* Jane has it so bad that even when the friend she has feelings for outright asks her whether she has a crush on him she panics and instinctively denies it, a rejection he takes at face value. Dirk theoretically averts this as he's apparently planning an
* Jane is a cheerful kid, but when Jake talks about his dating life once too often having lost track of the time until her birthday, she completely loses it, delivers a massive
* Jane is also fond of this, mixing in some of Jake's old-time language with Rose's love of long, redundant words.
* Jane is an interesting case. She clearly wants to takes Anne's place, but also recognizes that desiring Anne dead to make that happen is an evil thought; instead, she tries to convince herself that she would be a superior handmaid to Anne, and thus things would be better off for everyone if Anne was dead. In short, she recognizes that ambition is evil, and so tries to convince herself that she isn't ambitious but righteous.
* Jane is similarly mild in her expletives, although, unlike Equius, she doesn't care about her friends swearing.
* Jane Jackrum Interlude ends with Professor Hastings contacting Professor Oak with an idea to bring peace to Trainer and Ranger nations.
* Jane Jensen and Robert Holmes, creator and composer (respectively) of the
* Jane, Jesse spends several days doing nothing but redialing her phone to hear her voice again, in the form of her voicemail message. This ritual continues until her phone line is disconnected in the middle of the recording, forcing him to stop cold turkey.
* Jane Jetson was a typical 1950s housewife who didn't even know how to drive
* Jane "Jinny" Bunford had hair mere inches longer than she was tall, which is really something because she was 7'11" and is the third-tallest woman in recorded medical history.
* Jane Leeves; and she left the series for Jane Leeves to have the baby, by having Daphne going away to a spa in order to lose the weight. (With the in-joke that Niles went to see her there, and she had "just lost 9 pounds, 12 ounces".) In the final season, Leeves' second pregnancy was merely incorporated into the storyline.
* Jane Leeves by secretly hiding various sweets and desserts all around Frasier's apartment, allowing her to sneak snacks whenever she likes. Given that the main characters were psychiatrists, though, the show took the trope more seriously than others, noticing that Daphne's inability to stop was serious and prompting a trip to a spa to help her deal with the root of her problem (which in turn allowed Leeves time off to have her baby).

* Jane Leeves (Daphne) missed a couple in Season 8 due to her pregnancy (Daphne was said to be a fat camp after piling on the weight due to worrying about Niles saw her), and only appeared in a non-speaking cameo in a Season-11 episode due to her second pregnancy.
* Jane Leeves is a trained dancer and got to demonstrate this ability a couple of times on the show, most notably in the episode "Moon Dance". Her flexibility comes in handy in later seasons when she gets to show off yoga moves.
* Jane Lindskold to investigate a mysterious philanthropist going by "Arthur Pendragon." Once they realize just how big of a secret they've stumbled onto, though, they decide to change careers.
* Jane Lindskold, was literally one of the first two life forms on the planet, even before there were continents.
* Janel: "I want to know how you resell stolen bull semen... is there a bull semen black market?"
* Janelle Monáe about Cindi's struggles after she falls in love with a human.
* Janelle Monáe, Black American singer, musician, acting performer and activist, came out as pansexual in 2018 and nonbinary in 2020.
* Janelle Monáe has this, notable for not only its length (twentyish seconds) but its incredibly high pitch.
* Janelle Monáe is also a concept album, but it is not related to the Cindi Mayweather storyline.
* Janelle Monáe's concept albums, where she is an android alien, deliberate used the sci-fi themes to allow her to explore bi- and homo-sexuality in the '00s and early 2010s before it became a much more prevalent topic.
* Janelle Monáe's Metropolis is based around an android named Cindi Mayweather who falls in love with a human.
* Janelle Monáe's verse on the Tightrope remix with B.O.B. and Lupe Fiasco points out the people who kept saying that she needs to change her appearance to appeal to the masses.
* Janelle Monáe's "We Are Young", which is easily her best known song overall.
* Janelle Monáe takes place in an almost all-white facility that is reminiscent of a church and discusses "cleansing" and "coming into the light" repeatedly.
* Janel: "Somebody's like, you know, I could get these cows knocked up legitimately, or we could hit the black market."

* Jane Moore, main character Jo ends up with four very different men staking their claim on her (one of whom happens to be her ex-husband).
* Jane of Lantern Hill. The main character mentions that Miss Justina still wears her hair in a pompadour, as that was how she wore it when she said goodbye to Alec.
* Jane, on the other hand, finds the tape of herself with Patrick and helpfully tapes over it with constructive criticism of Patrick's performance.
* Jane Rizzoli isn't assuming a beautiful woman is a bitch, she's usually assuming she's this.
* "Jane's a Car" plays with this. The story focuses on Jane Perkins coming
* Jane's Addiction - "Been Caught Stealing", an upbeat hip-hop-esque song with dog barks.
* Jane's Addiction, is popularly thought to not bother owning any shirts.
* Jane's Addiction. Their only chart entry? 2003's "Just Because", which only peaked at #72.
* Jane Seymour has taken to it so well that she's now an American citizen.
* Jane Seymour). Perfect timing, as she and beau Sully had just married.
* Jane's games were particularly noted for their extensive documentation, befitting

their status as hard-core sim titles.
* Jane's inexplicable Southern accent at the beginning of the RP being explained as a Hoennese (In particular Mossdeep) accent.
* "Jane Smith" was identified by her bizarre taunt ("Rub a monkey's tummy! Rub a monkey's tummy with your head!") in the children's book
* Jane's Poppop (ie post-scratch John). It's mentioned that this request came at the end of his will, after a long string of joke stipulations, but Dad Crocker knew it was a real stipulation because that's what this family does.
* Janes USAF: In this game, your flight instructor makes you buzz an ATC tower. And he will end the mission only when you buzz it to his satisfaction.
* Janes USAF you and your wingmen have to escort a spec ops chopper as it infiltrates a test pilot onto a Russian airfield. Once there, he steals a prototype Sukhoi-37 fighter with a new kind of ECM jammer and flies it back to US controlled territory. You have to escort him back.
* Janet also hired an actor to play Will, Dixie's dead brother, with the intent of terrorizing Dixie. Dixie feared she was going off the deep end until another character mentioned a run-in with "Will". Suspicious, Dixie went to the cemetery (where "Will" had supposedly been haunting her) and when "Will" appeared, began interrogating him about a nursery rhyme from their childhood. Of course, he couldn't answer. To top it off, when he tried to run, he was confronted by her husband, thus proving himself to be made of flesh and blood rather than a ghost.
* Janet and Jason impulsively get married in Season 1. However, a few episodes later Michael erases the memories of the four humans and Janet once they realize they're really in the Bad Place
* Janet Asimov: To avoid revealing her gender, she originally used J. O. (Janet Opal) Jeppson and would continue to use it as a professional name, even as she began publishing other stories as "Janet Jeppson" or "Janet Asimov".
* Janet creates a highly realistic virtual reality software, Eleanor's first question is whether she can use it to simulate sex with a celebrity. Janet can't understand why this is the human reaction to new technology, but she later has to argue unconvincingly that a currently running scenario of her love interest in a sauna is "a glitch".
* Janet Evanovich has gone on record saying that she will now picture
* Jane The Killer pointed out how horrible this thinking is, pointing out that Jeff did nothing but defend himself and defeat the kid that everyone else, including Jane herself, is afraid of. The original story also uses this trope, as police show up at their door that afternoon to arrest Jeff for "attacking" Randy.
* Jane the Novela with each season based on a different novel Jane was writing (the show was also narrated by Jane herself).
* Jane the Virgin: A consistent flaw of Jane's. According to Xo, Jane has a 'compulsive need to be liked'; she is affected when people don't immediately take to her (like Patricia and Jane R.) and tries to warm them to her.
* Jane the Virgin Adam, who has his own Narrator (who is a woman, as opposed to Jane's male narrator) and all.
* Jane the Virgin: During Petra's baby shower, Jane can't find anything nice to say when she's called for a toast (since Petra hates insincere speeches), so she instead just says "She's...having two babies!"
* Jane the Virgin focuses on the titular character as a child that associate with the episode's plot.
* Jane the Virgin had a flashback to the eponymous protagonist's Quinceaera in 2006.
* Jane the Virgin has multiple telenovelas that Rogelio stars in, each more ridiculous than the last.
* Jane the Virgin, Jane, an aspiring writer, loses her virginity. She has trouble figuring out her character Cecilia's motivation, and can't help but cast her as either a promiscuous horndog who believes sex should be celebrated or a devout nun who disavows sex. This is later revealed to be an exploration of Jane's feelings on the matter — she had spent so long with 'virgin' as one of her identifiers that she has trouble reconciling sex as a good thing, and when she starts moving

past it, her writing also starts flowing.
* Jane the Virgin, Jane and Michael go on a date at the same amusement park they went to for their first date. Both dates end with them kissing on the ferris wheel.
* Jane the Virgin: Jane and Michael panting and discussing whether "it will fit." They're moving into their new house and putting boxes in the closet.
* Jane the Virgin: Jane and Rafael get caught in the rain in season 5 and kiss.
* Jane the Virgin lampshades, discusses, and converses telenovela and other romance tropes through the social circles of its aspiring romance writer protagonist Jane and her father Rogelio, who is a telenovela star.
* Jane the Virgin: Made in 2014, flashbacks to the eponymous protagonist's childhood years happened in the latter parts of the decade.
* Jane the Virgin most of the Spanish is shown in subtitles... Except for in the season two finale where Michael recites his vows in complete Spanish. No subtitles, just Jane and other characters' reactions, many being brought to tears. Watchers who understand the language likely got a piece of that too.
* Jane the Virgin product placement on Rogelio's telenovela, which leaves the creators wondering how to insert Honey Bunches of Oats into a climactic episode of a dramatic historical telenovela.
* Jane the Virgin technically ended the Michael/Jane/Rafael triangle halfway through season 2 by having Jane choose and marry Michael, but with Rafael still in the picture, lurking in the background and dropping subtle hints here and there, viewers speculated that it was only a matter of time before the triangle resurfaced again. Eventually it was resolved for good with Michael's death, clearing the path for a possible Jane/Rafael reunion.
* Jane the Virgin, three years later Rogelio and Darci's relationship has soured badly while filming their reality show, to the point that they start snarling at each other as soon as the cameras stop rolling and nearly every offscreen conversation is a fight. Ironically, said reality show is about how they are in love with each other.
* Jane the Virgin when Michael has an idea just as Nadine turns the fluorescent overhead light on. Lampshaded (heh).
* Jane the Virgin when she admits that she lied when she said she'd been with women before to get JR to have sex with her for the first time.
* Jane the Virgin which the ladies of The Talk made a guest appearance on that night's episode "Chapter Seventy-Four" in which Eve admitted to Rodriguez she is a huge fan of Jane the Virgin and was honored to be in that episode with her fellow co-hosts.
* Jane the Virgin with him). Meanwhile, Jane's grandmother Alba initially favors Rafael because of the romance component.
* Janet is a subversion/aversion/parody. She's a walking, talking, infinitely more helpful version of intelligent personal assistant programs like Siri or Alexa (Eleanor even calls her "Busty Alexa" at one point), providing information about the afterlife to residents of
* Janet Jackson also received international attention after the Nipplegate incident in 2004, where her naked breast was accidently revealed during a Superbowl broadcast and it caused a lot of controversy ... and higher album sales as a result.
* Janet Jackson sold over 10 million records, is considered one of the greatest albums of all time, and made Ms. Jackson (if you're nasty) a superstar in her own right.
* Janet Jackson video "The Pleasure Principle" seems to take place in one that was converted into a loft.
* Janet Kagan is the realization that the protagonist's personal AI has reached the point of sapience. The protagonist is delighted on her behalf, but worried about the potential pressures on her, since she's effectively still a child.
* Janet, Martouf and Jacob Carter/Selmak are on a super sekrit mission together.
* Jane to Lisbon in the Season 6 finale. He runs after her to a plane about to take off when he realizes he may lose her forever and confesses his love. This is after he has fabricated a letter from a serial killer in an attempt to prolong

Lisbon's stay in Austin. The FBI is forced to put everyone's transfers on hold until the case is solved, which includes Lisbon's transfer to Washington. That's why she is furious with Jane.
* Jane Toppan, a nursing student turned serial killer. She would dose patients with morphine and atropine to see what it would do to their nervous systems, climb in bed with them, and hold them as they died. She also claimed to get a sexual thrill from her murders.
* Janet, played by 5'10"/178cm tall D'Arcy Carden, also fits the role, with several characters being attracted to her in-universe or commenting on her looks.
* Janet The Bunny Queen' "Voyage To The Bunny Planet" really cares about young bunnies. She would usually drag and comfort the sleeping bunny who needs a visit to the Bunny Planet after a terrible or bad day they would have. When the young bunny is asleep, she would cradle the sleeping bunny and take them to "Bunny Planet" and shows them "The Day That Should Have Been" which takes shows them a more positive and sweet dream the bunny would have.
* Janet Varney kissing or about to kiss. She actively encouraged fans not to worry and said she would happily sign any such fanart.
* Janet Waldo, Doris Drew provided the singing voice. Waldo and Drew sound nothing alike. Waldo herself is actually a very good singer as evidenced in some early radio performances, so why they felt the need to replace her at all remains a mystery.
* Janet Waldo had pop singer Tiffany, who was to be just Judy's singing voice, be her speaking voice as well and rerecord over her lines lines. Despite that, one of them was kept in, which was most likely an oversight.
* Janet, who decides to become an Amway saleswoman and tries to help unemployed women do the same. Moore decides to help Janet out of a crisis by letting her do his colors.
* Jane Wants a Boyfriend, Jack brings flowers to his first date with Jane.
* Jane Wants a Boyfriend, so many times that she can recite the dialogue from memory.
* Jane was caught in an explosion and apparently died in his name was yelled on those days.
* Janeway attempts to have Chakotay over to her quarters for dinner, and achieves the unique distinction of burning the roast, which her only involvement in its making was to issue a verbal order to the replicator.
* Janeway cites the trope in "Latent Image" when arguing with Seven of Nine that their holographic Doctor is
* Janeway once nearly ruins relations with a species called the Tak Tak. Apparently to them, putting one's hands on one's hips is the greatest insult possible. Well, body language
* Janeway removed one of Paris's pips when he violated orders and she busted him down to Ensign in "Thirty Days".
* Janeway's other solution to any problem is to have Tom Paris solve it.
* Janeway summons Tuvok and reveals that though they've known each other for twenty years and served on three ships together, she's just learned he's been keeping something from her. It took an exhaustive amount of research, but she's finally got to the truth.
* Janeway suspects that a defector she has granted asylum is faking, and feeds him misleading information about where she is hiding the refugees and where their escape wormhole is located, to buy time for the refugees who are already booking it to the wormhole in hidden shuttles.
* Janey briefly flirts with Nisha before deciding the Lawbringer isn't really her type. Nisha responds that she likes them "handsome" anyway. Come
* Jane Yellowrock short story "Signatures of the Dead", a young, insane rogue female vampire is briefly heard attempting to sing "Starlight, Star Bright", but can't remember the words:
* Jane Yellowrock: The main hereon is a skin-walker, she fights vampires and has a witch for a best friend.
* Jane Yellowrock: Vampires getting together for formalities, weres getting

together for formalities, and both getting together for formalities spend time citing their titles in detail.
* Jane Yolen, so they dodge the issue by praising his other qualities.
* Jane Yolen the central practice. (The corpses of the dead are exposed, and eaten by vulture-like birds.)
* Jangles is a more literal example—a birthday party clown who's suffering conflicting emotions in the epilogue. It's made clear that while
* Jango Fett: Open Seasons, the radical Death Watch faction framed Jango Fett's True Mandalorians for murdering civilians, leading to them (save Jango, obviously) getting wiped out by a Jedi strike team led by then-Master Dooku.
* Jan Hanlo, one of the most important Dutch poets, also a prose writer in the latter part of his career, was attracted to boys and wrote a lot about his feelings. Of particular significance are his love poems to a twelve-year-old named Josje, and a book of letters,
* Jan Harold Brunvand has written a series of books detailing urban legends, including
* Jan Hendrik Schön's research seemed to show that a gray goo event was possible, but then, well,

* Janice and worried she'd leave or cheat on him, despite her being the most reliable of the friends' gang and obviously crazy about him.
* Janice from the Electric Mayhem band has long blonde hair, huge black eyelashes, and enormous red lips.
* Janice Kawaye few current photos of her can be found online, and no interviews with her exist to this day. She also has no social media of any kind, and most likely never has.
* Janice Rand seems to qualify. A 'mustang officer,' she went from an enlisted yeoman in the
* Janice's first husband is not much of a family man at all but has no trouble having children with Janice. Janice's second husband, however, is a much better family man and desperately wants children, but has fertility issues, resulting in them needing medical help each time they want to have a child.
* Janie found out that her mother actually kidnapped her from the hospital as a baby from her real mother and her birth name is Kamiyah Mobley. Alexis stated that nothing was ever out of the ordinary, other than the fact that she had no Social Security number or driver's license.
* Janie Fricke, a country music stalwart of the late 1970s through mid 1980s, had a hit song called ... "Playing Hard To Get." A top 20 country hit from January 1979, the song is about a young woman admitting that the game of "hard to get" is "
* Janie Fricke sang the entire second verse of "Thinkin' of a Rendezvous" by Johnny Duncan, but was not credited for it.
* Janie's Private Eyes series, while 13-year-old David, 8-year-old Janie and 6-year-old Blair actually do solve the case, they end up in danger and have to be rescued. Fortunately, someone else calls the police and rescues the kids, resulting in the police solving the case without the help of the kids' hard work.
* Janine also gets to say it triumphantly as the music kicks in and the guys return to business, confirming "yes, we're back!" on the phone.
* Janine is slowly revealed to be this, though Claudia initially doesn't see her this way.
* Janine; things were pretty aggressive before but it's when Janine insults Chandler that Monica cracks and gets physically violent.
* Janine was a blonde, up until Season 3 where her hair suddenly became dark brown.
* Janine was the only major character from the series to not appear in the former
* Janis also does this with Regina when she "apologizes" for helping Cady in sabotaging her and says she did it because "I guess I've got a BIG,
* Janis Ian's "Society's Child" is about the breakup of a teenage interracial relationship due to societal pressures.
* Janis Ian, whose 1968 hit "Society's Child" was played for the 1973 show, was

deleted from the 1975 updated special. She had just released a new single, "At Seventeen", and although it had yet to make the Hot 100 there were already strong vibes about the song. The good feeling was justified: The song became a long-running hit in the summer of ’75, eventually peaking at No. 7.
* Janis Joplin books, the Doctor cops to having used no such elegant solution — he just rips out the lining of his pockets, turning the whole lining of his coat into one big pocket.)
* Janis Joplin features Janis and the band, shown as cartoon characters in comic strip panel format.
* Janis Joplin owes something to her. Not bad for someone with only four studio albums to her name.
* Janis Joplin's a cappella song "Mercedes Benz," a parody of consumerism, was used in a car commercial to flog... er... Mercedes-Benz. The advertising company responsible did not stop to think about the appropriateness of using a song by a poster girl for Southern Comfort, who if given a Mercedes-Benz to drive would have been so habitually wasted she'd have crashed it. They also did not stop to think that Joplin-savvy listeners watching the advert might have also reflected on the (not-used) third verse, which implores the Lord to buy Janis a night on the town, with all that implies for consequent drunken driving...
* Janis Joplin's song "Mercedes Benz" by the makers of Mercedes-Benz cars is one of the better misuses. It omits the third verse, performed by a woman known to be constantly off her face on Jack Daniels, which is all about getting hammered on a night on the town. Followed by a ride home in the Mercedes-Benz?
* Janis Joplin, there's a panel depicting Janis screaming into a microphone, with the speech bubble saying, "Janis Joplin: Vocal", and then a smaller one saying, "And how!"
* Janitor Impersonation Infiltration: Infiltrating a location by posing as cleaners.
* Janitors Of The Postapocalypse and have to reconstruct a language for them. "Cured humans" still have black blood, are very difficult to kill, are not as intelligent as their natural human ancestors, and still have a chance of reverting back to animals under the right circumstances. The galactic community tends to think of them as pitiable creatures at best and barely-controlled flesh-eating monsters at worst, and within a couple months of uplift the Krakau "curing" them put them to work as shock troops and menial workers in their military. Some humans are happier about this than others.
* Janitors Of The Postapocalypse, a veteran who's attained the highest rank available to humans and who has gray in her hair and lines on her face, counts herself as twelve. Her subordinate Wolf claims herself as twenty-six because she's only been a person for eighteen months, and other humans scoff at her over it.
* Janitors Of The Postapocalypse by human food. When they provision their human soldiers, they give them a once-daily dose of slow-release fats, proteins, and nutrients in the form of a large tube of gray sludge, which Wolf says tastes like salty snot. Unusually though, they aren't expected to eat it by mouth and instead have feeding ports installed into their stomachs. Later in the series, while Mops will sometimes eat by mouth, she keeps some tubes with her so that she stays nourished even if she loses her appetite.
* Janitors Of The Postapocalypse gray paste through ports in their stomachs. They won't have tried Tjikko nuts before, but they always love them and he enjoys watching their faces.
* Janitors Of The Postapocalypse has a weakness for a salsalike food made with copper.
* Janitors Of The Postapocalypse to "salted snot". In fairness, it's meant to go into the stomach through a feeding port, not to encounter the mouth at all.
* Jan, Jans en de Kinderen: In one comic, Grandpa falls through the ice on a shallow pond when he tries to prove to Catootje and Jeroen that it's safe. Then the two kids also enter the pond so they can later claim they went out on the thin ice first and Grandpa saved them, thus preventing Grandpa from getting in trouble. The final panel shows all three home again, getting a foot bath against the cold, while

Jans praises Grandpa for his heroics.
* Jan, Jans en de Kinderen: The family cats and dogs are all able to talk, but humans can apparently not understand what they are saying.
* Jan, Jans en de Kinderen to keep the characters at the same age, but since it's always set in "the present" social and technological changes have been introduced over the years, such as the internet, cellphones, laptop computers etc.
* Jan Jansen's life following his association with CHARNAME was typically convoluted, the barest of details hidden amidst his half-truths and whole lies. According to his published memoirs, "A Jansen in Every Port," after a short prison term for monkey smuggling, he returned to his first love... monkey smuggling. This led to the now infamous Gibbon Riot of '72, a tumultuous and altogether unclean event that seemed to center on the estate of the Shadow Thief Vaelag. Jan would deny that he had planned the downfall of the rogue, but he was unable to explain what practical application he had intended for a horde of knife-wielding simians. Nevertheless, the death of the admittedly disliked and generally suspect Vaelag could not be attributed to the young gnome. Strangely enough, Jan had alibis for each and every second of the day in question, and what a day it must have been! Relatives from across the Realms came forward to say that he had stopped in for tea and turnips. At his later wedding to Lissa, Jan was asked how he managed to be in so many places at once, and yet still so far from the scene of the crime. "Well," Jan would say, "when you have that many monkeys, anything is possible."

* January 1941 issue". In this image, a cosmonaut in outer space is wearing a jar-like helmet that is completely clear in all directions.
* January 2010 had Games Workshop feature a new sub-strain of the Trygon called the Mawloc. It is the most Sandworm-like creature in the game so far, having shorter arms and a multi-jawed mouth. On top of everything the Mawloc is not only able to burrow underground, but move around while underground and reappear elsewhere later (apparently it's faster while underground than on the surface).
* January 23, 1989 strip, Calvin momentarily pretends to be calling Susie about homework as his mom passes through when he's actually trying to purchase power tools.
* January: A baby in a top hat blowing a horn (symbolizing the "New Year"). Either that or lots of snowy stuff.
* January Jones and, instead of a pregnancy storyline or the above-mentioned deflection tactics, the writers wrote in a fat storyline for Betty Draper, complete with fat suit and body doubles.
* January Jones auditioned twice for the role of Peggy Olson before Matthew Weiner asked her to read for the part of Betty Draper instead, despite the fact that at that point the character was barely in the pilot and he had no plans of fleshing

her out.
* January's needled by several characters for her crush on Philomena, who doesn't seem to notice.
* January's oldest younger brother, Fred, is the only one of her siblings who hasn't developed magic yet at the age of fourteen.
* January's story ends with a Rock-Paper-Scissors match and the narrative is structured to make the reader think that the protagonist of that chapter utilized
* Janus. A detective shoots dead an alleged copkiller and, in a state of shock, picks up the crook's gun to see if it's a replica firearm. Another detective sees what he's doing, takes the gun off him and puts it down where it was lying on the ground so the forensics people can photograph it. Unfortunately a civilian witness who didn't see the gun being picked up testifies that she saw police planting a gun on the scene.
* Janus and wins the trial by picking up a detail that everyone else missed.
* Janus, a prison guard catches drugs being passed this way from a visiting girlfriend to an inmate and forces him to spit it out.
* Janus Directive crossover; part of the fallout was the restructuring of all said agencies under the authority of Sarge Steel to avoid another such incident.
* Janus, who represents Thomas' impulses and desire to lie, to others or himself.
* Janusz Korwin-Mikke's. The abbreviation of party's name in Polish (Koalicja Odnowy Rzeczypospolitej Wolność i Nadzieja) is the same as last name of its founder... KORWiN.
* Janusz Zajdel has aliens who evolved on the day hemisphere of one of these. Consequently, they cannot survive without light and need protective suits with optical fibre cables connecting them to the central light-producing thing when they explore Earth.
* Janusz Zajdel, involves a researcher who discovers a dimension where lost items go to. And its inhabitants. The title itself is derived from a Polish folk saying which refers to lost items as "covered by the Devil with his tail".
* Janusz Zajdel's story "Paradyzja" space station. Due to the place being wired with an all-seeing, all-hearing AI which filters "disloyal" words, residents cobble together something known as "koalang" (associative-allusive language). The words have no inherent meaning, and everything is based on loose associations: for example, the sentence "I dreamt about blue angels last night carelessly" means "Police tried to search my place last night, but they were careless and woke me up". As one of the characters says, "everyone becomes an abstract poet by neccesity
* Janusz Zajdel, the aliens basically treat humans like cattle — that is to say, take good care of their health, keep them from fighting and exploit in moderation.
* Jan van Speyk. Named after a naval officer who chose to blow up his ship rather than surrender to the Belgians during the Belgian War of independence.
* Janzo and Naya, the two characters whose actors are South Asians, get together in Season 2.
* Jao Empire, this is the major weakness of the Jao, and the reason that some senior Jao want to make an alliance with humanity, rather than simply enslaving them.
* Japan Airlines Flight 123 also played this straight, with the pilots keeping the crippled aircraft in the air for longer than anyone could in the flight simulation. Sadly only four people survived this crash, however this was mostly due to the incompetence of the search and rescue teams and not at all the fault of the pilots.
* Japan Airlines Flight 123 What makes it more remarkable, is that in simulations after the accident, not a single simulator pilot was able to replicate the exact results and control the aircraft for anywhere near as long, while having the benefit of knowing beforehand what they were simulating, and having a clear head to do it.
* Japan Airlines Flight 123 when that plane, a DC-10, suffered a total hydraulic loss as a result of an explosive engine failure. Fitch quickly offered his assistance to the pilots, and the four of them working together were able to bring the plane down in a semi-controlled crash on the runway, saving the lives of 184

people (a 65% survival rate), which is generally agreed to have been little short of a miracle.
* Japan Air Self Defense Force pilots and aircrew stationed at Hokkaido wear bright orange flightsuits, deliberately invoking this, to aide in visual search in the event of an ejection over ice-cold water.

* Japan erupts into revolution against British occupation just before the turn of the 20th century, which soon turns into a decade-long civil war between those who want an imperial restoration and those who favor republicanism (with both sides also having xenophobic conservative and liberal globalist factions). In the end, the republicans win.
* Japanese admiral Togo Heihachiro was a keen student of Britain's naval academies, which helped make the British Royal Navy one of the world's finest fleets. He knew the era's most advanced naval strategies and tactics, which allowed him to track the Russian Navy's progress, choose where and when to fight and outmaneuver his Russian foes during the battle itself. The Battle of Tsushima was a vicious
* Japanese aircraft during the early stages of WWII; while fast for the early 1940s and well armed, they had next to no armor or safety features such as self-sealing fuel tanks or armored glass to protect pilots and crew. While some Allied designs were notorious for taking hundreds if not thousands of rounds of ammunition and still flying, even a short burst of gunfire would be enough to set a Zero ablaze and generally take its pilot with it. Later designs had armor and speed to match next generation Allied fighters, but by that point Japan had lost the best of its pilots and could only send up half-trained rookies to fight.

* Japanese Kabuki and Noh theatre are examples. The dancing appears tranquil and simple, but in truth, they are complex and call for precision. The most famous Japanese minimalist is Bando Tamasaburo, a female-impersonator.
* Japanese kawaii metal band LADYBABY defies easy classification, as it's a band that wholeheartedly embraces kawaii culture and blurs grindcore and its screaming vocals and lightning riffs, J-pop and its upbeat, heavily electronic beats and hooks, lyrics that are safe for fairly young children, and an aesthetic that has the band dressing like Sailor Moon knock-offs. The three fronts for the band wear supremely cute lolli-inspired outfits. Two of them, Rie Kaneko and Rei Kuromiya, are 19 and 16 year old Japanese females (as of 2016), while the third, Rick Magarey, is a bearded Australian cross-dressing professional wrestler in his early thirties - and he's the one with pig tails. Kaneko and Kuromiya deliver their vocals with the perky, high, very feminine sound you expect from the poppiest of J-pop while Magarey delivers his vocals with a scream you might expect from grindcore bands like
* Japanese knotweed, as well as its close relative, Giant knotweed. Both are popular garden plants that can quickly fill up the whole garden if allowed to grow unchecked. * Japanese Mythology are a hodge podge of folklore Yokai, Buddhist Ashuras and the occasional malignant Kami, which is pretty different from the Christian interpretation of them as fallen angels.
* Japanese Mythology, feature in most East Asian mythologies. Legend has it that this appearance was created when the first emperor took the heraldic animals of the states he had conquered and put parts of them together.
* Japanese Mythology (foxes), jorogumo (spiders), and housecats (bakeneko and nekomata) can do this as well.
* Japanese Mythology go to the Weaver festival in one chapter of the manga. The star-crossed lovers are mentioned again later on by a somewhat-delusional-from-being-fried-by-fireworks Ranma.
* Japanese Mythology has Hachiman and Bishamon. Despite Shintoism's syncretisation with Buddhism in Japan, try not to confuse the two - the first is somewhat like the Roman Mars, being a patron of warriors, protector of Japan and a god of agriculture and fishermen. The second was a Buddhist deity culturally changed to being more of a war god.
* Japanese Mythology (Heavenly Swamp Pike or Heavenly Jeweled Pike). After the creation of the world, however, the whereabouts of the spear are unknown.
* Japanese Mythology. (Her sisters had all died in the same way). The god Susano-oh was passing by, decided to save her, and slayed the Orochi instead.
* Japanese Mythology: In the story of Hoichi the Earless, the eponymous Hoichi was a minstrel who was haunted by a ghostly samurai who was forcing Hoichi to play for his dead master. Hoichi had a priest friend of his cover his body in protective sutras to render him invisible to the undead. However, the priest couldn't properly paint the sutras on Hoichi's ears, which were cut off and taken by the samurai's

ghost.
* Japanese Mythology (Ms. Eight-Foot-Tall), who stalks young children and can imitate the voices of their loved ones but can only make a terrifying "po-po-po" sound otherwise.
* Japanese Mythology, Ningyo or Mermaid flesh was said to give near infinite vitality unto the eater.
* Japanese Mythology: Okuninushi fell in love with Suseri-hime, daughter of storm god Susanoo. Susanoo wasn't too happy about that. First Susanoo tried to kill Okuninushi by having him sleep in a room full of snakes. When that failed, he sent Okuninushi into a room of centipedes and wasps. After another failure, Susanoo then shot an arrow into the middle of an enormous meadow, told Okuninushi to retrieve it, and proceeded to burn the field with Okuninushi in it. However, he actually ended up approving of the couple since Okuninushi managed to survive all of that.
* Japanese Mythology (such as umbrellas or combs) who have lived/neglected for long enough and gains spirits of their own, and most of the time, becoming malevolent.
* Japanese Mythology that the other gods were able to drag her out of the cave and seal it off.
* Japanese Mythology there is a chimerical creature called the Nue, with the body of a dog, the legs of a tiger, the face of a monkey, the tail of a snake, and the voice of a thrush. Famously the Emperor Konoe suffered nightmares, and one of his servants noticed a black cloud hanging over the palace. The servant shot an arrow at the cloud and out of it fell the monstrous Nue.
* Japanese Mythology, the storm god Susano-o flew into a drunken rage and did everything possible to mess up his sister Amaterasu's life. He defiled all her shrines, killed her handmaidens, and threw shit in her temples. The gods were unable to stop his overwhelming douchedness.
* Japanese Mythology. They both started out as creator gods, but while Izanagi remained one, Izanami sadly became a vengeful one who has vowed to kill a thousand people ever yday. By contrast, Izanagai has vowed to create 1,500 people everyday.
* Japanese Mythology to refer to gods, spirits, ancestors and forces of nature. Shinto priests have apparently complained about westerners translating the word as 'god', as this gives people not familiar with their religion a distinctly wrong idea.
* Japanese Mythology: Was Amaterasu conceived by Izanagi and Izanami while the latter was still alive? Or was Amaterasu the byproduct of Izanagi washing himself of the filth from Yomi? The Kojiki and Nihon-Shoki both say different things. And say nothing of the myth where she sends her grandson to rule over the world...
* Japanese Mythology was an eight-headed and eight-tailed monster that forced a pair of earthly deities to hand over one of their daughters to be devoured by the beast every year. Their eighth and final daughter, Princess Kushinada, was saved from this fate by the storm god Susano-o, who slew the beast by impersonating her, getting it drunk on eight large bowls of sake, and then chopping off each of its eight heads.
* Japanese Mythology was often an extremely pale woman who lived within snow storms. Tended to guide travelers to either their frozen deaths or to safety, if she so wished to.
* Japanese Mythology, which are child-like spirits whose job is to protect and bring good fortune onto the house they reside in. If you didn't take good care of the spirit and house and tick the Zashiki-Warashi off enough that they left, well...you and your house were screwed.
* Japanese Mythology would pull children (and sometimes adults) underwater and suck their intestines (or blood, or liver, or ki/lifeforce — the mythology is inconsistent on just what they ate) out through their anus. (This part is pretty consistent.) You could only protect yourself from this fate by carving your name on an even tastier treat and tossing it into the water. The one food they preferred over human innards? Cucumbers. Well, that or trick the kappa into bowing, causing the water to be poured out of its head and rendering it powerless. Obviously, if the kappa is in a body of water at the time, this technique is useless.
* Japanese myth, urban legends, and ghost stories tend to be particularly fond of

this trope. Most of the popular urban legends and creepy pastas to come out of Japan have some set of rules you must follow or a special trick in order to survive.

* Japanese Politeness: The stereotype that the Japanese are overly polite.
* Japanese Politeness trope, Japan averts this with respect to flags. Not wanting to curtail the citizens right to Freedom of Speech, but also not wanting to show disrespect, Japan outlawed all Flag Burning except for the Japanese Flag.
* Japanese Pop Music idol group from Fukuoka, Japan, who enjoyed minor success... until 2014, when fan-taken photos of Kanna Hashimoto went viral and took the entire nation by storm. Fortunately, for Rev. from DVL, this meant mainstream media attention, but unfortunately, the public cared about Hashimoto only. Hashimoto began getting acting and commercial roles and was also pushed to the center focus of their music videos. Rev. from DVL disbanded in 2017, and to this day, the only member most people remember is Hashimoto.
* Japanese produce inferior technology, where Doc jokes with Marty that it's no wonder a circuit failed because it was made in Japan. Marty counters that, as far as he knows, "all the best stuff is made in Japan."
* Japanese professional wrestling, due to the sport-like way it presents itself, tends to be especially liberal in the promo field. Unless they are rookies, deep in a storyline or playing a very specifical gimmick, wrestlers are often left to do the promo entirely by themselves as long as they don't break kayfabe nor say anything compromising. This occasionally backfires when real heat comes up in the talk, but promoters often see it as new chances to get the press's attention or even

* Japanese Spirit. There are still traces of it in everyday society and media, though.
* Japanese Spirit" was the motto — some civilians and government/military

officers alike would end up favoring particular, unintended aspects of the countries they went to or heard about.
* Japanese splatter films tend to be especially crazy even within this subgenre, with their anime-inspired plot elements and special effects that range from schlocky and visceral to horrifyingly realistic (sometimes within the same movie). Some samples:
* Japanese surface vessels up to cruiser-class had a weakness that was also their greatest strength: their torpedoes. While the Type 93 "Long Lance" torpedo had superior range, speed, and payload to anything the Allies could field, it's liquid oxygen fuel was highly explosive and rather touchy. There are several accounts of Japanese cruisers being crippled or sunk by near miss bomb or shell attacks that set off one of the torpedoes while it was still in the launcher, causing a chain reaction that would break the ship in half.
* Japanese swords that can cut through several bodies in a single stroke aren't unheard of. "5-body blades" as they're called are out there, and fetch a ridiculously high price at auctions. In fact, it's not too unreasonable to assume that some of these swords can cut through MORE than five—the executioners only ever stacked up to five men, so who knows how many people they can actually cut through? Probably the same people who know how many licks it takes to get to the center of a Tootsie Pop.
* Japanese: "Tabemono" (eat-stuff/food), "kaimono" (buy-stuff/things you bought), "Kimono" (dress stuff/clothing). The same applies to words with "butsu", such as "doubutsu" or "hakubutsu".
* JapaneseTeeth's MLP fanfics all tend to follow this formula, being more about the characters and with no antagonists in sight. Examples include:
* Japanese television personality Bobby Ologun, who was born in Nigeria, created a persona as a funny foreigner, frequently garbling his Japanese in amusing ways and generally showing ignorance of Japanese culture. His schtick has been criticized as
* Japanese television personality Masaki Sumitani does not respond to being called by the name of his alter ego, Razer Ramon HG (a.k.a. Hard Gay, a.k.a. HG-kun). He has, however, left fans briefly, changed into costume, and "sent" HG-kun to fulfill their interview requests. * Japan has many areas of land unsuitable for development because they actually are naturally that rocky, infertile, and/or geologically unstable. Often these are found right at the bases of mountains, so when the scenes are shot with the mountain behind them it gives the illusion that they're actually below ground-level as you would expect from a rock quarry. And as they aren't owned, it's easy to cordon them off for shooting, especially for enormous battle scenes.

* Japan, or at least the major cities, is mostly shiny in the center with some dilapidated areas being dingy.
* Japan's 34-32 victory over South Africa in the 2015 Rugby World Cup was the biggest upset in Rugby World Cup history, and arguably in the sport's history. Two weeks earlier,
* Japan's current constitution in the aftermath of World War II, the Emperor is legally not allowed to abdicate the throne. When Emperor Akihito wanted to abdicate the throne due to him feeling he was too old to do the job, it took years of debate for the Diet (the Japanese parliament) to pass an exception to the law for him. In the past, however, abdicating the throne was very common and expected of the Emperor to do once he (or she) became old, with more Emperors having abdicated the throne than dying on it.
* Japan's defeat in World War II as a whole counts as this. Much of their post-WWII policy (most notably, their Constitution, which is mostly known for its ninth article, renouncing its right to declare war) and culture has been shaped by the country's experience during the war and its immediate aftermath.
* Japan's 'Divine Wind' similarly repelled invasions; attacks across the strait were crippled or destroyed by wind and waves.
* Japan seriously considered the change when then-Crown Prince (now Emperor as of 2019) Naruhito's daughter Aiko appeared likely to be his only child. Then his younger brother Fumihito fathered a son, Hisahito, and the discussion ended.
* Japan Sinks. It's also mentioned later in the series that the Philippines was heavily affected by the disasters plaguing Japan.

* Japan takes O to mean 'Yes' or 'Accept' while Western audiences would likely take X instead. Many developers seem to unable to figure out the coding for "soft" OK/Cancel buttons and the "hard" X/O buttons, resulting in about a quarter of the titles for the PlayStation library using the wrong buttons for your region. For the PlayStation 5, the X button is now used for the enter command in all regions including Japan. This can confuse Japanese PS5 players because of the meaning of the letter X in Japanese. This will also inevitably confuse players used to Nintendo controllers.

* Japan Takes Over the World: The whole world is somehow under the effective control of Japan.
* Japan, the "era" didn't necessarily correspond to the Emperor's reign and was often totally arbitrary; the system formalized in 1872. There's also a much less used system counting up from the ascension of the legendary Emperor Jimmu in 660 BCE (one reason why Japan was so keen on getting the 1940 Olympics in Tokyo; it would have been the year 2600 by this reckoning).
* Japan-Think, Ameri-Think until the author's Japanese wife stepped in and resolved the situation.

* Japan used to be neutral, too, and is implied to have been an economic superpower in its own right before the series began because it controlled some 70% of the world's sakuradite deposits. Japan played the world powers off each other since, if any one country invaded and conquered Japan, the other two would be forced to immediately attack it as allies or else face annihilation thanks to the overwhelming advantage the invading power got from all that sakuradite. Britannia invades Japan at the start of the series and gets around this problem by distributing the sakuradite in equal thirds to itself and the other two powers.
* Japan warnings (well, 10-15 seconds in advance, but it's better than most places) and also gives detailed tsunami warnings with a map of the hardest-hit areas. The NHK being a national broadcaster, it's also well-equipped to give emergency bulletins with information handed to them by the government. NHK alerts also include a data burst (which makes a "piro-piro-piro" sound on analog TVs) which includes second-language instructions for bilingual TVs, so instead of Japanese, you could hear instructions in English, Chinese, Korean, or Portuguese.
* Japan was also building 8-inch gun turrets that didn't have ships to go with them, ostensibly as spare parts for their heavy cruisers. In actuality, those 15-gun light cruisers were always intended to have their 6-inchers replaced by 8-inchers as soon as Japan could get away with it, as the turret mounts were of the same size. And those cruisers were
* Japan was also destroyed by Moses Magnum and Namorita in one of the Exiles arcs. Apparently
* Japan was another aversion, since foreign invasions were all but unknown. The first Japanese cities, Nara and Kyoto, were modeled on China's walled capital city Chang'an, but their planned outer walls were never built.
* Japan was protected by the Mongolian invasion of their islands by the same situation regarding the sea and the weather that saved England (mentioned above in the Britain example). These events are the origin of the term kamikaze (divine wind).
* Japan, which lists "Some Kind Of Fool" which is still unreleased, save a much later David Sylvian rerecording. The album plays "Burning Bridges", and a sticker was included to highlight this. As a result of its omission, the planned inner sleeve with lyrics was omitted entirely as it was too costly to remake the ones with the Some Kind Of Fool lyrics. Sylvian has repeatedly vetoed the release of the original due to dissatisfaction with his lyrics, much to fans' annoyance.
* Japan Women's Pro-Wrestling, aka JWP Joshi Puroreso, always had lighthearted elements but got wackier in 1992 after the majority of the serious "shoot" wrestlers left to form LLPW, with such highlights as "Princess" title belts, the
* Japan would attack the naval base at Pearl Harbor without issuing a declaration of war first repeat.
* Japeth's musical number. The cutting goes like this (italicized part is cut):
* Jap Habit was said to be a 3-LP set that also included a paper kimono and sushi samples.
* Jap Herron ends with Jap's wife Isabel Granger giving birth to a baby boy she names Jasper William.
* Jaqen H'ghar (who is a Faceless Man) kills two Lannister henchmen this way, making the first death look like the victim fell off of a battlement, and the second death look like the victim was mauled by his own dog turned rabid.
* Jaques himself counts, as his attraction to Argent is obvious (and the ongoing serial "Lord Mettlebright's Man" makes it clear he
* Jaran Series involves the vast Chapalii Empire, who simply absorb the Earth and humans into their Empire without effort or aggression. Even though they've received many technological benefits from being ruled by the Chapalii and very little in the way of drawbacks, the humans still rebel.
* Jarate, as the the jar itself always shatters when thrown without damaging anything except the victim's morale.
* Jardinains 2!, which reverses the controls of the paddle. Catching another one will set things right.
* Jardinains! with the powerup that looks like a banana peel and makes all the

nains slip and fall off their bricks. You can go on a mad nain-bouncing spree, but have to watch out for the flowerpots that the nains were holding and dropped when they fell.
* Jared, despite being very intelligent and a badass, is childishly selfish and obsessive.
* Jared Diamond on horses charging the US Army or the migrant cowboys. But this is limited to a few conflicts in the 1870s which involved a few thousand people all put together. For nearly 400 years, the hidden conflict between the races involved sneak attacks, back stabs, well poisonings, kidnapping of women and children and other nasty things which happen when two agricultural societies try to undermine each other in a quest for land and resources. It remained hidden as long as it happened on the fringes of the civilized world and among people who couldn't write.

* Jared Leto, he grew incredibly ripped, while also dyeing his hair green and shaving his eyebrows.
* Jared Leto that was cut as it didn't fit the film's tone. However, the cable version adds this scene back in to pad the film's run time.
* Jared, like his actor Zach Woods, grew up in New York. Woods obviously didn't have all the foster parents Jared did.
* Jared Loughner was initially ruled not competent to stand trial after the
* Jared murdered his own father, the fate of his mother is as of yet unrevealed, though it's likely she met the same fate.
* Jared Padalecki, explaining the presence of a cast for the next four episodes.
* Jared Padalecki has accumulated several over the show's fifteen-year run, but his most common ones are Moose, Padamoose, and Puppy. His first son Thomas was known as Padababy for a time, but this has fallen away as Thomas gained two more siblings in favor of just calling them by their names.
* Jared Padalecki, occasionally-bordering-on-manic public persona camouflages it pretty well, but it was exactly this that made some fans suspect that he was having troubles with mental illness even before he went public in 2013, with some even comparing it to Robin Williams.
* Jared Padalecki single biggest prankster on set, he's chatty and cuddly, and is generally likened to a giant puppy. Sharp-eyed viewers have noted that Padalecki and Ackles act more like the other one's character, down to Padalecki knowing more about cars than Ackles.
* Jared Padalecki, the twitter-obsessed douchebag who plays Castiel. Collins tweeted throughout the episode's initial airing, the same exact tweets the show's version is seen writing.
* Jared Padalecki, "With those big blue eyes, he can't play a demon. They're like, 'awww...he's too pretty'."
* Jareth himself and his Goblins; the film is essentially a changeling tale.
* Jareth removes his mask while the guests retain theirs, and yet he is often in close proximity to mirrors, including two which are held up to him on either side by masked women when Sarah first spots him.
* Jargon Debate: The dilemma of exactly how much jargon to put into a fic.
* Jargon File entry), "Film at 11" has taken on an ironic meaning, equivalent to "seen it many times already". "More at 11" is a common variant.
* Jarhead, but is not afraid of dishing out extremely harsh punishments, and so

qualifies. A better example would be Swoff's first drill sergeant, D.I. Fitch, shown briefly at the beginning of the movie, who smashes his head into a chalkboard when he talks back.
* Jarhead has a scene where two planes fly over the marines to the tune of "The End" by The Doors, only for Swofford to wail: "That's Vietnam music! Can't we get our own music?"
* Jarhead Swoff is drifting into this trope, and repeatedly references his need for 'the red mist'.
* Jarhead, the girlfriend of one of the marines keeps sending him sexy photos of her wearing his uniform jackets (and nothing else). One of the other marines eventually asks if she has any clothing of her own.
* Jarhead: The Marines are shown passing the time by getting two scorpions to fight each other to the death. The smaller one's death saddens its keeper quite a bit.
* Jarhead uses it almost realistically during its characters' training time. One grunt asks the stupid question-"Them paintball bullets...they hurt?" Cut to the answer.
* Jarhead when the Marines call in A-10 ground attack aircraft to provide support during a battle, only for the A-10's to mistake them for the enemy and nearly kill them all with the bombing run.
* Jarhead where the character Kruger (Lucas Black) is a Texan with a very thick accent and displays some of the tendencies above, but is by far the most outspoken critic of the military operation (such as the lack of free speech for soldiers and possible health dangers of the anti-chemical weapon pills they're given).
* Jar Jar Binks and adding the syllable "sa" at the end of every pronoun ("meesa" instead of "I am", "yoosa" instead "you are", etc.).
* Jar Jar Binks, etc. Needless to say, while this is more in line with the actual effect that the symbiote had on him in terms of increased physical strength, the power boost gets so absurdly exaggerated that it’s pure parody material. Therefore, while the original moviegoers turned him into a Memetic Loser, newer fans have begun embracing him as the opposite.
* Jar-Jar Binks flaws and barely has to mention Jar-Jar at all, making the unspoken point that Jar-Jar is hardly an asset, but it's unfair to blame him for singlehandedly ruining the film when there are plenty of other things wrong with the writing, acting, story, and direction.
* Jar Jar Binks got progressively less screentime in the prequels, and only a non-speaking cameo in the last film, but

* "Jar of Jellybeans" Contest: A contest focusing on counting or measuring to determine how much of an item is in a container.
* "Jar of Jellybeans" Contest: I'm totally going to guess the right amount of jellybeans in the jar before you do! 1, 2, 3, 4...
* Jaron and the Long Road to Love (really Jaron Lowenstein of Evan and Jaron) wrote a country song called "Pray for You". Though very few would mistake its meaning once the chorus starts.
* Jar Potty: Someone has to go to the bathroom but can't make it to a toilet in time, so they settle for relieving themselves in the first empty container they can find.
* Jarred Christmas has a bit detailing a prank he wants to play on his then-newborn daughter: Deliberately teach her to pronounce one word wrong, and hope that

she never encounters that word outside the house until she's a teenager, where she embarrasses herself at a party by saying it.
* Jarre has been a painter since he was a kid. Back then, he sold his paintings on Paris' famous flea market claiming his big brother had made them.
* Jarrett has had a moment like that of his own. He defeated Mark Starr on the August 17, 1997
* J'arrkn's co-worker points out that M'gann is technically an undocumented immigrant that's only there due to her connections to Manhunter.
* Jars of Clay has made such crossovers much more common in later years). It's also been the only song of theirs to ever gain any sort of mainstream support.
* Ja Rule, in a diss he made to Shady Records, spelled murder M-U-R-E-D-R. Swifty responded with, "You claimin' you a murderer but you spelled it wrong / You put E before the D because that's all you on."
* Jarvan IV can wield his BFL (Big Freakin' Lance) with 1 hand. This lance is as tall as he is (he towers above every other character except Nautilus by about 3 feet) and with only a couple of items he can swing it twice a second. There's also the mystery behind the fact that Jarvan can slam the earth so hard with it that the surrounding ground forms a ring without any visible damage to it, though it is implied to be made of dragon bones.
* Jarvan IV utilizes a combo where he throws out a flag, hooks it with his spear, and drags himself to it. Any enemy between him and his spear is sent flying into the air. As an added bonus, the combo is considered self-inflicted crowd control, rather than a dash like most other movement abilities, which means it cannot be stopped by snares or roots once it starts, which is the usual response to dashes.
* Jarvis Cocker, billed as "A song-cycle about a piano in a hotel room," centers around events from the Chateau Marmont in West Hollywood, written from the point of view of the baby grand piano in Room 29.
* Jarvis Johnson channel on all of Youtube, he at least gives them this much credit:
* JASF: Jane's Advanced Strike Fighters, for instance, some dogfighting skill is required, but you usually engage the enemy from several kilometers away. Most kills will come as you close with other planes, but regardless of how you kill you can only get a missile lock when the enemy is ahead of you.

* Jasmine Cephas-Jones (Peggy Schuyler/Maria Reynolds) and Anthony Ramos (John Laurens/Philip Hamilton) of the original broadway cast of
* Jasmine. Could be Jasmine, saving her future grandfather. Which would explain a lot of stuff behind Angel's motivation in Season 5.
* Jasmine developed a fear of clowns after a childhood incident where she saw an older child dressed as a scary clown.
* Jasmine explains it's due to people being intimidated about her size.
* Jasmine first taps the shoulder on one of the forty thieves who attacked the royal palace, and then knocks him out cold, much to the shock of the other gawking thieves.
* Jasmine goes through great pains to manifest as a beautiful black woman in this plane, but her real form, which can be glimpsed when she's feeding, involves green light and tentacles. Also, anybody who comes in contact with her blood will see her as a rotting corpse.
* Jasmine has quite the curtain of brown hair behind her, too. It goes past her waist, and sometimes it reaches her butt. It not only has a large length but a pretty decent volume as well, as demonstrated in the episode "Nerves of Steelix": when Magnemite is thrown all the way back to the gym wall, Jasmine's hair is completely blown around, giving quite the show, even if briefly.
* Jasmine, has the ability to copy all the other superpowers she is with-in range of. This being said her power is kind of useless against others with the same or similar ability. Jasmine has copied so many powers at once she seems to have no limit, she also tends to use them like 'toys' in some cases including copying the

power of a transmuter to transform junk into gemstones and the power of mentally interfacing with technologies in order to turn on her apartment's electronics and dial the phone without ever touching it.
* Jasmine in the Pokemon games is a sweet girl who nurtures a sick Pokemon back to health. Jasmine in the
* Jasmine is all but shown to be fluent in every language spoken, with her speaking English, Spanish, and Mandarin on screen, and casually stating that her being a fallen Power That Was allowed her to master spoken tongue.
* Jasmine is described in the having sunbrown skin in the books and the anime surprisingly matches it especially
* Jasmine's main teammates Ava Johnson and Danaerys Azeat also apply with extreme-heeled black ankle-strap pumps of their own, but in the forms of a Devious Femme-12 and Karo 0255 respectively.
* Jasmine's mother raised her with strict expectations but little support and no guidance on how to meet those expectations. She often berates her for minor misbehavior and is not above hitting her, and it seems she does so not to try to discipline Jasmine, but out of anger for impinging on her own life.
* Jasmine takes this trope to the logical extreme with good publicity through
* Jasmine. The most we could get from her true form was a shadowed mass of tentacles, and she's mentioned by her abandoned demon followers as the "Blessed Devourer." Those who are immune to her mind-control charms don't see her as a beautiful woman but as a corpse filled with maggots, and her true name cannot be pronounced by human words (Angel needed a stitched up demon follower because it was the only thing capable of saying her name and breaking the spell).
* Jasmine the stripper with a heart of gold, her cute son and her dog are running from the fireball in Los Angeles. While she has a good lead on it, the dog barely jumps out of the way of the fireball which fills the tunnel, just in time. Conveniently enough, the fire also fails to consume all the oxygen available in the confined space they take shelter in. And the explosion big enough to destroy most of Los Angeles fails to blast through the door behind which our characters are hiding.
* Jasminum Eugenia is stated to be five and Zdrówko is... hmm. Old (the actor was sixty five while filming).
* Jasnah begins the process of arranging one between Jasnah's cousin Adolin and her ward Shallan. She's initially worried that Shallan will be upset she was not consulted about this, but Shallan is actually surprisingly amenable. She always expected to have her husband chosen by her father, and the one time

* Jason Aaron's Avengers not having to fight in a highly sexualised form that means she has to make the jokes before the bad guys do, and it's a relief to drop being the funny, upbeat one and just get mad and smash things.
* Jason Aaron's Avengers, she acquires a hammer whose special amber, in combination with new meditation techniques learned from the Cotati survivors, allows her to shift into a much more feminine form, if still not her original muscular incarnation, that she says has all the strength of her "Fem-Hulk" form, but far greater intelligence and control. (Though this was revealed to be a Cotati wearing her skin) In the Immortal She-Hulk one shot, it reveals she's STILL in trauma over the Grey She-Hulk ordeal, and also dealing with the fact she may infact be immortal, though Al Ewing showed her as far more in control of herself despite the Hulk-speak than Jason Aaron has done.
* Jason Aldean, as his first two albums are usually considered his strongest, due to similar reasons as Bryan — those two albums were simply the countriest-sounding, and put out before Aldean became a big star.
* Jason Aldean is commonly met with this criticism, particularly with how most of his material since around 2014 has been rehashes of existing songs: "Gonna Know We Were Here" and "Just Gettin' Started" rehash "Tattoos on This Town", "They Don't Know" rehashes "Fly Over States", etc.
* Jason Aldean songs to escalate the Hot Country Songs charts only a few steps behind each other. By spring 2011, "Don't You Wanna Stay" had reached #1.

* Jason Aldean, was his only one not to produce a Top 5 country hit (although "Johnny Cash" and "Laughed Until We Cried" both just missed, at #6). It's also his weakest-selling album to date. However, he bounced back nicely starting with the third album and ascended to A-lister.
* Jason Aldean), "Why" now looks like much less of a Black Sheep Hit, but the other two still qualify.
* Jason Alexander), a genius who spends all his time playing chess in the park, insulting his opponents and complaining about everything. His life is a complete mess as he could never tolerate being around anyone who doesn't share his skill and indulge his ego, blaming his poor life on everyone else. The episode ends with him leaving and Malcolm complaining about him in the same manner Leonard complained earlier.
* Jason Alexander because he assumed it would have been a one-off role and didn't bother memorizing the character's name during the audition; he did grow to enjoy the show and his character during production, though.
* Jason Alexander struggled to act alongside Heidi Swedberg, who played George's on-and-off girlfriend Susan, and felt that his comedic sensibility was "off" in every scene they did together. He claimed that

* Jason and Peter are discussing a study about how video games make kids violent...and then mention how much they want to strangle whoever wrote that.
* Jason and the Argonaunts. Some myths also state that Jason refused to allow a woman on the ship, which meant that Medea would be the only woman on the voyage back.
* Jason and the Argonauts are watched, challenged and aided by the Gods in Olympus, who plot their movements on a game board.
* Jason and the Argonauts as the eponymous character in this Hallmark miniseries. From being told that his uncle killed his father to nearly drowning, he has the same nauseated look.
* Jason and the Argonauts, Atalanta prepares to confess her love to Jason and is overjoyed when he replies that he loves her too... but has a decidedly different reaction when Jason goes on to say that they are this trope (he actually says "you've always been as dear to me as a brother", ouch).
* Jason and the Argonauts; etc. The other 39 varied in individual skills and abilities.
* Jason and the Argonauts has the Argonauts pursued by an army and come across a ravine. One produces a rope with which to climb down, but Jason has a better idea, tying the rope to a shield and asking Hercules if he's any good at the discus. Once the shield is thrown, the Argonauts cross on the improvised zipline, only waiting for the enemy to start crossing to cut the rope.
* Jason and the Argonauts. In a later scene, when the Argonauts are in trouble and another character suggests that he pray for assistance, he replies that he would rather depend on his crew's abilities than on gods who play with mortals for entertainment. "The gods of Greece are cruel. In time, all men shall learn to do without them."
* Jason and the Argonauts leaves out Aphrodite but has Hera ordering Eros to shoot Medea with one of his arrows and make her fall in love with Jason. This version portrays Eros as being made completely of fire.
* Jason and the Argonauts movies. One wouldn't exactly call those Amazons "man-hating", but they did have a law on the books that required the men's deaths.
* Jason and the Argonauts one (he clearly thinks of her as a man rather than a woman). Though despite this, Atalanta does attract one man.
* Jason and the Argonauts steals a giant pin on the Isle of Bronze, which awakens the titan Talos. When Talos is defeated, he falls and crushes Hylas. Hercules leaves out of guilt; Hera explains this is actually because Zeus has other plans

for Hercules at the moment.
* Jason and the Argonauts, Talos is a huge living statue who is apparently invulnerable until Hera puts Jason wise to the plug on its heel that is its weak point.
* Jason and the Argonauts while Jason goes around to get his ankle. Oh, and those two guys who admittedly put up an admirable effort (but still both die) against the skeletons at the end. Oh, and that one guy who jumps in the sea after the traitor Acastus and subsequently gets killed in an underwater fight by said traitor.
* Jason And The Argonauts, who Zeus punished by having his harpies defile his food.
* Jason And The Intragalactic Troubleshooters: In the climax of book 3, Jason dons the duck hat (a hat with a fake duck on it) he'd bought earlier in the book and bluffs the villains by claiming to be "Inspector Duckles of the Galactic Police, Bat and Duck Division", using his library card as a pretend badge and having knowledge of their previous (failed) plot to rob a certain location. General Batso falls for this imposture, allowing the heroes to escape.
* Jason asks his mom if he can keep playing a driving game for a sec. He later clarifies that he meant
* Jason as the quest leader, Piper as the Native-American love interest and Leo as the Latino Best Friend.
* Jason Bateman episode "Afternoon Delight". The episode is "standard fare" (as in, a show with a large ensemble where the majority of the characters gets a subplot each).

* Jason Bourne averts an assassination by turning a spotlight to where the sniper is hiding, causing him to miss his shot.
* Jason Bourne, Bourne is shown knocking an opponent out in a single hit during a illegal fight.
* Jason Bourne was a veteran of Vietnam, although the newer films have noticeably avoided this.
* Jason Bourne, where he steals someone's motorcycle to pursue an assassin.
* Jason Chan auditioned for the role of Dustin before being cast as Cam.

* Jason Cosmo and its sequel, mages supposedly have fast recuperative abilities and enhanced stamina (apparently the result of magical energy constantly pouring into the body), but we virtually never see any evidence of this, with the exception of the Lancer of the story, arcane master Mercury Boltblaster. Mercury has the excuse of spending much of his life travelling to obtain the finest education in the world in martial arts and swordsmanship, to avoid having to depend on spellcraft. As he spends much of the books either unable to cast spells or unable to do so without calling hostile and (ludicrously) overwhelming force to his exact location, this turns out to have been an excellent use of his time.
* Jason Costello, the show's first trans character, worried about how his decision to transition would affect his relationship with boyfriend Bart McQueen. Bart turned out to be bisexual and still wanted to date Jason.
* Jason Cramer's crime flashback shows that he was arrested after he attempted to send a package containing the decapitated head of his lover (to where he was trying to have it sent isn't clear) and the clerk noticed blood seeping from the box.

* Jason David Frank finale. The production flew them all first class to Auckland, New Zealand for a few days.
* Jason David Frank was so that his still not-yet-born daughter could watch him later.
* Jason Derulo has sampled some rather unfitting songs for his own music on more than one occasion:
* Jason Derulo". Neither song is as iconic as 2014's "Talk Dirty" (featuring 2 Chainz), which only peaked at #3, or 2015's "Want to Want Me", which peaked at #5.
* Jason Derulo's 2013 album "Tatoos" wasn't released in Jason's hometown of the US, but instead as a 5-track EP with only some of the songs from it. It was eventfully released as "Talk Dirty" months later, with a modified tracklist. In the case of Tatoos, the new songs from Talk Dirty were later added to that album for an Europe-only
* Jason Derulo - "Whatcha Say": the narrator is the one caught cheating.
* Jason describes his career: "I wasn't a failed DJ. I was pre-successful."
* Jason describes Jacksonville as "easily one of the top ten swamp cities in northeastern Florida."
* Jason doesn't quite get how it works. He suggests that if he and Pillboi get caught robbing a restaurant, they should just marry each other and then nobody will be able to testify against them.
* Jason Donovan by making and releasing his fourth album with Polydor called "All Around the World". To make a long story short, fans that were used to his clean image didn't like his new image. It didn't help that he sued a magazine months later for accusing him of lying about his sexuality and being a hypocrite (he was actually right,the accusations were actually untrue), thus making a majority of his fans undeservingly turn their backs at him.Thankfully, the encounter between him and his wife and the birth of his first daughter let him have a chance to clean himself up again and lead a normal and decent life.
* Jason Donovan had brown hair in the music video for the song "Hang on to Your Love" because he was taking a break from filming another miniseries.
* Jason Ellis, Australian skateboarder and radio host. Admits that he has had relationships with other men and identifies himself as bisexual.
* Jason Faust also auditioned for the role of Carter before being cast as Wes in
* Jason Friedberg and Aaron Seltzer takes this further as the duo has now resorted to producing their movies on even tighter budgets than their Hollywood titles, and don't even release them theatrically.
* Jason Gideon left the agency due to emotional stress and growing pessimism due to the cases he was working. This reflects actor Mandy Patinkin's growing disgust with the show's grim content.
* Jason Goes to Hell, its arguable Stephen is more the main protagonist than Jessica.
* Jason Goes to Hell: The Final Friday, at which point he becomes possessed by the spirit of Jason and resumes the killing spree.
* Jason Goes to Hell: The Final Friday bounty hunter decides that for every question, the protagonist must have one finger broken.

* Jason Goes to Hell: The Final Friday evolves into a small creature which does this to take over bodies.
* Jason Goes to Hell: The Final Friday impales a person possessed by Jason with a fire poker, the guy starts thrashing around and ends up crashing through a window.
* Jason Goes to Hell: The Final Friday is a bounty hunter who specializes in capturing serial killers.
* Jason Goes to Hell: The Final Friday, Jason kills Vicki by squeezing her head between her palms until he literally pops it like a zit.
* Jason Goes to Hell: The Final Friday, movie 6 was originally planned to include an appearance by Jason's father Elias (who would have bribed someone to have Jason properly buried rather than cremated after the fourth movie), and the scene was included in the novelization. It was cut from the final film though.

* Jason Goes to Hell: The Final Friday. Outside of Jason's old, abandoned home is a small playground where the protagonists battle Jason at night.
* Jason Goes to Hell: The Final Friday revealed that Jason and his mother regularly had sex with each other, with this revelation even having an accompanying flashback of them doing it.
* Jason Goes to Hell: The Final Friday, the former one graphically rots away.
* Jason Goes to Hell: The Final Friday. The host bodies die after Jason leaves them (oddly enough, NOT from the damage they take while he possesses them).
* Jason Grant debuted in #88 (February, 1970). He also headlined issues #89-90 (April-June, 1970). The story had a young man on a personal quest. In a

* Jason Jordan: Debuted (both overall and in WWE) in 2011. Hit the main roster in 2016.
* Jason Keltner mysteries start out as a starving musician, a starving artist, and a starving actor, and get drawn into mysteries when Jason is set up to take the fall or otherwise fail. Years later they become comfortable on steady commercial work; far from starving, but also far from what they envisioned as a success.
* Jason King (1971–72), in which Wyngarde portrayed a foppish writer who is often mistaken for the hero of his adventure novels.
* Jason King: a pair of safecrackers use a technique they learn from one of King's books; one brand of safe has a design flaw which means that all they have to do to open the safe is hit the centre of the dial with a hammer, causing all the tumblers to fall into place.
* Jason King. King is adapting one of his adventures for a TV series. The television executive insists that the hero should have a sidekick, who is first portrayed as a white guy, only to change to a black guy to go with the latest trend, then ending up with an Asian guy to get a wider potential audience.
* Jason King. King is a novelist who is adapting his adventure series for an American TV network, but the executive he's pitching to insists on dumbing it down.
* Jason King was the television embodiment of the late '60s/early '70s British dandy.
* Jason Lee was a prominent professional skateboarder before becoming a full-time actor.
* Jason Lee was originally cast as Loki. Scheduling confilicts meant he had to take the smaller role of Azrael.
* Jason Lives, has him boarding a ship and then sinking it with him still aboard, then trudging through the ocean waters to follow the survivors to New York. There, he's finally stopped by getting dissolved in toxic waste, and even that merely de-ages him back to an adolescent boy.
* Jason Lives, Jason's killing blow to Paula sends her crashing through a window. He then pulls her back inside for further mutilation.
* Jason Marsden late in development in the first game. Marsden's version of "Nice

job, little dude!" was left in a commercial.
* Jason Martin has said that "I Was 17" was his favorite song from the
* Jason "Mastermind" Wyngarde. Two of his three daughters are even better at it, being able to reinforce their illusions via telepathy (the third has different powers, which include inducing hallucinations but decidedly do not qualify for this trope since the hallucinations are completely random).
* Jason McElwain was the autistic student-manager of the Greece Athena HS (Rochester, NY) basketball team. For the team's last home game of the season on Feb. 15, 2006, McElwain was put on the roster so he could be given a jersey and allowed to sit on the bench. With four minutes left in the game, and Greece Athena leading by double digits, coach Jim Johnson put McElwain in the game, who dropped six three-pointers. McElwain's treys weren't relevant to the final outcome, but otherwise it was one of greatest
* Jason Mcnamara is Carmen Lopez's on again off again love interest on
* Jason Mewes is more or less playing himself, as Jay was Kevin Smith's interpretation of Mewes when he was a teenager, with a little of Smith's talkative mother thrown in. Silent Bob, in turn, was loosely based on Smith's late father, who only ever spoke up when he had something particularly witty to say.
* Jason Mewes, on the other hand, is anything but silent when not playing Silent Bob.
* Jason Michael Carroll garnered tons of buzz for his debut single "Alyssa Lies". While it is his highest chart entry on Hot Country Songs at #5, it's
* Jason Michael Carroll: His first two hits, "Alyssa Lies" and "Livin' Our Love Song", were also his only two big ones. He never saw Top 10 again, and abruptly left his label not long after the release of his second album.

* Jason Michael Carroll's song "Where I'm From", it turns out that the rich businessman for whom the small-town protagonist has been an airliner seatmate is from a similar small town background, including quarterbacking his high school football team to a state championship in 1963.
* Jason Miller, at the time the still-struggling writer of a hit play who'd never acted in movies, asked
* Jason Miller, who played exorcist Father Karras, lived in a Jesuit seminary for a while to totally immerse himself in the manners and mind-set of a Catholic priest. A senior Jesuit who felt the film's subject matter was just asking for trouble gifted Miller a protective amulet of the Virgin Mary and explicitly warned him that there would be trouble ahead. A day or two later, Miller's eldest son was critically injured in a road accident.
* Jason Momoa earned him a legion of fans for his incredible physical presence, which should easily overshadow any "Aquaman is a weakling" memes.
* Jason Momoa reprises his role in "Valar Morghulis", exactly one season after his character was killed off.
* Jason Momoa was slashed in the face with a broken beer bottle during a nasty bar fight. 140 stitches and one reconstructive surgery later, all that remains is the small scar in the middle of his left eyebrow. It could easily be filled in with makeup, but it's so distinctively badass that it has become the actor's signature feature, and it's present in all his roles.
* Jason Mraz actually has had three Top 40 hits, yet only two of them are remembered today: 2003’s "The Remedy" and 2008’s "I'm Yours". The former was his first hit of all-time that reached #15 on the Hot 100 and afterwards he faded out of public consciousness and became a one-hit wonder. However, that later changed when he made a comeback with the latter song, which became a hit five years later and far outpeaked "The Remedy", and undoubtedly remains his biggest hit of all-time. He had a third hit in 2012 with “I Won’t Give Up”, but it was quickly forgotten.
* Jason Mraz: Pop/alternative singer-songwriter who came out as bisexual in 2018.
* Jason Mraz's song "The Dynamo of Volition" has this line: "Singing heck is for the people not believin' in gosh"

* Jason Mraz's "Wordplay" is about the singer being pressured to make a new song and writing a refrain full of nonsensical syllables.
* Jason Mraz to have been "The Remedy", right? Nope, that only made it to #15. It was actually 2012's "I Won't Give Up", which isn't nearly as iconic.
* Jason Mraz: "Well, I can save you from unoriginal dum-dums/Who wouldn't care if you come...plete them or not."
* Jason once agreed to play chess with his father, and immediately rattled off both his and Roger's moves and thanked him for the good game, leaving Roger thinking he might have gotten too predictable.
* Jason once set up a computer chess game where Roger had 16 queens and the AI had 16 pawns. Guess who lost.

* Jason Russell's bizarre arrest didn't help things for Invisible Children either.
* Jason Scott was going to upload an archive of TEN MILLION 4chan threads, but apparently backed out.
* Jason's coworker Penny regularly seduces her male students. This bites her in the ass later when Joe's 'Do-List' is leaked, with enough of a description of Penny that her bosses figure out right away that she slept with him, and fire her.
* Jason's daughter Penelope, who took the role at the age of twelve, and later assumed Donna's old identity as Troia before becoming the third Wonder Woman.
* Jason's efforts to dump his lawful wife Medea (who had allowed the Argonauts to escape the land of her father Aeetes) for another woman costs him Hera's favor and leads to his disgrace and eventual death.
* Jason Shepard, aka Lightstorm, is this. Despite losing his powers before the beginning of the story, his intelligence is so great that he can use ordinary human tech to create Moon Kingdom-level weapons and armor. He's also one of the deadliest fighters known to exist.
* Jason Shiga author. He may or may not have shown up to receive his Eisner Award. The jacket blurb on one of his books claims that man was an impostor. He does have an active Twitter account, however.
* Jason situation so the colonists arranged to hire a fleet of FTL frigates to secure the system for them once the tech became widely available.
* Jason's life went really went downhill" thing. Years later, when he'd been abandoned by all, he found the rotting wreck of the Argo, the ship that had carried him to glory and now lying forgotten and useless, much like himself. He fell asleep under the wreck, and the prow fell apart and fell on his head, crushing it.
* Jason Statham, he needed a street-wise seller. Lo and behold, there's Statham. Part of his audition involved improvising a scene in which he refuses to give Ritchie back his money for a purchased watch.
* Jason Statham persona, playing a complete buffoon, bragging about surviving ridiculous injuries, and bursting in to save the day, only to get his overcoat

* Jason sustains a nasty hit on the head which has him disoriented and hallucinating. He lies about the symptoms to his doctor because he does not want to be taken off the team. When he returns home, the injury flares up again and he has a nasty episode in a restaurant that puts his future as team leader and SEAL in question.
* Jason Takes Manhattan through a cabin window, but she manages to deter him by stabbing him the eye with an ink pen.
* Jason Takes Manhattan tries to evade Jason by running into a derelict building. Unfortunately, Jason has teleported ahead of him and throws him through a window back outside.
* Jason Teague: He's a good-looking football coach, secretly dating one of the hottest girls in the school. His family is rich, he's a former star player himself, and he's able to lie and cheat at Lex's level. Unfortunately, he's pretty eaten up by his mommy issues, has no self-esteem, and is nearly incapable of taking any action his
* Jason the Terrible. Gimmick turned up in Puerto Rico, Japan, and various independents.
* Jason the Terrible (Karl "Butch" Moffat, the first guy in the gimmick, was born in Windsor, Ontario.)
* Jason the Terrible. There have been several other wrestlers who have done the Jason gimmick since.
* Jason threatens to sue Richard after he and Jason's father essentially destroy his livelihood, just in time for the Luke/Lorelai relationship to finally happen.
* Jason ties the ends of his spaghetti noodles together so he can eat them all in one long, unending slurp. Andy adds spaghetti to the list of things she can no longer make for dinner.
* Jason Todd, a longtime Batman that fans came up with in regards to he was. While there's some slight changes to his motivations and backstory, he's essentially the same character.
* Jason Todd and Roy Harper have become the victim of this multiple times in
* Jason Todd could wipe the floor with him that may be out of a sense of self-preservation.
* Jason Todd, murders the first people he sees and flees off into the night. Later played with.
* Jason Todd's got national coverage due to the fact that most people thought it was Dick Grayson who they were voting to kill off, and likely resulted in him getting more votes.
* Jason Todd, so this isn't quite as egregious as some other examples.
* Jason Todd who he sees as his replacement and whom he's tried to kill on several occasions. Ironically, he's much closer personality-wise to Damian who is Bruce's sole biological child.
* Jason Todd, who over saw the event, that the votes were rigged by one person who wanted to see Jason die.
* Jason tried to stage an extremely poorly-thought-out robbery that ended with him suffocating to death in a fake safe because neither he nor his accomplice thought to put air holes in it. Not helped by Jason
* Jason uses a badass moustache as part of his gentleman disguise in

* Jason Voorhees features long-yet-thin strands of hair in the back of Jason's head.
* Jason Voorhees is revealed to be deathly terrified of water, due to him drowning as a child. A fair enough reason in-and-of itself, if not for the fact that his murders often involves him having to wade through/being thrown in large bodies of water.
* Jason Voorhees — they just happen to (usually) have been around long enough that nostalgic adults appreciate them too.
* Jason Voorhees never actually used a chainsaw at any point in the series, his
* Jason Wander series is the leading expert on the aliens' humanity is currently at war with, and occasionally lapses into this mode of speech. Lampshaded by Jason, who speaks normally but has good verbal skills, when discussing an alien device. Howard describes it as "a metallic, oblate spheroid." Jason translates this as "a tin football."
* Jason was catatonic after his resurrection, he only started talking and doing things of his own volition again after a dip in a Lazarus Pit and he's much more violent and anger driven than he was before his death.
* Jason was strong enough to overpower two fire-breathing bulls at the same time. The only help he got was Medea giving him a potion to make him fireproof.
* Jason Whittaker (Whit's son) and Jack Allen (Whit's childhood friend) have a clear friendship from their first on-air meeting in Album #22. Due to their being created as two different sides of Whit's character, however, their bond is somewhat strained by their disagreements about taking action or risks (which comes to a head in the "Darkness Before Dawn" saga).
* Jason Wood. A data and image analyst, he has built a huge library magical and supernatural creatures from folklore and other sources and makes use of that to both counter and communicate with them.
* Jason Wood, the hero, after facing creatures Immune to Bullets for 5 of 6 short stories, finally encounters something that can be killed by firearms, prompting him to declare, "Well, praise the Lord and pass the ammunition, will wonders never cease; a horror from beyond time that I really can just shoot dead."
* Jason Wyngarde got this in the 90s; after contracting the Legacy Virus he finally realizes the pain he's inflicted on so many and so tries to make amends. Though his powers make things go wrong he ultimately manages to redeem himself by saving Jean Grey from dying alongside him.
* Jason X and instead convinced the director and writer to go with the slow kill instead.
* Jason X (a shuttle Jason had gone on a rampage in) before it crashed into a nearby planet. The last log was made by the ship's hiding and rambling cook, and ends with Jason bashing through the door, and horribly murdering him.
* Jason X as the government couldn't find a way to execute him given his immortal nature.
* Jason X, a virtual reality simulation meant to distract Jason creates a pair of scantily clad teenage girls who exclaim (among other things), "We love premarital sex!" (It works, temporarily.)
* Jason X back with him (and crack jokes about it while doing so) is definitely this trope.
* Jason X has college students of the future and their professor going on a field trip to a ruined Earth.
* Jason X: Having failed to execute Jason Voorhees, near-future humans somewhat successfully freeze him, leaving the problem for far-future humans to solve.
* Jason X, humanity left Earth due to pollution and has resettled on a new planet called Earth Two.
* Jason X is decapitated by Jason, her head is retrieved by her creator and hooked up to the ship's computer.
* Jason X: It's implied that Kay-Em is the sex partner of Tsunaron, her owner/creator. He also happens to be the most socially withdrawn of the students. His classmates are too busy screwing each other, screwing their teacher, or getting butchered by Jason.

* Jason X, Jason disappears in the middle of a hail of gunfire when the lights momentarily go out.
* Jason X). Jason punches a hole in the hull of the ship, causing one of the characters to die this way. We don't see anything beyond some scraps of flesh on a vent, but the line is the standout of the scene.
* Jason X Special attacking him. She then possesses the machines which are being used to study Jason's regenerative abilities and helps him to escape.
* Jason X Special is eventually revealed to be almost entirely staffed by androids, much to dismay of his mother's spirit, who wants proper revenge for her son.
* Jason X, the android Kay-Em gets her head knocked off by Jason during the climactic battle. After Jason is killed at the end, Kay-Em's disembodied head is being carried by one of the other surviving heroes, and she states, "I'd clap, if I could."
* Jason X, two guys playing a holographic video game have their characters (controlled mentally) killed by Jason, so they quit in frustration. It doesn't take a genius to realize how events played out after that.
* Jasper and several other villains were created on Earth to fight against the rebellion.

* Jasper Carrott and then mother says slowly "I meant his balls on the lawn".
* Jasper Carrott did a routine referencing this about how if a group of British people go to any far-eastern restaurant somebody in the group will impersonate the waiter too loudly "Flied lice, ha ha ha! As if he's deaf! He gets it every night of his life. He goes straight to the kitchen and pisses in the soup, it's your own fault!"
* Jasper Carrott did a stand-up routine about the Balinese allegedly hating to answer "No" to any question, leading to a conversation like:
* Jasper Carrott has a bit where he goes through an unfeasibly long list of euphemisms for sex, breasts and the penis. It is GENIUS.
* Jasper Carrott has a routine about visiting Hong Kong with friends and visiting a restaurant where people ordered by pointing at animals in cages. An animal would disappear into the kitchen and a little later would reappear cooked on a plate. Carrot noticed a scruffy dog sniffing around the street tables. His friend nudged him and said "For Christ's sake don't point at it!"
* Jasper Carrott, in which, among other things, aspersions are cast as to prim and proper Florence's sexual preferences.
* Jasper Carrott, known for his schtick of finishing shows by reading out absurd insurance claim forms.
* Jasper Carrott parodied the song with 'Day Trip to Blackpool', in 1981. While 'Day Trip to Bangor' was about what a lovely time they had there, 'Day Trip to Blackpool' is the exact opposite.
* Jasper Carrott, they'd be so shocked that you could brainwash them and build up your own private army.
* Jasper Fforde, a detective story using nursery rhyme characters. "The entire crime-fighting fraternity yesterday bade a tearful farewell to the last 'locked room' mystery at a large banquet held in its honor. The much-loved conceptual chestnut of mystery fiction for over a century had been unwell for many years and was finally discovered dead at 3:15 A.M. last Tuesday." Then it turns out that the locked room mystery was murdered... in a locked room.

* Jasper Fforde, the eradicated Landen talks with Thursday in her dream.
* Jasper Fforde, Thursday went back to get the wounded against orders. If the press hadn't gotten wind of it, she would have been court-martialed.
* Jasper Fforde, when Landen is eradicated, Thursday assures his parents that they would have been proud of him.
* Jasper In Deadland, and Cerberus, Pluto, Charon, Eurydice, and Persephone from Greco-Roman mythology.
* Jasper In Deadland, drinking the water of the River Lethe erases your memories the more you drink.
* Jasper In Deadland, Mr. Lethe is furious that he was only given dominion over his namesake river while the other gods got better deals, and plans to overthrow the Roman pantheon starting with his boss, Pluto.
* Jasper In Deadland, when it looks like only Jasper or Agnes will be able to return to the land of the living, Persephone agrees to stay with Pluto for one more day if he agrees to let them both back.
* Jasper. While he dons a white armor, he primarily uses Zam-type spells (Darkness Spells) in both cutscenes and boss fights to highlight his sinister nature.
* Jaspion (even the distributor of the show admitted, adding that they preferred to licence it to Glasslite instead of importing the Japanese toys).
* Jasprosesprite^2, who is part cat, part eldritch princess doll, part girl, and two parts game sprite.
* Jasshinism encourages its priests to drag out the suffering of their victims as long as possible before killing them. Experiencing the pain of his dying victim has an almost narcotic effect on Hidan; only when extremely angered or pressed for time will he make their deaths clean.
* Jaswant's departure from the Shindurian court to serve Arslan can count as this, as long as Pars and Shinduria are not at war. Jaswant loves his country but does not wish to serve its current king. He also maintains that he is not loyal to the Pars royal family but to Arslan as a person first.
* Jataka Tales are presented as folk tales being incorporated into sermons given by the Buddha, in the context that the hero of each tale was one of the Buddha's previous incarnations. Each tale typically concludes with the Buddha tying it to Buddhist scripture in some way.

* Jaune and his sisters all have Grimm "parasites" implanted in their bodies. Despite their names, the parasites don't weaken or control them at all, merely acting as advisers and translators for the Grimm. They also produce and control the
* Jaune and Pyrrha at the finale of Volume 3...few moments before Pyrrha be killed by Cinder in battle.
* Jaune and Weiss have to pretend to date because of her sister Winter rather than faking an epic romance.
* Jaune and Yang mock the security Ozpin put on the relics, wondering why he'd put each relic in a vault that can be opened by a single Maiden. Especially since she is determined by who the last woman under thirty the previous one was thinking of as they died. The Maiden doesn't even have to be willing to open the vault, merely present. They ponder why he didn't just use a combination lock or have the vaults require all four Maidens be present, noting that the only dumber idea would be

* Jaune Arc, Lord of Hunger, and carried out countless assassinations during the Great War. They were eventually wiped out by Vale's army after word of their crimes reached King Osmund (one of Ozpin's former incarnations).
* Jaune Arc, Lord of Hunger. As his final order, Ironwood promotes his second-in-command Winter from Specialist to Brigadier General, entrusting her to replace him as Atlas' military leader should he die.
* Jaune Arc, Lord of Hunger as it faded away into the Force. To keep himself anchored to the mortal realm, Nihilus bound his soul to his mask, which his spirit continued to haunt for several millennia. Anyone who touches the mask ends up possessed by Nihilus's Force ghost.
* Jaune Arc, Lord of Hunger beneath the remains of the airship, and Blake and Weiss go MIA.
* Jaune Arc, Lord of Hunger galaxy. Additionally, both Aura and the magic on Remnant are revealed to be extensions of the Force.
* Jaune Arc, Lord of Hunger has Alixandre Arc, Jaune's great-great-grandfather who fought in the Great War. Early in the story, Jaune also mentions having a younger sister named Amber Arc.
* Jaune Arc, Lord of Hunger. He proceeds to drag a half-naked Ren over to his bed before telling him how he feels as though he's formed a close bond with him. Ren misinterprets this as Jaune trying to hit on him before the latter clarifies that he wants advice on dating girls.
* Jaune Arc, Lord of Hunger in his head. He is then interrupted by the sound of rustling in the nearby bush. When he investigates, he finds that the noise came

from a harmless bunny.
* Jaune Arc, Lord of Hunger into Remnant's atmosphere, the mask's container crash-lands near a monastery. The monk who finds the mask assumes it's a gift from the Brother Gods and converts his religious sect into a death cult centered around worshipping Nihilus's mask.
* Jaune Arc, Lord of Hunger is activated, creating a black hole above the battlefield that starts sucking everything in.
* Jaune Arc, Lord of Hunger, Jaune starts having dreams of Darth Nihilus's past as a Jedi after finding his mask.
* Jaune Arc, Lord of Hunger moment, he tries to excuse himself from the conversation by claiming that he hears his friend Nora getting caught in a vending machine.
* Jaune Arc, Lord of Hunger, Nora loves to annoy Pyrrha by teasing her about her obvious crush on Jaune.
* Jaune Arc, Lord of Hunger of Dust rounds mid-air and then uses them to form a protective dome around himself.
* Jaune Arc, Lord of Hunger, offers to take him up as her apprentice so she can teach him to control his powers.
* Jaune Arc, Lord of Hunger of the story, there are several Greater-Scope Villains present in the setting.
* Jaune Arc, Lord of Hunger: Played with. Darth Nihilus refers to the humans of Remnant as "Remnantians" since he's from a setting where naming one's ethnicity after their home planet is standard practice. However, Remnant's humans simply refer to themselves as "humans" because as far as they know, they're the only humans that are around.
* Jaune Arc, Lord of Hunger proficient in various fields including Sith magic, alchemy, and history.
* Jaune Arc, Lord of Hunger: The fanfic's premise is that the titular protagonist gets possessed by evil spirit of Darth Nihilus.
* Jaune Arc, Lord of Hunger. Unaware of the danger behind him, Adam assumes that she ran away because she's afraid of him and he angrily calls her a coward. As he is about to give chase, he hears the sound of footsteps behind him. He then turns around and finally sees what actually caused Winter to break off their duel so suddenly.
* Jaune Arc, Lord of Hunger: When Jaune visits Team RWBY's dorm to ask Weiss out to the Beacon Dance, he starts off by asking Weiss if they can speak in private. Weiss' teammate Ruby eavesdrops on their conversation and tries to hide it by pretending to read a magazine, unaware that she's holding the magazine upside down.
* Jaune Arc, Lord of Hunger when she leans over his hospital bed to adjust his pillow and unknowingly smothers Jaune's face with her bosom.
* Jaune Arc, Lord of Hunger, with members from all three groups pointing blasters at each other. Omega refers to the situation as a "Tatooine standoff".
* Jaune Arc's greatest strength. He lacks any combat background, unlike the main cast, which makes him one of the weakest characters in the series. Even so, despite the visible gap of ability between Jaune and almost every opponent he encounters, he has never backed down from a fight and, once he engages, there's no way to intimidate him or make him give up. Pyrrha once comments that she's never met anyone with as much drive to better themselves as Jaune.
* Jaune Arc started out so weak he couldn't even pull Pyrrha's spear out when it pinned his hood to a tree. When Pyrrha awakens his Aura abilities, he becomes strong enough to block strikes from monsters with one arm and has no increase in muscle.
* Jaune Arc, which is a major plot point for him. As the only son in a family of daughters, he wants to be like his father, grandfather, and great-grandfather and become a Huntsman. However, he's uncoordinated, clumsy, weak, gets motion sickness, has absolutely no idea how his Aura works, and, worst of all, he lied on his entrance papers to get into Beacon. When Pyrrha tries to help him, he snaps at her for doing so. However, after being blackmailed by Cardin after he overheard everything, he finally grows a bit of a backbone, swallows his pride, and asks

Pyrrha for help.
* Jaune at first appears to just be a lovable idiot who's there for comic relief, but later events show him as deeply troubled at his lack of skill, desperately seeking to be a great warrior despite not having the training for it, and hating the fact that he doesn't measure up to his teammates and friends. He's also revealed to know how to play the guitar and is a skilled dancer (he grew up with seven sisters, apparently).
* Jaune believed that Ruby cheated one him at least twice to conceive their children and has started to do so again due to a variety of factors in his life and their relationship. In fact, Ruby had gotten pregnant through secretly visiting sperm donation clinics in an attempt to spare Jaune’s feelings about his infertility, assuming that he didn’t know about it, having secretly gotten him tested. Of course, some would argue that this is still cheating and not simply a gigantic misunderstanding since cheating can be argued to be wholly about the betrayal of trust and not the physical aspect at all.
* Jaune blames himself for his family's deaths (not without justification) in
* Jaune, due to being raised completely away from human civilization with only his family around. He does get better eventually, but it takes him a while to learn that "sleep with" is a euphemism for sex (since sex doesn't involve much sleeping), and mistakes Yang's joking "it's a date!"
* Jaune falls into some black goop, and tells Pyrrha and Jeanne not to tell anybody.
* Jaune has created a special kind of alcohol for Huntsmen that tricks their Aura into thinking it's beneficial, which means the already extremely strong liquor is spread through their system far faster due to their Aura helping it along. While mere potent alcohol to normal people, a Huntsman will get completely hammered after a shot or two in mere seconds.
* Jaune himself blushes a bit when Sun winks at him and continues to coo over him.
* Jaune himself starts to suffer from this problem later on in the story. A lot of his stronger powers are ridiculously potent, which also means he can't use them where there is potential for collateral damage.
* Jaune in midair with no landing strategy. He crashes into the ground, but at least cushions Weiss on the way down.
* Jaune is ashamed that when four men broke into his cafe and beat and robbed him, all he could do was beg for them to stop. Upon hearing this, the Malachite twins explain that in his situation, all he could do was fight, give up, or do nothing. Alone, unarmed, and with no experience, he couldn't hope to fight against four armed men. Doing nothing, aka stoically taking the beating, would tell them they hadn't beaten him enough. The only viable option was to give up and let them know he was giving up.
* Jaune is a sweet nice guy who is more suited to healing his friends than fighting. Naturally, he also gets this with the villains.
* Jaune is the object of affection for Ruby, Pyrrha, Yang, and Velvet. He doesn't even notice. Cinder is a
* Jaune — being unaware of Pyrrha's feelings for him — sees nothing wrong with pouring out his romantic woes to her. Later, in a much more serious situation, Pyrrha opens up to Jaune about how she's always felt it was her destiny to save the world, and how she recently found a chance to do so. What she doesn't mention is that it will likely come
* Jaune provides an example of both a charismatic and levelheaded leader in
* Jaune qualifies to some extent. He's the least fit between friends and allies, but give him proper guidance and he'll show himself pretty capable.
* , Jaune screams about how she's "some crazy woman who kidnapped him and had problems with men". Cinder's inner monologue makes it clear that she doesn't have any problems with men while not exactly denying the other parts of Jaune's accusation.
* Jaune screams, "Are you kidding me!?" when Neptune uses the same failed pickup line that he once used on Weiss and it works.
* Jaune's family is implied to be this as well, having generations of warriors,

heroes and hunters as his legacy. Jaune himself?
* Jaune's kidnapping, where he's continually pitted against Greycloaks while being wounded and sick, Jaune starts becoming addicted to Leveling and succumbing to Raven's view. Jaune's high Resilience score that supposedly provides mental fortitude, and frequently displaying a Skill that keeps him calm and focused during emotional and mental turmoil
* Jaune's name is sometimes mistaken for being the mundane English name "John", which is very close in pronunciation. It's also often misspelled as "Juane", which would be pronounced "joo-an" if anything, or "Juan", which is a Spanish name pronounced "wan". Lampshaded in an early episode of Volume 7, in which Marrow, a new character, hits Jaune with both misspelled versions, presumably to let fans know how such misspellings would actually be pronounced.
* Jaune's Semblance allows him to bolster the Aura of others by giving them his own. Fortunately, he has a lot of Aura to work with.
* Jaune's Semblance is Aura Amplification. He first uses it by accident when Cardin tries to punch him; it
* Jaune's sister Coral is known for her cruel sense of humor. When they were younger she showed Jaune a smutty book just to mess with him, she gave Cinder an illegally short skirt so she'd get in trouble when she transferred to Beacon, and is implied to be the one responsible for naming Cinder's team CMEN (it's supposed to be pronounced "cinnamon," but everyone jumps to the obvious pronunciation).
* Jaune's sisters are at least as bad. Though his eldest sister, Sapphire, does seem to have a bit more experience in human civilization, and correctly uses the phrase "there are plenty of fish in the sea" instead of "there are plenty of nevermore in the sky" that the rest of the family uses.
* Jaune's temporary waitresses. Unfortunately for them, Jaune's cafe's biggest group of regulars work for the local mafia (ordering fifty coffees from him twice a day) and one of their enforcers "encourages" the boys to leave.
* Jaune's. This goes along with her characterization change into a darker, more cynical person.
* Jaune upgrades his long sword, Crocea Mors, so that it can combine with its sheath to turn into one of these.
* JauntTrooper, utility bots patrol the abandoned MegaCorp facilities, cleaning up anything they deem a mess. This can be useful as well as aggravating to the player.
* JaVale McGee for all his troubles. He then became a certified NBA journeyman, bouncing from team to team and playing limited minutes, but his performance in the 2018 Playoffs for the championship-winning Golden State Warriors showed that he still had it in him to be a productive player. As such, the Lakers took a chance on him in the summer of 2018, as he was one of the few bright spots during LeBron James' disappointing first season in Los Angeles, averaging a career-high 12 points (also his first double-figure season since 2011-12) and finishing among the league's Top 10 in blocked shots. As of 2019-20, McGee's numbers have dipped a bit, but he still deserves credit for turning things around so late in his career.
* "Java", recorded as Al Tousan in 1958, became a Top 10 hit for Al Hirt in 1964.
* Javelin of Lightning, a classic item that on hit creates a lightning bolt blasting everything behind it.
* Javelin Thrower: Javelins certainly go back to the Stone Age, and in fact prehistoric cave paintings have been discovered which appear to depict humans or hunted animals which have been wounded by thrown spears.
* Javelin Whitetail on M3, having defected from numerous factions over the years. It took a while for some characters to clue in on the notion that she should not be trusted. Repeated betrayals is a staple of the MUSH.
* Javert and Valjean may count, but fandom reaction has certainly been… enthusiastic, even attracting several new shippers.
* Javert's solo "Stars" was originally placed in the middle of Act I, before the time skip from 1823 to 1832, and centered on Javert vowing to find Valjean despite having lost track of him. But early in the London production's run it was moved to a later point, after the time skip; the new context was Javert vowing to find Valjean after regaining track of him for the first time in nine years. The film

puts it back in its original placement and context.
* Javert when he is outed as a spy while at the barricade and believes (rightfully) that the students plan to execute him.
* Javicia Leslie as Ryan Wilder, the next Batwoman, who's also lesbian.
* Javier Botet has Marfan syndrome, which has made him extremely tall and thin, with very long, thin fingers. Due to this, he's been cast in a ton of movies as super creepy monsters.
* Javier decides to fully embrace the trope and takes Natalia on a Captive Date
* Javik also mentions the Metacon War, a war that the Protheans fought against a machine race which lasted their entire run as a space-faring race (probably up to a few tens of thousands of years). The final insult was the arrival of the Reapers shortly after the Metacons were defeated for good, to which Javik considers the realization "that machines had surpassed organics
* Javik, before remarking that they used to eat flies and lick their own eyeballs.
* Javik claims that the Protheans did not "date" other species. They conquered them, enslaved them, sometimes ate them, but did not date them. Except for asari.
* Javik from the third game has a bit of his voice actor's Nigerian accent in his voice. More than a few players called him "Jamaican" as a result.
* Javik implies that the Protheans themselves practiced this trope, though he also mentions that this view was reconsidered after encountering the Reapers. It must be noted that he's an
* Javik provides another case after the Leviathan DLC. After The Reveal
* Javik reveals that the precursors to the Protheans were the Inusannon, whose ruins on Ilos were where the Prothean first discovered mass effect technology, much like humans had from the Prothean ruins on Mars.
* Jawaharlal Nehru. Gandhi himself, too: he fought against the British rule in India through totally nonviolent means. Whenever he and his protestors would march, he called up the local media so that when the rest of the world looked at the news and saw the British beating on unarmed protestors who refused to fight back, they got painted as the bad guys. You know you qualify as a Guile Hero when you can show up to every battle unarmed and still win the war.
* Jawbreaker features the main characters staging a kidnapping for their friend's birthday. Unfortunately, this goes horribly wrong when the intended victim chokes on the jawbreaker they were using to gag her.
* Jawbreakers: Lost Souls: The "Jawbreakers" are a group of former superheroes who now do mercenary work. And fight giant gorilla monsters.
* Jawbreakers Lost Souls was intended to be just a short one-shot comic that the author wanted to put out so that he could write the story he wanted to without interference and industry regulations. After receiving a MASSIVE backlash from several prominent members of the comic industry the Indiegogo campaign went on to earn several times what the creator had originally expected to and became an overnight success.
* Jawbreaker starts out with a girl being kidnapped, gagged and thrown in the trunk of a car. Eventually her high school buddies throw open the trunk and shout "Surprise!" Unfortunately, they find that she choked to death on the jawbreaker one of them stuck in her mouth before gagging her.
* Jawbreaker: The three main characters and most female characters have worn outfits that leave their midsection exposed.
* Jawbreaker: When a monster tries to eat someone, that someone stops it by forcing its jaws open until they break.
* Jaw Drop: A character reacts to something by having their jaw hang open.
* Jaw Drop done when drinking from a water bottle in the episode "iOwe You" when Freddie told her how much she owes him and Carly in dollars.
* Jaw Drop when he finds himself in bed with a naked Catherine in the cutscene following Stage 2.
* Jawohl! — "Yes, sir/ma'am!" Technically it actually just means
* Jaws 2. After the shark attacks the teenagers and sends them adrift on a raft cobbled together of what's left of their sailboats, help arrives on two occasions, but they each fail in different ways.

* Jaws 2 has an orca that is mauled to death by the great white shark, and the supposed marine biologist claims that there are far greater marine predators than it, referencing the shark. In real life, orcas are capable of killing great white sharks and the only predator (besides humans and other great whites) that preys on great whites. There have even been cases of entire populations of great whites fleeing from an area due to orcas preying on one individual. Even a fully-grown shark would not bother attacking an orca as it is still less than half the size of the mammal.
* Jaws 2: Marge and the helicopter pilot manage to escape from the shark in multiple script drafts, but both appear to die in the filmed version. The penultimate version of the script also has Bob get eaten by the shark, while he survives the final version.
* Jaws 2, where a character is unable to get herself from safety as the shark approaches her.
* Jaws 3D is on a large grouper, the head of which is left floating in a cloud of blood. Its mouth is still moving.
* Jaws 3D near the end when the shark breaks through the aquarium glass it doesn't bump the glass very hard at all causing it to instantly shatter, the scene is quite hilarious considering how fake the shark looks in that shot with the 3D effects.
* Jaws 3D. When the music builds up, only to show a random fish, the Critic went "CAAAAAAA— I mean, FIIIIIIIISH!!!!"
* Jaws also used this trope as a loophole to film a movie about a shark attack virtually without a shark, due to the ceaseless problems with their mechanical substitute. Given how bad the props are in the sequels, the wisdom of this move is all the more apparent.
* Jaws, and he devoted much of his post-Jaws career to ocean conservation.
* Jaws, as Chrissie thrashes around, she manages to grab on to a buoy. The bell rings, essentially sounding her death knell.
* Jaws became the first film to see wide-release distribution, became one of the highest-grossing films of all time and ushered in a new wave in American film-making.
* Jaws. Benchley also admitted the movie had much better character development. And while he likes the way he wrote the shark's death (getting so hurt it dies of its wounds), he admitted that Spielberg's explosive depiction worked for the big screen in a way that the original wouldn't have.
* JAWS, Brody and the marines aren't able to deal with the situation in time, and at the end get called off by the skipper.
* Jaws Brody snaps when Quint destroys the radio before they can call for help. Smashing the baseball bat on the destroyed radio he condemns Quint for being "certifiable" rather than calling him a more common term such as "crazy" or "insane."
* Jaws did with sharks, they still acknowledge that the films did inspire them to learn more about the real deal.
* Jaws. During the shark's night time attack on the boat the power supply goes off, leaving the crew in darkness.
* Jaws fit this trope, as both animals were chewing on something that exploded in their mouths.
* Jaws gives us Captain Quint (a former Navy man) as Soldier and Matt Hooper as Scientist. They have the same goal, but have a mutual skepticism about the others' methods. Compare their actions the first time they see the shark: Quint goes to the radio and assures the harbor that they're alright, because he wants it all to himself. Hooper tries to get a photo and begs a terrified Brody to pose for it to get some scale.
* Jaws has said in interviews that he knew how silly it was, but he figured that if the audience was still with him this far into the movie, they'd go that one last step.
* Jaws helped to keep the first death a secret. Since his decision was forced on him by his superiors, one of those superiors remarks, "She's wrong." Brody realizes that he should have stood up to his superiors, though, evidenced by his reply: "No,

she's not."
* Jaws. However, legend has it has Richard Dreyfuss among others believed in him, as did producer Richard Zanuck. They were handsomely rewarded for their faith.
* JAWS (initially opened in 1990, then shut down, reworked, and re-opened in 1993)
* Jaws is the first film to prove that people can be scared of cellos. Duh-Dun...Duh-dun...Duh-dun...
* Jaws, just before the famous "You're gonna need a bigger boat." line, while Brody is dropping bait food in the water, you can distinguish the shark just below the surface. However, since on first viewing it is more likely to be focused on Brody, it's probable the audience has jumped just as much as him when it emerges.
* JAWS large amount of fictional Amity TV programming that played in the queue line.
* Jaws — Killer shark series. Four films since 1975 of whom only the first one was directed by Steven Spielberg.
* Jaws movies. The opening scene in the first movie is the most remarkable one.
* Jaws Nazi shark. A keen environmentalist, he later regretted his contribution to the Threatening Sharks trope and wrote several nonfiction books about sharks and their important place in the ecosystem.
* Jaws novel when Chief Brody looks for Quint the shark hunter's name in the phone book all it's listed under is "Quint".
* Jaws of it, with the first Jaws being the only good movie about sharks.
* Jawsolyn, retired American female wrestler, identifies as lesbian, is in a relationship with Canadian wrestler Kaitlin Diemond.
* JAWS Orlando. Like most of the rides there, the waiting line has TV hanging from the ceiling showing fake commercials and programs related to the theme of the ride — in Jaws's case, stuff about Amity. One of the commercials features a Crazy Eddie, who LITERALLY WRECKED THE ELECTRONICS he was peddling ON-CAMERA so he could give you the "discounted" prices. Complete with a miserable complaining accountant.
* Jaws played in the background. Surprisingly, these commercials were made by Kellogg's with the implication that the cereal was just that good, ignoring the implications that people who can't get Corn Pops act like junkies going into withdrawal.
* Jaws, Quint destroys the radio when Brodie tries to call for help, and later appears to deliberately burn out his engine so they can't escape their final confrontation with the shark.
* Jaws, Quint's home is decorated with the jaw bones of the many sharks he's killed.
* Jaws. Quoth Quint: "You know the thing about a shark, he's got... lifeless eyes, black eyes, like a doll's eye."
* Jaws ride due to the skipper's grenade launcher, the biggest one occurring when the skipper accidentally shoots a gas dock.
* JAWS ride is able to smash its way into the boathouse, and then makes a lunge for the boat.
* JAWS ride, the boat's skipper attempts to evade the shark by going into a dark boathouse. Turns out the shark is able to get into the boathouse...
* Jaws ride, the boat's skipper would shoot a grenade into the shark's mouth. The shark would then go back underwater, and then there would be a several-second delay before the shark would explode.
* JAWS ride, the Captain Jake's commercial states that if you mention the commercial, you'll get an actual life jacket (but not without noting that the offer is subject to avaliability).
* Jaws ride, the skipper says, "Eat THIS!" while firing at the shark while it's getting electrocuted, but it's soon after revealed that the shark survived this, albeit briefly.
* Jaws, Sean's still a kid while Michael is a teenager. The following two films got around the issue by making them both adults.
* Jaws seemed completely impervious to any kind of injury at all, which honestly makes you wonder why Bond ever tried to take him in close combat after the first time. Also not helped by Bond's insistence on punching Jaws

* Jaws series and other killer shark movies will invariably feature at least one scene where someone is eaten alive by the shark.
* Jaws, some girls are sneaking into a closed beach. The fence is electric, and two of the girls tests it. It's off, but they act as though they're getting electrocuted anyway. They eventually get eaten.
* Jaws starts killing swimmers at the resort town of Amity. Eating people whole even. The Mayor tries to cover it up, but as the situation gets more and more dangerous a team looks into it and start hunting the shark. The sequels introduce new sharks, and the final film has a shark targeting the Ellen Brody character's family as "revenge".
* Jaws: Technically, his job title is Chief of Police, but Martin Brody feels like one of these, with his rural hometown, and only having a single officer working under him. Brody is the sheriff of the resort community Amity Island, and with his one deputy, diligently investigates the shark attacks, tries to close off the beach to keep people safe, and eventually goes out to see with two other men to hunt and kill the shark, in order to end its threat.
* Jaws that would have paid off better when the shark finally appeared.
* Jaws, the book actually kills off the character Matthew Hooper during the cage scene. Earlier in the book: he was having an affair with Brody's wife, Ellen. She avoids the trope by never being in the water. The first victim in the book was taking a postcoital swim.
* Jaws: The book was set in a Long Island resort, but the movie is set on a New England island.
* JAWS, the death of a fellow skipper and his passengers can only be heard when he screams over a radio transmissions.
* Jaws: The first victim of the Shark is a woman named Chrissy Watkins who was skinny dipping.
* Jaws theme. A girl keeps telling him to stop (instead of just punching him in the face). He's one of the first victims.
* Jaws the mechanical shark "Bruce" after Spielberg's lawyer Bruce Raimer.
* JAWS, the price of Captain Jake's Amity Boat Tours is shown as being $39.95 per person.
* Jaws: The Revenge. Great stuff, guys. To be fair, that was the studio-ordered SECOND ending of the movie. The original ending had the shark bellowing away as the prow of the boat skewers it like a cocktail weenie, the shark's weight tearing the boat in half as both sink into the water.
* Jaws: The Revenge has it that while the studio demanded changes, they didn't give the production enough money to re-shoot. (The original intent was the shark to be impaled, die and sink - taking much of the boat with it.)
* Jaws: The Revenge's tagline: "This time...It's personal." Given that the film came out in 1987, the concept is probably substantially older.
* Jaws: The Revenge takes place near Christmas despite it's tropical setting.
* Jaws: The Revenge, the shark-hunters disorient the great white using a device that confuses its electroreceptive sense.
* Jaws, the scene where Brody is complaining about having to dump chum (chopped up fish and fish blood) into the ocean begins with the line "Slow ahead. I can go slow ahead. Come on down here and chum some of this shit," and ends with the line "We're gonna need a bigger boat", having gone from funny to scary in a nanosecond when the shark abruptly appears.
* JAWS, the shark returns after being electrocuted to lunge at the boat one more time before finally dying.
* Jaws they're trying to trap back into its Ancient confinement artifact.
* Jaws, they test to see whether an oxygen tank explodes upon being shot. It doesn't explode, but the gas spewing out of the bullet hole at high pressure would kill a shark just as well.
* Jaws to pursue the shark. Plenty of drinking, showing off of scars, and singing drunken tunes when they're not trying to kill the Great White.
* Jaws Unleashed during the cutscenes, it turns a big area in the water blood red.
* Jaws Unleashed. Somehow taking a bite out of a boat causes it to go *BOOM*.

* Jaws was changed by the BBFC from PG to 12A in 2012 on theatrical re-release. This is because when the film was originally classified, there was no 12A/12 rating, although it was now considered a borderline 12A/15 film for its bloody violence and gore. They relented with the former as a "compromise", due to it being so well-known and available unrestricted for 37 years.
* JAWS, we see someone wearing a "Chompy the Shark" costume, who during the commercial complains to Jake about how much he hates wearing this suit in the sun.
* Jaws when he talks about the shark: "...what we are dealing with here is a perfect engine, an eating machine. It's really a miracle of evolution." There are many quick lines like this in the boat with both Hooper and Quint marveling at this particular shark's incredible strength, tenacity, intelligence, and unpredictability.
* Jaws when the future's 3D Jaws sequel: "Eh, Shark still looks fake."
* Jaws, when the heroes are brainstorming a way to kill the eponymous reptile:
* Jaws, where the mayor even complains that closing the beach due to shark attacks on a holiday would be harmful.
* Jaws. While talking on the radio with Mrs. Brody, Quint (a former U.S. Navy sailor) ends the call by saying "over and out".
* Jaws Wired Shut". Homer is the brash, wacky one and Marge is the classy one.
* JAXA, another Japanese Auto, on the other hand, embodies the trope of the samurai
* JAXA; best seen with the use of the Tsukuba Space Center in the opening sequence and in a few episodes.
* Jax break Johnny Cage's spine in retaliation to him hitting on Sonya, or Johnny Cage brutally shattering his daughter Cassie's skull during a practice battle.
* Jax Epoch and the Quicken Forbidden, Jax came back from Realmsend, magic started leaking into her world: a dragon flies around New York City, mechanical knights storming through the streets, and there was a heavy snowstorm in the middle of summer.
* Jax Epoch and the Quicken Forbidden stole a notepad and a spellbook and magic gloves and boots.
* Jax Epoch and the Quicken Forbidden stole the spellbook and the magic boots and gloves, she first has some troubles with casting spells, but she does get better later on in the story.
* Jax Epoch and the Quicken Forbidden took this along with the magic boots and gloves from an old cabin after she went through a door in Realmsend.
* Jax Epoch and the Quicken Forbidden, tt's more of a justified trope. After Jax came back from the inter-dimensional portal, somehow the magic starts leaking into her world, causing magical things to happen like a dragon flying through the city of New York.
* Jax is also a completely unintentional expy of Ranma, and Tenchi, and several other well known "middle of the harem" anime characters... Only Jax might end up with the marrying them all.
* Jax is later also revealed to have been artificially produced by splicing DNA together from five different species, with many doubles of herself existing.
* Jax Jones: The video for "All 4 U" shows a stylized version of Jax Jones on the side of a milk carton, marked "Missing. Male, Black Cap. Last seen: Demolishing bare Snacks."
* Jaxom fell in love with and later married the nurse who treated him after he fell ill in
* Jaxonhh - Gamer best known for his appearances on the Fine Brothers' productions.
* Jax's ending from Mortal Kombat 4 should have ended with him putting on shades and the theme song from
* Jax's skins maintain this theme; weapons include a hockey stick, a board with nails in it, a fishing rod, a cardboard tube, and a trophy cup on a stick, and Riot has stated at least once that the seemingly real weapons of his remaining skins are actually made of foam.
* Jaya Ballard, who's this trope. She's appeared on the flavor texts of over a dozen red spells, including Incinerate and Inferno, and her own card pays homage to

these spells.
* Jay and Silent Bob comic book mini-series, Jay tries to have sex with Tricia in the shower but she kicks him out.
* Jay And Silent Bob — Stoner flick series. Have appeared in 5 films since 1994.
* Jay and Silent Bob Reboot also features Jason Mewes's daughter, Logan Lee Mewes, as Ben Affleck's character's daughter, and Kevin Smith's wife, Jennifer Schwalbach Smith, as a "Mooby's" fast food manager who has sex with Silent Bob in a restroom.
* Jay and Silent Bob Reboot which is not a reboot but a direct sequel, featuring returning characters and plot elements, cameos, and more commentary on now-modern geek movie movie trends (such as the Marvel Cinematic Universe and Ben Affleck as Batman). A huge part of the plot even involves Jay meeting the daughter of himself and his love interest from the first film.
* Jay and Silent Bob received quite a bit of flanderization over the course of Kevin Smith's
* Jay and Silent Bob Strike Back had the eponymous duo singing with Morris Day and The Time at the end of said flick at the after-party for the in-movie movie Bluntman and Chronic.
* Jay and Silent Bob Strike Back has a Federal Wildlife Marshall who shows up at a diamond heist claiming jurisdiction because the criminals also arranged for the animals in an animal testing facility next door to be released at the same time. The local cops resent this... less because of the jurisdiction issue, and more because he's a complete idiot.
* Jay and Silent Bob Strike Back in the unauthorized movie based on their lives, Jay gives a "Say WHAAAAAA?"
* Jay and Silent Bob Strike Back, in which he launches into a shockingly knowledgeable diatribe about the legal transference rights of intellectual properties.
* Jay and Silent Bob Strike Back is an inversion. Despite being the more obnoxious one of the pair, Jay is the romantic lead and Bob is his wingman.
* Jay and Silent Bob Strike Back is a stoner comedy, but it contains several fantasy sequences with big special effects and even a lightsaber fight (apparently, the movie they were shooting had real lightsabers and not props).
* Jay and Silent Bob Strike Back, Jay and Silent Bob find themselves hitchhiking with Scooby Doo and the gang (just don't ask). After a dream sequence in which they all get high, it is revealed that Jay and Silent Bob have fallen asleep.
* Jay and Silent Bob Strike Back. Justice is a highly intelligent, highly-skilled, erudite cat burglar. Jay is an ignorant foul-mouthed semi-homeless pothead.
* Jay and Silent Bob Strike Back: Justice's friend asks why Jay was kissing her hand.
* Jay and Silent Bob Strike Back — a shout out reinforced by the subsequent appearance of the Sleestak Diner sitting in the shadow of Kirk's Rock.
* Jay and Silent Bob Strike Back, movie director Chaka Luther King asks his production assistant for coffee, smacking the coffee cup to the floor when it is not up to his specification. We'll never know if that production assistant got anywhere in his career.
* Jay and Silent Bob Strike Back out of it though. She comments to the others, "The fat one is creeping me out."
* Jay and Silent Bob Strike Back present their union cards to gain the trust of and help from an LA dealer. (Jay and Silent Bob are members of Jersey local 404; the LA dealers are Los Angeles local 305.) The two groups even spend time talking business (the Jersey union might have to strike in September because they don't have medical yet).
* Jay and Silent Bob Strike Back (referenced when a particularly inarticulate fan has the screenname "MagnoliaFan").
* Jay and Silent Bob Strike Back: Slow motion camera work emphasizes how Jay is quite taken with the beauty of female character Justice.
* Jay and Silent Bob Strike Back smack his shin into it and limps around for a moment.

* Jay and Silent Bob Strike Back's "Suzanne" over the ending montage.) Sexy jewel thieves were involved.
* Jay and Silent Bob Strike Back that she's in the mood for "a hot, thick Sicilian". He disappears with her off-screen.
* Jay and Silent Bob Strike Back: "The internet is a communications tool used the world over where people can come together to bitch about movies and share pornography with one another."
* Jay and Silent Bob Strike Back, their superhero identities Bluntman & Chronic use lightsabers. Bluntman's is called a "bluntsaber" and Chronic's is a double-bladed "bongsaber". Their archnemesis Cock-Knocker (played by Mark Hamill) uses a "cocksaber".
* Jay and Silent Bob Strike Back The three hot chicks claim to be from an extreme animal rights group and recruit Jay and Silent Bob to liberate an animal research facility, but the mission is really a cover for a jewel heist.
* Jay and Silent Bob Strike Back, though not as often as his detractors like to say.
* Jay and Silent Bob Strike Back. To cover it up, Bob reaches over and puts an empty fast-food cup over Jay's crotch — which immediately mutes the music.
* Jay and Silent Bob Strike Back, when trying to explain what the internet is to Jay, it is described thusly:
* Jay and Tara they would be, and choose not to have sex as an expression of individuality.
* Jay and Tim's adventures off camera are a common topic, as well as the cast's college adventures.
* Jay and Trent, the commmentators, react this way to Darren being elbowed during a hockey fight.
* Jay Black parodied himself in a later, live performance of "Cara Mia," in which he held his note slightly longer than he had in the original recording—while comically glancing at his watch as if to time it.
* Jay Blue Lake (Bluejay), an Avatar with the spirit of the Bluejay. However, given that he is a member of the Medawhila tribe, and was already chosen to study under
* Jay Briscoe had been in Ring of Honor from day one and before he challenged
* Jayce and the Wheeled Warriors episode "Blockade Runners", the titular heroes come to the rescue when the evil Monster Minds place a blockade around planet Baz as part of an invasion scheme.
* Jayce and the Wheeled Warriors has Oon, the magically animated armour, who apparently breathes (though only when running).
* Jayce and the Wheeled Warriors, Jayce tries to short circuit a computer whose self-destruct mechanism he has inadvertently triggered by pulling out two wires and touching them together. Herc warns him that he will electrocute himself doing this and tells him to drop the wires. However, though the shock briefly knocks Jayce unconscious, he is otherwise unharmed. (The attempt to short out the computer doesn't work.)
* Jayce and the Wheeled Warriors was created to be merchandise-driven from the start, and never finished due to poor toy sales.
* Jay C Flippen, his character, Jack Lomax, is written in as a man who is in a wheelchair, having broken his back while fighting an oil-well fire.
* Jay Cruz and Eddie Rios have no idea how any of you can wear those dull pants. On the flip side, the rest of the locker room finds the bright and oddly patterned outfits of Los Ben Dejos (Dos Ben Dejos?) distracting at best.
* Jay Cutler's retirement after not being resigned by the Bears after the 2016 season was a more justifiable example than Favre. Cutler even had a commentating job lined up, but Miami's Ryan Tannehill went down for the year with an injury, so Cutler came out of retirement to work with head coach Adam Gase, who was Cutler's offensive coordinator for several years in Chicago.
* JaydenAndCrusader character Kat is a catgirl and appears with no warning and apparently no reason in the middle of the comic with a very rushed (2 line!) introduction.

* Jayden And Crusader decided it was something he didn't want and went back to his friends.
* Jayden and Crusader was given a robotic body and immediately developed sentience. However as she was created within the comic itself to fill the trope of Cute Robot Girl, this was to be expected story progression.
* Jayden and Lauren being siblings instead of Jayden being a decoy for Lauren like Takeru was for Kaoru Deker and Dayu's backstory was the biggest departure from Shinkenger with Juzou and Dayuu being unrelated in Shinkeger but the former being husband and wife. This was one of the few things the series was praised for.
* "Jayden",, skyrocketed in popularity after 1998 when Jaden Smith was born, peaking in 2010 as the fourth most popular boy's name.
* Jaye Davidson similarly decided to retire from acting after his starring role in
* Jay Exci, a British YouTuber who makes videos rebutting or criticizing popular media, came out as non-binary in 2020 and uses she/he/they pronouns.
* Jay falls in love with a beautiful actress who swears to everyone that she genuinely loves Jay and isn't trying to butter him up for a good review. When he screens her film and discovers that her acting is God-awful, he decides to be honest and give an impartial critique of how terrible the movie is. Unsurprisingly, she immediately turns on him, giving away that indeed she was just using him to get good press (
* Jayfeather in the third series particularly stands out from the earlier main characters in that he's blind and that his path in life is one he actively didn't want at first.
* Jayfeather is unable to understand why Leafpool and Crowfeather act so weird around each other, but any reader who has read the second series would know that what he is detecting is pure
* Jayfeather, Lionblaze, and Leafpool know that Hollyleaf killed Ashfur, but they decide not to reveal it to the Clan. Apparently keeping secrets just runs in the family.
* Jay Garrick, Barry's predecessor, was originally not hit too hard by this because he was a regular in the
* Jay Garrick member and leaves full time participation, Johnny Thunder tries to get his Thunderbolt to make the others let him join. They're not happy, and decide to play a joke on him to teach him a lesson, sending him to capture "Killer McPanzee", a supposed dangerous criminal who is in reality nothing of the sort. Naturally Johnny gets mixed up with real crooks, and the whole team gets involved, eventually adding Johnny to the ranks due to his sheer determination and grit, even though he's a bit of a doofus.
* Jay gets a lot of information about Julie his uncle, and gives him some money to play Bingo with afterwards.
* Jay Goede, the voice of Mewtwo and his creator Dr. Fuji who went under the pseudonym Phillip Bartlett, has had no other voice acting roles to date, he is mostly a stage actor and has had some on-camera roles in films and television shows.
* Jay Greenberg and other musical prodigies. He entered the Juilliard conservatory at age 11, and had written five symphonies by the time he was 13.
* Jay Hopper voiced Tenchi's father, grandfather, and the GP Grand Marshal. These are his only anime roles.
* Jay is at least partially, if not primarily, responsible for the continued degradation of the Hospital and the concept of healthcare across the Range through his dedicated campaign to
* Jay Jay the Jet Plane. Additionally, some VHS and DVDs of the show were released by Tommy Nelson—a Christian distributor, who redubbed it to insert references to Christianity even though the series wasn't originally conceived as a Christian show, to the annoyance of some non-Christians.
* Jay Jay the Jet Plane (although not originally a Christian series, it was redubbed on Tommy Nelson videos to make references to Christianity)
* Jay Jay the Jet Plane, in which the original voiceover narration and some dialogue is replaced with audio mentioning God and the Bible.

* Jay Jay the Jet Plane — An American/British/New Zealand/Korean co-production.
* Jay Jay the Jet Plane was intended to teach life lessons, mainly to children.
* Jay Jay the Jet Plane were animated this way, so that's why it looks so creepy to parents and older viewers.
* Jay jumps onto a tour bus filled with Japanese tourists in the second opening sequence of
* Jay Landsman appears aloof, but he truly does care about his subordinates, from lobbying Rawls on McNulty's behalf (although this partially comes from Jay's desire to keep the clearances that McNulty brings in), administering Irish wakes for fallen officers, and cutting Bubbles loose after Sherrod's overdose.
* Jay Landsman auditioned for the character based on himself before being cast as Dennis Mello.
* Jay Leno. And his Battle Bot (occasionally trotted out for an exhibition match) was called Chinkilla.
* Jay Leno and Jimmy Kimmell pulled this off by disguising themselves as reporters.
* Jay Leno because he's a selfish slimeball. True, maybe he shouldn't have accepted NBC's offer to move back to 11:35, but basically everything that is attributed to Leno was really done by Zucker. (And the quality of Leno's humor is subjective and is honestly irrelevant to the debate.)
* Jay Leno had, in his collections of funny newspaper titles, a story about a '57 Chevy which stalled across a railroad crossing with a train oncoming. The train was totaled. Not a scratch on the car.
* Jay Leno'. He continues to do hundreds of stand-up shows a a year (even while hosting a nightly talk show), but refuses to do taped specials out of the belief comedy is best experienced live and that a recording will strip some of the situational nuance from his performances.
* Jay Leno, in a monologue, pondered the horror of a commercial jingle for Ekrich brand hot dogs—"Ekrich brings good meats from the heartland—and the secret ingredient is
* Jay Leno. Listing all of the instances of this would require a separate page.
* Jay Leno noted poorly worded advertising in his standup routine, including the jingle (recited in mounting horror) "Eckrich brings good meat from the heartland — and the secret ingredient is
* Jay Leno's Garage is your heater/brake/magneto/indicator... you need to pump that up every ten minutes or the whole thing goes up in smoke". Then there's the pre-drive checks that have to be done on many older cars and motorbikes (like getting steam up in the Stanley Steamer).
* Jay Leno's Headlines, in which a newspaper article about a fishing contest notes that "the use of dynamite or other explosives is prohibited".
* Jay Leno's jokes come from this premise. Kevin Eubanks often gets treated as an exception, but in general it's assumed in the jokes that this trope holds.
* Jay Leno. Unfortunately, because of the legendary rapport Leno had with his replacement Kevin Eubanks (not as legendary as that between Johnny Carson and Doc Severinsen, or David Letterman and Paul Schaffer, but close), no one remembers that fact.
* Jay Leno. Whenever Jay does his "Headlines" segment, you can always expect at least one story about a dumb criminal to crop up.
* Jay Leno with a robot with his a picture of his face called Chin Killa.
* Jay Lethal. Lethal started by telling Martini to keep calm and that they were not going to yell but neither of them could keep their cool.
* Jay Lethal suspended above the ring in the same shark cage. Gail retained in a similar way to Robbie (champion's partner deploys foreign object, challenger uses it, is disqualified). Of course these are both call backs to angles ran in IWA Puerto Rico, back when it and TNA Impact both shared Fox Sports net in 2004(Savio Vega being suspended in a cage for Super Phoenix getting a title shot at Ray González. Vega ended up being in charge of the knockouts in TNA later.)
* Jay Lethal where he revealed he was one of the first wrestlers to be getting his

own action figure(ensuring he will "Live Forever")
* Jayme Closs' home, murdered her parents, and abducted her. He held her prisoner in his home, stuffed under his bed, for three months before she finally escaped on January 10, 2019.
* Jay Mohr was meant to be his ultimate catalyst into fame, but it was panned by critics and burned out after one season. Since then, he's only managed supporting roles and TV shows that either were low-rated or short-lived.
* Jayne also dual-wields two oversized assault rifles in the first issue of the

* Jayne County, former frontwoman of pro-punk band Wayne County and the Electric Chairs, and the first openly trans rock singer.
* Jayne fits the type as well, even if it's only the audience that finds him lovable. He's a lot like Mal, but without the slightly wonky but still functional moral compass. Or the smarts ... though he
* Jayne has an extremely dark and cynical view of the world, a score of zero in the morality department, and very inconsistent loyalties. Mal hired Jayne by offering more than his previous crew, who he promptly betrayed and shot. Textbook
* Jayne has an ironic name in contrast with his vicious, mercenary nature. However, Jayne is actually a real, though uncommon, male name. Characters on the show have teased him about his name.
* Jayne Mansfield, partly because Hollywood movies were just switching over to color when she came along (1955).
* Jayne's reaction on walking in on Mal and Zoe during their deadpan "Take me, sir. Take me hard" scene.
* Jaynestown), he actually turns out to be a criminal mastermind. The only spontaneous situations he handles well are medical emergencies.
* Jay Newman is a serial rapist too, who kidnaps and imprisons his many victims.
* Jay Pharoah's Principal Frye, who is actually based on Jay Pharoah's high school principal from Chesapeake, Virginia. The only difference is in the name: on the show, the principal's name is Daniel; in real life, the principal is named James.
* Jay Pickett. His colleague, Travis Mills, suspected a heart attack was the cause.
* Jay Pinkerton studio album are you?", a graphic that read "You are 'Nevermind the Bollocks'. It is the only Sex Pistols studio album." Most of the other parody quiz results operated around similar jokes, i.e. "Which sex are you?"
* Jay Roach was usually associated with directing goofball comedies like the
* Jay Sean; however, the 2019 remix by Regard was much more popular worldwide.
* Jay Sherman once described Lorenzo's Oil as a mixture of fantasy and crap. "I dubbed it 'Fantacrap!'"
* Jay's Journey, Omelio wonders aloud what sort of pirate would be dumb enough to deliberately blow up his own ship... in the presence of the pirate who did exactly that.
* Jayson voiced Bulk Biceps in his first appearance on the show in "Hurricane Fluttershy" and the professor during Twilight's song in "The Crystal Empire–Part 1" as well as other bit parts.
* Jay Stewart is known for his long role as the announcer/sidekick on the original incarnation of
* Jayuzumi (he thought that the franchise was by this point running out of ideas), he's moved back into them again, with gaming videos now few and far between.
* Jayuzumi is a variation. He is capable of speech in real life, but having him talk personally would ruin the whole soundboard joke, so he instead plays voice clips from various works to bypass this.
* Jayuzumi often behaves this way, even though a significant number of his videos are explicitly labelled as "trolling" or prank calls. At the end of the day, he makes fun of other people via soundboards, but it's mostly in good fun and he can often get a laugh out of the people on the receiving end of the joke.
* Jayuzumi runs into this a lot. Some of the players he runs into while getting

annoyed at the soundboards, in general, will acknowledge if he does a good joke, even if they're the butt of it.
* Jayuzumi's pranks frequently fail to realise that they are being recorded and trolled, and thus their shouting at him to stop just makes him press their buttons more.
* Jayuzumi. The reactions range from surprisingly calm to hammy and stupid.
* Jaywalking Will Ruin Your Life: Committing an insignificant crime will make you suffer for the rest of your life.
* Jay Ward prominent chins — while making them dumb as fenceposts.
* Jay White: Debuted in 2013. Entered the NJPW dojo in 2015. Became a NJPW regular under the new moniker of Switchblade in 2017. Won the IWGP United States Championship in 2018, the first championship of his career, and added the IWGP Heavyweight Championship to his résumé in 2019.
* Jay White just over a month after Tanahashi claimed the title from a departing Omega, validating his ascent as The Club's true weapon of choice to succeed Devitt after Styles. And Devitt responded by Tweeting his name and wearing the same color ring gear as him. This has only strengthened with the addition of KENTA at the end of the 2019 G1 tour.
* Jay-Z, but a former minority owner of the NBA's Brooklyn Nets; now a sports agent on the side)
* Jay-Z grew up in housing projects near Brooklyn and sold drugs to get by.
* Jay-Z is basically showing the mirror universe where Sean Carter kept on selling drugs instead of going into music.
* Jay-Z is notorious for claiming he's going to "retire" and then not doing so, often making more music a very short time later. His first time "retiring" was back in 1996 after his first album debuted. He's had 10 albums since then, not counting collaborations and guest appearances.
* Jay-Z Knowles. Beyoncé comes from an upper-middle-class family in Texas (her father who has a PHD in business was a successful businessman at Xerox prior to quitting to be her manager where he stayed until 2012.); Jay-Z was raised poor in the public-housing projects of Brooklyn and at one point sold crack cocaine to make ends meet. However, both of them were easily multimillionaires in their own rights when they met and are now worth over a billion dollars between the two of them.
* Jay-Z mash-up. Few could've expected one of the biggest rappers in the world working with one of the biggest rock bands in the world.
* Jay-Z, on the other hand, plays this trope straight (including the video).
* Jay-Z put "Death of Auto-Tune (D.O.A.)" on an album with several Auto-Tuned hooks. Jeez.
* Jay-Z's attitude toward his critics can be encompassed in "99 Problems":
* Jay-Z version of "Numb". It usually depends on what genre the listeners prefer.
* Jay-Z was originally written and produced by Eminem as a song for Royce da 5'9". The part during one of Eminem's verses containing what sounds like vocalized record scratches was actually dubbing over a reference to Royce in the lyrics.
* Jay-Z were allegedly criminals before having music careers, and many of their songs deal with this topic from their perspective.
* Jay-Z, which is quite well-known, especially as an anthem for residents of the Big Apple. His signature "99 Problems," however? That one didn't get any higher than #30.
* Jay-Z. You can also always expect his mentor No I.D. to have given some of the tracks a once-over production-wise.
* Jazmin Bean is non-binary, but seems to be going for this look, minus the “girl” part.
* Jazz also became wildly popular with black and white audiences alike.
* Jazz and Blaster are huge fans of human music, particularly rock and roll — much to the annoyance of most of the other Autobots, although Cosmos seems to dig it.
* Jazz" and often came out of nowhere to attack people in no shape to defend themselves. WWE notably was the only promotion she never played a face in - and was

presented entirely as an intimidating heel.
* Jazz and Serena are both African-American. Jazz's father Laby is an immigrant from Côte d'Ivoire.
* Jazz clarinetist Benny Goodman would often glare at other band-members he felt were not up to his standard while playing a song, and would continue staring for minutes on end while they played the rest of the tune. It was infamously known as "The Ray".
* Jazz clarinettist Wally Fawkes had a second career as a satirical cartoonist and artist of the British newspaper strip
* Jazz deliberately made herself a Black Sheep from her own family, unwilling to partake in their ghost hunting obsessions. She then got
* "Jazz, Delicious Hot, Disgusting Cold" made fun of the band's roots in trad jazz. In order to play bad jazz on purpose, the band members swapped their instruments around and only recorded one take.
* Jazz did this at a Ring Of Glory show when she saw usual Trinity had turned down a booking to watch as a fan. Trinity had planned for this and sent Radiant Rain in her place.
* Jazz from Hell, which was the only instrumental album to ever warrant a Parental Advisory sticker. Why? Because one of the songs is called "G Spot Tornado".
* Jazz guitarist Wes Montgomery's rot started with his later Verve albums, which were becoming more pop-friendly. The trend accelerated when he move to A&M, where his albums sold well, but became more pop-instrumental and less jazz. Sadly, Montgomery died suddenly in 1968, before he could rebound artistically.
* Jazz/improvisational singer Linda Manus-Cobine often performs shoeless.
* Jazz is fascinated with all the stuff on Earth, like rain and traffic lights, though it does take him a while to realise little girls do not spit acidic slime. This is in contrast to his superior Sentinel Prime, who hates Earth and everything on it.
* Jazz Jackrabbit Devan Shell sent his scavenging underlings to loot the planet for spare parts with the objective of building his Megairbases.
* Jazz Jackrabbit falls under this considering every main female to include Princess Eva and Lori Jackrabbit is defined by having a rather ample bust.
* Jazz Jackrabbit had "KILL this rabbit" posters out for the title character.
* Jazz Jackrabbit has a special Christmas "demo", as well as a full Christmas-themed episode.
* Jazz Jackrabbit is considerably shorter than his love interest Eva Earlong.
* Jazz Jackrabbit is full of these. Many of the secret areas have signs that have jokes and messages to the development/design team on them, which completely fly over the head of the average player.
* Jazz Jackrabbit levels will make you dizzy (switch around your controls).
* Jazz Jackrabbit's last levels are set in punny named hell levels that include ripped graphics from the Earthworm Jim example above.
* Jazz Jackrabbit, some levels contain caged green birds called Hip Hops that you can rescue. Hip Hops will relentlessly attack any enemies within range, but will disappear as soon as Jazz takes damage.
* Jazz Jackrabbit that Devan Shell "has got a huge ego, so he tends to surround himself with morons."
* Jazz Jackrabbit, there's a witch that turns you into a frog, and being kissed by Eva Earlong turns you back into a hare. There is only one only place where this happens, and it is in the demo levels.
* Jazz: Just like the 1920s jazz was still enormously popular worldwide. It got a bigger explosion when swing came around to cut the rug.
* Jazz legend Peggy Lee will be remembered to kingdom come for "Fever", "It's A Good Day", "Is That All There Is?", "Why Don't You Do Right" and literally hundreds of other superbly performed torch songs...but her biggest hit by far was a forgettable, racist (by today's standards) number called "Mañana (Is Good Enough for Me)", sung in a faux-Mexican accent and comprising a string of stereotypes about Latin Americans. Latinos are
* Jazz musician Mongo Santamaria is perhaps best known today as the punchline of a

throwaway joke involving the character Mongo in
* Jazz musicians spend HOURS working on improvisation. John Coltrane and
* Jazz musician Sun Ra has over a hundred full-length albums, which add up to over 1000 songs.
* jazz music, with all the criticisms of the "debauchery" of the genre at the time. However, the ban itself was very loose - the broadcasters deemed what was jazz, which made the ban pointless. The plan folded only a few years later.
* Jazz organ legend Jimmy Smith stands in front of one on the cover of his album
* Jazz pianist Joey Alexander gained attention even outside the usual jazz circles for being a child prodigy, who released his first album when he was 11 years old. He has the chops to live up to the hype, and he's played with big names in jazz like Wynton Marsalis and the Jazz At Lincoln Center Orchestra.
* Jazz pianist Keith Jarrett had to use a piano in bad shape for his legendary Köln Concert. The unique sound of the piano is seen to have contributed to the quality of the performance.
* Jazzpolitie: "There's only one way to tell you [what I feel for you]... Love Songs... You should hear them..."
* Jazzpunk EVERYTHING that the chef gives him once he learns what was used to make it.
* Jazzpunk features a robot who can spontaneously fall apart on cue and then un-fall-apart.
* Jazzpunk has a robotic hooker near the soviet consulate. You can steal a coin from a jazz musician and put in in her coin slot. She gives you a quick 2 second animation and a kiss on the cheek.
* Jazzpunk has at least joke for every interactable item. The only downtime is how long it takes you to travel between them.
* Jazzpunk Missionoyl claims to have this effect, although what exactly it does is unclear since the captions and floating HUD messages start appearing before you ever take it, and some of them are clearly meant for the general public to see. On a less ambiguous level is the frog's hacking device, a visor that shows wi-fi data packets floating through the air (among other things) and allows the player to "grab" them with a mechanical frog tongue.
* Jazzpunk, one of the hotel clerks does this while wearing a tiki mask every time the player faces near him.
* Jazzpunk prostitute, the next paper you buy may report that you sexually harassed the vending machine.
* Jazzpunk showcases in its trailers the ability to reduce the game's minimalist NPCs to nothing but chunks of meat.
* Jazzpunk, which has an ESRB rating of T but contains inappropriate content descriptors so overly long you'd swear it's supposed to be attached to an M rated game or that the developers also wanted the rating to be an anti-joke that would stick out compared to the other games out that week to gain purchases.
* Jazz's case, they'll probably name "Hello Dolly" and "What A Wonderful World", which are just songs, not jazz compositions, and Armstrong is well known for his distinctive singing voice and not as a trumpeter which is what his work in Jazz is based on.
* Jazz singer and bassist Esperanza Spalding got a huge amount of publicity when she won Best New Artist at the 2011 Grammys. Unfortunately, much of this was due to a perceived
* Jazz singer and bassist Esperanza Spalding won the 2011 Grammy for "Best New Artist". Her competitors included
* jazz songs.) Her name suited her stage persona so perfectly that many fans and even biographers were surprised to learn that it was indeed her birth name.
* Jazz standard "Tiger Rag" (AKA "Hold That Tiger") is used by multiple schools with the "Tiger" nickname, including Auburn, Clemson, LSU, Missouri and Princeton.
* Jazz Steve The Sound Guy, who dragged out Pussy Willow and easily put her through the seemingly unbreakable table.
* Jazz suffered this too at the hands of music critics when it first arose, and mostly due to racism. However, over the decades it's broken out of the ghetto, and

is even taught in schools alongside classical.
* Jazz, The Dogg Pound. She wrestle with a red bandana on too because "Redd Dogg" Rodney Mack also would.

* Jazztronauts, the Singer only ever communicates using an electronic tablet.
* Jazz trumpeter Clifford Brown died in a car accident in 1956 at the age of 25. His career lasted barely three years but he still managed to influence a tremendous number of later trumpet players, wrote two major jazz standards, and Benny Golson's "I Remember Clifford", written in honor of Brown, has itself become a standard. His collaboration with
* Jazz vocalist and pianist Blossom Dearie had this as a big part of her appeal, often described as having a girlish appearance and an innocent "baby-doll" voice. Case in point: her famous cover of "
* Jazz. When Jazz taunted LuFisto about how much less LuFisto had accomplished compared to her LuFisto said that was why she liked her.
* Jazz, when thanking Diva Dirt for a Legacy Award, mentioned how much time the job took away from being with her husband and kids.
* J.B. for the play, as two veteran actors currently employed selling balloons and popcorn at a circus.
* J.B.. In the play, J.B. cites this as a reason to believe in God even in the face of disaster; man is too insignificant to not believe in something greater.

* J.B., Sarah appears cradling a forsythia twig she found growing in the ruins of the town:
* J.B., Satan dismissively says, "You'll have better ones!", mocking the notion that everything could really be put right just like that.
* J. Carrol Naish (pronounced 'Nash'), an Irish-American (his uncle was Lord Chancellor of Ireland!), was often cast as Italian characters due to his swarthy complexion, like the character Luigi Basco that he played in the early TV sitcom
* J.C. Denton in "Helios ending" closed by Voltaire's aphorism "If God did not exist, it would be necessary to invent him".
* JC Denton starts out the game this way. He's sent directly from training to a terrorist situation on Liberty Island and believes that UNATCO is a paragon of law enforcement and justice. When the NSF commander (Leo Gold) at the end of the level tries to debate him about ethics, JC is adamant that UNATCO can do no wrong and justifies their treatment of the NSF. It only takes about a day before he's forced to confront his employer's atrocities, and eventually switches his loyalties to the NSF when they activate his brother's killswitch. As a result, he takes on a much more cynical and
* J. Cole has "Wet Dreamz", "No Role Modelz" and "Love Yourz", all three being released in a row and ending with "Z".
* J Cole's "Wet Dreamz": "That's when my heart starts racing and my body start sweatin'/Baby, you done woke my lil' man up" and "I'm in her crib, now a nigga palms' sweatin'/With a pocket full of rubbers and an erection".

* J Corp, seems to feel that it's his right as the oldest living human being to use his financial power to find a way to cheat death, regardless of the cost in terms

of money, lives, or morality.
* J.C. Penney suffered a backlash from its formerly loyal customers after they brought in a new CEO in 2011 and began selling clothes from hip, new brands aimed at attracting the younger crowd (like T-shirts you'd expect to find at Hot Topic, for starters). Their sales plummeted. As a result the new CEO was fired, the old CEO was brought back, and an ad was released promising that the changes had been reversed, saying
* JC Staff has a flat chested tsundere girl as its most popular and/or leading girl. ALL OF THEM.
* JCVD for a seemingly minor crime that he committed while trying to resolve the hostage situation and clear his name.
* JCVD, in which he plays himself reacting to a bank robbery mostly with fear and begging.
* JCVD runs on this trope. The bank robbers are convinced that they have taken "The Muscles from Brussels" hostage. Meanwhile, Jean-Claude knows very well that he isn't the action movie character they expect, just a washed-up, middle-aged B-movie actor who is very passionate about not being shot.
* J.D. also claimed at one point to have a comeback for every situation. Unfortunately, this comeback was always "so's your face". Played with in that instance, though, since he considers it a perfectly legit comeback, even when used by others in a nonsensical context.
* J.D. also mentions that he's attempting to do this to Turk when he asks Melody to keep a tiny bottle of ketchup so that he can replace everything in his apartment with tiny versions and convince Turk that he's grown extraordinarily tall.
* J.D. and Elliot closing in for a kiss as he was about to have a child and she was about to get married was a
* JD and Elliot try to be this, since their attempts at a relationship always failed horribly. Season 4 establishes that they no longer have romantic or sexual feelings for one another. In season 5's "My Day at the Races", they realized that their friendship was superficial and they weren't as close as they had been before their last breakup, but this is fixed by the end of the season and they stay that way until season 8 when they start having romantic feelings again.
* J.D. and Sean also don't much like each other, what with stealing each other's girlfriends.
* J.D. and Turk do a lot of shift-switching to put two doctors named Turner and Hooch together on a medical case,
* J.D. and Turk once explained to a dying patient that because they are around it so much they need to make it clear they aren't afraid of death.
* J.D. does-slash-subverts this with his dead, stuffed dog, Rowdy. The other characters just think J.D. has a hard time letting go of a beloved childhood pet — until Turk reveals that they got him from a garage sale when they were roommates in college. After that, pretty much every character spends some time playing with Rowdy, with Carla both thanking him for "finding" Turk's bandana and informing him he'll leave after she and Turk move in, at different occasions.
* J.D. does this a lot in later seasons, too, possibly aping Cox. It becomes a plot point when he's challenged by the
* JDG doll (supposedly the reason the show even exists) is shown to not do much except speak random messages like "look both ways before crossing the street!". Then as Fred wonders why it never sold, it starts saying "So a black guy, an Arab and a communist-" and Fred hurriedly throws the doll away.
* J.D. gets plenty of these via his internal narration, even though only the audience hears it. One of many examples:
* J.D. had to diagnose and treat a patient but was unable to figure out the diagnosis. During rounds, Dr. Kelso asked J.D. what treatment plan he chose, and J.D. painfully admits that he didn't do anything. He braces himself to be chewed out, but instead, Kelso compliments him and explains that the patient's symptoms were likely caused by being injected with too many medicines in too short of time and the proper treatment would be to stop the medication for a day or two.
* J.D. has a fantasy sequence of faking his death in order to get a hug from Dr.

Cox. Cox murders J.D. in anger; J.D. judges the risk worth it.
* JD has also made a friendship bracelet that he wears for Sasha, his motor scooter.
* J.D. has the Janitor and, briefly, hotshot intern Keith. Though frequently it was the Janitor getting ticked off at something minor that J.D. did and getting petty revenge, or playing a prank on J.D. for no particular reason.
* J Dilla was created as he was dying from an incurable blood disease, and was consciously crafted as a farewell to fans. It was released on his thirty-second birthday, and he died three days later.
* J Dilla, which was 75 percent complete. So he entrusted friend and producer Karriem Riggins to finish it.
* J.D. is scared of somebody else doing this to his, after an ex called his "Little Buddy", although he and others have referred to it as on occasion as "Little J.D." He already has a name for it, "Mr. Peeps", complete with British accent.
* JD is so uncomfortable in this position that he goes to sleep in his work clothes.
* Jd' Joan Of Arc ~ Jd' & JD Star Grapple Beauty Final of jd dojo graduate Yumi Ohka, who was returning to the ring after a two year absence.
* JD McCoy is a freshman phenom with a wildly overbearing dad. He's being groomed to be a future NFL star quarterback and his father forbids him to do things like drink soda, watch TV, or date. The one time JD shows signs of acting like a teenager, his father literally slaps him, forcing the coaches to intervene. Eventually, JD crumbles under the pressure.
* JD mentioned in an episode that he and Turk are so inseparable that a local bartender thinks Turk's name is Turk Enjaedi (
* JD occasionally attempts this tactic when trying to get a hug out of Dr. Cox. Dr. Cox does not appreciate it.
* J.D. often enlists either Turk or Elliot to help him masquerade as "the world's most giant doctor". The punchline is that there really
* J.D. often gets accused of this by watchers of the show, but he's not actually ugly — it's just Hollywood casting for hot girls that makes everyone a model.
* J. D. Salinger, but in "Seymour," Buddy emphatically denies the protagonist Holden is based on Seymour, and he claims the depiction of Seymour in "Bananafish" seems more like Buddy than Seymour. In addition, Salinger has a habit of including minor characters who narrate but refer to themselves in the third person, including Robert Waner in "The Inverted Forest" and Sgt. X in "For Esme with Love and Squalor."
* J. D. Salinger; he also rejected a proposal in the 1950s for a play based on that book.
* J. D. Salinger he would permit would be with himself, then well into his 30s, playing the 16-year-old lead.
* J. D. Salinger in 1949. The film had little resemblance to the original, and Salinger hated it so much, that he never again allowed his work to be filmed even after his death.
* J. D. Salinger's children report he that was much more invested in his fictional families than his actual one.
* JD's constant efforts to get the Janitor to like him, or eventually just to call off his grudge, usually backfire in this manner. There have also been a few episodes where it is implied or outright stated that in fact a
* JD's entire family apparently does this; when someone has to give bad news to someone else("My Cake"), they do so while presenting a cake. When JD's brother shows up at the door with a cake, JD immediately knows something bad has happened; sure enough his dad has died.
* J.D. set it up so a patient thought his name was Daman, so that, when the patient asked who was doing his procedure, J.D. could answer "Doctor Daman", prompting the patient to ask "Who's Daman". Needless to say, it failed, miserably. The patient was rather too polite, and added the honorific.
* J.D.'s mother praised him so much that he still thinks she was the perfect

woman.
* J.D started a similar relationship as "sex buddies" with ex-girlfriend Elliot Reid, from
* Jérémie also creates a polymorphic clone of William in Season 4. Yumi takes him as a fake boyfriend to keep people from realizing that something is going on.
* Jérémie Belpois. To put it bluntly, he willingly puts his entire world on the brink of malevolent A.I. apocalypse just about every day for the sake of maintaining a relationship with Aelita.
* Jérémie can transfer his teammates to Lyoko without saying "Transfer... Scanner... Virtualization" and jump back in time without saying "Return to the past now!", but still does it out of habit.
* Jérémie from attacking the real world. Even if others are left in dangerous situations in the process, Aelita can save them as long as she doesn't arrive too late; as such, saving her over the others is the logical move.
* Jérémie. Jérémie's clone substituted for the original while he worked on several programs for Lyoko. Clone!William replaced his real world counterpart for several months while the real one was trapped in Lyoko. Unfortunately, while these clones were pretty much benign and harmless (unless possessed by XANA, which both have been), they have drastically different personalities than their originals: Jérémie's clone is a bold womanizer, while William's clone is profoundly naíve and stupid.
* Jealocit) mediated the situation... and the Gokaiger kicked his butt.
* Jealously staring at another girl's huge breasts at the beach, at the pool, or in the changing room.
* jealous of her feelings/admiration for Guts, like her he eventually gets over it and admits his conflict to Guts himself.
* jealous of the beautiful Psyche, asked Eros to shoot her with an arrow so that she would fall in love with someone repulsive at first sight, but Eros ended up falling in love at first sight with Psyche.
* jealous wasn't reserved for a certain video-game situation, it'd be made for them.
* Jealousy to her brother, and Washington preventing her from getting an A.I. like North Dakota (by having a mental breakdown when implanted with Epsilon, but details) led to her resenting him and potentially her later betrayal.
* Jean acts like the big sister Harry never had, so he spends most of his time trying to wrestle his hormones into submission. While he mostly succeeds,
* Jean Alesi was an even more literal example of this. He only won a single race in F1 and even that was considered a lucky (although popular) win. Despite his talent being obvious to all who saw him race, a mixture of poor luck and lackluster machinery contributed to denying him further wins.
* Jean also performs one during the Battle of Trost, using several cornered comrades as a distraction so that the rest of the soldiers following him may escape safely.
* Jean Ango is a sniper with the typical distant attitude and lack of words to say but a highly unusual method: Because he also has amazing swiftness, he's able to pickpocket weapons off of nearby fighters and uses them against his targets. If it's a close-range weapon, like swords or maces, he will
* Jean Ango is the Quick Draw to Usopp's Trick Shot—he doesn't carry firearms on him either, and instead he is an incredibly fast and accurate shot using
* Jean Arthur, she retired from the silver screen and went on Broadway; however, her insecurity would often get the best of her. Her last days were spent in her home in Carmel, California. She died at the ripe age of 90.
* Jean Baptiste le Perche Du Coudray was a French fencing master of the 1600s. He was considered the first "modern" fencer, emphasizing the importance of the riposte.
* Jean Bart into a hybrid. Since this class of battleship featured all the guns at the front, she would have had a light carriers worth of aircraft and been able to

keep all her big guns. Ultimatly she was completed as a battleship post war.
* Jean, being rather temperamental (often with reason), does a lot of these in
* Jean Bernadotte went from French private all the way up to having his own Army as Charles XIV John, King of Sweden.
* Jean Boht. The show was set in Liverpool, where she lived, and many people confused her with the character. She said people have had arguments with her over her fictional TV family and how she treated them, and cab drivers not taking her because of the programme.
* Jean Borotra to relieve the castle and defend it from a Waffen-SS battalion trying to storm it and kill everyone. Not only did Borotra join the soldiers in the castle's defense, but he volunteered to vault the walls, slipping by the attackers and running to a nearby town to summon reinforcements before the defenders ran out of ammo. This gallant effort ended up helping save the battle.
* Jean-Claude, and the others of Belle Morte's line, function as incubi/succubi, though they are no longer called such.
* Jean-Claude Van Damme after he kills the man who raped and murdered his wife.
* Jean-Claude Van Damme does not voice himself in French dubs of his films, despite being a native Francophone, because "the Muscles from Brussels" has an accent that sounds strange to Parisian ears.
* Jean-Claude Van Damme has everyone who isn't already dead get killed by a rebel army, except for Van Damme's character.
* Jean-Claude Van Damme...in which he got killed off in a rigged motorcycle stunt.
* Jean-Claude Van Damme, JCVD opens a closet door to find the corpse of a woman hanging on the door, with a bullet in her brain.
* Jean-Claude Van Damme movie that was almost made before Cannon lost the rights.
* Jean-Claude Van Damme sequel because he wanted to do other projects and the money wasn't right enough to change his mind. In response, his character Kurt was killed off by franchise villain Tong Po in the opening of the film, setting the stage for another martial arts actor, Sasha Mitchell, to play the role of the youngest and last remaining brother out for revenge.
* Jean-Claude Van Damme who plays himself as an actor in a film being made in New York. The gang is allowed to be on the set because they are friends with Marcel the monkey who used to belong to Ross. Rachel has guts to go to talk to Jean-Claude and he finds her cute and asks her out, and Monica thus thinks Rachel stole him from her.
* Jean Craighead George is based on a pet owl, Yammer, that she used to have. She tells stories about her wild pets in ''The Tarantula in My Purse".
* Jean Craighead George, while not told from the perspective of wolves, does feature them as the primary members of the cast.
* Jean Croce had Raballo murdered and disguised it as a traffic accident, when Raballo tried to expose (and presumably shut down) the SWA.
* Jean de Dieu Soult, best known as one of Napoleon's Marshals, also happens to be France's longest-serving Prime Minister. He reformed the army and had fortifications built around Paris, among other things. Actually, the same could be said about many other Marshals, as biographies tend to focus on the Napoleonic era. Laurent Gouvion Saint-Cyr was originally a painter and art teacher, but he also served as Minister of War in 1818 and some of his reforms endured for more than half a century. Alexandre Berthier fought in the War of American Independence and studied the Prussian army for some years. Auguste Marmont failed as an industrialist, but his book
* Jean de La Fontaine" has a heron looking for food, but every time he sees a fish he thinks he can do better, until he can't find anything to eat at all, and has to make do with a snail.
* Jean De La Fontaine retold Aesop's fables and created some of his own.
* Jean de La Fontaine's adult-oriented poems use this trope as the plot:
* Jean escapes getting captured by a Titan by cutting its finger off and flying away.
* Jeane the person who stole his kill, in Henry's case), Travis is still declared the "winner" and takes their rank.

* Jean, for all his budding leadership qualities, has shades of this. He's been saved by Connie, Annie, Marco, and thrice by Armin.
* Jean François Nebell's company Litteris Production was in trouble after
* Jean from Team Unicorn is a Type I. He founded a team to give every teammate a good reason to win: for camaraderie. He knows how to combine the strengths of Andore and Breo with his strategy, resulting a near loss for Team 5D's.
* Jean Genet's novels, memoirs and poems record his attraction to, infatuation with and relationships with various somewhat younger men.
* Jean Giraud first worked under the name Gir, becoming best known for
* Jean Grey a major game-changer and a milestone moment for the franchise.
* Jean Grey and anyone else possessed by the Phoenix Force tends to have solid glowing gold eyes when they use the Phoenix powers.
* Jean Grey and Emma Frost and her clone daughters the Stepford Cuckoos being the most prominent examples.
* Jean Grey attitude) and shortly after became de facto consort of Sebastian Shaw, Black King of the Hellfire Club, she wasn't kidding.
* Jean Grey brought them to Jean's attention, though Jean appears to forgiven Xaiver.
* Jean Grey, but by chapter 70, they become increasingly formidable, and only become more so in the sequel.
* Jean Grey commonly use telekinetic force fields to protect themselves and their teammates. Presumably other telekinetic mutants are capable of this, as well.
* Jean Grey didn't seem to disturb him that much. He got over it in about two pages.
* Jean Grey. Even after countless hardships Jean has held onto that optimism and been an emotional anchor for the X-Men frequently.
* Jean Grey first encountered the Phoenix Force while using her telekinesis to hold the damaged space shuttle she and her friends were in together through re-rentry. While she succeeds in bringing the shuttle to Earth, at the same time a massive solar flare exposes her to a lethal radiation dose, and that's where the Phoenix Force steps in to save her.
* Jean Grey first used her powers when her friend Annie got hit by a car and died in her arms.
* Jean Grey found himself inexorably drawn to her despite being married. To make matters worse, his wife Madelyne looked just like Jean! (She was later revealed to be Jean's clone and killed off).
* Jean Grey, Hank, Warren, and Scott will drive you out. Or crazy. Or both. Usually both.
* Jean Grey has some complicated examples. None of them even worked out, somehow:
* Jean Grey (her love interests) always had blue in their costumes in early days.
* Jean Grey, however Jean herself has tried her best to defy this trope at times even as early as X-Men 12# when she had to play nursemaid to the wounded X-Men.
* Jean Grey, in quite an amusing way, since the comics Jean is 169 cm, but
* Jean Grey in the comics doesn't really seem to earn Wolverine's interest until she shouts him down. Every time she'd telekinetically clobber him and shout "I am no one's property!", it seemed to make him hotter for her. Pity every adaptation ever forgets that, having Logan fall for her
* Jean Grey is a literal example of this in her White Phoenix of the Crown form.
* Jean Grey is, by the sequel, the most powerful psychic that Earth has ever seen
* Jean Grey is scared of her telepathic power, and Xavier himself had struggled with his psychic abilities as a child (as mentioned in
* Jean Grey Joe Quesada admitted that the "Dead stays Dead" policy was stupid (since in comics it's like trying to plug a dam after the valley is flooded).
* Jean Grey. Later artists forget, and though Dark Phoenix's symbol is always torso-covering, the good Phoenix's chest symbol always fills the neckpiece. Amusingly, a later host of the Phoenix, Rachel Summers, once showed up in the red costume, immediately alarming her teammates until she explained that she just didn't like green.
* Jean Grey likewise had a very traumatic power manifestation, when her best

friend was hit by a car and killed at the age of six. It registered on a global scale and nearly killed her.
* Jean Grey: Marvel Girl, Phoenix, no code-name, Phoenix again, no code-name again
* Jean Grey — doing so would appear to be the telepathic equivalent of sticking your tongue out the corner of your mouth while aiming at a target: it just feels like it helps, even though it serves no purpose.
* Jean Grey, one of the most powerful beings in the Marvel Universe. While she initially handles this new power well, Jean is targeted by the supervillain Mastermind, who shatters her control over them in a mental battle. This causes her to lose it and become Dark Phoenix, an intergalactic menace who casually indirectly kills billions of people by devouring a star, and by doing so paints a big target on her back. This storyline was extremely influential, and many comics storylines parallel or homage this directly.
* Jean Grey outfit which when combined with her red hair gave her this aesthetic.
* Jean Grey quickly more or less adopts Harry as the little brother she never had. Emotionally, he happily reciprocates, though his hormones take a while to catch up. The fact that they're second cousins helps. In any case, threatening him will quickly cause Jean to go nuclear (emphatically
* Jean Grey; she's responsible for the eradication of a whole solar system.)
* Jean Grey's mutant psionic abilities first manifested when she was a child.
* Jean Grey's outfit made it sometimes hard to know which part were skin and which part were from the outfit.
* Jean Grey's Phoenix Force is a genuine divinity and has the power to match.
* Jean Grey starts to lose control of her psychic powers in the season 2 episode "Power Surge". Notably, unlike the previously-mentioned examples in the "Comic Books" and "Films - Live Action" folders, the Phoenix Force is not involved at all in this situation. When she loses all control, Rogue needed to drain her power to get them back under control, and she resumes training with Professor X in order to keep them that way.
* Jean Grey uses telekinesis, visible (to the reader) pink energy is often shown moving from her head to whatever she's manipulating. Other telekinetics often have similar effects (light blue for Justice/Vance Astrovik, purple for Psylocke, dotted lines or translucent white for the Invisible Woman, etc.). Rarely, if ever, is it made clear whether this energy is supposed to be visible or not. Often, onlookers will clearly be unable to tell why an object is moving seemingly under its own power, but on at least one occasion another character referred to Jean's telekinesis as "pink stuff."
* Jean Grey when she learned he was the son of her surrogate mother Mystique.
* Jean Grey when she stayed a good guy while wearing one of her most outrageously sexualised costumes ever.
* Jean Grey, who despite only being seventeen, is this to Harry (her cousin),
* Jean Harlow. Both probably would have made more films if not for Harlow's sudden death from kidney failure at age 26.
* Jean Harlow characters, before the Hays Code forced her to switch her image for this instead.
* Jean Harlow dyed her hair platinum blonde, though she denied it, and was in fact naturally very fair — just not as fair as she appeared onscreen. Eventually, her hair actually had to be cropped short due to peroxide damage, meaning in some films she's actually wearing a wig. Some stories say that bleached her pubic hair as well to maintain the illusion, but this is likely false.
* Jean Harlow...if Harlow was wearing a fancy dress in a movie, it probably didn't have a back.
* Jean Harlow). There was even a national day of mourning in the UK when she died.
* Jean Harlow. The studio tried to enforce this with images of her doing charity work to seem like a more wholesome All-American type.
* Jean herself has good control over her powers, but until the very end of the first book has very little idea of their sheer potential scope, meaning that she's largely winging it in the finale once she taps into her full strength. Later, she gets extensive training and becomes far more effective.

* Jean Hilliard of North Dakota. She was frozen stiff, but was as good as new when she thawed out.
* Jeanie finally has it out with Louie had done it because he's secretly been in love with her. Not because she was a woman; thus, subverting the trope.
* Jeanie Johnston was a rare exception to this; her crew kept the ship clean and a doctor was always on board to care for the passengers. As a result, the ship made 16 voyages to North America without any passenger deaths. She eventually sunk while hauling a load of timber, but no one died then either; the entire crew was rescued by a Dutch ship a few days after the sinking.
* Jean is also notorious for being unflinchingly honest with his opinions.
* Jean is callous when his hometown of Trost was being attacked, complaining he was one day away from joining the Military Brigade and leaving the whole mess behind. His attitude
* Jean is one of the only female characters that wears pants instead of the shorts and boots that most of them have. They're basically leggings, so they show her legs' every curve, and her introduction cutscene starts with a few seconds focused on those legs.
* Jean-Jacques Rousseau are cornerstones in modern political and social thought.
* Jean Johnson. Ia demonstrates why she is the only one who can fire it by pointing out that its range is measured in many light-years, and that over-shoots will definitely ruin someone's day: the area light-years away might be empty at the moment you fire it, but may not be empty when the beam enters the area years from now, as both planets and ships are moving all the time, and only a hyper-powerful precognitive can fire the weapon in a safe direction. Fortunately for the plot, Ia is such a powerful precognitive.
* Jean Johnson series, whole planets and moon colonies are infected with a 100% fatal plague. Even though everything on those planets and moon colonies are dead, Ia has the Feyori shift their orbit enough to have them fall into their respective suns, to prevent future bad guys from gathering samples of the plague and threatening other planets with it.
* Jean Johnson. She orders all of her crew to request transfer off the ship to save their lives, and the crew objects because they want to stay with her to the end. They explicitly ask her what will happen to them if they do transfer off, and while she lists a few people who have to live, she admits that "the rest of you have already had your impact" and "fame is fickle, and basking too much in your glory days will lead many of you to soured lives".
* Jean Johnson. The gray sphere is literally the width of multiple solar systems, and after it passes by, literally nothing is left: not planets, not stars, nothing. It consumes whole galaxies, and is on route to ours. Also, to a lesser extent, the Salik, who only eat sentient creatures but prefer to do so while the sentient creatures are alive and screaming.
* Jean Johnson to predict and overcome every move. Once she was put in charge, Ia decentralized all decision making almost down to the squad level, and directed her forces to run their own campaigns by simply reciting to them the code-words for the small-squad maneuvers that they had all learned in boot camp. Even though the Salik intercepted her orders, they didn't know what the code words meant, while the soldiers did, so her orders were clear to her own troops and of no use to the enemy.
* Jean Knight had a #2 hit in 1971 with "Mr. Big Stuff" but none of her other singles took off. However, her 1985 cover of Rockin' Sidney's "My Toot-Toot" (see the Country subpage) was a big hit in South Africa.
* Jean Lafitte was another famous pirate and privateer who fought for the US during the War of 1812. (During his lifetime, he fought as a privateer under a number of flags; a true pirate, his allegiances were all over the map.) Until then he had operated what was basically a private empire with a fleet bigger than the US Navy.
* Jean Lannes, one of Napoleon's Marshals, could actually be shot, but it didn't keep him down for long. He was not the most wounded officer of that time (he wasn't even shot five times in the chest in the course of his career like, say, Nicolas

Oudinot), but he was the only one with a reputation for having bones so hard that bullets bounced right off them. He did die young, but it was of gangrene after a cannonball tore through his legs.
* Jean-Luc & Dondoozat, Dondoozat usually did with to Jean-Luc whenever he would misbehave.
* Jean-Luc & Dondoozat episode "Autoroute", Jean-Luc took to mooning people on the highway, causing them to crash due to the distraction. The third car he tried it on, though, was being driven by Dondoozat, who chased and spanked him.
* Jean-Luc & Dondoozat has his eyes positioned so one is above the other, with his nostrils between them.
* Jean-Luc & Dondoozat, Jean-Luc called Dondoozat and farted into the phone when Dondoozat said hello. Dondoozat quickly found out and punished him for it.
* Jean-Luc Godard, and a recurring target is French philosopher, socialite and TV windbag Bernard-Henri Lévy, who really, really doesn't find it funny at all (which is one of the reasons why Godin keeps doing it.)
* Jean-Luc Picard is famous across the Alpha and Beta Quadrants, although his reputation has been somewhat tarnished after he resigned from Starfleet because he chose to do absolutely nothing (other than caring for his family's vineyard and writing history books) during his retirement.
* Jean-Luc Picard mentions that his brother Robert operates the family vineyard in La Barre, and keeps a couple of bottles around for special occasions. There is in fact a "Château Picard" in
* Jean Marais, then one with American dancer George Reich. He also had a brief one with actress Mila Parély, and may have been among the lovers of King Umberto II of Italy.
* Jean-Marc and Randy Lofficier's English translation of the early French SF novel
* Jean-Marie is held by Asterion as one of the best masters the hotel had, as the hotel was pretty damn close to achieving its goal when he was the master.
* Jean-Marie Le Pen is a French politician and founder of the right-wing populist National Front party who advanced to the presidential runoff in the 2002 election but lost in a landslide to the moderate incumbent President Jacques Chirac. His daughter, Marine Le Pen, later took over the party and in the 2017 presidential election advanced to the runoff, but similarly lost in a landslide to the moderate candidate Emmanuel Macron.
* Jean Marsh. Her character was actually a bona fide spy, or at least an agent of a paramilitary organization.
* Jean, meanwhile, got Duncan; however, the writers brought him in as a
* Jean-Michel Jarre, and maybe for his gigantic outdoor concerts. But there's even more to him:
* Jean-Michel Jarre, but rejected due to not fitting with said album's theme. Instead, he released it as a B-side to "Rendez-Vous IV".
* Jean-Michel Jarre. Even when he toured in 1993, he had ten projection screens of various sizes behind the stage which mimicked a skyscraper skyline.
* Jean-Michel Jarre fans refer to themselves and each other as Jarriens.
* Jean-Michel Jarre, including guitar stompboxes and electronic organs (in particular, his famous sweeping string sound is made with a mid-class Dutch home organ and a phaser effect box). Add to this the fact that many Jarre fans and followers are electronic musicians themselves.
* Jean-Michel Jarre's 2004 double concert in Beijing was his first to be transmitted via Web stream. The Chinese TV company set up several servers for this purpose. Unfortunately, they underestimated the legions of Jarre fans around the world who wanted to watch the concerts...
* Jean-Michel Jarre shows nothing but penguins waddling on the Antarctic ice.
* Jean-Michel Jarre was published by the small jazz label Disques Motors — and sold ten million copies right away.
* Jeanne Alter looks like Jeanne d'Arc, this makes the the French hate and fear Jeanne, often forcing her to hide.
* Jeanne Baret, the botanical assistant, housekeeper, and possible lover of the French naturalist Philibert Commerçon, accompanied her master when he joined

the Bougainville expedition; since women were not allowed to serve on French ships, she traveled in disguise under the name of "Jean Baret". Commerçon pled ignorance when the deception was revealed.
* Jeanne Calment, who currently holds the world record for oldest person of all time, smoked for 96 years starting at the age of 21, and lived to be 122. She reportedly only smoked one or two cigarettes a day in her later years, but it's still very impressive.
* Jeanne d'Arc, even if her death could be used as an excuse to drive the English out of France. The truth of the matter, on the other hand, contrary to popular belief, is a lot more complicated, to say the least, as French historian Pierre Champion will tell us here:
* Jeanne d'Archétype to be taken seriously (with a brief aside that the writers do not endorse this attitude).
* Jeanne D Arc shares an embarrassing story of a time Jaune Arc tried to get his ear pierced, but it got infected.
* Jeanne d'Arc when she decides to pursue the Englishmen and join the army.
* Jeanne Dielman, 23 quai du Commerce, 1080 Bruxelles is three and a half hours long of a woman doing the same things over and over again. That length is the entire point, but it's still put generations of film students to sleep.

* Jeanne Moreau) continued her artistic career well into the 1990s, branching into new styles as the decades went by, and still created daring work past her 100th birthday.
* Jeanne, one of the Founders of the Court, and an unnamed male elf from Gillite Wood.
* Jeanne Robertson's "Never Send a Man To the Grocery Store" (as can be seen
* Jeanne seems to be of this type, as her endings usually have her lamenting her victories as a still-single woman.
* Jeanne, the Ghost of the Annan Waters, is a terrifically dangerous spirit caught beyond the reach of the Psychopomps.
* Jeannette was sexually assaulted while incapacitated after being drugged.
* Jeanne wanders the Reverse Side of the World until she finds Sieg, who had been turned into a dragon. When she touches him, he returns to normal. Happy to see each other, they agree to go on a journey together, then Jeanne confesses she is in love with him.
* Jeannie magics up some expensive treasures to show off for some random guy who knocks on the door. This random guy, of course, turns out to be an IRS Agent.
* Jeannie sees Ferris running home in her side mirror, but he's gone before she can show her mother.
* Jean Patou, introduced casual and sportswear in women's fashion, the first designer to put monograms on garments, the guy who shortened the hemlines to the knees, only to lengthen it back later in the decade.
* Jean-Paul Alata's book about Sékou Touré, the dictator of Guinea, was allowed in France in 1981, four years after Alata's death from a stroke.
* Jean-Paul and his partner Kyle Jinadu tie the knot. It came out in 2012 when an increasing number of American states were legalizing same-sex marriage; this was Marvel's extremely unsubtle way of voicing their support. The problem is that Kyle is just a minor character whose relationship with Northstar—himself just an on-and-off member of the X-Men—mostly developed off-panel. For them to have the full-blown "Superhero Wedding" treatment would have made no sense if Kyle were Kylie instead.
* Jean-Paul Beaubier, as per canon (Northstar of the X-Men). However, he's an
* Jean-Paul Beaubier, one of Harry's friends, a mutant speedster — and from the finale of the first book,
* Jean-Paul Beaubier takes this role, initially to Harry (a little bit), and later rather more extensively to Clark, who's much more of a
* Jean-Paul Belmondo always did his own stunts, be it climbing on the rooftops of

Paris, fighting (he was a boxer in his youth), or hanging on helicopters.
* Jean-Paul is given access to the Speed Force, the bequeathed power of a long dead cosmic entity from the Marvel Universe known as the Runner.
* Jean-Paul Marat, despite generally being considered an enthusiastic advocate of execution in the rest of the revolution, took a surprisingly limited stance - Louis was only guilty if he had violated the constitution of 1791 (which of course Marat believed he had).
* Jean-Paul Sartre for "authenticity". He claimed that life and society was essentially meaningless and that it was up to human beings to give meaning to their existence and take responsibility for that self-defined ideal, and that "Bad faith" was all around us which means there's no one definition of authenticity that anyone can follow, rather they must follow their reason and their conscience.
* Jean-Paul Sartre, when the members of this relationship are put together in a room for all eternity.
* Jean-Paul's only friend at all prior to meeting Harry is Carol and possibly his mildly crazy twin sister.
* Jean-Paul Valley, he had a shuriken launcher built into his metallic gauntlets. By the time he reaches his final armor upgrade, it's magazine-fed and its settings reach a point where it could probably cleave a man in half (it certainly did its targets)
* Jean-Paul Valley's, no matter how evil they are and no matter how likely they are to escape and kill again.
* Jean-Paul Valley wasn't born but as much as engineered, conceived in a vat his genetics were altered with those of animals by The Order of St. Dumas, to give him strength, speed and resilience beyond human.
* Jean-Philippe is the manager of a small bowling hall and goes by his real name of Jean-Philippe Smet.
* Jean-Philippe is the Parisian Police Department's High Commissioner also serves as the team's Profiler and occasionally partners up with the player character to do field investigation when their regular partners are otherwise unavailable.
* Jean-Pierre Polnareff, though his tendencies toward this trope are downplayed, mostly because almost all the female characters encountered in Part 3 are either enemy stand users or single-scene side characters appearing for Polnareff to show off to. In his
* Jean-Ralphio and his twin sister Mona Lisa are also portrayed this way. They are both portrayed as obnoxious childish freeloaders who often screw Tom over. It is also revealed that Mona Lisa has convinced her father that she is a complete angel.
* Jean-Ralphio Saperstein is very obviously an obnoxious ass, but Ben Schwartz plays him so marvelously that the fandom likes him anyway.
* Jean Reno. Averted in the Quebecois French dub, where he's voiced by Guy Nadon.
* Jean Renoir to Commedia'dell Arte, bringing the style to cinema with legendary actress Anna Magnani playing Colombina
* Jean Reno is successful in both European cinema and Hollywood, appearing as French, Armenian, Russian, Italian, Polish, German...
* Jean Shepherd first loses. The Big Eater figured he'd have no problem, but he ended up heaving half his insides out while the little guy wins, having built up a tolerance in the past.
* Jean Shepherd hosted a program on New Jersey Public Television called
* Jean Shepherd opened and closed each episode of his long-running local New York radio show with "Bahn Frei" by Austrian composer Eduard Strauss.
* Jean Shepherd's greatest stories on his radio show was about the price war that broke out between two stores directly across the street from one another. The group coming for the bargains kept growing and reversing direction with every competing penny drop in the price. Soon word got out and there was a rumbling on the horizon as hordes began arriving for the cheap ice cream.
* Jean Shepherd tells of his experience on a blind date in which he gradually figures out that HE is the blind date, not his date.
* Jean Shepherd themselves, with a cover painted by illustrator Frank Kelly Freas, published by Ballantine Books.

* Jean Shepherd wrote many short stories about Joisey. Many of them satirizing pop art — such as the large ship sailing against traffic on Route 22, Lucy, the giant elephant hotel room in Margate, and them concrete Mexicans and flamingos on people's lawns.

* Jedi Academy, a mutated rancor appears and you have to run away from it through the entire level (while fighting dozens of dark Jedi) until you can achieve an environmental kill. In an earlier level, you have to help prisoners escape from a rancor pit, usually by leading the rancor away from their group while they Run Or Die.
* Jedi Academy. Apparently for a Jedi to become angry enough to kill a helpless prisoner automatically also makes them obsessed with power and others' weakness.
* Jedi Academy could recover it if they later deemed it necessary), they picked the gas giant. Later, when new uber-powerful Force Sensitive Kyp Durron got haunted and went evil, he fished it out using the Force and remarked that he wouldn't have had much more trouble if it had been in the sun. Later it's thrown into a black hole, this time for good.

* Jedi Academy has four levels that involve different variations of the theme of an enemy (or several) chasing you that can't simply be killed, and three of the enemies fit this trope.
* Jedi Academy in which the player is captured and must break out, obtaining weapons as they go. Another level places the character at the controls of a speeder bike. One level is essentially a puzzle level with no enemies to fight. Others have unique enemies found nowhere else in the game, including a couple areas where a creature is your main opponent and another that's basically a game of cat-and-mouse with Boba Fett.

* Jedi Academy, or the Imperial Remnant that's allied with them, trying to do some generically adversarial stuff like terrorism or weapon smuggling.
* Jedi Academy seems exceptionally adept at delivering Superweapon Surprises. After the aforementioned escape, the New Republic finds itself in possession of the worst weapon of mass destruction the universe has ever seen. This is decidedly against its principles, so the craft is ordered destroyed - which is somewhat difficult to achieve, considering it can withstand the pressure at the core of a star without a scratch. One character - well-meaning, but falling prey to the dark side - disagrees, retrieves the craft and out of the blue vaporizes the entire Carida system, one of the Empire's remaining strongholds. Surprise!
* Jedi Academy Trilogy, Ackbar takes over remote control of a partially-completed MC90 Star Cruiser and rams it into an Imperial Star Destroyer attacking the shipyards. Both ships are obliterated.

Another problem is that Daala worships Tarkin to a massive degree, resulting in her using his tactics despite the fact that the New Republic is already very experienced in dealing with those tactics as well as following his philosophy despite how it backfired on the Empire leading to its dissolution in the first place.
* Jedi and Sith (or, heck, any force user) also has a tendency to do this as well.
* Jedi and the Sith actually both embody Harmony and Discipline, but in opposite areas. The Jedi strive to master their emotions and do the will of the Force while the Sith seek to bend the Force to their will while giving in to their emotions. The Jedi belive in internal Discipline and external Harmony, while the Sith believe in external Discipline and internal Harmony (or Passion, which may not be identical; either way, a lack of control).
* Jedi Apprentice has been split between the Melida and the Daan, who for many generations have been feuding over an original cause no one remembers — now each fights to punish the other for their most recent atrocity. All resources now go into fighting and memorials featuring recordings of the dead, urging the living to avenge them. The Young — the youngest generation — is sick of it.
* Jedi Apprentice, in which Obi-Wan relaxes into his Jedi role a little farther and strengthens his bond with Qui-Gon.
* Jedi Apprentice noted that a good early sign that the Master-Padawan bond is working as it should is for both parties to sometimes think the same thing in unison. Notably, this doesn't mean either can read the other's mind, though they may become close enough to know what the other is thinking.
* Jedi Apprentice, Obi-Wan Kenobi become friends with and became attracted to a girl named Cerasi, but he didn't entirely understand what was happening. He confided his feelings to fellow Jedi Bant Eerin after Cerasi died, and Bant explained.
* Jedi Apprentice series that Padawans turning thirteen are always given gifts from their Masters, gifts with some symbolic meaning that take a lot of work to get, like healing crystals or specially made cloaks. Little Obi-Wan Kenobi is shocked, therefore, when Qui-Gon gives him a river rock. He conquers his own disappointment enough to look closely at it and see that it's a beautiful rock and hangs on to it. Later it turns out to react to his own Force abilities, which helps keep a mind wipe from affecting him; but when he tells Qui-Gon about this, Qui-Gon blandly says he thought it was a normal stone. Obi-Wan's not sure if he's being trolled or not.
* Jedi Apprentice tried to expose Palpatine's corrupt ties to the Seperatist during the Clone Wars, causing a bounty to be placed on his head after the Empire was established.
* Jedi Apprentice, which recruits people from environmentally devastated planets. It's actually part of an elaborate scheme to rob them all.
* Jedi Apprentice: While Grelb is being devoured by a local creature, a wild, panicked shot he fires kills Jemba.
* Jedi Apprentice while they stripmine the planets holy spaces, and contaminate their sacred pools with chemicals. And that's leaving out the fact that Offworld is also involved with the illegal slave trade, and Xanatos' terrorist vendetta against the Jedi.
* Jedi are supposed to be taken for training at an early age, specifically to ensure all they know is the Jedi way and they do not form attachments to anything or anyone outside it. This has raised eyebrows, even in-universe.
* Jedi Civil War. Wookiee labor was used in places where it would be too expensive to use and keep repairing droids, and was a revenue stream for Czerka while they found out what else the planet could get used for.
* Jedi Consulars and Sith Inquisitors can convert health into force in
* "Jedi Crash": Everyone has to run to the escape ship from Aayla's exploding cruiser. A couple of clones don't make it, and Anakin realizes the rest of the group is going to be overcome as well, so he stops and Force-pushes everyone else past the next blast door. While he's able to keep the flames mostly off himself

using the Force, the concussive blast knocks him out and Ahsoka and Aayla have to cut the door open and drag him the rest of the way.
* Jedi, for whom chaos and bad leadership were actually plusses, given his endgame.
* Jedi Grandmaster Satele Shan's son Theron is not Force-sensitive. This doesn't mean that Theron is in any way less of a badass than his mom... or his dad (Jace Malcolm, the Supreme Commander of the Republic forces).
* Jedi have harnessed the Force that binds the universe together, but their powers are still limited by what was cheap and easy in the 1970s and 1980s, such as making actors repeat things, speaking in voice-over to each other, and "sensing" things. More budget-heavy feats like moving objects and jumping were still pretty affordable. All of this makes the Emperor's Force lightning that much more of a shock (no pun intended) when he breaks it out in
* Jedi healers use the Force to help others in this regard — healers include
* Jedi healing trances often come with a variation where a trigger phrase is used to bring the Jedi out of the trance after they had been under for a sufficient time. Luke and Mara would use “I love you” when one was waking the other.
* Jedi in general are a mix between (highly idealized versions of) knights and samurai. However, how much "knight" and how much "samurai" actually varies between cultures. Corellian Jedi, according to
* Jedi in general just love to run through dozens of enemies taking each out with one slice, especially droids.
* Jedi in general. While a Jedi Knight certainly isn't invincible, and they've been getting thrashed by the Sith for years, only an idiot wouldn't respect their power (we are talking about a group of people who can lift heavy object with their minds, heal wounds instantly, possess lightning quick reflexes and swords that can cut through almost anything), yet most people you encounter in the game will think of Jedi as absolute pushovers. You encounter a pair of women on Dantooine who look like nothing more than simple farmers, who seem to seriously consider taking on a Jedi to collect on the bounty.
* Jedi K'Kruhk has managed to be almost killed several times over. He goes into some form of hibernation if seriously wounded, leading to people assuming that he's dead. But no, he's still got a looooong time ahead of him.
* Jedi Knight 2, there is a cheat setting that allows the lightsaber to do this, accurately slicing models along the cuts, making it possible to filet enemies and friends alike. The setting to allow this implies that it was a feature of the game that was censored.
* Jedi Knight a different design: the first games allow you to use it underwater (as it's an older lightsaber made for the purpose) while in the newer games Kyle didn't know enough about lightsabers to create one that would work underwater.
* Jedi Knight: Dark Forces II had two endings: In the Dark Side one, Kyle becomes the new Galactic Emperor. Naturally, the canonical ending is the Light Side one, where he defeats the bad guy and leaves the Valley of the Jedi in peace. It's also interesting how if you pick the Light Side, you get cutscenes and a plot that ties itself up nicely. If you pick the Dark side, however, you barely get some exposition text that (barely) justifies doing the exact same missions and actions, but for yourself apparently.
* Jedi Knight: Dark Forces II. Hit anything with the saber (Well, anything smaller than a truck), and it goes down.
* Jedi Knight: Dark Forces II, if you perform certain actions you can unleash Max from Sam & Max on a level. He will move through the level, murdering any enemies unfortunate enough to cross his path.
* Jedi Knight: Dark Forces II is revealed to enjoy classical music from around the galaxy, even pieces written by traitors to the empire.
* Jedi Knight: Dark Forces II it's revealed that the planet of Ruusan was rediscovered by the smuggler Jerg when he came out of hyperspace after a blind jump that he was forced to take to avoid being blown into atoms by an Imperial patrol vessel.
* Jedi Knight: Dark Forces II more heads (and other body parts) popping off like wine corks.

* Jedi Knight: Dark Forces II replaces it with "Capture the Ysalamiri", a more standard Capture the Flag clone with a ysalamiri on a branch in place of a regular flag.
* Jedi Knight: Dark Forces II, using a custom script to display player's speed in a custom level, running with maxed Force Speed is 107 km/h or 67 mph(compared to 47 km/h or 29 mph without it), achieving this speed from a standstill in about 1 second and also can make the sharpest turns ever at this speed, and hitting a wall at this speed results in slight health loss. When using a cheat code to fly, top speed with maxed Force Speed is 323 km/h or 201 mph (compared to 143 km/h or 89 mph without it), but reaching this speed from 0 km/h will take much longer (at least 5 seconds but don't remember exactly), and turning at this speed requires lots of space, and hitting a wall head on at this speed will kill you.
* Jedi Knight: Dark Forces II where a recently freed Jan Ors heads to safety. Subverted in the novella covering the game, where Ors is able to distract the dark Jedi with a thrown rock allowing Kyle to strike him down.
* Jedi Knight during that animation, the now-headless body will continue lamenting the loss of its hand.
* Jedi Knight II: Jedi Outcast: After spending a few levels powerless, Kyle Katarn regains his Jedi Force powers and lightsaber, which should make him an unstoppable killing machine (the lightsaber alone automatically deflects enemy blaster shots). So of course, instead of regular stormtroopers, the very first level as a Jedi is full of snipers and grenade throwers who can't be countered, negating everything the player just acquired.
* Jedi Knight II: Jedi Outcast and promptly locking themselves out from an item crate or the path out of the level.
* Jedi Knight II: Jedi Outcast are a fallen Jedi named Desann and an Imperial officer named Galak Fyyar. Both appear to be working together, but privately have different goals. Specifically, Desann wants to use the power of the Valley of the Jedi to create an army of Force-sensitives with which to topple the New Republic and create an empire of his own. Fyyar has been heavily mining a rare mineral called cortosis capable of resisting lightsabers in order to be able to effectively counter Jedi and, when the time came, Desann and his Reborn soldiers, in order to restore the old Empire and rule it.
* Jedi Knight II: Jedi Outcast, as seen in the page quote. No luck, but at least it manages to make him angry. It also completes Kyle's character arc from an angry guy with a lightsaber to a Jedi Knight capable of forgiveness.
* Jedi Knight II: Jedi Outcast: At the end of the trial to test his newly regained Force powers, Kyle Katarn must retrive his lightsaber from a cage atop a pillar. Lowering the pillar is easy enough, but getting his saber out requires a carefully timed combination of Force Speed and Force Pull... even though the bars of the cage are far enough apart that Kyle could quite easily just reach in and grab it. Or levitate the lightsaber out between them. Or activate the saber remotely and cut the cage open.
* Jedi Knight II: Jedi Outcast, characters enter and respawn in a versus match through a beam of energy. Getting hit by one of these beams results in getting "crushed into another dimension by x". A more amusing example is setting the number of bots to 10 and starting up a match in the Imperial Labs: Raven map. Because of how incredibly small the map is compared to other areas, spawn points are cluttered up, if not, overlap with one another. No matter what you do, you will ALWAYS start up the game automatically telefragging an enemy or an ally, or several people at once.
* Jedi Knight II: Jedi Outcast is that the Light ending is canonical, which is where the novel starring Jaden Korr follows from.
* Jedi Knight II: Jedi Outcast, it tells of a previous mission to Tatooine where Kyle Katarn left a single survivor. The author of the message, a New Republic intelligence agent, expresses anger that said sole survivor was too traumatized to offer an vital information.
* Jedi Knight II: Jedi Outcast levels requires all the previous enemies to be killed off; if Kyle had been handling foes the Jedi way, he'll have to massacre all

the lives he previously spared in order to continue.
* Jedi Knight II: Jedi Outcast occasionally do a variant with their lightsabers, flailing wildly when struck with a fatal blow; it is quite possible for Jaden to perish by standing too closely.
* Jedi Knight II: Jedi Outcast on FFA_Bespin. If you change the map with a vote while there's nobody else on the server, expect choruses of "Boooo! This map sucks! We want FFA_Bespin!" once enough people join. Everybody else just plays FFA_Deathstar, usually with lightsabers only and no Force powers.
* Jedi Knight II: Jedi Outcast: The logo falls into place from the camera's perspective, with the arch forming into place to the sound of a lightsaber deactivating.
* Jedi Knight II: Jedi Outcast, the offer of mercy comes across as nothing more than an insult.
* Jedi Knight II: Jedi Outcast, the prison where Jan is kept is like this, with about five or six consecutive doors. Holding down the switch in between two doors holds those two doors open only, so you have to open the doors, wait for Jan to walk through to open the doors for you, and continue until you leapfrog your way out.
* Jedi Knight II: Jedi Outcast who can kill you in a couple hits and can use supercharged force powers which are impossible to resist. However, he can also be killed with about 3 solid hits from the strong saber style. A straight duel with him (without using the Force energy beam in the center of the room to beat him) usually ends in less than half a minute, one way or the other.
* Jedi Knight II: Jedi Outcast, you will usually just watch Kyle die in a slow motion sequence. However on one level, you are required to be stealthy. If an enemy raises the alarm, you will see a cutscene of Kyle in prison just before being tortured.
* Jedi Knight: Jedi Academy disbelief at the ceiling before being banished.
* Jedi Knight: Jedi Academy going for round two rather than the traditional unrelated villains who happen to have the same goal of abusing the Valley of the Jedi's power.
* Jedi Knight: Jedi Academy had you fleeing from a giant cyborg rancor in a series of enclosed warehouses.
* Jedi Knight: Jedi Academy has Jaden Korr notice cloaked enemies are nearby shortly after leaving his ship. He activates his lightsaber, ready to take them on, before they uncloak and reveal just how many are surrounding him - at least five around him, plus another two on the high ledge near their commander when he comes to gloat, and they all have one of the deadliest weapons in the game pointed right at Jaden - at which point Jaden wisely decides to drop his lightsaber and surrender at the commander's suggestion.
* Jedi Knight: Jedi Academy has several examples in different levels, with the player character being the third party.
* Jedi Knight: Jedi Academy have strong Force auras - say, Dagobah, which was established as having one even in the original movies (being able to mask his presence by it being the whole reason Yoda went in hiding there). Conversely, when Jaden later accompanies Kyle to Byss so they can finish Rosh's mission, they realize right away there's no aura there because it has been drained already.
* Jedi Knight: Jedi Academy is loaded with them. There's a reason why you only have to do 4 of 5 missions in each act. Perhaps as a shout-out, you can trick them into eating explosives to distract them from chasing you.
* Jedi Knight: Jedi Academy: The arch turn into two lightsabers, which the Gold Guy connects at the hilts and spins to deflect several blaster bolts, then launches lightning from his hand at something offscreen.
* Jedi Knight: Jedi Academy. The game also defaults to "Darth Imperius" if a level 60 Inquisitor is rolled for the expansion, although their gender is still unconfirmed.
* Jedi Knight: Jedi Academy, the opening cutscene has Jaden and Kyle piloting their ship, with Kyle relaying a a story of his previous adventures to his student before they're interrupted by a distress signal:

Even those who are close (either physically or emotionally) can only send a sentence or two at most, combined with images and feelings.
* Jedi often stored information in things called holocrons, which typically contained several AI personalities which could distribute information, or not, depending on if they felt people were worthy. These tended to last thousands of years, though some had limited batteries. Of course, they
* Jedi Outcast and Academy this is a useful trick, as a saber throw is easily blocked going forward, but impossible to block when it hits the enemy from the back.
* Jedi Outcast by running into a room and letting the fireball pass you by.
* Jedi Outcast does allow the player to dodge the Disruptor Rifle shots, if you have Force Speed. It activates Force Speed for the duration of the dodge animation, making it look cooler, and drains a lot of Force Power, so the Computer is still a cheating bastard.
* Jedi Outcast, Fyyar goes off on a monologue, while Kyle casually finishes the objective he was performing before he was interrupted.
* Jedi Outcast has problems speaking Basic and constantly confuses singular and plural nouns.
* Jedi Outcast in multiplayer has a variation of Capture the Flag called Capture the Ysalamari. The carrier cannot use his force powers, and nobody can use the Force against him.
* Jedi Outcast, Kyle Katarn sarcastically asks Reelo Baruk what a decent crime lord like him is doing associating with the likes of Desann and the Imperial Remnant, and Reelo answers "Making money, of course." He's probably indifferent to who ends up ruling the galaxy.
* Jedi Outcast still chooses to duke it out with Katarn, despite losing his entire fleet and most of his strike troops having been wiped out by the Jedi. Admittedly he doesn't even know the attack has failed until Kyle tells him just before the fight, and the entire thing was a diversion to get him to the Academy basement where the fight takes place anyway.
* Jedi Outcast when Kyle decides to keep his lightsaber, we are informed that Lando owes Jan five credits.
* Jedi Path: A Manual for Students of the Force retcons that by making the robes explicitly an uniform.

* Jedi Starfighter, has some more open-air missions among broken sea cliffs, and a few missions that involve flying inside of surprisingly small installations.
* Jedi Starfighter: Reti, an ally of the main characters is forced to make a blind jump into hyperspace to escape when Jango Fett comes after him for the bounty on his head. It's never revealed if Reti survived, with some of his allies going to look for him at the end.
* Jedi tend to favor these, with many of their personal ships lacking even shields and focusing heavily on speed. This is because, thanks to being Jedi, they can push the capabilities of the ship to its limits; shields are dead weight when you can basically dodge rain.
* Jedi that is instantly lethal. This could mean that Force Lightning is something that any sufficiently powerful Force-user could wield, but the Jedi generally refuse to because it's basically made only to cause extreme pain.
* Jedi training actively encourages being calm and collected to the point of being effectively emotionless at all times, no matter how serious and stressful a situation the Jedi finds themselves in. Jedi who fail to act like this are either apprentices, on the way to the Dark Side, or both. This attitude tends to unnerve and annoy nonForce Users when around a Jedi.
* Jedi Under Siege) introduces two new potential love interests who can be flirted with regardless of gender: jedi knight Tau Idair for republic players, and imperial soldier Major Anri for empire players. It also allows female Jedi Consulars to start a new romance with base game love interest Nadia Grell, female Sith Warriors to start a new romance with base game love interest Jaesa Willsaam (and Sith Warriors of any gender to start a romance with Jaesa's light side counterpart, who was not romancable in the base game), and Sith Inquisitors of any gender to start a new romance with Khem Val.
* Jedi Under Siege, the player gets a rather blunt warning that any unfinished story content up to that point will be completed using default choices. This mostly concerns which companions you've recruited and which NPCs have died. Republic characters default to light side choices and Sith characters default to dark side choices. Inquisitors still inexplicably default to the light-side title Darth Imperius, whereas dark side Inquisitors who played the class story are normally named Darth Nox, and neutral Inquisitors are named Darth Occlus.

He pays it off—along with late fees and interest — to an IRS agent (who happens to be waiting for him outside the boxing arena). But now Creepers owes for the money he just won.
* Jeepers Creepers 2 is in broad daylight. And it's absolutely terrifying.
* Jeepers Creepers 2: The Creeper traps a student with his wings and beheads him, leaving his body to exaggeratedly move around and flail his arms in the air for a few seconds before collapsing. The creeper then consumes the head in order to grow himself a new one.
* Jeepers Creepers 2, the farmer's dog is the first one to notice that there's something off with one of the scarecrows...
* Jeepers Creepers 3: After looking into the Creeper's mind through its severed hand, Tashtego discovers that the Creeper has been around feeding on humans and hibernating for millennia.
* Jeepers Creepers 3 also expands the mythology by demonstrating that the Creeper has been around for thousands of years, and that he will apparently return to hunt anybody who is on the property where Kenny buried the Creature's hand.
* Jeepers Creepers 3 car; the Creeper's "BEATNGU" van scores about as many on-camera kills as the Creeper does!

* Jeepers Creepers decorates its lair with the preserved bodies of its victims, attached to the ceiling no less.
* Jeepers Creepers emerges from hibernation every 23 years and feeds for 23 days.
* Jeepers Creepers fits into the Final Girl trope, as the only real other main character, her brother, is murdered and torn apart for his body parts.
* Jeepers Creepers franchise has the Creeper following carefully constructed rules.
* Jeepers Creepers has a brother and sister returning home from college during spring break.
* Jeepers Creepers has the Creeper. A supernatural, cunning, and nigh unkillable predator. While it can operate in daylight easily enough it still has a lot of boogeyman like aspects to it, including a preference for children and teens.
* Jeepers Creepers has the Creeper, which is a being of unknown origin who returns every 23 years to eat humans and to use their body parts to replenish his body. Unlike most slashers, though, he hunts boys or men as a preference to women/girls, although there are female victims.
* Jeepers Creepers is a regenerator with a twist: he cannibalizes his victims for parts. Literally.
* Jeepers Creepers our heroes have just decided to go back and see if the creepy guy was really hiding a body. The sister comments to her brother, "You know the part in scary movies when somebody does something really stupid, and everybody hates them for it? This is it."
* Jeepers Creepers series has a very large and rusted 1941 Chevrolet, which is a trademark of the titular villain.
* Jeepers Creepers that cannibalizes people to perpetuate its immortality.
* Jeepers Creepers: The Creeper beheads a police officer with an axe while the man is driving a car.
* Jeepers Creepers: The Creeper's modus operandi is to frighten his victims, causing them to release pheromones which he sniffs to detect whether or not they have the... pieces he wants (or needs to replace lost bits). He the proceeds to remove body parts from his chosen victims, consuming the smaller parts like eyes. Whether or not the victim is still alive at the time of "extraction" doesn't seem to matter to the Creeper.
* Jeepers Creepers. The protagonist is borderline catatonic after witnessing this.
* Jeepers Creepers turned the title tune into a horrifying premonition.
* Jeepers Media in particular, he reviews a bunch of iPod knockoffs and his friendly demeanor slowly dissolves to be replaced with disappointment and confusion that such things are allowed to exist.
* Jeepers Media Mike Mozart just loves making cracks at toys that look more sexual than they appear.
* Jeepers Media The reality of these things annoyed him a great deal. He strongly recommends the official iPods in this case.
* Jeeves, and often ends up engaged by accident; however, this trope is clearly in play as well.
* Jeeves and Wooster, after Barmy wins a golf game by means of a gizmo, Bertie plots to puncture his hot water bottle in the night. He gets the wrong room, and hilarity ensues.
* Jeeves and Wooster: An amusing satire of the early 20th century British upper class system.
* Jeeves and Wooster, and a bit of a dandy. He has an unfortunate tendency to attract women with frighteningly assertive personalities.
* Jeeves and Wooster, and a decent number of his many other ones, too.
* Jeeves and Wooster (and the multitude of parties who desire the destruction thereof) of the various things he and other prominent personages did during The Gay

Nineties. By the sound of it, he could give Bertie a run for his money any day of the week.
* Jeeves and Wooster attracts—and is attracted by—girls who turn out to be either complete weirdos or just terrible people.
* Jeeves and Wooster been sex, and decided to kidnap Bertie for a Shotgun Wedding. As always, Jeeves found a way out.
* Jeeves and Wooster, Bertie does this and stands behind a chair—not because he's drunk, but to disguise himself as a floor lamp. Surprisingly enough, it works.
* Jeeves and Wooster, Bertie is trying to pose as author Rosie M. Banks for his friend Bingo's family. Bingo's young cousin asks him how many words there are on a page. Clearly having no idea, he comes out with:
* Jeeves and Wooster, Bertie Wooster doesn't get along well with his relatives. His Aunt Agatha spends a great deal of time unsuccessfully trying to turn him into a credit to the family.
* Jeeves and Wooster: Bertie Wooster, frequently. On being forced to sing at a "clean, bright entertainment":
* Jeeves and Wooster, Bertie Wooster jumps through a closed glass window and emerges unharmed.
* Jeeves and Wooster: Bingo Little replies to Bertie with this when asked why he would ever tutor Oswald Glossop.
* Jeeves and Wooster, can turn any minor predicament into a catastrophe.
* Jeeves and Wooster. D'Arcy Cheesewright falls in love with him and moves to New York in order to find her again.
* Jeeves and Wooster ends up marrying her. Corky is later forced to paint a portrait of their baby, and his resentment of the whole situation seeps through to such an extent that when his uncle sees the finished product he decides to stop supporting Corky on the spot and tells him to get a real job. Jeeves saves the day again by suggesting that the horrifying baby in the picture would make a good comic-strip character and Corky could probably sell it to a newspaper.
* Jeeves and Wooster episode "In Court After the Boat Race (or, Jeeves' Arrival)" which featured a magistrate who treated stealing a policeman's helmet as if it were mass murder and who handed down a five shilling fine as if he were pronouncing the death sentence.
* Jeeves and Wooster figure on hand to threaten Bertie with bodily harm, most notably the hot-tempered Tuppy Glossop and the would-be fascist dictator Roderick Spode.
* Jeeves and Wooster for Sippy, which causes Miss Moon to haste to help him, and their engagement.
* Jeeves and Wooster (French for "valiant knight") who can never say "no" to a woman and constantly gets engaged to women with less-than-appealing personalities as a result. Jeeves usually ends up doing something amazing to solve both Bertie's problem and the problem of the week at the same time.
* Jeeves and Wooster: Geeky naturalist Gussie Fink-Nottle, having trouble confessing his love to Madeline Bassett, complains to Bertie that male newts have it much easier, as they profess attraction by performing a simple body-shaking movement — which he demonstrates, in the middle of Bertie's club, inspiring a new dance which nearly everyone in the room is doing by the time he and Bertie leave.
* Jeeves and Wooster got some comedy out of Bertie getting Jeeves to sing with him while he played a duet on the piano.
* Jeeves and Wooster has a habit of listing Bertie's faults to others while he's standing there. If he attempts to interject she normally silences him with an offhanded "Oh, be quiet, Bertie."
* Jeeves and Wooster in at least one book where a writer character said something like, "He forbids the marriage? I couldn't use that in a story nowadays!"
* Jeeves and Wooster in later stories; while he ends up staying in New York for some time, he grows used to it almost instantly and makes as many friends as he had in England.
* Jeeves and Wooster In the second-to-last episode, genial if spineless Gussie

Finknottle and insufferably saccharine Madeline Basset suddenly develop problems - Madeline becoming a tyrannical vegetarian refusing to let Gussie eat so much as a bacon sandwich, so he can run off with a cook, punctuating his departure with a spiteful bacon-sandwich eating as one last "up yours".
* Jeeves and Wooster is infatuated with every woman he meets and, having the attention span of a moth, forgets them as soon as the next skirt shows up (though eventually he settles down and gets married).
* Jeeves and Wooster, Jeeves' mixture includes eggs and Worcestershire sauce (could be a Bull Shot).
* Jeeves and Wooster: Jeeves uses this to end the quarrels between Wooster's friends. He tricks Wooster into ringing the alarm bell, thus bringing everyone outside into the pouring rain, where they find out that the door is locked from the outside and they don't have the key. When asked why Wooster rang the alarm bell, he can't give a straight answer, and Jeeves makes him go to somebody else's house to find the key. This gives everybody else the opportunity to unite in anger against him, after which Jeeves "discovers" that he had the key in his pocket all along. When Wooster finally comes back, everybody else just laughs at him for having biked a mile in the pouring rain for absolutely nothing and forgets that they were angry at him.
* Jeeves and Wooster: Most of the male cast. In Bertie's case, it's only through Jeeves' best efforts.
* Jeeves and Wooster. Most of the plots consisting of him getting himself into trouble while trying to solve his friends' problems.
* Jeeves and Wooster now needs the money to support a wife and can't give an allowance to Bertie's friend. By an extraordinary coincidence, it turns out that the friend's intended bride was the same young person whom Jeeves himself was involved with.
* Jeeves and Wooster occurs when Wooster wakes up with a horrible hangover and tries to comprehend what happens to his home, as Jeeves reverses the utter chaos of his apartment at inhuman speeds.
* Jeeves and Wooster, one of Jeeves' regular tasks is getting Bertie Wooster out of engagements while avoiding such lawsuits. The very last Jeeves and Wooster short story, "Jeeves and the Greasy Bird", has a con artist scam Bertie into making a faux marriage proposal only to demand a £2000 payoff to avoid just such a suit. Jeeves, naturally, gets Bertie off the hook.
* Jeeves and Wooster, one of these situations is involved in setting off the main conflict. Two of Bertie's friends, Pauline and Chuffy, are in love, but the former ends up at Bertie's cottage wanting to spend the night there before moving on to Chuffy's place in the morning (since she has just swum ashore from her father's yacht and doesn't want to show up at Chuffy's stately manor in the middle of the night in a swimsuit). There's no question of a gentleman like Bertie not surrendering the bed, and as the cottage has no other suitable furniture, he eventually retreats to a pile of sacking in a shed. Unfortunately, his unorthodox sleeping arrangements result in the local police mistaking him for drunk and summoning Chuffy to help him home. Chuffy therefore discovers his love interest in Bertie's bed, wearing Bertie's pajamas. Bertie is quick to establish that nothing actually happened, and Chuffy more-or-less accepts it, but the argument about it still causes Chuffy and Pauline to break off relations.
* Jeeves and Wooster opens it. Jeeves (as usual) is completely unsurprised by the large man charging past him and making a loud crash, and simply greets the other man standing outside with his trademark "Good evening, sir."
* Jeeves and Wooster paints his portrait for him, but Jeeves doesn't approve — it gives Bertie a "hungry" look. Later, Bertie is forced to take the blame for a motor accident, and faces a lawsuit from a man who happens to own a soup manufacturing company. Trusting Jeeves to sort it out, Bertie leaves town. When he gets back, he finds his "hungry" portrait plastered all over the place on soup advertisements — the soup manufacturer agreed to drop the lawsuit in exchange for the portrait. Bertie is aghast at what his snobbish aunt will think, and promptly decides to leave town again.

* Jeeves and Wooster plays around with the trope. One of Bertie's friends wants to marry a waitress. To convince his uncle that it's a good idea, he makes him read romance novels where chambermaids end up marrying their masters.
* Jeeves and Wooster's earlier Reggie Pepper series, about a thick-headed young English gentleman and... no one in particular.
* Jeeves and Wooster season 1 episode 5, "Brinkley Manor", Jeeves is away and Bertie is forced to take care of himself. While he is struggling to make tea, Barmy Fotheringay-Phipps arrives for a visit. When the phone rings, Bertie asks Barmy to answer it and pretend he is Jeeves.
* Jeeves and Wooster stories, a pal of Bertie's is having trouble. He wants to paint portraits, but can't get a commission to paint one because he hasn't painted any. He finally gets a commission to paint a portrait of his uncle and benefactor's first baby. It's so horrible that the uncle calls it a fugitive from the funny papers, and cuts the painter off. Jeeves gets the idea that the character in the portrait could be the root of a series on the funny papers entitled, "The Adventures of Baby Blobb". It's a hit and the painter becomes rich.
* Jeeves and Wooster stories revolve around Bertie being asked to keep an eye on or take care of someone, generally by Aunt Agatha. The people he's asked to watch always turn out to be utterly irresponsible and impossible to control. Similarly, in "Episode of the Dog McIntosh" he has to look after Aunt Agatha's dog, in what turns out to be "a guardianship fraught with peril".
* Jeeves and Wooster story "The Metropolitan Touch", where the finale of a show is supposed to involve the chorus throwing balls of wool (representing oranges) to the audience. On the night, the villain of the piece substitutes real oranges, and the show promptly devolves into an all-out fruit fight with the audience caught in the middle.
* Jeeves and Wooster, the normally unflappable Jeeves has to stop and sit down on a convenient rock when a friend of Bertie's mentions that he often wears his pajamas well into the afternoon.
* Jeeves and Wooster There are also several other occasions where Bertie simply tries to resolve his difficulties without consulting Jeeves for various reasons (mostly injured pride or not wanting to give up whatever piece of clothing Jeeves disapproves of in gratitude), and it always ends up making things much worse before he's forced to return to Jeeves for help.
* Jeeves and Wooster thing even more remarkable is that there's no dubbing in those scenes. He's playing the piano and singing AND acting like an upper-class twit. Nice.
* Jeeves and Wooster, this happens to Gussie Fink-Nottle all the time, primarily in the first episode of season 2. This is especially bad, because if Madeline broke off her engagement to him, then Bertie would have to marry her. Either that or explain that he would rather die, which would be bad manners.
* Jeeves and Wooster to marry someone, though they got around it by running away from her.
* Jeeves and Wooster). Too bad he's too stupid to make something out of it. There is a catch about Wooster being stupid: He's the narrator of the stories. He is at least an extremely articulate idiot.
* Jeeves and Wooster TV adaptation, Bertie Wooster attempts to play this role for his friend Bingo Little, who is infatuated with Honoria Glossop, but Honoria instead gets the impression that he's speaking on his own behalf, and spends the rest of the series convinced that Bertie is pining for her.
* Jeeves and Wooster) was better. In real life, it's the other way around.
* Jeeves and Wooster: When Bertie calls Pauline Stoker "one of the nicest girls I've ever been engaged to," it sure sounds like an example of this trope. Given his tendency to get engaged at the drop of a hat, though...
* Jeeves and Wooster), when Bertie meets the author of the murder mystery he's reading, he asks him who's the killer, and he answers that it's the butler.
* Jeeves and Wooster, when he describes the gorgeous Daphne Dolores Moorehead as having "more curves than a scenic railway".
* Jeeves and Wooster where Bertie goes to stay in Devon, there's a scene where

somebody blows a car horn several times to attract his attention, each time just as he's blowing a note in the trombone he's learning to play, with the result that the trombone apparently makes a noise even Bertie can tell trombones shouldn't make.
* Jeeves and Wooster (while he deliberately had a drink beforehand, he wasn't aware that both Jeeves and Wooster had spiked his orange juice), and his speech turns into an incoherent rant where he takes bizarre potshots at his friends, and selects one student he doesn't like the look of and spends much of the speech insulting him.
* Jeeves and Wooster who can get talked into anything, but in Bobbie's case, the fact that she's gorgeous and flirtatious doesn't hurt her cause.
* Jeeves by about half a century! This trope could legitimately be called "Jeeves Speak", but "Spock Speak" is much snappier.
* Jeeves insulting everyone's clothes. Apparently it was just so Jeeves everyone fangasmed.
* Jeeves Weevil from "Evil Weevil" is defeated when he is tricked into sucking up his own body fat, which shrinks him to the size of a normal insect. He reacts by kicking Courage and the shin and shouting "Stupid dog!" in a high-pitched voice.
* Jef Costello, the hitman from Jean-Pierre Melville's crime picture
* Jeff Albertson (The Comic Book Guy) is obese, middle-aged, rude, and generally not good-looking. Eventually, however, he meets, dates, and finally marries a much younger and far more attractive Japanese girl named Kumiko.
* Jeff Albertson, the Comic Book Guy is probably the biggest example on the show. He's actually a member of Mensa, and does tend to talk like a "book smart" (though
* Jeff and Achmed the Dead Terrorist go through a whole discussion on the Kardashians and Kanye West.
* Jeff and Annie have one in the series finale "Emotional Consequences of Broadcast Television". They admit that while neither one is in a good position for a real relationship, they imply that they can try for real once they've spent some time apart.
* Jeff and Annie occasionally call each other "Milady" and "Milord", usually in a direct call and response
* Jeff and Hal flashbacked the time they took flying lessons from Kamek. When it failed, Kamek said "What are you, gay?!"
* Jeff and his friends are fascinated with military history. Of course they take to it like ducks to water.
* Jeff Beck who replaced Clapton as the lead guitarist has also had a very lucrative solo career.
* Jeff Bennett, when Kowalski sings to the other penguins about a bus called Graveyard Eight.
* Jeff Bridges's villainous Senator to be nominated as Best Supporting Actor.
* Jeff Bridges, too. Not only was he a fan of the comics, he also wanted an excuse to shave his head bald.
* Jeff Bridges was because the part required him to both shave his head and grow a beard, which were two things he'd always wanted to do.
* Jeff Bridges was stuff he brought from home. One shirt, in particular, has appeared in quite a few of his movies.
* Jeff Bridges were hesitant to cast Lloyd as his uncle in the film, thinking he was a solely comedic actor as a result of the above.
* Jeff Bridges what to make of this approach, as he was used to meticulous learning of lines and parts, and struggled horribly with Robert and Jon's improv skill... until he retrained himself to think of it as "making a $200 millon student film".
* Jeff Buckley) didn't even hit the top 100 of the albums chart (it peaked at #149).
* Jeff Buckley). He is given credit for raising the bar for singer/songwriters in the '90s and into the 2000s.
* Jeff Carson had exactly one #1 hit out of his three visits to the Top 10 — not his
* Jeff Christiansen, a boarded Veterinarian, created in 2001 the website
* Jeff Conaway (Zack Allan) died from drug-abuse-related illnesses in 2011 aged 60.

* Jeff Daniels and his wife Kathleen Treado, both met in high school, in Chelsea, Michigan, and married in 1979.
* Jeff does this to get Lester to perform "Africa" in "Chuck vs. The Best Friend". He even quotes Eminem's "Lose Yourself".
* Jeff Dunham Achmed) in order to appeal more to the conservative Southern crowd (Dunham is a Texas native).
* Jeff Dunham bit with Peanut and Jose Jalapeno dressed as superheroes, Jose claims he stops crime with mace and we get this:
* Jeff Dunham brings Achmed the Dead Terrorist out, he announces himself to the audience with "GREETINGS, INFIDELS!"
* Jeff Dunham comedic skill, he should not be considered a kid friendly performer, although he is not overly vulgar.
* Jeff Dunham frequently lampshades it during his routines. In "Arguing With Myself", he relates a story of taking his "helpers" through airport security:
* Jeff Dunham has a commentary track. As one of his character's puts it when you launch it, 'if you're watching this, you have too much time on your hands!' At the beginning of the commentary he admits he really doesn't know why a commentary track to a comedy ventriloquism act is even necessary, but the directors wanted to include one.
* Jeff Dunham has several of these. Jose Jalapeno on a Stick's entire existence is Mexican jokes and sharing this trope with Peanut, Peanut and Jeff get into it as well, and Walter and Achmed have a similar dynamic, though their interactions are limited for obvious reasons. Oh, and Achmed with Guitar Guy.
* Jeff Dunham has this with his puppet Walter when describing the ease of obtaining condoms.
* Jeff Dunham is an example of this, especially when he and his first wife got divorced. His stand-up following said proceeding was bittersweet at best. While his puppet, Walter, is excited and asks him what it's like, Jeff tells him it's not a good feeling. Jeff got better after he met his second wife. Whether or not his sadness is long-term is to be considered.
* Jeff Dunham is huge in the Middle East, and his "Achmed the Dead Terrorist"-routine regularly sells out halls in Abu Dhabi and Dubai.
* Jeff Dunham is not only an exemplary showcase of this trope as a ventriloquist, he's acknowledged it in his act through his puppet Peanut:
* Jeff Dunham might actually be part Irish and discusses what he would say if he ever met him:
* Jeff Dunham opens his "Spark of Insanity" special by acknowledging that the applause he gets isn't for him but for his dummies.
* Jeff Dunham puppet Walter tells him that one thing that scares him now is when his wife asks him, "Does this thong make my ass look fat?", and he made the mistake of answering her.
* Jeff Dunham's act involves his various characters (Walter, Peanut, Achmed, etc.) making various jokes at his expense.
* Jeff Dunham's character Peanut knows he's a puppet. For example, in one of his specials Guitar Guy looked at Peanut, prompting him to say "You know how I know you do drugs? You're looking me in the eye and you think I'm actually looking back"
* Jeff Dunham Show ran plugs for ringtones recorded by his characters, which always ended with Jeff getting a call playing the ringtone that had just been advertised while in a public place.
* Jeff Dunham show with a photo gallery of himself in some horribly tacky outfits. Even he has no idea what the hell he was thinking with some of them.
* Jeff Dunham's infamous puppet Achmed the Dead Terrorist is actually a big hit in the Middle East.
* Jeff Dunham skit with a "dead Osama" (who would eventually become Achmed the Dead Terrorist) has this when Osama describes his camp's activities.
* Jeff Dunham's most popular puppets is "the most beloved terrorist throughout the world," Achmed the Dead Terrorist.
* Jeff Dunham specials, "Spark of Insanity": According to Achmed the Dead Terrorist, suicide bombers sometimes play practical jokes on each other.

* Jeff Dunham's routines, Walter tells a story about how he told his grandson to pull Grandpa's finger... less than two seconds before an earthquake hit.
* Jeff Dunham's schtick with "Walter", a puppet who often voices Midwestern conservative views, is partly made up of "clappy humor," though mostly done to appeal to audience members who "know someone like this".
* Jeff Dunham theme. Dunham's puppets are a rare aversion to this trope, however: Whether the viewer finds them funny or not depends, but only the most timorous of weenies would find any of them scary.
* Jeff Dunham took advantage of this to have a professional photo taken of him with one of his earliest dummies. He then kept doing this into his college years.
* Jeff Dunham was happily adopted and says that he has no real desire to search for his birth parents. His eldest daughter is also happily adopted (by him), being the child of his first wife from a previous relationship.
* Jefferson after the historic proposal and would consist of Butte, Colusa, Del Norte, Glenn, Humboldt, Lake, Lassen, Mendocino, Modoc, Plumas, Siskiyou, Shasta, Tehama, and Trinity Counties. Its capital would likely be Chico. These counties are mostly rural, and the hypothetical state of Jefferson would have a far lower population density than the other states.
* Jefferson Airplane. A song which extols the virtues of changing your state of perception by doing lots and lots of lovely LSD. Now let's drive a car in this state. Yeah, right. If you don't crash it or provoke a road accident because of all those dope-smoking caterpillars, self-animating chess pieces, red queens with axes, white rabbits, et c, popping up out of holes in the verge, here comes Mr Policeman who discovers you to be intoxicated on Substances. Your trip now becomes a very bad one to the cells of the local nick. Yeah, right.
* Jefferson Airplane: Founding member Marty Balin was diagnosed with autism as a child.
* Jefferson Airplane in 1967, the song was written by Slick and first performed by The Great Society (of which Slick was its singer) in 1966, who also recorded it that year but didn't release their recording until 1968. Slick would eventually join Jefferson Airplane to replace their original female singer, Signe Toly Anderson, who had departed the band for maternal reasons. Slick re-recorded "White Rabbit" with Jefferson Airplane, and this version has become more well-known than the one by Slick when she was with The Great Society.
* Jefferson Airplane", in which all the things Alice drinks, eats and secondary-smokes when she goes down the rabbit hole bring on the mother of all mind-expanding trips.
* Jefferson Airplane which is hijacked by a rag-tag band of hippies is an arcology:
* Jefferson Airplane writers call this "the precise moment when culture and commercialism stopped fighting and started making sweet, sweet love."
* Jefferson can't help but clap during the First Cabinet debate when Hamilton does a dance about Jefferson doing "whatever it is you do at Monticello". Then again, as he and a smug Madison put it, Hamilton's arguments for a bank is futile since he doesn't "have the votes".
* Jefferson has a long gruesome scar around his neck where he was decapitated during his time in Wonderland. He hides it with a scarf in Storybrooke.
* Jefferson implies this will be the outcome if Adams tries to make him write the Declaration of Independence "by physical force" in
* Jefferson is half-black but has a lot of hatred for black people. In a flashback it's shown that he was dating a white girl while passing as white, but when she learned he was mixed she ran off.
* Jefferson Keane is executed halfway through the first season because the actor portraying him, Leon, refused to commit to a series. When Leon asked Tom Fontana why he was being killed off, Fontana told him it was because he said he wouldn't commit to more than four episodes. Leon replied that he thought he'd been talked out of that and actually wanted to stay.
* Jefferson once fell inside Al's workplace when a wall gave in. Jefferson's claims of injury ended as soon as Al stated they had no insurance.
* Jeffersons, and are often mocked as "black shows that only appeal to white

people."
* Jefferson Starship mostly did rockers. Their biggest hit, "Miracles", was a soft ballad.
* Jefferson Starship's song "Light the Sky on Fire" (and the subsequent video in the Star Wars Holiday Special) features lead singer Marty Balin looking skywards and asking the following:
* Jeffery Dahmer got away with leaving corpses lying around in his apartment. People complained about the smell, but nobody did anything about it. Anyone could have caught him simply by walking in and opening his closet or his refrigerator — but nobody did, until one of his captives escaped and led the police to him. And it was fortunate that the police believed the victim that time. In another incident a drugged-out, 14-year-old victim escaped, bearing physical signs of his ordeal, including a hole that Dahmer had drilled in his head. The police dealt with it as a gay lovers' tiff, taking the victim back to Dahmer's apartment and telling Dahmer to take care of him. Dahmer
* Jeffery Manchester became the only person to escape from the Brown Creek Correctional Institution by holding on to the bottom of a delivery truck.
* Jeff Fisher, Head Coach of the St. Louis/LA Rams and, before them, the Houston Oilers/Tennessee Titans. With the exception of two seasons, he's been a Head Coach since 1995. In that time, he has had 6 playoff appearances (of which he's lost 3 times in the first round). He's had a .500 record or lower in 16 of his seasons as a head coach. He has also not had a record above .500 since 2008, spanning his final 2 seasons in Tennessee, and his last 4 in St. Louis/LA, and not including the current (2016) season. Overall, his coaching record with both is barely above .500. For comparison, following the 2015 season, former Giants head coach Tom Coughlin was fired (or rather asked to resign) for having 3 consecutive sub-.500 seasons and 1 playoff appearance in 7 years, despite having won 2 Super Bowls with the Giants. In 2016, Jeff Fisher received a contract extension in the middle of what will be a 5th consecutive sub-.500 season with the Rams.
* Jeff Foxworthy all over me. She came in with a saddle and a pair of jumper cables..."
* Jeff Foxworthy) are known primarily for making exaggerated humor pertaining to stereotypes of the Southern United States... where most of their fanbase hails from.
* Jeff Foxworthy charges through the crowd, shoving people aside and leaps into the boat at the last second, prompting Donovan to add "And Jane Fonda was there too" mid-sentence.
* Jeff Foxworthy claims he was an "all-state" mooner his senior year of high school.
* Jeff Foxworthy contains an example. Although he had opened with a few of his trademark "you might be a redneck" one-liners, an audience member can be heard shouting "Redneck!" near the end of the set. Jeff clearly stumbles for a few seconds before closing the set with more "you might be a redneck" one-liners. This may also explain why most of his subsequent albums feature the "you might be a redneck" jokes solely at the end.
* Jeff Foxworthy had a joke once involving his mother. "I don't want to know where you've been, what you've been doing, or who you were doing it with!" Flipped on its head when his mom says, "Now where were you?"
* Jeff Foxworthy had a routine where he described Louisiana food as the best in the world "as long as you don't ask too many questions about what you're eating." He also claims to have seen his wife's relatives whack steaming pots with spoons and going "git back in there!"
* Jeff Foxworthy has a bit about how people imagine southerners in white-collar professions, noting that the Southern accent is "not the world's most intelligent-sounding accent", including this doctor:
* Jeff Foxworthy has a bit where when he was young, his mother sent him to the store for some milk, but he spent a long time dilly-dallying at a friend's house.
* Jeff Foxworthy has a joke about how men are conditioned not to cry, and gives this example:

* Jeff Foxworthy has noted that this happens to a lot of young single men who think they can date until they die.
* Jeff Foxworthy have sex." Jeff raised his hand and asked, "Is this really a problem?"
* Jeff Foxworthy, he postulated that the reason many NASCAR fans can't stand Jeff Gordon is that he enunciates his speech, whereas other drivers go off on Southern-accented Motor Mouthing run-ons.
* Jeff Foxworthy: "If the directions to your house include the phrase 'turn off the paved road', you might be a redneck."
* Jeff Foxworthy includes in his routines, "If your dad walks you to school because you're in the same grade, you might be a redneck."
* Jeff Foxworthy, in one routine, talks about the party that he threw when his parents were away, in which the urn that contained his grandma's ashes was knocked off the mantlepiece and then vacuumed up. He talks about how his mom gets all sentimental and goes in there and starts talking to grandma and "I don't have the heart to tell her I had to smoke a carton of Marlboros just to get her back up there."
* Jeff Foxworthy mentions how the list of items that are forbidden on airplanes includes leaf blowers and Coleman lanterns.
* Jeff Foxworthy mentions such a scenario in one of his routines, where he and his family were standing in line at the movies and Jeff's mother forgot her hearing aid.
* Jeff Foxworthy noted about a portable safe is wife bought for him as a gift: "To save thieves the hassle of gathering up your belongings, it's the portable safe! With an easy tote handle so they can take it back to the thieves' den and figure out the combination at their leisure. The portable safe, by RonCo."
* Jeff Foxworthy of a human body and surrounding it with religious pamphlets.
* Jeff Foxworthy's mustache and annoyance that he makes a lot of money being a clean comic.
* Jeff Foxworthy stated that getting a "time out" in his family meant that "our dad would take time out of his busy day to blister our butts!"
* Jeff Foxworthy's "You Might Be a Redneck" routine could be considered this, seeing as he often refers to himself as one.
* Jeff Foxworthy tells a tale of when his daughter made a little peanut butter and jelly sandwich with Ritz crackers. He's just polished it off when...
* Jeff Foxworthy: The most famous of the Blue Collar comics, and the creator of "You Might Be a Redneck". Sales of his various comedy records since the late 1980s has made him one of the best-selling comedy performers of all time.
* Jeff Foxworthy uses this to describe every guy coming home to his wife after spending too much time at the bar.
* Jeff Foxworthy warns against doing this during an argument with your spouse, especially if you're not carrying your keys.
* Jeff Goldblum, 6'0"), are more than tall enough to avert that part of the trope.)
* Jeff Goldblum and distribution than anything else — their chemistry together is one of its major assets — so neither's career suffered, and it garnered a small fanbase via cable/video. They divorced in 1990.
* Jeff Goldblum at Tony Lacey's Christmas party in Hollywood. "I forgot my mantra."
* Jeff Goldblum from 1990-93, a time when he was doing almost as much film work in Europe as he was in the U.S. The ads boil down to him delivering eccentric, comic monologues about the product (i.e. he broke up with an offscreen girlfriend who got custody of the lager while he got custody of the fridge, so he only gets to see the lager on weekends), meaning that they aren't any odder than the various American ad campaigns he's participated in since the late 1990s!
* Jeff Goldblum. He's an insomniac office drudge whose wife is cheating on him who gets pulled into a criminal conspiracy involving three different flavors of organized crime, the Iranian secret police, CIA and FBI agents, and even Elvis impersonators. At first, it's all he can do to merely keep his head above water. But by the end, he can face down an Iranian gunman with no hesitation at all.
* Jeff Goldblum, he was given a few chances to display his piano playing skills.

* Jeff Goldblum said "That's fantastic: You had a son to promote the movie you were coming out with a year later!"
* Jeff Hanneman was known for being very reserved and private. While the other members were more than happy to socialize and hang out with fans after shows, Jeff greatly preferred sitting on the bus and reading and would also seldom give interviews. When he wasn't touring, he preferred to stay at home and spend time with his wife; his bandmates seldom saw him outside of touring and recording.
* Jeff Hanneman; while the rest of the band would always take time to hang out and party with fans, Jeff would usually depart to the bus to read, and interviews were rare. Outside of recording and playing shows, Hanneman seldom saw his bandmates and usually preferred to stay at home and spend time with his wife. While Kerry King was criticized for referring to Hanneman as a good friend despite having not seen him for several months prior to his death, the truth was that even his best friends rarely saw or spoke to him and going several months without any real contact with him was completely normal and expected.
* Jeff Hardy 2011 doped to the gills. He's cleaned up his image since however. Returned to WWE with Matt Hardy in 2017.
* Jeff Hardy and on his own. However, he lost the majority of them, including both times he was in Money in the Bank
* Jeff Hardy bizarre, and yet he was respected enough and loved by the fans enough during his WWE run that he was given all those title reigns.
* Jeff Hardy for Jeff Hardy. Things got worse when Hardy came out in his Will-o-the-Wisp attire, and received chants of "We want Matt!". Then the match started, and it was awful, with Hardy botching nearly everything he attempted to do, and Krazy K (a trainee of Hardy's who had no other reason to even be in the match) being worse than Hardy. The fans cheered for everything Joey Matthews (who was supposed to be the heel) did and booed everything Hardy or Krazy K did. When the match ended, with Jeff winning, the fans chanted "Don't come back!"
* Jeff Hardy for the TNA World Heavyweight Championship in Bound For Glory 2012.
* Jeff Hardy happened, Jeff was sent home, and when he came back, he was told this would be his last chance. He's managed to stay on the wagon since then.
* Jeff Hardy kicked in and we all got ready to cheer our lungs out anyway.
* Jeff Hardy made an appearance for Ring of Honor. At the time Jeff's popularity with the smark crowd was at a low ebb. Hardy's Estrogen Brigade came to the RoH show
* Jeff Hardy personification of this Trope, with his wacky hair coloring leading to his oft-used nickname: The Rainbow-Haired Warrior. He's been seen with his natural blond hair a few times on WWE TV.
* Jeff Hardy, Punk was portrayed as the villain for pointing out that Jeff, who had twice been suspended from the company due to his drug issues, was hardly a good example for people to let their children look up in contrast to himself, who wore his straight edge lifestyle on his sleeves - Jeff didn't really have a response better than "I'm a free spirit!" and "I admit I've made mistakes!".
* Jeff Hardy's imagination, "Raaahahahaha!" He tended to laugh even when being beat up.
* Jeff Hardy was immune. And at the time he could have been second in-line for being the Ricky Steamboat of his generation, having only been heel once.

* Jeff Jarrett in both WCW and TNA (the latter company being one he co-founded with his father Jerry). Even the death of his wife, Jill, and a reduced role in TNA did little to repair this damage since it was soon discovered that Jarrett was having an affair with Kurt Angle's then-wife Karen. It wasn't until Jarrett left TNA and mended fences with WWE that people started openly admitting to liking him again. His Hall of Fame induction in 2018, followed by a return to a WWE ring in 2019, cemented his resurrection.

* Jeff Jarrett. The first being from a single Twist of Fate. Total length: 5 seconds.
* Jeff Jarrett. The title fell out of the box, and Booker T became the WCW Champion. When the belt fell out, David Penzer had to hand it to Booker. Thankfully, Russo wasn't sharp enough to change the finish and award the title to Penzer instead.
* Jeff Jarrett, though he did end up stealing Debra away from Mongo when he finally got kicked to the curb.
* Jeff Jarrett; today, many wrestling fans are just begging for it to be put out of its misery.
* Jeff Jarrett (Which is spelled J-E-haha-DOUBLE F J-A-DOUBLE R-haha-E-DOUBLE T), in his early days in WWF, the wrestling country singer who planned to use wrestling as a stepping stone to break into Nashville. His guitar still featured prominently for most of the rest of his career, usually by way of cracking it over the head of his opponents.
* Jeff Jarrett. While he was considered mid-card status during the time in WWE, he utilized political power to become a multi-time champion and main eventer. This did not go well with the fans, seeing as there were no development to make him that type of caliber champion. Most of Jarrett's hate could be considered

* Jeffrey Archer includes a short story about chess, and particularly a game of strip chess which sounds fairly similar to the vodka advert mentioned above. The titular twist is probably not entirely surprising to a savvy reader though.

* Jeffrey Archer. Richard Armstrong goes into a tirade against the editor of one of his newspapers that led with "Extra Benefits for Nurses" while his rival Keith Townsend had his newspaper lead with "Top Pop Star in Drug Scandal". The editor replies that the pop star in question had never had a hit in the top 100 and was caught smoking a joint in the privacy of his own home. After Townsend pulls more stunts like a bingo contest and a nude on page three, Armstrong eventually fires his editor.
* Jeffrey Archer short story "Chunnel Vision." At a lunch, an author hears his friend gushing about his brilliant idea of a thriller of a terrorist attack inside the Chunnel and a family caught in the middle. He fails to notice the other writer being more uncomfortable nor that his girlfriend (who's clearly planning on dumping him for cheating on her) is ordering the most expensive lunch imaginable. Just as the aspiring writer is being hit with the massive check, a woman comes up to talk to this author friend about how much she loved his newly released thriller...which is almost beat for beat the exact same plot his friend has been spending months working on.

* Jeffrey Dahmer also tried the insanity plea unsuccessfully. He was responsible for at least 17 murders in Milwaukee between 1978 and 1991. He also experimented with cannibalism. Prevailing wisdom indicates that if Dahmer had been insane, he would have been caught much sooner, as his 13-year killing spree took a certain amount of mental faculty to hide, especially given the fact that he was able to talk himself out of trouble on more than one occasion. Ironically, he was then killed in prison by another inmate who claimed that God told him to, but

* Jeffrey Dahmer's first victim was a young hitchhiker named Steven Hicks, whom he lured in with promises of alcohol before bludgeoning him to death.
* Jeffrey Dahmer, the Milwaukee Cannibal, got a total of 16 life sentences, life plus ten on the first two counts of murder, plus 70 on each of the next 13. He would have been eligible for parole in 900 years if his cellmate hadn't killed him in 1994, which might explain his mention in
* Jeffrey Dahmer, was a class clown at his high school and even had a fan club launched in his honor.
* Jeffrey Dahmer while in prison. When he was attacked by another prisoner who attempted to slit his throat, he refused to press charges and requested to be returned to the general prison population. Only a few months later, he was beaten to death by another prisoner. His last words were, reportedly: "I don't care if I live or die — go ahead and kill me."

* Jeff the Killer, after his attempt to murder a young boy in the beginning of his first story goes sour, smashes a window, jumps out of it, and escapes into the night. The cops who were called on him don't bother going after him.
* Jeff the Killer: Jeff's first kills were Randy, Keith, and Troy, a trio of bullies who went around mugging kids and threatening them with knives. After Jeff beat the crap out of them, they got his brother sent to Juvy, and later attacked him at a birthday party to try and kill him, threatening to shoot anyone if they interfered.
* Jeff the Killer lore. While he doesn't wear all black, he has the scraggly black hair, blanched skin, and dark sunken eyes. Also like Cesare, Jeff even stabs people to death as they sleep!
* Jeff the Killer mutilated his own face to remove his eyebrows and nose.
* Jeff the Killer spin-off "Jane The Killer", Jane's father is an ex-cop who now hates them, as he was framed for stealing drugs and was forced to leave. He enforces a strict "no cop" policy.
* Jeff the Killer. These days, if asked about "Jeff the Killer", most Internet denizens will greet it with either a snort of derision or a short lecture about the poor imitators it inspired in its wake.
* Jeff the Killer yet takes the bullies who inflicted this upon him (or mostly anyone else really) quite easily.

* Jeff Tracy wears morning dress and affects a British accent to go to an airshow in one episode. "Oh, bang on; jolly good show!" Wonderfully wrong. Penny is too pleased to correct him. All the more impressive since Jeff was played by Peter Dyneley, a British actor with a Canadian accent, playing an American trying to affect a stuffy British accent and doing it badly.

Oh, and the caverns you pass are full of dangerous monsters...
* Jeff Wayne; Act I describes the conquest of Earth by the Martians, and Act II its aftermath.
* Jeff Wayne's Musical Version of The War of the Worlds; and a second, invented by Wayne, where a NASA-sponsored mission to Mars in the 1970s appears to be interrupted by a new Martian attack.
* Jeff Wayne's Musical Version of The War of the Worlds gives Sir Richard Burton this treatment. It went through two variations: the first, from the 2006 tour, was a large, papier-mache "head" over which the hologram was projected. The second, from the 2010 tour, was a full-on CGI recreation of the actor.
* Jeff Wayne's Musical Version of The War of the Worlds has something to say referring to this trope:
* Jeff Wayne's Musical Version of The War of the Worlds" If not a trope namer, then surely a trope named-after.
* Jeff Wayne's Musical Version of The War of the Worlds originally began life as a tune for a Lego commercial.
* Jeff Wayne's Musical Version of The War of the Worlds successfully conveys a silent, desolate London, wracked with scarlet fever (after a fashion) and choking to death from an alien life-form. Sir Richard Burton's narration is but the icing on the cake.
* Jeff Wayne's War of the Worlds basically the supreme overlord of the attacking aliens, you could basically say "They're not being killed" easily.
* Jeff Wayne's War of the Worlds, destroying the British houses of parliament is the Martian victory condition. The ending cutscene that follows culminates in a fighting machine shooting at the clocktower, which then crashes down on top of the camera.
* Jeff Wayne's War of the Worlds has a Martian commander blasted mid-sentence while reporting on the poor state of the invasion. The elders change plans accordingly.
* Jeff Wayne's War of the Worlds has human blood as a Martian resource.
* Jeff Wayne's War of the Worlds, much like the novel, the Martians engage in xenoforming with their red weed.
* Jeff Wayne's War of the Worlds: Powerhouse Martians coming in heavily armed tripods Vs Subversive Humans using weaker tanks and armed cars cranked out in greater numbers.
* Jeff Wayne's War of the Worlds: Similar to the Literature example above, but humans are on an even war footing with the Martians. The Human arsenal has been expanded with tanks, armored cars, self-Propelled artillery/anti-air, and a balloon. The Martians forces now have Recon, Exotic telepathic, and various construction units.
* Jeff Wayne's War of the Worlds their leaders until they come up with a solution.
* Jeff when noticed by one of his former lawyer buddies, has to come up with an explanation on the spot.
* Jeff, Who Lives at Home chiefly a drama film with occasional warm moments, but made hysterical by the antics of the two brothers.
* Jeff Wilson (New Zealand international in both rugby union and one-day cricket) and the former Aline Harper (NZ netball international)
* Jeff Winger is an unapologetic version of this trope...at least for now. The very fact that he lied about having a valid college degree
* Jeff Winger is the first and most shameless example, shown to have the most active sex life of the group. In fact, he initially started the study group in order to get into Britta's pants, though it evolved beyond that quickly. In a

season 5 episode it's mentioned that he keeps trophies of his conquests, which everyone else finds creepy.
* Jeff Winger likes to present himself as the cool guy who's permanently in control and laid-back and uncaring about everything. But whenever it starts to look like his position as leader of the group or his command over things is slipping, he gets very uptight and very tense very, very quickly. He later admits that he's one of these, and it's only because he usually is in control that he's able to act so relaxed about things.
* Jeffy "Brad" Bradley started out relatively scrawny, but a chain of events involving his own decapitation revealed that without deliberate stunting he would turn into the eight-foot mountain of muscle he spent the rest of his time as, but he never really lost the respectful habits he developed while smaller than a house.
* Jeffy gets this during the few times the show tries to make him vulnerable thanks to being a selfish, temperamental, misbehaved brat most of the time. There's also the fact that he remains a bad kid despite promising to Mario that he would be good during the end of "Jeffy's Parents", making that episode in itself an instance of this trope for him. For example, take the end of "Jeffy's Bad Christmas". In it, he, Junior and Cody take many efforts in getting Santa to give Jeffy presents even though Santa already put him on the naughty list. However, Santa eventually manages to escape, leaving Jeffy detected that he didn't get any presents and admitting he doesn't deserve any. Sad music plays over this scene, trying to make us sympathize for him. Jeffy has been extremely and intentionally obnoxious throughout the year (which is even pointed out in the episode itself), and moments of him being good are rare. So chances are you won't feel bad for Jeffy and instead bluntly agree that he indeed doesn't deserve presents.
* Jeffy has one at the beginning of "Jeffy Gets Stung By A Bee!", and acts like a dog so he can get Chef Pee Pee to take him outside to poop, which sets the episode's plot in motion.
* Jeffy's Birthday!", Jeffy does this with the giant pencil Mario gets him as a birthday present.
* "Jeffy's Scary Movie" has Jeffy watching an R rated horror film titled
* jefmajor's. The comments to any of those videos are also great sources for puns. You'll have your hands full trying to sort through them al-OOOOOH!
* Jeft implies that magic and energy are related when he mentions that to keep Paul's strength from overwhelming him, much of it is transformed into raw magic and returned to the Field before it leaves his skin.

* Jegertroppen, or "Hunter Troop", the world's first all-female special forces training program.
* "Jeggings", a portmanteau of "jeans" and "leggings", have become a popular fashion choice of the late '00s and early 2010s. They're considered more practical than jeans in many ways, including the ability to be worn under a skirt or dress, being thin enough to tuck into high boots, and of course, retaining a sexy snugness while still functioning similarly to jeans. Ditto for other forms of skinny jeans in the '00s.
* Jehoram of Judah, whom God struck down with some kind of intestinal plague (possibly cholera). As noted in Chronicles, his death was
* Jehoram's reign ends in a violent and humiliating way—his entire family wiped out by invaders save for one son and he himself killed by a lethal disease of the intestines. According to the Second Book of Chronicles, he was hated throughout the nation of Judah, and he was even dumped in a random burial ground in Jerusalem (unlike his father and grandfather, who had both mostly followed the ways of the Lord and upon death were buried with full honors, including memorial bonfires after they were interred, in the royal cemetery) following his ignominious demise. Considering he had murdered all of his own brothers (all stated to be better men than he was) to become King of Judah in the first place (on top of all the idol worship he imported from the Nation of Israel), it was little surprise he went out the way he did.

* Jek "Piggy" Porkins — callsign Red Six, the first pilot to die on the run against the Death Star in
* Jekyll after Dr. Jackman want him because he is "the next stage in human evolution". In this case, it is implied that the original Jekyll had hundreds of kids, becoming responsible for many if not all cases of identical twins and so forth.
* Jekyll & Hyde — When the person is their own doppelgänger.
* Jekyll & Hyde: After Dr. Jekyll takes his formula for the first time during the song "Transformation", he experiences a maddening pain he describes in detail, wondering if he was going to die from it just before he finishes his transformation into Mr. Hyde.
* Jekyll & Hyde: A good person who changes into a villainous alter ego.
* Jekyll & Hyde: A good person who transforms into a villainous alter ego.
* Jekyll & Hyde as the eponymous character(s), he's at his highest level of ham in the climactic song "Confrontation". Why is that an example of this trope? Because Jekyll and Hyde both sing that song. That's right, The Hoff can have Ham-to-Ham Combat with HIMSELF.
* Jekyll & Hyde: During "Confrontation", Jekyll threatens Hyde with this and follows through at the end of the show.
* Jekyll & Hyde had a few of these along with vocals, backing up "Lost In The Darkness", "No One Knows Who I Am", and "Sympathy, Tenderness".
* Jekyll & Hyde has the wealthy aristocratic Emma Carew as the Betty and penniless prostitute Lucy as the Veronica. Several screen adaptations of the story have also used the trope, with Jekyll's fiancee (usually the daughter of Sir Danvers Carew) as the Betty and a prostitute/bar girl that Hyde picks up as the Veronica.
* Jekyll & Hyde is based on movie versions of Stevenson's novel more than the text itself. Later Broadway revivals hew closer to the show's original vision, which was darker and edgier than the 1997 version and closer to the book, having Jekyll revel in the freedom Hyde gave him and paraphrasing directly from the book as he contemplated his dual natures.
* Jekyll & Hyde, Jekyll's fiancee was originally named Lisa Carew, but then renamed to Emma Carew. There have been so many changes and updates made to the show that new productions alternate between the two names depending on which version they're following.
* Jekyll & Hyde of "Once Upon a Dream" and overall, too many to list. The show overall is probably better for the cuts but many of the cut songs were excelent on their own. With that last point in mind, while "Good 'N' Evil" is more thematically appropriate to the story, they eventually decided to reinstate "Bring on the Men"!
* Jekyll & Hyde potion, and keeps switching between forms. He repeatedly mauls the bulldog while in Hyde form, then switches back to his normal, Jekyll form. Eventually Sylvester becomes convinced that he can scare the dogs while in normal form. The result is the same as above.
* Jekyll & Hyde, Sir Danvers Carew is the only person who can stand Simon Stride, a sexist jerk who works to bring Jekyll down at every opportunity. Simon gets invited to Jekyll and Emma's wedding, where Hyde kills him.
* Jekyll & Hyde: The person's conflict is changing into a villainous alter ego.
* Jekyll & Hyde to change himself into a different individual, Edward Blake. Blake starts out looking exactly like Marlowe, just with a different name and personality. However, as the film progresses, and the more evil acts he commits, the more physically repugnant Blake becomes.
* Jekyll & Hyde, when it comes to the lead character. In the 1994 Concept Recording, Jekyll & Hyde are played by a baritone (Anthony Warlow). In the 1997

Original Broadway Cast Recording, they are played by Robert Cuccioli (who is capable of singing both tenor and baritone/bass notes as both characters). In the Resurrection Recording, Jekyll/Hyde is played by Rob Evan, and he is capable of both tenor AND baritone notes. However, in the 2012/2013 Cast Recording, the role is played by Constantine Maroulis, who is a tenor or high baritone. The role of Jekyll & Hyde is meant for tenors, but it can be played by a baritone (as several productions have done). It should be noted that some actors who have played the role will use a low register for Hyde, and a high/normal register for Jekyll.
* Jekyll & Hyde, with Hyde getting an entire song about murdering people. The musical culminates in a standoff at Jekyll's wedding, and versions that have Jekyll and Hyde played by different actors tend to stage "Confrontation" as a fight scene.
* Jekyll and Hyde (2015), an engineering assistant and the grandson of the original Spring-heeled Jack, who has invented a special suit that allows him to replicate his ancestors abilities, and is hunting the killer in an attempt to restore his family name.
* Jekyll and was also able to determine that he had cancer, where, and his life expectancy by tasting his sweat.
* Jekyll a variation of this occurs when Tom Jackman's assistant, Katherine, ends up trapped alone in their apartment after he transforms into Hyde. Worse still, Katherine has switched the power off as part of a very risky gambit to get past Tom's security, meaning that the security cameras that normally keep Hyde in line are also off; fortunately, after toying with her for a while, Hyde lets her live - so long as she explains why she drugged Tom and switched off the power in the first place.
* Jekyll, Benjamin Lennox and Christopher Browning find out the hard way that annoying Hyde is a very bad idea:
* Jekyll. Claire (apparently) swallows the key to Hyde's chains to prevent him from escaping. Hyde, ever horny and homicidal, gives her a long, slow one. Result.
* Jekyll draws from nearby electrical sources to power his transformation. As such, when Dr. Jackman's in a room and the lights flicker and go dark, it's a sign that the psychopath is about to show himself.
* Jekyll Fenella Woolgar was cast as one half of a lesbian couple; however, by the time filming started she had a rather noticeable bump. She thought that she'd lose the role but it was no matter to the writers; they just worked it into the plot and it actually spawned quite a few endearing and funny bits. It was joked about on the commentary: 'You just can't cast lesbians these days!'
* Jekyll, has been shown to be able to get up from a chair and to the door of a room in the time it takes the woman who had been facing him to turn to the door, among other examples.
* Jekyll, Hyde teases Jackman's (his Jekyll-side's) wife about how he might want to come out when the two were having sex. She responds, 'I might let you'.
* Jekyll, Jackman forces his best friend (working for the Government Conspiracy) into eating a key when he feels his transformation starting. Hyde is almost fooled but then sees that his friend's mouth is a little wet, and puts two and two together. ("Did my daddy make you dribble...?")
* Jekyll — Benjamin, about to walk into a meeting with Hyde, warns his men "Don't kill him. Or me. In that order."
* Jekyll, Mr Hyde does this a lot, mainly because he finds it funny to scare people. Presumably, it's a case of him moving too fast for the eye to follow rather than any actual teleportation powers.
* Jekyll: "Now, You know what I call this, children? I call it the perfect start to an evening. The night is young, there's a beautiful girl, and someone's going to die. That's you, by the way." The threat isn't carried out because Hyde's still avoiding killing people, per his agreement with his Jekyll. So he just breaks the guy's neck (nonlethally) and toys around with his girlfriend for a bit.
* Jekyll results in the prolonged beating of a man who'd humiliated Jackman earlier that day — biting off one of ears as a finishing move. For added horror, Jackman wakes up the next morning to find the severed ear in his pocket.
* Jekyll starts by establishing the main character as a descendant of Dr. Jekyll

and then elaborating on his powers and love-life.
* Jekyll, the antagonists justify their attempts to kidnap Tom Jackman and experiment on his other personality on the basis that humanity is doomed to this trope, without Hyde's unique genetics.
* Jekyll the main character's Hyde persona is equipped with a frightening one. It's currently the page illustration.
* Jekyll this, plus a sink full of blood, was one of the earliest signs that Hyde was first emerging.
* Jekyll this to the observing scientists. "Genetic memory doesn't work like that." "Of course not, maybe he's got something else. Something better."
* Jekyll to attack him with a knife consists of the camera spinning around him real fast and ending with him behind the victim.
* Jekyll uses this as one of the warning signs that Hyde is about to show up, and they're one of the few cosmetic changes made to show the difference between the main character's two personalities.
* Jekyll want to think of some ways to disable the security system that don't involve drugging him and cutting off the power to the entire huge, soundproofed house...
* Jekyll: when Tom Jackman becomes Hyde, his features alter, which is reflected in actor James Nesbitt's makeup (different hairline, jaw, etc.). People keep referring to Hyde as a "pretty boy" and the like, but little mention is given to Jackman's attractiveness.

* Jellal spent years before the start of the series up to the Tower of Heaven arc manipulating Erza, his childhood friends/fellow slaves, and even the Magic Council itself in order to prepare the R-System for the process of reviving the black wizard Zeref after being possessed by his spirit as a child. He tormented Erza, destroyed countless lives, and even killed one of his friends Simon in the name of obtaining "true freedom." The kicker? Even if he hadn't been defeated by Natsu and Erza, it wouldn't have mattered because

* Jelle's Marble Runs features marbles taking part in competitive sports, with these marbles apparently having personalities and the like. The results are not predetermined, but of course, they aren't actual living things. The fandom took this and ran with it anyway, and will frequently contribute to it with memes and jokes on the JMR subreddit.
* Jelle's Marble Runs: Starting in 2018, a team will be chosen to host the Marble League in their home stadium. Additionally, Marbula One has race tracks that take place in one of the team's home region that change every race. As for specifics:
* JelloApocalypse "Alomomola" and can't even keep doing the silly voice:
* Jello Biafra's slogans for his 1979 campaign for mayor of San Francisco included "What If He Does Win?" and "There's always room for Jello" (the latter taken from a Jello advert).
* Jell-O Pudding used this in a commercial — the kids were camping on the lawn, Mom told a scary story about a creature that hunted down kids who stole pudding snacks (kicker being Mom was getting back at the kids for stealing her pudding snacks).
* Jell-O sugar-free instant pudding mixes also boast that they are "fat free". All instant pudding mixes are fat free, they're just sugar, cornstarch, flavorings, colors and preservatives. The fat content depends on the milk you're using.
* Jelly Belly is on a strict diet and has to put up with his family chowing down on delicious, high-calorie foods while he's stuck eating nothing but lean, broiled

meats and vegetables. Even when he becomes more serious about losing weight and eating healthier, staying away from junk food is still an effort in and of itself.
* Jelly bracelets, worn as a fashion item by teenage and preteen girls back in
* Jelly Cube Planet in episode 2 is a square planet made out of jello that can only fit a small number of residents. There is no way it would be big enough to have an atmosphere, but it seems no one needs one.
* Jellyfish, and are constantly praised by fans of melodic, classic pop songwriting. The albums were recently remastered and re-released on an indie label on vinyl.
* Jellyfish, anemones, and others of their phylum have a digestive system with only one orifice - a mouth - so they don't poop. Whatever they can't digest from their food, they vomit out instead.
* Jellyfish basically have sexual reproduction producing larvae, which then settle down as a polyp, which in turn buds and produces new medusae asexually, and the cycle begins anew.
* "Jellyfish Jam": "SpongeBob has learned one of the sea's harshest lessons: wild animals can throw really wild parties."
* "Jellyfish Jam"; the first episode to use CG, for a panning shot from SpongeBob's house to Squidward's house.
* Jellyfish lyric sheets are full of puns. There's also "Nothing" by short-lived Jellyfish splinter group, The Grays.
* Jellyfish mentions someone as wearing a "lampshade crown of thorns" in the lyrics of "Joining A Fan Club".
* Jellyfish's "He's My Best Friend", where lots of double entendre makes it clear that the "friend" in question is actually the narrator's penis (a couple of the more blatant examples being "my hand's a five leaf clover /it's Palm Sunday over and over" and "I pick him up when he's feeling down / I guess he's always been hanging around"). Funnily enough,
* Jellyfish splinter act The Lickerish Quartet continue this tradition with "Fadoodle", entirely consisting of a string of pre-20th century euphemisms for sexual intercourse.
* Jellyfish starts with Bowser saying "... and then I'll join OPEC!" Notably, this is not part of the actual song, but taken directly from a comic strip included with the original album.
* Jellyfish, to name a few. He was also the co-founder of the infamous novelty duo The Moog Cookbook, which did Moog synthesizer-based instrumental renditions of popular songs.
* Jelly gets this in "Hope Castle" when Flick says that they'll defend it against wild creatures and she comments "Even it means sacrificing our lives in cruel and painful ways."
* Jelly Jamm: According to the official website, the show is intended to "celebrate music, fun and friendship".
* Jelly Jamm: A recurring joke in the series is an inexplicable cutout of a Mariachi that plays some notes of the Mexican Hat Dance whenever it appears.
* Jelly Jamm episode "A Day at the Races", Bello, Goomo, Mina, Rita, and the King all compete in a simple race where they have to reach the finish line in their vehicles. The King cheats by distracting the other racers so that he can get ahead of them, and he also makes fun of them in the process.
* Jelly Jamm episode "My Little Queen", Bello tries to blame Mina for the Queen becoming a kid again. Mina then posits the possibility it was Bello, leading to Goomo (who saw what had really happened) saying this line:
* Jelly Jamm episode "My Little Queen", the kiddified Queen does this to the King, drawing stuff like hearts and flowers on his face with a pencil.
* Jelly Jamm has an episode where Mina builds a giant robot to help Bello change the lightbulb on his Jammboman helmet, Jammboman being Bello's pretend superhero persona. Bello later tinkers up the robot, turning it into a mech called Jammbobot for Jammboman to use to aid in his crime-fighting pursuits — it even has a theme song ("Jammbobot! Jammbobot! Jammbobot! Jammbobot!").
* Jelly Jamm: In "Lost Dodo", Rita gets lost in the forest while looking for a lost

baby dodo. Suddenly, she trips over a rock and accidentally comes face to face with the baby dodo she was looking for. This results in about a few seconds of them screaming at each other.
* Jelly Jamm: In "White Trainers", Goomo becomes so obsessed with his new shoes that he goes as far as to write a heart-penetrated-by-arrow symbol on a tree, with the inside of the heart having Goomo's name and a drawing of one the shoes in it.
* Jelly Jamm is Planet Jammbo, the source of all the music in the universe. According to the explanation the planet's Queen gives to Bello about how her castle's music factory works, the music is apparently a mineral that is mined from underground and then refined in the factory before eventually being converted into bubbles that float in the sky and off into space.
* Jelly Jamm reaction to seeing a morbidly obese Dodo is "Oh, mama!". Coincidentally, this was the only time he spoke proper English in the show.
* Jelly Jamm, Rita and Mina fit the "pink girly girl, blue tomboy" subtrope. Averted with the male characters, however, as two are purple and one is red.
* Jelly Jamm, the residents of Planet Jammbo are known as Jammbonians.
* Jelly Jamm: These five friends live on the planet of Jammbo, the planet where all music in the universe originates.
* Jelly Jamm, the sky of Jammbo has a bunch of lamps that seemingly hang from nowhere.
* Jelly Jamm tired, to which Goomo replies he is tired and wants to go home, which is exactly what he does afterwards.
* Jelly Roll Morton who frequently insulted darker-skinned musicians while emphasizing the white portion of his mixed-race heritage.
* Jelly's Day short "Uncle Betty's Strange Rash" introduced Jelly's Uncle Betty.
* Jellystone! but rather each episode would focus on a different set of characters with their own different settings and scenarios including but not limited to:
* Jellystone!), but the show shows that he's just as competent as Cindy Bear (the scene right after has him bring the flatlining patient back to life). Played straight with Boo-Boo, who while a decent nurse, is nowhere near ready to be a Doctor himself.
* Jellystone! cartoons, the fans of the show having had their curiosities turned towards discovering the older works the characters were based on.
* Jellystone!: Cavey Jr. and a sabertooth tiger are originally found frozen in ice blocks.
* Jellystone! for the sole purpose of eating pizza there, but the manager refuses to let adults in without a child accompanying them. Yogi's first plan involves dressing Boo Boo in a bonnet and diaper and passing him off as his son. The manager is not fooled and threatens to call the police, while Yogi can't believe it when his plan fails.
* Jellystone!. He has his own private museum of vintage wrestling memorabilia underneath his office.
* Jellystone! is more aggressive and smug than his original incarnation.
* Jellystone!: The ending of "A Fish Sticky Situation" features Top Cat and his gang having just saved everyone after turning into fish, finding a crate of expired milk which they sell to the town and turns them into cows.
* Jellystone!: The occasional moment, as Jellystone is really a very dysfunctional town.
* Jellystone!: When Captain Caveman tries to instruct Junior how to swing his club, saying he's doing too much stooping, Junior begins shouting "Stupid!" repeatedly, which offends Shazzan. Cap tells Junior that "stupid" is a no-no word; in response, Junior begins repeating the word "butt," which causes Peter Potamus to start rambling about how he's been doing squats.
* Jellystone!: Whenever Shag Rugg gets scared, he screams about wanting his mama.
* Jellystone!, who were not originally comedy characters, reside in Jellystone as well.
* Jem: After Eric Raymond lost his half of Starlight Music, the Misfits needed another music company to promote their albums so Pizzazz asked her father to start one.

* Jemaine Clement. Served as sort of an in-joke for his family since his father actually is Australian.
* Jem and he was simply afraid to tell Aja earlier because The Holograms and The Misfits get along poorly.
* Jem and Jerrica Benton are the same person. Unfortunately, Jerrica's boyfriend Rio doesn't know this, and he falls in love with Jem. If she only told Rio the truth everything wouldn't be so complicated and she wouldn't have to be her own boyfriend's mistress. One episode had her trying to and even ran a simulation to see what would happen, but immediately ditch that plan when Rio exploded in anger. The IDW comics even went with that route when she did reveal her identity.
* J. E. Mand ("S. O. Meone") (Duke Charles of Mecklenburg-Strelitz as playwright)
* Jem and the Holograms (2015) and seems to be trying to appeal to the youth of the day. Grown fans of the cartoon were put off by the massive changes, while tweens were put off by how derivative it looked. The result was an embarrassing $2 million gross on a $5 million budget, getting pulled from theatres after only two weeks.
* Jem and the Holograms (2015), Jerrica is asked to sign a solo recording contract by music executive Erica Raymond. Nearly everything about the signing scene is wrong:
* Jem and the Holograms (2015) Not to mention that Jerrica Benton was portrayed as a chest-length-haired brunette rather than the shoulder-length-haired blonde she was in the cartoon. Similar case with Kimber, who was a redhead in the cartoon, although Kimber in the live-action version had some red streaks. Shana is also portrayed as black-haired and multiracial rather than purple-haired and African American.
* Jem and the Holograms (2015) one of the girls, as they commit breaking and entering, declares in a panic that she "can't go back to juvie!"
* Jem and the Holograms (2015) wears a pair of Delman Pointed Toe D'Orsay Pumps that get a considerable amount of close ups.
* Jem and the Holograms, but an older, more experienced actress that had given Jem a hard time in the press wins the award — and her speech includes an apology for how badly she treated Jem.
* Jem and the Holograms cartoon, as a hairstylist reassuring Jerrica as she's about to go on stage. Jem's singing voice Britta Philips also cameos as a stage manager.
* Jem and the Holograms count here as well. They can't tell anyone about the supercomputer Jerrica and Kimber's late father made or else she could be used for evil. They also keep the secret that Jerrica and Jem are the same person.
* Jem and the Holograms go back to 1781 Vienna and 1944 London, Shana, Aja, and Raya never face any racism.
* Jem and the Holograms had a speaking voice provided by Samantha Newark, but a singing voice provided by Britta Philips.
* Jem and the Holograms has the rival band The Stingers wearing purple. Riot declares himself music royalty.
* Jem and the Holograms (IDW) after seeing her band online, then saw her in person and began flirting with her.
* Jem and the Holograms (IDW) Aja stares at her three sisters sleeping in a group. She notes they look cute and Kimber's sleep bubble even says "cute sleeping".
* Jem and the Holograms (IDW), as in issue 6 Kimber's sisters casually ask if she is secretly dating Stormer, and Pizzazz knows something is going on between Stormer and Kimber but wants to stop it. Eventually Pizzazz decides to ignore the romance as long as it doesn't affect their band.
* Jem and the Holograms (IDW). Blaze feels the need to come out as a trans woman to her all-female band, however they don't care at all and her being trans is a non-issue.
* Jem and the Holograms (IDW) caused her to become a white Englishwoman instead.
* Jem and the Holograms (IDW) count as well. Shana is docile and fashion-savvy much like Jerrica while Aja is outgoing and tomboyish.
* Jem and the Holograms (IDW) Eric's name is written as "Erik" on his coffee cup. This is possibly an in-series version of this.
* Jem and the Holograms (IDW) involves the titular band being paired up for Secret

Santa with their rivals The Misfits.
* Jem and the Holograms (IDW) is full of tall women. Clash is the tallest female, at 185 cm (only an inch shorter than Rio). Pizzaz, Kimber, Jem, and Jetta in particular are meant to be attractive and are all above average height.
* Jem and the Holograms (IDW) Latino) and Jerrica (white), Jerrica and her crush on Riot (half-white, half-Asian), and Aja (Chinese) and Craig (half-Middle Eastern, half-Israeli).
* Jem and the Holograms (IDW) of The Misfits, Stormer. Stormer isn't bad or anything, but her band is constantly butting heads with Kimber's band.
* Jem and the Holograms (IDW) of the music contest while The Misfits get off scot-free because they're hosting the event.
* Jem and the Holograms (IDW) reboot became a hit with men and women despite being incredibly female geared. It has a female writer, female artists, lots of pink and "feminine" colors, only a handful of major male characters, and an emphasis on romance, friendship, and family. Just like the '80s cartoon its based on it broke out of the ghetto.
* Jem and the Holograms (IDW) set in the 2010s instead of the late 1980s.
* Jem and the Holograms (IDW). Stormer's bandmates consider it treacherous for her to date a member of that band.
* Jem and the Holograms (IDW) that ended before many fans were even born.
* Jem and the Holograms (IDW) that takes place in the 2010s (particularly 2015 at the start).
* Jem and the Holograms (IDW). The second time it ends up badly as Rio starts complaining about Jem, who unknown to him is Jerrica's alter ego.
* Jem and the Holograms (IDW) The trope is also inverted in that Emmett Benton's counterpart is still alive.
* Jem and the Holograms (IDW) with the exceptions of Danse, Astral and Eric Raymond's henchman Zipper.
* Jem and the Holograms involved the Misfits trying to somehow dispose of the Holograms in order to get the spotlight to themselves.
* Jem and the Holograms - Showtime, Synergy! One occasion this turns out to be a disadvantage as Jem is working on a movie and can't let the make-up artist touch her face with out revealing the truth.
* Jem and the Holograms splits the project into rival films, the good guys soldier on and the end result is a box-office success that saves Ba Nee.
* Jem and the Holograms. The thing that draws the line between virtual star and stage alias? No one but Jerrica's closest friends knows she is Jem. The people in that universe perceive Jem and Jerrica as two different entities.
* Jem are ignored in the series itself. For example Clash and Video were supposed to be born on the same day according to the Series Bible, but the series shows that Video was already a toddler when Clash was born.
* Jem are often shown wearing long coats. Part of it is due to them being a fashionable rock band in the 80s but it also signifies them as the cool, trouble making enemies of the protagonists. Stormer's long coat is pretty much always orange.
* Jem averts this trope by clearly showing ages in the character bios.
* Jem changed the titular Jem and the Holograms into all being high schoolers. This changes them dramatically as they're more immature and don't deal with 'adult issues' like jobs or romance. Oddly, the film was aimed at an older audience than the cartoon—tweens and teens instead of girls ten and under.
* Jem character with the most love interests by far is Kimber. She has a new boyfriend or crush every few episodes. It bombs in her face when two of her old boyfriends want to both marry her.
* Jem comics. While they are recognizable enough there are clear differences. For example, Kimber is now much lankier and her normal hairstyle is a sidecut.
* Jem, confirming that they're back together. Pilar is more happy than unnerved because they've been broken up since before her birth.
* Jem does this in pretty much every episode. They nearly die or get into some danger only to be fine after the commercial break.

* Jem episode "In Search of the Stolen Album": Synergy, Jem's super-computer, is able to scan clues that the Misfits' treasure hunt joke on the Holograms in a matter of moments—and even the reasons behind the places.
* Jem episode "Journey to Shangri-La", where some blood can be seen when Roxy cuts her hand on some thorns.
* Jem episode "Kimber's Rebellion" has the Misfits hijack a television interiew that Jem and the Holograms are having. Pizzazz mocks her rivals' name and retorts that the Misfits' name actually means something. Jem replies by quipping that the name of the Misfits means rude, obnoxious and loud. Pizzazz snaps back that she is not loud.
* Jem episode "Out of the Past" shows Jerrica and Kimber Benton's mother Jacqui telling them of how she enjoys sharing home with foster children and hopes for her daughters to be the same, which foreshadows Jerrica, Kimber, and their foster sisters Aja and Shana running the Starlight House and looking after the foster girls after Jerrica and Kimber's parents die.
* Jem episode, the Critic gets one because of him saying a certain phrase from the analysts:
* Jem features covers to three magazines called "Glitter", "Gloss", and "Trendy".
* Jem get into at least one food fight in the series. They generally just like making mischief after all.
* Jem gloomily by himself after learning his mother is sick and being forced to interact with his abusive father.
* Jem'Hadar, even obeying orders to go to their deaths because "it is the order of things." In one case, a Jem'hadar realizes that the unusually poor strategy of the Vorta would lead to his entire unit being killed in the attack and expressly recognizes that they were betrayed by the Vorta, but still conducts the attack as planned.
* Jem'Hadar make things simple. The commander of a unit is called the First. His second in command is the Second, below him is the Third, and so on.
* Jem has aspects of this. It's understandable as she's a teen in 80s California.
* Jem has Stormer's brother and Aja's boyfriend Craig Phillips. When Craig finds out that Jetta hired some thugs to destroy Raya's home, he immediately barges in and demands Eric give an "anonymous donation" so they can cover the damages. When Eric refuses, Craig wraps a desk lamp tightly around Eric's neck until he complies. Later, he turns on the Misfits, and demands they treat his sister better than they do. By the end of it, all of them are quaking in fear of him, and do what he asks.
* Jem, however, and they both go back to their bands at the end of the episode, but they do become friendlier to each other.
* Jemimah's superpower allows her to remove the effects of friction from the soles of her feet, allowing her to glide around at great speeds. As a
* Jem. In "The Bands Break Up" Raya is disgusted by Kimber's new Misfits inspired makeup however fans either often prefer it or can't tell the difference. Similarly, Roxy gets a makeover in "Roxy Rumbles" when she decides to change her life and many fans liked it quite a bit.
* Jem: In "The Stingers Hit Town", Pizzazz, who had become smitten with lead singer Riot, abruptly shoves a donut into Roxy's mouth when she interrupts her when she tries to flirt with him.
* Jem is always called "Little Jem" by the family's hired help, Susan, which he
* Jem is "Destiny". Riot usually sings lead and the women are backup however in this song Riot only sings the chorus.
* Jem is Jerrica Benton performing in a band with her sisters by using holograms to give herself an alter ego, the titular Jem. Said holograms are controlled by an artificial intelligence named Synergy, who was constructed by Jerrica's father Emmett Benton before he passed away. It is also established that Emmett Benton's wife Jacqui, who served as the basis for Synergy's appearance, died in a plane crash when Jerrica was young.
* Jem), is obsessed with engineering, and has a tendency to freak out if things don't go his way.
* Jem is one of the most iconic examples, featuring Jerrica Benton disguising

herself as the superstar Jem with help from her father's supercomputer Synergy.
* Jem. It missed several episodes and worst of all Pizzazz's hair was deeply muted from its normal bright, lime green color. The Shout! Factory DVDs are the full series with correct colors though. It's best to watch two-parter episodes in one go instead of separately.
* Jem: It's implied that the "Jem" persona is escapism to Jerrica. As Jem she can be free-spirited and do things she normally couldn't do.
* Jem" it's revealed that Pizzazz started acting out when her mother abandoned her as a child. Her millionaire dad spoiled her with gifts instead of actual attention and this didn't help her situation.
* Jemjammer, Ælfgifu goes to a space station pub for lunch and orders the chowder. It looks at her funny.
* Jemjammer, after an extended break between episode five and six, Jyllana jokes that the docking procedure they began in the previous episode felt like it took eight weeks to complete.
* Jemjammer, Alana hits a giant spider right between the eyes with her gun—and it's strong enough to completely disintegrate it.
* Jemjammer (aptly titled "Ghost Ship"), The Kestrel encounters a ship crewed by animated skeletons.
* Jemjammer, Cacophony has a red and black one for stealth missions. It pairs with black two-inch heels (as opposed to higher, glittery ones in her regular apparel).
* Jemjammer calls others "my dear" and "my love" quite often. Her compatriot Jylliana doesn't like it too much.
* Jemjammer discusses his backstory with Jylliana, he tells her about how he definitely didn't try to dock too hard during his first stint as a Spelljammer crewman, and certainly didn't cause the ship to burn up on entry.
* Jemjammer, DM Kit makes Jylliana and Aelfgifu take psychic damage if they make a bad pun. Cacophony is exempt because she's a bard and it's expected of her.
* Jemjammer features a store called "Stuff". It sells basically everything, though predominantly antiques, and is large enough that Aelgfifu needs to roll a Survival check in order to help the party get out safely.
* Jemjammer has the party stop at Port Meridian in the episode of the same name, which is a space station built into an asteroid.
* Jemjammer, Jylliana begins having dreams of a shadow spreading across the sky.
* Jemjammer, Jylliana references this while having a small breakdown fighting giant spiders.
* Jemjammer, Mr. Herst ends up ending his turn in a pool of acid. While it's been a pain for everyone else, he resists it so much that he only takes one damage from it. It's like vinegar to him.
* Jemjammer spiders that can control minds and breed by having their young burst from their corpses. The party has to fight them after they attack Alana's ship. The fact that Jylliana (and to a lesser degree her player Annie) are arachnophobic doesn't help.
* Jemjammer state that the entire fight against a giant shark took thirty seconds of in-game time.
* Jemjammer. The main ship used is the Kestrel, which resembles a normal sailing ship but can still ascend beyond the spheres and into the void of wildspace.
* Jemjammer the party gets ambushed by bandits. Cacophony has to rouse everyone from their sleep to fight back, and Jylliana spends a good five minutes waking up and gathering up her stuff. It almost lasts into the fight itself!
* Jemjammer: The suits of armour in Spider Chateau. Jylliana predicts that they'll activate when the party passes their line of site. When Grak tosses a rock past them they attack, and Jylliana and Cacophony high-five.
* Jemjammer, to the point where Kit has her re-do stealth rolls on occasion to see if anyone heard her exclamations.
* Jemjammer. Vicki points out that this is very indicative of both Cacophony's character and Maq herself.
* Jemjammer: When ambushed by bandits, Jylliana uses the spell Thaumaturgy to increase her volume to "voice of god" levels, then shouts at the bandits until they

flee in terror.
* Jemjammer, when Vicky asks why Annie keeps failing stealth rolls, she points out that Jylliana is wearing noisy chain mail. This lack of stealth comes up a few times.
* Jem. Jerrica and her friends are twenty-something year olds. At least two episodes have them befriending seniors.
* Jem like she says, though the others are too ignorant of British accents to notice.
* Jem lives in California while her boyfriend is off working in Britain.
* Jem looks like her deceased mother and became a popular musician like her as well. No one outside of her bandmates knows this though since Jerrica sings as her alter ego "Jem" and Jerrica just seems like the band's manager.
* Jem Minx nearly drowns. Rio somehow revives her by using some subpar CPR tactics.
* Jem naturally has hair colors like blue and pink however multiple colors at once seems to be impossible. Pictures show Danse with less colors than she has currently.
* Jem. Newark thinks that it's hilarious to make something as sweet as Jem so profane.
* Jem nor the romantic problems involving Riot and Minx are resolved. Jerrica is still flirting with Rio as both herself and her alter ego Jem, Minx still has unrequited feelings for Rio, Riot is still in love with Jem while she doesn't like him, and no one knows Jem's secret identity.
* Jem plays this role for the kids at her orphanage and to her blood sister Kimber; the rest of the band are downplayed but present examples as well.
* Jem, Rapture mentions that her racist and religious parents used to forbid her from playing with kids who weren't also WASP.
* Jem, Rapture's parents are conservative ministers. They think that rock-and-roll is satanic and see either religious or political messages in various bands, including their own daughter's band.
* Jem, Raya was reunited with Luis while on tour in Mexico. They went on a date, Raya lost her virginity, then Raya went back to America. Four months afterwards, Raya finds out she's pregnant.
* Jem) recently caused a scandal when they were revealed to be lip-syncing.
* Jem revolves around this issue in relation to Stormer and Roxy's relationship. Roxy kisses Stormer but freaks out when Stormer touches her face. It reminds her of when as a kid someone (presumably her mom) shoved her hand onto a fire. When Stormer rubs her back later, it gives Roxy flashbacks of being stabbed.
* Jem. Rio isn't even dating Jem, he's Jerrica's boyfriend, which effectively makes him a cheater.
* Jem Rio who also loves her alter ego Jem (but doesn't know they're the same person), and Riot who loves Jem but not Jerrica.
* Jem series, who wanted Jerrica to have a reason to keep her other identity a secret from Rio.
* Jem's first episode, "The Beginning". After summarizing the gifts from her late father, Jerrica states, "I know how to stop Eric Raymond." We don't get the plan — until we learn who Jem is!
* Jem. She asked Jetta to call Eric Raymond and tell him to go to hell and then ask him to help. She asked Stormer to call Pizzazz's Dad because Stormer was the Misfit he liked the best. Pizzazz didn't believe Roxy would be of any help but asked her to call Clash anyway. Stormer wanted to use her phone call on her brother Craig instead of Pizzazz father so it was Roxy who phoned Gabor Manor.
* Jem. She retired from the profession two years after the cartoon ended in 1988 and has never attended any fan conventions, not even the annual JemCons.
* Jem, she's much happier and sweeter than when she is around Pizzazz.
* Jem). Someone being illiterate in modern day America is considered absurd to many viewers. This, however, isn't as unrealistic as it seems. 2017 studies show that 16 million Americans are considered functionally illiterate and many of these are 30 and under. It's also mentioned (and outright shown in the comic) that Roxy ran away as a teenager. She likely read enough to get through school and dropped out before

it became a major problem.
* Jem. Stormer usually plays background vocals in Misfits songs that are incredibly arrogant, self-confident, and aggressive 80s pop. Stormer's and Kimber's music are ballads and her bandmates are disgusted she is singing such "sensitive" music.
* Jem, the Holograms go to Morvania, a made up Slavic country, and in a season 3 episode, they go to Croatia, both of which are presented this way.
* Jem: The pilot starts with an already famous Jem being well-received by her fans and then it flashbacks to the graveyard scene with Jem's father being buried.
* Jem, the protagonist is undergoing psychiatric care to resolve the issues in his life. At the conclusion, we discover the reason he's come to the (robot) psychiatrist in the first place, and the story ends without a real attempt at closure.
* Jem. There's even one scene where she casually puts whipped cream on a bowl of fruits, peels and all.
* Jem. The song itself is an egotistical song instead of literally being about a giant.
* Jem turns Clash into the type of groupie that tries to sleep with the band. Stormer has only kissed and cuddled with her, but it's implied her bandmates have done more.
* Jem TV series. However, at least three of them: Ashley, Ba Nee, and Krissie, were later made into dolls.
* Jem, two of these characters were introduced. When Shana temporarily left Jem and the Holograms to pursue her fashion designer career, her bandmates scouted for a new drummer. Raya won their contest and became their new drummer, with Shana taking up a new instrument. The Misfits tried (and failed) to outshine Jem's band by getting their own new member, Jetta who was a saxophonist but who usually played bass guitar. Raya never got any spotlight past her introduction episodes however Jetta became on par with the rest of the Misfits.
* Jem was oblivious to the rivalry between the two bands when he tried out to be Jem's new drummer.
* Jem: when a wealthy Jem fan puts out a notice saying he is willing to pay large sums of money for Jem's secret identity, Pizzazz and the other Misfits approach him and hatch a plan to bring Jem into a copy of her mansion and have her interact with actors playing her friends and family so she'll reveal her secret. Not knowing she's really Jerrica, they fabricate pictures and movies of Jem as a little girl, and the impostors pretend to have known her as Jem since childhood. The ridiculousness of seeing an alternate past that her friends and family seem to believe is what really happened leads Jem to a mental breakdown.
* Jem when she meets (you guessed it) a princess who looks just like her.
* Jem where characters facial expressions don't quite match the mood or their voices. For example when Jerrica's sister gets thrown off a horse Jerrica screams but has a rather neutral expression.
* Jem, which ended up running for three seasons after being picked up for a full-fledged series, existed solely to sell dolls and playsets. The dolls were a hit at first, but as the show gained more fans, sales paradoxically started to wane, so the show was canceled despite the big ratings.
* Jem, which only causes Rio to think Jem is an obnoxious diva who takes others coffee and is barely around her bandmates.
* Jem with Video. She did try dating a man, Stefan from the episode "Heartland, Homeland", once but it didn't work out. Danse didn't feel attracted to him and, when Video confronted her about it, Danse ran back to her girlfriend.
* Jem wore a trenchcoat as a disguise when she told the police her manager had stolen money and framed Jem.
* Jena came twenty years after the death of Frederick the Great; the crash will come twenty years after my departure if things go on like this.
* Jen and Alex skirt very close to sleeping together in one episode, but decide that it makes more sense for them to remain friends than romantic partners.
* je ne sais quoi." It literally means, "I don't know what" which has the same meaning in English.

* Jenette Goldstein is Jewish-American but has been able to pass herself off as numerous different nationalities - her IMDB page even describing her as "a true chameleon". Her
* Jen himself when the castle is crumbling. He doesn't care about the danger of it coming down on him; he merely sits with Kira's corpse and mourns.
* "Jenifer": Jenifer manipulates the hero into getting himself killed by attacking the cannibalistic woman in broad daylight and getting shot for his trouble by a man who thinks he's just a crazed psycho.

* Jennifer Aniston - and to this day can't believe it was even a fashion trend. The haircut was something done either when the stylist was drunk, made a mistake or got experimental (depending on who you ask) and she grew it back out as quickly as she could.
* Jennifer Aniston, but since the show she's gone through most of the shades of blonde.
* Jennifer Aniston did something similar. She would leave the house wearing a distinctive set of orange cargo pants, so that all photos of her would look identical and therefore unusable.
* Jennifer Aniston, in which her character seeks both a promotion and the affections of a man who is only attracted to women who are taken.
* Jennifer Aniston, making her even more of a tabloid target than she is now.)
* Jennifer Aniston petty dealer neighbour to play the mom in a beard family for smuggling purposes. Forced to bring an RV brimming with contraband marijuana across the Mexican border as a last chance to clear a debt that he might otherwise not survive, the juvenile middle-aged slacker must improvise, fast, and decides his last chance is to assemble a fake family of similar local misfits and failures, impersonating the very picture of squeaky-clean Americana that would never get a second look from customs and law enforcement, and thus hide in plain sight. The roster is filled out with a homeless runaway from their block and the alcoholic neighbor's neglected awkward geek son. Starting out with mutual disgust and distrust all around, the ragtag bunch is forced to method act to maintain their cover, and in the process of enacting the silliest cliches they can come up with, grow more and more attached to the lie... Which turns out to be everything that had been so very lacking from the real lives of these four embittered and lonely losers.

* Jennifer Aniston's famous "The Rachel" hairdo came about because - in her words - the hairdresser was drunk, made a mistake and tried to correct it.
* Jennifer Aniston. The funny thing is that this was unintentional. The stylist originally wanted Aniston to have even-length hair, but wasn't sober and accidentally cut off a bit too much on the front right; instead of matching all the rest of her hair to it, he just cut off a bit on the other side to make it symmetrical. In an interview, Aniston claimed that she hated the haircut and didn't get what the "big deal" was.
* Jennifer Aniston, which critics called her finest hour. She still does plenty of comedy though.
* Jennifer Aniston, while Aniston has said that the hairdresser was drunk when he cut it like that. She grew it back as quickly as she could.
* Jennifer Beals happened because it got shrunk in the wash and had to cut a large hole to fit her, though it kept faling off-shoulder.

* Jennifer Coates in "The Sixth Juror" (season 10) because they had exhausted all other possible people for said duty at the small base where the trial was held.
* Jennifer Connelly, and she's quite good at it. She was dubbed in the theatrical version, for whatever reason, but her natural voice can be heard in the director's cut.
* Jennifer Connelly. But the Screen Actors Guild wasn't that fooled and nominated her for Best Actress instead.
* Jennifer Connelly is still most widely remembered for its explicit sex show sequence involving Connelly's character and a sex toy which is almost always circulated out of context).
* Jennifer Connelly, who voiced JARVIS (Tony's first AI) and now plays The Vision.
* Jennifer Coolidge; the latter, though, was more of a recurring role.
* Jennifer Diane Reitz and other webcomics with queer and trans themes.
* Jennifer Garner did the same, with the result that Sydney's action scenes had to be cut considerably.
* Jennifer Government, also NRA to some extent, though both factions are mostly mercenaries for corporations.
* Jennifer Government has the Corporate States of America spanning several continents.
* Jennifer Government is named for the company they currently work for.
* Jennifer Government. On the book cover itself, however, it is the barcode for the book itself so that it could be scanned by the cashier.
* Jennifer Government: The eponymous Jennifer is a single mother and a government agent. Also, badass.
* Jennifer Government, the events of the novel are set off when Nike tries to drum up press for their new line of shoes by arranging random shootings in their stores.
* Jennifer Government, the United States encompasses not only most of the Americas, but also the British Isles, South Africa, India, Japan, Indonesia, and Australia.
* Jennifer Government where the eponymous agent tries to commandeer a car, only to be tied up in wrangling over how much she has to pay the owner for the right to use it (this being an ultra-capitalist society where the government isn't really taken seriously).

* Jennifer Grey, an out-of-work actress who had just received a rhinoplasty... much like the real Jennifer Grey.
* Jennifer Grey. Baby's giggling when Johnny Castle brushes his hand down her side, touching her breast, was just Jennifer Grey's nerves getting the better of her. Swayze seems mildly annoyed on most of the takes that ended up in the film.
* Jennifer Grey she plays herself - out of work because she got a nose job.
* Jennifer Grey. The other characters are skeptical of this at first since Grey no longer had her distinct nose from her 1980s films.
* Jennifer Hale reprises the role, though she does the singing rather than Tammi Tampin.
* Jennifer Hale, she dropped the accent in favour of a fairly non-regional North American one.
* Jennifer Hudson's nephew, Julian King, was found shot to death in a white SUV days after his grandma and uncle were murdered. Julian's stepfather, William "Flex" Balfour, has been charged with the crime.
* Jennifer Hudson, won the Best Supporting Actress Oscar for that role, which is seen as a lead on stage and had earned Jennifer Holliday a Tony for Best Leading Actress in a Musical. Ironically, Hudson was not mentioned in the promotional material until after the movie was released.
* Jennifer Jason Leigh at the protagonist and tossing out a quick "Shuttup" each time he tries to speak in his defense.
* Jennifer Lawrence appearance in the books, which has caused some to take issue with the casting even if they were pleased with the final decision.
* Jennifer Lawrence. Director Gary Ross assured the fans that everyone would have the proper hair colors. Lawrence joked about it saying "I wasn't aware that everybody was so upset until after I got my hair dyed, and people were like, 'Oh my gosh, blond hair can turn brown. Wow. It's a miracle!' "
* Jennifer Lawrence leaked online in 2014. The vast majority of public response wasn't directed at her, but the people who shared the photos. It turns out that hacking into a person's online account, stealing their private pics, and posting them online are far more heinous crimes than a grown woman taking sexy pics intended for her partner's eyes only.
* Jennifer Lawrence was also criticized for refusing to lose a ton of weight to portray Katniss as on the brink of starvation, to which she responded that she refuses to starve herself for a role.
* Jennifer Lawrence, who was the slightly more believable age of twenty-eight.
* Jennifer Lien, who played Kes, was credited as a regular for the first three seasons of
* Jennifer Lopez "37 times growing up", but: "I never wanted to be that wimpy Maria... I wanted to be Anita, who danced her way to the top."
* Jennifer Lopez etc. She's far more likely to do comedy than drama these days.
* Jennifer Lopez expecting to do her own singing. And since the film was so close to the real Selena's death, they felt audiences would prefer to hear Selena's real voice while Jennifer just lip-synched.
* Jennifer Lopez) features several younger, fit men in just bathing suits - most of whom are wearing the standard speedo-style swim briefs.
* Jennifer Lopez had four #1 singles, but her most memorable songs, "Jenny from the Block" and "On the Floor", both peaked at #3.
* Jennifer Lopez is a sort of open letter to the eponymous singer, asking if she ever gets upset about the fact that her music soundtracks so many mens broken hearts and sexual frustration in (presumably gay) bars around the world every Friday night.
* Jennifer Lopez. The song was intended to reinforce her street cred as a working-class Puerto Rican girl made good, but it backfired, instead painting an image of Lopez as having lost touch with her roots and, in the process, becoming this trope.
* Jennifer Lopez While the album and lead single "Love Don't Cost a Thing" started off strong, her follow up singles, "Play" and "I'm Real," both underperformed. It was only after her now-famous remix of "I'm Real" with Ja Rule that things got back on track.

* Jennifer Love Hewitt, "And Then There was Shawn", as Jennifer Love Fefferman.
* Jennifer Love Hewitt are for you (she and most of the rest of the cast get on down in Hawaii there).
* Jennifer Love Hewitt) plays the girl in the video. However, she was actually the celebrity the song was written about - and was dating one of the members.

* Jennifer Morgan, Travis Morgan's daughter and the sorceress supreme of Skartaris in
* Jennifer Morrison. As she still had some filming left to do, she wore hairpieces for the remaining episodes.
* Jennifer Morrison (Dr. Cameron) and Jesse Spenser (Dr. Chase) dated in real life before their characters got together on
* Jennifer Morrison, she dyed her hair brown. When her agent later sent Bryan Singer tapes of her with blonde hair, he apparently said "Wow, this girl's great. We should test her against Jennifer."
* Jennifer Morrison - she was annoyed at how often she had to touch up her roots and saw it as a good opportunity to go back blonde.
* Jennifer Nettles was the Top Country Album for two weeks, despite its lead single barely making Top 40 and its second single not even coming close.
* Jennifer Roberson's Tiger and Del series primarily focuses on the desert south (Tiger's homeland) and the frozen north (Del's homeland), but this seems to be a single continent rather than the whole world.
* Jennifer Saunders both characters needed expanding, so it's still possible.
* Jennifer Saunders reacting the way most people would to the very concept, until she tried some to prove her point. While still trying to cling to her outrage, the worst she could describe it as was "unusual", and she claimed she now "had" to finish it. The slogan was "Chocolate Philly? Don't be silly!"
* Jennifer Saunders was on the dole before getting into comedy, often staying in bed all day.
* Jennifer's Body, and seems to be really into it before she breaks it off.
* Jennifer's Body but after Jennifer gets possessed by a man-eating succubus, her affection for Needy morphs into homicidal possessiveness and Needy is forced to kill her to prevent her from causing more deaths.
* Jennifer's Body focusing on the actress's sex appeal rather than the feminist satire - it was actually quite profitable; its budget was only $16 million and it grossed $31 million worldwide.
* Jennifer's Body has a few, justified due to the title character being a demonically-possessed quasi-succubus. Near the end, she gets speared through, and this is all she has to say:
* Jennifer's Body—specifically, possessed by a carnivorous succubus.
* Jennifer's Body playing a demon-possessed cheerleader who seduces her male classmates, then eats them.
* Jennifer's Body plays the man who picks Needy up near the end in his car.
* Jennifer's Body (Queer female main character, implied queer female supporting character, LGBT youth)
* Jennifer's Body routinely devours her lovers as a consequence of being possessed by a succubus.
* Jennifer's Body says she played her as a closeted lesbian, while she's bisexual herself.
* Jennifer's Body: The film starts with Needy in a prison psych ward, and most of the film consists of her showing us how she got to that point.
* Jennifer's Body: These possess non-virgins sacrificed in Satanic rituals, and give their hosts superhuman abilities in exchange for feeding roughly once a month. If that feeding isn't met, they fade away and cause their hosts to wither. They can be killed via a blade to the heart, and those who survive their bites can inherit their abilities.
* Jennifer Scales is named Evangelos, which means "Messenger of Light".
* Jennifer Sisko, who is found dead by her husband Ben in the first few minutes of

the series. Notably, her mirror universe counterpart is still alive
* Jennifer Slept Here starred Ann Jillian as the title character, an old movie actress who had been run over by an ice cream truck and haunts her former home as a ghost.
* Jennifer Stigile, a voice actress in our world, here wins the first season of
* Jennifer the Jerk Is Missing: Eight-year-old rich girl Jennifer, nicknamed Jennifer-the-Jerk by her classmates, kidnapped for ransom, along with the driver paid to take her to camp. Jennifer's busy making her captors' lives miserable with her brattiness and is so bratty, she acts like a bitch to her rescuers, one of whom says he prefers her tied and gagged.
* Jennifer the Jerk Is Missing has a group of kidnappers who can't stand their 8-year-old charge, even when she's tied to a chair, due to her constant complaining and mocking.
* Jennifer the Jerk Is Missing starts out this way, as Malcolm needs her babysitter, Amy, to believe that he did indeed witness a kidnapping. They then try to prove it to the adults, which doesn't work.
* Jennifer Tilly. In fact, this is a subgenre, as many actors are at least passable in poker (notably Gabe Kaplan, Dick Van Patten (whose son Vince calls the World Poker Tour), Mimi Rogers, and Lou Diamond Phillips, just to name a few).
* Jennifer Walters, aka She-Hulk likes to participate in these, though it's never come up in the series.
* Jennifer Walters daughter who hates him because of her mother's obsession with him.
* Jennifer Walters is badly wounded in an explosion, which requires Bruce Banner to give her a transfusion of his irradiated blood to save her life, thus turning her into
* Jennifer Walters's super strength in her Hulk form is proportional to how strong her base human form is. During an issue where she was preparing to fight The Champion in a boxing match, she spent months training in her regular Jennifer Walters form, and by the end of it was several magnitudes more powerful in her hulk form than she had been.
* Jennifer Walters that the Hulk's personalities are a result of multiple personality disorder and were not caused by his powers happens to explain away why she doesn't have the same problems the Hulk has. Of course, she did have some issues at first (but more roid rage-ish than "HULK SMASH"). As she became more used to the transformation, her lack of inhibitions shifted themselves from wanting to break stuff to just having fun.
* Jennifer Warnes before she settled on Warnes in the '70s), she was one of a select few female musical performers who kept her glasses on while performing, rendering them a trademark.
* Jennifer Warnes before temporarily billing herself as simply "Jennifer" for a couple of years.
* Jennifer Wilbanks that wound up costing in the tens of thousands of dollars. When she finally was found and she explained how she ran because of the pressure, people weren't too happy with her and she was forced to do many hours of community service (though this also had to do with her initial claim that she was kidnapped by a Hispanic man after she resurfaced).
* Jennings about a Chinese stamp-collector. The punchline is "Philately will get you nowhere".
* Jennings at Large has gathered a sizable menagerie. When it seems like the caretaker may be about to discover her secret, Jennings decides he has to help out. Since her flat is directly above his aunt's, they try lowering the animals via the window. Unfortunately, the local gossips are visiting his aunt, and happen to stumble on the hedgehog....
* Jennings books more or less run on Zany Schemes, usually initiated and largely performed by Jennings himself in order to avoid getting told off by a teacher. Sometimes the schemes are pulled off without a hitch, sometimes they work but in a different way than intended, or end up not mattering because of some outside circumstances that nobody could have predicted, and sometimes they fail

spectacularly.
* Jennings plot involves a visit by a school inspector. Various of the pupils, having got the wrong end of the stick, believe that the visitor is a gas inspector or a ticket inspector.
* Jennings.) The first rehearsal begins with the murderer reading out his first line: "Creeping on stealthily. I wonder if I will meet that old miser today."
* "Jenny Again", by Tunng. The titular Jenny is the equivalent of the example's Alice: the listener is put into the position of Bob, and the singer is in the position of Chris.
* Jenny Agutter to showrunner Heidi Thomas; she knew that the "salt test" diagnosing babies with cystic fibrosis was developed in 1958, due to having relatives with the condition herself, and suggested that Dr. Turner would learn about this medical breakthrough.
* Jenny, Brad, Sheldon and Tucker all spy on Nora Wakeman during her dates in "Mama Drama", though Nora isn't really trying to keep her romantic life secret.
* Jenny Calendar describes herself as a "Technopagan". Notable scenes include forming a pentagram of witches entirely over the Internet. They don't have to get anywhere close to the subject, and can still communicate.
* Jenny Casey trilogy. Master Warrant Officer Jenny Casey is a Canadian ex-soldier who has cybernetic replacements for an arm and an eye that she lost during combat. Jenny's former commander, who was responsible for replacing her limbs, contacts her to bring her into a secret government corporate project in which she is uniquely qualified to participate.

* Jenny Everywhere, Jenny meets a fortuneteller who somehow has five World cards.
* Jenny Everywhere stories, Jenny Nowhere has a one-sided crush on her archenemy Everywhere and is principally motivated by trying to get Jenny to reciprocate (in extremely convoluted, destructive ways).
* Jenny gets a pair of daggers — "Twilight" and "Dusk" — that enable her to turn invisible.
* Jenny gets one when her mother learns that she's seriously contemplating having sex with her boyfriend.
* Jenny Jones — a man was brought in to meet his secret admirer on the air, which was another man. The guy murdered his admirer shortly afterwards. For what it's worth, her show's ratings spiked for quite some time after the news broke.
* Jenny Kurtz's show counterpart Sheri Holland is shown to feel genuine remorse for her actions -
* Jenny Lewis specifically called this one an "anti-anti-smoking song". Make of that what you will.
* Jenny Lou Carson's "Jealous Heart", which is about a woman who drives her boyfriend because she can't control her jealousy and says the memory of him will haunt her for years.
* Jenny Matrix's mother Mary is both completely absent and a controlling
* Jenny Nicholson: A critic who presents humorous takes on modern media.
* Jenny Nicholson for its psychic invariably describing having trouble breathing on the basis it's a generic manifestation (linked to her overall vague and muddled readings), and listing the myriad deaths that could result in this phenomenon all the way up to "being dead and therefore no longer able to breathe, as in, all ghosts".
* Jenny Olson, serves as the Straight Man. Larfleeze is still the Wise Guy with his continued desire to hoard anything of value, even immaterial things like views, comments, likes and subscriptions for the podcast.
* Jenny's ability to dismember herself and all that is never fully delineated.
* Jenny's bobbed hair for "Love Doesn't Have To Hurt" and the first half of the

* Jenny Schecter. Mia Kirshner however would have none of that took the woman aside and explained, she (like the woman) was here to have fun, and she worked to make money. Jenny was a fictional character, and it was fine it she wanted her to die. It was not okay to want Mia herself to die, because that was hurtful. The woman was taken aback.
* Jenny's Number to a song about a woman named Jenny, who had this number.
* Jenny Sparks: The Secret History of The Authority, young Jack Hawksmoor repeatedly ends up in a troubled fetal position after getting repeatedly kidnapped and operated on by aliens.
* Jenny's Wedding (Lesbian main character, lesbian supporting character, queer female romance)
* Jenny talks like this all the time. And yes, her classmates and teachers think there is something terribly wrong with her because of it.
* Jenny tells about the narrator having a girlfriend named Jenny who apparently lead a double life where she killed a girl and got sent to prison, blaming the narrator who still loves her regardless.
* Jenny Wakeman, since he only told her about the dating website as a means of rigging it to date her.
* Jenny was born on July 16, 1945, the date of the Trinity Test when the United States successfully tested an atomic bomb in the New Mexico desert.
* Jenny was made for another time and another place. She never fit in here.”
* Jenny Wily hates Doc Robot in large part for killing her father in cold blood
* Jenon has an unfortunate tendency towards this. Early into the story, there's a scene where protagonist Garlot and his childhood friend Siskier have a heart-to-heart while waiting for their enemies to walk into their trap—and right when Siskier has finished giving Garlot some
* Jenos is a Support champion who was specifically designed to be geared more towards damage. He's fast, wields a machine gun, can immobilize enemies, has a simple use-and-forget healing ability, and has an Ultimate that fires a singular, high-damage beam that penetrates all terrain in the targeted direction.
* Jenova cells are also responsible for the enhanced combat abilities of many of the Tsviets and Deepground fighters in
* Jenova crashed on the Planet some thousands of years ago. It saw/caused the extinction of an entire sentient race. It's implied life cycle is similar to Lavos from
* Jenova. If the dead facial expression and missing arms and feet weren't a tip-off, she's wired into
* Jenova's motives and nature can actually be summed up pretty easily: It's an infectious agent, not really a life form, that lands on a host planet and subverts it in order to reproduce and spread. In the real world we've got something that behaves in almost the exact same manner: a
* Jensen Ackles and had a tendency even before Dean to get typecast as badasses with daddy issues. He also usually takes the lead in public appearances with his costars- who are friends of his in real life -by mutual agreement, but accounts of him when he's not with friends describe him as somewhat quiet and on the shy side. He's admitted in interviews later in the show's run, after more than a decade spent as Dean, that he's caught himself thinking "what would Dean do here", or otherwise drawing on the character to be a little more outgoing himself.
* Jensen Ackles (Dean) directed the episodes "Weekend at Bobby's", "The Girl Next Door", "Heartache", "Soul Survivor", "The Bad Seed", and "Atomic Monsters".
* Jensen Ackles found out about fanfiction due to Kim Manners giving them printed copies of Wincest stories early in the show's life.
* Jensen Ackles, his character Jason Teague was killed in the former's cliffhanger meteor shower that occurred during the fourth season finale and fifth season premiere. Some broadcast versions actually have him dying offscreen.
* Jensen Ackles turn down the offer. Ackles would eventually go on to portray Jason Teague in the fourth season of the series.
* Jensen Ackles' unborn daughter, Justice Jay (shortened to "JJ" by her parents) was nicknamed Princess Ackles for a time.

* Jensen acted alongside his then-rumored girlfriend Tania Saulnier in the episode
* Jensen, a member of the Chorus New Republic in Seasons 12 & 13, is a skilled mechanic, but a terrifying driver. Lopez has described her driving as "a cross between a young teen and an old lady. Who is also blind." In Season 13, she manages to
* Jensen's irrational fear of sunspots comes from a time in her youth where there was a large maintenance well near the edge of town, and the rushing water in it made her terrified of it one day flooding the place (which also happened to be located near a dam).
* Jens Lekman sings "Nina I can't be your boyfriend/So you can stay with your girlfriend" in "Postcard to Nina"; she wants to spare the feelings of her Catholic father.
* Jens Pulver started fighting in 1999, was the UFC's first-ever lightweight championship, and, for eight years, was the only person who ever defeated BJ Penn at lightweight. However, when UFC really hit the mainstream Pulver's suspect chin and defensive grappling were used against him multiple times, culminating in a two-year, six-fight losing streak. Unfortunately, most modern fans only remember the tail end of his career, which has consisted of him getting punched out or submitted.
* Jenufa. Depends on the production, on the tenor who sings Laca, and on your interpretation. To put it short, the heroine, after all sorts of suffering, finds true love – with the man who has previously scarred her for life in a fit of jealous rage, effectively frightening off all suitors except himself. He says he has repented and admits that by disfiguring the girl he caused many of the subsequent tragic events of the opera. If his remorse (and Jenufa's forgiveness) are convincing, then it's classic bittersweet. If not, it's this trope.
* Jenufa, Grandmother Buryja completely ignored her step-grandson Laca when he was a child and reached to her for comfort after he was orphaned. He grows up a bitter and violent man, and she is very angry that he doesn't treat her as family. They both get better by the end of the opera, however.
* Jenufa has Kostelnička thinking of her daughter's plight, and then:
* Jenufa, quite the contrary, because Števa is a selfish irresponsible jerk and drunkard. He abandons Jenufa on the same day anyway, so it never comes to the challenge.
* Jenufa to become a kind and compassionate man, and Jenufa does marry him in the end, but Kostelnicka's relationship with her stepdaughter is ruined, perhaps forever (the author of the play the opera was based on later wrote a novelisation where they reconcile, but after several years).
* Jen visits a friend (Sarah Peters) at Rob's old school to dig up dirt on him, and later arranges a meeting between Becky and Rob's ex-girlfriend Amanda who he stalked and abused.
* Jeoffrecourt and Beausejour, in north-eastern France. Actually a subversion: they are not empty abandoned towns but full-scale sceneries built for training purpose inside
* Jeong Jeong became a recluse after seeing what the Fire Nation had become.
* Jeong-Jeong (who deserted from the Fire Nation army when he realized just how much harm it was causing) also has scars across his eye.

* Jeopardy!, and that he has brought shame and humiliation on his family name for generations to come.
* Jeopardy!, as of 2014, has experienced a shift in its metagame, due to the work of Arthur Chu. Arthur has perfected a way of playing the game that involves hunting for the Daily Doubles by clearing out the bottom three rows (the ones which are usually the hardest and where the Daily Doubles usually are). When he does find them, he always attempts to answer them even if he doesn't know the answer to block

other contestants from answering that Daily Double.
* Jeopardy!: Averted until Season 31. Until then, the show allowed players who finished tied to keep their winnings and play again on the following game. However, the producers circumvented this after four occurrences in Fall 2014: now, all ties are decided with a tiebreaker clue. The winner comes back on the next show with their winnings, while the loser goes home with $2,000. This situation first occurred on March 1, 2018.
* Jeopardy! by offering the full winnings only to the winner, to create more of an incentive to compete. The losing contestants initially got parting gifts, but starting in the early 2000s, second and third place respectively won a flat $2,000 and $1,000.
* Jeopardy champion and general living braintrust Ken Jennings said that he was one of these growing up. He also went on to say that he still was, and firmly believes that being like this is a very admirable trait. He says that you should find the answer to any question that shows up in your head whether it's "How does photosynthesis work?" or "How does the water get in a toilet bowl?" He says knowledge is power, arm yourself.
* Jeopardy! champions who win at least five games in a row earn a bid to a future Tournament of Champions.
* Jeopardy!: Colby Burnett answers a clue about cheese. Alex: "also a Colby cheese!" Colby: "Never heard that before, Alex!"
* Jeopardy! contestant can stay on as long as he or she keeps winning, and keep all money earned. The very next year, a certain young man named Ken Jennings took full advantage of this rule.
* Jeopardy! criticized the show for seemingly getting easier over time, particularly in the early 2000s. While it's very much subjective in this case, the purported "easiness" may just be the result of learning more material by watching the show for an extended period of time.
* Jeopardy! died of pancreatic cancer in November 2020. Executive producer Mike Richards paid tribute to him on the first episode aired after his death, and every posthumous episode featured a tribute to him after the credits. The very last Trebek show, aired January 2021, ended with a montage of him through the years, set to the song “Once Before I Go”.
* Jeopardy! had "MythBusters" as a category. Adam and Jamie appeared in pre-recorded clips to give each answer.
* Jeopardy!. He's the only player to appear at every "all-time" tournament: "Super Jeopardy!", "Tenth Anniversary Tournament" (which he won), "Million Dollar Masters", "Ultimate Tournament Of Champions", and "Battle Of The Decades".
* Jeopardy!: If there is a tie after Final Jeopardy!, a single tiebreaker clue is played. The first player to buzz in with the correct response wins. If no one answers correctly, additional tiebreakers are used until someone does.
* Jeopardy! ("I'm picking the reluctant Machiavellian houseplant"), they're judged by a referee (always named "John-Bob", regardless of gender) who penalizes them for infractions of the arcane rules, and the winner is the first to say "Kamoulox".
* Jeopardy! inhale helium before delivering the clue "Type of gas I just inhaled that makes me talk like this."
* "Jeopardy!" Intelligence Test: A character's knowledge, or lack thereof, is exposited to a viewer by showing them calling out answers while watching a televised game show.
* Jeopardy! is the fact that contestants almost always pick clues top-to-bottom, even in situations where it would be advisable to do otherwise. For instance, if it's late in the round and you're behind, it might be wise to go to the higher-valued clues first, especially if a Daily Double (which are rarely in the top two boxes) hasn't yet been uncovered.
* Jeopardy! it almost four years later. It was cancelled again after five months before being uncancelled again in 1984 where it has been running in syndication ever since.
* Jeopardy!. It got to the point where her audience couldn't tell whether her April Fools induction of the show was authentic or if she was kidding.

* Jeopardy. Its "knowledge" was all self-contained (i.e. it couldn't look up answers it didn't know on the internet) and it was only provided with raw data, not the links between the data (think Wikipedia without intrawiki links) and had to figure those out itself. The only major concession made for gameplay was it was provided the answers as a raw text input at the same time the contestants could read the clue on the screens (so it didn't do the speech-to-text or character recognition from the screens). Amusingly enough though, it did mechanically push the same buzzer the contestants used.
* Jeopardy! makes frequent use of the Clue Crew to deliver video clues in pertinent categories. One use that fit this trope was when Clue Crew member Sarah Whitcomb Foss had her real-life pregnancy worked into a video category on pregnancy that aired on September 18, 2013.
* Jeopardy!" — Goal: Make the game easy enough for the celebrities to win.
* Jeopardy (not to be confused with the US game show) gave viewers the opportunity to vote on the ending of the final episode from a choice of "happy", "sad" or "spooky". The spooky ending was chosen with the other two options appearing on the CBBC website for several years before disappearing.
* Jeopardy! occasionally has a category of song lyrics, which are read in regular speaking fashion by Alex Trebek or Johnny Gilbert. It's harder than you'd think.
* Jeopardy! of the clues were re-recorded in post due to Alex having a cold at the time of taping that left him sounding very rough. A disclaimer was added at the start of episode indicating as such.
* Jeopardy! originally used boxes, but has since switched to risers, so that shorter contestants may see over the podiums and to make all contestants roughly the same height to make pan shots easier to manage.
* Jeopardy!: Referred to in the very first clue on the current (1984) incarnation of the show. The $100 clue in the category "Animals," the contestant, Greg, correctly replied "What are rats?" for the answer, "These rodents first got to America by stowing away on ships."
* Jeopardy! regularly uses "Crossword Clues [letter]" as a category, where each clue is phrased as a crossword puzzle clue, and all five responses begin with the same letter.
* Jeopardy!'s 2008 Teen Tournament had two contestants named Rachel. One of the two went by "Steve" during the entire tournament to avoid confusion.
* Jeopardy!. Sweden would be an exception to that, where a version of "Jeopardy" was a big hit for many years.
* Jeopardy!. The former has outlived its original host-announcer pairing of Art Fleming (d. 1995) and Don Pardo (d. 2014), as well as its second host, Alex Trebek (d. 2020); and the latter has outlived two of its announcers: Jack Clark (d. 1988) and Charlie O'Donnell (d. 2010).
* Jeopardy!: The game itself was not necessarily the point of criticism; all versions of the home-game adaptation – and there were several – are playable. But critics often point at these as faults:
* Jeopardy!, the German-accented host reads off the answers to which the contestants must ask the appropriate questions. For each wrong question a contestant asks, a beautiful young woman is given an electric shock, to which the host responds with obvious glee, with remarks like "Exquisite!".
* Jeopardy! (The light bars above the contestants' podiums, and that annoying music they play during Final Jeopardy)
* "Jeopardy!" Thinking Music, and a short-lived revival in 1978 performing poorly, resulting in the show's hibernation until the next decade).
* Jeopardy! Tournament of Champions, as the contestants Austin Rogers, Alan Lin, and Buzzy Cohen are being introduced, they collectively strike this pose, leading host Alex Trebek to call them "a bunch of monkeys."
* Jeopardy! tournaments in the 2006–07 season had the two-day final with one person down 25K+ dollars, then coming back to win on day two of the final. The first teen tournament showed David Waler beating the runaway victor of day one Ben Schenkel, and the second tournament had Meryl Federman come from third place to beat the day one victor Greg Peterson.

* Jeopardy! were originally supposed to air on Christmas Eve and Christmas Day, respectively, but that entire week's shows aired two weeks later, yet those two episodes still make mentions of Christmas.
* Jeopardy!, where the commercials are entirely controlled by the local TV station. One local station in Georgia has run the same ad for a local state college twice during the same break, and the same ad for a doctor's office three times during another. (It used to be car dealership ads, before car sales tanked...)
* Jeopardy! (which he did from 1956 to 1965), and you'll get people born within the last thirty years ask "You mean Bob Barker wasn't the first host?"
* Jeopardy!: While there were numerous close games through the years, one of the best "down to the last play" games came in the midst of Ken Jennings' incredible 74-game run in 2004. The game where he became champion was decided on Final Jeopardy! (he had the lead and bet liberally). On his 49th day, he had a mere $5,000 ($19,700 to $14,800) lead over the second place contestant and had to have the right answer (his opponent was incorrect) to win, which he did. Another of his games saw one of his opponents wager everything on a Daily Double late in Double Jeopardy! and guess correctly, and that opponent briefly took the lead before Jennings reclaimed the lead just before the end of the round; with Jennings leading by less than $2,000, both he and his opponent engaged in a truly dramatic Final Jeopardy! ... with Jennings winning. Finally, Jennings last game saw him hold a slim lead over the woman that finally beat him (thanks to Jennings giving a wrong answer).
* Jeopardy! will often transition from the opening title card to the studio using a wipe that's themed after the title card.
* Jeor Mormont's old pet raven can also speak a few words, which often seem ominously prophetic.
* Jepardy (CBBC) had three different endings that viewers selected via phone-in, choosing from a "spooky", "happy" or "surprising" ending. The "spooky" ending, which won the first time the series was aired, left the characters' fate unclear; when the series was repeated, the vote was run again, and this time the "happy" ending (which was effectively the same as the "spooky" ending but with the final twist removed) won. The "surprising" ending was never aired.
* Jeph Jacques ending, left a lot of dangling plot threads and unanswered questions about the characters and setting.
* Jeph Jacques intentionally left it ambiguous as to whether or not transwoman Claire has had reassignment surgery or not, and has no plans to clarify.
* Jeph Jaques act like each others' sitcom arch nemesis in guest comics and on their own comics' homepages, but are friends in real life.
* Jeph Loeb (after the protagonists' early colours). The Yellow also refers to cowardice, as Daredevil is The Man Without Fear; Gray refers to the Hulk's status as a wildcard straddling the line between good and evil.
* Jeph Loeb series and the "Hush" arc of Batman (putting characters in with no explanation).
* Jeph Loeb Supergirl. His argument was that Linda's origin was far too confusing and tenuously-tied to the Superman mythos to make sense to casual fans, which is hard to argue. After all, "Kara Zor-El is Superman's teenage cousin who survived the destruction of Krypton while in stasis" is a far more coherent origin story than "Linda Danvers is a teenage Earth-born Angel of fire who merged with a protoplasmic creature from another dimension to become the new Supergirl".
* Jeph Loeb) until that was taken away from him and handed to Marvel Studios.
* Jephthah recklessly makes an oath to sacrifice whatever comes out of the house to greet him when he returns from battle. This turns out to be his daughter, and Jephthah chooses to stand by his (poorly thought out) oath and sacrifices his daughter rather than admit his mistake and bear the consequences of breaking the oath by himself.
* Jeppson's Malört has been described as tasting like "pencil shavings and heartbreak" and "a burnt condom filled with gasoline".
* Jerad and Amanda Miller, before going down in a prolonged shootout with the police. Jerad was gunned down, while Amanda killed herself. They originally planned

to continue on to a courthouse but never made it that far.
* Jerak the Quasit Imp and his Succubus and Balor pals (Winnie and Grull) of
* Jerec explains was a barely-trained youngling when it all went down.
* Jered likes to deceive and trick his opponents, while attacking them with throwing daggers.
* Jeremiah, but he doesn't). Interestingly, this was the only time Monique Kavelaars ever acted, while Ingrid does so full-time.
* Jeremiah, cast regular Ingrid Kavelaars' character Erin has a twin sister named Lauren, played by... her real-life twin sister Monique Kavelaars.
* Jeremiah Clarke. Making matters worse for him, it was long incorrectly attributed to Henry Purcell.
* Jeremiah. Crops up a few times. In an early episode, the characters briefly talk about how 'farming' is starting up again 'down south'. Not mechanized and industrial farming surely. Nor would such farms be of any use to Jeremiah or his friends as there is no transportation system, or systems of any kind period to transport food in any event. In the second season, Jeremiah meets a man whose life ambition is to be a 'baker'. Needless to say, any bakeries he came across equipment would all be electrically powered (no grid,) rusted, and seized, and it's never discussed where the wheat (flour,) yeast, clean water, sugar, salt, etc. would come from to supply his would-be bakery. Even worse, there is no formal 'economy' of any kind, besides barter and salvage, in the town he lives in—no money and everyone is still more or less permanently hungry. If he did manage to overcome the (many) logistical hurdles, his fellow townspeople would likely simply rob him of all his food and not feel bad about it later. The second season did mention the revival of regional trade routes, as well as law and order on the community level.
* Jeremiah Cross lead him to build Baroque Works entirely around his leadership. There was no structure in place to run the organization should he be taken out of the picture.
* Jeremiah Curtain was said to speak over seventy languages at the time of his death. He certainly collected a lot of fairy tales in the original languages.
* Jeremiah: Elizabeth is mixed race. Actress Kandyse McClure who played her is of Cape Coloured descent (a South African ethnic group with Black, White and Malay ancestry).
* Jeremiah Gottwald pulled this one twice. Technically the second time was just the completed version. He awakened prematurely the first time, and his cybernetic upgrades were not yet finished.
* Jeremiah had many Native American forming nation-states in post-apocalyptic America, who conducted raids on mostly-Caucasian settlements for slaves and resources.
* Jeremiah -"I travel light"). Long story short, they all wander off except Mr. Smith—then the next morning, they are throwing a baseball around, and Mr. Smith appears and catches it—with his theretofore broken arm, saying sadly, "You guys shoulda stayed..."
* Jeremiah: Jeremiah has come to believe God is cruel and uncaring after the hardships he's been through.
* Jeremiah Johnson and Del Gue are taken by surprise by some Christianized Flathead Indians, Jeremiah offers them some horses just to be polite and guarantee his safe release. Unfortunately, the Flatheads have a gift economy and are bound by tradition to respond to any gift with an even greater gift. The Flathead chief compels Jeremiah to marry his daughter.
* Jeremiah Johnson dual-wields a pair of percussion hunting rifles to thwart an ambush.
* Jeremiah. Theo also sheltered and groomed a bunch of nerds from her school to be this on a small-scale, such as by making a working generator.
* Jeremiah, the titular character was based in an underground military facility, from which he ventured out into the post-apocalyptic world.
* Jeremiah Valeska all have moments of this, and sometimes get annoyed at their minions for not quite understanding them.
* Jeremiah Valeska, at the age of twenty-one, has already been a highly successful

engineer for at least four years, is an expert at making extremely difficult-to-disarm explosives, and is a formidable enough
* Jeremiah Valeska, Jerome's twin, was able to convince their mother that Jerome tried to kill him, according to Jerome. It may have helped that Jeremiah seemed to be genuinely convinced that he wanted to kill him when they were children. As an adult, he is able to convince a young
* Jeremie Belpois. He is interrupted before he gets close to raising it to his lips.
* Jeremy & Sandy (Season 19) finish in second, but don't get much screen time until one of the late legs.
* Jeremy Bamber murdered his parents, his schizophrenic sister (who he then attempted to frame), and her twin six-year-old sons
* Jeremy Bentham, the father of utilitarianism, was dissected after he died, and his skeleton was outfitted with a wax head and stuffed into his clothes filled out with hay. The 'body' is kept in public display at the University College London. It has been brought out to meetings of the College Council on at least two occasions, where Bentham was listed as being "present, but not voting."
* Jeremy Bentham, the founder of Utilitarianism, never used one short word when he could use a dozen long ones. Here's his attempt to sum up the philosophy in one sentence:
* Jeremy Brett and Edward Hardwicke are prime examples: Hardwicke, who played Watson from "The Empty House" onward, would try to help Brett while he was battling bipolar disorder.
* Jeremy Brett. Apparently the producers felt that his voice was too mature for Freddy.
* Jeremy Clarkson about the BBC's legally-required neutrality. Clarkson himself was pretty neutral on the strikes. Of course, everyone latched onto the joke acting as if, for once, he were being serious.
* Jeremy Clarkson describes his attempts to reduce the pain of consuming
* Jeremy Clarkson: If you're a 17 year old boy and need car insurance, slice your penis off.
* Jeremy Clarkson once did this without even driving — he lost control of a car he was pushing and sent it into a small shed. No lasting harm was done, though Richard Hammond may have sprained something laughing.
* Jeremy Clarkson relates an anecdote about serving on a jury where he remembers two notable characters: The first was a snobbish
* Jeremy Clarkson to American comedian Rich Hall (he's done some comedy singing before) before they showed the video of Hall driving the lap: "You can drive a stick shift car?" Rich Hall: "I can now"
* Jeremy dates two girls in one season, both of whom die shortly after they commit to each other. In the next season, another girl dies shortly after it's revealed that she has a crush on him. The curse seemingly breaks when he dates Bonnie, another main character, but then it gets
* Jeremy decides to point out that Zuma (a member of the Posse) says all her sentences like questions. When Zuma gets offended, Jeremy claims he was just making an observation, causing Zuma (off-panel) to respond "Why don't you just observe
* Jeremy does this in "Hosanna's Way" after he spends a short time in jail.
* Jeremy frequently makes fun of old photos of his parents dressed in fashions from the 60s and 70s.
* Jeremy Gilbert. His three love interests have been Matt's older sister Vicki, his older sister Elena's best friend Bonnie, and Anna, a vampire who is hundreds of years old.
* Jeremy Hardy Speaks to the Nation episode "How to be a Good Citizen," Jeremy calls Gordon Kennedy "the most famous Scottish person in Wilsden." (Wilsden is in West Yorkshire.)
* Jeremy Hardy Speaks to the Nation episode "How to Speak", Paul Basset-Davies explains that dogs can understand our tone of voice, and from this can learn simple words like "Sit" "Roll over" and "What's that, Skippy? Flipper's fallen down the old mineshaft?"

* Jeremy Hardy Speaks to the Nation have titles starting "How to...", describing the topic from which Jeremy will be digressing this week. The shortest is "How to Die", the longest is "How to be Better Theologically, Socially, Nationally and in Terms of One's Own Personal Development, Responsibility and Interaction with the Fellow Humans with Whom We Share this Fragile Planet, and Ting" (usually referred to as "How to be Better").
* Jeremy has said that he frequently does movies only to pay for his castle. He also did
* Jeremy Heath-Smith, the chief executive of Core Design, was very open about what motivates him to keep assembling new teams for yet another
* Jeremy himself fell victim to this, when he discovered that the lorry he purchased for the Burma Special lacked a synchromesh.
* Jeremy Hotz has a tendency to laugh after he delivers the punchline to his jokes, although it comes off as more of a nervous chuckle. This combined with covering his face contributes to his neurotic persona.
* Jeremy Hotz's routine about his diesel-powered Chevette with a trailer hitch:
* Jeremy Inman is also known mostly for only one role; in his case, it is Android 16, although he's voiced many other supporting roles in the series and in other shows.
* Jeremy Irons almost two decades earlier was dubbed into French, along with that of the Italian who played Odette, because neither of them spoke the language well enough.
* Jeremy Irons film commented he was chewing so much scenery they had to rebuild the sets twice.
* Jeremy Irons role, Irons replied: "Are you kidding? I'd just bought a castle, I had to pay for it somehow!"
* Jeremy is a master of this. In one instance, he stays up all night working on a playlist to listen to while writing a huge paper that's due the next day; he plans to start actually writing at dawn.
* Jeremy is like this with many people—except his girlfriend, Candace, who worries about the fact that he hasn't given her an
* Jeremy Jahns uses color to distinguish his videos. Red background? A review. Pretty much anything else has a blue background.
* Jeremy James books, Timothy wins all the games at his own birthday party, until the last one. During the final game of musical statues, Jeremy James thwarts him by pulling the rug under Timothy's feet, making him wobble.
* Jeremy Johnson initially had no purpose other than being a bright spot in Candace's life, but later episodes develop him a bit more. He's shown to have his own life and friends, is savvy to Candace's freakouts, and got some interaction with other characters like
* Jeremy killing Greg by Make It Look Like an Accident to try to keep Vivi as his girlfriend.
* Jeremy Lloyd had a stint working in the menswear department at Simpson's of Piccadilly, a now-defunct
* Jeremy Messersmith. Not quite a straight example, as the singer's lover has already moved to a different state, and he is contemplating going to meet her there rather then stopping her from leaving in the first place.
* Jeremy Metzger, Batu's human husband and the father of their kids, repeatedly tries to be a good father to both of his kids but regrets how his attention can't be on both of them at the same time. He first spends a lot of time trying to comfort and support Eli due to his mother's neglect, which becomes more complicated after Eli displays his powers and
* Jeremy Paxman, a journalist famous for his tenacious and often confrontational interviewing style, once said that when interviewing politicians the question he always had in the back of his mind was "why is this lying bastard lying to me?"
* Jeremy Paxman. Explaining how Johnson tended to pat him on the arm repeatedly in interviews, he proceeded to miss the hostess' upper arm and immediately apologize.
* Jeremy Renner A jumpy censor started bleeping out as soon as they heard the word "shitty" and cut to the audience so you couldn't read his lips, so that with the

seven-second delay the version that played on broadcast was, "Kathryn Bigelow is a great director who likes to film..." which incidentally made it seem like he said something far, far worse.
* Jeremy Renner and deciding that he desperately wanted to play a superhero.
* Jeremy Renner and recorded folk music in his early 20s under his real name Jimmy Moskowitz.
* Jeremy Renner's character goes home on leave and is grocery shopping with his wife.
* Jeremy's dance in "Nerdy Dancin'", when Ferb (who's secretly controlling Jeremy through a remote-control exoskeleton) starts swatting at a bee.
* Jeremy Shada auditioned for the role of Keith before he was cast as Lance.
* Jeremy's head has popped off his body and went about its own way as a part of many visual gags in
* Jeremy's older brother Chad was initially depicted as a gleaming, near God-like figure with a square jaw whose full face is never seen. In later appearances, he is shown in full and more or less resembles Jeremy but taller and with a goatee (though that last was acknowledged in a strip where Jeremy questions Chad on why he grew the beard).
* Jeremy Stephens, in an attempt to make himself seem like a threat towards then reigning UFC champion Conor McGregor, ended up confusing the notorious one as to who he even was supposed to be in a moment that has become quite legendary in the company's history:
* Jeremy takes some extreme measures to avoid parental embarrassment, to the point where when his father was still driving him to school Jeremy got out to walk the rest of the way
* Jeremy Thatcher, Dragon Hatcher: The title character buys a dragon's egg from the magic shop, which he then finds out he has to hatch. (Actually, the egg chose him. Dragons apparently have the power to attract their own prenatal egg-sitters.)
* Jeremy Torres would go out of his way to befriend and help others in the game, often to the detriment of himself with promises being made that he struggles to keep and providing a hefty amount of heartache as his friends die around him.
* Jeremy was in love with Vicki, who was dating Tyler at the time, then Anna, and finally Bonnie, his sister's best friend.
* Jeremy works at Mr. Slushy Burger, which requires him to wear a goofy little pink hat with a hot dog on it. Candace has gone through more than one mall job requiring a dopey outfit and/or hat. A particularly memorable one being a Perry outfit in "Toy to the World".
* Jeremy X, a Torch Minister of War, is an ex-genetic slave often described as a lovechild between
* Jericho (2006), after the attacks they gained the status of military police.
* Jericho (2006) - Almost everybody has an interesting history that gets at least a little attention, from what Jake was doing for two years to the relationship between Johnston and Gail (turns out she was 'the other woman').
* Jericho (2006): Ashley Scott. Sometimes she tries to cover this up by holding her hands over her blank face. With mixed success - many times this has simply ended up looking like she's sniffing her fingers, not a major improvement.
* Jericho (2006), feel a lot better on DVD, leading some to be frustrated at the end of the series. Watching one episode after another commercial-free makes the story feel much tighter.
* Jericho (2006): Following the nuclear explosions and collapse of society, many of the locals (led by the ex-mayor and his family) form a group of volunteers called the Jericho Rangers to serve as protectors for the town and enforce the laws within it.
* Jericho (2006); going on the title alone you'd have no idea it took place in the United States, let alone Kansas.
* Jericho (2006) had this happen on occasion, presumably to save on cost. This got strange when Mary, owner of the local bar who did not appear to have a hired maid or waiter, would not show up in her own bar when the episode's focus characters showed up.

* Jericho (2006), in a rare in-universe example. U.S. Marines come to help rebuild and resupply the town. A former Army Ranger notices details that are wrong; one calls an NCO 'sir', they say 'hooah' (Army) rather than 'oorah' (Marines). They are simply civilians wearing uniforms and using the town's resources.
* Jericho (2006) Iran and North Korea are mentioned as being outright destroyed in the exchange of nuclear weapons. Then again, it's not like America escaped unharmed, as the premise of the show is about scraping together a post-apocalyptic society in a small midwestern town that was far enough from major cities to survive.
* Jericho (2006), it is noted that precious metals and jewelry have become less than worthless after the nuclear attack. Not only has basic survival taken priority, but gold picks up radiation easily, making much of it actively hazardous to handle.
* Jericho (2006) managed to get a second season after fans sent crates full of nuts to the producers, in reference to Jake Green's "Nuts!" reply to the New Bern attackers' demand to surrender. Unfortunately, the ratings went down even further post-renewal and it didn't last very long, but did reach a conclusion of sorts.
* Jericho (2006). Oddly enough, however, their pairing became the only major romance of focus throughout most of season one and all of season two pummeling the hell out of the pretty much forgotten (by the writers) Heather/Jake/Emily triangle, which from a story-telling standpoint, should've been the romance arc of focus.
* Jericho (2006), one episode has Bonnie fighting off a bunch of Ravenwood goons with a shotgun. We see most of the gun battle, but when Goetz walks into the house, perspective cuts to Mimi, who is in the storage closet, slowly bleeding from a gunshot wound. We hear three shots: one from Goetz's gun, which we see go through the wall a strike a shelf; one from Bonnie's shotgun; and another from Goetz, which doesn't hit the wall. Cue Mimi's stunned look as she realizes that Goetz had the last shot. We don't find out that Bonnie is dead until the very end of that episode, and we never actually see her get shot.
* Jericho (2006), some soldiers vote to rebel against the new "Allied States of America" and rip off their flag patches. It was snarkily noted in some quarters that the patches came off so easily they appeared to have been velcroed on.
* Jericho (2006)'s track record with satellites is... schizophrenic. On the one hand, you get reasonable-looking still photos from satellites. On the other, you get Hawkins' satellite feeds... which appear to be filmed right at ground level.
* Jericho (2006), the bar's TV picks up a few seconds of a news report from Asia. The reporter stands beside a Big Board map of a nuke-battered United States, which offers both the townsfolk and the viewers a first glimpse of which cities have been destroyed.
* Jericho (2006): The fictional company Ravenwood (a loose allusion to Blackwater), who is supposed to be full of ex SEALs and other Special Ops guys, gets their ass handed to them by guys with no military experience, including a deaf mute girl with a shotgun.
* Jericho (2006) this is what the Ravenwood mercenaries do to a town they invade. They take all the supplies and shoot anyone who opposes them. Since the towns are isolated from the outside world, they do not have to worry about anyone coming to help the townpeople. The people of Jericho try to preempt this by blowing the bridge into town themselves before Ravenwood crosses it.
* Jericho (2006) throughout the series, and likely the reason why so many people look to him for safety.
* Jericho (2006), where over a dozen major U.S. cities are bombed with nuclear weapons, leaving only small towns and two major cities standing.
* Jericho, a PSA at the cinema is warning the public to "breathe through your nose" because of the smog. Later while searching for the murderer of that particular episode, Jericho's car has to be navigated through the smog by a detective standing on the fender, wearing a gas mask and waving a torch.
* Jericho did it again on Raw in September 2010 (which happened to be the same time his DVD came out), listing all the wrestlers he beaten over the years, starting out with

* Jericho is full of teenagers crassly making out, indifferent to the portrayals of death and heroism on the screen, as part of the series' general deconstruction of 1950's British society.
* Jericho Iteration, written in 1994 and set in 2013: St. Louis has not been destroyed by a massive earthquake and Cascadia, a nation consisting of Washington and Oregon, has not seceded from the Union.
* Jericho (MLP) around the western borderlands of Equestria. It gets lampshaded.
* Jericho (MLP) contains a particularly weird example, in that the puns are in German. The entire 41st chapter is dedicated to a pun-tastic monologue the narrator gives.
* Jericho Moon lures groups of greedy Jebusites to the ruins of his birthplace with fake treasure maps, then watches from the shadows as the rival groups kill each other over non-existent buried wealth. Then he personally kills the survivors in vengeance for how Jebusi failed to help his people against the Hebiru.
* Jericho Moon, she only wants them because they're made of perfectly-ordinary iron ... which is the next big thing in technology and will soon be worth a fortune.
* Jericho of the DCU had the power to take over someone's body, but if the target is conscious, they retain the ability to speak, which means they often start yelping about how they suddenly have lost control of their voluntary motor functions.
* Jericho Squad are just as high-class as the members of any similar, non-magical military squad would be.
* J. Eric Smith After incorporating the more subjective metric of "overrated=musical quality/critical praise", he cuts to the chase with naming the most overrated record:
* Jeri Hogarth sees Jeri resort to her old tricks: her response to being conned by Inez and Shane is to buy a gun from Turk Barrett and manipulate Inez into murdering Shane. And she blackmails Chao and Benowitz into giving her a larger buyout offer.
* Jerin himself has been told about the "paths of pleasure" by his grandfather and could explain a thing or two to Cullen, but as everyone expects him to remain chaste until marriage, he can't tell
* Jerin Whistler after his father's death and handled it well. They start crying and are inconsolable when they hear he's going to leave and get married, and he distracts them by recruiting them to help make pound cake and maple ice cream. He's also good with the young princesses, not letting them walk all over him but still befriending and teaching them. His skill with children is considered a major plus for him as prospective husband material by his future wives.
* Jeri". Wendy begins slicing at Jeri, but only makes it to 30 cuts when Pam comes in and fatally strikes Wendy over the head. Pam gets arrested and breaks up with Jeri, now seeing what type of person she truly is.
* Jerkass about the word "finely," purposely misinterpreting it as "finally."
* Jerkass: A character is so contemptible and unpleasant that this will garner him a lot of hatred from other characters.
* Jerkass: A lot of heels (and some of the nastier faces) can be this.
* Jerkass and Chopper needs to remember that humans can still be complete monsters.
* jerkass and he's actually a really good guy. He doesn't join the team till volume 18, and his importance to the team only being hyped up during his first two matches. Afterward, we rarely even get to see his kicks and his role in the story significantly decreases... until the final match of the Christmas Ball that is, where he performs his first real 60-yard kick and seals the victory for the Devil Bats.
* Jerkass and lovin' every minute of it, this wasn't a huge problem. (At present, Sinestro's ring and others like it no longer suffer this drawback, instead drawing power from their own power source like the Lanterns'.)
* Jerkass and nearly got Pierce arrested simply for choosing to help an agent over a member of Alpha Team.
* Jerkass and no longer their buddy - even though he's shown to be quite laid back, and is only doing the job he was assigned. Radar is so troubled by this that at the end of the episode he asks to be demoted back to Corporal.

* jerkass and then reveals himself to really be a boy when he pulls up his dress. Bebel crossdresses because he wants to get into travesty acting like his dad.
* Jerkass and whose wife plainly resented him. Did Lee do the math? Nope. Said best friend also murdered him.
* Jerkass: A rude, mean, and unpleasant person. Although most of them aren't actually evil, most villains are jerks to some degree.
* Jerkass at pretty much anything he tries). He also seems to be a pretty savvy guy, both tactically (being one of the first to realize Daein's true intentions during their first ambush) and in general life-situations, as shown in his conversations with Gatrie. No wonder he looks down on many people around him.
* Jerkass at the end when SpongeBob proves to be the better jellyfisher.
* jerkass attitude toward the writers and cast members. He has made cameos in a few episodes, but hasn't hosted since Season 22 (1996-97).
* Jerkass at Your Discretion: I'm only being mean now because we're all alone, loser!
* Jerkass Ball: I'm normally a nice guy, but I can be a jerk at times.
* Jerkass Ball. When Callum is in a coma because of his use of dark magic, Rayla spends two episodes being angry at him for doing so even though he did it to save her life. To be fair, however, she still gives him doting care and throws in a gentle word of encouragement every now and again. Subverted when she begins to understand how serious Callum's fever dream, or dark magic coma, is after Callum begins having trouble breathing.
* Jerkass Bellamy reassures them it must be a mistake. But then, Luffy is heard outside calling him out (because Bellamy and his crew had beat up some friends of his earlier) with a tone of incipient ass-kicking. Cue mass Spit Take as the tavern goes into a panic again.
* Jerkass businessman cuts the line for a taxi, only to get cut in half by a steel cable from a passing truck that gets caught in the taxi's trunk lid.
* Jerkass, but Doc eventually realizes that this makes him an excellent paramedic since he can look at a situation objectively.
* Jerkass, but it's unclear whether she could be considered actually evil. The answer would depend on whether or not she deliberately drove the puppets insane or whether things simply got out of her control. So far, there's been no definitive answer either way.
* Jerkass classmates, particularly if said classmate is picking on one of Beltane's friends. Has the power of controlling ectoplasm, so can perform spectacular tricks.
* Jerkass Coca-Cola commercial played occasionally at Carmike Cinemas.
* Jerkass, coincidentally enough, becoming prominent around the same time in the show's run), that this adjective came to denote a jerkish character.
* Jerkass Dissonance: The idiot fans love me for being a jerk! After all, it's fictional, so stop getting your panties in a bunch!
* Jerkass Dissonance: The reason why the words "badass" and "jerkass" sometimes appear nigh interchangeable, even on this very wiki.
* Jerkasses as often as not, worshipping them is not always the best idea).
* Jerkasses Leonard asks how they should apologize, Sheldon suggests "Zack, I'm sorry you're stupid. Have a Milk Dud".
* Jerkasses oral report which left the teacher and the entire class in tears.
* jerkasses or Jerkass Straw Vulcans. While they may be said to be overly pragmatic (they do believe in the importance of the Genii people and society over individuals, to rather harsh, but somewhat justified means and ends), they aren't paragons of wisdom, nor are ever said to be logical.
* jerkasses, treating everyone beneath them with contempt and mockery, particularly the shorter Irkens. In fact, the Irkens are a race of Neidermyers.
* jerkasses. When the trio decide to summon a demon at a sleepover and discuss what they'd do with them, Trainee says she'd just ask the demon to be friends and hang out with her. (When the demon they summon winds up being Xaphan, the two unsurprisingly hit it off pretty well, and Xaphan's ecastatic the first time Trainee calls her "friend.")
* jerkass fiancé Hahn is last seen being thrown into the Arctic ocean by

Admiral Zhao after a hilariously failed attempt to assassinate him. It's unclear if he survived.
* Jerkass Genie smirks) and really, really cool! She turns him into a packet of Tim-Tams. Which then get eaten by his girlfriend.
* Jerkass gets pulled down into the toilet butt-first by the spectral shark. When his body is found, all four of his obviously-broken limbs are sticking up from the toilet alongside his head.
* Jerkass, gives Germaine a second chance at life with a reset button, basically telling her that he thinks she can do a lot better than how she is right now and can change her life.
* Jerkass Gods, and sometimes called out by the mortals (such as Gilgamesh), though doing so was a very bad idea.
* Jerkass Gods: Arrogant deities who look down on mortals or cruelly abuse them.
* Jerkass Gods believe in for similar (or, in some cases, identical) actions.
* Jerkass Gods to him; the closest he ever gets is when he thinks about how releasing Hope from Pandora's Pithos would stop the war and bloodshed Kronos was causing.
* Jerkass Gods who act as uncaring pricks towards the mortal beings they rule over.
* Jerkass Gods: Worship me, you weak, pitiful mortal, or I'll smite you!
* Jerkass, has a Drapion, a Nidoking, and a Magmortar that knows Smog.
* Jerkass Has a Point: A jerk actually makes a valid point even if the way they made their observation wasn't very nice or tactful.
* Jerkass Has a Point, if they're heroically aligned, manages to provide valid points.
* Jerkass Has a Point: I'm an asshole, but I'm right about something! If you don't like that, then screw you!
* Jerkass Has a Point when he mocks the concept of competing with Suzie as a prize (see page quote).
* Jerkass Has a Point: While this individual could phrase their assertions in less offensive ways, said assertions are actually accurate.
* Jerkass he belittles Zuko at every opportunity, saying Zuko has no chance of catching the Avatar before him due to Zhao's resources, while Zuko is just a banished prince. Zuko rebuttles that he will be allowed to return home when he captures the Avatar, to which Zhao points out if the Fire Lord wanted Zuko back he would have allowed him to return. The more the show goes on the more it's made clear that Zhao was right, even before Azula was sent to arrest Zuko.
* Jerkass. He's a Dating example, as well as a minor Control example, since the only reason Rie invited him and Momoko was because Runa asked her to.
* Jerkass initially inspired by the way he saw singers for local nu-metal bands carry themselves on stage. He did some interviews as himself where he'd acknowledge Robby Roadsteamer as a character, but for the most part, he would never appear publicly as himself. The character eventually got retired because he was concerned that if he kept it up too long he'd be pigeonholed - nowadays he makes music as himself rather than the character. It's since been joked that Robby Roadsteamer still exists, he just hasn't been heard from in years because he and his band left the Boston music scene for Western Massachusetts.
* jerkass in moments when in reality it would take much longer even if the guy had a heart attack almost immediately. Finally, the python has no problem getting human shoulders down its throat. A real python would need a few moments to unhinge and stretch out its jaw, and then would probably need some time to properly position a meal that wide. Assuming a snake that size (about 16 feet) could get its head over an adult male's shoulders in the first place; even most potentially man-eating snakes (over 20 feet) will have trouble consuming a large person and take hours to do so. Yes, there were time constraints, but still. At least the python seems to still have been working on its meal when the poor thing got sucked out the window.
* Jerkass in order to go back to being in comedy TV but everyone mistakes his awfulness for humility, clever artistic commentary, and bravery.
* Jerkass in the anime, but mainly to the extent of being snide and condescending toward Miho (for example, in the finals, saying that Oarai must be weak if she

became its commander). In the manga, between the semifinals and the finals, Erika flies over to Oarai, confronts Miho, and angrily accuses her of not just costing them the victory, but abandoning them in their time of crisis, and vaguely insinuates that Miho traded her vice-captaincy of her old school for captaincy of her of her new school. She's significantly more vicious and angry in that scene from the manga, and leaves Miho in tears at the end of it
* Jerkass is deeply conflicted by his own messiah role and increasingly uncomfortable with his followers and fanbase, particularly because he doubts that anything he's done will even make an impact.
* Jerkass: It's what this index is all about! Are you too much of a dumbass to read the goddamn index description above?!
* Jerkass knowing that he had protection from on high. When Hurley was presumed dead in the plane crash, karma hit Randy square in the ass.
* Jerkass lines and extremely sympathetic lines (you can hear them all in the audio listing). While some lines are callous, especially regarding Ellis or Rochelle's deaths, in others his rather simple lines are delivered with heart-felt grief or compassion (even for Ellis). Especially true for Coach's deaths, some of which sound like Nick is utterly crushed by the loss of the heart of the team.
* Jerkass, loves what he calls "Chinese crap", i.e. random things from every East Asian culture put together with no awareness of what they are.
* Jerkass) man will go to prison, but if he does testify, he'll be confessing that he was truant from school at the time in question.
* Jerkass, Marge appeared to be more and more of a doormat, forgiving him over and over again, not only for stupid accidents and acts of ignorance, but huge acts of genuine deceit. While Bart and Lisa weren't willing to put up with it in many cases, Marge overlooked almost everything he did.
* Jerkass mechanic, the van smashes her against a wall, which crushes her in half.
* Jerkass medical school?!" Another scene has him saying, "If I wanted a nurse's opinion, I'd. . .actually, I don't know what I'd do, because that's never happened. Throughout his time on the show, it's obvious he holds little regard for anyone who not only isn't in the medical profession, but isn't a surgeon like himself.
* Jerkass minor antagonist Colonel Calloway is already hesitant about the snack he's been offered due to its moldy flavor — discovering he's eating fungus fudge with toadstool tea just pushes him over the edge into true disgust.
* jerkass misanthropes who can't stand each other...and it's made abundantly clear that they'd never be happy with anyone else.
* Jerkass nature, such as lusting after Belle despite clearly knowing she isn't into him or trying to blackmail her into marrying him by threatening to send her father Maurice to an asylum, they still love him.
* Jerkass; no, it's just an excuse to degrade and insult the 'uninformed masses'.
* Jerkass, noting that colonels are the worst, since "they can practically taste those stars.")
* Jerkass of Hell and informed the damned that they were all trapped in there with him.
* jerkass older siblings also have great magical power, without the control issues. But as a result, they all have come to see the idea of training to improve one's skill as a sign of weakness.
* Jerkass on his face, who takes pleasure in curbstomping outmatched opponents.
* Jerkass Orange Protestant who hated Francophones and Catholics-a very bad thing for a country where Francophones and Catholics were a very large minority. Hughes badly alienated many of those Francophones and Catholics, making them less willing to enlist in the Canadian Forces, further inflaming already-high linguistic tensions when World War I broke out.
* Jerkass outright, is far more acerbic and has a history of unscrupulous moments.
* Jerkass Peter; she still seems to be established as the caring and intelligent housewife of the family, though depending on the gag, can switch between nurturing and loving her kids endlessly or being as abusive and neglectful to them as Peter.
* jerkass. Phoebe's friend Helga, who wasn't initially enthusiastic about meeting him, ends up thinking he's really cool, and she and Matthews talk for hours while

Phoebe sits with them looking bored.
* Jerkass practice of "negging." The idea is to shake the confidence of the negee (usually a woman one wants to pursue sex and/or a relationship with) enough to get her to seek his validation and approval. This can also be done with advertising: play on the potential consumer's insecurities (about their looks or status or whatever else)... and imply that your product will make everything better.
* Jerkass prince and his knights but is protected by the disfigured anti-knight Sandor Clegane and the drunken fool Dontos Hollard.
* Jerkass Realization: A character realizes to their shame that they have been a jerk.
* Jerkass Realization for Vegeta. Since Gohan could still have beaten Cell before then, and since Trunks could still be revived by the Dragon Balls, it falls under this, with the other Z Fighters flat-out calling Vegeta an idiot.
* Jerkass Realization: You realize how much of a jerk you were, now you become wiser.
* Jerkass reporter Damien is taught an "ancient greeting" by Japanese journalists which actually means "Go have sex with a hedgehog". After their initial shock, the Japanese executives he greets find it a lot more funny than he does. Henry repeats this situation with a Russian dignitary, introducing himself as a pregnant cabbage. On another occasion, Damien pretends that a tearful witness in Nagorno-Karabakh is talking about how his family were shot by drunken soldiers. Unfortunately, the cleaning lady is from that region and reveals he's actually thanking Damien for giving him money so he can visit Elvis Presley's home in Memphis.
* Jerkass, resolving his conflict to the benefit of all; Brian, on the other hand, turns bureaucratic (albeit with a helping of regret) when confronted with conflict.
* Jerkass: Screw politeness or respect, because you're just an idiot who's wasting my precious time!
* jerkass's face... in mid-sentence... and the sentence was "well, I stole your face".
* Jerkass, she's treated as being exceedingly attractive to the point most of the surgical team have crushes on her even though she treats them like dirt.
* Jerkass, sleazy and emotionally and physically abused Jonathan as a child. He wasn’t any better towards Will and their mother Joyce, having cheated on the latter at least once during their marriage.
* jerkass so it's understandable why Gao treated his battle with Mr. Don with equal parts spite and excitement.
* Jerkass so that he can have Kendall to himself, Kendall ultimately says the same thing at the episode's end.
* Jerkass stepfather, "Smelly" Gabe Ugliano. Percy's mother Sally only married him because Gabe's "mortal stench" helped hide Percy from monsters. Gabe proceeded to abuse Percy and Sally, and to squander the family's money on gambling and booze, until Sally got sweet, sweet revenge at the end of the first book.
* Jerkass that says she isn't the titular mother (who is the only woman Ted marries).
* Jerkass that Will can't stand. Grace immediately annuls the marriage and it's implied the guy will probably be sent back to Canada soon afterwards.
* Jerkass: The character's main purpose is to be an asshole to the other characters.
* Jerkass they weren't going to be good at challenges or would just get overshadowed by awesome, so they tried to up their weakness so they would assume they're nothing.
* Jerkass. This backfires on him hard as she starts to abuse him and eventually breaks up with him in "Splatty Tomato".
* Jerkass to everyone and his family since he considers himself as a beautiful person. At the end of the episode, he crashes his car and gets tossed out, rolls down a hill, falls off a cliff, hits a cactus and a plane on the way down, and then finally crashes into a seemingly randomly placed lard factory. He eats the lard around him to get out. As he's recovering in the hospital, he's shown to gain back all the weight he dropped.

* Jerkass to everypony except RD, because she cares only about being cool. RD also wants to be cool, but is so appalled at Gilda's behavior (which includes making Fluttershy cry) that she tell her to "go find some new cool friends someplace else."
* Jerkass to One for them, and gets the brunt of the bully's negative traits. In other cases, the bully will target one character more than they do with others.
* Jerkass to One: (The cruel to one variety) I'm kinder to everyone except you.
* Jerkass to the local kids and tending to chores in her dim, stuffy home. If your character marries her, she moves in with you as a farmer's wife, alleviating the problem and giving Penny her own space to flourish.
* Jerkass to think he could get away with it. Par for the course, that doesn't end well for him.
* Jerkass toy store without explanation. At his parent's house he has several medals from the war—some of which are only awarded posthumously.
* Jerkass. Turns on the heroes. Trys to ram the Kurogane, which as mentioned before, has a drill on the front; not his brightest moment.
* Jerkass. Unfortunately, he went too overboard with his act and we just hated him instead. Apollo went into the game without a strategy and made little effort to garner the viewers attention. By week two, he wound up with the least votes next to Ashley and was a team captain.
* Jerkass until they got into a fight over a Poke Ball, and they eventually mended their friendship at the Johto conference.
* Jerkass when he learns that Akeem is a prince, with Cleo urging Lisa to make it work with him, and screaming in Darryl's face that Lisa doesn't want him).
* Jerkass while she is using such magic. In one scene, while using a powerful barrier spell to stop a demon, she tells the woman she is protecting to stop whining. After the demon leaves, she apologizes.
* jerkass who complains loudly about anything and everything and was seen making racial slurs toward the priest in one episode. But unlike his predecessor Frank Burns, he's actually a very competent (if slow) surgeon, with cardiac expertise the others lack.
* Jerkass who delights in humiliating SpongeBob, only to have his ass handed to him when SpongeBob unexpectedly attracts the elusive King Jellyfish.
* Jerkass who did morally questionable things in the name of "justice". He does grow out of it.
* Jerkass who disowned his daughter after she eloped with a Sacean nomad, but he changed his mind after he learned he was a grandfather and sought to meet his daughter's family on better terms.
* Jerkass who especially hates Davan and Mike and ignores prayers to Him in lieu of watching shit happen to them.
* jerkass who got off a murder charge after turning the court case onto Togusa using excessive force for being 'prejudiced towards cyborgs'. The episode ends with a secretary on night shift watching a news report of both the man and his attorney had died in a hit-and-run car crash, while Boma enters from the car deck, informing her she needs to arrange the disposal of a damaged car.
* Jerkass who has no respect for anybody, including his teammates, is violent even off-court and he loves to ruin his opponent's play.
* jerkass, who nevertheless received superpowers and thus is invited to join the group. He does at least try to help stop events from spiraling out of control.
* Jerkass who tries to cheat on her. This was to make way for the Ross/Rachel relationship.
* Jerkass who tries to convince people not to have fun with countless pamphlets and rants, and occasionally replaces foods with healthier substitutes.
* jerkass who wants his own way and resents having the threat of the Elements of Harmony held over his head while the ponies try to "reform" him more or less against his will — but who may also be at least somewhat redeemable after all.
* Jerkass who was both a sensitive intellectual and a military genius.
* Jerkass who wouldn't let the poor new guy in. It's bad enough companies have had

to make not making the person behind you use their own card a termination-level offense.
* Jerkass William F. Drink finally sees the mass chaos for himself and realizes he should have listened to his son all those years ago about the chemical byproduct that trapped the ghosts in their graves and drove them insane.
* Jerkass Woobie: A mean character whom some fans see as deserving sympathy for undergoing misfortune that seems unfair in spite of the bad things they did.
* Jerkass Woobie: Despite their bad behavior, we still end up feeling sorry for a jerk or villain because of all the bad things they've been through.
* Jerkass Woobie, if the "Woobie" part is used to automatically excuse the 'Jerkass' part no matter how out of proportion (or unrelated) the one is to the other.
* Jerkass Woobie: When audiences feel that the person may have been a jerk, but what they suffered was still undeserved.
* Jerkass would have been very satisfying if his corpse hadn't turned up in such a horrible, trauma-inducing way.
* jerk at best). They have a mean streak that tends toward the sadistic; they may delight in hurting others, whether emotionally or physically, and often have little patience for anyone who disagrees with them. Also, keep in mind that sometimes, any sympathetic character does act like a jerk at some point, such as when a normal Woobie gets pushed too far, but this does not necessarily make them into this trope.
* Jerk City, although it reflects more on the players' puerile sense of humour than anything else.
* Jerkcity HD characters, but soon you'll notice a lot of the contributors like to draw Spigot the beatnik (the only obviously human character in the main cast) very attractive.
* Jerkcity, in the process pointing out that he can't do anything because he is fictional.
* Jerkcity, though a creator behind the comic has said that the comic is actually a satire of this kind of humour.
* Jerkcity use slightly modified versions of dialogue already published in earlier strips.
* Jerk In Sheep's Clothing”. When asked why he cannot accept romantic feelings for Marinette, Adrien explains that he is waiting for another girl (Ladybug), and does not wish to be “unfaithful” to her, even though she has already refused his feelings. Nino and Kagami pick apart his logic, stating that waiting for a girl who has already rejected him to one day magically change her mind makes him look sad and pathetic.
* Jerk In Sheep's Clothing, and giving her reasons to doubt them and their loyalty, all so Marinette will sever ties with her friends and devote herself entirely to Henri.
* Jerk In Sheep's Clothing, and that he is the good, loyal Betty and Adrien is the handsome but fickle Veronica.
* Jerk In Sheep's Clothing OC Henri LeRoi, who plans to turn her against him and all her friends.
* Jerk In Sheep's Clothing seem like the bullies instead of the other way around, all to get her to cut ties with them and become dependent on him.
* Jerk In Sheep's Clothing who's only trying to lure her into an abusive relationship.
* Jerk Jock a boy), is unable to count to 10, thought steak came from trees, once attempted to shovel water, and believes Paris is in Germany.
* Jerk Jock: A jock immaturely expresses his insecurities by bullying people.
* Jerk Jock and school bully Tony from a supernatural attacker despite a great deal of animosity between them.
* Jerk Jock, and she doesn't spare him any real thought until she finds out that he's Nomad.
* Jerk Jock became less malicious over time and came to support the Glee Club at the end of season 3.

* Jerk Jock: I'm the alpha male of high school! Get out of my way, you wimp, or I'll kick your ass!
* Jerk Jock: I'm the strongest guy of the varsity, it's my prerogative to decide who deserves to exist and who doesn't!
* Jerk Jock in his teenage years, properly maturing only in the last year or two of school. It's implied that Harry's unhappy upbringing has made him a better person in some respects. Dumbledore also comments to Snape he finds Harry's personality much like his mother's, rather than his father's.
* Jerk Jock in love with the other). She doesn't even raise her voice as she kicks them out of her shop, and they go without another word.
* Jerk Jock is revealed to have sexually assaulted young high school girls throughout his four years of high school via writing on a mirror in the girls' room. His horrific raping of protagonist Melinda Sordino is what sets the plot of the book in motion.
* Jerk Jock Jo. Although he's really a military cadet, he has a lot of traits associated with Lovable Jocks - strength, athleticism, loyalty, bravery, and a firm adherence to teamwork and good sportsmanship.
* Jerk Jock. Mike even gets along very well with the nerdier Chris which is rare for this trope.
* Jerk Jock moment, especially since he makes peace with his romantic feelings for Aradia, despite her being the lowest troll on the hemospectrum right before he dies.
* Jerk Jock nature does not fare well against the cynical, harsh world of high school.
* Jerk Jock of the story, physically stronger and more threatening than Morty. He is shown bullying Morty and his friends, especially Harold in Chapter 1 when he corners him in the hallway to verbally abuse and physically intimidate the redhead.
* Jerk Jock on how to make his confession sound like he had shot the jock in self-defense (which the evidence was circumstantial enough to support).
* Jerk Jock on the part in the filmmakers to reflect the cyberbully age.
* Jerk jocks are a type of low-level enemy in the game, though they aren't called that.
* Jerk Jocks being felt up and actually encourages Jesse and Chester to do so (not knowing that the jocks are not far away).
* Jerk Jock since he taunts both Cody Phillips and Jason but he turns out to be a nice guy.
* Jerk Jocks, Kise never became a full jerk and he was always nice to Kuroko.
* Jerk Jock trope even further when he attacked the Morlocks with guns and bombs.
* Jerk Jock. When he bullies a wimpier classmate, the wimp snags his dad's humongous construction 'bot and crushes it like a beer can.
* Jerk Jock with Peter over Liz, causing her to lambaste both of them. Flash mellowed out greatly in later years and supported all Peter’s relationships.
* jerk moments does not hate anybody, and he always gives advice to those in trouble, whether he or she is a student or a teacher. He hates letting people down so much that his bad habit in Guide to: Bad Habits was saying yes to everyone.
* jerk of the week usually gets some kind of public shaming... that occasionally involves getting taped to a flagpole.
* Jer'Kol he is her father, but it turns out he is really an assassin sent to kill her!
* Jerks Are Worsethan Villains: Being a villain is pretty bad, but being a jerk is even worse.
* Jerks Are Worse Than Villains status, while the common bully has no such charm.
* Jerks of All Trades threatening to cancel the trio's short subjects contract and sue them if they tried to sell the series — a stipulation in the contract said that they couldn't perform in a TV series that could compete with their theatrical shorts. As a compromise, Columbia sold a package of 30 shorts to ABC, leading to the first-ever broadcast of Three Stooges shorts on television.
* Jerk Sue perspective, but is actually a horrible person when viewed more objectively.

* Jerks Use Body Spray: (Over)use of body spray is a sign of a guy being a douchebag.
* Jerk-to-Nice-Guy Plot: A plot where a character starts off as a jerk, but events make them nicer.
* Jerk-to-Nice-Guy Plot: A story about how I start off as a jerk but gradually develop into a nice guy.
* Jerk-to-Nice-Guy Plot: A story about when I started off as an asshole until I undergone events that change me into a nice guy.
* Jerk with a Heart of Gold: A character who acts mean and selfish, but they mean well deep down.
* Jerk with a Heart of Gold: A character who acts mean, but occasionally shows that they're not completely heartless and can be very sweet to those they care about..
* Jerk with a Heart of Gold. Also noteworthy was their difference in class status, with him being a prince and she being a servant.
* Jerk with a Heart of Gold: An anti-hero has a nice side beneath their unpleasant front. For the sake of simplicity, this is as close to kind-heartedness as they get, without being exactly polite by default.
* Jerk with a Heart of Gold before returning to the Brotherhood of Mutants.
* Jerk with a Heart of Gold: Cranky or rough exterior shows a kind, helpful side.
* Jerk with a Heart of Gold her, and Mary and Kitty to witness all this and react in the most screwed-up way possible.
* Jerk with a Heart of Gold midsection to no avail. A bad idea, considering that Harry was already more than a little upset about Carlos shoving him down a flight of stairs earlier. Harry flashes Carlos a satisfied grin just before knocking the crap out of him and tossing him out the front door.
* Jerk with a Heart of Gold of making you miserable. She stays sympathetic partially because she at least waits until she's provoked, partially because she does care for her nephew Skippy, and partially because it's a cartoon and even the most ridiculous injury is survivable. Best exemplified in "Frontier Slappy", dealing with someone attempting to cut down her tree.
* Jerk with a Heart of Gold, or otherwise act kindly/heroically outside those moments of offensive speech.
* Jerk with a Heart of Gold personality prevents him from ever really admitting that he loves his mother, but his actions speak volumes to her, as she has always had faith in his inner kindness, and in the end, she was right.
* Jerk with a Heart of Gold "Quickie" had him giving Jon a "tasty treat" which ends up being dog food. Horrified, he asks for an antidote, which turns out to be Tabasco sauce which he then is treated to some water that's from a goldfish tank...and the cycle goes on. Garfield even talks to the audience and proclaims that the whole routine could go on for days!
* Jerk with a Heart of Gold. Sanosuke Sagara, or his father Kamishimoemon?
* Jerk with a Heart of Gold: Some heroes are mean, but have a soft side deep down.
* Jerk with a Heart of Gold: Someone who is capable of being both very rude and kind, sometimes towards the same individuals.
* Jerk with a Heart of Gold, still has a moment when he decides it's enough.
* Jerk with a Heart of Gold: Sure, I'm an asshole, but I can be a nice guy every now and then.
* Jerk with a Heart of Gold: The love interest is nice despite the fact they can be a jerk at times.
* Jerk with a Heart of Gold: There are redeeming qualities of an unapproachable person.
* Jerk with a Heart of Gold version of a WMD to end the conflict for good. His grouchy demeanor hides the scars of having gone through all that pain, but he's able to warm up and let go of his demons.
* JerkWithAHeartOfGold.Video Games Getting long enough to benefit from genre folders
* Jerk with a Heart of Gold. While she does have a commanding voice and shoves Tank to the side, she doesn't want to put the pets through any serious danger and eventually comes around.

* Jerk with a Heart of Gold who pretends not to give a crap, but it's really hard for him to be the object of hate and make the painful money vs. life decisions.
* Jerk with a Heart of Jerk: A mean character appears to do something nice, but their supposed good deed only results in proving that they were a much worse asshole than previously thought.
* Jerk with a Heart of Jerk - If a character is even worse than others assumed.

* Jerky Turkey "Crier" who's sobbing because he he got a 1-A grade on his draft physical, meaning deployment was inevitable.
* Jerlayne, dwarves are a servitor race to their elven parents. A dwarf is born when an elf mates with an elf (an elf mating with an elf will result in a random variety of fantasy beings such as rusalkas). They have bronze-coloured skin and are all homosexual. Finally unlike the standard dwarf, these dwarves do the farming and household grunt work — they don't mine. In fact, they can't use metal items that haven't been processed by a female elf (only female elves can manipulate and detoxify metal items, and they get their metal by having male elves come to our world to scavenge our junk and bag it).
* Jerma985, Benjamin Franklin used a time-travelling machine solely to compete in the Jerma Rumble so that he can beat Jerma's ass.
* Jerma985, both of them were phlogistinator pyros, were originally intended to take down the enemy teleporter at their spawn but then the enemy started to come out. Jerma wanted to hide from the enemy but STAR_ just stayed at the spawn door and using his phlog special crit power and Jerma followed suit. They ended up with a very effect double phlog crit chain spawn camp and Jerma realized what dicks they are for doing such tactics and only felt relief when he got killed.
* Jerma985 did an improvised skit with the game's weird glitch in a clip:
* Jerma985 has him complain about a member of his ship's crew who spends the whole voyage screaming at everyone to "Be brave!", followed by an insult. While he was still editing the video, a patch was released that replaced the dialogue in the sailing sections with something less repetitive. The video ends with a clip showcasing this new dialogue, while Jerma complains he wants the "Be brave!" guy back.
* Jerma985_ managed to kill a sizeable amount of people in the vent using the grenade spam tactics, Jerma gave this trope out.
* Jerma985 of who can make an ugliest character in his 'Saint Rows 2'-Who is Uglier?'\. YMMV on who won.
* Jerma encountered a a morbidly obese lady during 'Judge Jerma'. A lady so obese her neck is essentially non-existent with all the fat in her collarbone and her pot belly needed a wheel attachment to support as she was walking. She even had a 'Oh Yeah' caption printed on the back of the shirt so that Jerma can make his signature 'byeah' joke.
* Jermaine Crawford auditioned for the role of Michael Lee before being cast as Dukie Weems.
* Jermaine Stewart's "We Don't Have to Take Our Clothes Off". The lyrics can be summed up as thus: "Don't move so fast and try to get to the sex right away, it's insulting and unclassy — let's just have fun and enjoy ourselves before we go any further." Interestingly, the POV character who wants to wait is male.

* Jerry Lawler for their behavior—the situation was indeed serious.
* Jerry Lawler is perhaps best known as a long-running commentator on WWF/WWE TV, but has decades of hinterland as an actual in-ring performer behind him and may well have held more titles than any other pro wrestler. He's also a talented artist, and among other things has illustrated books for Mick Foley.
* Jerry Lawler Lawler's place to interrupt a new champion's victory celebration, but The Miz is a frankly pathetic heel who more or less cheated to win his title and most faces would have done the same, there was a point in that Lawler

technically did screw himself out of the win. While yes, Cole did pull him off the ladder and temporarily stop him from winning, Lawler berated and then assaulted Cole on this for at least a full minute. If Lawler had simply given Cole a well-deserved punch in the mouth and gone back to his business, Lawler would have been champion. Although it was still fun to see Michael Cole get beaten down.
* Jerry Lawler. Often there is no Kayfabe explanation for it. The first territory to use fire as a hazard during matches was Puerto Rico, specifically CSP.

* Jerry Maguire, Dorothy is able to eavesdrop on a quiet conversation Jerry is having on an airplane while the engines are running, despite sitting in a completely different section.

* Jerry Maguire starts off with Jerry becoming disillusioned with the way the sports agency operates and he is subsequently fired. He decides to start his own agency and the rest of the movie follows his struggle to keep the business afloat while still maintaining his new principles.
* Jerry Maguire where two characters continuously shout "Show me the money!" probably only exists to make a meme out of the line. It worked, much to the chagrin of one of the actors.
* Jerry Maguire with Dorothy, and Jerry ends up talking more about her son, Ray:
* Jerry Miculek is a combination of the Trick Shot (capable of putting shots onto a target two hundred yards away from a pistol in both conventional and upside-down grips) and the Vaporizer (holds numerous speed-shooting records, including eight shots on-target from a revolver in under one second, and eight shots divided between four targets in 1.07 seconds).
* Jerry Nadeau suffered a traumatic brain injury after striking the turn three wall head-on with a hung throttle at Richmond in 2003. Due in part to the lack of understanding about Nadeau's injury at the time, he ended up with permanent brain damage from the resulting swelling, and given that another head injury would likely kill him, he's certain not to be cleared to race ever again.

* Jerry Pournelle, upheld in that King Alexander leads the final charge of his palace guard vs. the revolutionary Helots. Subverted in that he was a sick old man with an entirely healthy son, who was at that point safely ensconced in the planet's military command center and running the war.
* Jerry proves to be a very good gambler, causing him to receive the interest of a powerful mob family who decides to follow his system. Rick turns Jerry in for gambling fraud, resulting in his hands being cut off, and on the way home, Rick calls Jerry out not only for cheating (which he didn’t) but also for gambling in the first place. However, it turns out that by turning Jerry in, Rick not only received reward money, but all of Jerry’s winnings as well. He'd also already fixed the game.
* Jerry puts on a show of being unaffected by the escape of the leopard he rented and the death of its first victim. However, he wants to help pay for the dead girl's funeral and accompanies the hunting party seeking the leopard. He soon admits that he is torn up with guilt and concern but has always worked to hide such feelings.
* Jerry Sadowitz performer onstage in terms of both performance style and offensive material. Offstage, he is said to be a quiet man who is nowhere near as abrasive as his stage act.
* Jerry's Cousin by Jerry's stronger cousin Muscles and lands inside a vase. When Muscles spits at the vase and it breaks apart, Tom has been contorted to fit its shape, including having his arms bent like the handles.

* Jerry short was also quite dark compared to the others, until the ending.
* Jerry Siegel (1914-1996) and Joe Shuster (1914-1992) had no effect on the fate of the comic book or the wider franchise.
* Jerry Siegel and Joe Shuster are poster-boys for creators' rights movements. They sold the rights early on (for $65, for each of them), but later fought tooth and nail just to get some recognition, and eventually became rallying figures for the wider comics community as they all sought to negotiate higher pay and better conditions. While the situation is far from ideal, it has improved a fair bit thanks to their efforts.
* Jerry Siegel and Joe Shuster created in 1938 one of the most popular and iconic characters ever made:
* Jerry Siegel and Joe Shuster. He was the one who many would argue gave the Dark Knight more of his iconic features than his much more famous and outspoken partner,

Bob Kane. Starting in 2016, DC Comics finally gave Bill Finger his much overdue credit by having his name appear next to Bob Kane's in any new Batman-related media.
* Jerry Siegel and Joe Shuster though Kane got sole credit due to a contract stipulation until 2015 when Finger was finally given co-creator credit on Batman associated media).
* Jerry's mother's reaction to Crazy Joe Davola wanting him dead: "How can anybody not like him?!" His father is not so surprised.
* Jerry Springer. But then again, there's not a lot on all these other shows, either.
* Jerry Springer called Jimmy Hopper. One of the stagehands was a homosexual. When one of the guests refused to be calmed down by a "Dirty faggot", the stagehand jumped up and screamed "I'M NOT DIRTY!" and attacked the guy.
* Jerry Springer didn't win, but he got a lot farther than his dancing talent alone would have carried him. It got to the point that he actually asked his fans to stop voting for him, as he only appeared on the show to learn to dance and was tired of coming back.
* Jerry Springer played himself in the episode "The Post-Modern Prometheus"
* Jerry Springer ran through a long list of guests who were utterly unprepared for the format or public nature of the program, which led to long-running jokes that the show was the "trashiest U.K. talk show".
* Jerry Springer that claims that parents and children, siblings, or cousins are in love likely falls into this trope.
* Jerry Springer. The appearance ends with Kang vaporizing everyone in the audience and killing Jerry himself.
* Jerry Springer: The Opera, Jerry's primary motivation in Hell is to not be "fucked up the ass with barbed wire!"
* Jerry Springer. They are cutting out actual swear words, but most of the time, this is an audience member saying/shouting it, not the hosts or the guests. This can result in bleeping out parts of a sentence the host was saying that were perfectly fine.
* Jerry's Subs and Pizza, a Washington, D.C.-area sub sandwich franchise, during the 2008 election period, had a radio ad asking people to come in and pick their favorite sandwich, one for each of the (then three) major candidates (

* Jersey Devil would qualify, depending on how soon after its birth the creature escapes into the woods.
* Jersey Girl 2004, when Ollie and Gertie gets into a heated argument, Gertie reaches to a point where she says that she wished that Ollie died and not her mother.
* Jersey Girl, and made the film for his own purposes, critics be damned. Not quite as dickish as some have made it out to be, but still this trope.
* Jersey Girl. Before the end credits, a dedication appears to Kevin Smith's father, Donald E. Smith, who died before the film was released.
* Jersey Girl: Gertie comes home while Ollie is trying to be intimate with his friend Maya, so they hide in the shower, and Ollie pretends to be alone in it when Gertie comes in to use the toilet. This, of course, is the one time Gertie remembers on her own to flush, causing Maya to scream in pain and Gertie to catch them red-handed.
* Jersey Girl wasn't for critics. His later attempts to clarify (it was meant for his daughter) didn't help.
* Jersey Jack Pinball was moving towards simpler, low-budget tables. Jack decided the only solution was to start his own company and make the types of games that his buyers wanted.
* Jersey Jack Pinball without it. There's even a "Spin the House" mode to lampshade the point.
* Jersey Shore, The Situation points out that Angelina regularly has sex with various men while denying sex for the man who dates her, gives her gifts, etc. The guys tell her she's a whore for cheating on the guy she's dating and that she should have sex with him because he has done so much for her.
* Jersey Shore to wear their clothes, the show still went strong. This is especially true about Snooki, who is often mocked for her ignorance but still got a book deal.
* Jerusalem, and regales them with stories about meeting honest-to-goodness giants. Arguably deconstructed, as the reckless, daredevil attitude that makes him so entertaining is shown to have a habit of pissing off everybody, even those closest to him.
* Jerusalem Delivered takes place between two knights who end up closer than a sword's length and resort to shield bashing, headbutting and eventually wrestling.
* Jerusalem Delivered: This heroic poem is about the siege of Jerusalem during the First Crusade. Only it takes place two years later, lasts six months, involves non-real heroes on both sides, involves a demonic forest and magic, and distorts the historic figures involved (Bishop Adhemar was not shot in the eye with an arrow but died of illness and Godfrey was not elected king until after the sack of the city).
* Jerusalem, Ginger is mistaken for a woman by the Professor, though this is only because the former has long hair and the latter is a senile and possibly crazy old man. Nobody else has any doubts about Ginger's sex, which makes sense given that Mackensie Crook doesn't look much like a woman at all.
* Jerusalem over a relatively short period of time before the Muslim conquests put an end to that by destroying Persia completely and taking a huge bite out of Byzantium; when they took Jerusalem, they surprised everyone by slaughtering

nobody.
* Jerusalem takes place over the course of a single day. It's still three hours long, mind you.
* Jerusalem. The colony eventually collapsed from internal strife, and a hotel now bears its name.
* Jerusalem who claims to have met the ninety-foot giant who built stonehenge. In the second act, Byron shows the local teens a drum that he claims was the giant's earring, saying that the giant told him to bang on it if ever he needed the help of the giants. In the final moments of the play, when Byron stands alone, bloodied and beaten, his land in the woods about to be invaded by a bulldozer and a dozen local constables, he beats the drum and calls upon the mythological figures of England. At this point, the text of the play says "Blackout", but the original production from the Royal Court Theatre that has since moved to Broadway ends with the rumble of enormous footsteps in the distance.
* Jeryline is the last character left alive to confront the collector in
* Jerzy Skolimowski, a Pole, was cast as the chief KGB officer assigned to keep track of him.
* Jesper Who Herded the Hares" brings the pearls the king demanded. The king doesn't approve of Jesper and starts piling up the tasks.
* Jesper Who Herded the Hares, Jesper's older brothers lie about the pearls they are carrying and find they are transformed into what they claimed them to be; Jesper tells the truth and is given a magic whistle.
* Jesper Who Herded the Hares", the king invented more tasks for Jesper to avoid fulfilling his promise to marry him to his daughter, stopping only when Jesper has some dirt on him.
* Jess actually averts this trope. Yes, he reforms himself but he's still in love with Rory. His final line: "It is what it is. Me. You." is actually them realizing
* Jess and Nick spend the night together before their wedding, despite the common superstition that it's bad luck. Jess's mother walks in on them in bed, and fears they have brought a curse on themselves. Jess is flippant at first, but soon after, slips in the bathroom and scratches her cornea on a dogs toy. She is forced to wear an eyepatch. Her mother discovers eviction notices in her mail, which Jess was unaware of. She begins to believe the curse might be real. Nick's book pitch is rejected, and he begins to believe in the curse as well. Jess's mother gives her marijuana to relax her, but she has to much and becomes noticeably high. To make matters worse, Aly goes into labor, and Russell admits he still loves Jess. Rather than continuing with the wedding at the venue, they all drive to the hospital. Schmidt has a rabbi visit the maternity ward, and Nick and Jess get married in the hospital.
* Jess and Rory. They had a very popular relationship in Season 3 that ended because of issues between the characters,

* Jesse 13 is a miniature version of his father, but has red eyes like his mother.
* Jesse actually tries to quit the business several times, but tends to sink into depression and apathy when he doesn't have drugs (either making them or taking them) to distract him from the guilt of all the things he's done. Jesse also has a memorable scene where his
* Jesse also survives Walt's final barrage of machine-gun fire by being shielded by Walt himself.
* Jesse and Jenny actually played out a platonic version of this, even once being ranked as one of "The Greatest Romances That Never Were". It's been speculated that the racial difference and each being part of their own
* Jesse and M.T. are initially contentious, awkward allies who become such close friends over the course of Book 2
* Jesse and Rebecca, the woman he married while presumed dead and on the run.
* Jesse at one point uses The Word to compel a bad guy, Hoover, to count the grains of sand on a beach... and only offhandedly adds that he can stop once he's reached three million. He's later shown counting carefully... a wave strikes,

messing up the grains... and the guy, anguished, starts over. Ultimately averted, as Hoover
* "Jesse" by Ivri Lider mentions that the singer's crush supposedly has a girlfriend (or at least a crush) elsewhere. Whether he actually does or is just saying so is hard to tell.
* Jesse Cox after a one-two punch of having his character lose a match followed by having his character tempbanned. Jesse is so frustrated that he leaves the computer and goes screaming "I DIDN'T DO ANYTHING!" so loud that it's picked up in Dodger's podcast nearby. For her part, she just finds it funny and talks it over with him as he tries to cool down.
* Jesse Cox and pretending that the game was just a badly-written love story. But by the end of Ada's campaign...
* Jesse Cox's collaboration with Josh "indiestatik" Mattingly, The Greenlight, is designed to do this for indie games currently up for approval to be added to Steam.
* Jesse Custer is imbued with the Word of God, which means he can make anyone follow his commands to the letter. He doesn't always think this through, such as the time when he got rid of a sheriff by telling him "go fuck yourself", which resulted in him
* Jesse Custer, the protagonist, befriends an old German WWII veteran. Initially, it looks like
* Jesse has a similar problem as Walt but is generally less careful with his spending. However, the DEA already knows that he is a low-level drug dealer so him having extra money does not come as much of a surprise to them and they never suspect the scale of his involvement.
* Jesse is a weak link that she can manipulate into helping her and that there's friction between Jesse and Michael that she can exploit. The rest of the episode Jesse slowly manipulates Kendra into telling him what she knows while she thinks she's manipulating him.
* Jesse Jackson announced his withdrawal from activism in 2001, after it became known that he'd had an affair and fathered an illegitimate daughter. Shortly afterwards, he announced that he was returning. Pundit Jonah Goldberg quipped, "One man's 'retirement from public life' is another man's 'long weekend'."
* Jesse Jackson Jr. is arrested for assault on a reporter, discovered to have bipolar disorder, and chooses to check into rehab to get control of it. If not for the reporter withdrawing his charges (because he supposedly had his own pending arrest warrants), things might have gotten even uglier.
* Jesse Jackson was caught on mike whispering, "I wanna cut his nuts off," referring to Barack Obama. Made further hilarious by the jerking motion he made, as though motioning just how he would perform this castration. (Didn't stop him from
* Jesse James by the real-life coward Robert Ford happened in exactly this fashion. Ford himself was killed years later by one Edward O'Kelley, who walked up behind Ford and at least said "Hello Bob" before unloading both barrels of his shotgun. O'Kelley, in turn, was later justifiably (though not related to the murder) shot by police.
* Jesse James Meets Frankenstein's Daughter, Jesse unconvincingly attempts to explain away hank's gunshot wound by saying he shot himself while cleaning his gun.
* Jesse James Meets Frankenstein's Daughter, Lonnie betrays all of the gang, including his brother, to the authorities in order to claim the reward on Jesse.
* Jesse James Meets Frankenstein's Daughter, Maria Frankenstein transplants her grandfather's artificial brain into Hank's body.
* Jesse James Meets Frankenstein's Daughter technique. Her brother Rudolph has the same skills, but is plagued by a pesky conscience.
* Jesse James Meets Frankenstein's Daughter: The muscular Hank is shirtless from the time Maria transplants the artificial brain into his body onwards.
* Jesse James vs. Al Capone: James wields a large Bowie-style knife that can be used for stabbing and throwing.
* Jesse Lee Herndon (better known as SirSTACK) — Herndon Laboratories.
* Jesse Pinkman does not want to kill Gale at all, and when he's got the chance, he spends over a minute pointing the gun at him in tears before finally pulling the

trigger. As opposed to Walter, Jesse never quite gets over it. Like Walt though, Jesse does get comfortable with murder as well, killing 2 more without any sort of
* Jesse plays with this, as it looked like he was around mainly to disrupt the Finn/Rachel pairing.
* Jesse Quick (for her father, Johnny Quick, though Jesse has also taken on her mother's costumed identity as Liberty Belle.)
* Jesse Quick is descended through her superhero mother from the (in-universe) earliest flag-based costumed adventurer Miss Liberty (Bess Lynn) who fought alongside
* Jesse Sorenson had to work backstage at TNA to pay off medical bills that TNA refused to pay for after he suffered a broken neck.
* Jesse's post-Heisenberg life. How will he cope with the resulting psychological trauma from his year in the Aryans' captivity? Will he ever put his life back in order and make an honest living?
* Jesse Stone can't do anything to stop him from raping his ex-wife and openly mocks the restraining orders she's filed against him. Then it's this trope.
* Jesse Stone: Sea Change. Jesse is investigating a bank robbery case with an injured suspect. He asks the veterinarian if people bleed when they are shot. The vet tells him not always. As a 30 year veteran of the LAPD involved in many shootouts, Jesse would know the answer already. A young veterinarian in a small town might not know that. He's asking for the benefit of the audience.
* Jesse Stone was on track to become a professional baseball player until a career-ending injury led him to law enforcement.
* Jesse the Body Ventura, former Navy SEAL, former pro wrestler, first and only member of the Reform Party and governor of Minnesota. Our governor could beat yours.
* Jesse Turner, the antichrist, who has a demon father and a human mother.
* Jesse Ventura), but being elected Governor of Minnesota put him a good deal above his level of competence. His grandstanding and lack of a filter ended up alienating him from the legislature, and his dislike of the media and general lack of a sense of humor about himself didn't earn him many friends in the press, either. Add to this an economy-damaging tax rebate and it's of no real surprise that there was little disappointment when he chose not to run for re-election.
* Jesse Ventura (I-MN): Former professional wrestler turned Reform Party (later Independence Party of Minnesota) Governor of Minnesota from 1999-2003.
* Jesse Ventura on commentary when Cena would take shortcuts depsite being the top face in WWE. Punk would also be met with resistance from the face announcers.
* Jesse Ventura: Retired from competition due to health issues and became a top heel commentator for WWE.
* Jesse Ventura's mantra: "Win if you can, lose if you must; but always cheat."
* Jesse V. Johnson (former stuntman turned director and stunt coordinator)
* Jesse was also tied to a bed by Miss Oatlash for sexual purposes. But she did knock him out first. And
* Jesse Winchester was a dual citizen who headed to Canada when he was drafted. "Mississippi You're On My Mind " is about being homesick.
* "Jesse Younger" by country musician Kris Kristofferson deals with a man named Jessie Younger who is in all but name disowned by his parents over a disagreement over his differing lifestyle and beliefs and as a result his younger brother is treated as if he is his parent's only son.
* Jess Harnell where Cacofonix's singing actors Jean-Jacques Cramier and George Harrison do an amazing rock song, only to be knocked out like always with the villagers declaring him a horrible singer (it is implied at least in that scene that he is a brilliant singer, but way ahead of his time).
* Jessi accused one kid of being racist because the kid didn't want to play.
* Jessica Absalon grew up in poverty and experienced having lived in a ramshackle shanty for most of their life. After they made it big as part of the "Bakla ng Taon" vlogging collective, Jessica earned more than enough from their YouTube revenue to invest in a new house in Cavite, a far cry from the shanty they used to reside in.

* Jessica Alba. As the dye ruined her hair, she wore a wig in the sequel.
* Jessica Alba. She despised the latter - as many scenes were shot behind her back with a body double in a bikini, which led to her spending most of it not wearing very much.
* Jessica Alba using split-screen. She would have been killed by Boots.
* Jessica also has a falling out with Trish in Season 2 as the latter relapses into drug problems and develops a reckless hero complex. In the final episode of the season, Trish
* Jessica Alves, a Brazilian-born TV personality who is famous for their extensive plastic surgeries. She came out as transgender in 2020 after living life as a man, notably 'The Human Ken Doll'.
* Jessica and Emilie. Jessica has the longest hair of the duo and is so much of a tomboy that, when she entered a figure skating contest and some of her rivals said she had no chance for not being feminine, her friends weren't able to say she was.
* Jessica and Jeff Malone, who genuinely believes he can make this arrangement work.
* Jessica and Jonathan are babies and each have one tooth and can sit up on their own, making them anywhere between six months and a year old. They're
* Jessica and Malcolm have a falling out in season 2 after a season of Malcolm getting shit upon and him
* Jessica and Matt, two characters who are the most likely to die first due to how hard it is to keep them alive. If they manage to survive, they wind up meeting each other in the mines as a plot-convenient way to tie up loose ends, since they don't interact with the other characters who presumed they are dead.
* Jessica and tearing through bad guys like they were pieces of paper.
* Jessica and the Crocodile Knight uses confusing jargon whenever he can. When he and Jessica first meet, he describes her as "an immature homo sapiens of the female gender", instead of simply as "a human girl".
* Jessica Arndt was Reese's ex-girlfriend who broke up with him after he rejoined the army after 9/11. She got married but her husband was violently abusive. Desperate, she called Reese and asked him to help in getting away from her husband. Reese wanted to rush to her side but was called away on an important mission where he was betrayed by his superiors and left for dead. When he finally returned to the U.S. he discovered that Jessica died in an apparent car accident. He quickly discovered that she was actually murdered by her husband. Reese got revenge on the husband, but then reached a
* Jessica as a metaphor, in which each attempts to explain that he supports the other one but is not gay himself.
* Jessica attempts to use the connections of her acquaintances when trying to acquire sufentanil that she can use against Kilgrave. She tries to ask Trish if she has connections to any shady doctors who might be willing to slip her some, but Trish says that all the doctors she knows save small African villages and wouldn't be easy to persuade. So she next goes to Jeri Hogarth's ex-wife Wendy, who is a doctor. Wendy is not helpful either, because on top of not giving a damn about Jessica, she works in a clinic and sufentanil is surgical anesthesia. So Jessica just resorts to stealing some from a hospital, using Malcolm as a distraction.
* Jessica Blair and Hannah Cooper are pseudonyms of the English writer Bill Spence. This ended up making the news on various UK newspapers due to the perceived 'odd' situation of an 80-year-old male writer writing romance novels under a female pseudonym.
* Jessica Calvello, in which she plays the show's main character, Kanako Miyame.
* Jessica Capshaw had all had their contracts renewed for season 9, so it was clear that somehow those four at least will be rescued. Though notably it turned out to be an inversion: Eric Dane only appeared in the first two episodes before succumbing to injuries, while Arizona lost her leg but ultimately survived.
* Jessica Christ but when she gets into another fight over a decade later (with the same woman, no less), He strictly forbids Jessica from interfering.
* Jessica Christ God grumbles that He could close that loophole if He wanted to, but agrees to let it stand.

* Jessica Cruz making her debut as the movie's only appearing Green Lantern, and has been described as the lead character of the film.
* Jessica Cruz's non-violent method of beating Kilowog in a sparring match in
* Jessica Darling as she decides to take more risks and not be so afraid of looking silly even when not wearing the costume.
* Jessica Darling as the series continues to follow her after she graduates, and she is astonished when she looks back and realises just how little it all meant.
* Jessica Darling series. They grow closer again towards the end of the first book, but they never quite become the best friends they were growing up. Likewise, Jess and Dori in the prequel series, which also shows how Jess and Bridget drifted apart in the first place. Since a running theme of the books is that people and relationships change over time, this trope is almost a given.
* Jessica Darling's mother is forever dropping unsubtle hints about how Jessica should really take more interest in one guy or another, he's really quite a catch and I think he likes you, and anyway you can't be too choosy or else you'll be alone forever. Jess, needless to say, is not appreciative of her efforts.
* Jessica discovers a nasty side effect of regeneration. She's a virgin when she gets turned, has sex for the first time in her vampire form, and then discovers that her hymen grows back. After each time. Forever.
* Jessica Gawhi posted a twitter post on her wall regarding a visit with her mom.
* Jessica, George, and Maria are sent off, the phone rings, and greets Battler with... "Congratulations."
* Jessica has a crush on both Hyeon and Benedict, unaware that the latter is gay.
* Jessica Hecht was cast in a recurring role as Susan, girlfriend (and eventual wife) of Ross's ex Carol — was turned down for the part of Rachel.
* Jessica Henwick) auditioned for for Rey. They would later eventually go on to play Jessika Pava and Lieutenant Kaydel Ko Connix respectively.
* Jessica Henwick in the Dornish arc and understands the negative reception of the Sand Snakes. Nevertheless, she still enjoys being on the show and working with her castmates. She even owes the show for boosting her career.
* Jessica herself accidentally kills in self-defense Dale Holiday, a corrections officer assigned to guard
* Jessica Hynes. Series 2 explains her suddenly slighter frame and fondness for less clothing in general with the elegant solution of having her spending a few months between series backpacking around Asia.
* Jessica is shocked to see Matt Murdock/Daredevil alive after assuming he died following the Defenders' battle with the Hand.
* Jessica is subjected to a $50 million wrongful death in "Trails and Tribulations", with the
* Jessica Jones (2015): After an extended time under Kilgrave's control, Malcolm Ducasse discusses this trope with Jessica. There is an ironic freedom to being mindcontrolled because you are not responsible for your actions. You don't worry about plans or their consequences, you just fulfil the purpose of the controller.
* Jessica Jones (2015): After being a main character in the first season, Will Simpson gets killed off in the second episode of season 2.
* Jessica Jones (2015): After Jessica finds that Kilgrave has killed Ruben by making him cut his throat in Jessica's bed, she tries to get herself thrown in prison in an attempt to protect the people she cares about. Her 'plan', as it is, involves cutting off Ruben's head, going to the precinct, and dropping the head in a grocery bag on Det. Oscar Clemons' desk. The plan falls apart because Kilgrave tracks Jessica there and makes the cops point their guns at each other, and after giving Jessica an ultimatum, he makes the cops dismiss the severed head as the world's greatest prank ever.
* Jessica Jones (2015) all of the other players to go all-in and then fold.
* Jessica Jones (2015). And the title character was just one of his many victims.
* Jessica Jones (2015): At the start of season 2, Trish Walker's boyfriend Griffin is a war correspondent at ZCN, who have a CNN graphics package with slightly altered logo.
* Jessica Jones (2015): Because of the Netflix Marvel shows' cancellations, the

last we see of Trish at the end of season 3 is her being sent to the Raft for murdering three people, including the person who killed her mother, and attacking Jessica. Many fans have speculated that as the secondary lead of the show, Trish was likely going to have a redemption arc in season 4 since it was unlikely the show would keep her locked up in the Raft for the entire season.
* Jessica Jones (2015) between comically obvious frauds, and the genuine cases which are treated with the appropriate amount of seriousness.
* Jessica Jones (2015), but Jessica just mocks how silly and impractical it is.
* Jessica Jones (2015): Dorothy Walker. She's entirely responsible for Trish's childhood career, pimped her out to pedophile producers like Max Tatum for roles, as well as all of Trish's bruises, bulimia, and drug problems. In season 1, there's an implication that her talent agency also sees a lot of these. Adopting Jessica turned out to be something she did to distract critics from issues her stage mom behavior was causing.
* Jessica Jones (2015) establishes that some people have developed prejudices against powered people in light of the Incident, and they are meant to be analogous to the sort of treatment people of Middle Eastern descent got after 9/11. At one point, a woman who lost her mother in the Incident even tries to kill Jessica just because she's enhanced, while in the season 3 finale, after going rogue and killing three criminals, Trish gets thrown in the Raft, AKA Superpower Gitmo, just because she's enhanced.
* Jessica Jones (2015). In a flashback scene when the title character first tries being a superhero, Jessica rejects both a proposed superhero name and skintight costume offered by her friend Trish.
* Jessica Jones (2015): In "AKA 1000 Cuts", Kilgrave breaks into Jessica's apartment to threaten her into giving over his father in exchange for Hope being spared.
* Jessica Jones (2015) initially insists this is not the motivation for her actions, it's clear to both Trish and Kilgrave that she would do anything to protect Trish. Trish is alternately frustrated and touched by this.
* Jessica Jones (2015): In Jeri Hogarth's first capital case, she won the case by bribing one of the jurors. Wendy tries to use this as blackmail in the messy divorce.
* Jessica Jones (2015): In one episode, Jessica goes to Trish's apartment to deliver an update about Malcolm and Kilgrave. She is a bit stunned to find that she interrupted Trish in the midst of receiving cunnilingus from Simpson, considering that just two episodes ago, Simpson had tried to kill Trish (while under Kilgrave's control).
* Jessica Jones (2015): In the season 2 finale, Jessica, on the run with her homicidal mother, stops off at a diner to meet with Oscar so he can get her and Alisa some new IDs. However, some of the diner patrons turn out to be undercover cops waiting to catch Jessica. Jessica fights off the undercover cops and then escapes the diner in the back of a dump truck.
* Jessica Jones (2015): In the second season, Jessica's mother Alisa is turned in for being the superpowered serial killer killing people from IGH's sketchy past. Two episodes are spent that focus on her time in prison, until she breaks out with the intention of going after Trish after Trish indirectly gets Alisa's doctor/lover Karl Malus killed.
* Jessica Jones (2015) is a crass, hard-drinking, and cynical private investigator who is very good at her job.
* Jessica Jones (2015) is so absolute that they can't even go to the bathroom and often have accidents on themselves.
* Jessica Jones (2015): Jessica, after her time held captive by Kilgrave.
* Jessica Jones (2015)", Jessica does a nonverbal version with her eyes to Simpson who's just wearing briefs.
* Jessica Jones (2015): Jessica gives a rebuttal to someone who tries to pull this sort of remark on her, saying, "If you say ‘with great power comes great responsibility’, I swear I’ll throw up on you.”
* Jessica Jones (2015): Jessica Jones was the sole survivor of the car accident

that killed her entire family — or so she thinks. It turns out that her mother also survived, but Dr. Karl Malus decided to declare Alisa dead so he could perform somewhat illegal experimentation on her.
* Jessica Jones (2015) Jessica ties up all loose ends in New York City and is ready to board a train to El Paso and make her way to Mexico for a new life, when she has a last-minute change of heart and decides to continue her work in New York.
* Jessica Jones (2015): Kilgrave gains a lot of praise because, mind control abilities aside, he's like several different kinds of abusers rolled into one.
* Jessica Jones (2015): Kilgrave has shades of this, having stated multiple times that he and Jessica belong together because they are both superpowerful.
* Jessica Jones (2015): Kilgrave makes Luke Cage blow up his own bar in front of Jessica. Luke comes out with scorched clothes, his durable skin saving him from being killed in the explosion.
* Jessica Jones (2015): Kilgrave tell two cooks under his control to do something if he doesn't return within a certain time.
* Jessica Jones (2015) like Kilgrave to stand trial, especially when most people don't believe that his powers are real.
* Jessica Jones (2015): Luke Cage does this when Kilgrave commands him to fight Jessica.
* Jessica Jones (2015): Malcolm's response when Inez steals his TV from his apartment. He is forced to chase her down to find her trying to sell his TV off at a pawn shop for bus money.
* Jessica Jones (2015): One of the fake Kilgrave victims is a stoner who claims Kilgrave was this Chinese dude with glowing eyes who made him rob a convenience store at gunpoint.
* Jessica Jones (2015). Pam kills Wendy before she can get too far, but is subsequently arrested and breaks up with Jeri, now realizing what she truly is.
* Jessica Jones (2015) people and enslaved her for his sick purposes. Not only is Jessica herself always in danger because all it would take is one word from Kilgrave to enslave her again (until she finds out she's immune), but she lives in New York City, meaning she lives among 20 million people he can control at any time. Hope, after being victimized by Kilgrave and being forced to kill her parents, chooses to cut her own throat rather than fall back under his control.
* Jessica Jones (2015) premiered on March 8, 2018 (a Thursday), as that is International Women's Day. Which is appropriate seeing as the show has been revolutionary at female representation. Case in point: all thirteen episodes of season 2 are directed by women, and the main cast is primarily female.
* Jessica Jones (2015) provides a female example, in which Jessica deals with her multitude of problems using alcohol and isolation.
* Jessica Jones (2015): Pryce Cheng, a new PI who becomes a bit of a rival to Jessica in season 2, is a former Marine Corps captain and still has the tattoos on his arms to show it.
* Jessica Jones (2015) quote, 'saved the city', people have been making up stories about more super folk out there. Now some kid is pinning her murder on one? Have you ever heard a more made-up name than 'Kilgrave'? I mean come on. Give me a break." The clerk laughs at the guy mocking the silliness of Kilgrave's name, causing Jessica, herself a fellow victim of Kilgrave, to glare at him and say, "What, are you trying to drive customers away with that shit?"
* Jessica Jones (2015) regularly has Jessica provide some sort of internal monologue. Besides being fitting for the story, as Jessica is a private investigator, it also ties in to one of her issues: admitting her problems to other people. In the penultimate episode of the series, she admits that she is not comfortable with talking about her issues to other people. The internal monologue is her talking her problems through with herself.
* Jessica Jones (2015) say. Jessica decides to use the phrase "I love you", which turns out to be particularly handy at the episode's climax.
* Jessica Jones (2015) season 3, but some dialogue in season 3 implies she's involved in criminal work (she's doing deposition work on an accountant who did work for the Albanians that Fisk snitched on).

* Jessica Jones (2015): Season 3 has Carl Nussbaumer, who murders teenaged drug dealers whose deaths won't be minded by the criminal justice system because they'll be chalked up to gang violence, and steals their money and product to resell. He gets blackmailed by Eric Gelden and, later, accidentally killed by Trish Walker.
* Jessica Jones (2015) sends the children of a family whose house he is inhabiting into a closet not for having done anything wrong, but just because them being there annoys Kilgrave. This despite the fact that the girl remarks she has to use the bathroom. We don't hear of the poor children again.
* Jessica Jones (2015), serial mind rapist, doesn't like the word 'rape', despite that being exactly what he did to Jessica, Hope Schlottman, and almost every woman he's encountered. He seems to acknowledge that's exactly what he did when Jessica confronts him on this, but denies it at first and later mutters that he doesn't like what he does being described that way.
* Jessica Jones (2015)'s fight scenes, the response was a resounding, "we figured". A big example is when Jessica fights Kilgrave's hired goons. While it's understandable that she doesn't want to hurt them, her slow reflexes reflect her alcoholism. Of particular note is her fight scene with Luke Cage, where she tries to stop him from moving by pushing him... and he just keeps walking, creating this hilarious scene where she's ineffectually leaning against him.
* Jessica Jones (2015) shows gaslighting extensively (and very realistically, despite the setting — real-world victims of the technique have commented on how truthfully gaslighting is depicted by the show). This is not surprising, for a show that uses a villain with mind-controlling powers as an explicit metaphor for domestic abuse. At various times, first season villain (and Jessica's former abuser) Kilgrave attempts to confuse and distort Jessica's reality not with his actual mind-control powers, but simply by retelling the story of their relationship from a delusional perspective, that he insists on in the face of Jessica's own memories. Similarly, we see other characters such as Trish deal with this tactic from her mother. Interestingly, Jessica Jones doesn't simply demonstrate realistic gaslighting and its psychological effects alone, but shows its characters combating the technique by re-asserting their own stories. A recurring theme has Jessica reciting the names of streets she knew from the neighbourhood she once lived in, part of a psychological technique sometimes used by victims of abuse to have something concrete to hold onto that is outside of the warped reality insisted on by their Kilgrave.
* Jessica Jones (2015)'s natural charm and charismatic performance shine through and make every scene he appears in a disturbing highlight.
* Jessica Jones (2015): The ability to snap one's neck with her bare hands is something that runs in the Jones family. It's how Jessica ultimately kills Kilgrave once and for all in season 1. Meanwhile, in season 2, it's revealed that her mother can do much the same thing, using such a method to kill Luanne and Will Simpson.
* Jessica Jones (2015), the impact from Jessica firing a shotgun pressed directly against his neck in an attempt to break Kilgrave's control over him causes massive internal injuries and bleeding, which then can't be treated by conventional means because there's no way to get through his skin. Claire has to insert the needle through his eye socket to drain the fluid that builds up.
* Jessica Jones (2015) The Netflix series plays heavily on noir themes; Jessica herself being a gender-swapped, alcoholic, emotionally-detached private detective.
* Jessica Jones (2015), they get it on in a whole new light that breaks Luke's bed.
* Jessica Jones (2015). This is downplayed as they are fuck buddies more than anything, but still...
* Jessica Jones (2015) Though it's more downplayed in his own series, as the lack of comparison supers leaves it up to him to do most of the fast moving.
* Jessica Jones (2015) to order a detective, who's handcuffed to a pole with his own cuffs, to come with him. Cue the detective screaming in agony as he forces his hand through the cuffs, breaking the bones in the process.
* Jessica Jones (2015) to order an entire restaurant of people to shut up because their noise is too irritating to him.
* Jessica Jones (2015): Trish Walker, as a former child star, had to put up with

having her privacy stripped from her when she was 12 and her mother pushed her into acting. She's not happy when Jessica's idea of keeping her from going to a meeting with a person who claims to be Dr. Leslie Hansen is to sic the paparazzi on her and claim that Trish's relationship with Griffin Sinclair is on the outs. Despite Trish's attempt to sneak out of her apartment by having Malcolm distract them, they're photographed together anyways by one paparazzo who's not fooled by Trish's attempt at distraction, and the next day, a picture of them splashed across the tabloids, forcing Trish and Griffin to make an impromptu press conference to reporters outside the radio station where Trish hosts her show.
* Jessica Jones (2015) used the working title "Violet", reflecting Jessica's main theme color.
* Jessica Jones (2015)" when Jessica stops by to interview him), while Jessica learns from the transplant surgeon that Kilgrave will have to harvest a new set of kidneys in a couple of years.
* Jessica Jones (2015), which was going to have Jessica leaving NYC for a while, with the intent of her coming back at the start of the next season. When the writer realized it would be the last season, and thus viewers would be left with the impression that Jessica had just left forever, they hastily changed the ending to where she decided not to leave at the last second.
* Jessica Jones (2015): Will Simpson. He is first introduced being commanded by Kilgrave to attack Trish Walker. After Jessica breaks Kilgrave's control, Simpson proceeds to help Jessica and Trish in their plans to take down Kilgrave. Notably, he tries to use torture to interrogate one of Kilgrave's bodyguards who clearly doesn't know anything, and he has a hermetically sealed room all set up to contain and torture Kilgrave.
* Jessica Jones, and at times puts it over her head when she needs to go unnoticed.
* Jessica Jones: At one point while Jessica is under Kilgrave's control, Kilgrave commands her to start cutting her ear off. He makes her stop before she can finish cutting it off. In the present day, Jessica still retains the scar from that wound.
* Jessica Jones for eight months. The experience so traumatized Jessica that she quit superheroics, though continues to fight crime as a private eye.
* Jessica Jones has considerable raw strength, but little in the way of actual hand-to-hand combat experience, with most of her fights relying on her just hitting her opponents really hard, which puts her at a disadvantage when facing the rare foe who can match her strength and knows how to fight.
* Jessica Jones: Jessica realizes that her new neighbor, the drug-addicted Malcolm, is being used by Kilgrave as a spy. When she discusses this with Trish, they realize it's a perfect cover, as "everyone dismisses the junkie".
* Jessica Jones: Jessica's trademark leather jacket is revealed in season 2 to be one she acquired on the night that she first hooked up with Stirling.
* Jessica Jones receives his final power boost, his veins turn purple.
* Jessica Jones. She laid the smackdown on Kang the Conqueror (a guy who's a threat to a team of Avengers) when he threatened to shoot her if things didn't go his way.
* Jessica Jones showed there's a lot of fear and hate towards "gifted" people over this. One woman tries to kill Jessica in revenge over her mother dying as a result of the Chitauri invasion, even though she wasn't involved.
* Jessica Jones the whole world into forgetting his identity), and she didn't say anything the first time!
* Jessica Jones, though, as the end result was Luke got modernised and developed extensively past his previous blaxploitation characterisation, and Bendis was able to reign it in enough to have Luke retire and leave the Avengers.
* Jessica Jones. Trish notes that Jessica hates all of Trish's boyfriends.
* Jessica Jones was well-received and listed as the second most-searched TV series in the year 2015, not to mention earning numerous accolades. Overall the show was highly praised for its examination of misogyny and rape culture - all without alienating a male audience (excluding a vocal minority of gender reactionaries). And the advertising did not hide the fact that the lead was female at all. And even more, the vast majority of the main cast is female (eight females and five males, depending on how you count "major" characters).

* Jessica Jones. We then get a shot of the ceiling with multiple bootmarks and chipped plaster.
* Jessica Jones when Claire Temple has to sew up the title character after she gets a lower leg injury.
* Jessica Lea Mayfield's song, "For Today" is a subliminal anti-love song:
* Jessica Love from Finland stands in at 6'1. Hajime Ohara was impressed enough that he chose the then twenty-one Love as his partner to help him get one over on his long-time rival
* Jessica, meddled hugely in their careers. Jessica's ex-husband Nick Lachey has strongly implied that her dad's meddling was a major factor in the breakdown of their marriage.
* Jessica "ODB" Kresa: Left TNA in 2014, wrestled in ROH, and made some short-lived comebacks to TNA.
* Jessica Paré auditioned for the roles of Rachel Menken and Jane Siegel before being cast as Megan Calvet.
* Jessica Parker Kennedy is biracial just as her character Nora II is.
* Jessica Parker Kennedy. Patton has stated in interviews that both she and Kennedy have even been mistaken for one another on set due to their voices also sounding incredibly alike.
* Jessica points out that, while she might be rude and abrasive, she's also not wrong when she criticises the rest of the kids for being reckless and not actually coming up with a solid plan.
* Jessica Rabbit does this to Eddie Valiant during her introduction number in the Ink and Paint club in
* Jessica Rabbit makes at least 3 of these. There's a subtle one during her singing number right before she sits on Eddie, then another after knocking out Roger with a frying pan and dumping him in the trunk of a car, and a very quick one as she's getting into Benny the Cab in Toontown.
* Jessica Rabbit. Nowadays, the original style of singing it is nowhere to be found in covers of the song.
* Jessica Rabbit the attention was drawn to her back rather than to her breasts.
* Jessica says, casually, "Hey, didn't I throw you out a window one time?"
* Jessica Simpson began her career in show business as a Christian pop singer. During this stage of her career, she would often tape down her breasts for performances because her promoters felt that an attractive blonde with D-cup boobs wasn't the best image for a gospel singer.
* Jessica Simpson film. The change in image from "squeaky-clean gospel singer" to "mainstream sex symbol" did not sit well with some of her fans, and she was accused by many of being a bad role model.
* Jessica Simpson, notably with her famous "chicken or fish?" line. She's also played numerous other dumb blonde characters, a big contrast to her wholesome image when she was a pop star.
* Jessica Simpson out until the attendant pulls out his camera, which is what he was actually reaching for. The girls are both relieved and happy to pose for pictures.
* Jessica's Infinity Plus One Whip, the Gringham Whip, can only be obtained by grinding for an obscene amount of casino tokens. It can be worth it, as it has significantly better stats than the second-best whip and hits all enemies instead of just a group.
* Jessica's most favored method was showing a piece of paper she said contained the evidence to prove the killer's guilt. This was openly lampshaded when, after the killer confessed, the chief of police checked the paper out and just chuckled.
* Jessica!") to Bill Compton after he turns her. Their relationship seems almost stereotypically that of a father and daughter who fail to understand each other, only with the generation gap being MUCH larger. It also doesn't help that Bill had no desire to turn Jessica but was forced to by vampire law as his sentence for staking Longshadow. They get better over time as Jessica gradually warms up to Bill.
* Jessica Walter. She does not appear in the final film nor is she listed in its

credits.
* Jessica Walter; while Malory and Ron appear to have had a rush wedding within a few weeks of meeting and have a woefully mismatched relationship based on constant bickering, Walter and Leibman have been happily married since 1984.
* Jessica was the result of a string of one-night stands during a dark period in her mother's life. As a result, the true identity of her father is unknown to her.
* Jessica Wild from season 2, who placed consistently high and won the previous challenge. Even Tatianna, who had just won the lipsync, was shocked that Jessica was eliminated. Pandora Boxx's elimination shocked many as well since she had become a fan favorite.
* Jessicka Havok claimed Reby Sky's prior career, presumably the glamor model part, was so repulsive it was a disgrace for SHINE to employ Sky.
* Jessie… sometimes. He also did this with Shaylee Michaels in "Jessie's Big Break".
* Jessie, after Bertram is forced to go out with Mrs Chesterfield, he breaks down crying. Jessie comments he took that better than she thought.
* Jessie, amongst other female villains (and even protagonists), gets attacked by Pokémon on a regular basis.
* Jessie and extremely short shorts. According to her, "Everybody wears this." When Jessie tries to get her to change, she just stays where she is with her arms folded and smirks, as if to say "Make me."
* Jessie and James have their kiss at the tail end of the epilogue when James escapes the festival to reunite with Jessie after a year apart. James delivers an awkward

* Jessie and James of Team Rocket originally started out with an Ekans/Arbok and Koffing/Weezing. Jessie later owned a Seviper and James an Amoonguss.
* Jessie and James of Team Rocket wear red and blue hair respectively. Their disguises often follow the same pattern, with James dressing at the blue end of the spectrum and Jessie at the red, though sometimes (as seen in "The Misty Mermaid") they'll switch ends.
* Jessie and James pretended to be teenage Valley Girls in a Kanto episode. In the Japanese version, they were

* Jessie and James. The only certainty is they're older than any of Ash's tagalongs. Jessie once said she was seventeen but that's probably her trying to seem younger than she is, and flashbacks imply she finished high school. The Japanese version has implied they're twenty-five in one of the movies and according to
* Jessie and Jessie repeatedly waves her hands again before Luke can correct him that it wasn't a dream, but Luke does so anyway worrying Ravi even more. Jessie eventually gives up and says "Apparently, I need a new signal!"
* Jessie averts this among Disney Channel originals. There are three kids adopted from foreign lands (a Hispanic country, India, and an African country). Only the Indian acts foreign and a lot of his ethnic traits are more informative than played for laughs.
* Jessie: Bertram's mother does this as one of her ways to steal the spotlight on her son's birthday.
* Jessie boyfriend over sports. The ruse is discovered, however, when Luke types a word wrong in Emma's text and vents his frustration so loud he is caught in the act.
* Jessie came from a lower class background where they often time had no money for food... so she and her mom ate snow and pretended like it was delicious...
* Jessie. Emma prepares a dress for her to wear, but Zuri tells her to make some more room to breath.
* Jessie episode "Krumping Crunching", Emma uses this excuse when she, Jessie, and Luke are caught by Christina.

* Jessie episode "Quitting Cold Koala" was originally banned from TV by the Disney Channel due to a controversy over Stuart's gluten restrictions; it originally showed Bertram and the Ross kids making jokes about Stuart's allergy to gluten. To address this issue, Disney Channel posted on their Facebook page: "We are removing this particular episode from our regular programming schedule and will re-evaluate its references to gluten restrictions in the character's diet." The episode eventually aired on July 5, 2013, as part of a 2-episode spectacular. The episode was edited and revised, removing any mention of Stuart's gluten allergies.
* Jessie episode "Ride To Riches" features Bertram as king of a medieval LARP. Luke and Emma join in after they follow Bertram there.
* Jessie episode "Say Yes to the Messy Dress", Zuri cranks out a bunch of absolutely ridiculous Kitty Couture merchandise, including kitty litter, a board game, a burger griller, a backscratcher, and a trophy. Emma/Kitty Couture herself is not pleased.
* Jessie grounds the Ross kids from TV and internet for “the rest of their lives” in “Caught Purple Handed” after learning they had a party on the rooftop.
* Jessie: Happens towards the end of the episode where Mrs. Kipling imagines everyone switching bodies.
* Jessie: In "All The Knight Moves", Jessie (excited over the idea of Zuri winning the two of them a trip to Paris in a chess tournament) tries learning some French. When she tries to express her excitement over the tournament in the language, she gets this response:
* Jessie: In "Are You Cooler Than a Fifth Grader?", Ravi is able to get rid of a bully by letting him steal and eat his lunch: a sandwich with Indian dragonfire peppers. The bully screams and runs away in agony, while Ravi eats a whole pepper without even flinching.
* Jessie: In "Green-Eyed Monsters", Jessie and Tony try to kiss and are interrupted by Officer Petey.
* Jessie in that situation, Jessie made her work too so she could have the day off.
* Jessie: In the episode "Trouble With Tessie", Jessie fears that Tony is planning on proposing to her when he invites her to meet his parents at his family's restaurant. It gets even worse for her when she finds out that the family has a tradition of proposing at the restaurant. She finds a ring in her soup and starts panicking and saying no, but then Stuart clarifies that the ring is actually his which he gives to Zuri.
* Jessie is about as big of an age gap as you can get. A 7 year old with a woman old enough to be Great-Grandmother when you consider the actual age of both actresses.
* Jessie is carrying Emma's model of the solar system (her science fair project), she trips and Pluto falls off. During the judging of the science fair Emma wins, because the judges like that she remembered that Pluto is no longer a planet.
* Jessie is this (Even taking into account her penchant for imaginary friends).
* Jessie, James, and Meowth also often got this from Butch and Cassidy in the early seasons, at least before the latter were Flanderized to become just as incompetent as them.
* Jessie, James, and Meowth first appear in the second chapter and don't show up again until the twentieth, six months later in-universe. They explain to Ash that their attempt to rob the Viridian City pokemon center was their very first mission as Team Rocket members and that they went legit after being arrested. They now work as news reporters.
* Jessie, James and Meowth have their rival Team Rocket fraction Butch and Cassidy. Though the latter were largely an
* Jessie, Jessie and Zuri accidentally switch bodies with Ravi's magic bell. When Jessie goes to Ravi for help, Ravi doesn't believe her to be Jessie in Zuri's body until "Zuri" mentions that Ravi still wears choo-choo underwear which is a secret between him and Jessie.
* Jessie. Jessie considers doing this to Brooks when Mrs. Chesterfield cut off all of his money and rendered him broke to force them to break up. Fortunetly, just

when she was about to go through with it, Mrs. Chesterfield changes her mind after a talk with Bertram and gives Brooks his money and job back finally accepting their relationship.
* Jessie: Jessie falls over into a window washer's bucket. Recalling something he said earlier, she asks him where he does go to the bathroom when he's on the rig.
* Jessie. Jessie searches for the kids who are late trick-or-treating, but the kids were told by a creepy old doorman about an evil child-abusing nanny who lived in their building and happens to look exactly like Jessie's Halloween costume. This, along with Jessie being covered in red punch and having anger tantrums, leads the kids to believe that Jessie is possessed by the evil nanny and is out to murder them.
* Jessie J pointed out, is kind of odd, given that these are much closer to the exact opposite of their usual personas. (The music video goes even further by inverting the usual differences in appearance: Ariana's hair has been bleached blonde and wears all white in her scene, while Jessie J is her usual black-haired self in an all-black outfit.)
* Jessie J was only a hit in America because of the latter two artists.
* Jessie McKay to fight the evil Trifecta...but ran into problems, as McKay didn't show up.
* Jessie Mei Li is gender nonconforming, using both "she" and "they" pronouns.
* Jessie of all people during the Kalos Showcases. After losing in the Master Class to Serena, her teammates
* Jessie opened with a nightmare where Jessie was eaten by a giant version of Mr. Kipling.
* Jessie: Ravi thinks this after he is crushed by Bertram's hoarding pile.
* Jessie rivaled May in Pokemon contests during the Hoenn era, but she almost always failed miserably, leading May to sparsely acknowledge her (especially since she was usually in disguise). Subverted in Sinnoh, where Jessie was a more legitimate competition for Dawn, while Kalos zigzags this, since while Jessie was also competent in showcases, Serena still barely noticed her, if more because they rarely interacted, the latter preferring the
* Jessie says "I don't" and runs back upstairs, refusing to marry Brooks, knowing she would have to move to Africa with him and give up her life in New York with the Ross kids and her dream of being an actress.
* Jessie's Dustox averted this trope, except for the episode she was released in. In it she wears ribbons on her antenna while her mate doesn't.
* Jessie's Dustox in the Sinnoh episode "Crossing Paths" fell in love with a Shiny Dustox. But when it was time for them to leave to participate in a breeding migration with other Dustox, Jessie's Dustox tried to remain with Jessie, not wanting to leave her. Jessie had to resort to crushing her Poké Ball underfoot in order to sever her bond and force her to leave.
* Jessie Season 3 "Where's Zuri?", Stuart has a new laid back nanny named Hudson who allows Zuri and Stuart to play with fireworks inside which results in their balcony getting set on fire. By the end of the episode, when Hudson decides to become a more responsible nanny, he puts all his fireworks in a box and offers it to Jessie who doesn't want and tells him to get rid of them, but when he sees a fireplace with a fire going we cut to the apartment on fire with firefighters entering the building and everybody outside the building.
* Jessie Spano also didn't exist in the original concept of the series;
* "Jessie's Song", where Jessie has a full-on junkie meltdown after crashing from...caffeine pills. "
* Jessie's very long red hair in the shape of a drop or comma... and it is always looking the same, whatever the angle of view. And the hairdo also seems perfectly rigid—she once slapped both James and Meowth with the tail of her hair. One episode has her put it in a messy ponytail but when she trips it instantly poofs into her normal style, complete with a sound effect.
* Jessie tends to get a bit of extra "stuffing" in certain strategic areas in fan art.
* Jessie The episode "Doll in the Outhouse" has the titular character drinking a

72-ounce cup of Cherry Cola called the "Bladder Burster" in a flashback and unsurprisingly Jessie ends up using a Porta-Potty right after finishing it.
* Jessie, "There Goes the Bride", involves Jessie and Brooks forcing to move up their wedding when Brooks accepts a once-in-a-lifetime job in Africa and has to leave in two days. Jessie also has to go with him, but this means she cannot be the Ross kids' nanny anymore, and they start freaking out over the thought of losing her forever. They soon reconcile and the wedding goes off without any trouble, but when it came to the vows, Jessie notices the kids and says "I don't" last minute, and in the end, she and Brooks break up.
* Jessie to throw out everything he touched. Bertram happily responds that that includes Luke and Emma.
* Jessie: Unintentionally happens in the episode "A Close Shave". Bertram accidentally shaves the middle of Luke's head after being startled by Zuri. Both Bertram and Zuri fear that Luke will get revenge on them even after Luke forgave them. They even destroy the presents he gave them thinking it was a prank.
* Jessie: When Emma and Caleb decide to run away together, Emma asks Caleb to carry her because she is wearing high heels and can't run. Caleb instantly complies.
* Jessie: While Jessie and the kids are trapped in the Rosses' emergency panic room, Luke sees Mrs. Kibling as a plate of chicken and Mrs. Kibling sees Stuart as a rat.
* Jessie wins the Princess' Festival tournament and the doll set, since Misty doesn't take part in it this time around.
* Jessie) would join in just to point out how awful this show was. Yet it was one of the most watched and most renewed show on Disney Channel when it ran.
* Jessi Slaughter will "pop a Glock in your mouth and make a brain slushie."
* Jessi Smiles: Popular comedic skits from Vine. Also known for her make-up 'Get Ready With Me' videos.
* Jess is trying to disarm a bomb under Becker's direction, but the two wires — only one of which she can cut without killing both of them — are both red.
* Jess/Rory shippers, who had been disappointed by their ending in the original run.
* Jester from Campaign 2 is often referred to as "Jessie" or "Jess" by the rest of the party, often when she's in danger or upset about something. Her mother refers to her as "my little sapphire" which alludes to her mother's stage name "The Ruby of the Sea" and Jester's blue skin.
* Jester Lavorre. Jester actually leans so hard on the "Combat" side of this trope that the other party members often joke that she forgets she has healing spells in the first place.
* JesuOtaku cancellation, and general vitriol directed at fanbases he dislikes) and runs with them. He has a genuine dislike of what he makes fun of.
* JesuOtaku did this (and commented on how this doesn't seem to accomplish much other than blinding you and casting shadows on your nose) at the end of his Deliciously Evil Anime Villains Countdown.
* JesuOtaku for seeming to borrow its fantasy world from other works instead of trying to create one of its own.
* JesuOtaku. His response? "Sorry, Sage, I can't hear you. I'm going through a tunnel...in the bathroom."
* JesuOtaku is barefoot more often than not, both in character and out.
* JesuOtaku redubbed a lot of his live action skits in his episodes from 2009-2011 for quality reasons, but left his first review alone to show how far he came.
* Jesus, according to the Infancy Gospel of Thomas, which is most likely Gnostic heresy. When Jesus was five years old and making sparrows out of clay while collecting and purifying a bowl of water, a boy comes and drains the water out of the bowl, then Jesus curses the boy to dry up, and he dies. Later on, a boy runs by Jesus and bumps Him on the shoulder, and Jesus curses that boy, and he also dies. When the parents of the children Jesus killed come to Jesus' parents and complain about the situation, Jesus causes those parents to go blind.
* Jesus also said that anyone with sufficient faith in Him could cast out demons

in the same manner (and indeed, the Apostles are shown doing so on their own in later books), but He did caution against attempting this unless you were
* Jesus also uses the term "fallen asleep" (in John 11:10) to refer to the soon-to-be-raised Lazarus. He actually has to explain what he means to his disciples, as they don't get it.
* Jesus and has absorbed other pagan winter solstice holidays like Yule, since syncretism made conversion easier.) The expression "Xian" for Christian was originally not a pejorative, but came from online religion discussion groups where like those medieval monks you had to type "Christian" so much that Xian became the shorthand.
* Jesus and His army of saints from heaven at the Battle of Armageddon in the
* Jesus and Mo has a "What They're Saying" section, the final quote being "...humor is humor and this cartoonist doesn't have it." - Karl Giberson.
* Jesus and Moses come down to earth to play a round of golf. At the seventh hole there is a water hazard. Jesus takes out a 7-iron and addresses the ball. Moses says, "You can't hit that ball over that water with a 7-iron." Jesus replies, "If Arnold Palmer can do it, I can do it." Jesus hits the ball and it goes into the lake. He turns to Moses and asks, "Um... can you help me get me ball?" Grudgingly, Moses waves his arms apart, the waters separate, and Jesus goes into get his ball. He sizes the shot up again, and Moses sputters "You cannot hit that ball over the water with a 7-iron!" Jesus says, "If Arnold Palmer can do it, I can do it." Jesus hits and the ball again goes into the water. Moses says, "You're on your own on this." So Jesus walks on top of the water and dips his club into the water searching for his ball. Two other duffers pass by and see this incredible sight of a man on top of the lake. One of them asks "Who does he think he is? Jesus Christ?" Moses sputters "No... he thinks he's Arnold Palmer!"
* Jesus and Saint Peter are playing golf in Heaven. Jesus swings, the ball goes way to the left, bounces off a tree and into a bird's nest, causing the panicking bird to fly around and drop the ball into the hole. Saint Peter then says "Lord, are we here to play golf or screw around?".
* Jesus and the Apostles are on a boat, when a storm hits. Unable to see where they're going, they hang on for dear life until Jesus tells everyone to jump out. Peter starts thrashing around in the water, when Jesus stands in front of him, saying "Peter, stop drowning and stand up" (A variation involves a river and Jesus telling him to use the stepping stones like everyone else).
* Jesus announced that someone would betray him. (This detail does not however appear in the Bible. A huge amount of folklore has grown up to fill in the details of Biblical stories, much of it originating centuries later in medieval Europe. It would have been quite odd for the Disciples to have salt on the table, as salt was a precious commodity in First Century AD Rome.)
* Jesus: A prominent religious figure who's God's Son and our Savior according to Christianity and the world's second holiest person and prophet according to Islam.
* Jesus. As in back from the dead and powered up. Although in his case, it was
* "Jesus" being a not-uncommon name for men in Spanish-speaking countries leads to this kind of humor.
* Jesus, Bro! a Christian propaganda film. If you decide to watch both films back-to-back, it'll be hard to tell the difference.
* Jesus, Bro!, this was likely done to avoid this trope. Allison has mentioned on her Tumblr that while she had no love for the brothers, she was still able to work with them because they're adults. However, when a fan asked Allison on Twitter about working with Doug during filming, Allison replied that one time the only place to sit was next to her, so he stood.
* Jesus, but in Christian theology it actually makes sense), while Jews, Muslims, and all others believe he was fully human, period.
* Jesus Christ. Born from the Inmaculate Conception by God of the Virgin Mary.
* Jesus Christ himself. Thurstan's personal representative at the battle was fellow Bishop Radulf Novell, who delivered an inspiring sermon to the English before battle commenced and probably participated himself. All this appears to have had a profound psychological effect on the Scots, who went on to lose badly. Probably at

no other point in British history has religion been used so explicitly as a weapon of war.
* Jesus Christ himself was a wise, loving, caring teacher and a good friend. Then the Pharisees conspire to have him crucified, and on the cross he takes on the wrath of God Himself. Jesus knew this would happen; the distress of it caused him to sweat blood, and the event itself moved him to ask "My God, my God, why have you forsaken me?" Then after three days in the grave, Jesus is resurrected and brings salvation to all mankind.
* Jesus Christ In The Name Of The Gun, does this, although it was much more difficult than expected.
* Jesus Christ is this during His preaching days. It kinda led to his death (depending on which translation you read). He also warns his disciples that the world will hate them.
* Jesus Christ, of course, is argued by some as the only Physical God in History and Real Life.
* Jesus Christ Superstar (1973): "Then We Are Decided". The film also had "Could We Start Again Please?", which comes not from the original concept album but from the first Broadway production.
* Jesus Christ Superstar, after a much more taunting version of the climactic song than usual, Jesus reaches out to Judas, who rejects him one last time. Once Jesus is back in the physical world, the demonic showgirls vanish, and the last we see of Judas is of him suffering in Hell.
* Jesus Christ Superstar: After Pilate has Jesus whipped, he holds him in his arms, getting Jesus' blood on his hands. After sentencing him to death, he washes his hands of Jesus' blood.
* Jesus Christ Superstar, although Jesus relents and goes along with the original plan.
* Jesus Christ Superstar and Cooper were both around long before the mic-dropping thing.
* Jesus Christ Superstar, and tries to invoke this defense against the mob, but they aren't having it. Pilate gives an impassioned defense, but when he realises that even Jesus is determined that he must die, he drops it and symbolically washes his hands of the whole thing.
* Jesus Christ Superstar, Annas shoots a truly murderous one at Judas after he strikes Caiaphas and makes him bleed.
* Jesus Christ Superstar (Caiaphas and Annas want to protect the Jewish people, Judas is concerned that Jesus is bigger than even he can handle, and Pilate only sentences Jesus to death because Jesus refuses to fight back), but all contribute to Jesus's crucifixion.
* Jesus Christ Superstar, Caiaphas delivers the dated line "One thing I'll say for him, Jesus is cool." In later editions, this line is changed to "Infantile sermons; the multitudes drool".
* Jesus Christ Superstar came out the year after. Both feature Jesus in a version of biblical times with modern technology. They were then both turned into movies in 1973.
* Jesus Christ Superstar dies while accusing God of causing him to commit suicide. In the film version, he physically lets go of the tree branch mid-sentence.
* Jesus Christ Superstar dreams of millions of people in the future "mentioning [his] name... and leaving [him] the blame" for the death of Christ, a probable reference to the Apostles' Creed ("He suffered under Pontius Pilate...").
* Jesus Christ Superstar, during the song of Simon Zealotes, Roman soldiers can be seen gathering in larger numbers observing the commotion, and more meaningfully, Judas is in the background visibly disturbed by the events, forcibly walking off in the background during the next song, "Poor Jerusalem".
* Jesus Christ Superstar end after Jesus dies but before we find out if he resurrects or not.
* Jesus Christ Superstar ends with him dying for man's sins but a lot of lives were ruined in the process. The existence of God and the resurrection are also never cleared up.

* Jesus Christ Superstar film has the high priests Caiaphas and Ananias who wear all-black. In the climax where Jesus is sentenced to death, they also wear red capes.
* Jesus Christ Superstar functions this way, shifting its focus pretty evenly between the title character and Judas Iscariot, while giving equal weight and sympathy to the actions of both of them.
* Jesus Christ Superstar has Mary Magdalene combine elements of herself with those of the unnamed woman whose "waste" of costly perfume on Jesus in Bethany was condemned by the disciples in the New Testament, but just by Judas Iscariot in the rock opera. However, Mary Magdalene has been traditionally identified with the unnamed woman of Bethany for centuries, so this wasn't the first time it happened.
* Jesus Christ Superstar. He's still playing the role in stage productions, for crying out loud!
* Jesus Christ Superstar in whatever modern setting the director feel like (it tends to involve guns and drugs).
* Jesus Christ Superstar is doomed by old fashioned pride. Just because he's Jesus's right hand he automatically thinks he knows him better than anyone. He thinks his betrayal is for the best but he's just another part of God's plan so he kills himself when he realizes he has no control over his life.
* Jesus Christ Superstar Jesus asks "WHYYYYYYYY?!?!?!" on a long and high note in the "Gethsemane" number.
* Jesus Christ Superstar Judas as a man who unwillingly advanced the agenda of Caiaphus and the Council, as well as fulfilling prophecy.
* Jesus Christ Superstar Judas considers his betrayal of Jesus to be this in order to keep his movement from getting out of hand and destroying the Jewish people. To a lesser extent this is also true of Caiaphas although there's also a large amount of self interest mixed in in his case.
* Jesus Christ Superstar: Judas, duh. The 2000 has him as the only follower that wears dark clothes or leather, and one of his first interactions with Jesus has him insult Magdalene for her... profession.
* Jesus Christ Superstar, Judas is black. Some critics saw the casting as racist, but the filmmakers insisted that Carl Anderson was simply the best man for the role (Ben Vereen faced similar criticism for playing the role on Broadway). Jesus, meanwhile, is white, Mary Magdalene is Hawaiian, and the other disciples are all different races (but then again, the film makes no pretense at realism).
* Jesus Christ Superstar, Judas's reaction to Simon and his calls for armed revolution in the song "Simon Zealotes" is a series of continual face-palms, followed by continual glares at Jesus for allowing it to get this bad in the first place.
* Jesus Christ Superstar Mary was just a close follower of Christ and Judas betrayed Jesus out of greed.
* Jesus Christ Superstar musical number, Jesus repeatedly asks "Where is my mother?" while delusional from dehydration and blood loss.
* Jesus Christ Superstar, not only for Jesus but, by extension, the entire human race.
* Jesus Christ Superstar. Quoth Herod to Jesus, "Prove to me that you're no fool/Walk upon my swimming pool." Of course, Jesus in the Gospels also comes up against demands for miracles to prove his status, and refuses to play along with them.
* Jesus Christ Superstar, "Roll On Up, Jerusalem" ends with Jesus trashing the market stands around the temple.
* Jesus Christ Superstar: The break comes between Judas' betrayal of Jesus and the Last Supper. It's all dark, but the second act is darker than the first.
* Jesus Christ Superstar, the film, shows a shepherd walking through the desert. Some thought it was supposed to symbolize Jesus's resurrection, which was not itself featured with the movie (and the play it was based on). However, it was not one of the actors but a real shepherd, who just happened to walk by when the crew was filming, and they decided to leave him in. This could mean they had some plot-based reason for leaving him in or didn't want to bother editing him out.

* Jesus Christ Superstar the terrible things that Jesus goes through, it's when the flash-and-dazzle badgering of "Herod's Song" really gets going that he seems to think something along these lines.
* Jesus Christ Superstar, when Pilate washes his hands, the water in which he washes them turns red.
* Jesus Christ Superstar where the audience can decide for themselves whether he returned or not.
* Jesus Christ Superstar with Mary Magdalene (Betty) and Judas (Veronica). To the point where in the 2000 film version Judas catching Mary and Jesus in an intimate position is what drives him to betray Jesus to the authorities.
* Jesus Christ, to say the least) and that got them talking about the book as well.
* Jesus Christ: Vampire Hunter group of six atheists leave the same car. Understandably, Jesus throws his hands up in disbelief before engaging them.
* Jesus Christ: Vampire Hunter. Mythologically speaking, things like crosses and Holy Water, which are elements of the Christian religion, are useful for fighting vampires.
* Jesus Christ: Vampire Hunter, the title character gets attacked by a mob of atheists. "You don't know us, because we've never talked to you before!" Yeah, it's a weird movie.
* Jesus Christ: Vampire Hunter who pour out of a compact car. Six at a time. In six waves.
* Jesus Christ was making an unexpected visit, and what would they do to prepare, such as having to hurriedly get rid of ill-reputable materials and be unable to carry on the normal household conversation ... and treat him like an honored guest instead of someone they were uncomfortable with having around. The song also asks listeners whether they would uphold their values only when Jesus were around before reverting to a less-than-Christian lifestyle after he had left, or if they would practice Christianity all of the time.
* "Jesus Christ, you're like a goddamn Predator drone. You wait for Dora to set you up, and then you come in outta nowhere and drop a fuckin' tactical TMI on my head."
* Jesus comes upon a crowd preparing to stone a young adulteress. He interrupts them, crying, "Let he who is without sin cast the first stone!" After a moment's silence, all of the townsfolk shamefacedly drift away. Satisfied, Jesus turns to leave, when suddenly a rock flies from behind him and hits the woman square in the jaw. She falls over, clutching her face, as Jesus spins around in surprise. "Mo-om," he groans. "You're embarrassing me!" A variation of this had the rock fall from sky, with Jesus rolling his eyes. "Daaaaad... I was trying to make a point!"
* Jesus, cured the man but spared the demons by casting them into a herd of pigs instead of outright destroying them. However, the pigs then ran off a cliff into the sea and drowned.
* Jesus develops a form that does not cause great physical harm or death. It's called "The Way of the Jew"— or "Jew Do". This is by no means the worst pun in the book.
* Jesus did not die on the Cross. His resurrection and ascension into Heaven is a well-fabricated lie to cover up his escape. He lived until he was 48 years old and was ran over by an offal cart and then, in fact, died.
* Jesus didn't much care for the Rule Fu which is what He didn't like about the
* Jesus doesn't personally appear, but he gets a mention once; Mr. Nancy saw him having rather a rough time of things hitchhiking in Afghanistan. Not many people are pals with him there...
* "Jesus Doesn't Want Me for a Sunbeam"; Kurt Cobain jokingly introduces it a "rendition of an old Christian song, I think [...] but we do it the Vaselines way". It's not. It's an original song by the Vaselines that
* Jesus emits a very bright shadowless light upon His arrival from heaven in the
* Jesus. (Even worse: in that time and culture, "engaged" was "married but not living together yet.")
* Jesus fed 5000 men plus women and children using five loaves and two fishes. On another occasion, He fed 4000 using a few loaves of bread.
* Jesus' first coming is a double subversion of this trope. None of his disciples

believed that he was going to die on the cross; they thought he would be mounting an army to take over the Romans.
* Jesus fish" symbol commonly found on cars was originally used by early Christian congregations (we're talking thousands of years ago here.) The Greek word for "fish", "ihthis", happens to form the acronym Iesous Hristos, Theou Ios, Sotir = Jesus Christ, God's son, savior. Christianity was persecuted back then, so the churches placed the fish symbol on buildings around town: members of the congregation knew to follow these to the current secret meeting place, while those not in the loop just thought someone was doing fish graffiti.
* Jesus!) follows the life and times of Jesus Christ from the perspective of the various disciples as well as members of the Roman occupational government and others with a particular focus on the geopolitics of Judea and the Roman Empire.
* Jesus: Forced to carry the cross, then get nailed to it? The Torah says, "God's curse is on the one who hangs on a tree." Of course, in Jesus' case, it's entirely intentional. How else was He supposed to take on the curse of the world's sins?
* Jesus for centuries and never looks any older than he was at Christ's Crucifixion.
* Jesus Franco's rather unfortunate Dracula movie is one of few in which Dracula maintains his original mustache and de-aging.
* Jesus Freak, who even provides guest vocals at the end of the more well-known version.
* Jesus: "Giveth unto the least of my brothers your charity, that thou shalt forever after see the grace and beauty of these glorious boobs, and that thou mayest maybe juggle them at some point, which thou will findeth most pleasurable."
* Jesus had Satan played by Jeroen Krabbe in a modern suit and tie and a female model in red. The male Satan is more prominent, and he tries to dissuade Jesus by showing future events like the Crusades.
* Jesus) He also tells His followers not to do good deeds for praise, Earthly rewards, or recognition, but rather for the sake of doing good, and not to expect even so much as a "thank you."
* 'Jesus He Knows Me' features the band as televangelists all asking for money. (A clip at the end parodies Michael Jackson's own dance at the end of 'Black or White'.)
* Jesus, he says: "Am I leading a rebellion, that you have come out with swords and clubs to capture me?" Later, he says "Into your hands, I commend my spirit" and also "It is finished".
* Jesus himself (although the text is not really clear if this is actually an example after physical resurrection or Lost The Body), while the first two are explicitly confirmed not to have died. The ultimate form is The Rapture, which involves the resurrection of the dead, and every living member of the Faithful ascending into Heaven.
* Jesus himself fits this trope in many respects, blatantly altering or disregarding then-common interpretations of Mosaic law when he felt the rules had gotten in the way of doing what was right. (If you believe he's God made manifest in the flesh, he does seem to have the authority to interpret the laws as he sees fit to do so.) A prominent example is in Luke 6:6-10, when he calls the Pharisees out for not helping the man with his right hand withered during the Sabbath and heals the man afterward.
* Jesus himself, obviously, although this series shows exactly how pure and how remarkable it is even better than the Bible at some points. The series is set during one of the most violent periods of Roman occupation; most of the Roman rulers (and quite a few of the Jewish ones) are
* Jesus Himself used this trope in John 14 when He proclaimed that some believer would do even greater works than His own.
* Jesus. How much that counts depends on your beliefs on the relationship of the human race and God, and where/what the difference is.
* Jesus. In one episode, he escapes from a jail cell (in the Vatican) by having Kyle kill him and resurrecting on the other side of the door. He can only do this on Easter.

* Jesus in the gospel of Matthew says, "O Jerusalem, Jerusalem, the one who kills the prophets and stones those who are sent to you, how often I have wanted to gather your children together as a hen gathers her chicks under her wings, and you wouldn't let Me. See, your house is left to you desolate. For I tell you, you shall not see Me again until you say, 'Blessed is He who comes in the name of the Lord.'" (Matthew 23:37-39)
* Jesus, in the sequel, who's gentle, kindly, and helps talk Harry through a lot of his problems, specifically stating - when Harry notes that he could be doing more important things - that he will never have anything more important to do than comfort a child in pain. Considering who he really is, this is not particularly surprising.
* Jesus is a common given name in Spanish and Arabic (particularly among Arab Christians). In English? Name your kid that and expect to be swarmed by
* Jesus is initially portrayed as the insane kind of Windmill Crusader. This is played straight for most of the movie, he even gets cured of his messiah complex and gets to live a normal life. Later events radically change the picture.
* "Jesus Is Just Alright", first recorded in 1966 by black gospel group The Art Reynolds Singers, was covered by
* Jesus Is Magic performs a song that begins, "I love you like bears love honey / I love you like Jews love money."
* Jesus is often taunted by the Pharisees, driven out of cities by unbelievers, and eventually brutally tortured and crucified by the Romans.
* Jesus Jewish law governing trials, but they put on clearly perjured witnesses to convict him. The conduct of Pontius Pilate, the Roman governor who approves his death sentence (the Romans required it) also counts, as even he acknowledges that no Roman (or Jewish) laws were broken by Jesus. Roman magistrates have the power to have non-Romans crucified at will however, making the whole Roman "justice" system essentially this for them. Trials of Roman citizens often go this way, as the magistrate is free to admit or ignore any evidence they please. Later on Paul, a Roman citizen, is given a trial, but the outcome isn't in doubt. The only real privilege they have is that citizens can't be crucified (and the trial needs to be in Rome). Paul is put under house arrest and later beheaded, while they crucify non-citizen Peter (upside down, as he doesn't want it to resemble Jesus' death).
* Jesus Jones: This British dance-rock group, alongside EMF, seemed to be starting a new trend of music when their hit song "Right Here, Right Now" hit #2. The #4 follow up "Real, Real, Real" gave the band a second hit, and they never again touched the Hot 100. A few more hits back home and on the modern rock airplay charts followed, but they went untouched by US pop radio. Nowadays, only the former is still well-remembered.
* Jesus, Judas, and Mary Magdalene to explain the singer's current relationship.
* Jesusland Map, which shows how the U.S. tends to split in half in terms of political candidates. With the exception of a few "swing states", it's a pretty decent guide to political leanings in the U.S. (Or at least it was circa 2004).
* Jesus looked like. Some movies have actors with either brown or blue eyes and few examples have him with blond hair.
* Jesus, Mary & Joseph! episode "National Treasure 4: Baby Franny: She's Doing Well: The Hole Story" was bumped ahead.
* Jesus, Mary and Joseph!": when Brian calls the Nativity story fictional, Stewie remarks: "Jesus lived with us, like, for a week! What more do you want?"
* Jesus me." There is also the popular song "Jesus Loves the Little Children."
* Jesus of all people had this problem. Jesus apparently involuntarily healed a woman from a chronic bleeding condition when she snuck up behind him and touched the edge of his robe, although he immediately sensed what had happened and asked, "Who touched me?"
* Jesus of Montreal when he went to see a Passion Play, starring an actor who had auditioned for one of his works, performed at St. Joseph's Oratory, a church in Montreal.
* Jesus of Nazareth had to do this a lot to cover for many of the Moroccan locals in bit parts who had limited English. Franco Zeffirelli eventually got in the habit

of shooting some scenes with the full intention of sending the actors to the studio later to dub the lines.
* Jesus on his way to being crucified, and was thereafter cursed to keep living and wander the earth until the second coming. The details vary wildly between stories.
* Jesus only as being completely ordinary (to the point people who didn't already know him couldn't pick him out of a crowd), Jesus would most likely have a darker olive complexion similar to that of Middle Eastern peoples.
* Jesus on Thyface, practically everything Jesus does gets him in trouble with someone - the water into wine miracle, for example, results in him being prosecuted for producing alcohol without a licence.
* Jesusophile. His first videos are pretty deadpan, and rather difficult to recognize as parody, but it gets more obvious the more you watch.
* Jesus promised the end of all ice giants. I don't see many ice giants around.
* Jesus pulls a particularly effective one in Luke 20:25 when challenged by his opponents to take a stand on whether the Jews should pay taxes to the Romans. This
* Jesus's answers inevitably pointed out and defied the false dichotomy.
* Jesus's attempts to befriend Seymour are a running gag. Despite all his Bible-thumping and Jesus obsession, Seymour routinely fails to recognize the real deal, and even shakes Him down for Jesus memorabilia at one point... which is an apt metaphor for
* Jesus says in Matthew 18:20 that "For where two or three are gathered together in my name, there am I in the midst of them." In other words, as long as even a single Christian remains The Church shall not die.
* Jesus, similar to response #2 above. Even if other mortal people never know what you did, God will still remember it.
* Jesus. Since this bystander is not mentioned in any of the other Gospels, a common theory is that he was Mark himself.
* Jesus's message. Even for those who crucified Him: "Father, forgive them, they know not what they do." And after resurrecting, He forgave Peter's repeated denials.
* Jesus, son of a carpenter, died on the cross, one of the things carpenters manufactured in his lifetime. Even more ironic is the fact that the Roman authorities crucified him because it was considered to be the most degrading execution method. A few centuries later the cross has become a symbol of martyrdom, worn by many Christians to commemorate whom they consider to be the most admirable human being who ever lived.
* Jesus Taboo, giving him some good advice in the bargain, and afterwards pops up every now and then, serving as what Harry dourly remarks is best described as a combination of 'therapist and parole officer.'
* Jesus' teachings, fitting the Christian philosophy that even the worst sinner can reform. One of them (Matthew) even became an Apostle.
* Jesus technically is God, and hangs out with fishermen, tax collectors, prostitutes, etc. In the Gospel of John, he calls his Apostles "friends" and John himself was Jesus' BFF.
* Jesus. The whole "love your enemies" thing is the most obvious. The times when we see him angry are the ones where he's railing against those who fail to love anyone (other than themselves) and lead the people astray with their lies. Christians believe that Isaiah 53:2-11 is a prophecy of his eventual death for the sins of humanity.
* Jesus, this actually makes hair sheep closer in appearance to their undomesticated folk. However, you will almost never see "hair sheep" or sheep with long tails in media.
* Jesus to the instigator of the Taiping Rebellion, who claimed this relationship for himself.
* Jesus to the Sheriff, who seeks to kill the protagonist Hank to keep order in Nevada, though he later diverts his attention to opposing the other two Big Bads listed below.
* Jesus to try and get him to break his fast, test God by jumping from the top of a temple, and bow to Satan in exchange for rule over the kingdoms of the world.

Christ has a Scriptural response to deny Satan at every turn and leaves the desert completely unfazed by everything the Prince of Lies threw at him.
* Jesus uses this trope in several parables, most heavily in that of the prodigal son.
* Jesus using any of his divine powers, simply praying, fasting, and so on, in order to model what godly behavior could be for us mere humans.
* Jesus was actually, canonically, the real deal in the DC-verse; he's part of the backstory of
* Jesus was sent to "proclaim freedom for the captives", among other things.
* Jesus Was Way Cool — a taboo against portraying Jesus in a negative light, a taboo that doesn't necessarily extend to God.
* Jesus, who only preached for three years and was in his early thirties when he died, has had a significant spiritual impact on the world for more than 2,000 years. On the other hand, for people who view him as the Son of God, he can be seen to have influenced the world since before the dawn of time.
* "Jet Airliner" was written and preformed by Paul Pena, but the album was shelved by his record label and only released 27 years later, in 2000. Steve Miller heard a bootleg of the song and recorded a cover with the
* Jet Alone, a "malfunctioning" giant robot from a rival organization, also qualifies.
* Jet and Sean bring out the best in each other whenever they work together. Jet's excitable nature highlights Sean's hard-work ethic.
* Jet and the Pet Rangers, the show uses entertainment to instill values such as "empathy, teamwork, and respect".
* Jet (based on Khaos himself) has two particularly well-known-in-universe pairs; both are high heels, the lower of which Khaos himself owns. That lower-heeled pair is often dubbed his go-to wedding heels while the other, higher heels are his iconic Ice Star red stiletto pumps.
* Jet Black has a cybernetic arm replacing one he lost in a police investigation gone wrong, although he became old-fashionedly defensive at Faye's recommendation that the current tech made organic limb replacements fairly easy. Jet chooses to keep the arm as a reminder of his mistake. Surprisingly Jet's arm is depicted as synthetic, but made of soft yielding materials almost leathery in nature. It's also nowhere near bulletproof and doesn't grant him any kind of superhuman strength.
* Jet Car over his radio going "Eject, Buckaroo! Eject!" but Buckaroo refuses and goes on to go through the mountain and into the Eighth Dimension.
* Jetdarters and skewers use jet propulsion. The former are bug-sized, the latter are... jets.
* Jet Dream (and quite large) TV camera with a zoom lens on a boom extending from the trunk such that Petite can see the faces of the bad guys chasing her on a dashboard-mounted screen.
* Jet Dream, a romance comic that focuses on the love lives of the T-Girls.
* Jet Dream has CIPHER, whose symbol is a zero, making it perhaps the most generic organization of its kind.
* Jet Dream is a Class 5 Big Girl, both a genius scientist and T-Girl strongwoman after her sex change.
* Jet Dream Jet Dream comics were only one of his business ventures aimed at cashing in on a "Fem Is In!" movement that... never quite developed.
* Jet Dream premise. Thus, almost all references to sex are veiled ones.
* Jet Dream "Saboteen" Captain Boris Volkov. The two can't stand each other, and in "The He-She Ski Affair", their respective organizations are also working at cross-purposes — the GRU wants to capture and interrogate Cookie Jarr, while the KGB wants to assassinate her.
* Jet Dream, she also makes several veiled references to using "the science of vibration" or her "Jet Dream Vibrostick" to deal with her new feminine urges.
* Jet Dream, she gradually warms up to the idea over the course of the story.
* Jet Dream, who's described as "Powerful as a wrestler, but with a cool, precise Teutonic mind."
* Jet especially, who always needs to Sean to teach him the Scientific Method over

and over, and often forgets things that he learned in previous episodes.
* Jet Fighter a successful ejection would result in the message: "Successful bailout! Rescue copter is on its way! Isn't simulating stimulating?"
* Jet Fighters II on iPhone, there's an unlockable Taunt called Banana Plug. It depicts the exhaust of a jet filled with bananas.
* Jetfire as he destroys the Nemesis's tow cables, and single-handedly defends any more ground forces arriving.
* Jet Force Gemini. Complete with power-ups and a multiplayer option. Makes a bit more sense if you remember the game's engine was originally written for Diddy Kong Racing, but still...
* Jet Force Gemini: If you aim correctly even with the pistol, you can blow an enemy's head off. You even get rewards for collecting heads. You can get a sniper rifle later on to make this easier
* Jet Force Gemini in the galaxy; in turn, each character goes to the intended destination by completing their own roadmap, dealing with different events as situations as they face the Drone army along the way. The second half, which starts with Mizar's first defeat, is a quest to repair an ancient ship to intercept the villain's asteroid to prevent its impact against planet Earth.
* Jet Force Gemini is the planet where Mizar's insect drones are trained and, from there, carried by the large vessels to the planets they aim to invade. Vela is the first character to storm the facility, and much later in the game Juno and Lupus follow suit.
* Jet Force Gemini. Most (if not all) of the enemies in this game are giant color coded bugs.
* Jet Force Gemini. Regular Blue Drones will do this too if caught completely off-guard.
* Jet Force Gemini subverts, parodies, or does something to this trope, seeing as it first ends with a standard award ceremony celebration with fireworks and trumpets and the usual sort... and after a fadeout and a record scratch, Juno is hilariously badly getting down with his bad self in a nightclub the team visited earlier as the credits roll. His teammates, Vela and Lupus, are too embarrassed of him to join.
* Jet Force Gemini: the game looks like a cartoonish, kid-friendly game... and then you realize that exploding enemies causes a huge shower of blood everywhere with a wet splattering sound, you can decapitate enemies (and certain allies) with headshots, and exploded enemies leave limbs behind.
* Jet Force Gemini. This one rebelled against the big bad and saved a few tribals but needs you to fix him up again. A friend can even control him afterwards to help fight enemies. Quickly becomes averted if your buddy starts shooting the tribals however.
* Jet Force Gemini, though you need a second player for him to do any attacking outside of minigame areas.
* Jet had two top 40 hits in the U.S., "Are You Gonna Be My Girl" and "Look What You've Done". Since the latter is largely forgotten today, they are often considered a one-hit wonder for the former. If they are considered a two-hit wonder, "Cold Hard Bitch" (their sole modern and mainstream rock #1) will likely be seen as the second hit.
* Jet has hook swords, which in retrospect may well have been a hint towards the whole
* Jethro: Cornwall-based comedian whose shtick consists of him playing a yokel farmer character and specialises in telling long, rambling stories.
* Jethro Tull (1987) brought back the hardcore fan base, but the band hasn't come close the success it had even in the late 1970s.
* Jethro Tull, about just how psychologically disturbing such an affair could be. The exact age of the boy is unclear but is implicitly about 12.
* Jethro Tull album. The album became a moderate hit and even won a (controversial at the time, but for unrelated reasons) Grammy award.
* Jethro Tull all five possibilities, according to Wikipedia, "converg[ing] in a similar concluding moment of gloomy or pitiful solitude".

* Jethro Tull has a 1000 foot tall polar bear stomping on an oil refinery station.
* Jethro Tull, is any indication, Lomas is just as prone to this, especially in the title track.
* Jethro Tull lyrics were written by a eight-year-old child prodigy give the game away to a degree, Ian Anderson still gets comments by Tull fans over how much older "Gerald Bostock"' must have gotten since the record was released to the present day.
* Jethro Tull revolves around a fictional child prodigy named Gerald "Little Milton" Bostock, an eight year-old boy who, according to the album cover, wrote the lyrics for a poetry contest.
* Jethro Tull seems to take place on a runaway train, though, similar to the Roseanne Cash example, it's metaphorically used to describe a man having a nervous breakdown.
* Jethro Tull song "Hunting Girl" is all over this. It was even inspired when then-bassist John Glascock was going through his luggage and the other band members noticed he travels with a riding crop.
* Jethro Tull song that didn't become a hit until several years after it was recorded).
* Jethro Tull (spy thrillers as metaphors for interpersonal relationships).
* Jethro Tull's song "Cup of Wonder" namechecks Alfred Watkins's book:
* Jethro Tull's song "Mayhem, Maybe" is sung from the perspective of one of a gang of mischievous elves, recounting their adventures tormenting human villagers and a few wild animals. Another song of theirs, "Kelpie", is sung from the perspective of a dangerous water fey, looking for his next victim.
* Jethro Tull than the 17th century British agriculturist after whom they were named.
* Jethro Tull (the albums, though the songs themselves also count) do this the most.
* Jethro Tull. Tull frontman Ian Anderson, who didn't attend the ceremony, said later that Tull likely won because they'd never won a Grammy before despite being around and well-regarded for so long, and that there was "no way I could have accepted it under those circumstances." Controversy over this award led to the separation of Hard Rock and Heavy Metal into two separate categories.
* Jet is about Zuko or Sokka's age, which isn't so bad until you realize he's been fighting the Fire Nation since he was much younger than the current cast of heroes, and has apparently gathered an entire following of children a la Peter Pan's Lost Boys. Smellerbee and Longshot are probably teenagers, but The Duke is
* Jet Island has giant spiders, lizards, and worms, as well as multiple drones scatered about that all dwarf the player.
* Jet Island: The player has two mounted to the wrists. They end up being the main way to get around quickly.
* Jet is somehow able to communicate with the rovers Beep and Boop perfectly.
* Jet is The Vaporizer, equipped with the machine gun— though in-game he could be considered a partial
* Jet Jaguar and Gigan's voices have gotten subtly higher pitched over time.
* Jet Jaguar Fight Song. ("HE MOTHER NEVER REALLY LOVE HIM / HE CRIMEFIGHTING COVER UP A BASIC INSECURITY")

* Jet Johnson and Tui Tapara try to hide their bed-wetting in the Jacqueline Brown book
* Jetlag parody travel guide for Molvania makes mention of the national car, the Skumpta. The car is described as having a single headlight, a three cylinder engine, and a candlelit interior. The car is also said to have performed best out of four leading European car models in a crash test involving being driven into a wall at 60 kph, but that's because the car broke down repeatedly and never reached the wall.
* Jetlag Productions, most of the characters have cute anime esque designs except

for the villain Charlatan with his bulging bug eyes, wrinkled skin, bony face, long crooked teeth, and claw like hands.
* Jet Lag" starts out as "keep the federal witness from getting murdered", but adds "find out who killed that flight's Air Marshall" to the to-do-before-the-flight-lands list.
* Jet Lag", Tony and Ziva spend a few days in Paris and their room only has one bed. Tony tells a witness that Ziva took the couch. Ziva tells McGee that Tony took the couch. By the end of the episode it is revealed they shared the bed.
* Jet Li, allowing for them to push themselves harder then the average soldier. They were able to hit with enough force to break through concrete, fast enough to outrun automatic gunfire and dodge it and perform other incredible physical feats.
* Jet Li, any (big) wire you cut will activate the bomb, but a string of wire, subtly hidden from untrained eyes, will defuse it. Because of the small size and the hidden nature of the wires (attached to a bigger wire), the bomb squad thinks that the small wire is a trap.
* Jet Li. A Yakuza/War Criminal type boasts he is protected by a "Revenge Fund" that will activate if he is killed, which promises a phenomenally large reward to the one who tracks down his killer. True to form, the entire city's Underworld wakes up at the promise of money when he is actually murdered.
* Jet Li he can defeat the world's best fighters in successive bouts despite each having a different discipline like boxing, spears, and fencing, and even when fatally poisoned he still easily defeats his final Japanese opponent.
* Jet Li, he is armed with a three-section staff and takes on the Japanese contender who comes armed with a katana. Halfway through the match, they unintentionally end up swapping weapons and continue fighting pretty well, until the Japanese man whaps himself in the back of the head with the three-section staff. Jet Li graciously offers to swap weapons back for the benefit of both.
* Jet Li. Li's character uses Kung-Fu acupuncture to make a guy's head explode. Li describes the physical symptoms as the man stands paralyzed.
* Jet Li of Filipino boxer Manny Pacquiao looking awed while his name is plastered on the screen as if they want the viewers to notice that Pacquiao is in this commercial.
* Jet Li, one mook gets stabbed in the throat with a pair of chopsticks by Li.
* Jet Li villains has infiltrated the police and gotten into the unit led by Li's best friend. Late in the movie Li's friend begins to notice the suspicious behavior from the infiltrator, and begins casually asking the infiltrator a few questions, like how long he's been on the force (about a year) and which department he was in before transferring into this unit. In response to these answers, Li's friends says that means the guy must have served with Captain Chan, and talks about how nice a guy Chan is. When the infiltrator agrees with this he's immediately shot: "Chan died four years ago, and he was a real prick!"
* Jetman, and Hideki Fujiwara (Dan the Birdman) played Dan/Tricera Ranger.
* Jetman had minor uses for it as well. The ball has appeared since then in Japan, though not powered on and with one of the tubes loose. Some fans were quite nostalgic to see it return.
* Jetman on the NES) made heavy use of a tractor beam for carrying ship parts and fuel.
* Jet, meanwhile, inverts the trope: He bought the Bebop and became a bounty hunter because people in his past ran away from him. Whenever he's given the chance to confront his past during the course of the series he actively goes out of his way to do so.
* Jet Moto 2. This one's an interesting case: The developers made changes to the game for this re-release, including having all the tracks and riders unlocked from the start, and a better framerate. However, Sony informed the developers that no changes can be made to a game that is re-released in the Greatest Hits line (in other words, it has to be identical to its original black label version), but by the time they told them, the game was already pressed and headed for stores.
* Jet Moto at least), those who didn't like it often cited insanely aggressive CPU opponents and confusing course design (with sharp turns and plenty of bottomless

pits later on), with Glenn Rubenstein of Game Spot even calling the first installment "an evil, difficult game."
* Jet Moto features all-terrain antigravity bikes with magnetic grapples.
* Jet Moto, the Butterfinger team members all have hideously poor performance.
* Jetpack and Disco Jetpack Zombies, Dodo Rider Zombies (when airborne), and Bug Zombies. The Hurrikale functions similarly to the Blover except it affects Zombies on the lane it was planted on.
* Jet Pack: In the future, we will be able to strap on these devices like backpacks to hover off the ground.
* Jetpack Joyride has "Bleeding Heart", a halloween-themed jetpack, that resembles an oversized human heart and sprays what seems like a dark-red blood when used. According to it's description, it was made out of cornstrach and red dye.
* Jetpack Joyride is the "Bad As Hog", where he rides on a hog bike while wielding a shotgun a-la the T-800.
* jetpack later, he starts flying over the level, wondering how he could be so stupid.
* jetpack. Rex might be made of Iron, but Six...well, he still seems to be, even if he is supposedly a normal human.
* Jet Pack seems to encourage this to get around a particularly vicious slide.
* "Jetpack" song, where he complains that the new millennium is not what he expected to be.
* Jet Pack the Survey corps use against the Titans has immense mobility, enough to match and surpass the Titans in speed.
* Jet Pilot as a defecting Soviet pilot flying a Lockheed F-80 Shooting Star.
* Jetrel", Neelix encounters the scientist who developed the weapon of mass destruction that destroyed his personal homeworld.
* Jet Scrander, and in one of the last episodes Sayaka got her upgrade to Diana A.
* "Jet Scream", because of how it reminded him of the times he traveled by plane to Korea and back to check on the animation during the show's first season.
* Jet Screamer's song "The Solar Swivel" sounds more like jazz/big band-era music than then-contemporary (early 1960s) rock music (more trumpets than electric guitars being heard). Perhaps other genres of music could've come back into style among teenagers by the Jetsons' era (akin to the swing music craze of the late 1990s)? That, or being a parody of Chubby Checker's then-recent song "The Twist"...
* Jet, Sean, and Mindy share one when Sean and Mindy finally find Jet in the second special,
* Jet Set Radio, and odd hairstyle, which make him look sorta like a Muppet.
* Jet Set Radio for Xbox suffered the same fate, even when it was packaged with the system.
* Jet Set Radio Future due to a combination of bottomless pits and confusing design (and the map layout doesn't help things, either).
* Jet Set Radio Future has a remix of "Concept of Love" by Hideki Naganuma, as well as a soundtrack mostly comprised of remixes from the first game.
* Jet Set Radio Future, this is considerably early in the game, and he returns in a later chapter with an improved version.
* Jet Set Radio is a game about spraying graffiti while riding Rollerblades and listening to hip-hop music. It might be termed a sports game, but that would fail to describe its focus on attitude. And the fact that it's actually a platformer.
* Jet Set Radio It was the earliest true 3D game to deliberately incorporate manga-esque cel shading into its graphics engine.
* Jet Set Radio only causes the player to fall on their back, and lose some health in the process.
* Jet Set Radio. Shibuya-cho, the business district, is always seen in daylight. Benten-cho, the entertainment district, is always at night. Kogane-cho, the residential district, has a permanent sunset.

* Jet Set Radio wear helmets all the time because of massive skull injuries.
* Jet Set Radio will result in Professor K saying to you "Hey, are you looking for

a bathroom or something?"
* Jet Set Wily 2 was not only a way better version than the original on the ZX Spectrum, it also contained an island which you could visit at a certain time period. The creator of the port said that he added it due to ongoing rumors of the fanbase about its possible existence.
* Jet's fatal flaw is his impulsivity. He tends to act before thinking, and this has caused trouble for him and his friends a few times throughout the show. He is also terrible at keeping the secret that he is an alien.
* Jet's goal is to protect children like himself orphaned by the warmongering Fire Nation and to fight back. However, it's made pretty clear that Jet has jumped off this slope when he attempts to
* "Jets" has six words: "Jets are like comets at sunset." Over and over. For six and a half minutes.
* Jets'n'Guns features the Necrofilicon, a book with such horrible grammar, reading any part of it out loud will awaken the dead in the immediate area.
* Jets'n'Guns laser bat'leth. They're also amazingly powerful, and (somewhat realistically) create a huge amount of waste heat.
* Jets'n'Guns states it was originally used by disgruntled ex-fans of an in-universe rock band to express their displeasure with the band's new sound.
* Jets'n'Guns when the player meets the Beer Empire, which are an alcohol-based parody of the Borg, complete with Beer Cubes.
* Jet's only #1 on both rock charts was not their signature "Are You Gonna Be My Girl", but "Cold Hard Bitch", although the former was their highest charting song on the Hot 100. Still, "Bitch" is easily better remembered than the band's
* Jetsons almost played it straight, but eventually averted it. Janet Waldo was meant to reprise the role of Judy, while pop singer Tiffany would do her singing, but executive meddling saw the latter voice the character in full.
* Jetsons, but it was described as retro-chic from some unspecified time between now and then.
* Jetsons: The Movie filled in their remaining lines. Additionally, at the very end of the film's end credits, you can hear Astro saying "I love you, George!" as a final send off to O'Hanlon.
* Jetsons: The Movie, George does this when his family asks him to close down the orbiting asteroid plant. Bonus points for having it echo.
* Jetsons: The Movie, George has Rosie cut out part of a breakfast pill he doesn't want, and notes that the toast was burned.
* Jetsons: The Movie has it in any shot of the Orbiting-Ore Asteroid. Or any of the buildings, actually. The cars fare a bit better however.
* Jetsons: The Movie has Jane, Rosie and Astro tearing up at a heartbreaking soap opera which raises some interesting questions (it's not clear if the husband is also a robot).
* Jetsons: The Movie has Spacely Sprockets showcasing the profits of the new Asteroid mine in such a fashion. The line goes up until it reaches the end, before crashing directly down and through the floor. Considering the mine is being sabotaged, this might actually be the correct profit margin.
* Jetsons: The Movie" He then leans his head out of the screen (which is huge, and so his head is huge, too) and into George's face to say sternly, "Get it?" George gulps.
* Jetsons: The Movie: Jane, Rosie and Astro are watching "All My Androids". All three are in tears as "Galaxina threatens to pull the plug on her romance".
* Jetsons: The Movie, released in 1990, features pop and rock music which sounds like real life 1980s rock.
* Jetsons: The Movie, the characters are introduced with the caption of "[Actor] as [Character]". When the text introducing Rosie appears ("Jean Vander Pyl as Rosie the Robot"), Rosie wipes away the text with a cloth.
* Jetsons: The Movie. The plant is fully automated, so there aren't actual miners, however.
* Jetsons: The Movie, this is how Judy meets Apollo Blue. They both immediately fall in love with each other.

* Jetsons: The Movie, when George walks in the house after getting stuffed into a sprocket box.
* Jetsons: The Movie with Tiffany as Judy Jetson just because she was popular at the time, a move that did not sit right with cast and crew especially when they had already used Janet for the movie and just re-recorded all her lines with Tiffany, to say nothing of the fact that by the time the movie came out Tiffany was declining in popularity. Not only that but the movie is littered with early '90s pop songs.
* Jet's sister Hollie also has a few pairs that especially meet this trope; of three total, two are high heels. One is an in-universe creation by in-universe character XJR while the other two (a wedge-heeled sandal and a pair of silver flip-flops) are pairs the character's basis has worn in real life.
* Jetstone: They prefer infantry above all else, but balance them with siege and some golems made by their Dollamancer. While they prefer to act like an Elitist faction, when all else fails they revert to a Spammer mindset, throwing waves of men at the enemy.
* Jetta is from a modest background and Roxy is apparently from a poor one; however, they're currently in one of the most popular rock bands in America. Roxy tried to invoke this further in "Roxy Rumbles" when she wins the lottery and goes to her hometown of Philadelphia to brag but ends up losing the money.
* Jetta, the token British character. She was the only non-American until The Stingers showed up. Jetta's also the only non-white member of her band, but this is downplayed as the series has a diverse cast.
* Jet the Hawk was mistaken for a parrot by some due to his green coloration and squawky nasally voice.
* Jet uses this trope on a pair of thugs in the pilot episode, only instead of his fist, he smashes a beer bottle into the first thug's face, then
* Jeune & jolie (2013): The movie depicts the life of seventeen years old Isabelle who chooses to embrace a life of prostitution.
* Jeux Sans Frontières BBC commentator Stuart Hall (and ORTF commentator Guy Lux) could barely speak for laughing for most of the game.
* Jeux Sans Frontières, with intermittent celebrity specials from 1983-88, and two revivals, one from 1991-94 on S4C {Wales only} and one from 1999-2001 on Channel 5).
* J even notes that the MIB have "unlimited technology from around the galaxy, and [they] have to drive around in a Ford POS". He eats his words when it comes time to push the little red button on the stick shift...
* Jewel), and she got rave reviews on how well she did Jewel songs. She even sang the same song later the same night out of costume, under the auspices of making a "surprise appearance" as herself - before the full reveal, an audience member who hadn't caught on said she thought this other woman had done a better job than the "real" Jewel.
* Jewel In the Palace her mentor (who were both framed and wrongfully accused and executed for a crime they didn't commit).
* Jewel is mostly about the hollowness of popular culture and commercialism. It also takes a few shots at objectification and sexuality in advertising (this is more prominent in the video). After the song's commercial failure, it was eventually licensed to ads for Schick razors.
* Jewelius for Twilight. When he reveals his true colors to her, he gloats that excluding her, nearly all his pawns have outlived their usefulness to him.
* Jewelius has been punishing the town of Ponyville for the actions of the Mane Five out of spite.
* Jewelius instead of quickly putting them down to jealousy/overreaction. It also helped that he tried to settle the confrontation at the rehearsal peacefully by suggesting that Twilight's outburst was only a case of a big misunderstanding, only for Celestia to shush him immediately.
* Jewel Knights Crusaders your hero is currently in high school and there are 2 candidates that fulfill this trope. One is a hot nurse who is also currently attending college, another is a childhood friend who the hero frequently call Onee-

san.
* Jewel of Darkness, and she's using him to gather intel on the Titans. However, by the end of the first arc, she's decided she enjoys their interactions enough that he's the only Titan she'd spare if possible.
* Jewel of Darkness between the human and Metahuman supremacist groups like the Human Defense League and the Metahuman Protective Association.
* Jewel of Darkness: During the fight in Midnight's lair at the end of the Jump City arc, she rips off one of Cyborg's arms and smashes it. Of course, since it's a robotic limb, he just rebuilds it in the arc epilogue.
* Jewel of Darkness has apparently inherited Slade's tastes in lairs, since the one she uses in the Jump City Arc is near-identical to the one he used in Season 1 of canon.
* Jewel of Darkness. He's eventually rescued by the other Titans and, despite the pain, proceeds to join them in taking her down.
* Jewel of Darkness: Midnight at one point is going on about how she's a much more refined and superior apprentice than the crude Terra, only to cut off with a curse when she sees the target of her mission is missing.
* Jewel of Darkness: Partway through the Rivalry Arc, after the encounter with Mad Mod, Jinx develops a new outfit for herself. Among other things, it's magically warded to protect her from energy attacks.
* Jewel of Darkness: Robin lampshades this trope when explaining to Starfire his reasons for being certain that Midnight, who was last seen beaten half-dead, survived their climactic encounter and the destruction of her lair at the end of the Jump City Arc.
* Jewel of Darkness seem to be mostly in it for the money, he seems to get a lot of enjoyment out of his work.
* Jewel of Darkness, she ends up back in the museum five minutes before her first arrival, allowing her to steal the Clock before she even shows up.
* Jewel of Darkness starts out when Raven was a little girl, but after a few chapters skips ahead several years to when she's a teenager for the "present" of the story. There's another skip of several months between the Jump City and Rivalry arcs, meant to simulate the break between seasons of the show.
* Jewel of Darkness that the Titans were fighting, telling them that she'll only let them be destroyed when she decides.
* Jewel of Darkness universe, Titans Tower is assaulted several times over the course of the story:
* jewel payments, then she betrays Maledict and joins with Eggman again, before finally teaming up with Sonic. Rouge flat out says she doesn't care what side she's on, as long as she gets something out of it
* Jewelpet (2009) Dian decides to ruin Christmas for everyone using a brainwashed Io. At the end it turns out that Santa Claus is way cool.
* Jewelpet (2009)-flavored rebel). She managed to escape Dian's fate and many years later saw an opportunity to unseal him using the power of the Jewelpets who got lost on Earth; this is what the heroes try to stop during the first half of the show.
* Jewelpet (2009) hates magic and thinks everyone is overly dependent on it. This is because he himself is terrible at magic, while coming from a world where magic is all-important.
* Jewelpet (2009): Keigo Tatewaki (early 20's) with Rinko and her friends (14).
* Jewelpet (2009), Ruby spits out her orange juice as a reaction to Amelie brainwashing a baby.
* Jewelpet (2009)'s lair, culminating in a climactic mid-season battle.
* Jewelpet (2009) starts out as this, but it's dropped after 11 episodes.
* Jewelpet, all Jewelpets fall into one of four colour classes, depending on their eye colour — Magical Red, Blue, Green and Black. Magical Red can manipulate fire, Magical Blue can manipulate water and move objects, Magical Green can manipulate plants and use transformation magic, and Magical Black specializes in fortune-telling and the occult. Note that these are the definitions given in the toys' universe and they play no role whatsoever in the anime, where the Jewelpets'

powers are given more freedom.
* Jewelpet. All of the series share the same Jewelpets, but not the same characters in general to prevent canon confusion.
* Jewelpet contest. Charlotte, Jasper and Sakuran were also created by fans.
* Jewelpet franchise has gained a cult following in the western side of the fandom. However Ruby, Garnet, and Sapphie are very popular in the Japanese side of the fandom due to their cute appearances.
* Jewelpet Happiness: Chiari has chronic bad luck, so she's used to falling in a few pits and tripping on random objects several times a day. She even has an app that tells her the level of luck she can expect for the day; when it tells her she'll have good luck, it just means she'll fall in less pits than usual. She's very optimistic nonetheless.
* Jewelpet Happiness: Episode 38, about the gang setting up their Cafe for Christmas, only to have an overeager Jewelpet screw things up. Nene and Mouri develop their romance as a bonus.
* Jewelpet Happiness: incidental and background characters are often drawn as simple blue figures that have a mouth and eyes (as lines) at best.
* Jewelpet Happiness: Kousuke's grandfather met his wife Kasumi when she saved him from drowning in this fashion.
* Jewelpet Happiness: The Red Moon is not just a foreboding-looking moon; it's alive and the main villain. It possesses people so they'll spread its evil energy, called Unhappiness.
* Jewelpet has the squirrel monkeys Tata and Purinki. The latter is a Sweetspet.
* Jewelpet: In various seasons there is the couple of Ruby and Granite. Both have wholly white fur, with the insides of their ears and accessories being pink and blue, respectively. Eye colors sort of count; Ruby's are red while Granite's are blue.
* Jewelpet is about anthropomorphic small animals named after jewels, birthstones and other minerals, who can use magic with the power of their eyes, made of said minerals.
* Jewelpet is very much a sugar bowl. The most evil thing imaginable in the series, Dark Magic, tends to be locked away somewhere, or be extremely weak in the face of Jewel Magic. Provided it's kept at bay, virtually nothing bad happens.
* Jewelpet Kira Deco! and not relevant to the story for the most part.
* Jewelpet Kira Deco!: Episode 38, in which Peridot is Santa's helper and instead of reindeer, Santa uses an ice turkey-phoenix thing to get around.
* Jewelpet Kira Deco!: In a scene, this happens to a male office worker.
* Jewelpet Kira Deco! is a town of fish who's entire culture is based around this. They even sleep on charcoal grills to help them rehearse for the "big day".
* Jewelpet Kira Deco!: Pink doubts her usefulness to the Kira Deco 5 and believes she made it into the team because the scientist who recruited the members is her cousin. This is subverted late in the series when a flashback shows that the scientist chose the members based on how their traits and abilities balanced each other out and considered Pink as seriously as anyone else.
* Jewelpet, Labra is a cute little baby polar bear who ordinarily isn't grating levels of loud. If she's sad, however, she produces a massively loud cry that can destroy buildings and other nearby physical objects.
* Jewelpet: Magical Change: Episode 11 features a kappa that's as bowdlerised as it gets. She looks like a little human girl, with the turtle shell and dish on her head the only indicatives of her species, and all the harm they want to do to humans is surprise them.
* Jewelpet: Magical Change, the baby Jewelpet Labra looks through a reversed telescope and panics because she thinks the Earth is shrinking. She tells this to her friends and they believe her, leading to wacky hijinx as they try to avoid the end of the world.
* Jewelpet: Magical Change: The Kiraras' seal stamper carries one around in episode 18b since he's run away after a magic spell from Ruby backfires and makes all seal stampers useless.
* Jewelpet: Magical Change. The result is that a little sprout pops out of her head

due to seeds being in the droppings.
* Jewelpet: Magical Change when everyone uses Titana's Jewelwatch to time-travel.
* Jewelpet: Most Jewelpets have their birthdays in the months equivalent to the birthstones they represent. So Ruby was born in July, Garnet in January, Sapphie in September, Diana (diamond) in April, etc.
* Jewelpet: Sango's main characteristic is her voracious love of sweets, to the point where she introduces herself by saying she's a sweets expert.
* Jewelpet series all look very cute and cuddly and have precious little gemstone eyes that make it hard not to want to give them a hug. Even better, Lady Jewelina created the Jewelpets specifically to make humans happy.
* Jewelpet Sunshine (39) right before going all heavy and character-driven for the last thirteen episodes.
* Jewelpet Sunshine, and Kanon has to forcibly give him up, without a consolation prize.
* Jewelpet Sunshine; a solitary type who doesn't have many close friends, except for her delinquent group. There's also a concealment metaphor, as she acts extremely tough, but turns very mushy when she falls in love, much to her embarrassment.
* Jewelpet Sunshine but instead pulls a lever that drops washtubs on a few of the people on the stage, as well as a giant one on the giant Garnet prop, causing it to fall over and destroy the stage background.
* Jewelpet Sunshine by posing as a tour guide using fake human arms and legs in order to sneak into the human world.
* Jewelpet Sunshine, comes from a rich family, and is arrogant, confident, and snobbish, though her wealth is almost never brought up. She does mellow out a little as the show goes on.
* Jewelpet Sunshine gathers its main characters in the Plum class, known as the "classroom of lost causes", of Sunshine Academy. The students in it are known for very disruptive behavior, though grades are a mixed bag.
* Jewelpet Sunshine is focused on Yaginuma, a not-very-sapient goat who is somehow part of Sunshine Academy's high school classes. Ordinarily Yaginuma is animated like the rest of the characters, but in this specific episode he's live-action and some Jewelpets, who are animated like normal, appear next to him. At the end of the episode, Labra notices he looks different and realizes she never undid whatever spell she cast on him to make him live-action before doing just that.
* Jewelpet Sunshine, Kanon and Mikage start dating around mid-series; towards the end of the show, Kanon's adoptive-all-along mother reveals to her that she and Mikage are actually twin siblings, who had to be separated because of a misinterpreted prophecy.
* Jewelpet Sunshine, meaning all the major characters are at least 18.
* Jewelpet Sunshine of the otherwise delinquent-filled Plum Class, says this:
* Jewelpet Sunshine permanently turn into a Jewelpet so he can be with the Jewelpet protagonist forever. Meanwhile, the plot neglects to address the feelings of his parents and sister about this decision, not to mention he disappears for 5 years without telling anyone so he can turn into a Jewelpet.
* Jewelpet Sunshine, Ruby catches Kanon and her friends with a love letter for Mikage and gets this response from Titana when she wonders what's going on. Kanon's friends are not happy with the statement.
* Jewelpet Sunshine: Ruby pranks the new teacher by having a blackboard eraser drop on him when he opens the door. The teacher happens to be a dolphin and it lands right on his blowhole, covering it with chalk, and making him look dead for a few seconds.
* Jewelpet Sunshine: Subverted. In episode 16b, the gang is trying to get past a security laser system to steal their summer vacation homework. Labra nearly sneezes, but Kanon's friend stops her... only for her to trigger the lasers herself in the process.
* Jewelpet Sunshine, the Jewelpets, while helping Sakuran the Sweetspet to deliver Christmas presents, set up a seesaw and use it to catapult some presents into a stocking hanging outside the house.

* Jewelpet Sunshine: Three examples. One is Nejikawa, who's forgotten by his classmates at least once. In one episode, he comments that he has become "as invisible as Yaginuma", which suggests the same thing of this character but is never really proven due to his limited screentime. Finally, there is Katori, who's so small, characters keep forgetting she's there.
* Jewelpet Sunshine, when a babified Ruby fills her diaper while being carried on Kanon's back, a screen reading "We are experiencing technical difficulties." and depicting an anthropomorphic wad of feces briefly appears.
* Jewelpet: The titular Jewelpets all have a natural ability to cast magic. This is downplayed as other beings, like humans, can cast magic too, but they have to learn it.
* Jewelpet Twinkle: Akari's older sister Monica had help from their mother Marie in getting launched as an idol, as Marie is an editor for a magazine and thus has a lot of connections in the mass media industry. Monica is aware of this trope and tries to break away from it.
* Jewelpet Twinkle, Akari takes her crush Yuuma flying through Jewel Land.
* Jewelpet Twinkle: Episode 39 features Akari taking her love interest Yuuma on a tour of Jewel Land on Christmas Day.
* Jewelpet Twinkle flames that increase in size with every object they consume.
* Jewelpet Twinkle has the Rare Rare Drops, candies that help Earth people understand Jewel Land's language.
* Jewelpet Twinkle if she sees one. This is the same girl who thinks snakes are cute, by the way.
* Jewelpet Twinkle: In the last episode, Ruby leaves on a journey through Jewel Land, accompanied by a few other Jewelpets, to find the Flower of Happiness, wherever it may be. The OVA shows that they are still at it.
* Jewelpet Twinkle is almost never seen without her totally frivolous cat ears and tail. Her various magical girl outfits also seem tailored for this trope, unlike her fellow mages.
* Jewelpet Twinkle is American. She likes manga and cosplay, and whenever she goes to Japan she takes the opportunity to buy loads of merchandise.
* Jewelpet Twinkle, Labra is sent to Akari's school to inform Yuuma that Akari has something to give him on the school rooftop. Labra floats to her destination with balloons tied around her, but some birds pass by and pop them all.
* Jewelpet Twinkle, Labra the toddler Jewelpet develops a crush on Akari's 6th grader friend, Yuuma.
* Jewelpet Twinkle, Miria and Sara swap voices along with their bodies after an accident involving Headmaster Moldavite mixing their potions.
* Jewelpet Twinkle, Miria befriends Angelina after beating her at a Jewelstar Grand Prix event. The latter's Jewelpet, Amelie, as well as Miria's Jewelpets Garnet and Sango, all say Amelie's catchphrase "Okay, please applause!" and are immediately met with applause from the audience.
* Jewelpet Twinkle, one of Headmaster Moldavite's "Stop-Hiccup-kun" magic items sends everyone onto a rope bridge in the middle of nowhere. Ruby and Tour have fun bouncing on it, leading to them breaking the bridge and making everyone fall.
* Jewelpet Twinkle's 53rd episode is a 28 minute long OVA with new opening and ending sequences which are included in the Blu-ray box set release of the series. It's centered around the adaptation of a character, previously residing in Jewel Land, to the human world, and so it's less humorous and more of a character study than most other examples on this list.
* Jewelpet Twinkle, Tata magically makes a bunch of banana peels appear on the race track so that the other competitors slip on them. Dian uses a magic spell to blow the peels towards Tata, and he ends up slipping on one himself and loses the race as a result.
* Jewelpet Twinkle, Tour announcing the first round of the Jewelpet sweets-making competition and its house theme comes right before the commercial break. At the beginning of the second half of the episode, Tour's dialogue is repeated.
* Jewelpet Twinkle, with her dream being about her with Akari's crush Yuuma. In the real world, she ends up kissing Ruby instead.

* Jewelry Bonney ate an unnamed Devil Fruit that allows her to accelerate and
* Jewelry commercials are notorious for making a very subtle claim that your romance will be passionately rekindled when the sight of a diamond turns your wife into a squealing little girl.
* jewel shard was ever shown to be able to defy death itself (for another, that is; she could not defy her own death).
* Jewel'.) She sang a few of her own songs, to acclaim from the crowd. She then stripped off the disguise and went back in as herself and sang a few. No one made the connection. Admittedly, it was dimly lit.
* Jewels Ocean is said to be the most beautiful being, even envied by the gods for. One NPC even outright states, "Her beauty surpasses even all of the jewels around the world".
* Jewel Staite putting a different name tag on her dog's collar each time he watched him. One time he made the name "Watdog" so when people in the dog park asked him what his dog's name was, he could say, "What dog?"
* Jewel, which was released a few months after she gave birth to her first child.
* Jewish American Princess, which takes the vanity and narcissism of the valley girl and adds sexual prudishness and an ethnic dimension.
* Jewish Autonomous Oblast in its early days; the Jewish residents never exceeded a quarter of the population. The fact that it was located in the middle of the Far East along the Chinese border, a place with no cultural meaning for Jews, did little to endear it to them, nor did the opposition of the natives. The Oblast still exists today and is still officially a "Jewish Oblast", but only 0.2% of the population is Jewish.
* Jewish Community Centers. However, some locations under the JCC umbrella still call themselves the Y (or formally, "YM-YWHA"), with perhaps the most notable example being the famous 92nd Street Y in Manhattan.
* Jewish example: Carol Matas, best known for her young-adult novels about the Holocaust, wrote
* Jewish folktale. Everyone had to do some task and if they succeeded they could marry the princess and if they failed, they would be beheaded. So, when the hero succeeds after his brothers have failed, the first thing he does is behead the princess and send her head in the mail back to her father.
* Jewish funerals give a full eulogy, here's what I would say..." and then proceed to give the full eulogy.
* Jewish gangster Mickey Cohen believed you shouldn't leave home not dressed up. His stated occupation was 'haberdasher', and he ran a men's clothing business in Los Angeles.
* Jewish/Irish opened on Broadway in 1922, and quickly became a laughingstock of theatre critics. It closed five years later, having run longer than any previous Broadway show.
* Jewish Mother; since only the most disgusting and pathetic members of his race survive to raise the young, who do you think's going to be teaching them their standards?
* Jewish Mother with raspy voice who treats him as a young teenager. She treats the guys as kids who came to play etc., but to be fair, Howard clearly depends on her to take care of him as though he's a child; this and his complaining amounts to a lot of mixed signals.
* Jewish Revolts, especially the fall of Jerusalem, and later Masada and Beitar, were the final nail in the coffin of an independent Judea. The Romans destroyed the Temple, fundamentally changing the nature of Judaism, and there wouldn't be a Jewish state in the Land of Israel until 1948.
* Jewish Revolts had been put down. They were eventually besieged by the Romans, and committed mass suicide to avoid capture.
* Jewish Revolts Herod was unpopular and this sparked a major religious uprising that continued until the Fall of Masada. Judaism would continue to trouble the Romans with further rebellions until Hadrian crushed and scattered the Jews into diaspora and even renamed Jerusalem as Aelia Capitolina, forbidding the re-establishment of the Temple. Jews who adjusted to Roman customs, and accepted Roman

rule were not proscribed but the main tenets of their religion and its ties to Jerusalem were definitely forbidden.
* Jewish tradition upholds that the prophet Isaiah met his end up being sawn in two, as one of the deaths of the heroes of faith in the
* Jewish treatment." The singer praises Santa's work ethic and wonders how he manages to put up with it all without complaining.
* Jew or Not Jew. They concluded that six of the dwarfs are Jewish (Dopey being the non-Jewish one) because apparently in a large group of Jews you have to have at least one non-Jew.
* Jews adore Kyle. Mostly because his character is very relatable to anyone who grew up Jewish, and also the fact that the
* Jews believe themselves to be God's Chosen People. As such, they have extra responsibilities beyond that expected of the rest of mankind. This is why they make it so hard to convert.
* Jews could also cross the borders between Christian and Muslim kingdoms and get an in to the economy on the other side that couldn't be gotten directly. As a bonus this also made them handy diplomats and spies on occasion.
* Jews for Jesus is an organization of Jews who converted to Christianity. They often stress the commonalities between the Jewish and Christian religions or re-interpret Jewish texts and rituals to make them more Christian. To many Jews, they end up as this trope or worse.
* Jews have been (and possibly still are) a real-world example of this. There've been multiple diasporas, during which the Jewish people have maintained a religious, cultural, and to some extent racial identity. Some would argue that even with the State of Israel there's a diaspora now, hence the possibility that this applies currently. Plus, there's a ton of "promised land" references in the Hebrew Bible and other, more recent Jewish literature. Furthermore, the Hebrew Bible explicitly refers to the Jews who survive various conquerors and are taken captive instead of being killed as a "remnant"
* Jew Süss (1940) is the most infamous example, though the main claim is that Jews rape Aryan women, which is elaborated on towards the end - this is in-keeping with Josef Goebbels's belief that propaganda should be as subtle as possible, so that the people maintain the illusion that their ideas are the product of rational thought and are therefore more likely to commit themselves to them as they are seen as being something personal to them rather than something the state hammers into them. The film was so effective that it reportedly inspired several murders of Jews in Nazi-occupied Europe, and was shown to concentration camp guards.
* Jew Süss and eventually ran his car full speed into a tree in 1946. His wife drowned herself in a lake three years later.
* Jew Wario, who, until revelations of sexual misconduct posthumously sprung up, had one of the cheeriest public personas out of all of them, and wound up dying of suicide in early 2014.
* JewWario would later be finished. (While MarzGurl later regretted finishing it after finding out about his history as a sexual predator, she kept the video up out of respect for everyone else that worked on it.)
* Jexi wasn't screened for critics until the day of its release; and ended up receiving largely negative reviews and low box office.
* Jeyne Poole, who isn't really dead, but the people who want to marry her off can't find the real one, and think she's most likely dead by this point.
* Jey Pawlik which is an autobiographical comic about their thoughts and experiences with gender and identity, and uses they/them pronouns.
* Jezail muskets, some of which were cobbled together from parts used by British Brown Bess rifles going back to the First Anglo-Afghan war, which started in 1838.
* Jezebel has been saddled with a reputation as an evil queen for millennia. The Bible accuses her of trying to kill every Jahve's prophet in the country and having an innocent man executed just because he would not sell his vineyard to her husband.
* Jezebel Jet dated Bruce Wayne while trying to break him on behalf of the Black Glove in

* Jezebel sometimes call themselves and other members "lesbian shitasses" in response to a slur hurled at them by former actor Scott Baio's wife, who called them (and probably feminists in general) that via Twitter in a rather childish attempt to insult them.
* Jezebel, the wicked queen of Israel, could very well be the poster child for this trope. She is extremely beautiful...and has the people of Israel killed if they refused to worship the Phoenician god Ba'al. In the process, she turns many Israelites away from God.
* "JFK, blown away - what else do I have to say?!" part of "We Didn't Start the Fire" other than that, you have earned the right to call yourself a true admirer of that song.
* JFK, footage of an interview is used to depict Kennedy as ready to withdraw from Vietnam. The clip ends before the President tells Walter Cronkite that “I don't agree with those who say we should withdraw.”
* JFK, grew up under a new name when her mother remarried shortly afterward and didn't know Oswald was her father until she discovered a box of old letters and newspaper clippings in the attic.
* JFK. He revealed in an interview how much he regretted not moving a second faster and taking the third (and fatal) bullet himself.
* JFK is one of the best examples of this, regardless of what the viewer may think of the premise. Virtually every scene features a well-known actor making an unannounced appearance.
* JFK preferred to skinny dip in the pool, sometimes with girls (also naked). He allowed the press to interview him while doing so on the condition they also swim naked.
* JFK Secret Ops where Kennedy survived his assassination. Part of the comic is set in 1965.
* JFK. Stone would later express regret at not making it clearer that the film wasn't meant to be entirely truthful, but more a metaphor for the American public's frustration at not knowing how the assassination really happened.
* JFK to detailing every single mistake, omission, and outright lie Stone and other writers made in their quest to prove a conspiracy to kill Kennedy.
* J. F. Sebastian spends his lonely days retrofitting toys as robot companions in
* J G Ballard's short stories "The Overloaded Man" and "The Subliminal Man."
* J. Geil makes it very clear that he enjoys women screaming and inflicting guilt onto their loved ones.
* J G Hertzler, who played several roles in the franchise, most notably the Klingon military officer and politician Martok and the outlaw Founder Laas in
* J. G. Keely. He has even written long explanations of why he has chosen not to read certain books based purely off of other's reviews.
* J.G. Thirlwell soundtrack, has also been the primary member or major collaborator of:
* JG Thirlwell's project "Foetus" reluctantly added, which took a different name for every new album: Foetus Under Glass, You've Got Foetus on Your Breath, Scraping Foetus Off The Wheel...(argueably, those are the album titles, but The Other Wiki agrees with this reading)
* J.G. Wentworth, a financial services company, had (877) CASH-NOW, sung in Wagnerian opera style.
* J.G. Wentworth "Bus Opera" commercial, mind you, but not lower than some of the men in the commercial.
* J.G. Wentworth's ads featured a catchy song with what they did, their name, and their phone number in the lyrics, neatly averting this.
* Jha'Dur with her practices) turns out to be still alive Na'toth, aide to the Narn ambassador, tries to murder her on the spot, and Earth finds itself in trouble for having an interest at keeping her alive.

* Jhereg series with some degree of regularity, as demonstrated by the signature quote: "No matter how subtle the wizard, a knife between the shoulder blades will seriously cramp his style."
* Jhin is a masked madman that acts as a mix of a Trickshot and a sniper.
* Jhin masks: one with a plain black leather covering obscuring his entire body and an ornately carved ivory mask on top of it. He acts as a covert assassin for a shadowy cabal, so it would make sense for him to hide his identity, and many of his voice lines reference his killings as being the only true way to express himself.
* Jhin, the last of the Tyrants, one of Hardy's most powerful beasts. The Tyrant lived to kill Lords and Kings, enslaving the very spirits of the wind and storm.
* Jhonen Vasquez According to fans of that last one, absolutely everything good about the show was his personal idea, and everything bad was due to the Nickelodeon executives, the demons to Vasquez's godhood.
* Jhonen Vasquez, and a man with tiny, squat legs, and an upper body so enormously overmuscled that he can't lift his own arms. One of the travelers jumps on his back (which he can't reach), and proceeds to stab him over and over again, exclaiming with glee that he can keep stabbing all day, as there's so much muscle, he isn't getting anywhere near any vital organs.
* Jhonen Vasquez are "Bolognius Maximus", "Game Slave 2" and "Backseat Drivers from Beyond the Stars".
* Jhonen Vasquez call him Mister Satan. And his son, The Dark Messiah, The Unholy Son, The second coming of evil... His mom calls him Pepito. His doggie's name is woofles.
* Jhonen Vasquez episodes. He's the guy with the red hair and sunglasses who swallowed a piranha in "The Wettening".
* Jhonen Vasquez has the comic-within-a-comic Happy Noodle Boy. Interesting in that they don't suck too bad at first, but get progressively worse as Johnny slowly loses his sanity.
* Jhonen Vasquez. He only really hates his fan dumb and even then, he's only even expressed displeasure for a few fan dumb behaviors.
* Jhonen Vasquez incredibly stupid so Bob's pronouncements aren't unjustified.
* Jhonen Vasquez is made of this trope. He never sticks with any project for very long.
* Jhonen Vasquez larger and more varied audience than his early comics.
* Jhonen Vasquez wrote a comic where he is confronted by five stereotypes of his weirdest, creepiest, or most annoying kinds of fans and must fight them all to the death when they merge into a bloated abomination.
* Jhumpa Lahiri deal with Indians (specifically Bengalis) living in America and struggling to assimilate into the culture for various reasons.
* Jhumpa Lahiri focuses on both arranged marriages and love marriages, while her subjects are mainly Bengalis (northeastern Indians). It's somewhat justified because Bengalis tend to be more liberal about marriage than other Indians.
* JHV'ed Groove Coverage's "Runaway" in "Bad Boy", then plagiarised themselves with a song ironically also titled "Runaway".
* Jiaan. The entire deghan army has just been destroyed, leaving Farsala with no defenders, and he only speaks a few lines, but we can assume they work. By the next book, he has assembled a ragtag but effective army.
* Jiang reworked the defenses to lure enemy armies into chokepoints where they could be destroyed (and thus gain a glorious victory), they failed completely and left Shu open to invasion.
* Jiangshi associated with I'Cath, which in this iteration of the setting is an actual populated domain.
* Jiangshi stories originated in the Qing dynasty, when many workers were conscripted to work on backbreaking foreign projects. As such, many of them died, with families requesting for the corpses to be returned home for burial.

Transporting corpses without government permission was illegal, and so it was done at night by tying corpses to the backs of workers, creating the impression of a hopping, nocturnal corpse.
* Jiang Shi subordinate. Aside from that, Seiga also has a Spell Card titled "Evil Sign: Yang Xiaogui", which is a sorcery involving the resurrection of dead fetuses by having dead spirits possess the corpses.
* Jiang Wei, true to history, tries to be this but fails pretty miserably.
* Jiang Ziya Nine-Tailed, as he seeks to help Xiao Jiu — an amnesiac young woman with fox-ears — regain her memories and uncover her sinister connection to Nine-Tailed.
* Jian (one-handed): Known as "The Gentleman of Weapons", the jian is not just a national weapon but a cultural icon. One of what is considered the four "main" weapons of Chinese antiquity, the jian was the weapon of officers, nobles and men of high standing. The typical jian has a double-edged blade and often include a colorful tassel in the pommel. Most modern blades are flexible for ceremonial or performance purposes. A staple of Chinese historical fiction, it is a requirement of any proper

* Jib Jab's Big Box Mart counts in regards to big box stores like Wal-Mart and their negative effect on people.
* Jib Jab...specifically, they didn't really die, their families made up, and they had "ten million babies"!
* Jib Jab turns famous public-domain songs (and at least one that's still under copyright) into satirical songs about politics and pop culture.
* Jick's. Ever. There's a filter in the in-game chat to prevent it being spoiled there, and spoiling it in the forums will get the mods all up on your ass.
* Jidaigeki along other professions which were deemed dirty and impure by Japanese society.
* Jidaigeki and Troperiffic, although two sets the bar for the video games department:
* Jidaigeki features the title group of bandits doing one last job before retiring once and for all. Things go poorly.
* Jidaigeki, however, comes when he is pursued by the heroes through a construction-site, grabs some random pieces of wood and some tools without slowing, and craft them into an attack-robot to sic on his pursuers. Without ever stopping.
* Jidaigeki period. There was a reason why the era is often referred to as "The Age of the Country at War". At some point, every major power in Japan had a battle with someone else and alliances were very shaky indeed.
* Jidaigeki there so that he may have the honor of being buried on his land. He expects that the daimyo will refuse his request and instead give him a few coins to go away. Unfortunately, the daimyo calls his bluff and forces him to go through with the act. To make matters even worse, Motome is so destitute that he has already sold the metal blades of his swords, so he has to disembowel himself with a blade made of bamboo.
* Jigen-ryu to intimidate and disorient the opponent. Even in modern training, martial artists of this style screech wildly as they strike practice targets with that single stroke thousands of times daily.
* Jigen stands out from the group as having the highest body count of dead lovers. Not just

* Jigglypuff was medium-low tier in 2002. It later became top tier after a player named Hungrybox (a member of the Five Gods) pioneered a very defensive strategy where he would chip away at an opponent until they got so frustrated they made a major mistake, where he would instantly punish them. Following this, Armada (another of the Five Gods) picked a similar low-tier character, Young Link, and implemented an even more defensive strategy where he would simply hop around the map and evade H-Box's Puff while throwing all of Young Link's projectiles at him to zone him away, chipping away at Puff until he could go in and get the final kill. Following
* Jiggy Mccue. The titular toilet is a website where, if you feel your life has 'gone down the pan', get someone in the room who's got it better, and hit the F key. Hilarity and mild Squick ensues when the protagonist accidentally tries this with his female second-best friend Angie. Suddenly, the pair wake up having swapped bodies overnight. The trope comes in when they hilariously try to adapt to life as the opposite sex, let alone learn all the behavioral nuances of each other they'd never noticed. Surprisingly, after a couple of days swapped, they find that aside from a couple of glitches, they are kind of perfectly suited for life as the opposite sex (said glitches mostly involve Angie-as-Jiggy beginning to hoard cushions, which thrills his mother). Some of the mishaps they encounter:
* Jigoku no Gouka de Yaka re Tsuzuketa Shonen: After having a dream of Flare returning from the Gates of Hell, Flare's master made a set of Chaos magical equipment to give to him as an apology on the faint chance that his student would return. Flare finds the equipment in a drawer a thousand years later, wearing it as a memento of his dear master before setting out to experience his second life.
* Jigoku no Gouka de Yaka re Tsuzuketa Shonen, Flare initially struggles to control his hellfire with any degree of precision, burning away underbrush haphazardly and nearly burning Primavera while trying to take care of a raging giant boar. He comes up with the idea of using his shaman magic to concentrate the fire around his arms to make them easier to handle rather than shooting them everywhere.
* Jigoku no Gouka de Yaka re Tsuzuketa Shonen, Flare is ripped to kingdom come and is strong enough to beat multiple people senseless with his bare hands even while they're flinging magic at him. After emerging from Hell, his strength is enhanced to the point that a huge sack full of supplies and even a suit of heavy armor feels like a backpack to him. He casually riddles a suit of treasured holy mithril armor from the White Pearl Kingdom full of dents with regular punches.
* Jigoku no Gouka de Yaka re Tsuzuketa Shonen, Flare seems to have little attraction to the opposite sex, if any. He's simply baffled when Aishera accuses him of being ready to jump Primavera at any time. He also doesn't understand why Primavera and Aishera are so mad at him for stripping them naked in their sleep so he can take their measurements given that it wasn't his first time seeing naked women.
* Jigoku no Gouka de Yaka re Tsuzuketa Shonen: It's unclear how human Flare still is after his trip to Hell. His body is a transformed version of the fires of Hell, and he can emit fire and wrap himself in it without burning himself. His strength

and speed are inhuman even when compared to his previous athletic prowess, to the point that he treats a harsh hike through the forest as a casual jog when a knight like Aishera is winded and sweating.
* Jigoku No Gouka De Yaka Re Tsuzuketa Shounen: Even before absorbing the flames of hell into his body, Flare is strong enough to easily beat up a whole crowd of shamans his age with nothing but his bare hands and with little apparent effort. He mentions doing 20 sets of 5,000 pushups and 7,000 sit-ups to his master, and regularly wears magical restraints too heavy for ordinary people to lift.
* Jigoku secretly aspired to attain godhood so he could use his power to make all women of his choosing
* Jigoro. He's still a huge ass while asking it, but it does show that the above comment was just an attempt to change the subject and avoid thinking about it. It obviously didn't work.
* Jigoro, in response to Hisao suggesting that he visit his daughter Shizune at Yamaku, ends up asking Hisao when the last time he's called his parents. Hisao is forced to concede that he hasn't done a very good job of keeping in touch with them; other routes show minimal, and usually off-screen contact with them.

* Jikuu Senshi Spielban the situation was more like a typical sixth ranger; Red Python's counterpart, after being freed, joined the team with a new suit that matched Diana (Kaitlin's counterpart.)
* Ji Li (Nie Huaisang) and Wang Yizhou (Nie Mingjue) have such similar facial features that from appearance alone, they can convince any unknowing passerby that they really are brothers.
* Jill and some other women wrote a test for their magazine, with one question comparing husbands to kitchen appliances: an oven ("warm and self-cleaning"), a garbage disposal ("grating and eats anything"), a refrigerator ("very cold and the light's never on"), and a tea kettle ("Hot and steamy, done in two minutes"). Jill chose that last one for Tim and added a quip that he does "whistle when he's done".

* Jillian Hall in WWE's Divas division - and had to watch Melina win it minutes later.)
* Jillian Hall. Jillian rolled Maryse out of the ring and lay down in her place attempting to pull the switch. Of course Jillian and Maryse aren't twins and the ref wasn't fooled.
* Jillian Hall. Jillian tried to pull the switch swapping places with Maryse...only to have the ref order her out of the ring. Not only do they not look like twins, they weren't even wearing the same outfits.
* Jillian Hall. She eventually stopped winning altogether, though she was granted one Divas' Championship reign – which lasted about a minute.
* Jillian Hall, until Ashley posed for Playboy and got a lot of attention, including a spot in a Timbaland music video. As an aspiring singer, Jillian was also envious of Lillian Garcia getting to sing the national anthem and having a more notable music career (or so WWE would have you believe. Jillian's album actually made more money than Lillian's) (ironically, jealousy caused Brandi Wine to try and kill her career back when Jillian was a rookie)
* Jillian Hall was in Ohio Valley Wrestling, she got breast implants and turned into a dumb blond, the storyline being that her implants leaked and the silicone went straight to her brain.
* Jillian Hall was raising a daughter around the same time she was training to be a pro wrestler.
* Jillian Hall (who actually is naturally blond, but bleaches her hair a platinum shade)
* Jillian Hall. With a twist, she got a real life album that sold well.
* Jillian herself is a Wild Card at best — and is even called such in the second book — and

Many scenes in Harry Potter appear to be close to direct copies of scenes in The Worst Witch, including things such as the broomstick lessons and getting into trouble for smuggling an animal into the school. The first book was published in 1974, and actually written well before that. While The Worst Witch is not really obscure, with new books still being published and selling well, along with multiple TV adaptations and most recently a theatre production, there's no question which series is better-known.
* Jill Sobule, the protagonist and her friend Jenny are both in relationships with men but are uncertain about their feelings towards them. While hanging out together they end up kissing. It's unknown if anything happened between her and Jenny, however, the protagonist is certainly changed by the kiss:
* Jill Stacy, Gwen Stacy's cousin. She was set up as a new love interest for Peter Parker after MJ's apparent death. When Mary Jane was found to be alive, Jill withdrew her advances toward Peter and her entire character is put aside.

* Jim Browning: Serious-ish scambaiter of Indian call centre fraudsters.
* Jim Browning's YouTube channel is dedicated to shaming tech support scammers and revealing details of their operations.
* Jim Brown is an NFL Hall of Famer and is routinely mentioned in every "Who is the greatest football player of all time" debate. He is also a Hall of Famer in lacrosse, which many of his contemporaries thought was actually his best sport, and after he retired from athletics he established a successful acting career that has spanned more than four decades.
* Jim Butcher. After looking into the background of both, Butcher started writing, but was unable to post the resulting story to win the bet because he thought it was good enough to publish (and get paid for). It grew into a six book series, by which point he'd completely forgotten where the bet was made and with whom.
* Jim Butcher, after the ambush in the Botanical Gardens, Harry gets rushed off for treatment by his friends.
* Jim Butcher are only the tip of the iceberg). Some fans have even noted that the length and detail of the description is directly proportional to the amount of in-universe time since the character last got laid.
* Jim Butcher as part of the coverup. They resort to an impromptu wake instead.
* Jim Butcher, called "Restoration of Faith", has an interesting take on a Bridge Troll... in Chicago, even.
* Jim Butcher. For the most part, the stories stick to European mythology, although creatures from other cultures' myths do exist. And while there are many different fantastical and magical elements present in the series, sci-fi ones are entirely absent.
* Jim Butcher in some form of a Mexican Standoff. He defuses the situations.
* Jim Butcher is revealed to be at least semi-sentient, though only once awakened by an Etherealist.
* Jim Butcher manipulation of them to be loyal to him. Granted, "small children" here is about ten, at least in Harry's case, which is more than old enough to avoid feeling like brother and sister.
* Jim Butcher's books - he's very gender-blind in assigning badassness, and many of his main characters have plausible romances with at least one other main character.
* Jim Butcher setting just so show that he could. He shopped it around to publishers a bit halfheartedly, not really thinking much of it and looking towards his next project now that he'd gotten it out of his system, and was rather

surprised when he found a publisher willing to take it on and commission sequels.
* Jim Butcher so people will serve them while still physically alive and well.
* Jim Butcher, the single punishment for violation of the Laws of Magic is execution by decapitation (regardless of whether the perpetrator was aware of the Laws or if they knew they were performing dark magic). The White Council justifies this by the fact that even minor dark magic perpetuates more and more dark magic use until the warlock's mind is twisted beyond recognition.

* Jim Carrey and was told that it had more drama. He chose the role of Lloyd because it had more laughs.
* Jim Carrey by diving onto to the antenna of the local cable companies' satellite dish from a great height in order to "kill the babysitter". (It makes slightly more sense in context.) The interruption of service this causes just happens to correspond to the exact moment when the verdict in a media circus trial is announced on live television.
* Jim Carrey/conspiracy theory that the number 23 appears in a lot of historical disasters.
* Jim Carrey from him — and a real one from her (made funnier by the fact that both of them have green masks on).
* Jim Carrey has a surprising amount of fangirls, (some of which are as young as their early-teens.) who find him (especially in his younger years) to be irresistibly delicious, especially on the fan-sites, where some forum users just simply can't stop speaking of their wish to see him naked, or to... well... yeah, you get it. Some of said teenage fans even think he's sexier in his current years.
* Jim Carrey has depression stemming from his traumatic, poverty-laden childhood. His father lost his job at age 51, and so he and his siblings were forced to drop out of school and work as janitors and security guards. He used to take Prozac before deciding to cease taking all medications and stimulants, including coffee.

* Jim Carrey said, "It's amazing how blank a script will be. It just says 'Jim does something funny.'"
* Jim Carrey (see above and below); this included not responding to his own name. (In addition, after the shoot was completed, Tony Clifton was discussed in Type One terms by all the participants.)
* Jim Carrey's portrayal of the character, though he is never described with one in Snicket's text itself.
* Jim Carrey, The Countess shrugs off the religious symbol ("Put down the cross, Robin. It only works in movies. Besides, I'm an atheist.") Then Mark shows up with a torch, and the Countess recoils, declaring, "Fire, on the other hand..."
* Jim Carrey The original script actually had him causing her boobs to grow twice more, and even give orgasms to his coworker Susan.
* Jim Carrey, though he always kept his comic edge. He lampshaded the trope in his first Golden Globe acceptance speech:
* Jim Carrey to demonstrate how remarkable his rubber face really is when it comes

to expressions. According to one account, it's basically how he got the latter role: "He took his face and he Grinched it."
* Jim Carrey unscathed. He asks them smugly, "Did you miss me?". He then takes a drink, sprouts several leaks and declares, "I guess not!"
* Jim Carrey, where Max does this to persuade The Grinch to save Cindy Lou in the post office.
* Jim Carrey, which drove most of his coworkers nuts. Once production wrapped up though, Carrey found himself feeling hollow inside, his entire state of mind having been shattered by the Kaufman persona. Much of his more infamous antics since then can be attributed in part to the sheer extent to which his mind was messed up by the persona.
* Jim Caviezel, making it difficult for audiences to see him as anything but Jesus and his career suffered for a while (something Mel Gibson warned Caviezel would happen), but his performance as John Reese is widely regarded as this.
* Jim Caviezel, reportedly had this happen to him while on a vacation in Mexico.
* Jim C. Hines curse loopholes are explained as being about leverage and possibility; a truly unbreakable spell would require an enormous amounts of power but true love is rare enough that it's functionally the same as an unbreakable curse. Which also implies that people only hear about the notable cases — the rare ones that have been broken.
* Jim C. Hines room for more than an hour. When Queen Beatrice asked Snow why she did it, Snow said that "she wanted him to know what it felt like to be a peon". Talia said that she told Bea that whatever Snow's punishment was going to be, it ought to be doubled just for that pun.
* Jim Clark. him; Hill and Stewart were good friends of Clark's, and were devastated by his death. Fangio himself once stated that Clark was the greatest driver of all time, and Senna named Clark as his boyhood hero, declaring him the best of the best.
* Jim Cornette and see if you can keep up... He developed the motormouth shtick because he got used to having more interview time before switching promotions in '85.
* Jim Cornette are a disgrace to the business and would have been blackballed and/or beaten up back in his day.
* Jim Cornette as it was not liking powerful women in general). Since working in the LPWA and becoming an owner of OVW for a time, Jim has admitted to finding women who can compete on par with men attractive. He maintains that he still sees no appeal in female body builders, though, and still hates breast implants.
* Jim Cornette being precedent for a whole flood. And even then, Cabana initially refused to return to ROH even after Cornette left and went back to OVW, saying he didn't like the new corporate owners either, and addressed the fact they mistakenly thought they could get him back after "the guy with the racket left" instead saying he returned for Carry Silkin.
* Jim Cornette but even that wasn't enough when he was put in a steel cage with Ronnie Garvin. Of course, it'd be hard to call Cornette an "innocent" bystander but the Express did turn face a few times.
* Jim Cornette did load it with a brick at least once, though. Actually, Jim has stated on many occasions that the racket was loaded with a horseshoe (that was thrown at him by a fan, and because it missed, he stated he figured it was lucky) and a dog chain. Furthermore, when things got serious, he would blast someone with the side metal rim, not the webbing in the center. As newspapers and lawsuits would show, Cornette bloodied and knocked cold more than one attacking fan thusly.
* Jim Cornette during his active career was "no swearing". Those familiar with his shoot interviews as his career wound down know exactly why.
* Jim Cornette, Fabulous Frank, continued to get chants of "Frank Is Gay" at Future Of Wrestling events.
* Jim Cornette has always worn them, although as a promotion owner and manager, he doesn't wrestle, so has never felt the need to hide it.
* Jim Cornette, he's made his preference for actual matches between trained women athletes than for cat fights visible. His lamentation being there are simply less

of those athletes available since Fabulous Moolah stopped working as a trainer.
* Jim Cornette in an attempt to intimidate a wrestler who had missed his cue to flee).
* Jim Cornette often refers to fans of wrestling he finds unacceptable as scum or idiots. When discussing fans of deathmatch wrestling he used the term "scum" repeatedly to show his disdain for them.
* Jim Cornette of this, stating that he only has two facial expressions: Normal and selling. To this day he derisively calls him "Johnny Sameface."
* Jim Cornette: Ran SMW from 1991 to 1995 and made his WWE debut in mid-1993.
* Jim Cornette, she was still probably giving just a few more dollars than she should have.
* Jim Cornette taking precedence over 1980s-1990s manager/promoter Jim Cornette.
* Jim Cornette), the audience cheered Cornette. Amusingly, the Dynamic Dudes included later X-Pac Heat recipient John Laurinaitis.
* Jim Cornette. The emotion of "vague or minor but tolerable dislike" does not seem to exist for this man.
* Jim Cornette told the audience that he turned down 83-year-old Mae Young's request to join the FWF, part of the crowd chanted "We Want Mae!"
* Jim Cornette was in the wrestling business for decades, and over those many years his pants would occasionally snag to due his own missteps, the actions of another worker or even attacks from enraged fans. Whatever the occasion, he would ALWAYS be wearing some ugly pattern on his underwear. Sometimes they were handmade, by Cornette himself, as he later revealed stores didn't always have something stupid enough to wear, literally turning this trope into an art form in of itself.
* Jim Cornette, who didn't like working people or women and (at the very least) was very unconscious or apathetic to the concerns of black people, and often wore a white suit. But he didn't get fat until a fall from a scaffold busted his knees.
* Jim Cornette willing to trust him, the state of Florida will not revoke his license and the promotion known as Future Of Wrestling continued to tolerate his presence(outside Florida and FOW Frank's publicity is not universally good).
* Jim Cornette with his mouth agape, looking like he just saw the most ridiculous thing he's ever seen. Cornette loved the concept so much that he enthusiastically agreed to the usage and even had merchandise made with the face on it(and proudly wears the t-shirt regularly).
* Jim Cornette wrote an opinion column once about how this is the proper way to have a wrestler (or his manager) cut a promo: give him a few points that he needs to hit during the promo and have him ad-lib the rest of it.
* Jim Croce also converted to Judaism upon marrying his wife Ingrid Jacobson.
* Jim Croce Live: The Final Tour from Saja Records): "It's like peein' in the pool. Everybody's done it."
* Jim Croce Live: The Final Tour reacts to an instance of feedback by imitating the sound and saying, "Sounds like a great big om."
* Jim Croce: "Operator (That's Not The Way It Feels)" is an attempt by a man to get in contact with his ex-girlfriend and her new boyfriend, the caller's former best friend, and let them know that he's gotten over the pain.
* Jim Croce's "I'll Have to Say 'I Love You' in a Song"...because of this trope. "Every time the time was right/All the words just came out wrong..."
* Jim Croce song "Bad, Bad Leroy Brown" is about a 6 foot 4 man from the South Side of Chicago, who is considered "The baddest man in the whole damn town."
* Jim Croce want to tangle with... but the rivals within the song managed to trounce them.
* Jim Cummings as two of his favourite roles, stating "they're both probably the closest to me - I kinda improvise a lot of them, kinda ad-lib".
* Jim Cummings land of Rashemen (geographically located in the same area as Belarus/Western Russia).
* Jim Cummings since 1988, said that he sometimes orders in-character as Winnie asking for honey.
* Jim Cummings was because he claimed that Tiana (the movie's lead character) looks exactly like his adoptive daughter.

* Jim Dale movies notably drew in a bigger audience — many of the audience crush-nursing young women — even with the movies that he didn't appear in, possibly in a hope to see him appear in a cameo. It was also probably why Dale's singing career was successful, long before he became an actor.
* Jim Dale universe can be, for some, quite hard to unhear. Snape and Umbridge being the worst offenders.
* Jim Davidson's act featured the notorious black stereotype character Chalky White. He claimed that black audiences loved the bit.
* Jim Davis has infamously admitted that this trope was the sole reason behind the creation of
* Jim Davis has stated that he's able to get away with all the abuse Garfield inflicts on Odie, and Jon as well, because Garfield is a cat. If Garfield were human, Davis states, the strip would have been cancelled long ago.
* Jim Davis once noted in an anniversary collection that whenever he has to go on a diet,
* Jim Davis passed away suddenly during production of the fourth season. The production crew had his character, Jock Ewing, go offscreen for a year while they figured out how to write out his character, then finally perish in an offscreen plane crash.
* Jim Davis. This, however, isn't true and is just an urban legend that's widely circulated. The final strip was a simple 1975 Christmas strip of Gnorm saying "Thanks, Pendleton" to the fourth wall.
* Jim Davis, when he got bored with it by having Gnorm stomped by a giant foot. Ultimately turned out not to be the case, however, as the last strip was just Gnorm wishing the readers a merry Christmas.
* Jim Dunnigan and associates have written books over the years including
* Jimenez admits outright that he volunteered just because of the pay (he's contrasting himself to the various more idealistic members of the Schwarzwelt expedition). We're not exactly talking the most pleasant human on the planet here...
* Jim Fullington, better known as the Sandman. Has been independently wealthy for more than a decade, and still goes out almost every night and gets the living hell knocked out of him due to the love of the "sport," and his love for the fans.
* Jim Fullington: Debuted in 1989, best known for his time in ECW in the 1990s as the Sandman.
* Jim Gaffigan and George Hamilton (as the "extra crispy Colonel," to promote extra-crispy chicken).
* Jim Gaffigan", but when they see him they think "I gotta do my taxes."
* Jim Gaffigan, especially his pale skin. A gimmick of his act is that he will frequently follow up his jokes with disapproving comments about them in a different voice, as if to suggest that is what the audience is thinking.
* Jim Gaffigan has a bit where he points out that life is easier when you're attractive. "If a stranger smiles at you and they're attractive, you think 'Oh, they're nice'. But if an ugly person smiles at you, you think 'What do they want?'."
* Jim Gaffigan in an extended bit on hotels, stating that anytime you are in a hotel pool with children you are "swimming in a toilet"
* Jim Gaffigan makes a lot of jokes about himself being this. Many of his routines are food-related, such as the "Hot Pockets!"
* Jim Gaffigan makes fun of his own act whenever he pretends to be the "Hypothetical Audience Member."
* Jim Gaffigan (on olive loaf): "I like my bologna like I like my martinis: dirty."
* Jim Gaffigan regularly has an 'internal audience.' A good portion of his jokes are commenting on what the audience must think of his jokes, in a high-pitched whisper.
* Jim Gaffigan sometimes interrupts his own routine to criticize himself by adopting the persona of a displeased audience member.
* Jim Gaffigan special, and how nobody ever does it with pie. "'I'm here!' 'Go take

a shower.'"
* Jim Gaffigan still feels obligated to do his "Hot Pockets" bit for fans despite it being one of his earliest bits.
* Jim Gaffigan talks about how uncomfortable it makes even religious people to talk about Jesus. He says that even the pope would say, "Easy, freak. I like to keep work at work."
* Jim Gaffigan voice to note that he's not only "going to Hell in two religions" but is in fact "practically sprinting" there. He also mentions that the people who say that are the ones he wants to meet in Heaven.
* Jim Gillette, Lead singer of Michael Angelo Batio's former band, Nitro, belts out a simultaneously awesome and hilarious 30 second falsetto scream in their song "
* Jim Gordon has made a point of not looking into who Batman is under the mask, using excuses to explain why he might not know who Batman is under the mask, and intentionally going out of his way to not find out who Batman is under the mask. It's quite clear that he knows damn well that it's Bruce Wayne (
* Jim Gordon ignores the Joker's probing personal questions, even brushing off a request for the time of day (though it was morbidly relevant to the question he was asked).
* Jim Gordon is generally portrayed as being a good enough detective to have found Batman's secret, but reserved enough not to tell anyone, even Bruce, likely because it would put him in an uncomfortable legal position. In
* Jim Gordon piloting a massive suit of bat-armor which even he complains looks a little ridiculous, and not like the real Batman.
* Jim Guthrie's song "Hands In My Pocket" was originally written for a Capital One commercial.
* Jim Hall's Chaparral Cars revolutionized auto racing and vehicular aerodynamics in
* Jim Hall: Widely regarded as one of the great guitarists in jazz; avoided the general tendency among 50s jazz guitarists to be super-fast show-offs and instead developed a subtle, thoughtful and highly musical approach which was very influential, especially on later players such as Bill Frisell and Pat Metheny.
* Jim Halpert can verge into this. He tends to play pranks on Dwight and Andy out of boredom, but occasionally because they're driving him crazy and pranking them allows him to turn their insanity into comedy. How sympathetic Jim is depends a lot on how funny his pranks are and how much the victims did to deserve them that episode.
* Jim Halpert, while not being as outrageous as Dwight or Andy, or nearly as stupid as Kevin, still is a notably mischievous employee, performing a large number of pranks that would normally be disapproved of in the workplace. To be fair, many of his pranks tend to be targeted at Dwight, whom is one of the lesser-liked employees, and a few others at Andy, whom the office likes even less than Dwight. Not to mention that when he is threatened with termination by
* Jim Henson, all of the bunnies dress up as a giant bunny to try to scare away the dog who was ruining their picnic. This part was actually discussed by the characters throughout the special's climax.
* Jim Henson, and a variety of commercials for both local and national markets. This continued until the birth of their first daughter, Lisa, when Jane retired from the company she formed with Jim to focus on raising a family.
* Jim Henson and MS-DOS a year earlier, and they are even buggier than the NES version, with the MS-DOS version prone to random softlocking.
* Jim Henson and Richard Hunt's deaths also resulted in most of their minor characters being phased out from
* Jim Henson, as Bert and Ernie respectively, that they are the only performers for Bert and Ernie to be allowed to write their own sketches.
* Jim Henson (both devoted at least a few weeks a year, Jim until he died and Frank until the late 1990s, to shooting new material with their respective characters), Henson disliked how it typecast him as a children's performer, even telling creator Joan Ganz Cooney over the phone that "[she] ruined [his] life." Similarly, Oz was

very hesitant to discuss it or his Muppet projects until recently, as he was worried that it would overshadow the work he has done as a director.
* Jim Henson Co. was that the actors and puppeteers who play the various Muppet characters are not allowed to engage anyone in an on-camera interview.
* Jim Henson episode performed live by humans and you'd basically have this movie). It was never produced in his lifetime, but it was turned into a graphic novel posthumously, with art done by Ramon Perez.
* Jim Henson Family TV, a subscription-service that hosted various non-
* Jim Henson, Frank Oz and Jerry Nelson. In one talk show appearance, the puppeteers wore identical outfits for the interview afterwards.
* Jim Henson. Goblins in a childhood bedroom plus kidnapping plus David Bowie's aggressively bubbling sexuality are bad enough, but then there's those horrible red Fiery puppets who juggled and swapped their body parts and sent their grinning, disembodied heads to chase our fleeing heroine while chanting "We just want to take off your head! Let us have your head!" Horrid.
* Jim Henson had Muppet Sing Alongs, which had a spin-off of its' own called "Things That...", which was a series of sing-along videos featuring the Muppets singing about different kinds of vehicles.
* Jim Henson in 2004. However, they are contracted by both companies to make new puppets and perform the characters in various media.
* Jim Henson in a public event, he is very gracious to fans, thankfully.
* Jim Henson, in which the Muppets encourage the viewers to do the activities featured in the videos.
* Jim Henson), Kermit hawks the Inner Tube cable system, claiming there's a channel to match one's IQ, income bracket and clothes. Some samples include the Millionaire's Shopping Network and the All-Kitchen Utensil Channel.
* Jim Henson know they're real, and have no idea what this strange bearded man is talking about). It didn't matter; many people who've worked with them have said seeing a Muppeteer doesn't stop the Muppets from seeming real.
* Jim Henson. Needless to say, it didn't materialize, but that was mostly because Henson and Sendak were becoming too preoccupied with other projects.
* Jim Henson outside of the Muppet fandom escalated after he passed away in 1990.
* Jim Henson Productions that use CGI characters have used a puppet-like armature covered in sensors, to allow the company's puppeteers to animate the character in real-time using their existing skills; Henson puppeteers regularly perform by watching their own actions on a video monitor. Generally, the low-quality real-time render is redone as a better render afterward.
* Jim Henson received flak at one point for... dating. Just dating. He was as baffled as you probably are right now, and it got dropped fast.
* Jim Henson reversed this, as all four characters were as prominent as ever in the various trailers and the film itself. Since the departure of Mupppet performer Steve Whitmire in 2016, Rizzo the Rat has suffered a similar fate to what Henson's and Hunt's character previously went through.
* Jim Henson's death, since it was thought that he was the character that most resembled Henson.
* Jim Henson's Dinosaurs. If they were herbivores it would be analogous to all the cooking/food channels we have on cable.
* Jim Henson's Dr. Teeth and fellow Muppeteer Richard Hunt's Scooter and Janice were in the same boat for the longest time as well.
* Jim Henson's non-Muppet fantasy films each have expanded universe material in the form of graphic novels.
* Jim Henson (some of which featured his two characters on the show, Convincing John and Cantus the Minstrel).
* Jim Henson's signature character, but his favourite was Rowlf the Dog. When he died, Kermit was recast, while Rowlf was retired for a while.
* Jim Henson stated once in an interview that if he didn't know how to end a skit, he'd just have one of the puppets eat one of the other puppets or have something randomly explode
* Jim Henson's The Muppets, and poor level design. Every level is a huge labyrinth,

and Kermit and Animal take damage from falling from even the lowest of heights.
* Jim Henson's version of the Mahna Mahna sketch ends with Mahna getting hit by penguins flung from a catapult. Scooter observes "We never did figure out how to end that bit."
* Jim Henson. The funny part wasn't just Jimmy burying his face in his hands; it was the fact that Jim Henson clearly couldn't keep it together and was slipping in and out of Rowlf's voice due to laughing so hard.
* Jim Henson. The next speaker was Henson's longtime friend and collaborator Bernie Brillstein, who was faced with basically doing the impossible - so he decided to acknowledge as much, and was met with a great deal of relieved laughter.
* Jim Henson, the song "Bunny Stew" is sung by the farmer's dog as he is following Bean. Most of the lyrics are about how stealthy the dog is being, and despite him singing them rather loudly, Bean doesn't seem to notice him.
* Jim Henson, the undisputed greatest puppeteer of the 20th century for his Muppets.
* Jim Henson this, he was not a ventriloquist and never tried to hide the fact that he was performing the voice of his puppets whenever himself was part of an act or was interviewed along with a puppet — camera work focusing on the puppets in such cases might have helped spreading confusion about him being one.
* Jim Henson thought chickens were the funniest animals in the world, so naturally, an episode devoted to chickens makes sense.
* Jim Henson until they met the other. And since Gelflings can now live in peace after the Skeksis and Mystics join bodies, they obviously will end up repopulating the Gelfling species.
* Jim Henson was never involved with the actual production (contrary to popular belief); in 1989, however, when the show celebrated its 20th anniversary, Henson wanted to express his gratitude and appreciation to CTW (now Sesame Workshop) for being a part of the show for all those years, by producing an anniversary special through his then-Henson Associates company.
* Jim Henson weren't especially big hits with critics or audiences, but elements of them would be incorporated into the main series, which would eventually go on to become the most popular show of its day.
* Jim Henson, which takes place in "another world" inhabitated by many different kind of creatures, none of them based on humans or any other specific creature from Earth. Henson originally wanted the Skeksis to speak their own fictional language, with the dialogue subtitled in English.
* Jim Hutton and Paula Prentiss did five movies together in the early 1960s. (Prentiss is 5'10" and would have towered over a lot of leading men. Casting her opposite the 6'5" Hutton kept her from having to walk in a trench all the time.)
* Jim Ignatowski was taking his driving test, leading to this classic gag:
* Jimi Hendrix: A famous quote goes: "There are two kinds of guitarists. People who say they are inspired by Hendrix and liars." Anytime a poll is held about the greatest guitarists of all time Hendrix is in the number one spot. If not, thousands of angry letters and comments will come in.
* Jimi Hendrix debuted in the top five in March 2010 nearly forty years after his death, shattering Elvis's record.
* Jimi Hendrix "excuse me while I kiss this guy," that Hendrix changed it. He was also known to point and kiss in the direction of a guy (usually his tour manager) immediately after singing the line.
* Jimi Hendrix instrumental "Third Stone From The Sun", an alien fleet arrives at Earth to search for intelligent life and somehow conclude that the only creature that qualifies is the chicken. At the end, they make off with all off the chickens before blowing up the planet.
* Jimi Hendrix is famously celebrated as one of the greatest guitar players of all time, but this wasn't always the case. Back when he was starting out, Jimi's guitar playing in the States was seen as too wild and unfocused for many bands he tried to join, and the few bands he did join, part ways with him shortly afterwards. It wasn't until he traveled to Europe that his guitar playing was embraced and he formed The Experience. He then returned to the States with the hit song "Hey Joe"

and the rest is history. His once unfocused guitar playing has since been used as a blueprint for many Rock guitar players that would come long after his unfortunate untimely death.
* Jimi Hendrix is from the point of view of an entity that has visited Earth once thousands of years ago during an ice age, and has come back to observe how things have changed:
* Jimi Hendrix. It comes from a club called "Spanish Castle" where Hendrix used to play before he got famous.
* Jimi Hendrix match the status of "Purple Haze". His second-biggest hit in the U.S.? "Crosstown Traffic" (peaking at #52), which has long since been overshadowed by tracks which had lower peaks, such as the aforementioned "Purple Haze" and "Foxy Lady", as well as songs that didn't even chart like "Hey Joe".
* Jimi Hendrix responded to being called "one of the best guitarists in the world" by saying he was "one of the best guitarists sitting in this chair."
* Jimi Hendrix revisiting Earth in the present after a thousands-of-years absence, refers to the planet as a "people farm", though not with the same sort of evil purpose the trope implies, but maybe a little self-inflicted by the people themselves:
* Jimi Hendrix's "Crosstown Traffic" enjoyed a revival in the UK after being used in a commercial for... um... something or other...
* Jimi Hendrix song. Like the Bette Davis note above, Dylan himself admits that when he plays it, he tries to play it more like Hendrix did, rather than he himself originally did, which was quite different.
* Jimi Hendrix stood with his guitar facing the speakers, becoming the first guitarist to use feedback deliberately in his music.
* Jimi Hendrix was inspired by a dream he had walking on the bottom of the ocean.
* Jimi Hendrix, was written by...some obscure Californian folksinger dude named Billy Roberts. A Dutch book about the stories behind songs traced the history of "Hey Joe", it's amazing how much it changed between Billy and Jimi. It also travelled all across the US before it got to him.
* Jimi Hendrix, who had just broken up. Hendrix was told he would never be on the BBC again after he finished the song, which suited him just fine as he'd felt "ridiculous" going on the show to begin with.
* Jiminez Hoffmann accidentally arranges his own marriage when he proposes a way to end a generations-long war by arranging a marriage between the Talpini prince and the Arguron princess. Of course, there's a species barrier - the Argurons are more or less human, but the Talpinis look like giant moles - but that's easily fixed. The Talpini king has adopted Hoffman as his son, so
* Jiminez Hoffmann apparently spends a large chunk of his time getting into various adventures in order to
* Jiminez Hoffmann eventually comes to realize that he has feelings for Larana... right around the time he mistakenly comes to think that she's in love with his brother, Aldin.
* Jim introduces Mike to this concept with the following joke. However, whenever Mike tries this on somebody else, they fail to respond properly. Eventually Dwight answers right, but Mike botches the joke anyway.
* Jiminy Cricket can't sleep because of all the snoring and ticking clocks in Geppetto's shop (prior to the Blue Fairy's arrival), so he yells, "QUIET!" They all freeze and all is silent.
* Jim is a main character in Episode 1, and then all but disappears (save for a few cameos) until Episode 10. Even then, he is still only a supporting character.
* Jim is torn in half and turned into a cyborg with artificial legs, pelvis, and left arm. He turns out to be
* Jim Jarmusch inserted black space to further slow down the pace. The film is general thought to be a reaction to the growing trend toward fast, flashy media.
* Jim Jarmusch) who is impressed by Corky and wants to make her a movie star, Corky turns her down, staying true to her unassuming tomboy working-class self.
* Jim Jefferies though he states that he finds it to just be a personality quirk.
* Jim "Johnny Cakes" Witowski is the chef-owner of a diner in New Hampshire and

boasts that his house-made breakfast sausages are "addictive." Vito Spatafore certainly seems to agree.
* Jim Jones becomes Mayor of San Francisco. Later, he serves as Chairman of the Progressive National Committee, and then Governor of California.
* Jim Jones had only two hits with 2007's "We Fly High" and 2009's "Pop Champagne". His followups weren't particularly successful on urban radio, let alone the Top 40.
* Jim Jones' People's Temple presented itself as a tolerant Christian church that promoted Social Justice and Civil Rights....but was really just a controlling outfit that could care less about faith and with worshiping Jones as a "God"-like figure.
* Jim Jordan was a famous vaudeville actor who had done a few short films in the 1940s as his stage character
* Jim Lee both began with them being noticed for their detailed fan art.
* Jim Lee is considered one of the most iconic and influential of the series; he illustrated a total of 25 issues between 1989-1992.
* Jim'll Fix It, a show where he granted children's wishes. Savile was "like Santa Claus, only real, and a pedophile. So basically, nothing like Santa Claus."
* Jim'll Fix It". When the DVD was re-released in 2014, the skit was pulled.
* Jim Lovell, the savvy, competent and balanced commander of the Apollo 13.
* Jim Lovell was a US Navy squadron mate of Pete Conrad, before they both joined
* Jim Macken aka Alois Trancy, from the anime's second season. It's confirmed in episode 8 that he was one of several young boys picked up as
* Jim makes a mocking remark about a giant teddy bear. One shows up in the first episode of the series.
* Jimmie (2008) has Michael Neuenschwander as Jimmie's father Michael Berger.
* Jimmie (2008) holds his arms bent like a T-Rex and shakes them while he walks. He also rubs his hand against his face and flicks his fingers.
* Jimmie (2008) is a Concerned Claire. She rats out her boyfriend Rick for abusing steroids, getting him temporarily kicked off the team and allowing Jimmie to take his place.
* Jimmie (2008): When Kathy introduces Jan to Jimmie, Jan holds his hand out, but Jimmie keeps holding his right arm against his chest.
* Jimmie Johnson has hands-down the best car in NASCAR, especially since it's financed by Rick Hendrick and Jeff Gordon. So why crew chief Chad Knaus was caught illegally altering the car prior to the 2006 Daytona 500 is anyone's guess. Knaus was suspended, the car was impounded, Johnson had to start the race from the rear of the field in a backup car — and he won the race anyway.
* Jimmie Rodgers, as the title suggests, is about the child of a man who became an alcoholic and then abandoned his family.
* Jimmie Rodgers' career only lasted about 6 years before he died in 1933. His impact has been felt far beyond country, with numerous musicians from various genres citing him as an influence.
* Jimmie Rodgers: While generally remembered as one of the early country music stars, his style incorporated a number of Blues elements (hence why he was later inducted in the Blues Hall of Fame)
* Jimmie Walker causing a rift between fellow cast member Esther Rolle who felt that the J.J. character was sending the wrong message.
* Jim Morrison, he is widely regarded as having perfected the modern "rock star" image.
* Jim Morrison slipped into this trope when he was parodying a fire-and-brimstone preacher at the beginning of the title song on
* Jimmy, a homosexual prostitute in Westside will only provide his services to a male Courier. if a female Courier asks for his services, he quickly turns her down.
* Jimmy Akin's Mysterious World, in which he and his producer discuss paranormal, supernatural, and other such strange topics "from the twin perspectives of faith and reason".
* Jimmy also frequently yells out "Hair emergency! Hair emergency!" when anything that might ruin his curls happens.
* Jimmy and Beezy are this to Miseryville's soccer star Wreckem, to the point of

interfering with his match against Lucius' team in order to get hoofprints from him, which ends up costing Wreckem the game.
* Jimmy and Chloe are alone in an elevator once not long after they broke up.
* Jimmy and the Pulsating Mass has Jimmy's older brother Buck. He's rude and domineering towards Jimmy, and kills Information Guy for being too wordy. His skillset is even labeled "Nerd Bash"!
* Jimmy and the Pulsating Mass. Jimmy is such an empathetic person that by imagining what it's like to be certain enemies, he can transform into them, altering his stats and giving him different abilities.
* Jimmy and the Pulsating Mass: Nearly all of the game's best equipment and weapons have to be obtained through the lengthy bonus minigames and sidequests, like earning points in the Dark Dungeon or tickets in the arcade to buy them. The very best are generally only obtainable in the post-game Heart Prison, at which point the only enemies worth using them on that are left are the bonus bosses in said Prison.
* Jimmy and the Pulsating Mass of the second Nightmare Zone (listed as ??? on the map).
* Jimmy and the Pulsating Mass: There's at least three skills for healing others. First Aid, learned from a manual, High Five, from the Low-Level Goon, and some other skill from the Happy Little Sunflower.
* Jimmy Angelo without the lucky necklace she left hanging on her rearview mirror...
* Jimmy - Any GMC truck, originated as a nickname but was later adopted by the company for their version of the Chevy Blazer.
* Jimmy Asher is a somewhat deconstructed example, as he's a kind, well-meaning man who is an ineffective and
* Jimmy Boyd had a novelty hit in 1952 with the Christmas classic "I Saw Mommy Kissing Santa Claus". Between its novelty stigma and the fact that Boyd was 13 at the time, the song cannibalized his career. He had a moderately successful acting career afterwards but never captured the stardom he had with his megahit.
* Jimmy Brooks was shot in the lower back and paralyzed in a school shooting, forcing him to use a wheelchair for the rest of his life and ending any chances of a basketball career. One Degrassi mini showed that had Jimmy never been shot, he would have received a scholarship for playing basketball.
* Jimmy Buffett has restaurants called "Margaritaville" and "Cheeseburger in Paradise" that are named after two of his greatest hits. The former has more restaurants than the latter. Also, "Margaritaville" has frozen food, beer, furniture, clothing, casinos, and barware under the name. The song has been considered to be the most valuable song, making more money off of related products rather than sales of the track.
* Jimmy Buffett in "Asshole song" lets the narrator in the song claim to have done the mom of the guy, who almost cut him off the road and about whom the song is about ("And I was talkin' to your mother just the other night").
* Jimmy Buffett offers a milder version in "Saxophones", lamenting that "they won't play (his) records in (his) own hometown" and suggesting that if saxophones were more heavily featured in his music, he'd "get some recognition from that Mobile, Alabama DJ".
* Jimmy Buffett often performs barefoot as part of his beach bum persona.
* Jimmy Buffett's song... not that Jackson really minds if Buffett plays it at Parrothead concerts.
* Jimmy Buffett tribute to New Orleans and what it endured during Hurricane Katrina, but the constant message of the song is that in the end, there is always hope.
* Jimmy Buffett, where the song was recorded. At the time the song was written (1979), the volcano had been dormant for centuries, though the song treats it as a given that it eventually would erupt. The volcano activated in 1995 and is still active now.
* Jimmy Buffett, which zoomed to #8 because of its star power before quickly falling from public consciousness.

* Jimmy Carr also made a joke about this. When asked why he refuses to give up his seat for a pregnant woman on public transport, his response was:
* Jimmy Carr: British comedian known for his black humor and deadpan delivery
* Jimmy Carr claims that Prince Philip called him a "funny-looking fellow" when he was a ball-boy at Wimbledon:
* Jimmy Carr had a joke where he mentioned how he read the word "chav" before actually hearing it, and thought it was pronounced "shav".
* Jimmy Carr has a stand-up bit where he talks about accents. The culmination of the bit is when he points out that saying his name with a Jamaican accent sound the same as "Jamaica" in a Jamaican accent.
* Jimmy Carr is called "the hardest working man in comedy" which he said "is like being called the most attractive man in the burns unit.". It was less offensive in context — until he made the "they stick together" joke.
* Jimmy Carr is nearly always decked out in an increasingly delicious array of suits. It should also be mentioned that his hair is just as impeccable as his style, with nary a lock out of place even when he's sharing an ice bath with a particularly friendly Georgie Thompson.
* Jimmy Carr—After one cheap shot at Christianity, he remarked "That seems to have split the room into two groups - one group thought that was hilarious, and the other is going to heaven."
* Jimmy Carr's live DVD titles are, in order of release: "Live", "Standup", "Comedian", "In Concert", "Telling Jokes", "Making People Laugh", "Being Funny", "Laughing and Joking". Which could be strung together as a single sentence describing all or any one of them.
* Jimmy Carr that satirized the tax avoidance of Barclays Banks. A few months later, it emerged that Carr was himself party to a K2 tax avoidance scheme.
* Jimmy Carr: This is an integral part of the comedian-heckler relationship.
* Jimmy Carr, while he does slow down when he does audience interaction segments, none of his "regular" jokes last more than 15 seconds. The jokes are essentially those lame gags found in Christmas Crackers spiced up a bit and delivered in such a deadpan style
* Jimmy Carter, baseball, Sno Cones") and ends up as a rant ("Money, privilege, spoiled rotten")
* Jimmy Carter). Basically, Carter was calling for citizens to conserve fuel during the current energy crisis, but it unintentionally took on a tone of blaming his citizens for causing the crisis.
* Jimmy Carter describes the tarring and feathering of a Tory by members of the Sons of Liberty. The man suffered severe burns on both feet as the tar filled his boots and had toes amputated as a result.
* Jimmy Carter intervenes in the situation and gets Hank and his dad to be increasingly less vague about it. The episode culminates in this trope, and afterward Hank and Cotton even have a good time bashing Jimmy Carter...
* Jimmy Carter occasionally carved out time to play with his youngest child, Amy, he was an absentee dad to his three sons, Jack, Chip, and Jeff.
* Jimmy Carter (played sprint football, a weight-restricted form of American football, at the US Naval Academy before going into politics and later the US presidency)
* Jimmy Carter's staff engaged a translator who rendered Carter's "I left Washington" as "I abandoned Washington," and "I love the Polish people" as "I desire the Polish people carnally." As soon as the mistake was discovered, the translator was fired posthaste. It turned out that the interpretor excelled in translating written Polish, but didn't have experience with interpreting spoken Polish at full speed.
* Jimmy Carter their responsibilities, rather than appointing capable leaders in those departments to do that work for him. After he left the White House, he ended up having a successful career as a diplomat, enough that historian Nigel Hamilton, who was critical of his Presidency, said his post-presidential work made Carter "the American Gandhi".
* Jimmy Carter, the unpopular incumbent president, was defeated for reelection due

to simultaneous mounting crises.
* Jimmy Carter together. Dole quipped, "That's hear no evil, see no evil, and evil."
* Jimmy Carter, with some newspapers printing that Udall had won in their headlines and Udall himself proclaiming "Oh, how sweet it is" (Udall was hoping that a win would slow Carter's momentum to the nomination down). Once the votes were counted, it was Carter that won that particular primary by 1% (roughly 7,500 votes) en route to the nomination and the presidency; while Udall would finish a distant second at the Democratic Convention that year. (Udall rather memorably "accepted" defeat by saying, "The people have spoken - the bastards.")
* Jimmy Carter working on Habitat for Humanity. Homer, obviously not having learned anything, tries to needle him into building him a house; Carter pulls out a glove and Homer screams and drives away as fast as he can.
* Jimmy Conway's homicidal rampage against the police and inhabitants of the town of
* Jimmy Cross' "I Want My Baby Back" was meant to be a mockery of those morbid
* Jimmy Eat World and it was released shortly prior they hit big in the mainstream.
* Jimmy Eat World in December of that year, with the title track retitled "Salt Sweat Sugar" (after a lyric from the chorus). A later reissue would re-instate the original title.
* Jimmy Eat World's "A Praise Chorus" contains the following verse, each line of which is a line from another song:
* Jimmy ends up cross-dressing frequently during the series, whether it's for disguise purposes, losing a bet or because he felt like it.
* Jimmy Fallon, in fact, described them as "a group people say they like but don't actually listen to."
* Jimmy Fallon was starting his comedy career in Los Angeles, he attended a house party that then-NBA rookie Kobe Bryant was also at. When the party was running low on alcohol, the two volunteered to run to the store and get more, only to learn the establishment was delivery-only and they couldn't purchase it on site. Bryant proceeded to show his ID to the clerk and tell him "I'm a Laker". After this, the clerk let them buy as much beer as they wanted.
* Jimmy Five — Originally Cebolinha — with his ironically named "Infallible Plans". Goal: take over the street and/or a plush bunny from Monica. And it brings another example of this trope, by his friend Cascão/Smudge - Goal: not joining the scheme... and then the beatings after they fail (
* "Jimmy for President" Carl does it as he runs away screaming out of the voting booth.
* Jimmy frequently displays a talent for fashion design that often evolves into a full-blown career as an adult, but unfortunately gets him
* Jimmy Gardner's comebacks mostly consist of third-grade caliber insults like "doofus" and "jerkface". Granted, it's still a step or two above Mike's boogeyman comment.
* Jimmy gets a nice red suit, presumably with his severance pay, towards the end of
* Jimmy, giving the numerous injuries he suffered in an arbitrary manner.
* Jimmy Glass, the English football player responsible for keeping Carlisle United F.C. in the Football League by scoring a goal
* Jimmy Glass. The fate of Carlisle's attempt to avoid relegation from the Football League (and probable folding due to the subsequent financial blow) has come down to the fourth minute of injury time in the last game of the season, when Glass,
* Jimmy Hart as the King. Lawler put Hart back in his place rather easily after healing.
* Jimmy Hart at Wrestlemania VI were enough for him to retire. The WWF's announcers pleaded for fans to send letters and cards requesting his return and to "heal" his fighting spirit, the response was (predictably) strong ... and by the start of August, Hogan had come out of his self-imposed "retirement" to gain revenge on Earthquake.

* Jimmy Hart would clobber opponents from behind with his bullhorn - when he wasn't verbally taunting them through it.
* Jimmy Havoc Chapter 21. He lost a hardcore match to Paul Robinson, his own stablemate, during which he made a subtle face turn. Then he was helped to his feet by Jim Smallman of all people, briefly waved goodbye to the crowd as they gave him a standing ovation and left the ring. He hasn't been seen since.
* Jimmy Havoc made him their top heel several other companies in England started to use him in a similar way to the point at that one point in 2015 he held five different companies championships at the same time.
* Jimmy Havoc: Popular British indie star who first made his name in PROGRESS and joined AEW in 2019.
* Jimmy Havoc sometimes uses these as part of his entrance. Jimmy himself wears a mask that covers his mouth, resembling a surgeon's mask covered in spikes.
* Jimmy Hoffa in 1975. It's generally accepted that Hoffa was murdered by organized crime, but the location and precise circumstances of his death remain unknown, and his body was never found. The FBI are still looking for his body.
* Jimmy initially mistakes Dolly for Golly before he notices her bow.
* Jimmy is lured to a full size phone booth at a vacant lot. A dump truck smashes the glass and steel booth, without any trouble, but Jimmy is able to hang on and jump in the back. He then pulls one of the mooks out of the passenger side of truck, and the other tries to shoot at him through the door and top of the cab, but Jimmy jumps off. The truck drives up a ramp, crashes through the cardboard sign on a billboard and explodes.
* Jimmy is supposed to be a very funny stand-up comedian that all the other characters find hilarious. He has yet to tell a single joke that is funny, though he has had several funny lines (none of which were in his comedy routine). In "
* Jimmy Jacobs Adrenaline Rush, which Thomas was apart of with actual friend ACH.
* Jimmy Jacobs after Jacobs cost Moxley the promotion's top championship belt and said that when he looked at Moxley he stared at himself in a mirror.
* Jimmy Jacobs after putting him in a sleeper hold and screamed "You want this Mickie? You want this you slut!"
* Jimmy Jacobs, catering to all his needs while treating Jacobs like crap.
* Jimmy Jacobs. Each being a more extreme case than the preceding. Consider he started as a commentator, one could say this of his wrestling career in general.
* Jimmy Jacobs from IWA Mid-South for trashing their heavyweight title belt at an All American Wrestling show, though he would show up again anyway, not caring about his ban.
* Jimmy Jacobs remake was eventually used as the intro for The Age of the Fall's actual entrance theme.
* Jimmy Jacobs revolved around his attempts to woo The Lovely Lacey but he showed an equal amount of interest in later ROH Champion Adam Cole.
* Jimmy Jacobs was offered the money from his missing pay check by All American Wrestling, to appear on one of their shows and thrash the IWA Mid-South belt. This lead to IWA M-S banning Jacobs for life after recovering the belt.
* Jimmy Jacobs when he realized that her love didn't redeem him, or make him feel any less hollow, or magically turn him into a better person. Quite dark and heavy stuff, if you think about it.
* Jimmy Jean-Louis auditioned three times for the role of D.L. Hawkins before being cast as the Haitian.
* Jimmy Jinx, "the unluckiest man in the world", appears in one episode of
* Jimmy Jones: The Alabama-born Jones had a massive hit in 1960 with "Handy Man", which hit No. 2 on the Hot 100. He followed up with "Good Timin'" which made it to No. 3. However, after that, his career went nowhere and he faded back into obscurity.
* Jimmy Kimmel Live! has a recurring segment called "This Week in Unnecessary Censorship", which consists entirely of this trope. So, for example, a clip of the President saying "I visited the Queen and we talked for hours" will have the words "visited" and "talked" bleeped out.
* Jimmy Kimmel Live! in hindsight after the 2016 election, depending on one's

political leanings.
* Jimmy Kimmel Live! on Republican Senator Pat Toomey of Pennsylvania during the 2016 US Elections mocking his indecisiveness to distance himself from Presidential Candidate Donald Trump.
* Jimmy Kimmel Live!, the irate rapper called up Kimmel and threatened him with, among other things: "You will never be able to show your face at a 14-year-old's high school football game and be cool again!"
* Jimmy Kimmel Live! to prove her health by opening a jar of pickles he just happened to have had hidden away, which she does.
* Jimmy Kimmell's cousin once snuck into Super Bowl media day simply by dressing up in the uniform of Carolina Panthers Kicker John Kasay. It worked, because of all the hundreds of reporters who covered the event, none actually knew what Kasay looked like.
* Jimmy Kimmel making fun of the whole idea of watching Let's Play videos.
* Jimmy Kimmel thought it would be funny for parents to record themselves telling their young kids that they ate all the Halloween candy.
* Jimmy later realizes that the implosion is not fun for Goddard and promises not to abuse that aspect of his talents.
* Jimmy Macdonald's Canada-type programs, honeymoons, and children wearing protective equipment while playing hockey. Oh, and rock and roll.
* Jimmy Macdonald's Canada, which dealt with the mental breakdown of one of the aforementioned newscasters in the face of change.
* Jimmy MacDonald's Canada who railed against technological innovation and youth culture. The show ended when MacDonald had a nervous breakdown on TV, made off with all the tapes from the episodes, flew off to parts unknown, but died in a plane crash. Some of the episodes have recently turned up, and the mockumentary features eight episodes of what was supposedly a weekly program that ran for years, intercut with prominent Canadians talking about how hugely influential Jimmy was back in the '60s.
* Jimmy made a lot of lather from that bar of soap, hoping to wipe his leather shoe clean from the doggy-doo he stepped on.
* Jimmy Mariano (Jess' father) and his girlfriend Sasha echo the Lorelei and Luke dynamic very accurately.
* Jimmy McNulty loves his sons, but repeatedly shows ill judgment when he's with them (e.g. losing them in a supermarket, leaving them alone at home in the middle of the night, etc.)
* Jimmy Neutron always refer to Jimmy as "the Creator" rather than by name, and believe that their sole purpose should be to serve him. (Although, most of their "services" are acts of disruption that Jimmy doesn't ask for or approve of.)
* Jimmy Neutron apart from its predecessor, this level was extremely slow and long.
* Jimmy Neutron: a thief is trying to steal the world's largest cubic zircon, but when she tries to cut the glass case with a small buzzaw the blade dulls since the case is actually made out of diamond. She then smashes Johnny's head into the case and it breaks. Not only is this exactly what would happen in real life (diamond is extremely hard, and therefore resistant to cutting, but is also brittle and will shatter if hit hard enough), the way the case shatters is pretty accurate too (it doesn't break into shards like glass, but seems to crumble to dust: when diamond shatters it breaks along crystal planes into multiple tiny diamonds rather than shattering like glass).
* Jimmy Neutron attracts one of these after he creates the tastiest candy ever, and then refuses to make more when he realizes how addictive it is. He flees to a candy shop for safety, only to learn that the now customerless owner called the mob.
* Jimmy Neutron: Boy Genius, although they're technically egg yolks in glass egg-shaped capsules.
* Jimmy Neutron: Boy Genius: Carl brings in his inhaler for show-and-tell. When he tries to demonstrate to the class how it works, he accidentally sprays himself in the face.
* Jimmy Neutron: Boy Genius consisted of Jimmy and his friends going out to an asteroid to find "space rubies" and keeping their find away from thieves.

* Jimmy Neutron: Boy Genius: During the big fight with the Yolkians at the colosseum. Jimmy throws Cindy a can of Purple Flirp, a sugary drink, to give her a power boost. She drinks it and throws it up in the air before using a flying kick against a Yolkian and catching it after landing.
* Jimmy Neutron: Boy Genius, during the part where the Yolkians find Jimmy's 'toaster', the one who delivered it to the King was 'spaced' because he entered the throne room unannounced.
* Jimmy Neutron: Boy Genius episode, the titular character (who is ten) is thrown in an adult jail and forced to work on a chain gang after being accused of a crime, before a trial. Even more ridiculous, his friends are arrested and thrown on the chain gang simply for realizing (out loud) that Jimmy wanted them to smuggle him escape tools, despite not acting on this or even having an opportunity to.
* Jimmy Neutron: Boy Genius. First a kid who is sick from eating too much cotton candy says this word for word at the end of an interview. Then the teen doing said interview also says it word for word and bursts into tears.
* Jimmy Neutron: Boy Genius has Goddard following the Nick ball as it bounces around, then projects the Movies ball alongside it.
* Jimmy Neutron: Boy Genius: Inverted with Cindy Vortex, who was the smartest student in her school before Jimmy's family moved in. She is a straight A student, a skilled martial artist, and once made a device for the science fair that could take old socks and reform them into sweaters.
* Jimmy Neutron: Boy Genius, Jimmy and Goddard grow to planet size to deafeat Goobot.
* Jimmy Neutron: Boy Genius, Jimmy gets chased by fighter jets while flying his rocketplane. He waves to the pilots and shouts "Nice antiques!"
* Jimmy Neutron: Boy Genius, Jimmy offhandedly states that the Yokian homeworld appears to be about 3 million light years away right before casually presenting the itinerary for the trip. And of course, the space fleet that they build out of the amusement park rides manages to make the trip in what is seemingly about a day. Strangely, in the made-for-TV movie "Win, Lose, and Kaboom," Jimmy asks his alien love interest if she thinks that they'll ever be able to see each other again, and she says "our planets are separated by parsecs of space" as if that actually means something.
* Jimmy Neutron: Boy Genius, Jimmy's Shoe-Bot ties Jimmy's shoelaces together instead of tying them properly, so when Jimmy gets up after seeing the school bus pull up outside, he falls over, sees his laces have been tied together, and glares at the Shoe-Bot, which shrugs.
* Jimmy Neutron: Boy Genius: "(The Earth's been visited by) ALIENS!!!"
* Jimmy Neutron: Boy Genius. The important question: Why say this, when 99% of households do not contain the materials to produce an upper-atmosphere rocket large enough for two human children and a robot dog? The remaining 1% doesn't either, for the record.
* Jimmy Neutron: Boy Genius: The kids apparently manage to travel 3 million light years in what amounts to about a day.
* Jimmy Neutron: Boy Genius, when his rocket starts to loose altitude, Jimmy and Carl's cheeks are pulled back and flap around until Jimmy activates the stabilisers.
* Jimmy Neutron: Boy Genius when Jimmy asks for Libby's cellphone with Libby replying that she doubts her phone reception exceeds their solar system (they were on an alien planet several million light years away). Inverted a moment later when Jimmy was just ringing his robot dog in a room not too far away.
* Jimmy Neutron: Boy Genius when the kids take off in their spaceships crafted from amusement park rides, lead by Jimmy Neutron
* Jimmy Neutron: Boy Genius where the technology, vehicles, and buildings resemble the fifties and sixties. As such, Jimmy's inventions tend to fit this trope.
* Jimmy Neutron: Boy Genius who abduct all the parents in Retroville in order to sacrifice them to their chicken god. You could say that they're bad eggs.
* Jimmy Neutron, Carl pretends to act like a mime, and holds up a sign that reads YEAH! when the plot is resolved. When Sheen tells him to stop and hits him, Carl

flips the sign around where it says OUCH!!.
* Jimmy Neutron does this when he can't think of a script for a movie.
* Jimmy Neutron episode, "Ultra Sheen" has Sheen defeat Robo-Fiend in level one of the Ultra Lord video game by pressing the off switch on his back.
* Jimmy Neutron Happy Family Happy Hour: In canon, Hugh Neutron is a kind eccentric. Here, he's a murderous psychopath.
* Jimmy Neutron has Butch sing this song at Jimmy and Cindy, only to get punched in the stomach by Cindy.
* Jimmy Neutron has our boy genius spraying his shoes with a special chemical that will let him run incredibly fast. He uses it to try to beat Cindy in a rematch to a race that he lost, and then continues to use them to move so fast that he appears invisible, letting him play pranks on people. This backfires when he starts running so fast that he can't slow himself down or stop.
* Jimmy Neutron in order to get out of going to investigate a haunted amusement park. Jimmy doesn't buy it and makes him come anyway.
* Jimmy Neutron is unable to finish anything he starts, leaving Jimmy a way to somehow save the day.
* Jimmy Neutron It was somehow even less faithful than you'd think it'd be.
* Jimmy Neutron, Jimmy and Cindy decide to have a burping contest to prove who is better. Jimmy eventually wins, but that's only because he ate a small portion of the Belch Boy packet.
* Jimmy Neutron, Jimmy's mother put one of these in Jimmy's father, just in case.
* Jimmy Neutron literally invents a machine to go inside any video game.
* Jimmy Neutron. Many times, Hugh would screw up one of Jimmy's inventions.
* Jimmy Neutron replacing Libby) falling into an alternate dimension due to a long list of exposition that wont be typed here. The first room they enter is a stark white box with one of these on the wall.
* Jimmy Neutron, Sheen is shown to be doing a crossword puzzle in ink in the episode where his brainpower is increased. When Cindy points out that it's not that impressive since her dad does the same thing, Sheen reveals that the crossword puzzle is from the Beijing Times.
* Jimmy Neutron's hyperactive best pal, Sheen is totally obsessed with Ultra Lord. He's got tons and tons of Ultra Lord merchandise, wrote the whole Ultra Lord website and firmly believes in Ultra Lord, even as a god.
* Jimmy Neutron's Nicktoon Blast, all of the Nicktoons are shown as existing together in a large multiverse, with the soundstages acting as portals between their worlds.
* Jimmy Neutron's Nicktoon Blast appears to be set in one, with the different Nicktoon worlds being accessible via soundstage portal.
* Jimmy Neutron's Nicktoon Blast, Carl quietly muttered "...mommy..." after Jimmy tried to unsuccessfully power up the Mark I rocket.
* Jimmy Neutron's Nicktoon Blast, Carl refers to his attack with Cosmo's wand as "super-powered laser thingy".
* Jimmy Neutron's Nicktoon Blast, Carl would zap King Goobot with Cosmo's wand. There would then be a brief pause, and then his eggshell would explode.
* Jimmy Neutron's Nicktoon Blast, during the Rugrats scene, Jimmy and Carl exit the characters' home by smashing right through an upstairs window.
* Jimmy Neutron's Nicktoon Blast features the computer-animated Jimmy Neutron going on a rocket chase through the traditionally-animated Nicktoon worlds.
* Jimmy Neutron's Nicktoon Blast. He is completely overwhelmed with happiness on the opportunity to take-over the world, taking the opportunity to remind that to the riders at every turn.
* Jimmy Neutron's Nicktoon Blast, in a blink-and-you'll-miss-it moment, Carl is using a magic wand to poof in a bunch of llamas, which results in the Dalai Llama getting poofed in as well.
* Jimmy Neutron's Nicktoon Blast, Jimmy's advanced Mark IV rocket ship is sought after by the Yolkians, who believe that it can be used to enslave the earth if duplicated.
* Jimmy Neutron's Nicktoon Blast. Just before heading into the throne room on the

Yolkian Planet, the protagonists pass by a Yolkian selling newspapers that have news of Jimmy's return to the planet as the headline. In the workprint version of the ride, the Yolkian even says the trope word-for-word, but in the final version had his dialogue changed to, "Extra! Extra! Rocket Boy Returns!"
* Jimmy Neutron's Nicktoon Blast, King Goobot blasts his way in through the walls of Jimmy's lab.
* Jimmy Neutron's Nicktoon Blast, King Goobot, having gained control of the ride vehicles, forces them to do the chicken dance, which he deems "a fate beyond your worst nightmare!".
* Jimmy Neutron's Nicktoon Blast, King Goobot is first seen on the Yolkian Planet, but then makes it to Earth in the ride's finale in just under a minute, despite it being well-established that the Yolkian Planet is quite a distance away from Earth.
* Jimmy Neutron's Nicktoon Blast, King Goobot's plan is to have Ooblar steal Jimmy's latest invention, the Mark IV rocket, and bring it back to the Yolkian Planet so that it can be duplicated and his armies can use it to enslave the earth.
* Jimmy Neutron's Nicktoon Blast, Ooblar accidentally rams into a group of Yolkians set up like pins, resulting in this, complete with the sound effect as well as Ooblar yelling "STRIKE!".
* Jimmy Neutron's Nicktoon Blast, Ooblar creates a large, Yolkian-shaped hole when he breaks into Jimmy's lab. Later, at the end of the ride, this hole is now seen patched up with a bunch of wood, only for the hole to be opened up again when King Goobot blasts his way in.
* Jimmy Neutron's Nicktoon Blast, Ooblar gets slimed after running into the Nicktoon Studios' "Slime Tower".
* Jimmy Neutron's Nicktoon Blast plans to steal Jimmy's latest Mark IV rocket and duplicate it so that he can use it to enslave earth.
* Jimmy Neutron's Nicktoon Blast reasons for coming to earth: to steal Jimmy's Mark IV rocket and use it to take over the world.
* Jimmy Neutron's Nicktoon Blast, there was a scene where SpongeBob is flung through Bikini Bottom, saying hello to everyone along the way. When greeting the regular Bikini Bottom citizens, he refers to them as "secondary characters".
* Jimmy Neutron's Nicktoon Blast, the riders do absolutely nothing to help stop Ooblar and only get tossed around all over the place in the attraction, with Jimmy having to pilot their ride vehicle via remote control throughout the whole.
* Jimmy Neutron's Nicktoon Blast when Jimmy mentions to Carl and the guests that they're the only ones that save the Nicktoons as well as the entire planet, since only they know of the Yolkians' evil scheme to enslave the earth.
* Jimmy Neutron's Nicktoon Blast, when King Goobot, after having his plans completely ruined, comes down to earth on his own to exact his vengeance against the heroes.
* Jimmy Neutron's Nicktoon Blast, when Ooblar is breaking into Jimmy's lab, he dons a disguise that consists of: Groucho glasses, a camera, and a Universal hat. Jimmy sees right through it, but apparently no one else did.
* Jimmy Neutron, the Employee of the Month, considers Jimmy to be the idiot of the group, and forces him to stand outside the restaurant wearing a hamburger suit, repeating the phrase: "If you want cheap food with taste, put McSpanky's in your face."
* Jimmy Neutron, the kids ponder what they will do with the money they'll get after they acquire Astro Rubies.
* Jimmy Neutron thrown in for good measure. Especially Cindy in "The N-Men". She tries to calm Jimmy down by admitting her feelings for him, but goes "I l-l...I l-l-ll..." and then faints. Jimmy is understandably curious.
* Jimmy Neutron vs. Jimmy Negatron imitates it early on to trick Negatron's henchman.
* Jimmy Neutron vs. Jimmy Negatron, the Herminator and Jimmy Neutron argue who Jimmy's last name is. Jimmy yells "Negatron", while Hermin yells "Neutron" and they switch it so Hermin believes he is talking to Jimmy Negatron.
* Jimmy Neutron vs. Jimmy Negatron, you can at one point make Jimmy go into a bathroom, which triggers a cutscene of him walking out and thanking the player for

thinking of it, because he hadn't gone all day.
* Jimmy Neutron when Jimmy investigates the town's sudden transformation into permanently-happy zombies.
* Jimmy Neutron, which manifests in an unusually "girly" outburst from Jimmy-in-Cindy's body.
* Jimmy. Not only does he hang around the girls, but he also shows many feminine interests, such as playing with dolls, baking, cheerleading, etc.
* Jimmy Novak, Castiel's vessel, was a man of faith who believed that Castiel choosing him as a vessel was a noble cause. This makes his eventual fate far more tragic.
* Jimmy Olsen and helps Jimmy fight the killer off, things get inverted when the assassin commits suicide, forcing Jimmy to take on the killer's identity and find out why he was made a target.
* Jimmy Olsen comic, Jimmy fought a demented cartoonist whose arsenal included cream pies filled with acid, and a rubber chicken loaded with lead weights.
* Jimmy Olsen comic, Jimmy nearly gets drained of his life force by a vampiric alien posing as a pet. At the end of the story, he runs away from a young woman who tries to ask him to hold her dog's leash.
* Jimmy Olsen could disguise himself so well that Perry, Lois, and even Superman had trouble recognizing him.
* Jimmy Olsen" gag by putting the bucket over a random spot in the wall, which Supes of course broke right through.
* Jimmy Olsen: In one early story, Jimmy is being held captive and forced to give crooks trying to win a million-dollar game show answers about Superman. While explaining a headline about him saving the Man of Steel, Jimmy includes a detail about the rescue not included in the news story and hence something only he and Superman knew. Superman can see that the contestant isn't Jimmy and has in fact recognized him as a criminal. All this tells him his friend is in trouble, and he flies to the rescue.
* Jimmy Olsen is bothered by how it will affect the staff if a rival newspaper folds and comes up with the idea of a show to raise money.
* Jimmy Olsen, Jimmy hurries up to search whatever is tearing up Metropolis so he can take pictures.
* Jimmy Olsen, Jimmy wonders how Superman knew that he was in trouble and where to show up. Clark, with whom he had been rooming temporarily, provided the answer to the readers — the young reporter had given his plans away the previous night by talking in his sleep.
* Jimmy Olsen on more than one occasion. After one such example, though, Jimmy got read the riot act by Lucy Lane. Turns out Lucy found in his apartment the purse, perfume, and jewelry that were part of the masquerade lying around his apartment, but she thought he was dating someone else behind her back.
* Jimmy Olsen pitched a book at two crooks who'd been stalking him in "The Hunted Messenger."
* Jimmy Olsen (see comics) was originally created for the radio show.
* Jimmy Olsen's secret identity. At the end of the story, Superman used a combination of heat- and microscopic-visions, focused through a space jewel and directed through Jimmy's eyes, to burn out the portion of Jimmy's brain which held that piece of information. Superman lampshaded the trope by telling Jimmy that he could only perform this trick once: if he ever tried it again, he'd short-circuit his vision powers.
* Jimmy Olsen started with him finding a maiden in a snowbank, apparently a young woman from Viking times who had been frozen for centuries. It turned out that "Helga" was actually a gynoid and that Jimmy's fan club were using it to make Lucy Lane jealous.
* Jimmy Olsen well." This is probably news to the millions of women who help their boyfriends, sons, or husbands with getting their ties on.
* Jimmy Olsen with a tendency to get into major trouble as a result. However, except for a few occasions, he always comes out with nary a scratch or even angst.
* Jimmy once defended a woman who stabbed a drug lord to death and the judge

wouldn't allow them to plead self-defense or defense of others. He managed to convince the jury to acquit.
* Jimmy O. Yang (born in Hong Kong but has lived in the US since he was thirteen)
* Jimmy Page replaced Jeff Beck, all of the group but Page left the band. Page recruited new band members and toured under the name The New Yardbirds for a while before changing their name to
* Jimmy Page's #2 Les Paul, they have to use black or zebra pickups instead.
* Jimmy Palmer jumped in for Gerald after he was shot in the first season, and became a member of the main cast in season ten. Unlike the substitutions of Ziva, Vance, and Bishop, he didn't fill an existing role as a cast regular, as Gerald was never a member of the main cast. McGee or Shepard might be considered Sixth Ranger material as well, although the creation of their roles was so early in the series and so ingrained into the show's early identity as a straight procedural that they could not be said to have really altered the show's character. Palmer's increasing relevance goes hand in hand with the development of NCIS as a misfit family series as much as a procedural.
* Jimmy Palmer sometimes shows inappropriate enthusiasm for gory details. One example includes him cheerfully saying "At first we thought it was a
* Jimmy Patterson, as Manon was based on a real woman named Helene Deschamps Adams, an OSS operator who worked closely with an American Lieutenant during the war and married him when the war ended.
* Jimmy Reed is a capable guitarist and harmonica player, his voice tends to be the main draw for many fans. He could sing a song about the most boring subject imaginable, and his fans would still listen for his voice. It is for this reason that his album, "Jimmy Reed Plays 12 String Guitar Blues", has never sold very well - despite the popularity of his other early records.
* Jimmy Reed's musical output. In some cases, it's about winning back a girl who walked out on him. "I'll Change My Style" is a good example of such.
* Jimmy Reed (the most popular bluesman of the 50s, with one of the simplest and most easily approachable bodies of work in blues)
* Jimmy Reed was a sensitive and often vulnerable blues artist, and he often leaned on his wife, Mary Lee, for guidance and moral support. Mary Lee had a tough persona and did not take shit from people.
* Jimmy Savile and his philanthropy work allowed Savile to use his influence to carry out his crimes for many decades up until his death.
* Jimmy Savile. During his life, he defined this trope and often bragged about his sexual adventures and was treated by many as a lovable rogue. After his death, it was revealed that he preyed on underage victims for decades, using his power and celebrity to groom them and keep them silent. Some reckoning within the media happened when this was revealed, as it was clear he hid his crimes in plain sight.
* Jimmy Savile in hindsight after he was posthumously revealed as one of the most prolific and notorious sex fiends in the history of mankind.
* Jimmy Savile (particularly the revelation that many people knew about it there, but didn't act as he was so popular then).
* Jimmy Savile that was about him using his wealth and connections to make peoples wishes come true, mostly children. In interviews however, he always admitted that he never actually did like children all that much. A year after his death, it was discovered that he was actually using his show to get close to children to molest them.
* Jimmy Savile, the Prime Minister during the 1980s; during the case of the investigation into Savile, it was found that he had been awarded a knighthood by Thatcher despite civil servants repeatedly warning the Cabinet Office of his criminal background.
* Jimmy says this when Chloe, who is at the time his girlfriend, walk in on
* Jimmy's childishness mean that he's an easy target for bullies (especially when Sarah isn't around) and he's often dismissed and patronised even when he does have legitimate concerns or opinions
* Jimmy's clients in the series premiere broke into a mortuary, cut the head off a corpse, and then had sex with it. On top of that, they made a video of the whole

event. The prosecutor only needs to play the tape as his closing statement to get them sent to jail.
* Jimmy's dream in "Suffer the Fate of Atlantis" is another example of this.
* Jimmy Smith: A jazz organist with a half-century recording career, Smith helped popularize the Hammond B-3 electric organ.
* Jimmy Smith influenced progressive rock band in Finland", in a humourous attempt to invoke this trope.
* Jimmy Smits father, so it's hard to say what Bail is supposed to be.
* Jimmy's nightmare in "Erection Day", of where he is a talent show, and suddenly, his penis erects endlessly. Others laugh and point, some girls flip out and leave, Mr. Garrison even says, "Don't worry Jimmy, we're laughing at you not with you."
* Jimmy Snuka, and Piper's initial heel run during the '70s and '80s. Piper had Snuka on his show, and after insulting him repeatedly, smashed him upside the head with a coconut that he had brought out alongside a pineapple and some bananas, for no other reason than to be an asshole. The act is considered such an effective bit of heeling that despite Snuka kicking Piper's ass up and down the coast over the course of the resulting feud as revenge, it was Piper who came out of it looking like the bigger star.
* Jimmy Snuka by the WWE in 2015 following his murder charges until his death in 2017.
* Jimmy Snuka like Benoit during his arrest, suspending his legends contract and removing him from the Hall of Fame, the WWE decided to honor Snuka as a hero with a glowing tribute video package, a move that was considered tone deaf and hypocritical by many considering how quickly the promotion had worked to wash its hands of Benoit nearly a decade earlier.
* Jimmy Snuka were in a tag team match, and the team won when Snuka delivered his Superfly Splash from atop Andre's shoulders.
* Jimmy Soul's "If You Wanna Be Happy" (which claims the secret to lifelong happiness is marrying an ugly woman, not a pretty one) features this exchange:
* Jimmy's schtick is partially this, which led to a memorable gag where Stan sent a message to Wendy using Jimmy to deliver it. The message included the phrase "You are a continuing source of inspiration".
* Jimmy Stewart, in which he plays a painfully bland "nice guy" for 90% of the film, only for us to watch his character flip out in a fantastic performance in the final denouement.
* Jimmy Stewart was around for many years after that movie. He usually said that Harvey was at home with a cold.
* Jimmy Stewart when he could have asked for, and easily received, a cushy job with the Air Force Motion Pictures Unit.
* Jimmy "Superfly" Snuka are known for often jumping much higher than needed off the turn buckle.

* Jimmy the Antichrist being the Antichrist?" This is lampshaded several times by Jimmy's sister, who keeps asking him whether he's sure he didn't mean to say he was gay.
* Jimmy "the Butcher" Figgis, and is outright willing to commit murders for him.
* Jimmy the Gent: Jimmy runs a scam where he recruits people to impersonate the long-lost heirs of rich folks who die intestate. His sidekick Lou has dug up a suitable fake heir, a woman who has the required identifying mark, a mole on her hip. Except that he got it wrong, as Jimmy explains.
* Jimmy the "Jazz Man" was more focused on making sure Gordon is killed than getting out of Gotham and laying low.
* Jimmy the Snitch Frankie doesn't really fit any of the above archetypes, but rather has a compulsive urge to squeal ("It makes me feel big!").
* Jimmy T., his double Jimmy P., and Dr. Crygor also sport huge moustaches. One of his enemies, Count Cannoli, has a moustache as well.
* Jimmy to Chloe as he dies in her arms for the much of the next season.
* Jimmy Tornado: At 19, Lupé is a brilliant and respected multidisciplinary scientist.

* Jimmy Tornado: Lupé's name is written without the accent in the magazine version, but with the accent in the album version.
* Jimmy Two-Shoes actually becomes depressed when there's destruction and she's not the one causing it. Then in "Bend It Like Wreckem"; after Jimmy and Beezy accidentally knocked the pro soccer player Wreckem out, she takes his brain out and takes care of it, then hugs it while baby-talking it!
* Jimmy Two-Shoes actually does this to one of his own men as a battle tactic.
* Jimmy Two-Shoes admirer Heloise are constantly at war for his attention. Literally the only reason they even remotely tolerate each other's presence is to stay around Jimmy, who occasionally becomes frustrated by their regular fights.
* Jimmy Two-Shoes (a fact clearer in the original pitch) you get the impression that this is as close to death as they can get.
* Jimmy Two-Shoes, after an episode ends on a particularly disgusting note, Jimmy and Beezy agree "This never happened."
* Jimmy Two-Shoes. A good example is "The Racing Bug", which features a large number of these in shots of the Racing Fleas.
* Jimmy Two-Shoes and find little brain-like blobs driving little toy car rides like the ones you find at a mall. Jimmy's happily gives up his post when requested by the bugs, while Beezy's is asleep on duty and snarls at the bugs before being driven off.
* Jimmy Two-Shoes, and in the original pitch it officially was. The citizens are just one of the reasons why it's obvious it's Hell, with all the monsters and demons. However, the people of Miseryville are generally a pretty decent lot (they just have crappy lives) and basically like ordinary humans in all but appearance.
* Jimmy Two-Shoes and stored in cryogenic chambers below Miseryville. As Lucius VI put it, "Every time there's an argument, someone gets frozen."
* Jimmy Two-Shoes are furry chipmunk-like rodents. There is actually a reason behind the name — it's a combination of "weasel" and "evil".
* Jimmy Two-Shoes. As the Season 2 theme song says "He ain't from around here, if you know what I mean!"
* Jimmy Two-Shoes. At different points, they've snatched up Beezy, Lucius, and Samy.
* Jimmy Two-Shoes at the end of "The Mysterious Mr. Ten" when Lucius can't believe Jimmy is funny.
* Jimmy Two-Shoes, Beezy exclaims that something is ironic. He then pauses and wonders if he actually knows what irony is. Later in the episode, he's still wondering if he got it right.
* Jimmy Two-Shoes); Beezy is taller than Saffi; and Jez is two heads taller than the comically diminutive Lucius.
* Jimmy Two-Shoes, Beezy on Heloise's new snow-making machine in "A Cold Day in Miseryville" starts producing snowflakes from its body:
* Jimmy Two-Shoes behavioural signs of being originally from Earth. It gets to the point that in one episode, when Jimmy questions how a bird can talk, Heloise sarcastically asks "Remind me where you're from again?"
* Jimmy Two-Shoes being haunted by the ghost of his uneaten pizza crusts.
* Jimmy Two-Shoes, both Jimmy and Lucius do this while being flight attendants.
* Jimmy Two-Shoes calling Lucius Heinous the 7th "Lucy", despite Lucius' hatred of the name (and of Jimmy).
* Jimmy Two-Shoes" Cerbee actually has acid as waste, which dissolves anything he relieves himself on.
* Jimmy Two-Shoes Chuck, a bus driver, becomes an obsessed stalker of a friend to an unwilling Jimmy after Jimmy called him "pal" and apologized for accidentally wrecking his bus. Chuck is shown to try to become a persistent friend to anyone who's even remotely nice to him.
* Jimmy Two-Shoes, Cowboy Stackhouse rode a horse half his width and a third his height.
* Jimmy Two-Shoes creatures who love to torment the citizens of Miseryville.
* Jimmy Two-Shoes does this gag with a message Sammy prerecorded in a tree.
* Jimmy Two-Shoes" ends with Heloise cured of her hiccups, and Beezy getting them.

* Jimmy Two-Shoes episode "Monster Mutt" when Heloise switches Beezy and Cerbee's minds around. Beezy-in-Cerbee plays it straight, but Cerbee-in-Beezy's voice is Beezy's voice actor, Brian Froud, making deep woofs instead of Cerbee's high pitched barks (which are done by Sean Cullen, who also voices Lucius).
* Jimmy Two-Shoes episode "Pop-Sicles", Beezy dresses up in a chicken suit and goes about annoying people to prove to his father, Lucius, that he could create misery too. Needless to say, Lucius was unimpressed. Beezy would be seen in the chicken suit in a few later episodes.
* Jimmy Two-Shoes episode "Powersquid and Spaghetti Beezy", the Rodeo Clowns are seen stepping out of one.
* Jimmy Two-Shoes episode "The Masked Jackhammer", when Jimmy becomes the tag team partner to the titular wrestler and believes himself to be responsible for their victories when they're really Jackhammer's. This ends up coming to bite him in the behind when Lucius then makes Jimmy and the Jackhammer fight each other, and the overconfident Jimmy is utterly trounced.
* Jimmy Two-Shoes episode "Too Many Jimmys" is a good example. When Jimmy borrows Heloise's people copier, the resulting clones are deformed and misshapen. For example one had no head, another had legs for arms with an oversized nose, and another one had a single eye with no body separating his limbs from his head. The justification for this though is that Jimmy had damaged the machine before the cloning process was completed. Yet for some reason, everyone in Miseryville seems oblivious to the differences between the clones and the real Jimmy.
* Jimmy Two-Shoes. Even though Jimmy would probably never collect, he has nightmare about having to do degrading things for him.
* Jimmy Two-Shoes, every guy is terrified at the prospect of dating her.
* Jimmy Two-Shoes expense. Other episodes that have ended this way include "I Totally Shredded My Cheese", "Jimmy Gets a Stache", and "Beezy J. Genius".
* Jimmy Two-Shoes. For example, when giant robots constructed by Heloise begin to destroy Miseryville and Lucius is unable to stop them (he fired Heloise earlier), Heloise just gives him a remote which instantly turns them all off. Lucius asks why she didn't use it, to which Heloise drops the trope's name.
* Jimmy Two-Shoes gives us TCFM (or Thorn), who looks exactly like Beezy only green, and uses this to get the people of Miseryville to do what he wants.
* Jimmy Two-Shoes goes through an elaborate, booby-trapped hall to a room guarded by a robotic hand that requires a complicated handshake to get past. Upon entering, Beezy walks in and gets a soda from the fridge.
* Jimmy Two-Shoes had a bird who had been held hostage by Lucius returned to his mother...who immediately ran right back into Lucius' grip when her mother proved way too annoying to deal with.
* Jimmy Two-Shoes had Heloise disguise herself as a boy in order to see a list of "Guy Stuff" that Jimmy and Beezy wouldn't let her see.
* Jimmy Two-Shoes had Jimmy and Beezy accidentally knocking the brain out of their favorite soccer player's head. By the end of the episode, Beezy still hasn't given it back, keeping it in a jar among his memorabilia.
* Jimmy Two-Shoes had Lucius fondly remembering his time in a marching band...because he played so badly it hurt everyone in Miseryville.
* Jimmy Two-Shoes has "Jimmy in the Big House", where Jimmy and Beezy try to bust Cerbee out of an animals-only prison by disguising themselves as pandas. Unfortunately, Cerbee had already escaped by himself, so the duo now have to get themselves out.
* Jimmy Two-Shoes has Lucius arranging for Beezy to marry the Weavil Princess in order to get a large amount of treasure from them (which they were willing to sacrifice in order to get rid of her).
* Jimmy Two-Shoes has the three main characters playing "Savage Bunny Paintball", which has them firing paintball guns at rabbits.
* Jimmy Two-Shoes has three suns, and the sky is usually orange. "Rocket Jimmy" revealed that there are multiple moons as well.
* Jimmy Two-Shoes, he begins laughing wildly before completely cracking.
* Jimmy Two-Shoes. He ends up being too weak to do so, and asks Beezy to help him.

He does.
* Jimmy Two-Shoes. He'll often buckle under pressure and tell people to quit interrogating him, even if they're simply commenting casually to what he is saying.
* Jimmy Two-Shoes. His introductory scene has a three bodied Miseryvillian walk out of his home, the implications clear.
* Jimmy Two-Shoes. His response to seeing an image of himself is "Hello, handsome."
* Jimmy Two-Shoes how much more elegant she looks when dressed up for formal occasions.
* Jimmy Two-Shoes, in an attempt to act casual, reads a newspaper upside down.
* Jimmy Two-Shoes, including Heloise popping out of the thin-as-a-pole Jimmy.
* Jimmy Two-Shoes in his concept art's outfit as opposed to his ordinary one. In another episode, Jimmy wears a bowtie, which was part of his concept suit.
* Jimmy Two-Shoes in one episode, he forces his son Beezy to play mascot by having him wear a Lucius costume. Beezy does not enjoy any moment of it and spends a good chunk of his time being tormented by children.
* Jimmy Two-Shoes in order to accept a challenge because he saw it in a movie.
* Jimmy Two-Shoes in season 2. The series proper has some examples, including Bill the Ball and an unnamed sock.
* Jimmy Two-Shoes in the episode "Wish You Weren't There". While Lucius is on a cruise, the boat hits a waterfall...which is so small it just rocks the boat a little. Then there are two more just like it, so Lucius doesn't worry about the fourth one...which is a big one.
* Jimmy Two-Shoes in the town's fountain. Guess when the blindness wore off.
* Jimmy Two-Shoes in Vancouver voices Heloise in an otherwise entirely Toronto-based voice cast.
* Jimmy Two-Shoes it did at the request of Disney XD's executives rather than Teletoon's.
* Jimmy Two-Shoes, it fits very well. Downplayed, as she's still portrayed as creepy and evil.
* Jimmy Two-Shoes, it's probably no surprise he grew up the way he did.
* Jimmy Two-Shoes. It works, but to her surprise, Jimmy and Peep hit it off quite well on non-Heloise topics.
* Jimmy Two-Shoes, Jimmy and Beezy both experience one after having to eat several enormous vats of Misery Inc.-produced ice cream, much to the delight of Lucius, who has finally found a product that makes Jimmy miserable.
* Jimmy Two-Shoes, Jimmy asks what's so funny. She points to two of the zombies who keep running into each other. Jimmy admits he's amused.
* Jimmy Two-Shoes Jimmy attempts to invoke this trope, but the sunglasses he uses get increasingly tacky.
* Jimmy Two-Shoes. Jimmy picks a paintball fight with a pack of bunnies, who respond by turning into commandos.
* Jimmy Two-Shoes, Jimmy sends Cerbee to get Heloise's help after he and Beezy get trapped in a prison. Cerbee tries to communicate to Heloise, but she thinks he's hungry and offers him a steak, which he accepts. This happens a few more times until Cerbee farts in his sleep, giving Heloise instant understanding of the entire situation.
* Jimmy Two-Shoes, Lucius does this with a mechanical hand as a means of getting into his vault.
* Jimmy Two-Shoes: Lucius gets so angry at Beezy that his head rockets off his shoulders and flies around.
* Jimmy Two-Shoes, Lucius has some pretty terrifying powers, but doesn't use them strictly because his pride would be wounded if he admitted he needed them.
* Jimmy Two-Shoes. Lucius responds by slapping him with a concrete hand.
* Jimmy Two-Shoes. Lucius VI agrees, muttering "And pigs will fly." Of course, Lucius makes it. Flash forward to the present where he's frozen, and his son is holding a flying pig on a leash, saying "He was always making crazy bets."
* Jimmy Two-Shoes, Lucius VI is constantly losing body parts. It might have something to do with how old he is.
* Jimmy Two-Shoes meant for Jimmy, he drags Heloise on a date, and ends up wrapping

her in a straitjacket to enjoy a candlelight dinner.
* Jimmy Two-Shoes moves of the cast, Jimmy is left trying to fly a plane. It takes Lucius a few seconds of conversing with him in the passenger section before realizing that no one is flying the plane.
* Jimmy Two-Shoes of Samy falling off the roof was used. One had to wonder whether it was intentional or not.
* Jimmy Two-Shoes of them, how long it took him to grow his horns. Lucius answers that it took 400 years. And in another episode, when Lucius is made fun of for his age, he defends himself by saying he's "just barely seven hundred".
* Jimmy Two-Shoes opens Jimmy and Beezy playing a game where they hurl themselves at a giant dartboard via catapult. Points are awarded based on where they land and the day of the week.
* Jimmy Two-Shoes, Peeps, a boy with a Cockney accent, is voiced by Christian Potenza, a Canadian.
* Jimmy Two-Shoes "Pet Rocky", Beezy goes to his dad Lucius to ask for a pet. Lucius assumes he's asking for this and proceeds to take out two dolls and make them kiss each other before being interrupted by reality.
* Jimmy Two-Shoes) punishments including being cooked, fed to monster fish, and dangled over an erupting volcano. Also used in "There will be Chocolate" when Heloise tries chocolate for the first time. She has a brief sequence of her running around a chocolate world taking a bite out of various objects and then licking a chocolate Jimmy. It then switches back to the real world to show her licking the real Jimmy.
* Jimmy Two-Shoes revealed that Heloise had cursed a man to never laugh because she thought his laugh was annoying.
* Jimmy Two-Shoes riding one that was either half mechanical or wearing armor.
* Jimmy Two-Shoes ruined the first). For an independent career woman, Heloise takes a surprising amount of pride in her cooking skills.
* Jimmy Two-Shoes, Samy calls Super Slugmeister "the greatest slug ever!" Lucius notes that that's not a very high bar.
* Jimmy Two-Shoes, Samy tries this on Heloise, but it only succeeds in causing her to dream about being a mermaid.
* Jimmy Two-Shoes, saying that Jimmy may literally be in Hell (as most fans believe), be in an alien world/dimension, or even just be dreaming in a coma.
* Jimmy Two-Shoes seeks to torture everyone, it's no surprise that several of their products are aimed at kids. The Misery Inc. catalogue includes "delights" for the children of Miseryville such as electric rubber balls, lollipop tarantulas, toy sharks that bite fingers, and a giant robot dinosaur that eats children (and that one's for playgrounds!).
* Jimmy Two-Shoes, similar to Pinkie Pie below, is on good terms with just about everyone in Miseryville and is able to bring out the best in even the evilest of people, like Heloise. The only person who he can't get to like him is Lucius, and certainly not for lack of trying.
* Jimmy Two-Shoes since her tiny assistant Dorkus had been able to lift a bull while wearing it earlier, but Jimmy does manage to drive off the clowns in the end while Lucius has no luck using the stolen squid for evil.
* Jimmy Two-Shoes snatching up Cerbee and trying to experiment on him. However, he quickly proved to be so energetic the doc couldn't handle him.
* Jimmy Two-Shoes status, and a few background characters qualify as well.
* Jimmy Two-Shoes subverted this in the episode "Carnival Lucius". Heloise tricks Lucius into building one (because Jimmy wanted one) by describing it as if it were something terrible. Then it's played straight when Lucius realizes the truth and straps her and Jimmy into a roller coaster that's meant to kill them. That said, Lucius' carnival was still full of unsafe and dangerous rides, although the people of Miseryville didn't seem to mind.
* Jimmy Two-Shoes that drops into a pit of...eel things in his office.
* Jimmy Two-Shoes that he's completely unaware of just how much he is loathed by him.
* Jimmy Two-Shoes that Jimmy thinks is adorable. In both instances, he then turns

off the flashlight and puts it away.
* Jimmy Two-Shoes that makes repeated threats that no one takes seriously until he finally gives up and leaves.
* Jimmy Two-Shoes the bailiffs in the Horn Fairy Court wear eyepatches with stars on them.
* Jimmy Two-Shoes: The episode "A Present for Jez", where a reprogrammed mechanical doll tries to take over Miseryville.
* Jimmy Two-Shoes, the mysterious Hooded Chicken is said to leave a feather on its victims door before it strikes.
* Jimmy Two-Shoes...then tosses the book aside, muttering "Can't believe everything you read."
* Jimmy Two-Shoes. They tend to be of the visual variety. It's not uncommon for the show to open a scene or introduce something to the plot via Heloise conducting some kind of sadistic experiment on some unfortunate demon (usually Beezy).
* Jimmy Two-Shoes to arrest the ones responsible. He does so and leaves...without digging his boss up.
* Jimmy Two-Shoes to be her assistant. She's very effective, but Jimmy falls in love with it. As you might expect, the robot didn't last the episode.
* Jimmy Two-Shoes to Jimmy, and even overthrowing Lucius as ruler of Miseryville.
* Jimmy Two-Shoes to Miseryville's equivalent of YouTube, turning Lucius into the town laughingstock.
* Jimmy Two-Shoes to read to Jasmine. However, when Beezy gives it to his father, he says "This is from Jez," and it's only after they part that he wonders "Or was it for Jez?"
* Jimmy Two-Shoes to the point where their colonel was able to grab Beezy and toss him around like a ragdoll when he ticked him off.
* Jimmy Two-Shoes to the Weavil Princess, Beezy attempts to fail at the challenges he must pass to win the right to marry her. Unfortunately the weavils, who arranged the marriage entirely to get rid of her, makes sure he passes.
* Jimmy Two-Shoes tries to perform, he inevitably runs into this trope.
* Jimmy Two-Shoes trying to obstruct her from entering Miseryville's Annual Mad Scientist Awards. Both her head and body were able to operate relatively well on their own, with the former managing to somehow build a vehicle out of sticks and stones to get to the awards and Dr. Scientist in time.
* Jimmy Two-Shoes turned Hell into Miseryville in the final product, fans still commonly accept this as canon.
* Jimmy Two-Shoes. Turns out the vase is one of several that are worthless, Lucius breaks them whenever he gets mad.
* Jimmy Two-Shoes Twinkles the Terrible causes planets to explode in an cloud of pink dust, which settles in a heart-shape.
* Jimmy Two-Shoes uses to address the public. One also appears in the Season 1 intro.
* Jimmy Two-Shoes. We've also seen pandas, a goat, a rhino, a crab, and an ape.
* Jimmy Two-Shoes, when he points out he has Saffi, she's wheeled out to say "I don't mind," then proceeds to disappear other than a cameo near the end.
* Jimmy Two-Shoes) when he takes it for himself in "A Hair-Brained Idea".
* Jimmy Two-Shoes. When Jimmy assumed the role of "Power Squid" and fought his first battle against a horde of clowns, as he/the squid on his head fought them, his fourth battle cry was "Hadoken!" before ending it with a spin kick.
* Jimmy Two-Shoes, when the same car that did it to her backs up and splashes her again.
* Jimmy Two-Shoes, which she intended to pull a carriage for her and Jimmy.
* Jimmy Two-Shoes whistles after Lucius demands to know who let Beezy borrow their cell phones.
* Jimmy Two-Shoes, who is out of mustard, which means Jimmy needs some of Beezy's mustard (another thing Beezy collects).
* Jimmy Two-Shoes with a bear on a stick. It eats him, chews him up, and spits him out.
* Jimmy Valiant during the 1986 Great American Bash tour. After defeating Shaska

Whatley in a hair vs. hair match, Valiant won the right to face Shaska's manager, Paul Jones, in a match with the same stipulation. Shaska interfered to help Jones win exact revenge for his own head shaving. Afterward, a crowd of wrestlers tried to stop Valiant from going through with the head shaving, saying he could protest the finish to the

* Jim Shooter (italics and caps in the original) was a world-sized organism that had to feed to remain healthy. Its natives, the Plasmoids, used organic spacefleets to conquer other worlds and mulch their ecosystems into "gore for the Org."
* Jim Shooter's (sadly on long hiatus) blog, this seems to be a constant source of tension between writer and artist. The writer often wants the scene visualized as he or she writes it in the script due to the necessities of storytelling (Shooter, for instance, writes long descriptions and even at times sends reference photos or sketches along to clarify how things should look). Meanwhile, the artist believes him or herself responsible for the visual look of the pages and may see things very differently from an artistic standpoint.

* Jim Sterling. Jim's wild card persona is the reason why some publishers silently refuse to give him review copies of their games.
* Jim Sterling, made as an extremely sarcastic response to the studio essentially calling him incompetent following his initial coverage, Jim decides to subvert this.
* Jim Sterling-riddled parody of awful "Top Ten Hottest Videogame Babes" videos, which relies on Jim's not-so-great looks and his exploitation of the sordid stereotypes of gay male sexuality to make the video as nauseating and pathetic as the "hot babe" things look to anyone with any sense of perspective.
* Jim Sterling's (after they suggested that he had been criticising the game 'poorly' by missing features like a flashlight and grenade launcher, both of which turned out to be equally hideous-looking and borderline nonfunctional) has him make this gem of a comment:
* Jim Sterling, Sterling had said that they would legally change their name to "Jim Sterling" if not for the legal issues that would arise if they did so.
* Jim Sterling, video game and video game industry critic, who describes themself as "not straight" (and has identified as pansexual on Twitter). They also came out as non-binary in 2020 on Twitter.
* Jim Sterling which only rose as the case went on. Romine's incompetence was to the point that in Sterling's post-mortem of the case, they note that they and their allies' (including Sterling's own lawyers) reaction to Romine's antics boiled down to 'I have no idea what he's doing.'
* Jim Sturgess and Bae Doona play Hae-Joo Chang and Somni-451, whose romance ends in death, but Somni is confident they'll meet another lifetime. Immediately after she says this, it cuts to a
* Jimsy and the Monsters, a short story by Walt Sheldon, a scientist uses teleportation to bring two silicon based organisms to Earth.
* Jim Thorpe, winner of several Olympic Gold medals, got a spot on his school's

track team when he beat the high jumpers while wearing street clothes.
* Jim through the paper he officially worked for during the first season, then during the second season (after various bureaucratic roadblocks stopped him from writing anything of any truth officially) writes for underground resistance papers and news articles he got smuggled to other countries to arouse international sympathy.
* Jim Traficant from the House ever to have been expelled from the body.
* Jim Tyer cartoon he animated on, like the opening of "House Busters", and you'll see some of the weirdest cartoon animation ever committed to paper!
* Jim "Ultimate Warrior" Hellwig infamy) has legally changed his name to "Warrior".
* Jim Varney commercials starting on the day of Varney's death. It was later found that they did this as a favor to his family, as Varney had always been fond of his work in those commercials.
* Jim Varney in which he provided the voice of Cookie. Additional dialogue that had yet to be recorded prior to his death was provided by Steve Barr.
* Jim voiced King Sombra in "The Crystal Empire" and Troubleshoes in "Appleoosa's Most Wanted".
* Jim Ward among the other members whenever they are reading their lines from just about anywhere.
* Jin always stops and helps when someone's in need within earshot, even when ordered to keep a low profile. Sometimes, it feels like he charges for his services only because he's expected to.
* Jin and Sun get a pretty bad case of this in several seasons. In the first season they both appear in most of the episodes and get their own centric episodes, but after that all of their centrics get lumped together as one and their role in the plot diminishes considerably. For starters, in season 3 they both disappear for about six episodes in a row and have no dialogue in several others. Its also around this time that they start to just sort of follow other characters around for want of something to do, other than the occasional
* Jin, apparently drove him crazy and now it can telepathically contact (or rather scream at) Jin when he's miles and years away.
* Jin (called Fortuno in the dub) uses a hidden camera to spy on the cards in Yuma's hand and relay the info to his D-Gazer, giving him an advantage because some of his cards require guessing the cards in the opponent's hand. Cathy figures it out and destroys the camera, and Yuma is able to beat him.
* Jin, can move and attack faster than most characters can blink, making him unbeatable in combat. Even
* jinchuuriki, as the demons sealed in their body will attempt to take control of their body if their will or seal weakens. Gaara and Shukaku were the first shown instance of this, foreshadowing Naruto's on-going struggles with the Kyuubi. Both ultimately found a method to handle it.
* Jinder Mahal (Canadian of Indian ancestry, though his gimmick only plays out on his ancestral heritage.)
* Jinder Mahal, he's billed from Punjab, India but he's born in Canada.
* Jinder Mahal is immensely popular in India. Despite the fact that he fits the "foreign heel" trope to a T, he is very charismatic, a skilled and entertaining wrestler, and has held down a number of championships. WWE tried to bank on his success by putting the world title on him at one point, but several factors made their plan fall apart (including failing to build up his push, having him shoot racist promos, and causing nearly all of his wins to be via cheating).
* Jinder Mahal: Made his WWE TV debut in 2011. Left in 2014 and came back two years later. Got a main event push in 2017, complete with a WWE World title run.
* Jinder Mahal was also an evil Indian, but as Khali was a face by then he was evil more because of his entitlement and bullying than for his nationality. He could have played the Canadian heel as well—while of Indian origin, he was born and raised in Calgary.
* Jinder Mahal, which was one of the main reasons why he was given the belt in the first place.
* Jin'do the Hexer in Zul'Gurub was optional; you can actually skip him, and he

drops some of the best loot in the dungeon next to Hakkar. Two other bosses were accessible through skill-related means; it was possible to fish up Gahr'zahka by catching fish to make a lure for him, and preparing a certain kind of mojo with Alchemy enabled raids to fight bosses at the Edge of Madness. In the re-released Level 85 Heroic Zul'Gurub, people with enough Archaeology skill can access the optional boss at the Edge of Madness.
* Jinemon Kotsubaki, former 7th Division lieutenant and father of 13th division third-seat Sentaro, was renowned as a master swordsman.
* Jin (end of season 4) and Frank (late season 6) both pull rather impressive versions of this too, particularly Frank, since a lot of viewers thought he really was dead.
* Jinenji is the son of a mountain woman and a mysterious youkai whose nature is never explained. Jinenji and his very old mother live as hermits after his mother was exiled from the village for consorting with a youkai; she is so bitter that when Inuyasha and Kagome first meet them, they think Jinenji's mother is the youkai parent. When Jinenji saves the village's lives despite all the abuse he's received, the villagers learn to accept him.
* Jingai no Yome to Ichaicha suru among others). Some are continued in the second volume.
* Jingaroo had Toot and Snoot Groote, a pair of marspial moles who are particularly adept at mechanical engineering.
* Jingaroo had Victoria, an emu focused on fashion, clothes, and makeup, as well as her dreams of flight.
* Jin-Gitaxias has long metallic arms that look skeletal and his hands have long fingers as a bonus.
* JING! JING! Dschingis Khan! He liked the ho but then he liked the Hindu better!
* Jing King Of Bandits, Jing heads to the prison Seventh Heaven in order to find Campari and steal his dream-making power.
* Jingle All the Way- Arnold's trying to get This Year's Toy for his son, and tries to win one in a raffle which used little balls with numbers as tickets. But after some struggle to get one with the other customers, the raffle-ball gets out of their hands and gets lost in a ball-pool. When he jumps in to get it back, parents attack him, thinking he's after the kids...
* Jingle All the Way experienced a similar situation in 1995 when he attempted to obtain a Buzz Lightyear action figure. As a result, he re-wrote Kornfield's script.
* Jingle All the Way featured a scene of a warehouse full of mall Santas and elves who turned out to be scamming imposters. Or, as Arnold put it, "sleazy con men in red suits."
* Jingle All the Way features a ping-pong-like raffle ball doing this within a mall. Even though the movie is supposed to be a comedy of sorts, everything up until now was not this goofy and did not suspend the laws of physics this much, making this scene feel out of place. After this happens, several other very goofy scenes show up. If it weren't for the ridiculous ball, the other scenes' departure from the apparent laws of physics within the movie might have come as more of a shock.
* Jingle All the Way has Howard Langston briefly impersonate a police officer (or rather, an undercover detective) in order to stay out of trouble when the police raid a counterfeit toy operation that he was trying to buy a Turbo Man action figure at.
* Jingle All the Way in the '90s and early '00s included several deleted scenes, notably a long monologue by Myron describing his favorite childhood action figure.
* Jingle All the Way is based on toys like Cabbage Patch Kids and Tickle Me Elmo becoming the hot toy in demand. Toy companies seek reactions like this.
* Jingle All the Way is that the characters milk the living hell out of how dangerous the bombs are before a camera cut simply shows everyone covered in soot, including the officer who directly ripped it open.
* Jingle All the Way — throws what is a high-tech boomerang. The villain lets go with one of his hands, while the other hangs on. He grabs the Turbo Man toy out of the boy's backpack and shouts "Victory is mine!", before the boomerang hits his

other hand, causing him to fall. He lands on a parade float and is promptly arrested.
* Jingle All the Way mixes this with action comedy as Arnold and Sinbad go through a series of increasingly wild misadventures in the pursuit of the toy of the year.
* Jingle All the Way on December 4, 2020, the last ten minutes were omitted in order to make time for an E-Sports tournament.
* Jingle All the Way on the same channel, where the last ten minutes of the film were cut off in order to show an e-sporting tournament.
* Jingle All the Way, the postal worker bluffs the police by claiming a package he's holding is a mail bomb. To his own surprise, it is.
* Jingle All the Way until after getting divorced, and then suggests to Jaime that maybe his parents should get a divorce if it would make Howard do the same.
* Jingle All the Way was actually released through Wal-Mart for the 1996 Christmas season.
* Jingle All the Way when he realizes he was sold an imitation product. When the police arrive to arrest the Mall Santas, Howard picks up a toy badge and impersonates an undercover cop to avoid arrest. This manages to fool the police.
* Jingle Belle, tells the story of Santa Claus's rebellious teen-age daughter.
* Jingle Bells, Batman Smells, P.S.: So Does May books, Junie B.'s little brother Ollie is mentioned, but not actually seen. Likely true for the productions of other titles from the series as well. This is most likely because all of the children are played by real kids and it would be more trouble than it's worth for a production of this type to try to cast a kid that young.
* Jingle Cruise starting in November, with a thin storyline involving a shipment of holiday decorations being lost in the jungle on the way to the base of operations added to the usual script — along with plenty of seasonal puns.
* Jingle points out. The water soaks everything and everyone around him, including the restaurant table during a date.
* jingle, Rat to fall on his knees, and Pastis to appear and apologize to the readers.
* Jingle: "so S O... G double-O D Good." The "SOGOOD" one is still used outside of the US though, jingle optional.
* Jingle - strangely incoherent speech - talks like a telegram - rum fellow - very. Broca's Aphasia?
* Jingo after Commander Vimes gives a speech, somewhat to Vimes's embarrassment.
* Jingo also has a moment where the Klatchian leader is informed that the Morporkians think Klatchians will run away after "tasting cold steel". He licks his blade and wonders why they say that, and if that's as cold as steel gets.
* Jingo, although he's only crossdressing and not actually a woman, Corporal Nobbs is reluctant to get back into his male uniform/role after he's spent half of the book wandering around Klatch as Beti.
* Jingo, a man who believes nursery stories qualify as military precedent and will deliberately pursue a moronic strategy because the enemy won't expect it.
* Jingo, an Agatean tourist is in the crowd at the procession, taking lots of pictures that Carrot later uses as evidence in investigating the failed assassination of Prince Khufurah.
* Jingo, an Ankh-Morpork fisherman and a Klatchian fisherman stumble on the newly-risen island of Leshp at the same time. When the two men realize that they can't lay claim to it for their respective nations unless they get home first, each grabs for his boy's arm and rushes back to his boat...and then returns, lambasting the other man as a kidnapper, to swap for his own boy.
* Jingo and it needs to be made more civilized for the good of the city.
* Jingo, and their ancestors were great generals. The Morporkian soldiers have neither training nor experience, while the Klatchian soldiers have plenty of both (and outnumber the Morporkians to boot), but the aristocrats wave that aside with the claim that the Klatchians are savages and won't stand against the superior Morporkians. Take note, this IS coming from a group of people who believe that the best strategy is a full frontal assault, that if, after the battle, you subtract your fatalities from your enemies and get a positive number it is a great victory,

that rudeness is the same as straight-talking (if and only if you're a nob, of course) and that if you talk LOUD AND SLLLOOOWW enough anyone can understand you, even if they don't speak the same language.
* Jingo arrow shaped formations whenever they advanced, because that's how his military books and diagrams represented units advancing. He then explains that it didn't actually matter because neither side actually held formation once the battle was joined.
* Jingo as following the "subtract the enemy's casualties from thine own, and if the number is positive, then it was a Glorious Victory" school of strategy.
* Jingo books is "Pardon my Klatchian", a la the real idiom "Pardon my French".)
* Jingo, but makes the mistake of picking Ankh-Morpork (and therefore the aforementioned Vetinari) as the common enemy of Klatch.
* Jingo, but the Klatchian attempt as noted by Colon and Nobby is truly impressive.
* Jingo by a delirious Klatchian. Angua (presumably mistaking it for a similarly-sounding English word) responds that she doesn't have to take that kind of language and promptly leaves.
* Jingo by Nobby, as a joke on a common nostalgic phrase: "We never had locks on our doors in those days... that's 'cause the bastards even used to steal the locks".
* Jingo, Carrot displays the perfect balance between logic and emotion. Declining to go and rescue Angua who is being held prisoner on a Klatchian ship, he points out his presence is needed elsewhere where he can accomplish more.
* Jingo, Carrot gets members of the two opposing armies to play football during a cease-fire. 71-Hour Ahmed remarks that a similar game is played by nomads in some parts of Klatch, with a severed head.
* Jingo, Carrot runs across a knife nut boy. After a brief interview, Carrot discovers that the boy does not have enough gum to share with his playmates, but has more than enough knives for everyone.
* Jingo. Carrot suggests war is, by definition, a breach of the peace, and Vimes starts adding up the other crimes you can charge an entire army with:
* Jingo, Corporal Nobbs recounts a story about how his uncle was a sailor who was press-ganged after a plague. A bunch of farmers got him drunk and he woke up the next morning tied to a plough.
* Jingo: Denephew Boot's uncomplicated parents were expecting a girl. They wanted to call their daughter Denise ("De-niece"). When trying to masculinise it, instead of going for the obvious choice "Dennis", they swapped "niece" with "nephew".
* Jingo designed a bonafide nuclear bomb (the materials it's made from "don't like being squeezed. So they go bang. With extreme alacrity.") This is one of the many reasons he's kept locked up.
* Jingo equally stupid) would've won and Vimes would've had "Things to Do Today: Die" on his Dis-organizer.
* Jingo from Klatch who attended the Assassin's Guild school. He notes that after seven years of an Ankh-Morpork public school, "patronized by the sons of gentlemen", life among the most feared warrior tribe in Klatch is an absolute picnic.
* Jingo, he could simply say "Yes, but I own all the rights to it," which didn't seem to bother them at all.
* Jingo. He defends his decision based on examples from other famous battles, ignoring his aide's comments that in said battles, the winning army was A) larger than the other side's, B) better equipped/experienced than the other side, C) extremely lucky, or D) entirely fictitious, as the battle came from a children's story. It's a good thing that Vimes showed up and aborted the battle...
* Jingo. Including an apology from Leonard of Quirm for not having better chemicals to do the job.
* Jingo in that they're still behind him). We are told of the only worse attempt, General Pidley's famous 'Let's all get our throats cut, boys'
* Jingo is "a man who'd stay up all night to invent an alarm clock to wake him up in the morning."
* Jingoistic Reclaimers allow their vassals, or Thralls, to fight wars with one

another but not to colonize empty planets, presumably to reduce the threat they may pose.
* Jingo. It helps that he's described as having the kind of mind that it's impossible to truly imprison (in the very literal sense, he designed pretty much all the security measures himself).
* Jingo. It may just be a metal tube with a firework stuck in it, but it certainly impresses the weapon-loving Nobby Nobbs.
* Jingo). It's not a very good flying carpet, all the good ones having been locked up for the war effort. Colon is almost as frightened as Rincewind about riding it.
* Jingo, Lord Vetinari performs a spontaneous comedy juggling act to convince the Klatchian guards that he, Colon and Nobby are traveling performers. His routine includes making a baby chick appear under Colon's hat.
* Jingo, Lord Vetinari pulls off a juggling act despite never having attempted it before. His excuse for this is that he's spent decades juggling different parts of his city's political and murderous groups. The fact that he's a trained assassin with excellent reflexes probably helps.
* Jingo. Luckily, the crossbow is in such poor condition that nobody is hurt, but by the time the Watch arrives, Mr. Goriff covers for his son and says that he did it.
* Jingo), muses that you stuff a bunch of weeds in a shampoo bottle, and you have herbs.
* Jingo, Nobby Nobbs mentions his mother's uncle, a sailor who was press-ganged by a bunch of farmers who tied him to a plough.
* Jingo. Nonetheless, Vimes goes right back to saying it. (There is a distinct lack of trouble.)
* Jingo (of a similar substance). Because it was in Greek, and the disagreement was over an iota subscript, it gave us the phrase "not one iota (of difference)."
* Jingo of his lines revolve around his ability to kill anyone with anything sharp, and he doesn't even bother to put on the Jeeves impression.
* Jingo of mutual understanding, starting with the sheer galactic-sized embarrassment of having parents.
* Jingo one of the darkest in the series. Most are about war and racism. And there's the World's Most Laughable Shipwreck.
* Jingo quite easy to miss if you're not paying attention, and the reader may end up doing exactly what Vetinari did.
* Jingo refers obliquely to the trope a few times, during scenes in which a group of Ankh-Morporkian and Klatchian fishermen are stranded on Leshp, as microcosms of the much bigger territorial dispute in the main plot.
* Jingo, Reg Shoe's attack on some enemy soldiers is narrated this way.
* Jingo reveals that conversely, the D'regs word for 'stranger' also means 'target'.
* Jingo rules when he beheaded a man before the three days were up, just because he poisoned El-Ysa. The victim's actions seem pretty bad already, but when Vimes asks who El-Ysa was, he's told it was a village.
* Jingo, Sam's PDA somehow gets switched with one from a different timeline. He's horrified as he realizes that, if he had made the wrong choice at the wrong time, a lot more people would have died. Including Vimes himself: "Things to do today... Die..."
* Jingo says they can't trust 71-Hour Ahmed because he's a D'Reg, and when Vimes says "But you're a D'Reg too!" Jabbar replies "Yes, offendi! We know what we are talking about!"
* Jingo, Sergeant Colon is sweating and in a very difficult situation... as it turns out, he's playing the Discworld version of Scrabble with Lord Vetinari, and thankfully, he manages to lose.
* Jingo's kidnappers by boat, on the basis that if he stayed awake fretting about her, he would be useless when they caught up to them.
* Jingo suggests that the Curious Squid are somewhat civilized and either built for themselves or adapted to living in the buildings on Leshp. They can't figure out why their city disappears above the sea every once in a while, though.

* Jingo that he is, ignores the assault and proceeds to do go about things as he does.
* Jingo: the cabin Angua is imprisoned in a ship just happens to be the one that The Boat drills through to latch onto the ship, making a sharp pointed metal drill tip available.
* Jingo (the conflict is over an island that is of no real significance except that the other lot aren't getting their hands on it).
* Jingo, the generals of the armies of Ankh-Morpork and Klatch meet for breakfast, snide remarks, and final demands on the battlefield with the intent of engaging in battle afterwards (though in that regard, things don't quite go according to plan).
* Jingo, the nobles and guild leaders of Ankh-Morpork are gearing up for a war with Klatch, and are aghast to learn how broke the city is, demanding that Lord Vetinari explain this as once. Vetinari calmly points out that the city is full of rich people who simply don't pay their taxes, and produces a list of offenders (basically everyone in the room except for Vetinari and Vimes). Suddenly everyone in the room decides this isn't a very pressing matter after all.
* Jingo the seriously pissed off "Vimes's grin was as funny as the one that moves very fast towards drowning men. And has a fin on top."
* Jingo thief stealing a lady's bag. He immediately gave chase while still leading the procession, which caused the people behind him to follow his lead since they didn't really know if this was how things were supposed to go, which caused the people behind them to run after them since they don't know what's happening at the front and they're getting left behind, which caused everyone watching to run after them too because, well, everyone else was doing it. While all of this was happening, the poor thief continued to run as fast as he could because he had taken one look over his shoulder and found the whole of Ankh-Morpork society bearing down on him.
* Jingo this by having Vetinari going specifically to talk to Leonard da Quirm to do this.
* Jingo to be more or less free to come and go as he pleases. His hideously destructive designs are intended for constructive purposes (mining, hunting dangerous animals) and he's always immensely disappointed that people want to use them otherwise and is grateful to Vetinari for the opportunity to be sequestered in a light, airy space with plenty of paper and modeling material.
* Jingo to cure and ends up being identified as a suspect because of them. None of them ever worked.
* Jingo treat all men equally. Allow Klatchians the right to be scheming bastards, hmm?"
* Jingo trick (they buried him under the name "Topless Harry"), and points out they need to throw grapnels to secure the enemy ship before boarding... and Vimes, in his haste to lighten the ship's load, had all the grapnels thrown overboard.
* Jingo Vetinari denies that he can speak Klatchian right after he's translated everything the Klatchians on the ship are saying. Since he's talking to Colon and Nobby, it works. (He also later claims to not be able to juggle or do street magic after performing a masterful piece of street theatre, though he also claims that merely managing Ankh-Morpork is more of a balancing act than any juggling.)
* Jingo. Vimes, at the head of a procession, spaces out and begins slowing down and finally comes to a halt, and the entire procession does the same, with jostling and bumping for those slow to keep up with events.
* Jingo, Vimes orders his men to throw out the ship's cargo so they can reach Al Khali faster. Detritus complies, discarding every loose object he can get his hands on. Like the anchor. And the ship's barometer. And the lifeboats. The captain of the ship, still sore about being blackmailed into letting Vimes commandeer his boat, doesn't stop him.
* Jingo, Vimes reflects on the case of Sweeney Jones, the Barber of Gleam Street, who was cutting his customers' throats. Although, unlike his Roundword namesake, not on purpose.
* Jingo Vimes reflects that Carrot is charismatic enough that he really would be able to inspire people with a speech that went "Bread! Eggs! Milk! FLOUR!"

* Jingo: "Vimes's grin was as funny as the one that moves very fast towards drowning men. And has a fin on top."
* Jingo, "Vindaloo" is claimed to translate to "tasteless gristle served to macho foreign idiots".
* Jingo warns Sam Vimes, "Lady Sybil has vouchsafed to me that if you are not there she will utilize your intestines for hosiery accessories, sir." In other words (and probably the ones Sybil used), she'll have his guts for garters.
* Jingo was heavily inspired by Pratchett's feelings regarding both the First Gulf War of 1990-1991 and the Falklands War.
* Jingo, when Angua asks Carrot if Snowy Slopes (a deceased criminal) is an assassin, Carrot replies, "No. He just kills people for money."
* Jingo, when it looks like Ankh-Morpork and Klatch may be going to war, the city council asks the head of the Guild of Armourers how business is, and are cheered when he says they've been making lots of high-quality weapons. They're less happy when the Patrician gets him to admit who's been buying them...
* Jingo, when two rival fishermen grab their sons and rush for the beaches, frantic to sail back to their home cities and lay claim to a newly-discovered island. Each man reaches the shore, realizes they grabbed the wrong boy, then rushes back to exchange sons while accusing the other of kidnapping.
* Jingo, while Vimes is having a talk with 71-hour Ahmed in Klatch, they are attacked by a random Ankh-Morpork patrol looking for Klatchians to fight.
* Jingo who believe that breeding and ethnic superiority will be enough.
* Jingo: Why didn't he just take the whole pad? Because he also wanted Vimes to be curious about the contents of the note.
* Jingo you, Willikins, will march with your red and white uniform? And you don't see anything wrong with this?"
* Jingyan notes Mei Changsu's habit of rubbing at things when he's thinking — just like Lin Shu used to...
* Jin. He is the first love interest who was in a previous marriage and ended up a widow/widower.
* Jin is very stoic and aloof, yet he's also very gentle and caring when he is with his older brother Kusanagi.
* Jin Kazama wears a blue and violet hoodie as a secondary costume in
* Jin Kazama, Yoshimitsu, and Nina Williams were not in the initial roster for
* Jinki:Extend who loves mecha anime and building models based on them... and ends up piloting a mech herself.
* Jinki:Extend who specializes in psychologically breaking female pilots by raping them.
* Jin Kisaragi he is to virtually everyone else, the fact that Jin treats Tsubaki with genuine kindness only reinforces this.
* Jin Kisaragi is more of a Jack-of-All-Stats than Bang due to the fact that he is easier for beginners to use. Being the
* Jin Kisaragi is praised as "The Hero of Ikaruga" because he singlehandedly turned the civil war in Ikaruga around and ended it. In a bit of a twist,
* Jin Kisaragi lacks most of the raw power that most characters have in their fighting styles, instead relying mainly on his skills as a swordsman in conjunction with his ice abilities. This is especially obvious when contrasted with the
* Jin Kisaragi; one translation of his words to Tsubaki in his Arcade mode story contains the line "The only truth in this world is death". However he subverts this because while he believes the world is worthless he refuse to fall prey to apathy.
* Jinkx Monsoon. Identifies as non-binary and uses they/them pronouns when not in drag.
* Jin, Kyotaro, a samurai, privately begs actor Sawamura for money and declares he would do anything (though not with the exact words.) Sawamura tells him to "partake in a show"—that show being to prostrate himself before Sawamura in the streets and publicly plead, which Kyotaro does.
* Jinmen is about all kinds of animals with human faces appearing in the world and attacking humans and animals without human faces.
* Jin Mi pretends to be a boy (with the help of a magic hairpin) when she first

arrives in the Heavenly Realm, and later while hiding in the mortal realm.
* Jinnah's Muslim Assembly, a group within the Indian independence movement, suggested agreeing to support the British through
* jinn embody most of the popular western genie stereotypes between the two of them.
* Jinnian trilogy in the True Game books, the narratrix quietly appreciates the pleasures of having a Shifter for a lover, and misses his powers when they're gone.
* jinni informs them they have two wishes left, to which the guy responds, "Then we'll have two more of those."
* Jinn in service to Eblis apparently serve as artillerymen, using their powers in conjunction with specially-modified demons to bombard the enemy with meteors - as you find out when you attack the artillery position.
* Jinn is the first Spirit encountered, dwelling in the Lamp of Knowledge. When her name is called by a Summoner, she will appear to them and offer to answer a specific number of Questions. Every century, Jinn may answer a total of Three Questions before her power is sealed and she must wait for the next era. While she cannot reveal the Future, she has access to all the knowledge of her creator, the God of Light. When asked a question, her response may be as simple as a verbal answer ("You cannot.") or as elaborate as an illusion that draws the summoner(s) into a story narrated by Jinn.
* Jinn is very curvaceous, with a classic hour-glass figure, and the chains draped around her waist are balanced against the curve of her hips. She wears jewelery on her body, such as braces, anklets, earrings and necklaces, but she is otherwise completely naked. When she first manifests, Qrow doesn't know where to put his eyes and tries to avoid staring at her.
* jinni who declares that he only grants "worthy" wishes. The girls wish for the never-ending Tim-Tams, then run off to enjoy them, completely ignoring the man who reminds them that they still have two more wishes.
* Jinni Zeala a male genie who throws parties in a Flying Harem while wearing a rainbow-colored feathered turban.
* Jin of K-pop boy band "BTS" is commonly called mom by fans, even receiving this nickname from the members sometimes, due to his caring and sometimes effeminate nature.
* Jinora at the end of Book 3, along with the airbending tattoos that indicate master airbenders.
* Jinora continued to be a badass in Books 2 and 3, being Korra's spiritual advisor and saving the day in both books' finales: in Book 2,
* Jinora. Tenzin virtually says this verbatium when she asks about whether she is ready for her tatoos, after Kai convinces her that she should have them.
* Jinpachi Mishima, he dissolves to dust, due to the fact that the evil spirit that possessed him engulfed him in flames.
* Jinpachi Mishima. It kinda makes sense in context, since he's a demon and all.
* Jinpachi, who is affected by the Devil's blood, turned into a demon after he died underground under Hon-maru, imprisoned by his son Heihachi, after the events of Tekken 4 Jinpachi is released, and he holds the King of Iron Fist Tournament 5 to find somebody to stop him, as he could feel the Devil taking over. He also sends a letter to Wang, his old friend, to have a go as well.
* Jinrai clones. They will respawn as soon as all of them are scrapped.
* Jin-Roh: The Wolf Brigade, a powerful moment in the film, Kei grabs onto Fuse crying and utters line from Little Red Riding Hood "Mother, what big claws you have! Mother, what big teeth you have!". All the while, Fuse is screaming in anguish as he finds himself forced to either shoot the woman he loves or turn his back on his fellow Panzer Cops.
* Jin-Roh: The Wolf Brigade are set in motion when the protagonist hesitates to shoot a young girl armed with a suicide bomb.
* Jin-Roh: The Wolf Brigade, the Cerberus corp have their armor outfitted with goggles that have night-vision. All the better to shoot Little Red Riding Hoods in the dark with.
* Jin-Roh: The Wolf Brigade was fought between Germany and Japan, the latter's ass

got kicked by the former, and the Corps is a secret police force for the fascist Japanese government.
* Jin-Roh: The Wolf Brigade, we see another member of the unit in a nearby derelict building, de-cocking his Broomhandle Mauser which he had aimed at them.
* Jinroh The Wolf Brigade where a witness to a government scandal is killed off to guarantee she'll never be found by the opposition. As long as they believe she's still out there somewhere, they can't move against the protagonist's unit.
* Jin's birthday is Feb 14 (Valentine's Day), coupled with Tsubaki being born on March 14 (White Day).
* Jinsei Owata no Daibouken II's discontinuation. The plot is about Owata's last adventure before the world ends, mirroring the fate of many Flash games and animations when Flash finally goes offline.
* Jinsei Shinzaki on in an immediate rematch...which she also lost but at least managed to last more than five minutes in.
* Jin Takemiya genre, Takemiya is incredibly prolific, and her works have been featured in every issue of Yuri-Hime since her debut.
* Jin, Tanosuke is so feminine, his acting career begun with him playing female characters. If it wasn't for his short hair, you probably wouldn't guess he's a man.
* Jin then morphed into a darker and more conflicted character after being betrayed by his grandfather and learning of the Mishima family's cursed bloodline,

* Jinx has Bombs Away, which is also the most powerful physical attack in the game.
* "Jinx" has one of the lengthiest displays of frozen time when Clark goes into Super Speed
* Jinx High has a character walking to a closed gas station to use the pay phone (the book was written before everyone and his goldfish had a cell) and promptly becoming Eldrich Horror Chow.
* Jinx High is a witch who's been stealing her daughters' bodies for several hundred years; this seriously throws the protagonist, who's not expecting the skilled magician she's looking for to be in high school.
* Jinx High mystical abilities until late in the novel, and certainly wasn't aware that his parents had been part of Diana's Scooby Squad in their college days.
* Jinx High storm is causing a huge buildup of static electricity, so possibly justified if no one at the school has ever heard of surge protectors.
* "Jinxie" Penlan of the Valhallan 597th causes accidents through her clumsiness every time she's mentioned, but they all work out in her favor. This actually improves her squad's morale since they trust her to be their resident
* Jinx is the very definition of "a Vaporizer", a psychopathic outlaw toting around a large Machine Gun she affectionately refers to as "Pow-Pow" and a rocket launcher she calls "Fishbones (whom she talks to on occasion).
* Jinxter's famously bad ending. The game begins with the player character about to be run over by a bus, and then awaking in a mysterious, magical world where they become one of its guardians. If you successfully save the world, the, it turns out

you didn't die and awaken in another world; you're quite alive, and the folks in the other world have no idea what was happening on Earth. They helpfully teleport you right back to where and when you left from - in other words, right in front of the bus and to your immediate death.
* Jinx, the Loose Canon as she may be, she's also one of the game's most straight-up entertaining personalities.

* Jiren of Universe 11 is widely regarded as the most powerful mortal in the multiverse. He's one of the few opponents Goku is unable to match even at Super Saiyan Blue, as well as someone that Hit's Time Stop was unable to help him keep up with. Not even using Time Freeze was able to slow him down. The only thing that ever genuinely did serious harm to Jiren was Ultra Instinct.
* Jiren of Universe 11. Universe 11's team as a whole is a Super Team.
* Jiren was younger, by the hands of "the killer". The survivors left him behind out of desperation.
* Jirisan - Old Temple, for Seong Mi-Na, and bonus character Seong Han-Myeong
* Jirobo of the Sound Four enjoys making fun of Choji's weight during his fight with him, despite being fatter than he is.
* Jiro's second son Takashi mentions that although he serves the same food as his father at his branch restaurant, he has to lower his prices to keep customers coming in (of course, reducing it from 30,000 yen—that's $300—isn't that much of a hit), and has two Michelin stars. (Most chefs would kill for just one—but Jiro's original restaurant has
* Jiro tends to twirl her earphone jacks around her finger or touches them together when she's embarrassed.
* Jisu uses a metal bat that is later enhanced by Dusik to have spikes.
* JitteryDragon spoofs. Whenever someone trips, runs into something, or something falls or rolls offscreen, That Poor Cat is heard.

* Jiu Jiu of a canine. Snow & Night, a pair of Jiu Jiu brothers, were left in the care of demon hunter Takamichi as young puppies and were shown to be capable of limited speech a few weeks after birth. Shortly after that, they gained the ability to shapeshift between their human and canine forms. At three years of age, they can shift between their fully grown canine forms (being medium-large dogs) and teenage human forms at will. If exposed to the light of a full moon, they shift uncontrollably into their canine forms and fall into an irrepressible rage.
* Jiu Jiu. Takayuki was the only person in their family who truly cared for Takamichi, and she often reminisces about him.
* Jive Turkey-influenced empowered "All About That Bass", and the Shmoney Dance;
* Jix and often involve the Ambis (aliens) getting confused by human traditions.
* Jix androids can backup to a spare body if they have one, or do a rapid upload into any nearby hardware with sufficient storage, such as another android.
* Jix, Dyonus (an android with a male personality) has a crush on Jix. There's a lot of running gags based off of this. Even though Jix doesn't feel the same way, she "lets" him give her massages and such.
* Jix had a story that took place in an alternate reality where Remula had taken over the Earth and it was discovered later that the original Lauren had actually be transported to that universe when she caught up to her counterpart.
* Jix has a lot of bounty hunters; however, the only two seen are Pratos (who is really named Aranis, Jix's cousin), and Maricax, both of whom hunted the main characters.
* Jix has a story arc that revolves around a device that might as well be called "The Rule 63 gun." Lauren spent the majority of the arc as a feminine looking man.
* Jix: Kelelder the Planet Thief, regenerative type, he's been teleported into the sun twice and his spirit just went back to his ship and generated a new body.
* Jix Kelelder the Planet Thief was made immortal due to a glitch in a cloning and mind transfer device. He's also made a couple of servants immortal using his blood, Heleatra too due to a deal with Remula.
* Jix, Lauren was sent to an alternate dimension where Jix's other personality, Remula, rules Earth.
* Jix named Lamerix is constantly creating weird devices that wreak havoc in the comic. Even before Lamerix surfaced, Remula reverse engineered a device she had seen briefly.
* Jix, one of Remula's personalities, Lamerix creates a device that does this. She tests it out on Lauren, changing her into a guy. Lauren gets mad about being temporarily stuck and uses it on Lamerix, but with no noticeable change (due to no major sexual dimorphism in Ambis and the fact that fur covers their private parts). Lauren convinces Lamerix to temporarily change her husband Paul while she's trying to figure out how to reverse the change.
* Jix that the Ambis (the alien of the strip) has a device that can download languages into the user's mind. Their androids, on the other hand, can learn a language if they hear enough of it.
* Jix: The Ambis acquired much of their advanced tech from another species who tried to invade their homeworld.
* Jix: The Collector captured specimens of sapient species and kept them on his ship. Though, after he captured Jix and she escaped he had to open his collection to the public to pay for the damages, and since her galaxy-conquering race were among the more likely to patronize his zoo he had to stop using them as specimens.
* Jix, the comic switches tracks and has a story about Lauren trying to get the alien androids living in her apartment to do chores. And after Jix's recent fight with the big bad's daughter, Lauren and Jix took a relaxing roadtrip to hunt down the remains of the big bad's daughter's ship before they reached Area 51.
* Jix to emerge from Remula's consciousness was the result of an attempted ejection while the ceiling of her ship was still closed.
* Jix was thought to be male until her brother Romulos revealed her true identity (it's hard to tell what gender a small furry alien is unless you are able to see anything).
* Jiya pose as a lesbian couple in an effort to convince Agent Christopher to come

out to her parents and back out of the arranged marriage she had agreed to as a result of Rittenhouse's assassination attempt on her.
* Jiz by Sienna D'Enema, and has episodes like "The Abortion Episode", "Jiz and the 40th Annual Porn Awards", and "Jiz and the Mammograms".
* Jizzed in My Pants: A man ejaculates during the day while not having sex.
* J. J. Abrams also may have reintroduced this song to more recent generations.
* J. J. Abrams and memorabilia. Interestingly, various car brands saw a brief spike in the sale of white-colored cars around that time.
* J. J. Abrams as the score composer. He also tried giving major roles or cameos to Greg Grunberg and Simon Pegg.
* J. J. Abrams. At any one time, he's helming both a film and television series, and often has multiple works listed on his IMDB page.
* J. J. Abrams a wonderful and necessary revitalization of the franchise or a travesty that has ruined Trek forever and brought a legion of godawful newbies down upon the heads of "real fans."
* J. J. Abrams before Abrams's film was released). More generally, pretty much every single detail in the script that can possibly be perceived as a flaw tends to get dumped on Abrams, which completely ignores the fact that he co-wrote the movie with Lawrence Kasdan and Michael Arndt.
* J. J. Abrams fan of the series. (While Abrams was admittedly a casual fan, his colleagues and screenwriters Alex Kurtzman and Roberto Orci are themselves admitted fanboys.)
* J.J. Abrams has been known to do this for announcing new projects. The first trailer for
* J.J. Abrams has handwaves the faster ships by saying that the shuttles that evacuated the Kelvin, scanned Nero's ship from the future. Then Federation scientists studied the scans and made the technology standard.
* J. J. Abrams. Some of his movies are non-canonically connected by some Fanon there as well (see film section).
* J. J. Abrams was the film's villain from the start rather than make a mystery out of it.
* J.J. Armes, a cyborg detective whose main selling point was an arsenal of snap-on hands.
* JJ herself faced the problem in her relationship with Will. He's likewise understanding, thanks to being in law enforcement himself, only occasionally complaining about her need to constantly travel.
* JJ himself was, for a while, in the habit of blindly trusting whichever
* JJ is the only character to appear in every episode of the second generation.
* JJ is the only person - in the world, apparently - who calls Reid "Spence".
* J. Jonah Jameson gets one of his nicest incarnations. He's still a sensationalist blowhard who runs a smear campaign against Spidey, but he does care about the truth, and quickly issues retractions when presented with contrary evidence. He himself lost his wife to a masked shooter, and targets Spidey as part of a personal campaign to prevent anyone else sufferering the same fate.
* J Jonah Jameson has developed this in recent years. He bemoans the state of modern journalism and holds up his time as editor of the Daily Bugle as an exemplar of “real” reporting. He conveniently forgets that he spent years using his editorial control to conduct a one-man smear campaign against Spider-Man, blatantly twisting the facts to fit his preconceived biases, and even essentially trying to create news by hiring figures like Alistair Smythe and the Scorpion to unmask Spidey.
* J. Jonah Jameson in most incarnations has an impressive vocabulary of mild swears ranging from "Poppycock" to "What in the dad-blamed Sam Hill?" Although in one comic by
* J. Jonah Jameson, is a downplayed version. He's a great (yet gruff) boss who protects his employees from various super-villain attacks (namely that guy who takes the great photos of Spider-Man) but hates Spidey's guts. Unfortunately, the two people are one and the same.
* JJ's son, Henry and that the UnSub was inside JJ and Will's home at the time as

well and that poor Henry didn't know that the UnSub was a bad guy.
* JJ, who keeps following his "sempai" Dee Laytner and clinging to him.
* JK establishes himself as a "friend" who takes advantage of others and isn't ashamed to admit this. Gentarou accepts him anyway and makes

* J. K. Rowling, Barty Crouch mentioned that his grandfather owned a flying carpet that seated twelve back when it was legal.
* J. K. Rowling books, Gryffindor Quidditch captain Oliver Wood was fond of these. His team, not so much.
* J. K. Rowling by the publisher because their initial target audience was young boys who they felt might be put off by a female author.
* J. K. Rowling). Examples of magic being used as technology don't occur much in the story itself, but it is clear from the dialogue that this is how it is used in the larger world the books take place in. Wizards don't seem to understand the Muggle concepts of "light bulbs" or "telephones" for example. The self-writing quills are word processors that suit the personal tastes and writing style of the writer: see Rita Skeeter's acid quill for that one. Then there are self-stirring cauldrons, sneakoscopes (alarms), wireless radios, apparating, broomsticks, the flying carpets, floo network, and portkeys (transportation), and the Portrait Galleries that often act like a vast, sentient internet for anyone that happens to be able to persuade them. Lovegood's antique printing press too—if the Quibbler has it, why not the Daily Prophet and every wizarding publisher in existence?
* J. K. Rowling film. She takes a "go ahead, I won't look" view toward fanfiction, though.
* J.K. Rowling herself seems to have gotten this even more wrong, as Wormtail's transformation in the third novel mentions his
* JK Rowling herself stated she was invoking the trope from about book 4 onwards, remarking that anyone starting a 7-book series halfway through shouldn't really be surprised when they find themselves confused by the continuity.
* J. K. Rowling. Its sole function is to cause excruciating pain for its target, and can only be successfully cast if the caster genuinely wants the target to suffer.
* J. K. Rowling. JKR has stated that the most powerful wizard is only equal in combat to a human with a shotgun. As the shotgun has existed since the Middle Ages humans have had at least combat tech equal to magic since then.
* J. K. Rowling likes this trope. It happens to Ron a few times too; for example when Harry shakes him awake in one scene he randomly shouts something about Quidditch fouls.
* JK Rowling loves giving Word of God so much that she is apparently launching a
* J. K. Rowling never outright stated what her skin color was. All that's described in her appearance is her having brown eyes and frizzy hair; given frizzy hair is often associated with African descended woman's hair, it would make sense as to why some may assume Hermione is a dark-skinned girl (not that frizzy hair is unique to African descendants).
* J. K. Rowling says that this was deliberately done so that she had a built-in excuse when she inevitably messed up and moved a classroom to the wrong floor.
* J. K. Rowling stated "Hogwarts is a multi-faith school." So, presumably, all the major religions are represented.
* J. K. Rowling under the name "Robert Galbraith" and the book received critical praise, but her prophecy came true when it was leaked that Rowling was the author. Sales ultimately went through the roof after the announcement.
* JK Rowling Uses Magic To Turn Transvestites Into Serial Killers: A satire of social justice activism.
* J. K. Rowling who are terrified by being caught in the middle of a confrontation between James and Sirius on one side and three men on broomsticks on the other.
* JL8 that he and his superheroing pals are called "kids", he spits out his chocolate.
* JL8 where all the main characters are pre-adolescent. After some initial

* JLA: Act of God has them get together, though you can argue about whether it fits this trope, since they're depowered at the time.
* JLA: Act of God-level heavy hitters) invades, he is going to steamroll the Earth with trivial ease.
* JLA: Act of God seemed to not be able to get past the days when they were superheroes. Even Supergirl called the past 'The Glory Days'.
* JLA: Act of God there are numerous plot holes and discrepancies throughout the series, none of which are ever resolved or even realized:
* JLA Adventures: Trapped in Time, the film was pretty well received by fans and critics.
* JLA: A League of One: Dragons like Drakul are stated to be invincible unless their heart, which they can remove and hide, is destroyed.
* JLA/Avengers crossover, Batman also kicks Punisher's ass off-panel after realizing Punisher is going to just slaughter a bunch of mobsters.
* JLA/Avengers crossover where the very personifications of the companies and their universes had these colors, probably because of their logos.
* JLA/Avengers for George Perez to draw, making a beautiful piece of art and every geek in comicdom happy.
* JLA/Avengers having told them about Superman's twin weaknesses of Green Kryptonite and red solar radiation.
* JLA/Avengers. More specifically, he grabs the last MacGuffin and gives it to Batman, then orders the Avengers to stand down and let the League win.
* JLA/Avengers?" On the next page, Cap is seen hitting Prometheus hard enough to break his helmet.
* JLA/Avengers, Superman narrowly manages to defeat Thor. The injured and exhausted Superman remarks, "He... May be the single toughest opponent I've ever..." and then the other Avengers dogpile him and beat the crap out of him.
* JLA/Avengers to be, the character who argues for the restoration the most is Hal Jordan - who is "supposed to" be dead. (Barry Allen is there too, but he's not quite so eager to restore the realities.)
* JLA/Avengers what to do in a fight, teams up with Martian Manhunter, who's a very powerful telepath.
* JLA, Batman convinces Mirror Master to defect from the Injustice Gang by doubling Lex Luthor's paycheck. This probably inspired the Justice League example under Western Animation.
* JLA comic. The heroes are trapped in a dream-machine by the villain The Key; however, the machine is constructed so that realizing that they're dreaming and awakening will provide the energy for the machine's true function.
* JLA: Earth-2 (Earth-3), the twist was that even narrative causality was inverted, so that all good deeds were doomed to failure in the mirror universe (just as evil was doomed to ultimate failure in the regular DCU).
* JLA: Earth 2 explored this when both the Crime Syndicate and the Justice League try to affect the other's world, with both of their victories being rendered minor and short-lived due to this balance.
* JLA enemy Doctor Destiny used technology to manipulate and manifest dreams into reality. The Sandman series revealed that the power source of his device was a
* JLA has been this for ages, especially during its Watchtower period, during which members lived/hung out/worked at their base.
* JLA: Heaven's Ladder The plot of the series is kicked off when their lack of a religious belief means they have no frame of reference, leading them to kidnap several planets (Not just the populations of planets, the planets themselves and everything on them) to study the civilizations and figure out how to make a perfect heaven.
* JLA involved them meeting an alien who, upon observing humanity, concluded that we had a genetic imperative/common subconscious desire to drive ourselves to extinction.

* JLA issue where the League returned to present after saving Atlantis.
* JLA mad by trapping them in a maze-like satellite, the structure of which is controlled by his subconscious mind.
* JLA separate all the heroes and their secret identities into separate people, and the separated Batman had only the barest outline of a face under his cowl.
* JLA story arc, the Justice League went back in time and got killed. Nightwing assembles a back-up League as per Batman's instructions. When the new team is brought together, they watch a video Batman made for them. Green Arrow starts ranting at some point, to which video Batman yells, "QUEEN, ZIP IT!" Because he's BATMAN.
* JLA's Wayne and takes his form (making it a double example of this trope: a Martian who is forced to think it is human who then winds up thinking it is a different human).
* JLA, the Martian Manhunter reconfigures his brain so he can think like him.
* JLA the ruler of a planet of elemental giants sends seven of his greatest warriors to a certain backwater planet for a grand battle to decide the new leader. The battle never happens; all seven are defeated by local superheroes within minutes of their arrival. The warlord decides that Earthlings are too dangerous to live and orders a full-scale invasion. And is, of course, beaten.
* JLA. The Shaggy Man's tiny brain did not have a good effect on his mental facilities, and the Shaggy Man mostly just slept a lot. And yes, this does show a bizarre combination of the mind as the brain and as something beyond physical.
* JLA: The supervillain Prometheus has an intense hatred of the police due to his origin story, which is the inverse of that of Batman. His parents were two hippie spree killers, and he traveled across the United States with them until they were cornered by local law enforcement and were gunned down after opening fire on the surrounding police. This traumatic experience caused his hair to turn white, and he vowed to "annihilate the forces of justice" in order to get revenge for his slain parents.
* JLA, throws him through three buildings while saying "Thank god... for this crummy economy... or we'd never have abandoned buildings... to smash!"
* JLA uses his vibration and intangibility-based abilities during sex with his wife, Iris.
* JLA vs. the Crime Syndicate of Amerika (the Crime Syndicate of Amerika) end up in the "good" universe while the Justice League takes on the Void Hound, a mechanical creature easily capable of destroying planets. True to form, instead of helping out, they relax in comfortable chairs provided by the Power Ring (the alternate universe's Green Lantern) and eat popcorn... also provided by the Power Ring. As he says, "It's kind of tasteless, but hey, it's lo-cal."
* JLA Watchtower who had been slated to die in a traffic accident, but was snatched to the Lunatic. In a plot that crossed both games, an injured Nightwing stumbled into the cafe after an incident on Watchtower. Hugo was the first to intervene and saved Nightwing's life. When Nightwing's friends from Watchtower came to take him home, that universe's version of Starfire took a fancy to Hugo. A whirlwind courtship later, "Hugo Wallace Anders" was set up with a new life and identity in Watchtower-verse.
* JLA. When it reacted to a disfigured film star shouting "Don't look at me!" by turning everyone in the city blind, Green Lantern realised "It's getting creative."
* JLA: Year One thanks to Flash's legs, Green Lantern's arm, Martian Manhunter's eyes and Black Canary's vocal cords.

* J. Michael Straczynski has said that whenever he got stuck writing
* J. Michael Straczynski. He also has Mephisto proclaim that a "small part of their souls will remember what you have lost", thus somehow implying whatever Peter and MJ become on the surface is just an extension of Mephisto's spell and that the real Peter and MJ are locked away, waiting for release.
* J. Michael Straczynski. He did. One of the characters was revealed to be a total pervert, fascinated by sex between alien races. In one episode a clip is shown of a Pak'Ma'Ra engaged in doggy-style sex with a Drazi, something that is completely impossible, especially in the manner described, due to the actual locations of the reproductive organs presented as though in the same place as humans. They are not. The clip is even plot-relevant: it is used to distract some guards.
* J. Michael Straczynski, however, resulted in just half a season before the show was canceled.
* J. Michael Straczynski In another case, his instructions allegedly consisted of: "Break our hearts."
* J. Michael Straczynski, including every season finale. Lots of great information about the production and his writing strategy, and it ultimately becomes very moving when he audibly chokes back tears while watching the series finale.
* J. Michael Straczynski. Indeed, the show didn't even end as he had originally meant for it to end, due to changing station commanders between seasons 1 and 2, changing several major plot points. And if you were just watching the show, you probably wouldn't have noticed (much).
* J. Michael Straczynski in order to avoid spoiling future storylines, naming Valen as a specific example.
* J. Michael Straczynski in the 8th season. He was brought in to liven things up a bit: Jessica became a part-time professor of criminology in New York, the show's tempo changed a bit, etc. If you pay attention, you can see his style stamped all over MSW.
* J. Michael Straczynski in which Max's ex-wife's cat was kidnapped by enemies, causing Max to demonstrate how tough he could be. The ep was dedicated to JMS's own recently deceased cat.
* J. Michael Straczynski, it achieved its goal of a five season run, making it the longest running SF space drama of its time.

* J. Michael Straczynski. JMS did so, and as soon as the executive meddling evaporated, mercilessly killed him off and never looked back.
* J. Michael Straczynski run, when Aunt May discovers the truth about her nephew's super-hero identity she admits that for the longest time due to his sometimes odd behavior and natural sensitivity she thought he was gay.
* J. Michael Straczynski's bosses were very worried about him when he turned that one in....
* J. Michael Straczynski. There was once a website called the Church of Joe, where his more obsessive fans could sign up to be clergy in a religion worshipping the Great Maker, Joe Straczynski himself.
* J. Michael Straczynski, which arguably changed the genre (on television, at any rate) permanently.
* J. Michael Straczynski, which has a setting with five major galactic powers and several smaller governments.
* J. Michael Tatum and when he wears it, France's voice comes back to him.
* J. Michael Tatum, gay American voice actor, director, and script-writer.
* J. Michael Tatum is this, while in Real life he has a medium sounding voice a lot of his roles are deep-voiced men.
* JMSDF between their pacifist and humanist values and the more war-oriented mentality of the time.
* JMS has written several episodes where he purposefully did not take a stand in the issue presented, but rather presented both sides and let the viewers draw their own conclusions. This hasn't stopped many people from claiming that such episodes are clearly (for/against) (their views/views opposing their own). One example of an inversion of this trope is the episode
* JMS' Spider-Man, but are in fact "totemic" powers carried by the spider which it felt compelled to pass on after being hit by the lethal radiation beam. It was written in a way letting it be totally ambiguous if either this version or his classic origin is the real one, and even suggesting that both might be true to some extent. When Spider-Man asks an ally of Ezekiel which explanation is true, he simply responds that one explanation didn't necessarily contradict the other.
* JMS' Spider-Man, Peter is attacked by two people claiming to be his and Gwen Stacy's children. One of the reasons this doesn't make sense is, as Peter points out, that he and Gwen never had sex. This is one of the reasons the story is considered bad, since there was no conceivable reason for them not to have slept together.
* JMS' Spider-Man". Production is complicated by the filmmakers' debating whether the title character should be bitten by a radioactive lobster or something more important like a lobster god, and by Dr. Octopus.
* JMS' Spider-Man run, Peter and MJ reconcile and whilst they're holding each other Doctor Doom (who was being attacked at the airport they were in) moves from underneath the rubble, prompting MJ to ask "Did the ground just move?" and Peter to respond "It always does".
* JMS' Spider-Man, Spider-Man was being flown to Las Vegas via the private jet of a crime boss, Mr. Forelli. When a scantily clad stewardess started making veiled offers to Spider-Man, he sealed his seat away from the rest of the passenger compartment with curtains made out of his webbing, muttering, "Just slide the food through the webs and no one gets hurt."
* JMS's run on Spider-Man can build one of these in New York while it's taken the city three extra months to finish a subway extension.
* JMS stated that he's well aware of how unrealistic this is, but he also knows that audiences want to see the actors faces.
* JMW Turner's paintings included "Slave Ship (Slavers Throwing Overboard the Dead and Dying, Typhoon Coming On)", "
* Joab calls out David for publicly mourning the death of his son Absalom, telling him that had his servants died instead of Absalom, he would be okay with it.
* Joachim Hoch is described as just under 6'5 and built like a grizzly bear. Hanala on the other hand is lucky to be 5'1. Of course, size means nothing but a height difference as Hanala is the brutally violent one.

* Jo actually called CPS on the Spivey family after the camera footage showed the father appearing to beat one of his children with a belt. The actual discipline took place off-camera, but the belt is seen beforehand and the child can be heard screaming.
* Jólakötturinn, or Yule Cat, is described as a horrible creature that eats children with no new clothes for Christmas.
* Joakim Noah, also of the Bulls, sprained his ankle about a game after Rose went down. He missed out on the final two games of the series, where Philly beat Chicago.
* Joan and Grace's secret affair to get the garden club presidency with the threat of revealing it.
* Joan Armatrading's "I Love It When You Call Me Names" is about a "big woman and a short, short man."
* Joan Baez's version of Donna Donna received a bump after some of the lyrics were featured in
* Joan Calamezzo even moreso - she's the host of the local talk show
* Joan Crawford 38 years and Crawford's initial reservations about being directed by a twenty-something newcomer.
* Joan Crawford attributes it to Joan being combative and temperamental with her previous husbands, whereas Al was able to handle her - and he also moved her into his life rather than into hers as the previous ones had.
* Joan Crawford came to Hollywood in 1925, she promoted herself by entering and winning dance contests doing the Charleston and other routines of that era. Her early roles often featured her dancing skills.
* Joan Crawford has Risen from the Grave holds the last note of "Joan Crawford has rissssssssssssseeeeennnnnnnnnnn....." for an unfeasibly long time, finishing on a suffocated gasp before Allen Lanier's piano outro.
* Joan Crawford's exact date of birth is unknown, except that it was sometime in the 1900s (1904 at the earliest, 1908 at the latest).
* Joan D'Arcy is one of the less seen Trust heads and the last one to be formally introduced. However, her hiring of the man that kills Rothstein and
* Joan Holloway always asks her lovers to zip her up when she's getting dressed.
* Joan Holloway and Roger Sterling have a long and passionate love affair. He is one of the bosses in their ad agency and married with a teen daughter while she is a single secretary (who more or less runs the office as an unofficial office manager). Some people know, Roger's older business partner Mr. Cooper, but most are oblivious to the relationship. They break up when Joan gets engaged. Roger continues to have a soft spot for Joan.
* Joan Holloway and Roger Sterling have a long and passionate love affair. He is one of the bosses in their advertising agency and married with a teen daughter while she is a single secretary (who more or less runs the office as an unofficial office manager). Some people know, for example Roger's older business partner Mr. Cooper tells Joan she should not waste her youth, but most are oblivious to the relationship. They break up when Joan gets engaged. Roger continues to have a soft spot for Joan. They later have a baby together after they sleep together once, and Roger tries to tag along.
* Joanie Loves Chachi if the network hadn't played with its scheduling.
* Joan Jett about social media and tabloids that are bombarding everyone with too many details about what people are eating, wearing, and sleeping with and all the other pointless details all the time.
* Joan Jett and founder of Blackheart Records. Has had relationships with both women and men.
* Joan Jett and has a line that goes "if you need a drink babe, I'm buying."
* Joan Jett and The Blackhearts mentions the subject of the song standing Joan up on a date:
* Joan Jett and the Blackhearts song, "Fake Friends" is pretty much about this trope, and why it is better to cut ties with those who are only friendly to you when it is convenient for them.
* Joan Jett fans were not amused when "Do You Wanna Touch Me" was covered by the

show, and an 2008 Hewlett-Packard TV commercial featuring the Joan Jett version was pulled once HP learned that a convicted child molester wrote the song...and was getting royalties from their ad!
* Joan Jett's "Do You Wanna Touch Me." Not demonstrated by Joan, sadly.
* Joan Jett's "I Hate Myself For Loving You" is an unusually self-aware version of this trope, as the POV character is quite aware of how toxic the relationship is but can't bring themselves to leave it.
* Joan Jett's massive hit "I Love Rock And Roll" was originally by The Arrows.
* Joan Jett topped the Hot 100 with "I Love Rock N' Roll", one of the 1980's most memorable songs. She had two more Top 10 hits, one of which was the #8 hit "I Hate Myself For Loving You". Peaking one slot above it was… "Bad Reputation", another enduring rock tune, right? Believe it or not, "Reputation" never charted anywhere. That #7 hit was actually a cover of Tommy James' "Crimson and Clover", which has faded into obscurity like her minor Top 40 hits.
* Joanna Boland, who plays Morgan Finn, is cisgender though, while her character's transgender.
* JoAnna Garcia Swisher is a full eighteen years older than Disney's Ariel, who is more recognizable as a rebellious teenager. However, it's hard to imagine an actress who could better capture Ariel's quirky attitude.
* Joanna Jędrzejczyk had dominated the Women's Strawweight division with an iron fist, with many experts wondering if she would do what Ronda Rousey couldn't and retire as champion. Few gave her UFC 217 opponent, Rose Namajunas, a chance of pulling off the upset despite Namajunas' skills growing by leaps and bounds during her time in the UFC. But pull it off she did,
* Joanna Lumley appeared as a laboratory assistant, but her scenes were also cut.
* Joanna Newsom has a song called '81 (referencing a year from a recent century), but when spoken in the song itself, the lyrics book says "A.D. 1". This pun only works in American English, since in British English, the D and T sounds would be completely distinct.
* Joanna Newsom often plays this straight, because a lot of her songs are fairy tales. They also tend to be long and filled with gorgeous imagery and metaphor. Example:
* Joanna's problem was actually less that she was a woman or even seriously mentally ill; As Joanna's own mother, Queen Isabella of Castile aptly demonstrated, women (yes, including
* Joanna the Mad - Queen of Castile - for her husband, Philip the Handsome. She took to carrying his coffin around with her and sleeping with it. Her son, Carlos I of Castile (better known as Charles V,
* Joanna turns out to be married, with a husband who's a vicious drug smuggler and treats her about as bad as you would expect.
* Joanne Bertin's Dragonlords have it sort of built in. A Dragonlord is a being with half a human's soul, half a dragon's; before they are born these souls are split in twain and reassigned. Dragonlords pine after their soultwins, and there's mention of the horrifically tragic case when one's soultwin turned out
* Joanne of Arc, for example, knows she dies in medieval France eventually. She is currently an agent of the Continuum. Do
* Joan of Arcadia, and the character in question was never seen again.
* Joan of Arcadia chooses what he looks like, when he appears as a boy her age because it's easier for her to be mad at him in that form.
* Joan of Arcadia depending on how you interpret her relationship with God.
* Joan of Arcadia episode "No Bad Guy" contains a plot involving an elderly man who loses control while driving and causes numerous deaths by crashing into a farmer's market. As the episode's title suggests, the moral is that sometimes bad things just happen with no one to blame. However the case of George Russell Weller, on which the episode was based, was not so co cut and dried. There was evidence that the incident was a premeditated spree-killing.
* Joan of Arcadia. Fans were not happy about this, and although the season finale did imply that there was a bigger threat coming for Joan to deal with, the show did not manage to get a third season.

* Joan of Arcadia, got the boot not long after, failing to be renewed for a third season even though it was relatively popular and critically-acclaimed. Aired at 8 PM Fridays on CBS.
* Joan of Arcadia had one at the end of the first season episode "Jump".
* Joan of Arcadia has Joan and her friend Grace resolve their differences and then sit on the porch while the camera pulls away, a song plays, and the screen fades out. There was still twenty minutes left.
* Joan of Arcadia has Joan ask the teenage boy claiming to be God to prove his divinity. He gestures behind himself to show... a tree.
* Joan of Arcadia has Joan believing God is trying to make her preach this, and she begins protesting her cosmetology class by not showering, washing her hair, or putting on deodorant or makeup. God then tells her that isn't what he meant. But it kind of was. But not really. The Aesop of the episode was a little confusing.
* Joan of Arcadia is via a television newscaster who speaks directly to her.
* Joan of Arcadia It could be that this was simply God testing her, like Job. The second (and final) season finale, however, introduces Ryan Hunter, a person who it's implied previously talked to God and may now be talking to the Devil (or is the Devil). We'll never know though.
* Joan of Arcadia, Joan joins the chess club and beats her first opponent in only a few moves in what he thinks is an ingenious display of lateral thinking, but is actually a fluke. Realistically it couldn't be either. There's nothing lateral about noticing you're able to checkmate your opponent; a fluke would be possible against an equally inept opponent, but a competent player would never make a move that would open themselves up to checkmate.
* Joan of Arcadia, Joan's father uncovers a large conspiracy within the municipal government and calls in the FBI. The FBI removes all heads of various municipal agencies - including Joan's father, who is Chief of Police. But the community still knows who the real hero is.
* Joan of Arcadia, Joan's younger brother was shown to have an addiction to Internet porn.
* Joan of Arcadia, Joan, who is still reluctant about her new mission and frustrated with the lack of clarity, has this exchange.
* Joan of Arcadia made this the rule, actually listing things God couldn't say with regards to universal truths and religion. God conversed with Joan on a regular basis and always refused to answer any major questions.
* Joan of Arcadia once complained that she was tired of doing the oddball tasks God gave her without knowing the point of it all. God replied that people aren't meant to see the big picture, that they only see their part in it because that's all they can process. Joan insists on getting the full view of where her latest task leads and God obliges. Joan sees a rapid flash of images that showcase the results of her actions and she quickly blacks out from sensory overload.
* Joan of Arcadia once suggested that Joan's visions could be due to Lyme's disease.
* Joan of Arcadia pregnant (although the episode ends with Helen revealing she had her period that evening, indicating an early miscarriage. Or a false positive. They're fairly common.)
* Joan of Arcadia rant at God, God offers to show her what he sees and hears every day. Fifteen seconds later, she's on the floor, unable to deal with the downsides of omniscience.
* Joan of Arcadia used a version of "One of Us" that Joan Osborne specially re-recorded to fit the length and pace of the credits better.
* Joan of Arcadia uses a high school with a science lab and art room, but probably only one hallway.
* Joan of Arcadia when he refers to her as "Joan" in a second season episode after she disappoints him.
* Joan of Arcadia which also contains some elements of a police drama (mostly in the parts with Joan's father) high school romance and many religious/spiritual themes.
* Joan of Arcadia, while God does occasionally talk to Joan through dreams, her

normal dreams also include Adam as a dog and evil koala bears in hats.
* Joan of Arc campaign is narrated by Guy Josselyne, who tells the exploits of Joan and her battles in the Hundred Year War. Interestingly, he appears in the last scenario as a hero and though his survival is optional, he will still be the narrator even if he dies in the same scenario.
* Joan of Arc cut her hair to a man's length both for practical reasons and to show her commitment to the cause (and make it easier for men to take her seriously); it was something the clergy at her trial made a big deal about. When she was convicted, her head was shaved completely, giving us a twofer.
* Joan of Arc did not disguise herself as a man, but chose to wear men's clothing while fighting for practical reasons.
* Joan of Arc ends with Joan's soul ascending to Heaven and being greeted by a crowd of angels.
* Joan of Arc/execution) — 1900 film, possibly the oldest example
* Joan of Arc had her army prepare a rescue outside the city walls, only to look up and see the smoke of her pyre rising above the rooftops.
* Joan of Arc mention that the two of them got along well (though no solid proof of a romance exists) and it's likely that Gilles de Rais went mad long after the war.
* Joan of Arc: national heroine of France and she is well known for her virginity.
* Joan of Arc, once stated that he would have been prepared to follow her to the gates of Hell if she asked it of him.
* Joan of Arc's voices told her where to find a sword, buried behind the altar of the church of Saint Catherine de Feirbois. When her followers found it, it was covered in rust, but it wiped off easily, revealing five crosses (or fluer-de-lis according to some sources), and it turned out to be Charles Martel's sword, who left it as an offering of thanks after the Battle of Tours and also for whoever was chosen by God to save France in the future. Joan later broke it just before the Siege of Paris when she hit a prostitute with the flat side (she had a habit of beating any prostitute she found to drive them out of her camps), which the king saw as a bad omen and suggested to her that perhaps she should have used a stick, though she claimed it was actually a sword taken off a Burgundian soldier.
* Joan of Arc was a chaste maiden dedicated to the church, and could qualify. (Though she would more precisely be classified as a Warrior Nun.)
* Joan of Arc was a prostitute. Why else would she be following the army? Joan herself later drove off camp followers who were prostitutes.
* Joan of Arc was found innocent by the court... 25 years after she was burnt at the stake. The vilifications continued for a long time in England, though, and for good reason (i.e. Joan fought for France, who was England's nemesis during the Hundred Years' War), and the basis for her trial to begin with (Joan's claims of being told by God she should defeat the English naturally was a massive threat which they had wanted to discredit with it).
* Joan of Arc: When confering a singular honor on the titular heroine, King Charles VII remarks on the seemingly strange idea that birth and lineage are often held up as more important than a person's character, but as king he is able to ignore that convention and thus award Joan the honor due her loyalty and service.
* Joan of Kent, a cousin of King Edward III, claimed a childhood marriage promise to one Thomas Holland as grounds for the annulment of her marriage to the Earl of Salisbury. Since Joan was a wealthy heiress her husband did
* Joan Osborn asks "What if God was one of us?" in her 1995 song of the same name.
* Joan Osborne is a raw and rootsy blues-rocker whose one big hit, "One of Us", is a relatively lightweight alternative-pop tune.
* Joan, precisely how heroic they are generally depends on the episode.
* Joan Redfern — the love interest of John Smith, a certain humanized-amnesiac Time-Lord — is revealed to have kept John's diary and her memoirs in an attic. Over ninety-five years later, her great-granddaughter publishes them as a book...only for a man,
* Joan Rivers struggled with depression after the suicide of her husband Edgar Rosenberg and subsequent estrangement from her daughter Melissa.
* Joan Rivers, would never have gone on to attack him for it, let alone eat him.

* Joan's on their one-night stand (and her only episode of infidelity).
* Joan Sutherland and Richard Bonynge (she would rarely sing without him conducting; it was in at least one of her contracts, with the New York City Opera).
* Joan Vinge all time units have been replaced by multiples of seconds (megaseconds,gigaseconds), freeing them from dependence on any local rotation or revolution cycles.
* Joan Watson so that Sherlock and Mycroft obtain valuable information for them.
* Joan wear armor into battle, and lived with an honor worthy of the title.
* Joaquim De Almeida, is a little over 5'7"/170 cm, so Janney had to remain seated throughout the meeting and the scene seemed a little strange.
* Joaquin loses his right eye in the final battle. He places a black eyepatch over it.
* Joaquin Mondragon, or so it seems, but he is actually using The Medal of Everlasting life, making it impossible to kill or even hurt him.
* Joaquin Phoenix and shortly thereafter revealed, to the surprise of almost no one, that the whole thing was fake.
* Joaquin Phoenix. When he's shown smiling/laughing, it's either very subdued, or as a result of the medical condition that causes him to laugh uncontrollably; when he does kill someone, he's actually completely serious. It's not until the end that he actually starts to adopt one.
* Joaquin Phoenix (where he stayed in character for three months and was later compared to Daniel Day-Lewis by director Paul Thomas Anderson).
* Joaquin's dad is talked about a lot but never makes an appearance which leads to all sorts of Fanon.
* Joaquin trails the McGiven's gang by clinging to the underside of their wagon in
* João, on the other hand, was mostly forgotten for decades, appearing only in a handful of Brazilian stories before making a comeback in the Dutch comics. However, since those stories are made in the style of the old US comics, his appearance and personality remained unchanged.
* João Rebelo: "Very well then. Shoot me. And buy your security."
* João Ternura, was written for around 45 years, with interruptions in the meantime, only been published posthumously.
* Job 40 as the "Crocodile" starts breathing fire and the "Hippopotamus" has a tree-like tail. There are some guesses as to what the Behemoth might actually be, with some bets assuming it to be entirely mythical or symbolic and others guessing that "severely distorted or exaggerated hippopotamus or other large creature" might actually be about right.
* Job: A Comedy of Justice: Part of the early indication that there was a relationship between "Alec" and Margrethe is her willingness to help Alex into his formalwear, including tying his tie.
* Job: A Comedy of Justice, where Satan is one of the nicer characters.

* jobber Reno Riggins, who would have a brief surge of offense, then pause to shout "Get ready for… a RenoPlex!". This would inevitably give his opponent more than enough time to recover and beat the tar out of him.
* jobber rookie and a bodyguard for Alberto Del Rio), another dancer, with the exact same theme song that everyone onscreen acts like they've never heard before.
* jobbers. Or worse, a division with Jobbers, C List Fodder and some popular girl, who then gets a free pass to quarters. The thing is, there's a nomination process and a classification round before the final bracket, so they could use proper seeding if they wanted to.
* jobbers to the Harlem Globetrotters as the constant losers in a fake league that

focuses on showmanship rather than actual basketball. In the early days of the exhibition matches, they would even play as several different teams to create the illusion of a whole league rather than just two teams, much like old-school jobbers, who would work as several characters to keep rosters and costs down. In 2015, the Generals folded when the Trotters ended their long-term contract to serve as their foils. Two years later, the Trotters bought the trademarks of the Generals and relaunched them as a separate barnstorming team that no longer plays the Trotters.
* Jobbers) while others, such as the Moondogs and Sharpe had main-event matches at some point.
* Jobber with more defeats than most champions have victories, but he'll always be the champion in players' hearts.
* Jobby the Hong he ordered ended up being one, as evidenced by how many of its joints were broken straight out of the package.
* Jobby the Hong". Kaye was left speechless for a moment before breaking character and saying "I can't... No... I just can't." The end of the review has Kaye give the closing narration before being shown the line in the script again and shouting "I'm not saying it!".
* Jobe claims that several male telepaths she knows insist on 'riding along' with their female partners during sex because of (supposedly) how much better they like the female experience, and even get upset if their partner won't let them.
* Jobe Wilkins' father is a gadgeteer genius villain. He resents Jobe for being a bio-devisor instead of a gadgeteer like him.
* Jobe Wilkins has absolutely no limits as to how she will accomplish her goals, other than her own sense of self-control. The only scruple she's shown of any kind is a distaste for mind control, and even then her
* Jobe Wilkins plays the biological imperative concept straight. He designed his current female form as a
* Jobe Wilkins, who is not only a frighteningly powerful bio-devisor but also has scads of patents in biological areas. He just developed a cure for dysentery. Problem? He's an amoral monster with all the empathy of a tarantula.
* Job for a Cowboy for them, as none of them particularly liked deathcore and hated that they had blown up because of it, and they all decided that they would rather play death metal and risk losing their status and having to get day jobs than play a genre that they didn't care for just so they could make a living off of their music.
* Job for a Cowboy, founding guitarist Ravi Bhadriraju is Indian-American
* Job for a Cowboy is either chronicling a psychedelic trip (based on the nature of the visions and the album's musical flow, probably ayahuasca) or a wisdom-granting seance. "Worming Nightfall" is either where the trip goes very wrong and destroys the protagonist's mind or where the seance goes wrong and leaves her trapped in a dream world. The wording is ambiguous enough that both explanations are equally plausible.
* Jobless Parent Drama: A family faces financial difficulties because one or both parents are now unemployed.
* Jobless Parent Drama: A family struggles because a parent is unemployed.
* Job listings are getting into the act too: "replenishment" is the euphemism for "putting goods on the shelves".
* job of drill sergeants to be this way. Why? Because it will make you remember your training, which in turn will save your life once bullets start flying. A soldier that does twenty years of service may not remember what he did all the time (especially if he never saw combat). But he will definitely remember his time in basic training if he had even a halfway-decent drill sergeant.
* Job Offer", we learn that Malory had moved without telling Archer when he was a kid coming back from Boarding School for the winter break, leaving him stranded at the station on Christmas.
* Job Simulator have made human workers obsolete, and one of the past-times available to humans is experiencing virtual recreations of "jobs". These recreations of such jobs as office worker, gourmet chef, convenience store clerk,

and automobile mechanic are not very accurate, and mostly an excuse to have you mess around with random objects in each scenario.
* Job Simulator, if you accidentally throw or drop a task-critical item outside of the play area, it will teleport itself back into the play area automatically, preventing you from having to restart.
* Job Simulator, you can hire "Hipster Bot". He wears glasses, founded Font Snob Club, and has worked at a grape juice brewery.
* jobs in Japanese). They have the power to use enemy skills. By eating cat food.
* Job-Stealing Robot and the shrinking job market even more scarce, leading to calls for permanent universal income and other forms of social democracy to correct this situation.
* Job-Stealing Robot: A robot designed for a specific function causes people to lose jobs due to the robots making it unnecessary to hire human workers to do the tasks the robot is capable of.
* Job-Stealing Robot: Robots built for specific functions result in humans no longer being hired for jobs that involve doing what the robot was made to do.
* Jobs that are in the public sector (retail, police, teachers, etc.) rarely get thanks for the hard work they do for the people they serve. Many war veterans that returned home alive and well can also get the same treatment from their fellow countrymen.
* Jobs: The final arc of the film is the lead-up to the iPod's introduction in 2001.
* jobs. When a class of students is asked what kind of careers they want, most chose glamorous jobs like being an actor or an athlete, with Noguchi (who wants to be a salaryman) being mocked for a lack of imagination. Their teacher reminds them that for the glamorous careers, your time in the spotlight will eventually end and then you will have no job security. For people who want to raise a family, the stable, secure job of an office drone is a much better way to go, with benefits like a health plan and a pension making things easier for you in the long run.
* Job System kicks in, which is about 30 hours later. Before that, the fights are still pretty boring.
* Job System system whereby classes have distinct equipment and abilities but can be changed at any time.
* Job Title: Some of the more gimmicky movies have a killer of a profession that will provide thematic kills and quips.
* Job was a good, righteous man with much wealth and a large family. When the devil argues to God that Job is only good because of his circumstances, God permits him to take away all Job has, and later to afflict his health. In his harsh circumstances and despair, Job curses his own birth but refuses to renounce God. In the end, God restores Job's fortunes.
* Jocelyn Fray from greatly resembles her daughter Clary, only with sharper features.
* Jocelyn left her husband on her wedding night because she had fallen in
* Jocelyn Wildenstein. Supposedly her husband talked her into the plastic surgery which makes her look like a Rule 63 version of the Joker.
* Jock Dad, Nerd Son: A nerdy kid has a father who was a jock in school.
* Jockey shorts or jockeys (men's briefs) - inverted, as when briefs were invented by Cooper’s, Inc., they were given the moniker “jockey” in reference to the fact that they offered the same “masculine support” as an athletic supporter AKA jockstrap. Decades after the debut of the brief, Cooper’s would change its name to Jockey.
* "Jock o'Hazeldean" is about a bride eloping from an arranged marriage with the eponymous hero.

* Jo Clayton, Aleytys was sold to a insect-like species to be used as the host for their next queen, which would consume her as time passed; Aleytys' abilities made her particularly good fodder.
* JoCo loves this trope. "Better", "Betty and Me", and "I Crush Everything" all turn creepy partway through.
* Jodelle Ferland a teenager, and thus she is always padded down and costumed in baggy, concealing clothing to disguise her large breasts.
* Jodi Behan the titular bride in the famous viral video "Bride Has Massive Hair Wig-Out" did indeed cut off her hair for the video. She actually got the starring role because she was the only one of the four actresses willing to do so.
* Jodie can get arrested three different times during the "hunted" level from
* Jodie Foster, prolific and highly decorated actress and director, acknowledged she was lesbian in 2013 while accepting a lifetime achievement award at the Golden Globes.
* Jodie Foster revealed that she is not normally a method actress ("They go to acting class and learn to melt like an ice cream cone"), but had to become one for this part. She lived in the house, ate Nell's food, and almost "channeled" the character as she developed her gestural language.
* Jodie Foster voices herself in French dubs. It helps that's she's perhaps the American actress who speaks French the best, very fluently and with no trace of American accent.
* Jodie's newborn daughter, Danielle, has a cleft lip as well as just a smooth surface with nostrils in place of a nose.
* Jodie Whittaker informed her that there was another role she might be interested in...
* Jodie WhittakerThe biscuit (cookie) dispenser in the Thirteenth Doctor's TARDIS dispenses custard creams, which are Whittaker's favorite. The set designers put it in as a surprise for her.
* Jodi Picoult, a man falls in love with a ghost and ends up with her granddaughter.
* Jodi Picoult are in... but at worst, there is something downright creepy in her tendency to break Anna down into her component physical parts. Two examples stand out: Even at Anna's birth, Sara totally fails to mention her newborn as she rushes off to oversee Kate's treatment thanks to Anna's umbilical cord. Still creepier is when she denies Anna a chance to go to hockey camp in case something happens to Kate - since when the next crisis strikes "we will need Anna - her blood, her stem cells, her tissue - right here."
* Jodi Picoult has strong overtones of this — several reviews have mentioned that the character was so wise and saintly that the story felt unrealistic.
* Jodi Picoult, in which is the eponymous character was believed to be one.
* Jodi Picoult's books. They may not still be together, but they did (or will) get married.
* Jodi Picoult's novels fit this trope, usually falling into the woman vs. sick child and woman vs. herself category.
* Jodi Picoult's novels, the father of the family relates the tale of one of his coworkers who stood staunchly by his wife as she fought cancer. When she was better, she dumped her husband, claiming that she wanted more from life. The father's initial reaction was that the woman was a monster, but after looking after a sick daughter himself, he could understand where she was coming from.
* Jodi Picoult's the main character's five-year-old son is molested by a Catholic priest.
* Jodi Picoult would call up her friends to update them on what exciting things her characters were doing.
* Jody Lynn Nye, the artificial food is called "nutri". The main character laments more than once that she craves the stuff, unflavored, when pregnant.
* Joe 90, a computer is used to download recordings of other people's skills into

Joe's brain.
* Joe 90 featured a concert pianist who defected in the middle of one of his own live radio broadcasts when Joe (who had been programmed with the pianist's own brain-pattern) took his place at the piano; and his guards never noticed a thing.
* Joe 90: Joe McClaine's glasses don't help him to see better, but they contain the electrodes that transfer brain pattern recordings into his brain, allowing him to use the skills of whoever's pattern has been downloaded this week.
* Joe 90 the BIG RAT was located in a secret underground facility beneath Professor McClaine's house.
* Joe 90, where the title character was actually played by a young boy.
* Joe 90 would end each scene by shrinking the picture into a small box, and begin the next scene with the process in reverse.
* Joe Abercrombie and indicates Abercrombie's actual opinion (voiced in the review) which is more to the effect that Morgan's book was too grimdark even for him-.
* Joe actually asked her out, but she got scared and broke his heart, then got together with Todd because Joe going after Helène made her feel like he was lying to her before. She knew what he was like all along, he even physically abused her, but she couldn't bear to admit that she was wrong, and the whole experience just convinced her that nobody could care about her. This eventually lead to her lashing out at Ryan at the start of the actual comic, when he tried to help her.
* Joe, Alan and Phoebe were all friends until Helène arrived and took Alan away from Joe, then Phoebe started dating an abusive douche named Todd, who eventually dumped her and started spreading rumours that she was a lesbian, pushing her to the breaking point
* Joe also had raped all of his current wives except for Cheedo (and even then, the only reason he hadn't successfully assaulted her was that The Dag stood up to him when he tried), and at least two of them are pregnant as a result. In fact, the whole plot of the movie is kicked off by the wives wanting to free themselves and their future children from Joe's tyranny.
* Joe & Mac version of these which can grab and eat you, which is an instant kill.
* Joe and Bonnie show shades of this as well, particularly in the later seasons. In one episode Bonnie vacationed in Paris intending to cheat on him, and then Joe actually
* Joe and Don of Gorenger #53, witnessing his destruction at the hands of Akaranger (actually Captain Marvelous in disguise). This is not a depiction of his original demise, so he must have been brought back to be killed a second time.
* Joe and Finn Cole (John Shelby and Michael Gray) are brothers in real life, and play cousins in the show.
* Joe and Jack, Jack is a cat, but walks and behaves just like a boy and in practical terms seems more like a brother of Joe of about the same age, or maybe a little younger. His character model even looks a lot like Joe, except different coloring, whiskers, cat ears and a tail. Enhancing the resemblance is that Joe wears a full-body costume of an animal all the time.
* Joe and Jack, Joe and Jack visit the hut set up by their friend Tallulah, thinking it's going to be a spy headquarters, only to find she wants to have a tea party with them.
* Joe and Marla in the sequel, who hide from Jack inside a freezer, with the ending scene showing that no one has found them to let them out yet, but with a little ambiguity about whether their dead.
* Joe And Petunia. The aforementioned nightmare-ish PSAs that followed were made as a reaction against this.
* Joe Arpaio; furthermore, these policies failed to distinguish between inmates who are serving a sentence and those who are being held over the course of an ongoing case (because they were denied bail or don't have the money to pay it), and since the latter are still considered innocent in the eyes of the law, this treatment that was questionable even for convicted criminals became a real issue when it was applied even to those who had not yet been convicted of a crime. This (combined with his policies targeting undocumented immigrants) played a significant role in

his defeat by Democrat Paul Penzone in the 2016 election; between voters opposed to Arpaio's policies on principle and those who felt that the innumerable lawsuits and massive national opprobrium the policies were generating weren't worth whatever benefit they had, there were enough people who no longer wanted him around for him to be voted out.
* Joe Assante, who voiced lead character Jake Conway in the rather infamous

* Joe Beck's spine is double the length of Michelle Meyers', he towers multiple heads over her.
* Joe Biden, but has been happily remarried for decades to his current wife Jill.
* Joe Biden carried the state by 20 percentage points, becoming the youngest Senator in that Congress, holding this seat for a further 36 years, until he resigned to become Vice President.
* Joe Biden insisting on protesting Biden's win went memetic near-instantly.
* Joe Biden is elected to the Senate in 1984 after serving as Delaware's Governor from 1977 to 1985. Ever since his decades-long political career had ended in the Red Wave of 1996, Biden became a member of the liberal lobby group Centrist Circle and the Amtrak Board of Directors as well as serving as a part-time lecturer at the University of Delaware.
* Joe Biden is noted for being snarky and wisecracking, despite enduring so much tragedy in his life. In December 1972, only a month after he was first elected Senator of Delaware, his wife Neilia and their infant daughter Naomi were killed in an auto accident, with their sons Beau and Hunter hospitalized too. And then, in May 2015, Beau died battling cancer, which many believe was why Joe decided not to seek the 2016 Democratic presidential nomination.
* Joe Biden is well known for this. During the 2008 Democratic primary, when asked at a debate whether he could be disciplined enough as president to restrain his tendency to run on at the mouth: "Yes."
* Joe Biden kicked off his 2020 campaign by talking about "hudge fund managers" and coining the word "extredible" to refer to the cuts taken by union workers.
* Joe Biden led to renewed accusations that Big Tech companies censor and manipulate information to try and influence politics. However, the New York Post article also received greater scrutiny as a result of the exposure, with many media outlets picking through the controversy and detailing its flaws. In any case, regardless of the politics involved, the attempts to censor the article ended up turning what would have been a minor issue that most people wouldn't have cared about into a full-blown scandal that garnered headlines for the rest of the election cycle.
* Joe Biden out of this. Before this, Trump repeatedly called Biden "Dementia Joe" and "Sleepy Joe" in an attempt to label his opponent as senile and incompetent. The "Sleepy Joe" nickname came with a catch when Trump detractors joked about how a "sleepy" guy somehow "stole" an election despite Trump's baseless claims to the contrary.
* Joe Biden popular, so it can't even be seen as a gaffe, and Biden would later lean into it during his own presidential campaign, though he toned down the language to "big freaking deal".
* Joe Bob Briggs, besides his tongue-in-cheek movie reviews and hosting stint on
* Joe Bob Briggs' "Drive-In Reviews" would often use the "fu" suffix when listing the various weapons used in the target movie, which would lead to line items like "hubcap-fu", "tree branch-fu" and "brick-fu".
* Joe Bob Briggs, who wasn't allowed to describe most of the events of the movies he reviewed in his original position as a newspaper film critic.
* Joe Bravo and Escobar came out on a February 2015 World Wrestling League show to help Mr. 450 defeat Americas champion Phenomeno BJ. Then they turned on him before Richard Negrín demanded a referee count three on Mr. 450, bringing the Americas Title into the Gentlemen's Club.

* Joe Dever's Lone Wolf is a female example of this, having spent several days in her village, overrun with Giaks.
* Joe Dever's Lone Wolf: Lone Wolf has the option of performing one on the last enemy slain during a battle, or on particularly strong enemies, using the Summerswerd to deal the finishing blow. This refills his Kai (The game's version of Mana) power.
* Joe Dever's Lone Wolf: One can bring this up when refusing to go in the elevator without Leandra.
* Joe Dever's Lone Wolf: The Healing discipline allows Lone Wolf to do this.
* Joe Diffie in "Prop Me Up Beside the Jukebox," when he requests that the audience do this for him when he's dead. He even asks for a stiff drink and a suitable date: a blonde mannequin. In the music video, a pair of friends do exactly this for their deceased buddy, breaking into the funeral home and carrying his body out between them. They make the corpse nod to the waitress, wave at a blonde a the bar, and clap to the music, while passing off his tendency to fall over as ordinary drunkenness, before finally leaving the corpse propped against the bar's jukebox at closing time.
* Joe Diffie of being a ballad instead of one of his trademark up-tempo novelties.
* Joe Diffie's "John Deere Green" tells of Billy Bob, who climbed the water tower to paint it with a huge heart and his name with his high school sweetheart's. The two marry, and the declaration of love remains, visible from their front yard, despite the town's attempts to paint over it.
* Joe Diffie's "My Town" both include the grand small-town romantic gesture of climbing the water tower to paint it with a declaration of love. In both cases, the relationship lasts.

* Joe Dirt about his mullet, "1976 called. They want their hair back".
* Joe Dirt blasting from their radio. The song drowns out and eventually replaces the background music.
* Joe Dirt, however as he gets close to home, a group of punks drive up to him and the BGM is immediately replace by the song that was playing in the car's radio (You Ain't Seen Nothing Yet by Bachman-Turner Overdrive) which continues to play until they turn off the radio.
* Joe Dirt is pretty good at picking up trashy redneck women, but when it comes to sweet girls, he thinks they're just being nice.
* Joe Dirt Joe describes to a DJ host about his travels where at one point he found what he thought was a meteor that had crashed near him. He pulls it along his travels, even eating off it at one point before taking it to an astronomer to confirm its real. Unfortunately for him he finds out its not a meteor but a big turd ball from an airplane that froze during is waste descent.

* Joe Dirt. With two pictures. They are funny. The joke is that his mom actually sort of looks like her picture.
* Joe Dolce's "Shaddap Ya Face". Dolce is an Italian-American who has lived in Australia for some years, so this crosses over into
* Joe Donnelly was a Democratic congressman from Indiana who represented the conservative blue-collar wing, which was dying off at the time. In 2012 he decided to run for Senate against longtime Republican incumbent Richard Lugar in what many saw as a "sacrificial lamb" campaign rather than a serious challenge, as Indiana was a red state and Lugar was well-liked across the isle. However, he wasn’t particularly popular with those in his own party, and he was ousted by the very conservative Tea Party champion Richard Mourdock in the primaries. This caused some headaches with the Indiana GOP, which culminated in a statement in which he said that rape victims should not get abortions because babies were a gift from God. Mourdock’s campaign crashed and Donnelly scored the upset win. The win was, by all counts, a total fluke, and the next time the seat was up, Donnelly lost by five points to state legislator Mike Braun.
* Joe Duddington apparently gently encouraged Mallard to help her break the World Steam Speed record.
* Joe Elliott holds a note in the live version of "Make Love Like a Man" that is utterly incredible.
* Joe Fang games by firing your gun rapidly against him. He has a huge hit box in his helicopter in the first game and he goes down extremely fast in a jet pack in the second game.
* Joe Golem and the Drowning City and their artifacts. The Pentajulum of Lecter (essentially an ornate heart), an object with the power to trespass realms is described as having eternally changing features, being sometimes round, sometimes angled, sometimes both at the same time, and having incomprehensible geometries, sometimes appearing to be four-dimensional and things of the sort.
* Joe Green decided not to take up his roommate Mark Zuckerberg's offer to help him with his website called
* Joe Greene, agent of Majestic 12, writes sensational articles about the gray death virus that aren't quite the truth, but just close enough to discredit anyone trying to tell the public the real story.
* Joe Grey mysteries for fans to send in descriptions of their pet cats. Three were randomly selected as occasionally-recurring characters.
* Joe Grey Mysteries, they can't exactly walk into the police department to spill the beans on all they know.
* Joe Haldeman, an alien with the ability to change shape and heal from seemingly fatal injuries who was on Earth at Jesus' time hears of him and wonders if he was another of the same species, but never manages to find out anything for sure.
* Joe Haldeman has a race which uses miniature teleporting field projectors as

cutting weapons.
* Joe Haldeman has this as an unintended side-effect. Sending an army several light years away to fight a war then retrieving the survivors afterwards means, inevitably, that the time-dilation effect applies and those soldiers have returned to an Earth several centuries older than the one they left. After the second or third jump to and from a war-front, heterosexually inclined veterans realise in their absence that the social mores of the world have reversed — being gay is now the norm and a small population of diehard heteros are now the "queer" ones. The inevitable happens and several formerly hetero ladies travel on their next jump into time and space as active lesbians.
* Joe Haldeman, hostile aliens make Earth's sun go nova. The plot is about making a memorial for Earth.
* Joe Haldeman, part of the action takes place on...a train from Boston to Miami.
* Joe Haldeman. The eponymous time machine doesn't have any blueprints, but the main character who built does remember how it was made and quickly makes up a copy. Unfortunately, it doesn't work (or, at least, it doesn't act as a time machine. It simply works as a photon source which the original machine was supposed to be). Once the character arrives sixteen years in the future, and his professor published all his notes and has received the Nobel Prize in Physics, there are over a thousand copies of the machine in existence... which all also don't work.
* Joe Haldeman. The story follows a lot of characters, most of which ultimately do nothing for the plot (seriously, there was even a porn actress thrown in).
* Joe Haldeman When Captain Kirk's survey party is trapped on a planet without means of communication, they lay out a series of symbols once used by stranded airmen to communicate with the Enterprise.
* Joe Haldeman, written in 1981, is set in roughly 2085, with a significant population living on satellite semi-independent "worlds" in space, but makes note that on Earth, most of Asia is now part of the "Supreme Socialist Union."
* Joe Hill, a combination of worldwide mass hysteria and anger over the destruction caused by the strange crystalline rains (not helped at all by the President's deranged warmongering) leads to nuclear exchanges breaking out which devastate entire countries. They also manage to kill the scientists who created the crystalline seed compound, meaning almost everyone who could have come up with a way to stop the rains is dead.
* Joe Hill, famous leader of the IWW, had about as literal a one of these as you can get. Facing a firing squad, as the executioner called ‘ready... aim...’ Joe cut in with ‘Fire!’.
* Joe Hill has eyes that look like they were scribbled out with a black Sharpie; another character refers to the black blotches as "sunglasses of the living dead".
* Joe Hill, includes a doomsday cult operating in the protagonist's neighborhood. They don't appear to be much more than the stereotypical weirdos who wear silvery robes and tin plate hats and who conduct strange ceremonies, but their leader spent time in jail many years prior for abusing his wife and daughters as part of his strange beliefs, and three members try to abduct the protagonist so that she can be forcibly converted into their fold.
* Joe Hill, revolves around a teenager who encounters a man with a camera that scrubs memories from the minds of people he takes picutures of. When the camera is finally destroyed, it's revealed to contain a black liquid with an eye in the middle instead of machinery.
* Joe Hill, the gigantic mass of cloud-like material that Aubrey lands on when he tries skydiving is eventually revealed to be a semi-sentient repository for an alien intelligence that has apparently been stranded in Earth's skies for hundreds of years. It responds to Aubrey's desires for shelter and companionship but resists his efforts to figure out exactly what it is.
* Joe Hisaishi: composed the scores for Hayao Miyazaki's films. The John Williams of Japan.
* Joe is a deconstruction: while there are low-lives among the hippies (like the ones who steal Joe and Bill Compton's wallets), the real brutality is all from the "straights" Joe and Bill, who commit multiple murder.

* Joe is nicknamed Narcissus by his inventor because he'd rather gaze at his own reflection than do anything. But, like real narcissists, he's not content to simply admire himself and must devise ways of hurting others—in his case, up to and including drugging one of his master's creditors/house guests.
* Joe is the man he's looking for he goes to him for help on the case and they become extremely close, to the point that Ryan feels comfortable casually drinking in Joe's house.
* Joe Isuzu made him a pop-culture icon for a time in the late 80s/early 90s, it simply wasn't very effective at actually selling Isuzu cars and trucks. They brought him back briefly in the early 2000s, but soon afterwards ditched him again as Isuzu slowly wound down their US operations.
* Joe Jackson era, best known for "Is She Really Going Out With Him?", "It's Different for Girls", "Always Breaking Us in Two", and "Steppin' Out", came out as bisexual in 2001.
* Joe Jackson had a few hits in his career, but the only two that are still remembered today are 1979's "Is She Really Going Out With Him?" and 1982' "Steppin' Out."
* Joe Jackson is about this trope, though it's obvious that a good deal of the issue is actually the singer projecting his feelings of jealousy.
* Joe Jackson is quite possibly the most misanthropic and embittered of the lot.
* Joe Jackson takes several shots at the British tabloids and their front-page stories in his song
* Joe Johnson was a previously unremarkable and little-known snooker player who suddenly hit form in the 1986 World Championship, taking the title having never previously advanced beyond the first round. It was his only ranking event win; despite making the final again the following year, he slipped down the rankings quite swiftly thereafter.
* Joe Jonas of pall bearers carrying a casket while simultaneously crying and dancing to one of their songs.
* Joe Kidd: One of Harlan's gunfighters, Mingo, is an expert with a scoped rifle and guns down revolutionaries with cold detachment.
* Joel 2:28, which Peter the apostle said has come to pass at the day of Pentecost, as shown in the page quote above.
* Joel, and made a whole sketch on his show about how the next movie was going to be about him.
* Joel and the bots do a group impression of Rip Taylor with a string of increasingly lame, desperate prop jokes. IT'S FUNNYYY!
* Joel Courtney and Katherine McNamara have been close friends for years and worked together regularly on movie reviews and interviews.
* Joe Ledger, Joe Ledger describes himself as a student of languages, from the first book, Patient Zero, he got on a Homeland task force because he could speak Farsi and other Middle Eastern languages that the people they were wiretapping spoke in. Throughout the series, Joe has demonstrated a knack for many languages, including Farsi, German, Czech, French with either a France or Canadian accent, Italian, Russian, Spanish and being able to speak a little Greek, but not able to read Greek. His boss, Mr Church, usually keeps his language abilities a secret until the time is right, but is hinted to be fluent in at least as many languages as Joe. Unusual for an adult, Joe continues to learn more languages, as he starts to pick up the secret language used by Arklight just from observation, allowing him to ease drop on its members
* Joe Ledger, the Tunguska Event was caused by an alien spacecraft crash landing. The resulting debris is highly sought after by certain groups.
* Joel gets in one of these earlier in the same season, explaining his
* Joel Grey as a passenger on a plane where several other passengers are robbed, and one of them later turns up dead.
* Joel Heyman would be much more fun. Joel, Kathleen, and Gavin worked in the film business, but left and joined Rooster Teeth, realizing it was much more fun and relaxing.
* Joel Hodgson were inspired by the silhouettes in this trope, specifically when it

was used in the Warner Bros. shorts.
* "Joe Lies", taking its title lyric from one of Corey Flood's 65 songs about her ex Joe.
* Joelison Fernandes da Silva is 7ft 8in, his wife? At 5ft tall, she's almost 3 foot shorter.
* Joel Kinnaman was a candidate for Deadshot before being cast as Rick Flag.
* Joel McCrea. But early in the production each actor went to the producer on his own, dissatisfied and ready to quit, so the roles were reversed.
* Joel McDonald. The commentary actually manages to throw some genuine fan-submitted questions too.
* Joel Robuchon's sense of smell and taste, imagining how good his sushi would be if he was as sensitive as Robuchon.
* Joel Rosenberg players transported to the world of their game use obscure pop culture references as passwords amongst themselves:
* Joel Schumacher film had it more skeletal-looking with blue lighting.
* Joel, the game's main protagonist, is severely injured and must rely on his 14-year old companion Ellie to protect and take care of him until he recovers. Later on, Ellie is incapacitated at the Firefly hospital and Joel must rescue her.
* Joe Macer (who had accidentally killed Pauline, then tried to murder Dot, the only person who knew about it) was killed falling out of a window and crashing through a market stall that happened to be underneath.
* Joe Madureira had a little of the regular kind and a little of the "can't be bothered" kind. After building an elaborate office full of toys and entertainment, he and his employees were apparently more concerned with having Nerf wars than getting out issues of
* Joe Mantegna was originally content to have his first appearance as Fat Tony on
* Joe Massino, boss of the Bonanno crime family. Jack Stubing, an FBI agent assigned to investigate the Bonanno family operations, was aware of the measures Massino used to avoid scrutiny compared to his peers at the time. He therefore decided to go after Massino with a rear-guard action by convincing his bosses to lend him a pair of forensic accountants normally used in fraud investigations, believing that they could easily pinpoint conspirators in the family's racketeering schemes. Stubing believed that long prison sentences would be sufficient to get anybody to turn informer, and thus make it easier to trace how the money flowed back to Massino. Ultimately, they managed to get Salvatore Vitale (Massino's brother-in-law and underboss), already irate that Massino planned to kill him, to turn informer.
* Joe Medlin's "I Kneel At Your Throne" is heavily suggestive of this, with phrasing such as "with my heart in my hand/I am at your command" and "all this love, I confess/will be yours to possess".
* Joe Millionaire. There are only so many times (turns out it's just two, and even then they had to go to Europe the second time) that you have a guy pretending to be a millionaire and the girls believing it.
* Joe Murray himself voices Ed Bighead's son Ralph (later Rachel), who refuses to join his father at "Conglom-O"
* Joe Murray intended for Rocko to be a light yellow, and animated him as such in the pilot. However,
* Joe Namath, former New York Jet and first superstar of the Super Bowl, was nicknamed "Broadway Joe." He could just as plausibly have been called "Hollywood Joe", since Hollywood had by that point (late 1960s) long outstripped Broadway as an entertainment mecca - but New Yorkers surely wouldn't have stood for that!
* Joe Nanini, the first drummer for Wall of Voodoo, was known for his use of pots and pans as drums, as heard in their sole hit, "Mexican Radio."
* Joe Nichols' "Revelation" is about a nightmare involving the Second Coming; the song ends, "If I never go to Hell, Lord, it'll be because you scared it out of me."
* Joe Nickell was sometimes known as "the real-life Scully" or "the modern Sherlock Holmes", a skeptic and forensic authentication expert who describes himself as "the world's only full-time professional paranormal investigator".
* Joe Oriolo Felix the Cat (billed in one episode as Professor Nutmeg) is an evil

variant in that he is always trying to steal Felix's bag of tricks. Otherwise he and stooge Rock Bottom scheme to commit crimes in quests for being rich.
* Joe Oriolo Felix the Cat cartoons, space travel is very casual. The Professor's spaceship and Poindexter's flying saucer allow them to travel to other planets with all the effort and time of going on a Sunday drive.
* Joe Oriolo Felix the Cat episode "Abominable Snowman" has Felix and Professor encounter the eponymous snowman, who is a skyscraper sized monstrosity that both Felix and Professor are left at the mercy of.
* Joe Oriolo Felix the Cat. In it, Felix and Poindexter encounter Big Brownie, a giant brown bear who causes trouble for Felix, Poinsy and the ranch owner Bart at the start of the episode. But as Poindexter insists, it turns out Brownie isn't bad, just clumsy and misunderstood.
* Joe Oriolo Felix the Cat is largely centered on recurring bit-player Vavoom (a little impish kid with a very loud voice), as Felix spends the bulk of the episode stuck trying to keep the dam leak from getting worse while Vavoom tries (and fails) to seek help.
* Joe Oriolo Felix the Cat is set in a western ghost town, where Felix is heckled by Professor and ends up getting trapped inside of a derelict hotel hanging over a cliff.
* Joe Oriolo Felix the Cat just so he can take over Earth all by himself.
* Joe Oriolo Felix the Cat pulls this in two episodes, "Felix Finder and the Ghost Town" (Felix is darting in and out of deserted bulidings in the town and going so fast he runs into himself) and "Felix The Cat Suit" (the Professor and Felix tiptoeing in and out of open compartments in a hallway).
* Joe Oriolo Felix the Cat The DVD releases of the show use these syndicated edits.
* Joe Oriolo Felix the Cat, the Master Cylinder was this in his debut episode, but he quickly abandoned this form for a smaller, more compact and mobile body.
* Joe Pantoliano left his mike on after he thought the interview was over and proceeded to take a long and luxurious leak in the men's room, an act which gives new meaning to his nickname Joey Pants.
* Joe Pera's entire act hinges on his awkward delivery, long pauses and dry persona. His

* Joe Pesci (the star of the film), Leone told Pesci that he could pick whichever of the available roles he wanted as his own instead. He chose the part of Frankie, which was considerably larger in the original script than it is in the finished movie.
* Joe Pickett, a bomb goes off that takes out two local thugs who are trying to kill Joe. However, this was not the reason Joe had planted the bomb, leading to this exchange with Nate:
* Joe Pickett. A former army surgeon, he was dishonorably discharged from the army and sent to a military prison for conducting unnecessary surgery on prisoners of war. Escaping, he travels the country posing as a ufologist; attacking and dissecting people while they are still alive.
* Joe Pickett and by the time he eventually makes it, the informer is dead.
* Joe Pickett and sits up (whilst in the body bag) in the back seat, prompting Whip to unload another few slugs into his head for good measure.
* Joe Pickett are killed by an improvised explosive device planted under the body of a cow.
* Joe Pickett, a woman needs a spur-of-the-moment alias. Hearing Patsy Cline's "Walkin' After Midnight" come on the jukebox, she introduces herself as Patsy.
* Joe Pickett, Brenda Cates dotes on her youngest son Dallas; treating him as a hero and constantly insulting and belittling his older brothers, Bull and Timber.

* Joe Pickett Clay McCann out his cell by grabbing his ear and dragging on it hard enough to draw blood. Later, he makes good on a threat, and literally tears McCann's ear off during an interrogation.
* Joe Pickett concerns a rogue grizzly that has wandered far out of its usual range and is wreaking havoc in Joe's bailiwick. Joe is rightful very worried about the idea of having to track the bear down and confront it.
* Joe Pickett, EPA director Juan Julio Batista attempts to take out Butch Roberson by calling in a military drone strike on him. The Hellfire missiles deployed wind up igniting a massive wildfire
* Joe Pickett: Every woman who gets involved with Nate Romanowski - the series resident badass - meets an untimely end.
* Joe Pickett features a jurisdictional nightmare involving not only Joe and the sheriff, but the state police, the FBI, the Forestry Service, and the National Parks Service.
* Joe Pickett, Game Warden Joe Pickett is in a neighboring district and encounters two hunters who he's been told are recurrent poachers, and when he asks what they've been hunting they answer "snipes" just to be snide. Joe comments that he was once sent on a snipe hunt by some older boys who really just left him out in the woods while they got beers in order to let the guys know that he won't put up with their bullshit as the usual game warden does.
* Joe Pickett. He concocts a scheme that will allow him to murder four people who stand in the way of his latest money-making scheme and never stand trial for it. He later tells one of their friends that he shouldn't be upset at him as their murders were nothing personal, but just business.
* Joe Pickett, is a crazed environmentalist obsessed with undoing his father's (and others) carbon footprint, to the point where he is willing to commit murder. His final act is to attempt to shut down a coal-fired power station.
* Joe Pickett is letting Critchfield get away with everything he is so he can continue to take care of his disabled daughter after his wife and the girl's mother left them.
* Joe Pickett, Joe is so disgusted by the events he has just gone through that he makes a big show of resigning and handing in his badge to the new director of the Fish and Game Service. Especially poignant as earlier in the novel, Joe had been rewarded by having his original badge number reinstated (after several books were he was angry because the previous director had effectively stripped him of his seniority by refusing to do so).
* Joe Pickett, Joe's daughters are abducted as one of the biggest storms in living memory sweeps in. Joe first has to find a way through the flood waters to the ranch where they are being held, and then race to find and rescue them as the ranch buildings slowly disappear beneath the flood.
* Joe Pickett, J.W. Keely murders a prisoner by smuggling him a can of chewing tobacco laced with cyanide. He hopes that the prison guard who probed the tobacco with his finger doesn't lick his fingers afterwards.
* Joe Pickett, Latta instructs Joe to beat him up in order to make the story of Joe jumping him and escaping seem plausible. Although reluctant, Joe winds up smashing him the face with the butt of a shotgun hard enough to break his jaw.
* Joe Pickett likes to portray himself as this. A competition long-distance shooter, he joins McLanahan's manhunt simply because he wants to have the opportunity to shoot a man, and Farkus notes that he and McLanahan discuss killing a man as if they were talking about hunting an elk. His reserve breaks down quickly when they are captured by their intended target, however.
* Joe Pickett, Liv is captured and held captive in an old root cellar by the Cates clan. They later plan to drown her by filling the cellar with sewage.
* Joe Pickett, Nate grabs an old dirt bike from a ranch to chase the criminals who have kidnapped the rancher and stolen his truck. At the end of the novel, he decides he likes the bike and rides off with it.
* Joe Pickett novels. Having risen through the ranks of the bureaucracy rather than being a field officer, he has little understanding of field work. Having a personal dislike of Joe, at one point he demands daily (rather than weekly reports) from

Joe, and insists Joe clears any investigation with him before proceeding.
* Joe Pickett. Rather than capturing people and releasing them to hunt, the killer stalks and kills hunters while they are out hunting.
* Joe Pickett so he would know a certain message actually came from him (Nate being the only person Joe knows who shoots .454 Casull ammunition). Joe tosses the bullet to Nate who has to make a desperate catch and reload.
* Joe Pickett, Templeton's lackeys plant a bomb underneath Joe's pickup, to be detonated by a mobile phone. Fortunately, Joe discovers it before it can be detonated.
* Joe Pickett, the killer leaves a red poker chip on the body of each of their victims.
* Joe Pickett, there is a local legend about a secret path that allows passage through the otherwise uncrossable eponymous canyon. A local Indian tribe is supposed to have used to escape from the army under cover of darkness. However, the location of the path has been lost for decades. When Joe and his allies are fleeing from killers, his only hope of survival lies in finding it again.
* Joe Pickett, the sixth-graders in Lucy's school start doing this to the younger kids; saying "Don't look up" and then, when the kid does, pushing them over an accomplice kneeling behind them.
* Joe Pickett. They attempt to do the same thing to Joe when he takes over the post.
* Joe Pickett who is a lot cannier than her husband thinks she is, Stella turns to Joe to protect her against her husband's schemes. But she is definitely keeping secrets of her own. Significantly, she is the only woman to ever make Joe question his faithfulness to his wife Marybeth.
* Joe Pickett. Wyatt, the youngest of the Scarlett brothers, is generally regarded as 'odd' and 'not quite right'. One of his hobbies is taxidermy.
* Joe Pitt tries early on to repress his homosexuality, and in fact doesn't even consciously recognize that he's gay until "
* Joe Quesada a story by JMS which originally was planned to have Gwen be revealed as Peter's babymama was vetoed by Quesada who objected to Peter and Gwen having unprotected sex as young people, the idea of kids aging Spider-Man, and furthermore the perception of Spider-Man as "deadbeat dad". Quesada did suggest changing the father to Norman Osborn, which most would agree was a terrible idea, but it was still JMS' choice to write that story and take that suggestion rather than withdraw it once his idea was proving unworkable.
* Joe Quesada is a pretty good artist, but his skills as a writer or editor have been criticized. When he got promoted to Editor in Chief, there was a lot of backlash. In the position, he's proven to be great at marketing and promotion, but his contributions to the high-level creative process have not been greeted with much acclaim.
* Joe Quesada's canon status; the characters in question did form a team by that name, and the entire comic took place in an offbeat alternate universe that the Beyond Corporation of the core universe sent them to.
* Joe Quesada. So not only did Peter make a deal with the devil, but he also allowed the devil to trick him into aborting and then forgetting about his own child, after it had been clearly explained to him why it was the wrong thing to do. A lot of fans were quite puzzled about how that could be called a happy ending in any sense.
* Joe Quesada that even if they had given away free milk and cookies with every comic, they would've been accused of trying to kill readers with a dairy allergy.
* Joe Quesada, writers and editors tried to break up, kill off, or otherwise end Peter and MJ's relationship time and time again. Also one of the reasons Gwen Stacy was killed. Nobody at Marvel was ready for a married Spider-Man yet.
* Joe Raposo, one of the show's most famous songwriters, died on February 5, 1989 of lymphoma. New songs that he had written for this show appeared until 1990, with one nabbing him a posthumous Emmy.
* Joe Reagan, brother to Danny, Erin, and Jamie, was a patrolman who was killed in the line of duty before the series began. Jamie's unofficial investigation into his

death forms season 1's
* Joe Rogan does a stand-up bit that retorts female insults against the appearance of male genitalia, with Joe saying "have you seen what
* Joe Rosenthal horndog attitude: one time, he set out intentionally to sleep with 30 women in one day (to 'get the gay off of me' after having his head shoved in Walky's crotch in an attempt to obscure his face), and succeeded.
* Joe Roth replaced Katzenberg as the Disney Studios chairman and remained in that position until 2000, when he left to form his own production company
* Joe Schmo 2, deleted from the broadcast episode but included on the DVD, Derek serves the group an awful British breakfast. T.J. comments that it tastes like "boiled ass," causing someone to ask just what exactly that tastes like.
* Joe Schmo 2, Eleanor is a weeper who breaks down crying due to the smallest slights from Austin, usually because of him favoring the ditz Cammy over her. Just before she quits, however, she finds it in herself to refuse Austin's offer of a pearl necklace to remain on the show, telling him...
* Joe's Diner has you working a night shift at the titular diner. So, of course, the sun is never out.
* Joe's Diner is a small roadside diner out on route 66 that's built on top of a native American burial ground.
* Joe's Diner was built on top of one. As a result, the place is haunted by the ghosts of two Native American cheiftans currently buried there.
* Joe's Earth-2 doppelgänger was a jazz singer and sang the standard "Where or When". Makes since given Jesse L. Martin is a Broadway level performer, most famously a member of the now legendary Original Cast of
* Joe's Garage, there is a man named Bald-Headed John that repeatedly rapes Joe.
* Joe's half-sister is also voiced by a guy, but like with Dr. Girlfriend, he doesn't try to do a woman's voice, so normally, she sounds like a man. When she talks on the phone, she pinches her noise to make her voice sound higher.
* Joe Sixsmith, a character of crime fiction author Reginald Hill, subverts most of the basic
* Joe's mother Dot. Dot even runs her own driving school despite her apparently horrible skills behind the wheel.
* Joe South was responsible for tunes such as "Hush," "Down In The Boondocks," and "(I Never Promised You A) Rose Garden." As a performer, he had two #12 singles on the pop charts: "Games People Play" in 1969, and "Walk A Mile In My Shoes" in 1970.
* Joe Spencer from the SG-1 episode "Citizen Joe" also counts. He's been watching SG-1's adventures for years using alien phlebotinum he stumbled across, and he is suitably starstruck when he meets SG-1 in person. The whole episode is essentially "What if one of SG-1's viewers existed in-universe?"
* Joesph Ducreux / Archaic Rap meme does it similarly, but not only on rap lyrics.
* Joe's reaction when certain movies are reviewed negatively, and he asks how that was worse than
* Joe Strummer's vocal phrasing in "(White Man) In Hammersmith Palais", which makes the line "Ken Boothe for UK pop reggae" sound like "can't fool the UK pop brigade".
* Joe Swanson. Even in the scenes where his legs work fine (such as flashbacks) his legs are kinda small.
* Joe Swanson, in later years, has become wimpier despite the fact that he has muscles. It went to a point that he gave up a fight just because he was tripped off of his wheelchair.
* Joe Swanson is a man's man, from the waist up anyway. Greased-up Deaf Guy? Not so much.
* Joe Swanson sometimes swings into this but other times plays it straight. Incidentally another
* Joe Swanson's son Kevin simply disappeared from the series. This was due to the show's staff finding him boring. In "
* Joe's World books, Greyboar the strangler is renowned for tying enemies into knots, especially their necks, and takes a professional pride in making each knot a different one. He also sometimes ties his foster brother and agent, Ignace.
* Joe's World: The central character of the first book is Greyboar, a professional

strangler famed for his exquisite fingerwork.
* Joe Tazuna was chosen for the death game and not Ryoko - without him to keep Sara in check, she would begin manipulating the others in order to win.
* Joe then assures the radio people he's telling the story to "No, that last part didn't really happen,
* Joe Versus the Volcano. A single flower grows in the desolate area outside the factory where Tom Hanks works.
* Joe Versus the Volcano features a distinctive jagged line that appears several times during the movie. His company's logo, the entrance to the factory, a crack in a wall, a lightning bolt, and a path up the volcano from the title.
* Joe Versus the Volcano - Happens to Patricia (Meg Ryan's third role) during a storm, knocking her out. Joe jumps in to save her, hero that he is.
* Joe Versus the Volcano includes a Polynesian tribe that descends partially from ancient Jews, so one of their tribal chants is the Israeli folk song "Hava Nagila."
* Joe Versus the Volcano is first encountered in an interminable phone call repeating the same few phrases: "He can get the job, but can he do the job? ... I am not arguing that with you!"
* Joe Versus the Volcano, the Waponis are renowned for having no sense of direction. Some of their ancestors were the crew of a Roman galley that got so lost that it sailed deep into the South Pacific and discovered their island.
* Joe Versus the Volcano: "What is that, a teddy bear?" "No. It is my soul."
* Joe Walsh has "The Radio Song," about finding a quiet place alone and listening to music on the radio.
* Joe Walsh in 1975, then becoming successful as a solo artist again in 1980. His biggest solo hit, "Life's Been Good", came out in 1979, while Walsh was still an Eagle.
* Joe Walsh's solo hit "Life's Been Good" pokes fun at the misadventures of 1970s rock stars.
* Joe Walsh's song "Life's Been Good", he mentions this. Presumably it's he who pays for it, but since rich people are often detached from their finances through accountants and such, this is basically like saying he doesn't worry directly about it but has guys taking care of the actual transactions for him — which are probably pocket change to him anyway.
* Joe. When he realizes a werewolf is lurking right behind him in the land rover, instead of trying to escape or freaking out, he (probably pissed beyond all reason by witnessing Terry's horrifically torturous death a minute earlier) leaps into the back at the thing screaming like a berserker.
* Joe (white), and has a thought-bubble vision of Joe calling him a racist again. When Joe actually meets Amber, he's more concerned with the fact that she just happens to look uncannily similar to Danny's ex.
* Joe, who is by far one of the most more competent male character characters in the show, despite being confined to a wheelchair.
* Joey (1997), Billy panics upon seeing an oddly-specific "No Kangaroos" sign on the train to Sydney, though he manages to keep Joey hidden until they get there.
* Joey (1997) when the ASIO agent reveals a recording device hidden inside a cassette player.
* Joey also mistakes Monica for cheating when he sees her hiding a guy in her apartment. ("I told you, you shouldn't have married someone so much hotter than you!") Again inverted as Chandler doesn't think Monica is cheating...because
* Joey also spent an episode trying to find somewhere he could change US dollars into "Vermont money".
* Joey: A 'Mechanical Boy'" is about a boy who develops autism because of his refrigerator parents, then is completely cured through kindness and self-expression. It is now known that autism is a lifelong condition that has nothing to do with parenting.
* Joey and Chandler are both interested in a visiting Dutch woman. Chandler gets an edge by "guessing" that Dutch people come from somewhere near the Netherlands (the place they really come from). Joey responds, "Nice try. See, the Netherlands are this make-believe place where Peter Pan and Tinkerbell come from", apparently

having confused the Netherlands with
* Joey and Chandler's apartment managed to accomplish looking much more lived-in and normal despite the general lack of clutter, though this was probably in part because of the colors used and that most of it looked assembled bit-by-bit rather than carefully arranged and bought all at once.
* Joey and his date walks in on a set that Chandler and Monica had obviously put together for this purpose - she leaves horrified. This was while Joey was the only one who knew of their relationship. He berates Chandler for making it more and more difficult to keep their secret, and storms out in a huff. Then he sticks his head back in the door to deliver his parting shot:
* Joey and Monica in later seasons. This is mainly because Monica gets together with Chandler, who Joey considers his
* Joey and Phoebe have informed Mr. Treeger of a gas leak in Monica's apartment so they can get in. When firemen break down the door, Joey asks why he didn't just unlock the door, Treeger shows his keyring and explains "By the time I found it on this thing, the whole building could've exploded. And when that happens a second time, people start to ask questions."
* Joey and Rachel almost have sex, but it turns out Joey is completely unable to unhook Rachel's bra. This qualifies as "not feeling it" for Joey, who once made a girl's bra come off just by looking at it. (And as we find out later, said girl was Monica.)
* Joey attempts to describe what is happening to the others. He says that a scrum is "like a huddle" (in American football). It is not at all, as the scrum is an active part of gameplay involving both teams, and a football huddle is simply a team's strategizing session between plays. He also says this when no scrum is visible on the screen. Granted, the entire point of the plotline is how ignorant the American characters are of the rules of rugby, so this may have been intentional.
* Joey Bettany. At one point, Simone chops off her plaits in an attempt to get Joey to pay attention to her after Joey makes a remark about girls with short hair. Joey isn't pleased.
* Joey, causing its ratings to drop and then suddenly canceling it out of nowhere.
* Joey Daddiego's post match assault on Donovan Dijak at the first night of
* Joey D'Auria — the second and last Bozo on WGN-TV — did a bit called "Doctor Flamo" on
* Joey, Dee Dee and Marky spoof this trope in "Black and White" when they find paint after the house has been stripped of its color. Here they wear trenchcoats and have their chests painted to trick Oggy into using the paint.
* Joe Yellow's Eurobeat song "U.S.A." is considerably less well known than
* Joey, especially in later seasons. His ditziness especially shines through in the subject of geography - at various points in the series he has thought that the Netherlands was where Peter Pan lives, described Chandler's "going to Yemen" ruse for getting rid of Janice as clever because "it almost sounds like a real place", and goes to the bank to try changing dollars into "Vermont money".
* Joey Fatale claimed his band, MiniKiss, was the world's best dwarf
* Joey Fatone went on to have a fairly successful career in television presenting and theater while Chris Kirkpatrick pretty much retired from public life, returning to normal life with the occasional behind the scenes work or hosting gig.
* Joey Fatone, who succumbs to a surprise shark attack in, what else,
* Joey Graceffa, a YouTube comedian and personality, came out as gay in 2015.
* Joey Gregorash and his hit wedding song "Together" gained popularity after it was encouraged to be listened to throughout the
* Joey has lied about his dancing experience, and now he's been put in charge of a dance audition. He can only do lame arm-pumping and head-nodding dance moves, along with jazz hands (which he's just now learned), so instead of the complicated "The Combination," he just teaches everybody how to do his style of dancing.
* Joey has one when he finds out that Chandler and Monica are together.
* Joey has proposed to Phoebe, thinking she is pregnant, then proposes to Rachel, who actually is pregnant. Phoebe is hurt, but says "I'll take you back, Joey

Tribbiani... hey, look, a Salami Buddy!" (one of Monica's wedding presents nobody could figure out).
* Joey, he frustratedly tells his sister "Chandler and me were not a gay couple!"
* Joey Heric decides to defend himself in his second murder trial after growing unhappy with Bobby. The judge permits this, although with Bobby staying to counsel him if necessary. At first, he does well, though later he gets outmaneuvered by Helen, with Bobby taking over as his lawyer again.
* Joey is a crappy actor (who gets a teensy bit better with time) and gets a role in a soap that is not strictly fictional (being
* Joey is a hunky actor who is consistently the dumbest character on the show.
* Joey) is often confused by cards everyone else knows about, doesn't understand how the game's chain mechanic works, and often has to count on his fingers to do math. That said, once he understands said cards/mechanics he becomes an extremely capable duelist, able to devise fairly complex strategies on the fly.
* Joey is so good to his female friends, that upon hearing Phoebe was pregnant, he goes out to beat up the supposed father... then comes back and proposes to Phoebe so she won't be alone. Later when he finds Rachel is the one who is actually pregnant, he promptly proposes to her too.
* Joey Janela: Started the decade as a local indie wrestler on the NJ circuit, later made his name in CZW before hitting the big time with AEW in 2019.
* Joey/Jonouchi defeats an opponent by allowing his Baby Dragon to age a millennium into the much-more-powerful Thousand Dragon.
* Joey/Jounouchi is much like this, especially later in the show. After losing the unofficial duel for third place against Kaiba in Battle City he is exuberant about the challenge Kaiba gave him, and when Kaiba derides this attitude in contempt, he asks, mystified, why the hell Kaiba even duels if not for fun.
* Joey knows why Ross, Chandler, Monica, and Rachel's bosses don't like them.
* Joey Matthews was well liked across the independent circuit and treated well by Ohio Valley Wrestling even when OVW had a developmental deal with WWE. But make no mistake, he wasn't very well liked by WWE's executives and was seen mainly as a tool to build up John Morrison. Yes,
* Joey Mazzarino left the show in 2015, causing Murray Monster and Horatio the Elephant to be sidelined. Horatio would eventually return in 2019, now puppeteered by Tyler Bunch (with Peter Linz doing the voice for his one line in
* Joey, Michael Tribiani asks Joey to pretend to have seen evidence on someone's computer that he ripped off Michael's idea. Joey can't remember what he's supposed to say but instead bluffs that he saw something else. When asked how he knew the computer had pornography on it, he replies that every guy's computer does. Michael claims his doesn't. Joey then corrects him by telling him about the folder "Joey's Tax Stuff".
* Joey misses an audition because Phoebe fails to give him the message. She poses as his agent to get him a new audition and Joey asks her to get him one more. Well, two. Five, but that's all. No, it's six.
* Joey models for an ad that turns out to be a public service campaign warning against sexually transmitted diseases. Women keep turning him down when they recognize him and think he really does have an STD.
* Joey Molland is the only surviving member of the band Badfinger. Other members of the band, Pete Ham committed suicide in April of 1975, Tom Evans also committed suicide in November of 1983, and then Mike Gibbins died of a brain aneuyrism in October of 2005.
* Joey Montana has been long-standing on the Panamanian urban scene, but he’s best remembered for his 2016 viral hit “Picky”, which is his only billion view hit on YouTube. He followed up well with “Suena El Dembow” a year later, but its success was highly tied to featured artist Sebastián Yatra. Both singles are also Montana’s only certifications.
* Joey once admitted that he sometimes cooks while naked ("Toast, oatmeal...nothing that spatters"). He's also been known to sleep naked and doesn't always remember to get dressed before leaving his room.
* Joey picked up the ball to deliver a bit of obscure info about Trump Towers,

prompting Chandler's reaction: "What kind of stuff do you
* Joey + Rory was a very popular bluegrass-country duo who managed to escape the stigma of being singing competition contestants (they competed on
* Joey Ryan and blow pops. There are few lengths he won't go to get, or retrieve one.
* Joey Ryan and Championship Wrestling From Hollywood, where trying to convince him he is anything but the biggest money-making star is nothing but an exercise in frustration.
* Joey Ryan: Blackballed from the industry in 2020 after multiple women accused him of sexual misconduct.
* Joey Ryan Champion? Fine, remember when Joey Ryan dressed up as a rooster? Uh, what about when Ryan slurped on a sucker and then wrapped it in his chest/pubic hair? Of course you do!
* Joey's acting during a toy commercial looks like that of a sexual predator, as he's holding his crotch to control the pain from his hernia. The line "Hey Timmy, I've got a
* Joey Skaggs has made a career out of the Stealth Parody, generally to "wake up" the media's breathlessly reporting on anything that comes down the line, thus making them susceptible to people like Skaggs. Some of his more memorable works:
* Joey starred in a Japanese commercial plugging lipstick for men. He gives the tape of the commercial to Chandler, who promises to watch it but doesn't. He tells Joey he watched it, but Joey can tell he's lying because otherwise he would have made some kind of joke about it.
* Joey Styles reason Vince doesn't just outright fire him is because the mutants would burn WWE Headquarters in a fit of rage the next day.
* Joey Styles told him "In the midst of all the craziness, I want you to be the steady voice of reason"
* Joey suggests this to Ross when they find out Emily is interested in someone else.
* JoeysWorldTour gets a ton of backlash due to his disgusting behavior (especially, the way he eats) and his obnoxious noises.
* Joey then tries this with Ross, with disastrous results...mostly because he reused Phoebe's "
* Joey used the penultimate part of "Sunny Hours" by Long Beach Dub Allstars.
* Joey used to be a lawyer, no less). Predictably, they all lose to him.
* Joey was also not only the first person to learn about Monica and Chandler's relationship, but also the only one to do so by piecing things together and figuring it out rather than overhearing it on the phone or actually seeing them about to make love.
* Joey was a show about an ensemble. Another problem was that many believed Joey had become too dumb and cartoonish by that point to really be able to carry an entire series on his own.
* Joey was fond of this one too. Notable exchange when Chandler is trying to compete with Joey for the attentions of a Dutch girl.
* Joey Youngman started using the name Wolfgang Gartner to separate his newfound love for electro house from his tech house.
* Joe Zieja, who's an air force pilot, and both of them have a way of gathering intelligence.
* Joffery Baratheon only wields the sword Widow's Wail for a few minutes because he is fatally poisoned soon after he gets it. His father, Jaime Lannister, later wields Widow's Wail in battle.
* Joffery ridicules Tywin for sitting around during Robert Baratheon's rebellion, Tywin mostly stood by until he was allowed into King's Landing. Joffery is half right. He states his father did most of the work in the rebellion, not aware that Jamie Lanister is his father, not Robert. He is however right about how Tywin acted during the rebellion. Tywin doesn't actually deny any of it and simply has Joffery sent to his room.
* Joffrey absolutely despised Robb Stark. While Robb in return wants to kill Joffrey he considers Tywin to be his true threat. Fitting form, Joffrey considers

Robb Stark's death his greatest victory even though he didn't play any role in it.
* Joffrey also speaks of Aerion "Brightflame" Targaryen who died from drinking wildfire.
* Joffrey... and then he talks to Ned Stark, who gives him some sage advice Joffrey takes to heart. It takes countless lives of trial and failure, learning and training, redemption and honor, but Joff's well on his way to becoming the savior king Westeros needs to survive and end the Long Night.
* Joffrey appears to be a pure sadist. Unlike the other examples on this list, he is never even hinted to actually have sex with or rape his victims. Remember, this is a teenage boy with near-total power who was engaged to two if the most beautiful girls in the Seven Kingdoms, and yet may very well have
* Joffrey, a product of incest himself, displays a disturbing fondness for violence. At times he even seems to be
* Joffrey Baratheon and Ramsay Bolton, who were rather monstrous individuals who would be easier to be better people than others.
* Joffrey Baratheon inherited his parents' stunning looks, but is physically and emotionally abusive to his family and fiancee and governs the realm with
* Joffrey Baratheon is only 13 years old, yet is regarded by many as the single most depraved character in the series (at least until the below-mentioned Ramsay came along).
* Joffrey Baratheon's wedding to Margaery Tyrell was a pompous affair, basically a long gloat about how Joffrey had won the War of the Five Kings. Even though most of the attendees were Joffrey's allies, it was generally seen as poor taste; the only one who enjoyed it was Joffrey himself... until he was poisoned and dropped dead.
* Joffrey Baratheon to his brother Tommen. In the fourth book, Tommen says that he would "
* Joffrey Baratheon was one of the main antagonists of the show since the series premiere, however, he's killed off two episodes into season 4.
* Joffrey behave and shut up. Contrast with his mother Cersei's slap which merely angers Joffrey.
* Joffrey ended up so vicious. Through a combination of obsessively sheltering him from any positive influences and relentless coddling of his own negative behavior, she ensured that he had the petty stubbornness of a child, with all of her own shortsightedness and cruelty to go with it.
* Joffrey, etc.) and is very disappointed that his little brother Tommen isn't like him when he tries to stand up for himself.
* Joffrey hates flowers because he considers them to be effeminate, yet
* Joffrey himself, and Ramsay Snow are basically what would happen if you took a vicious teenage bully and gave them command of a group of soldiers and total protection from consequences.
* Joffrey is clearly Cersei's favourite child, with Myrcella second and Tommen running a very distant third. Considering the effects, the younger children have probably benefited from that.
* Joffrey is dead, Tommen's fate is largely dependent on her own (outlook not good), and Myrcella is surrounded by people who, while they don't wish her harm, will use her to gain power. Sansa Stark is being groomed for rulership by Littlefinger, Margaery Tyrell isn't dead yet, and there's Daenerys Targaryen. And.
* Joffrey is described as being beautiful with flowing blond locks and sparkling green eyes in the books but is played by the fairly average
* Joffrey is known to have bullied his little brother Tommen, but it is commonly believed by fans that he molested him as well.
* Joffrey is poisoned on his wedding day; everyone assumes it was his fault, and he had nothing to do with it.
* Joffrey loves weaponry, has great knowledge of the Targaryens' bloody legacy, and his room is decorated with animal skins and skulls. He also appears enthralled at the sight of hundreds of men burning alive in the wildfire explosion, bringing to mind a previous king...
* Joffrey owns ornate swords, often with pretentious names (Lion's Tooth, Hearteater, Widow's Wail), but displays no real ability to use them and prefers to

kill helpless victims with a crossbow (much less skill and training involved).
* Joffrey quickly turns a night with two prostitutes into this in "Garden of Bones".
* Joffrey retreating to the Red Keep during the Battle of the Blackwater, and Cersei's refusal to make him return in fear for his safety, results in much of the city watch deserting and the city almost being taken.
* Joffrey's armor and gilded sword. His crossbow is adorned with gems as well.
* Joffrey shows off his cool sword Hearteater in "Blackwater" but flees the battle without even unsheathing it.
* Joffrey's only genuine source of joy seems to be hurting other people. He forgoes even sexual sadism in favor of more direct physical violence.
* Joffrey's passing is insincere. Lord Mace Tyrell doesn't even bother to put on dark clothing.
* Joffrey's regime and unify Westeros to face the threat of the White Walkers.
* Joffrey (thus illustrating that most of the problem is an awful education combined with youth and having Cersei as a mother), but he never really knows what to do with it when he does get it.
* Joffrey with both of his siblings; he's a sadistic psychopath, while Myrcella and Tommen are perfectly sane, decent and normal — in fact, kind and gentle to a fault. This makes Joffrey and Tommen both awful kings for different reasons.
* Joffrey" with him, you're told that while you can't kill him since he's just a kid, feel free to "slap the bastard out of him".

* Johanna and Helena after all since people obviously actually like a show such as hers.
* Johanna becomes a metal mask, and Johanna's own face is a feminine mask on the front of the bike that serves as her body.
* Johanna Quaas at the age of 86, keeps herself busy in her retirement practicing and performing tumbling in gymnastics competitions.
* Johanna's daughter, Famke Smith-Rhodes-Stibbons, settled a fight with a fifteen year old boy at the Guild School by leaping up at him, grabbing his collar, and head-butting him breaking his nose. She was eleven at the time.
* Johannes Brahms adapted the theme from the song "Wie Melodien zieht es mir" as the second theme from the Violin Sonata in A, Op. 100.
* Johannes Brahms is almost synonymous with 19th century German Romanticism, and his compositions are among the most frequently performed and recorded of any western classical composer, but he also collaborated with music historian and publisher Friedrich Chrysander on what remains one of the most widely-used editions of the complete keyboard works of French Baroque composer François Couperin (whose music Brahms was instrumental in popularising after a century and a half of relative neglect).
* Johannes Brahms's Piano Concerto in D minor, Op. 15, was originally sketched as a sonata for two pianos.
* Johannes Cabal and the Fear Institute Johannes and a man are staring over a cliff edge, which , Cabal says, two things at the bottom. When asked what they are, he says the remains of the former occupant, then he pushes the other man and says "And very shortly...you." (it also doesn't take).
* Johannes Cabal and the Fear Institute of his trapped soul make a handy light source, Ercusides' griping aside.
* Johannes Cabal Cabal, and there are indications that demons and devils exist independently of him, there's nothing that challenges Nyarlathotep's claims about God and Heaven.
* Johannes Cabal; his muscles creak from disuse when he forces a smile; and when he has a giggling fit, people around him are stunned with dismay.
* Johannes Cabal is likely the cause, but he deflects the subject when his friends mention his celibacy.
* Johannes Cabal Johannes is a pithy man who usually only employs lethal force, or no violence at all. As a result he tends to have several of these. When stranded in a pocket dimension with no sense of time that has turned the other inhabitants into dull automatons who repeat actions over and over, Cabal takes a croquette bat from one, ostensibly to help take a shot. "Tricky shot." He says-before bludgeoning the man dead in one swing (it doesn't take).
* Johannes Cabal mentions that Cabal never wears a slightly formal outfit no matter what he's doing-black hat, black jacket, white shirt, black tie, black pants, black socks, black shoes (some early stories have him wearing suspenders or a cardigan indoors-also black). The only exception are his tartan house slippers. This is Lampshaded by his brother who explicitly points out all his outfits are like this

and mentions that Cabal doesn't have "outfits" he has "a uniform."
* Johannes Cabal on every soul that enters Heaven. This is why Johannes feels driven to discover the secret of immortality.
* Johannes Cabal shows an example of this-it even ends with Cabal giving a lengthy, pompous summation. If Cabal were so inclined, he'd make an excellent detective in the Sherlock Holmes vein, but Cabal is a scientist (and necromancer) first, detective second.
* Johannes Cabal the Detective, Cabal is drinking with a Mr. Samhet when he realizes his sherry has been spiked. Because Cabal didn't drink that much, and being of the precise scientific mind, he manages to calmly say "I appear to have been drugged." This is subverted as the sedative takes further hold and Cabal manages to say “Unghk" and "Bolph." before passing out.
* Johannes Cabal the Detective Cabal manages to subdue a centuries old incredibly powerful warlock this way, tossing him a vial of holy water. The warlock, Umtak Ktharl, is so evil the holy water boils and bursts the vial in his hand, causing him to lose his concentration and plummet (he has hovering at the time) into a fast-moving river. The narrator muses that the only reason this worked is that Ktharl caught the item (which was the worst thing he could do) because he was so sure it couldn't hurt him.
* Johannes Cabal the Detective Johannes' life is saved because he happens to carry a sword-cane. Specifically he's at gun-point being held by Count Marechal who really wants to kill him. Because Marechal is a decorated soldier whose constantly in uniform, complete with sword Cabal is able to taunt him into giving him the chance of a fair fight. Their fight takes place in a grand hall, complete with long table that they of course stand on during the fight.
* Johannes Cabal the Detective Leonie Barrow points out that Cabal thinks he's better than everybody else. Cabal dismisses this as absurd and then tries to think of someone he looks up to. He can't.
* Johannes Cabal the Detective reagents. Whether they're truly necessary or he's making things difficult for his captors is left unclear, but they're delivered.
* Johannes Cabal the Detective the main antagonist is Count Marechal, who is more or less the de-facto ruler of the fictional country of Ruritania (the Emperor dies shortly after the book starts and Marechal is technically ruling for the mind-addled young son of the Emperor). He's a hands-on type, a former cavalryman who dreams of conquest and the brains to do something about it.
* Johannes Cabal the Necromancer and its sequels — in book one, Johannes is twenty-eight, but he acts like a grumpy old man most of the time (in one portion of the novel he realizes he sounds like one too because he's trying and failing to get his anger across) and not a young adult. If his age weren't stated it would be easy to imagine him as a man of forty or more. Given Cabal's intellect he was probably always like this, but what really pushed him over the edge was when the woman he loved died when he was young (19 or so).
* Johannes Cabal the Necromancer, and transports Cabal into a pocket dimension.
* Johannes Cabal the Necromancer Cabal goes to confront an evil sorcerer, Rufus Maleficarus and his small band of lunatics-mostly cause they're in his way. However Cabal is so unafraid of Rufus that he mocks him and lets him chant a spell that eventually (while Cabal waits, taunts and sneezes) tosses Cabal into a pocket dimension. The place, known only as the Garden, seems to have no time, or death, though to Cabal he's there for a few minutes at least (which is more or less meaningless in a world without time-until he makes some) but when he comes back its noted in the narration that he's been gone-to the outside world-for thirty seconds.
* Johannes Cabal the Necromancer has one of these as a prize in the title character's demonic carnival.
* Johannes Cabal the Necromancer: Johannes Cabal has his own basement of horrors, to say nothing of his antagonists' lairs and haunts.
* Johannes Cabal the Necromancer Johannes Cabal may or may not have accidentally locked his brother in a particularly disturbed crypt in a possibly haunted cemetary.
* Johannes Cabal the Necromancer Johannes wears smoked-blue lenses that wrap

around-they're as much for practicality as anything else, as Cabal more or less lacks a sense of style.
* Johannes Cabal the Necromancer Satan is presented more or less as the Biblical version-though he's a point in his immortal life where he's become jaded, bored and slightly snarky. He makes a wager with the titular character just to be entertained and doesn't much care to win or lose-but he does still have a bit of a temper.
* Johannes Cabal wizard has a laugh "like a hyaena in a helium-rich atmosphere". Johannes is unimpressed, despite the wizard's power.
* Johannes de Silentio, Johannes Climacus, Anti-Climacus, Victor Eremita, Constantin Constantius, Vigilius Haufniensis, Nicolaus Notabene, Hilarius Bookbinder, etc. (some of
* Johannes Heesters, the late Dutch stage and film actor that performed up to his death at the age of 108, once mentioned that the only thing he was afraid of was that his wife (who is 46 years younger) might die before him. (
* Johannes Kepler wrote a story called "Somnium" about a student of Tycho Brahe travelling to the moon by means of magic provided by his mother, a witch. Kepler himself was a student of Tycho Brahe, and his mother was accused of witchcraft.
* Johannes Liechtenauer is often described as the grandmaster of western swordsmanship, though his mastery included a variety of weapons. Said to have been born in Liechtenau or Liechtenstein, Germany in the 13th or 14th century, he toured Europe to study various armed combat techniques under a variety of masters. The puzzle poem he wrote unified all these concepts and techniques and provides us with the earliest example of such an efficient sword art in the West. Many later fencing masters would go on to directly reference Liechtenauer and many who didn't clearly retain elements of his art.
* Johann Konrad, who perfected his Elixir of Youth, and has been using it to live for centuries and continue his obscene work.
* Johann Krauss and his wife died during the Chengdou disaster; fortunately he was in the "Astral Plane" at the time. Now he's an effectively immortal cloud of mist, as long as he can find an empty "body" to inhabit.
* Johann Liebert is a master at getting people to kill themselves and do horrible things.
* Johann Pachelbel is perhaps one of the most famous and frequently performed classical works. Though some of his organ works are popular with organists, the overwhelming majority of the general population, if they know him at all, only know the Canon.
* Johann Reichhart and the the US Military Government. He came from a familiy of executioners, tracing back to the 18th century. He was definitely a professional about his job, killing over 3000 people for three different governments. Still, he seemed to be conflicted about his job, proposing a more painless method for hanging (that the Nazis didn't want to implement), and stopping executions for the Americans after learning he had killed two innocents. When there was a discussion in Germany about the reintroduction of the death penality after some gruesome murders in the sixties, he spoke against it.
* Johann Sebastian Bach, a.k.a. 48 Preludes and Fugues. The entire work is a masterpiece, but the first Prelude remains its best-known portion.
* Johann Sebastian Bach. Among aficionados, the authorship is still up for debate to be attributed to him on that piece.
* Johann Sebastian Bach apparently composed several church cantatas by taking a previously written secular cantata, replacing the texts of the arias and choruses and composing new recitatives and chorale settings. In some cases, such as the Easter Oratorio (BWV 249), all that survives of the original secular cantata is its text and the numbers reused in the sacred version. Cantatas 134 and 173, like the Easter Oratorio, betray their secular origins (specifically, as congratulatory pieces for Prince Leopold of Anhalt-Cöthen) by not including any chorales or Bible verses, which anchor the vast majority of Bach's sacred cantatas.
* Johann Sebastian Bach are usually known only by their covers by other composers and performers.
* Johann Sebastian Bach (BWV 659) is quite dreary and sad compared to his other

chorale preludes and has been described as one of his saddest works.
* Johann Sebastian Bach from lowly accompaniment to the star of solo works or concertos, thus contributing to the demise of basso continuo (and the prevalence of its opposite, obbligato, in the basslines of most classical music after the baroque era and the use of precomposed "continuo" melodies in most performances of baroque music).
* Johann Sebastian Bach improvised most of his fugal works. Bach was a genius improviser, able to improvise three-part fugues, and once did so on command for Frederick the Great, but while a few of his fugues might be written-out improvisations, most of them were through-composed.
* Johann Sebastian Bach, notoriously dismissive of all composers before the 20th century said: "Bach is interesting. To me that's the most tolerable music to listen from that era."
* Johann Sebastian Bach's Brandenburg Concerto No.3, which has only first and third movements — no second movement (apart from a two-chord cadence - though the third movement is sometimes wrongly called the "second", even though it's definitely in the style of a third movement rather than a second).
* Johann Sebastian Bach's concertos for one or more harpsichords were transposed transcriptions of his concertos for other instruments, including the two violin concertos, Brandenburg Concerto No. 4, the Flute Concerto, and the concertos for two violins and for violin and oboe.
* Johann Sebastian Bach turned out to have been composed by none other than Telemann. Bach had liked them enough to copy out the entire scores by hand for his own use.
* Johann Sebastian Bach were just as annoying in Bach's time as they are today.
* Johann Sebastian Bach which showed the world that keyboard instruments were fit as the main instrument of a concerto or even as a solo instrument.
* Johann's Tiger' War Stories has one. After spending the majority of the issue trying to keep his crew alive so they can surrender to the Americans before he can commit suicide by Soviet for his atrocities, the tank commander is thrown from his Tiger tank by his crew as they encounter a large group of Soviet heavy tanks. In the end, he's captured by Americans, the only one of his crew that's left alive. In the end, he'll either be executed for his crimes, or have to spend the rest of his life living with what he did.
* Johann Strauss Senior, which is always played at the end of the Vienna Philharmonic's New Years Day Concert.
* Johann Wolfgang von Goethe and Friedrich Schiller. The rest is rotating, but they are very, very hard to miss.
* Johann Wolfgang von Goethe has (true to history) an iron prosthetic (or "Iron Hand") for a right hand.
* Johann Wolfgang von Goethe kills himself because his lover Charlotte is married to his friend.
* Johann Wolfgang von Goethe. Many phrases originating in his works found their way into everyday German language.
* Johann Wolfgang von Goethe proposed to his old love's very young daughter Ulrike. She didn't accept his proposal.
* Johann Wolfgang von Goethe. She uses her beauty to enamour and manipulate the Knight Adelbert von Weislingen; then, when he has outlived his usefulness, has him murdered.
* Johann Wolfgang von Goethe, the demon Mephistopheles cannot enter Faust's study in human form until Faust has told him to come in three times. He was, however, not subject to this inhibition while he was transformed into a dog in the preceding scene. He also reveals that ghosts and demons must always leave a house by the same way they have entered.
* Johann Wolfgang von Goethe was a German knight who had lost his right hand, and had it replaced by an iron prosthetic which allowed him to fight with a sword. The play also features Franz von Sickingen, another knight and an ally of Götz (in the play, his brother-in-law) who had only one leg.
* Johann Wolfgang von Goethe, which by this time has been interpreted to death,

undeath, back to death and straight into the sun, thought that the entire process of over-analyzation and insisting on trying to find a meaning and idea in a work was absurd and contraproductive even in the early 19th century.
* Johann Wolfgang von Goethe) without knowing where it's originally from?
* Johan's Crystal Beast monster spirits. When all 7 are gathered he can summon his ace monster Rainbow Dragon. (Its evil twin Rainbow Dark Dragon works in a similar fashion). Subverted with the Shadow Riders of which seem to have 7 yet later revealed to have their leader thus 8. On the other hand, there are seven keys necessary to unlock the Sacred Beasts, and those keys are held by seven Key Keepers.
* Johan's fixation on the much older Tenma has a messed up mind game feel to it.
* Johan uses a deck consisting of the seven Gem Beasts, of which there are only one of each. This means that Johan has only seven monsters in his entire 40-card deck (and Rainbow Dragon, but that has a special summoning condition, and he doesn't have it for a good chunk of the series). Despite this, he never has a problem drawing at least two Gem Beasts in his opening hand. This would almost be justifiable if his other cards let him search for his Monsters, or recycle them when they leave the field, but most of the time, this is not the case.
* Jo Harvelle, who spends most of Season 2 with an unrequited crush on Dean Winchester, something which the Demon Meg uses to torment her when

* Joh Fredersen grabs his hair with his hands on the rare occasions that he gets scared.
* Johji Manabe, to the point of condemning Kadokawa Shoten for the low budget visuals and downright stating that it "looked like shit". To this day, the series still hasn’t had an official DVD or Blu-Ray release nor has it seen the light of day overseas because of such backlash (though it did get Latin American Spanish and Arabic dubs, oddly enough).

* John Adams, adorably enough! When Gilbert Stuart mentioned that he "wished to God he could have painted Mrs. Adams when she was young; she would have made a perfect Venus," Mr. Adams expressed emphatic agreement.
* John Adams. After hearing himself being refered to as "old, querulous, bald, blind, crippled and toothless", Adams simply replies "I'm not crippled."
* John Adams. George Washington was easily the choice for first President, and by the time his administration was over, Franklin was dead.
* John Adams might have been able to "see the rays of ravishing light and glory... through the gloom," but he also knew what they faced. There was very little joy in Independence Hall that day.
* John Adams section for the possibly apocryphal real basis of the scene.
* John Adams should have a little more respect for his colleagues, as they are as proud and accomplished as Adams.
* John Adams, the Founding Father and 2nd President of the U.S.A. lived to be 91. In the early 19th century, 91! He held the record of longest-lived president until the twentieth century, when Hoover tied him, and then Ford, Carter, Reagan and Bush surpassed him.

They spend all of their time together naked and simulating sex acts trying awkwardly to hold normal conversations in compromising positions; at the end of their plot John works up the courage to ask out Judy while staging the last scene.
* John and Kate, the direct supervisors of the main characters, are fickle, cruel, and completely self-centered.
* John and Lyla have a daughter named Sara, until Barry's meddling results in the baby being turned into a boy named John Junior. They don't actually remember baby Sara, so they can't be
* John are 167 cm and 181 cm, resulting in the occasional jab by satirists.
* John asks Rose to help him find their parents. She can't answer him, but leads him to them. On the way, he jokes about talking to her like she's a dog and being told by Karkat that he has to marry her. She's leading him to their parents' corpses, who were killed by someone who was currently part dog.
* John Astin as Grandpapa Addams, father to Gomez (now played by Glenn Taranto). Much humor was made from the very nature of the cameo. In fact, Astin's first words with his appearance were "Where's that Young Gomez?". The cameo is emphasized by the fact Taranto intentionally pitched his performance as a straight impersonation of Astin (as opposed to Raul Julia's film version of the character).
* Johnathan pulls out a mini-mirror to shave only for Dracula to come visit in his room all of a sudden. Johnathan is startled by his presence since he didn't see him in the mirror. When Dracula sees it, he hisses and uses his powers to crack it.
* Johnathan Tzachor, producer of the franchise for all of Saban's seasons, has claimed that any season he didn't produce either in part or full (
* Johnathon and Nancy while they do it less than Hopper still take limelight away

from the kid squad with their adventures. Though they tend to compromise by just joining the others for the finale.
* John averted the Game Over Timeline, These can surely be handled as separate characters, since the differences in their respective timelines go back to three entire years.
* John babbles random nonsense in the Hungry Sea; George is concerned, but Ringo dismisses it as “Just John bein' John.”
* John Barnes a human being, and comes in a 6000 round magazine that can be emptied in a few seconds on full-auto. Exploits include shooting down barely-visible planes and ripping modern-era tanks to scrap. The weapon can also manufacture more rounds from random trash. At least in spirit, it is one very, very, very B.F.G.
* John Barnes novels do this ALL the time. "For almost everyone, the Slaughter was like Rome Falling, the Crusades, or the genocide of the Americans — unfortunate, vaguely remembered, nothing to do with the business of living now."
* John Barrowman are the exact same height (6'), and she never did so with the latter. It probably has to do with the mystique of the Doctor.
* John Barrowman let out a positively ear-splitting one after David Tennant kissed him. Said squee was so loud it managed to be heard over the squees of most of the DW fanbase.
* John Barrowman. One time on the Paul O'Grady show, he told of an occasion in which he'd played along, telling a little boy he'd been sent by the Doctor to find a Cyberman...
* John Barrowman's albums recall the days of Andy Williams and Dean Martin, with show-tunes.
* John Barrymore article, Rudnick recalls Williamson binge-drinking, sexually harrassing the stage manager, offering unsolicited "direction" to co-stars, and— eventually— jabbing Evan Handler, who played the lead, in the buttocks with a prop sword during a swordplay sequence. (Handler walked off the production that night and did not return to the role.)
* John being kicked out of his first school: he was strong enough they couldn't control him and volatile enough to not cooperate, and in a world like this there's no room for someone like that in the system.
* John Bellairs, although they're both dead by the time the story starts.
* John Bellairs became friends with the elderly Ms Eells and her brother Emerson.
* John Bellairs has cereal magnate H. Bagwell Glomus, whose will was hidden away before his suicide, and young Johnny Dixon's desperate hunt for it (he wants the reward money to pay for a brain surgeon for his grandmother, whom he believes to be dying of a brain tumor). The search is opposed by Glomus's sister, who wants the will to stay hidden because she fears her brother hadn't left her anything (without a will, she at least got some of his money). Johnny ultimately finds where the will was hidden, but it's destroyed before anyone can read it. He still gets the reward money, since he did find where it was hidden.
* John Bellairs, he is very put out by the fact that he did not recognize Arabic writing on a sword, thinking instead that it was only decorative engraving.
* John Bellairs, Miss Eells blatantly ignores a "No Trespassing" sign as she and Anthony hop a fence to explore an empty house. The narrator notes that Miss Eells hates such signs anyway, and once stomped on one just to show what she thought of it.
* John Bellairs, the eponymous ring is a magic artifact that (among other things) grants wishes by allowing the wearer to invoke a demon. Upon finally getting possession and mastery of the ring, the villain wishes to be young and beautiful and to live for a thousand years — then vanishes. The heroes later notice a young willow tree nearby...
* John Bellairs, who create the eponymous clock which is intended to drag the world into the proper temporal position to bring on doomsday.
* John Belushi accidentally hit him in the forehead with his sword during a Samurai sketch. During the commercial, Henry's wound was cleaned and bandaged. As an in-joke, all the other cast members from that point on sported similar bandages on their foreheads, and the incident was written into the "Weekend Update" sketch ("Up

* John Belushi and Dan Aykroyd wore shades when performing as Jake and Elwood Blues. The Blues Brothers act originated on
* John Belushi. Belushi repeats what his teacher says, and then the teacher has the heart attack. Belushi, unfazed, repeats the action.
* John Belushi dead - cutting to an incredulous reaction shot of him in the audience to uproarious laughter.
* John Belushi the eagle biologist tells him she's not interested, you'd think he'd get the memo.
* John Belushi. They died at the same age, of the same cause, and had very similar dying words. Belushi's were "Just don't leave me alone." He died alone too.
* John Belushi turns to give the camera his trademark single raised eyebrow after he climbs the ladder to look into the sorority house window and discovers the girls in the midst of a semi-nude pillow fight.
* John Birks "Dizzy" Gillespie. Famous for his ebullient and often comic onstage persona, which has harmed his reputation among people who think jazz musicians should never smile; also for his peculiar habit of inflating his cheeks while playing, and for his strangely-shaped trumpet. His tireless gigging and infectious enthusiasm probably did more than anyone else to popularise bebop and establish it as the foundation of mainstream jazz.
* John Blunt, one of the engineers of the South Sea Company Bubble, was famous for two things: having a very sharp (if unscrupulous) mind and running the Hollow Sword Blade Company.
* John Boehner's. Needless to say the president doesn't seem to have even noticed this, let alone actually care (he certainly hasn't felt the need to comment).
* John Borg was a longtime Metallica fan long before he got to develop the pinball game.
* John Boy And Billy Big Show has a multiple choice quiz for call in listeners that always has two joke answers and the actual correct one (usually it's about some wacky news story, so even the real answer is often ridiculous). The theme song for the segment includes a chorus of cheerleaders shouting "Pick C."
* John Boyega added Rose Tico, played by Vietnamese-American actress Kelly Marie Tran, to the main cast.
* John Boyega, he was described by the interviewer to be very dreamy, handsome and beautiful. Boyega then admits: "honestly, it's hard looking away from his face, cause good lord is he handsome."
* John "Bradshaw" Layfield being a millionaire stock broker persona in the ring reflects his real-life investment savvy and the wealth he built for himself (enough to write a book on financial investing advice).
* John "Bradshaw" Layfield. Bradshaw flat out refused, to Vince's face, to do anything besides lose cleanly to Chavo.
* John "Bradshaw" Layfield character was based on his real life, having invested his early paychecks wisely, so much so that he became a business contributor to CNBC and Fox News.
* John "Bradshaw" Layfield. He may have gotten his start as a beer-swilling Texas football player and ended his time in wrestling as Wall Street tycoon type, but that's because he actually is both. He was known as far back as his being an Acolyte to have a knack for the stock market. He went on to become a millionaire from it, sold a book on finance management, and has been featured on the cover of Fortune. He even met his wife on the set of the business show Bulls & Bears, where he was a regular guest.
* John "Bradshaw" Layfield in 2009 and retired the same year. He also first became a commentator around 2006-2008 while nursing his injury before returning to this field after his aforementioned retirement.
* John "Bradshaw" Layfield is hard to determine. Or possibly a joke given that neither of them are French (as in, from France): they're both Canadian.
* John "Bradshaw" Layfield, later commentator. He's also a stock market investor)
* John "Bradshaw" Layfield made it rain $100 bills with his face on them during his entrance.

* John "Bradshaw" Layfield once chokeslammed Bradshaw through the limo.)
* John "Bradshaw" Layfield!" prompting JBL to say, "I gotta admit, that was pretty funny, King."
* John "Bradshaw" Layfield, quit the company in a fit of rage. In reality, she left to be with her new husband and to continue to pursue her Brazilian Jiu-Jitsu programs.
* John "Bradshaw" Layfield: Returned to commentary in 2012 and has wrestled the occasional match.
* John "Bradshaw" Layfield's abuse of power was "helping" wrestlers and "best for business".
* John "Bradshaw" Layfield seems to have been put on the commentary team for the sole purpose of enforcing these. If a wrestler has a catchphrase or similar that asks for audience participation (R-Truth's "What's up", the Uso's "When we say 'Us' you say 'O'", and Los Matadores' "Ole" chants), JBL will loudly scream it into his headset when the fans are asked to.
* John "Bradshaw" Layfield thing was all an act... Doubly appropriate as he's apparently a complete jerk in real life too.
* John "Bradshaw" Layfield. This caused considerable controversy both in Germany (where the Nazi salute is illegal) and in the US.
* John "Bradshaw" Layfield to help him take the WWE Championship from Cena. It didn't work.
* John "Bradshaw" Layfield was known for having long black hair most of his career. Behind the scenes, when his stock investments went up and had to be on Wall Street more often, he cut his hair short and let it revert to his natural dark blond. WWE eventually used this as a way to bring in his JBL character.
* John "Bradshaw" Layfield would occasionally taunt his opponents that he's a "Wrestling God" (even if he's a whiny, cowardly Heel).
* John brainwashed Dean into believing that demons and ghosts are real and probably molested him as a child. Of course, Henriksen said this just to make Dean angry.
* John Brown, in the run-up to his raid on Harper's Ferry, faced a lot of grumbling by his followers. He promptly resigned and offered to follow any of them who wanted to lead; they all re-elected him as leader unanimously.
* John Brown's body (sang to the chorus of the Battlehymn of the Republic) (called literally "Uncle John in battle") is sang as a children's song. The third and forth stanzas are (translated back):
* John Brunner actually handles this pretty well, despite being written in 1968. The USSR isn't gone in 2010, but it's mostly defunct and implied to be Communist only in name, and the real threat is ... China. A lot of other predictions in the book are surprisingly accurate as well.
* John Brunner, because... nobody on either side knows why. (Though the fact that they live within the sphere of influence of the elemental Fegrim may have something to do with it.) The war finally fades and dies with the passing of Kanish-Kulya from Chaos into Time.
* John Brunner introduces Howson, whose telepathic power is second-to-none. Yet he is afflicted with haemophilia, scoliosis and never went through puberty, because the region of the brain that controls the growth of the body was overwhelmed by the area that governs telepathic ability.
* John Brunner is one of the few novels pre-to-post cyberpunk that came anywhere close to hitting the prediction nail on the head. And if you have read "Sheep" you realize this is not a good thing ...
* John Brunner, one particular district is far more prosperous than by rights it should be... at the cost of unnaturally dark and cold nights.
* John Brunner to make connections between pieces of information that it previously ignored. In addition to an intelligence boost, this bestows automatic empathy, since those infected can no longer disregard the genuine pain that others feel.
* John Brunner were able to sense electric fields. A minor plot point is the protagonist reasoning that the aliens must have lived in constant terror of thunderstorms. He is therefore able to deduce that a bizarre bellows-like gizmo the archaeologists found must have been a device for predicting the weather.

* John Byrne: a gangster's moll asks Batman "You wouldn't hit a lady, would you?" and Batman replies that of course he wouldn't, but he doesn't see any ladies here, and knocks her cold.
* John Byrne and may be the mastermind behind the whole thing. After a few days of this Bruce and Dick are discussing how this hampers their activities Batman and Robin, and Cap arrives at the window just in time to hear Bruce say he's going to have to ditch Rogers because he's got an appointment with the Joker...
* John Byrne, a receipt is found that mentions delivery of "zzxjoanw" to the victim. The cops figure it must have been some garbled message to someone named "Joan". Batman, armed with encyclopedic knowledge, knows that a zzxjoanw is actually a Maori drum and deduces that the victim was a collector of obscure musical instruments. The problem is that in real life, "zzxjoanw" is actually a fictitious entry in a 1903 music encyclopedia that managed to make it into two other books of "interesting words" over the next 50+ years, and no such instrument actually exists (Maori doesn't even have the letters Z, X, and J).
* John Byrne comic and is written accordingly as well. Batman and Robin smile throughout the story, deliver wisecracks and best the villains via a clever scheme.
* John Byrne deformities came when he placed his iconic mask on his face immediately after forging, before it had time to cool, since he was so desperate to hide that scar from view.
* John Byrne. During the "Vision Disassembled" arc hints are dropped about the Great Lakes Avengers. When the GLA take the main stage, you start seeing subplots about the Scarlet Witch's potential abduction. During all of this, the Witch's "imaginary children" plotline is given a few panels each issue.
* John Byrne he managed to introduce a short guy for Diana to command.
* John Byrne he was depicted as actually having been both popular and visibly athletic in his teen years.
* John Byrne. History is therefore completely altered after all, but no-one seems to mind.
* John Byrne ignoring what he had drawn in favor of writing his own interpretation.
* John Byrne in the 1980s, the first issue began with his parents on doomed Krypton. Later, Byrne commented that this was dumb of him; he should have let the readers learn the details at the same time as Clark, since all the readers knew the basics already. In his own opinion, Byrne stuck to the Stations too closely.
* John Byrne, leaving the book with Tony Stark on death's door thanks to a techno-organic virus eating away at his central nervous system with any use of the titular armor significantly shortening his lifespan.
* John Byrne likely suspect was the killer that it took a while before they realized it really was the most obvious person.
* John Byrne line. When he parted ways with Marvel, he simply excised the Marvel-exclusive parts of the story and published what was left as a graphic novel.
* John Byrne one-shot after a kid at a comic-book convention asked him what would happen if Galactus tried to eat Apokalips.
* John Byrne stops him, saying the two of them would only get in the way. Spider-Man accepts this but says that he wishes he had some popcorn.
* John Byrne's "Trial of Galactus" arc in ended this way when Byrne wrote himself into the final issue. The Watcher snatched him from his home and brought him to the cosmic tribunal, stating that he was the "chronicler" of the Fantastic Four's adventures and thus needed to be there to witness as Reed Richards was brought to trial for the destruction of the Skrull throneworld; he was accused of genocide because he saved the life of Galactus some time before. Various cosmic beings, including Galactus himself and
* John Byrne, the opposite happened - Heracles fell in love with Wonder Woman.
* John Byrne worked like this. Small two page snippets would later contribute to the storyline. The Greek Gods arguing about Cupid being able to make someone in love with anybody else and then combining this with a conqueror from the future just arriving, for example.
* John Bytheway. Yes, that is his name. He's gotten tired of people saying, "By the way, John." He realized in 8th grade that his last name is a prepositional phrase

and that if his child's middle name is a verb "he or she will be a sentence." He also has traced his family name back to 16th century England. He relates a story in which, after decades, a new joke was made. "If you have a son, will you name him Owen?"
* John Cage, 20th-century composer known for his avant-garde works, was also an amateur mycologist (botanist specializing in mushrooms).
* John Cage, bisexual American experimental composer of the 20th century
* John Cage. In a good way. Also known for chance music and indeterminacy.
* John Cage is one of the two senior partners and he has a relationship with their newly-hired litigator Nelle Porter. They lasted quite long but ultimately they broke up. It was a case of
* John Cage, which given the conditions of contemporary musical performance, usually consists of the noise made by a concert hall full of people trying to be silent while a pianist sits at a piano for 4 minutes and 33 seconds. Did your cellphone go off because you forgot to silence it before stepping into the concert hall? That's okay, it's technically part of the performance itself.
* John Cale. The final result was Reed threatening to dissolve the group unless Cale was sacked, with which Sterling Morrison and Maureen Tucker reluctantly complied.
* John Callahan draws politically incorrect comics making fun of disabled people, which has to do with the fact that
* John Callahan's Quads! an erection... because the unsexy thoughts would help him with premature ejaculation.
* John Callahan's Quads! had the hippy girlfriend of the quadriplegic protagonist have sex with him while he was asleep, in the episode where he sold his soul to the devil to be able to get it up. He is somewhat distressed, but this is more because he's been having nightmares of going to hell and she doesn't seem to notice.
* John Callahan's Quads!, he never even considers to ask for a cure for his quadriplegia as well.
* John Callen (Oin) auditioned for the role of Radagast, and the voice of Smaug.
* John Calvin. Arguments explaining why theatre is evil and/or useless go back at least as far as Plato, and the opposition dates back at least as far as Aristotle.
* John Candy are honorable mentions, given they mean well, but are too weird or clumsy and therefore considered nuisances.
* John Candy, but was contractually obliged. Sadly, this turned out to be his final film, as he died during production.
* John Candy during the scene where he comes to the bedroom of Tia's "boyfriend" Bug to rescue Tia by drilling a hole through the doorknob, he's also holding a drill and smoking a cigar. Although generally throughout the movie Buck comes out as kind of kooky such as when he asks Tia "How would you like to spend the next several nights wondering if your crazy out of work bum uncle will shave your head while you sleep?" and where he's talking to Tia's boyfriend about burying the hatchet.
* John Candy. This man was tall, weighed somewhere around 300 lbs. (136 kg), and had a very lovable and caring nature. He was also a great dad. He played this type of role in some (if not most) of his films.
* John Candy worked on three movies that were released after his 1994 death. All are dedicated to his memory:
* John Carlyle's security droids are pretty standard, aside from the fact that they're
* John Carmack's lukewarm reception, "The Carmack" still commands attention when he speaks about game technology, especially 3D graphics engines, his specialty.
* John Carmack, who was the lead programmer on the game, once commented that “Story in a game is like a story in a porn movie. It’s expected to be there, but it’s not that important.”
* John Carpenter (also an alien) ever escaped his prison. Unfortunately, the Church became corrupt and started seeking power for its own sake.
* John Carpenter and find out that, out of all the worlds it's come across and assimilated, humans are the first species it's encountered that can't shape shift.

The concept of individuality and a static shape go completely over its head.
* John Carpenter and frequently used throughout the remainder of the series.
* John Carpenter, a piece of the alien uses an elongated tongue to drag itself along the floor.
* John Carpenter, Carpenter opted out of doing any more and signed away the rights to producer Moustapha Akkad, who quickly revived the original formula. Michael Myers went on to appear in five more films after his canon death, not counting the remakes.
* John Carpenter composed for his films are frequently cited as influential in the Synthwave genre, so much so that in 2015 John Carpenter started a second career as a standalone musician.
* John Carpenter features by far the most devious and cunning iteration. The Thing in this version is extremely careful about who it infects, generally going for the most quiet and unassuming crew members as opposed to authority figures and scientists. Instead, it puts great effort in framing those authority figures in an attempt to remove the ones who stand the best chance of exposing it. When they finally figure out a way to test who The Thing is, all of the most likely suspects turn out to be human.
* John Carpenter. He wanted to make a Western, but couldn't do it within his budget.
* John Carpenter) hidden in billboards, magazines, and everywhere else.
* John Carpenter in particular are clearly two good friends reminiscing and catching up.
* John Carpenter is a green liquid who enters into people via their mouths: the hosts then do the same thing to spread the possession, i.e. vomiting into other people's mouths.
* John Carpenter is an electronic musician. This also explains why his films tend to have an electronic score rather than an orchestral one: He has made the score himself.
* John Carpenter is that a polymorphic alien crashed on Earth during the Ice Age, and has been in suspended animation in Antarctica until some Norwegian researchers discovered it. The alien wiped out their compound and fled to the American base disguised as a sled dog. Given enough time, the alien can mimic any organism it consumes, and the American researchers have nowhere to flee that isn't sub-zero cold.
* John Carpenter of the 80s and 90s. Many tropes of the subgenre can be traced to Michael Myers' first rampage.
* John Carpenter opens a new story. Viewers were expecting to see Michael Myers again and weren't pleased to see something totally irrelevant to what they expected.
* John Carpenter plays the Surgeon General of Beverly Hills, a man obsessed with achieving physical perfection through plastic surgery. The prosthetic makeup he wears for the part — sculpted cheekbones, a thinner nose, a squarer jaw, visible hairplugs — makes the character look more like an animated mannequin than anything else.
* John Carpenter's The Thing. When it's not disguised as something or someone, the titular Thing always manifests as a dangerous and gruesome mass of shifting gore, blood and body parts that come and go as needed.
* John Carpenter Sutter Cane writes the protagonist's partner Linda Styles out of existence so that only he can remember her. That's assuming he's not just crazy.
* John Carpenter's Vampires as someone in love with─and sexually excited by─destroying vampires.
* John Carpenter's Vampires: During Valek's massacre at the motel, he grabs one of the hookers to have her soak up some bullets. He's not even doing this for protection but purely out of sadism, as he's actually immune to gunfire.
* John Carpenter's Vampires has been vanquished, the day has been saved, but the lesser threats still have to be cleaned up. Both end with the hero and their sidekick heading out to kick some more ass.
* John Carpenter's Vampires involves a group of vampire hunters out to stop the

head vampire from getting a cross which will let him go out in the sun. There are other vampire hunting teams all around the world, all funded by the Catholic church.
* John Carpenter's Vampires: On the posters, the vampire lord Jan Valek is shown as a face in the clouds overlooking the heroes.
* John Carpenter's Vampires slices somebody in half vertically using his hand.
* John Carpenter's Vampires, Valek is the first vampire, accidentally created during a botched exorcism. He is the strongest, as the only thing that can hurt him is sunlight. He lacks every other vampire weakness. His goal in the movie is to complete the exorcism in order to become truly immortal. This would also allow him to make other vampires without weaknesses.
* John Carpenter's Vampires vampire cuts a human cleanly in two with just his claws.
* John Carpenter's Vampires. When John Crowe discovers that his Vatican liaison is withholding information from him, he threatens the priest, who refuses to believe that Crowe will harm a human being. Crowe responds thus:
* John Carpenter. The leader of the zombie-type-things goes through every possible emotive inflection of "RARRrrrrh!" in his first ten minutes onscreen, depending on his apparent mood. Then he gets to deliver them all over again, a few times each. Scarily enough, this makes him one of the best actors in the film.
* John Carpenter. The movie dances around this issue by setting up the all-out battle to occur after the story's events, but it's impossible to maintain any hope for the surviving characters because victory is ultimately impossible.
* John Carpenter: The Norwegian screaming at the Americans in the beginning of the film is explaining that the dog is a shapeshifting alien, which the Americans don't figure out until halfway through the film. Faced by what appears to be a madman shooting at them, the base commander guns him down.
* John Carpenter). The premise also bears strong resemblances to the John Greenleaf Whittier poem The Wreck of the Palatine which appeared in The Atlantic Monthly in 1867, about the wreck of the ship Princess Augusta in 1738, at Block Island, within Rhode Island.
* John Carpenter This scene is both gross and hilarious. It's the slick voice coming out of the lifeless prop head that makes it funny. Every time.
* John Carpenter to Rick Rosenthal, though he did co-write and score the film, as well as directing additional scenes.
* John Carpenter two out of four crew members are obliterated in a nuclear blast by a malfunctioning bomb that decides there is no point to existence. Ironically, this stems from a crew member trying to convince the bomb not to explode. Now floating around helplessly in space without a ship, one of the two remaining ones is sucked in by a group of asteroids to slowly drift off and die, while the other decides to surf into the nearby planet's atmosphere on a piece of debris to burn up.
* John Carpenter, undead sailors came out of the mist to seek their revenge.
* John Carpenter was made on a shoestring budget of $60,000. And it shows.
* John Carpenter when the movie starts. To be fair, when speaking of said professor, one student said that "he wants philosophers, not scientists," so it is a little open to debate or interpretation.
* John Carpenter, which was very popular at the time. He did not agree with the film's philosophy but liked how it conveyed "the sense of New York as a kind of jungle, and I wanted to make a science fiction film along these lines".
* John Carpenter while researching theoretical physics and atomic theory. He recalled, "I thought it would be interesting to create some sort of ultimate evil and combine it with the notion of matter and anti-matter."
* John Carpenter, who starred in several of said films (including the three mentioned), has remarked a few times that he wouldn't have a career if it weren't for such.
* John Carpenter with Christopher Reeve, only the teacher girl and her kid (the only alien child who had more or less normal emotions) survive. Everyone else in town is dead.
* John Carter after losing faith, which, by implication, glorifies his cause as a

Confederate.
* John Carter, as his Earthling bone structure and musculature give him superhuman strength on Mars). So, the next time, they use bigger, stronger chains that he can't simply break. What does he do? He breaks the rock that the chain is attached to.
* John Carter, at least, is occasionally shown as having some doubts about his ability to get out of his latest scrap... though to return to the "invincible" theme, often he's not actually worried about
* John Carter, directed by Pixar veteran Andrew Stanton, was dedicated to Steve Jobs, co-founder of Pixar.
* John Carter: He wasn't actually teleported to Mars, just a carbon copy controlled by his consciousness.
* John Carter: In the Disney adaptation, Zodanga is reinvented as a mobile city dragging itself across the surface of Barsoom by dozens of giant shovels strip-mining the planet as it goes.
* John Carter is called the "greatest (or "master") swordsman in two worlds" (Mars and Earth) in
* John Carter. It's heavily hinted at that before or parallel to messing up Mars, they also meddled in humanity's early civilizations on Earth.
* John Carter, it's said that Mars is dying out due to the actions of the Therns, and after the Therns are done with Mars they'll just move on to Earth. This doesn't happen in the book; in the book Mars is dying on its own and the natives have multiple methods in place to slow down the planet-dying process.
* John Carter of Mars a captioned illustration opposite each page of text, and which were intended for children, unlike the original John Carter novels.
* John Carter of Mars - Adventures on The Dying World of Barsoom using a streamlined version of the 2d20 system called the Momentum system.
* John Carter of Mars) and both factions are introduced as antagonists but once John Carter dethrones the First-Born's mad tyrant, they become friendlier.
* John Carter of Mars, and of course John Carter's own mysterious past, the question how old he realy is and why he cannot remember any childhood.
* John Carter of Mars), and the Okar (Yellow Martian) elite guard Solan gives Carter a serious run for his money in the third book.
* John Carter of Mars, an ugly queen, pays him to have her body switched with that of a very beautiful young woman, setting in motion the main plot of the book.
* John Carter of Mars: Barsoom is littered with artifacts from the more advanced White Martians who once ruled the planet, but most of those ruins have been overrun with Green Martians, who aren't intelligent enough to appreciate anything more complicated than the fact that the radium rifles kill things.
* John Carter of Mars, being Martian, an egg-laying species, has no bellybutton.
* John Carter of Mars books are full of these; although Martians do have fire-arms, swords are still the main weapon of choice for most of them.
* John Carter of Mars books — you'd think this would apply with the protagonist falling in love with a Martian with a life span of hundreds of years, perhaps potentially forever, but Carter also becomes immortal for the same mysterious non-reason that he gets transported to Mars.
* John Carter of Mars books. There's actually very little attention drawn to it, but it's also made clear that nobody on Barsoom wears any clothes other than jewelry and a harness on which to hang their weapons.
* John Carter of Mars books, wherein a disguised John Carter introduces himself as "the Sultan of Swat".
* John Carter of Mars), but with a culture where you win honor through successful raiding they'll jump at the chance to attack anyone passing through or near their territory, making them a perennial headache for any Barsoomian hero.
* John Carter of Mars carry swords; the Damsels In Distress are likely to slip a dagger between your ribs and little old men can give the best swordsman on two planets a fight to remember.
* John Carter of Mars dual wield a fairly ordinary sword and a hook-sword designed to disarm an opponent as their standard technique.

* John Carter of Mars go, though, and it's worth noting that in the first book, Carter accidentally kills a Green Martian simply by punching him in the face.
* John Carter of Mars-humanoid Green Martians. It likely says something about Carter's personality....
* John Carter of Mars. It's a low-gravity world whose colonists have evolved into lanky humanoids.
* John Carter of Mars kept artificially viable by a single "atmospheric plant", there is generally an attitude that the fewer nations or species there are, the more resources will be left for the survivors.
* John Carter of Mars, Mars once had thriving seas and green life, but the planet is now on life support, with its great canals and even its atmosphere sustained artificially by its inhabitants who haven't given up the ghost. Its seas are so long gone that there are ancient ruins in the plains that used to be the bottom,
* John Carter of Mars — when the villainous Green chief Tal Hajus develops a rather rapey interest in Dejah Thoris.
* John Carter of Mars often include enormous beasts called zitidars that Carter, in his role as narrator, repeatedly compares to mastodons, suggesting an elephantine aspect to them.
* John Carter of Mars, raising some unanswered biological questions...)
* John Carter of Mars research involves swapping people's brains. He's even made a business out of it, transplanting the brains of the old and wealthy and/or powerful into younger bodies.
* John Carter of Mars series, many Barsoomian species have at least six limbs - two arms, two legs, and a third set of appendages that can serves as either extra arms or extra legs.
* John Carter of Mars series most of the Barsoomian races are ruled by monarchs, save for the tribal Green Martians. John Carter of course marries the princess of the Red Martian city of Helium.
* John Carter of Mars series, several Barsoomian words are substituted for perfectly applicable English terms, such as calling kings "jeddaks".
* John Carter of Mars series, there's Woola, a big friendly dog-like beast who accompanies John Carter on his earlier adventures on Mars.
* John Carter of Mars: Some of the fauna of Barsoom (Mars) have clear counterparts on Earth. The Banth is clearly a ten-legged lion, the Thoats are eight-legged reptilian horses and the Calot are stocky pets similar to bulldogs. The White Apes, despite their name, only look like white, four-armed gorillas, but their ecological role is more similar to large predators like bears.
* John Carter of Mars stories, every Red Martian city seems to have an assassins' guild. While not exactly legal, assassination is common enough that most people of means take measures against it. Pretty much everyone knows who the assassins are, but no one (well, no one but John Carter) wants to take them on for fear of being, well, assassinated.
* John Carter of Mars: Swords and Firearms are the standard weapons for most Martians. The guns are used mostly for long-range battles between large armies or naval engagements; Martian culture emphasizes personal combat, and there's a code of honor which prohibits the use of a weapon superior to that used by your adversary (if someone challenges you with a sword, you can fight him unarmed or attack with a sword yourself, but shooting him would brand you a coward).
* John Carter of Mars telepathic probing, something that comes in handy for Earth-born hero Carter during his adventures.
* John Carter of Mars that interprets Issus's divine edicts, and the First-Born (Black Martians) who are directly controlled by her. The few exceptions not under her control also qualify as theocracies of their own such as the city of Phundahl where its empress controls her subjects using fear of their god Tur.
* John Carter of Mars, there are several levels of this. The Therns (White Martians) present themselves as gods to the other Martian races, in spite of actually being only technologically advanced and strategically-placed mortals (though, judging from the Thern princess Phaidor, at least some of them buy into their own hype). The Therns in turn worship the goddess Issus, who is actually only

a very manipulative, very evil old woman. Whether she simply deified herself or impersonated a pre-existing god isn't elaborated on, as she's been in the role for time-out-of-mind.
* John Carter of Mars: This rule is so powerful on Barsoom that even the women accept it and submit to being rescued no matter how distressed they may be at leaving their male companions and love interests in deadly peril.
* John Carter of Mars uses the to-the-death variant, where "chess" games are a form of gladiatorial combat.
* John Carter of Mars was given the name Dotar Sojat after killing two Tharks (named Dotar and Sojat, respectively) in battle.
* John Carter of Mars, we are told that Ulysses Paxton has read the earlier works and so recognizes Barsoom when he reaches it.
* John Carter of Mars where they prey upon all other lesser races, kidnapping women all across the planet to serve as chattel and property, invoking their right as being the very first race of men to achieve sentience in Mars. Yet, they are non-productive people - they rely on slaves on virtually every labor except warfare which is the First Born males' sacred privilege and duty, while their women do literally nothing and lived idle with slaves to wash, feed, and dress them. They don't create anything new, they just steal it from other peoples - Work is something for the lesser peoples, while their masters live long lives of luxury and take pride in their non-productiveness, and it's considered criminal for them to labor and invent.
* John Carter of Mars: While Barsoom is a dying world with most of their people struggling to survive, none are as doomed as the Lotharians of which only 1000 remain with no females and children among them. They live as recluses in the Torquas swamps and developed such advanced psychic powers to create life-like soldiers to defend them as well as extend their own lifespans. Their leader Tario attempted to use his powers to circumvent this problem by materializing a female in secret, though he had no success.
* John Carter that can move incredibly fast (John uses his super-jumping skills to get from the ground to a high ledge only to find Woola already waiting there). Later on, Woola uses its speed offensively, but pouncing on a hostile Thark tribe attacking John.
* John Carter (that is, leaving the original body sleeping where you left it, and sending a copy with your mind in it to the destination).
* John Carter, the otherwise nearly-identical Red Martians of Helium and Zodanga are differentiated by the Heliumites wearing blue capes while the Zodangans have red. This is even acknowledged during the climax when, as Tars Tarkas is about to attack Kantos Kan and another Red Martian, they show him their blue capes and tell him they're Heliumites and, therefore, his allies.
* John Carter. The Therns state pretty clearly that the Martian religion was fake and they were behind it all. On the other hand, let's take a look. They can shapeshift, appear to have magic (or some super advanced technology), have been to Earth and are quite familiar with it (the leader talks about Carter's home state of Virginia). You get the idea.
* John Carter, the two moons shown look very little like the actual two moons of Mars, Phobos and Deimos.
* John Carter. Throughout the whole Mars experience, he's almost always shirtless for no particular reason. In the books, he was bare-ass naked. Anything more and the fangirls would have revolted.
* John Carter to find his wife and daughter dead and burying their bodies.
* John Carter, Warlord of Mars was published by Heritage Models, Inc in 1978 for use with their line of miniatures.
* John Carter, who appeared in the recurring role of Lt. John Biddle, directed two episodes of
* John Cassavetes famously took roles in blockbusters to help finance his smaller indie directorial efforts.
* John Cassavetes was released two years later, over half the footage is similar scenes that have completely different dialog. Cassavetes would continue to work in

this heavily improvisational framework throughout his career as a director.
* John Cazale only acted in five films during his career before dying of lung cancer in 1978 at age 42. However, his work is some of the most enduring in Hollywood history: Those five films
* John Cena. A closer analysis of the dissonance involved with his character and push might conclude that part of the problem with Cena is he behaves like a tweener yet the company routinely shills him as the purest hero in the history of wrestling, which only adds to the clear perception that corporate pull is the main thing that's keeping him on top.
* John Cena after his infamous pipebomb. So much that Cena responded with a punch and Vince responded to his demands in vigor.
* John Cena also got in on teasing R-Truth about it later. Smackdown was in Green Bay the next night, and Packer Clay Matthews was deputized as an emergency Special Guest Referee in that main event.
* John Cena amount of talent, no matter how much the other guy is carrying the match.
* John Cena) and a heel are forced to be tag team partners. The heel will let the face take a beating and refuse to tag in or help him.
* John Cena and Fruity Pebbles, his face was even put on the cereal box.
* John Cena, and nine other Superstars. Presumably, most first-time viewers didn't look that carefully before they watched the show.
* John Cena antics are hilariously entertaining to boot. Throw in some excellent matches between the two of them, and the result was arenas split 50-50 with support.
* John Cena are two notable cases. In even more added irony, they would switch "roles" on the main roster. Initially, the former for both rivalries were the heels in developmental; on the main roster, they're the faces.
* John Cena, as Cena then returned a couple of weeks later at Survivor Series without stab wounds whatsoever.
* John Cena, a similar tactic was used by Miz in order to seemingly win the match, but on the account of the referee finding the cellphone that played the supposed recording of (an out-of-context) Cena saying "I quit!", Miz ended up losing the match to Cena.
* John Cena being the key word, because Cena was already a 10-time champion going into the match, meaning he not only could win the big one, but had done so ten times already.
* John Cena by returning to the midcard in 2015. Has since focused on an acting career.
* John Cena came after him. Thus far the Wyatts have proven to be the only thing that can make Cena show actual fear.
* John Cena came out, he was good enough to do interviews in it during the press tour.
* John Cena. Debuted in 2001. Made his WWE debut in 2002. Peaked in 2005.
* John Cena, due to him sleeping in his underpants and subsequently being woken up suddenly.
* John Cena during a backstage segment at Backlash in 2007. According to Cena, Orton called him handsome, said he wouldn't take it lying down, and wanted the two of them to get together later in the evening. Cena would proceed to point out that there's nothing wrong with that, but he's not that way though.
* John Cena en route to one title run that lasted just three months shy of a year (and with only a three week break between his next one that lasted another five months) and one that went just over a month past a full year and even that was only ended due to aforementioned injury.
* John Cena feud has been going on, on-and-off, for years. The feud itself never quite connected with the audience as being anything legitimately special, despite WWE's attempts to portray it as being one of the greatest rivalries in not just WWE itself, but in all of sports. Fans are so sick of it that around 2014, Cena/Orton matches began being received by live crowds with anything ranging from silent apathy to outright hostility.

* John Cena feud that he's not as high on morals as he claims can be argued to be true. John Cena's done some pretty awful things and was saved from being booed by being a face. Of course Punk, being a heel, was booed for pointing this out.
* John Cena fidgets with his hat during promos sometimes, usually taking it off and rubbing his head during "Awkward" or "Thinking" moments.
* John Cena has a degree in exercise physiology. Might explain the superhuman rate of recovery from just about any major injury...
* John Cena has been on the receiving end of armor-piercing questions as well. Such as on the March 2, 2015 edition of
* John Cena has served the longest time as the Face, and if often considered the mascot for WWE.
* John Cena has stated in the past that this is pretty much the sole reason that it would be difficult for him to become a villain. He enjoys the charity work that he does, and it would be difficult for him and the WWE to give it up without a replacement handy. This trope was also the reason there was such a scandal over him getting divorced from his wife. Because Super Cena isn't supposed to have marriage problems like a normal guy. Notably his former girlfriend and fiancée Nikki Bella had to sign an NDA when entering their relationship, and thus the chapter in her autobiography detailing it is left incredibly vague.
* John Cena held both the ECW Title and the WWE Championship he said he would wear the former proudly. Noting the other one, he said, "And look at this one—it spins!"
* John Cena hinged on the big monster attempting to get Cena to "embrace the hate", in order to corrupt him, as it were.
* John Cena, in spades. Whether it's saving a Diva in distress, turning the tide of a three-or-four-or-10-against-one battle, or chasing bad guys off, John is your man. Probably the only reason he doesn't show up in every single segment to battle the villains and right the wrongs is that he gets too distracted chasing whatever bad guy caught his eye first.
* John Cena instead of reviving the angle just to give Cena his win back.
* John Cena in the mid-'90s as that character archetype was already starting to wane. However, because Hogan, personal problems and backstage antics aside, is still beloved by WWE fans even today, the company seems to always make their top face a clone of Hogan, then wonder why the fans don't cheer him.
* John Cena in the ring and in real life is far goofier and more playful.
* John Cena is a case of not having any heat to begin with, becoming very popular, getting X-Pac Heat with both barrels, shaking it off in an odd way, getting it back, and losing it again.
* John Cena is an Italian national, has been the only one to not pronounce it "Seena".
* John Cena marked a return to the tradition of clean-cut top faces. He roughly played a similar role to Hogan, but showed signs of vulnerability and weakness much more frequently.
* John Cena meme appears to be the wrestling fandom's equivalent to Chuck Norris Facts - the meme gained heavy overexposure and became annoying very quickly. Most fans agree that the only good thing it did was help John Cena ride the meme's popularity into a successful acting career. Even John Cena himself has made fun of it, notably performing his own piss take on the meme in a Cricket Wireless ad.
* John Cena; more recently branching into acting, both live-action and voice)
* John Cena off the top of a car onto the stage floor. John Cena still attacks both times.
* John Cena of him, and if you can name a wrestler, character or real celebrity odds are there' not just one version of them but several.
* John Cena persona. He wore a different one every week, usually according to where the show was, and in keeping with hip-hop fashion at the time, many of them were throwbacks.
* John Cena's Attitude Adjustment (formerly the F-U, which was a parody of Brock Lesnar's similar finisher, the F-5).
* John Cena's double murder-suicide and to help with Linda McMahon's attempt at

having a political career.
* John Cena's fanbase consists of children. In fact, he's granted over 500 wishes for the Make a Wish foundation.
* John Cena shortly thereafter and was relegated to the midcard once more; his title run mentioned only to boost the credibility of whoever was beating him up that week. While The Miz still seems to be playing this trope hard, he ultimately had his Championship reclaimed by Cena, albeit only to have it snatched by...
* John CenaSTF crossface combo) to the end of the sequence, making it his Six Moves of Doom.
* John Cena tendencies of both men. Punk even called out the audience for giving John Cena the "Superstar of the Year" Slammy Award for 2012, despite the fact that Punk had spent literally all of 2012 as WWE Champion.
* John Cena. The consensus was that the crowd was loving this at the end, and could give the Boneyard Match a run for its money.
* John Cena, the F-U, as a mockery of Lesnar's finisher, the F-5. Lesnar showed absolutely no response to Cena, and when they met again... well, Lesnar beat him again, though Cena actually looked really good in the match, even in defeat, solidifying his status as a rising star.
* John Cena. The match ended with Cena completing his mission as he handily beat Barrett.
* John Cena. The punchline to all of them are basically, "ur gay. Hur-hur-hur."
* John Cena this at the same time. One of the biggest rubs you can get as an up-and-coming wrestler in WWE is being booked to go over Cena, in which case Cena will be booked as a gatekeeper-type and the less-established guy will be the one playing the underdog. This can cause some serious whiplash, as Cena can go from playing the underdog against the newest monster heel to playing firmly established legend against an underdog, then back to playing the underdog against a different monster heel, in consecutive storylines.
* John Cena traded short trunks for shorts in his gimmick change from generic heel to delinquent white rapper.
* John Cena used to do a Q&A session on WWE.com called "5 Questions with the Champ." When a fan would ask a question such as "How did you spend your birthday?" or "How do you plan to spend the holidays?" he would say that "to protect the guilty," he wouldn't say exactly, but that it did involve [Insert Noodle Implements Here], some of which were: packets of Mayonnaise, children's golf clubs, a Samoan, Pay Per View cable, and massive amounts of alcohol.
* John Cena was also on the receiving end of a sub-3 minute squash at the hands of
* John Cena was as a white rapper in the vein of Vanilla Ice, even releasing an album. While his freestyle raps were later abandoned, vestiges of it remained in his ring persona.
* John Cena when he's called on his behavior, but is still presented as a role model and leads the B.A. Star Anti Bullying campaign as well as most (if not all) WWE's charity causes.
* John Cena, who has a record for filling Make-A-Wish requests that may never be topped.
* John Cena with a steel chair or similar object, and he will duck under you and hit you with the Attitude Adjustment anyway.
* John Cena: WWE portrays everything Cena does as just and everything that anybody who opposes him does as unjust.
* John Cena Yeah, those numbers don't add up, but it happened, and that's not the only time.
* John Cena, you can add a Busaiku Knee (knee to the face of a standing opponent, popularized by KENTA).
* John Cheever wrote a lot of stories about unhappy couples who lived in New York so this trope popped up several times. In "
* John Cho (born in Seoul to a North Korean father and South Korean mother, he later migrated to the U.S.)
* John Christopher), anti-Terraforming is on the Tripods' agenda somewhere after Enslave Humanity. The alien Masters plan to replace the Earth's atmosphere with one

like that of their own planet.
* John Christopher Luke fights and kills the Bayemot (a giant ameoba-like creature) by striking at its nucleus deep inside its body with a sword.
* John Christopher; massive earthquakes redistribute the balance of ocean and land, and the protagonist comes across a large tanker sitting in the desert which used to be the seabed.
* John Christopher off Wells' Martians, and depicted what the world might be like if their initial invasion had been successful. He also does a fair job of justifying the impracticality of the 3-legged design; the number 3 appears to be integral to the culture of the Masters, presumably as a consequence of their biology (as well as 3 legs they also have 3 tentacles and 3 eyes) and as well as tripodal design of their vehicles they also incorporate triangles and pyramids into their architecture and technology at every opportunity.
* John Christopher series, the narrator Will is taken by his alien master to a museum that displays outstanding specimens of humanity. There he is sickened to see the corpse of his friend Eloise, preserved in a glass case. When Will last saw her, Eloise had been voted queen of the tournament and thus won the right to serve the Tripods. She went happily.
* John Christopher trilogy ends with the group defeating the Tripods, and then having to try to tame humanity itself.
* John Christopher use these to ensnare, crush or whip any opposition.
* John Clark played Fred Dagg for many years, with the character being treated as essentially real, with other media and interviews playing along. Since everybody knew Fred Dagg, John Clark could not be himself or play any other roles, and eventually left New Zealand partly to escape the role.
* John Cleese and Graham, when, during one sketch where Eric (in drag) is naming off different ways to say "predict". A board comes down with a list of all the words he's saying, and the audience reads them off at the same time while Graham (also in drag) points to them.
* John Cleese, and the show was one of the most popular TV comedies of all time.
* John Cleese and they wrote every episode together. They were married when the first series was made, but divorced before the second one started.
* John Cleese are the only Pythons most people can recognize by face and name. The others' faces will ring a bell if you've watched any of their episodes or films, but only dedicated fans will be able to name them.
* John Cleese, Cleese is refusing to appear on "Pigs in Space", citing his contract, which says he will only work with Kermit, Fozzie and "the ugly, disgusting little one who catches cannonballs" (Gonzo). When a monster eats his contract, Cleese demands to see his agent...at which point the camera shows another monster has eaten the agent. Cleese immediately opts to cut his losses and do "Pigs in Space".
* John Cleese does this right after he asks to buy a fish license for the first time and the clerk gestures for him to move down to the next window.
* John Cleese during The Cheese Shop sketch gives a sudden outburst to the background Bouzouki player and to those dancing.
* John Cleese for De Postbank. He is out on the street asking bystanders who invariably tend to know nothing about Giroblauw (De Postbank's payment product), and getting increasingly frustrated by the lack of positive responses; he's been told everyone in The Netherlands uses it or at least knows about it (quite true at the time, actually). Cleese: "Do you use Giroblauw? (say yes or I'll break your arm)". Person, taken aback: "No, but my wife does." Cleese, switching to female at person's side: "So, you use Giroblauw?". Female: "I'm not his wife, I'm his sister." There were longer versions running in movie theaters as well. Everyone old enough to have seen them remembers them, and as the product is repeatedly mentioned as part of the gag, it's impossible to forget.
* John Cleese founded the company Video Arts to make corporate training videos. When asked why, he said it was because he discovered that businesses would pay loads of money for him to do the things he did well, write and act.
* John Cleese, Gonzo's cannonball catching act has left him with a five-foot arm.

Cleese sees he's depressed, but assumes this is about his nose and says he can recommend a plastic surgeon. When Gonzo explains "No, it's not my nose, it's my arm!" Cleese replies "Is it? Well, why's it in the middle of your face?" When Gonzo finally clarifies that he's upset because his arm is five feet long, Cleese asks "Isn't that enough?"
* John Cleese, he advises Gonzo to "keep repeating something" while Cleese attempts to rearrange his limbs. Gonzo, naturally, chants "Something ... something ... something ..."
* John Cleese. He succeeded (rather than, when asked if a slug can talk, answering "not really", he said "well, it mutters a bit"), and Cleese laughed so hard he forgot where they were. He asked the audience, all of whom shouted the next lines back at him, making him think "what's the point?" This wasn't the last time Palin tried this; another performance had him respond with "why yes it does!" Cleese was prepared this time and responded with "well then I'll take it!" and then he walked off the stage, to the roar of the audience's laughter.
* John Cleese, in 1975. They were divorced by the time of the second series in 1979, but this doesn't appear to have hindered the quality of the show in any way.
* John Cleese in another sketch. As they walk toward the location of the other sketch, Cleese observes that "We're on film at the moment."
* John Cleese includes a blind tasting party, where about twenty of Cleese's friends sampled wines ranging from $10 a bottle into the hundreds. The guests' opinions were spread all across the spectrum, with no clear overall preference for cheap or expensive, imported or domestic. Cleese's message from all this: drink what you like, and don't let anybody tell you otherwise.
* John Cleese" Then a crewman comes in to take the cover off his face.
* John Cleese. They both had to learn to manage big and heavy swords and to do some acrobatics, though never being recognizable, wearing both heavy armors and full helmets. They both avoided the use of stuntmen because, as they said in commentaries, they had a lot of fun in enacting the duel.
* John Cleese This particular quote generated no shortage of controversy when it leaked to the press by way of the infamous "Morawiecki tapes", secretly recorded at a restaurant in Warsaw.
* John Cleese version of Gerald Ford) orders a Secret Service agent to catch "the first plane to London, France".
* John C. McGinley was originally offered the part of Tony. But Spencer dropped out, and Stone offered McGinley the larger role. Ivan Kane ended up playing Tony.
* John Collier's "Evening Primrose" is an account of how poet Charles Snell decided to move into
* John Collier's short story "Green Thoughts", thought to have inspired the original film version of
* John Coltrane: Master saxophonist and spiritual thinker who went from being a sideman for Miles Davis to leading his own quartet, in which he blew jazz open with a revolutionary approach to composition and improvisation: his compositions became more and more complex to the point that only he could play them absolutely fluently, at which point he drastically simplified them, helping to codify Modal Jazz in the process. Extremely divisive in his day, with some critics thinking he was just going too far: now universally acknowledged to be one of the greats. Went on to be one of the codifiers of free jazz.
* John Coltrane was a four-part suite about Coltrane's spirituality, broken up by movement into the record's four tracks.
* John Coltrane: Was very much inspired by Arabian and Indian folk music later in his career and used these sounds in his own work.
* John Conlee had seven #1 hits in his biggest hit making period ranging 1978-1989, but none of them were his
* John Conlee has been produced by Bud Logan for literally his entire career, and has used Brent Rowan as his sole lead guitarist since "Friday Night Blues".
* John Connolly and replace her with a changeling, who converts the rest of the family and releases them from the fort.
* John Connolly, Buddy Carson, it grants its host the power to transmit fast-acting

cancer at a touch- and enforces its use with agonising pain and the threat of infection. Though the Worm doesn't speak in the short story, Carson mentions a dream in which it tells him that his only purpose is to "Spread the Black Word."
* John Connolly Louis gains the trust of a possible witness by flashing a gym membership and claiming it's a badge.
* John Connolly, who had been raised in the same South Boston neighborhood as Bulger and had known him since childhood. As Bulger's handler, Connolly took whatever intelligence Bulger could provide on the Boston Mafia in exchange for aiding and abetting Bulger's violent takeover of the city's underworld. In 2008, Connolly was convicted of racketeering, obstruction of justice, and murder and is currently serving a 40 year prison sentence.
* John Connor's head from around his mouth. A later flashback shows him mid-transformation, his flesh and bone being gradually turned into machines, all while he writhes in agony and the nanomachines make sickening crunching and buzzing noises. For a split second, his entire head is shown beginning to be converted.
* John Constantine also met an Elizabethan warlock called Jack Constantine, who came to a nasty end in a graveyard.
* John Constantine but can turn on them as well if he is in a bad mood or it again suits his purposes.
* John Constantine evil magical entities stop dead when John enters and tells them Tim Hunter's coming with him.
* John Constantine from the Hellblazer series was originally drawn to resemble Sting (specifically, as Sting appeared in the films Brimstone and Treacle, and Quadrophenia).
* John Constantine gets out of a sticky situation where a demon had fused four hooligans together to kill him, while retaining their personalities. Unfortunately for the demon's plans, two were for Chelsea, the other two for Arsenal. They start beating the crap out of themselves (ultimately ripping themselves apart), allowing John to escape.
* John Constantine has moments of this. "Yea, though I walk through the valley of the shadow of death, I shall fear no evil, for I am the evilest bastard in this valley."
* John Constantine is a lot less manipulative and untrustworthy because of his friends in the BPRD. Still pretty vindictive against evil vampires, though.
* John Constantine is both kinky and bi in nearly all of his portrayals, whether it's the comics or the show, though the movie was a notable exception. In Hellblazer, he's been portrayed as a rather pushy sub who usually demands it even rougher, and he's into everything from handcuffs to whips to even burn play.
* John Constantine is, by his own admission, terrible at fighting. He will more often than not lose out in a straight-up fist fight and doesn't really use any magic outside of rituals, and then only when absolutely necessary. Regardless, anyone who decides to piss him off better watch their backs, because chances are that he will be arranging some spectacularly terrible fate for them somewhere down the line.
* John Constantine is portrayed differently from the usually smarmy, cynical, self-centered, chain-smoking, alcoholic con-man with a low opinion of superheroes and a habit of pushing people away in the comics. Here, he's much nicer, as he's depicted as a deadpan, wise-cracking sorcerer and paranormal investigator with a much friendlier but still smarmy personality, and he's also a member of the Justice League.
* John Constantine nonchalantly comments that the candles made booze out of holy water. The booze the Devil just drank, and the candles that Constantine promptly kicks over.
* John Constantine points out that the easiest and most blood-efficient way to do this is with a papercut on the page of the spellbook you're using.
* John Constantine's first appearance, he stares down a biker who's hassling him in a bar. The man isn't very intimidated, until he notices that John crushed his glass when he made a fist and is still squeezing the shards. His hand seems fine soon after, so it may have been an illusion.

* John Constantine. The protagonist John Constantine grew out of that.
* John Constantine using the same props and costumes, and thus importing that show into the larger franchise.
* John Constantine usually operates out of London, but he's been known to take a break from the unrelenting horrors of the city and relax with the unrelenting horrors of the countryside.
* John Constantine was a Hogwarts student (Slytherin, naturally) and fought against the Death Eaters.
* John Cooper Clarke is one of the most famous performance poets in the UK, known for his punk rock delivery style and strong affiliation with the Manchester post-punk scene. Despite his fame, he only managed one Top 40 single in the country, "Gimmix! (Play Loud)", a #39 entry in 1979.
* John, creator of the "parallel Earth" Cybermen, sees his creations in this way. Davros, in the original series, created the Daleks for much the same reason.
* John C. Reilly is another downplayed example; he's a relatively outgoing guy who grants interviews and makes public appearances (usually related to an upcoming project), but doesn't use social media (he did give a Reddit AMA in 2014).
* John C. Reilly, only for the kid to say that he didn't look like Ralph. (According to him, kids only really understand that sort of thing if they're older than eight.)
* John Crichton has a habit of singing when his sanity drops a notch. For example, in "
* John Cryer. Later, the main characters get into another one at a redneck diner, which apparently houses brawls all day, judging by the warning the gas station attendant gives them just before going in.
* John Cusack also made seven films with Jeremy Piven. And eight with Ned Bellamy. He seems to like doing this.
* John Cusack - although they've made few films in which they share the lead, they often cameo in each other's films.
* John Cusack has gone on record as stating that he'll take just about any well-paying gig he's offered because it lets him finance the small indie projects that are his true artistic love.
* John Cusack is often seen drinking shot-glasses of hot sauce as a method of self-flagellation (he's an assassin).
* John Cusack was Dimitri's speaking voice, but his singing was done by Jonathan Dokuchitz.
* John Cusack will usually feature other Cusacks, as well as Jeremy Piven, a longtime friend.
* John C. Woods was tasked with executing Nazi war criminals, including the one sentenced to death during the Nuremberg trials. Although he claimed to have experience before as assistant hangman, he really didn't.
* John C. Wright, a bunch of people sitting around a table talking both reveals the players and sets the stakes for the series' action.
* John C. Wright, a character coming to with amnesia is told he consented to forget what, exactly, he had consented to. He asks how he can know this is true, and the computer answers that in fact, he doesn't know it.
* John C. Wright, a character describes a location as easy enough for Amelia — "blond brain" — to find. (He intends it as an insult; other characters have particularly marked her out as the clever one.)
* John C. Wright, after some false memories were revoked from Atkins — against his will — Atkins tells Phaethon to spare him the pity.
* John C. Wright, after two and half books insisting that Daphne Tercius, being a version of his wife Daphne Prime, is not his wife, Phaethon reflects on the differences, tells Daphne Tercius that she is not his wife, and asks her to marry him as herself, not as a version of his wife.
* John C. Wright, aiming for this: "Social harmony is achieved only when everyone loves everyone."
* John C. Wright, Amelia attempts to extort help in escaping. She bungles it.
* John C. Wright, Amelia ponders whether Mrs. Wren accidentally or intentionally

let slip that they were watching her — or possibly not, and some convolutions of what pose she wanted to take in order for them to interpret her knowledge.
* John C. Wright, an AI controlling a mansion takes on the form of a penguin in order to fly through the air with the son of the house, and keeps it despite the objection that penguins can't really fly. It later explains it takes a penguin form regularly as a deliberate pose so humans will understand its motives as best they can. It also uses the form to explain to Phaethon how even a man about to be unjustily exiled can be happy: by following its nature.
* John C. Wright and fell into the Abyss. Indeed, ap Cymru justifies talking with him on the grounds it's not disobedience, as he was never forbidden to talk to him.
* John C. Wright and hedonists. While it was enforced by the Nymph Queens — those who resisted were sent into cryogenic sleep to await an age more palatable to them, or if necessary, killed — it was also accepted by the Nymphs. Soldiers would drink it to prevent the memory of battles disturbing their peace.
* John C. Wright, any problem that can't be stunned by the girls' showing some leg is inevitably Colin's part. His most successful performance? Having a "conversion experience" during a crowded Christmas service.
* John C. Wright appears as a headless man who carries about his head separately. On the other hand, he is dead and just coming from Hades (and they are about to make him Psychopomp).
* John C. Wright, Atkins complains about having to rely on a "spoiled rich man's son" to rescue humanity. Phaethon is actually not spoiled. Just very, very, very pig-headed.
* John C. Wright, Atkins is glad that Daphne and Phaethon survived so that he can report no civilian casualties — at least, he says that's his motive.
* John C. Wright. A token attempt is made to claim it was suicide, Grimaldi being a Hindu. The hero accurately points out that no starship captain would endanger his ship in that way.
* John C. Wright, at the climax, Victor reveals his love for Amelia; he had wanted to wait until he had more to offer than himself, but the danger is too great.
* John C. Wright, Blondies. Indeed, when Menelaus is viewing an old SF series and realizing it depicts the future (which didn't happen) as racism-free, a white man kissing a black woman is described as a Blondie kissing a Swarthy — the hair color trumps the skin color for the man.
* John C. Wright, Boggins tells him how proud he is and what a pity it is that Quentin will not remember.
* John C. Wright children in what appears to be a school; they are hiding this not only from the outside world but from the children themselves.
* John C. Wright deals with this. Everness Mansion guards the gates of dreamland. If it is destroyed, humanity will shortly go insane.
* John C. Wright for the team after their previous leader inadvertently dropped them into a river.
* John C. Wright gives a multi-page, firebreathing rant on why he/she felt like destroying society...and is unpleasantly surprised to find that no one cares.
* John C. Wright, half-titan Raven is married to the very, very petite Wendy. She's not kidding when she says he can pick her up with one hand.
* John C. Wright has deities from a plethora of pantheons but Jesus is never mentioned even though there are angels, specifically Uriel/Apollo and Lucifer. It is however hinted that Oberon had a hand in writing the Bible, at least the Old Testament, and Prometheus admits to being one of the angels mentioned as "laying with the daughters of men."
* John C. Wright has the frozen Knights Hospitallar wake when the Tombs need protection.
* John C. Wright, Helion glances at Vafnir's view of the meeting. It all appears as music to him.
* John C. Wright he posited the idea of alignments based on the real-life worldviews (from his conservative Christian point of view), with Classical (corresponding to Pagan philosophy), Principled (corresponding to theology), and Conventional (corresponding to modern ideology).

* John C. Wright, Hormagaunts would prevent the ill from getting themselves cryogenically suspended to avoid loss of their perfectly usable organs — including wombs, which could be maintained long after the rest of the woman was not.
* John C. Wright, in Nymph culture, it was expected that a man's first sexual intercourse would be with his mother.
* John C. Wright instead. She pointed out that merely human knights did, and they should be able to.
* John C. Wright is slandered. At which point, he offers to break the speaker's kneecaps if they don't shut up.
* John C. Wright, it's her duty to encourage him); a man telling him it was tantamount to suicide and so a sin; and more.
* John C. Wright makes use of rhymes as enchantments. Taffy ap Cyrmu, in the same work, takes his name from one: "Taffy was a Welshman, Taffy was a thief."
* John C. Wright — the most that is possible is until every form of energy in the universe is completely consumed.
* John C. Wright, Menelaus can argue with the Master of the World, but not the doctor.
* John C. Wright, Menelaus deduces that the story about the princess's mother is nonsense, and her only parent must have been her father — she was posthumous, though.
* John C. Wright, Menelaus, posing as a subordinate Chimara, argues with all due respect that his more stealthy plan is better.
* John C. Wright, Menelaus realizes the princess is interested in his own personality.
* John C. Wright, much of the story revolves about how many people from different eras and so different cultures — and the historical change was often one of bitter reaction and conflict — are woken out of cryogenic slumber together. Many conflicts ensue.
* John C. Wright never says anything one way or the other about religion, but it's somewhat odd that in a setting where characters are defined heavily by their philosophical beliefs, the only person who engages in any form of worship or mysticism is a bit character whose philosophy is never explained. This might seem even odder when one considers that Wright is a devout traditionalist Catholic, except that he wrote the trilogy before he converted.
* John C. Wright, one character argues with Menelaus not to try his mad experiment as if he really wants him to do it.
* John C. Wright opens with a masquerade season to celebrate a once-in-a-millennium holiday.
* John C. Wright, Phaethon donns a Harlequin outfit for the Masquerade. The Earthmind salutes his fidelity when he greets her. Possibly inspired by this, his foes don the forms of Scaramouche and Columbine to pursue him.
* John C. Wright, Phaethon uses his "emergency persona" — a high-speed unemotional persona developed by him for space accidents, but quite useful when he's under attack, too.
* John C. Wright, self-aware beings can come into existence either through enough computer time, or through philosophical reflections.
* John C. Wright, Sophotects, do not obey humans. This receives no sympathy from the Solar System's civilization, who, if their Sophotects don't obey, fire them, and so deduce that the others use them as serfs.
* John C. Wright, speculating that the ghettoization came about because mainstream literature, steeped in the post-war nihilism and pessimism, felt distrustful and critical towards any work which appealed to colorful imagination.
* John C. Wright, the dog things invert; when they are done sniffing around, they howl in frustration at not finding the scent.
* John C. Wright, the Nymphs have held to this and bioengineered their own breast to past human proportions.
* John C. Wright, the precursors left the Momument, so that we would meddle with it and reveal our existence, so they could come to enslave us.

* John C. Wright, there are six different, mutually exclusive paradigms of magic. Working out their relationships and interactions in a form of meta-magic is a major plot point, and the paradigms can, in fact, be charted.
* John C. Wright, the Savants used Golden Goo. It destroyed the cities, where it was released first — killing most people there, with only a few stunned to be transferred with their minds intact — and only by savage, fiery attack by the Giants was the earth saved from their "Golden Age."
* John C. Wright, the ship crew (who conquered the earth when they brought back antimatter) always wear an imitation spacesuit, in special cloth, and a bracelet of red.
* John C. Wright the Witches scorn any interpretation of technology that focuses merely on its material husk.
* John C. Wright. This is an important factor in why people are so opposed to the hero's projects, later on.
* John C. Wright, this is Menelaus's motivation to sleep through the millennia until Rania returns. He hates being woken because every time ages him.
* John C. Wright, Ungannis tries to invoke this trope by splitting herself into many personalities, some of whom would try erasing memories of her crimes, and still be executed for them. This is not greeted with horror by the Transcedence mass mind — legally, you can not evade punishment unless you rework your personality into a new person, and none of the split personalities had tried to redact the beliefs that had led Ungannis to commit the crime.
* John C. Wright using just the right amount of force while literally naked. (The nanites in his blood help, but it's still awesome.)
* John C. Wright, Vanity offers to cook for Glum, which lets them manipulate him. She's not an objectively very good cook, but Amelia notes that whatever she makes is mysteriously delicious.
* John C. Wright, Vanity's secret passages often don't add up, geometrically, with the places they go to and lead from.
* John C. Wright, Victor, asked what he wants, says a home, wife, children.
* John C. Wright, when Grum sets Lelaps on Vanity and Amelia's trail, he finds them, turns away, and starts to bay, running off. Grum comments that he's found the scent.
* John C. Wright when he saw a mural of an attack from their starship: the prince would never have countenanced it for any reason.
* John C. Wright, when it comes up that Nerea is Gil's cousin, Ruff is quick to point out that means second cousin once removed.
* John C. Wright, when Phaethon reunites with Daphne, Helion and Atkins turn away on their own, but must make Diomedes leave them all; Diomedes, coming from the asexual Neputanians, finds it very interesting to watch.
* John C. Wright, when Vanity accidentally invokes Bran, he recognizes the power of her companions and offers to unleash the Wild Hunt on them for her. Vanity has to talk quickly to convince him that they are her friends.
* John C. Wright, where the character can make true what he wants to be true. Its weakness is that he really has to want it; if you do not actually feel the malice necessary, you can not curse someone, for instance.
* John C. Wright, where the Sun has burnt out and the only light is from residual vulcanism.
* John C. Wright", which involves Matthew Flint and Sylvester Steel who run the agency "Flint and Steel Investigations" specializing in the supernatural, with the help of a plethora of artifacts. Though the story itself is less about the agency and more about Matthew's experiences in the afterlife.
* John C. Wright, with Phaethon pondering over Daphne Prime and Daphne Tercius — noticing things.
* John C. Wright, with the effect of making no relationships special; however, despite this, the other cultures note similarities between Nymph-talk and talk of brotherhood.
* John Darling by Tom Batiuk that ran about 12 years. Batiuk and his syndicate came into conflict over the rights so Batiuk killed off the title character and ended

the strip, leaving the syndicate with a worthless property. Years later, Batiuk revisited the story in FW to solve the murder. Later still, introduced Darling's daughter, Jessica, as part of the FW cast.
* John Darling when Les wrote a book about the murder and through the writing process solved the mystery.
* John Dashney features an old lady, a secret reading room in a library, some strange phone cards, an eleven key on payphones, and some strange cheese, all of which appear only under very specific circumstances. The old lady is at the center of it all, and she eventually turns out to be the daughter of a renowned supernatural expert, and terrible procrastinator; she's the daughter he never got around to having, the reading room is full of books he never got around to writing, and in fact he never got around to becoming renowned or even a supernatural expert. She appears to people who make up the dregs of society, but nonetheless have the potential to be something much more if only they were able to get around to it, and gives them the means to get around to it.
* John David Washington then professionally in the United Football League before becoming an actor)
* John D. Clark wrote two short science fiction stories in the 1930s, one of which may hold the minor distinction of being the first hard-SF (for
* John Deacon conceived "Another One Bites the Dust" as a "little ditty about a cowboy". It was initially not intended to be a single because it was so far and away from the rest of the album, but
* John Deere Green tells the story of a teenage boy who declares his love for a girl by spray-painting it on a water tower. The townspeople take issue not with the fact that he vandalized a water tower, but that he used green instead of red paint.
* John Dee's master has now threatened Dee with undoing it and just before Dee dies of age making Dee immortal at that age for the rest of eternity.
* John Dee's voice was rather nasal initially, but as soon as he got his
* John de Lancie had to shut down production on bonus features for his Bronycon documentary due to rampant piracy.
* John de Lancie happy when 4chan uploaded said film onto The Pirate Bay just to spite him, and the combination of that plus a horrible convention experience — where he and the other actors didn't get paid — led him to break off contact again).
* John De Lancie has yet to pass up the opportunity to reprise his role as Discord on
* John de Lancie, said at one time that he was, more jokingly or more seriously, randomly asked by people on the street how is it to be an all powerful entity. Reportedly, he'd answer them "It's just a role". OTOH he told an anecdote about being confronted by a big tattooed biker type who he was sure was going to mug him, at the very least:
* John DeLorean used plastic surgery to extend his chin to help change his image from that of a suit-wearing General Motors executive.
* John Denver had a big soft spot for kids. He adopted two (Zachary and Anna Kate) during his first marriage, and fathered one of his one (Jessie Bell) in his second. Subsequently, a good deal of his social activism work was dedicated to causes for children's welfare.
* John Denver on the country charts. "Rocky Mountain High" also got to #9 on the Hot 100, and didn't make the country charts at all, but it's still not unheard of to hear the song on a country station.
* JohnDenver, Robbie Rist, whose straight blond hair and round-framed glasses were as iconic as Denver's own.
* John Denver's song, "Grandma's Feather Bed", he considers the Gal Down the Road:
* John Denver's "Take Me Home, Country Roads", long an unofficial state song and since 2014 one of several official state songs. At football games, the team will sing the song and invite the crowd to join in. (Denver himself performed the song at the 1980 opening game for the Mountaineers' current stadium.)
* John Denver's "The Eagle and the Hawk": "I am the eagle, I live in high country...I am the hawk, and there's blood on my feathers..."

* John Dickinson and John Adams get into a stick fight during the Continental Congress in
* John Dickson Carr both exemplifies and subverts this trope in many of his mystery novels.
* John Dickson Carr, but the one who managed to escape from his coffin first ran away and left the other two to die. One survived and pursued him.
* John Dickson Carr specifically warns aspiring mystery writers about this kind of clue in his essay "The Greatest Game in the World." Of course, if you do what he advocates, having guilt depend on a series of clues rather than just one, you won't have that problem.
* John Dickson Carr the narrator regularly halts the action to inform the reader that if you think such-and-such is the case, "you're wrong."
* John Dickson Carr used this in a number of ways in other stories since he wrote
* John Dies at the End, after getting bullied, in order to be put into a special class.
* John Dies at the End and, in a pinch, a Bible bound to a baseball bat with electrical tape.
* John Dies at the End, and it actually works against Korrok and helps defeat him.
* John Dies at the End appear different depending on the expectations and desires of the person seeing them. A female ghost might conform to the beholder's standards of beauty, for example. This is the way that they are spotted, when different people disagree on the details of their appearance (hair color, skin color, etc).
* John Dies at the End, Arnie Blondestone is revealed to have been murdered before he even met David.
* John Dies at the End, a supernatural entity with a grudge against Marconi manifests as a hulking humanoid figure made out of all the meat, fish, and poultry in a basement freezer.
* John Dies at the End be attacked by a ghost under these circumstances.
* John Dies at the End, but he refuses to talk about it. All he's willing to disclose is that he was held down by a group of bullies who did something awful to him.
* John Dies at the End, but they also gain a lot of experience identifying subtle clues that ordinary people could notice if they paid attention. They learn mirrors can be used to circumvent certain illusions, religious symbols can be used to flush out and ward off evil, and household pets can be used to detect and identify paranormal beings.
* John Dies at the End by David Wong. When traveling to another dimension, the inhabitants there greet them completely in the nude for fear of appearing otherwise would disturb the visitors. They couldn't be more wrong.
* John Dies at the End Dave and his friends are trying to sneak into a casino disguised as a rock band, but the security guards notice the shotgun hidden under his coat:
* John Dies at the End: David is tormented by songs on the radio that are altered to racist screeds and personal insults that only he can hear. When he tries to turn the radio off, he finds that it was off all along.
* John Dies at the End ends with David Wong explaining that the forces of darkness have "checkmated" him now that he is in love with Amy. The shadow people drive this point home by demonstrating how easy it would be for them to retroactively kill Amy if he ever steps out of line.
* John Dies at the End features the Shadow Men, malevolent entities that can erase people from existence.
* John Dies at the End for the first time, both John and David become unstuck.
* John Dies at the End from an alternate Earth where technological progress took a very different route.
* John Dies at the End got started as a bunch of self-proclaimed "retarded horror stories" written as Halloween specials. However, it was taken offline when it was published in book form.
* John Dies at the End has an example of this, in a similar vein to Discworld, outside the books. Back before it was published, the author, David Wong had a

couple of possible inconsistencies pointed out. His response? "There are no plot-holes: just more layers of mystery".
* John Dies at the End has a video recording of a precognitive man holding what looks like a one-sided conversation. The heroes can't make sense of it the first time they watch it, but when they replay it later on, the man's girlfriend is present, and she ends up (reluctantly at first) holding a full conversation with the recording. And then the recording asks the heroes to leave the room so that he can have a private conversation with his girlfriend.
* John Dies at the End intent on entering our reality and shaping it to suit them. It's strongly implied by the end of the second book that the only reason they haven't been successful so far is that there are so many of these things trying to invade our reality that their various plans and agents keep interfering with each other.
* John Dies at the End is missing a hand, which the protagonist Dave interestingly enough doesn't discover until midway through the novel.
* John Dies at the End is so called because "there's a shitload of us in here."
* John Dies at the End, John gets several (of varying quality) after he "introduces" some wig-monsters to a folding chair.
* John Dies at the End, John lights a giant self-wrapped cigarette that acts as a powder trail to the bomb that destroys part of the building in Shit Narnia.
* John Dies at the End John, which involves backflips, kung-fu fighting, and horse-theft.
* John Dies at the End, Molly the dog drives a car into a burning building to save her owner.
* John Dies at the End, or the ghost that possesses an entire fridge full of meat to give itself a corporeal body.
* John Dies at the End. Somehow, they are still affected by crosses, prayers and the Bible.
* John Dies at the End. The crude humor might lead you to assume otherwise, but it's definitely horrific and strange.
* John Dies at the End, the plot revolves around a mysterious drug called "Soy Sauce," which gives the user enhanced sensory perception, clairvoyance, and the ability to see monsters and dimensional portals.
* John Dies at the End, the protagonist is driving in the middle of the night with a lot on his mind, and experiences this trope. Fortunately, the guy in the backseat just wants to talk. Unfortunately, the guy brought along something to motivate the protagonist into speaking more freely, and it's thirsty for blood.
* John Dies at the End, the protagonists are heading to a final showdown without really knowing what to expect, and the narrator is armed with a chainsaw. At one point, he wonders whether he could have gotten caught in his situation with a dumber weapon. This is a nod to the earliest version of the story, wherein the narrator is in the same situation, but armed with a sword.
* John Dies at the End, the town becomes global news, but the narrator still refuses to name it.
* John Dies at the End. This gets subverted in the sequel. A Man In Black shows up, and, among other things, he can turn invisible and "sit" in midair as if in an invisible chair. The invisibility trick is just that—it takes years of practice, but there's nothing supernatural about it. The invisible chair? That's magic.
* John Dies at the End, though the erasure isn't perfect. Dave has the vague impression of his group having six people instead of its actual five and realizes that someone in their number has been erased from existence. For all Dave knows, it might have been someone he knew very well, but now he has no memory of them because they never existed.
* John Dies at the End with this scene from the very beginning of the book.
* John dies to save Dean's life, Sam keeps asking Dean if he's all right and tries to get him to express himself, but Dean just refuses to talk about it. When he's alone, however, he smashes his beloved car.
* John Diggle and Felicity Smoak are as close as family. Diggle is very protective

of Felicity, and they are each other's sounding boards when it comes to their personal problems.
* John Dillinger's never participated in any of his bank robberies, but she was present with Dillinger during two police shootouts on other occasions — in Chicago in November 1933, and in St. Paul at the beginning of April 1934.
* John Dillinger was 21 when in September 1924, he and a pool hall buddy named Ed Singleton robbed a Mooresville, Indiana grocer named Frank Morgan. Two days after the attack, Dillinger was arrested, and thinking the judge would be lenient enough to let him off if he pled guilty and apologized, he didn't bother to hire a lawyer. This was a big mistake, as the judge sentenced him to a 10-20 year sentence in Indiana's Pendleton Reformatory. It was in Pendleton that Dillinger met two of the partners who would be by his side during his infamous 1933-1934 bank robbery spree: Harry "Pete" Pierpont, and Homer Van Meter, both of whom were doing time for armed robberies (Van Meter for highway robbery on a train, Pierpont for bank robbery). All three of these guys were soon transferred to the Indiana State Penitentiary in Michigan City, where Dillinger met most of the other men who would be by his side, including Russell Clark, Charles Makley, and John "Red" Hamilton. They all taught him the art of bank robbery. When Dillinger was paroled in May 1933, he immediately started robbing banks in Indiana and Ohio for money that he used to pull off arrangements to smuggle guns into the prison to break out Makley, Pierpont, Clark, and Hamilton.
* John DiMaggio's rap as part of the musical number "This Trinity's Going to War" from "Bender's Big Score", and the beatbox version of the theme song used during the intros for "Spanish Fry" and "Bender Should Not Be Allowed on Television" with Billy West's vocals added for a good measure.
* John DiMaggio with Paolo Buglioni, whose voice is more similar to DiMaggio's.
* John D. Macdonald's extensive chronicles both show, in particularly impressive and plausible detail, both how the innocent victims got taken and how Travis and his best friend and accomplice Meyer work the big con on the con men.
* John D. MacDonald, who normally writes mainstream detective fiction starring
* John Doe, another blossoming deity, makes defensive use of this trope after the crew saves his life in
* John Doe, a woman believes she's having psychic visions of a serial killer, and reveals key details on his methods and location. It turns out that she'd nearly been murdered by the killer herself, and had escaped, but suffered so much blood loss in the process that her brain retained nothing but fleeting memories of her close call.
* John Doe episode "Manifest Destiny." After John decides to take a holiday, a vicar on his flight is poisoned. John must discover the murderer's identity before more people are killed.
* John Doe features a hero that displays ability of knowing everything that can be known about on earth. He's basically a walking and talking magical database.
* John Doe is talking to someone in Farsi, thinking that no one around him understands the language. Doe not only understands it but also knows that the phrase "Bedouin Prince" refers to a ship.
* John Doe, outright stating that the police don't provide them with any challenge.
* John Doe started off with a pilot movie, which sported noticeably better special effects than the series did.
* John does this to Sherlock when Sherlock tells him that his wife falls into his "adrenaline junkie" pattern.
* John Doe the boy and the title character want him to be the father, but he isn't.
* John Doe. The status quo is restored at the end of the episode by another electric shock. Despite this, he still manages to solve the case.
* John Doe time before technology allows for the memories to be "revived" as a fully-functional virtual person.
* John Doe trivial fact, only things like mathematical formulas. Well, until he spent a single day reading the World Book.
* John Doe: Vigilante, Adam McCleish has a collection of ponytails he cut off the young girls he murdered.

* John Doe: Vigilante ends with the S4D vigilantes breaking John Doe out of the courtroom. Technically he is not their boss, he was their inspiration, but given their devotion to him, it seems inevitable that he will end up leading them (if he chooses to).
* John Doe: Vigilante father of three girls and simultaneously very hard to play the scenes for that very same reason.
* John Doe: Vigilante. He caps off his spree by killing the very person who triggered it—the man who murdered his wife and daughter.
* John Doe: Vigilante, John Doe films the process of his killings and sends it to the media. However, the mainstream media edits the films, showing only the execution, not the reason. John Doe then gives the films to a smaller outfit, which publishes them uncut, on the internet. Their head journalist, Sam Foley, rides the wave of popularity surrounding John Doe to his own advantage; parlaying into fame and success. It is strongly implied that John Doe is providing Sam with advance warning of his killings, and that Sam is withholding this information from the authorities.
* John Doe: Vigilante: John Doe's activities inspires other citizens to form a loose alliance called 'S4D' ('Speaker for the Dead'). S4D emulates John Doe and starts extracting vigilante justice in his name. However, S4D tends to be least directed than John Doe himself, and some of their victims are not criminals, such as the lawyers who defended some of John Doe's victims: an act that John Doe expresses regret for in his final interview.
* John Doe: Vigilante, John Doe's 'costume' consists of an expressionless flesh coloured mask and a black hoodie. Because the mask matches his skin, with the hood up, it is not obvious to casual observers that he is wearing a mask.
* John Doe: Vigilante, John Doe's followers, the S4D movement, wear black clothes, white masks and red armbands making them look like a cut-rate S.S.
* John Doe: Vigilante, John Doe's followers, the S4D movement, wear white expressionless masks, that frequently end up spattered with blood during their vigilante activities.
* John Doe: Vigilante, John Doe's targets are all unrepentant criminals who have escaped justice or been let off on a technicality.
* John Doe: Vigilante—child molesters, abusive husbands, culminating in the guy who killed his wife and daughter.
* John Doe: Vigilante, members of the S4D movement start attacking the lawyers who had defended John Doe's targets. In at least one case, they cut out the lawyer's tongue.
* John Doe: Vigilante, one of John Doe's targets is a husband who is bashing his wife. John beats him to death in the laneway behind his house.
* John Doe: Vigilante takes one while awaiting the verdict in his trial, knowing that he's either going to prison for the rest of his life or that he has no life to go back to even if he is acquitted—his wife and daughter were murdered, which spurred his killing spree.
* John Doe: Vigilante: The judge in John Doe's trial is wearing a black robe and no wig, and the barristers are wearing business suits. At a trial in an Australian Supreme Court, the judge should be wearing a red robe and full wig, and the barristers black robes and horsehair wigs.
* John Doe: Vigilante, they were either acquitted of or given lenient sentences for the despicable crimes they had committed.
* Johndoe Vigilante: Used by John doe to murder his last victim after faking a suicide attempt in order to draw the victim in close enough to grab him.
* John Doe: Vigilante who is John Doe's first target has a wall covered in pictures of his past victims: each of which has a smiley face sticker stuck over their head.
* John Dortmunder, John stammers out "John D— Diddums." From then on, despite realizing that it doesn't sound like a real name ("It's Welsh," he'll frequently explain), whenever he needs an alias on short notice he panics and can't think of anything but "John Diddums."
* John Dortmunder short stories by Donald E. Westlake, Dortmunder and his crew tunnel into a bank from a nearby building. They emerge in the middle of another

bank robbery and become part of hostage situation. They ultimately end up using their tunnel to help the hostages escape.
* John Dortmunder, the spectacularly unlucky criminal protagonist of a
* John Ducey played Mr. Kraft's nephew in Season 3's "The Band Episode", before also reappearing as a regular in Season 7 (Leonard).
* John Dunsworth plays main cast member Dave Teagues and his daughter Molly plays Vickie.
* John "Earthquake" Tenta, during his run as a monster heel, did a seated senton which was called the Earthquake Splash. He would often do this over and over even after the match ended, often resulting in his unfortunate opponent having to be carried out on a stretcher.
* John Edward Douglas, founder of the FBI's Criminal Profiling Program and inspiration for several of the trope examples listed above, has written several professional and true-crime books about profiling and his personal experiences with its use. His near-fatal bout of viral encephalitis, while pursuing the Green River Killer case, surely contributed to this trope's assumption that a profiler's work is both emotionally and physically exhausting. If there is a profiler in fiction, chances are he is one of the inspirations for it.
* John Edwards as well, who was reportedly very obsessed with his hair if
* John Egbert and the Goblet of Sick Fires comes out as transmasculine and becomes basically a clone of Dave, matching his exact appearance and mannerisms.
* John Egbert. He not only treats his various friends and allies incredibly well but also constantly tries to make friends with his enemies and the Trolls (who initially start out insulting and annoying the Kids rather than helping them). He almost never starts a fight and is intensely trusting of others; indeed the only two characters he's genuinely antagonistic towards are

* John Egbert ... who happens to have a working knowledge of robotics and nuclear technology, is successful at selectively cloning and breeding frogs to create a perfect god-frog in less than 24 hours, and is the one who both formulated and executed a plan that saved both the kids and the trolls from their impending doom.
* John Elder Robison, examined the first thirty years of his life and the effects of living with Asperger's at a time when it wasn't recognized as a formal diagnosis.
* John Enos once does a fake informercial for his own law firm: the Law Firm of Enos, Enos, and Enos.
* John Esmonde and Bob Larbey's (now little remembered) National Service sitcom
* John E Stith features several levels of Hyperspace in which the universe is progressively smaller and the speed of light decreases with each step. The story is largely concerned with a murder mystery on a spaceship traveling in the level where the speed of light is 10m/s and relativistic effects are a part of everyday life.
* John Fahey: American guitarist who evolved from traditional folk and blues to incorporate Portuguese, Indonesian, Tibetan and Brazilian influences along with weird sound effects and New Age experimentation.
* John Ferrera aka lisanjohn 710 aka what pisses me the fuck off. He is a good person and has good intentions but will curse like a sailor when expressing his opinions and will tell you off if you try to tell him that he can't, he has done more calm review videos and videos with other people talking about wrestling and other topics. He could very easily pass for Pragmatic or Classical most days and Unscrupulous on bad days.
* John fills this role for the pre-Scratch human kids. All the trolls, and all the humans except John, regard John as the leader of the pre-Scratch human team. John insists he's their friend, not their leader, to which everyone's response has been "That's why you're the leader." John is nominally the
* John Finnemore's Double Acts episode "The Goliath Window", Mark the sailor, explaining how he always knows what his phantom limb is doing to Luke the parson, tells him that "it is now making a signal most inappropriate for a parson's parlour". A clearly irritated Luke simply responds "Really? Is it this one, or this

one?"
* John Finnemore's Double Acts, he replies the only address he had; their father's house. His brother has to spell it out for him before he realises that their father would not have passed them on.
* John Finnemore's Double Acts of manipulating Adele into selling sensitive information to a rival company then covertly recording her confession. As Kerry points out afterwards, it's no good to simply ask someone whether they're wearing a wire and take their word for it, you've got to search them.
* John Finnemore's Double Acts with a shared distaste for "horrible smelly diesels". They are overjoyed to receive the news that the locomotive pulling one train has broken down, and been replaced not just with a steam engine, but with a classic steam engine from the Transport Museum because that was the only one available.
* John Finnemore's Souvenir Programme a ghost in this story after all."
* John Finnemore's Souvenir Programme, a man is insisting that the "so-called fire brigade" don't actually do anything about fires, in terms similar to someone attacking "the PC brigade", while a woman tries to explain that this isn't the case, to no avail. Eventually:
* John Finnemore's Souvenir Programme and have her bemoaning her lack of punchlines in her introduction.
* John Finnemore's Souvenir Programme a Rat Sanctuary, because that wasn't a question he'd ever considered before. The wife points out she's been saying this all along.
* John Finnemore's Souvenir Programme: A very odd example in one sketch, where a man suffering the usual difficulty getting through tedious bank security checks turns out to be a robot, who has been lured into a trap to determine he's a robot, for no readily apparent reason. Also, the teller is also a robot, because it takes one to catch one.
* John Finnemore's Souvenir Programme, a woman wants her budgie (killed by the cat) and the cat (killed by choking on the budgie) taxidermied into a tableau of the cat on trial with a jury of mice. When the taxidermist suggests this might unsettle visitors, she says probably not once they've been through the Hall of Ex-Husbands...
* John Finnemore's Souvenir Programme biscuit led to his fellow logicians agreeing that, since no one would take the last biscuit, the penultimate biscuit was the effective last biscuit and so could not be taken. They then follow this line of reasoning all the way back through the packet until none of them can eat any biscuits at all.
* John Finnemore's Souvenir Programme) but is fascinated by the idea of a box for horses.
* John Finnemore's Souvenir Programme case, he was sure they'd get on very well.
* John Finnemore's Souvenir Programme detective, trying to stop shoplifters in a grocery.
* John Finnemore's Souvenir Programme, Ep. 3, gives us this brilliant example. Warning: Any and all attempts at comprehension may result in brain damage.
* John Finnemore's Souvenir Programme: Evidently played straight in one sketch focusing on a match between "United" and "City", then mercilessly skewered afterward with Carrie Quinlan and Margaret Caborn-Smith as commentators on the sketch pointing out how John has no idea how football works, and has clearly just taken what little he knows from overhearing stuff in the pub.
* John Finnemore's Souvenir Programme features the tale of a deadly tortoise stampede:
* John Finnemore's Souvenir Programme for his authentic 21st century costume.
* John Finnemore's Souvenir Programme) from two men named Pratt and Rabbit who meet him at midnight in Greyfriars Kirkyard. He finds them in an open grave and is unconvinced that they're re-burying someone who digs himself out to look for his wee dog. ("We call him ... Greyfriars Body.")
* John Finnemore's Souvenir Programme, he describes how he applied to work a bank, and met with the irascible owner, who immediately gave him a job. And that's how he

became a manager at Finnemore and Finnemore.
* John Finnemore's Souvenir Programme. He tells a story about Queen Victoria's brain, and robot hedgehogs, only at the end to realise he misheard the question.
* John Finnemore's Souvenir Programme his girlfriend to set him one of these. Once she realises he's serious, she challenges him to shoot a panda. When he protests that this is cruel and illegal ("You didn't say 'legal', you said 'possible'"), she instead challenges him to spend ten years in the Arctic, although she's not going to wait for him, because she'd look pretty silly if he died. He doesn't like that idea either and, rather fed up with the whole thing ("You’d do anything for me, so long as it isn’t unpleasant or inconvenient! That’s very good to know!") she asks for a glass of water.
* John Finnemore's Souvenir Programme In series 1 episode 3's Since You Ask Me sketch they use this trope.
* John Finnemore's Souvenir Programme in which recurring interviewer Patsy Straightwoman (Carrie Quinlan) interviews Stanley Meadows (John Finnemore), an artist who only paints "slightly off" Disney characters on the side of ice cream vans. Stanley explains that when the van drivers paint the characters themselves, the results are either wildly off or completely spot on, but it takes real talent to paint characters where the individual components look fine (as opposed to Pluto's nose obviously being too long), but the whole just looks... slightly off. He also deliberately selects a black paint that fades more quickly than the other colours, so that the "slightly off" Goofy is "staring out at you with blank, sightless eyes" after a couple of summers.
* John Finnemore's Souvenir Programme, in which the Evil Queen from Snow White is told by her chancellor that she's wasting the magic mirror, and they can use it to build up the kingdom's finances. His first go is a horse race, but he quickly moves on to the stock market.
* John Finnemore's Souvenir Programme. John says he didn't write it, and Carrie admits she'd just gotten bored. Sketch over.
* John Finnemore's Souvenir Programme-like film director has a chance reunion with a Shakespearean actor who took a minor part in one of his gangster movies. The actor tells the director's PA "It was awfully fun. They cut my head off, you know."
* John Finnemore's Souvenir Programme mid-battle about whether MacDuff was "of woman born" or not ("You have a birthday!") Eventually one of the noblewomen in MacDuff's party kills Macbeth, and MacDuff promises he'll make sure everyone knows her part in it...
* John Finnemore's Souvenir Programme: One sketch has a school trying to come up with a motto. They don't have a lot of luck.
* John Finnemore's Souvenir Programme One sketch revolves around a company whose job it is to provide examples of these for TV shows, with the department head admitting that 95% of the time they just do search engines. The rest of the sketch is them brainstorming ideas that aren't just knock-offs of Google.
* John Finnemore's Souvenir Programme One storyteller sketch has him approached by the Prime Minister to put Queen Victoria's brain in a robot body. The storyteller points out this will happen, then adds he's not going to refuse, he's just saying. Sure enough, Robo-Vic goes on an insane rampage, slicing people in half with giant novelty scissors.
* John Finnemore's Souvenir Programme Parodied, when a bunch of police officers try this, and it doesn't work since their perp knows the routine. So they switch up to Good Cop, Bad Cop, Nasty Cop, Defeatist Cop, Haiku Cop, Holistic Cop, and Truthful Cop. That eventually gets the confession, even if it does eat up a lot of manpower.
* John Finnemore's Souvenir Programme parody. Christopher Muscheer has been established as having a wife and son, but in the future scene, when his son is berating him for neglecting his family, he asks "And what of your sister?" and gets the reply "My sister? You cared so little for my sister you didn't even bother setting her up earlier in the story!"
* John Finnemore's Souvenir Programme parody with the Circus replaced by the Zoo. Which is an actual zoo. Stale beer in a plastic cup from the zoo cafe.
* John Finnemore's Souvenir Programme, Patsy Straightwoman interviews a tricyclist

who won two medals in "that big international sports competition. The one which is like the Olympics, but isn't the Olympics, but happened at the same time as the Olympics, and also let's say in this universe the Olympics don’t exist."
* John Finnemore's Souvenir Programme, Patsy Straightwoman is interviewing Professor Craven, a scientist who has no idea how to simplify his ideas for a lay audience. When she prompts him that sometimes scientists use analogies, we get this:
* John Finnemore's Souvenir Programme play "Ding-Dong the Witch is Dead", they will reluctantly play other songs involving witches, they reserve the right not to play "Wicked Anabella" if it turns out the organiser is lying about the deceased not being named Anabella, and while they are more than happy to play "Always Look on the Bright Side of Life", they are going to stick to the original lyrics, and not the ones the organiser wrote. While we never hear his half of the conversation, it seems pretty clear this trope is in play.
* John Finnemore's Souvenir Programme, season 4 episode 1. Each monkey sung about its own method of avoiding evil ("And although some don't think it wise/To simply cover up your eyes/It's certainly working for me") Of course, the third monkey just went "Mph, mph, mph". As with many modern versions, the point is that, rather than being virtuous, the monkeys are ignoring injustices they could be fighting. ("And if he sees no evil/Maybe there's no evil to see.")
* John Finnemore's Souvenir Programme Season 8 Episode 1, with the ghost of a small business owner, whose unfinished business is his actual business. He therefore cannot pass over until either the company goes bankrupt or it amasses all the money in the world, which is the only win condition he can think of, and one that he acknowledges is impossible.
* John Finnemore's Souvenir Programme, Series 9, Episode 1, Russ has a tattoo of a crocodile's lower jaw. He has an explanation in place that it represents the fact you can hold a crocodile's jaws closed, but not open, symbolising that strength depends on application, but it's actually because he asked the tatooist for the narrowest animal she had, then backed out altogether when she'd just started.
* John Finnemore's Souvenir Programme since nobody treats them kindly, like giving them a biscuit(or three biscuits, one for each head).
* John Finnemore's Souvenir Programme sketch, John plays a diplomat dealing with a very tough team of negotiators. The one in the middle is "slightly to the right of Genghis Khan", the one next to him is "far to the right of Genghis Khan", and the one on other side is, of course, Genghis Khan.
* John Finnemore's Souvenir Programme sketch, the RAF's secret weapon in WWII, that lets them detect German bombers in the dark, isn't radar, it's cats. Except the cats aren't interested. The boffins somehow manage to explain Nazism to them, and this makes things worse, as the cats decide they're in favour of it.
* John Finnemore's Souvenir Programme skit, in which a scientist devotes his life to creating a machine to translate whalesong, only to learn that all they ever say is "Hi! I'm a whale!"
* John Finnemore's Souvenir Programme skit, the mayor of Sodom describes himself as a Sodomite, then clarifies that he means a native of Sodom, then adds that there's nothing wrong with the other kind.
* John Finnemore's Souvenir Programme: Spoofed with one Storyteller sketch, where he's asked to tell them of a murder mystery, but "without all the boring working it out", skipping right to this part.
* John Finnemore's Souvenir Programme (the duke having been dressed as the duchess for reasons she feels it's best not to go into).
* John Finnemore's Souvenir Programme the "scene" to resolve itself humorously, and gets more and more anxious at the lack of a punchline. However, as the boss is out of the office there's nothing to be done, until;
* John Finnemore's Souvenir Programme to get him to come up with an idea for getting it back to her.
* John Finnemore's Souvenir Programme tragedy is "he can't turn it off".
* John Finnemore's Souvenir Programme, two parrots are discussing whether one of them has an unfaithful wife, pausing to repeat the last thing the other one said.

At the end, just when the married parrot has decided to trust her, his friend repeats something she said when they were together...
* John Finnemore's Souvenir Programme. Two women are heard talking about the various irritating/publicly embarrassing proposals they've received from men (through a megaphone in Trafalgar Square, throwing an expensive ring into a gorge, etc.) when Finnemore's voice breaks in:
* John Finnemore's Souvenir Programme uses this fairly regularly, especially in the latest episodes.
* John Finnemore's Souvenir Programme, when the burger bar rep and the film company rep can't figure out which of them is supposed to be paying the other for this.
* John Finnemore's Souvenir Programme, when the page announces Good King Wensensclas has arrived at the peasant's hut, the peasant's response is "Yeah, and I'm the Pope."
* John Finnemore's Souvenir Programme, which is "practically my theme music". The organ breaks into a rather sarcastic rendition of "The Sun Has Got His Hat On".
* John Finnemore's Souvenir Programme who had Snow White murdered by a professional hitman, rather than just sending a huntsman after her.
* John Finnemore's Souvenir Programme, with a couple of them falling under this trope.
* John F. Kennedy and Officer J.D. Tippet, Lee Harvey Oswald was nabbed while sneaking into a movie theater without paying a ticket. The theater manager suspected Oswald might be more than a petty criminal and called the cops.
* John F. Kennedy assassination indicated that his killer, Lee Harvey Oswald, refused to admit his acts, even as he lay dying (after himself being shot by Jack Ruby) in the garage of the Dallas Police Station. (Although one interpretation, where an officer asked the badly wounded Oswald if he'd like to make a statement and he simply nodded his head "no" as he moaned in pain, could be that he was entering shock.)
* John F. Kennedy becomes an avowed socialist as a way of rebelling against his bourgeois family and his controlling father in particular, forming a secret society of local leftist students at his prestigious boarding school, and distributing socialist literature amongst the broader student body. When the revolution happens, Kennedy quickly raises his secret socialist society to work as a local militia, and backed by his fellow students he overthrows the headmaster, and takes control of the local area. Following the victory of the revolution, Kennedy journeys back to the Kennedy Massachusetts estate to confront his father, only to discover that his family, like many other members of the American elite, has evacuated to join Douglas MacArthur's exile government in Cuba. This event inspires Kennedy to decisively distance himself from his family, as he discards his American name and instead adopts the Gaelic version of it, Sean Cinnéide, which becomes his nom de guerre, and later, full legal name.
* John F. Kennedy. First, during her birth, Rosemary was deprived of oxygen, which is generally believed to have changed her from the person she would have been otherwise, leaving her with developmental disabilities and difficulty regulating her emotions. Then, when those emotional difficulties she had as a result of the first incident became unmanageable, doctors convinced her father that a lobotomy would calm her difficult behavior. Instead, the procedure destroyed Rosemary's mental capabilities, leaving her unable to walk, talk, or regulate her basic body functions. (She regained some limited abilities over the years, but was never able to return to anything remotely resembling her previous level of function.)
* John F. Kennedy giving a political speech, and a modern-day politician finishing the same speech.
* John F. Kennedy had won. Of course, TV being a relatively emergent technology that was only just starting to be adopted at the time could have resulted in differences in the demographics of television owners and non-television owners. And, of course, while it might be a poor reason to not vote for someone because they look like a slightly-crazed, paranoid, crook, the fact that Nixon, in fact, turned out to be a slightly-crazed, paranoid, crook is of no little relevance.
* John F. Kennedy. He was a technocratic midcentury corporate executive freshly

recruited from the private sector by the administration. He did have some military experience; he served in the Army Air Force during WWII, as part of a group overseeing planning, logistics, and analysis for the bombing campaign against Japan. However, his concentration on numbers, statistics, and formulae rather than 'soft data' like reports from troops in the field made him less than effective at directing the war effort: He knew that the Americans were dropping thousands of tons of bombs on the VC, and couldn't really understand how they were still fighting.
