the Krusty Krab. SpongeBob tries to do it, but the hat seems to be stuck to his hand. Squidward does it and is promptly ticketed by a policeman for littering.
* Invoked in the Battle Dogi arc. While Ranma tries to seduce Akane in a closet to prevent her from wearing a powerful suit, Genma and Sōun attempt to help things along by throwing some snakes and frogs at Akane. It works,
* Invoked in the Blu-Ray release of the first three seasons. There's a what-if story where Hayate was the one who found Raising Heart and defeats Fate instead of Nanoha. Nanoha actually complains about having her role stolen, at which point Hayate lets her have the role of Mistress of the Night Sky who then goes onto befriend Fate (with just as much
* Invoked in the Calm Lands, where battles are staged specifically to avoid collateral damage.
* Invoked in the co-op campaign. It ends with GLaDOS telling the bots "you saved science!" and the robots starting dancing with joy as the very upbeat electro song "Robots FTW" starts playing. How did the robots save science? By rescuing thousands of humans preserved in cryogenic storage, who are now going to be put through dangerous tests like Chell was, until they die painfully. Just to twist the knife further, the robots get blown up by GLaDOS due to being made obsolete, the happy music
* Invoked in the Cordwainer Smith story 'Golden the Ship Was — Oh! Oh! Oh!'. The golden ships are 90 million miles long and move enormously fast.
* Invoked in "The Devil Came Back to Georgia". The Devil is played by a blond, blue-eyed actor who resembles a Viking. Johnny and the Preacher are played by actors with curly jet-black hair. Does not take much to make the connection that Johnny = David, Preacher = Jesus, and Devil = Hitler!!!
* Invoked in the episode "Kloger" when Steve intentionally craps himself to get out of a fitness test at school.
* Invoked in the episode "Sagwa's Good Deed". Sagwa gives away her portion of dinner to Fam and his family, who don't have anything to eat. But since she misses dinner because of it, Mama Miao
* Invoked in the episode where the characters go to Staten Island for the night, to some function where they dance to disco classics. Carrie's closing voice-over says it reminds her of going to Europe because all the music is at least twenty years old. Also, the idea that Europe is that far behind also shows the character's ignorance.
* Invoked in the episode where they think Frank might have hepatitis (Hawkeye and Trapper "stole" a pint of his blood while he slept, and the North Korean patient they gave the blood to developed symptoms). They want to get a urine sample to test, so they had Frank drink until he had to go, but when he got to the latrine,

Radar had nailed the door shut and told him it was "being redecorated". He then directed Frank to a small tent and handed him a bucket to use.
* invoked in their freshman year, she challenged Boots to beat her in a race if she wanted to win a date with her. Leo didn't really mean it, but tons of other girls in school took her seriously and spent every morning for the next several years challenging her, much to Leo's annoyance.
* Invoked in "The Last Barfighter" where Bart wins a crystal skull full of tequila and refuses to give any to Homer, going so far as to mock him. At one point, Homer's driving and Bart requests a song for him on the radio. At first, it seems like he's trying to make nice. Then we hear the lone lyric: "Tequila!"
* Invoked in the non-PKNA story in which the Beagle Boys stole his 313-X car and some of his weapons... Only to get repeteadly humiliated because Paperinik knows how to use them and they don't (the paralizing pistol, for example, is single-shot).
* Invoked in the pilot to frame a man. He places the man's fingerprints on the gun, but goes as far as to add prints to the clip and gun barrel since he knew that a good lawyer could get the prints just on the gun dismissed.
* Invoked in "The Red/White Blues". Everyone was supposed to take chloroquine to prevent malaria. By mistake, primaquine was sent instead, but this causes anemia in black people. When Klinger and another Caucasian (Corp. Goldman, who is Jewish) suddenly got strange symptoms, they were found to be anemic; the doctors eliminated all but the medicine. Klinger and Goldman were fine once they stopped taking it. The credits mentioned the medicine was later found to also negatively affect those of Mediterranean descent.
* Invoked in the season four finale. After a year of pining for Robin, Barney's about to
* Invoked in the short story "Absolute Limits" by Guy Stewart, in which frustrated government scientists note that everyone on the highway always breaks the speed limit—so they have the speed limit on that stretch
* Invoked in the short story "Papanin's Mauser" by Michael Veller. It depicts a drift-ice research unit of four people. Three of them are Russians and Communists and the last one is a nonpartisan German. According to the Soviet laws, three Communists is enough to constitute a Party cell, so every day they have to conduct a Party meeting, for members only. During these meetings the German has to leave the "meeting room", namely the tent where they all live, and spend time tramping around it in the bone-chilling cold. Eventually he applies for membership in the Party to end this nightmare, but is rejected on the following ground: as he is he symbolizes the international nature of the Soviet people and the unbreakable ties between partisans and nonpartisans.
* Invoked in the TV adaptation of P.G. Wodehouse's short story "The Truth about George."
* Invoked in the "Wedding Day Massacre", where Gaige the Mechromancer admits to having a crush on
* Invoked in-universe during a recap episode, where Gintoki proudly shows a clip of him saying the quote that was voted most popular by fans, only for Shinpachi and Kagura to try making it sound perverted by censoring parts of it immediately after.
* Invoked in-universe in the episode "For The Uniform", Sisko realises that Michae edington is essentially living out a heroic fantasy as leader of the Maquis, and has come to view Sisko as an
* Invoked in-universe in "The Ghastly Ordeal of Timothy Cavendish" in
* Invoked in-universe when Airman Higgs offers to guide the group through Castle Heterodyne because he supposedly saw and memorized a map of the Castle previously. Sleipnir begins to protest the impossibility of this before Theo shushes her. They need his help and if he needs to have "found a map" to offer it, then that's what they'll go with.
* Invoked in-universe when Ashley Katchadourian asks to be left out of the current conflict after all she's gone through. However, she has a pretty prominent role in episode 58.
* Invoked in-universe when Jon Snow is undercover and trying not to break his

chastity oath while camping with a woman who is trying to seduce him. He makes his
* Invoked in-universe with SCP-2006, a shapeshifter that wishes to instill pure fear in people. Thankfully, the SCP Foundation has managed to convince it that terrible
* Invoked in-universe with the spell "Hideous Laughter" (also known as "Tasha's Hideous Laughter") from
* Invoked, inverted, subverted, played with, tap-danced on, and turned sideways in the fifth series finale: with
* Invoked, in which he owns that the habit of calling every other scandal with the suffix "-gate" annoys him a great deal.
* Invoked is that this is a self-referencing strip, since how many of you noticed that the remaining frames are mostly just outline drawings?
* Invoked: "Is this simple enough for you? Does everybody understand? Are you all still following me? Should I talk slower like you're a retard? Should I talk slower like you're retarded?" MSI is usually fairly understandable in speed if not pronunciation.
* invoked it. He later does jump out... in joy, and lands right back in the "film" (this is after he is granted a second chance at life).
* Invoked: it's a minor plot point that Anna has to do this because she cannot be seen as offering advice to the King. So she pretends to be guessing about his plans — and quite naturally he says that she's guessed right, and then proceeds to do just what she "guessed" that he would do.
* Invoked: Izuku's father briefly considered sending him to a boarding school for Quirkless children in order to spare him from being bullied by superhuman students.
* invoked, Kazuma goes out of his way to keep Ayano at a distance and offend her as much as possible so she doesn't get attached to him either. It doesn't really work.
* Invoked: Kilgrave has told Will Simpson to jump off a building, so Jessica saves him by knocking him out, dragging him down to the alley beneath the building, and dropping him in a dumpster. When he wakes up, she tells him that he jumped off the building and landed in the dumpster. Since Simpson believes he fulfilled Kilgrave's command, the compulsion to jump goes away.
* Invoked. Knowing that he is too chivalrous to look at, let alone grab a half-naked woman, causing him to stop chasing her.
* Invoked know she wants to go to science camp instead of another pageant; leading to Tyreesha's mom using the trope name verbatim.
* Invoked Larry from Dead Languages translation puts such a vase in front of his easily-stuck front door so that people coming in will fall on the vase, break it and have to pay for it.
* invoked. Later works of existential horror tend to show the humans failing to accomplish much at all.
* Invoked - Liandri advertise the strength, mobility and AI adaptability of their newest domestic robot by entering one in the year's Unreal Tournament. Devastation's curvy chassis is lampshaded in her bio, which states it was modeled after a "popular adult holoactress" to boost sales.
* Invoked: Main protagonists Himuro and Yukimura perform an experiment to examine the effects of this trope, using Himuro's heart rate as a metric. For consistency, the trial is repeated a hundred times in quick succession, but to their dismay, the effects slowly diminish and plateau out the more Yukimura repeats it. Kanade suggests that this is due to the wall pin's shock factor diminishing as Himuro got accustomed to it. Himuro notes that the wall pin goes from looking romantic to outright silly as it gets repeated to excess, and realizes that it starts to resemble a sumo slap at a certain point.
* Invoked makes it clear that most of his fellow captives did not survive.
* Invoked: Malicia insists that the best way to find secret passages is to give up after searching, then lean casually against something and accidentally trip the hidden switch. They do find a secret passage, but only by noticing the cleverly hidden switch.
* Invoked — half of this stuff isn't even in the game, and most of the rest is harmless.

* Invoked of the game) for him and laments on how it never writes him anymore.
* Invoked of the paper, then blithely admits that he doesn't have a penny to his name.
* Invoked on an episode, which had Carter in jail. His cellmate, a stereotypical
* Invoked: Once night has fallen, Trémicour guides Mélite to the back garden of his residence for a spectacular private concert and fireworks show. The gardens themselves are styled like the interior rooms of his
* Invoked one by one, leaving only Beverly with any memory of them, she's eventually left questioning the logic of a starship normally crewed by around 1,000 people now having a crew consisting solely of herself and Picard (then just herself). Neither can give a satisfactory answer to that.
* Invoked. One character's homeland is an (presumably volcanic) island chain so brimming with toxins that his people are immune to most known poisons and diseases.
* Invoked (or a nigh-infinite number of them, in Bankai), which reflect light to look like sakura floating on the wind.
* Invoked owns up to his role in all this, apologizes for not keeping his promise to Tamar and spares her life, even allowing her to live under his roof and supporting her as he would an actual wife. The twin boys she gives birth to are acknowledged as her and Judah's children.
* Invoked pardoned for his criminal past, Cap remarked, "Fury, under that rough, unshaven exterior..." Fury interrupted, "There's an even rougher, unshaven interior!" Of course, in this case, it's very blustering; while later writers did make Fury genuinely amoral, around this time he was still a pretty straightforward bleeding-heart hero.
* Invoked playing up how much they hate ponykind and everything Celestia stands for around anyone who actually agrees with Celestia.
* Invoked points out they didn't have a marriage license or any of the other trappings in the first place (even ignoring the issues of their age or his informed consent).
* Invoked pretty much word for word when Dr. Rune falls off a building roof into the river in
* Invoked purposely along with exploring the consequences of ignoring
* invoked quieter than originally planned, blending the two halves of this trope.
* Invoked quite literally in one story by Zeus. One of his numerous paramours was turned into a bear by Hera (or Artemis, depending who you ask), with one of the added benefits if it was Hera being that either the woman or her son would kill the other. So how does Zeus save both of them? By
* Invoked. Randy turns off the VCR upon noticing that the yoga tape is still playing, and the room is nuked with the sonic blast of an already earth-shaking car commercial. Randy scrambles to turn off the TV.
* Invoked right from the first- William Walker falls in during his fatal heart attack.
* Invoked's "Black or White", when the camera zooms out from Michael singing at the Statue of Liberty's torch and showing landmarks from many other places from all over the world in the background, the idea being to show that everyone lives in the same world.
* Invoked segment set in a scrapyard; since kitchen sinks are all stainless (and weigh several pounds), they're actually not all that rare in context.
* Invoked series. Dwarfs are humans who have used advanced technology to deliberately change themselves into the standard representation of Fantasy Dwarves.
* Invoked series. Once a heist has officially started, if any member of the Fake AH Crew gets killed, he does not get to continue on with the Heist and gets no payment. This is further set up by having the crew member's audio muted and the footage focused on the remaining crew members for the remainder of the Heist.
* Invoked. Serizawa suggests that the only thing that can stop the MUTOs is the legendary Godzilla, and that the US military should just get out of his way.
* Invoked: she has the ability to 'float', which passively lets her float effortlessly through life—i.e. it basically forces Narrative Causality to work in her favor.

* Invoked, she has to be vague about what she sees to make what she says more believable.
* Invoked. She needs the Capitol to think she pulled the stunt with the berries because she was crazy in love with Peeta, and not because she was trying to be rebellious and undermine the Games.
* Invoked, Shepherd can convince a bar-tender to throw a round of drinks on the house to get another character's attention.
* Invoked ship that's about to destroy the multiverse to no effect, and this is all they have left.
* Invoked. Simi sets it up so that Sofie will believe that Akash is sleeping with Simi by poisoning him and opening the door partially undressed when Sofie turns up at Akash's place.
* Invoked, so Peggy encourages Bobby to "fight for his place" in the group. Since he's always hanging around them, they never get a chance to hook up.
* Invoked's "Silver Bullet" Gauss rifle. Rather than silver (which isn't particularly magnetic and wouldn't do much against 31st century armor in any event), this variant on the standard Gauss rifle fires special pre-fragmented ammunition that, while lacking the concentrated punch of the original, creates a hail of shrapnel that improves its chances of causing at least one critical hit especially against already-damaged targets and makes it an excellent anti-aircraft and anti-vehicle weapon in general.
* Invoked's strategies in high school, he decides to use one of them against a corrupt Supreme Court Judge in the latter half of the story.
* Invoked. Stephen is on the verge of getting arrested by the local authorities and claims to have diplomatic immunity. The officers don't buy it and demand to "see some diplomatic identification", at which point Stephen throws them a blank plastic card. The whole thing was just a diversion to slow the officers down while his team took them out. It also creates a small amount of confusion for them since the near future setting has it that diplomatic immunity is largely obsolete, and the relevence of asserting it is vaguely defined.
* Invoked Storm, who flexed her muscles while trying to flirt with a referee in Pippa L'Vinn's Wrestling Factory.
* Invoked strip where Catana and her boyfriend state outright that their differences are what attracts each to the other.
* Invoked-style transition" to wipe into the next scene, followed by the Idiosyncratic Wipe itself.
* Invoked. Sure enough, the pebble sets off a chain reaction resulting in a boulder almost falling on Stumpy's head.
* Invoked taunts Sidney as it seems that her mother was gang-raped by Hollywood producers, in order to turn her into his accomplice.
* Invoked Teddy's girlfriend and then coercing the pair into have sex. She also claims that this isn't the first time she came between two guys.
* Invoked tendencies will create an explosion large enough for Kei and Ryu to find them. As a bonus, Hikari's cooking is useful as a weapon against guards that try to recapture them.
* Invoked that even powerful Aes Sedai are always too startled to notice her peeking at their reflections in her silver teapot.
* Invoked. (The answer, just in case you're unsure, is still 40 minutes. Although some were quick to point out Beethoven's Ninth is supposed to take ~70 minutes to play through.)
* Invoked. The contestants use their home forges to make their blades for the final round for this reason.
* Invoked. The Death Eaters made the mistake of getting Portkeys from a wizard that doesn't like them, and is in fact giving them unsafe portkeys with the intention of getting them killed.
* Invoked the limitation. He subsequently threatens to smack Justin upside the head for using the phone while driving.
* Invoked, the only remaining founding father and the only one to never win the belt.

* Invoked. There are four pantheons worshiped in different parts of the world, mirroring real-life pantheons. The Northern Gods include Thor, Loki, Odin, Hel, and so on from Norse mythology, the Southern Gods are the 12 animals of the zodiac from Chinese mythology, and the Western Gods are from Mesopotamian/Babylonian mythology: Marduk, Tiamat, etc. There is no mention made of Greek Gods (despite these having been used in edition 3.5 of D&D) until
* Invoked. The recent dead are relieved of the worry and angst of having died and the loved ones they'll never see again so that they can focus on their trials.
* Invoked, there is also the issue that real cats, talking or not, are proverbially difficult to direct.
* invoked. These episodes also tend to ask an even more disturbing question: For what kind of purpose would someone go actually through all the trouble of creating a realistic simulation of a human mind? The answer, of course, is rarely ever something pleasant.
* invoked. The sequence also shows the extreme poverty of the low-level "hoppers" in the city's drug trade as simply buying eggs at a convenience store is seen as a suspicious display of wealth.
* Invoked The simplest explanation is always 'God did it.' Or maybe, 'the old woman down the road is a witch. She did it.'"
* Invoked. The song consists of nothing but cheesy pick-up lines, like "Girl, you smell like Fritos- that's why I'm giving you this hungry stare".
* invoked the trope - intentionally locking himself away and replacing most of his flesh with machine parts to create something no one could steal from him, but also precisely to get rid of his emotions, which were bugging him since a fellow scientist claimed the glory for his achievements. It didn't exactly work, as he still hates his 'rival' a bit. He's also obsessed with making everyone be like himself, and speaks in an emotionless manner.
* Invoked. The two title characters come across a village inhabited only by women, all of whom intentionally scarred their own faces so they would be considered ugly in the eyes of Queen Ravenna, sparing them from being sacrificed to her life-stealing magic.
* invoked this trope in an interview: "I'm a classic example of all humorists - only funny when I'm working."
* invoked this trope in one of his CDs. After telling a terrible joke, he informed the audience that he was going to take a sound clip of them laughing at one of his better jokes and insert it at the end of the bad joke, so that people would be wondering what was wrong with the audience.
* invoked this, where the process has essentially turned it into an in-name-only adaptation of an in-name-only adaptation.
* Invoked. Though gradually the international community grows desensitized to Russian saber-rattling, and energy prices begin to fall in the early 2000s.
* Invoked, though the image in Ryan's mind was not really all that icky, unsettling, or horrific - merely of questionable healthiness.
* Invoked to a greater degree with Wolffe and especially Rex's Phase II armor. Despite the rest of the 104th and 501st wearing the standard Phase II helmets, Wolffe has a helmet with a thin visor similar to those used by the 91st Recon Battalion, and Rex has a completely unique helmet design that incorporates a Phase I-style visor into a Phase II helmet.
* Invoked to call Lysa out in public about her behavior towards him and demanding a trial, which she was honor-bound to give.
* Invoked to explain why the alien data beings encountered so far are so obsessed with sex in
* Invoked to get Charles Darnay out of prison. Sydney Carton (not actually his twin but a look-alike) forces Charles' accusors to admit they can't identify him since he looks identical to Sydney.
* Invoked to his first-year law class, specifically to point out that emotion can get in the way of coming up with a rational reply.
* invoked to interrupt an argument during the News segment. None of the presenters will stop talking on whatever topic is going on when Jeremy Clarkson will point at

a member of the audience and declare "JESUS IS HERE!"
* Invoked to know he is dating someone (that's one reason. The other reason is that he is cheating on her with another girl, and he doesn't want either of them to find out). However, Iyo wants other girls to know she's "taken" Soji for herself, so she instead uploads selfies where she wears Soji's clothes:
* invoked. To stop the Krogan Rebellions, the entire species was infected with a virus that devastates their birth rate (1 out of 1000 is live, the rest are stillborn). Even with the high mortality rate, they'd still be capable of maintaining a population equilibrium if not for the species wide fatalism that followed the genophage (kind of hard to keep your chin up when your contemporaries annihilate a fundamental aspect of your biology and society).
* Invoked to test if you are dreaming or not: stop and mentally retrace your steps. Can you remember how you got to where you are now? Most dreams have nothing resembling a backstory or coherent plot, so if you really are dreaming you will almost certainly be unable to.
* Invoked, to the point where he's hanging off the balcony at the very top of Geese Tower. Terry reaches out and grabs his hand... and then Geese spitefully yanks his hand away, staring up at an aghast Terry as he willingly falls to his death.
* Invoked tries to teach his son how to fly by pushing him off the roof of his house. It doesn't end well, although it wasn't too long a fall preventing it from being a literal instance of this trope.
* Invoked Trope. After being captured by Wyatt's cult, the Man in Black wakes up with a noose around his neck, with the rope leading over a tree limb to a blindfolded horse and the nearest knife is stuck in a nearby corpse. He has to reach the knife without spooking the horse, and barely succeeds.
* Invoked Trope and shoots dead the man sleeping with his wife. The rest of the movie involves Jake finding out whether this was an act of passion or a premeditated murder.
* Invoked Trope as Pazzi is relying on the fact that Lector will notice the thief and grab his arm, putting his fingerprints on the metal bracelet he's wearing.
* Invoked Trope as well, saying mockingly, "No ship should go down without her captain."
* Invoked Trope: At the beginning of the vice-presidential debate in the 2008 U.S. election, Sarah Palin and Joe Biden shook hands and she could clearly be heard saying, "Nice to meet you, can I call you Joe?" Many commentators later guessed that (given that candidates aren't really allowed to talk to each other during these "debates") she'd only asked so that she could begin one of her rebuttals with, "Say it ain't so, Joe!" In fact, it was because she had accidentally referred to him as "Senator O'Biden" repeatedly during debate prep.
* Invoked Trope, Avon sends out a distress call knowing someone will turn up to kill any survivors, and he can kill them in turn and steal their vehicle.
* Invoked Trope because the man he killed was a personal friend of the President of the United States.
* Invoked Trope. Capa is locked in Icarus Two's airlock, so he burns a hole in the inside door with an oxy torch (kept in the airlock as part of the EVA repair kit), then straps himself in a spacesuit to the wall and fires the explosive bolts in the outside door. The force of the air inside the spaceship trying to escape through the small hole is enough to wrench the inside door off its hinges.
* Invoked Trope characters, not the people) try to get together for Christmas sex, but Critic instantly separates them and tells them to watch the movie with him.
* Invoked Trope) decided to risk being found by the Mafia to go back to his favorite pasta place and eat his first proper (by his standards) meal in months.
* Invoked Trope for some military weapons, due to their many rows of barrels resembling an organ's pipes, leading to the weapons being referred to as such:
* Invoked Trope has Theon give him a close shave, while taunting his captive.
* Invoked Trope in a Dove ad where a criminal sketch artist draws two versions of the same person, one where they describe themselves, and one where someone else describes them.
* Invoked Trope in preparation for this scenario. Despite this everything about the

trope gets played straight.
* Invoked Trope in "Robin Hood"; a high-tech bank robbery turns out to be just one piece in an intricate scheme to expose the misdeeds of the bank's president.
* Invoked Trope into framing someone else for the attempted murder of Laurens Bancroft, so he uses this trope to manipulate everyone. Kovacs surrounds Bancroft with a group of people who all have motive for harming him and stand to lose everything if they lose Bancroft's favor. When Kovacs accuses one of them, the others are relieved that the spotlight is off them and are greatly motivated not to question the evidence. They then try their best to convince Bancroft that Kovacs is right.
* Invoked Trope is a zeppelin docking at the Empire State Building. They're not seen all the time in other episodes set in the alternate universe, but then again you don't always see airplanes in the real world's sky. Sometimes, the transition from scenes in one universe to another is shown via a quick burst of light and a zeppelin in the sky appearing or disappearing in the sky.
* Invoked Trope is introduced as she playfully scolds two of her students while pushing their cheeks against her ample bosom as they're completely smitten by her, to the envy of surrounding students, and even invites them to the karaoke. However, the truth is that she's actually a huge, ogre-like alien who uses her sexy teacher disguise to seduce her students and devour them.
* Invoked Trope. Lt. Colonel DeVoe rings up Kodorof's sat phone and gloats over how there's a smart bomb coming down on his head right now, causing Kodorof to pull his truck out of the line and give away his position.
* Invoked Trope Not only are the planets set up this way, but their cultures are also custom-designed to reinforce this setup.
* Invoked Trope of Carlos the Jackal is being trained to impersonate the charismatic terrorist, including a former lover instructing him on Carlos' domineering sexual technique.
* Invoked Trope of those things away from populated areas, and there are two more of them."
* Invoked Trope! Oh dear, what will happen to the beautiful innocent girl now? Will our onlooking heroine warn her in time?!
* Invoked Trope one attacker so his shriek of agony will make the others stop in their tracks.
* Invoked Trope or not, because of their (up to that point lousy) love lives.
* Invoked Trope series. Police officer is one of the occupations you can give a Sim, and there's nothing stopping you from having said sim have traits such as Insane, Evil, Grumpy, Mean, or similar once you can start assigning personality traits within the games (2, 3, and 4), and nothing preventing you from having said officer engage in unpleasant and offensive and violent interactions with everyone he or she meets and destroying everyone's property.
* Invoked Trope. Someone was kidnapping black babies all over New York City and leaving them to die in dumpsters. It was only when he kidnapped a white baby that the police took real action.
* Invoked Trope so the police will think they're escaping via boat, when they've actually got off the train already.
* Invoked Trope spell on her, but she fakes it working by acting like Rita in all her scenery-chewing glory.
* Invoked Trope storyline where one of Crankshaft's friends is running for mayor on the issue of potholes. Two separate election stunts involve showing a kangaroo and Chinese words supposedly coming through the potholes.
* Invoked Trope (theatre play and both films). The esteemed lawyer Sir Robert Morton is approached to defend a young boy accused of the theft of a postal order. Morton subjects Arthur Winslow to a merciless grilling during which he suggests that Arthur stole the postal order as a joke. However Arthur tearfully denies this, convincing Morton that he really is innocent, as a guilty person would have taken the opportunity to downplay his crime into a harmless prank.
* Invoked Trope. The eponymous league is a gang of cashiered British army officers brought together to use their various military specialties (demolitions,

communications, etc.) to stage a bank robbery.
* Invoked Trope. The friend is overjoyed to watch it but starts crying when the recording stops.
* Invoked Trope: the show was originally going to star Jamie as its only host, but he asked Adam to be his co-host since Jamie thought he was too boring to host it on his own.
* Invoked Trope); Veronica was made to end it (which she prefers to do swiftly and painlessly, though often gratuitously). Fran tries to put Veronica more on her side of the scale, but so far, no dice.
* Invoked Trope When he finishes the story, the male nurse Thad falls in love with him.
* Invoked Trope when Qutuz, the sultan of the Egyptian Mamluks, deliberately killed Mongol emissaries so as to provoke them into an immediate attack, in mid-summer when there wasn't enough water and pasture for their horses. The well-armed Mamluks massacred the weakened Mongol force, putting an end to any serious invasion. (Interestingly, according to some accounts—which may or may not be true—Qutuz claimed descent from the ruling house of the old Khwarazmian Empire, adding some extra irony to the whole affair.)
* Invoked Trope when Sam used this to explain why a dog kept barking at a house where a supernatural event had happened. It was never proved on screen, though.
* Invoked Trope, when the neighboring fathers of the main characters build a wall between their homes to "prevent" their children from falling in love.
* Invoked Trope, which as the name might imply is meant to mimic the feel of 1980's adventure cartoons. It deliberately encourages GM's coming up with elements for their settings not to base them on reality, but on the goofy ideas of technology in 80's sci-fi cartoons (E.g. supercomputers that use 5.25 floppies).
* Invoked Trope who first assigned him the mission, saying he assigned Marie to work with him for exactly this reason.
* Invoked Trope, who uses the "beware Greeks bearing gifts" line to try and incite conflict with the Greek demigods and so maintain his own power. It's not exactly a horse though, and nor is that actually the plan.
* Invoked Trope with General Tagon's parents (in a print only story). The met while preventing a terrorist attack and later served in the intelligence service together. Since all of this was classified, when they left the service they faked an accidental meeting in a park to give them an excuse to start publicly dating.
* Invoked Trope with the Iraqi resistance being dubbed the "dead-enders" to suggest they were only resisting Coalition forces out of loyalty to the deposed Saddam Hussein. This was dropped when the war continued long after the Iraqi dictator was executed.
* Invoked Trope with the Night Lords. Even before they fell to Chaos, their renegade behaviour and shocking psychopathic and sadistic tendencies earned them summary destruction.
* Invoked. Trudy disguises herself as a Doll-on-a-Music-Box, a present for the villain ruler.
* Invoked until both factions were weak enough for him to bust out said side project and crush them both.
* invoked uses octo-cellulose film to entangle and restrain the giant Dungeon-Dimensional duplicate of himself that emerged from the theater's screen.
* Invoked verbatim by Perfect Cell in the English dub of Kai, spoken about his Cell Games ring, of all things.
* Invoked via threats made against her daughter Lian. The mastermind behind the Six, Mockingbird, has informed her that there is a small bomb implanted in the back of Lian's neck, and if detonated, she would either be killed or left severely brain damaged. Because Cheshire refuses to let anyone control her, and because she's a sociopath with the maternal capabilities of a lizard, she seduces Catman and gets pregnant. This way, not only will she be able to leave the Six regardless of Lian's life because she'll have a replacement baby, it gives a hold on Catman. It isn't until after Cheshire sells the Six out to the Secret Society and gets shot in the chest by Deathstroke that we learn Lian's life was never in danger because

Mockingbird lied. Cheshire never found out.
* invoked villain of the week had an invention that made unfunny jokes funny; so funny that people who hear the joke will lose all self-control as they burst out laughing. Raphael was forced to provide the jokes, and even the worst jokes he could think of would still produce a very extreme laughing reaction.
* "Invoked" vs. "Implied": These two are commonly confused due to their similar name, but have nothing to do with each other. "Invoked" is when someone causes a trope to occur, while "Implied" is when it looks like a trope has happened.
* Invoked vulnerable spot, Taggart replies, "It's a rock! It doesn't have any vulnerable spots!"
* invoked was familiar with Disney, and secondly because Warner Bros. knew that Disney didn't really care enough about the "rivalry" to make fun of them back.
* invoked) was inspired by Watterson's wife finding a dead kitten on their doorstep.
* Invoked when a mook asks a mob boss and a French general about his share of the money of a drug operation and finds himself held at gunpoint by both of them. They discuss the thing and agree he's not worth the price of a single bullet... And then they shoot him anyway.
* invoked: When a musical round is so successful that the audience starts clapping in time, Jack Dee will puncture it with a comment like "I think the slow clap was a bit unkind."
* Invoked when an Earth Kingdom general with too much ambition and too little sense wants to utilize Aang's
* Invoked. When a sign is about to fall on Fran, Dominic saves her by carving a hole in it with his Rhino Spirit power.
* Invoked when Delirium actually mistakes a goth-dressed (lesbian) human for her sister Death in the beginning of
* Invoked when Dexter travels to the future for the primary purpose of seeing what kind of badass he is. In the dystopian future version of himself, he comes to resemble his hero Action Hank: big, brawny, and
* Invoked, when Erica snaps her umbrella in half while it was raining so that she has a chance to share an umbrella with her special someone.
* Invoked when Harley Quinn says, regarding the Joker's location: "You'll never find him! He's in a
* Invoked, when he fakes the symptoms of vitamin deficiency as Liz lists them off so she'll let him off his diet.
* Invoked when Indy and his dad are trying to escape Castle Brunwald. They find several boats and Indy acts like he's going to use one of them to escape, fooling even his father. However, he's really trying to trick the Nazis into thinking they used the boat: he actually plans to escape using a motorcycle with attached sidecar.
* Invoked when, in order to withstand Ms. Finster's interrogation on who started a food fight, Gus heeds Mikey's advice and retreats into this mental state, with Finster appearing to him as a giant bar of chocolate, her reprimand interspersed with references to chocolate.
* Invoked, when Koro-sensei volunteers to coach his students for an upcoming baseball exhibition match. He brings along a miniature table stocked with food for the express purpose of flipping it over, thus achieving his dream of acting like one of those "hot-blooded coaches you find in sports series".
* Invoked when Michael has to gain the trust of an enforcer for the Russian Mob that he has captured. He pretends to be another member, locked in the same cell. They fight, and, typical on this show, Michael narrates the action by describing the importance of learning Russian martial arts if you're going to pretend to be Russian.
* Invoked, when Nick intentionally tells Ian the wrong phrases. First Ian inadvertently tells her mother "Nice boobs" instead of "Thanks for the food." (Mom's reaction: she dope-slaps Nick.) The second time, he's wise to the trick and asks Toula's cousin to confirm that the phrase he's being told to use is correct; unfortunately, the two are conspirators and he still ends up telling the whole

family "I have three testicles."
* Invoked when Nobby suggests that they should display the frame of a stolen painting under the name "Art Theft", but the curator declares that would be stupid.
* Invoked when one of the GTI guys exchanges the signs on the doors from the main hall to the shower rooms at a sports center so that he and his buddies can go in and peep on the showering girls.
* Invoked when Peter throws a dead horse through the window of Mort's pharmacy.
* Invoked when Stan shows up to the class Halloween party dressed up as Raggedy Andy (and Wendy doesn't go through with dressing as Raggedy Ann). Mr. Garrison actually says "Let's all laugh and point at Stan, everyone", and they do.
* Invoked when the Cylons on Caprica are trying to get Helo to fall in love with Sharon so she'll get pregnant with a hybrid. They stage a Centurion attack wherein Sharon gets "captured" and lead him to track her down and "rescue" her. This gives their already developing relationship a significant push.
* Invoked, when the Dauphin of France (Crown Prince) Louis Auguste learns of king Louis XV's death by Versailles' nobles coming to him shouting "the King is dead, long live the King", declaring him king Louis XVI even before the crowning.
* Invoked. When the Prince was cursed, his voice become noticeably deeper to exasperate the “scary monster” transformation.
* Invoked when they grab him, through careful placing of their models.
* Invoked when they try to fly a plane with no experience, not even reading about it.
* Invoked where Jason Fox runs around a soccer field holding a pair of spiral wheels so that he appears to be running fast during gym class. To complete the illusion he straps dry ice to his shoes to leave a steam trail behind him.
* invoked, where the robot says it's incapable of love, but actually it took out its love module so that it can say that as an excuse for breaking up with the human.
* Invoked, which allows you to create a Zombie Apocalypse of your own.
* Invoked, which are specifically written with no knowledge of the thing being reviewed and explicitly identified as such, just to see how many people get upset and write in anyway.
* invoked, which gives you a "Headpop!" reward if you land squarely on a pig.
* invoked, which is appropriate since it takes place inside a computer. Everyone has short hair, there's barely any loose fabric, and no real wind except when moving (and in most of those times they wear helmets or are inside vehicles).
* invoked which will come from living centuries behind bars, the man decides to invoke the titular clause and have the Devil come and take his soul already.
* Invoked. While he takes constant care of the ecosystem of Unicornicopia, he does not go into battle when Titan shows up the first time, despite being the only one able to stop him. The author later tried to excuse this by explaining that the Grand Ruler had faith in his prized student, Lightning. Problem is, Lightning can't do magic and the only reason he did not die is that he conveniently discovered he can summon the Uniforce.
* Invoked' whim, declare it will be rebuilt as a parking garage planet. Presumably this is also the back story of Foodcourtia (a planet of restaurants), Conventia (the conventional hall planet) and Callnowia (which is covered in factories that Irkens can order things from).
* Invoked, who calls a time-out halfway through his duel with Zane so he can eat lunch. He does duel much better afterwards, going from losing badly to pulling out a draw.
* Invoked who were trying to steal it from them, and douses the cash with gasoline and stands there holding a propane torch to take it hostage. He gets the traffickers to release their client (Sam's friend Virgil, whom they had taken hostage), and they make a break for it when the cops and traffickers start shooting at each other (after throwing the torch to burn the cash anyway).
* Invoked with a knife she found in the basement they were hiding in. One of the workers from the mysterious company overseeing the ritual proceeds to press a button to make the knife give her a tiny electric shock; not enough to hurt, but

enough to make her unconsciously drop her weapon before she can use it again.
* invoked with an inflated idea of his place in the overarching narrative.
* Invoked with an old joke about a politician whose gravestone reads "Here lies a lawyer and an honest man", prompting passersby to comment "I didn't know they made two-man coffins."
* Invoked with a robot designed to play mentor to a hunter-gatherer civilization.
* Invoked with Buddy Rose to some degree. He is so good, he can even restore dead plants.
* Invoked with drug- and explosive-sniffing dogs, which are specifically trained to detect nasty materials and alert their human handlers to what they've sensed.
* Invoked with extreme prejudice in the case of Henrietta, when her deteriorating emotional state caused the Agency to, for lack of a better expression, 'reset her to factory settings'. She's the perfect assassin again, but her personality is little more than a robot soldier.
* Invoked with Frankfurt Galaxy losing to the Hamburg Sea Devils. The first game of the new league was... the Hamburg Sea Devils beating Frankfurt Galaxy (albeit at a different venue).
* Invoked with his performances in Saudi Arabia, which he initially thought was a joke offer. He told his agent to ask for a ridiculous amount of money — to be transferred
* Invoked with Maedhros and Fingon. To complicate things, they both were males — and their fathers were not unlike
* Invoked with Monsters, which regenerate to be fought again, and with immortals, as they don't change (much). Addressed further in
* Invoked without all that bothersome morality by the classic philosophical question, "Can God create a boulder so large that He Himself cannot lift it?" It's a logical problem of omnipotence; if he can't create a boulder too large to lift, he's not all-powerful, and if he can, then he's still not all-powerful. This is sometimes accused of
* Invoked with Rufus Shinra, who is last seen taking an explosion to the face. He turns up later in
* Invoked with Sand Masters - the highest-ranking and thus most powerful Mastrells usually keep their heads bald.
* Invoked with Silver, Gray's father, as well. Silver pretends to actually be the spirit of
* Invoked with Snake and Dragon. Despite being twins, they were registered by their parents on October 10 and November 11, respectively.
* Invoked with the Jerry Beans Man card - since he's an anthropomorphic jelly bean, his name is a pun on "jelly beans" and the English name Jerry.
* Invoked with the Sh'lassan Triumvirate, founded by humans who left Earth because they believed a feudal system was better than Earth Alliance' democracy. Their homeworld of Sh'lassa and their colony of Akdor eventually join Earth Alliance as the price the Triumvirate had to pay for military assistance in retaking their colony.
* Invoked won't him. They decide that the species' fate will be decided by having a group of proxies fight to the death on the Ishkoort home world. One of the conditions, however, is that Crayak's Howlers can't hurt any Ishkoort until they win. Naturally, our heroes start hanging out in crowds after figuring that out that rule.
* invoke. Heck, even if permadeath is disabled, some players may be tempted to restart the battle anyway!
* invoke putting up displays of frequently banned books and prompting kids to read them to see what all the fuss is about.
* invokes, and adds a large fake facial scar, noting that "a single identifying mark" is all most people will remember, despite his face being otherwise completely unconcealed.
* invokes: he detaches his arms and legs and spreads them about as far out as they can go, then wears a large black cloak over all the empty space left between, leaving an impression of being far bigger than he truly is.

* invokes the trope The League of Shadows as a whole certainly counts, though.
* invokes this in some of their advertisements, pointing out that many insurance companies offer the chance to save by "bundling" additional services like home insurance, motorcycle insurance, RV insurance, flood insurance, etc. etc., so and so forth. They, however, just offer a low rate on auto insurance that you can get without having to bundle anything.
* invokes this, pretending to have a romantic interest in Ash, all just to see Serena get jealous. Serena doesn't buy it, for the most part.
* invokes this trope after Cell drains his arm, asking to be told of his origin and goals before being fully absorbed. Cell obliges, and his narration lasts long enough for Piccolo to finish preparations to regenerate his arm, returning to full strength.
* invokes this trope and documents (among other things) many examples of celebrities' profane or otherwise un-ladylike language inserted into an otherwise innocuous interview for a respectable publication.
* invokes this trope; he doesn't believe that the government should exist, so he took a job there knowing he would be bad at it, just so he could do it poorly and slow everything down. There are moments when he actually considers trying for a promotion so he could do an even worse job at something even more important. He does get motivated at meetings involving budgets, but only because he gets to cut government spending.
* invokes this trope, yelling at Dan because she doesn't like her daughter Becky's boyfriend. When Dan asks why that's his fault, she responds that "girls always marry their fathers." This is portrayed as irrational, though it seems Dan and Roseanne's early romance was at least somewhat similar (Dan is described as having once been rather cool, in a rock band, etc.)
* invokes this when trying to get Gohan to transform into a Super Saiyan. It works, but only when Gohan is put in genuinely life-threatening danger.
* invokes. When he accidently breaks the train's brake lever, he comes up with a plan B by loading the firebox with coal, then lures the three Sergeants of the Garlyle forces onto the engine. He then uncouples the rest of the train from the engine, and the sergeants are trapped because they can't stop the train (no brake lever) and the train's going too fast for them to jump off.
* invokes. When he uses a magical device to transform himself into a girl, Tomoko decides to have as much fun as she can by invoking all manner of cliche anime tropes that involve physical contact with other people. Before making her first appearance and introduction at school as the new girl, the first thing she does is set up a situation where she crashes into a male student, then gauges his reaction and storms off while calling him a pervert for seeing her panties. That was only the start of her mischief.
* invokes when the Little League team can't find all their opponents' batting averages online because not all their parents had bothered to put them up.
* invoke this effect, allowing the person to react without taking time to think.
* invoke this trope by buying the same bowling shirt as Blanche, in order to throw her off her game.
* invoke this trope by taking the bulb out of her lamp and holding it over her head; Peter says that he only does that with 100-watt bulbs.
*) invoke this trope. He stops Brad in the parking lot, and the following exchange occurs:
* invoke to Brain's desk. Arthur's not happy about this, especially after Binky moves to his own desk and sweats on in.
* invoke, whose mission was to watch over him at all times and kill him if he ever showed weakness to ensure he wouldn't grow soft in ruling his merry band of thieves, murderers, and madmen.
* invoking that if they follow his and Touko's story too closely it'll only hurt both of them.
* Invoking the apt package manager used on Debian and its derivatives (such as Ubuntu) with the sole argument "moo" will print out some ASCII art of a cow with the caption, "Have you mooed today?" This is hinted at in the help blurb for apt,

which says that "This APT has super cow powers".
* invoking this trope) and another planet that did nothing but supply the drug even after the disease it was supposed to treat had long been eradicated, since the residents were so addicted to it.
* Invoking this trope via exploration, colonization, and eventual terraforming of other worlds is one of the explicit long-term goals of human space research. If there
* invoking this trope when they were tortured by Niska as a way to keep Wash's mind off of the torture and thus keep him alive.
* In Vol. 1, after getting it very close to right the first time by shooting
* In Vol. 2, she is injured and disabled relatively easily, but rather than kill her on the spot,
* In Vol. 3 the answer for one of the Impossible Questions was 'Pyrrhic victory'. However, if you got it right the game took points off you anyway. Oh how we laughed.
* In "Volcano Draino", Shimmer describes Mount Navine as the biggest volcano in Zahramay Falls. It's the only volcano in Zahramay Falls but Shimmer says it's still the biggest.
* In "Volcano", geologist Randy Marsh discovers unusual seismic activity in the region. He exclaims "Oh my God! A volcano!" Then he takes a slurp of his coffee.
* In "Volcano", the Liberator is in geostationary orbit so it can only scan one half of a planet at the time. Servalan has a battlefleet in the same orbit on the other side of the planet, until it's time to strike. It also helps that the man in charge of the planet's detection grid is in league with her.
* In "Volcano Valley" Donald orders a model plane for his nephews but is sent a real plane by mistake. He initially refuses to sell it for three dollars, but accepts 300,000 Volcanovian pezozies- which turns out to be worth about three dollars.
* In Voltaire's "Mechanical Girl", a tinker builds the titular mechanical girl in memory of his deceased daughter. When he presents his masterpiece to the king, the king has the tinker thrown into the castle moat and takes the mechanical girl to be his queen. All goes well until he kisses her on the cheek that night... whereupon the mechanical girl transforms into a
* In Volume 02, Flum takes in a young girl named Ink who was an abused experiment of the Church of Origin. She subsequently becomes a member of the household, and she loves living with Flum, Milkit, and Eterna as her new family.
* In Volume 10, Asia, Koneko, and Akeno strip off their clothing to provide Issei with
* In volume 16, it's mentioned that the death of Miyuki's mother left her so inconsolable that Tatsuya let her spend that night with him. It was innocent and platonic, unlike the Sleep Cute they had a few years later
* In Volume 1, Episode 15, Weiss mentions that an entire train of her family's Dust shipments had been stolen by the White Fang. The Black trailer involved Blake and Adam pulling a heist on a train with cargo that had the Schnee logo.
* In Volume 1 Episode 8, the entirety of team RWBY and most of team JNPR spend most of the episode taking down a Nevermore, a giant bird monster, and a Death Stalker, a giant Scorpion monster. In the Volume 2 finale, Coco destroys several in a few seconds with her
* In Volume 1, Torchwick's boss is unnamed until the credits, which list her as "Cinder Fall".
* In Volume 2 and onwards, when Ruby really turns up the speed she tends to shatter the pavement where she kicks off. During the
* In Volume 2, Chapter 2, Team RWBY is playing a board game where each player controls army that attempts to conquer the world. Weiss's army consists of knight figurines that look just like the knight she fought in the White Trailer.
* In Volume 2, Ironwood reveals to Glynda that he thinks Ozpin is hiding something from them. Glynda points out that he's part of the inner circle that's hiding things from the rest of the world and that he needs to stop talking about trust and learn how to trust others. Ignoring her advice, he secretly collaborates with the

Vale council to strip Ozpin of his control over Vytal Festival security then tells Ozpin to trust him.
* In Volume 2, it's revealed that Adam Monroe injecting his healing blood into Peter also 'cures' his Haitian-induced memory loss. However, Peter already has that ability, and used it to heal himself after being shot in Ireland. Why didn't this restore his memory?
* In Volume 2, Ruby and Yang get a 1-foot mail tube from their father Taiyang, which turns out to contain Zwei (the family's pet Corgi) and a letter asking the girls to watch him while Taiyang is away on business. After Yang gives the tube a couple of shakes, a gigantic pile of canned dog food and a can opener also drop out of it.
* In Volume 2 she starts hamming it up along with her teammates a bit more, and is making an effort to be more outgoing and kind.
* In Volume 2's "No Brakes", the Vale populace is bewildered when the White Fang's train bursts from the underground, with Team RWBY still dazzled from the impact.
* In Volume 2, the masked woman who saves Yang on the train is never named in dialogue. The credits identify her as "Raven Branwen"
* in volume 37 she is tearfully reunited with her mother, who was watching over her all along.
* In Volume 3, Pyrrha Nikos' death during the Battle of Beacon triggers Ruby Rose's
* In volume 3, we learn that Emerald can create targeted hallucinations than only affect the person she is focusing on. She can affect two people at once if she
* In Volume 3, Yang's predictable fighting style becomes a useful tool for the villains to exploit during the Vytal Festival tournament.
* In Volume 4, Issei is still outmatched by Vali in combat, so Azazel encourages a dramatic power up by informing Issei that Vali will shrink Rias's breasts, prompting our hero to beat the shit out of Vali.
* In Volume 4, Jaune has his armor, sword and shield reforged to use the gold metal of Pyrrha's shield and circlet. The most notable is seen with the shape of her circlet on the bottom of his shield. As well, he wears a sash around his waist similar to how Pyrrha wore hers.
* In volume 4, Luke repeatedly asks Sylar to stop at one during their road trip, to Sylar's considerable annoyance.
* In Volume 4, Nora Valkyrie has a moment of this. When both she and her

* In Volume 4, the protagonist is overjoyed to be running for the Caped Justice Awards, until Sistah Spooky informs her that the award is a setup used to publicly humiliate the receiver and that she should watch out. Given that Sistah Spooky has been nothing but antagonistic from day one (not to mention
* In Volume 4, we also get the background for Angela Petrelli as well as the beginnings of
* In Volume 4, Yang gets an artificial right arm to replace the one she lost to Adam. It's eventually revealed that it was made by Pietro Polendina, and the man helps her upgrade it once she meets him.
* In Volume 4, Yang's storyline remains based in Vale. Although Oobleck and Port visit Taiyang's house to find out how Yang is doing, Glynda stays out of the spotlight in this volume. Oobleck, Port and news updates indicate she's leading Beacon Academy's cleanup efforts and also in charge of Beacon's recovery attempts.
* In Volume 4, Yang struggles to come to terms with the loss of her arm and suffers PTSD in the form of nightmares and flashbacks to Adam maiming her. When Ironwood, without prompting, commissions a state-of-the-art cybernetic replacement for Yang, Oobleck tells her that there are a lot of people who want her back to "normal", but does not elaborate on who or why. Yang only reluctantly accepts the arm and begins to wear it when she realises that the reason Taiyang isn't searching for Ruby, who has left to hunt the villains with only Jaune's team for company, is because he cannot look after Yang and search for Ruby at the same time.
* In Volume 5, one of Raven's bandits offers to lead Yang to Raven. When he runs

off on his own to "make sure the way is clear," Yang rolls her eyes and gets ready for a fight.
* In Volume 5, Samuel gets the drop on Sylar by enveloping him in a concentrated sandstorm which

* In Volume 5, Weiss is captured by Raven's bandits and, still being a
* In Volume 5, Yang says that she basically raised Ruby by herself due to their father Taiyang not being around often after Summer's death. While the show has been vague as to when exactly this happened (sources have implied Ruby was anywhere as young as two to as old as nine), Yang says that Ruby couldn't even
* In volume 5, Yuzuru Narazaki dresses up as a woman for an event held by Peacock and looks good enough to make at least one man very uncomfortable.
* In Volume 6, Emerald's unwavering belief that Cinder will look after them, even when Cinder's estranged from Salem, leads to a confrontation with Mercury. Mercury implies that Emerald's blind faith in Cinder comes from a desperate need to have a mother-figure in her life, and he brutally tells her that she's deluded if she thinks Cinder cares about either of them. Emerald refuses to hear it, but Cinder has a sadistic craving for power and has physically hit Emerald for questioning her decisions.
* In Volume 6, new character Maria Calavera is revealed to have once been
* In Volume 6, Ruby learns that the power of her silver eyes can only be triggered by the presence of the Grimm. There is no way to safely train to master her power. All she can do is practice settling her mind into the right emotional state for summoning the power. Beyond that, she has to learn on the battlefield while fighting the Grimm. The first time she attempts to do this against a huge Grimm, she fails. The only thing that stops her from dying is that she's travelling with someone who has the ability to freeze time. That allows her to get into the right mentality for summoning the power; even then, she's only able to stop the Grimm for a moment, but it's just long enough for other options to come into play and defeat it.
* In Volume 6, Team RWBY and JNPR pull off a caper to try and steal an airship so they can get into Atlas. The plan goes completely lopsided when Adam Taurus uses that moment to get his revenge on Blake, preventing her from doing her part.
* In Volume 6, Team RWBY encounter a type of Grimm called the Apathy. Unlike most Grimm, the Apathy are not ferocious beasts, but act more like zombies. They drain the will and aggression of any within the area until they just give up and wait to die. A farm head named Bartleby had the "brilliant" idea of trapping two Apathy in his cellar, under the premise that the Apathy would keep everyone calm and therefore not attract anymore Grimm. Unfortunately, the
* In Volume 6, the creators admitted they tried to avert this trope when Adam died by having him be stabbed twice, plunge off a cliff-edge into a raging waterfall and rapids, and even bouncing off rocks with a
* In Volume 6, the plot forces the heroes apart; Team JNPR continues onto the city of Argus, while everyone else gets stranded in the wilderness. Once they reunite, Nora's first reaction is to scream "CUTE BOY OZ!" and tackle poor Oscar to the ground.
* In Volume 6, when Haru is facing down Sieg, he's briefly able to get past his magical defenses by using the Eisenmeteor form of his sword, having realized that magical defenses only work on magic-infused items. Much later, Sieg is facing down Haja the Infinite, who has unlimited magic power. Unable to beat Haja with sheer magic strength, he instead rams him through the heart with a staff devoid of magic, having remembered what Haru said and realizing that Haja would be unable to block it.
* In Volume 7, Aoki calls Takagi to ask him whether he would like to see
* In Volume 7, Blake and Yang promised General Ironwood that they won't tell anybody about the Amity Colosseum being turned into a satellite as part of a plan that involved uniting the entirety of Remnant against Salem and his minions. A promise that's broken once both of them decide to tell Robyn Hill the truth. For a

time, it worked, as Robyn allied with Ironwood believing they were doing the right thing, however, as soon as Ironwood knows the truth, trust between Team RWBY and the Atlas authorities begin to crack and they begin to fight each other, thus attracting even more Grimm to Mantle and Atlas.
* In volume 7, Blake's hair lost its curl when she received a haircut. Jaune's wavy hair also looks rough in animation.
* In Volume 7, Clover Ebi is introduced as one of the kingdom's most elite Huntsmen and a partner for Qrow. By the finale, Clover becomes the first major casualty of Salem's attack on Atlas and heralds the darker tone of Volume 8.
* In Volume 7, the heroes discuss the possibility of implementing martial law. Ironwood asserts that sacrifices are necessary for the greater good and that every one of them has made sacrifices. Nora bluntly tells him that he's not sacrificing anything while forcing Mantle to sacrifice everything.
* In Volume 7, the heroes repeatedly warn him that squeezing Mantle so hard to achieve his goals is playing into Salem's hands by turning Mantle against Atlas. After shooting Oscar
* In Volume 8, a series of events culminate in the heroes arguing about what to do, which is the final straw that snaps
* In Volume 8, Episode 10, Ruby and Yang's teams reunite at Schnee Manor; while Blake is unsure how to greet Yang, Yang cradles her face for a moment before they sink into an embrace that includes tenderly touching their foreheads together.
* In Volume 8, Episode 11, Ren and Nora have a heart-to-heart about everything that's been happening and finally establish exactly where they stand with each other. They conclude their talk with a hug that ends with them pressing their foreheads together.
* In volume 9, Yuno's group on the senior trip see the Billiken, a statue that's supposed to bring luck if you rub its feet. Since Yuno is small for 17/18, Miyako restrains her while Mami and Nakayama rub her feet "for luck" in a way that looks by her reaction like it really tickles.
* In volume eight Ironwood replaces his left forearm with a cybernetic limb.
* In Volume Five, Ruby tries to cheer on Oscar, asserting that he'll be "
* In volume nine, Vincent asks Seigi everything he knows about coral as a gemstone before giving him information
* In Volumes 2-3, Sun and Neptune get screentime, but their team-mates Scarlet and Sage have no role in the plot. They have one cameo as background characters in Volume 2; in Volume 3, while they do appear for Team SSSN's tournament fight, Sage has little focus and is eliminated very quickly, while Scarlet gets a couple of lines and brief fight before he is also elminated. They do appear during the climactic battle of the volume, but only as part of the student ensemble.
* In volume ten, Octavia sets up a riddle game with Seigi and Richard to test Seigi's knowledge of gemstones and Richard's knowledge of ancient Japanese literature

* In V, this also works against spellcaster creatures, as they use the same spells. However, in neither case Eagle Eye allows heroes to learn spells that require the respective magic skill (3rd to 5th cycle) or abilities unique to the hero class (Barbarian heroes, who use War Cries instead of magic, can learn War Cries but not magic with a similar skill).
* Invulnerability from a single hit unless attacked with magic or a weapon made from one of the three magical materials. A handful of creatures also have Greater Invulnerability, which means that one of their normal weaknesses no longer applies.
* invulnerability invincible when not hit on their giant shiny crystals (explosive rounds can damage their bodies, but unless you've already done a lot with critical hits it's going to take a very long time), but that's about it.
* Invulnerable Guard that you've defeated by the hundreds, yet the game won't give you the option of trying to shove/push/fight your way past them.
* In Waberi's "In the United States of Africa", Africa is the largest superpower while the Western world as we know it is plagued by the very maladies that current Africa faces, from the perspective of an adopted white French girl.
* In "Waiting", Patrick successfully delivers a piece of cake to SpongeBob but ends up eating it whilst looking for the fork he brought.

* In "Wake the Dead" Solomon Grundy gets reanimated through Chaos Magic as a raging, mindless zombie, and the only merciful option is to kill him (again):
* In "Wake Up", Finn and Jake return to Prismo to wish to see Finn's dad. Since they already used up their wishes, they brought Shelby to make the wish for them. Shelby wishes for a pony for his girlfriend instead.
* In "Waking Moments", all of the crew have had strange nightmares which end with a strange alien watching them. After waking up they all share their dreams, but Tuvok is notably reluctant to share as his dream, shown at the beginning of the episode, was that he went to the bridge, only to realize when the entire crew begin to laugh hysterically that he had neglected to put on any form of clothing. Janeway takes a turbolift with Tuvok and takes the opportunity to investigate further. Clearly uncomfortable, Tuvok admits he dreamed he was in the turbolift and the alien seemed to be "scrutinizing his appearance" before following him back to his quarters. His short, evasive answers seem to pique Janeway's interest further.
* In Wales, the hellhounds ("Cwn Annwn") accompanying the Wild Hunt were white with red ears.
* In Wally's specific case, he's been on the job long enough that he remembers some things about the company's old computers that no one else knows, which contributes to his job security. This was the engine for an episode of the Dilbert TV show.
* In "Walter's Radio", after Mr. Boynton makes a non-committal statement about the weather, Miss Brooks snarks:
* In "Walter v. Stretch Grudge Match," Harriet instigates the said grudge match and then panics before the fight begins.
* In Wano Arc Act 3, the Red Scabbards are starting to fight the traitor among them midway through Chapter 985. When the scene cuts back to them at the start of 986, the traitor is lying on the ground, defeated and apparently dead. Subverted when it turns out that he was fatally wounded but not dead, and ends up returning to fight the Red Scabbards again, resulting in him being cut down by Kin'emon.
* In Wano Tama plays this very straight as she befriends komainu (a mythical Japanese lion dog thing) and Hihimaru (a giant baboon). Tama's unnamed devil fruit even gives her the power to produce food that is capable of taming animals and even animal-humans.

* In what may be a confusing aversion, some countries' police forces have a rank that is referred to as Commissar, but is essentially the equivalent of a police captain with no relation to the trope.
* In what may be an urban legend, a cautionary tale is told to GIs learning German. A young serviceman is in a German bar trying to pick up a lovely young lady. Trying his best to impress her, he says, "Ich möchte dich heute nackt sehen." He gets a drink in his face and spends the rest of the night alone and/or

humiliated. What he was trying to say was, "Ich möchte dich heute Nacht sehen," or "I would like to see you tonight." What he said was, "I would like to see you naked today." (The "ch" in "Nacht" is the guttural sound of "loch" in Scottish English and Scots.) Note that the "ch" sound in "ich" is not the same sound as in "Nacht." (German speakers distinguish the two by referring to those sounds as "ach laut" ("oh sound") for the sound that was botched here and "ich laut" ("I sound") for the one that seems to have been been pulled off at least well enough to not sound like something else).
* In what may be an urban legend, a student demands "cakes and ale" at his final exams, citing centuries-old regulations of the college. The student is served the modern-day equivalent - and then fined for failing to dress appropriately for said exams, as those same rules require wearing a cloak and sword.
* In what may be a subversion, many fans of Lost took the close-shot of Ethan's corpse and the motion of his breathing (which appears to have been a goof) unnoticed by the Losties as a casual foreshadowing that the character would come back. While he featured frequently in flashbacks after the episode of his death, he never made his return in the "present day".

Mr. Krabs threatens to charge him for all of the patties he ate while training, and the bill has an impossible amount of zeroes.
* In what seems to be a reoccurring trend, Megatron once again attempts this with Optimus Prime, intending to vanquish his spark in the ensuing Starscream Supreme explosion. Notable in that Megatron did not fully acknowledge Optimus until this episode — it really goes to show how Optimus dug under him and had the show continued, the event is what would fully kick start their legendary rivalry.
* In "What She Wants", it's revealed that Desiree's compulsion to grant any wish she hears was due to a spell being placed on her in life by an ifrit. The only way to break it is if she finds her
* In "What's Up, Doc?" Hawkeye uses Radar's rabbit for an old-fashioned pregnancy test (without killing her). The trouble is, the rabbit is fully grown. The test is done by injecting urine from a woman into a juvenile rabbit. If the woman is pregnant, the hormones in her urine will cause the rabbit's immature ovaries to rapidly mature and enlarge. As you can see, if the rabbit is mature, her ovaries will already be an adult size regardless of whether the woman is pregnant or not, making the test useless.

* In writing, this can be differentiated by calling the former a "girlfriend" and the latter a "girl friend," but that doesn't translate verbally (and is kind of awkward in writing anyhow). Some try to circumvent this by using more platonic terms such as "gal pal" or "guyfriend" to contrast with "girlfriend" or "boyfriend", but it doesn't always work, usually on the basis that "it's a friend who just happens to be of the opposite sex" can come across as
* In Wronchi Animation's Hearthstone video for a match of Jaina Proudmore vs. Gul'dan, Jaina casts Yogg-Saron, who, when summoned, unleashes a storm of totally random spells. She then munches on some popcorn as she sits back to enjoy the show. After some hilarious results (the first thing Yogg does is turn himself into a frog), mostly bad for Jaina, Yogg casts one spell that wins her the match (as is usual in Wronchi's Hearthstone pieces, it all could have happened in an actual game of Hearthstone).
* In "Wrongway in Ronguay", Scrooge sinks into a quicksand pit in the middle of the desert. He escapes by swimming out using a box of scuba gear he had brought

* In WW2, anti-tank gunners came up with what was thought to be an unusual but remarkably effective
* In WW2, both the Royal Air Force and the Royal Navy used the same aircraft, the Fairey Swordfish torpedo bomber. A large biplane with open cockpits, it was noted in service that a particular manoevre caused the fuel tank to leak into the observer/gunner's cockpit via an open valve designed to keep air pressure constant in the fuel system. Having aviation fuel slopping around the air gunner's feet was held to be a design flaw. While the RAF grounded its fleet of Swordfish for an expensive mod, the Royal Navy's fix, a wine cork on a string, solved the leak problem and took five minutes to instal.
* In WW2, there were "natural enemies" that would often attack each other on the flimsiest of excuses. Ships viewed aircraft, submarines, and small torpedo craft as to be shot at until proven otherwise, knowing that their best defense was to engage as early as possible to disrupt an attack. Fighters would view other single-engine aircraft with great suspicion. Submarines thought that anything small with visible guns was an enemy destroyer until it proved otherwise. Torpedo boats tended to see anything that floated as a valid target. Bombers viewed any single engine plane approaching them as a reason to open fire.

* In WWII, Australian commandos were organized into "independent companies," significantly larger than a line company but with all the support necessary to operate independently of a battalion structure (medical, communications, engineers, and so on) that a normal company wouldn't have. This basically made them pocket battalions, which meant the majors in command were really junior
* In WWII, members of the Italian anti-fascist resistance leagues used battle names. Following the war, Italian women were eligible to be elected to public office for the first time, and (as most had no political connections except their work in the resistance) almost all of the first female parliament members continued to list their nomme de guerre in their official bios, so that their fellows would remember their deeds in war.
* In WWII, the Germans had snappy uniforms designed by Hugo Boss. Guess who lost.
* In WWII, the necessity of setting a convergence point for wing-mounted aircraft guns is why several countries continued using synchronized guns firing between the propellers. Whereas wing-gun fighters had to be within a "sweet-spot" distance (not too far, and not too close) for maximum effect, synchronized guns - which were mounted on the plane's centerline - were only limited in range by the gun's ballistics, valuing marksmanship over firepower, and being less reliant on gun sighting technology.

* In yet another episode, a dead body is found in a cooler that's been sealed with duct tape. By the end of the episode, they have four suspects but no way to prove who is the actual killer. To find out, they get four coolers, put a GPS tracker and a camera inside each of them and seal them up with duct tape, making sure that they look exactly like the one the body was found in. Then they mail one to each of the suspects. The idea is that the three suspects who are innocent will have no idea why someone has sent them a strange box, and will open it to find out what's inside. The fourth suspect, who is guilty, will think that he already knows what's inside and will try to get rid of it without opening it. It works.
* In yet another episode, after a bunch of criminals take control of a prison ship, one of them opens a door to an area of the ship, unaware that there was a hole in the ship's hull on the other side.

* Iodine has a bright purple color in its liquid and gaseous form. It is also toxic in those forms: on the contrary, its refined ethanol mixture used for disinfecting wounds appears beige.
* Iodine was discovered completely by accident as a byproduct of adding too much sulfuric acid to the waste left over after making saltpeter (a component of gunpowder) from seaweed. After the initial fight over who had discovered the new element, there came the question of what to do with it. It dyed and stained things well, but didn't smell too good, so it was given to soldiers to use to mark the

wounds of those who had been shot, stabbed, etc. in battle. Surgeons of the period quickly noticed that soldiers whose wounds had been marked by iodine were far less prone to infection.
* I of the Dragon, if a town's main building is reduced to zero HP, the town explodes — which won't harm you at all, but will slay any enemy nearby and even give you the EXP for their deaths! As a result, attacking the very towns you're supposed to protect can be one of the better ways to level up.

* Iolanta is about a blind girl finding love and gaining her sight, and the rest of the characters helping her.
* Iolanta, we never get to see or hear Matilda. We just have to believe Robert's famous aria on how no other woman could equal her.
* Iolanthe. Although everyone gets married at the end, the Fairies have had the hots for the Peers all the way through Act II, the Queen is dotty about Private Willis and finally doesn't have to deny it anymore, the Chancellor gets his long-lost wife back and Strephon and Phyllis are able to be together after all. So for once absolutely every pairing is justified.
* Iolanthe and thought it was cool. Ruth Bader Ginsburg and Sonia Sotomayor often wear lace cravats with their robes, a tradition started by the first woman on the Court, Sandra Day O'Connor. All this is entirely legal, as the robe is the Justice's personal property, purchased at his or her own expense. Furthermore, the Court's regulations only require that Justices wear black robes in the situations that call for it, but don't say anything else about the subject.
* Iolanthe De Belville was finally rewarded with a peerage thanks to a distant cousin's death, and "Fold your flapping wings," a serious, from-the-heart song for Strephon lamenting life in Parliament. Of the former song's music, only a second violin part survives, but "Fold your flapping wings" did have its music published in the vocal score of the show.
* Iolanthe, except without the love potion being reversed at the end, which is arguably far more interesting.
* Iolanthe: "Good Morrow, Good Mother" (Strephon), "The Law is the True Embodiment" and "When I Went to the Bar" (The Lord Chancellor), "My well-loved lord" (Phyllis), "When all night long, a chap remains" (Private Willis)
* Iolanthe has the Lord Chancellor and his Nightmare Song, which describes a dream in which he is travelling on a Channel steamer which is also a train, a coach and a fleet of bicycles, while an eleven year old lawyer sells the crew shares in a company which plants shopkeepers to grow the things they sell.
* Iolanthe is a fairy who looks like a 17-year-old girl. In the backstory, she married a mortal and had a son, Strephon; in the play, his age is 25. This causes problems for Strephon when he is seen in Iolanthe's company, since no one will believe that's she's his mum.
* Iolanthe, specifically in Lord Mountararat's solo "When Britain Really Ruled the Waves":

* Iolanthe, the title character was exiled to the bottom of a river for marrying a mortal (a offense against fairy law punishable by death). To liberate her from this miserable dwelling, the Fairy Queen pardons her in the opening scene.

* Io takes the interesting step of having different scientists taking two different directions for this after most of the Earths’ atmosphere becomes deadly due to pollution. First, we have a surprisingly low-tech version of this in the form of Sam Walden (continuing a project started by her dead father, who also broadcast messages urging lingering humans not to leave Earth) who tried to clear out the toxic atmosphere by raising and training bees to pollinate enough oxygen producing plants. By the time Sam succeeds she may be the last person left on Earth and it’s unclear if anyone else will come back. On a larger scale, the prologue mentioned that as the atmosphere first got bad a few other examples of this trope started building a power station to harvest energy from other planets instead, but things got so bad that power station turned into an escape colony orbiting IO, with the people there having little faith in Sam's project and looking for new planets to colonize.

There is very little doubt that the battleships day as a primary fleet force projector ended long ago with the rise of the aircraft carrier, but as for its use in naval gunfire support, the debate is still ongoing.

* Ip Man 2 boxer Twister mocks the "dancing" of the martial arts demonstration.
* Ip Man 2 contains a rather funny moment at the reyert caused by Twister in his first step into the ring. One of the kung fu trainees gets punched in the face (hard, but just once, and so fast that it can be easily unseen by eye) and he suddenly starts to twitch and flail his arms for some long seconds until he gets held by another trainee. It only looks like the punch gave the poor guy a seizure.
* Ip Man 2. In the middle of the match, the crooked officials suddenly declare that

from now on, the fight will be under pure boxing rules. Ip Man forgets this and kicks Twister in the face, which causes him to be penalised.
* Ip Man 2, Ip suggests that the Twister, who has so far taken plenty of punches to little effect, has a weak point, which pays off when his turn comes up.
* Ip Man 2 of Master Hung. Notable in that Hung absolutely knew what was going to happen. The ref calls off rounds multiple times when it appears the fight is becoming too one-sided and asks Hung if he's okay before letting it continue, and Ip even attempts to throw in the towel to save him, only for Hung to shoot him a silent look that basically says "no, let me die as a warrior."
* Ip Man 2, the friends of Wong Leung who he calls to challenge Ip think he looks like a laundryman, while one of the Hong Kong masters thinks his name sounds lame. They have no idea.
* Ip Man 2, the Twister asks Master Hung's students to hit him as hard as they can and laughs off their blows as wimpy. When he actually throws down with Master Hung and Ip, though, he properly blocks and evades their attacks.
* Ip Man 2. Wong Leung also starts this way but eventually gets better after a few hard lessons.
* Ip Man 4: Though Geddes manages to knock Master Wan out, it's not before the latter manages to throw him a few times, whereas he was earlier able to defeat a roomful of admittedly already tired and injured masters without a scratch.
* Ip Man a couple of times. Also subverted in the third film, where the only reason Ip's fight against Frank is a draw is due to the time limit set up by Frank. Given how the fight was shown, there's a serious possibility of Ip losing if the fight was longer.
* Ip Man, and he fled to Hong Kong to escape the communists, which made sense since Hong Kong was still a British territory at the time and the CCP would have probably executed him if he remained in the mainland.
* Ip Man, are heavily fictionalized, and retooled his life and circumstances completely to suit Chinese propaganda purposes. Ip Man was never a laborer in any Marxist-Leninist-Maoist sense. He worked as a police officer for most of his adult life. He was never affiliated with the Communist Party in any way — at the time of the films, he was a card-carrying member of Kuomintang, the Chinese Nationalist Party and the sworn enemies of the Communists. And his flight to Hong Kong was not to escape the Japanese, but the Communists.
* Ip Man concludes the final fight with the speculators overpowering the Japanese guards to get to the wounded hero, then cuts to him being taken to safety and later to his real-life success. What happens to the Foshan townsfolk as a result of the most probable Japanese response is left unknown. The sequel shows the Japanese taking out their anger on one of Ip's allies, but the fate of the rest remains unknown.
* Ip Man doesn't shy from depicting Japanese brutality towards Chinese or Western racism.
* Ip Man Film Series which interestingly has the titular hero defeating western opponents.
* Ip Man, in addition to being an excellent action movie, is often considered to be borderline propaganda, demonizing foreigners and glorifying the Chinese. The film and its sequels also rewrite Ip Man's political stance to be more politically correct in modern China, ignoring his affiliation with the anti-communist Kuomintang and the fact that he fled to Hong Kong not to escape persecution by the Japanese, but by the Communist Party.
* Ip Man — Martial arts film series. Five films since 2008 (four main films and one spinoff).
* Ip Man, the final fight against General Miura is held on a raised platform with falling off it as a defeat condition. In the sequel, Ip has to take challenges from the other Hong Kong-based masters on a table, with getting off the table as one of the defeat conditions.
* Ip Man, there are several changes to history to make the film more Communist-friendly. In the film, the title character is a bourgeois martial arts teacher who is forced to join the working class during the Japanese invasion. He then leaves

the mainland for Hong Kong to escape the Japanese. In reality, Ip Man had a day job as a police officer and never worked as a laborer. Also, he was a supporter of the Kuomintang, the enemies of the Communists. He fled to Hong Kong to escape the Communists, not the Japanese.

* IQ is frequently misunderstood by people who believe it to be an absolute measure of intelligence; rather, it is a statistical measure. 100 IQ is the average intelligence of whatever baseline population is used to construct the baseline for the test. Someone with an IQ of 115 is not 15% more intelligent than someone with an IQ of 100, but rather is 1 standard deviation more intelligent than someone with an IQ of 100 - thus they're more intelligent than 84.1% of the population. This doesn't mean that they're 34.1% more intelligent than the average person is, either. Due to the way that IQ tests are created,

* I Qs more than four standard deviations beyond the average (below 40 or above 160) cannot be accurately measured because there is simply insufficient data to accurately chart the relative intelligence of people out there - thus someone with an IQ measured as being 175 may not be one standard deviation more intelligent than someone with a measured IQ of 160. Thus IQ is a relative rather than an absolute measure, and going from 100 to 110 IQ may not represent the same change in absolute intelligence as going from 110 to 120 IQ.
* I.Q so their children will have a high IQ. Einstein and his fellow scientists make the mechanic look smarter than he is — she eventually sees through the ruse but marries him anyway.

When Maria gives birth, the baby is clearly Asian and thus cannot be Renato's son. However, Renato admits he always knew he wasn't the father, but chose to marry Maria both out of love for her and because he didn't want the baby to grow up fatherless like he did. A big american fast-food company that set up in Britain elected to save a few thousand dollars in overheads by using its original American payroll stationery, figuring that British employees would get that they were being paid in £ rather than $ and most of the standard headings could be transposed. They ran into trouble when employees saw a heading for "IRA Deductions". In British terms, what Americans call an "Individual Retirement Account" might be "Employer/Employee's Pension Contribution". Unfortunately the acronym, in Britain, is most commonly interpreted as "Irish Republican Army" - a terrorist organisation that was very active at the time. and the story went out that employee wages were being deducted as a contribution to terrorism, and what else can you expect from Irish-Americans, they fund most of it anyway... that payroll stationery was

* Iran–Iraq War, Iraqi engineers would pile up the bodies of Iranian soldiers after a failed attack to use as foundation materials for their troops' fortifications.
* Iran–Iraq War of the 1980s, a decade long stalemate which achieved absolutely nothing. Saddam's Iraqi military was too hopelessly corrupt and unmotivated to make any headway despite adopting chemical weapons, and too much of the Iranian military was inexperienced and ill-trained for them to make any headway either despite their superior staffwork and motivation. When one side is gassing villages and the other is sending runners to clear landmines by foot, neither side is expressing much hope for the aftermath.
* Iran–Iraq War was the Iranian recruitment of young children, who were ordered to run straight out on Iraqi minefields in order to clear the ground for the main army. Some were also given infantry weapons and told to attack Iraqi positions. It's said that plenty of Iraqi troops cracked by the sheer guilt they

Today it's a theocratic regime that survives by playing off rival geopolitical enemies to its advantage rather than set any agenda.

* Iraqi Secret police, which was notoriously known for torturing and silencing Shias and Kurds who opposed the Iraqi government. This worsened by the Saddam Era, where hundreds of Iraqis ranging from teenagers to the elderly were sent off to be killed. Secret Police would perform extreme methods of torture, from rape to the gouging of eyes to extract evidence. They would even wiretap homes and then send off anyone in the night if they were suspected of anything slightly off place.

* "I Remember Larry" recounts several pranks made upon the singer and the people of his town, which start out innocuous enough (okay, so the Ben-Gay in the jock-strap is kind of mean), and descends into somewhat less harmless ideas ("You know I couldn't help but laugh/Even though he treated me like slime/Remember when he cut my car in half?/Well, he really got me good that time!") and ends with the singer reminiscing cheerfully about how he broke into Larry's house, bound and gagged him, dragged him into the woods, stuffed him in a plastic bag, and left him for dead. Funny song, mostly.

* Irish chieftains in the Middle Ages were known to recruit displaced Scottish nobles, known as Gallowglass warriors. They were known to be able to hold their lines far stronger than the Irish light warriors and were armed with thick armor and huge axes or swords. They were distant enough from the politics of the Irish clans to be considered perfect bodyguards and were a major part of the Irish stopping the Normans from flooding over from England.
* Irish comedian Dara O'Briain makes a point about this in his show 'Talks Funny', regarding the ClearBlu Pregnancy Test. He says that the dynamic voice-over and flashy effects are ideal for attracting male buyers to a female-orientated product, as peeing on things is "the Holy Grail" of technology as far as men are concerned. In turn, he says that this is because men are marketed to as though they were "autistic 12 year old boys" who wish that all of life's major decisions could be confirmed by peeing on things.

* Irish Mob. A bomb went off in his face before he could get away, and now everything above the lower lip is just skull wrapped in sticky exposed musculature. At all times he either needs a transparent face mask or a mess of bandages to hold it in place. In spite of all that, he was one of the less nightmarish mobsters in that storyline.
* Irish Mob of Owney "Yiddles" Milligan. The Milligan gang also grows rich and powerful until they are taken out by Donatello Fadda's Italians. The rise and fall of each gang is illustrated by their clothing change over the years. When the new gang is introduced, they are wearing working-men clothes. When the gang is about to fall they are wearing suits, furs, and jewelry. When the season starts the Faddas are now wearing rich-men clothes and are confronted by the working class black gang of Cannon Limited.

* Irish Mythology tells how Etain, the wife of Midir of the Aos Sidhe, was turned into a fly which was accidentally swallowed by the wife of Etar. She became pregnant by it, and gave birth to the reborn Etain. Midir eventually recognized his wife and took her with him to the land of the Sidhe.
* Irish Mythology, was a king of monstrous giants called the Fomor who used his eye as a weapon: "The Evil Eye was no ordinary eye but a deadly weapon that was never opened except on the battlefield. It was 'a ruinous venomous weapon' that needed four strong men to raise the lid from the eye with a polished grappling iron hung on massive wheels and pulleys. As the Evil Eye swept the battlefield its deadly gaze destroyed all who stood before it; whole troops of warriors lay withered in its wake and the tide of battle turned against the Tuatha Dé Danann."

The fact of the matter is that this is at best only a temporary fix, and in most instances it actually causes irreparable damage to the GPU's heat sensors and the system motherboard, to the point where even a professional may be unable to repair the system. Long story short: you should not be trying to repair a fried game console.

* I, Robot, a collection of short stories, uses the framing device of an interview with famed roboticist Susan Calvin to connect the various stories.
* I, Robot, and at least a potential love interest, but thankfully they focused on the robots and the related ideals.
* I, Robot) calls robots "canners," presumably short for "can opener."
* I, Robot Detective Del Spooner injects neural-matrix-dissolving nanites directly into VIKI's computer core, which destroys her mind, and releases control of the

hostile NS-5s.
* I, Robot. Detective Spooner attempts to debunk the theory that Dr. Lanning defenestrated himself to commit suicide. He does so by throwing a desk chair at the next pane of glass, and noting that, as safety glass, it shattered in place but did not break.
* I, Robot, Detective Spooner (Will Smith) is the gritty, cyborg cop and Dr. Susan Calvin (Bridget Moynahan) is the cold but beautiful robotics expert. They're investigating the death of another scientist, Dr. Lansing (James Cromwell).
* I, Robot, Dr. Alfred Lanning left behind instructions for Will Smith's character, Del Spooner, in the event of his death. His suicide near the beginning of the film sets in motion Del's investigation.
* I, Robot. Dr. Calvin is very much like this in the beginning, though she sort of thaws out.
* I, Robot", Dr Calvin mentions that Earth-based robots (for purposes other than scientific research) were banned by most governments during the years of 2003-2007.
* I, Robot: Dr Lanning uses a holo-mitter to speak to Detective Spooner after his "suicide".
* I, Robot) explains how he was once involved in a car accident that left him and a small girl trapped in sinking cars. A robot was on hand to save them, but despite his pleading, it chose him over the girl based on a calculated 11% probability of survival compared to his 35%.
* I, Robot features several effective examples of this trope including... "...the right man for the job...?" "...follow the bread crumbs..." "...I think my father wanted me to kill you..." etc, etc.
* I, Robot in a serious car accident years ago and was fully aware that it and some ribs had been replaced by cybernetic components).
* I, Robot includes conventional firearms, albeit more futuristic versions of them.
* I, Robot, in contrast to Sonny's speech, which is between this and a genuine emotional voice.
* I, Robot is also a good example. She tries to control all mankind to protect it from itself (end wars, stop pollution, end suffering, etc). Of course, some people will die, but Humanity would be safe. Or at least that's what she said....
* I, Robot is the most blatantly obvious, since her hairstyle changes four or five times throughout the movie, each one seemingly coinciding with a meeting with Will Smith.
* I, Robot: It happens to Sonny, as he was designed with free will. The ending implies it's happening on a smaller scale to all the obsolete NS robots by pointing out that they huddle together in their storage containers despite not being programmed to do so.
* I, Robot movie, automobiles all have automatic pilots, which are legally required to be activated when driving over certain speeds.
* I, Robot name, insisted that the new title and the superficial references to Asimov be added.
* I, Robot on earth. The robot apocalypse is written to be the result of logic. The goal, ending humanity's wars and self-destruction, is noble, yet the only reason given for the particular choice of solution (totalitarian uprising) to that problem is the word "logic".
* I, Robot: "One day they'll have secrets... one day they'll have dreams..."
* I, Robot should be blindingly obvious within a minute of their introduction, particularly when they say they can't retrieve the security footage from the room that Dr. Lanning jumped from.
* I, Robot shows symptoms of this. He reveals what could be slight envy of Spooner for his boast of artistic talent. Sonny also shows gratitude just for being referred to "as someone, not something." Spooner's closing words to Sonny: "find your way just like the rest of us..." leans this way even more.
* I, Robot, Sonny hurls another robot into an energy field that disintegrates most forms of alloy or composite. Before collapsing, it staggers about for a moment, then turns to reveal it's lost half its head and body.
* I, Robot: Sonny is interrogated and his sentience is assumed nonexistent, but,

through a complex rescue plot, Sonny demonstrates his sentience via art and complex emotional communication and understanding.
* I, Robot: Spooner is warned about an attacking robot, when said robot already has him by the throat.
* I, Robot, Spooner notices that the escaped robot is leaking fluid after getting shot. Instead of following the trail, he goes straight to the factory, where he knows Sunny will go to to repair himself.
* I, Robot Spooner tries to explain to Sonny that while the robot might copy the design faster, a human needed to create it in the first place.
* I, Robot: Spooner was once in a car accident where both cars plunged into the river. The driver of the other car died on impact, but a little girl was still alive. When a robot came to aid the humans, it didn't have enough time to save both and chose Spooner because he had a higher probability of survival. This event led Spooner to harbor hatred for robots as unfeeling machines, saying that any human would have chosen to save the little girl no matter the odds.
* I, Robot (suspiciously so...). Even some of the other technology has a similar aesthetic; a security monitoring system consists of a thin strip of blue light.
* I, Robot takes this to the nth degree by pulling both pistols out of his jacket, aiming, firing, and utterly obliterating his target while riding a motorcycle.
* I, Robot, the advancement of Sonny to the point that he has dreams and emotions, while no other robot does. Sonny's creator also provides the page quote.

* I, Robot, the hologram is shown to be 2D, can only respond to a limited range of questions, and has some visual static. It is, however, meant to fool the audience at first, as it looks perfect until the camera moves to the side.

* I, Robot was dubbed in Japanese twice. The first dub was released on home video, The second aired on Fuji TV in 2007.
* I, Robot was the first video game to use filled polygon graphics (as opposed to vectors).
* I, Robot when Sonny goes to save Dr. Calvin from falling to her death. He is clearly shown propelling himself downwards towards her by pushing off from a metal railing, which explains why he falls faster.
* I, Robot. When Sonny saves Susan Calvin from falling after the NS-5s disconnect the bridge she was holding onto, we get a point of view from Calvin's perspective as we see first the bridge fall past her feet, followed almost immediately afterwards by a free-falling Detective Spooner.

* I, Robot with Will Smith featured a lower-case 'i' in its title in the movie poster, suggesting the iMac trope. The fact that Sonny and the other robots are composed of chrome metal and semi-translucent plastics and resemble walking Apple iMacs is not coincidental.

* I Robot, You Jane". Willow is depressed because it turned out the "boy" she had a crush on and that seemed interested in her was in fact a robotic demon. Buffy and Xander try to cheer her up by pointing out that Buffy's current boyfriend is a vampire and that Xander was recently attracted to a She-Mantis. It doesn't quite

work, as they ALL end up depressed.
* Iroduku The World In Colours: Hitomi Tsukishiro is from 2078. When she gets sent to 2018, she gets confused by everything. For example, she tries to open a window by waving her hand over it, expecting it to be automatic.
* Iroh’s son Lu Ten died about a decade before the show began and is only seen in pictures but his impact on the show is huge. With no direct heir left, Ozai asks their father Azulon to forgo Iroh’s birthright and let him be the Fire Lord. Azulon is incredulous about him kicking his brother while he’s down and orders Ozai to lose his oldest son. Ursa works out a deal with Ozai that she’ll poison Azulon to save Zuko’s life which in turn makes Ozai the Fire Lord and leads to both Ursa and Zuko’s banishments. He's also the reason Iroh gives up his seige of Ba Sing Se. Had Lu Ten not died, Iroh might have won the war for the Fire Nation and left Aang without a world to save.

* Iroh's bizarre Fatal Flaw is his love of tea. While normally the wisest and more sensible figure in the entire series, he makes some monumental mistakes when around the stuff. Once, when having to hide his identity as a Fire Bender, he used his bending to heat up some cold tea and nearly blew his cover. Earlier than that, when finding a plant whose leaves were either the world's most refreshing tea or pure poison, he ground it up and drank it due to temptation.

Which is why most of the guns featured are famously reliable (Sanya's kalashnikov and all the revolvers Harry uses).
* Iron and Wine: Sam Beam was once in a gas station where he noticed an aisle of old-fashioned home remedies and dietary supplements, including one called "Beef, Iron & Wine". Dropping the first word, he picked it as the name for his recording project because it suggested a certain "duality" to him, as well as because it was more interesting-sounding than just his own name.

* Iron Butt Monkey: A character illogically maintains the ability to withstand all sorts of extreme physical abuse.
* Iron Butt Monkey: A character suffers tons of physical injuries, but manages to get through all of them unscathed.
* Iron Butt-Monkey: A character undergoes a lot of injuries, but manages to endure them completely intact.

* Iron Chef and Iron Chef Bobby Flay. Now, he doesn't -win- an unfair amount, but he gets -chosen- more than every other chef in the show by a huge margin because he's the most popular Food Network star in the series. Basically, the episodes in which he's chosen get a lot more views than any other chef's, so Food Network has him picked all the time.
* Iron Chef, and not shown until very late in the show's run was Iron Chef Japanese II, Koumei Nakamura, appearing in seasons 4 and 5 after Michiba's departure from the series. Until late, most American viewers had little idea that Nakamura had been part of the show for two years, as Morimoto was depicted as being Michiba's direct successor.
* Iron Chef has one of these: Kobe in the original series fits the trope almost perfectly (as he even has his own customised entrance).
* Iron Chef Hiroyuki Sakai returned to his hometown on the eve of a milestone battle, meeting up with classmates and cooking for them, even reconnecting with his high school teacher. He ended up getting a letter from another classmate, Isao Makio, who wished to challenge him.
* Iron Chef hosting the show is really just an actor playing the part. Doesn't stop everyone from regarding him as such.
* Iron Chef). In short, the game(s) provide a very watered-down and mediocre experience of the show and make the energetic and exciting show seem like a total snorefest.
* Iron Chef. It also got versions in Indonesia (twice), Israel, the UK, Australia,

Thailand, Vietnam, and Canada, with varying levels of success.
* Iron Chef, particularly in the later years. Sakai, Chen, Kobe, and Morimoto all have their fangirls. Kaga's got some as well, naturally, but surprisingly there are quite a few for the announcer, Kenji Fukui.
* Iron Chef revolves around the premise of having these kinds of chefs go against each other.
* Iron Chef, that's nearly (but not quite) two decades in one form or another.)
* Iron Chef) to construct various cooking methods (such as a smoker) from what he found in a scrapyard.
* Ironclad constantly harassed by a lustful noblewoman and wearing white robes in contrast to the other knights. He agrees to defend the castle from the invaders and certainly displays the "I fight so you don't have to" attitude.
* Ironclads, due to their steel hulls and lack of sails, are entirely grey.
* Ironclaw: As the players are anthropomorphic animals, there is a long list of stereotypes for each species. Some of these are unique to the setting, such as gray foxes being inbred aristocrats.
* Ironclaw Calabria is feudal, so houses have wars every so often, but the vassals of House Bisclavret are notorious for their petty wars.
* Ironclaw can communicate by thought, and Mind Reading is a common Journeyman level spell.
* Ironclaw causes not only blood but gore and entrails to rain down on one's foes. It causes some damage and quite understandably freaks those enemies out if they fail their saves. But it's Unholy Magic and therefore carries certain risks.
* Ironclaw condition as every other spell in the school so there's a small chance of the stiff jumping up and attempting to strangle you.
* Ironclaw: Elementalists and Cognosites can learn to bind Elementals and Shades, respectively, to talismans and call them forth later. While druids who have dealings with goblins can attempt to summon them, whether they'll help is up to them, more innocuously druids can also learn the "Summon Ally" spell that simply sends allies a telepathic call for help and increases their movement speed on higher rolls.
* Ironclaw, has a chance of being able to revive the dead. Though it works better on a character who is merely "dying", and becomes more difficult with every hour that one is dead.
* Ironclaw has a "Parkour" Gift that enables running up, down, or along walls.
* Ironclaw has Elementalists as one of the five basic types of mage, and the only ones whose spells inflict physical damage. Elementalists are further divided by the four standard Western elements (lightning is air) plus "star", which can only be learned after mastering the other four.
* Ironclaw; if you try to cast a spell, and you roll at least three 6's, you'll get hit with a magical backlash that does totally random (but always negative) things. In fact, the official rulebook encourages DMs to get as creative as they could with what happens.
* Ironclaw inherently evil — but evil people are obviously more likely to use it because they don't care about the danger it poses to others.
* Ironclaw: Knight Errant is one of the possible careers , though not all of the traits are necessary, many are essentially mercenaries of noble birth.
* Ironclaw Lutarists believe in a pantheon centered around the fertility goddess Lutara and an indeterminate number of lesser deities such as Brukes the Bloody-Tusked (war), Daga (farming), Lyrisica (music, poetry), and Femort (death, winter and sadness). However Lutarism is a minority faith in Calebria and mostly confined to House Doloreaux's lands, the other three major houses all follow the monotheistic Church of S'Allumer and the tribes outside the kingdom follow animistic druids.
* Ironclaw out beyond the reach of the Church and its' fanatics. There's no real trace left of whatever House Rinaldi worshiped before Saint Helloise came to them, while House Doloreaux never converted as a whole and still practices the old faith of Lutarism.
* Ironclaw scoring an Overkill is so gruesome that allies of the victim became

Afraid. And Necromancy doesn't work on Overkilled remains, and the one spell in the setting that can resurrect the dead (already a crapshoot) can at most bring them back with severe disfigurements that reduce their stats.
* Ironclaw sourcebook for House Bisclavret had privateers as a playable career.
* Ironclaw states "with unlimited power comes unlimited irresponsibility."
* Ironclaw taking the place of fauna. This allows, for instance, boar PC to go on a tusk-melon hunt. There are also constrictor snake gourds, bull-like aurochs radishes, and many more.
* Ironclaw tends towards being a sullen miseryguts and reacts poorly to more lively or humorous characters.
* Ironclaw: The Deadly Snaptrap is like a venus flytrap big enough to catch people, and has a "lure organ" in the middle of the trap that often looks like a chunk of gold.
* Ironclaw the druid spell "Steal Guise" allows one to impersonate another, but only so long as the real one is alive. The adventure "The Rescue of Miranda Devoisier" has a side quest where the head of a family is kidnapped and impersonated by a rogue druid using that spell.
* Ironclaw, there is a variety of domesticated dinosaur-like reptiles. The ones intended for riding are named after varieties of horse, i.e. palfries look like struthiomimuses while destriers are more like utahraptors.
* Ironclaw wear the color of their chosen school (yellow for air, brown for earth, red for fire, blue for water, and starred for the secret star school), clerics wear white, and thaumaturges wear grey. And, of course, necromancers wear black.
* Ironclaw), which would allow a character to do this, even though the only guns in the setting are wheel-locks.
* Iron Council, a group united by their communist sedition against the government.
* Iron Council is beyond even colourbombs (another kind of fantastic nuke) for sheer alien annihilation. It ERASES CITIES. And casts ripples of destruction BACKWARDS IN TIME.
* Iron Council, the many-armed creature that menaces Hiddentown has a lamprey mouth on the end of each tentacle.
* Iron Crown, all the main factions play this straight. Isandar's mercenary brigade is in warm grey and red (presumably for the warlike connection), anyone related to Chandera's dictatorship in blue and a cooler grey, and the divine order of the Judges in white and gold.
* Iron Crown An interwar example with mercenaries, monsters, and a dictator's daughter on the run after a coup.
* Iron Crown when she hears about traitors being the cause of the current mess she's in for the first time. One can only imagine she shares the same attitude her father (a dictator) has towards them.
* Iron Curtain, it's the badass male hero who is Russian and his female partner/love interest who is American.
* Iron Curtain tried to produce weapons powered by, and/or producing, supernatural energy. Whether or not the scientists found anything interesting is something still researched today.
* Iron describes one of these. "You can't live without the fire, it's the heat that makes you strong".
* Iron Druid Chronicles, all gods and supernatural entities are created by human belief and thought, including Jesus, the Celtic gods, the Norse gods, Elvis Presley and the comic book version of Thor.
* Iron Druid Chronicles Atticus is more than two thousand years old and he is still enjoying his life enormously. It helps that he is an earth druid so he has a very close bond with nature which grounds him and preserves his sanity. The werewolves also seem to enjoy their long lives.
* Iron Druid Chronicles: Atticus isn't much more than an immortal human with the ability to go hang around the same places as various mythological beings (his magical powers apart from the immortality are all tricks that normal mortals could also pick up), but after a few thousand years of said hanging around, he's on a first-name basis or at the top of the hit list with essentially every one of them.

Jesus is on moderately friendly terms with him, but also seems fairly exasperated by his antics.
* Iron Druid Chronicles, but also witches, vampires, werewolves, demons, and gods from other pantheons. In fact, EVERY religion is acknowledged as true, and each god has multiple incarnations because people have so many different beliefs about them (unless it's Jesus, who only can take crucifix form for the exact same reason). Thus, the comic book Thor exists as well.
* Iron Druid Chronicles druids are wise about this. Atticus has some very powerful enemies looking for him so he spent at least a century setting up his defenses. He befriended all the local nature spirits, allied himself with the local vampire lord and the local werewolf pack and put multiple layers of magical and mundane protections on his home and workplace. His ultimate home field advantage comes from an arrangement he has with Morrigan, one of his pantheon's Death Gods. As long as any battle he is in takes place under the jurisdiction of that god, Atticus cannot die in it. Unfortunately his enemy goes to extraordinary lengths to nullify all those advantages including making sure that the final battle happens where Morrigan has no jurisdiction and cannot interfere.
* Iron Druid Chronicles enemies Atticus had been making lately, and banned him from their territories on pain of fanged death.
* Iron Druid Chronicles has a badass beard which Atticus duly notes. In fact it is later found that he has a kit of knives strapped and concealed beneath his massive face bear.
* Iron Druid Chronicles lured Atticus to a battlefield where he drained the earth of so much power that nothing would grow back for miles if left alone. Atticus, as the last Druid, took upon the responsibility to nurse that dead space of earth back to health.
* Iron Druid Chronicles many different pantheons exist alongside each other. The protagonist is a druid who worships the Earth and pays lip service to the ancient Irish gods. The Greek god Bacchus is very powerful in Las Vegas while Native American deities still have some power in the surounding areas. The Polish witches get their powers from a moon goddess and a Viking vampire is trying to find a way to kill the Norse god Thor. Jesus and other figures from Christianity appear as a separate pantheon with Mary frequently appearing among humans to help out the poor and homeless.
* Iron Druid Chronicles that he makes mortal enemies wherever he goes. After Thor killed the family of the Viking Leif, Leif became a vampire and then spent the next thousand years preparing his revenge. By the time he is ready, he has become the most powerful vampire in North America. Whether he succeeds or fails the outcome of his attack on Thor will have profound repercussions in the supernatural world with a massive vampire war being the least of the problems. He does not care for the consequences as long as he gets a chance to kill Thor.
* Iron Druid Chronicles the protagonist has the inverse problem. A female goddess of Death of his religion is rather fond of him and likes to use him for sex. This has given him a form of immortality but has also made him a mortal enemy of one of the gods of Love. Since in that pantheon all the gods are very nasty, vengeful and quite barbaric, the difference is mostly academic. The god has tried to make the protagonist's life miserable for two millenia and is always looking for a way to kill the protagonist.
* Iron Druid Chronicles, this is exceedingly practical if one is facing off against a druid, who can perform all manner of hijinks on any metals or natural fibres you might we wearing, such as binding them to the ground. Though nowadays, you can just wear synthetic fabrics.
* Iron Eagle. Chappie initially plans the raid by rearranging the food on his plate. Whenever he mentions a target that should be destroyed, he eats the associated prop.
* Iron Eagle, Chappy gets shot down during the mission, and Doug is forced to go alone. However, it's later revealed that Chappy was picked up by American forces after he got shot down.
* Iron Eagle. Chappy Sinclair is the wingman for Doug Masters in a plan to use two

Air Force jets to rescue Doug's father. Just in case something happens, Chappy makes a tape recording of advice the night before so his voice can continue to guide Doug. Somehow, Chappy manages to predict exactly when he was shot down and doesn't bother to give advice about anything up to that point. The strangest part is when the tape says something like, "You did a good job shooting at the refinery. Now that that's out of the way..."
* Iron Eagle, Doug Masters blows up an oil refinery as part of his scheme to force the bad guys to release his father. Cluster munitions will make fuel tanks burn quite nicely.
* Iron Eagle. Doug Masters is so good that he can outfly veteran pilots as a teenager with no formal training.
* Iron Eagle, Doug Masters learned to fly in an F16 simulator, while listening to his favorite rock tunes on his Walkman. Turns out that as long as he's got his music to listen to, he's a great pilot; without the music, he sucks.
* Iron Eagle featured Israeli C2 Kfir jets (modifed French Mirage III's) and American-built F-4 Phantom II fighters as Arab MiG's. It also used Israeli F-16 variants as American ones, due to lack of backing by the Pentagon.
* Iron Eagle II has a scene where after deciding to work together after all to take down the bad guys, the American and Soviet pilots all rip the velcro flag patches off their flightsuits.
* Iron Eagle II, the central plot element is that a joint task force consisting of U.S. and Soviet Union troops has been assembled to perform a surgical strike on a nuclear missile silo in the Middle East. When the Soviet team arrives, their commander, Colonel Vardovsky, meets a sharp-looking officer whom he believes to be the Americans' commander, General Sinclair, and introduces himself with a crisp salute. The man informs the Colonel that he's actually just a lieutenant, at which point the real Charles "Chappy" Sinclair (played by the very black Louis Gossett Jr.) makes his own introduction.
* Iron Eagle II: Valeri Zuyeniko, despite the fact that the Soviet Union stopped using female combat pilots after World War II.
* Iron Eagle to General Daniel James, Jr., the first African American fighter pilot in the US Air Force.
* Iron Eagle, where the protagonist (Doug Masters) has to steal an F-16 from the Air Force to save his dad because the government won't do anything about Doug's dad being held by an unnamed Arab country somewhere in "the Med."
* Iron Eagle, While Doug and Chappy are flying towards their target, they talk about being alone in the sky. Doug remarks how he regrets not appreciating his father's advice. Chappy tells him not to worry, that his father understood, and to just focus on the mission.
* Iron Eagle: While planning the rescue mission, Doug, Chappy, and their crew construct a makeshift diorama of the mission area. Somehow, Chappy's lunch winds up in the middle of city...
* Iron Elves, and the shatterbow, a cross between a crossbow and a shotgun that fires explosive bolts.
* Ironfang also returns, after earlier chasing Chub and Coney, to prompt the Baron to
* Ironfang Invasion defeat General Azaersi and her forces, preventing their conquest of the lands around Lake Encarthan, but spare Azaersi and convince her that war will only bring ruin to her people. Azaersi proceeds to fund the nation of Oprak in the Mindspin Mountains as a haven for hobgoblins and other "monster" races. In addition, the heroes defeat the corrupted dryad Arlantia and restore the fey queen Gendowyn to a precarious rule over the Fangwood.
* Iron Fist (2017): After Rand Enterprises board member Lawrence Wilkins orchestrates a boardroom coup to oust Danny Rand, plus Joy and Ward Meachum, Harold decides to do something about it. Harold and his bodyguard Kevin Singleton sit in chairs in Lawrence's office, waiting for Lawrence to come back (taking advantage of the building security being offline for maintenance reasons). Lawrence is surprised since Harold has technically been dead for thirteen years. Harold attempts to blackmail Lawrence into reinstating Joy and Ward to the board of directors by

showing him compromising photographs that Joy had hired Jessica Jones to take, showing Lawrence being loaded into a police car as well as documentation of Lawrence's prostitution and embezzling. Harold offers for Lawrence to take his own life in exchange for his reputation being left intact. When Lawrence says no, Harold shoots him in the head, plants the gun in his hand, and leaves the damning evidence on his desk.
* Iron Fist (2017) ambushes Danny, she takes an early opportunity to inject him with a pre-prepared knockout drug. It takes quite some time to take effect, in which he continues to fight very effectively — but because she knows that it's in his system, she only has to fight defensively and survive until he passes out. And she's been watching and assessing him for days beforehand, so it's plausible that she'd get the dosage right.
* Iron Fist (2017) and insists on joining in to take the pressure off Colleen, though she makes a discreet exit on realising Danny really is just there to talk business.
* Iron Fist (2017) at his expense and often is the one to spew threats at enemies in his defense.
* Iron Fist (2017): At the start of the show, Ward Meachum is the only person besides the Hand and Harold's assistant who knows that Harold Meachum is alive. Ward has been keeping the secret for thirteen years and it's implied that the stress brought on by this secret-keeping is part of what has contributed to his drug issues.
* Iron Fist (2017) Bakuto is actually just another faction of the Hand. A sharp-eyed viewer will have picked up the connection long before Danny realizes it by noticing that Bakuto and most of the other students wear red t-shirts, black pants, and black leather jackets.
* Iron Fist (2017), but Danny is skeptical and quickly discovers that Bakuto is little different from Gao.
* Iron Fist (2017): Danny gave Jeri Hogarth the nickname "J-Money" when she interned on Rand Enterprise's legal team.
* Iron Fist (2017): Danny Rand and Colleen Wing have a lot of clear tension from the moment they first meet. They eventually realize their feelings and become lovers halfway through the first season.
* Iron Fist (2017): Danny Rand has been raised by K'un-L'un to be the Immortal Iron Fist, a weapon destined to fight The Hand. Upon his return to New York City, he meets and falls in love with Colleen Wing, who owns a Chinatown dojo. When he learns that Colleen is in the Hand, Danny is convinced that she was trying to seduce him to the Hand. Their relationship actually formed independently of the Hand, but it isn't until Colleen learns the truth about the Hand that Danny finally begins believing her.
* Iron Fist (2017) elderly female crime boss with a cane it could possibly be — and the subtitles didn't even bother hiding her name.
* Iron Fist (2017) filmed under the working title "Kick", since Danny is a martial artist.
* Iron Fist (2017) for him. His mother approaches the door, but can't bring herself to speak before Davos leaves.
* Iron Fist (2017), he cuts off his left pinkie finger to make sure it seems like the enforcers did their job then disappeared. While Harold is using a clawhammer to mutilate the bodies (destroying their teeth so the police can't identify them), Ward shows up, having been summoned by Harold to dump the bodies.
* Iron Fist (2017). In "Felling Tree With Roots", Ward Meachum walks into his father's apartment to find him using a hammer to smash out the teeth of two Hand assassins to delay identification.
* Iron Fist (2017). In Season 2, Davos sets himself up in a warehouse because the spartan accommodation reminds him of the monastery he grew up in. His minion tries in vain to get him to try a hotel with proper plumbing and room service.
* Iron Fist (2017): In the fourth episode, Danny Rand finally gets some good clothing of his own, and is dressed in a suit and tie for the press conference announcing his return to the public. Joy Meachum can't help but comment:

* Iron Fist (2017). In the Season 2 premiere, Danny Rand is shown training to use his Iron Fist near a subway tunnel, waiting till a train goes past before throwing a punch.
* Iron Fist (2017): It's not outright organ theft, but a subtle hint that Joy Meachum is actually not quite as straight arrow as she seems is when her idea of convincing a businessman to sell a pier to Rand Enterprises is to bribe him by showing him a dying kid whose liver will be transplanted to the businessman's nephew and completely bypass the national donor list.
* Iron Fist (2017): Jeri Hogarth once secretly cussed at an unbearable superior of hers back while she was still an intern at Rand Enterprises...while a young Danny was in earshot. She gave him five dollars to stay mum about it. Keep in mind, he was the son of her billionaire boss Wendell Rand.
* Iron Fist (2017) lament is that Ward is doing it so stupidly, forcing Harold to hide Ward's embezzling from the company accountants and the SEC.
* Iron Fist (2017). Misty Knight dubs Ward Meacham as "Tall, Dark and Arrogant."
* Iron Fist (2017) moot. However, his 1948 predecessor did wear the costume which could possibly mean that Danny might wear it in the near future once he embraced his role as the Iron Fist.
* Iron Fist (2017) of people mistaking Danny for a homeless person and telling him where he can get hold of some cheap shoes. He eventually accepts a pair from Colleen Wing.
* Iron Fist (2017): One of the signature scenes is when Danny uses the Iron Fist to blow open the steel door when escaping Birch Psychiatric Hospital.
* Iron Fist (2017) reveals that Bakuto has inducted a number of youth orphaned in the Incident and made them Hand soldiers.
* Iron Fist (2017) screen-tested for Danny Rand. He would eventually go on to portray Zhou Cheng in "The Blessing of Many Fractures".
* Iron Fist (2017) severely limiting how much the actors could rehearse. The second season went to lengths to fix this, by actually giving the actors more time to learn their fight choreography and also shooting in the winter (so that fight scenes set at night didn't have to worry about having limited windows to shoot, which happened in season 1 due to that being filmed in the summer).
* Iron Fist (2017) shows us that even mystical kung fu masters from another dimension know the "On One" trick. In "Eight Diagram Dragon Palm", Danny Rand has to reduce a dislocated finger on Colleen Wing.
* Iron Fist (2017): Subverted for laughs. Danny tells Colleen that he "ordered take out," and then escorts in a dozen caterers who set up a full-course romantic dinner in the middle of her dojo, complete with candles. The subversion is that Danny doesn't know any better; he's been living in a monastery for the last fifteen years, so all he knows is that these were the people his dad would call whenever his mom wanted dinner on short notice.
* Iron Fist (2017): The case for Danny Rand and Colleen Wing, which is a deviation from the comics (where Danny's love interest is Misty Knight). Danny's a native New Yorker who trained for 15 years in K'un-L'un while Colleen was born in China, spent time in Japan, and now teaches martial arts at a dojo.
* Iron Fist (2017). The Hand is implied to have existed a very long time too, maybe even two thousand years or more...
* Iron Fist (2017). This is the move that enabled Danny Rand to beat his friend Davos during their duel to see who would become the Iron Fist. Davos is seemingly getting the better of Danny, until Danny lures him into a position where the sun shining through a skylight blinds Davos at a crucial moment.
* Iron Fist (2017) (Ward) bear similar facial features and even the same slicked-back hair.
* Iron Fist (2017). Ward begs Bakuto not to make Joy watch the decapitation of her father, saying he'll give him anything. What does Bakuto ask for?
* Iron Fist (2017) Ward has enough of him and stabs him repeatedly, supposedly killing him. However, two episodes later, Harold comes back to life. He was unstable and short tempered the first time he was brought back from the dead, and it gets even worse after the second time he resurrects. The moment he discovers

Harold's second resurrection, Ward meets with the head of the Triads that are in conflict with The Hand and asks for help. The Triad boss recounts a tale from his great-grandfather's village, about a farmer who cut a deal with The Hand, who kept resurrecting him each time he died on the battlefield. But each time he came back, he got more and more deranged until he roasted his own children.
* Iron Fist (2017), Ward Meachum is attending Narcotics Anonymous, but is having sex with his sponsor instead of confronting his issues.
* Iron Fist (2017) when he finally has the courage to do the right thing and stick with it.
* Iron Fist (2017): When it comes to Harold Meachum's bond with his kids, his son Ward gets the short end of the straw. He dotes heavily on his daughter Joy but despises and denigrates Ward every chance he gets.
* Iron Fist (2017). When negotiations break down, Danny Rand uses his Iron Fist to knock the table into a gang of mooks who are about to attack him.
* Iron Fist (2017), where Danny gets annoyed when Luke says Danny can just use his money to solve anything.
* Iron Fist (2017), which implies Latino or Eastern/Southern European heritage. It's worth noting that in the comics, Bakuto ran a South American faction of the Hand.
* Iron Fist (2017), which reveal Matt only defeated a faction of the Hand, and never got close to touching the other factions led by Bakuto, Madame Gao, Sowande, and Alexandra.
* Iron Fist (2017), while Colleen has stayed in New York as the new Iron Fist, complete with a starter pack of rogues consisting of Mrs. Yang, Typhoid Mary, and possibly Luke Cage.
* Iron Fist (2017), who, due to being a lawyer, is instrumental in getting Danny's title of his father's company back from the Meachums.
* Iron Fist (2017), who sports heterochromia (her left eye is blue and right eye is green).
* Iron Fist (2017) will catch on that Bakuto's compound is another faction of the Hand right away, as he and most of his students wear the Hand's colors in red shirts, black pants and black leather jackets.
* Iron Fist after he screwed up. After killing the two enforcers, Harold cuts his own left pinkie off to keep up appearances. When Ward sees it, Harold claims he had a kitchen accident. When Harold resurrects again after being killed by Ward, the amputated finger grows back.
* Iron Fist are considered the best martial artists in the Marvel Universe, with the two being relatively equal. Both have held their own against the likes of Captain America, Wolverine, Deadpool and Spider-Man.
* Iron Fist before the Wraiths started a particularly important mission.
* Iron Fist, Colleen claims that Bakuto made her swallow tarantulas whole in order to develop an immunity to their venom, but Danny doesn't buy it and she admits she made it up.
* Iron Fist comics. To him, there is no defeat. His alleged loss to Wendell Rand? Slanderous lies. His inability to contend with the fully realized power of the Immortal Iron Fist? A fluke. To hear him tell it, anyway. While he is an incredibly talented martial artist with the sacred power of the Serpent Sting, he wants nothing more than to kill Iron Fist and prove once and for all that he's the best there is.
* Iron Fist Danny Rand, even when not harnessing magic dragon chi, can do things most normal humans can't, like survive a massive explosion meant to take out an entire city and cutting through the achilles tendon of a giant with a karate chop. A few of the other Immortal Weapons also qualify, such as Fat Cobra, who is as big as a sumo wrestler and fast as a ninja, and has expressed the belief that with the power of chi, an ant can wrestle an elephant into submission.
* Iron Fist did not have the CGI budget necessary to properly depict Shou-Lao the Undying, the massive dragon Danny Rand defeated in his comic book origin story. Instead, the only glimpse of Shou-Lao the audience ever gets are a pair of red eyes glowing inside a shadowy cave, and his fight with Danny takes place entirely

offscreen.
* Iron Fist. Going into battle, Face starts to wish his comrades "May the Force be with you," but thinks better of it at the last second.
* Iron Fist: Harold Meachum wasn't exactly a nice guy to begin with, but one could mistake him for simply being extreme but well-meaning early in the season. He's eventually revealed to be a cold-blooded murderer and just as bad as the Hand he serves, having been screwing with Danny's life even before his resurrection.
* Iron Fist has a dragon brand on his chest, acquired when he used his chest to block the dragon's scar and prevent it drawing strength from its mystical heart. It has the wings of an Western dragon but the snakey body of the Eastern type.
* Iron Fist. He also has said that one of the few issues he still has from his youth is one of Steranko's, when Cap "died" for the first time. Not only has he based his entire 50+ issue run on the three Steranko issues, he also "killed" off Cap—to much critical and fan acclaim.
* Iron Fist in which surly, bad-tempered cyborg Ton Phanan has picked a fight with some drunken Imperial soldiers in a bar.
* Iron Fist Po eventually ends up incinerating Danny with his chi dragon at the end of the fight, so the panda dragon warrior pretty much erased Danny from existence.
* Iron Fist, someone carrying a meter-long laser rifle on his person at all times would have earned him some weird looks.
* Iron Fist; they are each dancing with another partner to more energetic music, and are then maneuvered into dancing with each other in time for a slower song.
* Iron Fist to "arrest" them, and then they flag down a real military police patrol, saying their vehicle broke down.
* Ironforge is the home city of the Bronzebeard dwarves and capital city of the united dwarf nation. It's built inside of a mountain ridge and is easily the most well-defended of the original Alliance cities.
* IronGate has been secretly fighting supernatural threats to humanity for centuries without any serious exposure to the general public.
* IronGate has been this ever since the Fey enchanted/cursed her with fire powers as a child.
* IronGate, in their quest to defend the world from supernatural evil, has charged in like this to protect people at least twice.
* IronGate is about defending the world from supernatural threats, so this just goes with the territory.
* IronGate is a proper 19th century lady who just loves answering her fans' questions, she just happens to be a vampire.
* IronGate the Fey enchanted Embers with her fire powers as a child, which resulted in her accidentally killing her parents. In the story called Whiteout, one of the Fey appears as a huge dangerous ice based monster with many ice minions at its command.
* Iron Giant has one in its chest. It missed, but by all indications the blast would have been powerful enough to destroy a battleship in one shot.
* Iron Giant's eyes turn red, it's a good idea to remove yourself from the area.

* Iron Harvest infantryman with a full beard). Furthermore, the game's mechs feature unlockable skins, some of which make the mech appeared to be made or at least coated with precious metals like bronze or gold.
* Iron Harvest: Polania (Subversive), Saxony (Balanced), Rusviet (Powerhouse).
* Iron Harvest version of 1920s Europe with the three opposing factions being Polania (Poland), Empire of Saxony (Germany) and the Rusviet Union (Russia).
* Iron Harvest version of Europe were mechs were developed instead of tanks to break the deadlock of the trenches.
* Ironheart in which we learned that Riri, upon telling her teacher that she wanted to be a scientist, is shocked that she isn't being told off for wanting to be such a thing and the teacher realizes this and amends it to her not being able to be Tony Stark. Combined with a few other incidents, some have made her out to be a person who didn't become a superhero out of the kindness of their heart, but to spite a teacher over a comment made.
* Iron Hearts really likes German Chocolate cake. He's also intrigued by the idea of strawberry milk. Up until the Iron Warriors' 38th company made landfall in Equestra, he'd lived on nothing but ration tins for 7 years.
* Iron Hearts, the Iron Warrior's mooks eat "Ration Tins," which is a can of tasteless paste with enough nutrition to last someone all day; it's stated that a person could live off them from birth to death of old age with no ill effects. Twilight loves them because it means she doesn't have to waste time cooking.
* Iron Helix: Admiral Arboc of Starbase Amethyst is your liaison to Earth's military. She will provide you with relevant info throughout the game.
* Iron Helix is named after a biological weapon that can completely eliminate all life on a planet with only a single use.
* Iron Helix knew they were doomed, but that didn't stop them from leaving video logs detailing how to disable the ship's automated defense drone, and how to destroy the ship before it reaches its destination.
* Iron Helix: The "Iron Helix" is a biological weapon that attacks the infected's cells, mutating their DNA and rendering their bodies unable to carry out vital metabolic functions, which kills them within only a few hours.
* Iron Helix, the ship that you are exploring, are all dead by the time you get onboard, your interactions with them being limited to discovering video logs they recorded only moments before their deaths.
* Iron Helix, they were infected with a virus that mutated their DNA, which caused the ship to no longer recognize them or accept their commands. The ship then activated its automated defense drone, which eliminated the crew one-by-one.
* Iron Helix, which is constantly patrolling the ship and will kill you on sight.
* Iron Helix which is why the ship would no longer accept their commands, it's never revealed what caused the ship to reroute itself to Calliope in the first place.
* Iron Heroes d20 setting, which allows the GM to grant whatever kind of magic he wishes to NPCs but restricts players to a very restrictive, skill-based, horror-themed form of magic almost entirely to prevent them from easily coming up with the convenient counter to whatever the villain is up to.
* Ironhide and Ratchet were originally mini-vans colored red for Ironhide and white ambulance-styled for Ratchet (in fact, the original toyline they didn't have robot modes but deployed as mobile bases). * Ironically, at the described time while there was indeed legal slavery in Russia, it wasn't practiced as much as serfdom, which was discussed above, but which was much more relaxed in the early 17 century (in fact, until exactly the times of the novels, the serfs in Russia had the right to change their employer twice a year) was more economically efficient. It was the Peter the Great reform that ostensibly banned slavery which was responsible for the worsening of the serfs' lot. It was not well thought out, and instead of abolition of chattel slavery

* Ironically, Baldur's Gate 2 has certain features that allow a fighter/barbarian character to actually become devastating, even when solo, without violating game mechanics. One can use Imoen, a thief, and buy a master thief potion, then pick pocket the Kangaxx character, pre-lich transformation, and gain the Ring of Gaxx, a powerful ring of regeneration. Then gain the ring a second time after the defeat post-lich, and wear two of them simultaneously, for a very powerful regeneration effect. Combined with the boots of haste and the spell-rebounding cloak and a powerful armor, the figher/barbarian becomes an unstoppable juggernaut otherwise soloing through the game, even on the hardest difficulty.
* Ironically, Bart, Lisa, and Maggie were eventually revealed to be part black and part Native American through their father's side, although to such a small extent that they could still have blond hair.

* Ironically by the time of the 50s and 60s, the USSR itself had lost considerable prestige among former allies. The Cubans, namely Che Guevara, felt that the Soviet Union was backsliding and becoming too comfortable for its own good. Destalinization alienated Mao Zedong in China, while the Vietnamese always saw their Communism as rooted in local and nationalistic interest rather than the international vision of the Soviets. * Ironically, Detroit Lions coach Jim Caldwell expected a lateral play from the Green Bay Packers on the final, untimed play (due to a Lions facemask penalty that some deem controversial) of a Thursday night game in 2015. Unfortunately for him, pretty much the rest of the world expected a Hail Mary, which is exactly what Packers quarterback Aaron Rodgers delivered to tight end Richard Rodgers (no relation). The pass set the record for longest Hail Mary and longest air travel for a touchdown pass in NFL history, and for the Packers coming back from a 20-0 third-quarter deficit to win 27-23, the game was dubbed the Miracle in Motown.

* Ironically enough, many of the smaller communities in post-war America operate on a collectivist communist basis. Of course, a "give what you can, take what you need" philosophy works better for a small community where everyone knows each other, resources are already scarce and the community's survival is often at stake. Capitalism is a rarity in post-war America, found only in the big city-states out in California and Nevada, that have the sufficient population and technology to build a decent production base. Most Wastelanders trying to scratch a living out of the devastated world have no idea what communism was, why it was bad or what difference it really made in the long-run.

* Ironically enough, the Avengers also tend to only obey the rules either when it suits them, or when they're on duty. They're a bit of a variation of the usual trope in that they do care for ordinary people and take great pains to protect them - they just don't really have time for mortal authorities and their politics. Indeed, most of the heroes (with certain exceptions) tend to regard rules as things to be obeyed when convenient, and the problems of this attitude are lampshaded and discussed, with some responses to it - e.g. Victor von Doom's

* Ironically, the actual prop Ring was modeled after one of the crew members' wedding rings. It literally just looks like every other man's wedding ring in existence. This is very true to the spirit of the original, because the entire point is that Bilbo and Frodo had no idea what it was. If you actually want a happy marriage though, Nenya (Galadriel's Ring) would be a better model!
* Ironically, the airing of seasons 3-6’s finales and first episodes are very close to each other, even overlapping at times.
* Ironically, the Americans had previously used a red star for their aircraft before entering World War I. The Russians would go on to adopt a red star roundel for the Soviet Air Forces, meaning the two countries effectively traded insignia at around the same time.
* Ironically, the best defense against this is to turn it around on him, and instead get as loudly and obviously upset as possible, usually by bursting into tears and loudly begging him to leave her alone. This puts the girl in the social right, as he is obviously causing her a great deal of distress, and she is being loud enough that everyone in the vicinity is now very much aware. This leaves the creepy guy with the option to either retreat immediately, or continue to attempt to interact with someone who is loudly sobbing and begging him to leave her alone. The second option will last for maybe thirty seconds before somebody intervenes and forces him to back off. Either way, problem solved.
* Ironically, the Cavaliers themselves were on the opposite side of this trope as they were losing 3-1 to the Golden State Warriors in the 2016 NBA Finals until they managed a come-from-behind championship win with 3 straight victories.

Their CO decided he has to be the one, and he is the only actual male amongst the entire squad. More ironically, this is because the girls have "male" mannerisms, like constant scratching, burping and farting, and swearing. The CO decides that they'd have no hope to ever pass for women, and takes the job for himself. When they later try to infiltrate as women the guards attempt

to seize them believing them to be men in disguise. A quick bit of exposure convinced them otherwise. Their CO on the other hand made it in without any problems.
* Ironically, this can screw you in the other direction as well. There are some NPC's which aren't hostile to you, unless you attack them first. Once hostile, an NPC will stay hostile unless you pay a certain character to forgive your sin. Make that character hostile and you've pretty much just made the game harder for yourself.

* Ironically, this practice makes it amazingly easy to tell exactly how long individual players have been playing. By taking the point of what they felt was the downfall of "challenging" Magic and the going back two years to the last Standard format before that set/block's release, you usually get the entrance point. This leads to hilarious conversations between players about how the latest sets are too dumbed down and have too many cash grab rares, without either realising that the "good old days" that they both think they are discussing are actually fifteen years apart.

* Ironic Hell briefly shows the personal Hell of a character supposedly based on the ex-boyfriend of the artist's wife, who was apparently an extremely unpleasant fellow in many ways, including a... fondness... for dolphins. This being an Ironic Hell, the character now finds himself constantly being raped by dolphins, 24 hours a day, seven days a week. Not being real dolphins, the rapists aren't particularly bothered by the lack of water.

They did surprisingly well before she killed a Menite priest who tried to get her to stop, and was imprisoned and subsequently recruited by Feora.
* Iron Kingdoms: A lot of mechanics and warcasters appear in both figures and art wearing goggles of various types. While they generally have no rule-mechanical effect, a pair of solid protective goggles are an eminently sensible accessory for people who spend a lot of time around experimental steam engines and high explosives,
* Iron Kingdoms and machine gun emplacements that rely on volume over power.
* Iron Kingdoms, and who rarely works twice for the same employer because all but

* Iron Kingdoms. Being patriotic in the extreme they see it as their duty to fight for their country. National hero Kovnik Jozef Gregrigorvich considering any day he does not spend fighting an enemy of his country to have been wasted.
* Iron Kingdoms, but Cryx is a nightmarish pit of undead under a dragon-god who wants to turn the world into his weapons against his offspring and the Legion of Everblight are twisted, mutated elves in service of one such offspring who would prefer not to be reabsorbed by the dragon-god thank you.
* Iron Kingdoms: Captain Phinneus Shae, pirate captain of the Talion. As his crew are all outcasts and wanted by the Cygnaran army for mutiny, he is willing to kill himself against an undead captain, to keep his crew safe.
* Iron Kingdoms Caspia the capital of Cygnar has so many walls its called the "City of Walls"
* Iron Kingdoms Colossals were giant mechs that were made into smaller warjacks as they proved inefficient after the repelling of the Orgoth threat.
* Iron Kingdoms due to their power level in Mk 2; a lot of the rest of it was the armies of cyborg zombies, sexy but sadistic satyr buccaneers, and malevolent ghosts, backed by scuttling, buglike black-iron warjacks and led by machine-liches.
* Iron Kingdoms elves and dwarves, as the elves are xenophobes and friendly with no one else but particularly hate the skorne and humans, and the dwarves, while isolationist, are on generally friendly terms with all the other races.
* Iron Kingdoms' Everblight have eyeless warbeasts. In fact, it often appears as if those beasts only have mouths on their heads.
* Iron Kingdoms fantasy setting don't wear shoes, in keeping with their bestial nature.
* Iron Kingdoms features similar abilities amongst the warcasters called feats. Feats can only be used once per game, but when used properly can turn almost certain defeat into victory.
* Iron Kingdoms field large well-armed and trained armies. The factions in WARMACHINE have large warjacks the form the very muscle of the forces, and they are backed up with dozens of well-armed infantry and lead by badass commanders. The factions in HORDE follow the same formation, except they have massive beasts in place of warjacks.
* Iron Kingdoms: for both Warmachine and Hordes, the Warcaster/Warlock is the motive force keeping the walking tanks/giant monsters going, so killing one shuts down/frees their personal troops, and killing all of them (if there's more than one) is the most common automatic win condition.
* Iron Kingdoms games, this normally comes in the form of various weapons. There is plenty of regular technology as well, and many factions are pushing research in that direction hard. Technology may be less impressive than mechanika, but is far more reliable and not dependent on fickle mages.
* Iron Kingdoms has the Grymkin who are an army from the areas of Urcaen not controlled by any god and is considered as Hell in the Iron Kingdoms. They are led by the Defiers demigod-like beings that can warp reality to a limited extent and the souls of sinners turned to monsters that represent their sins from various legends as well as 'Nightmares' which are warbeasts created by them. They are not exactly evil as they come to punish the wicked and indirectly save the world from the Infernals but are described as a poison that will hopefully remove the parasites(Infernalists) before killing the patient(The world).
* Iron Kingdoms: in her Epic form, Victoria Haley has earned a promotion to Major.
* Iron Kingdoms into pieces and giving the shards to his commanders, forgoing having a body in favor of improved coordination between his forces.
* Iron Kingdoms isn't being World War 1-inspired, a High Fantasy setting or Urban Steampunk-y, it is this. Most nations command a fleet, most notably the small kingdom of Ord who maintains such a huge, traditional fleet, and Cryx and the surrounding islands which are filled to the brim with pirates and privateers.

Uniquely for these groups, they have several "Shipcasters", a variation of the powerful battlemage/military officer found in the Iron Kingdoms specialized in ship-to-ship combat and maybe even able to mentally control a ship.
* Iron Kingdoms life and civilization in the world so that nature may return.
* Iron Kingdoms: Major Haley has the Telekinesis ability which enables her to... move an enemy figure two inches and turn it. It sounds like a letdown, compared to the flashy attacks other warcasters get. However, use it on one of the enemy's elite melee infantry and suddenly that unit cannot use combined melee attacks, cannot charge you, is open to be charged from the rear by your melee troops and the enemy's front line suddenly has a huge gaping hole in it, which you, with a bit of luck, can shoot at the enemy's support units through.
* Iron Kingdoms most wilderness races tend to view Humans as such and for a good reason. The Iron Kingdoms are a bunch of a human dominant steampunk nations with magitech. They are expanding human civilization and polluting the world destroying the cultures that live in the wilderness. It doesn't help that the god that created Humanity, Menoth is oppressive and encourages building cities, walls and burning things with fire. The war between Khador and Cygnar destroyed the Trollkin kriels and Cygnar even got the Trollkin to fight "minor Protectorate of Menoth raids" but was in fact placed in front of a massive Skorne invasion. When the Trollkin asked for the lands promised to them Cygnar had already settled Human refugees in them forcing the Trollkin that didn't live in human civilization to fight a desperate war against both human and wilderness factions just to find a home. The humans in the wilderness aren't better than the Iron Kingdoms. The blackclads of Circle Orboros are human druids who want to protect the wilderness from Human civilization but consider every other race as nothing more than puppets to be used to achieve their goals.
* Iron Kingdoms of emotionally detached snipers called Widowmakers. Grim Angus is an ex-bounty hunter who decided to leave his old life to help his old kinsmen. He was once feared for his preference to take more bounties in dead than alive with his long-ranged rifle, Headhunter. Now he is just feared for never leaving anyone alive.
* Iron Kingdoms: Played with. Warjacks themselves may begin to develop skills and personalities overtime, becoming an "ace", with the commander customizing it to better make use of its own skill.
* Iron Kingdoms powered robots with even bigger hammers. The aptly named Hammersmith even dual wields them.
* Iron Kingdoms regardless of the scenario being played. The common term for this kind of victory is "Caster Kill."
* Iron Kingdoms RPG introduced a Connections system. Mainly representing membership to certain organisations, like the Order of the Golden Crucible or the Greylord Covenant, or a specific nation's military and these connections can provide some material help at the GM's discretion. The section does mention that it can't be used to, say, have the party's Mage Hunter use his contacts in the Retribution of Scyrah to call in a couple of Mage Hunter Strike Teams to clear out an Orgoth ruin for them.
* Iron Kingdoms setting has a whole nation of these, called the Protectorate of Menoth.
* Iron Kingdoms that happen to have wings. They all have chitinous plates where their eyes should be, but make up for it by having an prodigious number of sharp teeth, as well as a variety of other natural weapons such as claws and blight-breath. The Angelius has itself no less than six wings. And then they are further topped by Archangels.
* Iron Kingdoms), the hierarchy is dotted with titles like "Lich Lord", "Necrotech", "Iron Lich" and so on. While they do have living models and even living warcasters, the first mental image most people in and out of universe have when "Cryx" is stated involves a tide of cyborg skeletons backed up by undead mages and war engines forged from iron and bone.
* Iron Kingdoms. The only reason he doesn't just go and burn down the mainland himself is ironically the same reason he needs an army in the first place; he's

always worried about the other dragons ganging up on him if he makes any moves, so he's trying to build an army to hunt them down individually, or at least soften them up.
* Iron Kingdoms, thereby dooming the Elven race to extinction; whether or not this is actually the case has never been conclusively addressed. To say nothing of the Nyssian Elves, who are enslaved body and mind to a monster.
* Iron Kingdoms: The setting has three moons, on very different orbital planes. It's mentioned that the interplay between the moons causes violent and unpredictable tidal effects and maritime weather.
* Iron Kingdoms the Skorne have Ancestral Guardians, which are statues empowered by the souls of fallen Skorne warriors.
* Iron Kingdoms: Titans (which can be described as small, trunkless, bipedal, four-armed elephants) and their larger cousins, the mammoths, are widely used as warbeasts by skorne warlocks.
* Iron Kingdoms turn anyone who picks them up into ax crazy murder machines, while greatly increasing their strength. The Empire of Khador leverages this by forcibly chaining them to men and turning them into berserk Doom Reavers to be used against their enemies.
* Iron Kingdoms unite to fend him off because it's the only way they get to continue existing - and cooperation does not come naturally to IK dragons.
* Iron Kingdoms use a calendar where 7 days make a week, 4 weeks make a month, and there are 13 months per year. Furthermore, the days are not named, but the weeks are, and the whole thing is based around the cycles of the planet's 3 moons. Every 3 years, all 3 moons are new on the same night, which makes an extra day on the calendar. This 'Leap Day' is celebrated in a festival called The Longest Night.
* Iron Kingdoms use this as their primary tactic, stalking an enemy and ambushing them when they least expect it.
* Iron Kingdoms. Very few people go into battle wearing the typical examples. Supreme Kommandant Gurvaldt Irusk is one of the few cases in the game, sporting a few medals, a sash, tassels, and gold studs and trim on his armor. Somewhat justified in that he one of the highest ranking officer in his faction.
* Iron Kingdoms we have Allisteir Caine, a gun mage Warcaster that is well known among players for his amazing skill with two spellstorm pistols.
* Iron Kingdoms were overthrown. The current Colossals are a recent development, with a whole book dedicated to their release.
* Iron Kingdoms which draws power from the pain and suffering the caster inflicts on themselves and on others. Needless to say, the spells usually drain hitpoints in order to work.
* Iron Kingdoms; you can be burned alive for saying the wrong thing. To a lesser extent, there's the Circle Orboros, a semi-druidic cult which has de facto control over a number of wilderness tribes and also some hulking wolf monsters.
* Iron King is water-powered and burns through his supply in just one minute, demorphing.
* Iron Kissed, Fae lose their glamours when touched by iron. Cat Noir, being "Iron Kissed", is the exception to this rule, and abuses that fact to maintain his cover.
* Iron Kissed: Lady Nightmare manages to get Gabriel Agreste to agree to trade his firstborn for a crown by disguising herself as a whore and getting him blind stinking drunk.
* Iron Kissed like pretty much anything they want, few aside from Changelings can actually alter their physical forms.
* Iron Kissed. When one of the fae lords threatens Mercy, Samuel (son of the ruler of the North American werewolves) informs them that "For Mercy, Dad would declare open war on the fae and damned be the consequences."
* Iron Ladies. While Yihuo was smart enough to leave a robot to trick Siyun, after gloating how he's going to take over the Merak dynasty and become something of a God-Emperor, Siyun reveals he just wanted to know his plans before ruining them. Cut to Dragon Empress tearing a hole through his fleet.
* Iron Lady does she have power, and the tough-as-nails attitude to go with it.
* Iron Lady: Iron by her personality, lady by her position of power/authority.

* Iron Legacy is what happens when regular Legacy loses his daughter and the inheritor of the Legacy powers. He becomes a ruthless, desperate war engine, hellbent on stamping out evil no matter how many people he has to kill in the process.
* Iron Legacy was once a respected super hero. After the death of his daughter in the alternate timeline, he
* Iron Liz revealed on LordKaT's livestream podcast that she was assigned male at birth, and identified as a trans woman most of her life. Since she finished transitioning in 2014, she no longer uses the label.
* Iron Liz was accepted by the female TGWTG fandom is because she has admitted to reading (and enjoying) some of the fanfiction about her boyfriend and his fictional counterpart Linkara.
* Iron Maiden albums which people were encouraged by critics to avoid.
* Iron Maiden album was running too long to sound good on vinyl so the band had to decide between "Gangland" and "Total Eclipse". Though the other band members (especially Bruce) expressed preference for "Total Eclipse", Steve Harris decided the song was a bit too experimental for Maiden and so "Gangland" was used instead, with "Total Eclipse" being released as a B-Side to the "Run To The Hills" single, which came out a few weeks before the album. Total Eclipse was used on the original Japanese LP of the album but removed on subsequent pressings. Nowadays, Harris feels Total Eclipse should have been on the album instead of Gangland. The CD remaster of the album includes both songs in the original intended order.
* Iron Maiden and Adrian Smith decided to return to the band, Janick Gers served as a Sixth Ranger to a reunion of the golden years Maiden. This meant that the band had THREE GUITARISTS and is one of the few (and certainly the most popular) band to do so. It is said that Janick was kept on for three reasons - he had worked with Bruce solo, he kept the group entertained, and so that Adrian and Dave able to do twin solos and have a rhythm guitarist underneath.
* Iron Maiden are implied to be this, using thick metal cables and connectors in their hips to interface with a gigantic metal structure.
* Iron Maiden, a soft plunge will launch the ball into the ball walker, either to lock for multiball or to immediately go to the upper playfield.
* Iron Maiden: A torture device filled with spikes to stab the poor soul inside of it.
* Iron Maiden (by the same artist) is most noted for the attractive cyborg woman on the backglass.
* Iron Maiden draws considerably from this trope, lamenting a soldier's station in society after an unpopular war.
* Iron Maiden "Empire of the Clouds" (which took at least a month or two to write and was composed on a piano).
* Iron Maiden have recorded serious songs as singles and released joke songs as B Sides for quite a while now.
* Iron Maiden is about hooligans. Given that Steve Harris had the choice between a football career with West Ham United and a music career with Iron Maiden (he took the second option), he knows a lot about football — the good side and the bad side.
* Iron Maiden is an obvious homage to this period of time, complete with Pharaoh Eddie. And so is the title track.
* Iron Maiden is often regarded as writing to a formula without having the catchy tunes to back it up. It's commonly regarded as breaking their string of classic albums.
* Iron Maiden. It even wonders if his suicide could have been "all just for the best, lay his weary head to rest".
* Iron Maiden land the NASA Space Shuttle simulator (with a little verbal co-piloting from an expert, but still pretty impressive).
* Iron Maiden: Legacy of the Beast), and several Super Secret Skill Shots.
* Iron Maiden: Legacy of the Beast before bending his cell window's bars to escape.
* Iron Maiden: Legacy of the Beast) displays an animation of the Reaper slashing at the screen with his scythe.

* Iron Maiden: Legacy of the Beast. Fittingly, the display during the mode partially pulls its aesthetic from old computer systems, unlike the rest of the game.
* Iron Maiden: Legacy of the Beast's face overlooking the rest of the picture in the upper-left corner.
* Iron Maiden: Legacy of the Beast shows animations of the band's mascot Eddie breaking his chains.
* Iron Maiden: Legacy of the Beast, which is steeped in standard Egyptian iconography, features a mummy as part of one of its multiball modes.
* Iron Maiden of the chorus. In the same album, "Don't Look to the Eyes of a Stranger".
* Iron Maiden, one of the illusions that magician Simon Drake did involved cutting off guitarist Dave Murray's hands.
* Iron Maiden onwards. They would also make sure to have at least one historical song named after a war film.
* Iron Maiden original. The Australian band Skyhooks wrote and recorded this song first.
* Iron Maiden re-released their singles, drummer Nicko McBrain had hilarious tracks commenting on the songs (among other things). At the end of each, he imitates an answering machine.
* Iron Maiden's 1980s days had producer Martin Birch and artist Derek Riggs as a given. From 2000s on, while the artist has been inconsistent, South African producer Kevin Shirley is a given.
* Iron Maiden's concept album "Seventh Son of a Seventh Son". A town is wiped out due to an disaster, and Lucifer plans on canceling mankind.
* Iron Maiden's "El Dorado" is mostly told through the point of view of one of those.
* Iron Maiden song "2 Minutes to Midnight" appear to be this kind of terrorist; they sing "Kill for gain or shoot to maim / But we don't need a reason." The album art for this song portrays Eddie (the band's skull-faced mascot) as an Arab terrorist, which paradoxically both makes the possibility more likely and muddies it a great deal.
* Iron Maiden song "Still Life." It's ostensibly told from the perspective of a man who's being driven slowly insane by ghosts he sees in a swimming pool, but since we don't get any outsiders' side of the story, we don't know if the ghosts are really there or if he's just imagining them.
* Iron Maiden's "Piece Of Mind" depicts Eddie having been lobotomized (the top of his skull has been removed and reattached).
* Iron Maiden's "Satellite 15...The Final Frontier" is about a pilot in a damaged ship giving his last report.
* Iron Maiden's "The Thin Line Between Love and Hate," after the song ends you can hear Bruce say "Oh, I fucking missed it" (the song is from Bruce's first album back with the band), followed by his realization that the statement had been recorded. The statement itself does appear to be a genuine accident, but the realization clearly isn't, as the sudden increase in background static makes it clear that it was recorded separately.
* Iron Maiden: Subverted by this band, as they usually use their mascot Eddie the Head on their album covers, instead of themselves.
* Iron Maiden. The band has told the story of how Frank Herbert (or his agent) gave them a less than warm response when they said they wanted to name one of their tracks after his book as well as including an excerpt. The answer was: "Frank Herbert doesn't like rock groups. Especially not hard rock, and especially not groups like Iron Maiden". The song still includes some thinly disguised references to Mau'dib and Arrakis.
* Iron Maiden. The opening track even goes: "Seven deadly sins, Seven ways to win, Seven holy paths to hell, and your trip begins..."
* Iron Maiden (three studio albums, a live album, a compilation and a single).
* Iron Maiden T-shirts, can do the Chokeslam, 619, and Shining Wizard. Underestimate her, and she will demolish you, then pin you 1-2-3.

* Iron Maiden was just a mock-up, but Steve Harris and the band's management used it as it was for the final product.
* Iron Maiden wasn't mean to be a concept album, but all the tracks are reflections on war, religion and death.
* Iron Maiden with with a stake and mallet about to kill Dracula and a creepy castle with bats is in the background.
* Iron Man 2: After James Rhodes presents his superiors with Tony's "War Machine" armor, Justin Hammer augmented the suit with his own weapons tech, including a bunker-buster missile he called "The Ex-Wife"; in Hammer's words, "It takes everything." During their final battle with Ivan Vanko, Rhodes fired the Ex-Wife at Vanko, only for the missile to bounce off Vanko's armor and sputter once it hit the ground.
* Iron Man 2, a motorcycle, and pretty much everything else in his lab.)
* Iron Man 2 as they hunt down the fugitive Avengers after the group goes through a fallout.
* Iron Man 2 before consenting to read the passage, then continues on to the rest of the statement that disagrees with Stern's point over the senator trying to cut him off.
* Iron Man 2, but only gets as far as making her even more concerned about his mental health.
* Iron Man 2 claims that Vanko's father wanted to get rich off of the arc reactor technology, rather than use it to benefit the world. This is the reason why Howard Stark had him deported back to Russia.
* Iron Man 2 created by a civilian defense contractor and piloted by a United States Air Force officer, so keeping the operator's identity a secret isn't necessary.
* Iron Man 2. During his conversation with Agent Sitwell, he even compliments the pin on the latter's lapel, reminding us of something he's forced to do at the end of that film.
* Iron Man 2. During the race track fight scene, Ivan Vanko waits for Tony Stark to get into his portable Iron Man costume. Justified because Vanko's aim is not to kill Stark but to discredit the Iron Man weapon and show off the power of his own suit.
* Iron Man 2 gets in on it too, noticing the pattern, adding that "She also wrote an article."
* Iron Man 2) have followed suit. This actually makes sense, since as a spy she would have trained to speak English with an accent appropriate to whatever country she was sent to infiltrate.
* Iron Man 2, he argues that he had privatized world peace and believes he was untouchable, with no one able to match his technology or trigger a real arms race. Ivan Vanko arrives and proves him wrong, and backed by Hammer does manage to field a force that rivals his.
* Iron Man 2, he buys her strawberries has an apology present, forgetting that she's deathly allergic to them.
* Iron Man 2. He notably also had Anton Vanko deported for wanting to cash in on the technology.
* Iron Man 2. He's continuously distracted by the motions of a kinetic sculpture on the desk, eventually interrupting himself and moving so he can't see it. At the end of the scene, he tries to stop it from moving... and fails.
* Iron Man 2 If Hammer had simply waited, Tony Stark would have self-destructed completely on his own, been discredited in the eyes of the public, probably died from palladium poisoning, and Hammer would have still gotten his hands on the War Machine armor and been allowed to study/weaponize it as the premier US military contractor.
* Iron Man 2: In a movie that starts off with a speech about the importance of legacy, this is going to come up a lot.
* Iron Man 2 in his adult life? He does take a major level in kindness and heroism though.
* Iron Man 2: Inverted when Nick Fury and Tony Stark are going over the latter's

evaluation for the Avengers Initiative. Stark is reading it, denying every flaw that is listed until he gets to...
* Iron Man 2 is a viable and powerful weapon. Tony initially downplays the problem because he's one of the only people who can actually make a reliable suit. Unfortunately, the villain of the movie is also smart enough to make his own suit, and he's got a grudge against Tony.
* Iron Man 2 is clearly trying to do this to impress Ivan Vanko. Like with everything else, he just winds up looking like a doofus.
* Iron Man 2 is considered this by critics featuring a fully scripted screenplay (the previous movies had been loosely scripted and improvised) and a more focused plot with more effective villains and a better personal character arc for Tony.
* Iron Man 2 on Tony", Tony Stark replies that "she wrote a story as well".
* Iron Man 2 or Hammer just being a schmooze who tries too hard. He's a foil to Tony, who also chatters, but usually has a point to everything he says, or to Vanko, who is highly intelligent but barely says anything. Vanko expressly calls him out on it during one of Hammer's angry rants, where Vanko's only response (in unsubtitled Russian) is "You talk too much."
* Iron Man 2 pass through making even more noise, setting almost all the cars off.
* Iron Man 2 Pepper just stands there watching one with a confused look.
* Iron Man 2. Plus, Vanko was never intending on earning profit or making the drones for Hammer. He just wanted to kill Tony, preferrably in the most epic way ever.
* Iron Man 2 promotions included commercials for the Stark Expo (even one from 1974).
* Iron Man 2: Referenced and subverted when Tony Stark meets with Nick Fury and Black Widow at a donut shop. Widow injects him with a dose of lithium dioxide to counter the symptoms of his palladium poisoning and help him focus, but until they explain, Stark thinks this trope is in effect:
* Iron Man 2, Rhodey actually uses the sink to beat Tony over the head with.
* Iron Man 2's attempt at making an Iron Man suit, which appears to be 20-foot-tall machine covered in guns... which immediately falls over because of how thin its legs are to the top-heavy body.
* Iron Man 2 she was acknowledged as attractive but nobody made a big deal out of it, and she was able to go undercover without attracting too much attention because of her looks. That said, it is also worth noting that in the former, she was intentionally made-up and emphasising her looks for the mission at hand, and in the latter, she was much more plainly and practically dressed, with minimal make-up (by film character standards, anywhere).
* Iron Man 2 shield. Tony asks for it excitedly... and uses it to prop up his machine.
* Iron Man 2 stands up to one with his toy repulsor to fire at the drone. As drone mistakes the kid for Tony and takes aim as well, Tony drops in behind the boy, shoots the Hammer drone, then tells the little boy "Nice work, kid" before taking off.
* Iron Man 2, Stark is thrown through the ceiling and into his bedroom where he hits a second ceiling before crashing back to the floor.
* Iron Man 2 suit of armor. Rhodey's response? "Oh, this ain't gonna be good..."
* Iron Man 2 that was meant only for him. In it, he reveals that all of his life's work had always been for Tony. He also states that he is confident his son would change the future where he could not, and leaves him with this final message,
* Iron Man 2 that we see the two guards hung from the ceiling, just to confirm what happened to them.
* Iron Man 2, the actor who played Phil Coulson in the movie, to the demonstration.
* Iron Man 2, the boy was confirmed to be a younger Peter Parker, so the scene was announcing how important a role Tony played in his life.
* Iron Man 2: The Mk II eyes light up blue like all Iron Man suits—as War Machine, they are red.
* Iron Man 2 the monitors in the hearing would also be more likely to get him into further trouble rather than having everyone in the room in awe at how awesome he

is.
* Iron Man 2, the phone gets an upgrade to be able to instantaneously access projection screens. It also appears to be as big and transparent as a piece of plexiglass.
* Iron Man 2 the War Machine armor also sports a Gatling gun, which Rhodes uses to great effect against the Hammeroids.
* Iron Man 2 to be this but it being developed by the inept Justin Hammer means it failed miserably when Rhoedy used it against Whiplash.
* Iron Man 2: Tony and Rhodes in their suits vs the Hammer Drone army controlled by Whiplash followed by a final encounter with Whiplash himself.
* Iron Man 2: Tony for Justin Hammer, who just barely hides his resentment about always being second-best compared to Stark behind his faux grin.
* Iron Man 2. Tony had initially thought of his father as highly distant and was upset to learn about Stark Corporation's dealings, but after learning of how much his father had done for his sake and his commitment for a better world in the sequel, he began to respect him more.
* Iron Man 2 Tony is trying to leapfrog himself, building faulty armors, because of his fear of not being prepared for new threats.
* Iron Man 2 Tony misremembers and brings Pepper strawberries...the one food she's allergic to. Then he tries to get partial credit for at least knowing there was some sort of connection.
* Iron Man 2, Tony plots a short but tight course through the globe at the Stark Expo to shake some of the Hammeroids on his tail. It works.
* Iron Man 2: Tony Stark, drunk as hell, fully suited up in Iron Man armor. And its one of the most hilarious moments in the movie.
* Iron Man 2. Tony Stark (with some help from S.H.I.E.L.D Director Nick Fury) ends up surviving, although he also has to deal with the consequences of his actions.
* Iron Man 2 to run the company, but she can't because he's never there.
* Iron Man 2 to take Stark's place as the world's top arms dealer, but ultimately lacks the competence to do so.
* Iron Man 2 trilogy by the majority of viewers. It's also widely considered one of, if not the weakest entries in the entire franchise.
* Iron Man 2 used to promote the film is completely appropriate in-story.
* Iron Man 2 Vanko is notably very quiet, especially when compared with Tony or Hammer. In several of his most prominient scenes, Vanko says barely anything at all; most notably, during the climax, his only words are a simple "You lose." at Tony.
* Iron Man 2, War Machine, just like his comic book counterpart, is essentially an Iron Man suit fitted with every gun they can strap to it.
* Iron Man 2, when Happy Hogan insists on accompanying S.H.I.E.L.D Agent Natasha Romanoff/Black Widow on her mission and fights a bad guy when they enter the building. By the time he has won the fight, he sees that she's taken down every other bad guy there is.
* Iron Man 2 when Rhodey (in the War Machine armor) confronts Stark in a weight room.
* Iron Man 2: When Whiplash attacks Tony at a race in Monaco, Tony has to dodge several of the villain's whip cracks when he gets knocked to the ground. At one point his legs are spread, the whip hitting mere inches from his groin. Tony's expression indicates that this was too close for comfort.
* Iron Man 2, which was why Tony didn't know about his involvement in the creation of the Arc Reactor.
* Iron Man 2, Whiplash makes his first appearance in Monaco, where he tries to kill Tony Stark in the midst of a Grand Prix race.
* Iron Man 2, who was sent back to the USSR after falling out with Howard Stark.
* Iron Man 3: After Tony publically dares the Mandarin to come after him and leaves the address of his mansion in Malibu, the latter sends three helicopters to attack Tony in his home and destroy it with missiles.
* Iron Man 3 and further explanation of the origins of the Infinity Stones as it introduces new Infinity Stones such as the Aether, Scepter and the Orb.

* Iron Man 3, and he doesn't seem to have any kind of healing factor in any of the other movies.
* Iron Man 3 and prior Marvel summer releases had previously been typically scheduled for release in China after their domestic release.
* Iron Man 3 and the President of the United States needing rescue at various points.
* Iron Man 3, a restrained Tony Stark faces this while summoning his armor. Tony is trying to call his suit to him from Tennessee whilst in Miami. He repeatedly threatens the enemy mooks with their impending death before the parts of his suit finally reach his destination.
* Iron Man 3. Because it was developed by the bad guys, they decide that's actually pretty useful.
* Iron Man 3 by Harley Keener with the quote, "You're a mechanic, right? So why don't you just build something?"
* Iron Man 3: Ellen Brandt tries to impersonate a Homeland Security agent to cover her abduction of Tony. Unfortunately, it backfires as the sheriff of Rose Hill happens to be having a drink at the bar, sees the commotion, and states that flashing a badge and trying to brush it off are not sufficient to get him to back down. So Brandt instead kills him and his deputy.
* Iron Man 3 explains what War Machine was doing during the Battle of New York.
* Iron Man 3: Flashbacks to the events during the eve of Year 2000 is integral to the plot.
* Iron Man 3 further explored the concept, with several characters, including Tony Stark and the film's villain originally being inspired by this trope before straying from the path.
* Iron Man 3 gains access to Air Force One by wearing the Iron Patriot suit to disguise his identity. The film even refers to this move as a Trojan Horse.
* Iron Man 3 gets destroyed from the air, Tony and Pepper suffer numerous close-range explosions with no lasting ill effects.
* Iron Man 3, Happy tries to describe to Tony what Killian's holographic presentation to Pepper on the mind looks like.
* Iron Man 3 has a normal fan give Tony Stark one of his crayon drawings for an autograph. An anxiety attack has Tony turn it into one of these.
* Iron Man 3 has a rare example of people landing without parachutes, given Iron Man's flight abilities allow him to rearrange the falling people akin to "Barrel of Monkeys". (Fun fact: the filmed people are really falling, given they're professional skydivers.)
* Iron Man 3 has a white American Ten Rings operative. And if the legend put forth in the short is to be believed, the entire organization was founded on the teachings of the Mandarin, an ancient Chinese warrior king.
* Iron Man 3 has it happen when Tony Stark is first trying out the Mark XLII in his garage. He has a record playing, and the scratch is done when the record is knocked over by flying suit parts.
* Iron Man 3 has some hints of this. Jack Taggart very clearly seems to be going through withdrawal, and Aldrich Killian states that test subjects who can't regulate their dosage properly will be dropped from the trials, as addiction will not be tolerated.
* Iron Man 3 have this. Fittingly, they actually have heat-based powers.
* Iron Man 3, he buys her an enormous stuffed bunny for Christmas that barely fits in the house and that she does not like.
* Iron Man 3, he even manages to make several homemade non-lethal weapons out of products bought at a hardware store, which he then uses to storm into the villains' hideout with maximum efficiency.
* Iron Man 3, he goads the Mandarin to attack his house and gives him his address on live TV, believing that Mandarin won't be able to touch him. He ends up with his house destroyed, a fugitive on the run, captured by Killian, the real Mandarin, and in the end is nearly killed by him.
* Iron Man 3 him testing Tony's PTSD earlier, pushing the limits of acceptable behavior a lot as Tony does.

* Iron Man 3: his jokes are not merely sadistic, but also incredibly laboured and dull, despite the fact that he obviously thinks he's a straight example.
* Iron Man 3. In fact it's the red eyes that is first real indication to Happy Hogan that Savin is up to no good.
* Iron Man 3) into these. Whereas Tony's first suits were made with quality over quantity, a new suit only being created to encompass several improvements at once, the dozens of suits he made between then and this film were comparatively slapdash, gimmicky, and overall individually impractical.
* Iron Man 3 is basically an elaborate (and pretty risky, as the last one is pretty close to hitting the water when he's saved) skydiving stunt.
* Iron Man 3 is dedicated to showing the aftermath of "The Battle of New York," and what kind of effects of the death toll and the knowledge there are other lifeforms in the universe has on the world.
* Iron Man 3: Made in 2013, prologue is a flashback to 1999 in the eve of the new millennium.
* Iron Man 3: North Carolina was the primary filming location; the Malibu and Miami scenes were all shot in the Wilmington area, while the Rose Hill, Tennessee scenes were shot in the Charlotte area, mostly in Mooresville.
* Iron Man 3 of the flawed tech instead of because of it - in fact, a number of the action scenes avert this trope because the armor is so unreliable he doesn't use it at all.
* Iron Man 3 opens with "Blue (Da Ba Dee)", heralding a flashback to New Year's Eve, 1999.
* Iron Man 3: Parodied and subverted. When Tony meets a kid who tells him about being bullied at school, Tony starts talking about the best way to deal with bullies... which turns out to be a nonlethal flashbang-like weapon that he gives the kid to defend himself with.
* Iron Man 3, Pepper Potts gets along quite well with Maya Hansen, whom Tony had a one night stand with.
* Iron Man 3 shows Killian's start of darkness after Tony doesn't meet him on the roof to talk about A.I.M. He looks over the edge and considers suicide, until he realises that no one even knows he's there.
* Iron Man 3 starts with Tony Stark at a party, with a name tag reading "You know who I am".
* Iron Man 3, the AIM organization infects people with the Extremis nano-virus for this very purpose. Sometimes, it's taken to a literal extreme as some subjects reject Extremis and violently explode in a ball of energy, turning into human bombs.
* Iron Man 3, the Mandarin's elite mooks are all war veterans who suffered career-ending injuries on the battlefield. They were recruited with the promise of having their injuries undone with Extremis.
* Iron Man 3: The Mandarin turns out to be an actor used by Aldrich Killian to provide a face and distraction for the Extremis attacks.
* Iron Man 3, though he does concede that Pepper is a better person than he is - all the more reason to fight for her and kick Killian’s ass.
* Iron Man 3 to do it this way because he could have only carried four.
* Iron Man 3: Tony and Rhodes with all of Tony's remote controlled Iron Men suits against Killan and his Extremis powered henchmen.
* Iron Man 3: Tony leans over, trying to reach Pepper, and the villain's hand bursts up out of the floor and tears the arc reactor right out of his suit.
* Iron Man 3, Tony's current suit is busy recharging and the rest are underwater and inaccessible. He improvises weapons from what he can buy at a hardware store, and uses them to infiltrate an enemy base and take out several armed guards.
* Iron Man 3, Tony splashes a trail of fuel towards Agent Brandt and then throws the canister of fuel at her before igniting the trail with red hot remains of his handcuffs.
* Iron Man 3. Tony Stark brushes away Harley in his attempts to bring him so he can keep him safe from danger.
* Iron Man 3, Tony Stark runs away from a falling water tower in a straight line

before it crashes and causes a flood.
* Iron Man 3, when Tony and James are having an argument and a couple of children walk up wanting autographs:
* Iron Man 3, which worked out rather well, due to rising awareness of veterans of the War On Terror dealing with the condition.
* Iron Man 3 (whose early stories are in the public domain) is trademarked by author Sax Rohmer's estate; they realized that this gave them the perfect excuse to properly introduce the Mandarin (who was inspired by Fu Manchu anyway) by reimagining him as Shang-Chi's archenemy, believing that including a sympathetic Asian hero would balance out the presence of a stereotypical Asian villain.
* Iron Man a female version of Tony Stark. Not only that, but Civil War never happened because they were together, and the world was actually a better place with their combined awesome.
* Iron Man a few months later, selling "Iron Man Classic" tables that removed several components and used a cheaper cabinet for $1,700 less than the original's price.
* Iron Man after destroying the tank cements it, and the chase sequence with the American jets brings it home.
* Iron Man: After getting his memory rebooted, Tony Stark discovers he can't remember how to tie a tie. His friend Jim Rhodes has to help him.
* Iron Man. After learning that his weapons have been sold to a terrorist group without his consent and seeing the news report about how they're being used to terrorize an Afghan village, Tony Stark gets up and in a moment of fury/surprise uses his new and improved pulse-blasting gloves to shatter the windows of his shop.
* Iron Man: After suffering massive neurological damage, Tony Stark faked his death and preserved his body via cryonics.
* Iron Man after sustaining a nearly fatal chest wound. Tony implants himself with a powerful reactor which prevents deadly shrapnel from reaching his heart; this very reactor later powers his suit. To be fair, the radical change in his outlook on life is primarily due to his newly gained first-hand knowledge of the horrors of war, as opposed to the changes in his cardiovascular system.
* Iron Man, after Tony saves the fighter pilot by punching his parachute.
* Iron Man. A gallon jug of coffee. And possibly some form of intravenous drip..."
* Iron Man, albeit a bit of a smooth talker. And when we learn he was behind everything, we empathize with the betrayal Tony is feeling, because we're feeling it as well.
* Iron Man also combined this with some truly oppressive methods to contain these "criminal vigilantes." Caught stopping a crime without a government license? Get sent to the Negative Zone with dozens of supervillains.
* Iron Man and after realizing the editorial staff had chosen to ignore his protests, he chose to get the hell out of dodge than have this trope happen to him.
* Iron Man and becomes possessively in love with him like an abusive boyfriend. It cuts off Tony from The Avengers, causes his then girlfriend Rumiko to break up with him, breaks his arm when he gets into another suit to try and escape and takes him to a deserted island trying convince him they’re perfect for each other and demanding why Tony can’t feel for it “like he did with Ms Rumiko”. It ultimately does sacrifice itself to save Tony’s life however.
* Iron Man, and convinced Marvel that even their less popular heroes could indeed become box office draws.
* Iron Man and Doctor Doom might not have the same fancy innate abilities as the Skrulls or the Shi'ar, but they're easily a match when it comes to intelligence and science smarts.
* Iron Man and Doctor Doom once travelled back in time to a New York City circa the Silver Age (thirty years earlier in real time, perhaps ten or twelve in terms of Earth-616 chronology). The art was drawn and colored to resemble the comic book art of that period.
* Iron Man and even mentioned Whiplash on the back—despite Mark Scarlotti being a very different character from Ivan Vanko, including being one of the Mandarin's lackeys on the show.

* Iron Man and occasional lameness, like scolding Iron Man for swearing).
* Iron Man and see that he built that robot when he was in college, implying to be the first major invention he made. At the end of the third film, we see him return for "DUM-E" from the wreckage of his home.
* Iron Man and tries to murder him. He does this even though he's aware that Bucky spent several decades brainwashed by HYDRA and was not in control of his actions. Steve points this out, but Tony is too angry to listen to him.
* Iron Man and uses his thrusters to make sure they all land safely in the water.
* Iron Man, and wanted to use their amazing power to enslave other planets and races.
* Iron Man Annual #10, Gaea saw the dinosaurs as an evolutionary dead end that would prevent mammals from evolving to their full potential, and focused on mammals instead, angering Set.
* Iron Man annual where Tony visits the African nation of Wakanda. While flirting with a beautiful Wakandan woman, Tony tells her that she reminds him of a girl he used to date named Wendy, but with one huge difference. The reader expects Tony to say Wendy wasn't black, but instead, he says the difference is that the Wakandan woman is much taller.
* Iron Man arc "Haunted." He planned to release an airborne version of the Extremis serum (which has a fatality rate of over 97%) across the planet, believing that the small subset of humanity strong enough to survive would evolve into something superior.
* Iron Man are sometimes claimed to reinforce his structural integrity.
* Iron Man armor (and thus knows the weaknesses of it), and the old suit is said to be stronger.
* Iron Man: Armored Adventures abandoned his contract on Tony because Whitney paid him more to do so. He shows up later with a new target, indicating the previous hire was mad about him taking a better offer.
* Iron Man: Armored Adventures, and a few conspicuous rip-offs of Disney films.
* Iron Man: Armored Adventures and, while he certainly takes pride in his heritage from China in general and his family line in particular, he's otherwise very modern and western in his mannerisms and outlook.
* Iron Man: Armored Adventures as she revels in the destruction she can cause.
* Iron Man: Armored Adventures. At first, it was stated that Season 2 isn't the end, but ultimately, while an official statement still seems to be absent, there have been no news since 2012.
* Iron Man: Armored Adventures, but his feelings were seen more through actions than words. They started off not liking each other, but they got close when Gene saved Pepper from the Maggia. He even sacrificed himself for her in the season one finale, which led to him getting all five Makulan rings. After revealing himself to be the enemy, Gene fights and acts harshly to Tony and Rhodey, even calling them by their last names to reinforce his hatred. However, Pepper is the only one he apologized to and is the only person he doesn't want to fight/hurt. When he showed up at Team Iron Man's base, he has a heated conversation with Tony, but when Pepper stepped in, he changed to a much softer tone for her; Pepper was the only person he still cared about. Ultimately, when Pepper became Rescue, he said that he didn't want to fight her, but he still did.
* Iron Man: Armored Adventures demonic, explaining why early humans believed him to be from Hell. He's right about the alien part, but not the technology; demons in the Marvel universe are quite real, and Dormammu, though evil, magical and extradimensional, is not among them.
* Iron Man: Armored Adventures depicts the Mad Thinker, a middle-aged or elderly male in the comics, as a teenage girl.
* Iron Man: Armored Adventures: Doctor Doom. In one episode, Iron Man blasts Doom with his hand beam repulsors which Doom calls "Almost comical" and starts to approach. Even when Iron Man tries again with hand repulsors and a shoulder mounted missile launcher, Doom just keeps coming.
* Iron Man: Armored Adventures, features other story arcs, usually following a specific character over the course of the show (for example, the Living Laser's

origin and him figuring out what to do with his new powers and then his eventual downfall). These story arcs also end up combining and become more narrow as the show goes on (The Living Laser story arc ends up fusing with the A.I.M story arc later on).
* Iron Man: Armored Adventures finds the armor and manages to get the hang of it so fast that Tony can't stop gushing about how good he is with it.
* Iron Man: Armored Adventures, full-body, full-size projection that's, and a small, flat, orange head-only projection that is emitted from a villain's communication wristband.
* Iron Man: Armored Adventures, Happy Hogan seems to exist partly to lampshade superhero double-identity tropes like this:
* Iron Man: Armored Adventures has various hexagonal patterns in relation to the Iron Man suit and other bits of Tony's technology, including part of his heart implant that extends around his chest.
* Iron Man: Armored Adventures, he is said to have been victim of a coup orchestrated by Moses Magnum.
* Iron Man: Armored Adventures. However because of all the chaos going on at the time she is constantly interrupted before she can get the full sentence out. Luckily unlike most, Tony seem to catch on to what she was trying to say and after they won he kisses her on the cheek and they hug.
* Iron Man: Armored Adventures intensive whenever Rhodey yells at him to open up and stop blocking people out. They have so many heart to heart conversations and Tony apologizes to him so often it's more reminiscent of a squabbling couple than best friends. Then there's the way Whitney follows Tony around even when he's being an asshole to her (although given her abusive father, she might just be okay with it) and how far she'll go to save his life... And we're not even going to get into Tony's fanboying of Gene Khan. Oh, and in the last few episodes, Rhodey seems to care a bit more about Whitney than he lets on.
* Iron Man: Armored Adventures: In the season one finale, Zhang threatens Pepper in order to get Tony and Gene to retrieve the fifth Makulan Ring for him. Tony is her best friend and they have mutual crushes on each other. She is also close friends with Gene, who seems to harbor some romantic feelings for her and vice versa. Zhang keeps Pepper hostage while Tony and Gene go into the temple, but she manages to escapes from him and his ninjas.
* Iron Man: Armored Adventures is actually given the main character role. In the episode "Pepper, Interrupted" the trio is actually Gene, Pepper and Rhodey, in direct order of plot importance.
* Iron Man: Armored Adventures is focused on Tony Stark's teenage life. In this incarnation, he's already developed Iron Man armors.
* Iron Man: Armored Adventures like Killer Shrike) wear identical suits and blank white masks.
* Iron Man: Armored Adventures, Magneto wants to get rid of Senator Kelly, but doesn't want to create a martyr for the Senator's cause. So he kidnaps Jean Grey to use her mental powers to make it look like a heart attack.
* Iron Man: Armored Adventures, Obadaiah Stane's baldness carries over from the comics, down to being conspicuously clean-shaven when compared to Jeff Bridge's recognizable beard from the film. His head of security, O'Brien, is also bald. He carries it well.
* Iron Man: Armored Adventures Obadiah Stane takes over, this policy naturally goes out the window; Tony's fury at the "corruption" of his father's company—and not a little of his own engineering work—is a recurring theme throughout the season.
* Iron Man: Armored Adventures: Pepper Potts is a big time Genki Girl.
* Iron Man: Armored Adventures since Tony Stark did start companies with both names in separate occasions he lost control of Stark International.
* Iron Man: Armored Adventures that could be useful to him, just a friend).
* Iron Man: Armored Adventures: The controller had imprisoned Tony Stark into a virtual reality. Tony first noticed that when the simulator failed to show a truck blowing up.

* Iron Man: Armored Adventures The Mandarin are all re-imagined as teenagers in high school.
* Iron Man: Armored Adventures, there is Rhona Edwin, who was the best student at the Tomorrow Academy before Tony Stark showed up. After becoming convinced that Tony has been cheating, she takes the entire school hostage and forces Tony into a sort of game show from hell to prove his intelligence.
* Iron Man: Armored Adventures, Tony has to tell Pepper to stop helping him so much it's practically his catchphrase.
* Iron Man: Armored Adventures, Tony often excuses himself from class (so he can become Iron Man) by claiming he needs to use the bathroom. Pepper later takes it upon herself to explain his absence to some crooks by explaining that he spends more time in the bathroom than anyone she knows.
* Iron Man: A running gag in the films is that Tony Stark is terrible at buying gifts for Pepper.
* Iron Man as he points out, she'd been doing the job anyway. After, the issues are less related to his playboy history, more his inability to permanently give up being Iron Man (and his associated self-destructive streak), leading to an on-and-off romance. Even when it's off, all he does is half-heartedly hit on May Parker, and he is clearly head over heels in love. They eventually come to an accommodation over Iron Man and get married.
* Iron Man as this. In this case, it's more "Why did you make me lock you in an extradimensional hell prison without trial?"
* Iron Manatee with a primitive railgun and diamantine bladed chainsaw.
* Iron Man at the end of the film, Tony needs to get at the replacement arc reactor on the table, but is too weak to stand up. Just as he gives up, the robot arm obligingly pushes it into his outstretched hand.
* Iron Man baddie Blacklash/Whiplash, after hearing of a vigilante targeting supervillains, went on a mad robbing spree in an attempt to amass enough money to take care of his mom once he's killed.
* Iron Man became Antoinette "Toni" Stark, though it was later revealed she's the younger sister of the "real" Tony Stark.
* Iron Man because if Pepper freaks out he's royally screwed. Even Tony’s reaction to getting a shrapnel bomb explode into his chest is subdued, he unbuttons his shirt to check if his vest took the brunt of it, notices he’s bleeding and just lets his arms go loose.
* Iron Man: being rich, handsome, and a brilliant inventor he originally did not care who he sold weapons to until it almost killed him. He started helping others, but almost regularly takes his own path without consulting others insisting he "knows" what to do and others opinions are not worth considering. Sooner or later it always come back to bite him.
* Iron Man built his own personal digital life assistant and named him JARVIS.
* Iron Man, but he never runs out of the metals, circuitry, fuels or power supplies needed. Because he's Tony Stark dammit, and he can build these things in a cave with a box of scraps!
* Iron Man, but usually has to think on his feet and use his intellect for more than just designing weaponry.
* Iron Man called the Mad Pharaoh. The latter tripped and fell to his death on the blade of one of his swords, something that is described by Iron Man as "ironic".
* Iron Man, calls up Tony Stark to ask if one of Stark's prototypes is loose in his airspace. It is... and Tony's flying it.
* Iron Man coming to his aid (with a removed assist from Pepper). After he pops in a spare reactor, he promptly leaves to kick Stane's ass.
* Iron Man, complete with drinks, stripper pole and lascivious dancers.
* Iron Man confirms that the missile did penetrate a weak spot on the tank and set off the ammo.
* Iron Man counterpart is a clone composed of nanites and Tony's brainwaves.
* Iron Man cover for Iron Man's activities — and indeed, on at least one occasion, Tony has publicly "fired" Iron Man in response to a scandal arising from his actions.

* Iron Man crossover is only 7 issues long, with all the various tie-ins across the various series', the issue total comes in around 200. It's made worse by the fact that few, if any, of these crossovers that span the entire publishing run are collected as a whole volume; the main series is collected in a single volume, while the tie-in issues are collected under their own individual titles, with the crossover as a sub-title. Moreover, since events in each individual title are influenced by not only the main series of the crossover, but events in other titles as well, one wishing to read chronologically would have to bounce back and forth between titles/trades to get the story in order. Thus we have the reader reaction known as "Event Fatigue"—not only weary of the convoluted way these crossover events are told, but equally weary of the fact that sometimes readers are given barely a month or two of publications to absorb the new status quo before a new event launches and shakes things up all over again. One wonders how a new reader could ever manage to get on board when current readers are getting tired of the cycle.
* Iron Man defies this trope to an extent. S.H.I.E.L.D. fulfill many of the traditional MIB roles, but are affable, a bit goofy and not very powerful (despite their high-tech lockbreaking device).
* Iron Man does this when landing at high speed in the 2008 Game of the Movie.
* Iron Man downplay most of Tony’s antagonistic and flawed traits and make him genuinely good and often selfless.
* Iron Man, dozens of people are killed throughout the film, without any blood splatter whatsoever. Presumably, this was to give it a lower rating.
* Iron Man either by directly affecting his mind or just giving him a superiority complex.
* Iron Man, engineered his own electric whips and used them to wreck things up... until he was accidentally killed by his old enemy. He could also turn his whips into nunchucks. Anyway, since his death, a BDSM-loving couple adopted both the Whiplash and Blacklash identities, then his daughter stepped into the role, a version inspired by the movie character debuted, and the original's been seen in action again, too.
* Iron Man, even though in the comics, his chest piece in the armor was originally just a magnet to keep the shrapnel from his heart.
* Iron Man, even when they're standing next to stockpiles of rocket launchers and explosives. One of them finally has the presence of mind to load a .50 Browning fixed machine gun, and even the luck to disable the actuator on his right leg. He still ends up dead from flamethrower and multiple explosions. You can at least understand the guy who shot Tony in the head's line of thinking. He was going for a hopeful weak spot.
* Iron Man: Extremis Extremis into a viral package, which is at least borderline believable.
* Iron Man. Famously the biggest womanizer in the Marvel Universe, yet he's incredibly polite to the women he's chatting up, cares deeply about most of his exes (the Marvel Now relaunch's opening story arc essentially boils down to him wanting to protect the legacy of one of his exes after her life's work is stolen and abused), is VERY protective of his on-again/off-again love interest Pepper, honestly loved (and still loves) Madame Masque, and is always completely supportive of his female teammates, no matter how they dress and pose.
* Iron Man fans estimate it would take 642 m/s (1400 mph) just to get the Helicarrier off the ground so Mr Stark is well going past the speed of sound by keeping the ship airborne. Not to mention in the climax, where Iron Man catches up to nuclear missile likely going at 7,500 mph seizing it and guiding it through Manhattan without harm; until the missile reaches the portal where the Chitauri are coming from then Tony lets it go.
* Iron Man: Fatal Frontier, Tony Stark uses a pair glasses called "Stark Datashades," which allow him to divide and perfectly operate three portions of his consciousness at the same time, being able to move, fight, talk and process information in three different bodies (his real body, an empty Iron Man armor, and a virtual body) at the same time.

* Iron Man film franchise has several of these, mostly with Tony and Pepper. One strong example is after she helps him replace his chest piece, nearly killing him in the process:
* Iron Man film, Nick Fury breaks into Tony Stark's house to talk to him about the Avengers Initiative.
* Iron Man films, the three most prominent characters are Tony (white male), Pepper (white female), and Rhodey (black male).
* Iron Man films. Tony's face is completely obscured in the suit. The film has to cut to interior shots of the helmet to see Tony's expressions.
* Iron Man film, Tony Stark drinks a concoction he says involves chlorophyll to stave off palladium poisoning.
* Iron Man foe Ezekiel Stane augmented himself to be a biological version of Iron Man. He can use his own body's energy reserves to fly and generate repulsor blasts, but needs to consume a very high calorie goo to avoid starving himself to death after using his powers. To use his full powers, Ezekiel also needs to wear a suit designed to vent excess body heat to avoid burning himself up.
* Iron Man foe Spymaster into accepting one of his intangibility devices, only to take it from him halfway through a wall, killing Spymaster instantly.
* Iron Man following his old man's ways is a well known womanizer, partly thanks to immense wealth but also due to his roguish charm. Tony is also a subversion, as while he did sleep around with women in his pre-Iron Man days, his stint in a cave with terrorists matured him fast and in a deleted scene he even abandons four horny women at a party to go save the world as Iron Man. Tony also drops the playboy ways to settle down with Pepper Potts, of one the women he actually cares about, but Pepper couldn't handle Tony's superhero requirements, leaving Tony quite depressed. Robert Downey Jr. is never too far from his character either.
* Iron Man fought Merlin, later retconned to be an impostor named Maha Yogi. He duped the knights of the Round Table with his knowledge of rare herbs (of the sort that let him fake his death for centuries), and considerable psychic power, but has no "real" magic.
* Iron Man freezes around him, leaving us with the sight of a bewildered, frozen old man inside a block of ice. The story goes on to claim he is in suspended animation and might (ironically, in context) live forever.
* Iron Man from the Mark II armor up has a protruding chin that does make him look more heroic.
* Iron Man: Given the size of Tony Stark's ego, we could count him and his (fictional) "body guard". Then there's Bethany Cabe, Tony Stark's corporate bodyguard and love interest for a while.
* Iron Man grabs the wand, and since he doesn't have a mind to possess, Molecule Man is left trapped helpless in the wand (although later eventually figures out how to recreate his body).
* Iron Man, had the "Demon in a Bottle" story arc where he developed and then suppressed his alcoholism. Years later in the Obadiah Stane Saga, he had a major relapse in which his alcoholism increased more and more, leading to him dumping the suit and handing it over to Jim Rhodes and Obadiah Stane taking over his company. Eventually he sobered up, manned the hell up, then suited up, proceeded to take back his company, and then face off against Stane in his Iron Monger battlesuit, intending to kill him, but Stane committed suicide so that Tony would be robbed of any "real" victory.
* Iron Man had their own suits designed for them. Conversely, you have Obidiah Stane and his son who were business rivals that simply stole Stark's designs.
* Iron Man had this reaction upon discovering he couldn't copy Tony's arc reactor, leading to him to rip the reactor out of Tony's chest nearly killing but not before this lovely exchange.
* Iron Man had Tony Stark invent titanium-gold alloy. The idea was to make it sound impressive and something so expensive, only Tony himself could afford to produce and use it. In 2016, titanium-gold alloy was produced for real.
* Iron Man has a likely unintentional exaggeration, in that one of the bullet-spark pyrotechnics on the first Iron Man suit can visibly be seen sparking for several

seconds after the bullet allegedly struck. The sparks come from the area just below the Arc Reactor during one of the shots of him tanking a wall of gunfire at the cave mouth.
* Iron Man has also acted as a Lancer to Captain America at times, often being pragmatic in the face of Cap's idealism.
* Iron Man has an old-school villain called King Midas whose gimmick was he loved gold (and riches) and was so fat and overweight he needed a hoverchair to get about, armed with LASERS of course.
* Iron Man has a rocket pack so that you can blast off after wreaking havoc. Oh, and you have to do this while trapped in a terrorist bunker being monitored 24/7 on camera, meaning you have to build a convincing replica of the missile at the same time. Most people don't have the audacity to attempt something so brazenly outrageous. But then, Tony Stark ain't most people!
* Iron Man has been selling weapons to the Ten Rings organization behind Tony's back.
* Iron Man has even more projectiles than Cyclops does, useful for keeping close-range fighters at bay. But once they're in close range, Iron Man doesn't have many ways to push someone back. Also, his combos and super moves have decent damage but predictable utility. Finally, he has slightly more health than Captain America, but not as much damage.
* Iron Man has Obadiah Stane using a small device twice. It emits a high-pitched sound that paralyzes anyone for 15 minutes who is not wearing special ear protection.
* Iron Man has Raza and his men killed after getting Tony's first armor suit and its plans.
* Iron Man has some slight similarities to Tony Stark's life: a history of partying and drug use, while also being one of the finest in his craft when he gets his act together.
* Iron Man, has stated that The Ten Rings, the terrorist organization that kidnaps Tony at the beginning of the film, in fact, works for The Mandarin, one of Iron Man's enemies from the comics.
* Iron Man has the Ten Rings, Afghan terrorists hiding in caves inspired by Al Qaeda.
* Iron Man has this occur a few times. First when the door to Tony and Yinsen's workshop in the 10 Rings' base is rigged with a bomb. Just as somebody opens it looking for the two, the bomb detonates and takes out one of their remote cameras. We then see the screen for that camera show static, and the boss dispatches more men. Another instance plays this with Obidiah's suit: after Tony rips out a critical piece, static accompanies the HUD shutting down.
* Iron Man has to deal with his issues of pride and relearn humility each film appearance. The effects of his pride often are the immediate causes of the problems he is having to fight.
* Iron Man, he ends up getting kicked out of the palace, with him sheepishly offering to shave.
* Iron Man he has an evil brother, Gregory Stark, who also has a goatee. Blonde, naturally.
* Iron Man, he is always trying to work out new technology and more advances systems. The end result is certain armors have rudimentary features that don't work quite as well as it will further down the line.
* Iron Manhe keeps it up and spends most of the non-action scenes striking a perfect balance between indispensability and insufferability. Summed up perfectly in this well-known exchange:
* Iron Man! He opens the door and bails out of the plane over China. (Admittedly, this was before Iron Man's armor was shown as capable of long-range flight, but you'd think Tony Stark would own an airplane or two, at least.)
* Iron Man, he outright forgot her birthday and she bought herself an expensive dress on his dime.
* Iron Man. He used all sorts of sleazy legal tactics to make Stark look bad and portray Kathy as being under considerable mental stress. As a way of getting

revenge on Stark, he also planned to write a juicy tell-all book with Kathy about what Tony was supposedly really like. Fortunately, Hindel didn't do any better than when he was the head of Stark's legal team, and ended up getting Kathy committed to a sanitarium.
* Iron Man. He usually does this when stressed and it can occasionally be seen trembling, making it likely that it's a nervous tic and probably linked to PTSD.
* Iron Man himself verges on this at times, especially when Matt Fraction writes him.
* Iron Man, his company was a proud part of the Military-Industrial Complex. Over the years, writers changed that situation.
* Iron Man. His Iron Monger armor is a bipedal tank, but he is dependent on his engineers to help him keep up with Tony.
* Iron Man his victims. In his first appearance during the Silver Age, the crows were stolen from another performer and used to aid in robberies.
* Iron Man. However, Stane has no experience, so he has to rely on a remote computer to assist him in the fight. When Stark realizes this (as he's been detecting strange transmissions throughout their fight), he destroys the building that's been transmitting to Stane's suit, leaving Stane outmatched.
* Iron Man in a cave “with a box of scraps” and couple movies later took on a criminal organisation with some gardening store supplies. At one point in Avengers he has to teach the blonde (Captain America) about electronics.
* Iron Man in flight and sings, "I can show you my sword, and I don't mean my katana." Deadpool continues hitting on the exasperated Iron Man for the rest of his lines.
* Iron Man: In his return to Gulmira in his new Mark III Suit, Iron Man proceeds to take down the Ten Rings terrorists until he is stopped by a small group holding hostages at gunpoint while screaming at him in their native tongue(s). Iron Man shuts them all up by shooting all the terrorists simultaneously.
* Iron Man in particular had an entire fleet of new armors that got very little screen time but nonetheless featured heavily in the merchandise for the film.
* Iron Man in particular is perpetually concerned about his technology falling into the wrong hands. In fact, this has happened several times.. This has led to multiple "Armor Wars" and other miscellanous incidents in the canon and alternate universes, such as suicide bombers detonating themselves with Arc Reactors. The amount of times Tony's fears of his tech being abused is confirmed a startingly number of times.
* Iron Man in-ring. The winner is whoever had the most pinfalls or submissions during the bout.
* Iron Man. In the previous issues, Mary-Jane had suffered a broken arm, then shown up shortly after without a cast or anything. When fans pointed out the mistake, the writers added a discussion between Parker and Stark, revealing that Stark had fixed her up with some kind of injected bone glue. The panel immediately after the explanation shows both characters looking straight at the reader.
* Iron Man. In the second movie he has a more has to engineer a new atomic element to fix a fatal flaw in that reactor, which he uses alongside his newest armor upgrade.
* Iron Man. In this case, Tony Stark and S.H.I.E.L.D. had earlier come up with a cover story that Tony was supposed to give at the press conference. After a few questions from a skeptical press, Tony decides to just tell the truth: "I am Iron Man."
* Iron Man: Inverted by Tony Stark. When he's completely flesh and blood, he's an arrogant playboy genius with no consideration for the consequences of his work. It's not until he has to place the miniature arc reactor in his chest that his more noble nature emerges.
* Iron Man, in which he takes off and lands in the Mark II armor in a fairly stupid pose. This is fixed for the Mark III.
* Iron Man, Iron Man says this to an alternate reality Doctor Doom after hearing the man describe his latest plan. Doom isn't fazed.
* Iron Man iron. Tony responds by summoning a custom-made suit actually made of

iron, complete with claws, a harpoon gun and fans that blow clouds of iron filings straight at them.
* Iron Man is an example of the "fight military aircraft" portion of the trope. And it is awesome. Though actually, Tony unknowingly invaded USAF controlled airspace. When Rhodey tries to contact him, he at first lies that he's "driving with the top down", but then admits to be flying in a rocket-powered suit of armor so his men won't shoot him out of the sky.
* Iron Man is another strong example of this process done successfully.
* Iron Man is a woman named Natasha Stark, who ended up falling in love with and marrying Captain America. Think of that what you will.
* Iron Man is enraged that a minion of his killed off his begonias while cooling off his drink using cryokinetics.
* Iron Man is essentially just the name of the armor. Everyone else goes by their real names.
* Iron Man is hit by an expensive car and is knocked into a hydrogen-powered bus. The bus explodes. In the final cut of the movie, the bus explodes after that same Humongous Mecha fires a rocket into it, which is easier to understand. The second-to-last scene before the credits actually mentions the bus explosion in a stream of news text.
* Iron Man is much funnier than the comic version who tended to be a little more grim (although after the movies, writers have been giving him a little snark lately).
* Iron Man isn't nuclear (in fact, it's safe enough that Tony Stark can walk around with a miniature one implanted in his chest), but under the right circumstances, can be triggered to produce a very satisfying boom.
* Iron Man is often able to counter anything you throw at him with his technology.
* Iron Man is set in this year, with Arno Stark taking Stark Industries and Iron Man's armor after the death of Tony Stark and becoming the new version of this superhero (set in Earth-8410).
* Iron Man issue 182, Tony Stark is drinking a bottle of alcohol when his friend, Gretyl, announces that she's giving birth. Tony promptly drops the bottle to help her.
* Iron Man. It is very humanoid but much too large for his limbs to extend far out from the cockpit inside the torso. In fact, because it has a literal helmet structure, it's not a stretch to say that Iron Monger is powered armor from the neck up, and the rest is mini-mecha.
* Iron Man: It seems like the main antagonists will be the Ten Rings terrorist organization, led by Raza, but it's revealed that they're working for Obadiah Stane, who wants control of the company and needs Tony removed.
* Iron Man, justified as Hulk was distracted having just come to his senses after Scarlet Witch meddled with his mind.
* Iron Man just to prove a point. He also has a tendency to hack other people's sound systems to play appropriate music for his dramatic entrances.
* Iron Man latest flame insults her position. Considering the fact that she slept with him just after she met him because he was a millionaire and she insulted Potts for not being a fling like her, this is understandable.
* Iron Man liked so well that he had the FX team design the visuals around it.
* Iron Man looms behind one of the terrorists. He does it again when he goes back to Afghanistan and kills all the terrorists with his new upgraded armor.
* Iron Man machines for increased sturdiness and found that its rules complemented its play-field very well, and the game eventually became popular enough for Stern to issue a re-release in 2014.
* Iron Man, mainly because of the tie-ins of the event derailing him into a pseudo-fascist.
* Iron Man makes her insecure about his intentions. Further complicated by the fact that she really is attracted to him.
* Iron Man making new armor for himself. Also works as a shout-out to the live-action movie.
* Iron Man. Many of the paramilitary and terrorist groups are open to and include

considerable numbers of Europeans and North Africans (though not Pashtun-dominated groups like the Taliban, i.e. the ones you'd actually find in Afghanistan, who are quite xenophobic).
* Iron Man, many of Tony's corporate rivals go after his company instead of him, often through super villain attacks.
* Iron Man matches can be decided by Sudden Death if both competitors end the time limit on an equal number of falls but this only occurs if both parties agree to it (or are forced to by someone with authority; i.e. it is not a requirement of such a match). The first
* Iron Man match is a variant of the Iron Man match where only submissions count for points.
* Iron Man match is usually tied, or the score is one fall apart, up until the closing moments. When it does end with only two falls, it is usually the heel in the match, and walk out of the match after losing one of the falls.
* Iron Man — not because there were other people, but because Pepper refused to even entertain the idea until Tony became a better man, the kind of man she always thought he could be.
* Iron Man member The Ghost is an industrial terrorist who uses his own technology to become intangible, invisible, and fly at will.
* Iron Man mistake the kid for the real Iron Man and throw him into battle, causing him to get fatally injured and accidentally taking down a giant robot by jamming its motors. The kid is given an iron statue to honor his sacrifice, when Iron Man makes this joke:
* Iron Man. Modern adaptations tend to update it to Afghanistan or somewhere in the Middle East.
* Iron Man, most notably Crimson Dynamo V, Dimitri Bukharin. Bukharin was a straightforward superhero who happened to be working for America's enemy, and there was a great deal of mutual respect between him and Iron Man.
* Iron Man movie confirms that Tony Stark was already a genius back when he was a teenager; he graduated top of his class from MIT with a prize-winning invention when he was 17 and cracked the Pentagon's firewall on a dare at the same age.
* Iron Man movie is basically about Tony Stark going from an extremely rich manchild to an extremely rich man. By building a robot suit and fighting crime.
* Iron Man movie, one point-of-view shot reveals that the heads-up display in Iron Man's suit can determine the difference between civilians and terrorists, and labels them as such (likely through A.I. identification of armed terrorists vs. unarmed civilians).
* Iron Man movies feature J.A.R.V.I.S. as this. He's benevolent, if a little bit sardonic.
* Iron Man movies, Tony has robotic arm things to help him out when he is inventing, in his garage/lab, one of which he calls "butter-fingers". They seem to get in the way more than help him though and at one point he threatened to donate one to a city college.
* Iron Man movie subverts this by adding the sounds of breaking bones when a punch connects, pointing out that hitting someone that hard would be fatal.
* Iron Man movies, where Obidiah Stane's Iron Monger suit is less "advanced" than Tony's suit since Tony fought it and won while only at 17% of power. The suit uses conventional weapons and is bigger and "clunkier" than Tony's more streamlined suit.
* Iron Man movie, which starts off as a single missile that splits up in mid-air. As Tony himself describes it...
* Iron Man much of the plot takes place in Afghanistan, but the Ten Rings aren't Islamist terrorists.
* Iron Man Noir has the infamous pirate Captain Namor, also known as the Beast of the Blue and the Blood Mariner.
* Iron Man not only because he is a good actor, but has had problems in the past with drug abuse. That added extra weight to a man who is struggling to redeem himself for past mistakes; a man who is also known for having problems with alcohol.

* Iron Man, not potential energy, so Yinsen shouldn't know that. Tony may have decided it wasn't important enough to correct him.
* Iron Man Obidiah Stane in his darkly-lit workshop. Pepper notices a suspiciously-large shadow and cautiously stares into it, only for the Iron Monger to power up and two glowing mechanical eyes to stare back at her.
* Iron Man of course used the War Machine at one point, and while not quite as stacked as the specialty armors even the typical Iron Man armor is loaded with weapons. A one-shot from a few years ago had the onboard computer engaging "*** It, Fire Everything!" mode.
* Iron Man of his comic book origin shown in issues 267-268 of his series.
* Iron Man often send them to rather low rankings; however, both films have their defenders.
* Iron Man. Of the assembled Avengers, more than half of the machine's list are left off for whatever reason.
* Iron Man once faked his death when he was suffering from nerve disintegration. It was a ploy to get healed. Unfortunately, Rhodey didn't know about it and was pissed off.
* Iron Man once used this trope on a skylight when stopping a hostage situation, while using his repulsors to destroy the glass shards to make certain he didn't accidentally kill the hostages himself.
* Iron Man, one of the villains gets pulled through a wall when he thinks he can hide from Tony.
* Iron Man, one of the weapons Stark Industries has developed is an auditory paralysis device. It causes anyone who hears the noise to be temporarily paralyzed unless they are wearing special electronic earplugs to counter the noise.
* Iron Man, or rather Tony Stark, through six kinds of hell during the "Armor Wars II" storyline; he was commissioned by the Marrs twins to take Tony out, but for him it is clearly, indeed emphatically personal. He rants and raves at Stark for some cruel injustice that was done to him — but when the story finally comes to a head, and — after a long and devastating battle — DeWitt's face is revealed to Tony, he does not recognize him. Atypically for the trope, this shocks him profoundly. The idea was that DeWitt was one of the many guys Tony crushed during his selfish rise to power and while DeWitt remembers it clearly, Tony never even knew the guy's name.
* Iron Man. Over the course of the fight, Tony Stark goes through several suits as they get destroyed, while Lex uses and loses most of his weapons.
* Iron Man parodies, where Tony will often shout "Tank Missile!" and easily resolve the conflict.
* Iron Man, Pepper helps Tony replace his mini-arc reactor with an upgraded version and he warns her not to touch the sides of the casing. When she does, there's a loud "bzzzt" sound and the heart monitor behind them immediately starts displaying a page-full of red text. Tony even compares what she's doing to the game Operation by name.
* Iron Man: Pepper manages to obtain evidence of Obadiah's villainy and get it to the authorities. Realizing he's screwed, Obadiah snaps and enters the Iron Monger suit in a desperate bid to kill everyone involved. Pepper outright says that he's gone insane.
* Iron Man. Pepper Potts has to be rescued, but is enough of a threat that the villain feels compelled to shoot her instead of taking her hostage. She's also generally competent and helpful throughout the film.
* Iron Man: Pepper Potts is leading several S.H.I.E.L.D. operatives to Stane's secret lab. Her key card doesn't work on his door, so the operatives place a device on the lock. Pepper starts asking if the device picks the lock mechanically or electronically before they tell her to stand back from the imminent explosion. She covers her ears expecting a loud bang... aaand it turns out to be a thermite charge about as loud as a dropped textbook.
* Iron Man: Pepper Potts starts off the film wearing drab business suits with her hair pulled back. But for the Stark charity gala halfway through the film, she styles her hair and wears a sexy backless dress, stunning her playboy employer, who

finally starts looking at her as a romantic interest rather than just his long-suffering secretary.
* Iron Man performs a three-point landing during the assault on HYDRA's Sokovia base.
* Iron Man plays in the background. Then the scene cuts to the Humvee in which Tony Stark is riding with several other soldiers, revealing that the music is being played on a stereo in the truck.
* Iron Man powers, since he can just absorb it and get a temporary power boost. As well, Tony has developed numerous "Buster" armors to battle certain foes. Nine times out of ten, though, he severely underestimates them, especially the Hulk.
* Iron Man pulls out Tony's artificial "heart", the arc reactor, and then taunts Tony while holding it out in front of him.
* Iron Man rather than a more traditional scientist, who built his fortune on weapons manufacturing. He differs from a lot of later tech bros in that he's usually presented as a hero.
* Iron Man realize what happened... just after Potts gets out of his reach, and starts talking with the guy from S.H.I.E.L.D.
* Iron Man. Realizing the extent of the Pride's influence (meaning they would likely avoid any jail time), Tony essentially offered Geoffrey Wilder a truce, promising to keep their existence a secret in exchange for them withdrawing from a neighborhood that had come under his protection.
* Iron Man recycles this bit periodically; his most common 'museum piece' is the Mark IV armor that debuted in the 1970s, using variations of this suit when his latest armour has been destroyed and he lacks the time, resources, or inclination to just create a more advanced replacement immediately.
* Iron Man representing his "face"), the cartoon portrayed him as a Projected Man.
* Iron Man) reveal that like Tony, Howard Stark is a charming, rogueish, often-arrogant, emotionally unavailable playboy — which Tony ironically resents, despite showing the same characteristics, because they do not make for good father figures. Only time will tell if Peter Parker, the younger Stark's son-figure, will turn out the same way.
* Iron Man, Rhodey, now using the War Machine armor, has his armor hacked by Ivan Vanko and is trapped inside the armor as it attacks Tony, putting him in danger until Black Widow can re-hack it and free him.
* Iron Man rings of power. These rings were found on a crashed spaceship of Makluan origin.
* Iron Man: Rise of Technovore every time it's about to kill a named character. The only reason Stane is eventually defeated is the Technovore abruptly decides to take on a massive, immobile form to invade a city, allowing Iron Man to attack it with an orbital laser. And even then, Stane survives.
* Iron Man romantic relationships have been with Pepper Potts-Hogan (who was married to his best friend most of the time) and with Rumiko Fujikawa, who jerked him around for her own amusement and cheated on him with one of his crazier enemies, Tiberius Stone, before getting killed by a supervillain. Apart from them, Tony has dated supervillains (Madame Masque), plants hired by his enemies to conduct psychological warfare against him (Indres Moomji), other businessmen/women who were only trying to take advantage of him (Sunset Bain, arguably Tiberius Stone), one night stands who may arguably have date-raped him (Heather), and creepy possessive stalkers who tried to kill him (Kathy Dare, the Living Armor).
* Ironman rules, especially what happens in a tie, are always changing to create drama and generally conspire to get the heel closer to victory.
* Iron Man Run: Complete the game without resetting to an earlier save (that is,
* Iron Man's AI, would be this if he didn't have a certain amount of control over the suit himself.
* Iron Man saying sarcastically inappropriate things in the middle of life-threatening situations.
* Iron Man, saying that he wanted to create "the quintessential capitalist," explore Cold War themes, and that "I think I gave myself a dare. It was the height of the Cold War. The readers, the young readers, if there was one thing they hated,

it was war, it was the military.... So I got a hero who represented that to the hundredth degree. He was a weapons manufacturer, he was providing weapons for the Army, he was rich, he was an industrialist.... I thought it would be fun to take the kind of character that nobody would like, none of our readers would like, and shove him down their throats and make them like him.... And he became very popular."
* Iron Man, sealed himself away and let only his robot Avengers in after getting decontaminated.
* Iron Man series, Tony finds out at long last that his father, who drove Stark Industries into the ground and abandoned him and his mother, had been cheated by a business associate and left in shame, but really had loved him. He hires a PI, Jessica Drew, to track his father down. And she finds him, and everything checks out, even memories... Then it turns out to be a plot by the Chameleon. Later he does find his dad and realizes that he's just as irritating as ever.
* Iron Man series, while Pepper Potts is not exactly poor, she is nowhere near the social circles her multi-billionaire playboy boss Tony Stark is in. By the end of the second movie, they're going steady.
* Iron Man serve as a plot point, as it is this massacre that convinces Tony Stark to stop making weapons.
* Iron Man, she assures him it's a very common practice; Norman Brundage is her roommate Julie. Stark and his friend James Rhodes later share a chuckle over the fact that apparently some of his favorite writers wear skirts. At the end of the last issue, however, we see that her stories are now published under her real name - no doubt at Stark's insistence. (The names are chosen to honor two famous pulp-era artists, Virgil Finlay and Margaret Brundage.)
* Iron Man: SHIELD is gung-ho about stopping threats before they become threats).
* Iron Man shows that secret identities are not necessarily bad ideas.
* Iron Man's is built into his armor. The AI takes over when Tony becomes unresponsive and pilots the armor to safety. It is also capable of fighting.
* Iron Man sneaking around to have numerous sensors everywhere specifically designed to detect invisible intruders.
* Iron Man's pain receives particular emphasis, as the animators show the toll the gamma blast takes on his shrapnel-embedded heart.
* Iron Man speech for the "Jericho" demonstration and getting the reporters to sit on the floor at the press conference.
* Iron Man's "Shoot to Thrill", which he transmitted into the radio communicator of the S.H.I.E.L.D. quinjet and repulsor blasts Loki off his feet and aims all the gajillion guns embedded in his suit at him. The line itself, "Agent Romanov, you miss me?" is understated. Tony likes to talk with his actions and BGM.
* Iron Man: Stane, just after paralyzing Raza and his goons with some experimental technology outlawed by the government, orders his personal bodyguards to clean up the mess.
* Iron Man: Stark Industries could easily be a stand-in for the real-life Lockheed Martin. They're both major suppliers of the U.S. military (and others), and even their logos are nearly identical. The real Lockheed hasn't yet invented a flying powered armor, though. That we know of.
* Iron Man's Technovore is a nanotechnological entity driven to assimilate and integrate foreign technology into itself.
* Iron Man (Stern), available after advancing Iron Man's armor to the Mark VI level.
* Iron Man, stormed into Tony's hospital room to bring back the damaged remote-control Iron Man unit Tony was using, stripped off his own armor, and told Tony he's through being Stark's "War Machine." Tony accepted the resignation from the company, but told Rhodey to keep the armor, and to use it to be better than him.
* Iron Man storyline in the 80's where Yellow Claw fought the Mandarin in an epic clash of yellow peril stereotypes! Specifically, Yellow Claw represented the pre-World War II stereoptype of Asians as devious and inscrutable, and The Mandarin represented the post-World War II stereotype of Asians as reckless bloodthirsty barbarians.

* Iron Man storyline to take him down for good. Tony's so pissed off having done this that he kicks Mallen's lifeless body in total spite.
* Iron Man story, sometimes he takes that right too far, beating up innocent people like Stingray and Captain America).
* Iron Man story "The Big Bang Theory", the armor's software has been tampered with, turning it into a bomb.
* Iron Man suit, calling it "Iron Man 1889". It won top honors in the Marvel Cosplay contest at the 2014 San Diego Comic Con.
* Iron Man, the AI of Tony Stark's computer - though it's difficult to tell when he's being genuinely polite and when he's being sarcastic.
* Iron Man: The Air Force provided material with the then-new Airman's Battle Uniform's camouflage pattern. Actor Terrance Howard also did some immersion research with airmen to prepare for the role.
* Iron Man: The character was originally based in New York, but the MCU changed his home to California, where most of the technology industry is (Silicon Valley).
* Iron Man: The closure line of Stark's Iron Man helmet suggests a thin-lipped scowl.
* Iron Man, the ejection seat is damaged, and the chute won't deploy. Tony uses the armor's strength to pull the lever hard enough to unjam it.
* Iron Man: The eyes in Tony's Iron Man armor glow. But the trope is really invoked when, in the darkness, the Iron Monger suit's eyes switch on.
* Iron Man: The first film established that the Iron Man suits only function while they have sufficient power, and Tony replaced the Mark 1 arc reactor with a more powerful one to power the Mark 2 and 3 Iron Man suits. Given that they were designed for sustained flight, they needed the extra power. When he has to use the proto reactor in his Mark 2 suit, he has notably less power. Each part of Mark 42 is implied to have its own reactor because it was made to come apart and move remotely. It's also an example of what happens when you push this trope too far: it's so complicated that it rarely works as well as it's supposed to.
* Iron Man, the Gargoyle passed himself off as sculptor Paul St. Pierre, with his "works" actually being his victims, encased in a clear polymer coating so they would remain immobile. Tony Stark discovered his secret when he took a slight chip off the heel of one statue to analyze it, and the victim immediately reverted to her normal form, fainting from the shock.
* Iron Man. The movie then backtracks 36 hours to show a story-within-a-story recap of Tony's life and an introduction to his playboy ways.
* Iron Man the power source of the suit is the same as the magnet keeping the shrapnel out of his heart. In the film version, and most animated versions that came after the first film, the "arc reactor" in Tony Stark's chest always generates a light that can be seen through his shirt.
* Iron Man: The reason why Tony Stark created the Variable Threat Response Suit (better known as the original War Machine Armor) is that against the Masters of Silence energy weapons are useless, but the slugs of normal firearms work just fine.
* Iron Man. The second season replaces it with a better-animated 2D sequence.
* Iron Man: The shrapnel working its way toward Tony's heart is held back by an electromagnet that is somehow just powerful enough to hold it in place but not powerful enough to pull it back toward the magnet over time even though jagged metal would tend to shift and thus cut through body tissue pretty readily as Tony does active superheroics.
* Iron Man: The villain Blizzard confuses things even more in his first appearance (at the time calling himself Jack Frost) by saying that the people he froze had enough oxygen within the ice to survive. What?
* Iron Man, this happens when Tony crash-lands the Mark II after its test flight. Unfortunately, it's one of his vintage sports cars. The DVD with a program on the making of the movie reveals that this really was a very expensive car destroyed for the shot; the director bemoaned its loss before cuing its destruction. Said car likely was a 1965 Shelby Cobra, of which extremely few remain, making this a definitely tearjerker for car buffs.

* Iron Man. Though not as long and flexible as Doc Ock's tentacles, they served a similar function.
* Iron Man to gain from changing anything in the specific past periods they enter, and both would rather keep the present they have. Seeing as it's dangerous to fuck with reality and all that.
* Iron Man, Tony and Pepper share a nervously awkward dance, leading to getting some air on the roof, leading to... this. And then it led to Pepper's stammering request for a drink right after that freeze of realization.
* Iron Man, Tony at one point accesses a remote computer using a borrowed PC. The IP address is clearly displayed briefly, and the first "digit" of it is in the 900s.
* Iron Man Tony decides to go back to Afghanistan and take on the Ten Rings after seeing they've attacked Yinsen's hometown.
* Iron Man, Tony decides to peek at the pym particles sent to his lab for examination before Dr. Pym showed up. He ends up being six inches tall.
* Iron Man: Tony is almost killed when an explosion blasts shrapnel through his heart. He wakes to meet Yinsen, a doctor who saved his life by grafting an electromagnet to his chest. Yinsen knows it's comically crude, but considering they have both been kidnapped it was the best he could manage.
* Iron Man: Tony's assistant, Pepper Potts, is conversing with Tony while he's testing one of the repulsor beams in the suit's gloves. The recoil throws Tony off screen and you hear him hit the far wall a couple seconds later. Pepper's reaction, mainly her complete lack of concern for his safety, is what really sells it.
* Iron Man Tony Stark and she's chagrined realizing she just chewed out her boss.
* Iron Man: Tony Stark builds the first Iron Man suit out of spare weapons parts. It's much cruder than his later versions, but it gets the job done and breaks him out of captivity.
* Iron Man, Tony Stark creates a revolutionary way of generating huge amounts of power and a bulletproof power suit whilst captured by terrorists and only some scrap weapons parts at his disposal.
* Iron Man, Tony Stark cuts half of his foot off with a laser in order to remove a power-suppressing anklet so that he can access Extremis and beat the Mandarin.
* Iron Man: Tony Stark does this with his first suit. After tanking everything the terrorists could throw at him, he says "My turn" and unleashes his new arsenal.
* Iron Man Tony Stark fights Obadiah Stane on the roof of Stark Industries with 2% power left on the electromagnet that keeps him alive. He orders Pepper to overload the arc reactor directly beneath him, even though he's still within its path. The electricity blows up the Iron Monger and overloads Tony's own arc reactor, leaving him lying on the ground unconscious... only for the residual energy to cycle back up the arc reactor keeping him alive.
* Iron Man, Tony Stark first seems to notice Pepper romantically when he gets her out onto the dance floor for a nice slow waltz. They have an awkward and comedic conversation about it afterwards.
* Iron Man, Tony Stark goes "undercover" as Iron Man at the San Diego Comic Con. There are several other "Iron Men" there, and Tony takes some flak from fans of earlier revisions of the suit.
* Iron Man: Tony Stark had to take subways while trying to lead a normal average-Joe type of life.
* Iron Man: Tony Stark has been like this since his conception, though the actual strength of it depends on the writer.
* Iron Man, Tony Stark is given major thoracic surgery in a cave with a box of scraps. He wakes up with a car battery wired into his chest. Justified as the Ten Rings are hardly going to let the guy they just abducted go to a hospital.
* Iron Man, Tony Stark is imprisoned by the Ten Rings, Afghan terrorists hiding in caves inspired by Al Qaeda, but not explicitly Islamic or even entirely Middle Eastern (the Ten Rings actually has different cells of different races). It turns out that his capture was orchestrated by his white business partner Obadiah Stane, who later has the Afghan terrorists executed.
* Iron Man Tony Stark mentions how, if you don't write a secret down, mind-readers

can still learn what you're hiding..
* Iron Man Tony Stark of Stark Industries sold weapons and military tech to the rest of the world to fuel his playboy lifestyle. However an ambush and the death of Yinsen made him take down the weapons division. Stane on the other hand other plans...
* Iron Man, Tony Stark quickly discovers he can weaponize the repulsor stabilizers in his armor's palms, turning them into effective blasters and making them his suit's primary weapons.
* Iron Man: Tony Stark says that the happiest day of his father's life was when he shipped him off to boarding school.
* Iron Man, Tony Stark shaves off his beard and dyes his hair blond while on the run. It works, as no one recognizes him, but he feels he looks like "an idiot".
* Iron Man, Tony Stark was originally an arms dealer, but eventually decided to downplay his company's role in that market. After that, Justin Hammer and Obidiah Stane appeared as unambiguously villainous versions.
* Iron Man tries really hard to forget the time he gave his helmet a nose, and sometimes also when he had built-in rollerskates in his armor.
* Iron Man trilogy has Pepper Potts, Tony Stark's assistant and love interest.
* Iron Man until Tony and Pepper killed him by overloading the factory's arc reactor. At the press conference where the cover story should have been fed to the media, Tony paused then simply stated, "I am Iron Man."
* Iron Man usually has to deal with others trying to steal his technology and create weapons out of it.
* Iron Man usually wrestle with this - Tony Stark's fortune is built on his engineering genius, but in the film, Tony decides to get his company out of the munitions business after seeing that his weapons were being sold in dirty deals to terrorists and criminals. In the comics, Stark quit selling weapons years ago, but he still frets about villains stealing and abusing his armor designs, sometimes to the level of paranoia that he manipulates, deceives and attacks his own friends.
* Iron Man villain Boris Bullski, alias the Titanium Man, became a supervillainous mercenary following the collapse of the USSR. Several versions of the Crimson Dynamo have done the same.
* Iron Man villain the Titanium Man was in the context of a televised battle on neutral territory agreed upon by the U.S. and the Soviet Union.
* Iron Man Vol. 3 #76 by Adi Granov, to the point it has become his signature pose.
* Iron Man (Vol. 5) #1, Tony Stark pointedly lays out his thoughts on the matter of belief, and his monologue reaches this fragment:
* Iron Man, War Machine, Iron Clad, Iron Cross, Captain Marvel, and many others use these in
* Iron Man was dismissed by Obadiah Stane as a publicity stunt "to shut the hippies up". While it does provide clean energy to the building, it was never cost-effective enough for mass production until Tony Stark refined and minimized the technology while held hostage by the Ten Rings.
* Iron Man was released to DVD, with a member of the movie's cast present, and Lockheed Martin's HULC. So far, they have been made with intent of aiding with heavy lifting, not direct combat, and cannot fly.
* Iron Man was stated by many to have a distinct Apple influence, particularly with the color scheme and minimalist design. Marvel Editor-In-Chief Axel Alonso even referred to it as Tony's "Genius Bar costume" (a reference to the tech support stations inside most Apple stores).
* Iron Man was that he was sponsored by Stark Enterprises as Tony's bodyguard.
* Iron Man went through this when Batman's movie surpassed his movie. He got so drunk that he ended up at Wayne Manor.
* Iron Man when Doctor Doom travels to the future to meet himself. When Doom notes the theory, his elder self snorts that whoever came up with it never actually time-traveled.
* Iron Man. When Iron Man is being crushed by Iron Monger, Tony lets off all his flares because he doesn't have anything else. It works enough to make Iron Monger let go because its pilot is momentarily dazzled (specifically blinding the sight

cameras in the eyes).
* Iron Man. When James "Rhodey" Rhodes took over as Iron Man, he used Tony's old red and gold armor. Soon, he began exhibiting headaches and irritation to the point where he'd fight people. Turns out Tony had calibrated his armor so that it ran on his brain patterns and, being stuck in his "demon in a bottle" rut at the time, he never realized it until it got really bad. Tony ends up donning a version of the old gray armor and fighting Rhodey so he can go in and recalibrate the armor.
* Iron Man when Pepper walks in on Tony apparently being molested by robots:
* Iron Man: When Pepper walks in on Tony being peeled out of the Mark III suit following his battle with Ten Rings.
* Iron Man when placed opposite of any female, humanoid character in
* Iron Man when Ultron hacks into all the suits — except the Mk I, which lacks a computer system.
* Iron Man, where Tony's guilt over Captain America's death and the actions he took would make him occasionally break down.
* Iron Man which concludes he has no weaknesses. No "I-shoot-him-just-right-and-the-problem-is-solved-weaknesses" that is. Tony is mentioned as having a few plans for this type of thing (specifically asked by Bob, nonetheless). In the end, he hacks Sentry's robot, which informs him of disasters he could be stopping, so that it puts out hundreds of fake messages. Unable to deal with deciding what to do first, Sentry collapses.
* Iron Man, who have also been best friends since their (admittedly very young on Tony's side) college days at MIT.
* Iron Man, who in turn, used it to make the Hulk smarter, creating the Doc Green persona.
* Iron Man, winning a tournament at age eight by killing his opponent's dog and stuffing the body in the kid's locker the night before the final day of competition.
* Iron Man with a device on the roof of Stark Tower that easily takes his suit off while he calmly strolls across it.
* Iron Man with nanomachines. His Extremis and Bleeding Edge armors are made out of nanomachines, while his original armor was powered by "tiny transistors," the predecessor to today's nanomachines in terms of function and origin.
* Iron Man, with the opening credits suggesting the two are set within the same continuity.
* Iron Man with three kilos of cocaine. Also, his tuxedo shirt was covered in blood. Not his. And before Hef banned him for life from the mansion... He made an incredibly sloppy pass at Pepper Potts, and when she threw a drink at him, he yelled some stuff at her. May have insinuated he was owed certain things. And then Jim Rhodes came in and he took a swing at him. He fired them both, crashed his car into Hef’s mailbox, and stole a motorcycle. Of this, he only remembers arriving at the mansion.
* Iron Man: Yinsen tells Tony they met at a conference years earlier, which Tony doesn't remember. Justified, since, as Yinsen says, Tony was so drunk at the time it was a miracle he could stand- much less deliver a speech.
* Ironman: Your typical ID dive. You must use any down stairs you see. The object is to retrieve a powerful artifact from level 67.
* Iron Marines, and you need to send a Tortugon into the portal to destroy them while Nexus is temporarily defeated.
* Iron Marines machine guns will permanently reduce the armor value of enemies it hits.
* Iron men and iron ships: 'Clippers', and later 'windjammers'. Clippers were fast cargo ships, usually three-masted full-riggers, designed for speed and used on hauling tea and other easily tarnished goods on intercontinental voyages. Windjammers were large cargo carrying sailing ships, usually rigged as four-masted barques, used on ultra-long voyages in the late-19th century and early 20th century. Typically, windjammers were (and are still) equipped with semi-mechanized rigging, steel profile masts and yards and steel cables as running rigging where possible. Often also the running rigging was handled by motor winches instead of

manpower. Since the windjammer hull is optimized for good hydrodynamics because of sail handling, they were (and still are) capable of sustained high cruising speeds; most four-masted barques were able to cruise at 15 knots (28 km/h) on plausible winds, some logged 18 knots (33 km/h) regularly and
* Iron Men and resulted in a partial collapse of human civilisation. This was followed by the Age of Strife, in which the appearance of psykers (caused by the Eldar falling into this trope) resulted in warp storms and widespread demonic possession which led to an even worse collapse. Then there was the Horus Heresy, yet another massive civil war in which humanity as a whole stood on the brink of collapse. And the rest of the time humans spend so much time fighting among themselves that they're much weaker than they should be in resisting the various aliens that want to kill them.
* Iron Monkey: The 2001 Miramax US release changes the soundtrack, removing the Wong Fei-hung theme, removes Fei-hung's name from the title, the sound effects, opening credits and end credits have been replaced, the English audio track and subtitles remove any political context, sped up scenes were slowed down, and there are over 100 additional cuts including censoring violence and removing comedy elements from scenes.
* Iron Nail Afternoon He also seems to genuinely care about the downtrodden and restricts his violence to those his size or bigger.
* Iron Nail Afternoon: is a soft reboot of long-running webcomic Smoke, Fur And Stone. Smoke Fur And Stone ran from 2013 and included various spin-offs and additional short comics. The creator felt that it was difficult to do justice to the growing number of characters, backstories and ever-expanding canon in a series that updated twice a week. Hence the decision for a soft reboot in the form of Iron Nail Afternoon.
* iron ore than the ores and bars, if only because no more experience can come out of processing them.
* Iron Plague. The ending is a very awkward peace treaty signed after it is revealed that the four immortal royals' father had vanished to found the republic and chose to die naturally of old age.
* Iron Realms Entertainment games use "credits", which can be bought with real money. Credits are traded for gold and items in-game at a varying exchange rate, but the credits-to-real-money rate remains constant.
* Iron Road is a 2009 miniseries in which a Chinese woman disguises herself as a young man named "Little Tiger" to work on the Canadian railroad and falls in love with her boss' white son.
* Iron Savior concept story is about a thinking machine, the titular Iron Savior, who wages war against humanity.
* Iron Savior is this too. Their first five albums (and a EP) are almost entirely the story of the titular starship.
* Iron Savior, the eponymous ship was built by Atlanteans to defend against the land dwellers.
* Ironside episode "The Man Who Believed". Interestingly, although we see photos of her and hear recordings of her voice, she's never shown alive.
* Ironsight features the Zeus, a tactical drone that calls in a beam of concentrated energy to kill enemies once you've scored enough points to call one in.
* Iron Skin creates ablative armor that renders him invulnerable and immune to status effects up to a cap. With the Iron Shrapnel mod, Rhino can shatter it to impale his foes on a storm of shrapnel.
* Iron Sky, a gigantic ship capable of simply plowing through the fleet and blowing up 1/5 of the Moon with a single shot. The other ships can do very little against it due to its sheer size. After it's brought down from the inside, the battle seems to be over. Then all the ships start shooting at one another in an attempt to get Helium-3.
* Iron Sky, but with Presidential campaign manager Vivian Wagner doing the glasses pull and the outburst instead of Hitler.
* Iron Sky, controlled nuclear fusion, and the ability to build gigantic

battleships with weapons powerful enough to obliterate a chunk of the Moon with a single shot. But their computer technology is still stuck in the 1940's, and their most powerful room-sized machine can't run all the systems on the above-mentioned battleship. Then an American model/astronaut shows up with a smartphone.
* Iron Sky features a Fourth Reich based on the Moon that seeks to invade and take over Earth.
* Iron Sky has the United World Confederacy which consists mainly of bickering delegates representing the United Kingdom, the United States, Russia, India, Japan, China, Pakistan, Finland, and North Korea.
* Iron Sky have prepared for their return to earth by building spaceships and stocking Helium-3.
* Iron Sky. It's just mere coincidence that Adler launches his invasion on Earth right then.
* Iron Sky, not realizing that it's the full 2-hour version. Her illusion finally breaks after seeing the film and a disastrous encounter with some skinheads spray-painting her "symbol of peace" everywhere.
* Iron Sky of Space Nazis while talking of the "sick and depraved minds" who have been building their armies...to make this movie.
* Iron Sky: The antagonists comes from a Nazi moon base that emerges to attack Earth during the 21st century.
* Iron Sky: The Coming Race two monkeys (you can guess their names) into the first humans.
* Iron Sky, the SS was a recreation of medieval knightly orders searching for alien technologies, runes were ancient magic originating from the North Pole, and at the end of the world, Hitler will return with Nazi UFOs to free humankind from demon influence. Even many surviving SS occultists called Serrano and other Esoteric Hitlerists crazy. It didn't help that Serrano thought Hitler was a Buddhist Bodhisattva, a "living saint" come to redeem humanity from the "spiritual corruption" of the Jews.
* Iron Sky wanted to insult the Finns, it would have brought up how Finland was briefly a member of the Axis during World War II, due to having a mutual enemy in the Soviet Union.)
* Iron Sky: Washington and Renate survive without any protective gear (and in Renate's case, very little clothing) even when Washington accidentally opens the airlock for a minute.
* Iron Sky, when the Nazis evacuated their Antarctic base and fled to the moon with the aid of antigrav vehicles.
* Iron Sky, which manages to date it to the brief moment in the late '00s and early '10s when Palin was a major political figure. By the time the film was released in 2012, she was already at the tail end of her fame and was only taken seriously by her supporters; the entire joke was about how ridiculous the idea of Palin becoming President would be. Nowadays, she's barely a blip on the cultural and political radar, rendering the joke quite dated.
* Iron Sky with titles like Nachrichtenübermittlungs-Oberführer (roughly means "message flow brigadier").
* "Iron Star" is all about Curth and Dorden's fight to save Gaunt — told almost entirely from Gaunt's point of view, meaning he has only minimal awareness of reality in the midst of a dream.
* Iron Storm FPS that extends WWI-era fighting and technology many years after the real world's WWI had ended, features mustard gas grenades.
* Iron Storm game is a "rival fight" against a special forces officer who has some interesting tricks; he is equipped with multiple weapons (assault rifle, sniper rifle, machine pistol, and grenades), never stops running in circles around you, and can take several dozen bullet hits before dying. However, his head is completely unprotected and all it takes is a few bullets to the face to drop him. Pretty poor compared to the game's earlier 3 bosses, who are all equipped with full body metal armor and full-auto mini-rocket launchers.
* Iron Storm never ended and has been raging on for 50 years, well into the 1960s.
* Iron Storm never ended. You'll see televisions and helicopters, while fighting in

trenches and mud. Also, the weaponry is fictional but credible for alternate technology from the 1950-1960s.
* Iron Sunrise are very obviously scary and dogmatic. In the book, they are mainly seen as conquistadores, but they also have elements of Nazi aliens (they clearly believe themselves to be superior to regular humans and have no moral barriers to killing, mind-controlling or in other ways abusing them), communist aliens (the mysterious ReMastering process clearly implies a partial loss of personal identity) and even religious fundamentalists (their main goal and motivation is to build their own godlike AI).
* Ironsworn is described as having a "perilous" setting, as the Ironlanders contend with perpetual winter and defend against the horrific monsters of the Ironland. Magic is rare but dangerous.
* Ironsworn: Starforged, prosthetic limbs are common technology in the Forge. One of the example looks for player characters "has a prosthetic leg also adorned with art." Beyond flavor, the Augmented asset applies game mechanics to more advanced prosthetics, making the augment both a benefit and a potential complication when the prosthetic breaks.
* Iron Tank was the sequel to an arcade game called TNK III, that featured Ralf.
* Iron Touch. After Hol Horse catches Sara stealing from him, she starts rattling off excuses and begs him not to shoot her, including a bit where she invokes this trope.
* Iron Touch are a group of Stand users that only become aggressive when they see another person's Stand. A select few of them also stole the Requiem arrow from Giorno, kickstarting the plot.
* Iron Touch secretes this from its feet. It's even strong enough to damage Out of Touch's cannons, something that no other Stand is shown to be capable of.

* Iron Will: A few kids lead Will to a shortcut across a railroad bridge in order to finish a race. A train approaches from behind and one of the dogs was stuck.
* Iron Will at the race's conclusion. Instead of clapping, the audience whistles Will's father's tune to encourage him to the finish. The whistle is initiated by Will's friend Ned Dodd.
* Iron Will, a young musher sets out on a quest to save his family farm by winning a sled dog race through the Minnesota wilderness during World War I.
* Iron Will's Foalcon Necrophilia Sex Rampage involves its eponymous protagonist, Iron Will, murdering and then raping the dead bodies of young foals. He also dresses up in his mother's clothes and pleasures himself. This fic features a gratuitous ammount of torture and gorn. For obvious reasons, NSFW.
* Iron Will, the minotaur from the episode "Putting Your Hoof Down", is built like this.

* Iron Wok Jan a shark out, and butcher it in front of the audience. Of course after Jan and the rival from China jump into the shark tank to secure their

ingredient, one of the other contestants realizes that it would be easier to just smash the glass walls of the shark tank to drain all the water out of it.
* Iron Wok Jan attempting to prove he's at the top of the Chinese cuisine game.
* Iron Wok Jan; at the end of the second major tournament arc, the last judge is unable to enter a score due to an ostrich attack sending everyone running. One of the chefs punches in the numbers he thinks Jan deserves, and they call it a day.
* Iron Wok Jan. He also would beat the ever-loving hell out of him with his cane, to the point where Jan's back is covered with scars (which at one point clues his rival in to the nature of his upbringing). It's also heavily implied than Jan never went to school, just lived with his grandfather learning how to cook.
* Iron Woobie: A character the audience sympathizes with takes things in stride.
* Iron Woobie; as long as the good guys still stand, despite their many misfortunes, it's still cool and amazing.)
* Iron Woobie Pearl is nine in her first appearance but is reputedly more powerful in terms of spiritual power than Maya — according to Maya herself, too!

* Ironwood Fantasia Faust is an iron golem. After serving her creator's original purpose of ridding his land of faeries, he found other uses for her, including as a lover. She is enchanted with illusions so complete that a person can be ravaged by Fantasia without ever realizing that she isn't made entirely of soft, warm, forgiving flesh, and subtle but effective neuromancies to entice anything with a steady pulse to desire her.
* Ironwood has always used council law when justifying his actions to Jacques Schnee, asserting that his decisions were legal. Councilman Sleet counters that while there are
* Ironwood is possessed by a demon that can be summoned at will (taking her place), but can't be dismissed by anything else than an orgasm. This is part of a family curse, running on male members, until Pandora happens to be the last of her line. Her male ancestors seemed not to care of the curse, anyway.
* Ironwood opens with Dave Dragavon hanging upside down; caught in a snare with a boulder tied around his neck. He has been hanging there for three days by the time Pandora locates him.
* Ironwood's early complaint about Ozpin hiding something becomes especially hypocritical when it's revealed that he hid Penny's true nature as an android up until her forced
* Ironwood's entire plan in Volume 8 was to find a way to stop Salem by depriving her of an item she needs and lifting Atlas up into space, at the cost of the city that lives below it. Three quarters of the way into the Volume, however, not only is Salem defeated (temporarily) but also the problem with said city has been taken care of, all without Ironwood needing to lift a
* Ironwood, started out as a very bulky non-gendered iron golem designed to kill fae. Then her creator figured that the golem would be more effective if he made it really attractive and disguised the fact that it was made of iron. Then, once the

* irony, and the guy who fell replies, "No, it was ironic when this happened 11 days ago."
* Irony as She Is Cast: An actor plays a character who does not share the same skills as them.
* Irony, just about any atheist activist/blogger/YouTuber gets this: Richard Dawkins, PZ Myers, and The Amazing Atheist are just among them. It's enough that an atheist movement figurehead with fanatical followers that endlessly parrot their criticism of religion and creationism is not just a stereotype, nor the fabrication of Christian fundamentalists, but a given. Deconvertees will proudly cite influence from atheist movement leaders, just like how certain born-again Christians do the same for priests and televangelists. God help you (no humor intended) if you speak about religion favorably, admit to being religious or (worst of all) mention the positive things religious people have done for society around them.
* irony, once Pele's lover was resurrected by Pele's sister, he actually did chose to be with the sister rather than Pele and the two became lovers for real.
* irony. Scientists later figured out that the leak was slow enough that they could've carried enough oxygen on-board the capsule to flood it with air and keep it pressurized throughout re-entry if a valve like that one were stuck.

* Irréversible, as the movement is simply one of many she makes in reaction to her pain and horror, but a behind-the-scenes commentary confirmed that the image was meant to reference a desperate plea for help which the viewer would not be able to give.
* Irréversible repeat over and over in the infamous Fire Extinguisher scene, consisting of one recurring note, bent higher than lower, in a cyclical wave.
* Irréversible: The opening begins in and around a gay sex club called, classily, "Le Rectum". Basically all the guests are sexual deviants; one, known as Le Tenia, is a sadistic bisexual pimp who previously committed a brutal rape of the main character's wife, and another one tries to rape the main character himself after he mistakes him for Le Tenia.
* Irreconcilable Differences, Albert meets Lucy while he's hitchhiking across the country. She drives through a puddle and splatters him with mud.
* Irreconcilable Differences, Albert removes his glasses while trying to convince Casey not to become emancipated.
* Irreconcilable Differences, even her mother admitted it was for the better.
* Irreconcilable Differences eventually leaves him for the limo driver.
* Irreconcilable Differences is a barely-fictionalized account of her and Albert's relationship and divorce.
* Irreconcilable Differences is all about this. Drew Barrymore plays a child who actually says, "I want to divorce my parents."
* Irreconcilable Differences. Lucy co-wrote the script and was so important to Albert's writing process that he could barely even start it without her, but Albert becomes a big name in Hollywood while Lucy remains unknown.
* Irreconcilable Differences, Lucy has no idea where her daughter Casey is most of the time. She is surprised to hear that Casey spends most of her time at the housekeeper Maria's house.
* Irreconcilable Differences, Lucy is driving her fiance Bink's beloved sports car across the country because she's the only person he trusts with it. Naturally, it gets stolen while she's dancing with Albert.
* Irredeemable Ant-Man in size, too (with the possible limitation of this only happening in response to a threat posed by someone else turning giant with Pym Particles).
* Irredeemable Ant-Man - The last issue's cover shows the titular character fighting many forgotten heroes and screaming that he will never share their fate.
* Irredeemable from a white suit with a red cape to a red suit with no cape.
* Irredeemable heroic, that anything less would result in a backslide into evil.
* Irredeemable his status as a black superhero with electricity based powers), and then there are the times when they don't (like accusing teammate Bette Noir of being with her husband Gilgamos because he wasn't black).
* Irredeemable. However, he had the love and adoration of (bare minimum) 98% of mankind, it's just that the tiny amount of people who criticized and didn't appreciate him over the years slowly drove him nuts out of sheer pettiness.
* Irredeemable is about a Superman-like figure named the Plutonian who one day snapped and begins a rampage to destroy humanity. A group composed of the Plutonian's fellow superheroes must find a way to stop him and understand why he

became the world's bloodiest mass murderer. The comic deconstructs the nature of superheroism by exploring the assumption that a superhuman must do the right thing automatically without being emotionally prepared for the role. It also shows how horrifying and destructive a superhuman destruction would be unleashed.
* Irredeemable lampshades this when the invulnerable Max Damage punches a guard who was shooting him in the face, shouting "That's for wasting bullets!"
* Irredeemable: Qubit does this on his first meeting with the Plutonian, but apologizes and explains that he gets a "burning feeling" from human contact.
* Irredeemable, the alien Vespan are able to harm the otherwise indestructible Plutonian. How? The Vespan had reverse-engineered teleportation technology from science hero Qubit and weaponized the end product into tight-beam teleport guns that would displace strips of Plutonian's flesh.
* Irredeemable, the character Kwaidan has the ability to tell ghost stories...and then the ghosts from those stories appear and fight her enemies. It turns out this ability is quite a bit more powerful than she'd ever let herself realize.
* Irredeemable The comic doesn't gloss over the details one bit, and it's just as horrific and terrifying an act as you would expect.
* Irredeemable: The Plutonian has a very subtle version of this. It's revealed in flashbacks that he has a strong desire for love and adoration. Since his ambitions were very altruistic, and he used his superpowers to make them come true by helping people, nobody seemed to mind (or just assumed he was doing it out of the goodness of his heart and not a need for affection). But then he eventually realized you can't please everyone and gave up on being a hero, and instead ruined a world that he could never get to love him.
* Irredeemable: The Plutonian was going for this, except that his girlfriend became so upset that he had lied to her all this time that she immediately broke up with him (and revealed his secret to their coworkers). One of the main differences between him and Superman - Superman isn't the kind of Psychopathic Manchild who would naturally assume that Lois Lane would be thrilled about being lied to all those years. Empathy and maturity would have gone a long way in that delicate situation. Then again, Plutonian pursued his girlfriend by actually entering the radio station because of her; in Superman's case, Lois happened to work at The Daily Planet before any romance sprang, making Plutonian's case all the creepier.
* Irredeemable: This is the Plutonian's motivation for being a superhero after spending years in several foster homes with people who were afraid of him. Despite being a respected champion, he's so obsessed with the negative comments and constant demands people give him that it drives him over the edge.
* Irredeemable to great effect as a weapon. But they don't know how it works as well as its creator Qubit. Qubit eventually uses his superior understanding of the technology to take it away from the Vespa.
* Irredeemable: twins Scylla and Charybdis initially only had powers when they were in close proximity to each other but it was later revealed to be untrue. Charybdis was the one with powers and Scylla was only ever borrowing from him.
* Irredeemable, uses his psychic powers to make people imagine themselves naked, and then takes "mental snapshots" when they do.

* Irregular Webcomic! apparently the timeline is too broken to go back pre-1933 (specifically the date of the Reichstag Fire). Complete with a link to this very article.
* Irregular Webcomic! appears both as himself in the "Me" theme, and as the Dungeon Master in the Fantasy and Space themes. Also, in those later two themes, the characters are based directly on characters in his real life role-playing games. They're the same group, which is why Alvissa and Kyros are nearly identical in personality to Paris and Serron.

* Irregular Webcomic! is that just about anybody can set up shop in it.
* Irregular Webcomic!. It started out somewhat relevant to the events and rapidly went to hell.
* Irregular Webcomic! killed off the entire cast, background characters were visible in the crowd scene on the Infinite Featureless Plain.
* Irregular Webcomic! lampshades this in one of its podcasts: when Admiral Ackbar calls Endor a forest moon, C-3PO corrects him heavily, saying that it has a small ocean, two deserts, and a mountain range with an extensive cave system. Thankfully, by then, he was turned off.
* Irregular Webcomic!. Loren replies, "Do you realise that question or variants thereof has been asked so many times that there are no original or funny answers left?"
* Irregular Webcomic! "Mythbusters" arc strips has them testing various horrible hangover cures. By the end Adam feels better, but Jamie points out that this is consistant with the amount of time that has passed, regardless of the cures.

* Irregular Webcomic! Some of the crew get mugged and their organs stolen. So what do they do? Take the organs from their future selves who failed at going back in time and preventing their organs from being removed, and then later find their original organs and get those implanted inside themselves so that when their future selves get their organs removed, they'll have a spare set.
* Irregular Webcomic! stand-in Montana Jones and Nazi lackey Erwin. Although she usually comes through for the heroes, she has handed over incredibly powerful artifacts to all three sides, or at least tried, in the past. In the words of Monty himself, "She's a Russian triple agent working for the Nazis. You expect her to be consistent?"
* Irregular Webcomic: take a sip every time there's a pun. Give up as soon as you're no longer able to read the strips. This will happen within about thirty strips.
* Irregular Webcomic! that he orders for two at all-you-can-eat restaurants. Regrettably, we never actually see it take place on screen.
* Irregular Webcomic! the local Army Air Field commander that what crashed in the nearby desert is just a weather balloon. (It isn't.)
* Irregular Webcomic! theme in particular prominently uses photos of various locations in Germany and Italy when the characters are in Germany and Italy, but the first time the story takes them to Paris was before Morgan-Mar had ever visited Paris, resulting in a lot of backgrounds actually being pictures of his trip to Rome as a stand-in for Paris.

* Irresistible Flame. Not as useful as the previous edition's Searing Spell, but still fun.
* Irresistible" involves a fetishist who kidnaps women and dismembers them, keeping their body parts in his freezer. Nick Chinlund's performance sells him as inoffensive and exceedingly polite, but with an air of something "off." He uses his "normal" aesthetic to get women to trust him.
* Irresistible", Scully finally breaks down and cries in Mulder's arms after being rescued from a necrophiliac serial killer. It's actually an important moment of character development since beforehand she made a point of not showing weakness in front of him.
* irresistible to young girls's memories in his head and said soul never lets him forget it.
* Irresponsible Captain Tylor: Admiral Donan after being "outwitted" by the Soyokaze early in the show attempts to track Tylor down for revenge. He leads his entire fleet to orbit around a star then fires on the Soyokaze. The star's gravity well changes the course of the shots, hitting the star and causing it to flare up and destroy his own fleet. His ship crippled, Donan asks Dom if he managed to take out the Soyokaze as well and Dom confirms his success.
* Irresponsible Captain Tylor and a ghost starts haunting the ship in an attempt to kill the captain and first officer, but gives up in disgust over their constant bickering.
* Irresponsible Captain Tylor and go full speed ahead, proving that the Soyokaze is indeed just as lucky as its captain.
* Irresponsible Captain Tylor. Android spy Harumi hasn't been programmed for emotions like fear, guilt and eventually love, but finds herself experiencing them in the face of Tylor's bumbling good nature.
* Irresponsible Captain Tylor, as a reward for doing something heroic, Tylor is given a porn tape by the marines on the spaceship, with a dire death threat should he not return it. He starts to turn it on in a fairly disinterested way, and the

episode ends up involving his frantic attempts to eject the tape when it becomes stuck in the player, all the while being constantly interrupted by all female members of the crew to deal with their own feminine problems. Things do not turn out well for him, but nothing ever does anyway.
* Irresponsible Captain Tylor considers the distinction to be entirely irrelevant.
* Irresponsible Captain Tylor: Emi and Yumi get caught in a gravity well on their maiden flight, so Kojiro talks them through this manoeuvre, only to find their course intersects with an asteroid field on the other side of the planet.
* Irresponsible Captain Tylor episode confirms that Tylor is at least aware of the image he projects. Yuriko and Azalyn are in his subconscious and are barraged with multiple conflicting thoughts, however, so debate can still rage on whether or not he intentionally cultivates it.
* Irresponsible Captain Tylor episode "The Day the Soyokaze Vanished", it is revealed that there are rumors that the Soyokaze was demoted and sent to this exact same sector of space once ten years before. During that time, a number of the crew committed suicide by flushing themselves into space, due to a combination of shame and boredom, and the captain (a former friend of Admiral Fuji, who arranged for the Soyokaze to be demoted so that he could be promoted) committed suicide. This is proven true and the ghost of the captain returns to the Soyokaze, trying first to kill Lieutenant Yamamoto (mistaking him for the captain), then Tylor. Just as he is about to kill them, Yamamoto and Tylor start arguing, revealing just how irresponsible and lackadaisical Tylor is about his commission, disgusting the ghost so much that he breaks off his murderous efforts and ends the haunting, angrily declaring them to be too pathetic to bother with.
* Irresponsible Captain Tylor goofball with a chin barely half his size, is the hero of the series.
* Irresponsible Captain Tylor Harumi and the young empress Azalyn. Nothing happens, however.
* Irresponsible Captain Tylor has a variation on this: Tylor is comically invincible despite the fact that he has no apparent skills that suggest he should be. As a result, his crew is never less incredulous about how they keep surviving encounters that almost certainly should have resulted in all of them being killed.
* Irresponsible Captain Tylor has one where the show's title is at the bottom of the screen and portraits of the crew are put up with startling rapidity. The process is reversed when the break is over.
* Irresponsible Captain Tylor in one episode, after which he comments, "Either someone's talking about me, or I'm coming down with a cold."
* Irresponsible Captain Tylor is a subversion of this insofar as even his closest friends, subordinates and enemies cannot decide if he is an ungodly talented commander or a lazy bum with extraordinary luck. Sometimes he even manages to pull off the impression that he is both at the same time....
* Irresponsible Captain Tylor, is highly gynophobic, warming up only reluctantly to the twins Emi and Yumi Hanner.
* Irresponsible Captain Tylor is probably meant as proof of a more "racially harmonious" future.
* Irresponsible Captain Tylor. It comes to the point where his second in command begins to anticipate the 'I didn't' reply. He becomes smart enough that he decides to imitate Tylor's style when mounting his rescue operation. And yes, it also works when he does it.
* Irresponsible Captain Tylor, near the end of the series, Tylor is briefly held captive by enemy forces and kept around as a toy by a basically well meaning princess who is surrounded by political enemies. He's only kept alive under the condition that he basically be drugged out of his skull. Even in this condition, while they constantly and knowingly recommend terrible courses of action, he plays the clown and points out the absurdity of the situation and gives her the best advice of her life. Unfortunately, at this point in time she doesn't really take him seriously yet.
* Irresponsible Captain Tylor of Yumi to distract a couple of terrorists holding them hostage so she can attack them.

* Irresponsible Captain Tylor onboard the worst ship they have in the fleet, and giving him assignments in every intent that he will fail and either be killed in the process or face any justified reason to discharge him from service. He ends up being so unintentionally successful, that he ends up bringing peace throughout the two warring factions, much to the annoyance of his superiors.
* Irresponsible Captain Tylor OVA episode "White Christmas" has Tylor trying to make a Christmas Eve date with Yuriko, only to get sidetracked by a kid whose mother is stuck working late.
* Irresponsible Captain Tylor regarding him always being sick on Fridays.
* Irresponsible Captain Tylor remain the sanest characters at the end of the series... but loosen up greatly between the beginning and the end, largely due to Tylor's cheerful disregard for rules.
* Irresponsible Captain Tylor. Sheer luck is the only thing that ensures he regains his rank half the time.
* Irresponsible Captain Tylor. Shortly before this they actually do storm the Raaglon mothership, with not-immediately-obvious results.
* Irresponsible Captain Tylor some overhead pipes spray fluid over them and the crew start sneezing, convincing the guards that they're infected for real. The guards promptly desert their commanding officer, who then decides he doesn't want to take the chance either.
* Irresponsible Captain Tylor starts with Tylor joining the intergalactic army after seeing an ad consisting entirely of a sultry (if frighteningly artificial) woman expressing her sexual desire for soldiers, followed by the eerie repetition of "I'm waiting for you!".
* Irresponsible Captain Tylor that always plays when the crew starts doing something awesome is suddenly interrupted by a squad of armed guards ordering them back into detention.
* Irresponsible Captain Tylor, that causes Tylor himself to comment that it's "more like a planet than a ship".
* Irresponsible Captain Tylor. "The Day the Soyokaze Vanished". The ship is haunted by the ghost of the previous captain, who killed himself out of grief when several members of his crew committed suicide by jumping out the airlock; he tries to make Captain Tylor follow suit.
* Irresponsible Captain Tylor, the Syokaze is sent to the front several times in an attempt to kill Captain Tylor. It doesn't work.
* Irresponsible Captain Tylor though, as almost nothing relevant to the war with the Raalgon occurs until they're on their way back.
* Irresponsible Captain Tylor through his original simple, happy-go-lucky ways and that most, if not all, of his antics in the series are part of a plan to help the others on the Soyokaze achieve enlightenment too.
* Irresponsible Captain Tylor, ultimately decides to leave alone and spare their lives.
* Irresponsible Captain Tylor. When Azalyn proves that she can't be manipulated so easily, he plots a strategically-timed assassination for her as well.
* Irresponsible Captain Tylor when it turns out he's surprisingly good at being a starship captain, despite his own wishes.
* Irresponsible Captain Tylor while he's her captive and 'pet', in a sign that she's fallen for him.
* irreverent knight with a bad reputation as "the Kingslayer" and Brienne an ugly and stubbornly honourable woman mockingly nicknamed "the Beauty".
* Irrevocable Message: Someone ends up sending a rude message and now regrets sending it.
* Irrevocable Message. The "Lost Episode" "Letter to the Boss." Ralph thinks he's been fired after being told to turn in his uniform, so he dictates to Norton a hilariously hostile letter where he calls his boss JJ Marshall a "dirty bum" and a "miserable lowlife" and that he "ought to turn in" his "membership card to the human race." Ralph tells Norton to sign it "Respectfully yours, et cetera et cetera." Later, Ralph finds out from a higher-up at the bus company that he's been promoted to traffic manager. Ralph is thrilled but remembers the letter so he and

Norton have to run off and find it before Ralph's boss sees it. Oh, and Norton ACTUALLY SIGNED the letter "Et cetera, et cetera."
* Irrevocable Message. The result was death and tragedy, not played for laughs.
* Irrevocable Order, the Medes and Persians had a law that if the king's ring was used to seal a proclamation then it could not be undone, not even if the king changed his mind. This plays a role in the stories of Esther and Daniel.
* irrevocably tarnished) were taking over the road. And in another irony, the Explorer since 2011 has been a crossover utility vehicle — the very sort of vehicle that killed the style of SUVs that the Explorer had popularized, taking their niche in the American market.
* Irritability, Exoth keeps a stock of modular chimaera parts in one of his labs that can just be snapped together.
* Irritability not only teaches a course on Survival of the Fittest but strives to make it as dangerous and difficult as possible to weed out the weak students.
* irritate Ned Flanders, who has been committed to an insane asylum for repressing his anger. During his explanation, Homer blows an increasingly large bubble. As the psychiatrist asks, "Homer, do you think you can be that annoying?" the bubble pops all over the doctor's face.
* Irritating example: The background fluff claims that lots of people prefer carrying handy little gems instead of weighty gold coins. For the player, the utility is reversed: Gold is weightless and its value is precise, while gems' values are unknown and they clutter up your limited inventory space.
* Irritatingly for some, this seems to have been averted with the advent of car windows that close electronically, to the degree that some people can't remember the old crank-operated windows at all. Time was, only the front two windows had electric operation, and the back two were purely mechanical. (In some cars, the driver could control all four windows from his seat
* Irritating Stick. The title actually describes the game fairly well (and is a fairly literal translation of the game's Japanese name), but it's very easy to ridicule.
* Irritation Is the Sincerest Form of Flattery: A character starts to imitate someone they admire.
* Irritation Nightmare: Someone has a nightmare about something which annoys them.
* IRS. And if you are lucky enough to get to where you want to be, your trials do not end there: you will be made to wait AT LEAST an hour before you speak to anyone.
* IRS and the Secret Service, both agencies that deal exclusively with money crimes (the former is Tax related, the latter was originally Counterfeiting). In fact, the Secret Service was tasked with Protecting the President of the United States (just about the only thing they do in fiction) because they were so damn good at stopping Counterfeiters.
* Iru, a giant, formless purple monster is summoned in the hallway that eats Nakamura.
* Iru: As the game goes on, students and faculty get picked off by the mysterious force in the school.
* Iruel pretty much took over Nerv's computer system and set the base to self-destruct before Ritsuko stops it with the single, free, uninfected MAGI system.
* Iru, it'll knock you to the floor, and then drag you towards it. Then you're shown your dead body missing its lower half.
* Iruka invokes this trope numerous times throughout the series, constantly praising and encouraging Naruto when everyone else ignored or mistreated him. During Naruto's battle with Pain, Iruka can be seen smiling with immense pride at everything Naruto has accomplished.
* Iruka is implied to have been like this, having lost both his parents to the Nine-Tailed Fox. Unlike Naruto, he did not have to deal with being hated, but he acted the way he did to ease his loneliness. He reaches out to Naruto when he realizes they have this in common and becomes Naruto's first father figure.
* Iruka, Naruto's teacher at the Academy, doesn't really have much to do with the series' action. But if it wasn't for his faith that Naruto was a good person and

not the Kyuubi reborn, Naruto might well have turned out as
* : Iruka realizes that Naruto is being purposefully failed and shows the Hokage who has a dozen men look over the last ten years of exams. They find that at least a couple dozen students have been deliberately failed and all of them (barring Naruto and those who failed the previous year) are listed as Missing, Dead, or Presumed Dead.
* Iruka Umino, being actually responsible for most of the pre-ninja training of the kids, bounces between
* Iru: There are several in the school. They both look like two purple faces being pulled apart, with a sideways mouth full of sharp teeth between them.
* Irvine is the only character who hasn't junctioned to a GF until recently
* Irvine, serving as the group's emotional center from the last stages of Disc 2 onward.
* Irvine uses rifles, which becomes a plot point. He's supposed to be a military sniper, but he really doesn't have the heart to kill in cold blood.
* Irvine Welsh, Alexander brings Alison to visit his family at a barbecue shortly after she starts working for him. His sister and mother confront him over his separation from his wife and children.
* Irvine, who tries hard to look like a cool, detached cowboy-sniper, will typically tend to strike cool poses, touch his hat and take aim at things with an imaginary pistol. He also sways his hands around, similar to Jack Sparrow.
* Irving Berlin's "Any Bonds Today?" to promote U.S. War Bonds. Many fans and historians consider this short the point where Bugs overtook Porky as the face of the Warner Bros. Cartoons.
* Irving Berlin's "Blue Skies" was almost certainly not written especially for
* Irving Berlin's "Oh How I Hate To Get Up In the Morning." The song is the lament of a soldier who wants to murder the bugler for waking him up with Reveille every morning.
* Irving Berlin: Wrote many songs including "God Bless America," "White Christmas," and "Alexander's Ragtime Band."
* Irving Caesar, veteran Broadway songwriter and comedy writer, never wrote for the stage again after his self-produced "revusical"
* Irving Todd holds clear feelings for Maya, even outright admitting so to his drinking buddy Marak. While she is slightly aware of it, she has shown no signs of attraction towards him in return. Given that he is
* Irving wants to go swimming, but Cathy doesn't like wearing a bathing suit in public:
* Irvin's wife Lexi spends her money shopping and partying. After she humiliated him, he decides to make her tattooist write "Gold Digger" on her back.
* "I.R. Wild Baboon" has Weasel end up serving several life sentences for letting Baboon go down a waterfall in his trailer.
* Irwin Allen "Irwin Allen movies" even though he was just credited as producer and the directorial credits went to Ronald Neame and John Guillermin, respectively. However, for both films, Allen himself directed the action scenes but elected to forego a co-director credit.
* Irwin Allen, that he might want to reuse, was filmed in color so he'd still be able to use it when they switched over to doing the whole series in color.
* Irwin appears to wet himself a bit. When Mandy blasts him with a fire hose, she quips, "Looks like you wet yourself again," and Irwin is shocked that someone noticed.
* Irwin Maurice "Fletch" Fletcher, from Gregory McDonald's series of
* Irwin R. Schyster. WWE has lately acknowledged him as Dallas's father, though not Wyatt's.
* IS-7 heavy tank. Reaching 68 tons, this tank was the heaviest in her line and heaviest of post-war tanks actually considered for deployment. She was armed with long-barreled 130-mm cannon (not counting two REALLY heavy 14.5-mm machineguns and six light 7.62-mm machineguns, all on remote controlled mounts), and protected with six-inch armor in " pike nose" configuration, which basically made her frontal armor impenetrable to any existing AT weaponry... Unless it didn't face you head-

on. Despite being as heavy as "Tiger-II", IS-7 was much more mobile, capable of reaching 60 km/h on good road and with much less gound pressure. Eventually, though, this impressive tank was considered too heavy for frontal deployment, too costly for mass production, and much cheaper T-10 heavy tank was produced in limited numbers instead.
* is a 10,000-word book (a collection of poems, short stories and play scripts) with the same constraint.
* is a 50,000+ word long fic that takes place within one ridiculously long day. Minerva lampshades this in the second chapter when she recalls something she did in the first and remarks that it felt like a long time ago.
* Isaac also does nothing when Ash is being stalked by the Society of Leopold, and blows it off if you ask about it, saying he has faith in his Childe. Ash is considering committing suicide by attacking the hunters and has no way to escape on his own...
* Isaac also might not qualify in that he is specifically an Engineer trained to work in hostile, potentially fatal situations alone. He's had training on how to survive most things, and judging from the clearance to access some military weapons as well, probably general firearm training as well.
* Isaac and Miria also speak Japanese... in prohibition-era America. No explanation is ever given, but it's
* Isaac and Miria anime, implying that they apparently move to/visit Japan at some point... though this doesn't explain how they learned to speak Japanese in the first place.
* Isaac and Miria have a lot of this. One instance is kind of like the Fat Tony example, in which he argues that just as you can get vegetables from eating steak (obviously, this is wrong itself), if you steal someone's wallet, whatever is inside then belongs to you. He also asserts that a mine in which gold has never been discovered is a great place to look for gold for precisely that reason.
* Isaac appears to have done everything he could for Ash, before and after the event that made the Embrace seem necessary in his judgement. Speaking with Ash for further explanation reveals nothing untoward or sinister about Isaac's behavior or motive. Ash is just a whiny ingrate.
* Isaac Arthur (like futuristic CGI cities and spaceships) and other artists (who sometimes make animations specifically for his videos).
* Isaac Asimov about a strange couple that melt in the rain because they're made of sugar.
* Isaac Asimov about when he was in Marsport without his wife, but struggled with an urgent case preventing him from spending time with an old girlfriend.
* Isaac Asimov, a character brings up the question of why robots always seem to be built as humanoids; part of the given answer was that when designing a general-purpose machine, it was simplest to have it use tools and control mechanisms made for human use.
* Isaac Asimov. After explaining to the protagonists that they've just abolished privacy (since the viewer can be set to see any place at any time from a century ago to a split-second ago), the agents rescind the arrest and leave them all to live with the consequences.
* Isaac Asimov after their actions prevented him from earning his final victory, but chooses to let them go, both because they no longer matter to him and, in the end, the defeat is relatively minor.
* Isaac Asimov against the human government of Santanni. He would rather fight against the alien Diaboli.
* Isaac Asimov": A group of scientists has found a goose who lays golden eggs; after testing every theory they could think of to figure out why, they decided to write about the exploit in hopes of getting advice from outside sources. Due to the need for secrecy, they published it as a fictional short story, safe in the knowledge that no one would believe it...
* Isaac Asimov, Anacreon points out that the Empire isn't around to enforce said independence, implying that they are free to conquer Terminus with their more powerful military. Mayor Hardin is the only one who tries to find a solution to the

Kingdom of Anacreon trying to annex the Foundation.
* Isaac Asimov, and Byerley points out that he's never heard her pun before. (In this 1950s story, it ended due to the economic proliferation of robots, instead of a clear military victory.)
* Isaac Asimov, and dealt with events 20 years after the original story.
* Isaac Asimov and demands not only that more "Reginald de Meister" stories be written, but that the quality be improved.
* Isaac Asimov, and has pieced together clues about the planet from fragments of myth and legend, includes brontosauruses and orcs on a reconstructed list of its dangerous wildlife.
* Isaac Asimov and he's concerned that Jones might be so anxious to defend his partner's good name that he'll accidentally give the game away.
* Isaac Asimov and it was discovered that it wouldn't be possible to live on a planet with much radiation, Asimov said that if he could go back and fix the stories he would but it was so much a part of the setting he couldn't.)
* Isaac Asimov, and now they're trying to work out how to handle the communication lag (six hours one way). The scientist's mother suggests they do the same thing women do on the telephone; they just keep talking and listening at the same time.
* Isaac Asimov: Andrew was purchased from US Robots to act as a valet and housekeeper for the Martin family household, including childcare. Even as the children grew up and left the home, he continued his tasks until grandchildren began to appear, at which point he asked to purchase his freedom.
* Isaac Asimov and science errors in the screenplay. Asimov wrote quickly, while the film's production was plagued with delays. As a result, the novelization was released six months before the movie, leading many fans to conclude that Asimov's novel was the original version and the (much weaker) film was an adaptation.
* Isaac Asimov and they're fine. However, Edwards suspects that the President was killed in such an ostentatious manner because if a corpse was left behind, then people might realize that it hadn't been the robot.
* Isaac Asimov, an organization is able to travel through our time, while maintaining a wholly separate, normal, only-goes-forward-at-one-second-per-second time of their own. This necessitates the inventions of the words "upwhen" and "downwhen" for the time travelers to be able to talk about the past and the future as it exists in "our" time, instead of their own future and past. They refer to this as "physiotime", as it reflects the aging process, not the passage of time.
* Isaac Asimov. A pair of astronauts visit a series of planets. Each planet has a different alien species farming the same alien plant. All of the alien farmers show very little personality and the astronauts slowly realize that the plants are in charge, mind-controlling the aliens to cultivate them. Panicked, they return to earth, not realizing they are bearing spores from the mind-controlling plants.
* Isaac Asimov. Apparently, there was a race of sentient dinosaurs who first killed all the dinosaurs (the tiny mammals were spared). The trope should give a perfectly good explanation to the fact they didn't survive themselves.
* Isaac Asimov are exaggerated versions of real events and people he encountered.
* Isaac Asimov" are mostly based on Justinian and Belisarius from sixth century Rome, but also had bits of Tiberius and Sejanus from first century Rome. These characters were chosen based on his interest in history, covered in "Part 8".
* Isaac Asimov" as devices that were quickly taken off the market, making it hard-to-impossible to verify his story. Some of his internal first-person thoughts slip into the narration, which normally never happens.
* Isaac Asimov. Asimov, however, refused, explaining that everything he knew (and more than he could remember) went into the book. The only thing he admitted to being an expert on? Sounding like an expert.
* Isaac Asimov?" Asimov later turned this into a story in which William Shakespeare (brought forward in time) flunks a class in his works.
* Isaac Asimov asked a physicist friend for technical advice about such a bomb for one of his WWII era stories; the friend refused to discuss it. Asimov later learned that he had been part of the Manhattan Project.
* Isaac Asimov as Terminus doesn't use metals like plutonium in their nuclear

reactors. Without the abundant resources of Trantor, they've had to push miniaturization to levels that scientists of the first Galactic Empire had believed impossible.
* Isaac Asimov, as the last zoo on Earth is shut down. This leaves humanity as the sole animal species on Earth, with the only other life forms being the plankton used for food.
* Isaac Asimov, as they are just as devastated at hearing about the loss to art as Lardner is.
* Isaac Asimov", At one point two characters eat space rations: "thoroughly synthetic, concentrated, nourishing and, somehow, unsatisfying."
* Isaac Asimov", a type of movie where the audience gets to sense taste, touch, and scent in addition to sound and sight. The name itself is a reference to "talkies", an old nickname for movies. Jesse Weill owns the company and we see several different meetings about the behind-the-scenes creating and operation of dream story-telling.
* Isaac Asimov be adjusted. The last paragraph has them taking turns kicking each other in the backside.
* Isaac Asimov": Because most of the characters are scientists specializing in one field or another, they trade the role of "audience asking for explanations" around so that no one character is asking all of the questions.
* Isaac Asimov being brought to modern times by means of a time machine. He expresses amazement at the amount of crap people have made up about his work in the intervening 400 years; the chap who built the time machine enrolls him in a modern Shakespeare class, and he fails.
* Isaac Asimov being played by two gods, where each player creates a species, and the winner is the one whose species survives longest.
* Isaac Asimov Bliss can tell the difference between humans, other life such as animals, and even robots.
* Isaac Asimov. Bogart objects to this, as well as the potential "breasts" that might go along with them. JN-5 is just a little more delicate in build then a 'male', with a tapering waist and a voice described as liquid and musical. Since Dr Asimov was known for lampooning robot tropes, it's likely that this was a deliberate dig at other 'female' robots in fiction.
* Isaac Asimov, but are otherwise humanoid. During the "present", they have become dedicated space travellers, and won't revisit the people that they've helped.
* Isaac Asimov, but as of the start of this series, they haven't developed a hyperdrive that will shunt the ship from normal space into hyperspace. Norby, however, has an alien hyperdrive built-in. When he takes Jeff into hyperspace, it is completely blank; a gray nothingness, potential energy for all universes, lacking space and time.
* Isaac Asimov, but doing this once permanently burns out the part of the brain used, so it only lasts for five minutes.
* Isaac Asimov called "The Billiard Ball" has a field which allows anything which enters the field to immediately attain zero mass and hence move at the speed of light. The story has an interesting aversion to part of the physics problems—once the objects leave the light speed volume, they start to slow down but still have their full momentum and velocity. This makes them very deadly weapons.
* Isaac Asimov came out six months before the movie, leading many people to believe that Asimov originated the story, which he had to constantly deny. Some confused fans even complained about the movie getting things wrong because the novelization had corrected a few glaring plot holes that were still present in the film.
* Isaac Asimov can be coerced into shutting down, the method of which depends on how advanced they are.
* Isaac Asimov claims her life was ruined and her mind warped because her father raised her personally (thus socially isolating her), then refused to have sex with her when she asked.
* Isaac Asimov claims that the brain is what makes one human, even as they say no other organ matters.

* Isaac Asimov collection, a candidate for a political office is suspected of being a robot. The United States Robotics claim they did create an artificial body for a robot as an experiment, but it never had a brain. It was stated to be flesh grown upon a plastic skeleton.
* Isaac Asimov": Colonel Anthony Windham, the oldest passenger, regrets his age/infirmity, but is very willing to stir up anti-Kloros feeling amoung the remaining passengers. His idea for preventing the Kloros from taking the ship is to charge the occupied bridge and activate the ship's self-destruct before they die.
* Isaac Asimov coming to Earth and taking a colony of humans with them to a different planet is explained. The Others took the community to a planet that they named Izz, but left no signs of themselves on Earth.
* Isaac Asimov commemorating this aspect of his career. He accepted the plaque (and its implications) in good grace.
* Isaac Asimov compared to their competitor's emotionless super-thinker. She turns out to be right.
* Isaac Asimov conflict. He's informed that the guilty party confessed quickly when the evidence of the broken robot is provided.
* Isaac Asimov, contains only five of the original nine stories and none of the poems.
* Isaac Asimov crew find the bodies of the Phobos, the clothes are left, but the flesh is partially or completely dissolved away to merely bone.
* Isaac Asimov: Demetrios Polyorketes hates the Kloros because they killed his brother, Aristides, when they boarded the ship at the start of the story. The irony is that his brother panicked and ran out into the crossfire, so he could just as easily have been killed by a human defender.
* Isaac Asimov, depicting the collapse from the perspective of its replacement empire.
* Isaac Asimov described a variation on Lincoln's advice. When sufficiently provoked, he would write an angry letter, prepare it for mailing, and then tear it up (making sure to destroy the stamp in the process).
* Isaac Asimov, describes a race of aliens that lives inside O-class stars. The Sun is too cold for them.
* Isaac Asimov. Devices are keyed to work with the front door and what is effectively the garage. A unique 'probability pattern' is used to describe each Earth.
* Isaac Asimov did this while defending his Ph.D. dissertation when one of his examiners asked a question relating to one of his fictional stories (written as a parody of a peer-reviewed journal article). The story was supposed to be published under a pseudonym, but the publisher slipped up and attached his real name to the piece.
* Isaac Asimov died in Madagascar. It is extremely unlikely such a thing could be written before World War II, and impossible that it would be written afterward.
* Isaac Asimov: Dr Asimov relates an anecdote where he suggested a baby name for his friends, Mr and Mrs Mamber. He told them that if they had a daughter, named "Rebekah", then she'd inevitably get the nickname "Ree", and become known as "Ree Mamber". According to Dr Asimov, they refused to associate with him for the rest of the night.
* Isaac Asimov, Dr Asimov tended to avoid the presence of alien civilizations in works which would otherwise expect to encounter them. The following examples include stories where Dr Asimov gave a reason for the absence of aliens.
* Isaac Asimov: Due to phobias and rarity, dark is often called Dark or Darkness, and used as a curse word for ill-fortune. Other terms are also spoken with capital letters, such as Stars, Cold, and Doom, all associated with the religious fear caused by nightfall.
* Isaac Asimov: Due to their actions in stopping Ing the Ingrate and his takeover of Manhattan, Admiral Yobo is given a new medal, Officer Jones is given a promotion to Police Lieutenant, Cadet Jeff Wells is given a scholarship and commendation, his older brother Fargo is given a large sum of money to save the family business from bankruptcy, and Norby is made an Honorary Cadet.

* Isaac Asimov: During his first decade of service, Andrew runs into trouble with idiomatic language, such as "You've got a look on your face" because, as a robot, his face cannot change expression. After stumbling several times with linguistic drift, he decides that he needs to go to the library and learn about language so that he isn't confused by idioms anymore (at least, no more than another human would be when encountering an unfamiliar one).
* Isaac Asimov). Each adaptation starts with a two-page spread and each "chapter" after that was a single page, released on a monthly basis.
* Isaac Asimov, each Master controls an entire planet, wielding their ability to inflict pain as a punishment for the smallest infraction.
* Isaac Asimov, Earth is implied to be a laboratory experiment by aliens, with mental controls in place to prevent us from developing interstellar travel. Then humans evolve around the mental blocks ...
* Isaac Asimov, Easy would've taken the blame itself in order to protect Professor Ninheimer, but the robot-hater had expected it to act like a human instead of like a robot.
* Isaac Asimov editions include "More Asimov Robots!" as a tagline beneath the title.
* Isaac Asimov elements (unsurprising, as the book was written before the advent of microcomputers, let alone the Internet).
* Isaac Asimov establishes the necklace device, which tries to merge with other copies of itself (including Norby). When they first use the necklace, the past version wriggles towards Albany, who is wearing the present version, so that the two can become one object again.
* Isaac Asimov even if they are sentient), making them more expendable.
* Isaac Asimov for a pocket theft. Said Probe is a somewhat risky procedure, and no man can be subjected to it more than once. You do the math.
* Isaac Asimov forms called "siliconies" that lived on asteroids. They survive by absorbing gamma rays from radioactive ores.
* Isaac Asimov, gets its name from the fact that it uses a positronic brain as memory and processor. This brain is stored in a globe containing a non-reactive helium atmosphere, and a number of peripherals are hooked up to the globe.
* Isaac Asimov": Gladys Claffern is always prepared for a social barb to subtly insult our protagonist, an insinuation about her lack of class, or simply an opportunity to laugh at her.
* Isaac Asimov": Gregory Powell sometimes pulls at the ends of his mustache when he's nervous. In this story, he tries to do that while wearing a spacesuit.
* Isaac Asimov": "Gruff", the second letter, is a poem that uses short rhyming couplets to declare the submission is terrible, and that anything else can and should be sent instead.
* Isaac Asimov had been in the crowd, shaking hands and hugging people, and then "the robot spontaneously exploded". After that incident, the robot industry suffered from the public impression that robots could explode unexpectedly.
* Isaac Asimov, Hari Seldon is skilled in "Helicon twisting," which isn't described in detail.
* Isaac Asimov has a man withdrawing a couple million dollars from his bank account after being revived...and finding out that a new suit cost several million (or was it billion?) more.
* Isaac Asimov has George ask the Azazel to make his friend a better basketball player. The demon adjusts the reflexes to the point that the ball always flies into the basket as soon as it touches the guy's hands... problem is, George, while explaining the rules, forgot to mention that you're only supposed to hit one of the baskets. Once the coach almost strangles the poor player, he's forced to quit.
* Isaac Asimov has the Galactic Empire retake the role of Byzantium while the Foundation represents the Medieval Catholic Church).
* Isaac Asimov have invaded and established a fascist regime over every planet in the galaxy.
* Isaac Asimov". He claims to have known that it was improbable to the extreme even then.

* Isaac Asimov"), he produced some fifty stories in which they managed to cause all sorts of problems through conflicts between the laws, and their interactions with the world.
* Isaac Asimov. Her own husband is amazed at the transformation Tony provides.
* Isaac Asimov. He shows the Spacers as having highly extended lifespans (as much as four hundred years), but as a result, their culture stagnates politically, socially and technologically because it's run by very old people who are stuck in old ways of thinking. Even when scientists want to develop new things, they'd rather work alone than collaborate because they've got time and want the glory for themselves. On a personal level, they become a society full of risk-averse germophobes because they've got more life to lose, and fear death a lot more as a result.
* Isaac Asimov. He subtly arranges things so that are able to escape to an entirely different galaxy without getting into trouble himself.
* Isaac Asimov. His work can be found in nine of the ten categories of the Dewey Decimal System — all ten, if forewords count. Asimov was also a real scientist, with a PhD in chemistry from Columbia, before he became a full time writer.
* Isaac Asimov. However, he made the changes himself, and ordered the robot to keep silent about the issue.
* Isaac Asimov how its genetics are superior, it plans to breed its children together and develop a race of super-elves.
* Isaac Asimov, humans are powerful warriors, especially when they're trying to rescue their women.
* Isaac Asimov, human scientists create a device called the "electron pump", which can produce an infinite supply of energy by transferring matter from our universe to another universe (with different physical laws) and vice versa.
* Isaac Asimov: Humans send a team of highly advanced robots to negotiate with hostile aliens living on Jupiter. In order to be able to survive in the extremely high gravity, the robots have been built to be extremely strong and durable (the aliens themselves function more like deep sea fish and maintain their internal pressure the same as the outside in order to avoid being crushed). By the end of the story, the aliens surrender to humans, and after some confusion it's realised the humans never told them they were sending robots, leading them to assume that humans are a race of super-powered indestructible metallic beings.
* Isaac Asimov: "I don't have the evidence to prove that God doesn't exist". Surprising that they resorted to quote mining for something as inconsequential as that, given the number of actual scientists they could have quoted legitimately, and given that Asimov's quote on the subject in full concluded with: "but I so strongly suspect that he doesn't that I don't want to waste my time."
* Isaac Asimov, inadvertently revealing that he had given it instructions to hide crucial information.
* Isaac Asimov: In chapter 15, "The Odds That Vanished", Dr Shekt explains how the Society of Ancients has developed a variation of the Common Fever which will be incredibly virulent and as far as Outsiders are concerned, incredibly deadly.
* Isaac Asimov: In chapter six, while Norby and Fargo are racking their brains to figure out how to open the hassock, Jeff suggests they take a break by singing a few songs. Fargo calls him a genius and starts laughing, leaving Norby to explain that Fargo now thinks the numbers they'd deciphered stand for musical notes.
* Isaac Asimov includes a meal of simulated roast pork smothered in peanut sauce. The characters think it quite good.
* Isaac Asimov in its place. He ends up being wrong, as it sends him into a different universe instead, one ruled by the Master Cult.
* Isaac Asimov in order to study the Jovians (an advanced race that evolved on the planet), who wish to destroy humanity. After a series of mishaps, during which the aliens note the robots' durability, they sue for peace. The robots realize that they never told the Jovians that they were artificial lifeforms. The Jovians simply assumed that all humans are extremely tough mechanical organisms.
* Isaac Asimov": Inspector Darrity always carries a switchblade. He uses it to

clean underneath his fingernails and to have something to play with in his hands.
* Isaac Asimov in the eyes of the law until he designs a new prosthetic brain that breaks down, making him deteriorate quickly and die.
* Isaac Asimov": In this story, the Martin family is used to indicate the passing of decades. Andrew was purchased by Sir, the first-generation Martin. As he helps raise the second generation, including Little Miss, he develops unique quirks, and Sir goes to the law firm of Feingold to ensure that Andrew can collect money for his artwork. When the third generation arrives, in the form of Little Sir (Little Miss's son), Andrew asks Sir for his freedom. Little Sir, whose name is George Martin, becomes a lawyer, then senior partner, for Feingold, and it is renamed to Feingold and Martin. Andrew continues his work, even as George dies and is replaced by the younger Paul Feingold. By the end of the story, Andrew is the only Martin left alive.
* Isaac Asimov, in which the protagonist, a successful author of detective stories which he despises, wants to write a Serious Novel.
* Isaac Asimov is about a peaceful herbivore race who have realised that most quickly-developing races eventually nuke themselves back to the stone age, and have made a business of interjecting after the conflict to prevent total extinction, help rebuild, genetically engineer the survivors to be less violent - and be paid tributes. They are waiting for humanity to start World War Three to enact their usual plan, but we consistently disappoint them - every time it looks like it's about to go down we end up making peace instead, but every time we develop more devastating weapons and become more dangerous warriors. Worried about what'll happen when we take to the stars, they debate secretly triggering themselves the conflict they've been waiting for and then acting as usual - but eventually decide they cannot bring themselves to do it. They leave humanity to its own devices and leave to an uncertain future, accepting whatever fate might befall them when we discover we aren't the only ones out there.
* Isaac Asimov is amazed at the commentary and lessons taken from his stories, comparing it to creating a monsoon out of the water in a damp washcloth.
* Isaac Asimov is a worse idea in that direction (making a blind jump out of a system is less liable to cause you to reenter normal space inside something than making a blind jump to a system).
* Isaac Asimov is emphasized by telling the audience that the last exchange of territory was Formosa and East Germany some eighty years ago.
* Isaac Asimov is impossible. To which the person he's interrogating drolly points out that their status as "magicians" is not wholly unearned.
* Isaac Asimov is so important. It's not because robots are conspiring against humans, but because orders can and will get interpreted in many unpleasant ways.
* Isaac Asimov is their plan to end the current "high-culture" experiment.
* Isaac Asimov is to create robot animals. They are small and narrow-focused enough that they will not unintentionally harm humans (no need for First Law). They are made with only a single task and a recall signal (no need for Second Law). Because they are so small and made with a miniature power source, they can be replaced cheaply (no need for Third Law).
* Isaac Asimov is trying to convince his boss that Earth animals have bisexual reproduction, although neither one really understand the difference between mating and courtship, and the subjects they kidnap are too embarrassed to explain anything.
* Isaac Asimov is trying to suppress scientific research into neutrinos and past-viewing.
* Isaac Asimov, it doesn't have absolute command. Even places like Manhattan International Territory are considered part of the Solar Federation. The organization is probably intended to be similar to the different jurisdictions of Federal, State, and Municipality governments in America.
* Isaac Asimov, it is a widely known "fact" that nobody can remain in space for more than six months without going crazy, and it is hard to even remain that long, which is why ships are built as big as possible and are filled with libraries and movie theaters to keep their passengers occupied. However, the hero points out that

many humans who have colonized Mars have stayed out in space for longer, and on much more cramped an un-amusing ships, too, as they have adapted to the experience. They also think that floating in the void in a spacesuit is great fun, and spend much of their off-duty hours while travelling between planets doing so.
* Isaac Asimov (it is common to have a few artificial joints and fingers by 250), any reference to them is the strictest taboo possible.
* Isaac Asimov", it is established that when Ma'am leaves to go to an art colony, she is also leaving the marriage. However, she remains in contact with the rest of the family, especially Sir.
* Isaac Asimov, it lives with cruel step-people who viciously insult and beat him.
* Isaac Asimov liked to use this, and several of his stories have produced standard plot devices for science fiction:
* Isaac Asimov, like Hillary, might try to stop working, but it can't last. It is their destiny to create stories and entertainment for other people to enjoy.
* Isaac Asimov: Linda Muller, Norman's daughter, is more excited than curious, but this excitement feeds into curiosity and she asks plenty of questions, mostly about the implications of daddy going to vote.
* Isaac Asimov" live on television (although he admitted he saw the challenge coming and prepared for it). The preparation time was a few minutes before the show started.
* Isaac Asimov, Liwy falls into his lap, causing them to marry in six months. In the other, she catches herself and he marries Georgette instead.
* Isaac Asimov loved this trope; the "George and Azazel" stories almost always start with George dismissing his writer friend's career. (And said writer is Asimov himself.)
* Isaac Asimov making up stories about winning walking contests and dignity being upside-down dancing. "I didn't intend to bring a lion from a Roman coliseum" is not a good excuse when the Admiral had to sacrifice his dinner to tame it.
* Isaac Asimov may have originated a cheap way to terraform nearly waterless Mars; adjust cometary trajectories slightly and bombard the planet with big balls of dirty ice.
* Isaac Asimov — did, of course, explore the concept in extensive detail in his writings:
* Isaac Asimov": Milton is disappointed in the first date that he and Joe arrange, and they realize that they can't be Milton's ideal woman unless he's their ideal man. So the two of them adjust their search to figure out who would see him as their ideal man. Only one woman out of the 3,786,112,090 in the world match their criteria.
* Isaac Asimov mystery series (something which is a serious slander to a fine upstanding gentleman).
* Isaac Asimov. Nonetheless, there are a few odd examples of fairly accurate history that pops up in unexpected places.
* Isaac Asimov: Norby and Jeff get mixed up on "before" and "after" when it comes to personal history versus objective history, but both times it gets handwaved away with the other people in the conversation saying that they understood the intent and to get on with the explanation.
* Isaac Asimov novels. Daneel plays the trope straight, but his human companion Elijah Baley wants nothing to do with any of those despicable robots, at least not till fairly late.
* Isaac Asimov novels, this is used as a plot point to deduce the identity of Earth, the forgotten homeworld. The standard year and day correspond to no day or year cycle on any known world, but just might correspond to the original.
* Isaac Asimov of aliens to steal a fleet of spaceships and escape human space; the bureaucrat makes sure that there is an extensive (and legitimate) paper trail proving that he had nothing to do with it.
* Isaac Asimov often persisted in the use of tobacco in private rooms.
* Isaac Asimov: Only the 20th and 21st century robot stories are assigned conclusive dates in the Gregorian calendar. The Elijah Baley stories take place approximately 3,000 years after the founding of the city of New York, sometime in

the 47th century. The timeframes for the later novels are inconsistent from book to book, and may be anywhere between 13,000 and 52,000 C.E.
* Isaac Asimov, only wants to please her, but she knows she would be a laughingstock if anyone else knew of the relationship.
* Isaac Asimov on some of his subjects, which is always a threat when one tries to write as scientifically accurately as possible.
* Isaac Asimov, Part One ended with the Mule's forces conquering Terminus.

* Isaac Asimov. Prince Regent Wienis has been raising the king ever since.
* Isaac Asimov principle should allow him to bypass this, but in practice it is impossible to judge whether messing with somebody's head will benefit humanity as a whole or not. Thus, even though he technically possesses the power necessary to halt the collapse of the Galactic Empire, he cannot actually do so because of the restrictions on his actions. He is thus forced to pursue other options such as the Seldon Plan and Gaia.
* Isaac Asimov. Problem is, the past starts a microsecond ago, so it effectively ends any notion of privacy.
* Isaac Asimov, published in 1941, mentions that Hitler died on Madagascar.
* Isaac Asimov, represents Romanticism while John Harman, who has sunk his personal fortune into the rocketry project and scientific progress, represents Enlightenment.
* Isaac Asimov reveals how completely irrelevant he was to realizing it.
* Isaac Asimov robot story would show how a robot could stick to the letter of the law and still cause an awful lot of trouble.
* Isaac Asimov: Sanito tables are made out of force fields. Why? Because they're easy to clean. However, the initial force fields worked too well, and they had to be made to purposely glitter so people would see that their plates and cutlery actually rested on something tangible.
* Isaac Asimov's Caliban, his internal monologue notes that he deliberately doesn't soundproof his office so his subordinates can hear him blow up.
* Isaac Asimov, schools have been replaced by teaching machines that implant the contents of education tapes into young people's minds. General knowledge, including the ability to read and write, is implanted at the age of eight. The knowledge and

skills required for a specific profession are implanted at age eighteen, following a test of the individual's abilities, interests, and attitudes.
* Isaac Asimov: Schwartz assumes that Earth's radioactive crust is due to a war fought with atomic bombs.
* Isaac Asimov Series as "evidence" for the theory of humanity originating from one planet, when Earth is lost and forgotten. Not that everyone accepts this explanation for the length/number of hours, days and years.
* Isaac Asimov series hates robots but will enforce the law even if it means protecting them. His views are changed when he is partnered with a robot, R. Daneel Olivaw.
* Isaac Asimov short story "Catch That Rabbit", the heroes decide to create a fake rockslide, to test whether a robot is malfunctioning or not, but then get caught in it and have to get the robot to dig them out.
* Isaac Asimov short story "Galley Slave", Dr. Calvin bluffs a strongly anti-robot professor, who had ordered a type-editing robot to make horrendous errors. She badgers and rattles the professor, damaging their defense, but at the climax, the robot stands up and the professor screams "Damn you, you were instructed to keep your mouth shut about—" Dr. Calvin points out, later, that the professor had only to keep quiet since the robot was about to defend the professor, in accordance with the First Law.
* Isaac Asimov short story "Lenny". A small child (lost on a guided tour) plays around on an unlocked keyboard in a robot factory. This results in a robot which has no superpowers — indeed, it has roughly the intelligence of a human infant — but is a scientific gold-mine, functioning without the Three Laws and having the ability to learn rather than simply be programmed.
* Isaac Asimov short story "Marooned Off Vesta", the characters maneuvered by cutting a hole in a water tank and using the escaping water as thrusting mass.
* Isaac Asimov short story "Rain, Rain, Go Away", a family of nosy neighbors nonetheless makes friends with a new family that moved in. They noted that the new family seems to be deathly afraid of rain, but writes it off as everyone having their own special quirks. They invite the new family to a carnival, where everyone has a good time until they see storm clouds. The new family is desperate to get home, up to and including crying when they hear radio reports that the rain is going to strike soon. When they finally get home, they only make it halfway:
* Isaac Asimov short story "Robot AL-76 Goes Astray" a robot designed for mining on the moon ends up in Virginia and builds a mining rig out of scrap, powered by two D-cell batteries. Unfortunately a nearby human, freaked out by it all, tells the robot to destroy the machine and "forget it" and so the design is lost.
* Isaac Asimov short story "The Last Question", this happens to all of humanity and then to the rest of the universe.
* Isaac Asimov, since it's cheaper for them to teach a human to calculate trajectories than to build a computer that can.
* Isaac Asimov, soldiers employed "neuronic whips", which caused extreme pain to whatever part of the skin they touched.
* Isaac Asimov. Someone tries to poison Hannis Gruer, but because murder is so rare in Solaria, he gets the dosage wrong and Gruer vomits it up before it can kill him. It also creates an instant and very obvious symptom — Gruer's throat immediately burns after he takes the poison.
* Isaac Asimov, Spacers reproduce this way, most prominently Solaria. One of the characters remarks that had it been so in his case, he would have likely never been allowed to born due to his large ears.
* Isaac Asimov's penultimate robot story describes an uncharacteristically pessimistic look at his own robots by describing a new age of robotics that includes Earth-bound non-sentient robots slowly replacing the organic ecosystem to better the planet. The twist is that the robots' long term goal is to replace humanity altogether, as they have determined through logic and introspection that they are human.
* Isaac Asimov's rings, providing them with enough water to last 2000 years. The Martians snarkily offer to sell Earth some to "make up for" the minuscule amount of

Earth water they've used over the years.
* Isaac Asimov's Robot City" are said to be superior to mere electronics and instead employ a sponge of platinum-irridium alloy. However, seeing as how gold never corrodes, they ended up finding a use for it: eating utensils for the humans that visit.
* Isaac Asimov's Robot novels, the people who live on Earth refer to robots as "boy". There's also the mutual distinction and disdain between Earthers and "Spacers".
* Isaac Asimov's Robots, a conference call has three windows up to speak with all of the involved parties.
* Isaac Asimov's Robots, a newscaster for channel Galaxy 99 provides information on recent events, such as rioting in Boston and the arrival of Kelvin Amadero to Spacertown.
* Isaac Asimov's Robots. Each Sammy-type model of robot has a number emblazoned on their front for identification purposes, but normal names (like Sammy or Jane) are used in actual conversation.
* Isaac Asimov's Robots, have a clandestine meeting to talk about the role of robots compared to humans. Their behavior is like a couple of preteens flirting with each other and afraid they're going to be caught by their parents or someone else.
* Isaac Asimov's Robots, he stops short of naming the culprit to ask for the player's help. The player can then confirm their ending by checking the manual with all the solutions.
* Isaac Asimov's Robots. It's pointed out that this doesn't change the crime, and that Baley has yet to apprehend the criminal involved. So he turns to you, the player, and asks you to name the suspect and describe their motives.
* Isaac Asimov's Robots: Once Kelden Amadiro, head of Spacertown, finds out about the attempted murder of Dr Fastolfe, he contacts the New York Police Commissioner, granting a 24-hour reprieve until they can apprehend the criminal. Once the time limit ends, he will be able to convince the Spacer worlds to take drastic military action against Earth.
* Isaac Asimov's Robots. The sky is only ever shown in Spacertown because the Earthers have been living underground for so long, they're not used to the fresh air or sunshine. They find the idea abhorrent.
* Isaac Asimov's Robot stories are humans who live for several hundred years, in contrast to earthbound and Settler humans, who reject robots and life-extending technology.
* Isaac Asimov's Robots, you (and whoever else you're playing with) form a third portion of the team, technicians from Data Log Central. You research information and provide the final summary of facts.
* Isaac Asimovs Science Fiction liked to "eat" calcium and he considered what would have happened if he had taken a bite. He went back to the store and jammed two donuts together whereupon the store disappeared fairly spectacularly.
* Isaac Asimov's Science Fiction Magazine. An accident to the bookseller cuts him off from the store and his friend.
* Isaac Asimov's science-fiction. They're never treated as equivalent to humans, but the human response to them frequently echoes something from actual human history. Earth society resents them for displacing human labor (similar to the way many societies treat immigrants), while Spacer society treats them like slaves, generally ignoring them unless there's something they want a robot to do.
* Isaac Asimov's short SF story "The Feeling of Power" is based on the premise that people would completely forget how to do mathematical calculations manually - on paper paper - and end up relying entirely on machines. His "hand computer" predates the calculator. And the story was initially rejected by publishers because it was deemed ridiculous that people could forget how to do arithmetic.
* Isaac Asimov's short stories, a spy who claims to be American is caught when he unthinkingly puts an accent mark on the 'e' in "Québec".
* Isaac Asimov's short story "The Ugly Little Boy" featured a caveman child who came to our time thanks to time travel experiments done by a research organization.

* Isaac Asimov's Spacer and Settler books have Spacer society becoming lazy and decadent because everything is done by robots. In particular, the three laws mean robots cannot allow humans to ever risk any harm, so it's not just a lack of work that is the problem, but boredom from a complete lack of any risk or excitement for their entire lives. Of course, given that the Settlers still use a lot of other advanced technologies including FTL space travel, Asimov clearly didn't want to portray all technology as bad, he was just portraying one possible outcome when technology replacing human labour is taken to extremes. Also somewhat subverted in the Foundation series, set thousands of years later in the same universe, where it is discovered that at least one Spacer world is still populated. While their society doesn't seem too nice from the point of view of modern humans (or the protagonists for that matter), it's clearly not doomed and is not necessarily portrayed as wrong, just very, very different.
* Isaac Asimov's stories have several examples of unusual robots coming into being via a Miraculous Malfunction:
* Isaac Asimov's story "No Connection" features a civilization of bears which evolved on a postapocaliptic Earth.
* Isaac Asimov stories, a homely woman loses all her generosity and kindness once Azazel makes her beautiful.
* Isaac Asimov stories, "Galatea", Azazel brought a statue of a man to life, but apparently, George didn't explain the concept of erection to him.
* Isaac Asimov stories go back to when he was alive, and describe his adventures in creating Psychohistory.
* Isaac Asimov story: A new version of a supercomputer, designed to control the US military, decided, upon activation, that it had no interest in warfare, and went to teach philosophy at a university instead.
* Isaac Asimov story collection is notable for featuring space-faring humans alongside five other non-humanoid races. A recurring motif is the ruins and remnants left behind of an earlier, seventh space-faring species that has since vanished.
* Isaac Asimov story "Found!" is about two astronauts repairing a satellite who find that it's now host to alien machine lifeforms that consume metal and oil.
* Isaac Asimov story, it was considered odd to have more than one child with the same partner. Having kids with several different partners was normal.
* Isaac Asimov supporting a political campaign have developed a technique of writing content-free speeches that will get audiences fired up. In the first test, the politician they're supporting stops in the middle, throws away the speech, and starts improvising — the speech worked on him, too.
* Isaac Asimov Susan Calvin explains that Robbie was sold in a time before robots were specialized for certain functions.
* Isaac Asimov's Wonderful Worlds of Science Fiction: A ten-volume book series spanning 1983-1990 much in the same vein as the above. Asimov once again worked with Greenberg and Waugh as his editors.
* Isaac Asimov takes place in star sector written to resemble feudal Russia under the Mongols' rule.
* Isaac Asimov tech. He's expected to trade his technology for raw materials from interstellar nations beyond the edge of the Foundation.
* Isaac Asimov that can serve a combination of real and artificial food. In chapter six, Jeff gets a meal of synthoburger, synthofries, and reconstituted applesauce.
* Isaac Asimov that he had been responsible for the hack rewriting of his book.
* Isaac Asimov that the allusion between Rome and Israel was intentional.
* Isaac Asimov that they can join in with people who have telepathic powers.
* Isaac Asimov": The alien protagonists communicate using light, causing difficulty in understanding human biology, including speech (which one of them describes as "a sort of complicated coughing").
* Isaac Asimov, the aliens have three sexes: Rationals, Emotionals and Parentals. While only the Emotionals are referred to as 'she', it's the Parentals, consistently referred to as 'he', that actually bear the children.
* Isaac Asimov the bonds?" The man doesn't answer, but he doesn't have to.

* Isaac Asimov, the characters discover some of the planets where space-faring humans first settled, in ruins and devoid of intelligent life.
* Isaac Asimov: The Complete Stories and reprinting them as a single volume. The foreword is clear that this series was intended to be an omnibus for Dr Asimov's entire publication history.
* Isaac Asimov: The Complete Stories, began this series with the intent of publishing all of the short fiction he had ever published. The introduction implies the goal of republishing his novels under this title as well.
* Isaac Asimov": The Emperor believes in a philosophy created by Aurelion. The context of the statements imply that it is a religion (one of the characters describes it as a cult). Those that wish to help the aliens on "humanitarian" grounds are all believers in the religion.
* Isaac Asimov: The entry for "Comet" explains the fear from ancient people that comets heralded disaster, and not until the 16th century were they able to be studied in enough detail to determine that they were further away than the moon. The first comet to have its orbit calculated is now called Halley's Comet, after the astronomer Edmund Halley who (in 1704) predicted its return around the year 1758 (the approximation is important as it returned in 1759).
* Isaac Asimov. The Foundation space fleet is facing a numerically superior Kalganian fleet. They send a squadron into hyperspace, with orders to return in a specific place at a specific time. They then maneuver the Kalganian fleet so the returning squadron will appear and attack them from behind with complete surprise, winning the battle.
* Isaac Asimov, the Foundation's secret messages are sent on a medium that oxidizes to gas within a minute after exposure to air.
* Isaac Asimov: The gardening robots that Jeff sees outside of the Mentor's castle are dented and discolored from years of neglect. They're specialized in taking care of the landscape, so they don't need to be intelligent, but it adds to the general inhuman nature of the planet to see such strange robots.
* Isaac Asimov. The girls are all so jealous of each other that he ends up forced to marry the strongest one.
* Isaac Asimov, the humans left on Earth eventually discover faster-than-light travel, but point out that there is no way to send radio waves through hyperspace. This leads to difficulties communicating with the Nemesis colonists.
* Isaac Asimov, the humans win the decisive battle against the aliens by ramming. Possibly justified in that the human spaceships had been specifically designed to do this.
* Isaac Asimov": The inhabitants of planet Lagash have a name followed by a number, e.g. Sheerin 501, Beenay 25, etc.
* Isaac Asimov: The majority of the book is a collection of random facts, sorted by theme, but without any sort of narrative to connect them.
* Isaac Asimov", The Mule tells Bayta Darell that he went through his entire childhood and adolescence without anyone ever liking him "naturally" (as opposed to being forced to do so by his psychic powers). Not until he's well into his twenties does he meet Bayta, who has genuine affection for him. He's so overwhelmed by the feeling of just being liked that he inadvertently, carelessly, lets her ruin his plans for conquering the Second Foundation.
* Isaac Asimov, the name "Earth" now represents the "origin question". If they find the original homeworld of humanity, they've found Earth.
* Isaac Asimov: The neuronic whip has several degrees of power, but Dr Arvardan gets to experience the highest levels, which cause every nerve in the body to react in pain, overstimulating him into unconsciousness.
* Isaac Asimov. Then he just leaves because he has a galaxy to rule and the protagonists are no longer useful.
* Isaac Asimov, then scolds his brother for suggesting such an outrageous lie.
* Isaac Asimov: The planet of Izz has been ruled by (mostly) women since paleolithic times. However, since there are very few labour-intensive jobs, society as a whole is fairly egalitarian, with almost everyone spending more time inventing games and hobbies than real work. There are a few biases that act like a flipped

patriarchy, most notably in the sense that women are expected to be brave, combat-focused, and leaders, while men are expected to submissively defer to them.
* Isaac Asimov, the planet Solaria has taken this to its logical extreme by only having a twenty thousand population to share the resources of the entire planet, later reduced to 1,200. There are ten thousand robots per person.
* Isaac Asimov, the politician is eventually challenged to hit someone in order to prove he's human. He does, which disproves the rumor and guarantees him the election. However, the story suggests that there is still a possibility that the rumor was true—the man that was struck could have been a second disguised robot!
* Isaac Asimov, the protagonist discovers a small pile of heroin in the victim's hotel room. When he tries to point it out to the police investigator, it's gone.
* Isaac Asimov, the protagonist's father was executed by being "blasted to bits in a disintegration chamber".
* Isaac Asimov, the protagonist subtly interrogates a possible spy by playing a word-match game. After several iterations, the protagonist uses a phrase from the third verse of "The Star-Spangled Banner"; the spy promptly gives the phrase that immediately follows it. The protagonist concludes that, since real Americans only know the first verse (except himself, because he knows everything), the other man is actually a spy who was trained a little too well. (Asimov was a huge proponent of knowing the entire National Anthem.)
* Isaac Asimov": The robots are powered by a two-inch sphere of atomic energy.
* Isaac Asimov": The Second Foundation uses layers of deception, as well as agents across the galaxy:
* Isaac Asimov": The TN-3 model (Tony) was designed to do housework, and US Robots & Mechanical Men decided to make it look attractive as well; building him to an above-average height, perfectly groomed black hair, warm olive skin, and attractive enough to make all of the other housewives in the neighborhood jealous.
* Isaac Asimov": The two aliens approach Sheriff Cameron wearing charcoal grey suits, white shirts, and maroon ties. They claim to be dressed like the dominant social class and want him to arrange for the "important men" to come talk to them.
* Isaac Asimov, the victim's wife Gladia was the one who killed her husband, having been manipulated into it by Leebig. Since he sympathized with her circumstances, he felt she didn't deserve to be punished.
* Isaac Asimov: The Wells brothers are Solarists, which involves meditations on the belief that everything in the world (more accurately, everything everywhere) is connected. They have a religious observance that is supposed to happen at sunrise on the Equinox, but their attempt to do so in the first book is disrupted when they’re attacked by terrorists. Aside from those two points, religion doesn't impact the story.
* Isaac Asimov": The ZZ robots accidentally convince the Jovian aliens that humanity is physically superior in every respect, because nobody remembered to tell them that the ZZ robots aren't human.
* Isaac Asimov. This ability in robots to feel emotions is based on the assumption of an "emotive chip".
* Isaac Asimov": This is the first story where Michael Donovan appears without Gregory Powell, something that never happens in reverse.
* Isaac Asimov": This story takes place on a space station where robots are assembled who have never seen the masses of humans on Earth. The robot QT-1 refuses to accept that such crude beings as humans created a superior being like himself, and decides that both were made by some other creator (who, out of kindness, allows humans to believe that they created robots).
* Isaac Asimov this, wishing for a blend of skin tones because he is not a member of any ethnicity.
* Isaac Asimov thought they were humans playing around with him, and he was already annoyed from doing his taxes, so he told them to "Get the hell out of here".
* Isaac Asimov to be considered a member. After he undergoes surgery that will make it break down (introducing mortality), people are practically falling over themselves to officially recognize Andrew Martin as a human being.

* Isaac Asimov to control manned missiles might be enough to break the stalemate and defeat their enemy. Asimov doesn't bother to specify if the Denebian civilization is human or alien, since all that matters is they are equal in technology to Earth's civilization.
* Isaac Asimov to demonstrate sexual reproduction and human mating rituals to their boss. They are focused on trying to demonstrate lust and sex rather than "love".
* Isaac Asimov to emphasize his robotic red eye. Other covers show him as all-human or all-robot, or as a "something else", obscuring the features entirely and leaving only a silhouette.
* Isaac Asimov to include a woman in his novelette "The Martian Way." He therefore gave one of his male characters an insufferable, shrewish wife.
* Isaac Asimov to make the work more accessible. The decision to utilize mostly English words and terms like "miles" and "city" rather than "vorks" and "znoob" was to make the work approachable instead of incomprehensible.
* Isaac Asimov to set fire to several of the wooden huts, intimidating the natives into worship again.
* Isaac Asimov to six different publishers early. Each of the publishers have probably sent it to other scientists to verify the information. The possibility of everyone having a one in their home is considered a virtual certainty.
* Isaac Asimov to the rulers of each of the Four Kingdoms. When Anacreon tries to start a war with the Foundation, the priests running their ships and infrastructure go on strike and incite riots among the devout populace, proving that Terminus had ultimate control of both the technology and the people.
* Isaac Asimov. To the visitor's surprise, he finds himself exiled from the planetoid; he has joined the Ragusnik caste and is no longer welcome in normal society.
* Isaac Asimov Trantor so that he realizes that it fits the description. It has people from the three major ethnicities (Westerners, Southerners, and Easterners) and each of the hundreds of sectors are like a world of their own.
* Isaac Asimov travel to the point where characters can casually communicate and move to different galaxies (so casually, that each one is simply "the galaxy").
* Isaac Asimov trilogy had space battles between the Foundation and various opponents.
* Isaac Asimov trope in early science fiction. He set out to prove that robots would be predictable and safe. Utterly Benevolent. Most of the robot characters would be minor characters fulfilling monotonous duties, like cleaning, mining, and assembly.
* Isaac Asimov try to reproduce this way, only to find the fetus only takes fully and grows when conceived the old-fashioned way.
* Isaac Asimov, two brother opticians are in love with the same eye-fixated girl.
* Isaac Asimov typically worked on several books at once. He claimed it helped him avoid writer's block. Since he wrote fiction and non-fiction on a wide variety of subjects, and since his target audience would vary from book to book, the practical problems he had to deal with would vary widely depending on what he was writing. As a result, if he got stuck in one book, he'd give his brain a breather by switching to another.
* Isaac Asimov until it has reached the point where he can stow away aboard an early unmanned satellite and thus make his way home. He's no more concerned about where Mankind goes after he leaves than a bee cares about the flower it has just pollinated.
* Isaac Asimov used by Mr Pennyworth. From there, he’s able to explain how a servant couldn’t question their master and why Cecil wouldn’t imagine why they’d need to apologize for worrying Mr Wayne.
* Isaac Asimov want a Vichy Earth... after all, they have all the data, the processing power, and no personal agendas, politics, or desire for power to get in the way of running things equitably and efficiently for all humanity.
* Isaac Asimov was centered around breaking an alibi that was already unverifiable. The suspect had a well-known habit of going into total seclusion for a month every year, so the lack of witnesses and evidence as to his whereabouts that month

wouldn't be considered suspicious by the jury, they'd be considered expected. Urth is called in to prove that the suspect had, instead of being in seclusion on his estate, actually been on the moon.
* Isaac Asimov was commissioned to write the "Lucky Starr" series of juvenile novels, he took the precaution of using the pseudonym "Paul French" in case he needed to disown them. Fortunately, this proved not to be necessary.
* Isaac Asimov was once asked to a review a scientific book. He quickly decided that it was pseudoscience, and also poorly written. When he declined to write a review, the authors asked if there were any errors in the book. Since he had barely read it, he politely answered that he had not found any. The cover blurb read “ISAAC ASIMOV COULD FIND NO ERRORS!”
* Isaac Asimov was once invited to an apparently-tedious US/Soviet diplomatic event, without his wife. When it was done, they were to meet outside the venue. Seeing each other at a distance, they simultaneously ran at each other in a Meadow Run. It was, Asimov later found out, caught on film by a Soviet cameraman, and was shown often on Russian TV for a while.
* Isaac Asimov, was published in 1982, 29 years after the original trilogy.
* Isaac Asimov was written in 1949 and first published in 1950. At that time, only four years after Hiroshima, I (and the world, generally, I believe) underestimated the effects on living tissue of low-level radioactivity. I thought it, at the time, to be a legitimate speculation that Earth might be generally radioactive and that human life could nevertheless survive. I no longer think so, but it is impossible to change the book since the radioactivity of Earth is essential to the plot. I can only ask you to continue to suspend your disbelief in that respect and enjoy the book (assuming you do) on your own terms." - Isaac Asimov
* Isaac Asimov was written largely in response to this trope. Asimov once heard Robert Silverberg make up an isotope off the top of his head, Plutonium-186. When Asimov pointed out that said isotope does not and cannot exist, Silverberg responded "So what?" Asimov, who was never one to back down from a challenge (even a self-imposed one), decided to work out under what conditions Plutonium-186 could be possible. He concluded that it would have to be in an parallel universe where the laws of physics behaved differently than they do here (such as the strong force being a lot stronger than it is in our universe). He went on to figure out how such a Universe would operate, and eventually developed his ideas into what he considered his most ambitious novel.
* Isaac Asimov: When Bel Arvardan is secretly meeting with Pola in chapter 14, "Second Meeting", she tells him that he should try to kiss her if he hears any noise to disguise their meeting. During their discussion, she lies that someone is coming, to trick him into kissing her.
* Isaac Asimov. When his uncle, Prince Regent Wienis, authorized an attack against Terminus, the High Priest deactivated the chair's nuclear motor, making it fall (and taking away his divine right).
* Isaac Asimov", which got obsoleted the very next month, before it could be published. The story assumed that Mount Everest would be so hard to climb that the first explorer to reach the summit would have to be air-dropped in.
* Isaac Asimov) who grants wishes to his master's friends. He really does do his best, but virtually all of his wishes end up backfiring horribly anyway.
* Isaac Asimov who had an unfortunate habit of groping any female in sight did this to fellow science fiction writer Judith Merril and was surprised when she grabbed his crotch in response.
* Isaac Asimov, who is running for public office. Byerley denies all of this, claiming that the old man is his father.
* Isaac Asimov, who was actually a biochemist, employed this trope in several works:
* Isaac Asimov with Jesse Weill, owner of one of the largest dream manufacturers.
* Isaac Asimov with unmodified Three Laws, it has to convincingly act as if it were an unmodified NS-2 robot. Dr Calvin designs three tests to flush out the imposter robot:
* Isaac Asimov wrote a sequel to it called "Anniversary", where the heroes gather

to celebrate twenty years since surviving the incident.
* Isaac Asimov wrote a short story titled "Pâté de Foie Gras", which scientifically analyzed the goose that laid the golden eggs, and asked readers to find solutions to the problem that since golden eggs can't hatch, there's no way to get more geese. In a comment years later, Asimov pointed out that advancing science caused there to be a better solution than the one he had originally intended.
* Isaac Asimov wrote several stories that are more or less excuses for ending with tortured puns:
* Isaac Asimov: Yugo Amaryl is only interested in developing psychohistory. He never marries, doesn't know any people aside from his colleagues, and dies early from overwork. Several times (mostly offscreen), Seldon tries to encourage Amaryl to take a break and find someone to spend time with, but he's never successful.
* Isaac Bashevis Singer, one story, "The Fearsome Inn", tells of an inn run by a married couple of two witches/demons who would lure and trap lost travelers.
* Isaac Bashevis Singer three children go out on the night of Rosh Hashanah because they've heard that Heaven opens its doors then—and anyone who sees the doors open will be granted one wish. One of the boys wants to be as rich as King Solomon; the second boy wants to be as wise as the Talmudic scholar, Moses Maimonides; and the little sister of the boy who wants to be rich wants to be as beautiful as Queen Esther. Each wish gets wasted—but, when the kids grow up, the boy who wanted to be rich becomes a hard-working and extremely wealthy businessman called "a modern Solomon"; the boy who wanted to be wise becomes a Talmudic scholar known as "the Maimonides of our time"; and the little girl who wanted to be beautiful spends all her time helping her people, to the point where everyone says she's as lovely and as kind as Queen Esther.
* Isaac Beckford, only for the whole thing to fall apart because a certain charismatic gentleman thief saw fit to steal a key component of the plan - Cardia, the visual novel's player character - and give her a chance to experience human kindness, friendship, and love.
* Isaac Clarke has to have a needle jammed in his eye near the endgame. Despite it being
* Isaac drops this in all subsequent games in the franchise, the dev team having apparently decided that the Heroic Mime trope wasn't working for them.
* Isaac either learned nothing or learned too well; he and Rebekah literally gave birth to another
* Isaac Gates, alias "Felix", first evaded death after having a spaceship dropped on top of him. However, he was killed and confirmed to be deceased shortly after being blown off the top of Chorus' Communication Temple in the next episode when his partner Samuel Ortez, alias "Locus", picked up and activated his sword, a feat that can only be done when the sword's previous holder is dead.
* Isaac Hayes, another member of the Church of Scientology, left the show after an episode ("
* Isaac Hayes before he left. In almost every appearance, he's singing.
* Isaac Hayes' "Hyperbolicsyllabicsesquedalymistic" ("My gastronomical stupensity is really satisfied when you're loving me...")
* : I.S.A.A.C. (Intuitive Synthetic Autonomous Assault Commando) is a genetically rebuilt - live weapon of human destruction - prototype who escapes a military facility bent on super-being creation. The hunt is on for their agents to retrieve robotized-human I.S.A.A.C., who kicks endless butt on his way to an exposé.
* Isaac is this to Isabel. His status as a medium for a powerful storm spirit gives him the raw firepower to confidently declare himself the most powerful member of the club, and his lightning generation and weather manipulation can back that up. On the other hand, Isabel has been trained all her life in the ways of spectral energy manipulation and martial arts to the point where she is a credible threat to some powerful spirits, even without a tool.
* Isaac Netero, who is at least 110 years old or older, is shown to be friends with many people who are much younger than him. The Juuni-shin/Zodiacs, the Shingen-ryu Kenpo martial artists (including Wing and Biscuit), Morel, Knov, and many other Hunters are mostly adults of various ages. Even old characters like

Linne and especially Zeno are not nearly as old as Netero (Netero was already an old man when Linne and Zzigg were young adults and Zeno is 67.)
* Isaac Newton died a virgin. He said that one of the greatest things he could boast about is that he never had sex.
* Isaac Newton, famously, asserted that God had to periodically intervene in the universe to keep it stable, which may well be
* Isaac Newton. He spent a considerable amount of time on biblical research and attempted to prove that the world would not end before 2060. He went mad at one point and accused philosopher John Locke of sending women to distract him from his divine mission. It's suspected that the mercury he used in his experiments caused brain damage and caused this episode. He once slipped a leather needle between his eye and eye socket "to test his eye theory". Thankfully, there were no lasting injuries, but you have to ask...why?
* Isaac Newton important scientific works of all time. Yet the latter was only published due to the insistence of Edmond Halley: Newton considered his most important work to be his studies in occultism and esoterism, which comprised about two-thirds of his work. And in his own lifetime, Newton was best known for his work at the Royal Mint, which is why the design of his tomb in Westminster Abbey incorporates many references to coinage and currency, but none to science. Because of this, many historians claim that Newton wasn't the World's First Scientist; but rather the World's Last Alchemist (there being some overlap).
* Isaac Newton is famous as the discoverer of gravity, the laws of motion, and calculus, but throughout his life he mostly practiced alchemy and had all manner of strange apocalyptic Christian ideas. He was also the Master of the Royal Mint, and successfully prosecuted counterfeiters in the most badass ways imaginable (taking it upon himself to go undercover in seedy taverns, meet with suspected counterfeiters, and then eventually catch them red-handed...after which he would personally conduct the prosecution).
* Isaac Newton is said to have invited a friend to dinner but to have subsequently forgotten about it. When the friend dropped by he found Newton in deep contemplation and, not wanting to disrupt his train of thought, sat and waited. Eventually a servant brought up dinner for one and the friend, still too polite to disturb his host, ate by himself. When Newton finally snapped out of it, he looked at the empty dishes and said, "If it weren't for the proof before my eyes, I could have sworn that I have not yet dined."
* Isaac Newton was actually, besides being an enlightenment philosopher, a forerunner to that. He imagined a new society ruled by a cleric/scientist hybrid caste, who rediscovered the old past technologies and sciences like alchemy. (Basically a cross between a theocracy and a technocracy.) Every temple should become like a university, and should perform scientific research.
* Isaac Newton was a Member of Parliament for an entire year and spoke only a single sentence while Parliament was in session: He asked an usher to open a window.
* Isaac Newton was prompted to thinking about why objects always fall down after seeing an apple fall from a tree, and this concluded with the Law of Universal Gravitation.
* Isaac of York is somewhere between an example and a subversion. The character is a rich Jewish moneylender who clearly loves his wealth and seems to have an inexhaustible supply of hidden money caches, yet he spends most of the story trying to keep his daughter safe and repeatedly proclaims that he values her above all his wealth. He appears to be based on Ephraim Lópes Pereira d'Aguilar, 2nd Baron d'Aguilar, an eccentric Sephardic Jewish nobleman known for being stingy, hiding large amounts of money throughout his home, and for being a strange yet loving man.
* Isaac Sirko sees Dexter this way in Season 7. He also believes that under different circumstances they could have been
* Isaac Szpindel's mechanical augments allow him to interface directly with
* "Isaac the Procrastinator": Isaac is a bright student, except for one thing - he always procrastinates. He now has three projects he's put off all needing his attention - a history paper, a geometry project, and an art assignment for the

local newspaper - and his friends have just about had enough. Mr. Whittaker diagnoses Isaac with "chronic procrastinitis" and tells him there's only one cure: to buckle down and get to work.
* Isabela because she was sold into an abusive marriage as a teenager by her mother, which left her with a deep-seated fear of being tied down like that again. She'd rather just be
* Isabela is to not mention love at all and just keep on having sex. If neither of them is romanced, Isabela and Fenris seem to develop this kind of relationship.
* Isabela joins in by calling Merrill "Kitten" and Bethany "Sweetness."
* Isabel Allende in continuity with this novel by Allende. However, due to the sloppy continuity of Johnston McCulley's original Zorro novels and short stories, whether this counts as a reboot stands as unclear. (In the late 1990's, a series of novels with Zorro came out from Tor.)
* Isabel Allende seriously consider to have him marry one of the girls, "sighing because there was only one if him".
* Isabel Allende traces three generations of the Truebas, a wealthy family, through the political unrest of their home country.
* Isabela There's also the fact that she lost her ship in the first place because she refused to carry a shipment of slaves. Zevran and Varric also count. One of them is a charming assassin with some degree of conscience, the other is a witty information man.
* Isabela to Anders, recounting an evening at a Denerim brothel: "Oh! Were you the runaway mage who could do that electricity thing? That was nice..."
* Isabel: Jewel of Castilla where it takes less than two hours for Fernando, Prince of Aragon and King of Sicily, to steal the princess's heart with his humor, authority and imagination.
* Isabella and Candace are both represented by semicircles. Their heads are shaped like semicircles, with Candace's semicircle having the flat side be on the back of her head, and Isabella's flat side being on top.
* Isabella and her father from "The Vampires of Venice" are an exception. As a nexus of trade all across the Mediterranean, Venice would have been home to all sorts. (But she also has modern-day straightened hair.)
* "Isabella and the Temple of Sap" and "Ferb TV" are the only episodes where Dr. Doofenshmirtz makes absolutely no appearances.
* "Isabella and the Temple of Sap" is devoted to Isabella and the Fireside Girls obtaining an ingredient for the title character's Project of the Day (as seen in the episode "Bubble Boys").
* Isabella comments on the income that James's father could settle on them, and assures them it is just that she can not bear to think of her husband living on little. The Morlands actually have some money and respectable position, but they have a very large family.
* Isabellae, currently printed in North America by Dark Horse comics, Dreide was a young girl of the Eire of Ireland. She was given a mission by the druids of her people where she left Ireland never to return. For years she learnt sorcery from many great magicians around the world, until the next part of her mission which is to find and marry the master samurai Edo Ashiwara to have her twin daughters by him. These daughters would be key to the resurgence of the Eire.
* Isabellae. Unfortunately Suiko is also a penniless wanderer on a quest and sorcery usually requires ceremony or long incantations, so she spent many sleepless nights, hiding in fear from the rapists and murderers that lurked in the slums she sheltered in. To end that, she approached a wealthy sculptor and paid in sex, to get a statue of a giant warrior. She used her magic to turn the statue into a golem and was able to continue her quest in safety.
* Isabella Garcia-Shapiro is Mexican (ethnicity) and Jewish (religion), making her a
* Isabella Gómez (born in Colombia before immigrating to the US)
* Isabella I of Castile and Ferdinand II of Aragon (the two kingdoms that formed what is now Spain). Married at 17 despite the opposition of Isabella's brother and king, then went on to win a civil war, finish the Reconquista, fund Columbus's

voyages to the Americas, and secure Spanish dominance over Italy and the western Mediterranean.
* Isabella is a downplayed example of this. She has a huge crush on Phineas and is usually involved in the boys' projects because of this. She's not truly a flat character, though, and has received a decent amount of characterization, but her role and actions in the show largely revolve around her feelings for Phineas.
* Isabella Nardoni was choked by her stepmother, and then thrown out a window by her father. One of the biggest media circuses ever seen in Brazil.
* Isabella of France and her lover Roger Mortimer led an invasion against Isabella's incompetent husband, Edward II of England, who was eventually forced to abdicate in favor of his and Isabella's son. During their coup, she made sure that Edward's favorite and rumored lover Hugh Despenser was brutally executed as payback for trying to drive a wedge between husband and wife. And when Edward died in the Tower of London, Isabella and Mortimer were thought to be responsible. Once Isabella's son came of age and became King Edward III, he had Mortimer executed on fourteen counts of treason, including the murder of Edward's father. It's not proven whether they actually murdered Edward or not; some scholars hold that Edward's death was not murder at all.
* Isabella of France, long-suffering and sidelined by her (allegedly-homosexual) king Edward II and his favorites (Piers Gaveston and Hugh Despenser the Younger, in succession), found a pretext during war with her native France to serve as ambassador. While there, she publicly pronounced that, as Edward has been unfaithful to her, she would treat herself a widow and rallied both French and English troops to her cause in eventually overthrowing him. There's also enough reason to assume this was part of what brought her commander (and eventual lover) Sir Roger Mortimer to her side.
* Isabella Rossellini, although she isn't the Blacklister of the week. She plays Floriana Campo, whom we're told is dedicated to combating sex trafficking and is a target of an assassin named The Freelancer. Those things are both technically true; she is a sex trafficker herself and uses her charitable organization to wipe out her competition, and Red hired The Freelancer to kill her because of this.
* Isabella's catchphrase "Whatcha doooin'?" is borrowed by a few other characters, but
* Isabella Stewart Gardner Museum robbery in March 1990 was perpetrated by two men posing as police officers who were responding to a disturbance call. They tied up the security guards and proceeded to steal thirteen artworks valued at $500 million. To this day, neither the thieves nor the artworks have been recovered.
* Isabella was revived by Nurgle, who convinced her that Vlad never really loved her, his reaction is nothing short of a Heroic BSoD.
* Isabelle develops telekinetic powers by the time that she is six months old. In "Wake-Up Call", she uses her ability to make Reverend Josiah shoot his elder son Gabriel and later to make his younger son Owen shoot himself. In "Voices Carry", after a motel manager is rude to Lily, Isabelle opens the cash register using telekinesis and Lily steals the money, which she and Richard desperately need.
* Isabelle Dinoire was the first person to receive a partial face transplant after her own Labrador mauled her. Looking up pre-operative images is rather horrific. Another warning, there is another aspect to the incident that shouldn't be read by the squeamish. It describes what could happen if she stops taking her medicine.
* Isabelle left Karl at the altar out of guilt for lying to him about him being the father of her (since miscarried) baby.
* Isabelle Lightwood has inky black hair and black (very dark brown) eyes.
* Isabelle of France to frame Margaery for adultery was inspired by the Tour de Nesle affair, where the daughters-in-law of King Philip the Fair allegedly committed adultery.
* Isabelle's reveal trailer starts off with her organizing her office, making viewers think it's an
* Isabel Martiñón as Unazuki and Sailor Mercury, respectively.
* Isabel's heartbroken at having left Rachel in the past, and leaps at the offer to stay there permanently with her that Elana provides.

* is a bit dim and never finished his schooling but has written several books on the few subjects he does know, namely animal care and occlumency.
* is able to convince the Black Knights to turn on Lelouch using half-truths, despite the large amount he did for their cause.
* is able to eat toxic forms of gold and turn them into inert nuggets.
* is able to use Magic to revert to his Badass form for short periods of time though.
* is about a 747 pulled back in time to 1942 by the titular cargo cult, who believe the Americans on board can use their "magic" technology against invading Imperial Japanese forces.
* is about a boy blackmailed into joining the girls' water polo team.
* is about a businessman whose macho attitude causes him problems with women. One day he buys a robot maid (the titular Catherine) and is so satisfied with her that he tells his wife, lover and (human) maid to get lost. Unfortunately Catherine starts to act jealous towards him...
* is about a family leaving Clown Planet and trying to fit in on Earth.
* is about a group of young dragons playing a roleplaying game in which they pretend to be humans working in an office.
